DISTRICT CENSUS HANDBOOK
1951

FAIZABAD DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is forty-seven Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh

RAMPUR:
November 25, 1955.

INTRODUCTION

A—The District

1. The district of Faizabad is a fairly regular parallelogram with a projection in the north-east running into the Azamgarh District. It is bounded on the north by the river Ghagra which flows in the district for a distance of 85 miles and separates it from the districts of Gonda and Basti. To the south lies the district of Sultanpur, to the west that of Bara Banki, while the eastern boundary is formed by the districts of Azamgarh and Gorakhpur. The total area of the district is 1,710 square miles and its population in 1951 was 14·82 lakhs. It has 4 tehsils, 11 parganas and 15 thanas.

Topography

2. In its general aspect the district consists of a level plain of a generally uniform character, the only variations in the flatness of the surface being caused by the various streams and drainage channels which run from west to east, and the numerous small depressions in which the surface water collects and which has no adequate natural outlet. It can be divided into two natural divisions, the lowland or *manjha* and the upland. The lowland comprises scattered areas of alluvial land very narrow at some places and rather extensive at others, in the bed of the Ghagra. This area is subject to frequent changes owing to alluvian and diluvian actions of the river. It is marked by large stretches of waste-land in which there is thick wild growth of *jhao* (tamarisk) and *kasehri* (thatching grass) providing haunts for wild animals. The rest of the district is an upland area which is a level plain cut up by a few streams. The vast expanse of cultivation is interspersed with *jhils*, *usar* plains and *dhak* jungles and dotted all over with numerous *abadies* (inhabited sites), mango groves, *mahua* and palm trees.

The rivers Ghagra in the north, Tons in the centre and south-east and Gomti in the south-west and their affluents carry off most of the drainage of the district, but in years of heavy rainfall the lowlying villages especially on the banks of Tons are flooded. In several tracts the drainage is defective, the result being the formation of *jhils* and swamps which occur in all parts of the district.

Soils

3. The prevalent soils of the district are generally a light loam in the level portions of the upland tract, with sand on the higher ground and clay in the depressions. Loam is here called *doras*. Clay is known, as usual, as *matiar*; while sandy soil is called *balua* or the well-known *bhur*. The belt of *balua* lies along the high banks of the Ghagra and Gomti. Below the *balua* belt is the level *doras* plain. The *matiar* soil is scattered all over the upland tract and is found around the *jhils* and numerous depressions. It is most common with southern portions of tehsils Bikapur and Akbarpur where drainage is defective. In the *manjha* the quality of soil varies from good clay alluvium to pure white sand.

Classification of area

4. The figures of the classification of area during the last fifty years are given in Table 2 of Part III of this volume. The portion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	734,480	67·7
Culturable waste (excluding current fallow)	164,324	15·2
Current fallow	24,282	2·2
Forest	..	..
Area not available for cultivation of which—	161,278	14·9
(a) *Covered with water*	*73,953*	*6·8*
(b) *Under sites, roads and buildings*	*51,168*	*4·7*
(c) *Barren*	*36,157*	*3·4*

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total Culturable waste (A+B+C)	**165,989**	**100**
A—Area under culturable waste land not available for immediate cultivation ..	111,802	67·36
(i) Forest under any legal enactment	..	..
(ii) Groves	54,187	33·65
(iii) Forests of timber trees	518	0·31
(iv) Thatching grasses, shrubs and bushes	42,205	25·43
(v) Land kept for grazing	14,892	8·97
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated	5,051	3·04
Of which due to—		
(i) *Kans* growth	33	0·02
(ii) Threshing floors	768	0·46
(iii) Malaria	..	..
(iv) Floods	330	0·20
(v) Lack of drains	12	0·01
(vi) Lack of water	55	0·03
(vii) Distance from *abadi*	235	0·14
(*viii*) Damage from wild animals	..	..
(ix) Other causes	3,618	2·18
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B.'	49,136	29·60

From the above it will appear that of the total area recorded as culturable waste, only 29·6 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 62·3 cents of which 51·2* cents have already been brought under cultivation and only about 3·3 cents can be further brought under the plough after some improvements.

Climate and rainfall

5. The climate of the district is, on the whole, healthy except in the swampy low-lying tracts in the east where malaria sometimes takes a heavy toll and in the congested area on the borders of the Azamgarh District where plague and small-pox generally appear in an epidemic form almost every year.

The average rainfall for the last quinquennium was 41·24 inches. During the last 45 years the rainfall has been less than 17 inches in only one year and has usually been over 32 inches. The average rainfall is slightly higher in the tehsils of Bikapur and Tanda than in the other tehsils. The distribution of the rainfall is more important than the actual amount. A premature cessation of the monsoon will cause serious loss in those parts in which rice is the staple crop, while it also creates a danger of a fodder famine, especially in the southern parts. Some rain usually falls in the winter months.

Irrigation

6. Irrigation is derived from canals, wells and other sources. Of the total irrigated area in 1950-51 the area covered by wells was 62·7 per cent., that by canals was 7·5 per cent. and that from other sources was 29·8 per cent.

Crops

7. More acreage is sown, under the *kharif* than under the *rabi* crops. In 1950-51 the area under *kharif* was 535,451 acres, that under *rabi* was 441,946 acres and that under *zaid* crop was 5,071 acres. The principal *kharif* crop of the district is rice and the principal *rabi* crop is wheat followed by barley and gram. Sugarcane is an important crop of the district. The area under it has risen from 48,439 acres in 1901-02 to 55,699 acres in 1950-51.

*The figure also includes the area classed as current fallow.

B—Analysis of the Statistics

Population : General distribution and density

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per squiare mile)	Land area (in lakhs of acres)	Land area *per capita*
Akbarpur	4·41	819	3·45	0·78
Bikapur	3·49	760	2·95	0·84
Faizabad	3·67	1,033	2·27	0·62
Tanda	3·25	927	2·24	0·69
Faizabad district	*14·82*	*870**	*10·91*	*0·74*

This district though thirty-fourth in order of area is fifteenth in the State in respect of population. Its density (870) is well above the State figure (557). It has not been to a very great extent inflated by the presence of towns and even the rural density is as high as 802, the density of the rural parts of the tehsils being: Akbarpur 788, Bikapur 760, Faizabad 830 and Tanda 851. (*Vide* Tables A-I & E)

Growth of population

2. The population of the district in 1951 was 20·9 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	**1,225,374**	1,100,274	125,100			
1911	**1,154,109**	1,059,156	94,953	**—71,265** (—5·8)	—41,118 (—3·7)	—30,147 (—24·1)
1921	**1,171,930**	1,078,904	93,026	**+17,821** (+1·5)	+19,748 (+1·9)	—1,927 (—2·0)
1931	**1,204,789**	1,096,547	108,242	**+32,859** (+2·8)	+17,643 (+1·6)	+15,216 (+16·4)
1941	**1,319,425**	1,218,918	100,507	**+114,636** (+9·5)	+122,371 (+11·2)	—7,735 (—7·1)
1951	**1,481,796**	1,345,010	136,786	**+162,371** (+12·3)	+126,092 (+10·3)	+36,279 (+36·1)

Between 1901 and 1921 the population of the district recorded a decrease of 4·4 per cent. when that of the State declined by 4·0 per cent. The district had fared badly during 1901—11 due to plague and emigration. In the following decade there was only a small increase in the population : the district undoubtedly suffered less from the influenza epidemic than did the State generally. Since 1921 the population of the district recorded a low increase of 26·4 per cent. as against an increase of 35·5 per cent. in the population of the State during the same period mainly owing to the small increase during 1921—31 due partly to cholera and plague mortality and partly to emigration. During the last decade the population of the district increased by 12·3 per cent. which is slightly above the State average. During this period the highest increase was recorded by tehsil Faizabad (15·5 per cent.), the percentage increase in other tehsils being : Bikapur 8·3 per cent., Akbarpur 13·2 per cent. and Tanda 12·0 per cent. The high increase in tehsil Faizabad was mainly due to the increase in the population of Faizabad-*cum*-Ayodhya city.

Vital Statistics

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial registered birth and death-rates and the natural rate of increase and population

*According to the area given by Surveyor General, it is 867.

growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	18·5	17·8	25·1
1931—40	27·8	27·8	27·9
1921—30	30·9	30·7	21·9
Mean decennial death-rate			
1941—50	14·2	13·8	18·1
1931—40	19·3	19·1	21·4
1921—30	24·8	25·1	22·1
Mean decennial rate of natural increase			
1941—50	4·3	4·0	7·0
1931—40	8·5	8·7	5·5
1921—30	5·2	5·5	—0·2
Mean decennial growth-rate			
1941—50	11·6	9·8	39·6
1931—40	9·1	10·6	—7·4
1921—30	2·8	1·6	15·1

There are large omissions in the registration of births and deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest loss of population during 1921—30 and gain during 1931—40 and 1941—50 on account of balance of migration.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	14,173	71·5
Dysentery or diarrhoea	237	1·2
Respiratory diseases	595	2·0
Plague, cholera and small-pox	2,880	14·5
Others	2,142	10·8

As in the rest of State 'fever' is responsible for a majority of deaths. But fever covers a number of ailments which the reporters are unable to identify. (*Vide* Table I, Part III of this volume)

Migration

4. About 93·1 per cent. of the people enumerated in the district at the census of 1951 were born there, 6·1 per cent. were born in other districts of the State, 0·3 per cent. were born in other parts of India and 0·5 per cent. were born in other countries. Of the immigrants from the districts of the State as many as 41,291 (males 7,327, females 33,964) are from the districts of the same natural division and 49,197 (males 11,497, females 37,718) from other parts of the State. The sex proportion suggests that most of the migration is from the neighbouring districts and is marriage migration. Of 3,942 immigrants from the adjacent States 2,192 (males 1,625, females 567) were from Bihar and 746 (males 519, females 227) from Punjab.

Of the immigrants who have come from territories beyond India 5,481 (males 2,826, females 2,655) were Pakistan-born and 1,612 (males 968, females 644) had their birth-place in other territories. The Pakistan-born are mostly the displaced persons who numbered 5,311 (males 2,706, females 2,605) in the district. Of the immigrants born in other territories 1,338 persons (males 751, females 587) were Burma-born and 205 persons were Nepal-born. The Burma-born are generally the children born in Burma to the former migrants from this State to Burma, who have returned with their families during the last War.

The number of non-Indian nationals in the district was 43. Of them 13 were Nepalese, 5 Chinese, 14 British, 2 Germans, 5 Irish and 4 Americans.

Unfortunately, the figures of emigration are not available. On the balance of migration according to vital statistics, however, the district appears to have lost about 29,000 persons in 1921—30 and gained about 7,000 persons in 1931—40 and 102,000

persons in 1941—50. But it should be borne in mind that the figures include a very large element of registration error. (*Vide* Tables D-IV and D-VI)

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures for the district are exhibited in the marginal table. (Figures of area shown under census years are quinquennial averages for the five years preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down from 59·5 cents in 1921 to 48·7 cents in 1951. The magnitude of this drop is about one-fifth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921	1,171,930	698,185	59·5
1931	1,204,789	700,227	58·1
1941	1,319,425	705,249	53·5
1951	1,481,796	722,658	48·7

Double-cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilisation and better culture. The average quinquennial area sown more than once was 244,203 acres in 1921, 239,144 acres in 1931, 242,381 acres in 1941 and 257,582 acres in 1951. The figures of double crop cultivation *per capita* are as follows :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents ..	17·3	18·4	19·8	20·8
Unirrigated double crop cultivation *per capita* in cents	17·1	18·1	19·5	20·3
Irrigated double crop cultivation *per capita* in cents	0·2	0·3	0·3	0·5

The double crop cultivation *per capita* has been steadily declining since 1921.

Irrigated area *per capita*

7. The average area irrigated in the district was 372,941 acres in 1921, 297,512 acres in 1931, 346,012 acres in 1941 and 343,856 acres in 1951. The average area irrigated more than once was 6,094 acres in 1921, 3,890 acres in 1931, 3,509 acres in 1941 and 3,690 acres in 1951. The figures of irrigation *per capita* are shown below :

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents ..	23·0	26·0	24·4	31·3
Irrigated double crop cultivation *per capita* in cents ..	0·2	0·3	0·3	0·5

The *per capita* irrigated area has decreased since 1941 and is far below that for 1921.

Cropped area

8. During the quinquennium 1916—21, 90·5 per cent. of the cropped area was under food crops and only 9·5 per cent. was under non-food crops. Thirty years after during 1946—51, the cropped area under food crops was 90·1 per cent. and that under non-food crops 9·9 per cent. The proportionate area under different crops between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under						
		Rice	Wheat	Barley	Juar	Maize	Gram	Others
1911—16	**931,470**	27·2	15·6	7·2	1·6	3·4	11·3	33·7
1916—21	**926,717**	28·5	15·6	6·9	1·7	3·2	8·9	35·2
1921—26	**947,135**	29·2	14·3	6·7	1·5	2·4	12·3	33·6
1926—31	**941,417**	30·0	15·7	6·5	1·8	2·6	12·0	31·4
1931—36	**925,123**	28·1	17·4	6·4	1·8	2·5	10·9	32·9
1936—41	**946,564**	28·4	17·0	5·8	1·3	2·4	12·2	32·9
1941—46	**963,954**	28·7	15·4	6·4	1·4	3·0	13·7	31·4
1946—51	**981,812**	29·2	14·8	6·9	1·3	2·6	13·3	31·9

Indigo has completely gone out of cultivation. Its area in 1901-02 was 6,154 acres. Cotton has never been an important crop of the district. The area under sugarcane has increased from 48,439 acres in 1901-02 to 55,699 acres in 1950-51.

Live-stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green-fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes which decreased during 1935—44 from 7·89 lakhs to 6·73 lakhs has recorded an increase during 1944—51 to 7·2 lakhs.

The number of working cattle and buffaloes has increased from 3·1 lakhs in 1944 to 3·6 lakhs in 1951. The number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs which decreased from 163 thousands in 1935 to 150 thousands in 1944 has recorded an increase of 178 thousands in 1951, due apparently to progressive fractionalisation of holdings. The number of carts was 7 thousands in 1935 while it was 11 thousands in 1951. The average net cultivated area per plough works out to 4·1 acres in 1951 as against 4·5 acres in 1920 and the average net cultivated area per pair of working cattle was 4·1 acres in 1951 as against 4·2 acres in 1935.

Breeding cows and she-buffaloes have slightly decreased since 1944 when the figure stood at 195 thousands. It was 194 thousands in 1951. The cows and she-buffaloes in milk per 1,000 of human population work out to 27 and 24 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep which decreased from 47 thousands in 1935 to 34 thousands in 1944 has since then increased to 35 thousands in 1951. Goats which decreased from 158 thousands in 1935 to 102 thousands in 1944 have increased to 105 thousands in 1951.

Horses and ponies which declined from about 9 thousands in 1935 to 6 thousands in 1944 have further decreased to 5 thousands in 1951. Donkeys have slightly increased from 3·6 thousands in 1944 to 3·7 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows:

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
390	96	24	71	25	27

10. To sum up, the population of the district is growing up at the biological natural rate of increase since 1921 but on the other hand the land area *per capita* has been steadily declining. The magnitude of the numerical increase in relation to the proportionately smaller increase in the average area under cultivation is a great strain on the economy of the district.

Villages and towns

11. The district has 2,737 villages and 7 towns. Out of 14·8 lakhs of people who were counted at the census of 1951, 13·4 lakhs were found in the rural areas and 1·4 lakhs in the urban areas i. e., there were 908 persons per 1,000 population who lived in the villages and only 92 of them lived in the towns. The corresponding figures for the State as a whole are: rural 864, urban 136.

The rural population per inhabited village works out to 491. The villages generally do not comprise of a single compact site. There are 10,700 hamlets in the district. The population per hamlet works out to 126. The medium-sized village, with population between 500 and 2,000, is the dominant type in the district. Of the rural population 58·4 per cent. live in such villages, 32·1 per cent. in villages of population under 500 and 9·5 per cent. in villages of population between 2,000 and 5,000.

Towns also vary greatly in number of inhabitants. Of the urban population 77·4 per cent. live in towns of population of 20,000 and over (*viz.*, Faizabad-*cum*-Ayodhya and Tanda) ; 16·9 per cent. in towns of population between 5,000 and 10,000 (*viz.*, Akbarpur and Jalalpur) ; and 5·7 per cent. in towns of population under 5,000 (*viz.*, Bhadarsa and Gosainganj). Faizabad city (including Cantonment which contains about 60·3 per cent. of urban population of the district) has recorded an increase of 43·1 per cent. since 1941. During the same period Tanda has registered an increase of 12·1 per cent. Jalalpur has recorded a significant increase of about 300·6 per cent. whereas Bhadarsa town appears to be declining as its population has gone down by 4·6 per cent. during 1941—51.

Other towns need no special comments. (*Vide* Tables A-III and A-IV)

Occupations: Livelihood pattern

12. Out of the total population of 1,481,796 persons (rural 1,345,010, urban 136,786) 1,247,795 persons (rural 1,234,106, urban 13,689) or 84·2 per cent. depend on agriculture for their means of livelihood and 234,001 persons (rural 110,904, urban 123,097) or 15·8 per cent. depend on non-agricultural sources. The following table gives the

distribution of 100 persons of total, rural and urban population of the district and of Faizabad city :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**84·2**	**68·5**	**8·7**	**6·6**	**0·4**	**15·8**	**5·3**	**3·4**	**0·7**	**6·4**
Rural	91·7	74·9	9·3	7·1	0·4	8·3	*3·0	1·6	0·3	3·4
Urban	10·0	5·7	2·5	0·7	1·1	90·0	28·1	21·4	5·0	35·5
Faizabad city	8·2	2·8	3·3	0·7	1·4	91·8	15·6	23·0	7·1	46·1

The district is one of the predominantly agricultural districts of the State. Here as many as 84·2 per cent. of people are engaged in agriculture as against 74·2 per cent. in the State.

Of the total population of the district 771,395 persons (males 306,101, females 465,294) or 52·1 per cent. are non-earning dependants. The percentage of non-earning dependants in agricultural classes was 51·4 and among non-agricultural population 55·4. It will be seen that in the main they consist of women. The male non-earning dependants are mostly children. 257,184 persons (males 63,801, females 193,383) or 17·3 per cent. of population are earning dependants. Among the agriculturists their proportion is 18·9 per cent. and among the non-agriculturists 9·2 per cent. Agriculture is a family occupation and it provides work to the women and grown up children in the family. The remaining 453,217 persons (males 382,234, females 70,983) or 30·6 per cent. are self-supporting. The proportion among the agriculturists is 29·7 per cent. and among the non-agriculturists 35·4 per cent. Of the self-supporting persons 370,365 (males 313,011, females 57,354) belong to the agricultural classes and 82,852 (males 69,223, females 13,629) belong to the non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of 82,852 self-supporting persons of non-agricultural population 4,504 (rural 3,270, urban 1,234) earn their livelihood from non-productive sources. Of the remaining 78,348 self-supporting persons (rural 38,108, urban 40,240) 2,398 (rural 757, urban 1,641) or 3·1 per cent. are employers, 22,161 (rural 9,331, urban 12,830) or 28·3 per cent. are employees and 53,789 (rural 28,020, urban 25,769) or 68·6 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	239
1—Mining and quarrying	2
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ..	2,053
3—Processing and manufacture—metals, chemicals and products thereof	237
4—Processing and manufacture—not elsewhere specified	785
5—Construction and utilities	230
6—Commerce	1,974
7—Transport, storage and communications	446
8—Health, education and public administration	1,126
9—Services not elsewhere specified	2,908

The principal large scale industry of the district is cold storage. Among the cottage and small scale industries, the principal are handloom cloth weaving (cotton), calico printing, basket-making, *chick* making, hemp ropes and *sutli* and papier mache.

Variation in the livelihood pattern

13. In the district the proportion of population depending on agriculture for their livelihood was 83·1*per cent. in 1951. The unfortunate fact is that the agricultural proportion has increased from 78·6 per cent. in 1921 to 83·1 per cent. in 1951. The figures stood at 80·5 per cent. in 1911 and 63·6 per cent. in 1901. The actual number of persons who depend on agriculture has increased to 1,231,855

*This figure includes earning dependants according to their secondary means of livelihood, while the figure 84·2 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

in 1951 from 921,137 in 1921 i.e., by 33·7 per cent. while the cultivated area has increased by only 3·5 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to be a gradual decline in village arts and crafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in the total population in 1951 was 47·9 per cent. (agricultural 39·8 per cent., non-agricultural 8·1 per cent.) against 55·2 per cent. (agricultural 43·1 per cent., non-agricultural 12·1 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 44·8 per cent. (agricultural 35·5 per cent., non-agricultural 9·3 per cent.) in 1921 to 52·1 per cent. (agricultural 43·3 per cent., non-agricultural 8·8 per cent.) in 1951. All this is an index of increasing unemployment and under employment. It is only by a greater diversion of the population to cottage and other industries and by providing subsidiary occupations to agriculturists that the present disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 266,760 occupied houses in the district—246,153 in villages and 20,607 in towns. That gives an average of 5,464 persons per 1,000 houses or 5·5 persons per house in the rural areas and 6,638 persons per 1,000 houses or 6·6 persons per house in the urban areas.

There were 292,318 households in the district—266,030 in the rural areas and 26,288 in the urban areas. That gives an average of 5,053 persons per 1,000 households or 5·1 persons per household in the rural areas and 5,101 persons per 1,000 households or 5·1 persons per household in the urban areas. The marginal table shows the developments in the size of household since 1921. The rural household has been increasing since 1921 and is slightly smaller than the average State rural household (5·07). The urban household has also registered an increase since 1941.

Census year	Persons per 1,000 households of	
	Rural population	Urban population
1921	4,807	3,880
1931	4,767	4,473
1941	5,011	4,114
1951	5,053	5,101

Out of 5,053 persons in every 1,000 rural households 2,544 are males and 2,509 are females. There is a male excess of 35 in every 1,000 rural households. Out of 5,101 persons in every 1,000 urban households 2,747 are males and 2,354 are females. There again is a male excess of 393 in every 1,000 urban households. The type of migration will account for the difference.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 5,098 persons (males 2,598, females 2,500) in the district. The corresponding figure of the total count is 5,057.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**258**	**479**	**178**	**85**
Rural	252	478	182	88
Urban	311	491	141	57

Medium households are the dominant type both in rural and urban areas.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	664
		Males (widowers)	262
		Females	74
	Wives of heads of households		664
			1,664

		Number in 1,000 households
B	Sons of heads of households	996
	Daughters of heads of households	709
		1,705
C	Male relations of heads of households (other than sons)	604
	Female relations of heads of households (other than daughters)	954
		1,558
D	Persons unrelated to the heads of the households — Males	72
	Females	99
		171
	Grand Total ..	*5,098*

Sons outnumber the daughters of heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

15. In the district as a whole the sex-ratio was 970, i.e., there were 970 females to every 1,000 males. It varies among the tehsils. The highest value was 1,009 in Bikapur Tehsil and the lowest value was 927 in Faizabad. The sex-ratio in other tehsils was 973 in Tanda and 974 in Akbarpur. It appears that Bikapur suffers heavily in male migration.

The sex-ratio is higher in the rural areas than in the urban areas. For the district as a whole the sex-ratio in villages was as high as 986 (mainly due to male migration)while that in towns was only 829.

The corresponding figure of the sex-ratio in the district was 991 in 1921, 975 in 1931 and 993 in 1941.

Age-structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population :

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4 ..	13·2	6·5	6·7	6·6	6·8	6·2	5·5
Boys and girls	5—14 ..	26·3	13·7	12·6	13·7	12·7	13·2	10·9
Young men and women	15—34 ..	30·2	15·7	14·5	15·4	14·4	18·3	15·7
Middle-aged men and women	35—54 ..	21·2	11·1	10·1	11·0	10·2	12·4	9·2
Elderly persons	55 and over ..	9·1	4·2	4·9	4·2	5·0	4·4	4·2

It will be seen that the population is progressive. 39·5 per cent. of it is of age under 15 and only 9·1 per cent. consists of elderly persons (55 and over). Again it may be noted that proportionately larger numbers in the working ages (15—54) are found in the urban areas. This is the effect of migration of workers to the towns from the villages many of whom are unaccompanied by their families. (*Vide* Table C-II)

Marital status

17. Out of every 10,000 persons in the district, there are 5,124 males and 4,876 females*. Among them 2,015 males and 1,354 females are unmarried. If we reckon males and females together the unmarried people are 33·7 per cent. of the population.

Of the males 39·3 per cent. were unmarried, 52·4 per cent. were married and 8·3 per cent. were widowed or divorced. Among the females 27·8 per cent. were unmarried, 58·7 per cent. were married and 13·5 per cent. were widowed or divorced.

Of the married males 16·2 per cent. were of ages below 15, 43·1 per cent. were of ages 15—34, 31·4 per cent. were of ages 35—54 and 9·3 per cent. were of ages 55 and over. Among married females 20·9 per cent. were of ages below 15, 47·4 per cent. were of ages 15—34, 26·6 per cent. were of ages 35—54 and 5·1 per cent. were of ages 55 and over i. e., elderly women.

*The corresponding figures of the total count are 5,076 and 4,924.

Marriage is universal. Among males and females aged 35 years and over only 8·2 per cent. of the males and 0·4 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 21·5 per cent. of the males of ages 0—14 and 31·0 per cent. of the females aged 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 96·66 per cent. of the people returned Hindi, Hindustani or Urdu as their mother-tongue. Of the 14·8 lakhs of people in the district only 3,041 or 0·2 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 2,887 or 94·9 per cent. of those who were bilingual in some Indian langauge. (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district, the number of people belonging to different religions is: Hindus 8,907, Muslims 1,080, Sikhs 10 and Christians 3. Of the 10,000 population in villages the numbers are : Hindus 9,158, Muslims 840, Sikh 1 and Christian 1. Of 10,000 population in urban areas the numbers are : Hindus 6,440, Muslims 3,434, Sikhs 96, Jains 3 and Christians 27. Muslims, Sikhs, Jains and Christians are generally concentrated in the urban areas of the district as is the case in other parts of the State.

There were 255 thousand persons belonging to the scheduled castes in the district. Their number per 10,000 of population works out to 1,720. In villages they are 1,843 for every 10,000 and in the towns their number per 10,000 is only 513. The district had 45 Anglo-Indians. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census of 1951 was 5,311 (males 2,706, females 2,605), a large majority of whom were concentrated in the urban areas. 91·7 per cent. of the displaced persons were from West Pakistan, 0·6 per cent. from East Pakistan and 7·7 per cent. from districts which could not be traced. (*Vide* Table D-V)

Literacy

21. In 1951 the percentage of male literacy was 15·4 in the district while that of female literacy was 2·1. In 1931 the literacy was 7·2 per cent. for males and 0·6* per cent. for females. On January 1, 1951, there were 445 primary schools with enrolment of 37,108. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

1. The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains Statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools" from information specially supplied by District Inspector of Schools.

Processing of Census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural classes—

I—Cultivators of land wholly or mainly owned; and their dependants

II—Cultivators of land wholly or mainly unowned; and their dependants

III—Cultivating labourers; and their dependants

IV—Non-cultivating owners of land, agricultural rent receivers, and their dependants

*The numbers per mille (of the 10 per cent. sample population) of each sex, aged 5 years and over who were returned as literate are as below :

Males		Females	
1951	1931	1951	1931
176	83	23	6

Non-agricultural classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes; with reference to the economic status, as follows :

(i) Self-supporting persons;

(ii) Non-earning dependants; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

> "A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family of household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant.' Each of them should be classed either a 'self-supporting person' or 'an earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a 'non-earning dependant,' if she does not also earn an income, and should be recorded as such."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily, economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", " Employees " and " Independent Workers " have been defined as follows in the Instructions to Enumerators :

An " employer " is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an " employer " merely for that reason.

An " employee " is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An " independent worker " means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies, kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become " employees ".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-returns and have not been smoothed.

Tables D-V(i) and (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

" A displaced person means any person who has entered India having left or being compelled to leave his home in Western Paskistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan ".

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population

Serial number	Tehsil	Area in square miles	Villages	Hamlets	Towns	Occupied houses: Total	Occupied houses: Rural	Occupied houses: Urban
1	2	3	4	5	6	7	8	9
	District Total	*1,704*	*2,737*	*10,700*	*7*	*265,760*	*246,153*	*20,607*
1	Akbarpur	539	890	3,449	2	**78,584**	75,723	2,861
2	Bikapur	460	626	3,676	..	**66,023**	66,023	.. ..
3	Faizabad	355	470	1,891	4	**66,651**	52,175	14,476
4	Tanda	350	751	1,684	1	**55,502**	52,232	3,270

Serial number	Tehsil	Population: Persons: Total	Persons: Rural	Persons: Urban	Males: Total	Males: Rural	Males: Urban	Females: Total	Females: Rural	Females: Urban

given (i) mohalla/ward-wise for urban areas, and (ii) village-wise for rural areas in the District Population Statistics. The figures count are as below.

Serial no.	Tract	Population
1	2	3
4	Tehsil Tanda (Rural)	89,234
	Urban Total	*7,205*
1	Urban Non-city	3,222
2	Faizabad City	3,983

Tables) the original table has now been substituted by the table derived from the second count,
persons who returned themselves as Anglo-Indians,
Males 21, Females 24,
