DISTRICT CENSUS HANDBOOK
1951

SITAPUR DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is forty-five. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh

INTRODUCTION

A—The District

1. The district of Sitapur is bounded on the west and south-west by river Gomti, which flows in an irregular course from north-west to south-east, separating this district from Hardoi. To the east lies Bahraich, the boundary being the great river Ghagra ; to the north is Kheri, the frontier being merely conventional, save in the north-east where it is formed by the Dahawar ; and to the south are the districts of Lucknow and Bara Banki between the Gomti and Ghagra. It has an area of 2,208 square miles and its population in 1951 was about 13·8 lakhs. It has 4 tehsils, 21 parganas and 15 thanas.

Topography

2. The district consists of two main divisions : the upland plain, which comprises the greater portion of the area ; and the eastern lowlands or *Ganjar*. The first of these is a level tract with slight undulations between the various rivers and streams by which it is intersected ; without hills or valleys, devoid of forests and large expanses of water ; well wooded with numerous groves and scattered trees with which it is covered ; and highly cultivated save in those parts where the soil is barren sand or cut up by ravines in the neighbourhood of the streams, or, as in the northern parts, where the rapid growth of coarse jungle grass wages war against the extension of cultivation. The apparent dead level is broken by the streams and the drainage channels, on either side of which the land rises. In places the country between these streams has a defective drainage system, the result being the formation of numerous shallow ponds and *jhils*, which during the rains are full to overflowing, while most of them dry up in the hot weather.

There is a well-marked fall in the slope from the main body of the district to the alluvial plain of the *Ganjar*. The western boundary of this tract is a high and sharply defined bank, under which flows the Kewani in the north, while further south is an abandoned channel of the Chauka. From this bank there stretches eastwards a low plain of stiff clay, cut up by innumerable streams and water-courses, and terminating in the sandy heights which mark the bank of the Ghagra. The whole of this tract is liable to annual inundations. On the east of the Chauka the *kharif* harvest is always precarious and in danger of being swept away by the violence of the stream. These floods in Chauka have from time to time effected considerable alterations in the physical aspect of the country, and the changes would be far greater were it not for the presence of wide expanses of *jhau* or tamarisk jungle which serve as brake to the current and by arresting the loose particles of sand bind the soil together in some degree of consistence.

Soils

3. The whole district is of purely alluvial formation. The deposits left by the rivers in the uplands are usually a fertile loam of varying consistency, which tends towards a stiff clay in the depressions, while the slightest rise above the mean level is at once marked by a corresponding lightness in the nature of the soil and a tendency to *bhur* or sandy land. The latter is most in evidence along the banks of the Gomti and Sarayan. In almost every case the land between the streams presents roughly the same aspects : a fringe of low-lying *tarai* of varying width in the immediate vicinity of the channel and bounded by the high bank, which is crowned by a ridge of light sandy soil broken by ravines and water-courses; and beyond this a level fertile plain extending to the bank of the next river.

Classification of area

4. The figures of the classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	1,033,915	73·2
Culturable waste (excluding current fallow)	158,798	11·3
Current fallow	74,921	5·3
Forest	1,632	0·1
Area not available for cultivation of which—	142,882	10·1
*(a) Covered with water .. ..

1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total Culturable waste (A+B+C)	**160,074**	**100**
A—Area under culturable wasteland not available for immediate cultivation ..	108,947	68·0
(i) Forest under any legal enactment	..	..
(ii) Groves	46,439	29·0
(iii) Forests of timber trees	444	0·3
(iv) Thatching grasses, shrubs and bushes	57,191	35·7
(v) Land kept for grazing	4,873	3·0
B—Area under culturable wasteland available for immediate cultivation but which could not be cultivated	22,206	13·9
Of which due to—		
(i) *Kans* growth	1,746	1·1
(ii) Threshing floors	1,730	1·1
(iii) Malaria	..	..
(iv) Floods	1,667	1·0
(v) Lack of drains	153	0·1
(vi) Lack of water	750	0·5
(vii) Distance from *abadi*	1,190	0·7
(viii) Damage from wild animals	1,035	0·7
(ix) Other causes	13,935	8·7
C—Area under culturable wasteland that can be brought under immediate cultivation after some improvements besides the area given against 'B'	28,921	18·1

From the above, it will appear that of the total area recorded as culturable waste only 18·1 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 91·8 cents of which 80·3* cents have already been brought under cultivation and only about 2·1 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

5. The climate is generally healthy. The lowlying parts on the eastern border have a bad reputation owing to the proximity of moisture to the surface. But it is not so unhealthy as the submontane *tarai* of Kheri and Bahraich. The cold weather is good and bracing. Frosts often occur in the winter. The prevailing winds are from the east during the rains and from the west during the remainder of the year.

The average rainfall for the last quinquennium was about 53·17 inches. During the last forty-five years the rainfall has been less than 20 inches in only two years and is generally over 30 inches. The wettest tehsil of the district is Sitapur.

Irrigation

6. Irrigation is derived from canals, wells and other sources. The number of tube-wells is very small in the district. In 1950-51 the irrigated area from canals covered 67·1 per cent. from wells 4·9 per cent. and from other sources 28·0 per cent.

Crops

7. The acreage under the *kharif* crops is more than that under the *rabi* crops. The area under *kharif* in 1950-51 was 733,465 acres, that under *rabi* 564,640 acres, and that under *zaid* crops 1,764 acres. The principal *kharif* crop is rice, while the principal *rabi* crop is wheat. Much of it is grown in combination with barley and gram. Barley covers a larger area than wheat, but is seldom sown alone, being generally found in combination with either wheat or gram. Sugarcane is an important crop of the district. Its area has increased from 32,921 acres in 1901-02 to 84,497 acres in 1950-51.

B—Analysis of the Statistics

Population : General distribution and density

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Biswan	3·23	579	3·57	1·10
Misrikh	3·26	547	3·81	1·17
Sidhauli	3·42	630	3·47	1·02
Sitapur	3·89	762	3·27	0·84
Sitapur district	*13·80*	*625*	*14·12*	*1·02*

*The figure also includes the area classed as current fallow.

This district though twentieth in order of area, stands sixteenth in the State in respect of population. Its density per square mile is 625 while that of the State is 557. The rural density of the district is 584, the density of the rural parts of the tehsils being : Biswan 553, Misrikh 543, Sidhauli 613 and Sitapur 633. (*Vide* Tables A-I and E).

Growth of population

2. The population of the district in 1951 was 17·4 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	**1,175,473**	1,096,763	78,710			
1911	**1,138,996**	1,064,149	74,847	**—36,477** (—3·1)	—32,614 (—3·0)	—3,863 (—4·9)
1921	**1,089,481**	1,006,175	83,306	**—49,515** (—4·3)	—57,974 (—5·4)	+8,459 (+11·3)
1931	**1,167,139**	1,093,575	73,564	**+77,658** (+7·1)	+87,400 (+8·7)	—9,742 (—11·7)
1941	**1,293,554**	1,206,735	86,819	**+126,415** (+10·8)	+113,160 (+10·3)	+13,255 (+18·0)
1951	**1,380,472**	1,276,210	104,262	**+86,918** (+6·7)	+69,475 (+5·8)	+17,443 (+20·1)

Between 1901 and 1921, the population of the district recorded a decrease of 7·3 per cent. when that of the State decreased by 4·0 per cent. only. The district appears to have suffered much more from the epidemics (including the influenza of 1918-19) during this period than did the State generally. Since 1921, it recorded an increase of 26·7 per cent. against an increase of 35·5 per cent. in the population of the State during the same period. The increases during 1931—41 and 1941—51 have been below the State average.

The variation in the population of the tehsils during 1941—51 is shown in the marginal table. The increase in the population of the district is well below the State average (11·8 per cent.). The increase is spread evenly over the tehsils except in case of tehsil Biswan which has recorded a decrease of 1·0 per cent.

Tehsil	Percentage variation 1941—51
Sitapr District ..	*+6·7*
Biswan ..	—1·0
Misrikh .	+9·8
Sidhauli .	+8·7
Sitapur ..	+9·5

Vital Statistics

3. Births and deaths mainly account for the trends in the population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial birth and death-rates and the calculated natural increase and the population growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	**23·1**	22·4	31·2
1931—40	**33·5**	33·5	33·4
1921—30	**35·3**	36·1	24·3
Mean decennial death-rate			
1941—50	**16·0**	15·7	20·1
1931—40	**22·9**	22·8	23·2
1921—30	**25·0**	25·4	19·6
Mean decennial rate of natural increase			
1941—50	**7·1**	6·7	11·1
1931—40	**10·6**	10·7	10·2
1921—30	**10·3**	10·7	4·7
Mean decennial growth-rate			
1941—50	**6·5**	5·6	18·3
1931—40	**10·3**	9·8	16·5
1921—30	**6·9**	8·3	—12·4

There are large omissions in the registration of births, as well as deaths, and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest a loss on account of migration during 1921—30, 1931—40 and 1941—50.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	17,975	83·9
Dysentery or diarrhoea	192	0·9
Respiratory diseases	162	0·8
Plague, cholera and small-pox	1,045	4·9
Others	2,036	9·5

As in the rest of the State 'fever' is responsible for the majority of deaths. But fever covers a large number of ailments which the reporters are unable to identify. (*Vide* Table I, Part III of this volume).

Migration

4. About 93·6 per cent. of the people enumerated in the district at the census of 1951 were born there, 6·0 per cent. were born in the other districts of the State, 0·2 per cent. were born in other parts of India, and 0·2 per cent. were born in other countries. Of the immigrants from the districts of the State, as many as 33,911 (males 8,228, females 25,683) were from the other districts of the same natural division, and 49,280 (males 15,628, females 33,652) were from the other parts of the State. The sex proportion suggests that most of the migration is marriage migration. Of the 2,085 (males 1,261, females 824) immigrants from the adjacent States, 707 (males 426, females 281) are from Rajasthan, 546 (males 331, females 215) are from Punjab, 574 (males 384, females 190) are from Bihar and 115 (males 40, females 75) are from Madhya Pradesh. Of the immigrants who have come from territories beyond India, 2,043 (males 1,131, females 912) were born in Pakistan and 256 (males 107, females 149) had their birth-place in other territories. The Pakistan-born are the displaced persons who numbered 1,804 in the district. Of the immigrants born in other territories, 231 (males 95, females 136) are Nepal-born.

Of the 36 non-Indian nationals, 19 were Nepalese, 8 British, 3 Afghans, 3 Portugese, 2 Americans and 1 Pakistani.

Unfortunately, the figures of emigration are not available. On the basis of the vital statistics, however, the district appears to have lost about 38,000 persons during 1921—30, 5,000 persons during 1931—40, and 7,000 persons during 1941—50. But it should be borne in mind that these figures include a very large element of registration error and are only indicative of trends. (*Vide* Tables D-IV and D-VI).

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures for the district are exhibited in the marginal table. (Figures of area shown under the census years are the quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down from 92·5 cents in 1921 to 73·8 cents in 1951. The magnitude of this drop is about one-fifth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921 ..	1,089,481	1,007,302	92·5
1931 ..	1,167,139	922,573	79·1
1941 ..	1,293,554	979,464	75·7
1951 ..	1,380,472	1,018,644	73·8

Double-cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yield can be brought about by more double-cropping, more irrigation, better fertilization and better culture. The average quinquennial area sown more than once was 263,615 acres in 1921, 229,519 acres in 1931, 249,886 acres

in 1941, and 267,762 acres in 1951. The figures of double-crop cultivation *per capita* in cents are as below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents	19·4	19·3	19·7	24·2
Unirrigated double crop cultivation *per capita* in cents ..	19·2	19·1	19·5	24·0
Irrigated double crop cultivation *per capita* in cents	0·2	0·2	0·2	0·2

The double crop area *per capita* has been almost stationary during 1941—51 but the area *per capita* in 1951 is far below that in 1921.

Irrigated area *per capita*

7. The average area irrigated in the district was 178,316 acres in 1921, 124,929 acres in 1931, 167,125 acres in 1941, and 150,733 acres in 1951. The average area irrigated more than once was 1,734 acres in 1921, 2,307 acres in 1931, 2,246 acres in 1941, and 3,040 acres in 1951.

The figures of irrigation *per capita* are shown in the table below:

Particulars	Years			
	1951	1941	1931	1921
Irrigated single-crop cultivation *per capita* in cents	10·7	12·7	10·5	16·2
Irrigated double-crop cultivation *per capita* in cents	0·2	0·2	0·2	0·2

The irrigated area *per capita* which recorded an increasing trend during 1931—41 has decreased during 1941—51. The irrigated area *per capita* in 1951 is again far below that in 1921.

Cropped area

8. The proportionate area under food crops has been decreasing during the quinquennium 1916—21, 93·4 per cent. of the cropped area was under food crops and 6·6 per cent. under non-food crops. Thirty years after during 1946—51 only 86·8 per cent. of the cropped area was under food crops and 13·2 per cent. under non-food crops.

The proportionate area under different crops between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	1,272,364	14·7	18·1	11·2	0·7	6·0	3·2	12·6	33·5
1916—21	1,232,591	18·4	16·6	11·3	0·6	5·3	2·7	10·3	34·8
1921—26	1,260,675	17·8	15·1	11·6	0·5	3·8	1·6	16·7	32·9
1926—31	1,154,568	17·7	16·8	11·0	0·5	2·8	5·5	12·7	33·0
1931—36	1,200,557	12·3	20·3	8·7	0·6	3·5	8·6	13·0	33·0
1936—41	1,228,136	16·2	20·0	7·3	0·4	2·6	6·6	14·4	32·5
1941—46	1,276,539	15·3	19·5	8·7	0·7	3·7	5·9	13·6	32·6
1946—51	1,293,348	20·4	18·3	10·7	0·7	2·5	2·5	13·0	31·9

The cultivation of linseed and cotton has been declining and opium has completely gone out of cultivation. In 1901-02, the area under linseed was 5,134 acres and that in 1950-51 was only 1,894 acres. In 1901-02, the area under cotton was 1,162 acres, and that in 1950-51 was only 76 acres. In 1901-02, the area under opium was 18,375 acres ; in 1950-51 it was nil. Sugarcane is an important crop of the district. The area under it in 1901-02 was 32,921 acres ; in 1950-51 it was 84,497 acres.

Live-stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green-fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III, the total number of cattle and buffaloes has been continuously decreasing since 1935, and now stands at 8·84 lakhs.

The number of working cattle and buffaloes in the district was 3·36 lakhs in 1935, 3·60 lakhs in 1944 and 3·62 lakhs in 1951. The number of ploughs is steadily increasing since 1930 when the figure stood at 152·7 thousands. In 1951 it was 178·3 thousands.

This is apparently due to the progressive fractionalization of holdings. The number of carts also started rising since 1920 and now stands at 54·1 thousands. The average net cultivated area per plough works out to 5·8 acres in 1951 as against 6·7 acres in 1920, and the average net cultivated area per pair of working cattle works out to 5·7 acres in 1951 as against 5·8 acres in 1935.

Breeding cows and she-buffaloes have increased from 2·77 lakhs in 1944 to 2·91 lakhs in 1951. The cows and female-buffaloes in milk per 1,000 of human population were about 47 and 28 respectively. Owing to the poor milk yield, the share of milk per head is only a few ounces per day.

The number of sheep has been decreasing since 1925 when they were 34·8 thousands. Now they stand at 16·1 thousands. Goats have been decreasing since 1935 and now they stand at 2·03 lakhs.

The number of horses and ponies has been declining since 1935 and now stands at 11·1 thousands. Donkeys have also declined from 2·5 thousands in 1935 to 1·7 thousands in 1951.

Poultry has increased from 23·6 thousands in 1944 to 26·9 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of livestock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
467	174	12	147	19	23

10. To sum up, the population of the district is growing at the biological natural rate since 1921 but on the other hand, the land area *per capita* the double crop area *per capita* and the irrigated area *per capita* are steadily declining. There is, at the same time, no evidence that crop yield per acre has increased. In these circumstances, the increase in the population is a great strain on the economy of the district and an outlet is evidently imperative for the increasing numbers.

Villages and towns

11. The district has 2,328 villages and 7 towns. Of the 13·8 lakhs of people who were counted at the census of 1951, 12·8 lakhs were found in villages and 1·0 lakh in towns, i.e., there are as many as 924 people per thousand of the population who live in rural areas and only 76 of them live in towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 548. The villages do not necessarily comprise of a single compact site. There are 7,673 hamlets in the district. The population per hamlet is only 166. The medium-sized village—with inhabitants numbering between 500—2,000—is the dominant type in the district. Of the rural population 68·0 per cent. live in such villages, 27·1 per cent. of the rural population live in villages of population under 500; and 4·9 per cent. live in villages of population between 2,000—5,000.

Towns vary in number of inhabitants more widely than villages. Of the urban population, 42·6 per cent. live in the town of population of 20,000 and over (viz., Sitapur) ; 38·5 per cent. live in towns of population between 10,000—20,000 (viz., Biswan, Khairabad and Laharpur); 14·6 per cent. live in towns of population between 5,000—10,000 (viz., Tambaur and Mahmudabad); and 4·3 per cent. live in the town of population under 5,000 (viz., Misrikh-*cum*-Nimsar)

It is significant to note that Sitapur, Biswan and Laharpur have registered an increase of 26·0 per cent., 18·3 per cent. and 8·0 per cent. respectively since 1941. Khairabad, Mahmudabad and Misrikh-*cum*-Nimsar appear to be declining towns. (*Vide* Tables A-III and A-IV)

Occupations : Livelihood pattern

12. Out of the total population of 1,380,472 (rural 1,276,210, urban 104,262) 1,158,814 (rural 1,140,352, urban 18,462) or 83·9 per cent depend on agriculture for their means of livelihood and 221,658 (rural 135,858, urban 85,800) or 16·1 per cent. depend on non-agricultural sources. The following table shows the distribution of 100 persons of the total rural and urban population of the district under the various livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	83·9	73·8	5·9	2·6	1·6	16·1	5·4	2·9	0·4	7·4
Rural	89·4	78·7	6·3	2·8	1·6	10·6	4·1	1·5	0·2	4·8
Urban	17·7	13·0	2·1	0·4	2·2	82·3	20·2	20·4	2·9	38·8

It is obvious that the district is one of the predominantly agricultural districts of the State. Here as many as 83·9 per cent. of the people depend on agriculture as against 74·2 per cent. in the whole State.

Of the total population of the district 822,617 persons (males 277,735, females 544,882) or 59·6 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in agricultural population works out to 59·5 and in non-agricultural population to 60·2 per cent. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 109,182 persons (males 35,945, females 73,237) or 7·9 per cent. of the population are earning dependants. Among the agriculturists the proportion is 8·6 per cent. and among non-agriculturists 4·3 per cent. The remaining 448,673 persons (males 428,496, females 20,177) or 32·5 per cent. of the population are self-supporting persons. Their proportion among agriculturists works out to 31·9 per. cent. and among non-agriculturists to 35·5 per cent. Of the self-supporting persons 369,934 (males 356,635, females 13,299) belong to agricultural classes and 78,739 (males 71,861, females 6,878) to non-agricultural classes. On the average one self-supporting person maintains two non-earning dependants.

Of the 78,739 self-supporting persons belonging to non-agricultural classes 2,204 persons (rural 1,451, urban 753) earn their livelihood from non-productive sources. Of the remaining 76,535 self-supporting persons (rural 51,328, urban 25,207) 1,316 (rural 431, urban 885) or 1·7 per cent. are employers, 16,998 (rural 7,741, urban 9,257) or 22·2 per cent. are employees and 58,221 (rural 43,156, urban 15,065) or 76·1 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	222
1—Mining and quarrying	20
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof	2,337
3—Processing and manufacture—metals, chemicals and products thereof ..	147
4—Processing and manufacture—not elsewhere specified	701
5—Construction and utilities	193
6—Commerce	1,588
7—Transport, storage and communications	270
8—Health, education and public administration	762
9—Services not elsewhere specified	3,760

The principal large scale industries of the district are sugar, glass, distilleries and plywood. The principal cottage industries are *durries*, agriculture implements, iron castings, weights, balances and cane-crushers, etc., *chick* making, ropes and *ban* of *moonj* and *bhabhar* and smoking tobacco.

Variation in the livelihood pattern

13. In the district the population dependent on agriculture was 83·5* per cent. The unfortunate fact is that the agricultural proportion has been increasing ever since 1911. The corresponding proportions were 70·6 per cent. in 1911 and 78·9 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 1,153,674 in 1951 from 859,378 in 1921 or by 34·2 per cent. when the cultivated area has increased only by 1·1 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to be a gradual decline in village arts and crafts. The cumulative result is a fall in proportion of workers and a corresponding rise in dependency. The proportion of workers in total population in 1951 was only 40·4 per cent. (agricultural 33·6 per cent., non-agricultural 6·8 per cent.) against 52·8 per cent. (agricultural 41·4 per cent., non-agricultural 11·4 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 47·2 per cent. (agricultural 37·5 per cent., non-agricultural 9·7 per cent. in 1921 to 59·6 per cent. (agricultural 49·9 per cent., non-agricultural 9·7 per cent.) in 1951. All this is an index of increasing unemployment and under-employment. It is only by the diversion of population to cottage and other industries and by providing subsidiary occupations to the agriculturists that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 229,043 occupied houses in the district—211,752 in villages and 17,291 in towns. That gives an average of 6,027 persons per 1,000 houses or 6·0 persons per house in the rural areas and 6,030 persons per 1,000 houses or 6·0 persons per house in the urban areas.

*The figure includes earning dependants according to their secondary means of livelihood while the figure 83·9 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

There were 288,718* households in the district—262,959* in villages and 25,759 in towns. That gives an average of 4,853 persons per 1,000 households or 4·9 persons per household in the rural areas and 4,048 persons per 1,000 households or 4·0 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household which has been increasing till 1941 has remained stationary since then and is smaller than the average State rural household (5·07). The urban household has also registered a decrease since 1941.

Census year	Persons per 1,000 households of	
	Rural population	Urban population
1921	4,740	3,805
1931	4,704	4,747
1941	4,853	5,145
1951	4,853	4,048

Out of 4,853 persons in every 1,000 rural households 2,604 are males and 2,249 are females. There is a male excess numbering 355 in every 1,000 rural household. Out of 4,048 persons in every 1,000 urban households 2,231 are males and 1,817 are females. There is a male excess numbering 414 in every 1,000 urban households.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,674 persons (males 2,506, females 2,168) in the district. The corresponding figure for the total count is 4,781.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**360**	**431**	**151**	**58**
Rural	357	437	148	58
Urban	399	357	189	55

Medium households are the dominant type in the villages whereas the small households are more numerous in the towns.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	627
		Males (widowers)	287
		Females	86
	Wives of heads of households	.. ..	627
			1,627
B	Sons of heads of households	.. ..	897
	Daughters of heads of households	.. ..	657
			1,554
C	Male relations of heads of households (other than sons)	.. ..	574
	Female relations of heads of households (other than daughters)	..	732
			1,306
D	Persons unrelated to the heads of the households	Males ..	121
		Females ..	66
			187
		Grand Total ..	*4,674*

Sons outnumber the daughters of heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

15. In the district as a whole the sex-ratio was 860, i.e., there were 860 females to every 1,000 males. It varied among the tehsils. The lowest value was 852 in Sidhauli and the highest value was 866 in Misrikh. The ratio was 859 in Biswan and 863 in Sitapur.

The sex-ratio is smaller in towns than in villages. For the district as a whole the sex-ratio in the villages was 864 while that in towns was only 814.

The corresponding figure of sex-ratio for the district was 873 in 1921, 876 in 1931 and 877 in 1941.

*See footnote to Table C-I on page no. 54.

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately : **Age-structure**

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4 ..	12·4	6·3	6·1	6·3	6·0	6·5	6·4
Boys and girls	5—14 ..	22·7	12·4	10·3	12·3	10·2	12·9	11·2
Young men and women	15—34 ..	33·5	17·8	15·7	17·8	15·7	18·3	15·0
Middle-aged men and women	35—54 ..	22·3	12·9	9·4	13·0	9·5	12·5	8·7
Elderly persons	55 and over ..	9·1	4·9	4·2	4·9	4·3	5·0	3·5

It will be seen that the population is progressive. 35·1 per cent. of the population is of age under 15 and only 9·1 per cent. of it consists of elderly persons. (*Vide* Table C-II)

17. Out of 10,000 persons in the district there are 5,436 males and 4,564 females.* Among them 2,484 males and 1,584 females are unmarried. If we reckon males and females together the unmarried people are 40·7 per cent. of the population. **Marital status**

Of the males 45·7 per cent. were unmarried, 47·2 per cent. were married and 7·1 per cent. were widowed or divorced. Among the females 34·7 per cent. were unmarried, 53·0 per cent. were married and 12·3 per cent. were widowed or divorced.

Of the married males 1·4 per cent. were of ages below 15, 46·7 per cent. were of ages 15—34, 39·9 per cent. were of ages 35—54 and 12·0 per cent. were of ages 55 and over. Among the married females 5·5 per cent. were of ages below 15, 59·3 per cent. were of ages 15—34, 29·5 per cent. were of ages 35—54 and 5·7 per cent. were elderly women.

Marriage is universal. Among males and females aged 35 years and over only 7·5 per cent. of the males and 0·4 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent though it is not very common. 1·9 per cent. of the males of ages 0—14 and 8·2 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

18. About 99·9 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken the main are Punjabi (0·05 per cent.) and Gujarati (0·05 per cent.) Of the 13·8 lakhs of people in the district only 1,186 or 0·09 per cent. were bilingual (in an Indian language). (*Vide* Table D-I) **Languages**

19. Of the 10,000 population of the district the number of people belonging to different religions is : Hindus 8,349, Sikhs 6, Jains 2, Muslims 1,640 and Christian 3; of the 10,000 people in the villages the numbers are : Hindus 8,587, Sikhs 3, Jain 1 and Muslims 1,409 ; and of the 10,000 population in towns the numbers are : Hindus 5,432, Sikhs 49, Jains 11, Muslims 4,479 and Christians 29. Muslims, Sikhs, Jains and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State. **Religion and special groups**

There were 417 thousand persons belonging to scheduled castes. Their number per 10,000 of population works out 3,021. In the villages they are 3,231 for every 10,000 and in the towns their number per 10,000 is 459 only. In the district there were 17 Anglo-Indians. (*Vide* Tables D-II and D-III)

20. The number of displaced persons in the district at the Census was 1,804 (males 986, females 818). Most of them were concentrated in the urban areas. Of their total population in the district 88·4, per cent. came from West Pakistan, 0·4 per cent. from East Pakistan and 11·2 per cent. from the districts which could not be traced. (*Vide* Table D-V) **Displaced persons**

21. The percentage of male literacy in 1951 was 10·5 while that of females was 1·7. As compared to this the percentage of male literacy in 1931 was 4·6 and that of females 0·6†. On January 1, 1951, there were 609 primary schools in the district with an enrolment of 47,218. (*Vide* Table D-VII) **Literacy**

*The corresponding figures for the total count are 5,376 and 4,624.

†The number per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literate are as below :

Males		Females	
1951	1931	1951	1931
116	54	22	7

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables.

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

Processing of Census data

2. The census data presented here has been derived from the census slips by a process of sorting compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned; and their dependants

II—Cultivators of land wholly or mainly unowned; and their dependants

III—Cultivating labourers; and their dependants

IV—Non-cultivating owners of land; agricultural rent receivers; and their dependants

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents this tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise) while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

The Economic Table—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supportitng' person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a ' non-earning dependant '. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant'. Each of them should be classed either a 'self-supporting person' or ' an earning dependant ' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a 'non-earning dependant', if she does not also earn an income, and should be recorded as such ."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include " unpaid family workers " or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting persons who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

> An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.
>
> An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers.'
>
> An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees.")

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-returns and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of this table a "displaced person" has been defined as follows :

> "A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population

Serial number	Tehsil	Area in square miles	Villages	Hamlets	Towns	Occupied houses: Total	Occupied houses: Rural	Occupied houses: Urban
