DISTRICT CENSUS HANDBOOK

1951

TEHRI-GARHWAL DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is thirty seven. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
September 30, 1955.

INTRODUCTION

A—The District

1. On August 1; 1949, the former princely state of Tehri-Garhwal merged in Uttar Pradesh and for purposes of administration it was constituted into a separate district of the same name. It is bounded on the north by the State of Himachal Pradesh and the territory of Tibet ; on the east and south by Garhwal and on the west by Dehra Dun. The district has an area of 4,522 square miles and its population in 1951 was 4·12 lakhs. It has 4 tehsils, 11 parganas and 70 thanas.*

Topography

2. The district lies entirely in the Himalayas and contains a tangled series of ridges with innumerable spurs separated by narrow valleys. The general direction of the main ridges is from north-east to south-west, radiating from a lofty series of peaks on the border of Tibet which vary in height from 20,000 to 23,000 feet above sea level. This district contains the sources of both the Ganga and Yamuna, and these two rivers receive the whole drainage. The Ganga rises in a glacier called Gaumukh, at a height of 13,570 feet and at first bears the name of Bhagirathi. A large affluent called the Jahnavi rises in Tibet and joins the Bhagirathi at Bhaironghati. The Bhagirathi flows south-west and then south-east and joins the Alakhnanda at Deo Prayag, after which the combined stream is called the Ganga. The Alakhnanda and Ganga form part of the boundary between Garhwal district and Tehri. West of the lofty peak of Bandarpunch rises the Yamuna, which flows south-west, and then forms the western boundary of the district. The Supin rises north of the same peak, and after receiving the Rupin assumes the name of Tons, which ultimately joins the Yamuna. Yamunotri and Gangotri near the sources of the large rivers, are important places of pilgrimage.

Soils

3. The soil is very thin on most hill sides and is alluvial. Cultivation resembles that in the districts of Garhwal and Almora. It is practically confined to terraces on hill sides and to small alluvial areas in river beds.

Classification of area

4. The figures of classification of area during the last two years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentages
Cultivated area	94,407	3·3
Culturable waste (excluding current fallow)	244,000	8·5
Current fallow	951	..
Forest	1,775,986	61·7
Area not available for cultivation	764,656	26·5

The total land area cultivated and cultivable (including current fallow) in the district is about 339 thousand acres. It works out to 82·4 cents *per capita* of which 23·1† cents have already been brought under cultivation. It may be noted, however, that the figures are only conventional estimates.

Climate and rainfall

5. The climate resembles that of Garhwal district. It is exceedingly diversified and ranges from tropical heat to severe cold. The river valleys can be said never to possess a good climate. The intense damp cold and mist is succeeded by considerable heat as the day advances and the resultant conditions are extremely favourable to fever. Snow falls as low as 4,000 feet in the winter.

. The figures of rainfall are not available. Generally speaking the maximum falls occur at the two points where a general rise in elevation takes place, namely the foot of the hills and the foot of the snows. The rains usually break earlier than in the plains.

Irrigation

6. Irrigation is derived from moderately small rivulets by means of channels along the contour line of the hills. The figures of irrigation are not available.

Crops

7. In the greater part of the district there are two harvests *rabi* and *kharif*. The chief crops of the *rabi* are wheat and barely and that of *kharif* rice, *jhangora* and *mandua*. Potatoes are also largely grown.

*The revenue and police administration in the district is of different pattern from the rest of the State.

†The figure also includes the area classed as current fallow.

B—Analysis of Statistics

Population : General distribution and density

1. The district though third in respect of area stands forty-ninth in respect of population. On account of the mountainous nature of the country, and large forest areas the density stands low at 91. The land area *per capita* calculates to 7·04 acres. There are no important towns in the district which are likely to inflate its density and even the rural density is as high as 90. Formerly Tehri-Garhwal was not divided into tehsils. Now there are four tehsils, their population in lakhs being : Deo Prayag 1·29, Pratapnagar 0·91, Rawain 1·06 and Tehri 0·86. (*Vide* Tables A-I and E.)

Growth of population

2. The population of the district during the last fifty years has recorded an increase of 53·2 per cent. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. only. The table below exhibits the variation in the total, rural and urban population during the last five decades :

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	**268,885**	268,885	..			
1911	**300,819**	300,819	..	**+31,934** (**+11·9**)	+31,934 (+11·9)	..
1921	**318,414**	318,414	..	**+17,595** (**+5·8**)	+17,595 (+5·8)	..
1931	**349,573**	349,573	..	**+31,159** (**+9·8**)	+31,159 (+9·8)	..
1941	**397,369**	397,369	..	**+47,796** (**+13·7**)	+47,796 (+13·7)	..
1951	**412,047**	404,897	7,150	**+14,678** (**+3·7**)	+7,528 (+1·9)	+7,150

Population in this district has increased steadily at all enumerations. Between 1901 and 1921 it recorded an increase of 18·4 per cent. when that of the State decreased by 4·0 per cent. It did not suffer from the epidemics of 1901—11 and it undoubtedly suffered much less from the influenza of 1918-19 than did the State generally. The steady increase continued during 1921—31 and 1931—41, which was slightly above the rate of the State as a whole. But during 1941—51 it registered an increase of only 3·7 per cent. as against an increase of 11·8 per cent. in the population of the State. This small increase was not due to any loss on account of epidemics or disease. There is considerable cold weather migration from the district to the plains below. This population had not yet returned when the last enumeration was recorded. The small increase during 1941—51 accounts for the low increase of 29·4 per cent. in the population of the district since 1921 against an increase of 35·5 per cent. in the population of the State.

Vital Statistics

3. Births and deaths mainly account for the trends in the population growth. Migration also is a factor though of the least importance in the district. But the figures of births and deaths are not available for this district. From the conditions prevailing, however, it can be said that the district has a high survival rate owing to the low death-rate.

Migration

4. Tehri-Garhwal is one of the few districts of the State which gain practically no population from outside. The proportion of home-born in this district was as high as 98·5* per cent. of the people enumerated in the district at the census of 1951. Only 0·9 per cent. were born in other districts of the State, 0 4 per cent. were born in other parts of India and 0·2 per cent. were born in other countries. Of the immigrants from the districts of the State, 3,000 (males 1,000, females 2,000) are from the districts of the same natural division and 688 (males 492, females 196), are from other parts of the State. Of 1,425 immigrants from adjacent States, 1,221 (males 938, females 283) are from Himachal Pradesh and 120 (males 88, females 32) from Punjab.

Of the immigrants who have come from territories beyond India, 270 (males 179, females 91) were Pakistan-born and 383 (males 341, females 42) had their birth-place in other territories. The Pakistan-born are generally the displaced persons who numbered 223. (males 137, females 86) in the district. Of the immigrants born in other territories 376 persons were Nepal-born.

The number of non-Indian nationals in the district was 26. All of them were Nepalese

*See foot note to Table D-IV.

Unfortunately the figures of emigration are not available. It is a known fact, however, that there is a considerable cold weather migration from the district to the plains below.

Growth of population and expansion of agriculture

5. Unfortunately an analysis of the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period is not possible. The figures for cultivated area are only conventional estimates and are also incomplete, and therefore, any comparison is not feasible. It appears, however, that extra population has been provided for chiefly by an increased cultivated area * but at the same time owing to the limited expansion of cultivation emigration has also increased. The likelihood is that owing to the limited possibilities of expansion of agriculture the future increases in population will prove to be a strain on the economy of the district and as a consequence emigration will further increase.

Villages and towns

6. The district has 2,533 villages and 6 towns. Out of 4·1 lakhs of people 4·0 lakhs were found in the villages and 0·1 lakhs were found in the towns, i.e. there were 983 persons per 1,000 population who lived in rural areas and only 17 persons lived in the urban areas. The corresponding figures for the State as a whole were : rural 864, urban 136.

The villages are small and have compact site. The rural population per inhabited village works out to 160. Of the rural population, 91·0 per cent. live in small villages of population under 500, 7·8 per cent. live in villages of population between 500—2,000 and 1·2 per cent. live in villages of population between 2,000 and 5,000.

All the urban population of the district lives in towns of population under 5,000 (viz. Tehri, Narendranagar, Uttar Kashi, Deo Prayag, Muni-ki-Reti, Kirtinagar). All these places were treated as towns for the first time at the census of 1951.

Occupations: Livelihood pattern

7. Out of the total population of 412,047 (rural 404,897, urban 7,150) 379,250 persons (rural 377,918, urban 1,332) or 92·0 per cent. depend on agriculture for their means of livelihood and 32,797 persons (rural 26,979, urban 5,818) or 8·0 per cent. depend on non-agricultural sources. The following table gives the distribution of 100 persons of total, rural and urban population of the district under the different livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**92·0**	**90·1**	**1·6**	**0·2**	**0·1**	**8·0**	**3·4**	**0·6**	**0·2**	**3·8**
Rural	**93·3**	91·4	1·6	0·2	0·1	**6·7**	3·3	0·4	0·2	2·8
Urban	**18·6**	17·5	0·8	..	0·3	**81·4**	7·3	14·8	0·2	59·1

It is obvious that the district is predominantly agricultural. Here as many as 92·0 per cent. of the people depend on agriculture as against 74·2 per cent in the whole State.

Of the total population of the district 164,030 persons (males 79,575, females 84,455) or 39·8 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 40·0 and that among non-agricultural population to 38·1. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 132,642 persons (males 19,491, females 113,151) or 32·2 per cent. of the population are earning dependants. Among the agriculturists their proportion is 33·0 per cent. and among the non-agriculturists their proportion is 22·5 per cent. Agriculture is a family occupation and it provides work to grown-up children in the family. The remaining 115,375 persons (males 97,605, females 17,770) or 28·0 per cent. are self-supporting persons. Their proportion among agriculturists is 27·0 per cent. and among non-agriculturists 39·4 per cent. of the self-supporting persons 102,455 (males 85,562, females 16,893) belong to the agricultural classes and 12,920 (males 12,043, females 877) belong to the non-agricultural classes. On an average a self-supporting person maintains one non-earning dependant.

Of the 12,920 self-supporting persons of non-agricultural population 810 persons (rural 350, urban 460) earn their livelihood from non-productive sources. Of the remaining 12,110 self-supporting persons (rural 10,062, urban 2,048) 146 (rural 116, urban 30) or 1·2 per cent. are employers, 3,726 (rural 2,545, urban 1,181) or 30·8 per cent. are employees and 8,238 (rural 7,401, urban 837) or 68·0 per cent. are independent workers.

*The cultivated area was 94,407 acres in 1949-50 and 1950-51. Figures for the period prior to it are not available.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	765
1—Mining and quarrying	9
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ..	1,083
3—Processing and manufacture—metals, chemicals and products thereof	818
4—Processing and manufacture—not elsewhere specified	1,637
5—Construction and utilities	277
6—Commerce	736
7—Transport, storage and communications	404
8—Health, education and public administration	1,837
9—Services not elsewhere specified	2,434

Among the large scale industries, there is none worth the name in the district. Among cottage and small scale industries the principal are woollen tweeds, *pankhies*, *Thulmas*, blankets and *chulkas*, etc.

Variation in the livelihood pattern

8. In this district the proportion of population depending on agriculture for their means of livelihood was 91·2* per cent. in 1951. The unfortunate fact is that the agricultural proportion had been increasing ever since 1901 and only in this census the process appears to have been arrested. The figure stood at 87·4 per cent. in 1901, 92·0 per cent. in 1911 and 94·6 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 375,781 in 1951 from 301,430 in 1921, i.e. by 24·7 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. The proportion of workers in the total population in 1951 was only 60·2 per cent. (agricultural 54·4 per cent., non-agricultural 5·8 per cent.) against 67·3 per cent. (agricultural 63·7 per cent., non-agricultural 3·6 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 32·7 per cent. (agricultural 30·9 per cent., non-agricultural 1·8 per cent.) in 1921 to 39·8 per cent. (agricultural 36·8 per cent., non-agricultural 3·0 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by a diversion of the population to cottage and other industries and by supplying subsidiary occupations to agriculturists that the present disequilibrium in the economy of the district can be rederessed. (*Vide* Tables B-I, B-II, and B-III)

Houses and households

9. There were 76,580 occupied houses in the district—75,205 in villages and 1,375 in towns. That gives an average of 5,384 persons per 1,000 houses or 5·4 persons per house in rural areas and 5,200 persons per 1,000 houses or 5·2 persons per house in urban areas.

There were 85,964 households in the district—84,366 in villages and 1,598 in towns. That gives an average of 4,778 persons per 1,000 households or 4·8 persons per household in the rural areas and 4,181 persons per 1,000 household or 4·2 persons per household in the urban areas. The marginal table shows the developments in the size of household since 1921. The rural household has decreased since 1941, and is smaller than the average State rural household (5·07).

Census year	Persons per 1,000 households of	
	Rural Population	Urban Population
1921 ..	4,656	..
1931 ..	4,694	..
1941 ..	5,556	..
1951 ..	4,778	4,181

Out of 4,778 persons in every 1,000 rural households 2,260 are males and 2,518 are females. There is a female excess numbering 258 in every 1,000 rural households. Out of 4,181 persons in every 1,000 urban households, 2,532 are males and 1,649 are females. There is a male excess of 883 in every 1,000 urban households. The type of migration will account for the difference.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,781 persons (males 2,305, females 2,476) in the district. The corresponding figure for the total count is 4,767.

*The figure includes earning dependants according to their secondary means of livelihood while the figure 92·0 in paragraph 7 includes earning dependants according to their principal means of livelihood and hence the difference.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**380**	**396**	**155**	**69**
Rural	376	397	157	70
Urban	581	349	47	23

Medium households are the dominant type in the villages but small households are more numerous in the towns.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	710
		Males (widowers) .. .	159
		Females	131
	Wives of heads of households		710
			1,710
B	Sons of heads of households		910
	Daughters of heads of households		679
			1,589
C	Male relations of heads of households (other than sons)		509
	Female relations of heads of households (other than daughters)		952
			1,461
D	Persons unrelated to the heads of households	Males	17
		Females	4
			21
		Grand Total	*4,781*

Sons outnumber the daughters of heads of households. The latter leave the home of their parents after marriage. Female relatives (other than daughters) outnumber the male relatives (other than sons). Such females are, generally, those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

10. In the district as a whole the sex-ratio was 1,095, i.e. there were 1,095 females to every 1,000 males. It varies among the tehsils. The highest value was 1,201 in Pratapnagar and the lowest value was 993 in Rawain. The sex-ratio in other tehsils was 1,143 in Deo Prayag and 1,052 in Tehri.

The sex-ratio is higher in the rural areas than in the urban areas. For the district as a whole the sex-ratio in villages was 1,107 (on account of male migration) while that in towns was only 590.

The corresponding figure of sex-ratio in the district was 1,035 in 1921, 1,017 in 1931 and 976 in 1941.

Age structure

11. The number in each age-group in the district is shown below as a percentage of the total, rural and urban population :

Age-group		Total Population			Rural Population		Urban Population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children ..	0—4	**11·8**	**5·6**	**6·2**	5·6	6·3	4·5	4·6
Boys and girls	5—14	**19·9**	**9·5**	**10·4**	9·4	10·5	12·4	7·5
Young men and women ..	15—34	**33·5**	**15·3**	**18·2**	15·1	18·2	26·7	13·4
Middle-aged men and women ..	35—54	**24·6**	**13·2**	**11·4**	13·2	11·5	15·2	7·9
Elderly persons ..	55 and over	**10·2**	**5·2**	**5·0**	5·2	5·0	4·9	2·9

It will be seen that the population is progressive. 31·7 per cent. of the population is of age under 15 and 10·2 per cent. of it consists of elderly persons (i.e. 55 and over). (*Vide* Table C-II,)

Marital status

12. Out of every 10,000 persons in the district, there are 4,881 males and 5,119 females* : Among them 2,104, males and 1,678 females are unmarried. If we reckon males and femles together, the unmarried people are 37·8 per cent. of the total population.

Of the males 43·1 per cent. were unmarried, 52·9 per cent. were married and 4·0 per cent. were widowed or divorced. Of the females 32·8 per cent. were unmarried, 53·0 per cent. were married and 14·2 per cent. were widowed or divorced.

Of the married males 0·5 per cent. were of ages below 15, 40·4 per cent. were of ages 15—34, 43·6 per cent. were of ages 35—54 and 15·5 per cent. were of ages 55 and over. Among married females 2·5 per cent. were of ages below 15, 61·8 per cent. were of ages 15—34, 30·8 per cent. were of ages 35—54 and 4·9 per cent. were of ages 55 and over.

Marriage is universal. Among males and females aged 35 years and over only 7·7 per cent. of males and 0·6 per cent. of females were found to be unmarried. Most of the females are married before they attain the age of 25. Child marriage is not very common. Only 0·9 per cent. of the males of ages 0—14 and 4·0 per cent. of females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

13. About 99.2 per cent. of the people of the district returned Pahari as their mother-tongue. Among other mother-tongues the important were Hindi (0·2 per cent.), Urdu (0·07 per cent.) and Hindustani (0·06 per cent.). Of the 4·12 lakhs of the people in the district 91,771 persons or 22·3 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 91,575 or 99·8 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

14. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 9,939, Muslims 51, Sikhs 7 and Christians 3. Of 10,000 population in villages the numbers are : Hindus 9,962, Muslims 37 and Christian 1. Of 10,000 population in the towns the numbers are : Hindus 8,609, Muslims 891, Sikhs 346, Christians 154. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State.

There are 21,000 people belonging to Scheduled Castes in the district. Their number per 10,000 of population works out to 514. In villages they are 518 for every 10,000 and in the towns their number per 10,000 is only 264. In this district there was only one Anglo-Indian. (*Vide* Table D-II and D-III)

Displaced persons

15. The number of displaced persons in the district at the Census was 223 (males 137, females 86), a large majority of whom were concentrated in the urban areas. 97·8 per cent. of the displaced persons were from West Pakistan and 2·2 per cent. from districts which could not be traced. (*Vide* Table D-V)

Literacy

16. In 1951 the percentage of male literacy was 22·8 in the district while that of female literacy was 1·0. In 1931, the literacy was 11·4 per cent. for males and 0·4 per cent. for females†. On January 1, 1951, there were 378 primary schools with an enrolment of 15,019. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables.

II—Village, Town, Pargana and Thana Statistics.

III—Miscellaneous Statistics.

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains Statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Agricultural Statistics", except statements no. 1—rainfall and 4—irrigated areas for which figures are not available has been prepared from the Annual Season and Crop Reports and Table 2, "List of Primary Schools" , from information specially supplied by District Inspector of Schools.

---

*The corresponding figures of the total count are 4,773 and 5,227.

†The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literate are as below :

Males		Females	
1951	1931	1951	1931
259	130	15	4

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economics characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural classes—

I—Cultivators of land wholly or mainly owned; and their dependants

II—Cultivators of land wholly or mainly unowned; and their dependants

III—Cultivating labourers, and their dependants

IV—Non-cultivating owners of land; agricultural rent receivers; and their dependants

Non-agricultural classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables.

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables.

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes; with reference to the economic status, as follows :

(i) Self-supporting persons;

(ii) Non-earning dependants; and

(iii) Earning dependant

These were defined in the Instructions to Enumerators as follows :

> "A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family of household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether

he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant.' Each of them should be classed either a 'self-supporting person' or 'an earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a 'non-earning dependant,' if she does not also earn an income, and should be recorded as such."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;
(ii) Persons living principally on pensions, remittances, scholarships and funds ;
(iii) Inmates of alms-houses and recipients of doles ;
(iv) Beggars and vagrants ; and
(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", " Employees " and " Independent Workers " have been defined as follows in the Instructions to Enumerators :

An " employer " is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an " employer " merely for that reason.

An " employee " is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as employers.

An " independent worker " means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes " employee ". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become " employees ").

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age returns and have not been smoothed.

Tables D-V(i) and (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

" A displaced person means any person who has entered India having left or being compelled to leave his home in Western Paskistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan ".

PART I
