DISTRICT CENSUS HANDBOOK
1951

BANARAS DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is fourteen. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
March 31, 1955.

INTRODUCTION

A—The District

1. The district of Banaras is bounded on the west by the Allahabad District, on the north-west and north by Jaunpur, on the north-east and east by Ghazipur, on the south by Mirzapur and on the south-east by the State of Bihar, separated by the Karamnasa river. The district as now constituted after the merger of the former Banaras State, has a total area of 1,965 square miles and its population in 1951 was 19·8 lakhs. It has 4 tehsils, 22 parganas and 25 thanas.

Topography

2. The whole district, except for tehsil Chakia, forms part of the Gangetic plain which may be divided into two main tracts, one being the level upland plain known as the *uparwar* and the other the *tarai*, or moist lowlands in the basin of the Ganga. The main difference between these two tracts is to be found in the slope and level of the country. Chakia tehsil contains large areas of hilly jungle and is part of the Vindhyan Plateau.

The rivers Ganga, Banganga, Varuna, Gomti, Nand, Hathi, Karamnasa, Garai and Chandraprabha mainly form the drainage system of the plains in the district. The most prominent physical feature of the district is the river Ganga itself. Its course is a succession of bold and almost semi-circular curves on the outside of which the bank is usually high and abrupt, while in the inside its place is taken by a shelving stretch of sand, generally sterile or producing nothing beyond thatching grass, but occasionally covered with a rich and fertile deposit left behind by the annual floods. The portion of the district to the west of the Ganga is well drained, while there is a considerable area in Chandauli to the east which is not directly served by rivers. North of the Garai river in this tehsil lies a large stretch of low country with no outlet for the surface water with the single exception of the small stream Lambuia. In this tract the water collects in large *jhils* and swamps, and in years of heavy rainfall a number of villages are inundated. Some portions of the clay tracts of Banaras tehsil also suffer from defective drainage.

Soils

3. In the western half the level country possesses for the most part a good and fertile loam soil of fair consistency, varied on the subordinate water-sheds by a lighter variety known locally as *bhur sawai*, while on the Ganga bank and at other elevated spots it degenerates into *bhur* or almost pure sand. In the depressions, on the other hand, the soil stiffens into a heavy clay known by the ordinary name of *matiyar*. This clay in which the sole staple of any importance is rice, is mainly confined to certain clearly marked tracts which are characterised by inadequate drainage resulting in the formation of numerous lakes and *jhils*. The chief clay tract are to be found chiefly in the valley of the Nand. There is also a well-defined clay land in the centre and north of pargana Athganwan and in the south-east of Kol Aslah. In the Chandauli tehsil, loam is again the predominating soil; but the proportion of *bhur sawai* and *bhur* is much less and that of clay is very much greater than in the western parts of the district. The southern tracts of Dhus and Majhwar are almost wholly clay and the country here is liable to suffer severely from floods from the Garai and other streams. In Narwan the most easterly pargana of the district the soil is principally *karail* and this also occurs in the narrow strips along the edge of the Ganga. It is dark in colour and closely resembles the *mar* or black cotton soil of Bundelkhand, containing much alumina and splitting into cracks and fissures when dry. Mention should also be made of *usar* land which are to be seen here and there throughout the district, especially in the clay tracts of Chandauli. The soil is highly impregnated with saline matter, frequently making its appearance in the form of *reh*. The proportion of *usar* is really very small and there is now little land in the district considered too poor for rice cultivation, it is nothing uncommon to see patches of rice growing here and there about an *usar* plain, indicating that the tract is in process of reclamation.

Classification of area

4. The figures of the classification of area during the last fifty years are given in Table 2 of part III of this Volume. The proportion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	805,297	61·2
Culturable waste (excluding current fallow)	124,246	9·5
Current fallow	44,380	3·4
Forest	200,000	15·2
Area not available for cultivation of which—	141,085	10·7
(*a*) *Covered with water*	60,121	4·6
(*b*) *Under sites, roads and buildings*	38,559	2·9
(*c*) *Barren*	42,405	3·2

The figures in the above table regarding culturable waste taken from Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a

detailed enquiry through the district officers regarding the nature of this area in each district. The following analysis of the area resulted from the enquiry :

Particulars	Area (in acres)	Percentage
Total, culturable waste (A+B+C)	**98,407**	**100**
A—Area under culturable waste land not available for immediate cultivation ...	60,125	61·10
(i) Forest under any legal enactment	21	0·02
(ii) Groves	30,784	31·28
(iii) Forests of timber trees	...	...
(iv) Thatching grasses, shrubs and bushes	29,070	29·54
(v) Land kept for grazing	250	0·26
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated—	20,264	20·59
Of which due to—		
(i) *Kans* growth	355	0·36
(ii) Threshing floors	467	0·47
(iii) Malaria	...	...
(iv) Floods	182	0·19
(v) Lack of drains	1,557	1·58
(vi) Lack of water	9,365	9·52
(vii) Distance from *abadi*	2,653	2·70
(viii) Damage from wild animals	24	0·02
(ix) Other causes	5,661	5·75
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B.'	18,018	18·31

From the above it will appear that of the total area recorded as culturable waste only 18·31 per cent was really capable of being brought under immediate cultivation after some improvements.

The Total land area cultivated and cultivable including current fallow in the district is about 974 thousands acres. The land area cultivated and cultivable *per capita* works out to 49·2 cents of which 42·9 cents have already been brought under cultivation and only about 0·9 cents can be further brought under the plough after some improvements. The soils are no doubt fertile, but the pressure over land is also excessive. In fact saturation point has been reached in respect of utilisation of land for cultivation.

Climate and rainfall

5. The average rainfall for the last quinquennium was 48·4 inches. During the last 50 years the rainfall has been less than 30 inches in only one year, viz., 1908-09, and has been usually over 30 inches. The wettest year with 68·33 inches rain during the last 50 years has been 1948-49.

The climate of the district resembles that of the eastern districts generally, being of a moist and relaxing character except in the cold weather. The latter is much shorter than in the western parts of the State but is of the same nature as elsewhere, the winter months being cool, dry and bracing. Frosts are occasionally registered but seldom do much harm or are of great intensity. The climate of lowlying portions of the Chandauli tehsil is not wholesome and from time to time epidemics of cholera and other diseases visit the city and rural tracts.

Irrigation

6. Prior to the merger of the former Banaras State in the district the irrigation was almost carried out from wells and a very small area was irrigated from other sources, such as lakes, tanks, etc. There were no canals and tubewells in the former Banaras District. The former Banaras State had some irrigated area served by canals and reservoirs. In 1950-51 the irrigated area from wells covered 82·2 per cent by Government canals 13 per cent., by reservoirs 0·9 per cent and by other sources 3·9 per cent.

Crops

7. More acreage is sown under *kharif* crops than under *rabi* crops. The area under *kharif* in 1950-51 was 583,878 acres, that under *rabi* crops 432,402, acres and that under *zaid* crops 3,236 acres. The principal *kharif* crop is rice while the principal *rabi* crop is barley followed by gram.

B—Analysis of the Statistics

Population : General distribution and density

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Banaras	10·43	1,715	3·82	0·37
Chandauli	4·32	848	3·26	0·76
Bhadohi	3·89	929	2·68	0·69
Chakia	1·15	241	3·03	2·65
Banaras District	*19·79*	*990o*	*12·79*	*0·65*

o According to the area figures supplied by the Surveyer General of India the density works out to 1007.

This district though 24th in order of area stands 7th in respect of population. The district density is far above the State average (557) and is one of the highest in the State, being the third highest after Lucknow and Ballia. It has been affected by the presence of the large city of Banaras. The rural density of the district is only 791 persons per square mile, the density of the rural parts of the tehsils being : Banaras 1,154, Bhadohi 880, Chandauli 820 and Chakia 234. Banaras is the extremely fertile tehsil of the district while Chakia is a part of the plateau proper and contains large areas of hilly jungle. It is also to be noted that the district as a whole has got one of the lowest figures of land area *per capita*. (*Vide* Tables A-I and E).

Growth of population

2. The growth of population in the district during the last fifty years has been phenomenal. The population of the district in 1951 was 53·6 per cent. higher than what it was fifty years ago. Compared to this the increase in the population of the State during the corresponding period has been only 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades.

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901	**1,287,770**	1,062,684	225,086			
1911	**1,294,468**	1,077,456	217,012	+6,698 (+0·5)	+14,772 (+1·4)	—8,074 (—3·6)
1921	**1,314,891**	1,090,968	223,923	+20,423 (+1·6)	+13,512 (+1·3)	+6,911 (+3·2)
1931	**1,407,650**	1,159,607	248,043	+92,759 +(7·1)	+68,639 (+6·3)	+24,120 (+10·8)
1941	**1,670,057**	1,372,820	297,237	+262,407 (+18·6)	+213,213 (+18·4)	+49,194 (+19·8)
1951	**1,978,634**	1,563,087	415,547	+308,577 (+18·5)	+190,267 (+13·9)	+118,310 +(39·8)

A noteworthy feature is that between 1901 and 1921 the population of the district recorded an increase of 2·1 per cent. when that of the State decreased by 4·0 per cent. During 1901—11, plague in the district had been moderately severe but it escaped the Malaria epidemic of 1908. Influenza of 1918-19 was also less severe in the district than in most parts of the State and in spite of the mortality caused by it, an increase (though small) was recorded for the decade 1911—21. In the post—1921 period abnormal deaths due to epidemics did not occur or were prevented from occurring and the population of the district recorded an increase of 50·5 per cent. since 1921 against an increase of 35·5 per cent. in the population of the State during the same period.

The variation in the population of the tehsils during 1941—51 is shown in the marginal table. The increase in the population of the district has been well above the State average (11·8 per cent.). The greatest increase is in tehsil Chakia followed by that in tehsil Banaras. The latter chiefly reflects the growth of Banaras city.

Tehsil	Percentage variation 1941—51
Banaras district	*+18·5*
Banaras	+21·5
Chandauli	+15·2
Bhadohi	+13·3
Chakia	+22·4

Vital Statistics

3. Births and deaths mainly account for the trends in population growth. Migration is also a factor, though of lesser importance. The following table gives the mean decennial registered birth and death rates and the calculated natural increase rates and population growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate—			
1941—50	**26·3**	21·9	40·3
1931—40	**35·9**	32·4	48·2
1921—30	**35·2**	31·9	47·1
Mean decennial death-rate—			
1941—50	**20·6**	13·8	41·8
1931—40	**24·3**	18·2	46·0
1921—30	**29·3**	23·3	51·3
Mean decennial rate of natural increase—			
1941—50	**5·7**	8·1	—1·5
1931—40	**11·6**	14·2	2·2
1921—30	**5·9**	8·6	—4·2
Mean decennial growth-rate—			
1941—50	**18·0**	13·9	30·8
1931—40	**18·1**	16·2	24·9
1921—30	**6·5**	7·2	4·2

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death rates have fallen during the last decade.

The figures of natural increase and growth-rate suggest some gain of population by migration during 1921—30 and a considerable gain during 1931—40 and 1941—50. Banaras city being a centre of pilgrimage attracts people from all corners of India.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	15,534	56·4
Dysentry and diarrhoea	1,077	3·9
Respiratory diseases	1,640	5·9
Plague, cholera and small-pox	1,910	6·9
Others	7,404	26·9

As in the rest of the State, 'fever' is responsible for a majority of the deaths. But fever covers a number of ailments which the reporters are unable to identify. Deaths from plague, cholera and small-pox are quite high. (*Vide* Table I, Part III of this volume).

Migration

4. Migration appears to have always contributed to the growth of population of the district. About 91 per cent. of the people enumerated in the district at the census of 1951 were born there, 6·4 per cent were born in the other districts of the State, 2·2 per cent. were born in other parts of India and only 0·7 per cent. came from other countries. Of the immigrants from the districts of the State as many as 76,818 (males 28,480, females 48,338) were from the other districts of the same natural division and 49,562 (males 14,967, females 34,595) were from other parts of the State. Most of the migration from the neighbouring districts is marriage migration. Of 29,904 immigrants from the adjacent States, 23,236 (males 8,095, females 15,141) were from Bihar, 3,075, (males 2,057, females 1,018) were from Punjab and 1,685 (males 945, females 740) were from Rajasthan. The movement to the city of Banaras from Bihar (males 4,095, females 2,547) appears to be of the semi-permanent type and nearly in half the number of cases men are unaccompanied by their families. The remainder of the migration from Bihar is mostly marriage migration.

Of the immigrants who have come from territories beyond India, 11,885 (males 7,324, females 4,561) were born in Pakistan and 2,183 (males 1,224, females 959) had their birth-place in other territories. The Pakistan-born are the displaced persons who numbered 9,112 in the district. Of the immigrants born in other territories 1,947 (males 1,092, females 855) were Nepal-born.

Of the 611 non-Indian nationals 497 were Nepalese, 49 British, 15 Malayan and the rest belonged to other countries.

Figures of emigration are unfortunately not available. According to the Vital Statistics the district appears to have gained 6,357 persons during 1921—30, 72,732 persons during 1931—40 and 163,721 persons during 1941—50 on the balance of migration. It should, however, be borne in mind that the figures contain a large element of registration error and are only indicative of trends. (*Vide* Tables D-IV and D-VI).

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation during the same period. The figures for the district* are exhibited in the marginal table. (Figures of area shown under census years are quinquennial averages for the five years ending with the crop year corresponding to the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down to 38·4 cents in 1951 from 52·9 cents in 1921. The magnitude of this drop is about one-fourth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921	901,312	646,685	52·9
1331	1,016,378	524,686	51·6
1941	1,218,629	533,756	43·8
1951	1,461,674	560,655	38·4

Double cropped area *per capita*

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilisation and better culture. The average (quinquennial) area sown more than once was 118,359 acres in 1921 for the district. It slightly increased to 137,095 acres in 1931. There was substantial increase to 151,644 acres in 1941. In 1951 there was again a substantial increase to 168,152 acres. The figures of double crop cultivation *per capita* in cents are as below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents	11·5	12·5	13·5	13·1
Unirrigated double crop cultivation *per capita* in cents ...	11·3	12·3	13·8	12·9
Irrigated double crop cultivation *per capita* in cents ...	0·2	0·2	—0·3	0·2

*The figures are for the old district of Banaras as comparative figures for the former Banaras State which has merged in the district are not available. The figures in paragraph 6, 7, and 8 are also for the old district of Banaras.

It is obvious that the double crop area *per capita* has also not kept pace with the growth of population and is steadily declining.

Irrigated area *per capita*

7. The average area irrigated in the district was 186,968 acres in 1921. The figures were 155,847 acres in 1931, 197,429 acres in 1941 and 177,891 acres in 1951. The average area irrigated more than once was 2,215 acres in 1921, 2,175 acres in 1941 and 3,075 acres for 1951.

The figures of irrigation *per capita* are shown in the table below :

Particulars	year			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents. ...	12·0	16·0	15·6	20·5
Irrigated double crop cultivation *per capita* in cents. ...	0·2	0·2	—0·3	0·2

The trend is towards a decline.

Cropped area

8. There has been almost no change in the cropping pattern of the district. During the quinquennium 1916—21 90·4 per cent of the cropped area was under food crops and 9·6 per cent of it was under non-food crops. Thirty years after, during 1946—51, the cropped area under food crops was 89·4 per cent. and that under non-food crops was 10·6 per cent.

The proportionate area under different crops in the district between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	**579,632**	21·0	5·9	19·2	3·0	3·4	2·6	9·2	35·7
1916—21	**595,044**	23·1	5·7	16·8	2·7	3·4	2·5	10·2	35·6
1921—26	**598,802**	23·8	6·3	15·9	2·6	3·1	1·9	12·3	34·1
1926—31	**661,781**	23·6	6·4	15·2	2·7	2·7	2·5	12·8	34·3
1931—36	**651,921**	22·8	6·8	16·8	2·9	3·0	2·3	11·0	34·4
1936—41	**685,400**	22·9	6·8	14·4	2·4	2·8	2·4	11·5	36·8
1941—46	**699,686**	22·9	5·5	15·1	2·3	3·1	3·1	13·5	34·5
1946—51	**712,251**	27·3	5·7	14·8	2·0	2·5	2·3	12·7	32·7

Indigo and opium are the two non-food crops which have gone out of cultivation. In 1901-02 the area under Indigo and opium was 368 and 4,780 acres, respectively ; no figure under indigo was reported since 1924-25 and the area under opium was only 113 in 1950-51. Sugarcane and hemp have recorded a considerable rise. The area under sugar-cane has risen considerably since 1930, with the establishment of sugar factories.

Live-Stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green-fodder crops. They have, therefore, to be correlated not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of part III the total number of cattle and buffaloes, which had been decreasing from 1935 up to 1944 has during 1944—51 recorded an increase. The number of working cattle and buffaloes in the district also showed a similar trend. The number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs has gone up since 1944 due apparently to progressive fractionalization of holdings. The number of carts which increased between 1920 and 1930 recorded a decrease between 1930 and 1944. In 1951 it slightly increased. The average net cultivated area per plough works out to 5·6 acres in 1951 and the average net cultivated area per pair of working cattle works out to 5·5 acres in 1951.

The number of breeding cows and she-buffaloes was 230 thousands in 1951. The cows and female buffaloes in milk per 1,000 of human population were 29 and 20 respectively. Owing to the poor milk yield, the share of milk per head is only a few ounces per day.

The number of sheep and goats in 1951 was about 117 and 139 thousands respectively. The number of horses and ponies was about 4 thousands and that of donkeys about 5 thousands. The number of poultry was about 63 thousands.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
283	72	59	70	32	12

10. To sum up the population of the district is growing up at the biological natural rate since 1921. But on the other hand, the land area *per capita*, the double crop area *per capita* and the irrigated area *per capita* are steadily declining. There is at the same time no evidence that crop yield per acre has increased. The cultivated area *per capita* in the district has now grown so small that even a slight disturbance by drought or flood is likely to cause serious scarcity conditions. In fact the district is marked out as a danger-spot from the point of view of the food situation of the State.

Villages and Towns

11. The district has 3,631 villages and 12 towns. Out of about 19·8 lakhs of people who were counted at the census of 1951, 15·6 lakhs were found in the villages and 4·2 lakhs in the towns, i.e., there are as many as 790 people per 1,000 of the population who live in the rural areas and 210 of them live in the towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 430. But the villages do not necessarily comprise of a single compact site. There are 6,511 hamlets in the district. The population per hamlet is only 240. The medium-sized village, with inhabitants numbering between 500—2,000, is the dominant type in the district. Of the rural population 54·6 per cent live in such villages ; 35·6 per cent in small villages of population under 500 ; 9·1 per cent in large villages of population between 2,000—5,000 ; and only 0·7 per cent in villages of population over 5,000.

Towns vary in number of inhabitants even more widely than villages. Banaras City including the Municipal Board, Cantonment, Sheopur Town Area and Hindu University (which have been treated as separate towns) has a total population of 355,777, i.e. 85·6 per cent of the urban population of the district. Only 7·3 per cent of the urban population lives in towns of population between 10,000—20,000 (viz., Bhadohi and Ramnagar) ; 3·8 per cent in towns of population between 5,000—10,000 (viz., Mughal Sarai Railway Colony and Mughal Sarai Notified Area) ; and the remaining 3·4 per cent of the population lives in towns of population under 5,000 (viz., Gopiganj, Chakia, Gyanpur and Gangapur). It is significant to note that Banaras city has recorded 35·2 per cent increase in its population since 1941. The increase in its population since 1921 is of 79·3 per cent. Except for Gangapur, the population of which has declined slightly in 1951, all the towns are growing up. (*Vide* Tables A-III and A-IV)

Occupations : Livelihood pattern

12. Out of the total population of 1,978,634 (rural 1,563,087, urban 415,547) 1,181,872 (rural 1,162,320, urban 19,552) or 59·7 per cent. depend on agriculture for their means of livelihood and 796, 762 (rural 400,767, urban 395,995) or 40·3 per cent. depend on the non-agricultural sources. The following table gives the distribution of 100 persons of the total, rural and urban population of the district and also of Banaras city under the different livelihood classes.

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**59·7**	**41·5**	**11·3**	**5·8**	**1·1**	**40·3**	**15·1**	**8·1**	**3·1**	**14·0**
Rural	**74·4**	52·0	14·0	7·4	1·0	**25·6**	10·3	3·9	1·9	9·5
Urban	**4·7**	2·3	1·0	0·1	1·3	**95·3**	33·0	23·9	7·6	30·8
Banaras city... ...	**3·3**	1·7	0·1	0·1	1·4	**96·7**	34·4	24·5	6·3	31·5

It is obvious that the district is one of the less predominantly agricultural districts of the State. Here only 59·7 per cent. of the people depend on agriculture as against 74·2 per cent in the whole State.

Of the total population of the district 1,120,892 persons (males 438,815, females 682,077) or 56·7 per cent have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 54·5 and that among the non-agricultural classes to 59·8. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 253,908 persons (males 75,915, females 177,993) or 12·8 per cent of the population are earning dependants. Among the agriculturists their proportion is 16·5 per cent and among non-agriculturists they form only 7·5 per cent. Agriculture is a family occupation and it provides work to women and grown-up children in the family. The remaining 603,834 persons (males 497,435, females 106,399) or 30·5 per cent of the population consist of self-supporting persons. Their proportion among agriculturists is 29·0 per cent and among non-agriculturists 32·7 per cent. Of the self-supporting persons 343,237 (males 276,858, females 66,379) belong to the agricultural classes and 260,597 (males 220,577, females 40,020) to the non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of the 260,597 self-supporting persons belonging to the non-agricultural classes 5,255 persons (rural 2,496, urban 2,759) earn their livelihood from non-productive sources. Of the remaining 255,342 self-supporting persons (rural 130,082, urban 125,260) 11,943 (rural 2,818, urban 9,125) or 4·7 per cent are employers, 69,571 (rural 23,514, urban 46,057) or 27·2 per cent. are employees and 173,828 (rural 103,750, urban 70,078) or 68·1 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations, classified according to the Economic Divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	233
1—Mining and quarrying	5
2—Processing and manufacture—foodstuffs, textile, leather and products thereof	2,296
3—Processing and manufacture—metals, chemicals and products thereof	420
4—Processing and manufacture not elsewhere specified	803
5—Construction and utilities	350
6—Commerce	1,831
7—Transport, storage and communications	773
8—Health, education and public administration	889
9—Services not elsewhere specified	2,400

Among the large scale industries the principal are spinning and weaving, flour grinding and rice pounding and husking, glass, soap, engineering, biscuits and chemicals. Among the cottage industries, the principal are silk including silk brocades, woolen blankets, woolen carpets, hosiery, *tatpatti*, brass and copper-wares, artistic brass-wares, scissors, geometrical drawing and survey instruments, cycle parts, glass beads, clay-modelling, *gur*, cane furniture, hemp; ropes and *sutli*, marble and stone carving and *biris*.

Variation in the livelihood pattern

13. In the district, the proportion of population depending on agriculture for their livelihood was 58·4* per cent. in 1951. The unfortunate fact is that the agricultural proportion has been increasing ever since 1901 when the figure stood at 56·1 per cent. It was 57·6 per cent in 1911 and 67·8 per cent. 1921. Only at this census the speed of the process seems to have been arrested. The actual number of persons who depend on agriculture has increased to 1,156,176 in 1951 from 494,899 in 1901 or by 133·6 per cent., while the cultivated area has recorded only a small increase. This has resulted in the progressive fragmentation and subdivision of holdings and pressure on impoverished soil. There appears to have been a gradual decline in village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in the dependency. The proportion of workers in the total population in 1951 was only 43·4 per cent (agricultural 25·9 per cent. non-agricultural 17·5 per cent.) against 54·4 per cent. (agricultural 31·0 per cent. non-agricultural 23·4 per cent) in 1901. The proportion of non-earning dependants has consequently increased from 45·65 per cent. (agricultural 25·16 per cent., non-agricultural 20·49 per cent) in 1901 to 56·65 per cent. (agricultural 32·55 per cent, non-agricultural 24·10 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by a greater diversion of the population to cottage and other industries and by providing secondary occupations to the agricultural population that the present economy of the district can be improved.

House and households

14. There were 271,401 occupied houses in the district, 224,642 in villages and 46,759 in towns. That gives an average of 6,958 persons per 1,000 houses or 7 persons per house in the rural areas and 8,887 persons per 1,000 houses or 8·9 persons per house in the urban areas.

There were 357,316 households in the district—271,139 in villages and 86,177 in towns. That gives an average of 5,759 persons per 1,000 households or 5·8 persons per household in the rural areas and 4,711 persons per 1,000 households or 4·7 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household has been increasing since 1921. It is considerably bigger in size than the average State rural household (5·07). The urban household has recorded a considerable decrease since 1941. It is slightly smaller in size than the average State urban household (4·9).

Census years	Persons per 1,000 households of	
	Rural population	Urban population
1921 ...	5,039	4,061
1931 ...	5,357	5,006
1941 ...	5,430	5,036
1951 ...	5,759	4,711

Out of 5,759 persons in every 1,000 rural households, 2,885 are males and 2,874 are females. There is a male excess numbering 11 in every 1,000 households. Out of 4,711 persons in every 1,000 urban households 2,561 are males and 2,150 are females. There is a male excess numbering 411 in every 1,000 households. The type of migration will account for the difference.

Information regarding types of household and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 5,289 persons (males 2,728, females 2,561) in the district. The corresponding figure for the total count is 5,506.

The table below shows the distribution by size of 1,000 sample households.

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**331**	**393**	**185**	**91**
Rural	276	416	203	105
Urban	481	332	135	52

*The figure includes earning dependants according to their secondary means of livelihood, while the figure 59·7 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Medium households are the dominant type in the villages while small households are more numerous in the towns. Quite a large number of migrants live in the towns without families.

Family composition of 1,000 sample households is as follows :

			Number in 1,000 households
A	Heads of households	Males (married)	661
		Males (widowers)	257
		Females	82
	Wives of heads of households		661
			1,661
B	Sons of heads of households		1,133
	Daughters of heads of households		722
			1,855
C	Male relations of heads of households (other than sons)		654
	Females relations of heads of households (ofher than daughters)		1,037
			1,691
D	Persons unrelated to the heads of the households	Males	23
		Females	59
			82
		Grand Total	*5,289*

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Female relatives (other than daughters) outnumber the male relatives (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

Sex-ratio

15. In the district as a whole the sex-ratio was 954, i.e. there are 954 females to every 1,000 males. It varied among the tehsils. The lowest value was 923 in Banaras tehsil. The highest value was 1,022 in Bhadohi tehsil. The wide difference in the former is caused by Banaras city where the males largely exceed the females. The difference in the latter is the results of male migration. The ratio was 971 in Chandauli and 973 in Chakia.

The sex-ratio is smaller in towns than in villages. For the district as a whole the sex-ratio in villages was as high as 995 (mainly due to male migration), while that in towns was 817. The sex-ratio for Banaras city was only 811.

The corresponding figure of sex-ratio for the district was 966 in 1921, 957 in 1931 and 956 in 1941 against 954 in 1951. The sex-ratio has been going down since 1921.

Age-structure

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately.

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4 ...	13·2	6·9	6·3	7·0	6·9	6·8	3·6
Boys and girls	5—14 ...	26·8	13·6	13·2	13·9	13·8	12·2	10·3
Young men and women	15—34 ...	30·8	15·9	14·9	15·4	15·1	18·0	13·9
Middle-aged men and women	35—54 ...	20·4	10·4	10·0	10·4	9·4	10·8	12·5
Elderly persons	55 and over ...	8·8	4·2	4·6	3·9	4·2	5·8	6·1

It will be seen that the population is progressive. 40 per cent. of the population is of age under 15 and only 8·8 per cent of it consists of elderly persons. Again it may be noted that proportionately larger numbers in the working ages (15—54) are found in the urban areas. This is the effect of migration of workers to the towns from the villages many of whom are unaccompanied by their families. (*Vide* Table C-II)

Marital status

17. Out of every 10,000 persons in the district there are 5,115 males and 4,885 females. Among them 2,199 males and 1,780 females are unmarried. If we reckon males and females together the unmarried people are 39·8 per cent of the population.

Of the males 43·0 per cent. were unmarried, 52·1 per cent. were married and 4·9 per cent. were widowed or divorced. Among the females 36·4 per cent. were unmarried, 51·5 per cent. were married and 12·1 per cent. were widowed or divorced.

Of the married males 7·9 per cent were of ages below 15, 47·9 per cent. were of ages 15—34, 33·9 per cent. were of ages 35—54 and 10·3 per cent were of ages 55 and over. Among the married females 15·4 per cent. were of ages below 15, 50·1 per cent. were of ages 15—34, 27·6 per cent. were of ages 35—54 and 6·9per cent. w ere elderly women.

Marriage is universal. Among males and females aged 35 years and over only 5·4 per cent of the males and 5·9 per cent of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 10·3 per cent. of the males of ages 0—14 and 19·9 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 98 per cent of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken the main are Bengali (0·98 per cent), Punjabi (0·20 per cent), Gujarati (0·12 per cent.), Sindhi (0·10 per cent.), Nepali (0·08 per cent.) and Rajasthani (0·07 per cent.). Of the 19·79 lakhs of people in the district only 22,843 or 1·2 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as a subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 22,307 or 97·7 per cent of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 9,000, Muslims 985, Sikhs 6, Christians 5, Jains 3 and others 1 ; of 10,000 population in villages the numbers are : Hindus 9,439, Muslims 558, Sikh 1, Christian 1 and others 1 ; and of 10,000 population in town ; the numbers are Hindus 7,351, Muslims 2,589, Sikhs 26, Christians 20, Jains 12 and others 2. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in other parts of the State.

There were 340 thousand persons belonging to the Scheduled Castes in the district. Their number per 10,000 is only 1,717. In the district there were 58 Anglo-Indians of whom 42 are males and 16 females. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census was 9,112 (males 4,740, females 4,372). A large majority of them are concentrated in Banaras city. Of the displaced persons 72·76 per cent. have come from West Pakistan 27·07 per cent. from East Pakistan and 0·17 per cent. from districts unspecified. (*Vide* Table D-V)

Literacy

21. The percentage of male literacy was 25·2 in the district while that of females was 5·3 only. In the district the percentage of literates among males in 1931 was 16·4 ; among females the percentage of literates in 1931 was 2·2.* On January 1, 1951, there were 777 primary schools in the district with enrolment of 92,906. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana, Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistic", from the Annual Season and Crop Reports, Tables 3, "Live-stock, Agricultural Machinery and Implements", from the published figures of Live-stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follow :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their depandants

IV—Non-cultivating owners of land ; agricultural rent receivers ; and their dependants

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

---

*The numbers per mille (of the 10 per cent sample population) of each sex aged 5 years and over who were returned as literates are as below :

Males		Females	
1951	1931	1951	1931
259	174	52	20

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I, is based on a 4 per cent. sample extracted from this register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts* comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts* comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise); while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "House-hold". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from house-holds.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for the census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants.

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependent' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a non-earning dependant. Each of them should be classed either a 'self-supporting person' or 'an earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of house-hold deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her Economic Status is that of a non-earning dependants, if she does not also earn an income, and should be recorded as such. "

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family households. But they do not include " unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and receipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers" "Employees" and "Independent Workers" have been defined, as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents, etc. and in that capacity control other workers. Such persons are also employees only and should not be regarded as employers.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobis*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes " employee " Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-returns and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st. March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."
