CENSUS OF INDIA 1961

Central Government Publications

Census Report, Volume X—Maharashtra, is published in the following Parts

I-A and B	..	General Report
I-C	..	Subsidiary Tables
II-A	..	General Population Tables
II-B (i)	..	General Economic Tables—Industrial Classification
II-B (ii)	..	General Economic Tables—Occupational Classification
II-C	..	Cultural and Migration Tables
III	..	Household Economic Tables
IV	..	Report on Housing and Establishments
V-A	..	Scheduled Castes and Scheduled Tribes in Maharashtra—Tables
V-B	..	Scheduled Castes and Scheduled Tribes in Maharashtra—Ethnographic Notes.
VI (1—35)	..	Village Surveys (35 monographs on 35 selected villages)
VII-A	..	Handicrafts in Maharashtra
VII-B	..	Fairs and Festivals in Maharashtra
VIII-A	..	Administration Report—Enumeration (For official use only)
VIII-B	..	Administration Report—Tabulation (For official use only)
IX	..	Census Atlas of Maharashtra
X (1—13)	..	Cities of Maharashtra

(13 Volumes—Two volumes on Greater Bombay
and
One each on other eleven Cities)

State Government Publications

25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra.

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;
(ii) The four-coloured map of the district ;
(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;
(iv) Supplementary information showing basic amenities available for each village ; and
(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

BOMBAY :
The 30th June 1964.

B. A. KULKARNI

THE DISTRICT IN MAHARASHTRA

FIG. 2

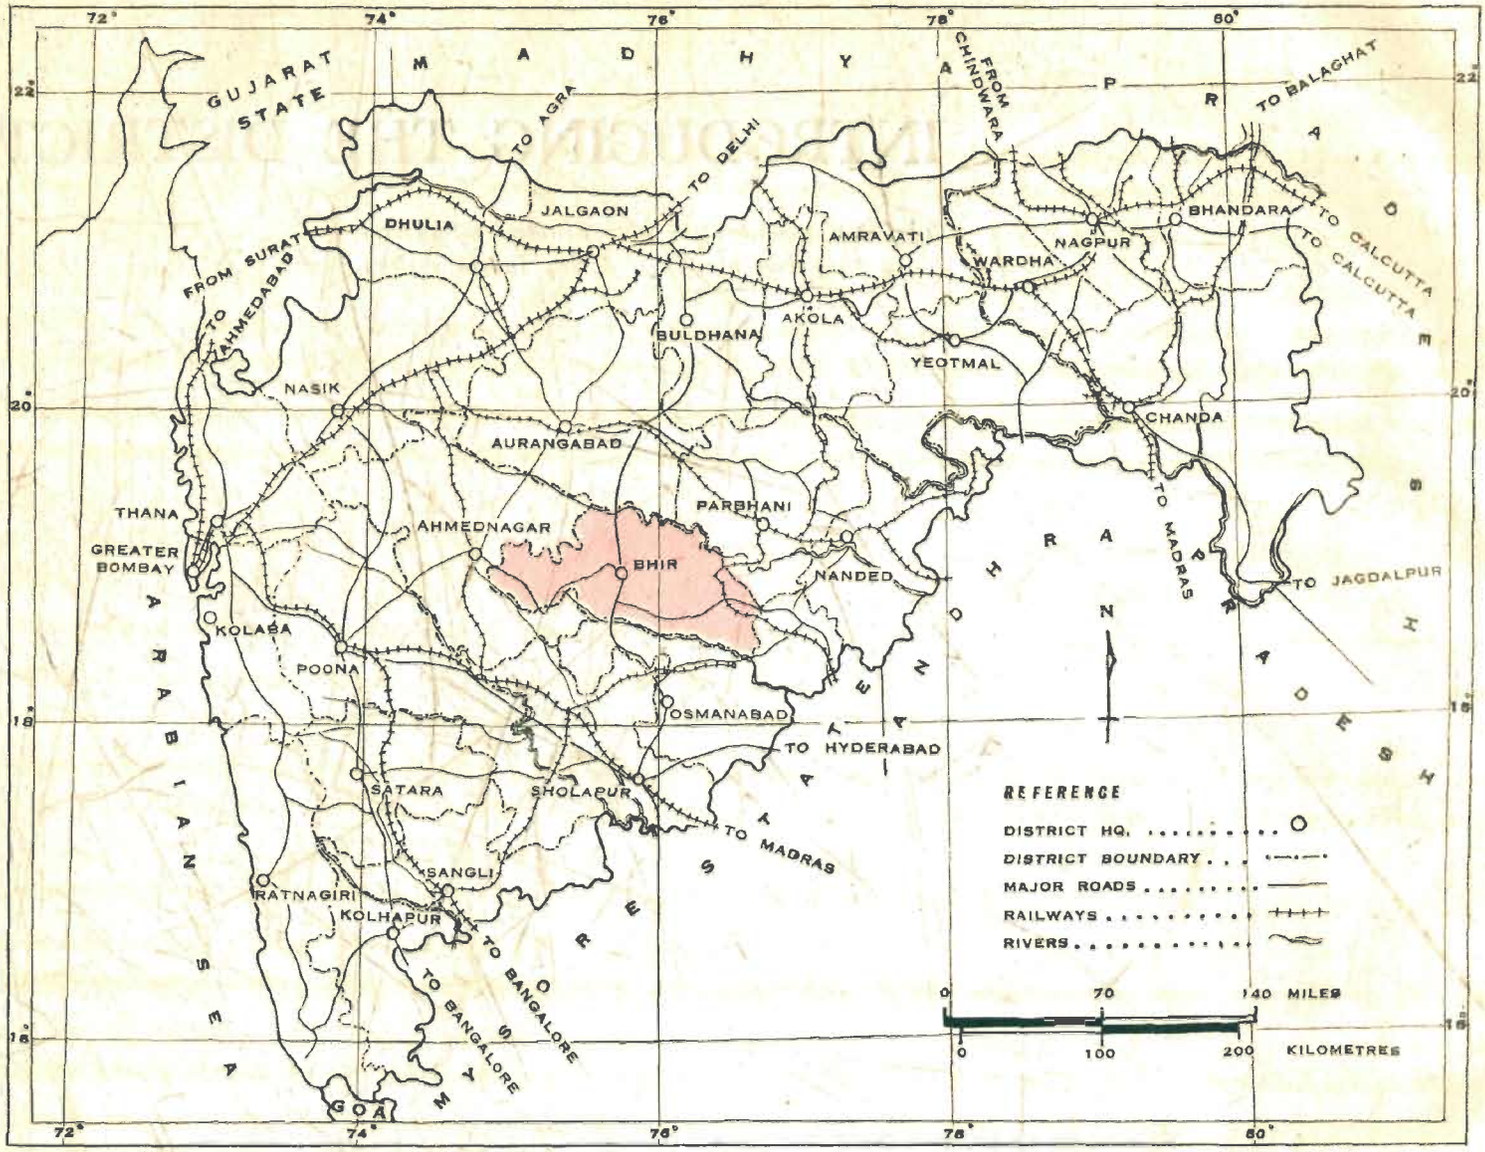

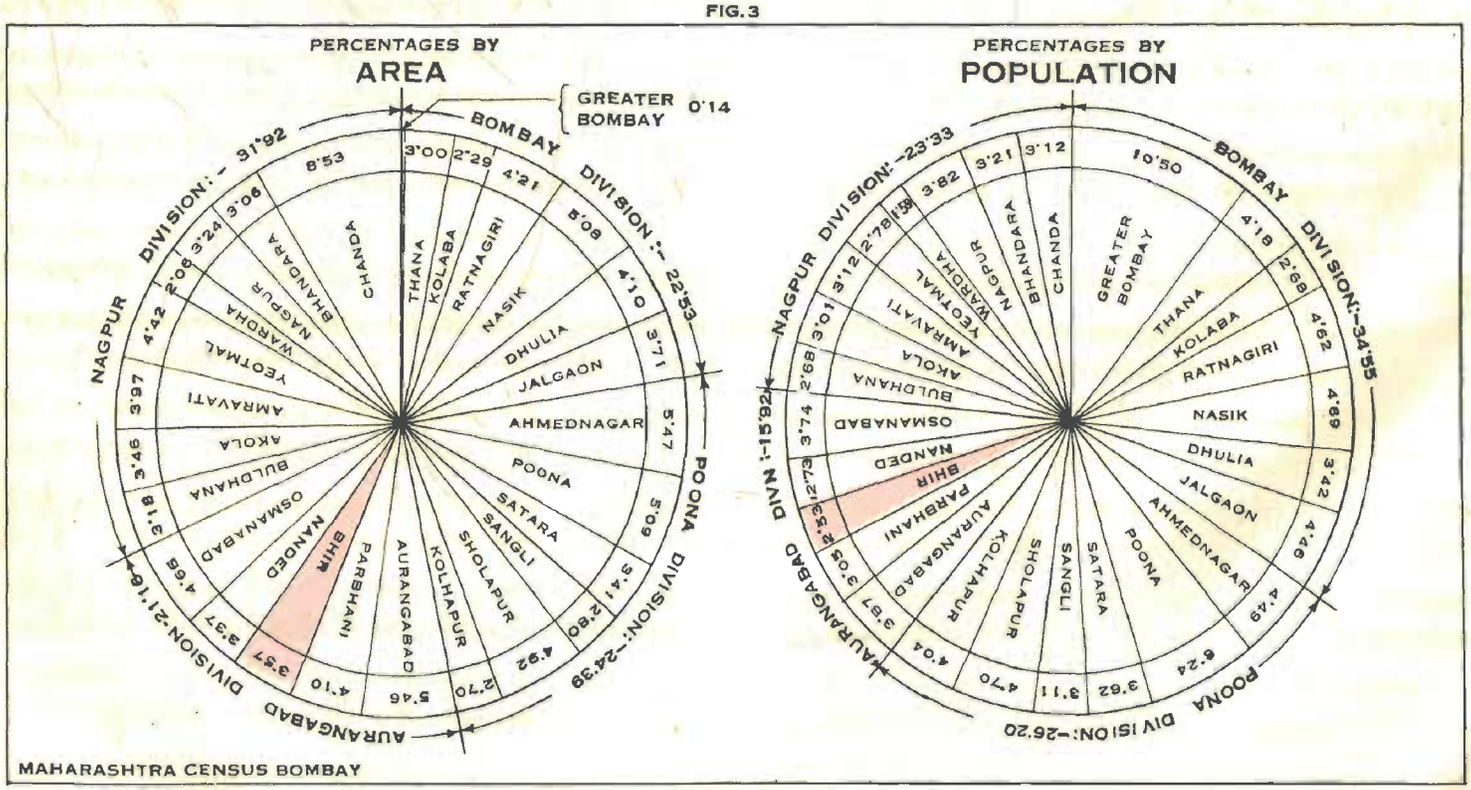

FIG. 3

MAHARASHTRA CENSUS BOMBAY

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

The district is situated in the Deccan trap area The northern part of the district lies in the Godavari basin proper while the southern part is in the basin of Manjra which is a tributary of Godavari and meets it after flowing through Andhra Pradesh. Godavari flows along the northern boundary of the district The Balaghat range running through the central part of the district from west to east acts as a watershed between those two basins Ashti taluka in the west is situated in the Bhima basin.

The district lies between 18° 28′ and 19° 27′ N latitude and 74° 54′ and 76° 57′ E longitude. It is bounded by Aurangabad and Parbhani districts in the north, Parbhani and Osmanabad districts in the east, Osmanabad district to the south and Ahmadnagar district towards the west.

The area of the district is 4,216 9 square miles and its population in 1961 is 1,001,466 In terms of area and population it makes 3 57 per cent and 2·53 per cent of the State, respectively The Figures facing this page show the position of the district in the State.

Hill Ranges

The main hill range is of the Balaghat which traverses the central portion from the Ahmednagar border in the west to the district boundary in the east This hill range divides the district in two zones One low-lying portion in the north known as Gangathadi and the other consisting of uplands locally known as Ghat or Balaghat. There are many peaks over 2,500 feet high. The elevation of the Balaghat portion is between 2,200 and 2,000 feet above sea level while that of the Gangathadi is between 1,500 and 1,200 feet. Ashti taluka has an elevation between 2,000 and 1,750 feet. The general slope in the northern portion is towards north and north-east while that in the southern upland portion is towards south and south-east. The general slope in Ashti taluka is towards the south.

Important Rivers

Godavari is the most important river of the district. It drains the northern part (Georai and Manjlegaon talukas) of the district. The river Godavari flows on the district boundary with Aurangabad and Parbhani districts. Other important rivers are Manjra, Sindphana, Bendsura and Wan.

Manjra emanates in the mountains in Patoda taluka and flows along the southern border of the district. Further east it passes through Osmanabad district, Bidar district in Mysore State and flows through Andhra Pradesh to meet Godavari river on the eastern boundary of Nanded or Maharashtra State. The famous Nizam Sagar project is on this river downstream in Andhra Pradesh. A small irrigation project is proposed near its source in Patoda taluka.

The Sindphana emanates from the hills in Patoda taluka, and runs through the northern part of the district to its east and joins the river Godavari at Manjrath in Manjlegaon taluka. A dam has been constructed on this river in Patoda taluka with a storage capacity to irrigate 7,000 acres Work has also been started on another project near Manjlegaon town.

Bendsura emanates from the hills in Bhir taluka and flows through that taluka towards north and joins the river Sindphana. A dam known as Bendsura project has been constructed on this river near village Pali on Bhir-Sholapur Road, with a storage capacity to irrigate 13,000 acres

The river Wan rises near Dharur town in Kaij taluka in the south of the Balaghat range It flows towards the east up to Ambejogai (Mominabad), then cuts across the hill range and flows towards the north to meet the Godavari 20 miles downstream near Sonpeth in Parbhani district. Work is in progress for construction of a dam on this river near Nagapur village with a storage capacity to irrigate about 15,000 acres

Sina river flows on the south-western boundary of the district. Talwar, Kamli, Rooti and Mehkari are its tributaries. Medium-size irrigation projects have been constructed on all these tributaries.

Climate

The climate of the district is pleasant and agreeable during the greater part of the year. The climatic year may be divided into three short seasons: a moderately warm wet season from June to September, a cool dry season from October to January and a hot dry season from February to May.

Within the district, there are local variations also. Patoda and Kaij talukas have cool climate even in hot season. The climate of Bhir, Manjlegaon and Georai on the low lands is warm and humid.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rains start with June and last up to October. The maximum rain falls during July. Second peak is during September.

Ashti taluka in the west gets the least annual rainfall averaging between 508 and 635 mm. Patoda, Bhir, Georai and Manjlegaon talukas have annual rainfall average between 635 and 762 mm. South-eastern portion, consisting of Kaij and Ambejogai (Mominabad) talukas, have the annual average between 762 and 889 mm. Only these last two talukas are in the assured rainfall zone and all the remaining talukas are in the low rainfall zone.

Dependability of Rainfall and Scarcity Areas

Mean rainfall at Bhir is 679·70 mm. The standard deviation is 231·65 mm and the coefficient of variability is 34 09 per cent Rainfall reliability is measured by the coefficient of variability. In fact, variability is inverse to reliability. Since the coefficient of variability is more than 34 per cent rainfall reliability may be said to be slightly low.

Parts of the district have been affected by scarcity from early times. The areas which have suffered most in the past were in Ashti, Patoda, Bhir and Manjlegaon talukas.

The Fact-Finding Committee appointed by the Government of Bombay in 1960 had reported that the rainfall is not dependable in the following areas and they are likely to be affected by scarcity condition as shown below :—

Area	Grade	Estimated frequency
(1) Ashti Taluka . ..	C	Once in ten years
(2) Patoda Taluka	C	Once in ten years
(3) Manjlegaon Taluka ..	C	Once in ten years
(4) Bhir and Pimpalner Circles of Bhir Taluka	C	Once in ter years

Soils

The entire district is situated in the trap region and its soils are mostly fertile black cotton soils especially in Georai and Manjlegaon talukas. In the remaining talukas, however, the soils are light, shallow and stony, interspread by strips of black soils on the banks of rivers and nallahs. Ashti taluka has fairly good soils towards the south. The soils in the northern and eastern parts are, however, undulating and light. Patoda taluka is almost hilly except in the north, where better soils are found along the Sindphana river. The southern parts of Georai and Manjlegaon talukas are hilly with elevated plateau which have light to medium black soils. The soils in the river valleys are, however, very fertile deep black and capable of growing a variety of crops. Manjlegaon and Kaij talukas have fairly large low-lying plains, growing crops like wheat and cotton. The high plateau, which occupies the southern part of Manjlegaon taluka and northern part of Kaij taluka has poorer soils with intermittent patches of black soil. Portions of Ambejogai (Mominabad) taluka have black cotton soil and the area especially along the river bank is fertile

Minerals

No minerals of economic value are found in the district

Forests

The district has got very little forests. At present the area under forests is only 54,355 acres which works out to 2·13 per cent of the total geographical area Forests are located in Patoda, Ambejogai (Mominabad), Ashti, Kaij and Bhir talukas. Forest produce is mainly fuel, wood and grass.

Natural Zones

The district can be broadly divided into four zones, viz , the central hilly tract, the Gangathadi or the Godavari basin proper in the north, the Manjra river basin in the south and Ashti taluka in the west. The hilly tract is spread over parts of Ashti, Patoda, Bhir, Kaij and Ambejogai (Mominabad) talukas and has a width of 10 to 15 miles all along the hill range. The soils in this region are light and stony. Scarcity areas are located in Ashti, Patoda and Bhir talukas of this zone. The Godavari basin includes the valleys of Sindphana, Kundalika and Wan rivers covering major portions of Georai and Manjlegaon talukas. The soils along the banks of Godavari, Sindphana and other rivers are very fertile. This zone, however, suffers from low and unreliable rainfall. The whole of Manjlegaon taluka is regarded as a scarcity area. The southern zone comprising of the Manjra river basin enjoys assured rainfall and as a result all kinds of crops are grown there. This zone has cooler climate, both in winter and summer, and the soils are more suited for growing of wheat. Ashti taluka has the lowest rainfall. Patoda and Ashti talukas together, because of their low rainfall and poorer soils, make the poorest zone in the district from which thousands of people migrate annually to sugar factories and farms in the nearby irrigated areas of Ahmadnagar district. All the existing irrigation projects had been conceived as protective works in scarcity affected areas. They have not added much to the agricultural development of the district. The Godavari and Sindphana projects now under consideration will, however. make a great difference.

ADMINISTRATIVE SET-UP

Brief History

In the year 1905, Kaij taluka was abolished and its villages merged in the adjoining Amba taluka. The name of Amba taluka was later on changed as Mominabad taluka.

There were no major changes in the boundaries of the district or its talukas between 1906 and 1948.

Twenty-six enclave villages belonging to Ahmadnagar district were transferred in 1950 to Bhir district. Twenty-one villages from Patoda and Ashti talukas were transferred to Ahmadnagar district.

The district had about one-fourth area as jagir. The Nizam's own estate called " Sarf-e-Khas " covered most of what is now Patoda taluka. It was taken over under the Sarf-e-Khas (Merger) Regulation of 1949. All the jagirs were abolished and their villages taken over under direct Government administration in the year 1949 under the Hyderabad (Abolition of Jagirs) Regulation, 1949

Consequent upon the integration of Sarf-e-Khas and Jagir areas the boundaries of all the talukas in the district were reconstituted in the year 1950. A new taluka was created with headquarters at Kaij. Patoda taluka which was previously under Sarf-e-Khas was converted into a mahal.

With the Reorganisation of States in 1956, the district was transferred from Hyderabad State to Bombay State. It forms a part of Maharashtra since 1st May 1960. The name of Mominabad taluka and town was changed to Ambejogai in 1962.

Present Set-up

For administrative purposes, the district is divided in seven talukas. The area, number of villages, number of towns, 1961 population and the position in the district by percentages of area and population are shown in the following table for each taluka separately. (Also see notes on seasonal migration and estimated and actual population figures for Ashti and Patoda talukas on page 18) :—

District/Taluka (1)	Name of Headquarters (2)	Area in sq miles (3)	Number of inhabited villages (4)	Number of towns (5)	1961 population (6)	Percentage of area (7)	Percentage of population (8)
BHIR DISTRICT	Bhir	4,216 9	1,031	7	1,001,466	100·0	100·0
1 Georai Taluka	Georai	618 2	155	1	135,519	14 7	13 5
2 Manjlegaon Taluka	Manjlegaon	594·6	163	1	143 487	14 1	14·3
3 Ashti Taluka	Ashti	581 1	121	1	108,123	13 8	10·8
4 Bhir Taluka	Bhir	582 4	169	1	159,622	13·8	16·0
5 Patoda Taluka	Patoda	510 1	91		90,849	12 1	9·1
6 Kaij Taluka	Kaij	691 8	164	1	164,331	16·4	16 4
7 Ambejogai (Mominabad) Taluka	Ambejogai (Mominabad)	638 7	168	2	199,535	15 1	19 9

General Administration and Revenue

The Collector is in charge of general administration, law and order, elections, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and two Deputy Collectors who hold charge of the Bhir and Ambejogai (Mominabad) revenue divisions and have their headquarters at Bhir and Ambejogai (Mominabad), respectively. Six Tahsildars are in charge of six taluka offices and a Naib-Tahsildar is in charge of the Patoda taluka.

Land Revenue Settlement

Authentic records of the revenue history of the district exist from the time of Malik Ambar early in the 17th century, who had the whole country surveyed, and fixed the revenue according to the productiveness of the soil in each tract. Prior to 1866, the villages were farmed out, the revenue contractors being allowed 10 per cent for collection; but on the introduction of administration by district officers in 1866, Talukadars and Tahsildars were regularly appointed, and the ryotwari system with cash payments of land revenue was introduced. The revenue survey was started in 1876 and completed in 1882, the assessments being fixed for thirty years.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during any revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlement untaxed. The comparative incidence of land revenue from field to field is thus still the same as it was at the time of the original settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments in the district is broadly the same as in the other districts of Maharashtra. In the case of land irrigated by wells and small *bandharas*, the land revenue is integrated and is inclusive of the charge for water supplied. For lands irrigated under Government canals, the land revenue at dry land rates is recovered by the Revenue Department while the water rates have been determined on *ad hoc* basis by the Revenue Department pending correct assessment by the Irrigation Department.

The First Revision Survey was completed in 1917. The land revenue rates have not been revised since then in spite of the expiry of the guarantee period of that revision settlement. As the Second Revision Settlement which was due in 1947 was not introduced, an increase of two annas per rupee was effected in the land revenue under the Hyderabad Land (Special Assessment) Act of 1952.

Jagir villages had not been covered by the original or revisional settlements. Surveys and settlements for them were taken up by the department from 1946. The general policy was to fix land revenue rates comparable with those in the adjoining Government villages. Departures made from this policy were set right in most of the cases by scaling down the settled rates to the adjoining levels after the abolition of Jagirs

Table 24 in Part III shows demand and collection of land revenue during the last ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from time to time. Kaij taluka was formed in the year 1950 by taking villages from the three adjoining talukas, viz., Bhir, Manjlegaon and Ambejogai (Mominabad) Because of such territorial changes the talukas actually have a varied pattern of land revenue assessments. Even then, the maximum rates or average land revenue rates per acre fixed at each settlement or revision settlement should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka. The table below shows these rates for dry, garden or rice lands for each taluka separately.—

Taluka	Original settlement or Revision settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Villages	Maximum rate per acre		
								Dry lands	Garden lands	Rice lands

*This is a new taluka formed by taking villages from the adjoining three ta'ukas, viz , Bhir, Manjlegaon and Ambejogai (Mominabad) The taluka was formed in the year 1950 No separate reports for the settlements are available for this taluka.

Assembly and Parliamentary Constituencies

Since 1957 the district has seven Assembly seats. In 1957, Kaij constituency was a double-member constituency with one of the two seats reserved for Scheduled Castes.

After abolition of the double-member constituencies in 1961, the seat from Kaij is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

	Assembly Constituency	Number of Voters on rolls
1	Ashti	81,089
2	Bhir	80,572
3	Georai	67,287
4	Manjlegaon	70,656
5	Chausala	72,101
6	Kaij	66,694
7	Renapur	70,871
	Total	509,270

In the 1962 General Elections, the Assembly constituencies Ashti, Bhir, Georai, Manjlegaon, Chausala and Kaij together made one Parliamentary constituency called Bhir constituency and the remaining Assembly constituency Renapur combined with Assembly constituencies Ahmadpur, Udgir, Nilanga and Latur from Osmanabad district made another Parliamentary constituency called Latur constituency.

The total number of voters on rolls in the district in 1961 was 509,270. The total population 21 years and above according to 1961 Census is 465,019. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Tahsildars are vested with magisterial powers. But those powers are limited to sections 107, 164 and 133 to 148 of the Criminal Procedure Code and none of them ever tries any criminal case except under the above sections. The District Magistrate does not have any administrative control over the Judicial Magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the district in the year 1922.

The District and Sessions Judge is assisted by one Assistant Judge and Additional Sessions Judge. He has jurisdiction over the entire district and attends to civil and criminal work, both original and appellate.

The Civil Judge (Senior Division) and Judicial Magistrate, First Class, attends to civil suits in Bhir taluka.

For the remaining six talukas there are five Civil Judges (Junior Division) and Judicial Magistrates, First Class, at different taluka places, one of them attending to suits in both Ashti and Patoda talukas.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by two Deputy or Assistant Superintendents and two Circle Police Inspectors. There are 21 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	No. of Villages
Georai Taluka	1 Georai	60
	2 Talwada	51
	3 Chaklamba	47
Manjlegaon Taluka	4 Manjlegaon	76
	5 Dindrud	41
	6 Pimpri	48
Ashti Taluka	7 Ashti	63
	8 Ambhora	60
Bhir Taluka	9 Bhir Town	.
	10 Bhir Rural	56
	11 Pimpalner	60
	12 Neknoor	54
Patoda Taluka	13 Patoda	48
	14 Manoor	43
Kaij Taluka	15 Kaij	52
	16 Yusuf Wadgaon	58
	17 Dharur	55
Ambejogai (Mominabad) Taluka	18 Ambejogai	56
	19 Bardapur	38
	20 Parli	53
	21 Renapur	26

Average number of villages and population per Police Station in the district is 50 and 47,689 as against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

All the towns in the district have Municipal Committees established under the Hyderabad Municipal and Town Committees Act. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for women are shown below for each Municipality separately :—

Serial No	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 population	Total No of Municipal Councillors	Seats reserved for		
							Scheduled Castes	Scheduled Tribes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1	Ashti	1954	1961	3	4,980	11	1	1	1
2	Dharur .. .	1953	1961	3	7,464	12	1	.	2
3	Parli . .	1933	1961	3	19,691	17	2		2
4	Georai .	1954	1961	3	7,129	12	1		1
5	Bhir .	1945	1961	3	33,066	17	1	.	2
6	Ambejogai (Mominabad)	1953	1961	3	17,443	17	2		2
7	Manjlegaon	1954	1961	3	8,876	12	1		1

Six out of seven Municipalities were established during the last two decades. Parli Municipality was established in 1933

The seven Municipalities together cover the entire urban population or 9·85 per cent of the total 1961 population of the district.

The taxation level of each of the Municipalities is shown in the next column.

Taxation level is generally low. The bulk of receipts for Bhir, Parli and Ambejogai (Mominabad) Municipalities are through the levies on incoming vehicles bringing agricultural produce to the markets. Very recently all the Municipalities have also decided to levy octroi duties.

Name of the Municipality	1961 Population	Year 1961-62		
		Total Receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
		Rs nP.	Rs nP.	Rs nP.
1 Ashti .	4,980	36,356 00	4,995 00	1 00
2 Dharur ..	7,464	21,917 28	8,970 68	1 20
3 Parli ..	19,691	2,42,871 84	57,835 88	2 94

7 Manjlegaon	8,876	418,395 00	17,301 00	1 95

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and seven Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries respectively except in the case of municipal towns which are not covered by them.

The Zilla Parishad covers 97·04 per cent of the area and 90·15 per cent of the total population of the district. The population covered is entirely rural population. The number of villages and population included under the Zilla Parishad and each Panchayat Samiti are shown in the following table. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population of the district in 1961. (Also see notes on estimated and actual population figures for Ashti and Patoda talukas on page 18)

—	Name of Headquarters	Area in sq miles	Number of inhabited villages	Number of non-municipal towns	Population in 1961	Percentage by area	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Zilla Parishad, Bhir	Bhir .	4,092 3	1,031	.	902,817	100 0	100·0
1 Georai Panchayat Samiti ..	Georai .	598 0	135	..	128,390	14 6	14·2

Constitution

The Zilla Parishad has 47 directly elected councillors. Out of these 47 seats, 7 seats have been reserved for Scheduled Castes. In addition, a woman councillor has been co-opted by the elected councillors. There are 5 associate councillors who are chairmen of 5 federal co-operative societies conducting business in the district. The elected chairmen of 3 Panchayat Samitis are also *ex-officio* councillors. The chairmen of other 4 Panchayat Samitis are out of the elected councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a Chairman of a Co-operative Society conducting the business of purchase or sale of agricultural produce in the area of the Block as an associate member and a Chairman of a Co-operative Society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti Their number is at the rate of two for each electoral division in the area of the Block

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I. A. S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government.

At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as a Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided over by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have Subject Committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now, with the creation of these democratic bodies at the district and block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities at the district level but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of record of rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board and District Panchayat Mandal. The functions of the non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan Schemes.

If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in the block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 105·8 lakhs. The major portion of the receipts is of receipts from Government. They are 94·6 per cent and the Zilla Parishad's receipts are 5·4 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 105·02 lakhs. Following are the major items of expenditure :—

General Administration	5·6 per cent.
Education	48·8 per cent.
Community Development Project	12·9 per cent.
Buildings and Communications ..	6· 9 per cent.
Miscellaneous	12·0 per cent.
Other items	13·8 per cent.

The Zilla Parishad had introduced a cess on land revenue at 20 nP. per rupee in its first year.

Per capita annual expenditure of the Zilla Parishad on different developmental heads is as follows :—

	Rs.
General Administration	0·64
Education	5·65
Community Development Project ..	1·50
Buildings and Communications	0·80

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 4 Class I and 33 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 3,806.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by the group village panchayats are shown below :—

Taluka	No of inhabited villages	No of independent village panchayats	No of group village panchayats	No of villages covered by group village panchayats
1. Georai	155	60	40	97
2. Manjlegaon	163	56	43	108
3. Ashti	121	61	26	61
4. Bhir	169	65	40	105
5. Patoda	91	51	18	40
6. Kaij	164	89	38	75
7. Ambejogai (Mominabad)	168	81	37	86
Total ..	1,031	463	242	572

All the villages in the district have been covered by village panchayats.

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows : —

Item	Amount (In '000)	Percentage of total income
	Rs.	
Grants	6,98	58·21
Taxes on houses and properties .. .	64	5·34
Octroi	1	0 08
Other taxes	2,72	22·69
Total taxes	3,37	28 11
Income from other sources	1,64	13·68
Total Income	11,99	100 00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue. Some village panchayats have imposed taxes on houses and properties. No village panchayat has started collecting octroi.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (In '000)	Percentage of total expenditure
	Rs.	
Administration	2,39	25·84
Health and Sanitation	1,17	12 65
Public Lighting	1,33	14·38
Other Items	4,36	47·13
Total Expenditure	9,25	100 00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of Panchayat *Ghars*, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—1961.

Variation

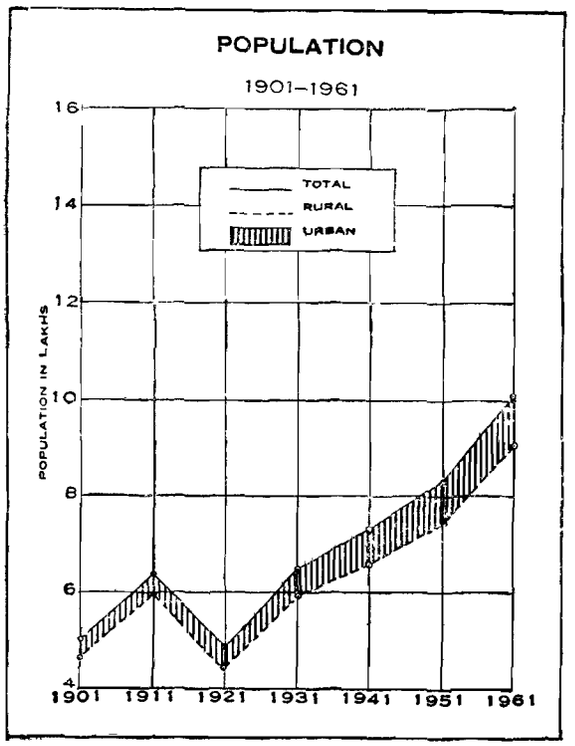

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Variation	Rate of variation
1901	506,349		
1911	637,861	+131,512	+25 97
1921	477,623	−160,238	−25·12
1931	648,986	+171,363	+35 88
1941	728,201	+79,215	+12 21
1951	826,046	+97,845	+13 44
1961	1,001,466	+175,420	+21·24

Figure on page (10) shows the total, rural and urban population of the district for the last seven Censuses.

The population of the district increased in the decade 1901—11 by nearly 26 per cent perhaps due to the recovery from the effects of severe famines of the earlier decade. The decade 1911—21 again had a severe setback due to influenza epidemic of 1918-19 in which the district seems to have suffered most of all the districts in Maharashtra. The following decade 1921—31 recorded the highest ever growth rate of 35·9 per cent which was due to the recovery from the serious losses in the previous decade. The 1931 population is very near the figure of 1911. After 1921 however the growth of population has been steady. Population increased by 12·2 per cent in the decade 1931—41, by 13·4 per cent during 1941—51

and by 21 2 per cent during the decade 1951—61. Though the 1951—61 growth rate for the district is lower than the State average (23·6 per cent), the population of the district will, with that rate, be nearly double that of 1961 in the year 1991.

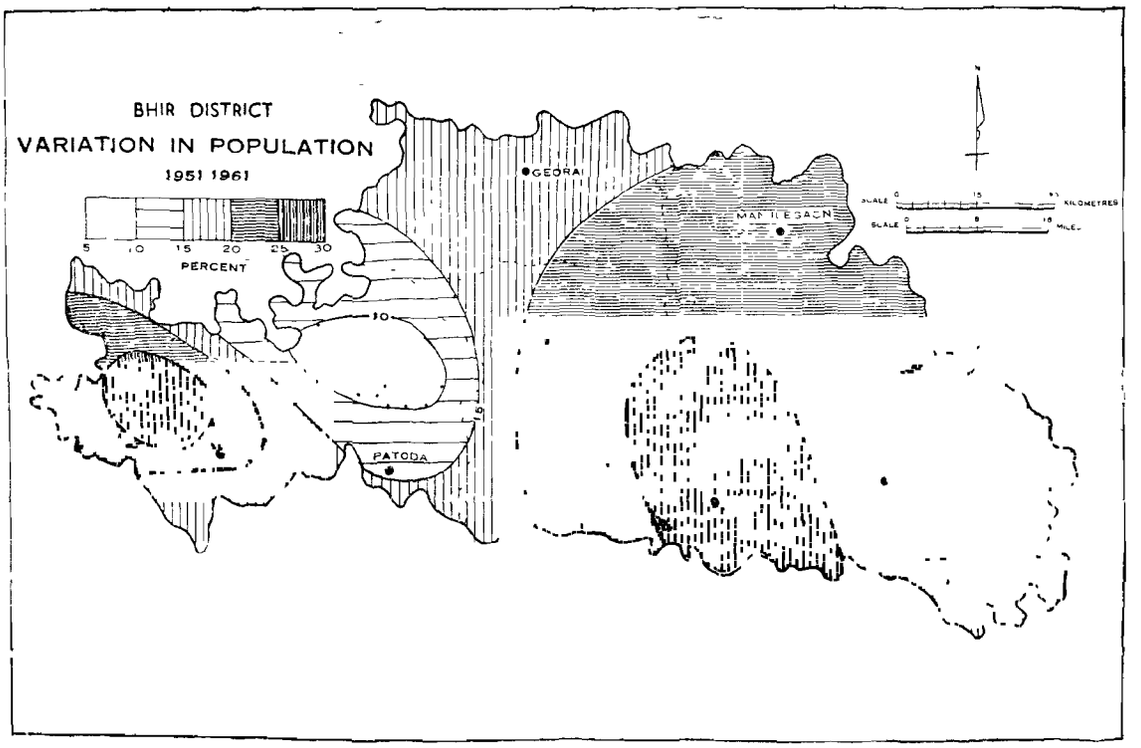

The 1951—61 decade variation for the district and each of the talukas is as follows :—

	Percentage Variation 1951—61
BHIR DISTRICT	+21·2
1 Georai Taluka	+19·1
2 Manjlegaon Taluka	+22 6
3. Ashti Taluka	+25 4
4. Bhir Taluka	+22 4
5 Patoda Taluka	+8 8
6 Kaij Taluka	+26 5
7. Ambejogai (Mominabad) Taluka	+ 20 8

Except for Patoda taluka, which is exclusively rural, the population of other talukas has grown more or less uniformly during the last decade and the growth rates are not much different from the district average. Patoda taluka has the lowest growth rate. It may be due to the increasing seasonal migration to sugar factories and sugarcane farms in Ahmadnagar district.

Figure below shows the area wise pattern of 1951—61 growth of population within the district :—

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Bhir District	Maharashtra
1901—1961	97·78	103 97
1921—1961	109·68	89 71
1951—1961 . .	21 24	23 60

During the forty years of accelerated growth since 1921, the population of the district increased by 109 68 per cent as compared to 89·71 per cent for Maharashtra. In fact the increase during the last sixty years (since 1901) is less than that of the last forty years. The heavy loss of life during the decade had reduced the 1921 population considerably and we therefore get a higher index of growth of 1961 population over 1921 than that over 1901.

The rates of growth for the district have been lower than those for Maharashtra except for the period 1921—61.

Density of Population

The densities of population for Maharashtra, Bhir district and its talukas for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA ..	271	334	
BHIR DISTRICT .	196	237	100·00
1. Georai Taluka	184	219	13 53
2. Manjlegaon Taluka	197	241	14 33
3. Ashti Taluka .	148	186	10 80
4 Bhir Taluka	224	274	15 94
5. Patoda Taluka	164	178	9 07
6. Kaij Taluka .	188	238	16 41
7. Ambejogai (Mominabad) Taluka	259	312	19 92

Figure on page (12) shows the approximate contours of density of population in 1961 within the district.

The density per square mile was 120 in 1901, 196 in 1951 and 237 in 1961. The density of population in the district has always been lower than the average for Maharashtra.

Within the district the density varies from 312 per square mile in Ambejogai (Mominabad) taluka to 178 in Patoda taluka. Bhir taluka is the second highest in density with 274. The relatively higher densities of both these talukas are however due to the existence of Ambejogai (Mominabad) and Parli towns in the first and of Bhir town in the second. The low densities in Patoda and Ashti talukas correctly reflect the scanty rainfall, poorer soils and the seasonal out-migration to neighbouring areas in Ahmadnagar district.

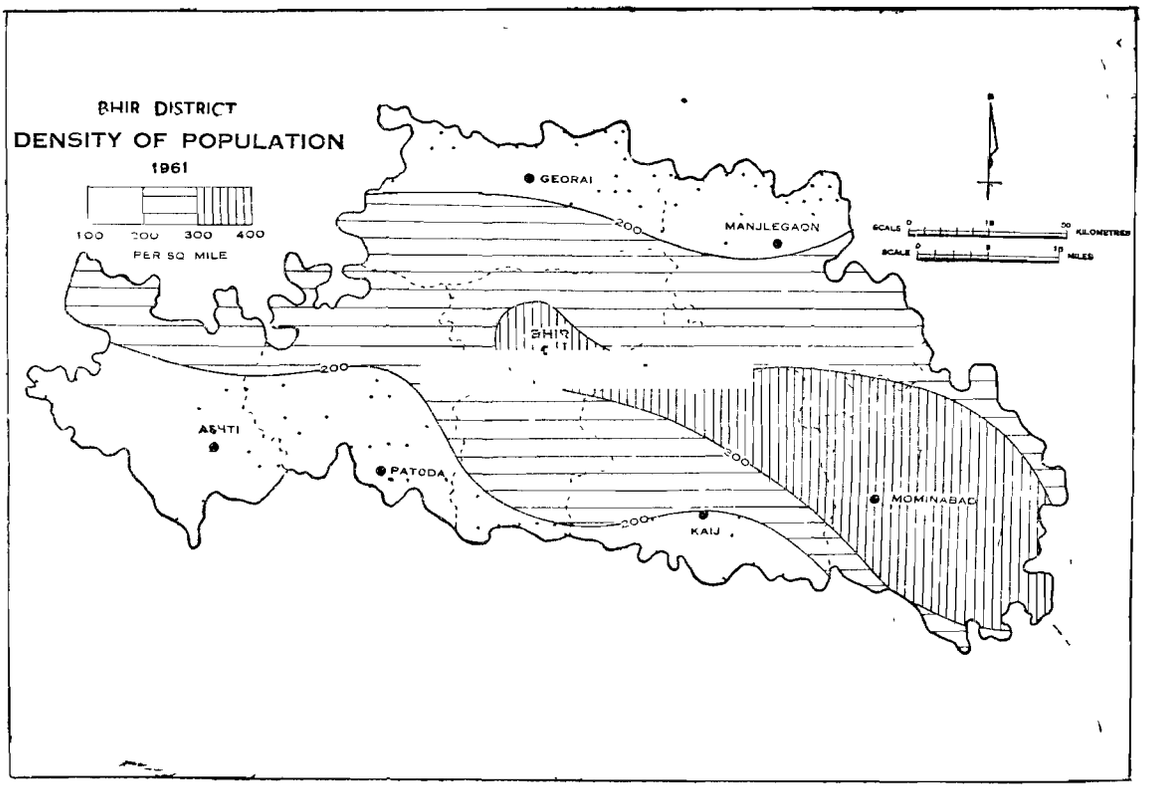

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

	Bhir District			Maharashtra		
Year	No of towns	Rate of variation in urban population	Percentage of urban population to total population	No of towns	Rate of variation in urban population	Percentage of urban population to total population
1901	4	..	8·55	219	..	16 59
1911	4	—7·13	6·30	232	+0 99	15 13
1921	4	—10 53	7·53	238	+18 72	18 50
1931	8	+60 56	8·90	258	+15·54	18 60
1941	8	+24·09	9·84	266	+27·11	21 11
1951	8	+20 71	10·47	383	+62 42	28·75
1961	7	+14 04	9 85	266	+21 32	28·22

In the Figure at the top on page (10) the actual urban population of the district since 1901 is represented by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 127·90 per cent as against 246 96 per cent for the State.

The district is less urbanised than Maharashtra State. 8·55 per cent of the population of Bhir district was urban in 1901 which increased to 9 85 per cent in 1961. The corresponding figures for Maharashtra are 16·59 per cent in 1901 and 28·22 per cent in 1961.

Pangaon which was treated as a town in 1951 Census was declassified as rural in 1961. No new town has been added in 1961. Even if Pangaon had been retained as a town in 1961, the proportion of urban population would have been only 10·65 per cent.

The urban population of the district decreased up to 1921, since then it has been increasing continuously. Except for the decade 1921—31 the rates of growth of urban population of the district were lower than those for Maharashtra. The highest rate of variation of 60·56 per cent was observed during 1921—31 due to the large fall in urban population in the previous decade due to influenza epidemic in 1918.

During the last decade 1951—61 the urban population has increased only by 14·04 per cent. Even after removing Pangaon population from the 1951 figure the growth of urban population in the district is only 18·84 per cent over 1951 against the corresponding figure of 33·74 per cent for Maharashtra. The growth rate of 18 84 per cent against 22·08 per cent for rural population would indicate a sort of stagnation in the development of urban areas perhaps due to the lack of industrial development.

All the towns in the district are only administrative centres except Parli which is a centre of trade. None of them has any manufacturing industry worth a mention.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are shown in the next column.

Year	Bhir District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	.. ..	91·45	..	83 41
1911	.. +29 07	93 70	+12·68	84·87
1921	.. —26 10	92·47	—6·77	81·50
1931	.. +33·87	91·10	+14·77	81·40
1941	. +11 05	90·16	+8·54	78·89
1951	.. +12·64	89·53	+7·72	71·25
1961	.. +22 08	90·15	+24 51	71·78

The net increase in rural population of the district has been 94·97 per cent over that of 1901 and 104·42 per cent over that of 1921. The corresponding figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The percentage of rural population decreased from 91·45 per cent in 1901 to 90·15 per cent in 1961. During the same period the percentage of rural population for Maharashtra decreased from 83·41 per cent to 71·78 per cent. The percentage of rural population of the district has increased slightly in the last decade as a consequence of the re-definition of urban area in 1961 and inclusion of Pangaon in rural area. Bhir district has higher proportion of rural population than the average for Maharashtra.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Bhir District		Maharashtra	
	Percentage of the No of villages to total No of villages	Percentage of population to total rural population	Percentage of the No of villages to total No. of villages	Percentage of population to total rural population
Less than 500 .	36·08	12·75	47 72	15·02
500—999 .	35·30	29·13	28 55	25 71
1,000—1,999	22·31	34 41	16 62	28 55
2,000—4,999 ..	5·53	18·32	6 18	22·40
5,000 and over ..	0·78	5·39	0·93	8·32

Nearly 90 per cent of the population in the district is rural as compared to nearly 72 per cent in Maharashtra. In the rural population, 41·88 per cent lived in villages with population less than 1,000 against 40·73 per cent for Maharashtra. This class of villages constituted 71·38 per cent of the total number of villages in the district against the average of 76·27 per cent for Maharashtra. The remaining 28·62 per cent villages with more than 1,000 population accounted for the remaining 58·12 per cent of the rural population in the district. The rural population is concentrated more in villages with population between 1,000 and 1,999. The distribution between small and big villages in the district is very nearly the same as the average for Maharashtra.

The area, number of inhabited villages, total rural population, average population per village and the number of villages per 100 sq. miles are shown below for the State, district and each taluka separately :—

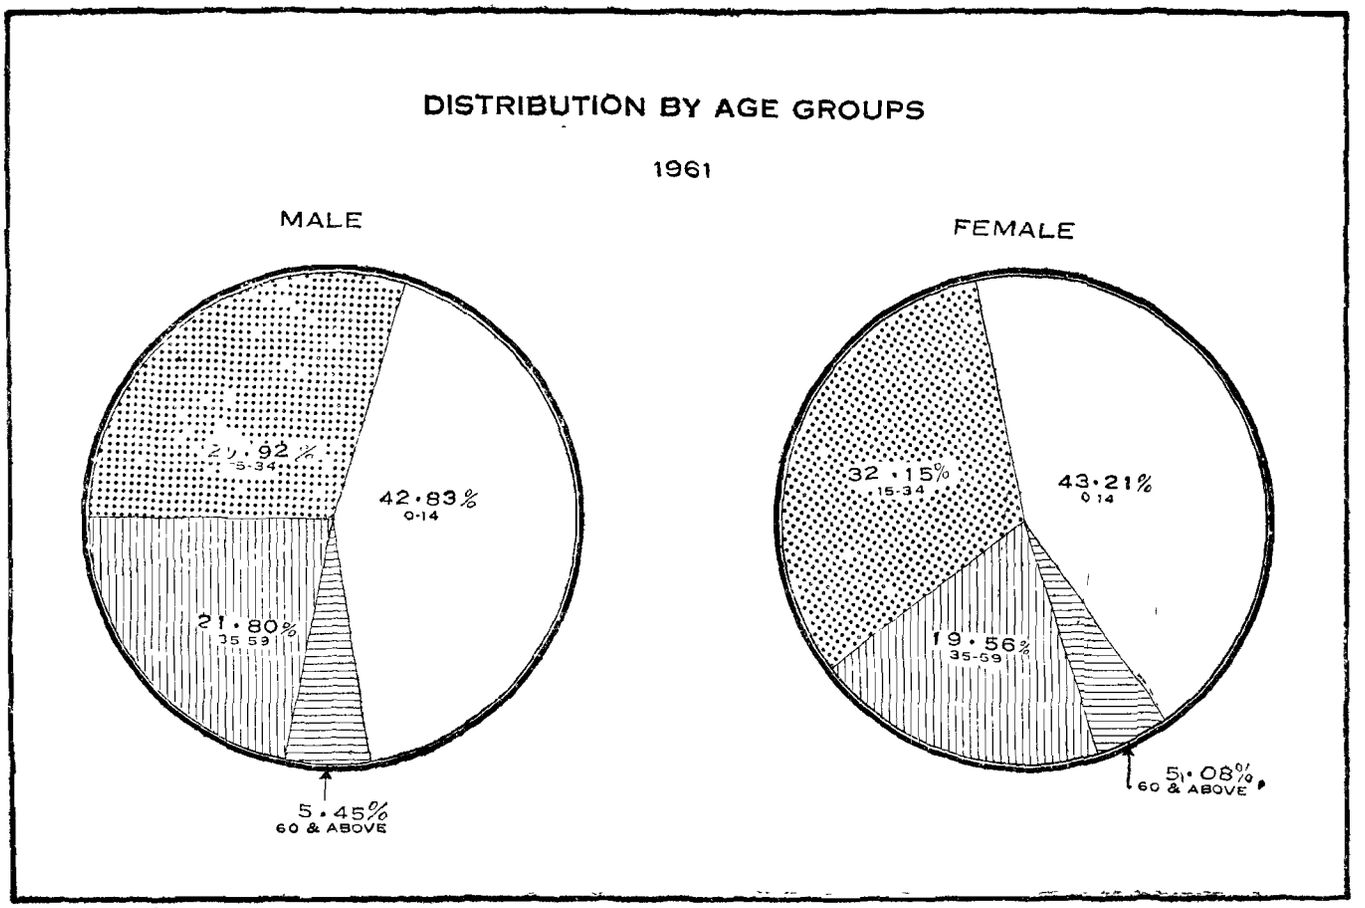

State/District/Taluka	Area in sq miles (rural)	Number of inhabited villages	Rural population	Average population per inhabited village	Number of inhabited villages per 100 sq miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736 3	35,851	28,391,157	792	31
BHIR DISTRICT	4,092 3	1,031	902,817	876	25
1 Georai Taluka	598·0	155	128,390	828	26
2 Manjlegaon Taluka	581·0	163	134,611	826	28
3 Ashti Taluka	561·1	121	103,143	852	22
4 Bhir Taluka	555·7	169	126,556	749	30
5 Patoda Taluka	510·1	91	90,849	998	18
6 Kaij Taluka	668 7	164	156,867	957	25
7 Ambejogai (Mominabad) Taluka	617·7	168	162,401	967	27

Average population per village in 1961 in the district is 876 against 792 in Maharashtra. Within the district, the average population per village varies from 998 in Patoda taluka to 749 in Bhir taluka. There are 25 villages per 100 sq. miles of rural area in the district against the average of 31 in Maharashtra. Within the district, Patoda taluka has the smallest number (18) of villages per 100 sq. miles and Bhir taluka has the largest with 30.

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. Table in the next column will show the proportions of population by broad age-groups in 1961 for the district and State separately for males and females compared with the corresponding proportions for 1951 in the district.

Age-groups	Percentages of population by age-groups					
	Bhir District				Maharashtra	
	1951		1961		1961	
	Males	Females	Males	Females	Males	Females
0—4 .	13·32	14 34	15 44	16 29	14 65	15 39
5—14	27·67	28 05	27 39	26 92	25 55	25 77
0—14 ..	40 99	42 39	42 83	43 21	40 20	41 16
15—34 ..	30 03	31·72	29·92	32·15	32 70	33·13
35—59 .	22 63	20·12	21 80	19·56	22 09	20 16
15—59 ..	52·66	51 84	51 72	51 71	54 79	53 29
60 and over.	6·35	5·77	5 45	5·08	5·01	5·55
Total ..	100 00	100·00	100 00	100·00	100·00	100·00

The Figure above shows the distribution of the district population by broad age-groups for males and females separately.

During the last decade the population of children aged 0—4 increased from 13·32 per cent to 15·44 per cent for males and from 14·34 to 16·29 per cent for females. Consequently the same trend was observed for the age-group 0—14. The percentage of males in the age-group 15—59 has decreased by less than one per cent in the last decade whereas the decrease in the percentage of females of the same age-group is negligible. The proportions of the population aged 60 and over are slightly lower both for males and females than 1951

The district population appears to be more youthful, i.e., it has a larger proportion of 0—14 age-group than the State average. The difference may be due to the temporary out-migration of working age persons to adjoining sugar farms and factories in Ahmadnagar district.

Dependency Ratio

The ratio between dependents (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

	Bhir District			Maharashtra		
	Youth	Aged	Total	Youth	Aged	Total
1951 Total .	79 7	11 6	91 3	69 9	9·3	79·2
1961 Total .. .	83 2	10 2	93·4	75·2	9·7	84·9
Rural ..	83 3	10 3	93 6	80 6	10·8	91·4
Urban . .	82 0	8 9	90 9	63 1	7 3	70 4

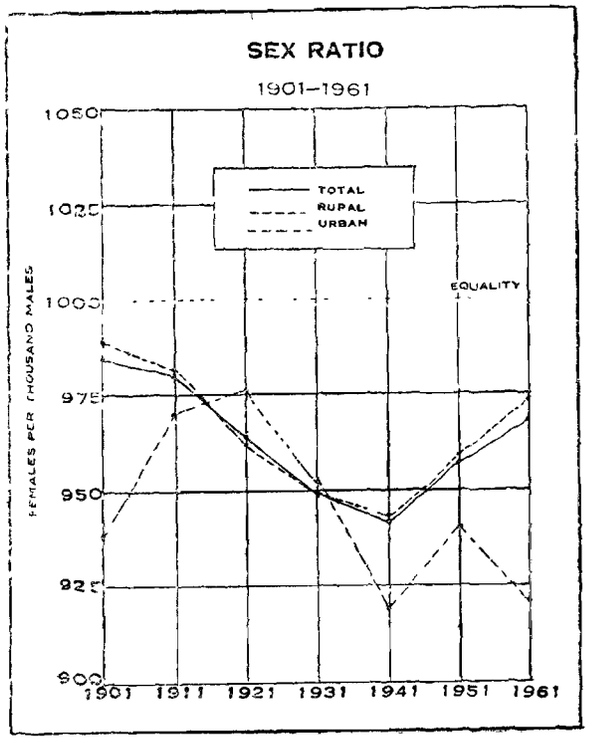

The youth component of the dependency ratio has increased both for the district and Maharashtra in 1961. The aged component has also increased for Maharashtra, but is slightly lower for the district than in 1951. The increase in the dependency ratio is the result of high fertility and declining mortality. Such trends lead to a younger population and result in increase in dependency. It may be seen that the dependency load is slightly more in rural areas than urban areas.

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

Year	Bhir District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	985	989	938	978	1,002	866
1911 .	980	981	971	966	1,000	796
1921 ..	963	962	976	950	954	776
1931 ..	949	949	952	947	987	790
1941 .	941	943	919	949	990	810
1951 .	957	959	940	941	1,000	807
1961 ..	968	973	921	936	995	801

Figure below shows the variation in sex ratios since 1901 for the district total, rural and urban areas separately :—

Since 1901 the sex ratio of the population of the district fluctuated between 985 and 941 compared to that of Maharashtra between 978 and 936. At each Census except 1941 the sex ratio for the district has been higher than that for Maharashtra. The sex ratio of the district has never been quite near to equality. It slowly reduced from 985 in 1901 to 941 in 1941 but has shown considerable improvement to 957 in 1951 and to 968 in 1961. The reversal of the trend of change in the sex ratio is partly due to the seasonal out-migration of male workers to adjoining areas.

The sex ratios for urban population were higher than those for rural population only in 1921 and 1931. The urban sex ratio has declined very sharply from 940 in 1951 to 921 in 1961.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas :—

Age-group	Total	Rural	Urban
0—14	977	983	925
15—34	1,040	1,050	956
35—59	869	871	847
60+	903	897	967
All ages . ..	968	973	921

The sex ratio increases from 977 for age-group 0—14 to 1,040 for age-group 15—34. It drops down to 869 for age-group 35—59 and further increases to 903 for age-group 60+. The same pattern is observed for rural and urban areas. This reveals the preponderance of females in the age-group 15—34 in rural areas. The seasonal out-migration of male workers in the age-group 15—34 from rural areas will partly explain this phenomenon.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows :—

	Total	Rural	Urban
BHIR DISTRICT.. ..	968	973	921
1. Georai Taluka..	977	978	957
2 Manjlegaon Taluka .	978	981	937
3 Ashti Taluka . ..	987	989	949
4 Bhir Taluka . ..	963	972	926
5 Patoda Taluka ..	999	999	..
6 Kaij Taluka	949	949	959
7 Ambejogai (Mominabad) Taluka.	952	965	896

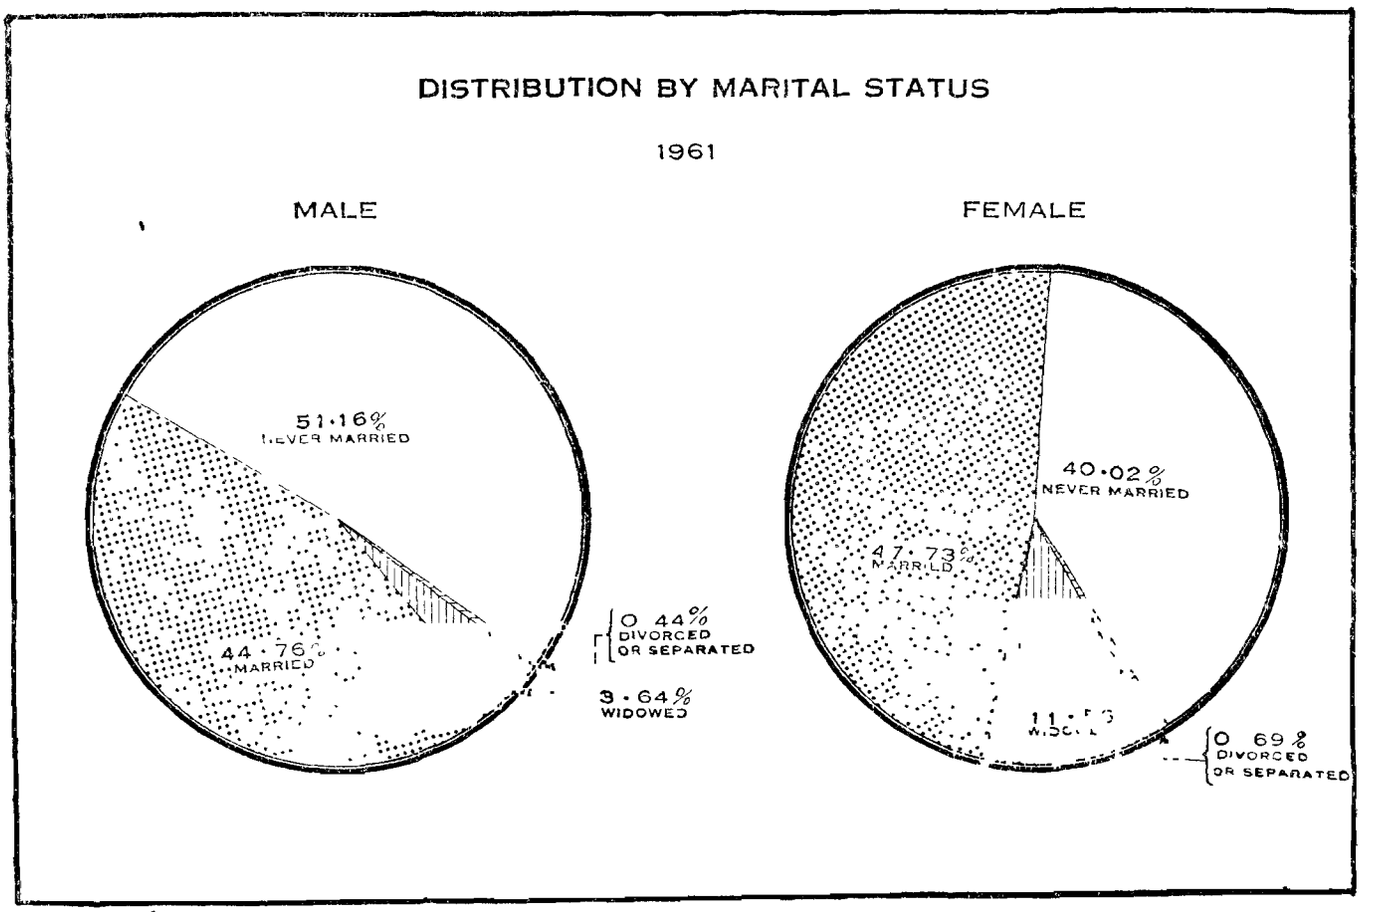

As in the total population of the district there is a deficiency of females in all the talukas of the district. Only in Patoda taluka the sex ratio almost approaches equality (sex ratio being 999). As usual the urban sex ratio is lower than the rural except for Kaij taluka where urban sex ratio is 959 against 949 in rural areas. Patoda and Ashti talukas have high sex ratios of 999 and 987 respectively and appear to be contributing mainly to the seasonal out-migration from the district.

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 .	100	96·85	80 74	3 08	18·85	0 07	0·37	.	0·04
	15—34 ..	100	27·45	2·74	70 24	91·27	1·98	5·40	0 33	0 59
	35—54 ..	100	2·74	0·38	87·96	67·61	8·84	31·49	0 46	0 52
	55+ ..	100	1·24	0 27	70·93	21·54	27·55	77 98	0 28	0·21
	All ages ..	100	48·61	35·19	46·43	51·08	4·74	13 41	0 22	0 32
1961	0—14 ..	100	98·29	90·39	1·66	9·43	0·04	0·11	0 01	0·07
	15—34 ..	100	28·55	2 70	69 15	92·36	1·46	3·49	0 84	1·45
	35—54 ..	100	1·90	0·26	90 32	70·03	7·03	28·76	0 75	0 95
	55+ ..	100	1 47	0 18	74 70	22·82	23·32	76 69	0·51	0·31
	All ages ..	100	51·16	40 02	44 76	47 73	3·64	11·56	0 44	0·69

Figure below shows the distribution of the district population by marital status for males and females separately :—

During the decade 1951—61, the proportion of never married increased both for males and females, the proportion of widowed decreased both for males and females. The proportion of divorced or separated persons is on increase but not to any great extent. All these changes contributed to the decrease in the proportion of married both for males and females. The changes in marital status were similar for males and females over the decade. The proportions of married and widowed persons are higher in rural areas. Urban areas have higher proportion of never married persons. The proportion of widowed for females is much higher than for males both in rural and urban areas. The increase in age at marriage for the total population could be observed from the marital status distribution by age-groups. The proportions of married in 1961 both for males and females in the age-group 0—14 are reduced to half of those in 1951.

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, i.e. the number of children 0—4 years age-group per 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group The proportion of widows of 15—44 years age-group to 1,000 married women of 15—44 years age-group is also shown for comparison :—

		Number of Children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of Children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of Widows per 1,000 married women (both in 15—44 years age-group)
1951 District	Total	658	754	115
1961 District	Total	752	844	83
	Rural .	754	843	83
	Urban ..	733	853	83

Over the decade the child woman ratio has increased from 658 in 1951 to 752 in 1961. It may be due both to a higher birth-rate and somewhat reduced infantile mortality. The child woman ratio in 1961 is higher in rural areas than urban areas. When the ratio is considered in relation to married women of 15—44 age, it is higher in urban areas. This may indicate either a higher fertility or a higher survival rate in urban areas. The number of widows per 1,000 married women (both in age-group 15—44) decreased from 115 in 1951 to 83 in 1961. The decrease in the incidence of widowhood over a decade is quite significant.

Migration

The 1961 Census showed the proportions of population enumerated at places of birth and other places as shown below.

83·84 per cent of the males were enumerated at their places of birth, 11·33 per cent males were born at other places within the district, 4·30 per cent outside the district but in Maharashtra and 0·53 per cent outside the State. The proportion of males migrated to the district is comparatively small and may be explained as there is no manufacturing industry of any significance in the district to attract outside labour. The Godavari bank areas do attract some seasonal agricultural labour from the neighbouring areas of Parbhani district but on the whole there is a net seasonal out-migration from the district.

Proportions of Population by Places of Birth.

(1)	Total population (2)	Place of enumeration (3)	Elsewhere in the District (4)	Outside the district but in Maharashtra (5)	Outside Maharashtra (6)
Persons	1 001,466	671,833	238,016	84,702	4,939
Males	508,827	425,857	57,559	21,816	2,704
Females	492,639	245,976	180,457	62,886	2,235
Percentage to total population—					
Persons	100 00	67 22	23 81	8 48	0·49
Males .. .	100 00	83 84	11 33	4 30	0 53
Females	100 00	50 04	36 71	12·79	0 46

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	968	973	921
0 — 4	1,022	1,024	1,003
5 — 9	1 010	1,016	959
10—14	874	884	797
15—19	1,011	1,045	797
20—24	1,191	1,210	1 042
25—29	999	993	1 063
30—34	961	960	974
35—39	897	900	868
40—44	918	926	850
45—49	853	857	818
50—54	852	846	918
55—59	741	743	713
60+	903	897	967

Sex ratios by five-year age-groups for total, rural and urban population of the district show that the rural-urban differentials are less in younger and older age-groups. These differentials are more significant in young adult age-groups, among which 15—19 and 20—24 age-groups are the most affected. The rural sex ratios in these age-groups are very high as compared to those for urban It is interesting to note that the urban sex ratio is not lower than that of rural areas for all the age-groups. It is higher than the rural sex ratio especially in adult age-groups 25—29, 30—34 and the older age-groups 50—54 and 60 and above. These age-groupwise sex ratios are influenced by age selective migration of adult male workers outside the district and boys for studies to urban areas. Preference in the age returns also influence them differently for different age-groups. No inferences can therefore be drawn without further local investigation

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and of non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52 ;—

(1)	Categories of Workers									Non-workers
	I (2)	II (3)	III (4)	IV (5)	V (6)	VI (7)	VII (8)	VIII (9)	IX (10)	(11)
District Total	31 41	14 12	3 92	3·34	0 85	0 63	2 00	0 42	4 05	39·26
Born at the place of enumeration	34 86	13·03	3 91	3 00	0 66	0·35	1 63	0·30	2 73	39·53
Elsewhere in the district	14 91	21 65	4·20	4 98	1 42	1·41	3 19	0 70	9 60	37·94
Outside the district	10 76	15 51	3 36	5 49	2 76	3 56	5 70	1 88	13 94	37·04

Percentage distribution of male workers and non-workers by place of birth shows that the proportion of non-workers among migrants is not much less This may indicate that a majority of male migrants reside with their families. The percentage of workers from among the migrants is lower in cultivation and higher in agricultural labour. The differences in the percentage distribution of migrants and non-migrants are more significant in the tertiary sector indicating that much of the migration to the district is for Government service and trade and other tertiary services.

Seasonal Migration

There appears to be a considerable volume of seasonal migration within the district as well as outside the district. A rough estimate can be obtained from the talukawise differences between the houselist population as on 1st October 1960 and the population enumerated on 1st March 1961. The differences in the sex ratios at these two reference dates also indicate the areas from or to which seasonal migration takes place.

Houselist population and the 1961 population for the district and each of the talukas of the district are as follows :—

District/Taluka	Population in lakhs			
	Houselist population (as on 1-10-1960)	Estimated houselist population at average growth rate	1961 Census final population (as on 1-3-1961)	Difference (Columns 3·4)
BHIR DISTRICT—				
Total	10·28	10·38	10·01	—0·37
Rural	9·28	9·37	9·03	—0·34
Urban	1·00	1·01	0·98	—0·03
1 Georai Taluka	1·37	1·38	1·35	—0·03
2 Manjlegaon Taluka	1·34	1·35	1·43	+0·08
3 Ashti Taluka	1·16	1·18	1·08	—0·10
4 Bhir Taluka	1·63	1·64	1 60	—0·04
5 Patoda Taluka	1·04	1·05	0·91	—0·14
6 Kaij Taluka	1·72	1·74	1·64	—0·10
7 Ambejogai (Mominabad) Taluka	2·02	2·04	2·00	—0·04

Patoda, Ashti and Kaij talukas are areas from where bulk of the seasonal migration takes place while Manjlegaon is the only taluka in the district which attracts such migration. But that taluka gets seasonal migrants from neighbouring areas of Parbhani district also. The main stream of seasonal migration is thus outside the district and specially to the sugarcane-growing areas in Ahmadnagar district. The volume of this migration towards Ahmadnagar can be estimated between 25 and 30 thousands. These people move often with their carts and bullocks, and work on sugar farms as labourers or on transporting cane from the farms to factories.

Sex ratios for the two reference dates for the district and talukas are as follows :—

		Houselist population (1-10-1960)	1961 Census final population (1-3-1961)
BHIR DISTRICT	Total ..	957	968
	Rural ..	960	973
	Urban .	929	921
1 Georai Taluka .	.	978	977
2 Manjlegaon Taluka .	..	977	978
3 Ashti Taluka .	.	974	987
4 Bhir Taluka .	. ..	945	963
5 Patoda Taluka	..	961	999
6 Kaij Taluka .		934	949
7 Ambejogai (Mominabad) Taluka		950	952

The sex ratio for rural areas changed from 960 on 1st October 1960 to 973 on 1st March 1961 while that for urban areas was reduced from 929 to 921. It indicates that the urban areas within the district do attract some seasonal male migration. The urban population on 1st March 1961 is, however, two thousand less than that on 1st October 1960. One of the reasons may be that some people temporarily migrate to urban areas before the beginning of October but return before the beginning of March.

Sex ratios for Georai and Manjlegaon talukas at those two dates are not much different. But there are very substantial differences between the two sex ratios for Ashti, Patoda, Bhir and Kaij talukas. This indicates that the out-migration is predominantly of males.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows:—

	Total	Rural	Urban
Single member .	6·48	6 23	8·68
2—3 members	22 51	22 22	25·13
4—6 members..	44·04	44 49	39 99
7—9 members	19 70	19 85	18·34
10 members and more .	7 27	7 21	7·86
All Sizes . .	100 00	100 00	100·00

6·48 per cent of the sample households are single member households Among the various sizes of households 4 to 6 member households are more common than others and account for 44·04 per cent of the total sample households. The table shows that small-sized households have a higher percentage in urban areas than in rural areas. It is significant that the percentage of households having more than 10 members is slightly higher in urban areas than rural areas The reason perhaps is that boys from rural areas are going for education to urban areas and for want of hostel or boarding facilities might be staying with relations.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition The percentage distribution of population of sample households by relationship for the district is shown below :—

	Total		Rural		Urban	
(1)	Males (2)	Females (3)	Males (4)	Females (5)	Males (6)	Females (7)
(1) Heads of households .	34 42	3 60	34 48	3 53	33·90	4·27
(2) Spouses of heads of households	0 10	30 41	0 09	30 50	0 18	29 64
(3) Married sons .	9 26		9 58	.	6 35	.
(4) Other married relations	4 78	17 57	4 82	17·90	4·40	14 52
(5) Never married, widowed or divorced relations ..	49 83	48 16	49 43	47 82	53 49	51 25
(6) Unrelated persons .	1 61	0 26	1 60	0 25	1 68	0 32
Total ..	100 00	100 00	100 00	100 00	100 00	100 00

34 42 per cent of the males are the heads of households as against 3·60 per cent of the females. Married sons form 9 26 per cent of the male population. 49 83 per cent males and 48 16 per cent females (which form the largest groups) are never married, widowed or divorced relations, the majority of them being never married children of the heads. Percentages of unrelated persons are 1 61 for males and 0 26 for females. More than 30 per cent of the females are spouses of the heads. Daughters-in-law and married daughters or sisters of the heads of households contribute to the higher percentage of females among other married relations. The differences in the household composition of rural and urban areas are the higher percentage of never married, widowed or divorced relations and the lower percentage of married sons in urban areas. The lower percentage of married sons in urban areas may be due partly to increased mobility of population in urban areas.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Prof K V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below:—

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951 .	826	*144	*437
Actual 1961 . .	1,001	176	518
Projected 1966	1,138	199	581
Projected 1971	1,281	224	649
Projected 1976	1,444	252	725
Projected 1981	1,630	285	812

*Estimated figures taken from 1951 Sample Census Tables

LANGUAGES

Table C-V at page 141 in Part II shows the population by nine major languages for the district and each taluka and town, separately. The distribution of languages by rural and urban areas of the district is as follows:—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari ..	1·64	1 80	0 19	98·86	1·14
(2) Bhilli ..	0 07	0 08	.	100 00	..
(3) Gujarati ..	0·10	0·06	0·42	57·71	42·29
(4) Hindi ..	1·40	0 93	5·64	60 21	39 79
(5) Kaikadi ..	0 11	0·12	0 04	96·33	3·67
(6) Kannada ..	0·05	0·04	0·21	61·58	38 42
(7) Marathi ..	86·57	89·20	62·45	92·89	7 11
(8) Telugu ..	0 83	0 76	1·58	81·41	18·59
(9) Urdu ..	9 02	6·82	29·09	68·22	31 78
(10) Others .	0·21	0 19	0·38	82·15	17 85
All languages ..	100 00	100 00	100 00	90 15	9 85

Marathi is the principal language and is the mother-tongue of nearly 86 6 per cent of the population. In rural areas Marathi speakers account for 89·2 per cent of the population. They make 62·5 per cent of the population in urban areas. Urdu has the second largest number of speakers and makes 9 per cent of the total population. It has more speakers in urban areas where they make as much as 29·1 per cent against only 6·8 per cent for rural areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows:—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari . . .	0 25	1 44	1 64
(2) Bhilli .. .	0 01	0 06	0 07
(3) Gujarati .	0 12	0 07	0·10
(4) Hindi	1·75	1 28	1·40
(5) Kaikadi	0 05	0 09	0·11
(6) Kannada . ..	0 46	0 11	0·05
(7) Marathi	86·81	86·61	86·57
(8) Telugu	0 74	0 88	0·83
(9) Urdu	9·57	9·25	9·02
(10) Others	0 24	0 21	0·21
All languages	100·00	100·00	100·00

The proportions of Marathi and other languages have not much changed from 1901 to 1961.

RELIGIONS

Table C-VII at page 142 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists	2 17	2 25	1 45	93 43	6 57
(2) Christians	0 04	0 03	0 15	67 48	32 52
(3) Hindus	88 11	90 33	67 82	92 42	7 58
(4) Jains	0 51	0 40	1 50	70 79	29 21
(5) Muslims	9 14	6 96	29 03	68 70	31 30
(6) Others	0 03	0·03	0 05	83 51	16 49
All religions	100 00	100 00	100 00	90 15	9 85

Nearly 88·1 per cent population reported their religion as Hindu. Muslims are 9 14 per cent. They are found more in urban areas where their proportion to the total urban population is as much as 29 03 per cent against only 6·96 per cent in rural areas. Christians and Jains are similarly more concentrated in urban areas. Hindus and Buddhists are more numerous in rural areas than in urban areas.

The comparative position of the religions in 1901 and 1961 is as follows :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists		2 17
(2) Christians	0 02	0 04
(3) Hindus	90 39	88 11
(4) Jains	0·60	0 51
(5) Muslims	8·82	9 14
(6) Others	0 17	0 03
All religions	100 00	100 00

The proportion of Muslims has slightly increased from 8 8 per cent in 1901 to 9·1 per cent in 1961. The percentage of Hindus has decreased from 90 39 in 1901 to 88·11 in 1961. This is because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists in 1961 is almost the same as in 1901.

Sex ratios in 1961 by main religions are as follows :—

Christians 1,079, Buddhists 1,069, Hindus 967, Muslims 962, Jains 937 and all religions 968.

The differences are due to rural-urban concentrations and may also have been partly affected by the seasonal migration outside the district.

SCHEDULED CASTES

Table SCT-I-Part A at page 148 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually, 30 castes are notified as Scheduled Castes in the district but only 9 were reported in the district in the 1961 Census.

The distribution of the Scheduled Castes population by rural and urban areas is as follows :—

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	68,478	66,794	13 51	93 80	6 20
(1) Bhangi	25	12	N	13 51	86·49
(2) Chambhar †	7,281	7,164	1·44	93·06	6 94
(3) Dakkal	10	3	N	100·00	..
(4) Dhor	1,114	1,036	0 21	62·93	37 07
(5) Ellamalwar	86	87	0·02	100 00	.
(6) Holeya	460	376	0 08	100 00	.
(7) Mahar	36,571	35,891	7·24	94 10	5 90
(8) Mala Jangam	5	9	N	100·00	..
(9) Mang‡	22,907	22,216	4·51	94 93	5 07

*Inclusive of persons from the Scheduled Castes who have not reported their individual castes. N=Negligible.
†Includes Mochi. ‡Includes Mang Garodi

The remaining 21 Scheduled Castes for which no one was returned in the district in 1961 Census are as follows :—

(1) Anamuk, (2) Aray, (3) Arwa Mala, (4) Beda Jangam, (5) Bindla, (6) Byagara, (7) Chalvadi, (8) Holeya Dasari, (9) Kolupulvardlu, (10) Madiga, (11) Mala, (12) Mala Dasari, (13) Mala Hannai, (14) Mala Masti, (15) Mala Sale, (16) Mala Sanyasi, (17) Manne, (18) Mashti, (19) Mitha Ayyalvar, (20) Samagara, (21) Sindhollu.

Out of the nine Scheduled Castes enumerated in the district, the largest number is of Mahars. The second largest group is of Mangs and the third of Chambhars. The remaining six Scheduled Castes have together 3,223 persons which makes 0·32 per cent of the total population of the district. Bhangi, Dakkal, Ellamalwar and Mala Jangam have very small populations in the district.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is shown in the next column.

All Scheduled Castes—	Percentage to total population in Total area	Rural areas	Urban areas
1951	15·92	16·61	9·96
1961	13·51	14·05	8·51

The reduction of the proportion from 15·92 to 13·51 is the result of a large number of persons from Mahar caste returning their religion in the 1961 Census as Buddhist or Nav-Bauddha. Due to the change of religion they are not treated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. But for the change of religion proportion of Scheduled Castes to the total population would have been over 16 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (1) and B (1) at page 152 in Part II show the literacy and educational levels for each Scheduled Caste.

The percentages of literacy for the district population, for all Scheduled Castes and each Scheduled Caste, are as follows :—

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	12 94	21·85	3·79	34 75	49·10	19·18
All Scheduled Castes . ..	5·52	10 09	0 85	18 85	31·75	5·28
(1) Bhangi	No Literates			12·50	13 04	11·11
(2) Chambhar	6·78	12 45	1 05	23·65	38·48	7·34
(3) Dakkal .. .	No Literates				.	
(4) Dhor	13·97	23·50	3·69	17·06	29·85	3·38
(5) Ellamalwar	22 54	34 88	10·34	.	..	..
(6) Holeya	3 83	6·52	0·53	..	..	..
(7) Mahar	6 23	11 39	0 99	22 83	38 52	6 05
(8) Mala Jangam	7 14	20 00	No Literates			
(9) Mang	3 69	6·85	0·43	10·01	16·49	3·64

The Scheduled Castes as a group appear to be much behind in literacy than the general population of the district. The females particularly lag very much behind in literacy. They do not appear to have yet taken advantage of the educational facilities and concessions available in the district.

Economic Activity

The industrial classification of persons at work and non-workers for the district average, for all Scheduled Castes and for each Scheduled Caste is shown in the next column.

	Percentage of workers in categories			
	Cultivation	Agricultural labour	All other activities	Non-workers
District Average	28 76	16 11	9 26	45 87
All Scheduled Castes	6 23	39 94	12 96	40 87
(1) Bhangi		2 70	48 65	48 65
(2) Chambhar	10 83	24 69	19 80	44 68
(3) Dakkal .				100 00
(4) Dhor	4 60	15 91	28 79	50 70
(5) Ellamalwar .	52 02		1 74	46 24
(6) Holeya	5 74	33 25	19 86	41 15
(7) Mahar ..	6 63	41 09	12 16	40 12
(8) Mala Jangam	14 29			85 71
(9) Mang ..	4 03	44 48	11 18	40 31

The proportion of workers is higher for Scheduled Castes than the district average. The proportion of workers in cultivation is far below and that of agricultural labourers much above the district average. Fewer persons from the Scheduled Castes own lands and their participation in agriculture is more as agricultural labourers.

Size of Land Cultivated

Tables C-I and SCT-V-Part A at pages 136 and 153 in Part II show a broad classification of cultivating sample households by size of cultivated land for the district rural population and all Scheduled Castes in rural areas, respectively. The proportions are as shown in the next column.

Out of a sample of 21,754 cultivating households 1,037 or 4·77 per cent households are from the Scheduled Castes against their population which is 14·05 per cent of the total rural population. 34·52 per cent and 27 per cent of the cultivating households of the Scheduled Castes are cultivating less than 5 acres and 5 to 10 acres of land as against the corresponding averages of 12·17 per cent and 19·68 per cent for the district. The percentage of households cultivating land over 10 acres among Scheduled Castes is 38·48 per cent only as against the corresponding average of 68·15 per cent for the district. The proportion of cultivating households is thus smaller in the case of Scheduled Castes and that is so particularly for cultivation holdings in larger size groups.

Size of land cultivated	District rural population		All Scheduled Castes	
	No of sample households	Percentage	No of sample households	Percentage
Cultivating households	21,754	100 00	1,037	100 00
Less than 5 acres	2,648	12 17	358	34 52
5 to 9 9 acres ..	4,280	19 68	280	27 00
10 to 29 9 acres ..	10,258	47 15	324	31 25
30 acres and over	4,568	21 00	75	7 23

SCHEDULED TRIBES

Table SCT-I-Part B at page 150 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Only two Scheduled Tribes are reported in the district in the 1961 Census. Their total population, however, is only 2,367 or 0·24 per cent of the total population.

The distribution of the Scheduled Tribe population by rural and urban areas is as shown below.

The remaining five Scheduled Tribes for which no one was returned in the district in 1961 Census are as follows :—

(1) Andh, (2) Gond, (3) Kolam, (4) Koya and (5) Thoti.

Bhils with 2,224 persons is the major Scheduled Tribe in the district. Pardhan, the only other tribe, has only 142 persons.

Bhils are found in all talukas of the district and predominantly in Ashti, Georai and Bhir talukas. Balaghat has been their traditional habitat. Pardhans are from the talukas of Georai, Manjlegaon, Kaij and Bhir. Both the tribes are found mostly in rural areas.

The Scheduled Tribe population in the district has increased from 1,482 in 1951 to 2,367 in 1961.

Literacy and Education

The Scheduled Tribes in the district are very much behind in education The very few persons from among the Bhils who are in urban areas are all illiterate In the rural areas the literacy percentage for Bhils is 5·49 per cent for males and only 0 95 per cent for females.

Economic Activity

More than 80 per cent of the workers from the Scheduled Tribes work as cultivators and agricultural labourers. Bhils have more or less the same proportions of workers and non-workers as for the total population of the district.

Name of Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes .	1,152	1 215	0 24	99 45	0·55
(1) Bhil ..	1,063	1,161	0·22	99 42	0 58
(2) Pardhan	88	54	0 02	100 00	.

* Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of the Standing Committee which is the most powerful committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amount for the amelioration of the conditions of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(*i*) *Educational* —These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, nomadic and semi-nomadic tribes, Vimukta Jatis and other Backward Classes. 4,385 students benefited from and Rs. 67,493 were spent on these schemes during the year 1962-63. Fourteen backward class hostels and 6 cosmopolitan hostels in the district were given grant-in-aid to the extent of Rs. 1,10,677 during the same year.

(*ii*) *Schemes for Economic Uplift* —These include schemes of granting loan-*cum*-subsidy for cottage industries and professions. Rs. 10,000 were spent on 46 beneficiaries. Assistance for purchase of milch cattle to the Scheduled Castes and other backward classes was given to the extent of Rs. 3,125 to 18 beneficiaries. Rs. 1,000 were given as vocational aid to 12 persons from Vimukta Jatis and Rs. 796 were spent on one Sevak who was appointed for their uplift during 1962-63. Rs 1,300 were also given for purchase of plough bullocks to five persons from Vimukta Jatis in the same year.

(*iii*) *Housing* —A number of housing societies of backward classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loans and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other Backward Classes is also provided. Rs 6,100 were spent under this scheme on 68 beneficiaries during 1962-63.

(*iv*) *Drinking Water Wells.*—An amount of Rs. 13,200 was spent under this scheme during the year 1962-63. Rs 800 were spent for repairs of four wells in or near Scheduled Caste localities while Rs. 12,400 were spent for sinking 16 drinking water wells for Scheduled Castes

(*v*) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Scheduled Castes. Medicines are given to the Scheduled Caste patients according to the certificate regarding non-availability of medicines from the Civil Hospital. Rs. 1,114 were spent under this scheme for 63 beneficiaries during the year 1962-63.

(*vi*) *Schemes of Removal of Untouchability* — These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, films shown and gatherings are addressed at fairs and other places Kirtan programmes and *melas*, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs 4,508 were spent under the schemes, during the year 1962-63.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan Schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960 All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Castes converted to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

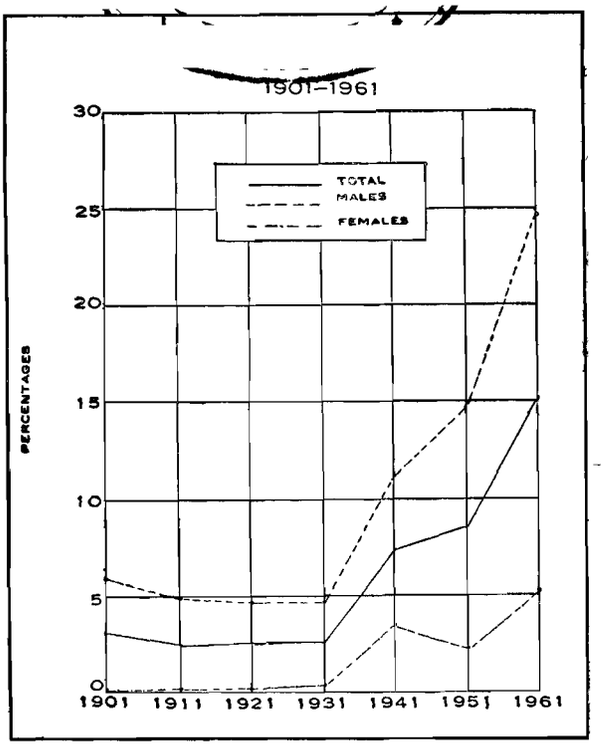

Educationally the district has been one of the most backward areas in the State. Even now there are only a few facilities for higher and technical education. The facilities for primary and secondary education have however increased nearly threefold during the Second Plan period and the 1961 literacy rate is as a result 75 per cent higher than that of 1951.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 was as follows :—

	Total	Males	Females
1901	3 02	5 93	0 06
1911	2 54	4·91	0 12
1921	2 51	4·65	0 29
1931	2 49	4 42	0 45
1941	7 42	11 15	3 46
1951	8 60	14 70	2 20
1961	15 09	24 60	5·27

Figure to the right shows this growth of literacy in the district for total population, males and females separately.

The literacy percentage has increased nearly five times during the last sixty years. The decade 1951—61 has shown a substantial improvement. The improvement in literacy is more pronounced among females. However there was a setback in female literacy in 1951 compared to 1941. The sharp decline of female literacy from 3·4% in 1941 to 2·20% in 1951 needs further investigation. A large number of primary schools have been opened after 1950.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately :—

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA . ..	29·82	42·04	16 76	21 46	33 51	9 34	51·07	61 62	37 90
BHIR DISTRICT .	15 09	24 60	5·27	12·94	21·85	3 79	34 75	49 10	19 18
1 Georai Taluka . ..	13·23	22 13	4·12	12·17	20 81	3 34	32 28	45 57	18 39
2 Manjlegaon Taluka . .	12·39	20 72	3·87	11·34	19·31	3·22	28 30	41·74	13·95
3 Ashti Taluka	13·86	22·58	5·03	12·77	21·23	4·21	36·47	49·90	22·31
4 Bhir Taluka	18·16	28·39	7·54	13·05	22 09	3·76	37 74	51 96	22·38
5 Patoda Taluka	14·11	23·68	4·54	14·11	23·68	4·54	..	..	..
6 Kaij Taluka	13·92	23·17	4·18	13·24	22·38	3·61	28·22	39·81	16 12
7 Ambejogai (Mominabad) Taluka	17 91	28·66	6·63	13·96	23·44	4·15	35·19	50·68	17·91

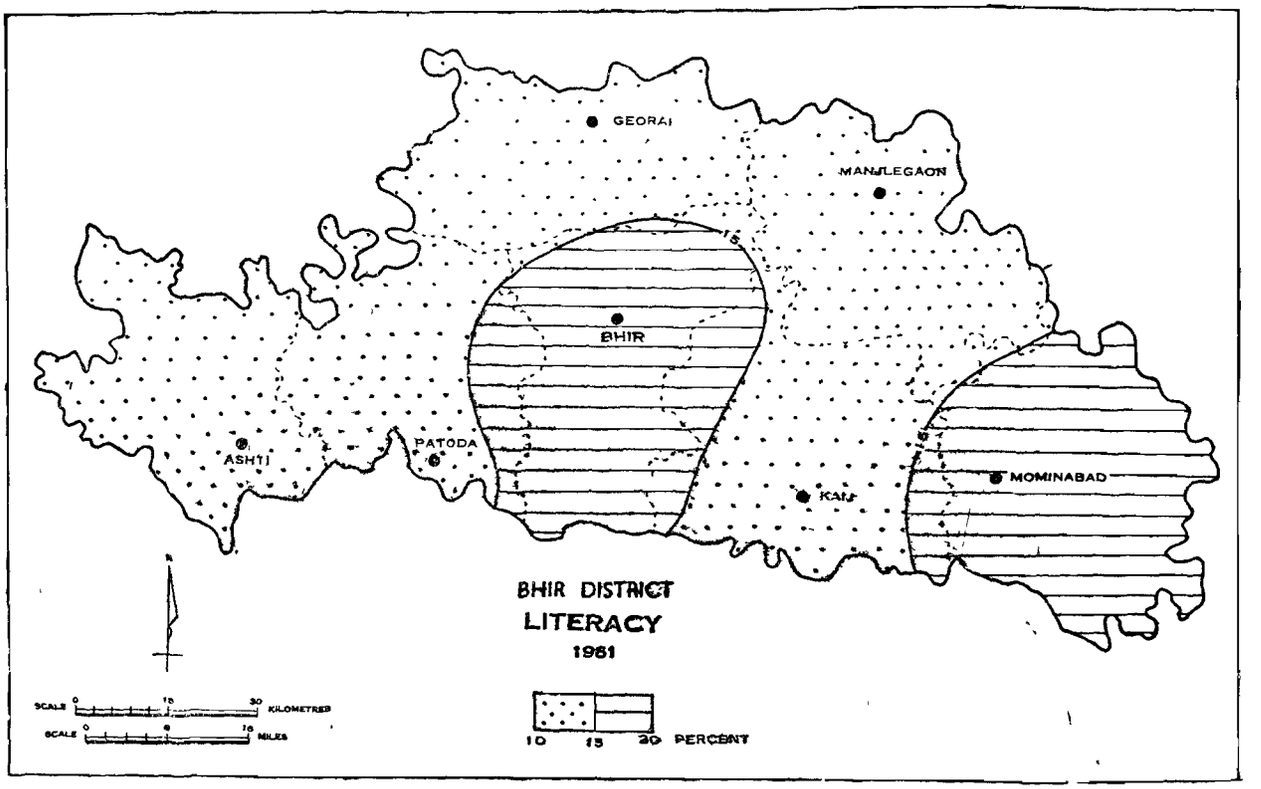

Figure above shows the spread of literacy in the district by isoplyths Bhir and Ambejogai (Mominabad) talukas have large urban populations and have higher literacy rates for the taluka as a whole. But the rural areas in both these talukas do not have higher proportions of literates than those of other talukas. In fact Patoda taluka has the highest literacy for rural areas, for total, males and females. The reason is that many enclave villages which were formerly under Ahmadnagar district are now included in Patoda taluka. Bhir taluka has the highest literacy both for males and females as far as urban areas are concerned

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as follows. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Low levels of literacy in higher age-groups for total population indicate the absence of sustained educational activity over a long period. The growth in the educational facilities in recent years may perhaps require a decade more to be fully reflected in the literacy rates.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All Ages	15 09	24 60	5 27	12 94	21 85	3 79	34 75	49·10	19·18
5—14	19 27	28·82	9 23	17 02	26·46	7·17	39 61	49 31	28 65
15—34	21·23	35·94	7 09	18·02	31·86	4 85	48 74	69 30	27·24
35—59	13 49	23·14	2·37	11·37	20 01	1·46	34 14	53 34	11·47
60 and above	9·29	16·89	0·88	7 76	14·24	0 54	25·36	45 72	4 30

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as follows :—

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV Multi-teacher	Middle I-VII
Total No. of schools	993	18	83	7	641	196	43
Central Government	1	.	.	..	1	.	.
State Government	985	18	88	7	640	189	43
Private	7					7	..

There has been a rapid growth in the number of primary schools in the district during the last ten years. Their number increased from 427 in 1951 to 683 in 1956 and to 973 in 1961. On 31st March 1962, it stood at 993. A special feature of primary education in the Aurangabad Division is that majority of the schools are Government managed. The Nizam's Government had, prior to 1947, imposed severe restrictions on opening of private schools and as a result very few private institutions could work in the area.

Out of 993 primary schools, 986 are managed by the Government (now handed over to Zilla Parishad) and only seven are managed by private institutions. The State Government's share (in the year 1961-62) was 99 9 per cent of the total expenditure. The Government expenditure on primary education is incurred through grants-in-aid to the Zilla Parishad and building loans and grants to primary teachers' training colleges. Wards of parents whose annual income does not exceed Rs. 1,200 get free education. Students from Scheduled Castes and Scheduled Tribes also get free education. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made steady progress in the district. On 31st March 1962, the number of basic schools was 113.

By 31st March 1962, seven towns and 893 villages in the district had primary schools. 138 villages did not have even schooling facilities. Average population served by a primary school in the district is 1,021 (as shown in table below) as against 971 in Satara district. In order to attain the Satara average the district should have 1,031 primary schools. Total number of primary teachers was 1,874. Out of them, 520 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Bhir District	Maharashtra
Average population served by a primary school	1,021	1,135
Average area served by a primary school (sq. miles)	4 3	3 4
Pupils per teacher	35	38
Pupils per school	66	127
Average annual salary per teacher.. (Rs)	1,102	1,250
Average annual expenditure per school (Rs)	2,352	4,903
Average number of teachers per school	1·9	3 3
Percentage of trained teachers . ..	27·7	64 8

The scheme of Free Primary Education is in force in the district since 1922.

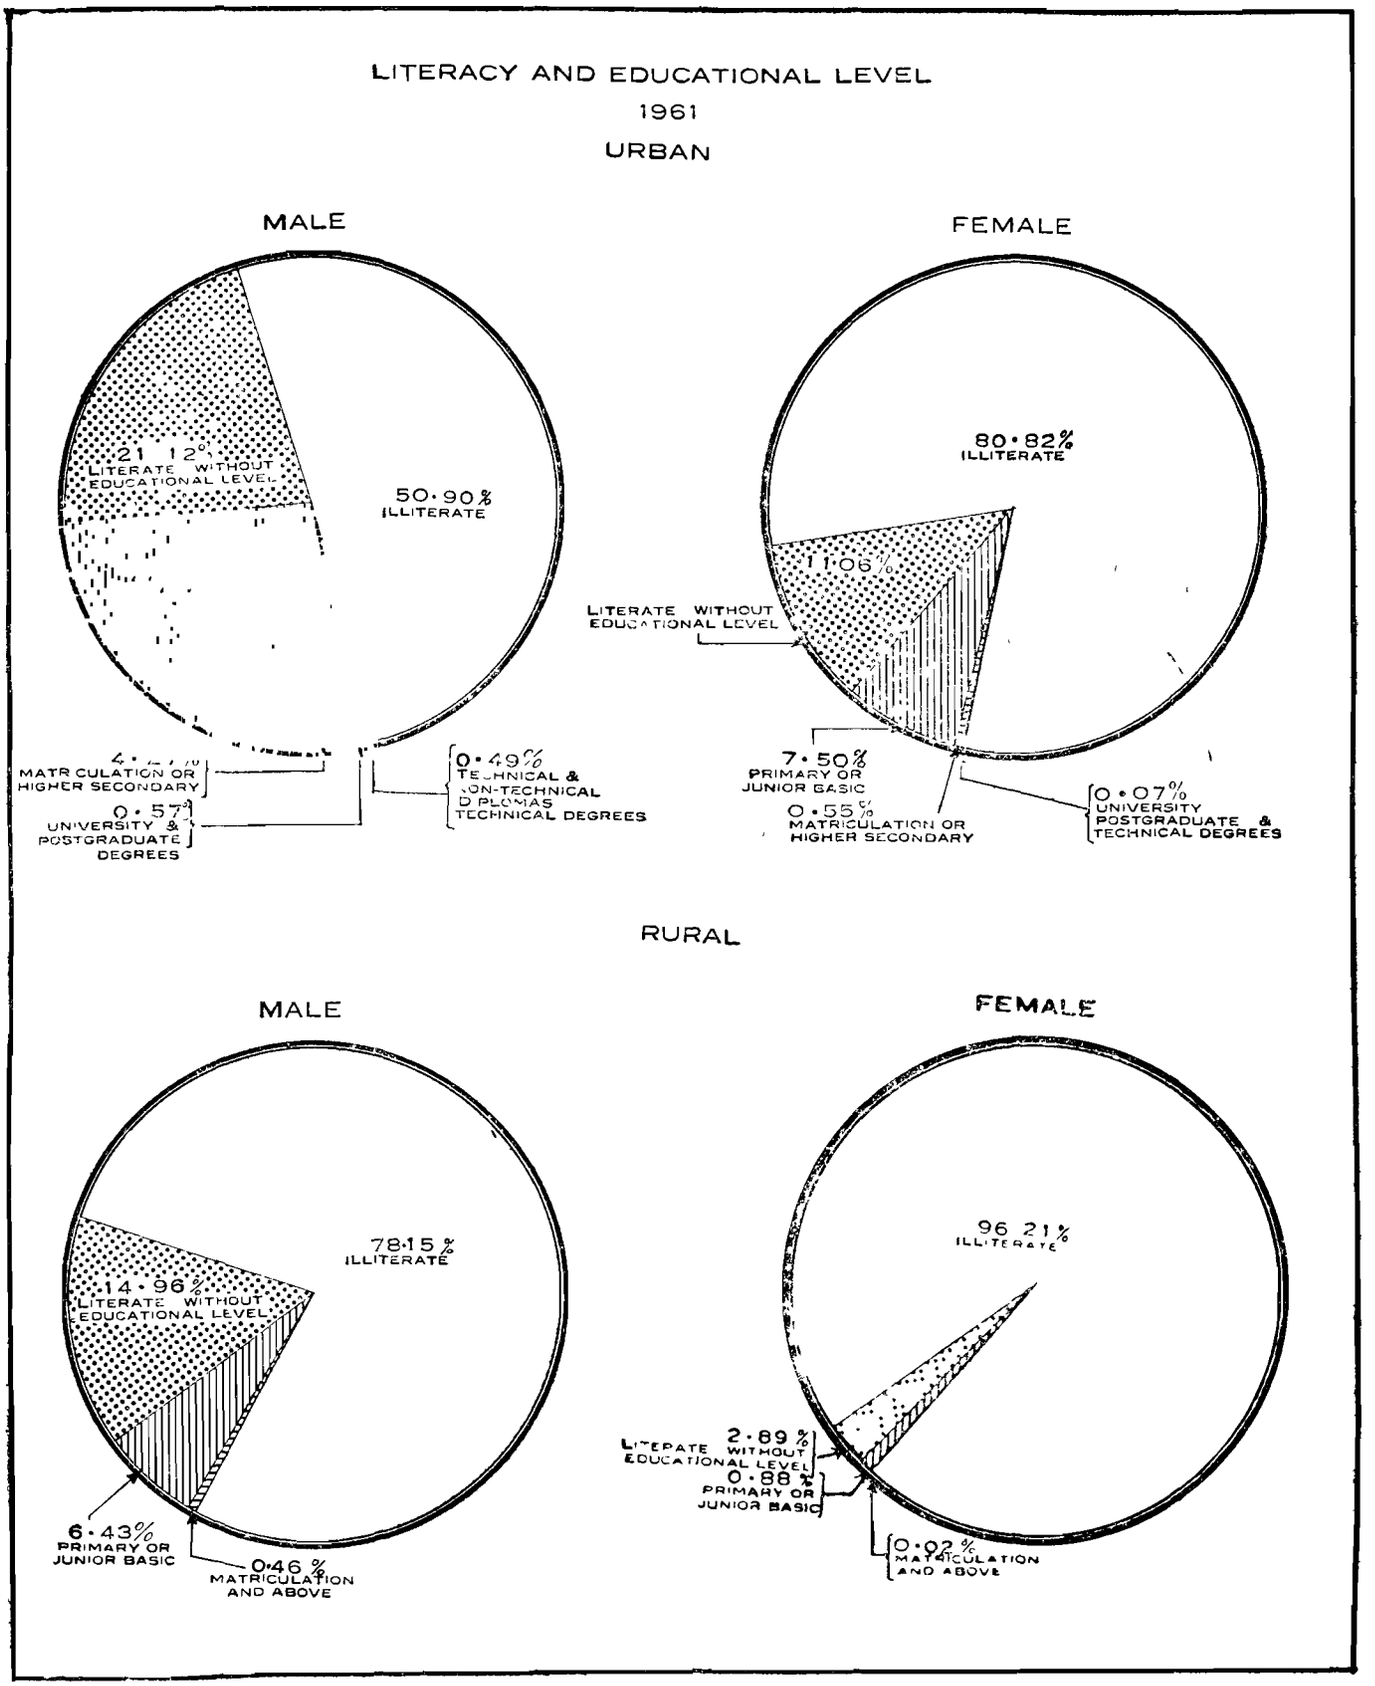

One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11. A provision of Rs. 60 50 lakhs has been made for primary education in the district. During the Third Plan period, additional 1,107 teachers would be appointed in primary schools. The number of students is expected to rise by 55,350. Similarly, it is proposed to build 227 class rooms during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational high schools	Higher secondary schools		Middle secondary schools
			Multi-purpose	Ordinary	
State	19	..	3	15	1
Municipal	..	..	..	..	..
Private	19	..	..	16	3

Total number of students on roll as on 31st March 1962 was 11,675. Out of them 9,801 were boys and 1,874 girls. Total number of teachers was 531. Out of them 321 were trained teachers. Percentage of trained teachers was thus 43·5. Other indices of secondary education compared to the State averages are as follows :—

	Bhir District	Maharashtra
Population served by each high school ..	26,679	13,805
Area served by each school (sq miles) ..	112 1	40 8
Pupil-teacher ratio . .	22	25
Pupils per secondary school .	307	338

Average annual expenditure (direct) per secondary school . (Rs)	28,130	39,543
Average No of teachers per secondary school	13·9	13 7

Figure on page (28) shows the proportions for literacy and different educationl levels among males and females for rural and urban areas separately.

The progress of secondary education in the district during 1951—61 is also quite remarkable. The number of secondary schools increased from 16 in 1955-56 to 35 in 1960-61 and to 38 in 1962. The secondary schools are dispersed throughout the district. Georai, Manjlegaon and Patoda have two each which is the smallest number in the district. Ambejogai (Mominabad) has as many as 13 secondary schools. Compared with the average area and population served by a secondary school in Maharashtra the district should have many more secondary schools spread over in rural areas. Satara district which stands highest in rural education had 150 secondary schools in 1962.

Out of 38 secondary schools, 50 per cent are managed by Government and the remaining by private institutions. The Government share in total expenditure on secondary education (in 1961-62) is 81·7 per cent and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 25,000 by 1965-66 and to 35,000 by 1970-71.

H. S. C. and H. S. (M. P.) S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts these public examinations at the end of the secondary school course. These are different from S. S. C. examinations held in Bombay and Poona Divisions. Two examinations are held every year and Bhir and Ambejogai (Mominabad) are the examination centres in the district. The number of candidates who appeared and passed from these centres during the years 1962 and 1963 are as follows :—

	H S C		H S (M. P) S C.	
	Appeared	Passed	Appeared	Passed

October 1962	235	99	.	.
Total ..		542		41

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. There are only two colleges in the district. The colleges now provide education in Arts, Science and Commerce. The number of college students was 521 in 1961. Many students from the district still go to colleges at Aurangabad and Nanded. Both the colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings.

Technical Education

No facilities for technical education are available in the district.

Libraries

There are nine libraries (as on 31st March 1962) in the district which are recognised by the Government of Maharashtra. These libraries together got a Government grant of Rs. 897 in 1961-62.

Printing Presses, Journals and Newspapers

There are five printing presses. There is not a single daily or a journal published in the district.

Radio Licences

The number of radio licences in the district was 703 in the year 1960-61.

Cinema Theatres

There are nine permanent cinema theatres and one touring theatre in the district, on 21st December 1963.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health Activities in the district.

Drinking Water Supply

Column 5 in the Village Directory in Part I shows the sources of supply and adequacy of drinking water for each village in the district.

Two towns have piped water supply. Out of the remaining five towns and 1,031 inhabited villages, 224 draw drinking water from rivers, 6 from nallahs, 1 from tank, 593 from wells and 212 have more than

one of these sources of water. Drinking water supply is not adequate in summer in 4 towns and 218 villages.

Guinea-worm Infection Control

Step-wells, nallahs and ponds from which water is used for drinking purpose are the main sources of the spread of guinea-worm infection. In all 23 villages covering a population of about 37,000 were affected.

In order to check the spread of this infection 112 wells and 6 nallahs were disinfected in the district.

Sixteen permanent and 4 temporary step-wells were converted into draw wells.

Malaria Eradication

During 1958 a malaria control unit was established at Bhir. Four sub-units are now functioning for Georai, Ambejogai (Mominabad), Patoda and Bhir talukas. The district unit undertakes rounds of spraying of DDT. The spraying rounds have so far covered a cumulative total of 10 lakhs dwellings. Twenty surveillance inspectors follow up malarial fever cases in the district.

Cholera Control

A mobile hospital unit functioned for cholera control at Mominabad during 1960-61. Primary Health Centres help the unit in undertaking measures to control the epidemic. Annual average performance on the preventive side from 1957 to 1960 is 75,000 anti-cholera innoculations and disinfection of about 3,600 wells.

Leprosy Control

During 1960-61, six institutions were functioning at taluka headquarters for leprosy control. Clinics are set up at weekly bazar places.

Anti-T B.

During the Second Plan period, a full-fledged T. B. sanatorium was set up at Ambejogai (Mominabad) 1,500 patients were treated during the year 1960-61.

Control of Smallpox

A campaign of mass vaccination against smallpox was undertaken in 1958-59 and 1959-60. One and a half lakh people are vaccinated annually.

Family Planning Centres

Family Planning Centres were set up at eight places in the district in 1960-61.

Medical Facilities

Medical facilities available in the district are shown in Table 17 in Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private practitioners, hospitals and dispensaries are not shown there.

The number of doctors has gone down from 18 in 1955 to 16 in 1960. The number of nurses has, however, increased from 12 in 1955 to 19 in 1960. The number of beds has also increased from 204 in 1955 to 342 in 1960. The number of indoor patients increased from 2,556 in 1955 to 4,634 in 1960. The number of outdoor patients also increased from 222,954 in 1955 to 322,690 in 1960.

Hospitals —There are two Government Hospitals. One of them is at Bhir and is called the District Hospital. A new building for this hospital is being constructed at Bhir. The other hospital is at Ambejogai (Mominabad) and is known as the General Hospital.

Dispensaries.—There are eight Government dispensaries in the district. Ambejogai (Mominabad) and Kaij talukas having two each and Georai, Patoda, Ashti and Manjlegaon talukas having one each.

Primary Health Centres.—At the end of 1960, there were seven primary health centres functioning at Yellamb-ghat, Renapur, Kada, Ghatnandur, Raimoha, Tadsonna and Lamani Tanda. During the Second Plan period over a lakh of patients were treated at these centres.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 595.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classifications by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 23 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

About 64 per cent of all the houses are used as dwellings, 22 per cent as cattle-sheds, etc., 8 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories and schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 31·3 in 1951 to 46·0 in 1961. The number of persons per residential house has, however, decreased from 6·3 in 1951 to 5·16 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by " owned " and " rented " categories, 86 per cent of the dwellings in the district are owned and only 14 per cent are rented. The proportion of owned dwellings in the rural areas is slightly higher (90 per cent) and very much lower (57 per cent) in the urban areas. Even this low proportion of 57 per cent for the urban areas in the district is much higher than the average of 30 per cent for urban areas of Maharashtra.

Out of the various materials used for walls, stone appears to be predominant both in rural and urban areas in the district with a proportion of 53·9 per cent Its proportions in the urban areas of Georai, Ashti and Kaij talukas are comparatively low and the difference is made up by mud. Mud-walls are more common in Manjlegaon taluka while mud as well as stone is used along with unburnt bricks in a number of dwellings in Georai taluka. Stone is not used as much for walls in urban areas as in rural areas. The proportion is only 39·6 per cent in the urban areas against 55·4 per cent in the rural areas. The proportion of mud (27·5 per cent) used for walls in urban areas is slightly higher than that (25 3 per cent) in the rural areas. Burnt bricks have a larger proportion (15·6 per cent) in urban areas against an extremely low figure of 1·7 per cent for rural areas. Unburnt bricks are used in 11·8 per cent dwellings in rural areas and 9 2 per cent in urban areas.

Out of the materials of roof, grass or thatched roofs are predominant in the district with a proportion of 47·3 per cent. That category includes the flat roofs of wooden beams or rafters with mud on them. Their proportion in the rural areas is 49 6 per cent against 25 2 per cent in the urban areas. Roofs of corrugated iron and zinc sheets are also common as 43·0 per cent of the dwellings have this type of roof. Corrugated iron and zinc sheets are, however, used predominantly in urban areas (62 4 per cent) than in the rural areas (40 9 per cent). Flat mud roofs or thatched grass roofs are very common in the talukas of Georai, Manjlegaon, Ashti and Patoda. The dwellings in the talukas of Bhir, Kaij and Ambejogai (Mominabad) have predominantly corrugated iron and zinc sheet roofs. These three talukas are part of a plateau region which along with Latur and its neighbouring talukas has a very high proportion of corrugated iron and zinc sheet roofed houses in the State.

Classified by the number of rooms occupied 71 5 per cent of the households are occupying one-room dwellings and only 16·2 per cent are occupying two-room dwellings. The households occupying larger number of rooms are more in the urban areas. Average number of persons per room is 3·86 for total, 3 93 for rural and 3 35 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the predominant economic activity in the district. The proportion of persons working on agriculture to the total working population is 82 89 per cent as against 69 91 per cent for Maharashtra.

The statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices, livestock and agricultural implements, etc. are presented for the district in Tables 3 to 10 in Part III.

Cultivating Seasons

There are two agricultural seasons, viz., kharif and rabi. Rice, kharif jowar, groundnut and cotton are the main crops grown in kharif season and rabi jowar, wheat and gram are the main crops grown in rabi season. The area under kharif crops is equal to the area under rabi crops

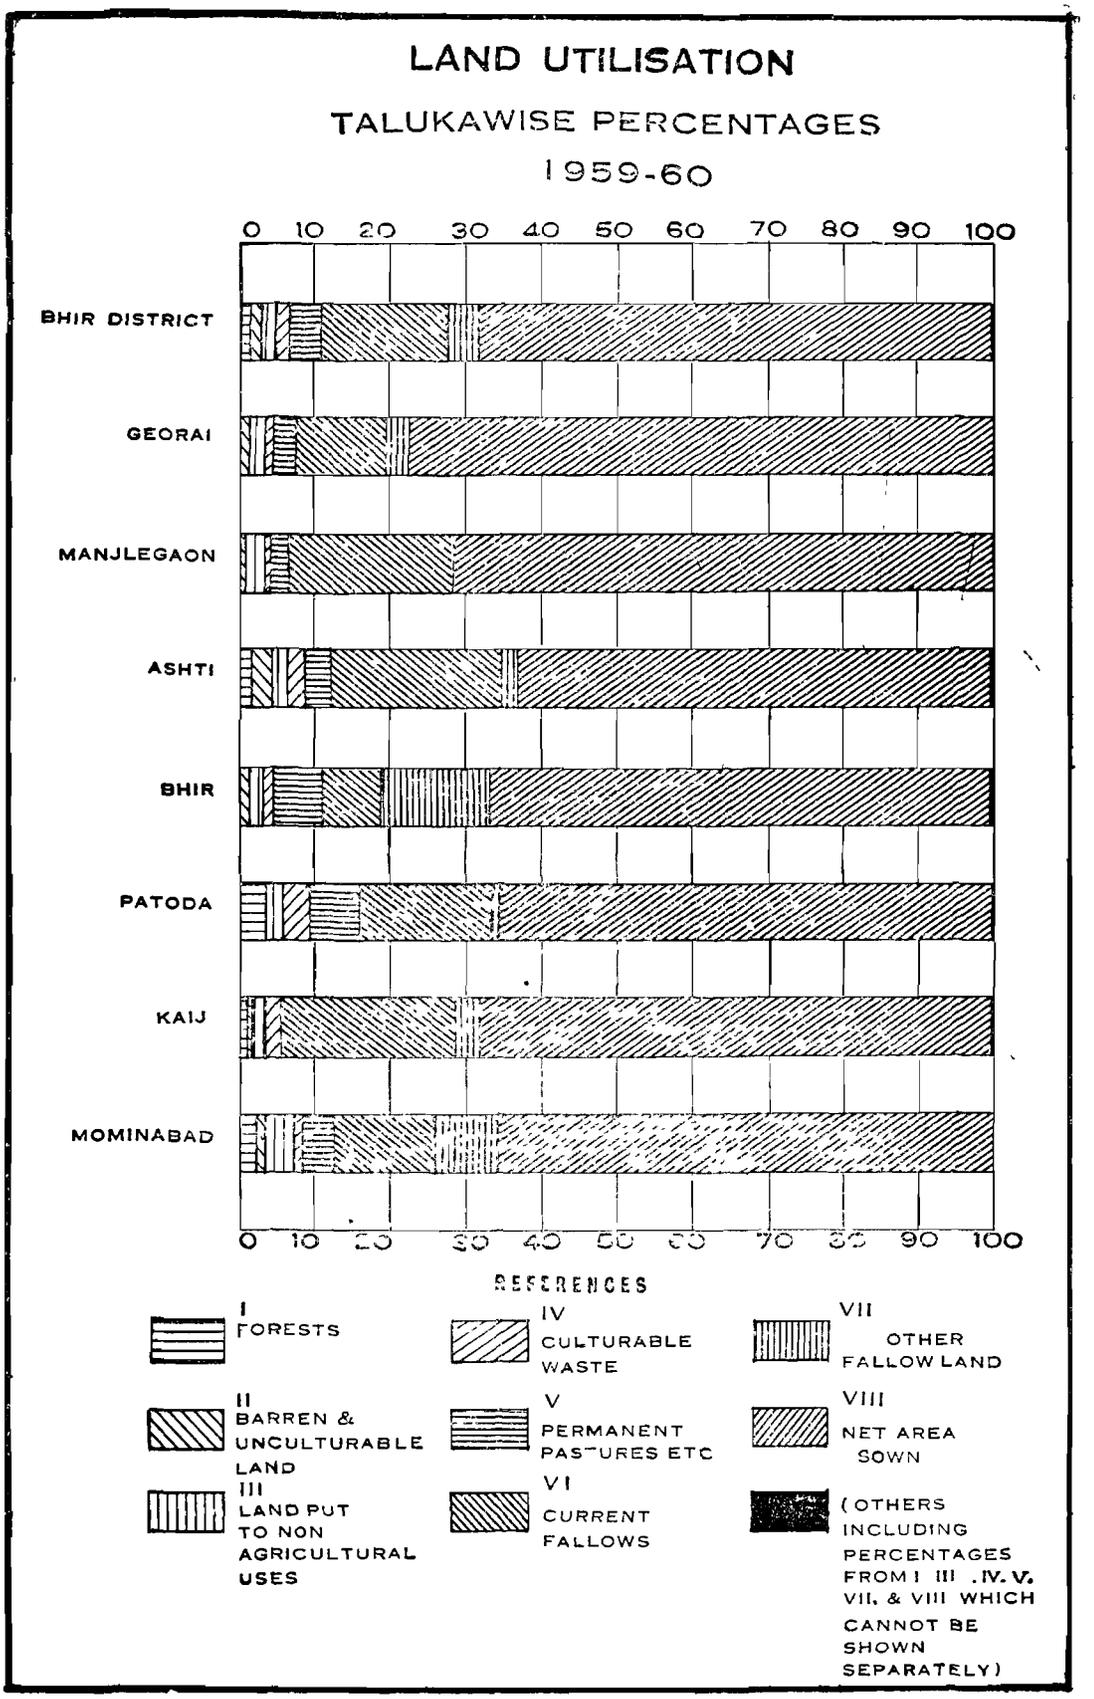

Monthwise agricultural operations in respect of the principal crops in the district are shown in the crop calendar on page (34.)

Jowar is grown in both the seasons. More area is, however, under rabi jowar. In 1959-60, the area under rabi jowar was 71 per cent of the total area under jowar. The local varieties of jowar grown in kharif season are Maldhamni, Varadi, Puri and Tuljapuri. The varieties grown in rabi season are Dagdi, Malthi and Shalu.

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on averages for three years from 1957-58 to 1959-60 :—

Administrative Unit	Percentage of geographical area										Total gross cropped area
	Total geographical area	Forests	Barren and unculturable	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown

IV CULTURABLE WASTE
V PERMANENT PASTURES ETC
VI CURRENT FALLOWS
VII OTHER FALLOW LAND
VIII NET AREA SOWN
(OTHERS INCLUDING PERCENTAGES FROM I III .IV. V. VII. & VIII WHICH CANNOT BE SHOWN SEPARATELY)

The Figure on page (32) shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is 69·68 per cent of the geographical area against 57·69 per cent for Maharashtra. The district has lower proportions of area under forests and culturable waste than the State average.

Nearly one-fifth of the geographical area is under current and old fallows. Most of it is extremely poor soil capable of being used only as grazing ground.

Within the district the proportion of net area sown to the geographical area ranges between 65·82 per cent for Ashti taluka and 80 36 per cent for Georai taluka. The talukas having very high proportions of net area sown, viz , Georai (80·36 per cent) and Manjlegaon (73·56 per cent) have no areas under forests. The proportion of areas under culturable wastes is lower than the State average in each taluka except Patoda taluka (3·68 per cent). The proportions of areas under current and old fallows are on the higher side. Local investigation may be worthwhile to find out how as much as one-fourth of the geographical area in Kaij taluka is reported as current or old fallow.

Because of the changes in the classification of land utilisation effected in 1950-51, it is not possible to determine if there has been any shift in the pattern of land utilisation over the last 40—50 years. Comparison with the available data for 1901, however, shows that the proportion of area cultivated has changed from 61·90 per cent in 1901 to 68·14 per cent in 1959-60; the area under culturable waste and fallow lands has increased from 15·64 per cent to 23·31 per cent and the area treated as not available for cultivation is reduced from 22·47 per cent in 1901 to 8·56 per cent in 1959-60.

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra All figures are averages for the three years 1957-58 to 1959-60 :—

Details of cropped area (1)	Maharashtra (2)	Percentage of gross cropped area in: Bhir District (3)	Georai Taluka (4)	Manjlegaon Taluka (5)	Ashti Taluka (6)	Bhir Taluka (7)	Patoda Taluka (8)	Kaij Taluka (9)	Ambejogai (Mominabad) Taluka (10)

Cotton	13 62	8.47	18 62	15 50	0 60	4 33	2 77	7 46	6 66
Tobacco	0 12	0 02		0 02	0 02	0 04	0 03	0 01	0 02
Other non-food crops including fodder crops	8 20	0 72	0 67	0 71	0 60	0 79	0 46	0 81	0 93

Figure at page (35) shows the crop pattern for the district and each taluka separately.

Food crops are predominant with 74·97 per cent of the gross cropped area This proportion is higher than the State average (69·88 per cent). Amongst the food crops jowar ranks first with 37·05 per cent of the gross cropped area, pulses have 16·08 per cent, bajri 11·60 per cent and wheat 5·27 per cent. Area under rice is less than 1 per cent and sugarcane has only 0·21 per cent. Compared to the State averages the district has higher proportions under jowar, bajri and pulses.

One-third area under non-food crops is under cotton and two-thirds under oil-seeds. Tobacco and fodder crops have insignificant areas. Half the area under oil-seeds is under groundnut. The district proportion of areas under "oil-seeds" is almost double the State average. The proportion of area under cotton is lower than the State average.

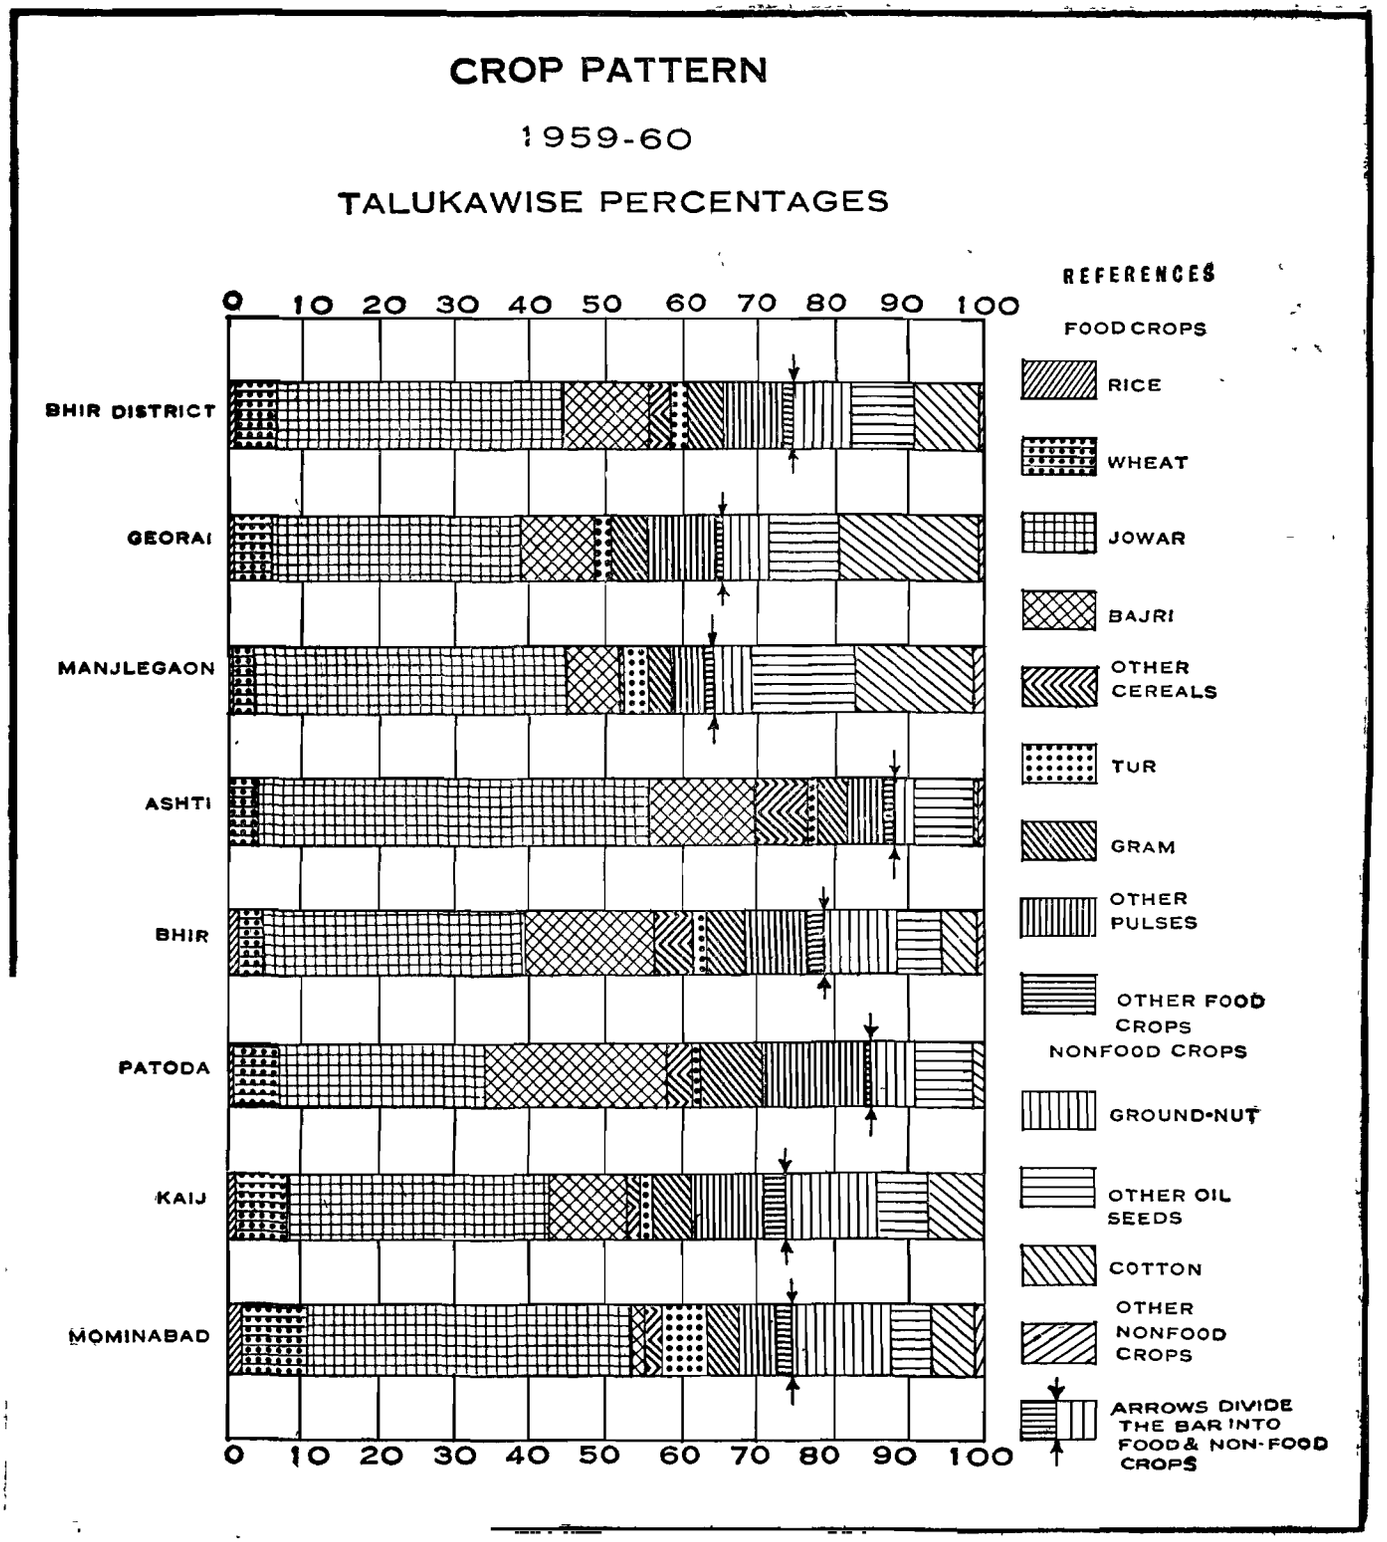

During the last decade from 1950-51 to 1959-60, the crop pattern has not undergone any significant change. Local variations in the areas under different crops in different years did occur and were probably due to variation in the rainfall.

CROP CALENDAR GIVING MONTHWISE OPERATIONS IN RESPECT OF PRINCIPAL CROP

Name of the crop	Agricultural Operation					
	April	May	June	July	August	September
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Kharif Jowar	Ploughing	Ploughing, 2-3 harrowing, clod crushing and manuring with FYM or compost	Harrowing, applications of manures and fertilizer and sowing	Sowing (contd) 2 interculturings, second after a week of the first Hoeing after each thinning and manuring	Weeding and interculturing	.

J-176 l—vi-B (Bhir).

Comparable statistics are not available for the entire district for years prior to 1950-51. But from the data available for 1903 (not identical in coverage) the area under oil-seeds seems to have gained considerably during the last sixty years and the area under cotton has gone down.

The proportions of areas under different crops to the cropped area in 1903 were as follows :—

Jowar 23 per cent, Bajri 14 per cent, Wheat 1·74 per cent, Rice 3·22 per cent, Cotton 10·45 per cent and Oil-seeds 3·88 per cent.

Generally speaking the crop pattern in the district is poorer than the average for the State. The State's crop pattern is itself poorer in the all-India setting because of high proportion of jowar, bajri and other low value crops. The district proportions of jowar and bajri are higher and proportions of rice and sugarcane are lower than the State averages.

The average yields for the district are also lower than the State averages for all the crops except tobacco and groundnut.

Within the district the proportion of area under food crops varies between 64·03 per cent for Manjlegaon taluka and 88·01 per cent for Ashti taluka. The proportions are lower than the State averages in Georai and Manjlegaon talukas.

The proportions of area under wheat do not vary considerably from taluka to taluka. There are, however, large differences in the proportions of areas under jowar. Ashti taluka has half of the gross cropped area under jowar. Ambejogai (Mominabad) taluka has 41·73 per cent and Manjlegaon taluka 39·63 per cent. Patoda taluka has the least (25·59 per cent) proportion of the gross cropped area under jowar. The proportions of bajri range from 2·04 per cent for Ambejogai (Mominabad) taluka to 26·18 per cent for Patoda taluka Bhir taluka has 16·64 per cent and Ashti taluka has 13·07 per cent.

There is a larger variation in the proportions of non-food crops and specially those of cotton and groundnut from taluka to taluka. Cotton is grown mainly in the Gangathadi zone. Georai taluka has the highest proportion (18·62 per cent) and Manjlegaon taluka 15·50 per cent Ashti taluka has practically no area under cotton, Patoda taluka has only 2·77 per cent and Bhir taluka only 4·33 per cent. Groundnut is grown to a large extent in Kaij (11·98 per cent) and Ambejogai (Mominabad) (12·02 per cent) talukas. Its least proportion is in Ashti taluka (2·15 per cent).

Ashti, Patoda and Bhir talukas together make the agriculturally poorer zone in the district where only jowar and bajri predominate and both cotton and groundnut have very small proportions.

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown below compared with the corresponding figures for Maharashtra taken as 100 :—

	Nine-year average yields per acre	1958-59 area	1958-59 outturn
MAHARASHTRA ..	100 00	100 00	100 00
Rice . ..	54 50	0 68	0·22
Wheat	82 44	5 04	5 05
Jowar . ..	99·08	5 16	5·46
Bajri .. .	82 06	5 45	3 49
Tur	32·85	3·98	1 43
Gram	90 38	9·05	9·20
Sugarcane	57 67	1·51	0·93
Groundnut	114 13	5·63	5 90
Cotton .. .	75·76	2 84	1·75
Tobacco	155 56	0·74	0 95

The district yields are higher than the State averages only for groundnut and tobacco. The average yields of rice, tur and sugarcane are comparatively very poor. The yields of cotton, wheat and bajri are also lower.

The district outturns of wheat, jowar and groundnut are about 5 per cent of the State totals. The outturn of gram alone makes a significant (9·2 per cent) proportion of the State outturn.

The Techno-Economic Survey of Maharashtra has estimated gross value of output per acre of cropped area in 1955-56 at Rs. 54 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportions of workers on land to total workers, gross area sown per worker on land and the proportion of gross irrigated area to gross cropped area are shown below for the district and each of its talukas compared with the State averages:—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown in acres per worker on land	Percentage of gross irrigated area to gross cropped area
MAHARASHTRA .	334	69 91	3 50	6·23
BHIR DISTRICT .	237	82 89	4·52	6 11
Georai Taluka . .	219	86·24	4·73	3 94
Manjlegaon Taluka ..	241	83·58	4 99	7·50
Ashti Taluka .	186	86·40	5·41	13·38
Bhir Taluka	274	76·42	4·10	8·46
Patoda Taluka ..	178	87 13	5·20	7·00
Kaij Taluka	238	85 38	4 11	2·69
Ambejogai (Mominabad) Taluka.	312	78·73	3·75	1 06

The proportion of workers in agriculture in the district (82·89 per cent) is the highest in the State and indicates how unbalanced its economy is and how greatly dependent are its people on the vagaries of the seasons.

The gross cropped area per worker on land in the district is 4·52 acres against 3·50 acres for Maharashtra. This advantage is more than set off by inferior soils, poorer crop pattern and paucity of irrigation.

Within the district the proportion of workers working on land to the total workers does not differ much from taluka to taluka. The proportion for Ambejogai (Mominabad) taluka (78·73 per cent) is lower because of the larger urban population. The area sown per worker on land ranges between 4·11 acres for Kaij taluka and 5·41 acres for Ashti taluka. The latter has the poorest soils of the district and the most unreliable rainfall.

The proportion of area under double crops to the total net area sown in 1959-60 (8·02 per cent) is higher than the average for Maharashtra (5·05 per cent). This proportion has increased from 2·04 per cent in 1951-52 and 2·94 per cent in 1955-56

to 8·02 per cent in 1959-60. This includes lands under irrigation as well as the area sown under mung which after harvesting is used as a green manure. The proportion of area under double crops varies considerably from taluka to taluka. In Ambejogai (Mominabad) taluka the proportion is nil whereas in Ashti taluka it is as high as 21·17 per cent. The proportions are higher than the State average in Manjlegaon (17·87 per cent) and Patoda (10·18 per cent) talukas They are lower in Georai (4·13 per cent), Bhir (4·59 per cent) and Kaij (2·27 per cent) talukas. The talukas which have high proportions of areas under double crops, also have higher proportions of irrigated lands.

Irrigation

The proportion of gross irrigated area to gross cropped area in the district is 6·11 per cent which is almost equal to the State average of 6·23 per cent. In 1951-52 the proportion was 3·93 per cent.

The proportion of net area irrigated to net area sown was 3·26 per cent in 1951-52. The Imperial Gazetteer reports nearly the same proportion (3·54 per cent) in 1901. Half a century had not thus added any irrigation. But from 3·26 per cent in 1951-52, the proportion has increased to 5 88 per cent in 1959-60. It has thus increased $1\frac{3}{4}$ times in eight years.

The proportion of gross irrigated area to gross cropped area (1959-60) is higher than the State average in Ashti (13·38 per cent), Bhir (8·46 per cent), Manjlegaon (7·50 per cent) and Patoda (7 00 per cent) talukas. The proportions are extremely low in Georai (3·94 per cent), Kaij (2·69 per cent) and Ambejogai (Mominabad) (1·06 per cent) talukas.

Table 4 in Part III gives the break-up for irrigated area by sources of irrigation separately for each taluka and the district. 89·51 per cent of net irrigated area is irrigated by wells, 7·96 per cent by tanks and 2·53 per cent by other sources. Ashti and Bhir talukas have some areas under tanks. In all the other talukas the entire irrigation is under wells. Kaij taluka has 28 wells per 1,000 acres of geographical area. Ashti taluka has 16, while Manjlegaon has only 4; in all other talukas the number varies between 6 and 7.

A large well constructed in 1582 irrigates about 500 acres near Bhir town. It is claimed to be a wonderful work of engineering.

The net area under irrigation has increased by 73,500 acres between 1950-51 and 1959-60, or about seven thousand acres per annum. The increase in the net irrigated area is the highest in Manjlegaon taluka all due to new wells or wells in disuse now brought under use. Net irrigated area in Kaij taluka has however gone down during the decade by 3,200 acres. Reasons may have to be found out if more and more wells are going in disuse. Another remarkable improvement is in the number of oil engines and electric pumps. The number of oil engines increased from 97 in 1951 to 807 in 1961. The number of electric pumps increased from 1 in 1951 to 31 in 1961. The increase in the number of oil engines is remarkable in Manjlegoan taluka.

Crop Pattern under Irrigation

Table 5 in Part III gives the crop-pattern under irrigation. In 1959-60 food crops occupied 96·78 per cent and non-food crops 3·22 per cent of the gross irrigated area. The corresponding figures in the year 1950-51 were 94·17 per cent and 5·83 per cent, respectively.

In 1959-60 irrigated jowar occupied 54·99 per cent of the gross irrigated area, wheat 15·14 per cent, gram 6·92 per cent, sugarcane 3·95 per cent, other food crops 6·52 per cent, bajri 3·46 per cent and rice 2·90 per cent. Amongst the non-food crops fodder crops occupied 1·45 per cent, cotton 1·13 per cent and groundnut 0·48 per cent.

Although jowar occupies 54·99 per cent of the gross irrigated area, irrigated jowar makes only 8·8 per cent of the total area under jowar. The proportion of irrigated wheat to total wheat is 17 59 per cent, rice 19·78 per cent, bajri 1·86 per cent and gram 9·00 per cent.

Kaij taluka has 10·47 per cent of the gross irrigated area under sugarcane. Ashti and Ambejogai (Mominabad) talukas have 2·97 per cent and 3·13 per cent of irrigated areas under cotton. The irrigated jowar occupies high proportions in Manjlegaon (78·31 per cent), Ashti (58·65 per cent) and Bhir (65 per cent) talukas.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains from 1951 to 1956 and from 1956 to 1960 compares with that of 1950-51 as follows :—

	Average annual production in hundred tons during		
	1950-51	1951—56	1956—60
Rice	12	26	37
Wheat	65	83	155
Jowar	723	1,108	1,604
Bajri	141	215	189
Ragi		1	1
Other cereals	18	30	46
Total cereals . . .	959	1,463	2,032
Total pulses	206	293	325
Total foodgrains	1,165	1,756	2,357

In the First Plan period the average annual production of total foodgrains increased by 50·73 per cent over the 1950-51 production. The average production of the foodgrains during the Second

Plan period is more than twice that of 1950-51. The increase in the production of cereals during the Second Plan period is 111·89 per cent but the corresponding increase in production of pulses is only 57·76 per cent over 1950-51. Increase in production is observed in all the cereals but that of the rice is very remarkable.

Adoption of a single year as a base for evaluating increase in production may not be quite correct as it may itself have been a bad year There is yet another reason for caution in the above evaluation. 1950-51 was a levy period and acreages under food crops had perhaps been under-reported in majority of cases. This was one of the findings of a committee appointed by the Government of Hyderabad for investigation into the large extents of fallow lands reported in those years.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the years 1951, 1956 and 1961 are separately shown in Section C of Table 9 in Part III. During the First Plan period the number of iron ploughs increased by 22·32 per cent. However there is a reduction in their number during the Second Plan period with the result that during the decade from 1951 the number has increased only by 21·06 per cent. The remarkable increase in the number of oil engines and electric pumps has already been mentioned. The number of tractors has reduced from 30 in 1951 to 12 in 1961.

By using standard average prices for the agricultural implements shown in Table 9 of Part III, the total outlay on them for the year 1961 may be estimated at Rs. 83 lakhs or Rs. 4·41 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 7 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as a Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officer. The latter works as a Secretary to the Taluka Samiti.

Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

Trial-*cum*-Demonstration Farm has been established at Bhir (Bendsura project) in 1960. It has an area of 50 acres

Agricultural Improvement

(*i*) *Increasing the area under irrigation.*—The most important single item for increasing the agricultural production is to increase the area under irrigation. The increase of 73,500 acres in the net irrigated area in the district in 1959-60 over that of 1950-51 has already been described. The increase is in the area irrigated by wells and tanks. This has been brought about by constructing a number of new wells and tanks and bringing into use the old disused ones through repairs and also by setting up of pumping sets run on oil engines as well as on electric power. During the first two Plan periods, six major and medium irrigation projects were taken in hand of which (1) the work of composite dam on Bendsura river near Bhir and (2) the earthen dams on Talwar and Kamli rivers have been completed and about 5,000 acres have already been irrigated during the year 1961-62. The works of the earthen dams on (1) Sindphana river near Bhir, (2) Manjra river called the Mohasangavi Project near Bhir and (3) on Kari river near Ashti called the Kada Project, are in progress. The projects on Wan river in Ambejogai (Mominabad) taluka and on Mehkari river in Ashti taluka are included in the Third Plan. On completion, all these projects will together, create an additional irrigational potential of about 55,000 acres.

Recently a major irrigation project on the Godavari river known as Jayakwadi project has been included in the Third Five-Year Plan. In its first stage the project is expected to irrigate 104,000 acres in the scarcity affected areas of the district.

In addition to the above major and medium projects the work of a *bandhara* across Dombri river in Bhir taluka is completed. Out of a potential of 1,000 acres, 170 acres have already been irrigated under it in 1961-62. Another work known as Wanjarwadi Tank irrigating 1,950 acres is also included in the Third Five-Year Plan. The Third Plan also includes construction of a *bandhara* at Chinchapur in Ashti taluka, 3,700 new wells, repairs to 1,936 old wells and installation of 800 pumping sets.

With the increasing facilities for irrigation, the question of full utilisation of the created potential is likely to assume importance. Statistics of the exact available potential and actual utilisation are not, however, available for the district separately.

(ii) Improved Seeds.—Another important scheme for the improvement of agricultural production is the recommendation of the improved varieties or strains of different crops suitable for the tract. On the basis of experiments conducted at different research stations, the Agriculture Department has recommended the following improved varieties:—

Wheat—(i) Kenphad 28, (ii) P.W. 3, (iii) Hy. 65, (iv) Vijay (Niphad 81); *Kharif Jowar*—(i) P. J. 4-K, (ii) P. J. 8-K, *Mung*—China; *Cotton*—1422 Gavrani; and *Sugarcane*—Co. 419. Seed farms have been established at 6 places in the district to provide improved seed to the farmers. The combined area of all the seed farms is 594·30 acres.

(iii) Soil Conservation and Bunding.—Under the schemes of land improvement, an area of 28,368 acres was bunded during the first two Plan periods. The Third Plan target is 1·5 lakh acres involving an outlay of Rs. 79·69 lakhs of which 24,000 acres have been already bunded.

Livestock

The numbers of livestock for the years 1951, 1956 and 1961 have been shown separately for each taluka and the district in Table 9 in Part III.

There are 1,065,900 livestock in the district in 1961. This makes 52·47 livestock per 100 acres of cultivated area. The corresponding figure for the State is 138·82.

The total bovine population of the district in 1961 is 70 per cent of the total livestock. The number of male bovines over three years are 279,700. The area cultivated per pair of male bovines over three years is thus 14·53 acres as against 5·48 acres for Maharashtra. There are 232,800 female bovines over three years. That makes 232·5 female bovines over three years per 1,000 population. This is higher than the corresponding ratio (158·82) for Maharashtra.

The total livestock has increased by 20·85 per cent from 1951 to 1961. All the types have increased except sheep and horses and ponies. The maximum increase is found in the number of goats (41·82 per cent). The number of sheep and horses and ponies has decreased by 28·86 per cent and 34·75 per cent, respectively. There was a reduction of 0·99 per cent in the number of buffaloes during the period 1951—56 but this has been made good by a large increase in their number during the period 1956—61 with the result that their number in 1961 is 17·49 per cent higher than that of 1951.

Veterinary Facilities

There are eight veterinary dispensaries and 18 veterinary aid centres at the following places:—

Veterinary dispensaries.—(1) Bhir, (2) Ambejogai (Mominabad), (3) Georai, (4) Ashti, (5) Manjlegaon, (6) Patoda, (7) Kaij and (8) Neknoor.

Veterinary aid centres.—(1) Renapur, (2) Parli, (3) Dharur, (4) Umapur, (5) Sirsala, (6) Talkhed, (7) Pimpalner, (8) Wadwani, (9) Shirur, (10) Rajuri, (11) Nandurghat, (12) Deolali, (13) Raimoha, (14) Sangvi, (15) Pimpalwadi, (16) Dhanora, (17) Bardapur and (18) Bhokaramba.

Treatment of animal diseases, control of epidemics, castration of bovines and control and destruction of animal parasites are the main services rendered at these dispensaries and aid centres.

For improving the cattle breed by selective breeding an artificial insemination centre works at Neknoor in Bhir taluka. There is one key village centre at Ambejogai (Mominabad) with key village units at six villages each having one breeding bull of Deoni breed.

A sheep development centre is working at Ambejogai (Mominabad) where Decanee breed is cross-bred with Marino type of sheep for improvement.

A poultry development centre is functioning at Ambejogai (Mominabad) since 1959. The scientific methods of rearing the birds are explained to private breeders in this centre. A poultry unit has also been set up at Bhir.

AGRARIAN STRUCTURE AND LAND REFORMS

The common system of land tenure throughout the district is Ryotwari.

Under the Ryotwari system, each field is considered a separate holding, which the ryot holds directly from the State, and the holder is called the occupant. The right of occupancy depends on the regular payment of the assessment and in case of failure to meet the demand, it is liable to forfeiture and the land reverts to the State.

The other important systems of tenure which were prevalent in the district were the Jagirs and Inams. All Jagirs and Inams (except Deosthan Inams) have now been abolished under the various measures of land reforms.

All hereditary watan lands held for village services have also been abolished and all village servants now work on a salary basis. The occupancy rights of abolished inam lands have been conferred on their holders or tenants, as the case may be, on condition of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Size of Land Holdings

Census Table B-X in Part II of this Volume shows that 60·14 per cent of the total number of sample households cultivate land and the remaining 39·86 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating sample households by size of land cultivated and by the interest in the land. 84 29 per cent of the cultivating sample households cultivate their owned lands only. 3 05 per cent of the sample households cultivate tenanted lands only and the remaining 12 66 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating sample households by the size of land cultivated is shown below.

The distribution of sample households in Table B-XI and the same shown in percentages in column 2 below, is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (as against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of these ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre ..	0 30	2 25
1 to 4 9	11·88	15·91
5 to 9·9 .. .	19 62	21 35
10 to 14·9 . ..	17 21	16·11
15 to 29·9	29·72	25 49
30 to 49·9	13·86	11 47
50 + .. .	7 41	7·42
Total ..	100 00	100·00

The average size of cultivation holding in the district in 1960-61 is 22 acres. Average size of the ownership holding in the district was 20 acres in 1952-53 against the average of 12 acres for the State.

Record of Rights

A Record of Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up to date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual Revenue accounts are prepared on the basis of the Record of Rights.

Ownership Rights to Tenants

Tenancy rights are regulated under the Hyderabad Tenancy and Agricultural Lands Act which is in force since June 1950. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the " Land to the tiller " policy, the Act provided for compulsory transfer of ownership rights of tenanted lands to the protected tenants from 26th January 1956. This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, ownership rights have been conferred upon 5,463 tenants for 55,043 acres of land in the district. Number of cases in which the revenue officers settled the price is 5,131.

Ceilings on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Four local areas, viz., Manjlegaon, Georai, Bhir and Patoda have been notified in the district with different ceiling areas for dry crop land, viz., 96, 108, 114 and 126 acres, respectively. In the case of irrigated lands, the ceiling area in all the four local areas is the same, viz., 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons, and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1959, and work of consolidation of holdings was started in Bhir taluka. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to end of March 1963, 13 villages have been completed covering an area of 14,408 acres with 2,770 holdings. This work is temporarily suspended as record of rights was not found to be up to date.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

(i) Dry crop land .. 2·0 acres.
(ii) Bagait land .. 0·5 acre.

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative movement was nominally introduced in the twenties. But it gained real momentum only after 1956 after the district came to the Bombay State. Concentrated efforts during the last five years have resulted in a rapid progress of the co-operative movement which in addition to a great expansion in the field of agricultural credit now extends to farming, marketing, housing, fisheries, dairy farming, etc. All the non-credit types of societies have, however, yet to make good progress in the district.

The following description is based on the Report for the year 1960-61.

Co-operative Credit

Agricultural Credit Societies.—There has been a significant expansion both of the number and membership of Agricultural Credit Societies, during the Second Plan period.

The position of Agricultural Credit Societies in 1957-58 and 1960-61 is as follows :—

		1957-58	1960-61
(1) Number of Agricultural Credit Societies		368	705
(2) Number of members		10,636	41,095
(3) Share Capital	(Rs in lakhs)	3·65	18·00
(4) Reserve and other funds	(Rs in lakhs)	..	2 53
(5) Working Capital	(Rs in lakhs)	18·46	95·72
(6) Number of members to whom loans were advanced		NA	37,931
(7) Amount advanced	(Rs in lakhs)	10·16	76·17
(8) Amount recovered	(Rs. in lakhs)	6·73	53·01
(9) Loans outstanding	(Rs in lakhs)	13·00	76 23
(10) Overdues	(Rs in lakhs)	4·40	6·73

Average membership per primary society in the district is 58 against the average of 96 members for Maharashtra. 98·63 per cent villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of the Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 20 53 lakhs and formed 21·44 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the Primary Agricultural Societies in the district amounted to Rs. 76·17 lakhs in 1960-61. The average amount of loan per borrowing member in the district works out to Rs. 201 as against Rs. 329 for Maharashtra.

During the course of three years from 1957-58 to 1960-61, the number of societies has almost doubled, the membership has increased four times, the share capital has increased five times and the working capital also five times. These indices reveal the very rapid progress made in the field of agricultural credit.

Central Co-operative Bank—A Co-operative Central Bank called "The Bhir Central Co-operative Bank, Ltd." was established at Bhir in 1918. It was reconstituted in 1958 and is now known as "The Bhir District Central Co-operative Bank, Ltd.". The Bank has been working as the central financing agency, catering for the credit requirements of all the primary co-operatives in the district. Since 1962, the Zilla Parishad also transacts its financial business through the Central Co-operative Bank.

In the year 1960-61 the position of the Central Co-operative Bank was as follows :—

(1) Number of members—		
(*a*) Individuals		110
(*b*) Societies		665
(2) Paid-up share capital	(Rs in lakhs)	11·12
(3) Reserve and other funds	(Rs in lakhs)	1 77
(4) Deposits—		
(*a*) Individuals	(Rs in lakhs)	9·16
(*b*) Societies and Banks	(Rs in lakhs)	17·80
(5) Borrowings—		
(*a*) State Co-operative Bank and the Reserve Bank of India	(Rs in lakhs)	51·00
(*b*) Government	(Rs in lakhs)	0 80
(*c*) Other Sources	(Rs in lakhs)	0·64
(6) Working Capital	(Rs in lakhs)	92·29
(7) Cash—		
(*a*) On hand	(Rs in lakhs)	3 41
(*b*) At Banks	(Rs in lakhs)	7·31
(8) Investment—Government and other trustee securities	(Rs in lakhs)	1·19
(9) Percentage of cash in hand to deposits		12·65
(10) Percentage of investment to deposits		4·41
(11) Loans Outstanding—		
(*a*) Individuals	(Rs in lakhs)	0·06
(*b*) Societies	(Rs in lakhs)	76·32
(12) Percentage of loans outstanding to deposits		283·31
(13) Percentage of loans outstanding to working capital		82·76
(14) Overdues	(Rs in lakhs)	13·05
(15) Percentage of overdues to loans outstanding		17·09
(16) Cost of management	(Rs in lakhs)	1·36
(17) Percentage of cost of management to working capital		1·47
(18) Profit	(Rs in lakhs)	0·44
(19) Number of branches and pay offices in the district		7

In the year 1960-61, the Bank's paid-up share capital increased by Rs. 1 79 lakhs, deposits by Rs. 8·72 lakhs and working capital by Rs. 27·11 lakhs (or by 41·59 per cent). The Bank advanced Rs. 64·63 lakhs more than the amount advanced in the previous year. The Bank made a profit of Rs. 44 thousand during the year as against Rs. 23 thousand in the earlier year. The proportion of overdues to outstanding loans has, however, increased from 8 97 per cent in the previous year to 17·09 per cent in 1960-61 and points out to the need for improving recoveries.

Land Mortgage Bank.—The Primary Land Mortgage Bank was established at Bhir in 1956 with a view to provide long-term finance to the cultivators. The number of members of the Land Mortgage Bank on 30th June 1961 was 6,893, paid-up capital Rs. 1·53 lakhs and working capital Rs. 19·17 lakhs. The Bank has advanced Rs. 10·85 lakhs as loans during the year 1960-61.

Urban Credit Societies.—There are 21 Salary Earners' Co-operative Societies. The membership of the societies is 512 and share capital Rs. 51,000. All the societies together had advanced Rs. 83,000 as loan to their members during 1960-61.

Industrial Societies

There are 20 weavers' co-operative societies and 70 other industrial societies in the district. Among the weavers' societies, 10 are handloom weavers', 8 wool weavers' and two silk weavers' societies. Their combined membership is 1,275, share capital Rs. 0·35 lakh and working capital Rs. 1·07 lakhs. The weavers' societies together produced goods worth Rs. 80 thousand in the year 1960-61.

The other types of industrial societies include 14 oil ghanis, 5 tanning works, 17 leather works, 7 carpentry and smithy works, 2 metal works, 12 pottery and brick-making, 6 coir and rope, etc. Their combined membership is 1,494, share capital Rs. 1·41 lakhs and their total production was Rs. 90 thousand during the year 1960-61.

Forest Labourers' Societies

There are four societies of this type all of which are Labour Contract Societies. They have 88 members and a working capital of Rs. 8 thousand.

Co-operative Farming Societies

There are four collective farming and three joint farming co-operative societies operating in the district in 1960-61.

The four collective farming societies together have 81 members and a working capital of Rs. 14 thousand. They cultivated 200 acres out of 449 acres in their command. The three joint farming societies together have 48 members and a working capital of Rs. 37,000. They cultivated 387 acres out of the 648 acres in their command.

Dairy Societies

One milk supply society was organised in 1959-60 and nine more in 1960-61. Their combined membership is 256 and working capital Rs. 7,000. These societies had not started work in 1960-61.

Fishermen's Societies

There is a fishermen's co-operative society at Pali near Bhir. The Bendsura project reservoir is allotted to the society for fishing. In 1960-61 the society sold fish worth Rs. 1,191. Up to 1959-60 this was the only one fishermen's society in the Aurangabad Division.

Purchase and Sale Societies and Unions

There is a Central Marketing Society at Bhir to which 230 primary societies are affiliated. This Central Society distributes the goods through its branches at important business centres. The Central Marketing Society has the district agency of fertilisers, iron, cement, sugar and other consumer goods. There are other marketing societies at Ambejogai (Mominabad), Georai, Manjlegaon and Ashti. The combined membership of all these five societies in 1960-61 was 2,605, share capital Rs. 6·08 lakhs and sales worth Rs. 11·70 lakhs. One of the societies sustained a loss of Rs. 6,663 during the year while the other four societies earned a profit of Rs. 20 thousand.

Consumers' Movement

There are three consumers' societies in the district. Their combined membership is 716 and share capital Rs. 23 thousand. The total sales during 1960-61 were of Rs. 69 thousand. One of the societies made a profit of Rs. 1,000 during the same year while the other two societies neither made any profit nor loss.

Housing Societies

There are 12 Co-operative Housing Societies. Their combined membership is 389 and share capital Rs 18 thousand. These societies together constructed 97 houses during the year. Eight of these societies are of Backward Class persons.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

	No. of societies classified as				No. of societies not classified	No of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Banks	.	1	.	.	..	..	1
(2) Agricultural Credit Societies	7	350	195	41	..	112	705
(3) Non-Agricultural Credit Societies.	..	6	5	6	..	3	20
(4) Primary Land Mortgage Banks.	..	1	..	..	..	..	1

FORESTS

The district has an area of 84·93 sq. miles under forests : 59·06 sq miles as reserved forest and 25 87 sq miles as protected forest. The entire area is under the management of the Forest Department. The forest area makes 2·13 per cent of total geographical area of the district against the average of 17 56 per cent for Maharashtra.

The Divisional Forest Officer in charge of the forests in the district has his headquarters at Aurangabad and has jurisdiction over the forests of both Aurangabad and Bhir districts. The division is under Poona Circle.

The forests are scattered all over in small patches and are of the " Southern Dry Deciduous " type. The important species found in the forests are : Dhavda, Salai, Char, Chandan, Moni, Tembru, Kandol, Khair, Mahuva, Palas and Ain. The forest has extensive grassy areas. The species of grass found are : Kusal, Paonya and Sheda. Sofia and Motia varieties of Rosha grass are also found. Forest produce worth Rs. 7 2 thousand was extracted during the year 1960-61.

Five hundred and sixty-four persons are reported as working in forestry and logging in 1961 Census.

The forests in the district are in an unorganised state and working schemes for regulating the felling are being evolved.

The Five-Year Plan scheme includes afforestation in 1,000 acres. Work had been done in 403 acres during the Second Plan period. The spillover work is now in progress.

FISHERIES

Fishing activity in the district is restricted to inland waters only, rivers and tanks being the chief sources. The length of perennial rivers in the district is about 160 kms. In addition to this about 1,742 acres of water-spread area is available for fishing from five perennial and four seasonal tanks.

The commercially important varieties of fish found in the district are :—

Baloo, Murrel, Koli murrel, Dokh, Tam, Rahoo, Maroof, Singhi, Baam, Kanwa, Kolus, Potiac, Patola, Seengal Khidla, Boori, Yellshal, Peora, Geehul, Murii, Kaneri, Chapti, Kobir, Patharchatu, Bekdi, Selan, Katarna, Ghegra, Tamboo, Gangaoli, Ghod Zinga, Mungarod Zinga and Matechkal Zinga.

In addition to these varieties, "Bengal Carps" are imported from Calcutta every year and are released in tanks and reservoirs for propagation of pisciculture. The carps generally stocked are Catla, Rohu and Mrigal. The Bendsura reservoir has been selected for development of deep tank fisheries. Carps are being stocked annually in this reservoir. During the Second Five-Year Plan the total number of Bengal Carps imported and stocked in all the reservoirs and tanks was 3·09 lakhs. The quantity stocked during the first two years of the Third Five-Year Plan is 1·65 lakhs.

In the 1961 Census, 406 persons are reported as engaged in fishing as principal work, 329 of them are males and 77 females. Fishermen in this district belong to the communities known as Dheemer, Bhoi, Kahar and Koli. Fishing is generally done with the help of drag nets (Udan) and cast nets (Malota or Phekjal). Most of the nets are made of cotton twine although these days nylon is also being used.

One Fishermen's Co-operative Society has been established at Pali near Bhir. Fishing rights of Bendsura reservoir have been granted to this society. Financial assistance in the form of subsidy has been granted to fishermen for purchase of cotton and nylon twines.

MINING AND QUARRYING

No deposits of any mineral have been reported so far in the district. Mining activity is therefore confined only to quarrying of stones, clay, sand, etc.

In the 1961 Census, 558 persons are reported to be engaged in quarrying of stones, etc. 466 of them are males and 92 are females.

INDUSTRIES

There is no large-scale manufacturing industry in the district. The few factories which exist are the cotton gins and presses, oil presses and dal-mills, all for processing of local agricultural produce The whole pattern of non-agricultural employment consists of village crafts and craftsmen working on traditional lines with locally available raw materials and for local demand alone.

There are in all 26,408 workers engaged in industries, 21,533 or 82 per cent of them are in household industries and the remaining 4,875 or 18 per cent in non-household industries. The number of workers in the registered factories in 1961 is only 556 which makes just about 2 per cent of all workers engaged in manufacturing industries or only one factory worker per thousand of total population against 20 per

thousand of total population for Maharashtra. The district has the lowest number of workers in registered factories in Maharashtra and may be said to be industrially the most backward district in the State.

The distribution of workers engaged in each industry major and minor group, is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from houselists are also shown separately for each village in the Village Industries Table presented at the end of Part II.

Registered Factories

There are 15 Cotton Ginning and Pressing units located at Bhir, Parli, Georai, Ambejogai (Mominabad), Yalamb Ghat and Dharur, providing seasonal employment to over 500 persons. Some of these units have oil-mills for off-season working. In all there are 14 oil pressing units located at Ambejogai (Mominabad), Parli, Manjlegaon, Dharur, Chausala and Bhir.

There are 25 registered factories including cotton ginning and pressing and oil pressing units and others making wheat flour, gur, bidis. The total number of registered factories has increased from 15 in 1951 to 25 in 1961. The number of workers in registered factories is 556 in 1961.

Small-scale and Cottage Industries

Most of the household industries consist of servicing or processing establishments. Production and rearing of livestock engages the largest number (17,769) of workers. The population of livestock is more than the human population in the district.

The next important household industry in which 5,199 persons are engaged is rearing of sheep and production of wool. *Ghongadis* (woollen blankets) made by the shepherds are in good demand from the agriculturists.

2,579 workers are engaged in miscellaneous textile industry. This group includes the tailors engaged in making garments for men and women.

The handloom industry is also a major cottage industry in the district. There were 1,540 cotton handlooms and 45 non-cotton handlooms at the end of May 1961. Nearly 620 or 40 per cent looms are under the co-operative fold. 163 or about 25 per cent of those looms are actually working. The other handlooms remain idle reportedly due to the cheapness of mill-made cloth.

2,140 workers are engaged in manufacture of shoes and other leather footwear. Leather work is an important household industry in the district. Tanning is in the hands of backward classes who do not have sufficient financial resources or credit. Two model tanneries have been established in the district during the Second Five-Year Plan. These are equipped with up-to-date tools and equipment for processing hides and skins on modern lines.

Brass industry of Amalner in Patoda taluka is well known for distinctive products like utensils, water-bottles and walking-stick handles.

There are 557 flour or rice-mills engaging 931 workers.

The other Common village industries in the district are brick-making, basket-making, gur and khandsari manufacture and soap-making.

The proportion of different groups of artisans to one lakh of total population in the district is as follows :—

Blacksmiths 98, Carpenters 253, Shoe-makers and repairers 230, Potters 164, Tailors and Dress-makers 243, Spinners and Weavers 144, Basket-weavers 153.

The Industries Department has started peripatetic industrial training schools which impart training in different industrial crafts. A multipurpose Gramodyog Centre has also been set up. This centre provides training facilities in handloom-weaving, wool-weaving, processing of hides and skins, blacksmithy, carpentry, etc.

The "Master Plan" prepared by the Industries Department in 1960 had indicated scope for establishment of cotton-seed oil industry in the district.

Industrial Estates

An industrial estate on co-operative lines is being set up at Parli-Vaijanath.

POWER

The number of electrified towns and villages in the district is only eight. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 10·36 per cent of the total population of the district.

The district consumption of electricity on different items for the year 1958-59 is shown in Table 30 in Part III.

The *per capita* consumption is considerably lower than the State average, as only eight towns and villages in the district had been electrified up to 1960-61. Before the Reorganisation of States in 1956 there was no electrified town or village in the district.

The electric supply is through the Maharashtra State Electricity Board. Most of the generated power is used for domestic, commercial and public

lighting only, as there are no industries using electric power in the district. Transmission lines with capacities of 130 KW and 150 KW have been laid at Parli and Bhir, respectively. Parli, the first place to get power in the district, was electrified in 1956 while Bhir received power in 1958.

Six out of seven taluka headquarters have now been served with power. The Purna Hydro-Electric Project Scheme envisages supply of power to Parli in the district.

There are proposals for extending other power grid lines to the district as well as for setting up a large thermal power station between Parli and Gangakhed.

TRADE AND COMMERCE

The principal exports are jowar, bajri, other cereals, pulses, cotton, oil and groundnut and other oil-seeds. These articles are generally exported to Bombay, Hyderabad, Akola, Barsi, Jalna and Latur. The chief imports are salt, sugar, kerosene oil, silk, cotton and woollen cloth, copper and brass The agriculturists bring their produce for sale to the market centres which are mainly wholesale centres. The distribution of goods beyond the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of the week

Shops

Almost every village has one or more shops except the smallest. These shops provide the inhabitants with their day-to-day requirements. There are 6,961 shops in the district. 5,270 are in rural areas and 1,691 in the urban areas. This does not include the shops temporarily set up in the weekly markets or fairs. The number of shops per 1,000 dwellings is 36·1 for the district as a whole, 30·1 for rural areas and 91·7 for urban areas. Thus the urban areas have about three times more shops per 1,000 dwellings than rural areas. The ratio between shops and 1,000 dwellings for the district is almost the same as the State average of 36 4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets are popularly known as *bazars* and are distributing rather than collecting centres. All sorts of articles like foodgrains, pulses, oils, chillies, spices, gur, cloth, fruits, vegetables, cattle, etc., are sold in these markets. Pedlars and hawkers set up booths on the market days. Agriculturists from nearby villages bring their farm produce. The traders and shopkeepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets start by about two in the afternoon and close by six to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and, if so, on which day of the week.

A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 199 shows the locations of all these markets and also the day on which they are held.

There are altogether 122 weekly and bi-weekly markets in the district. Out of these three are bi-weekly markets Fourteen of them are also cattle markets Twenty markets are held on Sunday, 16 on Monday, 19 on Tuesday, 19 on Wednesday, 15 on Thursday, 19 on Friday and 14 on Saturday.

The map facing page 199 will show that weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days, keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

Fairs are complementary to weekly markets so far as trade is concerned. They are attended by unusually large number and considerable quantity of agricultural produce and other articles of daily use are brought for sale. Special cattle shows are arranged in some of the fairs in the district and prizes are awarded to the best breeds. A list of fairs held in the district showing their locations, duration, dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 200 shows the location of all the fairs in the district having 1,000 or more gathering. A volume giving details regarding fairs and festivals in Maharashtra is also issued separately.

Trade Centres

Apart from the weekly markets and fairs there are seven wholesale trade centres in the district. All these markets are regulated under the Hyderabad Agricultural Markets Act, No. II of 1339 (Fasli), and are managed by Market Committees Bhir, Parli, Ambejogai (Mominabad), Manjlegaon, Georai, Dharur and Renapur are those principal market centres.

Parli is the biggest agricultural market in the district. Agricultural produce is exported from the market to Akola, Amalner, Bombay, Jamnagar, Howrah, Delhi, Hubli, Hyderabad and other places. The values of annual arrivals of a few important commodities in the five markets in the district for the year 1959-60 are shown below :—

Commodities	Value of annual arrivals at				
	Bhir (1958-59) Rs	Parli Rs	Georai Rs	Manjlegaon Rs	Ambejogai (Mominabad) Rs
(1) Cotton	12,31,781	39,08,684	11,27,808	.	1,21,837
(2) Groundnut	12,21,150	81,57,600	4,06,299	11,95,280	9,94,009
(3) Kardai	4,88,575	..	.	9,64,400	2,09,389
(4) Safflower	1,93,788	..	..	..	..
(5) Jowar	21,92,464	6,24,627	16,39,636	3,53,760	4,12,000
(6) Bajri	12,50,505	4,03,854	84,840	53,040	50,574
(7) Gram	1,35,549	84,636	6,555	29,260	36,910
(8) Tur	49,15,501	7,15,604	22,763	95,508	1,53,839
(9) Udid	1,75,458	6,755		.	1,14,338
(10) Mung	12,94,510	18,20,549	24,532	51,870	1,26,284
(11) Paddy	.	3,76,436		.	2,16,907
(12) Wheat		4,31,418	1,71,101	87,300	3,56,988
(13) Gur	. ..	7,58,912	44,440	..	1,58,952
(14) Kesari	. .	4,25,316	..	..	..
(15) Sesamum	..	1,35,296		..	9 538
(16) Rice	.	..	6,120	.	4,913

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district in 1961 is 11,243, out of which 6,199 or 55 14 per cent are in rural and 5,044 or 44·86 per cent in the urban areas. The number of workers in trade and commerce makes 2·07 per cent of all workers in the district. About 31 per cent of the district total is in Ambejogai (Mominabad) taluka only which has two important markets, viz., Ambejogai (Mominabad) and Parli.

Only 4·09 per cent of the workers in trade and commerce are engaged in wholesale trade, 89·37 per cent in retail trade and 6·54 per cent in miscellaneous trade and commerce. Eighty-eight per cent of the wholesalers are in urban areas.

The number of wholesalers dealing in cereals and pulses is 235. The wholesale trade of cereals and pulses appears to be separate and not combined with wholesale trade of gur, sugar, spices, oil, etc., as the number for this group is only 39 for the district. 5,986 persons are engaged in retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, etc.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown below :—

	Number of Banking Offices			
	Scheduled	Non-scheduled	Co-operative	Total
DISTRICT TOTAL ..	5	..	7	12
1 Georai Taluka ..	..	..	1	1
2 Manjlegaon Taluka .	..	..	1	1
3 Ashti Taluka . .	..	..	1	1
4 Bhir Taluka	1	..	1	2
5 Patoda Taluka ..	.	..	1	1
6 Kaij Taluka . .	.	.	1	1
7 Ambejogai (Mominabad) Taluka	4	.	1	5

Nearly half of all the banking offices in the district are in Ambejogai (Mominabad) taluka, because of the two large towns Ambejogai and Parli. Each of the other talukas has at least one branch of the Bhir District Central Co-operative Bank.

Financial transactions of the Government are done through the district treasury and a branch of the State Bank of Hyderabad at Bhir and sub-treasuries at other taluka places.

COMMUNICATIONS AND TRANSPORT

The district has only 29·74 miles of railway line in the south-east corner ; 25·09 miles of the Parli-Vikarabad line are broad gauge and 4·65 miles of the Parli-Parbhani line are metre gauge. Both the lines are of the Central Railway and work under its Secunderabad Division.

Existing railway mileage in the district makes only 0·71 mile per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by type of road surface. The district map facing the title page shows all these roads.

The district is well connected by roads with the adjoining districts of Ahmadnagar, Aurangabad and Osmanabad. There is, however, no direct road communication with Parbhani. The district headquarter is also connected by road with all the taluka headquarters.

During the last decade the State Highways increased by 55·93 miles. The major district roads increased by 55·05 miles and village roads by 33·61 miles. The total increase in all types of roads (excluding municipal) is 123·59 miles.

Under the Nagpur Plan the district should have 1,900 miles of roads. It was short of that target by 1,479 miles on 31st March 1961.

New Roads

The construction of the following roads is in progress :—

(1) Dharur-Manjlegaon road, (2) Parli-Gangakhed road and (3) Bhir-Parli road.

New Bridges

Work of the following bridges is in progress :—

(1) R. C C. slab causeway across Jalgaon stream on Bhir-Ahmadnagar road and (2) Cement Concrete semi-circular arch culvert across Karkhelwadi stream on Bhir-Ahmadnagar road.

Posts, Telegraph and Telephones

The district is included in the Aurangabad Postal Division Head Post Office is situated at Bhir and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62, there were 13 sub-post offices and 156 branch post offices in the district. Together their number has more than doubled over that of 1951-52.

There are Telegraph offices at the following five places :—

(1) Bhir, (2) Parli-Vaijnath, (3) Ambejogai (Mominabad), (4) Georai and (5) Manjlegaon.

The following three places have Telephone connections —

(1) Bhir, (2) Parli-Vaijnath and (3) Ambejogai (Mominabad)

Passenger Road Transport

Buses of the State Road Transport Corporation run on all the roads. Bhir district is included in the jurisdiction of the Aurangabad division and State Road Transport Corporation services are maintained through two depots situated at (1) Bhir and (2) Parli. No separate figures for passenger transport are available for the district. The two depots together run buses on 30 routes which make 108 single trips per day.

Private buses are run during fair season on six routes which are mostly kaccha village roads.

There is one temporary S. T. Bus Station in the district. It is proposed to construct additional bus stations and pick-up stands and provide other facilities for the travelling public during the Third Five-Year Plan.

Goods Transport

Separate figures for lorries operated in the district are not available as the Regional Transport Officer, working at Aurangabad, keeps combined records for his region including Aurangabad, Bhir, Nanded, Parbhani and Osmanabad districts.

Workers in Transport and Communications

1,819 persons are engaged in transport and 331 in postal, telegraphic and telephone communications, etc., in the district. Out of the workers in transport, 296 are in railway transport, 466 in motor transport and 1,057 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives for each village in the district whether it is served by a railway or a road or has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 3,900, 3,195 are males and 705 are females Their distribution by minor groups is shown in Table B-IV-C in Part II.

9·74 per cent of the workers are engaged in the construction and maintenance of dams, waterways and canals, etc., 29·69 per cent in construction and maintenance of roads, bridges, etc. and 60 57 per cent in construction and maintenance of buildings. The large portion engaged in construction of buildings represents the constructional activities like construction of buildings for Government Offices, Schools, Hospitals, etc.

All the workers engaged in construction together make only 0·72 per cent of the total workers in the district.

OTHER SERVICES

27,919 persons are engaged in the district in "Other Services". 20,609 are males and 7,310 are females. The major categories out of them are (1) Public Services, (2) Educational Services and (3) Personal Services. "Public Services" include administrative employees of Central, State and local Governments. "Educational Services" include all classes of teachers and "Personal Services" include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of these workers in other services by minor groups is shown in Table B-IV-C in Part II.

5·15 per cent of the total workers in the district are engaged in "Other Services" as against 8·53 per cent in the State. 17·15 per cent of the total workers in "Other Services" in the district are engaged in "Public Services" and 11·35 per cent in "Educational Services". Both these proportions are lower than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This is obvious, as there are very few urban centres and hardly any comparable number of businesses or tertiary services of any other type in the district. Even the proportion of "Personal Services" in the district (17·23 per cent) is much below the State average of 27·15 per cent

The number of domestic servants is 1,210 or one for about 828 population. The number of barbers is 1,613. The number of persons in laundry services including washermen is 1,046

There are 175 legal practitioners and 727 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is 151 and that in other schools and colleges is 3,016.

The number of State Government employees including those now working under the Zilla Parishad is 3,862.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of the total population, males and females, engaged in work for the district and each taluka are shown below :—

	Percentage proporation of workers		
	Total	Males	Females
MAHARASHTRA ..	47 91	57 09	38 10
BHIR DISTRICT .. .	54 13	60 74	47 29
Georai Taluka..	56 08	62·79	49 21
Manjlegaon Taluka . ..	55 50	63 08	47·74
Ashti Taluka	54 68	60 51	48 77
Bhir Taluka	52 01	59 00	44 75
Patoda Taluka	56 56	60·89	52·23
Kaij Taluka	55 32	61·51	48 79
Ambejogai (Mominabad) Taluka.	51·11	58·50	43 35

Labour participation rates in the district are higher than those for Maharashtra for total and both for males and females. Participation by females is much more than the average for the State. Only three districts in Maharashtra (viz., Bhandara, Chanda and Yeotmal) have higher participation rates than Bhir. Bhandara and Chanda are rice-growing tracts and both Chanda and Yeotmal have large proportions of tribal population. Bhir is neither a rice-growing area requiring large number of females to participate, nor does it have sizable proportion of tribal population. Higher participation rates here are due to the extreme dependence on agriculture and a generally backward economy. Bhir and Ambejogai (Mominabad) talukas, because of their large urban population, have lower participation rates particularly for females. Patoda has the highest participation rate for females due to the migration of male workers to adjoining areas in Ahmadnagar district.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activities. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72 25	12·34	15·41
	Rural	100	88 73	5·68	5 59
	Urban	100	11 97	36·69	51 34
Bhir District ..	Total	100	87 49	4 89	7 62
	Rural	100	91 31	4 03	4 66
	Urban	100	31 36	17 50	51 14

As can be expected the primary sector engages as many as 87·49 per cent of the workers. Even in urban areas it engages 31·36 per cent of the workers. Secondary sector engages less than 5 per cent. Urban areas in the district also lag very much behind in the secondary sector which engages only 17·50 per cent of the workers against 36·69 per cent for the State.

Categories of Economic Activity

The distribution of workers, males and females by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			BHIR DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation .	46 11	40.69	54 79	53 13	51 72	55 01
II Agricultural Labour	23 80	18 12	32.90	29 76	23.25	38 39
III Mining, Quarrying Live-stock, Fishing, etc.	2 16	2.97	0 86	3 90	6 45	0 52
IV Household Industry ..	4 39	4 80	3 74	3 97	5 50	1 94
V Manufacturing other than Household Industry	6 88	10 22	1.54	0 90	1 39	0 24
VI Construction .. .	1.24	1.69	0 53	0 72	1.03	0 30
VII Trade and Commerce ..	4 52	6.61	1 17	2.07	3 30	0 45
VIII Transport, Communication and Storage.	2 36	3.65	0 29	0 40	0 69	0 01
IX Other Services	8.54	11 25	4 18	5 15	6 67	3 14
Total Workers	100 00	100 00	100 00	100 00	100 00	100.00

As described earlier the district has larger proportions of workers engaged both as cultivators and agricultural labourers than the State average. This is so because there is no alternative employment in industry available in the district. The proportion in other services, trade and commerce are also lower and the proportion of workers in manufacturing industry (0·90 per cent) is insignificant as compared to the State average of 6·88. The district does not even have comparable proportion in household industry.

The ratio between cultivators and agricultural labourers of 53 : 30 does not differ much from the State average of 46 : 24.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison·—

State / District / Taluka	I Cultivator	II Agricultural labourer	III Mining, quarrying, livestock, fishing, hunting, etc.	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and commerce	VIII Transport, communication and storage	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA	46 11	23 80	2 16	4 39	6 88	1 24	4 52	2 36	8 54	100
BHIR DISTRICT	53 13	29 76	3 90	3 97	0 90	0 72	2 07	0 40	5 15	100
1 Georai Taluka	51 75	34 49	3 60	3 77	0 65	0 42	1 65	0 13	3 54	100
2 Manjlegaon Taluka	39 28	44 30	4 88	3 41	0 71	0 81	1 83	0 17	4 61	100
3 Ashti Taluka	68 79	17 61	3 79	3 77	0 53	0 63	1 04	0 12	3 72	100
4 Bhir Taluka	53 08	23 34	3 83	4 76	1 58	1 11	2 82	0 76	8 72	100
5 Patoda Taluka	71 10	16 03	3 71	4 39	0 24	0 60	0 98	0 65	2 90	100
6 Kaij Taluka	54 67	30 71	3 79	4 18	0 50	0 60	1 72	0 13	4 20	100
7 Ambejogai (Mominabad) Taluka	45 53	33 20	4 11	3 64	1 58	0 77	3 44	1 05	6 68	100

Distribution of workers by nine categories of economic activity is also shown in the figure on page (50) for the district and each taluka separately.

The proportions both of cultivators and agricultural labourers differ considerably from taluka to taluka. The proportion of cultivators varies between 39·28 per cent for Manjlegaon and 71·10 per cent for Patoda. The proportion for agricultural labourers varies reciprocally between 44·30 per cent and 16·03 per cent for the same two talukas. Ashti taluka approaches the Patoda pattern very nearly. Such wide variations within the district are due to the differences in the fertility of soils and resulting cropping and land holding patterns. In Patoda and Ashti talukas the ratio between cultivators and agricultural labourers is 4 : 1 against nearly 1 : 1 in Manjlegaon taluka and 2 : 1 in the district as a whole.

Labour Participation by Age

The labour participation rates by age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison —

Age-groups	Bhir District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All ages ..	54 13	60 74	47 29	47·91	57 09	38 10
0—14 .. .	15 53	17 06	13 97	8 72	8 62	8·84
15—34	85 85	93 92	78 09	74 53	87 45	60.90
35—59 ..	87 24	97 60	75 32	81 57	96 86	63 68
60+	52 92	75·05	28 41	49 13	72 82	26.28

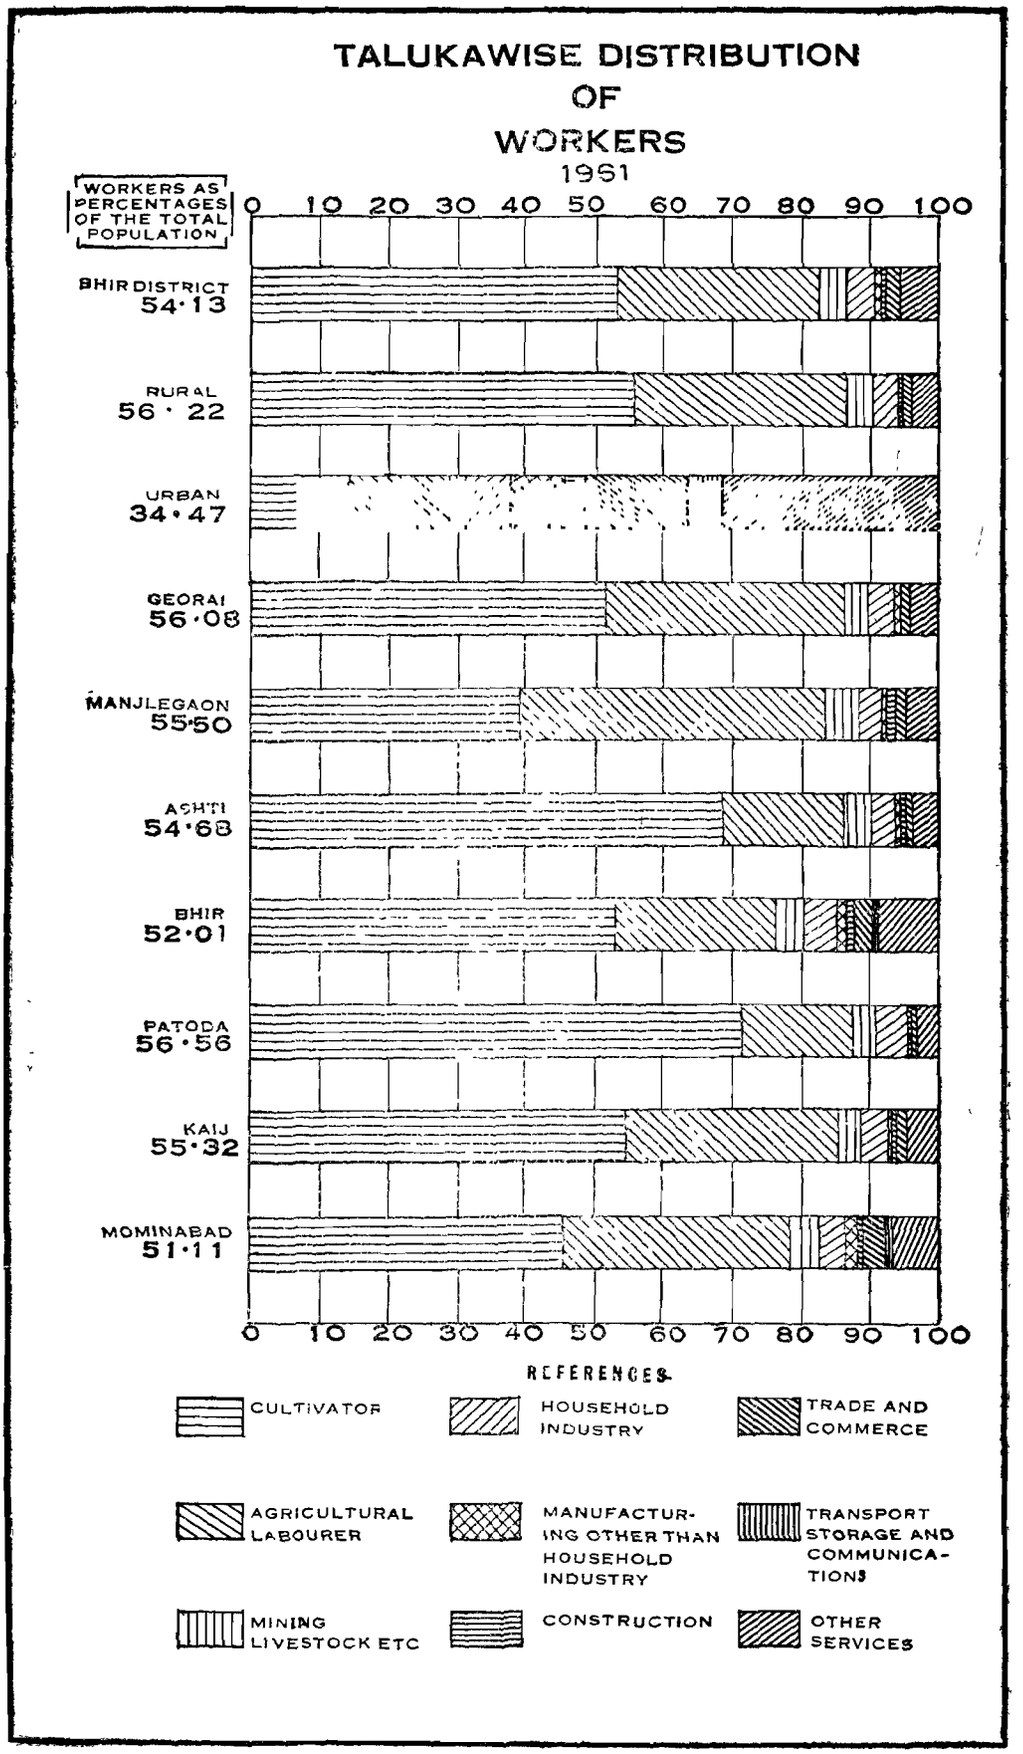

Proportion of workers is higher in the district than the State average in all age-groups and both for males and females. This is natural in the context of the overwhelmingly agricultural economy of the district and that too with inferior crop pattern and poorer yields. The proportion of children in the 0—14 years age-group working in the district is nearly double of that for the State In rural areas boys of this age-group usually look after the cattle and girls extend helping hands to their mothers in weeding cotton or groundnut picking and similar other lighter items of work on land.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra .	68 65	14 11	13 91	3 33
Bhir District .	84 50	9 65	5 09	0·76

With the prevailing low literacy rates both for males and females it is natural that 84·50 per cent of workers are illiterate. Those with matriculation and above are in other services, trade and commerce and transport and communications. It is however significant that 490 workers with educational level matriculation and above have reported as cultivators.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage of proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II :—

	Total Rural Urban	Total workers	Class of workers			
			Employers	Employees	Single workers	Family workers
Maharashtra ..	Total .	100	3 96	62 18	26 52	7 34
	Rural ..	100	1 57	46 47	38 58	13 38
	Urban	100	4 98	68 90	21 37	4 75
Bhir District .	Total	100	1 70	33 39	46 78	18 13
	Rural .	100	0 87	30 94	46 93	21 26
	Urban	100	3 52	38 71	46 47	11 30

Single workers are predominant in the non-agricultural sector with over 46 per cent in the total and both rural and urban areas. The proportions of family workers are 2½ times higher in the district than the State average. Even for urban areas the proportion of family workers is 2½ times higher than the State average. The higher proportions of single workers and family workers are due to the very low proportion of employees which is due to the absence of any large-scale industry in the district.

The proportion of employees, i.e., hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

	Total Rural Urban	Total workers	Employees	Others
Maharashtra .	Total ..	100	8 18	91·82
	Rural ..	100	4 91	95 09
	Urban ..	100	16·35	83 65
Bhir District ..	Total ..	100	6 16	93·84
	Rural ..	100	6 09	93 91
	Urban .	100	6 73	93 27

Even in the household industry, work is mostly done by the heads of households and/or family workers and participation by hired workers is restricted only to 6 per cent of total workers in household industry. For rural areas the district proportion is slightly higher than the State average but for urban areas it is even less than half of the State average.

Secondary Work

The proportion of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

	Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work		
			I	II	IV
MAHARASHTRA	I Cultivation	Total		17 85	1 97
		Rural		18 03	1 98
		Urban		10 54	1 32
	II Agricultural Labour	Total	13 17		0 94
		Rural .	13 46		0 97
		Urban	7 12		0 31
	III Household Industry	Total	14 78	6 97	
		Rural	19 61	9 38	.
		Urban	2 70	0 95	
BHIR DISTRICT	I Cultivation	Total		17 80	1 54
		Rural		17 87	1 55
		Urban		13 30	1 19
	II Agricultural Labour	Total .	8 06		1 35
		Rural	8 21		1.39
		Urban	3 35		0 38
	III Household Industry	Total	11 08	6 82	
		Rural	11 80	7 14	.
		Urban	4 87	4 08	.

The proportions of workers engaged in cultivation and working as agricultural labourers or at household industry as secondary work are of the same order for the district as for the State. The proportion of agricultural labourers working as cultivators is however lower in the district than the State average, perhaps because a substantial section of owner cultivators whose primary work is agricultural labour moves out of the district for work on sugar farms, etc., in Ahmadnagar district.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is shown below The occupational classification is described in the Explanatory Note to Part II .—

Occupational Division	Maharashtra	Bhir District
0 Professional, Technical and Related workers.	6 42	6 27
1 Administrative, Executive and Managerial workers.	3 89	2 45
2 Clerical and Related workers	9 13	2·88
3 Sales workers .. .	12 23	11 01
4 Farmers, Fishermen, Hunters, Loggers and Related workers	7 64	27 06
5 Miners, Quarrymen and Related workers.	0 75	0 41
6 Workers in Transport and Communication Occupations.	3 57	1 49
7-8 Craftsmen, Production Process workers and labourers not elsewhere classified	45 99	41·06
9 Service, Sport and Recreation workers	10 27	7 35
X Workers not classified by occupations	0 11	0 02
Total ..	100 00	100·00

Workers in occupation division 4 "Farmers, Fishermen, etc." have a substantially higher proportion in the district while proportions in all the other occupations are lower. The porportion of occupational division 2 "Clerical and Related Workers" is significantly lower, viz , 2·88 per cent against the State average 9·13 per cent.

Non-Workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	26 59	5 29	24 18	4 39	42 70	10 49
(2) Household duties	0 17	28 92	0 17	25 72	0 13	47 52
(3) Dependents, infants and disabled	71 03	64 73	73 77	68 79	52 69	41 14
(4) Retired, rentiers or of independent means	0 79	0 60	0 61	0 61	1 96	0 53
(5) Beggars, vagrants etc ,	0 89	0 42	0 92	0 45	0 71	0 23
(6) Inmates of institutions	0 01	N	0 01	N	0 03	0 02
(7) Persons seeking employment for the first time	0 26	0 01	0 16	0 01	0 95	0 03
(8) Unemployed but seeking work	0 26	0 03	0 18	0 03	0 83	0 04
Total ..	100 00	100 00	100 00	100 00	100 00	100 00

N = Negligible

Inadequate schooling facilities combined with poverty result in lowering the proportion of school-going children and as a result the proportions of full-time students to the total number of non-workers are lower in the district than the State average both for males and females.

There is a marked difference in the distribution pattern for non-workers among males and females. 26·59 per cent out of male non-workers are full-time students while the corresponding proportion for females is 5·29. The reason is that 28·92 per cent females who are engaged in household duties are also included as non-workers. The rural and urban differences are similar both for males and females. In urban areas the percentage of full-time students is higher and that for dependents lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 1·78 and 0·34 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties.

J-1761—I-1.

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with word "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) Seventy-five per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown inroman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for Persons.*

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for Electricity.*

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for Canal.*

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

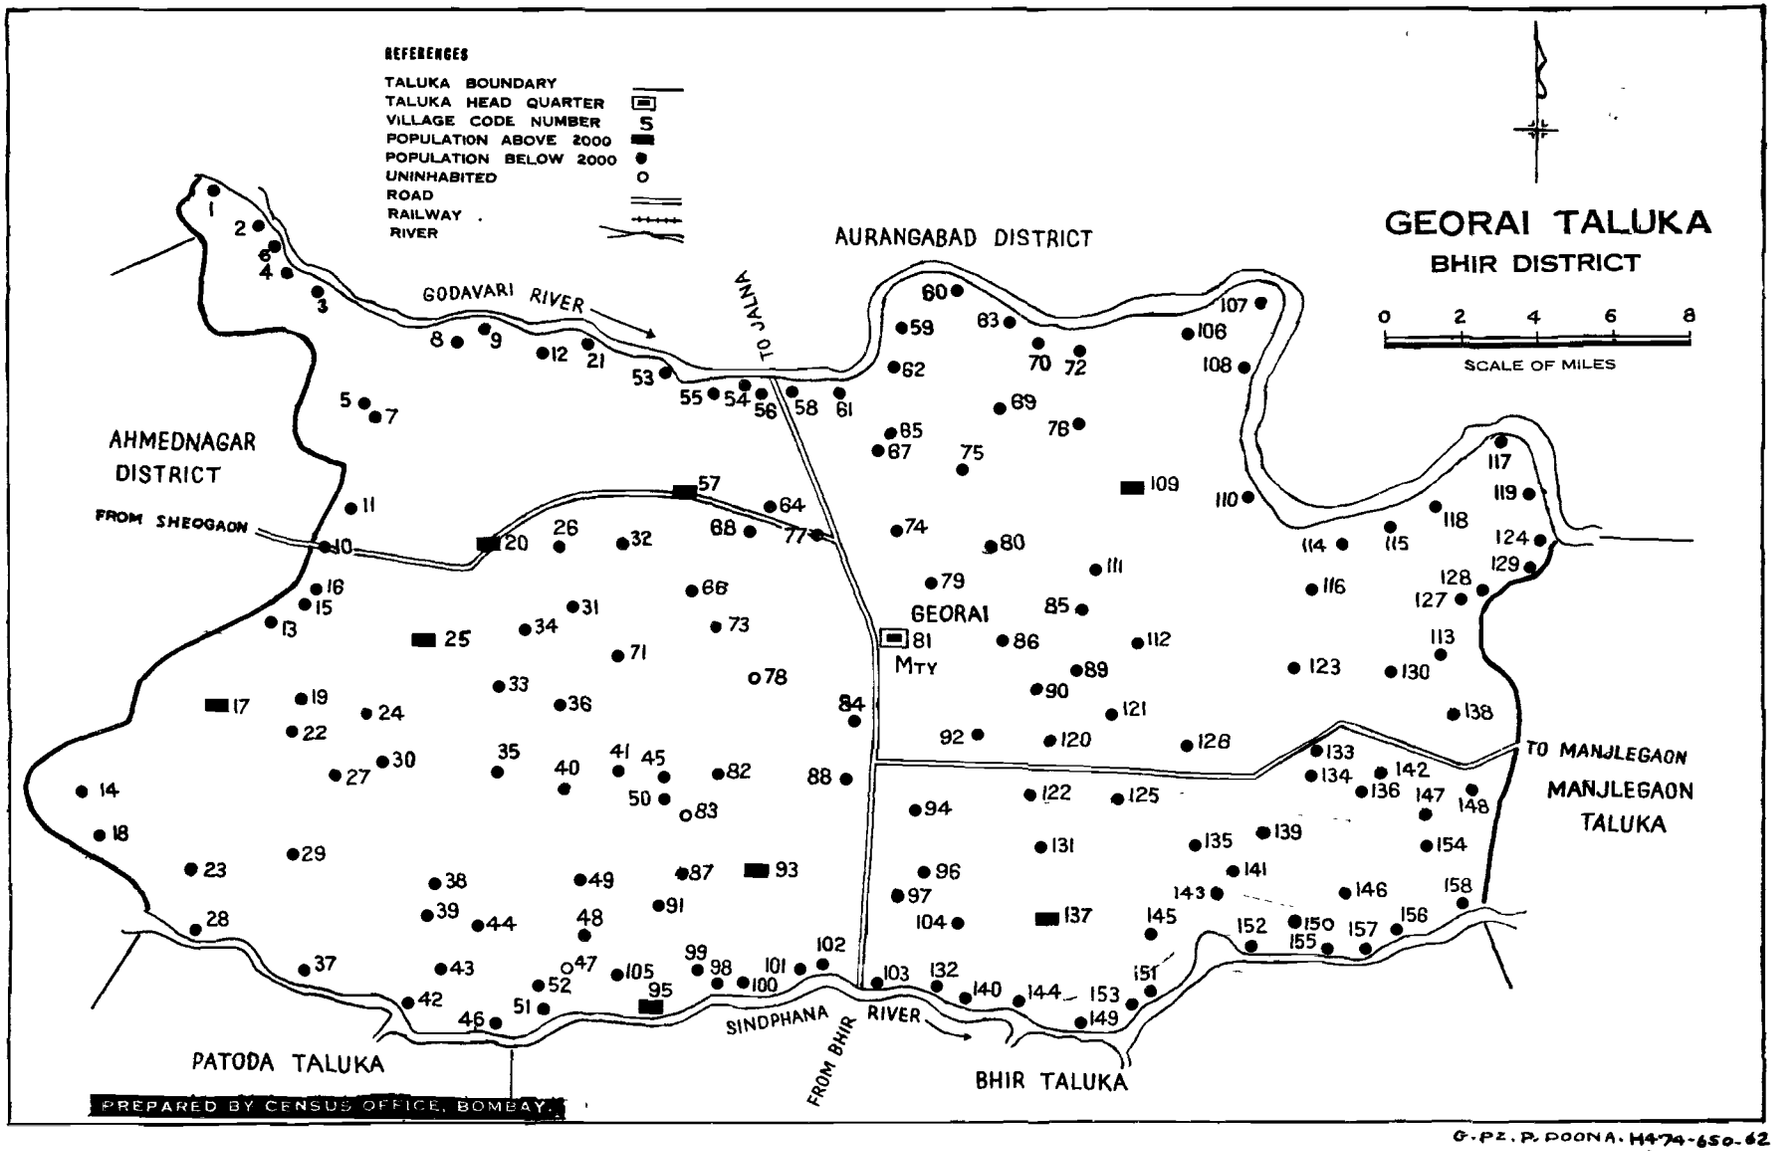

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

Number of Establishments and Workers for Industries classified by Minor Groups of Industrial Classification. 159

EXPLANATORY NOTE

THIS PART contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least $\frac{3}{4}$ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons;

(ii) earning dependents; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activitie
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water-supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V	Manufacturing	Division 2 & 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the household as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry;

(ii) engaged in cultivation only;

(iii) engaged in household industry only; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79 This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. This table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males, and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rual areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, StateLegislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Bauddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from the household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of worker for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124 This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions major groups and minor groups with their Code numbers are listed below —

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Division 2 and 3 –Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services

Division 8—Services—*concld*.

83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc	007
	Production of juice by tapping palms . ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops —*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld*	
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation .	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores .	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash .	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc , by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati) .	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots .. .	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling .	230
	Cotton spinning (other than in mills) .. .	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms . ..	234
	Cotton weaving in handlooms ..	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets .. .	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile . ..	243
	Manufacture of other products like rope, cord age from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) .	251
	Wool spinning and weaving in mill . ..	252
	Wool spinning other than in mills . ..	253
	Wool weaving in powerloom . .	254
	Wool weaving in handloom ..	255
	Embroidery and art work in woollen textile .	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk ..	261
	Spinning of silk other than in mills . ..	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood . ..	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books . .	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear .	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes ..	320
	Manufacture of rubber footwear .. .	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime ..	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products .	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery .	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus ..	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products .	365
	Manufacture of aluminium products . ..	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery ..	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles ..	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tunning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railway, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy ..	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals . .	607
	Wholesale trading in straw and fodder .	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper .	661
	Retail trading in metal, procelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials .	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous—*	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous) . ..	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport—*	
	Transporting by railways	700
	Transporting by tramway and bus service .	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by see or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport—*	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing—*	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication—*	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services—*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institution	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare linic as also by hakimi, unahi, ayurvedic, allopathic and homeopatnic practitioners.	820
	Veterinary services rendered by organisations and individuals	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisation operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hair dressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described* including activities of such individulas who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note : n e c =not elsewhere classified

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers, and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers, and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Mechine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors, Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
73 Furnac men, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n e. c
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n e c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sports men and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers, n. e c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
X9 Workers Not Reporting Occupations.

APPENDIX III

Common Household Industries with Their Industrial Code Numbers

Note : n e c. = not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc , not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n e c
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc , n e c
026	Production and gathering of other forest products not covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc , by gathering or lifting from sea, river, pond.
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040 2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040 4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n e c.
041 1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042 2	Rearing and production of other animals (mainly for slaughter) n. e. c
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc , and other small birds, *e g* , pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar, eri mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107 4	Quarrying of sand, clay, gravel, etc., n e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200 2	Hand pounding of rice by Dhekhi or Ukhal
200 3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200 4	Grinding of chillies, turmeric, etc
200 5	Production of pulses
200·6	Parching of grains
200 7	Production and processing of other crops and foodgrains n e. c
202 1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202 3	Production of jaggery from coconut and palmyra juice (neera)
202 4	Production of other indigenous products from sugar and jaggery n e. c
203·1	Manufacture of achar, pickles, chutney and murabba
203 2	Production of sauce, jam and jelly
203 3	Processing of cashewnut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203 6	Making dried vegetables
203 7	Production of other fruit products and preservation of fruits n e c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204 2	Fish curying or curing and salting (curying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209 1	Confectionery
209 2	Making of sweetmeats, laddu, peda, barphi, batasa, etc
209 3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209 4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209 6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209 8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210 1	Manufacture of vinegar from coconut juice (neera)
210 2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212 2	Production of other indigenous liquors from other materials from trees and shrubs
214 1	Production of mineral water
214 2	Production of aerated water such as sodawater, lemonade, etc
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
	Major Group 22—Tobacco Products
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
	Major Group 23—Textile—Cotton
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
	Major Group 24—Textile—Jute
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by plam fibre
244·4	Making of rope by date plam fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
	Major Group 25—Textile—Wool
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
	Major Group 26—Textile—Silk
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
	Major Group 27—Textile—Miscellaneous
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
	Major Group 27—Textile—Miscellaneous—*concld.*
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat, and other headgear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including rain-coats and headgears n. e. c
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n e c
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc, from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
	Major Group 28—Manufacture of Wood and Wooden Products
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc, from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhai
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld*
288 7	Caning of chairs
288 8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288 9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n e c
289 1	Making of sticks and poles from wood
289 2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289 4	Manufacture of other wood and allied products n. e c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292 1	Making of envelopes and paper bags
292·2	Papier mache articles
292 3	Making of kite
292 4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292 6	Making of paper toys
292 7	Making of paper flowers, etc.
292 8	Manufacture of other paper products from paper, paper board and pulp n e c
	Major Group 30—Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc
302·2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
	Major Group 31—Leather and Leather Products
310 1	Flying processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310 3	Stuffed animals
311 1	Making of leather boots, shoes or chappals (slippers, sandals)
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n e. c
312	Making of clothing and wearing apparel (except footwear), made of leather and fur
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335 2	Manufacture of Agarbatti
335 3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kumkum and hinglo
335 6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products—*concld*
335 7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335 8	Manufacture of perfumes, cosmetics and other toilet preparations n e c.
336 1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n e c.
337·1	Manufacture of plastic toys
337 2	Making of plastic buttons
337 3	Manufacture of other plastic goods
337 4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n e c
338	Salt production
339 1	Manufacture of ink including fountain pen ink
339 2	Making of candles
339 3	Making of tooth powder
339 4	Making of boot polish and inedible oils, etc.
339 5	Manufacture of other chemical products n e. c
	Major Group 34-35—Non-metallic Mineral Product other than Petroleum and Coal
340 1	Making of bricks
340 2	Manufacture of roofing tiles
340 3	Manufacture of other clay products n e c
341 1	Manufacture of cement door frames and sanitary fittings
341 2	Manufacture of cement jali and tiles
341 3	Making of cement statues
341 4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342 2	Manufacture of lime
343 1	Stone carving
343 2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n e c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346 1	Making of images from soap stone
346 2	Manufacture of images, toys and other articles of plaster of Paris
348 1	Mica splitting
348 2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353 1	Making of glass bangles
353 2	Making of glass beads
353 3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356 1	Making of earthen toys and artware
356 2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360 1	Re-rolling of M S Rods
360 2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods n e c
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365 1	Making of utensils of brass and bell metal
365 2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld*
365 4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n e c
366 1	Making of aluminium utensils
366 2	Making of other aluminium products n e c
367 1	Making of tin utensils
367 2	Making of articles from tin sheets
367 3	Copper utensils
367 4	Bronze works including bronze images, medals and articles of alloys
367 5	Manufacture of other metal products (excluding iron, brass, bell metal, aluminium) n e c
368 1	Lacquerware (if on metal)
368 2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368 4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n e c including silverplating, goldplating, E P N S , etc
369 1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc
369 2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e g* , buckets, etc) and articles from iron sheets
369 4	Making and repairing of locks and trunks
369 5	Cutlery
369 6	Manufacture of pins
369 7	Manufacture of scales, weights and measures
369 8	Foundry Industry (including blacksmithy)
369 9	Manufacture of other sundry hardware such as G I pipe, wire net, etc , n e c
	Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377 1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377 3	Manufacture of other batteries n e c
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc
385 2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc
	Major Group 39—Miscellaneous Manufacturing Industries
390 1	Repair of spectacles
390 2	Manufacture of small photographic equipment
390 3	Manufacture of optical and photographic equipment n e. c
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393 2	Goldsmithy
393 3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393 4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393 5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393 7	Gold covering work (fancy jewellery)
393 8	Bidriware industry
393 9	Manufacture of jewellery, silverwares, etc , n e c
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395 1	Manufacture of chalk pieces
395 2	Making of slate and slate pencil
395·3	Making of rubber stamps
395 4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc
396 1	Manufacture of deshi sports goods such as lezzim and dumbells
396 2	Making of rubber balls and balloons
396 3	Manufacture of other sports goods n e c bats, rackets, balls, etc
399 1	Making of tikka and cowdung cakes
399 2	Making of beds from conch shells and horn goods
399 3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399 7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc
399 8	Repair of petromax lights, etc
399·9	Making and repairing of goods n e c

EXPLANATORY NOTE

THE SCOPE of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually. However, this table is not shown for this District, as the data are not available

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, viz., " Daily Rainfall of India " and " Monthly Rainfall of India".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, viz., foodcrops and non-foodcrops. Foodcrops are further grouped by " cereals, pulses and others ". Non-foodcrops are similarly shown under " oilseeds and others ".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, viz., 1950-51, 1956-57 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

A-1761—III– 24-B (Bhir.)

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices or principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics prosented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, viz., 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, viz., 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is availabe and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
