OF THE INDIAN ADMINISTRATIVE SERVICE
Superintendent of Census Operations, Rajasthan

Printed by Mafatlal Z. Gandhi, at Nayan Printing Press, Ahmedabad-1.

FOREWORD

The Census data has always been considered as indispensable for day to day administration. It is increasingly being considered now as the foundation stone of all regional planning. The publication of this series of District Census Handbooks wherein census statistics is made available for smaller territorial units is, therefore, a significant occasion for it fills many existing gaps in statistics at the lower levels. Many interesting details have been revealed by the Census 1961 and I hope persons engaged in the administration of the State and public in general will appreciate the value and the effort that has gone into the production of such a standard book of reference.

I congratulate the Superintendent of Census Operations, Rajasthan, Shri C. S. Gupta I. A. S. and his colleagues who have done a good job with skill and perseverence.

B. MEHTA
Chief Secretary
to the Government of Rajasthan.

JAIPUR,
1st March, 1966.

PREFACE

The District Census Handbooks, to which series the present volume belongs, are the gifts of the Census of India and were first introduced in 1951. The 1961 series of District Census Handbooks are more elaborate than their counter-part in 1951 and present all important census data alongwith such other basic information as is very relevant for an understanding of the district. A wide variety of information which the Census 1961 collected has already been released in several parts as mentioned elsewhere in this book. The information contained in the present volume will be found useful by the Government, the district administration, persons engaged in regional planning, social workers and scholars in the field of humanities. Unfortunately these Handbooks became available to the users rather late in the decade. This was due to difficulties in printing. The Government Press Jodhpur, to whom this work was assigned by the State Government, had a heavy back-log of printing and found it impossible to print all the books in the series itself. Arrangements had therefore to be made to get these printed through a private press. I trust a more expeditious method for printing of such valuable matter in time will be devised in future.

I am grateful to Shri Asok Mitra, Registrar General, India for his guidance in this work from time to time. I am greatly beholden to the State Government for their kindly agreeing, as they also did in 1951, to get this series published at their cost.

Dr. U. B. Mathur, Dy. Superintendent Census Operations, Rajasthan assisted me in editing this series. Tabulation Officer Shri S. R. Luhadia assiduously worked for compilation of the information presented in the book and has seen it through the press. Many of the facts and figures incorporated in the book were built up after scrutiny of a lot of raw material and by personal contacts. This task was admirably done by Shri Ram Autar Gupta, Statistical Assistant. Without their sincere cooperation and the assistance rendered by various members of the staff, mentioned overleaf, who were associated with this work, it would have been hardly possible to present the information which is the subject matter of this book. I thank them all.

SECTION I

INTRODUCTION

INTRODUCTION

The territory now known as District Bhilwara used to be a part of the former Mewar State and the Chiefship of Shahpura. On the merger of Mewar State and the Shahpura Chiefship into the United States of Rajasthan in the year 1948, a separate district of Bhilwara was formed which, except for a few changes made in its territorial jurisdiction, continues up-to-date.

Location and Formation

2. District Bhilwara is situated between 25° and 25° 50′ north latitudes and 74° and 75° 25′ east longitudes. It is bounded on the north by Ajmer district, on the south by Chitorgarh district and Madhya Pradesh, on the east by Bundi district and on the west by Udaipur district.

3. The area of the district as reported by the Surveyor General of India is 4,034 Sq. miles and according to village papers it is 4,037.9 Sq. miles or 10,458.2 Sq. Km. The district covers 3.1% of the total area of the State and stands 14th in rank in area amongst the other districts of the State.

4. The district is composed of eleven tehsils *viz.*; Asind, Hurda, Shahpura, Jahazpur, Raipur, Mandal, Banera, Bhilwara, Sahara, Kotri and Mandalgarh which continue their name and form ever since the formation of the district. Inter-district transfers of territories took place by the transfer to this district of village Senturia from Rashmi and village Dowani from Begun tehsils of Chitorgarh district during the intercensal period 1951-61. Within the district by way of inter-tehsil readjustments, the entire former Badnor and Kareda tehsils were merged into Asind and Mandal tehsils respectively while the entire former Phulia and Arwar tehsils and one village Kotri from Jahazpur tehsil were merged into Shahpura tehsil. During this period one village Harpura was also transferred from Jahazpur tehsil to Mandalgarh tehsil.

Topography

5. The district generally consists of an elevated plateau. In the eastern portion of the district there are cluster of hills. There is a distinct range in the north-east corner which extends to Jahazpur town. The district is intersected by Aravalli ranges at several places which are predominated in the south-east in Mandalgarh tehsil and in the north-east in Jahazpur tehsil. Among the important rivers which flow in the district are Banas, Mansi, Khari, Kothari, Berach, Nakadi and Chandrabhaga. River Banas rises in the Aravalli hills in Udaipur district and enters this district near village Doodiya in Bhilwara tehsil. This river approaches the hills of Mandalgarh and is joined by the river Berach on the right bank and Kothari on the left. It then flows through Jahazpur tehsil and enters Tonk district. Another river Mansi has its origin in Mandal tehsil and passing through the portions of Asind and Hurda tehsils it joins the Khari river in Shahpura tehsil. Khari river originates near Deogarh in Udaipur district and is joined by Mansi river in tehsil Shahpura. Tanks are found in several villages of the district, the waters from which is utilised for irrigation as well as for domestic use. Among them Naharsagar, Ummed Sagar, Mandal, Gurla and Karera are note-worthy. Nahar Sagar, which is the largest in the district, was constructed by Nahar-singh-the ruler of former Shahpura State. It is at a distance of nearly 8 miles north of Shahpura town. Ummed Sagar, 4 miles from Shahpura town, was also constructed by Naharsingh, which was named after his son Ummed Singh. Mandal tank in the north-west of Mandal town has a beautiful bund.

Climate

6. The climate of the district is moderate and healthy. The district lies in the belt having an average minimum temperature from 15 0° C to 17.5° C and an average maximum temperature ranging between 27.5° C and 30.0° C. The normal annual rainfall of the district is 74.54 Cms. and lasts from July to September. The normal rainy days in the district are about 32 a year.

Geology and Minerals

7. The geological formation of the district consists of Banded gneissic-complex and Bundelkhand gneiss,

Vindhyan, Aravalli and Delhi systems. The district is rich in minerals. There are several mica mines in Raipur and Sahara tehsils. Mica is also available at village Bagwasa in Jahazpur tehsil. There are soap stone quarries at Bagwasa (Jahazpur tehsil), Chandpura and Kachhola (Mandalgarh tehsil) and at Georiya (Kotri tehsil). Sand stone is found in large quantities at various places in Mandalgarh tehsil while clay is found at Mangrop (Bhilwara tehsil) and in Mandal tehsil. Iron ore is available near Asind and Banera villages while Kyanite is found near Bhilwara town and at other places in south-west of the district. Other minerals found in the district are beryl, asbestos, calcite and garnet.

Forest, Flora and Fauna

8. During 1960-61, 1.3% of the total area of the district was under forests according to village papers. The district falls under subsidiary edaphic type of dry tropical forests. The principal species found is Dhokra (Anogeissus pendula). On higher reaches Salar (Boswellia serrata) and Khirni (Wrightia tomentosa) are found. Other trees found are Ber (Zizyphus jujuba), Babul (Acacia arabica), Gular (Ficus glomerata), Hingota (Balanites aegyptiaca), Pipal (Ficus religiosa) etc. Among shrubs mention may be made of Ak (Calotropis procera), Thor (Euphorbia royleana), Karonda (Carissa spinarum) etc. Deer, Neelgai, wild pigs, Chital, fox, etc. constitute the fauna of the district.

General Administration

9. For the purposes of administration, the district is divided into four sub-divisions and eleven tehsils as mentioned below :—

Name of Sub-division	*Name of Tehsil*
1 Bhilwara	1 Bhilwara 2 Mandal 3 Banera 4 Sahara 5 Raipur
2 Shahpura	1 Shahpura 2 Jahazpur
3 Mandalgarh	1 Mandalgarh 2 Kotri
4 Gulabpura	1 Hurda 2 Asind

10. The Collector is the administrative chief of the district who is also the District Magistrate. Each Sub-division is under the charge of a Sub-divisional Magistrate who is vested with 1st Class Magisterial powers while each tehsil is under the charge and supervision of a Tehsildar who is vested with 2nd or 3rd Class Magisterial powers as the case may be. Besides Collector, Sub-divisional Officers and Tehsildars who exercise criminal powers, there are courts of District and Sessions Judge at Bhilwara and Civil Judge at Bhilwara and Shahpura. A court of Munsif Magistrate also functions at Gangapur.

11. With the advent of democratic decentralisation, 11 Panchayat Samities have been formed out of which 8 are Community Development Blocks. The Panchayat Samities are guided by the Zila Parishad under the Chairmanship of the Pramukh and supervised by the Collector of the district who is also the District Development Officer. The Rajasthan Panchayat Samities and Zila Parishads Act, 1959, devolves on these Panchayat Samities the complete charge of the administration of the Block including the implementation of the Community Development Programmes. For imparting the technical guidance to the villagers Government has deputed its representatives from various departments to the Blocks so that an all round progress may be achieved. The ultimate aim of the Government is to make these Panchayat Samities the sole agency of all developmental activities at the Block level.

12. The office of the Superintendent Police is located at Bhilwara. 21 Police Stations functioned in the district during the year 1960-61.

Land Use

13. The classification of the land use in the district during 1960-61 was as follows :-

Classification of the land use	*Percent*
1 Forests	1.3
2 Land put to non-agricultural use ...	3.4
3 Barren and uncultivable land ...	15.4
4 Other uncultivated land excluding fallow land	8.2
5 Culturable waste	32.2
6 Fallow land	18.7
7 Net area sown	20.8
Total	100.0
Area sown more than once	7.1

Crop Pattern

14. Out of the total area under principal crops during 1960-61, 54.5% was utilised for cereals, 2.6% for pulses and the rest of the area was utilised for growing other crops including oil seeds. The important crops of the district in order of production are sugarcane, maize, wheat, barley, etc.

15. The district ranked second in the production of cotton and maize, fourth in sugarcane and seventh in barley amongst the other districts of the State and contributed 15.9% of cotton, 13.9% of maize, 10.1% of sugarcane and 5.9% of barley in the State during the year 1960-61.

Irrigation

16. The principal sources available for irrigation in the district are tanks and wells. During 1960-61, 388.3 thousand acres of land were under irrigation in the district of which 199.4 thousand acres were irrigated by tanks, 188.6 thousand acres by wells and the rest irrigated by other sources. 76.5% of the total irrigated area was under food crops including sugarcane.

Animal Husbandry

17. The total livestock population in the district was around 22.57 lakh heads according to the Livestock Census of 1961 as compared to 20.47 lakh in 1956. Out of the total livestock during 1961, 36.7% were cattle, 30.8% sheep, 20.5% goats, 10.5% buffaloes and the rest comprised of horses, ponies, mules, donkeys, camels and pigs. The total poultry in the district during 1961 was around 24.6 thousand, most of which consisted of fowls.

18. There are veterinary hospitals at Bhilwara, Shahpura and Jahazpur and dispensaries at Gangapur, Gulabpura, Banera, Raipur, Mandalgarh, Asind, Kareda and Badnor. Sheep and wool extension centres are run at Bhilwara and Shahpura under State Scheme while at Asind, Jahazpur, Shahpura, Mandal and Kotri under Community Development Blocks. There is a mass immunisation unit at Bhilwara. A sum of Rs. 1.30 lakh was spent over the development of animal husbandry in the district during the second five year plan.

Agricultural Implements

19. There were about 109 thousand ploughs, 38.3 thousand carts. 1.3 thousand 'ghanies', 663 sugarcane crushers, 80 oil engines, 60 tractors, 10 electric pumps and 5 persian wheels in the district according to the Livestock Census of 1961.

Agricultural Improvements

20. During the second five year plan a sum of Rs. 19.66 lakhs was spent in the district on agriculture sector. During this period about 35.6 thousand Mds. of improved seeds, over 800 tons of fertilizers, 4.9 lakh tons of manure and around 5 hundred improved agricultural implements were distributed to the farmers under various schemes of the Agriculture Department. About 4.7 thousand manure pits were dug and 8.6 thousand acres of area were brought under the plough. Seed multiplication farms were established at Bhilwara and Gulabpura.

Irrigation Development

21. During the period of second five year plan the work on Naharsagar, Ummedsagar, Deoria and Atwara projects was completed over which about Rs. 13.63 lakhs were spent upto the end of March, 1961. Besides, the work on the Meja, Sareri, Arwar, Jetpura and Khari schemes was under progress. On completion of all these schemes it is expected that an additional area of about 94.7 thousand acres will be irrigated. In all Rs. 124.04 lakhs were spent on irrigational facilities in the district during the second five year plan.

Industries and Labour

22. During the year 1952 there were 14 registered factories in the district which increased to 61 by the end of 1961. The largest establishment of the district is the Mewar Textile Mills Ltd. which provided employment to nearly 1.3 thousand persons in the year 1961. Other important establishments of the district are Government Cotton Ginning & Pressing Factory, Duduwala & Co. and Mica Insulating Bricks Factory at Bhilwara, Shri Ekling Cotton Ginning and Pressing Factory at Gangapur and Mahalaxmi Cotton Ginning Factory at Asind. During the year 1959-60, about 22 lakh yards of cloth was produced in the district.

23. There are several other industries in the district relating to cotton ginning & pressing, manufacture of bidi, furniture making, mica cutting, plating on utensils, shoe making and polishing on furniture. Some small factories are also found e.g. Dal & Oil Mills, saw mills etc. The industries department has also started a scheme of aiding small scale industries by advancing loans to the parties. Bigod, a village in Mandalgarh tehsil at a distance of 24 miles from Bhilwara town is famous for black-smithy. The District Industries Department has started a training-cum-production centre at this village where training is imparted in the modern methods of black-smithy.

24. There is a 'A' Class Labour Welfare Centre at Bhilwara which provides facilities of a reading room, library, recreational activities, wrestling, adult education, gymnasium etc. A sum of Rs. 6.86 lakhs was spent on industrial development in the district during the second five year plan.

25. The district has a separate employment exchange located at Bhilwara which registers people who are seeking employment and helps in securing employment for them. During 1961, the total number of registrations in this employment exchange was around 3.2 thousand.

Trade Unions

26. There were 18 trade unions in the district during 1960-61. The oldest trade union is the Mill Mazdoor Sangh which was registered in the year 1949.

Power

27. During the period of the second five year plan, additional installations of 1,040 Kw capacity were made at Bhilwara through installing two sets each of 200 Kw capacity in 1956-57 and one set of 640 Kw capacity in 1958-59 under the development of thermal power stations and connected works. Besides, one set of 125 Kw was installed in 1958 with two alternators each of 50 Kw in 1960-61 at Shahpura. Bhilwara and Shahpura towns are connected with electricity. A sum of Rs. 7.59 lakhs was spent on the development of power resources in the district during the second plan period.

Trade and Commerce

28. The articles that are exported out of this district consist of mica, soap stone, hosiery goods, cloth etc. while the imports include grain, medicines and other articles of general merchandise.

29. Bhilwara is the main trading centre in the district. Facilities of local markets also exist in certain villages which have been shown in the Primary Census Abstract elsewhere in this book.

30. The State Bank of Jaipur, The Bank of Rajasthan Ltd; The Central Co-operative Bank and The Punjab National Bank Ltd; have got their branches in the district.

31. There were 282 shops dealing in country liquor, 27 in hemp drugs and 2 in Indian made foreign liquor in the district during 1960-61. There were two permanent and three temporary cinema houses in the district during 1960.

Education

32. During 1956-57 there was one College, 9 High/Higher Secondary Schools, 37 Middle Schools, 10 Junior Basic Schools, 369 Primary Schools, 1 Professional School and 7 Schools for Special Education. The number increased to 18 High/Higher Secondary Schools, 54 Middle Schools, 81 Junior Basic Schools, 510 Primary Schools, 2 Professional Schools and 68 Schools for Special Education in 1960-61. The total number of scholars in all types of institutions during 1960-61 was over 42 thousand. A sum of Rs. 35. 57 lakhs was spent on educational facilities in the district during the second five year plan.

Medical and Public Health

33. During 1950-51 there were 15 allopathic hospitals and dispensaries in the district with 97 beds. By the end of the year 1960, the number of such Government institutions increased to 17 with 109, beds. There is a maternity and child welfare centre at Shahpura having 6 beds. Maternity facilities have also been provided in maternity hospital at Bhilwara where 12 beds are reserved

for this purpose. Family Planning Centres function at Bhilwara, Shahpura, Hurda and Jahazpur of which the first is under Government control, the rest are under the Panchayat Samities.

34. Out of 15 small pox vaccination centres in the district, 4 are under Government control and the rest are controlled by the Panchayat Samities. An anti-malarial unit has also been functioning in the district with its headquarters at Bhilwara under the National Malaria Eradication Programme.

35. Paediatric ward has been opened in Mahatma Gandhi Hospital at Bhilwara having 8 beds where an anti-rabic centre and a dental clinic also function. Laboratory and X-ray facilities are also available in Mahatma Gandhi Hospital at Bhilwara.

36. By the end of March, 1961, there were 48 Government Ayurvedic and Unani dispensaries including one hospital in the district as compared to 39 such institutions functioning during the year 1956–57.

37. The number of outdoor and indoor patients treated in the Government allopathic medical institutions of the district in the year 1960 was about 405 thousand and 6 thousand respectively. Rs. 6.10 lakhs and Rs. 1.10 lakh were spent on Medical and Public Health and Ayurvedic facilities in the district respectively during the second plan period.

Drinking Water Facilities

38. An urban water supply scheme for Bhilwara town was completed during 1959–60 over which Rs. 20.06 lakhs were spent during the first two five year plans.

Housing

39. During the second five year plan a loan of Rs. 6.36 lakhs was disbursed to the public under Low Income Group Housing and Rs. 90 thousand under Middle Income Group Housing Schemes for the construction of houses as a result of which 213 houses were constructed under L.I.G.H. and 2 houses under the M.I.G.H. Schemes. 105 houses under L.I.G.H. and 4 houses under M.I.G.H. schemes were under construction. Besides, 500 houses were constructed under the Subsidised Industrial Housing Scheme.

Transport and Communication

40. The district had only 102 miles of roads in 1950–51 which increased to 574 miles by the end of March, 1961. 50% of the roads in the district were fair weather and dressed up tracks, 43.4% painted and metalled and the rest consisted of gravelled type during 1960–61. 8 road works were completed and a sum of Rs. 45.61 lakhs was spent on road development works in the district during the second plan period.

41. There were 268 motor vehicles on road during 1954 which increased to 600 in 1961. The district is connected by Western Railway. A main line connecting Ajmer with Chitorgarh passes through this district. The total length of the railway line in the district is 89 kilometres. There are Dak Bungalows at Bhilwara, Shahpura, and Gangapur. All the important places of the district are connected with bus routes. There were 123 Post Offices, 18 Telegraph Offices, 4 Public Call Offices and 2 Telephone Exchanges in the district during 1960–61.

Local Bodies and Co-operation

42. There are Municipal Boards in the district at Bhilwara, Shahpura and Gangapur. The main sources of revenue of municipalities are rent of shops, octroi, vehicle tax, house tax and the grants provided by the Government. There is a Zila Parishad comprising of 11 Panchayat Samities and 344 Gram Panchayats in the district.

43. There is a Central Co-operative Bank and various types of Co-operative Societies in the district. In June, 1961, as many as 614 societies of various categories (including the Central Co-operative Bank) with a total membership of around 43 thousand were functioning in the district. The working capital of these societies was around 118.7 lakhs and the share capital was Rs. 21.6 lakhs. A loan of about Rs. 58.8 lakh was advanced and loans of Rs. 39.7 lakh were recovered. The deposits and borrowings during the period was around Rs. 11.3 lakh and Rs. 83.1 lakh respectively while the total

liabilities amounted to Rs. 123.8 lakh. In all 344 societies were functioning at profit, 151 at loss and 119 societies were functioning on no profit no loss basis. During the second five year plan a sum of Rs. 6.73 lakh was spent on Co-operation in the district.

Community Development

44. The Community Development Programme was started in the district during 1955-56 by establishing a block at Mandalgarh. This was followed by the establishment of a block at Mandal in 1956-57, Jahazpur and Shahpura in 1957-58, Kotri in 1958-59, Asind in 1959-60, Hurda in 1960-61 and Raipur in 1961-62. Thus by the end of the year 1961 there were 8 blocks (including one pre-extension block) in the district.

45. During the year 1961, about 15 thousand Mds. of fertilizers, 29 thousand Mds. of seeds and over 1,400 agricultural implements were distributed to the farmers and around one thousand agricultural demonstrations were held in the various Panchayat Samities of the district. 72 wells were constructed for drinking and another about 800 for irrigation purposes. 92 adult literacy centres were opened and over 1.8 thousand persons were made literate. 72 Youth Clubs and 14 Mahila Samities were started and 12 reading rooms and libraries were opened.

Social Welfare

46. An office of the State Social Welfare Department functions at Chitorgarh under the supervision of a Social Welfare Officer who looks after the welfare activities connected with the uplift of the backward classes in this district. This office also acts as a liaison between prisoners and their relatives.

47. There are two Government hostels in the district. Besides, voluntary hostels are run at Mandalgarh, Jahazpur, and Gulabpura each with the sanctioned strength of 25. There are training-cum-production centres for Scheduled Castes one at Bhilwara and another at Kaliyas (Asind tehsil) which provide training in tailoring and carpentary respectively.

48. The Government has also opened 'Sanskar Kendras' at Bhilwara and Shahpura for the development of cultural and religious activities of the Seheduled Castes.

49. For rehabilitating the Scheduled Tribes, houses have been constructed at Roopaheli (Hurda tehsil) and Rajwas (Jahazpur tehsil) and for Gadolia Luhars at Bhilwara. A sum of Rs. 3.5 lakh was spent for social welfare and welfare of backward classes in the district during the second five year plan.

Fairs and Festivals

50. Some of the important fairs held in the district are as follows:-

(i) Phooldol-ka-Mela

A fair is held at Shahpura town from Chaitra Badi 1 to Chaitra Badi 5 (March-April) every year and is called Phooldol-ka-Mela. About 15,000 people congregate in the fair who form groups and enjoy the occasion by singing songs and performing dances. The nearest bus stand for the fair is Bhilwara while the nearest railway station is Mandal.

(ii) Thaneshwar Mahadeo-ka-Mela

This fair is held on the confluence of rivers Khari and Mansi near village Phooliya in Shahpura tehsil. It takes place on Kartika Sudi 15 (Oct-Nov) every year when about 15,000 people participate. Bijainagar is the nearest railway station and bus stand for the fair.

(iii) Tejaji-ka-Mela

The religious fair of Tejaji is held at Mandal from Bhadrapada Sudi 8 to Bhadrapada Sudi 10(Aug-Sept) every year. About 10,000 persons congregate in the fair. The largest congregation is on Bhadrapada Sudi 10 (Aug-Sept) which is also known as Teja Dashmi. The Tejaji a legendary hero is believed to be a protector of the cattle. The nearest railway station and bus stand for the fair is Mandal. Tejaji fairs are also held at villages Sodar, Hurda and Dantra in Hurda tehsil, at Tahnal in Shahpura tehsil, at Bhilwara in Bhilwara tehsil and at Bijoliya in Mandalgarh tehsil.

51. The main festivals among the Hindus are Holi, Deewali, Dashera and Raksha Bandhan while Muslims observe Moharrum, Idulfitre, Idul Zuha and Barawafat.

Places of Historical & Archaeological Importance

52. Amongst the places of interest in the district the fort of Mandalgarh is famous. This fort is surrounded by low ramparts and a bastioned wall. It was built by the Chauhans of Ajmer in 12th Century. It changed hands several times till Rana Amarsingh II finally took possession of it in 1706.

Electoral Participation and Preferences

53. During the first general elections in the year 1952 there were 7 constituencies in the district of which one was a double member constituency. The total voting population was around 398.4 thousand. 32.9 percent voters exercised their right of franchise. The highest percentage of polling was 30.6 in Asind constituency while the lowest was in Jahazpur constituency where only 20.4% votes were polled. 3 seats were captured by the Congress, one each by the Jansangh and the Hindu Maha Sabha and the remaining 3 seats were won by the candidates who were independents. No separate seat was allotted to the district for the House of the People. The parliamentary constituency of the same name was, however, so delimited as to contain most of its tehsils (except Jahazpur and Mandalgarh which was combined with other constituencies) and two tehsils of Udaipur district.

54. During the second general elections in the year 1957 there were 6 assembly constituencies two of which were double member. The total voting population was around 411.4 thousand. 32.8% voters (50.3% of men and 14.5% of women) exercised their right of franchise. The highest percentage of polling was 36.5 in Bhilwara constituency and the lowest in Banera constituency where only 28.3% votes were polled. 6 seats were captured by the Congress and the remaining two seats by the Ram Rajya Parishad. For the House of the People the district was allotted a separate seat. 32.9% votes were polled and the seat was won by the Congress candidate.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract furnishes the population figures for 1961 Census and is presented in three parts viz. District, Rural and Urban Primary Census Abstracts. These abstracts contain the data in respect of area, number of occupied residential houses and households, total population and its breakup by sex, literacy, Scheduled Castes and Scheduled Tribes, workers and non-workers. The workers have further been classified into following nine industrial categories:—

I As Cultivator,
II As Agricultural Labourer,
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities,
IV At Household Industry,
V In Manufacturing other than Household Industry,
VI In Construction,
VII In Trade and Commerce,
VIII In Transport, Storage and Communications and
IX In Other Services.

2. The District Primary Census Abstract furnishes the data for the district total, rural and urban areas, each rural tehsil and for each town separately. The Rural Primary Census Abstract presents the data for the villages while Urban Primary Census Abstract furnishes information for the municipal wards of all the towns in the district.

3. A Revenue Mauza (including its hamlets) is treated as a village while a town is a place having either a Municipality or Cantonment or satisfying the following factors:—

(a) having a minimum population of 5,000 and
(b) having three-fourth of its male adult population engaged in non-agricultural pursuits, or
(c) having a density of approximately 1,000 persons per sq. mile.

Hamlets falling into the revenue areas of the towns but not administered by the municipality are treated as the non-municipal area of the town. The villages in the Rural Primary Census Abstract are presented tehsilwise and within a tehsil in order of their Census location code numbers.

4. In the Urban Primary Census Abstract, the data has been presented for each municipal ward of the towns. The blockwise figures for towns could not be presented here for want of space. This information, however, is available in the office of the Superintendent, Census Operations, Rajasthan. The data for non-municipal areas attached to a town has been shown just after the wards while for special charges, the figures have generally been included in the respective wards.

5. A special column (2a) in the Rural Primary Census Abstract has been provided for showing some of the basic amenities which existed in the villages. These amenities have been shown by means of symbols as under:-

P—Primary School
M—Middle School
H—High/Higher Secondary School
C—College
D—Dispensary
Hos—Hospital
Tmw—Trained Midwife
V—Veterinary Hospital/Dispensary
Pw—Pucca well
Kw—Kutcha well
Tk—Tank
B—Baori (stepped well)
Rly—Railway Station
Po—Post Office
To—Telegraph Office
Lm—Local Market

6. Village marked with an asterisk (*) indicates the location of a Gram Panchayat.

7. The area figures shown in column (3) of the Rural Primary Census Abstract are collected from the Revenue Authorities while this column of the Urban Primary Census Abstract has been left blank as area figures for the wards are not available.

8. Column (4) of the Abstract includes houses used as dwellings or partly as dwellings.

9. Column (5) shows the number of households. A "household" has been defined as a group of persons who commonly live together in the same house and take their meals from a common kitchen. A servant, friend or a guest (related or unrelated) residing and eating with the household during the census period has been treated as a member of the household. On the other hand, a son or a daughter residing in a hostel is not treated as a member of the household.

10. Columns (6) to (8) of the Abstract show the total population and its sex-wise breakup. This also includes houseless and institutional population. Houseless person has been defined as (i) a person who might be doing domestic service or some other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, etc. or residing without any such huts just on the open ground; and (iii) beggar, vagrant, tramp, sadhu, fakir, etc. who is found in the foot-paths, streets, in places like parks, gardens, railway yards, etc. Institutional population includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

11. Columns (9) to (12) of the Abstract show the population of Scheduled Castes and Scheduled Tribes and their sex-wise breakups. The further breakups of individual Scheduled Castes/Tribes are given in Table SCT—I.

12. Columns (13) & (14) of the Abstract give the number of literate and educated persons. A "literate" is defined as a person who knows both reading and writing. This also includes the persons having higher education. Detailed information on educational levels has been given in Table B—III and C—III.

13. Columns (15) & (16) give the total number of male and female workers. A person is classified as "worker" if in case of seasonal work like cultivation, livestock, dairying, household industry, etc. he has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household . A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined, has been treated as non-worker. "Work" includes not only actual work but effective supervision and direction of work also.

Persons under training as apprentices with or without stipend or wages are regarded as workers. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, or any such work, she has been treated as a worker. Similarly persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work, are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

The population classified as workers here is the economically active population including family workers but not including unemployed persons.

14. Columns (17) to (34) furnishes the sex-wise distribution of workers into nine industrial categories. The explanations for these categories are given below:—

Category I

This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work in land are also included persons who are engaged in supervision or direction of cultivation. The term 'cultivation' involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations.

Category II

All other persons working on land as labourers on wages without exercising any supervision or direction and without holding any right upon the land are classified as agricultural labourers and are included in this category.

Category III

Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

A "Household Industry" is an industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory but may use machinery and employ power like steam engine or oil engine or electricity to drive the machinery. Thus, in a rural area, the household industry can be located either at home or within the village but in urban area, the household industry or at least the major part of its work must be located at home. A household industry relates to production, processing, servicing or repairing and includes making and selling of goods but should not be confined simply to buying and selling. It does not include profession such as pleader, doctor, barber, waterman or astrologer, etc. Persons working in other person's household industry as paid employees, are also treated as workers in household industry.

Category V

'Manufacturing' includes all types of production, processing, servicing or repairing of goods which does not

include production or processing under category IV.

Category VI

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, water-ways, reservoirs, etc.

Category VII

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stock and shares, insurance, money lending banking, etc.

Category VIII

This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraph, telephones, wireless signalling, information and broadcasting are also included in this category.

Category IX

This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, recreation services, etc.

15. Columns (35) & (36) give the total number of male and female non-workers. The following persons have been classified as non-workers:—

1. Full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.

2. Person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.

3. Dependant, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.

4. Retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.

5. Beggar, vagrant or independent woman without indication of source of income and others of unspecified source of income.

6. Convict in Jail (an under-trial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.

7. Person who has not been employed before but is seeking employment for the first time.

8. Person employed before but now out of employment and seeking employment.

OTHER CENSUS TABLES

GENERAL POPULATION TABLES

(Note on A-Series)

There are four Tables and five Appendices in this series. These tables, being the basic population tables, furnish information about area, sexwise population and its variation during sixty years, classification of villages and towns by population and the trends of urbanisation in the district.

Table A-I

2. This is the basic population table showing area, density, number of villages and towns, occupied residential houses and population by persons, males and females. The data has been presented for the district as well as for each tehsil for total, rural and urban areas separately. The town figures have been shown immediately after the entries of the tehsil in which they are situated. The abbreviation just after the name of the town has been used to denote that the particular town has a Municipality or a Cantonment.

3. It may be noted that in the previous censuses the density of population and other urban break-ups upto the town level were not mentioned in this table which have been shown separately now for 1961 Census besides furnishing the number of inhabited and uninhabited villages in each tehsil.

4. The area figures both for rural and municipal towns have been obtained from the State revenue authorities. Though the area figures have been collected originally in acres yet these figures have been shown in Sq. miles and Sq. Km. in columns 3 (a) and 3 (b) respectively after converting them into the respective units. Further, the area figures have been given upto one decimal place in case of the district as well as for each tehsil but such presentation is made upto two decimal places in case of towns.

5. The density of persons has been worked out according to the area shown under column 3 (a) and has been presented separately for the district and for each of the tehsils and towns under column 4.

6. A village and a town has already been defined in para 3 of the note on Primary Census Abstract.

7. For the purpose of 1961 Census, a 'House' is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school etc., giving out on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. 'Occupied residential houses' are those houses which are used wholly or partly for the purpose of residence by one or more households.

8. In addition to this main table, there are three appendices which were not prepared in the last censuses.

Appendix I

9. This appendix is helpful in finding out the growth of the district to the present area since the last census. The appendix shows the territorial changes that have taken place during the last decade. A brief description of gain and loss of territory in those tehsils which had changes in area during the period is also shown in this appendix. A list of Such transferred areas has been given in the annexure to this appendix.

Appendix II

10. One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and above. For various reasons, several places with a population of 5,000 and over have not been recognised as towns. This appendix gives the tehsilwise number of such places with their population. Further, it also shows the percentage contribution of total rural population of the district of such places. An annexure showing the places with less than 5,000 population which were treated as towns in 1951 Census but declassified in 1961, is attached to this appendix.

Appendix III

11. This appendix shows the sexwise figures for houseless and institutional population for the district and each tehsil for total, rural and urban areas separately. Houseless and Institutional population has already been defined in para 10 of the note on Primary Census Abstract.

Table A-II

12. This table compares population figures of the district as ascertained at the 1961 Census with the corresponding figures for the six previous censuses. The figures presented for the six previous censuses in the table, have been adjusted after taking into consideration the territorial changes taken place in the district so as to afford a correct basis for comparison. This is an important table as it gives the growth of population from decade to decade. It further provides a basis for estimating the population especially in the absence of reliable data for vital statistics. The main change in this table over 1951 Census is that the percentage variation has also been mentioned from decade to decade.

13. The appendix attached to this table shows the population for the district as well as for each tehsil according to their territorial jurisdiction in 1951 besides furnishing the changes in area and the population involved in those changes that have taken place during the last decade. The details of transfers of areas and population in every case have been given in the footnote separately.

Table A-III

14. This table furnishes the sexwise total rural population together with the number of inhabited villages for the district as well as for each tehsil arranged into seven population size groups *viz;* less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

15. The main changes in this table over 1951 Census are (i) the group less than 500 has now been split up into two groups *viz*; less than 200 and 200-499 and (ii) it relates only to villages while in 1951 Census it related to villages and towns both.

Table A-IV

16. This table shows the growth of each town in the district since 1901 together with its sexwise population. It further furnishes the information regarding decade variation in population and its percentage. For the purpose of this table all the towns have been classified into the following six classes according to population :-

Class	I	1,00,000 and above
Class	II	50,000—99,999
Class	III	20,000—49,999
Class	IV	10,000—19,999
Class	V	5,000— 9,999
Class	VI	Less than 5,000

17. The district totals for a class have been given followed by the various towns in that particular Class. Column No. 2 of the table persents the name of the town and just under it the area of that town has been given both in Sq. miles and Sq. Km. The status of the town is separately shown in column No. 3 in an abbreviated form.

18. The main object of this table as indicated above is to show the growth of towns as towns and not how certain places have been converted into towns from villages as such the figures against towns have been shown for those decades only in which they were recognised as towns. The district population for all classes during the previous decades has been arrived at after adding the population of those places which were treated as towns in the corresponding decade but now declassified. As such if a town had not been treated as town in all the previous censuses, it is indicated as declassified in those particular censuses. Towns treated for the first time in 1951 Census have been asterisked*.

19. The change in this table over 1951 Census is that the areas of towns as well as the percentage of decade variations of total population of the towns have been additionally shown in the present census.

20. The appendix to this table shows the area and population of towns of 1951 Census which have been declassified in the present census. Such appendix was not prepared in the previous censuses.

21. A separate volume—Part II–A incorporating the General Population Tables for the State and the districts have been issued in which the concepts used have also been discussed.

Note :- 1. The Sq. Km. and density figures of urban areas of Tehsil/District are worked out using the area figures corrected upto 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Tehsil/District/totals tally.

2. Town treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

3. The following abbreviations have been used for the status of a town e. g.

Note :- 1. The district totals for each class of town relating to the years 1901 to 1951 do not correspond with the totals that would be arrived at by adding of the population figures of various towns relating to each census year. This is because that the district figures relating to the past census years also contained the population of those places which were classified as towns in the various censuses.

2. Town treated as such for the first in 1951 Census which continue as town in 1961 Census in shown with asterisk (*) on its left.

ECONOMIC TABLES

(Note on B-Series)

In 1951 Census Reports, the population was classified on the concept of 'dependency' which has been changed to that of 'workers' and 'non-workers' at the current Census. The change in the concept will be helpful in finding out the realistic picture of the economic activity of those important sections of household workers who otherwise have been left out of account in the past censuses.

2. This series has been divided into two parts *viz.*, (i) General Economic Tables and (ii) Household Economic Tables.

(i) GENERAL ECONOMIC TABLES

3. There are 9 General Economic Tables in this series. The first 3 tables distribute the working and non-working population by economic activity correlated with sex, age and educational levels. A more elaborate classification of workers by industry according to the Standard Industrial Classification is presented in Table B-IV while it has been shown by occupation in Table B-V. Table B-VI provides information about those occupations of National Classification which attract educated personnel in urban areas. Another Table B-VII shows the classification of workers by secondary work and the last two tables distribute the non-workers by sex, age and eight broad classes according to the activities pursued by them.

Table B-I

4. This is a basic economic table prepared on the basis of Primary Census Abstract, In this table the population has been divided into nine industrial categories of workers based on Indian Standard Industrial Classification and a separate category of non-workers (detailed classification of which are available in Table B-IX in Part II–B (ii) of State Census Report) further classified into sex and broad age-groups *viz.*, 0–14, 15-34, 35–59 and 60+. The classification of workers and non–workers by specific age–groups, is a special feature of 1961 Census. The age–groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle aged and elderly persons. Detailed classification of non-workers is, however, given in Table B-IX.

5. This table presents data separately for total, rural and urban population of the district while those for tehsils for rural areas only. Another Table B-II showing such information for each town is not reproduced in this book and has been given in Part II-B (i) of State Census Report.

Table B-III

6. This table has been compiled into two parts. Part A deals with urban population of the district classified into nine industrial categories of workers and a separate category of non-workers cross tabulated by literacy and various educational levels. Part B refers to rural population of the district as well as for each tehsil where educational levels have been confined only to two categories *viz.*, Primary or Junior Basic and Matriculation and above. It is an important table indicating employment of persons of different educational standards amongst the various categories of workers. The educational qualifications of available man-power can be assessed with the help of this table.

Table B-IV

7. This table has been presented in three parts. Part A deals with the industrial classification of worker of persons at work at household industry separately for total, rural and urban parts of the district, showing the figures for divisions and major groups of Indian Standard Industrial Classification. Divisionwise figures for each tehsil in case of its rural areas are also shown.

8. Part B of this table provides the data regarding industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service for total and urban areas of the district by divisions and major groups.

9. In Part C of this table the data has been furnished for industrial classification by sex and divisions, major and minor groups of persons at work other than cultivation for total and urban areas of the district. Such data for rural part of each tehsil is also presented in the supplementry table to B-IV Part–C by divisions only.

10. This table is quite important as it furnishes employment position in respect of various sectors of economy not only indicating the class of the workers *viz.*, employer, employee, single worker, family worker but also by different branches of industry according to divisions and major groups is Parts A and B and also by minor groups of Indian Standard Industrial Classification in Part C.

11. As the information included in Part C of this table is quite voluminous, the minor groups having figures less than 1% of the total workers of the respective division (less than 0.5% in case of division 2&3) have been excluded and relegated to the Appendix attached to this part of the table.

12. The Standard Industrial Classification, reproduced as an appendix at the end of note on this series describes in detail the various codes used for divisions, major and minor groups.

Table B-V

13. This is a new table and has been compiled for total and urban population by sex in order to provide information regarding occupational classification in the district engaged in production other than cultivation, further classified into divisions and groups on the basis of the National Classification of Occupations. Under each group the detailed occupational families are shown. Families having less than 1% of workers of the respective division (less than 0.5% in case of families under division 7-8) are not given in this table but are shown in an appendix attached at the end of this table. A fly leaf showing appropriate industrial category is also given in place of industrial category appearing in the table due to insufficient description given in the enumeration slip for industry or coding mistake. The occupational classification of persons engaged in non-agricultural pursuits has been further detailed according to various categories of workers. The categories of workers are same as adopted for Primary Census Abstract.

14. In this table cross tabulation of industry and occupation has been made for the first time while such information was combined in the previous censuses.

Table B-VI

15. This is a new table prepared for the first time in 1961 Census and provides information about those occupations which attract educated personnel. It has been prepared only for urban areas of the district upto divisional level of the National Classification of Occupations. The workers under each occupational division have been classified by broad age-groups *viz.*, 0–14, 15-34, 35–59 and 60 and above. The age-groups have been further classified according to educational levels as adopted in Economic Table B–III Part A. However, the figures for total workers under each occupational division have been provided for total only and not for different age-groups. It may be noted that total workers for occupational division in this table corresponds to the total workers of urban areas in Table B–V.

Table B–VII

16. This table has been compiled into two parts. Part A presents persons working principally (i) as cultivators (ii) as agricultural labourers or (iii) at household industry classified by sex and by the nature of their secondary work (i) at household industry (ii) as cultivator or (iii) as agricultural labourer. Such data has been presented in this part by divisions and major groups separately for the total, rural and urban parts of the district and by divisions only in case of rural part of each tehsil.

17. In case a worker is engaged in two or more kinds of work, the work consuming the larger portion of time has been treated his principal work while another consuming larger portion of his time considered his secondary work.

18. Part B of this table presents the industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry. Such data has been presented in this part of the table by principal work and additional work based on divisions and major groups for the district as a whole while it has been shown by divisions only in case of each tehsil for its rural areas.

Table B–VIII

19. This is a new table prepared for the first time in the current Census. This table presents the distribution of unemployed persons aged 15 and above by sex and educational levels. It has been compiled into two parts. Part A relates to urban areas and is presented for the district as a whole. Part B relates to rural areas and is presented upto tehsil level.

20. The number of unemployed in Part A of this table have been further split up by (i) persons seeking employment for the first time and (ii) persons employed before but now out of employment and seeking work. The age–groups in the first case are 15–19, 20–24, 25–29, 30–34 and 35+ which are modified in the second case as 15–19, 20–24, 25–34, 35–44, 45–59 and 60+.

21. The break-up of educational levels is much elaborate in Part A which is the same as given in Table B–III Part A while such educational levels are confined only to (i) Primary or Junior Basic and (ii) Matriculation and above, in Part B of this Table.

Table B–IX

22. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers based on the recommendation of the United Nations Organisation. In this table data has been shown for total, rural and urban areas of the district separately and upto tehsil level for rural areas only. Such information on the non-working population had never been compiled before.

(ii) HOUSEHOLD ECONOMIC TABLES

23. There are 8 Household Economic Tables in this series compiled in the current Census which is a first attempt for collecting economic data on the basis of households in addition to what is collected for each individual. In a predominantly agricultural State where most of the population is in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the

basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as an entity. A decision was, therefore, taken that the information relating to the economic activities of the majority of households *viz.*, cultivation activities and household industry should be collected at the current Census.

24. A household Schedule was used at the Census, 1961 for this purpose. In the Part I of this Schedules information on the extent of land cultivated by the household, either owned or held from Government or held from private persons or institutions for payment in money, kind or share, and extent of land given to private persons for cultivation for payment in money, kind or share was collected. Besides, nature of household industry conducted by the household and the duration of the industry in a year alongwith number of family workers and hired workers engaged in cultivation or household industry or in both was also collected.

25. All these tables have been prepared on the basis of 20% sample of households.

Table B-X

26. This table is prepared on a 20% sample of households and is presented for the district total, rural and urban areas separately and upto tehsil level for rural areas only. The sample households have been classified into four categories *viz*., (i) households engaged neither in Cultivation nor Household Industry, (ii) households engaged in Cultivation only, (iii) households engaged in Household Industry only and (iv) households engaged both in Cultivation and Household Industry. Thus, the table divides all the households in three important sectors of economic activity.

27. Cultivation includes ownership, tenancy cultivation and agricultural labour. The Household Industry relates to production, processing, servicing or repairing and includes making and selling of goods.

Table B-XI

28. This table presents data for the district total, rural and urban areas separately and upto tehsil level for rural areas only. In this table a more detailed examination of the cultivating households, which have been separated in the previous table, has been made. Such households have been classified according to the size of land cultivated and cross tabulated by the interest in land cultivated The sizes of land in acres are given as less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0–49.9, 50+ and unspecified.

29. The interest in land cultivated has been classified into the following three categories :—

(a) entirely owned or held from Government,

(b) entirely held from private persons or institutions for payment in money, kind or share, and

(c) partly held from Government and partly from private persons for payment in money, kind or share.

30. Abbreviations (a), (b) and (c) have been used in place of legends for interest in land cultivated under column 1 of the table and the same have been spelt out at the bottom of the table.

Table B-XII

31. In this table the data has been shown for the district total, rural and urban areas separately and also up to tehsil level for rural areas only. The table will facilitate a further study of households which are engaged only in cultivation, as each household having a particular size of holding mentioned in Table B-XI has been cross tabulated with reference to the number of persons working in cultivation. The holding has been grouped into the following size ranges (in acres); less than 1, 1.0–2.4, 2.5–4.9, 5.0–7.4, 7.5–9.9, 10.0–12.4, 12.5–14.9, 15.0–29.9, 30.0–49.9 and 50+ and unspecified.

32. In case of household where more than one person is working, the number of family workers and hired workers have been separated. Family workers have also been separately tabulated by sex.

Table B-XIII

33. This table is presented separately for rural and urban areas of the district. The table shows the distribution of sample households engaged both in Cultivation and Household Industry classified by size of land cultivated and by size of Household Industry. The Household Industries have been classified according to the code numbers of divisions 0, 1, 2 & 3 and their major groups of Indian Standard Industrial Classification (for detailed description see Appendix at the end of the note on this series). It throws light on Household Industries which are carried on as an ancillary to cultivation in different parts of the district.

Table B-XIV

34. In this table the data has been presented for the total, rural and urban households separately for the district and relates to households engaged only in Household Industry. The table has been prepared in two parts:—

Part A:—It relates to households classified by major groups of principal Household Industry and number of persons engaged in each, grouped under 1, 2, 3–5, 6–10 and more than 10 persons. The Household Industries

have been classified according to the code number of divisions 0, 1, 2 & 3 and their major groups of Indian Standard Industrial Classification (for detailed description of code numbers see Appendix at the end of the note on this series).

Part B:—It relates to households classified by minor groups of principal Household Industry. In cases where there are more than one Household Industry under a minor group, sub-minor group numbers in four digits have been given.

Table B-XV

35. This table has been prepared for households engaged both in Cultivation and Household Industry. The data has been shown separately for total, rural and urban areas of the district. Tehsilwise break-ups for rural areas only could not be given here due to short of space, however, the same is available in Part III of State Census Report. In this table, an analysis has been made of persons working in these households with reference to size of holding. In cases where more than one person is employed, the number of family workers and hired workers are separately given. Similar data in respect of households engaged in Cultivation only has already been given in Table B-XII. A comparison between this table and Table B-XII will show how the combination of Household Industry with Cultivation effects the employment position. This table helps to establish a co-relation between the Household Industry and the scale of Cultivation.

Table B-XVI

36. This table is confined only to Household Industry and the data has been presented separately for the district total, rural and urban areas. The data in respect of Households engaged in Household Industry only or both in Household Industry and Cultivation are given separately. Household Industry is classified according to period of working of the industry grouped under 1–3 months, 4–6 months, 7–9 months and 10 months to one year and under each category number of households number of family workers and number of hired workers are given. This table thus, furnishes important data on the seasonality of various household industries and yields inferences on the seasonality of Household Industry with seasonality of Cultivation.

37. The major groups of Household Industry having less than 10% of the figures of the respective division which have been omitted from the table are shown in the Appendix at the end of the table. For detailed description of divisions and major groups of Household Industry see Appendix at the end of the note on this series.

Table B-XVII

38. The data in this table has been presented separately for the district total, rural and urban areas. The family sizes of sample households have been classified according to single member, 2–3 members, 4–6 members, 7–9 members and 10 members and over. It may be noted that although the 'Census Household' is not exactly the same as 'Family' to the extent that it may also include unrelated persons residing with the family during the census count, yet this table gives a general idea of the family sizes as in the majority of families outsiders are likely to be insignificant.

39. The sample households have also been classified by economic activity by work in cultivation or household industry. Households engaged in cultivation have been further classified by size of land holding. Classification by economic activity as well as by size of land holding is presented only for rural areas while classification by size of households is presented for total and urban areas.

40. Separate volumes Part II–B (i) & (ii) for General Economic Tables and Part III for Household Economic Tables have been issued in which the various concepts used, have been discussed in detail.

APPENDIX TO TABLE B-XVI

The major groups of household industry having less than 10 percent of the respective divisions marked with an asterisk have been excluded from the main table and have been shown in run-on-lines in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table while alphabets given in brackets are meant for showing the different ranges of period of working in the household industries 'with' or 'without' cultivation as explained below. The numerical figure shown after the alphabets denotes the number of households in that particular range indicated by that alphabet.

With Cultivation			Without Cultivation		
Abbreviations		Class range or period of working	Abbreviations		Class range or period of working
A	=	1 to 3 months	E	=	1 to 3 months
B	=	4 to 6 „	F	=	4 to 6 „
C	=	7 to 9 „	G	=	7 to 9 „
D	=	10 Months to 1 year	H	=	10 Months to 1 year
X	=	Months not stated	Y	=	Months not stated

SOCIAL AND CULTURAL TABLES

(Note on C-Series)

There are 8 tables in this series relating to Social and Cultural aspects. Table C-I has been prepared from Household Schedules on the basis of 20 per cent sample. All the other tables in this series are based on full count and give data regarding age, sex, marital status and education, separately for rural and urban areas, single year age returns, mother tongue in alphabetical order, religion and classification by literacy and industrial category of workers and non-workers among Scheduled Castes and Scheduled Tribes for the district.

2. All the tables of this series have been reproduced in this book except Table C-VI on Bilingualism which can be seen in Part II-C (i) of the State Census Report wherein all tables of this series are contained.

Table C-I

3. This table is prepared on 20% sample from the Census Population Record Part II of the Household Schedule separately for the total, rural and urban areas of the district. The table is of sociological interest as it indicates the strength of the joint family system. It gives the composition of a household by family and non-family members. The family members have been classified into heads of household (who could be males or females) and their spouses, married sons and other married relations and never married, widowed and divorced or separated relations. As the definition of a census household also included outsiders residing with the family during enumeration, such persons have been shown in the table as *unrelated persons.*

4. The sample households of the rural areas have been classified into 3 categories *viz.* households engaged neither in cultivation nor in household industry, engaged in household industry only and engaged in cultivation. The households engaged in cultivation have further been classified by size of land holdings.

Table C-II

5. This is an important demographic table prepared on full count. It distributes the population by sex, age and marital status. The data has been presented for the district separately for rural and urban areas while those for tehsils for rural areas only. The population has been distributed into 14 age-groups which is further classified into four types of marital status *viz. never married, married,* widowed, divorced or separated. The age-groups followed in this table largely conform to the international requirements recommended by the United Nations Organisation.

6. This table is likely to be useful for studying the trends in the age of marriage. The data compiled here can be very well used for studying mortality in different marital statuses and also in different age-groups. The data on married females by age-groups can be utilised for forecasting the future births from age specific birth rates. All the persons falling in age-group 0–9* have been treated as 'Never Married' for the purpose of this table.

Table C-III

7. This table distributes the total population by age, sex and educational levels. The population has been distributed in to quinquenial age-groups upto the age of 34 and the age-groups 35–44, 45–59 and 60+. The table has been compiled into three parts. Part A relates to all areas, Part B for urban areas of the district while Part C deals with rural areas down to tehsil level. In Part 'A' and 'C' the educational levels are confined only to (i) Primary or Junior Basic and (ii) Matriculation & above while in Part 'B' these educational levels are much more elaborate as shown in Table B-III Part 'A'.

8. This table can be utilised to measure the growth of literacy in the population as a whole as well as in urban and rural areas separately and in the different age-groups since the last Census. The table is of special interest to the educational authorities for future planning and also to study the public attitudes towards adult education. In 1951 Census data was provided only about illiterate and literate classified into different age-groups on 10 per cent sample.

Table C-IV

9. This table has been prepared on full count and presents the distribution of population by single year ages (0 to 100) and by sex. The age in year completed on 1-3-1961 has been given but the infants who could not complete one year on 1-3-1961 have been shown under the age '0' while all old persons aged above hundred have been clubbed together and are shown against item 'Over hundred.' The data has only been presented for the district as a whole, its urban and rural breakups can be seen in Part II-C (i) of State Census Report.

10. The data presented in this demographic table is useful for the Census Actuary for computing mortality rates from the age data of the earlier censuses and for the preparation of life tables. It also provides data for studying bias in age returns at the Census.

Table C-V

11. This table presents data separately for total, rural and urban population of the district and only for total for tehsils classified by sex of persons speaking a particular language or a dialect as mother tongue. The mother tongues are arranged in this table in an alphabetical order.

*Marital Status of this group finds place in a separate monograph-Child Marriages in Rajasthan.

12. According to Census 1961 'Mother Tongue' is the language or dialect spoken in childhood by the person's mother to the person or mainly spoken in the household.

13. This table is of great interest to philologists in view of a large variety of languages and dialects spoken in the district and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the constitution.

Table C-VII

14. In this table the population has been distributed in six main religions and the figures of all other religions including the figures of those having 'Indefinite belief' such as Atheists and Agnostics have been clubbed together and noted under heading 'Other Religions and Persuasions'. Separate heading 'Religion not stated' has also been Provided for those who do not follow any religion and have given out only their nationalities such as Goans, Israelists, Italians etc.

15. The data of this important sociological table has been presented separately for total, rural and urban areas of the district and also for each tehsil.

Table C-VIII

16. This is a new table compiled in the 1961 Census and presents data separately for total, rural and urban areas of the district and further upto tehsil level for rural areas only. It has been prepared into two parts A & B. Part A presents the data of Scheduled Castes and Part B of Scheduled Tribes.

17. It gives the distribution of population by literacy classification of workers into different industrial categories no based the Standard Industrial Classification and non-workers. Literacy figures of these communities given for the first time in the present Census.

18. In 1951 Census data for Scheduled Castes and Scheduled Tribes was provided only about total number of persons belonging to Scheduled Castes and Scheduled Tribes classified by sex for the districts and upto sub-division.

HOUSING TABLES

(Note on E-Series)

There are five tables in this series prepared for the first time in this census which have been extracted from the House List prepared at the time of house numbering and house listing operations in 1960. Out of these, four tables *viz.* E-I, E-II, E-IV, E-V relate to housing conditions and furnish data for the purposes for which the houses are used, the tenure on which they are occupied by the households, material of construction of walls and roofs and the households classified by number of members and by number of rooms occupied by them. The data in these tables has been shown for the district as well as for each tehsil separately for total, rural and urban areas.

2. Another table (E-III) on industrial establishments also prepared from the house lists gives a break-up by industry and the fuel used cross-tabulated by the size of establishments, is not presented here for want of space and can be seen in Part IV-B of the State Census Report which presents all the tables of this series. However, the data regarding number of establishments contained in this table is separately compiled down to village level which has been presented in a separate list of industrial establishments.

Table E-I

3. This table has been prepared on full count and furnishes figures of census houses separately for total, rural and urban areas of the district and tehsils classified into different categories according to the uses to which they are put. The houses which were found vacant at the time of houselisting have also been shown separately as such. The following are the various types of houses into which occupied houses have been classified :—

Dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, hotels, hostels, sarais, dharamshalas, tourist homes and inspection houses, shops excluding eating houses, business houses and offices, factories registered under the Factories Act and worksheds and workshops not so registered, schools and other educational institutions including training classes, coaching and shop classes, restaurants, sweetmeat shops and eating places, places of entertainment and community gathering (Panchayat Ghar), public health and medical institutions, hospitals, health centres, doctors clinics, dispensaries, etc.

4. Occupied census houses which do not fall in any of the above categories have been classed as 'Others', e.g. temple, mosque, church, cowshed, motor garage, water-hut, engine room, store room, grass shed.

5. The concepts and definitions of the terms occuring in the table are given below:—

A "Census house" is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling, or a place of business, workshop, school, etc. with a separate entrance.

A "Census household" is a group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so.

A "shop" or a "workshed" is a place where articles are sold for cash or for credit.

A "Workshop" is a place where some kind of production, processing, repair or servicing such as paper-making, shoe-making tailoring, cycle-repairing, motor-servicing, halwai's shop, pottery-making, goldsmithy, blacksmithy, etc., are undertaken or where goods or articles are made and sold, and is not a factory registered under the Factories Act.

A "Factory" is a large workshop which has been registered under the Indian Factories Act.

"Business houses" are those premises where transactions in money or other articles take place such as banks etc.

Table E-II

6. This table has been prepared on the basis of 20 per cent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses. Shop-*cum*-dwellings and workshop-*cum*-dwellings are census houses which are partly used for residential or dwelling purposes and partly used as a shop or workshop. Dwellings with other uses are census houses such as offices, schools, temples, mosques etc. which are partly used for residential purposes by watchmen or attendents. The total number of households given in column 4 of this table gives the total of such samples classified into the aforementioned four categories of dwellings, which have been further classified according to their tenure status, whether owned or rented, separately for the total, rural and urban areas of the district and also for tehsils.

7. The following concepts and definition have been used in respect of tenure status :—

The term 'owned' was considered to be a situation when a household was living in its own house or a house duly mortagaged to it by some of its debtor.

The term 'rented' meant a situation when a household was found living in a house taken on rent from a landlord or in a house that was taken on lease or in a house for which no rent was being paid with the consent of the landlord.

Table E-IV

8. This table has been prepared on 20 per cent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses.

The total number of houses given in column 3 of this table gives the totals of all such sampled household. The material out of which most of the walls are made or where a house consists of separate structures, each made of different materials, the material out of which the walls of the main bedrooms, are made has been classified into the following nine categories :—

(1) Grass, leaves, reeds or bamboo
(2) Timber
(3) Mud
(4) Unburnt bricks
(5) Burnt bricks
(6) C. I. Sheets or other metal sheets
(7) Stone
(8) Cement concrete
(9) All other material

9. The material out of which most of the outer roof exposed to the weather is made, i.e., tiles, thatch, corrugated Iron, zinc or asbestos cement sheets or concrete, etc., or in the case of multistoreyed building, the material out of which the intermediate floor or floors is made, has been classified into the following seven categories :—

(1) Grass, leaves, reeds thatch, wood or bamboo
(2) Tiles, slate, shingle
(3) Corrugated iron, zinc or other metal sheets
(4) Asbestos cement sheets
(5) Brick and lime
(6) Concrete and stone slabs
(7) All other material

10. This table has been presented separately for total, rural and urban areas of the district and also for tehsils.

Table E-V

11. This table has been prepared on 20 percent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellnigs and dwellings with other uses. The figures given in column 3 of this table are the totals of all such sampled households. The sex break-up of the total number of members occupying such sampled households have been further classified into the following six categories showing the number of households and number of occupants by sex in each category:—

(i) no regular room
(ii) one room
(iii) two rooms
(iv) three rooms
(v) four rooms
(vi) five rooms or more

12. This table has been prepared separately for the total, rural and urban areas of the district and also for tehsils.

List of Industrial Establishments

13. This table gives the number of establishments and the number of workers in each branch of industry classified by minor groups of Indian Standard Industrial Classification (for detailed description see appendix to the Explanatory Note on B-Series). The data is presented in the ascending order of the minor groups showing the figures in the brackets first for the number of establishments and second for the number of workers employed. The information has been extracted from the house list prepared at the time of house numbering and house listing operations in 1960.

14. The data is presented for the district and each tehsil for total, rural and urban areas as well as for each village and town separately. A summary of number of industrial establishments by workers employed has been given separately for the district, tehsils and towns in the begining of this table. The table has been presented in run-on-lines and the villages are shown both by their names and Code numbers. The Code number of the villages will be helpful in finding out the location of the village in the tehsil maps. Villages which do not have any industrial establishments as well as those industry minor groups for which there are no figures in village or town or tehsil have been excluded from the list.

15. The data for some seasonal industries which were not actually working during the period of house listing has not been included. The number of workers also includes the proprietor and the other household members who were working in the industry during the week preceeding the enumerators' visit.

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

(Note on SCT, SC and ST Series)

There are 8 Tables in this series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. No special table was prepared for these classes during 1951 Census. The only information collected at that time was the aggregate strength of Scheduled Castes and Scheduled Tribes for the district and sub-divisions. However, together more information for these communities which have been safeguarded in the constitution, special tables have been devised and presented in this series. Part V-A of the State Census Report gives information for the State on this subject.

Table SCT-I

2. This table presents the industrial classification of persons of Scheduled Castes and Scheduled Tribes at work and non-workers by sex. In other words, this table presents caste/tribe wise (arranged in alphabetical order) break-up of the data shown in Table C-VIII. This table has been compiled in two parts. Part A deals with the Scheduled Caste population showing the data for each Scheduled Caste separately in rural and urban areas of the district.

3. Special study regarding the number of persons of Scheduled Castes engaged in unwholesome occupations like tanning, currying of hides and skins, scavenging is also conducted. The number of workers shown in these occupations as well as in other industrial categories is on the basis of their principal work.

4. Part B of this table refers to Scheduled Tribes population and presents the data for each Scheduled Tribe separately in rural and urban areas of the district.

5. A fly-leaf showing the sexwise break-up for Scheduled Castes and Scheduled Tribes in the district as well as for each tehsil is also attached which presents data separately for total, rural and urban areas. Figures of such Scheduled Castes and Scheduled Tribes have also been given for each village and town in the Primary Census Abstract.

Table SCT-II

6. This table distributes the population of Scheduled Castes and Scheduled Tribes according to their marital status of never married, married, widowed, divorced or separated and unspecified status under the age-groups of 0–14, 15–44 and 45+. The total population of these classes acccording to their marital status is also shown separately of all age-groups.

7. This table has been presented in two parts. Part A gives such information for each Scheduled Caste and Part B relates to each Scheduled Tribe providing such information for the district.

8. This is an important demographic table. The age marital status data in the case of Scheduled Tribes give an indication whether the tribal population is decreasing, stable or increasing.

Table SCT-III

9. This table presents the distribution of the population of Scheduled Castes and Scheduled Tribes by sex and educational levels. The table has been compiled in two parts. Part A has been further classified in two parts. Part A (i) provides such type of data for each Scheduled Caste in urban areas only while Part A (ii) presents similar data for urban areas for each Scheduled Tribe.

10. Part B of this table provides the similar information as in Part A for rural areas only, being classified in two parts. Part B (i) deals with Scheduled Castes while Part B (ii) refers to Scheduled Tribes.

11. In case of urban areas the data has been given for educational standards as in Table B-III Part A while such data has been shown for mere literate primary or junior basic and matriculation and above in case of rural areas as in Table B-III Part B.

12. This is an important table, the data of which can be proved very useful for the education department as it throws light on the spread of education among these communities in the rural and urban areas separately. The data will also be helpful to the department for awarding scholarships to the members of these communities.

Table SCT-IV

13. This table presents a distribution of the population of Scheduled Castes and Scheduled Tribes according to their religion. This table is compiled in two parts. Part A provides religionwise data for each Scheduled Caste in the district showing the rural and urban figures together. Similar type of information has been presented for Scheduled Tribes in Part B of this table. It may be noted that the members of Scheduled Castes can be either Hindus or Sikhs while members of Scheduled Tribes may profess different religions.

Table SCT-V

14. This table presents a detailed examination of the rural cultivating households of the Scheduled Castes and Scheduled Tribes and is based on 20% sample. Such households have been classified in various groups according to the size of land cultivated and cross tabulated by the interest in land cultivated.

15. This table is similar to that of household economic table B-XI and is compiled in two parts. Part A presents such data for Scheduled Castes while Part B provides such information for Scheduled Tribes.

Table SC-I

16. This table presents data for students and unemployed persons in non-working population of Scheduled Castes. This is further classified according to the broad educational levels consisting of literates, primary or junior basic and matriculation and above.

17. The data has been shown separately for the district total, rural and urban areas and further down to tehsil level in case of rural areas only. It is very useful table at it indicates the numerical strength of students and unemployed persons among the Scheduled Castes.

Table ST-I

18. Scheduled Tribes have their own peculiar languages and dialects. This is due to the fact that this table is prepared showing the number of speakers of that subsidiary language of those members of Scheduled Tribes who have moved out of their homes and as a result of contact with the local persons speak some other subsidiary language to the mother tongue. The number of persons speaking such subsidiary languages have been shown sex-wise in run-on-lines. The data has been presented separately for the district total, rural and urban areas for the each Scheduled Tribe.

Table ST-II

19. This table presents data for students and unemployed persons in the non-working population for each individual Scheduled Tribe. The data has been shown separately for district total, rural and urban areas. This table is an important one as it throws light on the progress of education and the unemployment position for each individual tribe.

SOME OFFICIAL STATISTICS

VILLAGE DIRECTORY

VILLAGE DIRECTORY

(*Note*)

Data collected for the Census 1961 at the village level has already been presented in the Primary Census Abstract. As an ancillary project, some additional information was also collected through a Village Information Schedule, specially designed by this office, and is presented in this Village Directory. Information in this directory and what has been presented in the official statistics and the maps may in certain cases be found to be conflicting. The reason obviously lies in the fact that data has been collected from different sources.

The Directory gives information about the major crop, the distance in miles from the nearest Primary School, Hospital or Dispensary, Railway Station, Post Office, Bus Stand and Police Station for each village. Such information was not collected for unpopulated villages. Where information was not received for a particular item an indication to this effect has been made by putting a '—'.

With a view to assist the reader to locate the villages easily, they have been presented here alphabetically. The names of the villages have also been given in the Devnagri Script. The names of the villages found to be printed wrongly in the Primary Census Abstract have been corrected here.

Crop which has the largest area under cultivation has been treated as the major crop of a village and the following abbreviations have been used to indicate it in Column No. 2 :—

W — Wheat
G — Gram
J — Jowar
B — Barley
Bj — Bajra
M — Maize
R — Rice
P — Pulses
T — Til
WG — Wheat Gram (Gochana)
WB — Wheat Barley (Gojara)
BG — Barley Gram (Bejar)
Md — Mustard
C — Cotton

SECTION IV

DISTRICT & TEHSIL MAPS

DISTRICT AND TEHSIL MAPS

(Note)

The district and tehsil maps presented in this section have been prepared and presented for the first time. They form a part of the Census Atlas and have been reproduced here specially with a view to help the reader to locate the places mentioned in the Primary Census Abstract and the Village Directory. The villages have been shown by code numbers in the tehsil maps.

The maps have been photographically reduced to their present size from the original revenue maps and the scale and graticules have been worked out as approximately as possible.

The following is the list of references used for all the maps :—
