PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists' brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931. The reason could be transfer from 1921 of certain charges on Census previously met from the provincial revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics upto the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces and Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office, Separation of administrative statistics and the decision to write the Introductory and the kind Co-operation of the State Government permitting Collectors of the 1961—71 decade to write the chapter on "Introducing the District", likely to go a long way in early publication of all the parts of the District Census Handbooks. Anotherfavourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in Hindi and 2 in English. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Parts A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District CensusHandbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

BHOPAL:
15th August, 1972.

VILLAGE AND TOWN DIRECTORY
PART X (A)

EXPLANATORY NOTE

History:

Prior to 1951 there were no separate Census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, banking, education, health, etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make districtwise Census publication very comprehensive resulted in late availability of the books to the users. Therefore, the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby release maximum data, as and when available, so that the publication may have a useful life of seven to eight years of intercensal decennium.

Scope:

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, Post and Telegraph facilities and communications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities, medical, educational, cultural facilities, trade, industry, commerce and banking facilities, population by religion and Scheduled Castes and Scheduled Tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B contains for each village and town, the primary census data incorporating area, occupied residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion, migration etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory:

This is in the form of one statement. Important statistics for each village have been given under the mainhead—Amenities and Land Use Data. Other information regarding nearest town with distance, market, staple food and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water, communications and post and telegraph. Under "Land Use", the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated cultivable waste and area not available for cultivation.

(a) There are 1,399 villages in the 3 tahsils of the district and the number of villages, tahsil-wise, in 1961 and 1971 is as under:—

Sl. No.	Tahsil	1961	1971	Difference
1	2	3	4	5
1.	Bhainsdehi	402	402	Nil
2.	Betul	537	569	(+) 32
3.	Multai	427	428	(+) 1
	Total	1,366	1,399	(+) 33

It may be seen that in all there is an increase of 33 villages in 1971 (32 in Betul tahsil and 1 in Multai tahsil). The reasons for the increase are;—

1. **Multai Tahsil.**—The revenue area of Multai town has been treated as a separate village (Location Code No. 29/3/205).

2. **Betul Tahsil.**—(i) Pathakheda (L.C. No. 539) and Sarni Thermal station (L.C. No. 540) are new habitations in the reserve forest.

(ii) A new habitation came into existence in the reserve forest before enumeration and it was given Location Code No. 29/2/569. Other particulars of this village required for the village directory are not available and, therefore, for other tables and statements discussed in this note, this village has not been considered. In other words, discussion in this note has been limited to 568 villages and not 569.

(iii) Twenty-eight habitations, where displaced persons from erstwhile East Pakistan (now Bangla Desh) have been settled, have been given Location Code Nos. 541 to 568 in 1971. Survey by Land Records Department has not been done and consequently these habitations have not been formally recognised as villages under the revenue law in force.

(iv) The revenue area of Betul Bazar town has been given Location Code No. 452.

The distribution of the villages with reference to their area in acres is as shown in the inset table below:—

Area (in acres)	No. of villages
1	2
50 acres or less	—
51-100	—
101-200	21
201-500	182
501-1,000	413
1,001-2,000	523
2,001-5,000	221
5,001 acres and above	6
Total	1,366

The above table does not show the data regarding 32 villages of Betul tahsil as the total area of the villages is not available for the following reasons;—

(1) Villages Nishana (L.C. No. 29/2/537) and Panchama (L.C. No. 29/2/538) are forest villages which are uninhabited and the area has not been furnished by the Forest department.

(2) Villages Pathakheda (L.C. No. 29/2/539) and Sarni Thermal Station (L.C. No. 29/2/540) are new habitations in the reserve forest and the area is not available.

(3) Twenty-eight habitations (L.C. Nos. 541 to 568) are in the rehabilitation area of Betul tahsil but they are not formally surveyed and, therefore, the total area of these villages with breakup is not available.

In this note wherever the area is referred to, it does not include the data of the above villages. Village Sarni (L.C. No. 29/2/509) in Betul tahsil has the smallest area of 102 acres and is located at a distance of 76.8 kms. from the nearest town, Betul, while village Ratagati (L.C. No. 29/1/143) in Bhainsdehi tahsil has the largest area of 7,863.24 acres in the district and is located at a distance of 16 kms. from the nearest town, Betul. In all 936 out of 1,366 villages for which area figures are available are in the range of 501-2,000 acres. Maximum villages in all the 3 tahsils come within the area range of 1,001 to 2,000 acres as will be seen from the following table containing tahsil-wise data of villages for which area figures are available:—

Area in acres	Betul	Multai	Bhainsdehi	Total
1	2	3	4	5
50 acres or less	...	...	...	...
51-100	...	...	...	...
101-200	13	3	5	21
201-500	88	42	52	182
501-1,000	173	140	100	413
1,001-2,000	202	164	157	523
2,001-5,000	59	79	83	221
5,001 and above	1	..	5	6
Total	536	428	402	1,365

(*b*) *Educational amenities*.—The total number of villages having various educational facilities within different distance ranges from the nearest town

are as indicated in the inset table below:—

Distance from nearest town	Total No. of villages	Number of Villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 kms. or less	77	27	4	2	..	..
6-10 kms.	100	60	12	1	..	..
11-15 kms.	111	49	5	2	..	..
16-25 kms.	270	146	23	3	..	..
26-50 kms.	505	248	35	10	..	..
51-100 kms.	273	113	6	2	..	..
101-200 kms.	46	11	1	..	..	..
201 kms. and above	13	2	..	..	..	..
Unspecified	3	..	..	..	..	..
Total	1,398	656	86	20	..	..

Distances of three habitations, from the nearest town located in the rehabilitation area, are not available. It is interesting to note that maximum number of villages (505) lie within the distance range of 26-50 kms. and maximum educational facilities are available in the villages falling in this range. The number of educational institutions in the villages of different tahsils is given below:—

Tahsil	No. of		
	High School/ Higher Secondary School	Middle School	Primary School
Bhainsdehi	5	18	170
Betul	8	28	252
Multai	7	40	244
Total	20	86	666

Two villages have three and six villages have two primary schools each and their area with distances from the nearest town are indicated below:—

No. of Primary School	Name of village	Location Code No.	Area of the village in acres	Name of tahsil	Distance from the nearest town with name	
1	2	3	4	5	6	
3.	Bhainsdehi	29/1/209	3,692.68	Bhainsdehi	Betul	59.2 kms.
2.	Sawal Mendha Ryt.	29/1/237	677.19	Bhainsdehi	Achalpur	38.4 kms.
3.	Ghoda Dongri	29/2/210	2,950.60	Betul	Betul	36.8 kms.
2.	Jamthi	29/2/264	1,750.75	Betul	Betul	6.4 kms.
2.	Mahiya	29/2/405	2,434.96	Betul	Betul	19.2 kms.
2.	Rodha	29/2/431	1,557.80	Betul	Betul	9.6 kms.
2.	Betul Bazar	29/2/452	1,929.07	Betul	Betul	0.0 kms.
2.	Barwhi	29/2/487	4,179.51	Betul	Betul	16.0 kms.

(c) *Medical facilities.*—The availability of medical facilities, per 100 sq. kms. and tahsil-wise, is as given in the following inset tables:—

Tahsil	Total area (in sq. kms.)	No. of medical institutions of any kind per 100 sq. kms.
1	2	3
1 Bhainsdehi	2,416	0.8
2 Betul	2,554	1.1
3 Multai	2,349	0.8

The above table will show that the villages of Betul tahsil have comparatively greater medical facilities per 100 sq. kms. The number of medical institutions, tahsil-wise, is as indicated below:—

Tahsil		No. of medical institutions
1		2
1.	Bhainsdehi ...	20
2.	Betul ...	29
3.	Multai ...	18

(*d*) *Power Supply.*—The number of villages with electric power supply within various ranges of distance from the nearest town is as indicated in the inset table below:—

Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
1	2	3
5 kms. or less	77	22
6 — 10 kms.	100	23
11 — 15 kms.	111	22
16 — 25 kms.	270	23
26 — 50 kms.	505	36
51 — 100 kms.	273	8
101 — 200 kms.	46	..
201 kms. and above	13	..
Unspecified	3	1
Total	1,398	135

It would be seen from the above that less than 10 percent of the total number of villages have electricity and over 95 percent of them are in the distance-range up to 50 kms. The number of villages having electric power supply, tahsil-wise, is as below:—

Tahsil	Total No. of villages	Villages having electric power supply	% of villages covered by electricity
1	2	3	4
1. Bhainsdehi	402	19	4.7
2. Betul	568	68	12.14
3. Multai	428	48	11.2
Total	1,398	135	9.7

The percentage of villages having electric power supply in the district compare favourably with the State percentage of 7. There is a thermal power station in the district. Within the district villages of Bhainsdehi tahsil have little of this facility.

(*e*) *Communications.*—The total number of villages and the number of villages connected by different types of communications, falling in different distance ranges from the nearest town are indicated in the inset table below:—

Distance from the nearest town	Total No. of villages	Number of villages connected by				
		Pucca road	Kutcha road	Pacca road & rail	Kutcha road & rail	Others
1	2	3	4	5	6	7
5 kms. or less	77	29	44	3	—	—
6 — 10 kms.	100	36	60	2	2	—
11 — 15 kms.	111	35	69	1	5	—
16 — 25 kms.	270	47	214	—	1	—
26 — 50 kms.	505	107	329	7	4	—
51 — 100 kms.	273	30	179	1	—	—
101 — 200 kms.	46	—	15	..	—	—
201 kms. and above	13	—	..	—	—	—
Unspecified	3	—	—	—	—	—
Total	1,398	284	910	14	12	—

Few villages are served by "pucca" road and there is no "pucca" road in the villages coming in the distance range 101-200 kms. and above. Out of 1,398 villages in the district, 1220 villages are served by either "pucca" or "kutcha" roads. The number of villages served by "Pucca" roads, tahsil-wise, and the total number of villages with percentage covered are as under:—

Tahsil	Total No. of villages	No. of Villages having "pucca" road	Percentage
1	2	3	4
1 Bhainsdehi	402	82	20.39
2 Betul	568	114	20.07
3 Multai	428	102	23.83
	1,398	298	

Comparatively, Multai tahsil has better communication facilities.

(*f*) *Post and Telegraph*.—The total number of villages in the tahsils of the district having post offices and telegraph offices are given below:—

Name of tahsil	Total No. of villages	No. of villages having post office	No. of villages having telegraph office	No. of villages having telephone
1	2	3	4	5
1 Bhainsdehi	402	30	2	1
2 Betul	568	32	4	2
3 Multai	428	50	4	1
	1,398	112	10	4

The number of post offices per 100 sq. km. area in each tahsil is as indicated in the following inset table:—

Name of tahsil	Total area in sq. km.	No. of post offices per 100 sq. km.
1	2	3
1 Bhainsdehi	2,416	1.2
2 Betul	2,554	1.2
3 Multai	2,349	2.1

Comparatively, Multai tahsil has better postal facilities.

(*g*) *Staple Food*.—Maize, 'Jowar', 'Kodo' and 'Kutki' constitute staple food in the majority of the villages of every tahsil. Wheat and rice is also the staple food in some of the villages, particularly of Multai tahsil. In the habitations of the rehabilitation area in Betul tahsil, where displaced persons from erstwhile East Pakistan (now Bangla Desh) have been settled, rice is the only foodgrain constituting staple food.

(*h*) *Land Use Pattern*.—(i) According to the village papers about 18% of the area in the district is under forest. The percentages of the forest area, tahsil-wise, is indicated below:—

(a) Bhainsdehi — 28.9 Percent
(b) Betul — 19.1 Percent
(c) Multai — 5.3 Percent

It may be noticed that major portion of the district forest area lies in Bhainsdehi tahsil.

(ii) The net cropped area in the year 1969 increased by 22.5% as compared to the area in 1960-61. The percentage of area under irrigation to area under crops during the years 1960-61 and 1968-69 comes to 4.8 and 5.7, respectively. The area under irrigation during this period increased by 43.4 percent.

(iii) The following inset table shows the average percentage of cultivable waste per village in different distance ranges from the nearest towns:—

Distance	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 kms or less	77	54,533.06	708.22	9,920.44	128.84	18.19
6-10 kms	100	85,535.53	855.36	15,751.99	157.52	18.42
11-15 kms	111	98,582.66	888.13	16,683.83	150.30	16.92
16-25 kms	270	241,240.67	893.48	40,286.05	149.21	16.70
26-50 kms	505	448,985,81	889.08	62,314.84	123.39	13.84
51-100 kms	273	169,491.85	620.84	28,040.46	102.71	16.54
101-200 kms	46	20,018.48	435.84	2,847.44	61.90	14.22
201 kms & above	13	5,243.57	403.35	1,469.99	113.08	28.04
Unspecified	3	—	—	—	—	—
Total	1,398	1,123,631.63	—	177,315.04	—	—

Ordinarily, the nearer a village to an urban area, the lesser is the proportion of cultivable waste but the above inset table will show that there is some deviation in the distance range 11-15 kms. to 101-200 kms.

In the whole district 177,315 acres (in round figure) of land has been classified as cultivable waste which constitutes about 10 percent of the total area of the villages in the district. The percentage of

cultivable waste in each tahsil is indicated below:

Name of Tahsil	Percentage of cultivable waste
1	2
1. Bhainsdehi	6.85
2. Betul	9.16
3. Multai	13.52

This table would show that comparatively more cultivable waste is located in Multai tahsil and it comes to about 1/8th of the total area of the villages in this tahsil.

Town Directory:

This is in the form of seven Statements. But before discussing the information collected in the seven Statements, it would be better to first understand certain concepts which determines urban areas.

(*i*) *Definition of town*.—A 'town' in the 1961 Census was either (i) a Municipality, Cantonment or Corporation; or (ii) a habitation with a population of at least 5,000, with atleast three-fourths of the adult male population engaged in non-agricultural pursuits. Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75% or more. But the list already finalised was not changed subsequently; the reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as Municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no material change in the concept of town and a list of 247 towns was prepared originally. Three more towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in the list of villages.

(*ii*) *Urban Agglomeration*.—The concept of Urban Agglomeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that "*de facto* urban agglomeration" is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within Municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(*iii*) *Standard Urban Area*.—This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are:—

(1) It should have a core town of a minimum population size of 50,000.

(2) The contiguous areas made up of other urban as well as rural administrative units should have close socio-economic links with the core town; and

(3) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements .—Very useful data regarding the towns have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

(*i*) *Statement No. I*.—This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(*ii*) *Statement No. II*.—This statement contains information regarding location (latitude/longitude), annual rainfall, temperature,

distance from the nearest city with population of 1 lac or more and State, District and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(*iii*) *Statement No. III.*—The statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(*iv*) *Statement No. IV.*—This statement contains information regarding amenities, e.g., road length, sewerage system, types of latrines, water supply, fire-fighting service, etc. in the different towns.

(*v*) *Statement No. V.*—This statement contains information regarding various important facilities available in the town viz., medical, educational, recreational and cultural.

(*vi*) *Statement No. VI.*—This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(*vii*) *Statemant No. VII.*—This statement contains data regarding population by religion and Scheduled Castes/Scheduled Tribes with male/female break-up for the year 1971. This is the only statement based on 1971 Census figures.

There are three tahsils and four towns in Betul district as indicated below:—

S. No.	Name of tahsil	Name of town	L.C. No	Class
1	2	3	4	5
1.	Bhainsdehi	—	...	—
2.	Betul	Betul	29/I	III
		Betul Bazar	29/II	V
3.	Multai	Multai	29/III	IV
		Amla	29/IV	IV

All the tahsil headquarters, except Bhainsdehi, are towns. Betul is also the headquarter of the district. Multai was recognised as a town in 1941 while Amla was recognised in 1961. Betul and Betul Bazar continue to be recognised as a town since 1901. No town has ever been derecognised.

Urban outgrowths and Standard urban Areas.—Betul and Amla towns do not have urban outgrowths. The following are the urban agglomerations in the district and their components are also mentioned:—

Town	Outgrowth (Name of Village)	Particulars (wholly/Partly)	Location Code No.
1	2	3	4
1 Betul-Bazar	Betul-Bazar kasba	wholly	29/2/452
2 Multai	Multaigaon	wholly	29/3/205

There is no Standard Urban Area in the district.

Statement I.—(a) Amla town has Gram panchayat while the rest of the towns have municipalities. The population of Betul, Betul Bazar and Multai fell during the decades as mentioned below:—

Name of town	Decade population		Reduction in population
	Year	population	
1	2	3	4
1. Betul	1911	7,454	
	1921	6,954	500
2. Betul Bazar	1921	5,773	
	1931	5,378	395
3. Multai	1951	11,767	
	1961	8,232	3,535

The population of the towns has, by and large, shown constant increase in every decade after their recognition as town except during the periods mentioned above.

The decrease in population of Betul during the decade 1911-1921 is largely due to outbreak of fatal influenza epidemic in 1918. During the decade 1921-31 the district experienced increase but the population of Betul Bazar decreased by 395 and this slight reduction in the population may be largely due to migration to other areas of the district.*

The population of Multai shows unusual increase of 6,571 in 1951 and decrease of 3,535 in 1961. The reason is that in 1951 the population of staff camp Amla (2,331) and Amla Railway colony (2,910) were included in the population of Multai town. †If this population of Amla (2,910+2,331=5,241) is excluded from the reported figures of 11,767 of Multai town, then the population of Multai town in 1951 should

* District Census Hand Book—Census of India, 1961—Betul District—page XLVIII.

† District Census Hand Book—Census of India, 1951—Betul District—page 158.

be 6,526 which synchronises with the general trend of reasonable increase in population. It may be indicated that Amla was recognised as a town only in 1961. Column 14 of the Statement shows the functional classification of the towns in 1961 as indicated in the following inset table:—

Functional category	Total No. of towns
1	2
Services-*cum*-Transport	1
Services	1
Primary Activities	1
Primary Activities-*cum*-Industrial	1

The method adopted for the functional classification is elucidated below:—

(b) The nine industrial categories were grouped into the followidg five functional characteristics:—

(i) Primary Activities (Comprising Category—I, Cultivation, II—Agricultural Labourer and III—Mining and Quarrying, Fishing, Live Stock, Hunting, etc.)

(ii) Industrial (Comprising Category IV—Household Industry, V—Manufacturing other than Household Industry and VI—Construction).

(iii) Commercial (Comprising Category VII—Trade and Commerce).

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications).

(v) Services (Comprising Category IX—Other services).

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 percent of the total workers the town was designated by that function. In case no single characteristic claimed 40 percent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town.

Statement II.—The physical and locational aspects as in 1969 have been covered. All the towns of the district lie in the Satpura plateau (Central Plateau). The rainfall data of Amla is not available but it gets rainfall similar to that of Multai which is at a distance of only 35 kms. from Amla by road. The temperature data of Amla and Multai are not available but there is not much variance as compared to the climate and temperature of Betul except that Amla is silghtly cooler. On the whole, the climate of all these four towns is generally moderate, the temperature remaining pleasant throughout the greater part of the year. All the towns are on bus route. Railway facility is available in all the towns except Betul Bazar which is only at a distance of 8 km. from the Betul railway station. The district headquarter, Betul, is at a distance of 176 kms. from the State Headquarters, Bhopal. Nagpur, which is now in Maharashtra State, is the nearest city from Multai, Amla and Betul Bazar while Bhopal is the nearest city from Betul. It may be interesting to note that Betul practically lies half way between Bhopal and Nagpur by road, the distances being Betul to Nagpur 179 kms. and Betul to Bhopal 176 kms.

Statement III.—On the basis of population of 1971, the four towns of the district have been categorised as under:—

Name of town	Population in 1971	Class
1	2	3
1 Amla	16,902	IV
2 Betul	30,862	III
3 Betul Bazar	7,959	V
4 Multai	11,114	IV

The Statement would show that the total expenditure is within the total receipts of the local bodies except in the following cases:—

1. Betul Bazar Municipality spent Rs. 3,500 and Rs. 3,400 more during the years 1968-69 and 1970-71, respectively.
2. Multai Municipality spent Rs. 7,300 more during the year 1970-71.

Amla Gram Panchayat and Betul Bazar Municipality have shown an upward trend in the total receipts during the years 1968-69 to 1970-71. The total receipts of Betul and Multai Municipalities, however, reveal a fall during the years 1969-70 and 1970-71, respectively, mainly due to reduction of Government grant and loan. Receipts through taxes have also shown, by and large, an upward trend during these three years except in the

following cases:—

Name of local body	Year	Extent of short fall
1. Amla Gram Panchayat	1970-71	Rs. 1,500
2. Betul Municipality	1969-70	Rs. 22,800
3. Betul Bazar Municipality	1969-70	Rs. 15,700

Government grant and loan have substantially contributed to the receipts of these local bodies and of Betul Municipality in particular. The per capita receipt and expenditure under broad heads is indicated in the inset table below:—

Class of town	Year	No. of towns	Per capita (in Rupees)						
			Receipt			Expenditure			
			Total receipt	Receipt through taxes etc.	Receipt from all other sources	Total expenditure	Expenditure on public health conveniences	Expenditure on public institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9	10
Class I 100,000 & over	..	..	..	..	..	..	..	..	..
Class II 50,000-99,999	..	..	..	..	..	..	..	..	..
Class III	1968-69	1	34.80	13.22	21.58	34.61	23.49	1.14	9.98
20,000-49,999	1969-70	1	26.34	12.48	13.86	26.03	6.55	0.92	18.56
	1970-71	1	29.83	13.22	16.61	28.62	5.87	0.82	21.93
Class IV	1968-69	2	9.53	7.04	2.49	9.24	3.12	0.29	5.83
10,000-19,999	1969-70	2	14.46	10.27	4.18	12.82	2.93	0.18	9.71
	1970-71	2	12.48	10.52	1.96	12.39	3.73	0.18	8 48
Class V	1968-69	1	10.82	6.78	4.04	11.26	2.62	2.10	6.54
5,000-9,999	1969-70	1	12.67	4.79	7.88	11.52	2.24	1.71	7.57
	1970-71	1	17.36	5.02	12.34	17.79	3.00	1.82	12.97
Class VI Below 5,000	..	..	..	..	..	..	..	..	..

The above inset table would show that the total per capita receipt matches fairly well with the total per capita expenditure. The per capita expenditure on public health and conveniences is, however, substantially less than even per capita receipt through taxes, etc. except in the case of Betul Municipality during the year 1968-69 when the expenditure was Rs. 23.49 against the receipt of Rs. 13.22. The expenditure of the local bodies other than Betul Municipality, shown in col. 15 of Statement No. III under head 'Others', constitutes quite a high percentage of the total expenditure. These local bodies, however, failed to give clarification regarding high expenditure under head "Others".

Statement IV.—All the towns have electricity and electric connections have also been given for industrial purpose. Street lights have also been provided in all the towns. Water tap facility is available in Multai town only. Fire brigade is not available in any town.

Statement V:—(*i*) *Medical facilities.*—There is one Primary Health Centre in each of the two towns Amla and Multai while two Hospitals and one Family Planning Clinic are available at the district headquarter town, Betul. Such medical facility is, however, not available at Betul Bazar. The number of beds per 1,000 population has been indicated in the inset table below:—

Total No. of beds in medical institutions	No. of beds per 1,000 population.
120	1.8

(*ii*) *Educational facilities.*—There is one combined college at Betul and one arts college at Multai while every town has Higher Secondary/High School facility. The number of Higher Secondary/ High Schools, Middle Schools and Primary Schools per thousand population is shown in the following inset table. For a more realistic appreciation the population in the age-group 0-14 has been considered for Primary and Middle Schools while population in the age-group 15-19 has been considered for Higher Secondary/High Schools.

Name of the town	Number per 1,000 population		
	Higher Secondary or High School	Middle	Junior Secondary/ Primary.
1	2	3	4
1 Amla	2.5	0.3	0.5
2 Betul	0.9	—	0.8
3 Betul Bazar	2.8	0.3	0.5
4 Multai	1.7	0.4	0 4

(*iii*) *Recreational and cultural facilities*.—Amla, though it is not even a tahsil headquarter, has got 3 Cinema houses while the district headquarter town, Betul and Multai have one Cinema house each. Public libraries are available in Betul and Multai towns only.

Statement VI.—There are 3 banks at Betul and 2 banks at Multai while the rest of the two towns have one bank each. Two non-agricultural credit societies are available at Betul while all the towns have got the facility of Agricultural Credit Society. Ground nut oil, sugar, rice and cloth are the main items of import while potato, "gud" and "harra" are the important items of export from the towns of the district.

Statement VII.—About 46 and 25 percent of the town population of the district are in Betul and Amla towns, respectively, and only 16 and 11 percent are found in Multai and Betul Bazar towns. About 84 and 10 percent of the town population follow hindu and islam religions, respectively, while the percentage of people following other religions is not very significant. By and large, this ratio is found in all the towns except that in Betul Bazar. The percentage of people following hindu and islam religions comes to about 97 and 3, respectively. About 4 percent people of Multai follow jain religion. There is no christian and sikh population in Betul Bazar. The percentage of Scheduled Caste population in Amla town is about 16 while in other towns it is less than 10. There is no Scheduled Tribe population in Amla and Multai while in Betul and Betul Bazar the percentage of this population comes to only 5.24 and 0.73, respectively.

Note:—Persons following different sect/faith have been included under the main religion as below:—

(i) In Betul town Hindu includes—Gaiki (M.4, F.4), Pardhan (M.8, F.5), Panjabi (F.4), Sanatan (M.2, F.3), Telgu-Naidu (F.2), Vaishnaw (M.3. F.4); Others include Purtgali (F.1).

(ii) In Betul Bazar town Hindu includes—Vedic (M.22, F.26).

(iii) In Multai town Hindu includes—Arya (F.3), Kunbi (M.1), Mehar (M.8, F.8), Radha Swami (M.4, F.2), Sanatan (M 4, F.2), Vedic (M.1, F.2), Vaishnaw (M.2, F.3).

(iv) In Amla town Hindu includes—Arya (M.12, F.10), Sanatan (M.8, F.8), Vedic (M.5, F.4), Vedic Arya (M,1) and Others include Parsi (M.1, F.3).

PRIMARY CENSUS ABSTRACT
PART X (B)

EXPLANATORY NOTE

I. General:

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961-71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex-ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households have been discussed.

II. Population:

The population of Betul district is 736,196, while the population of Madhya Pradesh is 41,654,119. The population of Betul district thus comes to 1.77 percent of the State population. The rural population is 90.81 percent of the district population whereas the urban population is only 9.19 percent as against the State percentage of 16.29. In other words, the district is rural in character. Highest percentage of the district population is found in Multai tahsil (about 39 percent) followed by Betul tahsil (about 37 percent) and Bhainsdehi tahsil (about 24 percent). One of the reasons for this is that the population of the towns are parts of Multai and Betul tahsils as under while there is no town in Bhainsdehi tahsil:—

Tahsil	Towns	Population of towns
1	2	3
(1) Multai	(a) Multai	11,114
	(b) Amla	16,902
(2) Betul	(a) Betul	30,862
	(b) Betul Bazar	7,959

Betul district ranks 28th among the 43 districts of the State in population. During the decade 1961-71, the district population growth-rate has been 31.37 against the State growth-rate of 28.67. The area of the district is 10,061 sq. km. In other words it has 2.27 percent of the State area and ranks 18th in area among the districts of the State. The density of population per sq. km. of the district is 73 against the State density of 94 and the district ranks 35th in density in the State. The sex-ratio, number of females per 1,000 males, of the district and the State is 982 and 941, respectively. Tahsils Multai and Bhainsdehi, have got sex-ratio higher than the district sex-ratio while the other tahsil, Betul, has lower sex-ratio.

III. Literacy:

1. The percentage of literacy in the district comes to 22.44 as against the State literacy percentage of 22.14. In 1961, the literacy percentage of the district (16.55) was lower than the State percentage of 17.13. The district has made some progress to increase the rate of literacy during the decade 1961-71.

2. The literacy percentage among the males in the district (33.47) is slightly higher than the State percentage of 32.70. Among females also, the literacy percentage in the district (11.20) is slightly higher than the State percentage of 10.92.

3. Among the tahsils, Multai tahsil has the highest literacy percentage of about 25, while Bhainsdehi tahsil has the lowest percentage of about 16.

4. The same pattern is seen in male literacy in the tahsils. Among males, Multai tahsil is at the top (about 39 percent), while Bhainsdehi Tahsil with about 25 percent comes last. Among females Betul tahsil leads in literacy (about 13 percent), while Bhainsdehi tahsil with 6.95 percent comes last.

IV. Workers:

In the district about 42 percent of the population comes under the category of workers (main activity) against the State percentage of about 37. The percentage of female workers (about 29) is appreciably higher than the State percentage (about 19). In the district, comparatively more percentage of workers have been returned from Multai tahsil. Betul tahsil

has returned the lowest percentage of workers (about 37). Among female workers also, Multai tahsil (with about 35 percent) leads other tahsils of the district, while Betul tahsil (with about 20 percent) comes last. Among the workers in the district, about 53 and 31 percent are cultivators and agricultural labourers, respectively, against the State percentage of about 53 and 27. Under the category "Other workers" the district percentage (about 16) is lower than the State percentage of 20.58. Among females, the district percentage of cultivators (about 40) and other workers (about 5) is lower than the State percentage of about 41 and 10, respectively, while for agricultural labourers the district percentage (55.01) is higher than the State percentage (48.70).

Comparatively, Multai tahsil has the highest percentage of cultivators (about 56) and lowest percentage of agricultural labourers (about 28).

V. Scheduled Caste and Scheduled Tribe:

The percentage of Scheduled Castes to total population of the district (10.47) is lower than the State percentage (13.09), while the percentage of Scheduled Tribes in the district (30.97) is significantly higher than the State percentage (20.14). In the tahsils of the district, highest percentage (14.34) of scheduled caste population is found in Multai tahsil, while the percentage (7.14) in Bhainsdehi tahsil is the lowest. In contrast to this, Bhainsdehi tahsil has returned highest percentage (59.04) of scheduled tribe population while Multai tahsil is not covered by the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, and consequently scheduled tribe population has not been returned from this tahsil.

VI. Occupied Residential Census Houses:

The district has 120,677 occupied residential Census houses against the State figure of 6,822,767 which comes to 1.77 percent. It is a coincidence that the share of the district, both in population and occupied residential Census houses, are indentical. During 1961, there were 108,326 occupied residential Census houses in the district against the State figure of 6,230,854 which came to 1.73 percent. There has not been any material change in percentage during the decade. The number of house holds and persons per occupied residential Census house in 1961 and 1971 are indicated below:—

Year	No. of residential Census houses	No. of households	No. of households per occupied residential census houses	No. of persons per occupied residential census house
1	2	3	4	5
State 1961	6,230,854	6,615,580	1.06	5.2
Distt. 1961	108,326	111,924	1.03	5.17
State 1971	6,822,767	7,740,289	1.13	6.1
Distt. 1971	120,677	134,046	1.11	5.49

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Multai tahsil with about 40 percent claims the highest percentage of the occupied residential Census houses of the district.

VII. Villages and Towns:

There are in all 1,399 villages in Betul district which comes to 1.86 percent of total villages in the State. The percentage of inhabited villages to the total villages in the district is 93.50 against the State percentage of about 92. There are in all 250 towns in the State out of which the district claims only 4 towns:—Amla, Betul, Betul-Bazar and Multai.

(1) Note— M=Municipality
U.A.=Urban Agglomeration
O.G.=Urban Out growth
N.M.=Non-Municipal

(2) Urban Outgorwth—
[1]. Village Betul-Bazar Kasba, L.C. 452 of Tahsil Betul is wholly included
[2]. Village Multaigaon, L.C. 205 of Tahsil Multai is wholly included

(3) Total area figure for the district represent provisonal 'Geographical Area' as supplied by the Surveyor General of India. Figures of Urban Areas are those supplied by the Local Bodies.

(4) Tahsilwise area figures are based on village papers as supplied by the Director of Land Records, Madhya Pradesh. Tahsilwise area figures do not include 3015.2sq. km. of forest area as tahsilwise break-up is not available.

(5) Town treated as such for the first time in 1961 Census which continues as town in 1971 Census is shown with asterisk (*) on its left.
