ACKNOWLEDGEMENTS

At the 1971 Census it has been our endeavour to compile both Census and non-Census statistics at the village and block level in a uniform manner. To ensure that these statistics are available to the users as soon as these are sifted and compiled, the District Census Handbook has been divided into three parts This is the first part of the series, the Village and Town Directory, which mostly comprises non-Census data

We are deeply indebted to the State Government for their everwilling and prompt help to us at all stages. The District Census Handbooks are being published by us on their behalf I wish to express my gratitude to Sri M. Lal, Chief Secretary to U.P. Government, for all the guidance and facilities afforded to us in the conduct of Census in this State. I am also grateful to Sri P. C. Pandey, Secretary, G. A. D (Now Commissioner, Rohilkhand Division, Bareilly) and his successor, Sri A. P. Dixit, for the facilities given by them in sorting out various administrative matters relating to the publication of these Handbooks. I am extremely thankful to the District Officers for their whole-hearted co-operation in furnishing the desired information and the District Census Officers for their hard work and sustained efforts in collecting the same.

The programme for the printing of District Census Handbooks has been heavy indeed, more so as three parts are being published, one in Hindi and two in English. The arrangements made by Sri A. Dar, Superintendent, Printing and Stationery, U. P., Allahabad for the printing of these volumes, are thankfully acknowledged Joint Superintendent, Sri J. S. Gupta, I/c New Government Press Aishbagh, Lucknow has also been extremely helpful in bringing out the maps

In the Census Office, everyone has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I am grateful to Sri K. S. Sinha, Deputy Director, Headquarters, the Tabulation Officer and other staff of the Technical Section, who have shared the burden and helped in bringing out these Handbooks.

I must also express my gratitude to Sri A Chandrasekhar, Registrar General, India, Sri K. D. Ballal and Dr. B. K. Roy Burman, Deputy Registrars General and Sri K. K Chakravorty, Central Tabulation Officer for their constant help and guidance despite their own heavy preoccupations.

INTRODUCTORY NOTE

1. History of District Census Handbook.

It has been customary to bring out vital statistics at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. Such information was, however, not brought out in 1901. Village Directories were prepared for all districts in 1911, but could be published only for thirteen due to the outbreak of the First World War. At the 1921 Census, these were published for all districts in the form of District Census Statistics. In 1931 villagewise statistics were compiled but could not be published owing to financial stringency, resulting in loss of valuable data. At the 1941 Census, restricted tabulation was undertaken in the wake of the Second World War, but the utility of Census statistics was recognised and these were published. The District Census Handbook in its present form was brought out at the 1951 Census, and was published alongwith another volume titled District Population Statistics. In 1961 Census, attempts were made to render the District Census Handbook more informative, as in addition to Census data pertaining to each village, data about its level of develoment and amenities were also collected. At the 1971 Census, efforts have been made to compile both Census and non-Census statistics at village/town level in a uniform manner with an enlarged scope.

As the District Census Handbook makes Census statistics available for the smaller territorial units, it is constantly referred to for several purposes of administration, demarcation of electoral constituencies, planning the development and so on. To ensure that these statistics are available to the users early, the District Census Handbook has been divided for being published separately into three parts :

Part A : Town and Village Directory

Part B : Village and Town-wise Primary Census Abstract

Part C : Analytical Report and Administrative Statement—District Census Tables.

2. Scope of District Census Handbook.

Part A of the Handbook comprises the Town and Village Directory. In village Directory, particulars of amenities in regard to Education, Medical, Power supply, drinking water supply, Post and telegraph and Communications have been given. Besides, it contains land-use statistics, davs of weekly markets and places of religious, historical or archaeological interest in each village. The Town Directory comprising seven statements throws light on the status of the town, its origin, growth of population, functional category, location and physical aspects, Municipal finances, Civic and other amenities, Medical and Educational facilities and statistics pertaining to Trade, Commerce, Industry and Banking. Apart from these, it also gives the distribution of population of the town by Religion and Scheduled Castes/Scheduled Tribes

Part B represents data down to village level for rural area and block level for towns. It contains the Primary Census Abstract which incorporates figures of area, number of occupiedd resiential houses and households, total population and its break-up by sex,

scheduled caste and scheduled tribe, literate population, working population by nine broad industrial categories of cultivators, agricultural labourers, workers engaged in forestry and livestock etc., in mining and quarrying, in manufacture or repair, in construction, in trade and commerce, in transport and communications and in other services as well as the non-working population.

Part C deals with the administrative statistics pertaining to the district in all field of development. The Census tables pertaining to language, religion, migration and economic activities are being reproduced in this part A write up indicating changes in socio-economic and demographic characteristics of the district during the last decade is also being included in it.

3. Town Directory given in Part A presents data for all the Census towns of the district There is no uniformly accepted definition of a town. The historical, political, cultural and administrative considerations are generally taken as criteria for rural-urban classification. An urban area, in contradistinction to the rural, comprises a large majority of inhabitants who are engaged in industrial and non-agricultural activities. In addition to its size, population and occupational characteristics, an urban area provides such facilities as transportation, banking, commercial and technical services, community facilities and other civic services. According to the State Government, all Municipal Corporations, Municipal Boards, Cantonment Boards, Notified Areas and Tow Areas are considered as town, and according to thier average annual income from their own resources, these have been classified into different classes of local bodies. The Criteria adopted under the Census Operations is slightly different from the State Government In 1971 Census all places satisfying the following conditions have been treated as Towns :—

1. All Municipal Corporations, Municipal Boards, Cantonments & Notified Areas.

2- All localities though not in themselves local bodies but forming part of a city or town agglomeration.

3. Other places satisfying all the three undermentioned conditions :

   (i) Population exceeds 5,000.

   (ii) At last 75% of the male working population engages in non-agricultural pursuits, and

   (iii) The density of population exceeds 1,000 persons per sq. mile (386 persons per sq. km.).

The information given in the Town Directory relates to the year 1969. The data has been presented in the following seven statements :

(a) Statement I—This statement presents the population of the towns at the end of each decade from 1901 to 1971, the Civic status of the towns and their functional categories at 1961 and 1971, Censuses The functional categories given in columns 14 and 15 have been determined on the basis of the predominant functional character of the town.

to derive which, the working population under the broad industrial categories has been regrouped into five broad functional classifications:—

(i) Primary Activities-Categories I, II, III, & IV
(ii) Industry-Categories V (a) V (b) and VI
(iii) Trade and Commerce-Category VII
(iv) Transport-Category VIII, and
(v) Services Category IX

For each town, the percentage of workers under each of the aforesaid classes to total workers is worked out, and where the workers under one of the classes comprise 40% or more of the total workers, the town is taken as mono-functional. In other cases, the next predominant occupation is taken into account and if the total of the two comes to 60% or above, the town is designated as bi-functional. If the total does not yield 60%, the third predominant occupation is also taken and such a town is treated as multi-functional.

(a) According to their area in acres the villages have been stratified in the following table.

Table 5

Area (in acres)	No. of Villages	Percentage
50 acres or less	550	7.21
51–100	1,290	16.92
101–200	2,604	34.15

5001 acres and above	1	0.01
Total @	7,625	100.00

@ Total is exclusive of one village whose information is not available.

It is evident from the above table that the number of villages having an area of more than 200 acres but not more than 5,000 acres are highest claiming the percentage of 67.87. Thereafter, the number of villages goes on decreasing as the size of villages increases. There is only villages having an area exceeding 5,000 acres. As regards smaller villages, there are only 550 having an area of less than 50 acres.

(b) The distribution of villages having educational institutions is given in the following table.

Table 6

The above table shows that the largest number of institutions (21.23%) including Higher Secondary Schools exist in the villages situate between 26 to 50 kilometres from the nearest town. The villages which lie within 6 to 10 kilometres have the least no. of institutions (17 93%).

(c) 48 villages in district Basti have hospitals. If all kinds of medical institutions including dispensaries, health centre etc. are taken into account, 107 villages out of 7,626 have medical institutions.

The following table presents the number of medical institution per 100 Sq. Kms.

Table 7

The percentage of electrified villages to the total villages is highest 44 98 for those, situate within a radius of 5 kilometres and the minimum percentage of 5.68 is or those situate at a distance 51 to 100 kms. from the nearest town. It is evident from the above table that the percentage of electrified villages to total villages generally decreases with the increase of distance from the nearest town.

As many as 0.54% of villages of the district are connected by rail, out of the total number of 7626 villages. 19.50% are connected by pucca road and 1.94% by kachcha and pucca roads.
