	(iii) Dantewara Tahsil	662–665

PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No. definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931 The reason could be transfer from 1921 of certain charges on Census previously met from the provincia. revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics up to the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces & Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office. Separation of administrative statistics as Part C of the District Census Handbook and the kind Co-operation of the State Government, permitting Collectors of the 1961-71 decade to write the chapter on "Introducing the District," is likely to go a long way in early publication of all the parts of the District Census Handbooks. Another favourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in hindi and 2 in english. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Parts A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District Census Handbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

BHOPAL :
15 *th August,* 1972.

VILLAGE AND TOWN DIRECTORY

PART X(A)

EXPLANATORY NOTE

1. History :

Prior to 1951 there were no separate census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, banking, education, health etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make districtwise Census Publication very comprehensive resulted in late availability of the books to the users. Therefore, the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby release maximum data, as and when available, so that the publication may have a useful life of seven to eight years of intercensal decennium.

2. Scope :

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, post and telegraph facilities and comunications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities medical, educational and cultural facilities, trade, industry, commerce and banking facilities, population by religion and Scheduled castes and Scheduled Tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B contains for each village and town, the primary census data incorporating area, occupied residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion, migration etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory :

This is in the form of one statement. Important statistics for each village have been given under the mainhead—Amenities and Land use Data. Other information regarding nearest town with distance, market, staple food and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water, communications and post and telegraph. Under "Land use" the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated, cultivable waste and area not available for cultivation.

(a) There are 3,683 villages in the 8 tahsils of the district and the number of villages, tahsilwise, in 1961 and 1971 are as under :—

S.No.	Tahsil	1961	1971	Difference
(1)	(2)	(3)	(4)	(5)
1.	Bhanupratappur	252	252	Nil
2.	Kanker	318	318	Nil
3.	Narayanpur	668	670	+ 2
4.	Kondagaon	526	536	+10
5.	Bijapur	715	725	+10
6.	Dantewara	236	240	+ 4
7.	Jagdalpur	605	614	+ 9
8.	Konta	314	328	+14
	Total	**3,634**	**3,683**	**+49**

It may be seen that there has been an increase of 49 villages in the district. The reason for the difference are :—

(i) **Narayanpur tahsil** :—Fourteen villages ceased to exist and 16 new villages came into existence in 1971. Thus in 1971 there has been an increase of 2 villages in the tahsil. The particulars of these villages are indicated below :—

(a) Villages that have ceased to exist in 1971 :—

S.No.	Village	L.C.No. 1961	Remarks
(1)	(2)	(3)	(4)
1.	[illegible] Tewia	124	These 3 revenue villages were merged in other villages by cadastral survey.
2.	Hurtarai	243	
3.	Rengabeda	630	
4.	Bhonga Bhondia	70	These 7 villages have been included in the Reserved Forest by cadastral survey.
5.	Murga	73	
6.	Kooli	149	
7.	Khehlabeda	276	
8.	Kalarkhutni	282	
9.	Puskasa	306	
10.	Mankote	179	
11.	Kohobeda	44	These 4 villages are abandoned 'Mad' villages. The habitation and cultivation in 'Mad' villages frequently shifts due to the practice of shifting cultivation.
12.	Kedkatta	250	
13.	Kuruspar	287	
14.	Matehnar	445	

(b) Villages that have come into existence in 1971 :—

S.No.	Village	L.C.No. 1971	Remarks
(1)	(2)	(3)	(4)
1.	Uliya	90	These are 4 revenue villages.
2.	Bachaghat	97	
3.	Tahkan tola	327	
4.	Katabans	119	
5.	Odchapar	111	These are 8 'Mad' villages.
6.	Barungmarh	407	
7.	Kodnar	434	
8.	Basing	435	
9.	Becha	437	
10.	Dhodharbeda *alias* Jamner	463	
11.	Kurusnar *alias* Khargone	510	
12.	Dhuta	459	
13.	Berkod	667	These are 4 forest villages.
14.	Ajrel	668	
15.	Boganbheda	669	
16.	Barche	670	

(ii) **Kondagaon tahsil** :—Eleven forest villages came into existence in 1971, while one village was transferred to Jagdalpur tahsil. Thus there has been an increase of ten villages in the tahsil. The particulars of these new villages are indicated below :—

(a) Villages which came into existence in 1971 :-

S.No.	Village	L.C.No. 1971	Remarks
(1)	(2)	(3)	(4)
1.	Dongar Silai	512	Forest villages.
2.	Gagda	513	
3.	Tamrawand	514	
4.	Chamai	523	
5.	Karsing	524	
6.	Taraibeda	528	
7.	Kirmari	532	
8.	Turibeda	533	
9.	Tumbeda	534	
10.	Shankarpur	535	
11.	Deogaonbeda	536	

(b) Village Tareka (1961 L.C. No. 430/1) is now in Jagdapur tahsil with location code number 588 (1971).

(iii) **Bijapur tahsil** :—Eleven villages have come into existence in 1971, while two villages of 1961 stand merged as one village. As a result of this there has been an increase of ten villages in the tahsil. The particulars of these villages are indicated below :—

(a) Villages which came into existence in 1971:—

S.No.	Village	L.C.No. 1971	Remarks
(1)	(2)	(3)	(4)
1.	Odasan palli	207	New villages.
2.	Muchler	211	
3.	Ider	349	
4.	Tadwada	289	'Mad' villages. The habitation and cultivation in 'Mad' villages frequently shift due to shifting cultivation practice.
5.	Tahakawada	302	
6.	Kunye	425	
7.	Betekal	433	
8.	Pallewaye	713	New forest villages.
9.	Bodla	725	
10.	Parkeli	257	New villages.
11.	Birabhatti	259	

(b) The two villages, Bhimaram (1961 L. C. No. 453) and Rampuram (1961 L. C. No. 454), have merged into one village, Bhimaram (Rampuram), in 1971 with location code No. 92.

(iv) **Dantewara tahsil** :—The following 4 habitations have been included in the list of villages in 1971.

S.No.	Village	L.C. No. 1971	Remarks
(1)	(2)	(3)	(4)
1.	Nagfani	234	New forest village
2.	National Mineral Development Corporation, Bailadila	109	Near village Bhansi
3.	N.M.D.C. Bailadila Centre of deposit No. 5	118	...
4.	N.M.D.C. Bailadila	166	Near Kirandul

(v) **Jagdalpur tahsil** :—The following 9 new villages have come into existence in 1971 :—

S.No.	Village	L.C.No. 1971	Remarks
(1)	(2)	(3)	(4)
1.	Jagdalpur (Dehat)	440	New habitations.
2.	Pakhanoguda	441	
3.	Tareka	588	This is a forest village transferred from Kondagaon tahsil.
4.	Bagrai	595	New forest villages.
5.	Malamunda	610	
6.	Choknar Bangladongri	611	
7.	Kodomali	612	
8.	Sandkarmari	613	
9.	Kirmari	614	

(vi) **Konta tahsil** :—The following 14 new forest villages have come into existence in 1971 :—

S.No.	Village	L.C.No. 1971
(1)	(2)	(3)
1.	Udaltarai	272
2.	Kosabandar	273
3.	Nimal Guda	275
4.	Kasaram	281
5.	Entapad	286
6.	Pentapad	287
7.	Tumalpad	288
8.	Regudgatta	301
9.	Danteshpuram	316
10.	Narasapuram	317
11.	Ramaram	318
12.	Pidmel	324
13.	Bodumpal	326
14.	Tolnai	327

The distribution of the villages with reference to their area in acres is as shown in the inset table below :—

Area (in acres)	No. of villages
(1)	(2)
50 acres or less	10
51 to 100	30
101 to 200	90
201 to 500	400
501 to 1,000	810
1,001 to 2,000	1,157
2,001 to 5,000	670
5,000 acres and above	121
Area not available	395
Total	3,683

Area of 395 villages is not available and therefore they have not been considered in this note, while discussing data regarding area. Such villages are mainly located in Narayanpur and Bijapur Tahsils. The main cause for the non - availability of data regarding area for such a large number of villages are briefly as under :—

(a) Less then one precent of such villages are forest villages.

(b) About 5 percent of such villages are "Mad" villages. It may be mentioned that location of habitation and cultivation in "Mad" villages frequently changes, due to the practice of shifting cultivation.

(c) About 4 percent of such villages are uninhabited and as such the area figures could not be furnished by the Tahsildars.

(d) Less than one percent villages are surveyed and some are exclusively project habitations which are administered by Dandkaranya and National Mineral Development Corporation.

Village Konda Padgu (L.C. No. 43/5/100) in Bijapur tahsil has the smallest area of 10·90 acres and is located at a distance of 240 kms. from the nearest town Jagdalpur while village Kukanar (L. C. No. 43/7/578) in Jagdalpur tahsil has the largest area of 17,955.11 acres in the district and is located at a distance of 70 kms. from the nearest town, Jagdalpur.

Out of 3,288 villages for which area figures are available, 1,157 villages are in the range of 1,001-2,000 acres while 810 and 670 villages are in the ranges 501-1,000 acres and 2,001-5,000 acres, respectively. As many as 121 villages are in the range of 5,001 acres and above. Maxmium villages in Dantewara and Konta tahsils come within the area ranges of 2,001-5,000 acres and 501-1,000 acres, respectively, while in the rest of the tahsils they come within the area ranges of 1,001-2,000 acres as will be seen from the following table containing tahsil-wise data :—

Area in acres	Bhanupratappur	Kanker	Narayanpur	Kondagaon	Bijapur	Dantewara	Jagdalpur	Konta	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
50 acres or less	...	...	...	2	4	...	3	1	10
51 to 100	...	...	3	3	8	1	8	7	30
101 to 200	...	3	4	5	27	5	28	18	90
201 to 500	10	24	56	36	99	21	84	70	400
501 to 1,000	70	85	132	113	115	30	163	102	810
1,001 to 2,000	140	155	204	221	137	62	170	68	1,157
2,001 to 5,000	32	51	107	134	111	84	118	33	670
5,001 & above	...	...	9	22	23	23	40	4	121
Area not available	...	...	155	...	201	14	...	25	395
Total	252	318	670	536	725	240	614	328	3,683

(b) **Educational Amenities** :—The total number of villages having various educational facilities within various distance ranges from the nearest town are as indicated in the inset table below :—

Distance from nearest town	Total No. of villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 kms. or less	46	29	5	1	1	...
6 to 10 kms.	58	35	4	...	...	...
11 to 15 kms.	110	63	5	...	...	...
16 to 25 kms.	263	142	17	1	...	...
26 to 50 kms.	545	284	35	4	...	...
51 to 100 kms.	1,184	438	50	6	...	...
101 to 200 kms.	1,118	287	26	3	...	...
201 kms. and above	359	55	5	1	...	...
Total	**3,683**	**1,333**	**147**	**16**	**1**	...

Maximum number of villages (1,184) lie within the distance range 51–100 km, and maximum number of villages having educational facilities also lie in this range. The number of educational institutions in the villages of different tahsil is given below :—

Tahsil	Number of Educational Institutions			
	Higher Secondary/ High School	Middle School	Primary School	Others
(1)	(2)	(3)	(4)	(5)
Bhanupratappur	1	13	84	...
Kanker	1	20	200	...
Narayanpur	4	15	116	...
Kondagaon	3	22	201	...
Bijapur	2	14	127	...
Dantewara	1	16	155	...
Jagdalpur	2	40	345	(college) 1
Konta	2	12	134	...
Total	**16**	**152**	**1,362**	**1**

Twenty five villages have two primary schools each, while 2 villages have 3 primary schools each. Five villages have two middle schools each. The area of these villages with distances from the nearest town are indicated below :—

S. No.	Name of village	Tahsil	L.C.No. 1971	Area of the village in acres	Distance from nearest town in kms. with name		Educational institutions & Number (if more than one) Primary	Middle
(1)	(2)	(3)	(4)	(5)	(6)		(7)	(8)
1.	Charama	Kanker	43/2/22	921.02	Kanker	28.8	2	...

29.	Konta	Konta	43/8/266	497.41	Rajahmundary (Andhra Pradesh)	144.0	2	...
					Total		56	10

It may be mentioned that there are only two colleges in the district, one in Kanker town and the other in village Dharampura, (L. C. No. 43/7/451) which is at a distance of only 3 kms. from Jagdalpur town.

(c) **Medical facilities** :—The availability of medical facilities, per 100 sq. km. and, tahsilwise, is as given in the following inset table :—

Tahsil	Total area (in sq. kms.)	No. of medical institutions of any kind per 100 sq. kms.
(1)	(2)	(3)
Bhanupratappur	1,371.85	0.5
Kanker	1,746.67	0.3
Narayanpur	3,025.90	0.5
Kondagaon	3,803.29	0.4
Bijapur	3,279.82	0.4
Dantewara	2,219.19	0.6
Jagdalpur	4,215.61	0.6
Konta	1,343.48	0,9

The above table will show that the villages of Konta tahsil have, comparatively, slightly greater medical facilities per 100 sq. km. It is uniformly low in the other tahsils. The number of medical institutions, tahsil-wise, is as indicated below :—

Tahsil	No. of Medical Institutions
(1)	(2)
Bhanupratappur	7
Kanker	5
Narayanpur	15
Kondagaon	14
Bijapur	13
Dantewara	13
Jagdalpur	27
Konta	12
Total	106

About 25 percent of the medical institutions in the rural areas of the district are in the villages of Jagdalpur tahsil.

(d) **Power supply** :—The number of villages having electric power supply within various distance ranges from the nearest town are as indicated in the inset table below :—

Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
(1)	(2)	(3)
5 kms. or less	46	18
6 to 10 kms.	58	7
11 to 15 kms.	110	9
16 to 25 kms.	263	16
26 to 50 kms.	545	19
51 to 100 kms.	1,184	17
101 to 200 kms.	1,118	5
201 kms. & above	359	...
Total	**3,683**	**91**

It would be seen from the above that only about 2 percent of the total number of the villages have electricity and the bulk of them are in the distance range upto 100 kms. The number of villages having electric power supply, tahsil-wise, is as below:—

Tahsil	Total No. of villages	Villages having electric power supply	Percentage of villages covered by electricity
(1)	(2)	(3)	(4)
Bhanupratappur	252	6	2.38
Kanker	318	30	9.43
Narayanpur	670	3	0.45
Kondagaon	536	9	1.68
Bijapur	725	1	0.14
Dantewara	240	10	4.17
Jagdalpur	614	31	5.05
Konta	328	1	0.30
Total	**3,683**	**91**	**2.42**

The percentage of villages (about 2) having electric power supply in the district is much lower than the State average (about 7). Within the district, villages of Kanker, Jagdalpur and Dantewara tahsils have, comparatively more of this facility, while less than one percent villages of Narayanpur, Bijapur and Konta tahsils have electricity.

(e) **Communications** — The total number of villages and the number of villages connected by different types of communcation, falling in different distance ranges from the nearest town, are indicated in the inset table below: —

Distance from the nearest town	Total No. of villages	Number of villages connected by				
		Pucca road	Kutcha road	Pucca road and Rail	Kutcha road and Rail	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 kms. or less	46	26	7	2	1	...
6 to 10 kms.	58	23	24	...	...	...
11 to 15 kms.	110	23	47	2	...	...
16 to 25 kms.	263	47	118	2	...	...
26 to 50 kms.	545	77	259	1	...	...
51 to 100 kms.	1,184	165	576	4	...	...
101 to 200 kms.	1,118	64	349	1	...	1
201 kms. and above	359	8	128	...	...	...
Total	**3,683**	**433**	**1,508**	**12**	**1**	**1**

Few villages are served by "Pucca" road. Out of 3,683 villages in the district, 1,954 villages are served by 'pucca' or 'kutcha' roads. The number of villages served by "pucca" roads, tahsil-wise, and the total

number of villages with percentage covered are as under: —

Tahsil	Total No. of villages	No. of villages having "pucca" road	Percentage
(1)	(2)	(3)	(4)
Bhanupratappur	252	86	34.13
Kanker	318	70	22.01
Narayanpur	670	51	7.61
Kondagaon	536	55	10.26
Bijapur	725	25	.45
Dantewara	240	30	12.50
Jagdalpur	614	92	14.98
Konta	328	36	10.98
Total	**3,683**	**445**	...

Comparatively, Bhanupratappur and Kanker tahsils have better communication facilities, while Bijapur tahsil is poor in this facility. Very few villages are connected by railway lines. This facility is for the limited purpose of exporting iron ore from the Bailadila iron ore mines to Japan.

(f) Post and Telegraph. — The total number of villages in the tahsils of the district having post offices and telegraph offices are given below: —

Name of tahsil	Total No. of villages	No. of villages having post office	No. of villages having telegraph office	No. of villages having telephone
(1)	(2)	(3)	(4)	(5)
Bhanupratappur	252	4	1	...
Kanker	318	8	2	1
Narayanpur	670	13	...	...
Kondagaon	536	18	1	1
Bijapur	725	15	...	1
Dantewara	240	16	4	3
Jagdalpur	614	33	1	...
Konta	328	16	1	1
Total	**3,683**	**123**	**10**	**7**

The number of post office per 100 sq. km. area in each tahsil is as indicated in the following inset table :—

Name of Tahsil	Total area in sq. km.	No. of Post Offices per 100 sq. kms.
(1)	(2)	(3)
Bhanupratappur	1,371.85	0.3
Kanker	1,746.67	0.5
Narayanpur	3,025.90	0.4
Kondagaon	3,803.29	0.5
Bijapur	3,279.82	0.5
Dantewara	3,219.19	0.7
Jagdalpur	4,215.61	0.8
Konta	1,343.48	1.2

Comparatively, rural areas of Bhanupratappur tahsil have less postal facility. Ten villages have telegraph offices and seven villages have telephone facility. The names and particulars of these villages are as under :—

Tahsil	Names of villages having telegraph office		Names of villages having telephone	
	Name	L.C.No.	Name	L.C. No.
(1)	(2)	(3)	(4)	(5)
Bhanupratappur	Bhanupratappur	43/1/180	...	...
Kanker	Charama	43/2/22	Charama	43/2/22
	Kanker	43/2/166	...	...
Kondagaon	Kondagaon	43/4/350	Kondagaon	43/4/350
Bijapur	...	...	Bijapur	43/5/557
Dantewara	Geedam	43/6/64	Geedam	43/6/64
	Dantewara	43/6/83	Dantewara	43/6/83
	Bhansi	43/6/108	Bhansi	43/6/108
	Kirandul	43//6/165	...	...
Jagdalpur	Kodenar	43/7/91	...	...
Konta	Konta	43/8/266	Konta	43/8/266

(g) Staple food. — Rice and "Kodo" constitute staple food in practically all the villages of the district. Besides the above, "madia" also constitutes staple food in Narayanpur tahsil. In very few villages of

Bijapur, Dantewara, Jagdalpur and Konta tahsils, maize and 'Jowar' are also additional staple food.

(h) Land use Pattern. — (i) According to the village papers about 42 percent of the area in the district is under forest. The percentage of the forest area, tahsil-wise, is as indicated below :—

Tahsil	Percentage
(1)	(2)
Bhanupratappur	20.57
Kanker	18.69
Narayanpur	56.99
Kondagaon	60.31
Bijapur	65.50
Dantewara	19.67
Jagdalpur	30.28
Konta	23.14

It may be noticed that, comparatively, there is less forest area in Bhanupratappur, Kanker and Dantewara tahsils while more than half the area of Narayanpur, Kondagaon and Bijapur tahsils are under forest.

(ii) The net cropped area in the year 1969 increased by 28.65 percent as compared to the area in 1960-61. The percentage of area under irrigation to area under crops during the years 1960-61 and 1968-69 comes to 2.20 and 1.65, respectively. The area under irrigation during this period increased by 3.52 percent.

(iii) The following inset table shows the average percentage of cultivable waste per village in different distance ranges from the nearest town.

Distanee	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 kms. or less	44	23,872.54	542.56	4,309.23	97.94	18.05
6—10 kms.	58	32,768.30	564.97	7,517.94	129.62	22.94
11—15 kms.	110	66,677.31	606.16	19,573.90	177.94	29.36
16—25 kms.	261	174,896.51	670.10	59,589.53	228.31	34.07
26—50 kms.	545	390,070.14	715.73	105,661.03	193.87	27.09
51—100 kms.	1,136	736,318.43	648.17	224,544.31	197.66	30.50
101—200 kms.	884	492,974.03	557.66	135,236.34	152.98	27.43
201 kms. and above	250	54,651.04	218.60	18,912.26	75.65	34.61
Area not available	395	...	...	...	...	...
Total	3,683	1,972,228.30	...	575,344.54	...	...

Ordinarily, the nearer a village to an urban area, the lesser is the proportion of cultivable waste, but the above inset table will show that there is some deviation in the distance ranges 26-50 kms. and 101-200 kms.

In the whole district, 575,345 acres (in round figures) of land has been classified as cultivable waste which constitutes about 11 percent of the total area of the villages in the district. The percentage of cultivable waste in each tahsil is as indicated below :—

Name of tahsil	Percentage of cultivable waste
(1)	(2)
Bhanupratappur	20.42
Kanker	11.06
Narayanpur	15.18
Kondagaon	4.19
Bijapur	10.52
Dantewara	9.03
Jagdalpur	14.36
Konta	6.34

It would be seen that, comparatively, the percentage of cultivable waste in Kondagaon and Konta

tahsils is less while it is maximum in Bhanupratappur (20.42 percent) and quite high in Narayanpur (15.18 percent) and Jagdalpur (14.36 percent) tahsils.

Town Directory

This is in the form of Seven Statements. But before discussing the information collected in the Seven Statements, it would be better to first understand certain concepts which determines urban areas.

(a) Definition of town. — A 'town' in the 1961 Census was either (i) a Municipality, Cantonment or Corporation; (ii) a habitation with a population of at least 5,000, with atleast three-fourths of the adult male population engaged in non-agricultural pursuits.

Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75% or more. But the list already finalised was not changed subsequently; the reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as Municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no material change in the concept of town and a list of 247 towns was prepared originally. Three more towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in the list of villages.

(ii) **Urban Agglomeration.**—The concept of Urban Agglomeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that "*de-facto* urban agglomeration" is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within Municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factul and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(c) **Standard Urban Area.** — This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are :—

(i) It should have a core town of a minimum population size of 50,000.

(ii) The contiguous areas made of other urban as well as rural administrative units should have close socio-economic links with the core town; and

(iii) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements

Very useful data regarding the towns have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

(i) **Statement No. I** :—This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(ii) **Statement No. II** :—This statement contains, information regarding Location (Longitude/Latitude) annual rainfall, temperature, distance from the nearest city with population of 1 lac or more and State, District and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(iii) **Statement No. III**:—This statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the

indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(iv) **Statement No. IV:**—This statement contains information regarding amenities, e. g., road length, sewerage system, types of latrines, water supply, fire-fighting service etc. in the different towns.

(v) **Statement No. V :**—This statement contains information regarding various important facilities available in the town viz., medical, educational, recreational and cultural.

(vi) **Statement No. VI :**—This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(vii) **Statement No. VII :**—This statement contains data regarding population by religion and Scheduled Castes/Scheduled Tribes with male/female break-up for the year 1971. This is the only statement based on 1971 Census figures.

Town

There are 8 tahsils and only 3 towns in Bastar district as indicated below :—

Sl.No.	Tahsil	Town	L.C.No.	Class
(1)	(2)	(3)	(4)	(5)
1	Bhanupratappur	Nil		
2	Kanker	Kanker	43/I	V
3	Narayanpur	Nil		
4	Kondagaon	Nil		
5	Bijapur	Nil		
6	Dantewara	Kirandul	43/III	V
7	Jagdalpur	Jagdalpur	43/II	III
8	Konta	Nil		

Only two tahsil headquarters are towns. Jagdalpur is the headquarter of the district. The above mentioned places were recognised as a town for the first time as indicated below :—

	Town	Year of recognition
(1)	(2)	(3)
1.	Kanker	1901
2.	Kirandul	1971
3.	Jagdalpur	1901

Kanker remained derecognised in 1911 while Jagdalpur in 1911 and 1921. Kanker and Jagdalpur towns have the follwing urban outgrowths.

S.No.	Name of Town	Name(s) of Villages	Partly/ Wholly	L.C. No.
(1)	(2)	(3)	(4)	(5)
1.	Jagdalpur	(i) Hatkachora	Wholly	443
		(ii) Frezerpur	Wholly	442
		(iii) Pakhanoguda	Wholly	441
		(iv) Kangoli	Wholly	438
		(v) Dharampura	Wholly	451
		(vi) Jagdalpur Kasba	Wholly	440
		(vii) Sargipal	Partly	432
2.	Kanker	(i) Kanker Kasba	Wholly	166
		(ii) Singarbhat	Partly	175

There is no Standard Urban Area in the district because there is no town having a population of more than 50,000.

(i) **Statement I :**—The category of town administration in 1970 has been indicated in column 5 of the statement. Kanker and Jagdalpur have a municipality, while Kirandul is administered by the public sector project of National Mineral Development Corporation. The population of the towns have, by and large, shown constant increase in every decade since their continued recognition as towns except that Kanker lost slightly in population during the decades 1931-1941 and 1941-1951 as indicated below :—

Sl.No.	Name of Town	Decade year	Population	Reduction in Population
(1)	(2)	(3)	(4)	(5)
1.	Kanker	1931	5,305	
		1941	5,173	132
		1941	5,173	
		1951	4,924	249

This fall in population may be due to partial migration within the district because the district population during the decades has shown an increase.

(ii) Column 14 of the statement shows the functional classification of the towns in 1961 as indicated in the following inset table :—

Functional category	Total No. of towns
(1)	(2)
Services	1
Service-*cum*-Industry	1
Total	**2**

The above table is in respect of only 2 towns because Kirandul was not recognised as town in 1961.

The method adopted for the functional classfication is elucidated below :—

The nine industrial categories were grouped into the following five fuctional characteristics :—

(i) Primary Activities (Comprising Category I–Cultivation, II – Agricultural Labourer and III–Mining and Quarrying, Fishing, Live Stock, Hunting, etc.)

(ii) Industrial (Comprising Category IV–Household Industry, V–Manufacturing other than Household Industry and VI–Construction)

(iii) Commercial (Comprising Category VII–Trade and Commerce)

(iv) Transport (Comprising Category VIII–Transport, Storage and Communications)

(v) Services (Comprising Category IX– Other services)

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 percent of the total workers the town was designated by that function. In case no single characteristic claimed 40 percent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town.

Statement II :—The physical and locational aspects as in 1969 have been covered. The district was constituted in 1948 after the merger of the erstwhile feudatory States of Bastar and Kanker, including the zamindaries there of. It may be mentioned that the district is the third biggest in area in the entire country and is situated in the extreme south of the State*. As a matter of fact it is bigger than the State of Kerala in area.

Physiographically, the district has two distinct features; the lower portion of the district, mainly lying in Kanker and Bhanupratappur tahsils, consisting of hills and the undulating plateau on the southern side has many lofty hills and forest. It may be informative to indicate that to the west and south-west of Narayanpur and bounded on the south by the river Indravati, is the extensive mass of hills known as Abhujmar.**

The district receives both the south-west and north-east monsoons and falls in the heavy rainfall region of the state. The climate on the plateau is pleasantly cool. On the whole, the climate in the interior regions of the district is damp and unhealthy.†

Temperature data of Jagdalpur has been indicated for Kirandul because the data for Kirandul is not available and the temperature is more or less similar.

The towns get an annual rainfall of about 1,395 mm. to 1,534 mm. The range of maximum and minimum temperature of the towns is from 31.6° C. to 18.9° C.

All the towns are on bus routes. Kirandul and Jagdalpur are connected by railway but so far it is not available for passenger traffic and is being exclusively used for the export of iron ore from the Bailadila iron ore mines.

Raipur is the nearest city by road from all the towns of the ditsrict. The district headquarter, Jagdalpur, is at a distance of 1,151 km. by road from the State headquarter, Bhopal.

The district is served mainly by the Raipur railway station which is at a distance of 295 km. by road from the district headquarter, Jagdalpur.

Statement III :—On the basis of population in the 1971 Census, the towns of the district have been categorised as under :—

Sl.No.	Name of Town	Population in 1971	Class
(1)	(2)	(3)	(4)
1.	Kanker	9,278	V
2.	Kirandul	9,057	V
3.	Jagdalpur	31,344	III

* District Census Handbook—Census of India, 1961—Bastar district—Page xxxvii.

** Ibid Page xxxix.

† Ibid Page xl.

Kirandul is under the National Mineral Development Corporation's project administration and, therefore, in this statement financial data of this town has not been incorporated. The statement would show that the total expenditure is within the total receipts of the local bodies except in the following cases :—

Sl.No.	Local body in the town of	Year of excess expenditure	Total Receipt	Total Expenditure	Amount by which the expenditure is more than receipt	Percentage of excess expenditure to total receipt
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1.	Kanker	1970-71	161,400	171,400	10,000	6.20
2.	Jagdalpur	1969-70	774,300	872,700	98,400	12.71
		1970-71	908,300	1,008,800	100,500	11.06

Column 7 of the above table would show that the percentage of excess expenditure to total receipts of the local body of Jagdalpur for the year 1969-70 and 1970-71 is more than ten. This is mainly due to substantial expenditure under heads connected with public utility works and general administration.

Receipts through taxes, etc. have also shown, by and large, an upward trend during these years except that there is a shortfall of Rs. 1,000 in the receipts of the local body of Jagdalpur in the year 1970-71.

The total receipts of the local bodies have also shown an upward trend except that there is shortfall in the receipts of the local bodies of Kanker and Jagdalpur in the years 1970-1971 and 1969-70, respectively.

Government grants have substantially supplemented the receipts of the local bodies. Loan has not been obtained by any local body.

The per capita receipts and expenditure under broad head is as indicated in the inset table below :-

Class of town	No. of town	Year	Per capita (in rupees)						
			Receipt			Expenditure			
			Total Receipt	Receipt through taxes etc.	Receipt from all other sources	Total expenditure	Expenditure on Public Health Conveniences	Expenditure on Public Institutions	Expenditure on all other aspects
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Class I 100,000 & over	...	...	...	...	...	...	...	...	...
Class II 50,000-99,999	...	...	...	...	...	...	...	...	...
Class III 20,000-49,999	1	1968-69	26.00	81.75	7.25	23.84	11.42	1.32	11.10
		1969-70	24.70	20.49	4.21	27.84	13.56	1.61	12.67
		1970-71	28.98	20.45	8.53	32.18	13.16	1.77	17.25
Class IV 10,000-19,999	...	...	...	...	...	...	...	...	...
Class V 5,000-9,999	1	1968-69	14.38	0.80	13.58	13.89	...	0.45	13.44
		1969-70	17.51	12.45	5.06	16.52	6.48	0.63	9.41
		1970-71	17.40	14.05	3.35	18.47	7.31	0.60	10.56
Class VI Below 5,000	...	...	...	...	...	...	...	...	...

The above table would show that the total per capita receipt matches fairly well with the total per capita expenditure and in some cases the total per capita expenditure is higher than the total per capita receipt. The per capita expenditure on Public Health and Conveniences as against per capita receipt through taxes, etc., is encouraging. In quite a good number of cases the expenditure of the local bodies shown in column 16 of statement No.III under head "Others", constitutes quite a high percentage of the total expenditure.

Note : Municipal Finance of Kirandul (Class V) town is not available due to its being project township.

Statement IV :—All the towns have electricity. Electric connections have also been given for industrial purposes. Street lights have also been provided in Kanker and Jagdalpur. It may be mentioned that in Kirandul the project premises have the facility of electricity. Water tap facility is available only in Kirandul and Jagdalpur. Firebrigade is not available in any town.

Statement V :— (i) *Medical facilities* :—State Government hospital facility is available in Kanker and Jagdalpur. Apart from hospital, Jagdalpur also has a Family Planning Clinic and a T.B. Clinic. The number of beds per thousand population is as indicated in the inset table below :—

Total No. of beds in Medical Institutions	No. of beds per thousands Population
(1)	(2)
154	3.1

(ii) *Educational facilities* :—Kanker has an arts and commerce college while Jagdalpur is served by a combind college which is located in Dharampura Village (L. C. No. 43/7/451) at a distance of about 3 kms. from the town. The village has been treated as an outgrowth of the town. Higher Secondary/High Schools are located in all the towns.

The number of higher secondary/high schools, middle schools and primary schools per thousand population is as shown in the following inset table. For a more realistic appreciation, the population in the age-group 0-14 has been considered for primary and middle schools, while population in the age-group 15-19 has been considered for higher secondary/high schools :—

Name of the town	Number per 1,000 population		
	Higher secondary or secondary	Middle	Junior secondary/ Primary
(1)	(2)	(3)	(4)
Kanker	3.0	0.2	0.7
Kirandul	1.5	...	1.05
Jagdalpur	0.9	0.2	1.1

(iii) *Recreational and cultural facilities* :—Cinema houses are only in Kanker and Jagdalpur towns. Similarly public libraries and reading room facility is available only in these two towns :—

Statement VI :—Kanker and Jagdalpur have bank facilities. Agricultural and non - agricultural credit societies are in Jagdalpur town, while only non-agricultural credit society is located in Kanker. There is no bank and credit society facility in the project town, Kirandul. Cloth, grain, sugar, cement, salt and kerosene oil are the main items of import in the towns, while paddy, wood and minor forest products are the main items of export from Jagdalpur town. Iron ore is the only important item of export from Kirandul. Tussar silk cloth and bell-metal articles are the items of local manufacture in Jagdalpur.

Statement VII :—About 63 percent of the urban population is in Jagdalpur town and it is followed by Kanker and Kirandul where the percentages are about 19 and 18, respectively.

Majority of the urban population follow hindu religion ; next come followers of Christian religion in Kirandul and Jagdalpur towns while in Kanker the percentages of people following Islam religion comes next. Town wise percentages of the population following different religions and percentage of Scheduled Caste and Scheduled Tribes is as indicated below :—

S. No.	Name of Town	Percentage of Religions								Percentage of Scheduled Caste	Percentage of Scheduled Tribe
		Buddhist	Christian	Hindu	Jain	Muslim	Sikh	Others	Religion not stated		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
1.	Kanker	...	1.07	86.40	1.51	10.83	0.19	...	...	3.91	13.10
2.	Kirandul	0.23	6.23	87.51	0.37	3.57	2.09	...	...	3.82	6.27
3.	Jagdalpur	0.15	6.69	82.67	2.88	6.11	1.50	...	...	4.13	8.06

There is no population following Buddh religion in Kanker. The percentage of the people following other religions is not very significant. The percentage of Scheduled Caste population is less than five in the towns. It is significant to note that though the district is mainly tribal, the percentage of Scheduled Tribes in Kirandul and Jagdalpur towns is less than 10 while in Kanker the percentage is only about thirteen.

PRIMARY CENSUS ABSTRACT

PART X(B)

EXPLANATORY NOTE

I. General

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961–71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex–ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households have been discussed.

II. Population

The population of Bastar district is 1,515,956 while the population of Madhya Pradesh is 41,654,119. The population of Bastar district, thus comes to 3.64 percent of the State population. The rural population is about 96 percent of the district population whereas the urban population is 3.74 percent as against the State percentage of 16.29. In other words, the district is highly rural in character. Highest percentage of the district population is found in Jagdalpur tahsil (about 28 percent) and the reasons for this are that (i) the number of bigger-size villages according to population is, comparatively, more in this tahsil, although the total number of villages is less than Narayanpur and Bijapur tahsils and (ii) the population of Jagdalpur town is included in this tahsil. Bastar district ranks 5th among the 43 districts of the State in population. During the decade 1961–71, the district population-growth-rate has been 29.85 as against the State growth-rate of 28.67. The area of the district is 39,060 sq.km. In other words, it has 8.82 percent of the total State area and ranks first in area among the district of the State. As a matter of fact it is bigger than the State of Kerala in area. The density of population per sq.km. of the district is 39 against the State density of 94 and the district ranks last (43rd) in density in the State. The sex-ratio, number of females per 1,000 males, of the district and the State is 997 and 941, respectively. Tahsils Kanker, Bijapur, Jagdalpur and Konta have got sex-ratio higher than the district sex-ratio, while the remaining tahsils have lower sex-ratio.

III. Literacy

1. The percentage of literacy in the district comes to about 10 as against the State literacy percentage of about 22. In 1961 also, the literacy percentage of the district (6.91) was lower than the State percentage of (17.13). The district, however, has made some progress to increase the rate of literacy during the decade 1961-71.

2. The literacy percentage among the males in the district (15.17) is lower than the State percentage of about 33. Among females also, the literacy percentage in the district (4.07) is lower than the State percentage of about 11.

3. Among the tahsils, Kanker tahsil has the highest literacy percentage of about 17.50, while Konta tahsil has the lowest percentage of about 3.

4. The same pattern is seen in male literacy in the tahsils. Among males, Kanker tahsil is at the top (about 29 percent) , while Konta tahsil with about 5 percent comes last. Among females, Narayanpur tahsil leads in literacy (about 8 percent), while Konta tahsil with 0.87 percent comes last.

IV. Workers

In the district, about 36.69 percent of the population comes under the category of workers (main activity) as against the State percentage of about 37. The percentage of female workers to total female population (about 16) is lower than the State percentage (about 19). Within the district, comparatively, greater percentage of workers (males and females) have been returned from Dantewara tahsil. Bhanupratappur tahsil has returned the lowest percentage of workers (25.64). Among female workers, Kanker tahsil with 28.30 percent leads other tahsils of the district, while Bhanupratappur tahsil with 8.63 percent comes last. Among the workers in the district, about 67 and 22 percent are cultivators and agricultural labourers, respectively as against the State percentage of about 53 and 27. Under the category "other workers", the district percentage (about 11) is less than the State percentage of 20.58. Among females the district percentage of agricultural labourers (about 40) and other

workers (about 8) is less than the State percentage of about 49 and 10, respectively, while for cultivators the district percentage (about 52) is higher than the State percentage (about 41). Comparatively, highest percentage of cultivators (about 79) has been returned from Konta tahsil, while Kanker tahsil has returned highest percentage of agricultural labourers. Lowest percentage of cultivators (about 55) and agricultural labourers (about 9) have been returned from Kanker and Dantewara tahsils, respectively.

V. Scheduled Caste and Scheduled Tribe

The percentage of Scheduled Castes to total population of the district (about 3) is less than the State percentage (about 13). The percentage of Scheduled Tribes to total population of the district (about 68) is significantly higher than the State percentage (about 20). Highest percentage of Scheduled Castes (6.25) is in Bhanupratappur tahsil, while lowest percentage (2.03) is in Dantewara tahsil in the district. As regards population of Scheduled Tribes, highest percentage (85.15) has been returned from Konta tahsil, while lowest percentage (55.38) is in Narayanpur tahsil.

VI. Occupied Residential Census Houses

The district has 256,151 occupied residential Census Houses against the State figure of 6,822,767 which comes to 3.75 percent. During 1961, there were 208,670 occupied residential Census houses in the district against the State figure of 6,230,854 which came to 3.35 percent. There has been very slight change in the percentage during the decade. The number of households and persons per occupied residential Census house in 1961 and 1971 are indicated below :—

State/ District	Year	No. of residential Census houses	No. of households	No. of households per occupied residential Census house	No. of persons per residential Census house
(1)	(2)	(3)	(4)	(5)	(6)
State	1961	6,230,854	6,615,580	1.06	5.2
District	1961	208,670	211,686	1.01	5.6
State	1971	6,822,767	7,740,289	1.13	6.1
District	1971	256,151	273,413	1.07	5.9

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Jagdalpur tahsil (with about 28 percent) claims the highest percentage of occupied residential Census houses in the district.

VII. Villages and Towns

There are 3,683 villages in Bastar district which comes to 4.78 percent of total villages in the State. The percentage of inhabited villages to total villages in the district is 91.99 against the State percentage of about 92. There are 250 towns in the State out of which the district claims three—Kanker, Jagdalpur and Kirandul.

(3) Town treated as such for the first time in 1971 Census is printed in italics.

(4) The total area figure given for the district is provisional 'Geographical Area' as supplied by the Surveyor General of India.

(5) The urban area figures have been supplied by the local bodies.

(6) The rural area of the district has been derived by subtracting the urban area figures supplied by local bodies from the total area figure of the district.

(7) Total area figures of tahsils are according to village papers as supplied by the Director of Land Records, Madhya Pradesh. Tahsilwise area figures exclude 18,043.7 Km^2 of forest area in the district since tahsilwise break-up is not available.

VILLAGE DIRECTORY

ABUJHMAR

A B U J H M A R

by

DR. H. C. JAIN

Tabulation Officer, Office of the Director of Census Operations, Madhya Pradesh.

Geographical Setting

A little known and comparatively inaccessible tract of Madhya Pradesh, the Abujhmar or Marh, as it is conveniently referred to, extends over 3 tahsils Narayanpur, Bijapur and Dantewara of Bastar district. Roughly speaking, it comprises all the wild, hilly country bounded on the south by the Indrawati, on the north by the plains of Antagarh and Narayanpur, on the east by the country of Johrias and the valley of the Gudra river and the west by the Kotri river from Pratappur to its junction with the Indrawati. The tract extends in west beyond the borders of Bastar district into Chanda (now renamed as Chandrapur) district of Maharashtra State.

The exact boundaries of this area are not correctly definable as it has not been fully surveyed and there is a lot of confusion and dispute about the inclusion or exclusion of certain villages specially those located near the border. With these limitations, Shri Noronha[1] has roughly estimated the area to be stretching in 1,500 sq. miles (3,905 sq. km). The area is roughly rectangular in shape but in the north eastern corner two great spurs are thrown into the plains of Antagarh by Rawghat and Kolar and on its north western corner by hills between Pratappur and Koilibeda. The Abujhmar tract is situated approximately between latitudes 19°N and 20°N and longitudes 80°E and 81°E.

Physiography

The Abujhmar, consisting of hills and valleys in all the directions, is a extensive mass of hills having no regular system. The names of villages and location given on Topo Sheets are different from those which exist now. This is because of the prevalence of *penda* cultivation (a form of shifting cultivation), many of the settlements are periodically deserted and new ones with new names are established. This has further increased the difficulty to describe the physiograpy correctly of this tract. The eastern part of the Abujhmar is, in general, higher than the western part. The average altitude of the area is 2500′ to 3000′. Plain ground is found in the northern side. The highest point (3,322′) as has been reported by Dubey[2] in annexure II is about 8 miles north-north-west of the confluence of the Gudra and the Baordig. The adequate description on the basis of topo sheet is not possible as heights on the contours is not indicated and village names do not tally. It would be useful to quote here from the tour diary of late Shri Pawar, a former Collector of Bastar.

"From the starting point, Pangur, we had to climb a very steep range of about 1,000 feet and then we descended into the valley of the river Nibra. From Wadapenda, we again ascended continuously right up to Kutul. At many places the climb was very steep. From Kutul to Adeq, the journey was over a plateau like a terrain sloping gradually eastward. From Adeq we were again descending upto Alwada and from here, the climb again started. It was a continuous climb, ranges after ranges, sometimes climbing down into small valleys or rivulets. We found ourselves at highest points of our journey between Botter and Murumwada. From here we then finally climbed down in the plains of the river Indrawati."[3]

Etymology of the land

Nothing definite can be said about the etymology and origin of the term 'Abujhmar'. A layman's interpretation of the term in hindi may be the

1. The Abujhmarhias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 67.
2. Census of India, 1961, District Census Handbook, Bastar District, 1964, page lxvii.
3. A Report on Abujhmarh, Tahsil Narayanpur, District Bastar by Shri S. B. Pawar published in the Abujhmarhias, Socio-Economic Aspects of a Little known Culture, Tribal Research Insttitute, Cnhindwara, 1963, page 25

'Unknown Highland' (Abujh meaning unknown and highland for Mar). If this interpretation is correct then it is clear that the name has been given to the land not by the Marias, the principal tribe of the tract but by the neighbourers. The Hill-Marias refer to their land as *Metabhum* meaning a high land.

Villages

In the Abujhmar hills agricultural conditions determine village-sites. When the *kaghai* (*penda* slope) is exhausted, it is given up and a new site selected and the *paghal* (village) also shifts together with this. If there are a number of *kaghai* (*penda* sites) and supervised from the village, then the village may remain on that site for a number of years. No hard and fast rule can be laid down for the duration of a village site which may be from 5 to 10 years.

In the Abujhmar, hill-tops or rockey slopes are favourable sites. Availability of enough forested land for shifting cultivation is the main consideration for selecting a site for the village. The village sites are also abandoned for superstitions in addition to agricultural conditions viz., out-break of some epidemic and menace of a man eating-tiger. The selection of the village-sites is done in consultation by the villagers by themselves, however, the Waddai, priest of the clan god and kasyeq Gaita, hereditary priest of the village, are also consulted and their decision is final. Shri Naronha[4] rightly observed in his tour diary that the Abujhmar is split up between villages by common consent and convention leaving nothing for Government. New settlements not only shift sites but are also often given new names and this is the reason that Shri Naronha[5] discovered during his tours in the Abujhmar that Survey of India map is quite bogus as far as the Abujhmar is concerned. It may be mentioned here that village-sites are sometimes changed within one or two miles within a particular forested land and this change may be for two or three times and the cultivation is managed without changing the name of the village. When the village shifts, the old settlement is left as it is and only household goods are removed leaving houses allowed to remain undisturbed.

There are in all 209 villages in the Abujhmar, 177 of which are inhabited on the reference date of Census enumeration i.e., 1st April, 1971. The uninhabited villages have no meaning due to changing-pattern of the sites of villages and their names and also majority of these are unsurveyed ones having no village records. It may be mentioned that the number of villages relates to a particular time i.e. 1st April, 1971 and the tahsil-wise number of villages was as below :—

Tahsil	Total number of villages	Number of	
		Inhabited villages	Uninhabited villages
1	2	3	4
1. Narayanpur	164	137	27
2. Bijapur	37	32	5
3. Dantewara	8	8	...
Total	**209**	**177**	**32**

Layout of villages

In the Abujhmar, the traditional arrangement is a street between parrallel lines of long houses. If a flat ground is available then the layout is generally of a horse-shoe pattern. There is no *baris* (kitchen gardens). The villages usually have a common and separate menustruation-hut know as *dola-lon* or *pedawa 'ghai*[6], the door of which always opens away from the village. This is also used for child delivery. The *lonu* (seed store) of the households are not inside the houses but they are built out of the village. In the areas where there is menace of wild animals, the villages have strong fencing all around. The pattern of houses has been described by late Shri Pawar[7] in the following words.

"The constructions of houses are not according to any set pattern. If a flat ground is available, then the lay out is generally of a horse-shoe pattern with Ghotul in the centre. Sometimes the layout of structure of houses with a broad street running in the centre is also found; in some places, because of the menace of wild animals, the whole village

6. Census of India, 1961, District Census Handbook, Bastar District, 1964, page lxx.
7. A Report on Abujhmarh, Narayanpur Tahsil, District Bastar, by late Shri S.B. Pawar. published in the Abujhmarhias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 31.

has a very strong fencing of bamboo, which is difficult to break down even for a wild buffalo..... The house in *Khalpati* have the usual tribal pattern in the district. Each house has a fairly big size *badi*, but in the hills no *badis* are provided as every food is grown only in *penda*. Here all the houses are clustered together, but the whole village is kept very clean. The houses also have no set pattern. The size is according to the needs of the family. They are on an average length of 15 to 20 and about 10 feet in width, with a height of 4 to 5 feet. The rooms are usually in rows, with *augli*, verandah in the front, followed by *age*, sleeping room of the husband and the sons and then *angadi* the kitchen as well as sleeping room for the wife and daughters and *lonu* and *hala* at the back. Where there is a common menstruation hut, no *hala* is provided in the house. *Lonu* has provision for storing grain, forest produce etc.'

The layout of the villages in Abujhmar has somewhat differently been reported by Grigson in his 'The Gonds of Bastar' than that of Pawar. He says[8], "The traditional arrangement is a street some twenty five yards wide between parallel lines of long houses; at one end of the street is the *gotul-lon* or village dormitory.....and sometimes in front of this dorimtory will be seen the *udam-garia* or seat of honour of the *kaseq-gaita* possibly also of the secular headman (*gaita* or *peda*) as well as the stones on which the other village elders sit around with them in conclave..... There is as a rule no *bari* (vegetable garden) attached to each house as amongst most Gonds including the Bison-horn Marias and Murais."

But this traditional arrangement is not always found and once set up on these lines may be built on another pattern when shifted to another site. This feature is more commonly seen in the southern area.

It may be of some use to mention here the terms for different parts of a house in the Abujhmar. The names for different parts of a hill Maria house are as below :—

Agli or *Augli*	- Verandah
Agha or *Age*	- Husband's living and sleeping room
Alpanji	- Sleeping plateform in *agha*
Andgi or *Angadi*	- Kitchen and sleeping room for wife and daughters
Lonu	- Seed Store
Hala	- Menstruation room
Dola-lon Pedawa ghai	- Common and separate menstruation hut for the village
Gotul-lon	- Village dormitory

In some big villages there are resting huts, known as *paik-gotul* or *kos-gotul* for the use of travellers and visiting officials.

Paik-gotul or *kos-gotul* (village rest house) & *Ghotul*, a recreational centre being special features are being described below in some details :—

Paik-gotul or *kos-gotul* :— It is a village rest house, constructed and maintained by the villagers. It is recognised by different names in different tribal areas viz., *thana-gudi* or *chavidi*[9] except in Abujhmar area of Bastar district, *gudi-ghar*[10] in Surguja district and by a similar name in Raigarh district. It is a one room structure with mud walls on 3 sides and thatched roof, the fourth side remaining open. Sometimes a partition of the room is made by leaf-thatching so as to make a open verandah or a separate kitchen. It is rectangular in shape.

Ghotul is a recreational centre, an elaborate scheme of co-education and training, a home of tribal religion and tradition and a dormitory where the unmarried youths and maidens pass there nights. In the Culture Studied[11] (A Socio-Economic Survey of Abujhmar) by the Tribal Research Institute, Chhindwara, the term for *Ghotul* is given as *Kos-Ghotuli* and it hos been observed that the unmarried boys of the village sleep in this house. However, Shri Noronha[12] observed in his tour diary about the *Ghotul*, "Boys sleep there purely because there is no

room at home. No dancing and no communion with the other sex." He further mentions[13] "Abujhmarhia is sensitive about his Ghotul. First says, only boys sleep in it, then admits that girls go occasionally but stoutly denies they sleep there. They don't-but human nature same here as elsewhere and *that happens which happens.*" It is an empire owned by the children where no adults are permitted. A leader separately for boys and girls is elected. These two guide and control the activities of boys and girls. The *Ghotul* is a well knit organised institution based on democratic principles. Shoobert[14] says, "All dormitory boy officials are choosen by a panchayat of all the boys and girls. The senior boys always hold office." It is a large hut beautifully decorated in a picturesque place at the outskirt of the village or in the centre of the village. The aspects of *Ghotul* life are varied. It is only in the evening and nights that there is a rhythm in the *Ghotul.* The discussions take place on different matters and activities for the next day. The *Ghotul* officials are little more than prefects and monitors who teach the younger ones the theory and practice of the things, they will have to perform when they grow old. It is a preparation and training for the home and social life. This includes braiding rope, thatching a house, cutting a tree, preparation of fields, propitiating the gods and revering their ancestors and elders.

The constant association of young people force them to devise many forms of entertainment which include wits and games. Dancing is learnt in the *Ghotul* by imitation. They pick it up by instinct. The *Ghotul* life teaches the boys the way of corporate existence, of cooperation, removes jealousy and sense of ownership and the girls learn the ways of keeping a house clean to serve the society.

Size of villages

In the Abujhmar, the size of village is small. About forty-one percent of the villages in Bijapur tahsil and about 40 percent in Narayanpur tahsils are those having a population of 50 persons or below, while in Dantewara tahsil there is no village in this population range. About 36 percent of villages in Narayanpur tahsil, 31 percent in Bijapur tahsil and 38 percent in Dantewara tahsil have population of 100 persons or below. Between the population range of 101 to 200 persons, 17, 25, and 25 percent of villages are in Narayanpur, Bijapur and Dantewara tahsils, respectively. In all, there are 8 villages having population more than 250, out of which 7 are in Narayanpur tahsil, the remaining one is in Dantewara tahsil.

The number of the Abujhmar villages, tahsilwise according to size groups is shown in the table below :—

Size group of villages	Total inhabited villages	Number of villages in		
		Narayanpur tahsil	Bijapur tahsil	Dantewara tahsil
1	2	3	4	5
Less than 10	1	1	...	...
11 — 20	11	9	2	...
21 — 30	14	11	3	...
31 — 40	20	18	2	...
41 — 50	22	16	6	...
51 — 60	19	15	3	1
61 — 70	16	12	2	2
71 — 80	16	13	3	...
81 — 90	5	4	1	...
91 — 100	7	6	1	...
101 — 150	22	15	5	2
151 — 200	11	8	3	...
201 — 250	5	2	1	2
More than 250	8	7	...	1
Total	**177**	**137**	**32**	**8**

The villages having population more than 250 persons with their particulars and population is given below :—

Tahsil	Name of village	L.C. No.	Population		
			Persons	Male	Female
1	2	3	4	5	6
Narayanpur	1. Kamteda	120	268	148	120
	2. Partapur	125	658	351	307
	3. Kohkameta	433	467	243	224
	4. Jharawahi	458	258	125	133
	5. Orcha	475	352	184	168
	6. Aadermad	571	325	155	170
	7. Kudmel	572	270	140	130
Dantewara	8. Hitawada	8	307	159	148

13. Abujhmarh Diary of R.C.V.P. Noronha published in the Abujhmarhias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 18.

14. Census of India, 1931, Vol. XII, Central Provinces & Berar, Part I, Report, page 414.

Occupied Census Houses and Households

There are 2,868 occupied census houses and 2,939 households in the Abujhmar. The tahsil-wise details are given below :—

Tahsil	No. of occupied census houses	No. of households
1	2	3
Narayanpur	2,163	2,206
Bijapur	481	505
Dantewara	224	228
Total	2,868	2,939

The number of households per occupied census house are found less in rural areas than in the urban areas and in Abujhmar tract it is, comparatively, less than the rural areas of Bastar district and those of the tahsils in which this tract is spread which may be apparent from the following table :—

	Households per occupied census house
1	2
Bastar district	1.07
Rural	1.06
Urban	1.16
Narayanpur tahsil	1.05
Bijapur tahsil	1.03
Dantewara tahsil	1.07
Rural	1.05
Urban	1.35
Abujhmar	1.02

The number of households per occupied census house in the Abujhmar (1.02) is much less than the State average (1.12). The low average of households per occupied house is mainly due to construction of a separate house by a boy as soon he gets married and stays separately.

In almost all the occupied census houses, one household is living except in 14, 8 and 1 villages in Narayanpur, Bijapur and Dantewara tahsils respectively, in which more than one households are living in a occupied census house. The tahsil-wise details of such villages are given below :—

Tahsil	Name of village	L.C. No.	No. of occupied Census houses	No. of households	Population
1	2	3	4	5	6
Narayanpur	(i) Mangbeda *alias* Musfarsi	108	6	7	60
	(ii) Kamteda	120	42	46	268
	(iii) Kanagaon	177	23	24	130
	(iv) Kundla	206	12	13	64
	(v) Konje	270	21	23	143
	(vi) Ranimarka	274	9	10	54
	(vii) Kodonar	275	12	14	76
	(viii) Konge	276	11	12	66
	(ix) Binagunda	282	11	15	60
	(x) Kohkameta	433	84	85	467
	(xi) Basing	435	11	12	75
	(xii) Dhuta	459	7	9	51
	(xiii) Orcha	475	67	77	352
	(xiv) Kodoli	654	27	29	124
Bijapur	(i) Tadwada	289	13	14	54
	(ii) Padmeta	290	15	16	79
	(iii) Dodimarka	291	17	20	79
	(iv) Murumwada	293	30	34	191
	(v) Jatlur	295	27	35	173
	(vi) Lekwada	298	23	26	135
	(vii) Komhu	299	17	18	88
	(viii) Tahkawada	302	9	10	42
Dantewara	(i) Kodokal	3	9	13	70

It can safely be said that in the Abujhmar area, not more than 2 households per occupied census house are found as the highest number of households are in Orchha L.C. No. 475 (77 against 67 occupied census houses) in Narayanpur tahsil and in Jatlur, L.C. No. 295 (35 against 27 occupied census houses) in Bijapur tahsil. The population of these villages are 352 and 173 respectively. In Partapur village (L.C. No. 125) in Narayanpur tahsil, the population of which is the highest (658) in the villages of

Abujhmar area, there are 105 households, similar to those of occupied census houses in the village.

Dubey[15] says, "Hill Maria villages are inhabited almost cent precent only by the members of this tribe save for a household or two of Rawats and Kalars in bigger settlements". Dr. Jain[16] added more details of a Maria settlement in his thesis and says, "A village in Abujhmar consists of a number of families related by blood or marital ties. In most of the cases, however, the villages in Abujhmar are still uni-clan villages and the relation of marital ties is found in those villages which have entered the stage of multi-clan ones." The Abujhmar thus have mainly Hill Maria's households, which can be explained from the table showing the number of clans in village surveyed by the Tribal Research Institute, Chhindwara.[17]

Sl. No.	Marh	Village	No. of clans	Total No. of families
1	2	3	4	5
1	Orchha	Thonda Beda	1	19
2	,,	Mundali	2	10
3	,,	Jurweda	1	18
4	,,	Gunya Beda	4	20
5	,,	Gudali	1	20
6	,,	Kodali	1	5
7	,,	Orchha	3	40
8	,,	Doolur	2	30
9	Kohkameta	Pareyadi	1	10
10	,,	Pangur	1	15
11	,,	Konge	4	8
12	Kutru	Murumwada	1	24
13	,,	Karagul	2	14
14	,,	Padameta	2	6
15	,,	Lauka	2	18
16	Barsur	Thoinar	3	15
17	,,	Hikul	4	15
18	,,	Paralnar	3	12
19	,,	Hitawada	4	25

The above survey has been conducted in the Abujhmar area of all the three tahsils:—

Narayanpur, Bijapur and Dantewara, and Orchha and Kohkameta Marhs are from Narayanpur tahsil. Kutru and Barsur Marh are from Bijapur and Dantewara tahsils, respectively. Out of the above 19 villages, 37, 26, 16 and 21 percent villages have 1, 2, 3, and 4 clans each, respectively. The number of uni-clan villages is the highest in the above 19 villages.

The People

It is an established fact that the Hill Marias are the main tribe concentrated in the Abujhmar and nearly cent percent population of the Abujhmar is of this tribe. On the basis of the meaning of word Mar, Hislop interpreted Maria as meaning 'man of the woods' The term Hill Maria is an anthropological makeshift and is not the term by which the tribe is known or refers to itself. The name by which the tribe calls itself is Meta Koitor or simply Maria. Hislop[18] says, "This term (Koitor), in its radical form is Koi, occurs over a wide area, being the name given to the Maria-sacrificing aborigines of Orrissa and to the jungle tribes skirting the east bank of the Godavery, from the apex of the delta as far up nearly as the mouth of the Indrawati. Its meaning is evidently associated with the idea of a hill".

Similarly, in the Chanda[19] Settlement Report it has been mentioned that the Koiturs are indentical with the Marias and this is born out by the distribution of the tribe, as all along the border of that part of the Bastar State which is the stronghold of the Maria race.

The name by which this tribe is referred to in the Scheduled Castes and Scheduled Tribes Lists (modification) Order, 1956, is Hill Maria. This term Hill Maria is purely anthropological makeshift devised by Grigson and it has come to stay in anthropological literature but, as said earlier, it is necessary to remember that the people do not refer themselves by this term. They refer themselves simply as Maria or as Meta Koitor (meaning the Highland Gonds).

Appearance

The Hill Marias are both shy and friendly, an attractive people. Hutton, in his foreword to Grigson's *The Maria Gond of Bastar*[20] stated "there is a slight but definite Mongoloid element" present in the Marias and culturally the parallels afforded by

19. Quoted in Census of India, 1891, Vol. XI, Central Provinces Part - I, page 197.
20. Grigson, W.V. The Maria Gonds of Bastar, Revisededition, 1949.

the Mari Gond are often interesting and suggestive... Some of them are definitely reminiscent of the tribes farther south in the Peninsula". In this regard, Shri Noronha's[21] observations are extremely valuable. He noticed three distinct racial types in the Abujhmar. He says Abujhmarhias differ widely in appearance from red bronze almost Caucasian type, through very dark symmeterical Dravidian type to absolute primitive Bushman type... Provisionally, judging by what I have seen, Abujhmar population consists of three different elements, reddish-brown, Caucasian or Aryan type, black symmeterical Dravidian and Australoid Bushman type. The original must have been Bushman who was squeezed into centre of Marh by successive waves of outsiders of two other types. At present I would say Bushman type is 20 percent with the remaining equally divided between other two. Naturally there is plenty of mixture but in spite of it, the three types still stand out".

However, these observations would need confirmation by detailed anthropological and anthropometrical research. Till that is done, we have no other information, except the observations quoted above, on the autochthonous elements of Abujhmar.

Robertson[22] quoted the description of this tribe from Colonel Glasfurd report on Bastar:—"They inhabit the densest jungles and are a shy race, avoiding all contact with strangers and flying to the hills on the least alarm". This observation of Glasfurd does not hold good at present. They are both shy and friendly. In general appearance, a Hill Maria is like any other tribal of the district, but there are certain distinctive features by which he can be always identified as a Hill Maria. The average height is 5'.8". He is hard skinned but has peculiar reddish copper complexion. They are in general cheerful, honest and extremely generous people. Both men and women wear only a piece of loin cloth. Young girls also do not cover their breasts with cloth. They are, however, very fond of neckless of beads which almost covers their breast.

Demographic aspects

Population

During the sorting of 1961 Census slips, a separate operation was carried on for Abujhmar after the main sorting was over. Prior to this the population of the Abujhmar has never been separately ascertained. A similar operation like that of 1961 Census has been carried out in this Census to ascertain the population of the Abujhmar area. The population of the Abujhmar area as per above operation in 1961 and 1971 is 12,229 and 15,227, the growth-rate being 24.51 percent against the district growth-rate of 29.85 percent.

As per Census of India, 1961, Glossary[23] on Scheduled Tribes of Madhya Pradesh, the population of Hill Marias was returned only 5 persons in 1961. The population of 1971 Census of Hill Marias is neither available at present nor it will be separately tabulated as it will be clubbed under the Gonds with other sub-tribes of the Gonds as per Scheduled Castes and Scheduled Tribes Lists (Modification), Order 1956, Grigson had estimated the population of the Hill Marias as 11,500[24] in 1931 and Elwin estimated them to number about 13,000[25] in 1942. It has been mentioned in the District Census Handbook, Bastar district 1961, at page lxxi that excluding the non-Maria population from 1961 Census figures and treating the Gonds as Marias, we have 11,533 Marias in Abujhmar. Grigson's estimate of Hill Marias was 11,500. In 30 years therefore, the population of Hill Marias seems to have remained static. If considering the Scheduled Tribes population (14,433) of the Abujhmar of 1971 Census as that of Hill Marias which is not the factual position, the growth-rate comes to 25.5 precent in 40 years, somewhat similar to that of the Abujhmar (24.51 percent) between 1961-1971, There can be more than one causes for static population of the Hill Marias.

One of the causes may be that birth and death rates in Hill Marias are equal. It has been mentioned in the District Census Handbook–Bastar district,

21. Abujhmarh Diary of Shri R.C.V.P. Noronha, published in Abujhmarias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, pages 10 to 15.

22. Census of India, 1891, Vol. XI, Central Provinces Part I, page 198.

23. Dubey, K. C. Census of India, 1961, Glossary on Scheduled Tribes of Madhya Pradesh, 1969, page 22.

24. Quoted in Census of India, 1961, District Census Handbook, Bastar District, page lxx.

25. Ibid, page lxx.

1961 at page lxxi that some of the tribes in the eastern and south-eastern parts of the State have low fertility and the Hill Marias seem to be one of these. Shri Noronha[26] observes in his tour diary"; Incidentally find that fertility amongst Abujhmarhias is very low even for aboriginals (where it is lower than elsewhere). Childless marriages are frequent and where there are children, the number is not more than 2 or 3 per family".

The above observations of Shri Noronha does not hold good as per 1971 Census data. The average persons per household, comes to 5.3. The persons per household, however, are comparatively, less than those of the Bastar district (5.9) and Madhya Pradesh (6.1). The average persons per household in different size-groups of villages are given in the following tables:—

Size-group of villages	No. of villages	House-holds	Popula-tion	Persons per household
1	2	3	4	5
Below 50	64	408	2,000	4.9
50 — 99	67	882	4,587	5.2
100 — 199	33	891	4,617	5.2
200 — 499	12	653	3,365	5.2
500 and above	1	105	658	6.3
Total	177	2,939	15,227	5.3

It would be seen from the above table that the persons per household in the Abujhmar are minimum (4.9) in the smallest size-group (below 50 persons) and it is higher (6.3) than Bastar district average (6.1) in biggest size-group of villages. However, it may be mentioned that there is only 1 village in this size-group (500 and above persons) biggest in Abujhmar and that is, Partapur (L.C. No. 125) in Narayanpur tahsil.

Density

The exact area of the region is not available and as such density of population cannot be correctly calculated. Only rough idea can be had from the population (15,227) and the approximate area of the region (3,905 sq. km) as mentioned in Geographical setting of the region. The approximate density thus comes to 4 per sq. km. as against Bastar district (39) and Madhya Pradesh (94).

Sex-ratio

The sex-ratio (i.e. the number of females per 1,000 males) in the Abujhmar is 977 as against 959 in Narayanpur tahsil, 1,003 in Bijapur tahsil, 977 in Dantewara tahsil, 997 in Bastar district and 941 in Madhya Pradesh. Ignoring the sex-ratio exhibited in Narayanpur tahsil (which may have become so low because of Dandkaranya Project) it appears that Abujhmar is situated in the area of high sex-ratio.

As is well known, the tribal societies generally have a high sex-ratio, i.e. the number of females per thousand males. What the exact reason for this phenomenon is, fall outside the scope of the present note. But it is a matter of research why inspite of a higher sex-ratio the tribal societies have the system of bride-price. Even otherwise the women in those societies enjoy a position that is denied to their sisters elsewhere. The women in tribal societies are not treated as drudges but they enjoy considerable freedom in the choice of mate and also divorce and remarriage. Because of the system of a bride-price, marriage is an economic proposition and if the regularly married wife runs away, it proves to be an economic catastrophe for the man. The sex-ratio in different size-groups of villages of the Abujhmar is indicated in the following table :—

Size-group of villages	No. of villages	Males	Females	Sex-ratio per 1,000 males
1	2	3	4	5
Below 50	64	1,020	980	961
50 — 99	67	2,324	2,263	974
100 — 199	33	2,307	2,310	1,002
200 — 499	12	1,700	1,665	979
500 and above	1	351	307	875
Total	177	7,702	7,525	977

The above table indicates that the sex-ratio (females per 1,000 males) in the lower size-groups of villages is less and it increases with the size-group of villages with the exception that it decreases again in the population group beyond 200 and the lowest sex-ratio is found in the size-group 500 and above in which there is only one village: Partapur (L.C. No. 125) in Narayanpur tahsil.

The tahsil-wise sex-ratio (females per 1,000 males) of the villages of the Abujhmar is indicated in the

26. Abujhmarh Diary of Shri R.C.V.P. Noronha published in the Abujhmarhias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 9.

following table:—

Sl. No.	Tahsil	No. of inhabited villages in Abujhmar	Abujhmar area		Sex-ratio in Abujhmar	Sex-ratio in tahsil
			Males	Females		
1	2	3	4	5	6	7
1	Narayanpur	137	5,864	5,714	970	959
2	Bijapur	32	1,262	1,231	975	1,003
3	Dantewara	8	576	580	1,007	977
	Total	177	7,702	7,525	977	977

It is found from the above table that the sex-ratio (females per 1,000 males) of the Abujhmar region of Narayanpur and Dantewara tahsils is higher than that of these tahsils, while it is low than that of Bijapur tahsil.

Literacy

The percentage of literacy in the region comes to about 2 only as against the Bastar district literacy percentage of about 13 and that of Madhya Pradesh about 22. The literacy percentage in Narayanpur, Bijapur and Dantewara tahsils is about 15, 6 and 6, respectively.

The percentage of literacy in different size-groups of villages is shown in the following table:—

Size-group of villages	No. of villages	Persons	Literates	Literacy percentage
1	2	3	4	5
Below 50	64	2,000	5	0.25
50 — 99	67	4,587	15	0.33
100 — 199	33	4,617	84	1.82
200 — 499	12	3,365	124	3.68
500 and above	1	658	113	17.17
Total	177	15,227	341	2.24

The above table shows that the rate of literacy increases with the size-group of villages and it can be generalised that the larger the village, larger the rate of literacy. In size-group 500 and above, there is only one village, Partapur (L. C. No. 125) in Narayanpur tahsil and the literacy rate of this village is 17.17 percent.

The literacy rate in 1961 and 1971 in the Abujhmar area as a whole and in the areas of different tahsils is given in the following table :—

Tahsil	Literacy rate	
	1961[27]	1971
1	2	3
Abujhmarh area as a whole	0.7	2.24
Abujhmar area in different tahsils		
Narayanpur	0.8	2.83
Bijapur	0.002	0.44
Dantewara	0.0	0.25

The above table would show that the Abujhmar region as a whole and the area of different tahsils have made attempts to increase the rate of literacy during the decade 1961-71.

The rate of female literacy in the Abujmar region is insignificant. It is only 0.45 percent as against the Bastar district (4.07) and Madhya Pradesh (10.92).

Educational Facilities

The educational facilities in the region are very meagre and those available in only 11 villages out of 177 inhabited villages are given in the following table :—

Tahsil	Village	L.C. No.	Number of	
			Primary school	Middle school
1	2	3	4	5
Narayanpur	Kamteda	120	1	...
	Partapur.	125	1	1
	Kachhapal	176	1	...
	Kohkameta	433	1	...
	Murhar	438	1	...
	Irakbhatti	456	1	...
	Nednar	491	1	...
	Gummarka	597	1	...
Bijapur	Lanka	288	1	...
	Murumwada	293	1	...
Dantewara	Handawada	7	1	...
Total			11	1

The educational facilities in the Abujhmar are available in 11 villages out of 177 villages of the region, which comes to only about 6 percent of the villages. This percentage of about 6 is very low as against about 36 percent of the villages of Bastar

27. Census of India, 1961, District Census Handbook, Bastar District, 1964, page lxxvi.

district. It is interesting to note that there is only one literate in village Murumwada, L.C. No. 293 in Bijapur tahsil although there is a primary school in the village. The data as regards educational institutions was collected in the year 1969, while the enumeration was conducted in March-April 1971 in which the data as regards the literates was collected. It is surprising that in the lapse of about 2 years time, none of the 191 persons in the village could be made literate and the literate person in the village may probably be the teacher of the school himself.

The following table shows the number of villages having educational institutions in different distance ranges from the nearest urban centre.

Distance range from the nearest urban centre in Abujhmar region	No. of villages having educational facilities			
	Narayanpur	Bijapur	Dantewara	Total
1	2	3	4	5
Below 50 km.	...	...	...	...
51 — 100 km.	6	...	...	6
101 — 150 km.	1	...	1	2
151 — 200 km.	1	1	...	2
201 and above	...	1	...	1
Total	8	2	1	11

Maximum number of villages (6) having educational facilities are in the distance range 51-100 km. and all such villages are in Narayanpur tahsil. In the distance range 201 and above km. there is only one village in Bijapur tahsil which has educational facility.

Jagdalpur and Kanker towns of Bastar district have only been considered for the purpose of distance ranges from the nearest urban centre. One more place, Kirandul, has however been recognised as a town in Bastar district at a later stage for Census purposes. If this town is taken into consideration for the distances of villages from the nearest urban centre, then the distances of the villages of Bijapur and Dantewara tahsils will be less from the nearest urban centre.

Medical and Postal Facilities

There is only one ayurvedic dispensary and one post office in village Partapur, L.C. No. 125 in Narayanpur tahsil in the entire region of the Abujhmar. This village is at a distance of 67 km. from Kanker town.

Communications

It has already been mentioned that Abujhmar is an inaccessible tract of Madhya Pradesh. Kachha road has been found in only 2 villages-Katgaon (L.C. No. 118) and Karangal Musfi (L.C. No: 121) in Narayanpur tahsil. These villages are at a distance of 70 km from Kanker town.

Economic activities

(i) **Workers and non-workers** The following table shows the percentage distribution of workers and non-workers :—

Abujhmar/ tahsils/ District	Percentage Distribution of Workers and Non-Workers					
	Total		Male		Female	
	Workers	Non-workers	Workers	Non-workers	Workers	Non-workers
1	2	3	4	5	6	7
Abujhmar area as a whole	45.29	54.71	61.97	38.03	28.23	71.77
Abujhmar area in different tahsils						
Narayapur	45.43	54.57	61.83	38.17	28.60	71.40
Bijapur	46.85	53.15	62.52	37.48	30.79	69.21
Dantewara	40.57	59.43	62.15	37.85	19.14	80.86
Bastar district	36.69	63.31	57.35	42.65	15.96	84.04

The table shows that the percentage of workers in the Abujhmar as a whole and that of different tahsils is higher than that of the Bastar district. Similar is the position in the case of male and female workers. The participation rate of females in Dantewara tahsil is lowest in comparison to the

other tahsils and that of the Abujhmar area as a whole.

(ii) Workers: The classification of workers into broad industrial categories by sex is as inldicated below :—

Abujhmar area of Tahsils/Abujhmar/ District	Total Population		WORKERS																				Non-workers	
			I		II		III		IV		V(a)		V(b)		VI		VII		VIII		IX		X	
	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F
1	2(a)	2(b)	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
Narayanpur	5,864	5,714	3,177	1,363	328	258	19	...	...	...	23	9	1	...	...	...	6	...	2	...	70	4	2238	4,080
Bijapur	1,262	1,231	726	359	58	20	...	...	...	...	...	...	...	...	...	...	...	...	...	...	5	...	473	852
Dantewara	576	580	352	109	2	2	1	...	...	...	...	...	...	...	...	...	...	...	...	...	3	...	218	469
Abujhmar as a whole	7,702	7,525	4,255	1,831	388	280	20	...	...	...	23	9	1	...	...	...	6	...	2	...	78	4	2929	5,401
Bastar district	759,181	310,765	74,297	5,802	4,980	9,776	2,876	2,125	6,772	2,871	15,136	323,781												
		756,775	62,326	48,795	941	1,760	2,796	378	326	962	235	2,293	635,963											

(iii) Agricultural activities : It may be seen from the table of classification of workers into industrial categories that an overwhelming proportion of economic activity (97.9 percent) is concentracted in agriculture and appreciable percentage out of this (88.2 percent) is in cultivation. It may be interesting to note that the concentration of workers in agriculture in 1961 Census was also 97.9[28] percent. In cultivation, it has, however, reduced from 95[29] percent during 1961 Census to 88.2 percent in 1971 Census. The table also indicates that the Hill Marias do not have sufficient agricultural labourers because their cultivation is done on a cooperative and reciprocal basis. Dr. Jain[30] observes in his thesis, "The Marias of Bastar and the Baigas of Mandla practise shifting cultivation which is referred to by the term *Penda* in the former case and *Bewar* in the latter. These shifting varieties of cultivation by its very nature and the terrain over which they are practised have to be communal in nature. Both these tribal societies have, therefore, framed their code regarding the participation by every adult able-bodied male in the operations and no body can infringe this code, eg., by remaining absent or by not doing the allotted work except with the sanction of the council. Another aspect of the code is that none of the individual member have any freedom to cultivate at will. They have to cultivate only at the site selected by the society and everybody has to ungrudgingly accept only that and that much of land which the tribal council allots him. Third aspect of the code is that every family has to contribute towards maintenance of old and disabled people. No constituent member can have any excuse to shirk the duty."

Cultivation

It is not within the scope of the present note to descibe the features of cultivation of the Abujhmar. However, a very sketchy information may by given, which may be of some interest and also it will prove the above statement of non-availability of sufficient agricultural labourers in this region. The cultivation is carried on over steep hill slopes which is known as *Penda*, a type of shifting cultivation. *Bewar*, or *Dongar, Beora, Bhatuwa, Dippa* and *Parka* or *Dahi* are the other terms for shifting cultivation practised in different parts of Madhya Pradesh. The arguments[31] of the Hill Marias in favour of this cultivation are :—

(i) They do not have enough man-power to carry on stable cultivation;

(ii) Their main food-*Kosra* cannot be grown in settled cultivation;

(iii) In *Penda*, they are able to grow a variety of crops together : this would not be possible in settled cultivation;

(iv) Enough land is not available in Abujhmar for carrying on settled cutivation; and

28. Census of India, 1961, District Census Handbook, Bastar District, 1964, page lxxviii.
29. Ibid.
30. Dr. Jain, H.C. The Organisation and working of the Panchayats in Certain Tribal Societies of Madhya Pradesh, an unpublished thesis for the degree of Doctor of Philosophy, page 152.
31. Census of India, 1961, District Census Handbook, Bastar District, 1964, page lxxix.

(v) Settled cultivation requires cattle and cattle attract tigers.

The *Penda* site, known as *Kaghai,* is determined by the village elders (tribal council) after the close of the harvest ceremony, at the *Koqsar* festival.

The marias fell the trees and undergrowth and burn them in common when dry. Only after this the allotment of area sufficient to individual household for their sustenance for one year is made by common consent.

Selection of the plot for the Penda cultivation

The following points are kept in mind by the Marias at the time of selecting the plot for *Penda* cultivation :-

(i) Nearness from the village so as to avoid wastage of time and energy which is needed for clearing and burning the forest and watching the crop.

(ii) A patch of dense growth of forest is usually given preference so that fertility is maintained.

(iii) High and precipitous slopes are given preference. A Manjhi told Shri Noronha [32] during his tour in the Abujhmar that it is, "because the hill will fall away". And Shri Noronha noticed, "Inspite of intensive *Penda* (5 years rotation) lower slopes of hills are never deforested. Either amazing coincidence or aboriginal has dim sense of danger of erosion".

Agricultural operations

(a) **Preparation of field:**—The agricultural operations begin towards the end of February or in the begining of March from felling the trees and undergrowth in *Penda*. This is, however, preceded by a ceremony in which the *Kaseq-Gaita* cleans a small patch under a *sal* tree and usual offerings of chicken and eggs in the *Kaghai* (*Penda* site) are made by him. Felling of trees is generally done by men but there is no bar to women taking part in it.

Burning of dried wood is taken up by men by the end of May, only men can participate in this operation ; participation by women is tabooed. The entire *Penda* site is fenced and field huts are constructed. There is no fencing on individual plots.

(b) **Sowing:**—The *Penda* plot is generally sown by two types of varieties viz., early-ripening and late-ripening varieties of grains by dividing it into two parts. Early ripening varieties include a number of cereals and it is collectively known as *Kosra*. The *Kosra* includes *Sawa*, *Sika* or *Chikona*, kodon and *Mandia*. Til, mung and *Kulthi* are the late ripening millets, In vegetables, cucumber and gourd are sown.

(c) **Harvesting:**—The threshing floor known as *Karanu* is prepared by women. In actual threshing operation, women are not allowed to take part, it is entirely the job of men and boys.

The above operations of cultivation also make it clear that almost whole of able-bodied population ramain engaged in *Penda* cultivation and these operations do not require agricultural labourers.

Shifting nature of cultivation

Penda cultivation is shifting in nature. The period of rotation varies; in intensive *Penda*, it may be as low as 5 years but normally it is from 12 to 16 years.

Stable cultivation

Certain low-lying areas have been reclaimed by the individuals and brought under permanent cultivation. These fields are the property of individuals, where as the *Penda* plots belong to the village collectively. During the time of preparation of the General Village Registers for 1971 Census (in the year 1969) permanent cultivation was noticed in only 20 villages of Narayanpur tahsil. The area of the villages and its break-up under different uses is given in the following table :—

Total No. of village	Area (in acres)	Land Use (in Percentage)			
		Forest	Cultivated (Irrigated and unirrigated)	Culturable waste	Area available for cultivation
1	2	3	4	5	6
20	22,253	74.66	9.63	5.20	10.51

The forest area out of the total area of these 20 villages is about 75 precent. Cultivation is done in about 10 precent of the land and out of which only 4 acres of land is under irrigation. The irrigated land is in Partapur village (L.C. No. 125) in Narayanpur tahsil which is at a distance of 67 km. from Kanker town. The remaining about 5 and 11 percent of land

32. Abujhmarh Diary of Shri R.G.V.P. Noronha, published in the Abujhmarhias, Socio-Economic Aspects of a Little Known Culture, Trible Research Institute, Chhindwara, 1963, page 16.

under culturable waste and area not available for cultivation, respectively.

Staple food and Drinking water facility

Staple food is mainly *Kosra* which includes *Sawa*, *Sika* or *Chikone*. Besides this, Kodon, *Madia* Kulthi and Rice are also staple food in this region. Drinking water facilities are available from well, river, nala and springs in the region. The drinking water facility from well is however, available only in about 14 precent of villages.

Land Records

There are no land records of the region. The whole of the Abujhmar is unsurveyed. Only a poll[33] tax at the rate of Rs.1/6/0 or Rs.1/4/0 in Narayanpur, Dantewara Marh and Bijapur Marh, respectively is required to be paid to the Government per year by each able-bodied male for the privilege of shifting cultivation. This tax is known as *Patti* and collected by the patel of the village who in turn deposits it in the treasury.

Other Economic activities

In other economic activities, mention of only household industry could be made.

In the region, only 32 persons are engaged in household industry. The number of persons engaged in other services is, however, higher (82). The Hill Marias are great basket makers and big baskets made by them are sold in the weekly markets outside Abujhmar. Other articles of bamdoo made by them are the dancing shields, sleeping mats and small baskets. Apart from bamboo work, broomsticks, known as *Phool-bahri*, are also made by them.

Participation rate

Participation is considered as an index of economy. A study of the participation rate reveals that the Abujhmar region is entirely rural. Participation rate tends to decrease with the pace of urban isation which is totally absent in the region. This is evident from the following table :—

Abujhmar region/tahsil/ district	No. of Workers (Percentage to total workers)		
	Primary sector	Secondary sector	Tertiary sector
1	2	3	4
Abujhmar region	98.22	0.48	1.30
Narayanpur tahsil	92.94	2.44	4.62
Bijapur tahsil	95.43	1.61	2.96
Dantewara tahsil	91.19	3.18	5.63
Bastar district	91.63	3.29	5.08

The primary sector indicates rural economic activities which is the highest in Abujhmar region in comparison to the tahsils and the district.

Scheduled Castes and Scheduled Tribes

The precentage of Scheduled Castes in the region is insignificant (0.67), while the precentage of Scheduled Tribes is very high (about 95) as compared to the district percentage (about 69).

Political organisation of Hill-Marias

It will be an injustice to Hill Marias, if their political organisation is not described in this note, which is very strong and the Hill-Marias attach a very high value to it.

This description of the political organisation is mainly based on the unpublished thesis of Dr. H.C. Jain on "The Organisation and Working of Panchayats in Certain Tribal Societies of Madhya Pradesh" accepted for the degree of Doctor of Philosophy. Abujhmar is traditionally divided into several *parganas* and the headman of each *Pargana* is known as *pargana-manjhi*. The institution of this *pargana-manjhi* has very much decayed during the recent years but during the erst-while Bastar State regime the *pargana-manjhis* were the link between the State and the people, and they were the representatives to the people before the government. This size of the *pargana* varies. For example, the manjhi of Kutru *pargana* of *Abujhmar* has 15 villages under his command whereas the *manjhi* of Molasnar *pargana* has 21 villages under him. There is a headman for every village known as patel. Each village comprises of two or more hamlets which are known as *para* and the chief of each *Para* is knows as *para-mukhia*. The Hill Marias being much more isolated and also having a speech which is difficult to understand, have an institution of *panch-mukhia* or the intermediary between them and the government. This *panch-mukhia* is necessarily a bilingual person and serves not only as an interpreter but also a link in matters between the Abujhmar and the government. The political organisation of the Hill Marias may thus be show as below :—

Hill-Maria

Panch | Mukhia

Pargana-manjhi

|

Patel

|

Para-mukhia

33. The Abujhmarhias Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 87.

All these institutions are hereditory and according to the law of primogeniture as stated earlier the *pargana-manjhi* is a powerful person though his status has fallen to a very great extent. In the Abujhmar there is hardly anything which takes place inside the village without the knowledge of the *pargana-manjhi.*

Religious heads

The religious head of the village is *Gaita*, He is responsible for worshipping the village deities as well as serves as sorcerer and medicine-man. Another person, *Perma* is responsible for the worship of the *Mata*. These religious heads are not hereditory.

General

The individual attitudes and opinion can never be known by an outsider and it is only in a group talk that some information can be got. Shri Noronha[34] has remarked in his tour diary, "Forget cardinal principle that no Abujhmarhia will tell you anything if you appear interested, with the result they all calm up".

Abujhmar has, of course, not remained a closed citadel, that it once was and is slowly being 'opened up'. The first person who entered in the Abujhmar to study and who also recorded a note was Captain C. L. R. Glasfurd in 1863, while W. V. Grigson, I. C. S., Administrator, Bastar State, made a long tour of this area in 1936 and presented a detailed description of the area, the people and their customs and manners in his book, "The Maria Gonds of Bastar". Shri R. C. V. P. Noronha, I. C. S. former Collector, Bastar, (presently Chief Secretary to Government of Madhya Pradesh) made one week tour from 6-1-1950 to 12-1-1950 and 16-2-1952 to 21-2-1952 and visited about 17 villages. Late Shri S. B. Pawar, former Collector, Bastar also visited some parts of the region in a 15 days tour. Dr. B.D. Sharma who was Collector, Bastar from 23-8-69 to 10-12-71 has the proud privilege of visiting the region more than once.

He undertook three trips and spent in all 34 days in order to visit sixty villages. Shri K. C. Dubey, former Sub-Divisional Officer, Dantewara (Presently Collector, Balaghat) and the research party of the Tribal Research Institute, Chhindwara, have also visited some of the parts of the region.

34. Abujhmarh Diary of Shri R.C.V.P. Noronha, published in Abujhamarhias, Socio-Economic Aspects of a Little Known Culture, Tribal Research Institute, Chhindwara, 1963, page 6.
