FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments., is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, adminisrtative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the disrtict which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The District and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the pulication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, I. A. S. the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing, and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S N Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Primary Census Abstract included in the publication relate to the district of Barddhaman. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census Operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation, We silently recall the contribution of Shri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Barddhaman (Principal Census Officer) and his innumerable colleagues including the Charge Superintendents, Census Supervisors, Census Enumerators. The data were processed under the Deputy Director in-charge of the Regional Tabulation office by a host of Coders, Checkers, Tabulators, Supervisors etc. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of data have been done by the Central Tabulation Unit of this office under the supervision of Sri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operations, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The credit for preparation of the maps goes to the Map unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal, who was ably assisted by Shri Chourajit Singh, Senior Geographer, Sri T. S. Khadatkar, Geographer and their colleagues.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Shri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Government who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS, Shri B. Bhattacharyya, WBCS, both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to Aparajita Print House, 91-A, Baitakkhana Road, Calcutta-700 009 for the printing of this publication.

Sukumar Sinha

Calcutta

Joint Director of Census Operations,

Number of Towns			291	49

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

(a) All places with a corporation, municipality, Town Committee, Notified Area, Cantonment.

(b) All other places which satisfied the following criteria :

(i) A population of 5,000 as the minimum,

(ii) Density per square kilometre would be a minimum of 400, and

(iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it fall short on the population front, *i. e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

Census House :

We defined the Census house in the following manner :—

"A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use.

Household :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both".

Scheduled Castes/Scheduled Tribes :

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of

a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

Literates :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational atainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

Main Workers :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz. main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season." In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly..... There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration"

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons..... participation of work that goes to augment the income of the household will only be treated as economic activity"

In 1981 Census any one who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

Marginal Workers :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding Enumeration.

Non-Workers :

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

Scope of Primary Census Abstract :

The Primary Census Abstract is the basic table prepared from the total count of census. It has been presented at three levels, viz. (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations. The District Primary Census Abstract presented here corresponds to that in 1971 and contains the following items :—Area of the police stations/towns in Km^2, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled Tribes population and its division into males and females, the sex division of the literates, total male main worker and total female main worker, total male cultivators and

total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers. All these information have been covered in 39 columns.

The urban/village PCA has been outlined with 28 cols. and have been depicted with occupied residential houses, number of households, population, scheduled castes population, scheduled tribes population, literates, main workers showing its four broad divisions, marginal workers and non-workers. All these data have been shown with sex division. The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and mouza wise.

The primary census abstracts of scheduled castes and scheduled tribes represent separately all information like scheduled castes and scheduled tribes population, literates, main-workers with broad categories, marginal workers and non-workers showing males and females for all the items in 31 columns.

The 1981 Census categorised workers into four major categories. The first and second categories *i. e.* cultivators and agricultural labourers correspond to categories followed in 1971. The third category represents workers corresponding to category v (a) of 1971. All other remaining workers grouped together in category IV of 1981. This category includes workers engaged in categories III, IV, v (b) VI, VII, VIII and IX of 1971.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District census Handbook 1981 follows the same manner as in 1951, 1961. A large number of inset tables has been prepared on Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

Table 1 presents sexwise population by rural and urban sectors. number of villages and towns in 1981 Census. Barddhaman is predominantly a rural district and 70·61 percent of its population live in villages. The district has 49 urban units of which three belong to size Class I viz. Barddhaman, Asansol and Dnrgapur. The urban population of the district constitute 29·39 percent. 95·93 percent of the village of the district are inhabited. Durgapur police station ranks first in respect of the population size in the district.

TABLE 2 DECADAL CHANGE IN DISTRIBUTION OF POPULATION

29	Kalna	213·076	184,482	28,594	261,505	226,482	35,023	22·73	22·77	22·48
	Total	3,916,174	3,024,184	891,990	4,835,388	3,414,219	1,421,169	23·47	12·90	59·33

Table 2 deals with the data in respect of the decadal variation in population during 1971-81. During the decade 1971-81, the disctrict has registered a growth of 23·47 percent, In 1961-71, the district's growth rate was 27·0 percent. The growth rates for rural and urban sectors separately during the decade have been worked out to 12·90 percent and 59·33 percent respectively against 19·92 percent and 58·98 percent during the decade 1961-71. In the police stations viz. Chittaranjan, Kulti, Jamuria, Raniganj, Faridpur and Durgapur have recorded negative growths in the respective rural areas. This is due to fact that considerable number of urban units have been created in these areas for the first time in 1981. Further there has been considerable expansion of existing urban units during this decade. There were only 22 urban units in 1971 and whereas 1981 that number had gone up to 49. Among the police stations, the highest growth rates of 60·88% and 49·06% for total and rural respectively are found in Bud Bud police station. The highest urban growth 712·45 percent is recorded in the urban area of Jamuria police station, Mangalkote police station constitutes on the other hand the lowest growth rate of 14·37 percent during the last decade.

TABLE 3 DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
— 200	127	4·94
200— 499	483	18·79
500—1,999	1,477	57·47
2,000—4,999	424	16·50
5,000—9,999	58	2·26
10,000+	1	0·04
Total	2,570	100·00

Table 3 furnishes the total noumber of villages and percentage distribution of villages by population ranges in the district of Barddhaman. Only one village (Srirampur) in the district has been recorded to contain more than 10,000 persons. Majority of the villages have been found in the population range of 500 1999 which constitutes 57·47 percent.

TABLE 4 DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (Per Sq. Km.)	Total No. of Villages in each density range	Percentage of Villages in each density range
1	2	3
— 10	6	0·23
11— 20	3	0·12
21— 50	7	0·66
51—100	35	1·36
101—200	127	4·94
201—300	245	9·54
301—500	817	31·79
501 +	1,319	51·32
Not Known	1	0·04
Total	2,570	100·00

Table 4 presents data on the distribution of villages by density of population. There are as many as 1319 villages in the district eonstituting 51·32 percent of the total inhabited villages belong to the density range of 501 and plus per square kilometre. Bulk of the villages of Kalna p.s. fall in this range. In terms of numbers Kalna, Memari and Purbasthali have contributed 141, 138 and 119 villages respectively.

TABLE 5 PROPORTION OF SCHEDULED CASTE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Caste population to total population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0—5	108	4·47
6—10	153	6·34
11—15	177	7·33
16—20	227	9·40
21—30	550	22·79
31 and above	1,199	49·67
Total	**2,414**	**100·00**

Table 5 reveals the proportion of schduled castes population to total population in the villages of the district of Barddhaman. Out of 2570 villages in the distriet 2441 have scheduled castes population. In other hand, there are only 5% villages which do not have Scheduled Caste population. Again there are 1199 villages in the district where the concentration of scheduled caste population is 31 percent or more. In comparison there are but only 108 villages where the concentration of scheduled castes population is less than 5 percent.

TABLE 6 PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled tribes population to total population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0—5	643	38·14
6—15	504	29·89
16—25	264	15·66
26—35	131	7·77
36—50	72	4·27
51 and above	72	4·27
Total	**1,686**	**100·00**

Similarly Table 6 presents the proportion of scheduled tribe population to total population in the villages of the district of Barddhaman. Out of 2570 inhabited villages of the district 1686 villages (i.e. 65·60 percent) have scheduled tribe population. As many as 643 villages have the Scheduled tribe population where concentration is in the percentage range of 0-5 though followed by 504 villages having scheduled tribe population in the 6 to 15 percentage range.

TABLE 7 PROPORTION OF SCHEDULED CASTE/SCHEDULED TRIBE POPULATION IN TOWNS

	Name of the Towns	Total population	Total Scheduled Cast population	Total Scheduled Tribe population	Percentage of Scheduled Caste population to total population	Percentage of Scheduled Tribe population to total topulation

	All Towns	**1.421,169**	**200,804**	**31,292**	**14·13**	**2·20**

The distribution of scheduled caste and scheduled tribe population in towns of Barddhaman district is reflected in table-7. The proportion of scheduled caste population in the urban sector of the district is, considerably at a higher than the urbrn state average in this regard. In the urban sector of the district 14·13 percent of the total population is scheduled castes whereas only 10·31 percent is found at the state (urban) level. Amongst the towns of the district, in respect of scheduled caste population Dainhat tops the list where 43·62 percent of the total popnlation belongs to the scheduled castes. Chhora town with 34·98 percent follows a close second.

The seheduled tribe propulation in the urban areas of the district of Barddhaman on the other hand acconuts for 2·20 percent only. Nevertheless this rate is much higher than the state average total in this regard

Among the towns of the district of Barddhaman Parashkol stands first in respect of concentration of scheduled tribe population followed by Searol. In terms of percentage of scheduled tribe population they are 13·18 and 11·23 respectively.

TABLE 8 LITERACY RATES BYPOPULATION RANGES OF VILLAGES

Range of population	No. of Villages in each ranga	Literacy rate
1	2	3
— 200	127	26·81
200— 499	483	33·98
500—1,999	1,477	36·64
2,000—4,909	424	37·60
5,000—9,999	58	37·19
10,000 +	1	48·87
Total	**2,570**	**36·91**

Table 8 present the number of villages in the population range and the rate of literacy in villages classified by population range in the district. All the villages of the district taken together have a literacy rate of 36·91 percent. The highest percentage (48·87) of literates has been recorded in the villages with a population range 10,000 plus. Likewise, the lowest rate of literacy (26·81 percent) is recorded in the villages having population less than 200. Thus, greater the population size of the village, higher the rate of literacy in the district.
