ALL INDIA PUBLICATIONS

Volumes similar to those above are being published at the All India level. Apart from these, All India Census Tables on 1% Sample basis being part II (Spl.) and a Special Report on Graduates and Technical Personnel (G-Series) being Part VII are published.

The District Census Handbooks will be available for sale at the Government Central Press,Bangalore and other publications at the Office of the Director of Census Operations in Karnataka, No. 21/1 Kanichay's Complex, Mission Road, Bangalore-27 and the Controller of Publications, Civil Lines, Delhi-110 006.

PREFACE

It has been the tradition of the Census of India to present demographic data in as detailed a manner as possible so as to serve effectively the interests of the users of Census data. It is also customary to publish special volumes containing both demographic and non-census data which are considered to be of great utility.

The District Census Hand books present Census data at their district, tehsil, town, urban block and village levels and provide non-census data on social, economic and administrative aspects. The District Census Handbook, in 1971 Census, is presented in three parts viz., A, B and C. Parts A and B have already been published in a single volume for all the districts except Bangalore for which Parts A and B were published in separate volumes. Part A incorporates the Town and Village Directories and Part B incorporates Primary Census Abstract down to the village level in the case of rural areas and to the Block level in the case of Urban areas.

The present volume, Part-C contains Census data, non-census data presented in 95 proformae on the social, economic and administrative aspects and the computerised secondary tables generated from Village Directory and Primary Census Abstract. In case of Bangalore district the volume is split into two. Volume I contains District level Census Tables and proformae on social, economic and administrative aspects.

The preparation of Part-C of the District Census Handbook has been made possible only due to the co-operation of the Heads of various Departments of the State as well as the Central Government to whom we tender our whole hearted thanks. Throughout the preparation of this volume we have had the constant guidance and advice of Sri R. B. Chari, Registrar General, India, a debt which is gladly acknowledged. I must also place on record the help and guidance from Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies), Sri K. K. Chakravorthy, Assistant Registrar General. We are deeply indebted to them for all the assistance rendered. In my office many have contributed to the compilation of this volume but I must mention the assistance I have received from Sri Ram Singh, Assistant Director of Census Operations (T), Sri G. Nanjunda Gowda, Investigator, Sri H. R. Keshava Murthy, Senior Technical Assistant and Sri Jahangir Pasha, Sri V. Thippashetty, Sri S. Anjaneyalu all Statistical Assistants.

I must also express my sincere thanks to Sri B. N. Rama Murthy, Director of Printing and Stationery and Sri Siddalingaiah, Assistant Director of the State Government Press, Bangalore for the personal interest evinced by them and ensuring printing in time. This is a State Government Publication and the interest evinced by the State Government has encouraged us, for which our thanks are tendered.

INTRODUCTION

The tradition of presenting social and demographic data in as detailed a manner as possible so as to serve effectively the interests of Census data users goes back to 1871 Census. It has also been a tradition of the Census of India to publish special reports in the light of additional investigations incorporating demographic as well as non-census data on social, economic and administrative aspects and such volumes have come to be recognised as of great utility. In accordance with this practice Taluka and Village Tables indicating demographic data upto Village level were being published during the pre-independence period. After independence, when a massive programme of nation-building was launched in the country detailed information about the socio-economic processes and about the distribution of the same in space and time, became indispensable. The Census was therefore called upon to provide more and more data in various fields. It was in response to such a pressing demand that the preparation of District Census Handbooks was taken up as one of the new features of the 1951 Census. The District Census handbook series in Mysore State replaced "Part IV-Taluk Table" and "Part V-Village Tables" of the earlier censuses and presented, a large number of tables of economic, demographic and social significance for the taluks and urban areas of each district. During the 1961 Census, in addition to primary census data in respect of each village details about its level of development as perceived in the availability of amenities therein, were also collected and presented in the village directory. In addition, the administrative statistics relating to the preceding 10 years were also presented along with a brief writeup introducing the district and highlighting its special characteristics, if any.

In 1971 Census the scope of the District Census Handbook has been enlarged considerably. Attempts have been made to provide uniform set of information in respect of amenities and infrastructure of growth for all the villages and towns all over the country. In order to ensure the early release of the basic census data about the villages and towns, the District Census Handbook has, on this occasion, been presented in three volumes for each district. Part 'A' consists mainly of non-census data; such as (i) physical aspects; location; municipal finance; civic and other amenities; medical; educational and recreational facilities; trade; commerce; industry and banking in respect of towns and, (ii) various types of amenities available, land use pattern and distance to nearest town in respect of villages. Besides, in Part A data on growth history of towns since 1901, its functional category, and the religionwise distribution of 1971 Population of each town have also been included. Part 'B' incorporates essentially the 1971 Census data and presents the Primary Census Abstract for each village and for each census enumerator's block in the case of the rural and the urban areas respectively. The changes in the boundaries of the different administrative units, in the number of villages and towns etc., if any, during the decade have also been outlined. In view of operational convenience parts A & B have already been published as a single volume in respect of 18 out of the 19 districts. In the case of Bangalore district these two parts have been brought out separately. Part 'C' itself forms a separate volume for each district and contains taluk and town-level census tables besides administrative statistics, furnished by different departments of the State and Central Government covering various aspects such as climate, agriculture, forestry, fishing, mining, trade and commerce, education, public health and sanitation, transport and communications, functioning of co-operative institutions, civic bodies, etc.

In addition computerised secondary Tables generated from data on Village Directory and Primary Census Abstract are also given at the end.

Definitions and Concepts

Village: The Census village includes all areas falling within the jurisdiction of a revenue village such as the main built up area or settlement **(the gramthana),** the hamlets and scattered or isolated homesteads

within the boundaries of the revenue village. However in a few cases, for the purposes of the Census, some areas such as Reserved Forest Areas not falling within the limits of a revenue village, have also been considered as villages. There are also a few cases where only the built up area or a part of a revenue village has been included within the limits of a Municipal town. In such cases the area which does not fall within the Municipal limits is considered as a village for census purposes by denoting within brackets "Rural" against such place, *e. g.*, Navalgund (Rural). A village without any inhabitants is referred to as "Uninhabited" or "becharak". The latter term literally means "without any lights".

Urban Area : The Urban areas, called for convenience as Census Towns, or merely Towns, were identified on the basis of some principles. Places are designated as Towns on the following criteria :

i) All places covered by Municipal Corporation, Municipalities, Cantonment Boards, Town Boards, Notified Area Committees, Sanitary Boards and Civil Lines irrespective of their population size or other characteristics are classified as Urban areas or Census Towns.

ii) All other places which satisfied the following criteria based on the 1961 Census are classified as Census Towns.

a) A minimum population of 5,000 ;
b) At least 75% of the male working population being engaged in non-agricultural pursuits ;
c) A density of population of at least 400 persons per Sq. Km. (1,000 per Sq. Mile).

iii) Apart from these some discretion was allowed to the Director of Census Operations to classify places which did not satisfy these principles but which had pronounced urban characteristics as Towns.

Ward : In Urban areas, the town or city has been divided into Divisions and Wards or Mohallas for administrative and election purposes having clearcut physical boundaries with which local people are well acquainted. The Division, Ward or Mohalla comprises several Urban Blocks.

Urban-Block : This is the smallest unit for Census enumeration comprising a compact unit of about 120 houses with an approximate population of 600 and having a well defined boundary which may be identified on field by the enumerator without difficulty.

Census House : A "Census House" is a structure or part of a structure having a separate main entrance from the road or common courtyard or stair-case etc , used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

Household : A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exingencies of work prevented any of them from doing so. There may be one-member household, two-member or multi-member household. For Census purposes each one of these types is regarded as a "Household". Again, there may be a household of persons related by blood or household of unrelated persons, the latter are Boarding Houses, Hostels, Orphanages, Rescue Homes, **Ashrams** etc. These are called "Institutional Households".

Scheduled Castes : "Scheduled Castes" means such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under Article 341 (of the Constitution of India) to be the Scheduled Castes. No person who professes a religion different from the Hindu or the Sikh shall be deemed to be a member of a Scheduled Caste.

Scheduled Tribes : "Scheduled Tribes" means such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under Article 342 (of the Constitution of India) to be Scheduled Tribes.

Literate : Literate is a person who can both read and write with understanding in any language.

A person who can merely read but cannot write is not a literate.

Worker : A 'Worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work includes not only actual work but effective supervision and direction of work. The workers are further classified into nine industrial categories.

Non-worker : Non-Workers are those whose main activity is economically non-productive and includes those engaged in household duties, full time students, rent receivers, retired persons, infants and old persons, beggars, vagrants, inmates of penal, mental or charitable institution etc. It also includes those non-workers who are seeking work.

DISTRICT CENSUS TABLES

EXPLANATORY NOTE TO CENSUS TABLES

Introduction

During the 1971 Census Operations vast data were collected and presented in the form of innumerable tables of which certain tables at the district level pertaining to district BANGALORE are presented in this Volume. The data presented in these tables are fairly detailed and descriptive in all aspects.

During the 1971 Census, part of the data have been processed on electronic computer. The Primary Census data and the data on mother tongue, religion, Scheduled Castes and Scheduled Tribes and broad age-groups were processed manually at Regional Tabulation Offices as was being done at previous Censuses. The data pertaining to 20 per cent of the urban individual slips were transferred on to Punch Cards and thence to magnetic tape and all the cross tabulations of the rural data were derived from 10 per cent sample of individual slips which were processed manually. The tabulation of Houselist data was also processed on 20 per cent sample basis. The Establishment Schedules were processed on full count basis. The data relating to the Housing and Establishment Schedules were processed on electronic computer.

Thus, the 1971 Census was a pioneer in the introduction of sampling procedures to a considerable extent. Careful studies were made of the 1961 schedules as also the 1971 pre-test schedules before evolving to optimum sampling size and the procedures as to yield data within reasonable margin of error. The following is the list of tables proposed to be published for the 1971 Census :

A Series	General Population Tables
B Series	Economic Tables
C Series	Social and Cultural Tables
D Series	Migration Tables
E Series	Establishment Tables
F Series	Fertility Tables
G Series	Special Tables for degree holders and Technical personnel
H Series	Housing Tables
SCT Series	Special Tables for Scheduled Castes and Scheduled Tribes

The tables pertaining to F and G Series have not been published in this Volume as the data for these series are compiled only at the State level. Also, some of the tables in the rest of the series which are not compiled at the district level have not been published in this volume. A brief description about scope and coverage of each of the series is given in the following paragraphs.

A SERIES: GENERAL POPULATION TABLES

i) A-I Area, Houses and Population :

This is the basic table for the Census furnishing population data for District, Taluk, Town/City/Urban Agglomeration for total, rural and urban areas separately. It presents area in Sq. Kms., density of population per Sq. Km., number of inhabited and uninhabited villages, number and names of towns, number of occupied residential houses, households and population by males and females according to the 1971 Census. The area figures for taluks and towns were supplied by the Director, Survey, Settlement and Land Records, Government of Mysore and the local authorities of the towns respectively. The area figures for the District were supplied by the Surveyor General, India. No attempt has been made to reconcile the area figures obtained from these different sources. The area figures obtained from the Surveyor General are treated as provisional.

Table A-I is similar to its counterpart in 1961 except for the fact that the "Town Group" of 1961 has been replaced by "Urban Agglomeration".

At the 1961 Census a grouping of urban areas was made to recognise urban spread and this was called as Town Group. The Town Group of 1961

included towns which were not necessarily contiguous and were, in many cases, separated by large distances with an entirely rural area in between. It was felt that the Town Group did not always reflect the spread of urbanisation correctly since it was generally made up disjointed units. This was replaced by the Urban Agglomeration where continuity and contiguity were necessary conditions. The concept of Urban Agglomeration is briefly discussed below :

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military campus *etc.*, and even though these are outside the statutory limits of a corporation, municipality or cantonment, they fall within the revenue boundary of the place by which the town itself is known. It may not be realistic to treat such areas lying outside the statutory limits of a town as rural units and at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the main town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area, what is being called "Urban Agglomeration" at the 1971 Census. The different situations in which an Urban Agglomeration could be constituted are (a) a city with continuous outgrowth (the outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages), (b) one town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a), and (c) a city and one or more adjoining towns with their outgrowth all of which forming a continuous spread.

As in 1961, there are three appendices to this table, as described below :

APPENDIX I :

This Appendix gives details of the 1961 territorial units constituting the 1971 set-up of each unit. This appendix is supplemented by a statement showing the areas for 1961 and 1971 for those towns which have undergone changes in area since 1961 and will show population for the transferred areas as per 1961 and 1971 Censuses.

APPENDIX II :

One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. For various reasons many places with population of 5,000 and over are not classified as towns, while many places with a population of less than 5,000 are classified as town. Hence this Appendix, gives the number of places which, though having population of 5,000 and above, are not classified as towns and the places which, though having less than 5,000 population, are classified as towns. This Appendix as in 1961 gives the number of such places with their population.

APPENDIX III :

This Appendix furnishes the number of houseless and institutional households, and houseless and institutional population separately for district, taluk and town/Urban Agglomerations with a population of one lakh and above, if any. Data are presented for total, rural and urban areas separately.

ii) A–II Decadal Variation in Population since 1901.

This table, as in 1961, furnishes data on the population and variation of population at the district and taluk levels for the period 1901 to 1971.

The Appendix to this Table has spelled out the adjustments necessary to bring the 1961 Census population of the taluk and the district to the jurisdiction of the district and the taluk as at 1971 Census, if any.

iii) A–III Villages Classified by Population

This table, as in 1961, classified only inhabited villages by size of population. It gives the number and population of villages under various size groups

viz., less than 200, 200–499, 500–999, 1,000–1,999, 2,000–4,999, 5,000–9,999 and 10,000 and above.

iv) A–IV Towns and Urban Agglomerations classified by Population in 1971 with variation since 1901.

This table gives the growth of each town (absolute growth and growth rate) since 1901 to 1971, along with the area of the Town/Urban Agglomeration at the 1971 Census in square kms. The towns treated as such for the first time in 1961, bear an asterisk (*) on their left while towns treated as such for the first time in 1971 Census are printed in italics.

This table has been supplemented by two Appendices. Appendix I indicates the new towns added in 1971 and towns in 1961 declassified in 1971. Appendix II, gives the reason for variation in area of the towns between 1961 and 1971.

B–ECONOMIC TABLES

All the tables in this series except B–I Part A and B–II have been prepared on sample basis. The rural data have been estimated from 10 percent sample of the Individual Slips and urban data have been estimated from 20 percent sample of the Individual slips.

The following tables have been presented in this volume:

i) B–I Part A Workers and Non-Workers according to main activity classified by Sex and Age-groups.

This is the basic economic table prepared on full count basis. This table furnishes the distribution of entire population under two broad classes of "WORKERS" and "NON–WORKERS". Workers are further classified into 9 broad industrial categories as shown in the table. As against four broad age–groups in 1961 each category of workers has been classified into eight age–groups *viz.*, 0–14, 15–19, 20–24, 25–29, 30–39, 40–49, 50–59, 60+. In 1961, the age-groups adopted were 0–14, 15–34, 35–59, 60+. Splitting the two age–groups of 15–34, 35–59 into six in 1971 is of special significance to researches for demographic studies.

ii) B–I Part B Female Workers and Non-Workers according to main activity classified by marital status and age-groups.

This table is prepared only at the State level on sample basis. As the district level figures are not compiled, this table has not been presented in this volume.

iii) B–II Workers and Non-Workers in Cities and Non-City Urban Areas according to main activity classified by Sex and Age-groups.

This table which is prepared on full count basis and is similar to B–I Part A with the difference that it is confined to presentation of data for Cities and Non–City Urban areas only. This gives detailed information regarding the distribution of workers by industrial categories as also the number of workers and non–workers by sex and broad age-groups. Further, data have been presented in the table for individual towns/cities/Urban Agglomeration if any/non-city urban of the district.

iv) B–III Part A Classification of Workers and Non-Workers according to main activity by educational levels in Urban areas only.

This table furnishes cross tabulation of each category of workers and non-workers by literacy and educational levels. The Educational levels adopted are:

a) Primary
b) Middle
c) Matriculation or Higher Secondary
d) Non-technical diploma or Certificate not equal to degree
e) Technical Diploma or Certificate not equal to degree
f) Graduate degree other than technical degree
g) Post graduate degree other than technical degree
h) Technical degree or diploma equal to degree or Post graduate degree in (i) Engineering and Technology, (ii) Medicine, (iii) Agriculture, Veterinary and Dairying, (iv) Teaching and (v) Others.

The informations furnished in this table will be of much use for assessing the educational qualification of available man power, as this provides data relating to the employment of persons of different educational standards among the various categories of workers.

v) B-IV PART A Industrial Classification of persons at work other than at Cultivation as main activity by Sex and Divisions, Major Groups and Minor Groups.

This table presents the distribution of workers other than at cultivation, by Division, Major Groups and Minor Groups of the National Industrial Classification, 1970. For description of codes used for Divisions, Major groups and Minor groups refer to Appendix II of Part II-B (i)–Economic Tables, Census of India, 1971, Series 14 MYSORE. The data is presented for the entire district and for "Urban Areas" of the district.

This table is supplemented by an Appendix which furnishes details of workers engaged in Manufacturing, Processing, Servicing and Repairs by Household Industry and Non-Household Industry.

vi) The tables B-IV Part B and B-IV Part C which give industrial classification of workers in Manufacturing, Processing, Servicing and Repairs by Household Industry as main activity and workers in Non-household Industry, Trade, Business, Profession or Service as main activity by class of workers, age and sex, have not been presented in this volume as they are not compiled at the District level.

vii) B-IV Part D Industrial Classification by Sex and Class of Workers of persons at work in Non-household Industry, Trade, Business, Profession or Service as main activity.

This table corresponds to B-IV Part B of 1961 and gives distribution of Workers by each class *viz.*, employer, employee, single worker and family workers by Divisions, Major Group and Minor Groups of N. I. C.of 1970. This table is presented for "Total" and "Urban areas" of the district.

viii) B-V Part A Occupational classification by sex of persons at work according to main activity other than cultivation, and B-V Part B-Occupational classification by sex and class of Workers in Non-household Industry, Trade, Business, Profession or Service as Main Activity.

The above two tables are not compiled at the district level and therefore are not presented in this volume.

ix) B-VI Part A (i) Occupational Classification of persons at work according to main activity other than Cultivation classified by sex and age-groups in Urban areas only.

This table presents the data for Urban areas only. The population under each Division and Group of National Classifications has been classified by nine age-groups *viz.*, 0–14, 15–19, 20–24, 25–29, 30–39,

40–49, 50–59, 60+and "age not stated". For description of codes used for Divisions and Groups refer to Part B (iii)–Economic Tables, Census of India 1971, Series 14 MYSORE.

x) B–VI Part A (ii) Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in Urban areas only.

This table presents data for each Division and Groups of National Classification of Occupations by sex and educational levels.

xi) B–VI Part B (i) Occupational classification of persons at work according to main activity other than cultivation by sex and age groups in Rural areas only.

This table is similar to B-VI Part A (i) presenting data for "Rural areas" only.

xii) B–VI Part B (ii) Occupational classification of persons at work according to main activity other than cultivation by sex and educational levels in Rural areas only.

This table presents data similar to table B–VI Part A (ii) for Rural areas with slight modification in educational levels. The educational levels of persons at work adopted are Primary, Middle, Matriculation or Higher Secondary and Graduate and above.

xiii) B–VII Secondary work i.e.,; Persons having main activity (i) Cultivators, (ii) Agricultural labourers,(iii)Household Industry, (iv) Non-household Industry, Trade, Business or Service and (v) Non-workers classified by sex and by Secondary work (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry, (iv) Non-household Industry, Trade, Business or Service.

This table is a comprehensive table providing statistics of main activity by secondary work. The workers having main activity as cultivator; Agricultural Labourer; Working at household industry, at non-household industry, trade business or service and non-workers are further cross-tabulated in case their secondary work is either (i) Cultivation or (ii) Agricultural Labour or (iii) Household industry or (iv) non-household industry, trade, business, service *etc.*

xiv) B–VIII Persons classified as Non-Workers according to main activity cross-classified by sex, age-groups and type of activity.

This table presents data for Total, Rural and Urban areas at the district level regarding the main activity of non-workers. The main activities adopted for presentation of data are: (i) Students, (ii) House hold duties, (iii) Dependents and infants, (iv) Retired, rentier and persons of independent means, (v) Beggers, Vagrants *etc.*, (vi) Inmates of Penal, mental and charitable institutions and (vii) Others.

xv) The tables B–IX Part A (Non-Workers categorised as others aged 15 and above classified by sex, age-groups and educational levels in Urban areas only) and B–IX Part B (Non-Workers categorised as others aged 15 and above classified by sex, age–groups and educational levels in Rural areas only) have not been included in this volume as they are compiled at the State level.

C–SOCIAL AND CULTURAL TABLES

All the tables of the C Series except C–V, C–VII and C–VIII have been prepared and estimated on 10% sample in case of rural areas and 20% sample in case of urban areas. Table C–V, C–VII and C–VIII are based on full count. Tables C–I (Part A and Part B) are prepared and estimated on 4% sample.

C–I Household Composition Tables

Table C–I is presented here in two main parts, namely Part A and Part B. Part B is further subdivided into Part B (i) and Part B (ii).

For the preparation of table C–I Part A, C–I Part B (i) and C–I Part B (ii), a 4 percent sample of households was drawn in two stages. In the first stage a 20 percent sample of Effective Enumeration Blocks was selected systematically with a random start. In the second stage a 20 percent sample of Population Records was selected from each sampled block again systematically with a random start. The final tables were computed by estimating on the basis of sample figures.

C–I Part A Members of households by relationship to head of household classified by age-groups.

This table presents data for Total/Rural/Urban population at the district level. It gives the composition of the households by relationship to the head of the household classified by three broad age groups of head of household *viz.*, less than 30, 30–49 and 50 and above. "Age not stated" is included in "All Ages". Related and unrelated members of the households and the single member households are shown separately. The relationship to head of households is given for sons, brothers, daughters, sisters, father, mother and other male and female members separately for married persons and for other marital status combined. Among the married relations, the spouses of the heads of households are also given separately.

This table is of sociological interest indicating the extent of Joint family system. The age distribution of the heads of the households and their relations classified by marital status will further help study the future trend of the joint family system. At the 1961 Census its corresponding table C–I was prepared on 20% sample basis for Rural, Urban and Total population. The relationship to the head was shown as "married sons" and "other married relations" and were not classified by broad age-groups.

C–III Part A Age, Sex and Education in all areas

This table presents data on the total population of the district by educational levels under the age-groups 0–4, 5–9, 10–14, 15–19, 20–24, 25–34 and 35+and "age not stated". The educational levels adopted for this table are the same as that of B–III Part B. This table helps to assess the growth of literacy in the population as well as in the different age-groups with the last Census.

C–III Part B Age, Sex and Education in Urban Areas only.

This table presents similar data furnished in C–III Part A with slightly different educational levels. The educational levels adopted here are the same as that of B–III Part A.

C–IV Single Year Age Returns

This table has not been presented here, as this has been compiled at the State level only.

C–V Part A Distribution of Languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India.

This table which has been prepared on full count, has two sections *viz.*, (i) showing the distribution of speakers of language (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the constitution of India for the districts separately for Total, Rural and Urban areas cross-classified by sex and (ii) showing the distribution of speakers of these languages down to the taluk and town level cross-classified by sex. The data for the rural areas of the taluk are not presented but they can be derived by subtracting data in respect of towns within the taluk from the total taluk figures.

C–V Part B Speakers of Languages/Mother-tongues(inclusive of mother-tongues

where grouped) other than those specified in Schedule VIII to the Constitution of India.

This table presents speakers of languages/mother-tongues (inclusive of mother-tongues where grouped) other than those shown under Part A for the district down to the taluk and town level. This table is also presented in two sections, (i) showing the speakers of these languages for the State and district for total, rural and urban areas cross-classified for total, rural and urban areas cross-classified by sex, (ii) showing the distribution of these languages/mother-tongues for total areas of districts down to the taluk and town level cross classified by sex.

In both Parts A & B, mother-tongues have been grouped in some cases under the relevant language (S). This has been done on the basis of information readily available or in the light of studies already made. These identifiable mother-tongues which returned 10,000 or more speakers each at the all-India level have been grouped in Part A and B as shown below :

PART A

GUJARATI	Saurashtra
	Banjari, Bhojpuri, Braj Bhasha, Kulvi Garwali, Hindustani, Kangri, Kumauni, Lamani, Lambadi, Maithili, Marwari, Mewari, *Pahari, Rajasthani.
KANNADA	Badaga
MALAYALAM	Yerava
ORIYA	Relli
SINDHI	Kachchhi
TAMIL	Kaikadi, Yerukala/Yerukula
TELUGU	Vadari

PART B

BHILI/BHILODI	Paradhi, Varli
KHASI	War
LAHNDA	Multani

All other mother-tongues falling under Part B and which returned less than 10,000 speakers each at the All India level or were not 'identifiable' on the basis of information available as of date are included in the category 'Others' occurring as the last entry in Part B.

*PAHARI is combination of various speeches spoken over long stretches of areas where the speakers preferred to give a general name as Pahari. Similar is the case with NAGA appearing in Table C-V Part B and marked by asterisk therein.

C–VI Bilingualism

This table is not presented here, as this table is complied at the State level only.

C–VII Religion

This table, prepared on full count basis presents the distribution of population by religion for the district, taluk and city/town, Urban Agglomeration (if any). The religion figures for city/towns and urban agglomerations (if any), presented here supersede those presented in statement of Town Directory (Part X–A & B).

C–VIII Parts A & B Scheduled Castes and Scheduled Tribes

These tables, prepared on full count basis, present the data regarding total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and ciassification of workers into different industrial categories and non-workers.

APPENDICES :

Appendices to C–VIII based on full count have been prepared to present data regarding number of Scheduled Castes and Scheduled Tribes for Rural and Urban areas of the district. The distribution of Scheduled Castes and Scheduled Tribes by literacy and by Caste/Tribe is also given.

D-MIGRATION TABLES

All the tables in this series have been prepared and estimated on Sample basis (10 percent in case of rural areas and 20 percent in case of urban areas).

Migration data have been tabulated extensively with reference to the place of last residence and not to birth place, except in case of table D-I which is related to place of birth and affords comparability with 1961 Census data.

i) D-I Population classified by place of birth

This table corresponds to D-II of 1961 Census.

This table gives the distribution of population by birth place according to rural and urban areas. In this table the place of birth is classified as rural/urban for those individuals whose birth place happened to be within the country. For persons born outside India, rural/urban status was not elicited. Similarly the place of enumeration is classified separately by rural and urban areas. This gives an indication of rural/urban migration based on place of birth.

APPENDICES I and II:

These two appendices present data on the inter-district and inter-state migration.

ii) D-III Migrants to Urban Units (including Agglomerations having 100,000 and above population) classified by Sex, Broad Age-groups, Educational levels and in case of Workers by Occupational Divisions.

This table presents data for cities and urban agglomerations with a population of 100,000 and over relating to migrants based on the "Place of last residence". Workers are classified by occupational divisions, further cross-tabulated by age groups and educational standards. This gives an indication of occupations which attract migrants to cities. The educational standards of the workers give an insight into the skilled labour.

This table corresponds to D-IV of 1961 Census, which was prepared with reference to place of birth instead of last residence as in the present Census.

iii) D-IV Population of Urban Units (including Agglomerations having 100,000 and above population) classified by place of last residence and duration of residence.

This table like the previous table presents data regarding the extent of in-migration from rural and other urban areas into the Cities or Urban Agglomerations. In-migration from rural and urban areas have been classified by migrants who have been residents for (i) less than three years and (ii) for three years and more at the place of enumeration. The in-migrants from rural and urban areas have been further classified with reference to their place of last residence into (i) last resided in Rural/other urban areas of the same district, (ii) last resided in rural/Other urban areas outside the district but within the State and, (iii) last resided in rural/urban areas of other States in India. This table shows migrants from within the country and this table corresponds to Table D-V of 1961 which was prepared based on the place of birth instead of place of last residence at the present Census. This table will be helpful in having some idea of acceleration or deccleration of the volume of migration in terms of short them (less than three years) and long term migration (more than three years).

iv) D-V Migrant Workers and Non-workers according to main activites classified by place of last residence.

This table gives the distribution of migrants by place of last residence according to each of the industrial categories of workers and non-workers separately for Total and Urban areas at the district

level. Data for rural areas have not been presented but however they can be had by substracting the figures of urban areas from the "Total".

This table corresponds to D-VI of 1961, which was prepared with reference to the birth place instead of the place of last residence as at the present Census. Place of last residence is considered more relevant for the study of migration.

v) D–VI Migrants classified by place of last residence age-groups, duration of residence and marital status.

This is a new table for 1971 which presents the distribution of migrants based on the place of last residence by age-groups, marital status, duration of residence and by sex. Data presented at the district/ city and urban agglomeration level reflects an important sociological factor viz., the marital status of migrants by age.

Note : Table D-II in this series is omitted as it is not compiled at the district level. This table presents data regarding the "Migrants classified by place of last residence and duration of residence in place of enumeration" at the State level.

E–ESTABLISHMENT TABLES

All the tables in this series are prepared on full count basis.

i) E–I Distribution of Establishments by broad types

This is a new table for the 1971 Census and is prepared for Total, Rural and Urban areas of the district. The table gives the distribution of all establishments by three broad types viz., (a) Manufacturing, Processing or Servicing Establishments, (b) Trade or Business Establishments and (c) Other Establishments in each of the Government or Quasi Government, Private and Co-operative sectors of the economy. The Manufacturing, Processing or Servicing Establishments have been further classified as Registered factories, Unregistered workshops and Household industries. The Trade or Business establishments have been further classified as Registered factories, Unregistered workshops and Household industries. The Trade or Business establishment have been further classified as Wholesale, Retail and Others. The "Other Establishment" have been further classified as educational institutions, public health institutions and others.

ii) E–II Part A Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by Registered Factories, Unregistered Workshops and size of Employment.

This table presents distribution of Manufacturing, Processing or Servicing establishments other than household industries for the Total, Rural and Urban areas of the district. Useful information about the size of employment and number of units under each of the three categories of (a) Registered Factories, (b) Unregistered Workshops and (c) Household Industries in each Division, Major Group of N.I.C., 1970 is given.

iii) E–II Part B Distribution of Manufacturing, Processing or Servicing establishments other than Household industries classified by Industry fuel/power or manual used and size of employment.

Information about the kind of fuel/power used in the industrial establishments other than household industries by Divisions, Major Groups of N.I.C. 1970 with the size of employment for Total, Rural and Urban areas of the district is given in this table.

iv) E–II Part C Distribution of Household Industry Establishment classified by Industry, Fuel/ Power, used and size of employment.

Information on Household industry Establishments by Division, Major Groups of N.I.C. 1970 about kind of fuel/power used, by broad employment size groups is given at the district level, for Total, Rural and Urban areas of the district.

v) E–III Distribution of Trade/Commercial Establishments classified by the type of Business or Trade and size of Employment.

Information regarding Trade/Commercial establishment classified by type of Business or Trade and size of employment for Total, Rural and Urban areas of the district is given in this table. All Trade and Commercial establishments have been further classified under each Division/Major Group of N.I.C., 1970.

vi) E–IV Distribution of Establishments (Other than Manufacturing, Processing, Servising or Business and Trade Establishments) by size of employment.

The table gives the distribution of establishments (other than Manufacturing, Processing, Servicing or Business and Trade establishments) by size of employment for Total, Rural and Urban areas separately under each Division/Major Group of NIC, 1970. The establishments are further classified by size of employment.

F & G SERIES

The F & G series, which furnish data on fertility and special tables for degree holders and diploma personnel are not presented in this volume as the data have been compiled at the State level only.

H–HOUSING TABLES

All the tables in this Series are based on 20 percent Sample of Census.

i) H–I Census Houses and the uses to which they are put

This table presents data on Census houses and the uses to which they are put for the Total, Rural, Urban areas and cities at the district level. The Census houses are classified as (a) Residence, (b) Shop-cum-Residence, (c) Workshop-cum-Residence including household industry, (d) Hotels, Sarais, Dharmashalas, Tourist homes and Inspection houses, (e) Shops excluding eating houses, (f) Business houses and offices, (g) Factories, Workshops and Worksheds, (h) Restaurants, Sweet, meat shops and eating places, (i) Places of entertainments and community gathering, Panchayatghar (excluding places of worship), (j) Places of worship and (k) Others.

The data pertaining to educational institutions, public health and medical institutions *etc.*, are included under "Others". This information is available in table E-I.

This table corresponds to E-I of 1961 with a few changes. In 1961 the data were presented down to the taluk level, but in this Census it has been given only for District and City.

ii) H–II Distribution of Census Houses by predominant material of wall and predominant material of roof.

This table gives the structural conditions of the houses according to type of material for wall and roof. The table is prepared for the same units as in table H-I. This table corresponds to table E-IV of 1961 with the difference that in 1971, this table has been prepared for Census houses while in 1961 Census households living in Census houses were cross classified by material of wall and roof.

This table has been supplemented with an Appendix which gives cross classification of wall and roof used in Census houses.

iii) H-III Households classified by number of members and by number of rooms occupied.

This table is prepared for the same units as in Table H-I. This table helps in the measurement of congestion and overcrowding in households.

This table corresponds with table E-IV of 1961 Census excepting that addition of information for households with unspecified number of rooms and households with details unspecified are shown in 1971. Institutional households are not reckoned for purposes of this table.

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

i) SC-I Industrial Classification of persons at work and Non-Workers by Sex for Scheduled Castes

For convenience, this table which is prepared in two parts, Part A for Rural areas and Part B for Urban areas presents a distribution of Scheduled Castes into two broad divisions : (i) Workers and (ii) Non-Workers. Workers are further classified into nine industrial categories *viz.* I-Cultivators ; II-as Agricultural Labourers ; III-Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities ; IV-Mining and Quarrying ; V-Manufacturing, Processing, Servicing and Repairs : (a) At Household Industry ; (b) Other than Household Industry ; VI-Construction ; VII-Trade and Commerce ; VIII-Transport, Storage and Communications and IX-Other Services. Non-Workers are shown under category X.

The information contained in this table would be useful for the formulation of welfare and other measures for the amelioration of the conditions of the Scheduled Castes and Scheduled Tribes, who have been given certain special rights and privileges under the constitution.

This table corresponds to SCT-I Part A of 1961 with slight changes in presentation. In 1961, figures were furnished for each synonym or, generic name of the Scheduled Caste as an appendix, whereas in 1971, only names of the Scheduled Castes as they appear in the Presidential order, for groups as a whole are given.

ii) SC-II Age and Marital Status for Scheduled Castes

This table gives sexwise figures for each Scheduled Caste separately by broad age groups and marital status. Figures for total population only are given without the rural-urban break-up. This is an important demographic table which is helpful to the sociologist for the study of correlation between age and marital status among the Scheduled Castes. Figures are presented for three broad age groups *viz.*, 0-14, 15-44, 45+ and Age not stated (A.N.S.) cross classified by marital status comprising Never married, Married, Widowed, Divorced or Separated and Unspecified status, in respect of each Scheduled Caste. It may be observed in the table that there are no figures under "Age not stated" category.

iii) SC-III Part-A Education in Urban Areas for Scheduled Castes, and SC-III Part-B Education in Rural Areas for Scheduled Castes.

Table SC-III is presented in two parts : namely Part A relating to urban areas and Part B to rural areas, and gives statistics about literacy and education among the members of each Scheduled Caste by sex-break up. In Part A of the table which pertains to Urban areas, the educational standards are classified into : Literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, Non-technical Diploma not equal to degree,

Technical Diploma not equal to degree, University Degree or Post Graduate degree, other than technical degree or Diploma equal to degree or Post graduate degree. This table corresponds to SCT-III PartA (i) of 1961.

In Part B, the educational standards are confined to : Literate (without educational level), Primary or Junior Basic and Matriculation and above. This table corresponds to SCT-III Part B (i) of 1961.

This table helps in reviewing the progress of education among Scheduled Castes in Rural and Urban areas separately.

iv) SC-IV Persons not at work classified by Sex, Type of Activity and Educational Levels, for Scheduled Castes :

This table provides the district level statistics relating to the Non-working population of the Scheduled Castes, cross classified by educational levels for Total, Rural and Urban areas separately. The non-workers are categorised into (i) Students, (ii) House-hold duties, (iii) Dependents and Infants, (iv) Retired, Rentier and persons of Independent means, (v) Beggars, Vagrants etc., (vi) Inmates of penal, mental and charitable Institutions and, (vii) Others. The Educational levels adopted here are Literate (without Educational level) Primary or Junior Basic, Matriculation and above but below Graduate, Graduate and above. Data are presented for all Scheduled Castes and not for individual castes. This helps in the study of Non-working population among Scheduled Castes and their various activities. This table is broadly comparable to Table SC-I of 1961.

v) ST-I Industrial Classification of persons at work and Non-workers by Sex for Scheduled Tribes

This table presented in two Parts, Part A and B gives separately for rural and urban areas, the distribution of Scheduled Tribes into two broad divisions of (i) Workers and (ii) Non-workers. Workers are further classified into nine industrial categories viz. I – Cultivators ; II – as Agricultural Labourers ; III – Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities ; IV– Mining and Quarrying ; V – Manufacturing, Processing, Servicing and Repairs ; (a) At Household Industry ; (b) Other than Household Industry ; VI – Construction ; VII – Trade and Commerce ; VIII – Transport, Storage and Communications and, IX – Other Services. Non-workers are shown under category X.

Data for each Scheduled Tribe by sex break up at the district level is also given. The information contained in this table would be useful for the formulation of welfare and other measures for the amelioration of the conditions of Scheduled Castes and Scheduled Tribes, who have been given certain special rights and privileges under the Constitution.

This table corresponds to SCT-I Part B of 1961 with slight changes in presentation. In 1961, figures were furnished for each synonym or, generic name of the Scheduled Tribes as an Appendix, whereas in 1971, only names of the Scheduled Tribes as they appear in the Presidential Order, for groups as a whole are given.

vi) ST-II Age and Marital Status for Scheduled Tribes

This table gives sex wise figures at the district level for each Scheduled Tribe separately by broad age groups and marital status. This is an important demographic table which helps the sociologist to study the relationship between age and marital status among the Scheduled Tribes. Figures are presented for three broad age groups *viz.*, 0–14, 15–44, 45+ and age not stated (A.N.S.) cross classified by marital status comprising, Never married, Married, Widowed, Divorced or Separated and Unspecified status, in respect of each Scheduled Tribe. It may be observed in the table that there are no figures under "Age not stated".

vii) ST-III Part-A Education in Urban Areas for Scheduled Tribes
and
Part-B Education in Rural Areas for Scheduled Tribes

Table ST-III presented in two parts, namely Part A relating to Urban areas and Part B to Rural areas, gives statistics about literacy and education among the members of each Scheduled Tribe by sex-break up, at the district level. In part A of the table which pertains to urban areas, the educational standards are classified into: Literate (without educational level), Primary or Junior basic, Matriculation or Higher Secondary, Non-technical Diploma not equal to degree, Technical Diploma not equal to degree, University degree or Post graduate degree other than technical degree, Technical degree or diploma equal to degree or Post graduate degree. This table corresponds to SCT-III Part A (ii) of 1961.

In Part B, the educational standards are confined to: Literate (without educational level), Primary or Junior Basic and Matriculation and above. This table corresponds to SCT-III Part B (ii) of 1961.

This table helps in reviewing the progress of education among Scheduled Tribes in Rural and Urban areas separately.

viii) ST-IV Persons not at work classified by Sex, Type of Activity and Educational Levels, for Scheduled Tribes

This table provides the district level statistics relating to the Non-working population of the Scheduled Tribes, cross classified by educational levels, for Total Rural and Urban Areas separately. The Non-workers are categorised into (i) Students, (ii) Household duties, (iii) Dependents and Infants, (iv) Retired, Rentier and persons of Independent means, (v) Beggars, Vagrants etc., (vi) Inmates of penal, mental and charitable Institutions and (vii) Others. The educational levels adopted here are Literate (without Educational level), Primary or Junior Basic Matriculation and above but below graduate, Graduate and above. Data are presented for all Scheduled Tribes in the district and not for individual Tribes. This helps in the study of Non-working population among Scheduled Tribes and their various activities. This table is comparable to Table ST-II of 1961.

ix) ST-V Scheduled Tribes by Religion

This table has not been presented because all the members of the Scheduled Tribes in Mysore State belong to Hindu religion.

Note : 1. The Density figures shown under column 4 for Urban Area of District/Taluk are worked out using the area figures corrected upto two places of decimals obtained by adding the area of individual town in the respective units and not using the area figures given in the table. For 'Total' and 'Rural' the density is worked out on area figures corrected upto one place of decimal.

2. Towns treated as such for the first time in 1961 Census, which continue as towns in 1971 Census are shown with asterisk (*) on their left.

3. Towns treated as such for the first time in 1971 are printed in italics.

4. The following abbreviations have been used within brackets against names of the towns to indicate the civic status of a town.

C	—	Municipal Corporation
B	—	Cantonment Board
M	—	Municipal Town
NAC	—	Notified Area Committee
P	—	Panchayat
SA	—	Special Area
SB	—	Sanitary Board
TB	—	Town Board
TP	—	Town Panchayat

5. The area of the District represents 'Provisional Geographical Area' and have been supplied by the Surveyor General, India. The figures for the Urban areas are those supplied by the Local Bodies. Area figures for Rural areas are derived by subtracting the Urban areas from the total area of the District as reported by the Surveyor General, India. The total of the area figures of the Taluks will not tally with the district figures because the former represents 'Land-use' area and is derived from the figures supplied by the Director of Survey, Settlement and Land Records in Mysore.
