VILLAGE & TOWNWISE PRIMARY CENSUS ABSTRACT

BANASKANTHA DISTRICT

N. R. VARSANI
of the Indian Administrative Service,
Director of Census Operations,
Gujarat

The office of Geological Survey of India proved that multi metals like copper, zinc and lead are found in Ambaji area in Banaskantha District. The Gujarat Mineral Development Corporation, a Government of Gujarat undertaking was granted a lease in this area. The Corporation estimated the quantity of multi-metals in this area at 7.13 million tonnes. There is an average proportion of 3.3% lead, 5.5% zinc and 1.3% copper in the minerals. The quantity of these minerals at Ambaji is much more valuable than multiminerals found at anyother place in the country.

Further research on this project is in progress in the modern laboratory established at Ambaji by the Corporation, with most modern purification and analytical equipments. Moreover, a pilot plant with 50 tonne per day capacity has been established at a cost of Rs.42 lacs.

On commissioning production on commercial basis foreign exchange of Rs. 25 crores per annum is estimated to be saved. Further, this project will augment sales tax, octroi and royalty of the State. This project will provide the employment opportunities to about 1,000 persons directly and to about 4,000 persons indirectly in this economically backward district. When fully commissioned, this project will be a prime enterprise of the Government of Gujarat.

FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981 some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0 - 6 age group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or

from the published records, both the computer and manual codes for each village have been provided for the 1991 Census alongwith the corresponding codes of 1981.

This publication is a joint venture of the State Government/U.T. administration and the Census Organisation. The data have been collected and compiled under the direction of Shri N.R. Varsani, Director of Census Operations, Gujarat on behalf of the State Govt./U.T. administration which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M. Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K. Singh, Deputy Director who was assisted by Shri N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

PREFACE

The 1951 Census, the first Census of Independent India, marked a turning point in the presentation of data when, for the first time, publication of District Census Hand Books, giving basic data about each village, commenced. Incidentally the census coincided with the launching of the First Five Year Plan for developing the key sectors of the country's economy as well as ushering in implementation of development projects for the socio-economic development of masses. Since 1971 District Census Hand Books are prepared by the Census Organisation and the District Census Hand Book Unit of the State Government during every decennial censuses. These are published by the Government of Gujarat at their own cost. The 1991 District Census Hand Books are fifth in the series of such publications. However, it was the 1961 Census that gave a more scientific approach to the presentation of data in the District Census Hand Book by giving among others, division of workers as per standard industrial classification into nine industrial categories as well as non-workers, who were conceptualised for the first time.

The 1991 District Census Hand Books comprise of two parts. The Village and Town Directory in Part-A and villagewise/townwise Primary Census Abstract in Part-B.

Part-A Village Directory

The village directory provides basic data relating to infrastructure, such as pucca/kuccha approach roads to villages. The data about communications facilities, such as bus stop, railway station as well as water ways and availability of electricity in the villages under the rural electrification programme are also given. Amenities in the village include provision of educational, medical, post and telegraph as well as provision of drinking water facilities. The demographic data covering total population and number of households as well as land use data are also given therein.

Town Directory

Here, area of towns, population, status, growth, brief history, physical aspects, communications, municipal finances, trade and commerce, industry, banking facilities, civic and other amenities etc. in each town are given.

Part-B Primary Census Abstract

The primary census abstract mainly deal with presentation of basic data like number of occupied residential households, number of households, sex-wise break up of population (including houseless and institutional population), Scheduled Castes and Scheduled Tribes population, no. of literates, main workers by standard industrial categories, marginal workers and non-workers of village/town/taluka/district, etc. In addition to give these information, an Appendix to highlight urban block level total population, Scheduled Castes and Scheduled Tribes population is also incorporated.

In the plan of presentation of these data, certain inset tables based on census and data on amenities available in the district precede the data shown in Parts A & B. Besides, an attempt has also been made to define Census concepts, brief history of the district, major/peculiar characteristics of the district as regards availability of economic resources, description of places important from such aspects as religious, historical, archaeological, etc., and those purely serving interest of tourists are also described. This has been specially included in order to give a filip to the aspect of tourism, which is so very assiduously being developed by the State and Central Governments, to attract both inland and foreign tourists traffic. In addition, district/taluka maps indicate respective administrative boundary of units, location of towns/villages having population above certain levels, amenities and other details.

The Five Year Plans have come to stay in the country and whatever development is achieved as a result of implementation of planning from the bottom level such as development of infrastructural facilities as well as basic amenities, etc., is reflected in the District Census Hand-Books and they give to the readers a searching eye whether the development over the years in villages/talukas/districts is lopsided or upto the mark. This is the basic requirement of this type of publications and an attempt has

been made to show whether the Census Hand Books reasonably fulfill these aspirations/requirements.

These District Hand Books are thus useful to planners in planning from bottom as well as to administrators, researchers, educational institutions, including universities and other socio-economic research centres, demographers and demographic research centres as well as students conducting research in demography, social and economic studies, as well as to the local bodies like Panchayats, Municipalities and Municipal Corporations, etc.

The Director expresses his deep gratitude to the following officers of the Government of Gujarat, General Administration Department, for their valuable, help and co-operation in fulfilling all administrative requirements intime for bringing out these publications.

Shri H.R. Patankar, the then Chief Secretary, Shri S.L. Varma, the then Additional Chief Secretary, Shri J.A. Pandya, Deputy Secretary, Shri A.H. Manek, the then Under Secretary, Shri H.L. Madia, Under Secretary, Shri A.H. Gamit, the then Section Officer and Shri M.S. Nanavati, Assistant.

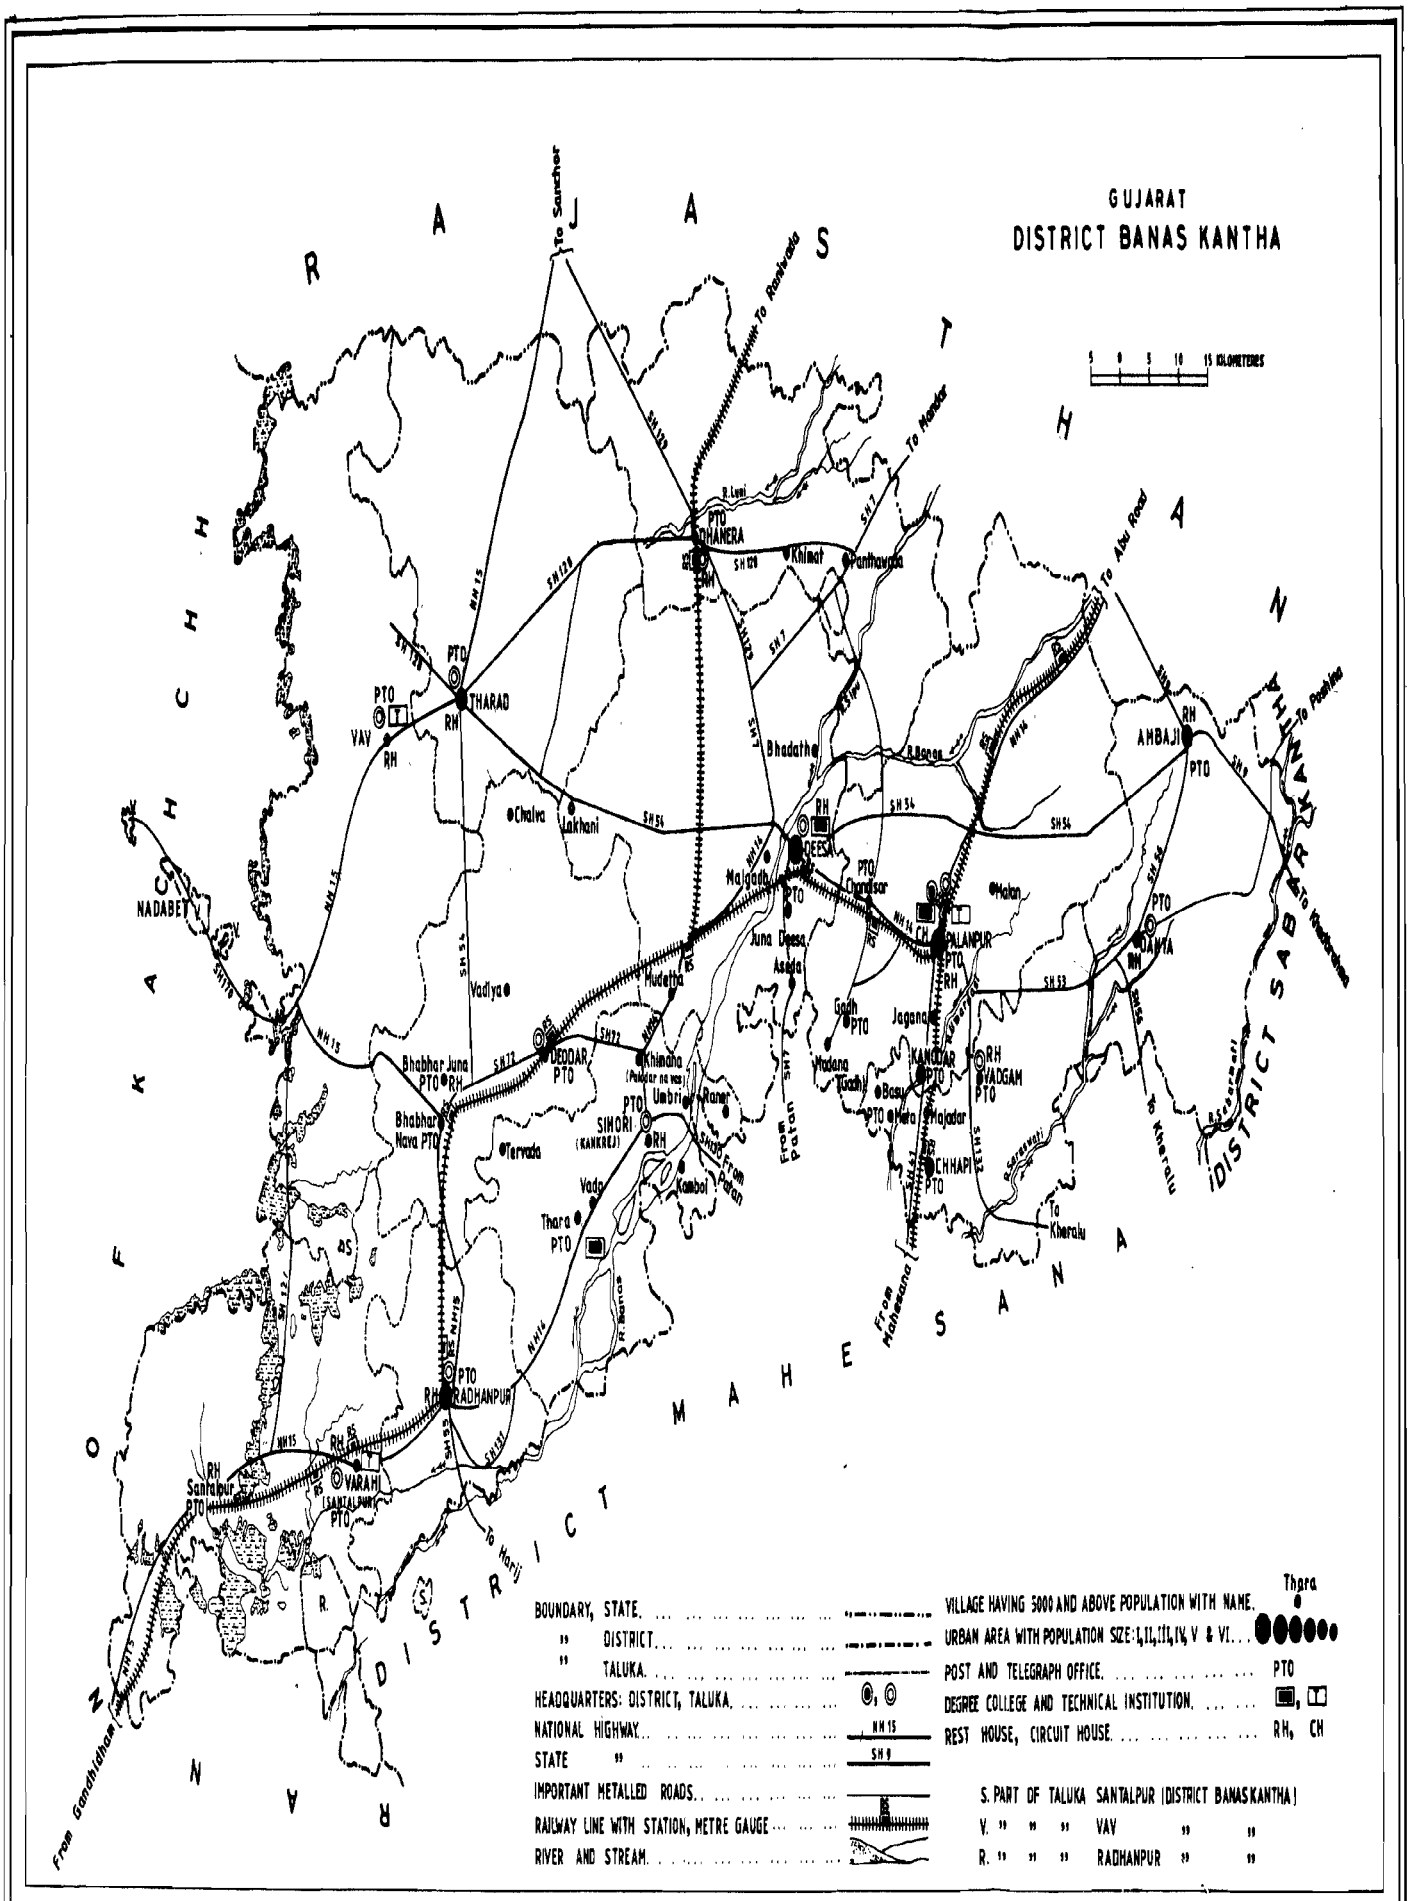

Shri V.B. Savdasia, Director, Economics and Statistics has also helped this organisation not only by placing at the disposal of Census services of competant personnel on deputation as well as provided valuable official statistics for this publication, which have since been incorporated.

The District Collector and the District Development Officer and their concerned staff have extended their warm and wholehearted co-operation for carrying out field work for the census and District Census Hand Book work. A large number of officials of Directorate of Census Organisation and District Census Hand Book Unit have contributed in bringing out these publications.

The Registrar General and Census Commissioner of India, Shri A.R. Nanda, provided encouragement and gave valuable guidance at every stage of the Census work. The various officers in his office particularly Shri N. Rama Rao, Shri M.K. Jain, Smt. Minati Ghosh, Shri A.K. Singh, Shri N.S. Soam and Shri J.P. Joshi had also rendered assistance in no small measure in bringing this work at the final stage of printing.

ANALYTICAL NOTE

Introduction

Keeping in view the needs of planners, specifically for micro-level planning, District Census Hand Book is brought out in two parts i.e. part A and part B for each district in one volume. The part A presents basic data pertaining to the infrastructural facilities and amenities for each village and town, whereas part B gives the primary census abstract data for each village and for each ward of the town. The village wise infrastructural and amenities data were collected through "Village Directory" form from the village level officials i.e. Talati-cum-Mantri, while the townwise infrastructural and amenities data were collected through "Town Directory" form from the local bodies viz. Municipal Corporations, Municipalities, Nagar Panchayats, Village Panchayats etc. The non-census data i.e. amenities and land use pertained to the year 1989-90. The primary census abstract data were compiled from the Individual Slips of 1991 Census and related to the Reference Date as Sunrise of 1st March, 1991.

It is utmost important for the "District Census Handbook" users to acquaint themselves with different census concepts adopted during the houselisting work as well as during the actual census enumeration work, as the tables presented in this publication relate to different census concepts, viz. rural and urban areas, census house, census household, scheduled caste scheduled tribes, literates, main worker, marginal worker, non-worker etc.

[I] Census concepts and definitions

Rural areas

The Census data are being presented separately for rural and urban areas. It is rather difficult to give an exact definition for rural areas as far as census is concerned. The urban areas are defined in the census. The remaining areas not classified as urban area are known as rural areas. Thus, a rural area is non-urban consisting of 'revenue village' with well defined boundaries, which is the basic lowest unit in the hierarchy of administrative units. The revenue village may comprise several hamlets, yet the entire village is considered as one unit for the presentation of census data. As reported by concerned authorities, the forest area is also treated as separate forest village.

Urban areas

Urban areas are clearly defined for the purpose of Census. Urban areas comprise (1) Statutory towns and (2) non-municipal towns i.e. census towns.

(i) Statutory towns

All places with local authorities like Municipal Corporations, Municipalities, Cantonments and Notified town areas are treated as statutory towns.

(ii) Non-Municipal towns or Census towns

All other places (except statutory towns) which satisfy the following three criteria viz. (a) A minimum population of 5,000 (b) A density of population of atleast 400 per sq.km. or 1000 per sq.mile (c) Atleast 75 per cent of the male working population engaged in non-agricultural and allied pursuits.

The three criterias specified above were strictly applied to all revenue villages based on the preceding census data i.e. 1981 Census data and all revenue villages which satisfied the above criteria were declared as census towns or non-municipal towns for the purpose of census. In the 1981 and 1991 censuses, industrial category III specifying activities like fishing, livestock, hunting, plantations and orchards, etc. were treated at par with cultivators and labourers for the purpose of the third criterion mentioned above. Thus, the third criterion was calculated with reference to the figures for working categories.

The above definition of urban area differs slightly from that of 1961 and 1971 censuses, wherein activities such as fishing, livestock, hunting, plantations and orchards etc. were treated under non-agricultural activities.

Urban Agglomeration

The concept of urban agglomeration, adopted for the first time in the 1971 Census is an improvement over the concept of town group adopted in the 1961 Census. The said concept has been continued in the subsequent censuses of 1981 and 1991. Very often, the growth of towns overlapped the statutory limits of a city or a town. These were reflected in large railway colonies, university campuses, port areas, industrial areas etc. which grow outside the limits of a town, but they revealed a continuous growth with the town. These outgrowths may or may not by themselves qualify to be treated as separate towns, but they deserve to be considered as urban areas. Such a town with its outgrowth area is treated as one urban unit and called 'Urban Agglomeration'. The constituents of an urban agglomeration should satisfy the conditions of urbanization, continguity and viability. These are the general

principles based on which urban agglomeration are formed.

Following are the probable different situations in which urban agglomerations could be constituted.

(i) a city or town with continuous growth, which is outside the statutory town limits, but coming within the boundaries of the adjoining village or villages,

(ii) two or more adjoining towns with their outgrowths,

(iii) a city and one or more adjoining towns with their outgrowths, all of which formed a continuous spread.

Census House

A 'Census House' is a building or a part thereof having a separate main entrance from the road or a common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both. In case of a building having a number of flats or blocks, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard, leading to the main gate, were considered as separate census houses.

Census Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a combination of both. Examples of such unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For Census purposes, each one of these types is regarded as a 'household'.

Scheduled Castes/Scheduled Tribes

The Scheduled Castes and Scheduled Tribes as notified under the constitution (Amendment Act of 1976) for Gujarat State have been treated as Scheduled Castes and Scheduled Tribes for the purpose of enumeration. A list of such Scheduled Castes/Scheduled Tribes notified for Gujarat is as under.

The enumerators were instructed to record a person as a Scheduled Caste, Scheduled Tribe provided the name given by the person was found in the above list. Scheduled Castes may belong to Hindu, Sikh or Buddhist religion. However, a person belonging to Scheduled Tribe can profess any religion.

Literates

A person, who can both read and write with understanding in any language, is taken as literate. A person who can merely read but can not write is not considered as literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children upto the age of 6 years are treated as illiterates, even if they are school going children and might have picked up reading and writing a few odd words.

Work

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in a nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Reference period for classification of economic status

In 1991 Census, the economic status of a person has been adopted into following 3 categories, viz. (1) Main Worker (2) Marginal Worker and (3) Non-worker.

The economic status of a person is classified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration.

Main Worker

The main worker is a person who works for the major part of the year i.e. for the 6 months or 183 days or more in one or more than one activity.

Marginal Worker

The marginal worker is a person who works for a period of less than 6 months or 183 days in one or more than one activity.

Non-Worker

A non-worker is a person who had no economic activity anytime during the period of reference of 1 year preceding the date of enumeration. These would cover all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last 1 year. Full time students and children attending schools, all dependents such as infants or children not attending schools or persons permanently disabled from work because of illness or old age, persons retired from service or rentier, beggers, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all non-workers who may not come under any of the above categories.

The activity of main workers is classified into following 9 categories viz. (1) Cultivator (2) Agricultural labourer (3) Livestock, forestry, fishing, hunting and plantations, orchards and allied activities (4) Mining and quarrying (5) Manufacturing, processing, servicing and repairs (6) Construction (7) Trade and commerce (8) Transport, storage and communications and (9) Other services.

1. Cultivator

A person is considered as a cultivator if he or she has been engaged either as an employer, single worker or family worker in cultivation of land owned or held from Government or from private persons or institutions for payment in cash, kind or share in cultivation including supervision or direction of cultivation.

Cultivation involves ploughing, sowing and harvesting and production of cereals and milled crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnut, tapioca, pulses, raw jute, kindered fibre crop cotton etc. It does not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

2. Agricultural Labourer

A person who works on another person's land for wages in cash, kind or share is considered as an agricultural labourer. He/she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land, on which he/she works.

3. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities

Those who are engaged in rearing up goats, sheep, horses, pigs, ducks, bees, silk-worms are treated as workers under livestock. Similarly, persons engaged in fishing or doing plantation or conservation of forests come under this category of workers.

4. Mining and Quarrying

Persons engaged in different type of mines such as coal, lignite, crude petroleum, natural gas, iron ore, manganese, gold, silver, copper ores and quarries of stones, clay and sandpits, precious and semi precious stones, mica etc. come under this category of workers.

5. Manufacturing, Processing, Servicing and Repairs

The category has been divided into two sub-categories namely (a) Household Industry and (b) Other than Household Industry.

5 (a) Household Industry

A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and within the premises of the house where the household lives in urban areas and that it does not run as a registered factory.

A Household Industry further related to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as that of a pleader, astrologer etc. or merely trade or business, even if such professions, trade or services are run at home by members of household.

5 (b) Other than Household Industry

This category of industry deals with production, processing, servicing and repairing done in places other than in household industry.

6. Construction

All persons engaged in construction and maintenance of buildings, roads, railways, telegraphs, telephone, waterways and water reservoirs, hydroelectric projects, industrial plants and activities allied to constructions such as plumbing, heating and air conditioning installation, setting of tiles, marble, brick etc. are treated as workers under this category.

7. Trade and Commerce

This category includes all workers employed in wholesale and retail trade of all kinds and other commercial activities like financing, insurance, real estate and business services and legal services as are rendered by advocate, barristers, pleaders etc.

8. Transport, Storage and Communications

All persons employed in any form of transport either by road, rail, water or air and persons participating in storage, warehousing activities and communications such as postal, telegraphs, telephones and broadcasting are treated workers under this category.

9. Other Services

This class includes all workers engaged in services like electricity, gas, water, public administration and defence services, sanitary services, education, scientific and research services, medical and health services, religious and welfare services, recreational and cultural services and personal services. Thus, it would appear that this category covers all such workers who do not come under any of the industrial categories mentioned in the foregoing paragraphs and also those whose activities have not been adequately described. General labourers who are accustomed to work in various miscellaneous jobs are also classified under 'other services'.

(II) Brief History of the District and District Census Hand Book

(a) History of the District

The district takes its name from the river Banas which flows through the district. The Banaskantha district as its name indicates consists of the territories situated on and around the river Banas.

Literary and epigraphic sources hardly throws any light on the early history of this district in particular. But it may be assumed that the district was ruled by the same successive dynasties that ruled over other parts of Gujarat.

The territory now forming Banaskantha district has passed many hands during historical times. The region was first under the sway of different Rajput dynasties of Anhilwad, where after it came under the Sultans of Ahmadabad. It then passed on to the Mogul Emperors, the Marathas and lastly the British. The princely States under the charge of the British Superintendency included States of Palanpur, Radhanpur, Tharad, Merwada, Vav, Danta, Deodar, Varahi, Tervada, Suigam, Santalpur, Bhabhar and Chadchat. The Kankrej petty States remained under Mahikantha Agency till 1844 when they were transferred to the Palanpur.

The former Palanpur State was a princely State, enjoying the first class rank entitled to a guard of honour and a salute of 11 guns. In the 14th century it was ruled by Palansi Chohans. Early in the 17th century the Chohans were displaced by Musalman rulers of Jhalor family who continued to rule till Independence.

Danta was second class in rank and enjoyed the special privilege of having within its territory the famous shrine of goddess 'Amba Bhavani'

The former Radhanpur State was the seat of the Babi ruler who was first class chief entitled to a guard of honour and a salute of 11 guns. The name of Radhanpur town, capital of the former State is said to have been derived from Radhankhan, a descendant of Fatehkhan Baloch who was under the Sultan of Ahmadabad. As result of integration of Indian States in the year 1948, the States of Palanpur, Radhanpur, Danta, Tharad and Vav, Thara Jagirs and the old Agency Thanas of Bhabhar, Deodar, Sihori, Varahi and Santalpur as well as the sub-Thana of Suigam merged into the district forming part of the then Bombay State. In November, 1956 the States were reorganised and the bigger bilingual State of Bombay was formed with Vidarbha, Marathawada, Saurashtra and Kachchh regions. The Banaskantha district alongwith the other districts of Ahmadabad Division formed part of the bigger bilingual State.

Lastly, the Bombay State was bifurcated on 1st May, 1960 and separate States of Gujarat and Maharashtra were formed. Since that date, the Banaskantha district became a part of the Gujarat State.

(b) History of District Census Handbook

Before the 1951 Census, the Census figures were published in a booklet known as 'Village Handbook' which contained only villagewise population figures. These books were prepared and published by the Directorate of Census.

The District Census Handbook was introduced for the first time in 1951 Census by the Directorate of Census. It comprised the villagewise primary census abstract figures and information on available amenities. It also contained several tables relating to the district. It varied in content and size from State to State depending upon the resources offered by the respective State Governments.

In 1961 Census, a uniform pattern of District Census Handbook was adopted throughout the country. The project was jointly executed by the Directorate of Census and the State Government. In addition to the English version, it was published for the first time in Gujarati language. The District Census Handbook 1961 was published in three parts viz. Part I, Part II and Part III. Part I related to Introductory Note i.e. general and economic information for the district and a brief gazetteer of place names. Part II pertained to census tables, villagewise list of industrial establishments, tables on handicrafts and departmental statistics. Part III consisted on village directory covering the amenities and primary census abstract data combined in one statement. It also covered district and taluka maps.

It is worthwhile here to note that the State Government has created a separate unit for the preparing and publishing District Census Handbooks from 1971 Census onwards. In the 1971 Census, the contents of District Census Handbook were modified. In the preceding censuses, the data on amenities and primary census abstract were covered in one statement whereas in 1971 Census, the data on amenities and primary census abstaract were separated into two different parts. Thus,the coverage of amenities data was extended and the land use data were introduced for the first time from 1971 District Census Handbooks. Moreover, a separate portion known as 'Town Directory' was also incorporated for the first time in the District Census Handbook. The 1971 District Census Handbook was published in three parts viz. Part A, Part B and Part C. Part A contained the village and town directory. Part B contained village and townwise primary census abstract data and part C contained official statistics, besides full count census tables, urban census tables and analytical report on census and related statistics socio-economic and cultural tables (Rural areas) and housing

tables. Part A and Part B were combined and published in one volume.

The District Census Handbook 1981 was brought out in two parts , Part A and Part B. Part A contained the village and town directory whereas Part B included the primary census abstract data, both General and Scheduled Castes and Scheduled Tribes. Both parts were published in one volume. Part C brought out for 1971 Census was dropped in 1981 Census. However, official statistics and some portion of analytical notes of part C of 1971 Census were also included in the 1981 Census Handbook.

For the 1991 Census, the District Census Handbooks are prepared more or less on the same lines of the preceding 1981 Census.

[III] Scope of Village Directory, Town Directory, and Primary Census Abstract

As mentioned earlier, the District Census Handbook is brought out in two parts - Part A and Part B. Part A covers the non-census data of village directory and town directory, whereas part B covers the primary census abstract data of 1991 Census. The scope of village directory, town directory and primary census abstract is discussed below.

Scope of Village Directory

For the census work, the villages in the district have been arranged talukawise (C.D. blockwise) and within the taluka(C.D.block), they are shown location codewise. Each village is assigned a location code number for the purpose of identification. Prior to the village directory information, a map and alphabetical list of villages for each taluka (C.D. block) is given in Part A. Village directory contains the non census data of each village. It gives the villagewise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, markets/hats, power supply, post and telegraph, communications, approach road to village and distribution of landuse area. In addition, it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the co-relation of amenities with the number of households and population they serve. If an amenity is not in existence in the referrant village, the distance in broad ranges from the nearest place, where the amenity is available is given. The broad ranges are (-5 kms.), (5-10 kms.) and (10+kms.)

The format of village directory has been revised and some items such as staple food of the people, places of religious, historical and archaeological interest, copies of the newspaper coming in the villages, number of motor-cycles and scooters, number of cars and jeeps and number of tractors available in the villages have been excluded from the village directory of 1991 District Census Handbook. At the end of village directory, the following 4 appendices have been included in the District Census Handbook 1991, on the same lines of preceding 1981 Census.

Appendix I gives talukawise (C.D blockwise) information regarding the facilities like educational, medical, drinking water, post and telegraph, communications and power supply available in the villages. In addition, information about the number of institutions is given talukawise (C.D. blockwise) so far as educational and medical institutions are concerned.

Appendix II presents land utilisation data in respect of non- municipal towns i.e. places considered as towns for census purposes.

Appendix III shows a talukawise (C.D. blockwise) list of villages where six amenities (viz. education, medical, post and telegraph, market/hat, communication and power supply) are not available and lastly.

Appendix IV presents a talukawise (C.D. blockwise) list of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by various ranges.

Scope of Town Directory

Town Directory covers the non-census data for each town. It presents important and useful information like civic and other amenities available in all the towns of the district. The information in town directory is covered in following 7 statements, viz. statements I to VI and IV-A. This statements used in the preceding 1981 Census are identical for current 1991 Census also. The details of town directory statements are given in brief

Statement I describes the class, name, civic administrative status of the town, its area, growth rates, density and sex ratio.

Statement II indicates physical aspects of each town.

Statement III presents the details of the income and expenditure figures for each town.

Statement IV indicates civic and other amenities in respect of each town.

Statement IV-A gives information about civic and other amenities in notified slums.

Statement V provides the information on availability of medical, educational, recreational and cultural facilities in towns.

Statement VI shows information about the trade, commerce, industry and banking for each town.

In all the statements except IV-A, the towns are arranged in the alphabetical order within the district. The details of these statements are given in the analytical portion of the town directory. In addition to the above statements, an appendix showing the towns with their outgrowths with population, is incorporated after the town directory statements.

Scope of Primary Census Abstract

Part B consists of the 'District Primary Census Abstract' (District PCA). The District P.C.A. comprises basic population data for each village separately in rural areas and for each town/ward separately in urban areas under the following heads, viz. area of villages in hectares and of towns/wards in sq.kms., number of occupied residential houses, number of households, sexwise total population, 0-6 years population, Scheduled Castes and Scheduled Tribes population, literates, main workers classified into 9 industrial categories, marginal workers and non workers.

The Scheduled Castes and Scheduled Tribes P.C.A. at the district/taluka (C.D.block) and town level are also presented.

The format of the P.C.A. for the villages and towns/wards in 1991 has been revised as compared to the P.C.A. 1981. In 1981, the main workers were presented into 4 broad industrial categories (i.e. I, II V(a) and categories III, IV, V(b) and VI to IX were combined together in the fourth category) whereas in 1991, the main workers were presented in 9 broad industrial categories. In addition, information for 0-6 years population is added in the revised format of P.C.A.

An appendix gives the urban block level total population and scheduled castes/scheduled tribes population. This is meant for the use of administrative purposes in urban areas. Such data are needed by Urban Planning Authorities and Researchers for conducting other studies in selected blocks.

(IV) Physical aspects - Highlights on the changes in the Jurisdiction of the district during the decade including its boundaries and any important event on geographic or geophysical aspect.

In each district of Gujarat State, two Systems of jurisdiction set up are functioning viz: (1) revenue system in rural areas and (2) local system in urban areas. Under the revenue system, the district is divided into prants (divisions) and further into talukas/C.D.blocks and revenue villages. Under the local system, the urban areas are classified into statutory towns, cantonment areas, notified areas etc. In Gujarat State, community development blocks are co-terminus with talukas and the hamlets of villages are not identified.

Banaskantha district consists of 3 prants(revenue) divisions viz. Palanpur division which comprises of Palanpur, Danta, Deesa, Dhanera and Vadgam talukas, Radhanpur division comprising Radhanpur, Deodar, Kankrej and Santalpur talukas and Tharad division comprising Tharad and Vav talukas.

For the implementation of development activities, all the above jurisdictions (i.e.village, taluka/ C.D.block, prant, district and town) have their own relevance and importance. The handbook contains the villagewise, townwise, talukawise/C.D.blockwise data. Prantwise data are also available by addition of the respective taluka figures.

The boundaries of the district and talukas remained unchanged between the period of two censuses i.e. from 1981 to 1991. Following changes are observed in the villages/towns of the district during 1991 Census.

Two villages which were rural areas in preceding Census 1981 have been classified as urban areas and declared as towns for the purpose of enumeration of 1991 Census, the details of which are as under.

Sl. No.	Name of Taluka/ C.D.block	Village		Town	
		L.C.No. of 1981	Name	L.C.No. of 1991	Name
1	Vadgam	38	Chhapi	III	Chhapi
2	Danta	10	Ambaji	VII	Ambaji

Vadnagar (L.C.No. 32 of 1991 Census) of Radhanpur taluka had been declared as independent (New) village and added for 1991 Census as per report of concerned revenue authorities.

Bhildi village (L.C.No. 124 of 1981 Census) of Deesa taluka had been bifurcated in two independent villages i.e. Bhildi (L.C.No. 124 of 1991 Census) and Nava Bhildi (L.C.No. 125 of 1991 Census) for 1991 Census.

Mandaliya village (L.C.No. 184 of 1981 Census) of Danta taluka had been deleted from the village list of 1991 Census as the area of this village was merged in Dharoi dam areas during the decade.

(V) Major characteristics of the district particularly in relation to the economic resources namely Agriculture, Forests, Irrigation, Co-operation, Livestock and Animal Husbandry, Fisheries, Finance, Industries, Powersupply, Transport and Communications, Insurance, Education, Medical and Public Health etc.

Economic resources are an important means of subsistence for the working people in the district. The details about economic resources of important sectors are given hereunder in brief.

(1) Agriculture

(a) Land and Land use

The total land in the district was 12.70 lakh hectares during 1989-90. The land classification according to the different uses, for the rural areas of the district for the year 1989-90, is given below on the basis of information collected for the Village Directory.

Land classification of rural areas

Sl. No.	Classification of area	Rural land 1989-90 (in '00 hectares)
(1)	(2)	(3)
1	Forest	1,353
2	Irrigated	2,930
3	Unirrigated	5,604
4	Culturable waste	1,188
5	Area not available for cultivation	1,156
6	Unspecified	
	Total	**12,231**

(b) Area Under Major Crops

The area under major crops for the years 1980-81, 1984-85 and 1989-90 are indicated in the following table.

Area under major crops

Sl. No.	crops	Area under major crops (In '00 hectares)		
		1980-81 *	1984-85	1989-90
(1)	(2)	(3)	(4)	(5)
1	Bajri	3,473	3,481	3,007
2	Jowar	961	1,127	927
3	Wheat	462	438	322
4	Rice	13	5	--
5	Other cereals	338	190	101

10	Groundnut	25	19	11
11	Cotton	279	208	263

* Revised

Source: Season and Crop Report, Directorate of Agriculture.

The area under all the crops has decreased during 1989-90 as compared to the year 1980-81. It is noticed that a majority of the cropped area was under bajri, jowar, wheat and cotton .

(c) Yield per Hectare

The average yield per hectare of the principal crops in the district during the year 1980-81, 1984-85 and 1989-90 is shown below.

Average yield per hectare

Sl. No.	Principal Crops	Average yield per hectare (In kg.)		
		1980-81	1984-85	1989-90
(1)	(2)	(3)	(4)	(5)
1	Bajri	212	910	559
2	Jowar	860	443	416
3	Wheat	2,834	2,550	2,099
4	Groundnut	502	806	785
5	Cotton	220	336	178
6	Sugarcane	3,833	1,400	8,676

Source: Season and Crop Report, Directorate of Agriculture.

The average yield per hectare was higher in bajri, groundnut and sugarcane crops, whereas the average yield per hectare was lower in jowar, wheat and cotton crops during the year 1989-90 than that recorded during the year 1980-81.

(d) Crop Calendar

The crop calendar for different crops in the district is revealed below

(f) Consumption of Fertilisers

The consumption of different type of fertilisers in the district is shown below.

Consumption of fertilisers

Sl. No.	Type of Fertiliser	Year(Consumption in '00 tonnes)		
		1979-80	1984-85	1989-90
(1)	(2)	(3)	(4)	(5)
1	Nitrogen	7,543	13,313	20,709
2	Phosphate	1,531	5,160	12,480
3	Potash	632	628	438
	Total	**9,706**	**19,101**	**33,627**

Source: *Directorate of Agriculture.*

The total consumption of chemical fertilisers shows overall upward trend during 1989-90 as compared to the year 1979-80.

(2) Forests

According to the figures available from the Forest Department for the year ending 1988-89, an area of 1,493.05 sq.km. is covered by forests which are found in 9 talukas of the district. The seasum wood and firewood are the major products whereas gum, madhuka-indika, hognut, soapnut, diaspiasmilenoxilon etc. are the minor products of these forests.

(3) Irrigation

(a) Area Irrigated by Crops

The area irrigated by different crops in the district for the year 1979-80, 1984-85 and 1986-87 is shown in the following table.

During the last decade, the growth rate of population in the district is 29.66 per cent. Among the talukas, Deesa taluka has recorded the highest growth rate of 35.12 whereas Radhanpur taluka has the lowest growth rate of 16.62. The decadal growth rate of Deesa, Deodar, Tharad and Dhanera talukas is greater than the district's growth rate. For the remaining talukas, the growth rate is less than the district's growth rate. The growth rate of urban areas is more than that of rural areas during the decade 1981-91. This indicates that there are immigrants in the urban areas from other places. Three talukas viz; Palanpur, Deesa and Radhanpur contributed about 84 per cent urban population to the total urban population of the district during 1991 Census.

The total scheduled tribes population of the district is 1,49,406 which is only 2.42 per cent of the total scheduled tribes population of the State. The proportion of scheduled tribes population is only 6.91 per cent of the total population of the district. Compared to the State's percentage of 14.92, the percentage for the district is lower.

Out of total 1,368 villages, 702 villages or 51.32 per cent have no scheduled tribes population. Scheduled tribes population live in 666 villages of the district. Of which, 316 or 23.10 per cent villages have less than 5 per cent scheduled tribes population to the total population of the respective villages. 130 or 9.50 per cent villages have scheduled tribes population between 6 to 15 per cent to the total population of the respective villages. 62 villages or 4.53 per cent have scheduled tribes population between 16-50 per cent to the total population of respective villages. 158 or 11.55 per cent villages have more than 51 per cent scheduled tribes population to the total population of the respective villages.

Percentage of scheduled castes/scheduled tribes population in towns

Table no.9 gives scheduled castes/scheduled tribes population alongwith their proportion to the total population in each town of the district.

* Towns having outgrowths

Scheduled castes and scheduled tribes population in the urban areas of the district are 25,126 and 8,078 respectively. Thus, as compared to the total urban population of the State, 2.16 per cent of the total scheduled castes population and 1.62 per cent of the total scheduled tribes population live in the towns of the district. Only 11.41 per cent belongs to the scheduled castes population whereas 3.67 per cent belongs to the scheduled tribes population to the total urban population of the district. All the towns in this district have scheduled castes population, the highest being 23.97 per cent in Tharad town and the lowest 5.87 per cent in Ambaji town.

All the towns of the district have scheduled tribes population. Chhapi town leads other towns of the district in the proportion of scheduled tribes population.

Literacy rates for the district

The literacy rate for the whole district is 39.29 during 1991 Census. The literacy rate for the total population of the district as per 1991 Census is lower than the State literacy rate of 61.29. The male and female literacy rates are 54.89 and 22.56 respectively in the district which are both lower than the State literacy rate of 73.13 and 48.64 respectively. The male literacy rates are much higher than the female literacy rates for both rural and urban areas as well as for the State as a whole.

Literacy rates for rural areas

Table No. 10 (a) reflects literacy rates for rural population of every taluka/C.D. block of the district.

	District		**68.12**	**80.91**	**54.21**

* Towns having outgrowths

The literacy rate for the urban areas of the district is 68.12. The urban literacy rate for males is 80.91 whereas that for females is 54.21 as a whole. Among the different towns, Kanodar town enjoys a unique position with the highest literacy rate of 77.05 while the Tharad town has the lowest literacy rate of 54.21. Except one town, in all other towns, the literacy rate is above 60. Higher literacy rate was noticed in 3 towns while it was lower in 4 towns in comparision with the district urban literacy rate of 68.12.

Workers and non-workers at the district level

As per 1991 Census, main workers inclusive of the marginal workers form 39.26 per cent of the total population of the district, against 40.23 per cent in the State. Thus, the quantum of these workers is less in the district than the State. The work participation rates for males and females at the district level are respectively 51.90 and 25.69 per cent. Thus, female working participation rate is very low than the male working participation rate. In the rural areas, the work participation rate is higher than that in the urban areas. A similar trend is noticed for male and female workers also. The percentage of non- workers to total population of the district is 60.74 against 59.77 for the Gujarat State. The proportion of non-workers to total population is higher in urban areas than in the rural areas of the district.

Percentage of main workers, marginal workers and non-workers for rural population of talukas/ C.D.blocks

Table No.11 gives taluka/C.D.blockwise percentage of main workers, marginal workers, total workers and non-workers for rural areas of the district as per 1991 Census.

In respect of rural areas of the district, the percentages of main workers and marginal workers to the total rural population are 32.33 and 8.27 respectively whereas the remaining 59.40 percent are non-workers. The proportion of main workers in respect of male and female workers to the total male and female population for the rural areas of the district are 51.97 and 11.29 respectively. Quite a reverse trend is noticed in respect of marginal workers where percentages of male and female workers are 0.45 and 16.64 respectively. Among the various talukas, the percentage of the total workers to the total population vary from 38.51 per cent in Vadgam taluka to 43.28 per cent in Tharad taluka. Similarly, the proportion of non-workers vary from 56.72 in Tharad taluka to 61.49 percent in Vadgam taluka.

Percentage of main workers, marginal workers and non-workers for towns

Similar percentages for males are 47.18 and 0.18 respectively whereas for the females percentages are 4.63 and 1.09 respectively. The percentages of total workers and non-workers to the total urban population are 27.42 and 72.58 respectively. For males and females, the respective percentages are 47.36 and 52.64 and 5.72 and 94.28 respectively. Among the various towns of the district, the proportion of total workers to the total population is the highest (34.00) in Kanodar town and lowest (26.01) in Radhanpur town.

ANALYSIS OF VILLAGE DIRECTORY

The village directory data supplied by the village officials are presented in Part A of this handbook. It shows various types of amenities and land use data in each village of the district. These data have been tabulated for each taluka/C.D.block of the district in the form of village directory. On the basis of these data, certain tables have been designed and a brief analytical note thereon is given below.

Distribution of villages according to the availability of different amenities

The table No.13 given below shows the taluka-wise/C.D.blockwise distribution according to the availability of different amenities such as educational, medical, drinking water, post and telegraph, market/hat, communication, approach to village by pucca road and power supply.

Of the total 1,368 inhabited villages in the district, 1,344 villages have atleast one primary school. Vadgam, Radhanpur, Deodar and Tharad talukas have education facility in all the inhabited villages.

Medical facilities in one kind or the other are available in 811 (59.28 per cent) villages of the total inhabited villages of the district. The remaining 557 or 40.72 per cent villages are devoid of any medical facility within the village. Among the talukas of the district, the proportion of villages enjoying one or more medical facilities is the highest in Deodar taluka and lowest in Vav taluka.

Except 4 villages, all the inhabited villages of the district enjoy the drinking water facility either of a well, a tank, a tap, a tubewell, a river etc. The main sources of drinking water are wells, tanks and tap in the most of the villages of the district. Out of total 1,368 inhabited villages, 650 villages are equipped with one or more facilities of post and telegraph. Among the various talukas of the district, the maximum coverage of about 78 per cent villages is found in Vadgam taluka and the minimum about 32 per cent is in Danta taluka. There is no facility of periodical market/hat in any of the inhabited villages of the district. Generally, persons avail of the facility of small retail shops in the villages. The public transport facilities are available in 84.43 per cent of the inhabited villages of the district. It is noted that all the inhabited villages of Vadgam taluka have public transport facilities. The next highest coverage is about 95 percent villages is found in the Radhanpur taluka and the lowest coverage is about 70 percent villages is observed in the Danta taluka. Of the total inhabited villages, 51.54 percent are linked by approach pucca roads. Again among the different talukas of the district, Vadgam taluka alone has pucca approach roads facility of 66.06 per cent which is the highest whereas in Tharad taluka with 38.81 per cent villages having the pucca road facility which is the lowest in the district.

In respect of electric power supply, 1,327 or 97 per cent inhabited villages in the district have been electrified. 41 villages of the district do not enjoy this facility.

Proportion of rural population served by different amenities

Table No. 14 furnishes talukawise/C.D. blockwise proportion of rural population served by different types of amenities.

In the above table, villages are distributed according to four ranges of the distance from the nearest town with the number of villages with their percentages served by each such amenity. Out of 1,368 inhabited villages, 58 lie at a distance of upto 5 kms. from the nearest town. The facilities of primary education, drinking water and power supply appear to be satisfactory in the villages of this group. Out of 58 villages, 49 have the facility of communication, 39 have the facility of approach by pucca road, 29 have the facility of medical and 26 villages have the facility of post and telegraph. Out of total 1,368 inhabited villages, 249 are situated at a distance ranging between 6 -15 kms. from the nearest town. Of these, 164 villages have approach by pucca roads facility, 162 villages have medical facility and 149 villages have post and telegraph facility. The remaining facilities are available satisfactory in the most of the villages of this group. Again of total 1,368 inhabited villages, 956 are located at a distance ranging between 16 - 50 kms. from the nearest town. Out of these, 798 villages have communication facility, 565 villages have medical facility, 448 villages have approach by pucca road and 426 villages have post and telegraph facility. Rest of the facilities are observed to be satisfactory in the most of the villages of this range. 105 villages lie in a remote place at a distance from the nearest town exceeds 51 kms. or more. Education, drinking water and power supply facilities are available satisfactory in most of the villages of this group.

Out of total 1,368 inhabited villages of the district, 256 are small in size i.e. having a population below 500 persons. 252 villages of this group possess the drinking water amenities. The facility of education is available in 236 villages. Next in order, power supply is available in 234 villages, communication in 160 villages, approach by pucca road in 100, villages, medical in 72 villages and post and telegraph in 43 villages. 846 villages of the district fall in the size group of 500-1,999 population. Except medical, approach by pucca road, post and telegraph facilities, all other facilities are available satisfactory in the villages of this group. Medical facility is available in about 58 percent villages, approach by pucca road is available in about 48 per cent villages and post and telegraph facility is available in about 44 percent villages of this group. Out of total 1,368 inhabited villages, 233 villages are in the population range of 2,000 - 4,999. All these villages are equipped with the amenity of drinking water. 33 villages are in the large size group i.e. population range of 5,000 and over. Education, drinking water and power supply amenities are available in all the villages of this group.

As much as 69.99 per cent of the total rural area of the district fall under cultivable land. Of these, 34.31 per-cent of land is irrigated. Among the talukas of the district, the largest cultivable area is found in Tharad taluka and the lowest in the Danta taluka. The maximum benefit of irrigation facility is availed of by Deesa taluka, with 59.26 per cent of the total cultivable area, followed by Kankrej taluka with 58.91 per cent. Santalpur taluka has the lowest irrigation facility (0.48 per cent).

ANALYSIS ON TOWN DIRECTORY

The Town Directory data, which have been presented in 7 statements and 5 input tables are considered for the purpose of analysis. These 7 statements are given in section II of part A under the heading of Town Directory for all the towns/cities of the district. On the basis of Town Directory statements, some inset tables have been prepared. For presentation of the data, the

Sl. No.	Class

4	10,000 - 19,999
	5,000 - 9,999
5	Below 5,000

The population growth rates for each town from 1901 to 1991 have been indicated in this statement. Deesa have the maximum growth rate of 49.62 whereas Radhanpur had minimum of 14.04 during the last decade. Density of population was the highest in Deesa town whereas it was lowest in Ambaji town during 1991 Census. The maximum sex-ratio (Number of females per 1,000 males) was 997 in Chhapi town and the minimum 862 in Ambaji town during 1991 Census.

Statement II

This statement depicts the physical aspects and the location particulars of each town, such as average rainfall and temperatures which have been obtained either from the Director General of Observatories Department, Government of India or from the concerned local offices. The distance between Gandhinagar, the State headquarters and the towns of this district vary from a minimum of 120 kms. for Chhapi to a maximum of 227 kms. in case of Tharad town. Palanpur, the district headquarters is 140 kms. away from Gandhinagar. All the towns except towns of the district have been arranged in alphabetical order within the district. The details of the data covered in these statements/tables are described below.

Statement I

Townwise status and some basic demographic data are presented in this statement. It specifically covers civic administrative status, area in sq.kms. number of households including houseless households, decadal growth rate beginning from 1901, density and sex ratio for the last three censuses.

There are 7 towns in the district. Of these, 2 towns have Municipalities, 2 have Nagar panchayats and the remaining 3 have Gram panchayats. The population norms for deciding the size class town and the classwise number of towns alongwith their names as per last Census are given below.

Number of towns	Name of towns covered in the respective class
(3)	(4)
...	...
2	Deesa, Palanpur
1	Radhanpur
2	Ambaji, Tharad
2	Chhapi, Kanodar
...	...

Ambaji, Kanodar and Tharad are connected by railways and all the towns have S.T. bus facilities.

Statement III

Statement III shows the municipal finance i.e. receipts and expenditure data under different heads for all the towns of the district. The receipts are classified in the following heads viz; (1) Receipts through taxes (2) Revenue derived from municipal properties and power apart from taxation (3) Receipts through Government grants (4) Receipts through loans (5) Receipts through advances and (6) Receipts through other sources. The expenditure is also classified under the following heads viz; (1) General Administration (2) Public Safety (3) Public Health (4) Public Works (5) Public Institutions and (6) Others.

Table No.19 has been prepared on the basis of Statement III which shows the per capita receipts and expenditure of each town of the district.

U.A = Urban Agglomeration

In case of all towns, the total per capita receipts are Rs. 243.44 whereas the total per capita expenditure is Rs. 245.19. The total per capita receipt of Rs. 807.93 is the maximum for Ambaji town and minimum Rs. 48.26 in Kanodar town. Similarly, the total per capita expenditure at Rs. 802.81 for Ambaji town is the highest and Rs. 50.58 for Kanodar town the lowest. The total per capita receipt for Kanodar, Palanpur, Radhanpur and Tharad towns is lower than the per capita expenditure. The lower total per capita expenditure, over the per capita receipt is found in Ambaji, Chhapi and Deesa towns.

Statement IV

Statement IV shows the civic and other amenities viz; road, drainage, latrines, water supply, fire fighting services and electrification available in each town of the district.

All the towns have open surface drainage. In addition, Palanpur has also sewerage system. As regards latrines, there are still service latrines in Chhapi and Tharad towns of the district. All the towns have facility of water borne latrines. As regards the method of the night soil disposal, sewerage system is prevalent in only Kanodar town. Septic tank system is prevalent in all the towns and wheel barrows system is prevalent in Deesa, Radhanpur and Tharad towns. There are no head load and baskets systems in any of the towns of the district. All the towns have facilities of water supply through the taps. In addition, Radhanpur town gets their water supply from wells and Ambaji, Deesa, Kanodar, Palanpur and Tharad towns obtain their water supply from tubewells. Fire fighting services are available in Deesa and Palanpur towns, whereas the remaining towns do not have their own fire fighting services. All the towns of the district are electrified.

Statement IV-A

Statement IV-A gives the civic and other amenities in notified or recognised slums of class I and II towns of the district. These comprise slum area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil, water supply and electrification details. Two towns of the district viz; Deesa and Palanpur have notified slum areas. Approximate number of persons residing in these areas is 27,578. Basic amenities are available in almost all the slums.

Table 20 is prepared on the basis of Statement IV-A. It shows the data about the share of slums in the respective city's population.

The proportions of slum population to total population are 7.03 percent and 25.69 per cent for Deesa and Palanpur towns respectively. The density of population for the slums area are not calculated as the authentic figures for the slums area are not available.

Statement V

Statement V deals with the details pertaining to educational, medical, recreational and other cultural facilities in each town of district. The statement reveals that only two towns viz; Deesa and Palanpur have college education facilities. Palanpur city possesses the teaching facility such as arts, commerce, science and polytechnic courses. There is no medical and engineering college in the district. Deesa, Kanodar, Palanpur, Radhanpur and Tharad towns have recognised typing training institutions. All the towns have primary, higher secondary and secondary educational facilities. 4 towns have adult literacy centres (Classes).

The number of cinema houses in Palanpur city are 3 which is the highest in any single town of the district. There is no cinema facility in Kanodar town of the district. 3 towns of the district are equipped with facilities of auditoria/drama/community halls. Except one town, all towns are provided with public library facility.

Table No. 21 is compiled on the basis of statement No. V. It shows the number of schools in each category, such as higher secondary, secondary and primary per 10,000 population for all the towns of the district.

TABLE 21

Note : In Gujarat State, the levels of Educaton are classified as under:

(i) Primary (from Std I to VII Passed)

(ii) Secondary/Matriculation (from Std VIII to X Passed)

(iii) Higher Secondary (from Std XI to XII Passed)

Hence, the details under col-5 are not shown.

It is seen from the above table that the average number of higher secondary schools per 10,000 population for all towns is 0.817, average number of secondary/matriculation 0.999 and average number of primary schools 2.270. The maximum number of primary schools per 10,000 population is found in Tharad town and the minimum is located in Ambaji town. Highest Secondary school is located in Chhapi town and the lowest in Palanpur town. The maximum and minimum higher secondary schools per 10,000 population are found in Ambaji and Tharad town respectively.

In statement V, information about medical facilities is given wherein Government, Semi-Government and charitable institutions providing medical facilities are covered. Hospital facilities are available in 6 towns of the district. The remaining 1 town has no such facility. Deesa and Palanpur towns have T.B. Clinic centres. Except 2 towns viz. Deesa and Palanpur, all others have health centre facilities.

Table 22 is prepared on the basis of statement No. V of Town Directory. It indicates the number of beds in the medical institutions in each town of the district.

The following conversion factor has been used for converting areas into hectares and hectares into Km^2.

Acres x 0.40467=Hectares

Hectares x 100=Km^2

The following villages have been treated as Census towns or merged fully in towns or one of the constituent units of Urban Agglomeration i.e. Outgrowths at 1991 Census. Hence, the details of such villages are not shown in Village Directory and Primary Census Abstract.

* These represent provisional 'geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by substracting the urban area from the total area of the District. The total area figures of the Taluka/C.D.block will not tally with the district figures because the former represent 'land use' area and are derived from the figures supplied by the Director of Land Records.

The area figures of the town are presented in two digits whereas total of the urban area figures in taluka/district are presented in one digit, hence there are the chances for minor variation because of the rounded area figures.
