FOREWORD

The district census handbook (DCH),complied by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level plannig for rural areas, It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out progrmmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled

Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added **inter alia** with this view. A significent addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by talking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tehsil/Town levels, At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Tehsil/ Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropeiate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. H. Khan, IAS, Director of Census Operations, Jammu and Kashmir on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982.

PREFACE

The compilation and publication of District Census Handbooks has been a traditional feature of the Indian Census since 1951. However, in Jammu and Kashmir State, where no census was conducted in 1951 due to the unsettled conditions prevailing then, this work was taken up as a regular feature of census since 1961 with certain improvements and additions in the data content of the publication at the 1971 census, further enhancing its utility for the data users

The 1981 series of the District Census Handbook which we have begun with the district of Punch will contain two parts each. Part A deals with Town and Village Directory and Part B consists of Town and Village Primary Census Abstract. In 1971 census there was also third part of the Handbook, published as a separate volume, comprising administrative and census statistics However, in view of the considerable delay experienced then in getting the relevant administrative statistics pertaining to various departments, compilation of this volume has been given up at the 1981 census. It is expected that such statistics would be available to the data users in the usual publications of the State Directorate of Evaluation and Statistics.

The Town Directory of the Handbook consists of seven statements which are almost similar to those adopted for the 1971 census except that a few new columns have been added to facilitate analysis of the data. A significant addition is of class of town in every statement which has been done on the consideration that the infrastructure of amenities and facilities found in urban India can best be analysed with reference to this specific parameter. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose vis-a-vis the respective statements. Due consideration has also been given to the Minimum Needs Programme of the Planning Commission. The columns on Scheduled Caste population in statement IV and adult literacy classes/centres in statement V are a sequel to this programme.

The Village Directory also follows the same pattern as in 1971 census except again for a few additional columns. The column on total population and number of households has been added to facilitate analysis of the other data in the Directory. The column on approach to village is to identify the number of inaccessible villages in the district. The column on number of households living in owned houses or posessing house sites in the village is again intended to cater to the Minimum Needs Programme of the Planning Commission.

It is hoped that with its present content the Handbook would, more than ever, serve as a useful reference publication, particularly for such administrators and data users as have to deal with planning, implementation and evaluation of development programmes, including the Minimum Needs Programme, at the grass-roots level.

The compilation of the Handbook would not have been possible but for the cooperation extended by the Revenue, Education, Medical, Public Health and other local authorities of the District in making relevant data available, for which we owe them our grateful thanks.

It must be stated here that the task of finalising and printing the present volume has fallen on me, since Shri A. H. Khan, IAS, Director of Census Operations, Jammu & Kashmir, under whose able stewardship the census operations of 1981 were carried out, retired from Government service by the time the volume could be taken up for compilation.

We are grateful to Shri P. Padmanabha, IAS, Registrar General and Census Commissioner of India and Shri N. G. Nag, Deputy Registrar General (Social Studies) whose detailed

instructions, guidance and advice were available all through.

The credit for compiling this Handbook, including analysis of data, belongs to Shri Abdul Gani, Joint Director, besides Shri H. L Kalla, Deputy Director, Shri Shamus-ud-Din, Tabulation Officer & B. A. Shora, Computor who ably assisted the former in this task and deserve appreciation for their respective contributions.

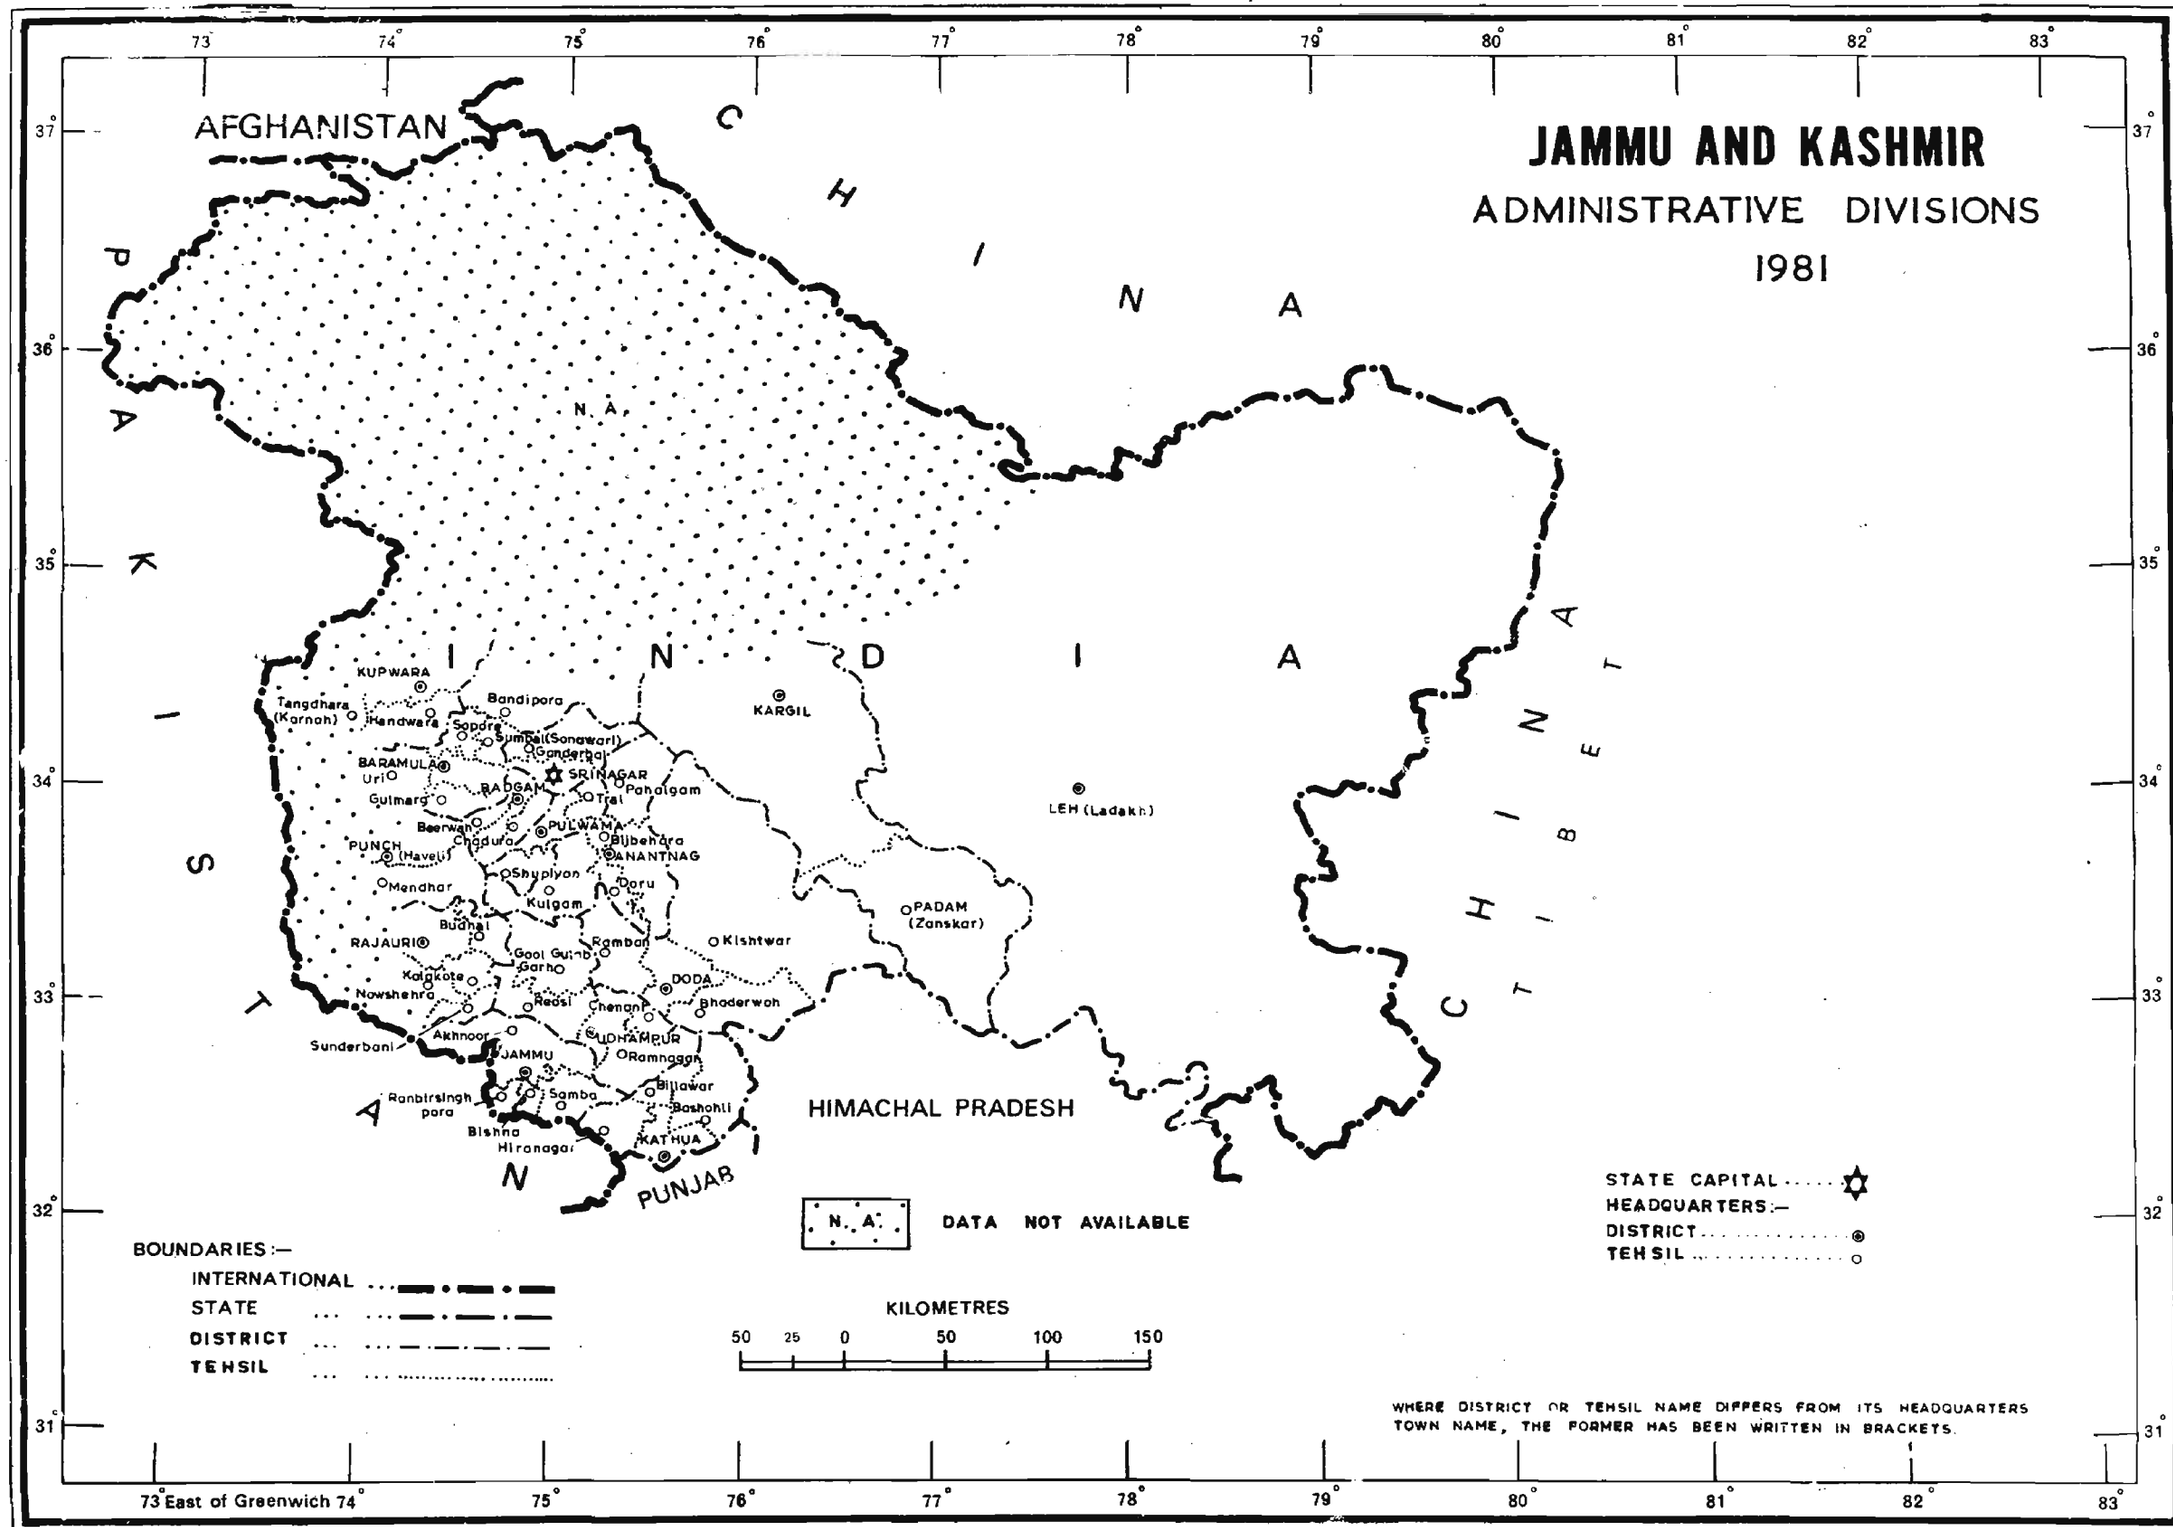

The Handbook has been provided with five maps, one showing the administrative divisions of Jammu and Kashmir State as in 1981, one pertaining to Badgam district and rest to its three constituent tehsils. These were prepared by the staff of our Cartographic section under the close and valuable guidance of Dr. B. K. Roy, Deputy Registrar General (Map) of the office of the Registrar General, India. Their names along with those of other officials who rendered valuable assistance in bringing out the volume are mentioned separately in this Handbook.

Srinagar,
the 15th May, 1987.

N. A. KAMILI,
IAS
DIRECTOR

	Uninhabited	281	21
Number of Towns		58	1

NOTE :- * The population figures exclude population of areas under unlawful occupation of Pakistan and China where census could not be taken.

‡ Includes 78114 Sq. Kms. under illegal occupation of Pakistan and 5180 Sq. Kms. illegally handed over by Pakistan to China and 37555 Sq. Kms. under illegal occupation of China in Leh (Ladakh) District.

@ Excludes 3, 1 & 4 villages of Srinagar, Chadura and Badgam tehsils forming out-growths of Srinagar Urban Agglomeration, 6 villages of Jammu tehsil forming out-growth of Jammu Urban Agglomeration respectively and 1 village of Udhampur tehsil treated as Census Town.

(a) Provisional

ANALYTICAL NOTE

A description of the various concepts used at the 1981 Census and a broad appraisal of the administrative statistics vis-a-vis the history of the district, the social and cultural changes witnessed by the district during the last ten years particularly in relation to economic resources, social, cultural and developmental activites and a brief description of the places of historical and religious importance in the district is given in the following pages :—

Rural/Urban Classification

For the 1981 census the classification of urban areas have been based on the following criteria :

a) All places with a municipality, corporation or cantonment board or notified town area committee.

b) All other places which satisfied the following tests :

i) A minimum population of 5000.

ii) At last 75 per cent of male working population engaged in non-agricultural (and allied) activity.

iii) A density of population of at least 400 per Sq. Km. (1000 per sq. mile).

The places which satisfied the criterion (a) above were treated as statutory towns while those as were not statutory towns but satisfied the tests laid down in critertion (b) above were treated as census towns. All other places which did not satisfy either of the above two criteria were classified as rural. Areas which qualified to be treated as towns under criterion (a) and (b) above were further classified by population ranges in the following order :-

Population range	*Class*
1,00,000 & above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000—9,999	V
Below 5,000	VI

Census House

A Census house was defined as a building or part of a building having a separate main enterance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both.

Census Household

A household for purpose of the 1981 census has been defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both.

Scheduled Caste/Scheduled Tribe

In Jammu & Kashmir State there are no scheduled tribes. However, the following 13 castes stand notified as scheduled castes under the State constitution :—

1. Barwala
2. Basith
3. Chamar or Ramdasia
4. Batwal
5. Chura
6. Dhyar
7. Doom or Mahasha
8. Gardi
9. Jolaha
10. Megh or Kabirpanthi
11. Ratal
12. Saryara
13. Watal

At the 1981 Census only those persons who returned themselves as belonging to any of the 13 castes specified above was treated as scheduled caste.

Literacy

For purposes of Census a person was treated as literate if he/she could read and write in any language with understanding power. A person who could merely read but was not able to write was classified as illiterate. For a person to be treated as literate it was not necessary that he/she should have received any formal education or should have passed any minimum educational standard.

Workers/Non-workers

For the 1981 Census a person was treated mainly as a worker if he/she had participated in any kind of economically productive work during the major part of the reference year i.e. at least 6 months or 183 days or more prior to the date of enumeration. A person who claimed to have participated in any kind of economically productive work for less than six months prior to the date of enumeration was treated as marginal worker. However, persons who did not participate in any kind of economically productive work during the whole period of the reference year were treated as non-workers.

Brief history of the district

Badgam is a newly constituted district which was carved out from Srinagar district on the basis of administrative recognisation of districts in 1979. The district derives its name from one of its village which is its headquarter. Till the last Census held in 1941 the area was known as Sri Partapsinghpora, after the name of Maharaja Partap Singh, one of the Dogra kings in whose rule it was constituted as a tehsil for the first time. Prior to 1951, the tehsil of Badgam including other tehsils of the present district formed part of the then district of Baramulla.

Brief history of District Census Handbook

The district Census Handbooks were published for the first time in 1951 as a part of the Census publication programme in almost all States of India except Jammu and Kashmir State where due to the disturbed conditions prevailing in the wake of tribal invasion of 1947—48 no census could be undertaken and as such no data was collected for the decade 1941—1951. The publication of District Census Handbook series fulfilled a long felt need.

These gave out not only the data contained in Primary Census Abstract according to new classifications but included a sufficient account of the district and its people, and a vast magnitude of other data covering such topics as communication, education, public health etc. in respect of each town and village of the district. Consequently, these have been found to be of immense help to all the departments of the State Government for planning and development at the grossroots level. With the introduction of single line administration at the district level, the utility and importance of these publications for constant use and reference by District Development Commissioners has increased enormously. The present hand-book is proposed to contain even more comprehensive data than in the past so as to meet also the requirements of minimum needs programme set forth by the Planning Commission. The publication will besides the basic population data emanating from the 1981 Census, contain comprehensive information pertaining to amenities and land-use pattern and other infrastructural statistics in respect of each village and town of the district so as to serve as a ready reference material for planners and administrators for assessment of past achievements and formulation of new programmes of development at the gross roots level.

Town Directory

The Town Directory covers information at town level and includes items such as status of administration, growth of populatin, growth pattern since 1901, physical aspects and location civic finances, civic and other amenities, medical educational, recreational and cultural facilities, trade, industry and commerce, banking facilities etc.

In addition, demographic data like sex-ratio, number of households, density of population and position of civic and other amenities in notified or recognised slums of class I and II towns have also been introduced. Considering the increasing employment of women in urban areas and the consequent housing need of single working woman, it has been felt necessary to indicate in the town directory also such information as the number of working women hostels with number of seats.

A broad appraisal of the data incorporated in the seven statements of the town directory is attempted in the following paragraphs :—

Statement—I gives information on civic administration status as in 1980, growth history of towns from 1901 to 1981, sex-ratio of towns from 1961 to 1981, density and area in sq. kms.

Statement—II gives the physical as well as locational aspects of towns of the district. Under the physical aspects data on annual rainfall (in cms.) and maximum and minimum temperature (in centigrade) have been highlighted. The statement also gives information on distance of the town from the nearest city with a population of one lakh and above, distances from the State, district and tehsil Hqrs., from the railway station and bus route. It also provides information on the existence of river/canal, if any within 10 kms.

Statement—III provides the budgetary statements pertaining to the financial year 1978-79. The statement has been apportioned into the receipt and expenditure heads. Under the receipt head, information has been given on such items as "receipt through taxes, revenue derived from municipal properties and power apart from taxation, Government grants, loans, advances and other sources". Expenditure head shows expenditure on general administration, public safety, public health and conveniences, public works, public institutions and others.

Statement—IV depicts civic and other amenities available in the towns of Badgam district and gives information on such items as length of the road in the town, system of sewerage, number and type of laterine, method and disposal of night soil, source and capacity of drinking water and fire fighting services. The statement also highlights the pattern of electricity consumed in the town and indicates the number of connections under sub-heads like domestic, industrial, commercial, road-lighting and others.

Statement-IV-A which is meant to depict civic and other amenities available in the notified slums of Class I & II towns has no relevance for Badgam district.

Statement—V gives medical, educational, recreational and cultural facilities as were available in town in 1979. Under medical facilities are indicated the type of medical institutions and the number of medical beds available. Likewise, different types of educational institutions available have been covered under educational facilities. Information regarding the number of cinema houses, stadia, auditoria/drama halls and public libraries have also been incorporated in the statement to bring out the extent of availability of recreational and cultural facilities. In addition, information about number of working women hostels has also been given in the statement. If a medical or an educational facility was not available in the town, the name of the nearest place where it is available has also been given in the statement.

Statement-VI gives the facilities of trade, commerce, industry and banking available in the town in 1979. Besides, the number of credit co-operative societies operating the details of three most important commodities imported, exported and manufactured in the town have also been indicated.

Village Directory

The village directory portion of the handbook depicts particulars of amenities available in each village of the district in the field of education, medical care, power supply, drinking water, post and telegraph, communication, besides information about land - use and places of

religious, historical and archaeological importance in the village. In case where a particular amenity is not available within the village, distance at which such a facility is available even in the most modest form has been indicated in three broad ranges viz ; —5 kms. 5—10 kms., and 10+kms. If there are composite schools, like middle schools with primary classes or secondary schools with middle classes, these have also been included in the number of primary and middle schools respectively. For example, if in a village or a town there were two primary schools and one middle school with primary classes, in the village/town have been given as three and that of middle school as one even though there are only three educational institutions. So also in case of secondary schools.

The village directory also carries the following four appendices :—

Appendix—I It gives the abstract of educational, medical and other amenities available in the tehsils of the district.

Appendix—II It furnishes the land utilisation data in respect of census towns. This appendix, however, is not relevant to Badgam district.

Appendix—III This is a list of villages where no amenities other than drinking water like education, medical, post and telegraph, communication, power supply are available.

Appendix—IV It provides a list of villages according to the proportion of scheduled caste population by ranges.

All these appendices appear after the main village directory.

Primary Census Abstract

The Primary Census Abstract part of the publication is exclusively based on the 1981 census data. It provides information in respect of each village and ward/mohalla of a town at tehsil level in respect of its area, number of residential houses, number of households, total population, scheduled caste population, literate and educated persons and working population by sex in 4 broad industrial categories viz ; (i) cultivators, (ii) agricultural labourers, (iii) household industry, manufacturing, processing servicing and repairs and (iv) other workers besides non-workers as a separate category.

Special PCA on Scheduled Castes

It is for the first time that a special Primary Census Abstract has been introduced in the DCHBs for the Scheduled Caste population The special PCA provides information pertaining to scheduled castes in respect of number of residential houses and their population, literates, main workers classified by cultivators, agricultural labourers, workers in the household industry and other workers, marginal workers and non-workers classified by sex. This PCA is also presented for District, Tehsil and Town levels.

Physical aspects

As stated earlier the district was carved out from Srinagar district on 1st July, 1979. It is bounded by district Baramula in the north and north-west and by Srinagar in the north-east, south and south-west. The area of the district is 1371sq. kms. The district has 501villages, out of which 480 are inhabited and 21 villages are un-inhabited. However, five of the inhabited villages of the district form outgrowth of Srinagar Urban Agglomeration and have therefore been excluded from the purview of discussion in this handbook. The climate of the district is more or less the same as that of Srinagar except that its higher regions get heavier snowfalls and experience severe cold in winter. The district extends to both mountainous and plain areas of varying heights and has an average height of 5281 feet. The maximum rain fall recorded in the year 1980 is 358.4 mm The district, however, experiences adequate rainfall but the 'kandi' areas of the district often receive insufficient rains causing sometimes complete

crop failure. On the other hand, the lowlying areas flanking the left side of the Jehlum are marshy and are often flooded during heavy rains.

Major characteristics

Badgam falls among those backward areas of the State which have suffered neglect in the past. However, after assuming the status of a separate district and with the introduction of singleline administration, the progress of development process has picked up with a significant impact on the socio-economic life of the people of the district. The need for expansion of public health facilities has been adequately realized and a number of water supply schemes have been taken in hand. At present 28 such schemes are under completion. It is envisaged to make available portable drinking water facilities to 200 villages to benefit 2 lakh inhabitants. Concerted efforts are also being made to cover remoter areas of the district under rural electrification programme. As a result, as against only a few villages electrified in the past, this facility stands extended now to 424 villages of the district. In the remaining villages also the work is in progress to bring them under the network of electrification programme.

During the last few years concerted efforts have as well been made for promotion of education at all levels. Consequently, the enrollment of boys and girls in the age-group of 4-11 in schools has reached upto a level of 75%. While a number of schools have been opened in the district, it is proposed to make school facility available to the inhabitants within a distance of every one km. In the year 1981 four new primary schools have been opened whereas ten primary schools and one high school was upgraded to middle and higher secondary levels respectively. In addition, under the adult literacy programme, various centres have been opened which have an enrollment of about five thousand adult males and females. These centres provide free education with books and stationery. Besides there are about 93 informal centres in the district where 550 boys and girls are being given free education, books and uniforms.

The major section of the population of the district is dependent on agriculture. In line with the Government's policy to reduce dependance on food imports, an intensive agriculture development programme has yielded encouraging results. Modern agricultural practices are being popularised to yield higher production. Farmers are being encouraged to interest themselves in taking to improved agricultural practices which would in the long run not only result progressive advance in the socio-economic life of its people but also make the district self sufficient in its food requirements. Provision has been made to give incentives for introduction of high yielding variety of seeds, fertilisers and pesti-cides. The State Agricultural Department is paying due attention to develop allied sectors of agriculture in the district. 3708 acres of land in the di trict has been brought under the protection of plants programmes. Demonstration plots have been marked on about 160 kanals of land under several training programmes and farmers taken on tour to some other districts of the State where good results of modern agriculture practices are shown and demonstrated for them to use and practice in their holdings. About 300 mushroom production units have been set up in the district and during the year 1981-82, mushroom production reached a level of 100 tonnes. During the same year about 150 persons were trained in mushroom growing. At the district headquarters the mushroom displaying centre building is under construction Saffron production is also picking up and more people are now taking to its farming in the district.

The district has shown a record production of 25000 tonnes of dry and fresh fruits. The cultivation of dry and fresh fruits on 40,000 acres of land in the district provides employment opportunities to a number of people. Under horticulture development programme, 24 demonstration plots have been established in

the district and pesticides are given to the fruit growers on subsidised rates. To boost the production of specific apple variety 'Ambri' in the district, 10 acres of land have been brought under orchards. For this pupose the plants of the said variety have been distributed to orchardists on fifty percent subsidy rates as also about twenty thousand almond plants have been planted in the various areas of the district.

As regards medical institutions functioning in the district, the position is as follows :-

Hospital	=	1
Primary Health Centre	=	7
Family Welfare Centre	=	19
Dispensaries	=	59
Others	=	5

This includes the six additional dispensaries established during the year 1981-82. About 6 lakh patients were treated and 6 thousand operations performed during the year 1981 in these institutions while the construction work on ten-bed hospital at Khansahib block is in progress. Also residential plots have been constructed for the doctors in the existing hospital buildings. Chari Sharief and Beerwah Public Health Centres have also been equipped with an X-Ray plant each while Badgam health centre has been provided with an ambulance. A multipurpose health welfare scheme has been launched in the district since 1981 for which the whole district has been divided into 33 zones. Every zone is almost made up of 5 thousand inhabitants to be looked after by two trained medical workers whose job besides educating people about family welfare schemes is to provide them with vitaminised medicines for child-care. For protection of infants against several virus diseases, the health department has supplied about 50 thousand medicines of different categories in the district.

In keeping with its potential, the industrial development of the district has also been receiving possible attention as a result of which the number of industrial units has reached 178 in 1981 as against 149 in 1979-80.

During the year 1981 three new firewood depots were opened in the district increasing the number of depots to eleven. In Pir Panchal division the forest department has constructed two rest houses at Khag and Tangnar, besides completing a log hut constructed at the height of 8000 feet and maintenance of nursery and a park each at Yusmarg and Airport.

Social Welfare activities have also been receiving increasing attention in the district since 1979. The department provide scholarship opportunities to 1100 students in various educational institutions upto an amount of Rs. one lakh six thousand. During the year 1980-81 a handicraft centre was set up in the district for training up girls in wood carving and furniture making.

To provide the vitaminised food to young ones, the department has created 18 such centres during the year 1980-81. About 850 boys have so far benefitted from the scheme till 1981-82. In addition, housing subsidy has been extended to the Gujjars and Bakerwals of the area for construction of houses. In addition, uniforms and books are also being provided to school children free of cost. The department has also provided 14 sewing machines to widows and disabled persons besides artificial organs and tricycles. Several sewing and knitting training centres in the district have been opened for women. During the training period rupees forty per month as scholarship is being given to them. Two special camps were held during the year 1981 in the district where women were trained in connection with the child care programmes.

For combating the unemployment problem the State Govt. have introduced self employment schemes in the district. During the year 1981-82, 25 industrial and non-industrial centres were opened increasing the number of such units in the

district to 200. In addition, 115 unemployed youths were registered for self employment under this programme.

The principal mode of transport in the district as elsewhere in the State is roads. It is therefore, natural that development of roads particularly rural roads as part of the minimum needs programme is commanding attention. During the last year, 128 schemes of construction of roads were started in the district which are now nearing completion. Already 3 kms. of tarred, 6 kms. of metalled, 19 kms. rough and 7 kms. of jeepable road have been constructed. The Roads and Buildings department is also engaged in the construction of various buildings in the district. About 76 such buildings are under construction. A mini Secretariate at the district headquarter and a district police colony at Ompora are also under construction.

As the main dependance of the majority of population in the district is on agriculture, therefore all concerted efforts are being made to augment irrigation facilities in the district. So far 1,466 acres of land have been covered under this facility. Increasing attention has been given towards the flood protection works in the district and during 1981 the work on about 27 such schemes has been completed.

Fishery farming programmes including construction of fish farms for which free technical know-how and other concessions are being provided, has been taken up in hand. Steps have been taken for the expansion of golden colour trout fish at Nala Sookhnag and Gowhar Pora. The facility provided to fishermen in the district is showing good results in the production of fish of various varieties.

Social and cultural events

The district of Badgam has the distinction of having given birth to famous writers, poets, sufis and musicians whose rich contribution has lent a discernible dimension to the cultural ethos of the district while the most outstanding amongst them being Hazrat Sheikh Noor-ud-Din Noorani whose resting place at Chrar-i-Sharief has been the place of attraction for hundreds of thousands of devotees from diverse faiths through the ages covering last six centuries. Other high-ranking sufi poets are Shamas Faqir, Samad Mir and Shah Gaffoor. Abdul Ahad Azad, the revolutionary poet also claims his descent from the Badgam District only.

Socio-cultural activities continue to sustain the interest of the people of the district. Diversification of such activities in the recent past has added especially to its literary heritage, to which effect emergence of Noorani Cultural Forum, Badran Dramatic Club and Bhagat Theatres of the district, to quote only a few, provide the desired testimony.

Places of religious and historical importance : Shrine of Alamdar-i-Kashmir

As already mentioned, Hazrat Sheikh Noor-ud-Din Noorani is in the vanguard of local sufis of Kashmir whose shrine at Chrar-i-Sharief is the source of spiritual inspiration for the people at large. His out-ranking spiritual attainments have to be traced to the Kubarviyah Order, (being one of the most famous in the hierarchy of fourteen Orders of Islamic Sufism) the foundation whereof was laid by Hazrat Sheikh Najam-ud-Din Ahmad-ul-Kubara of Central Asia as far back as 12th century A.C. The Kubarviyah Order spread in the Kashmir valley through Hazrat Amir-i-Kabir, Mir Syed Ali Hamdani in the course of his pursuit of propagation of Islam while heading a 700-strong force of sufis leading to their ultimate migration to Kashmir valley. This mission was later continued by his illustrious son Hazrat Mir Syed Mohammed Hamdani, the saint who handed down the torch of Kubarviyah Order to Hazrat Sheikh Noor-ud-Din Noorani, popularly known as Alamdar-i-Kashmir (meaning the spiritual saint who is gifted with the authority to lead the Kashmiris for salvation especially on the Day of Resurrection) and Sheikh-ul-Alam (meaning a top-ranking saint of the world). He is also remembered by the pet name of Nund Reshi

representing a distinctive sub-system of Islamic mysticism highlighted by practice of extreme self - abnegation as a way of ridding the self from the worldly and material allurements to realise the super-natural. The restraints exercised by the Reshis covered spiritual retreat into seclusion best offered by caves in the olden days, so as to scale high levels of spiritual manifestations through concentration and meditation. Reshis practised self-denial which lay in withdrawal from luxuries of life, lust of power, sex or meterial prosperity and restriction to the minimum levels of sustenance, abstention from taking meat, fish, onions, garlic etc. The cult of Reshis has its fountain source in the Middle East with Hazrat Owais Karni of Yemen claiming to be the founder of the Order. Sheikh-ul-Alam is the most widely acclaimed leader amongst the sufis of Kashmir especially in the Reshi cult.

Sheikh-ul-Alam sprang up towards the close of 14th century A.C. in village Qaimuh of Tehsil Kulgam having been married at an early age to Zia Ded who bore him two children, namely Hyder and Zoon. In his prime of life, the Sheikh turned his back against the material allurements for the sake of attaining high levels of divine ecstasies which enabled him scale high stations of meditation culminating in the revelation of the Truth to him in a mountain cave and jungle near Darigam. It is worthwhile to recall here that the highest form of realisation of Divine Truth revealed itself to the Prophet of Islam (May peace be on him) in the Cave of Herra frequented by him over a long period culminating in his proclaiming of Prophet-hood. This tradition of withdrawal into seclusion has over the centuries been followed in varying degrees by ardent followers of different Orders.

The passing away ceremony of Sheikh-ul-Alam is celebrated on the 26th of Ramzan (9th lunar month according to Islamic Calendar) synchronizing with the Shabi-Qadar (The Grand Night on which Holy Quran was revealed). This date corresponded then to the month of Poh of Bikrimee era in winter when also his annual Urs is celebrated.

Apart from the days of festival when the shrine is visited by hundreds of thousands of pilgrims from all parts of the valley, large columns of devotees are seen trekking their way to the Shrine for the whole year round. His pithy sayings have become household maxims in Kashmiri houses today. A high priest of broad humanism, Sheikh Noor-ud-Din exhorted people to the service of society irrespective of caste or creed in these words : "Feed the hungry, if you can, ask not the naked what his caste or creed is".

Some of his poetical works have survived till date apart from his dicta which enjoy the status of universal truth.

Sheikh-ul-Alam followed in the foot-steps of the Prophet of Islam and was able to realise a vast number of his traditions which any devout Muslim cherishes to strive for. Amongst the prominent traditions the saint inherited, is his being a man of no letters and yet gifted with a vast reservoir of spiritual knowledge, worldly wisdom and human values which he preached in great measure. Again, his age of 63 years follows the age of the Prophet.

The year of passing away of the saint is derived from the chronogram composed as "Shamas-ul-Aarifeen" (meaning the shining star of high saints) which according to the value ascribed to Arabic alphabets works out to 842 Hijri.

Here it may be pertinent to refer to the sufistic poetry in Kashmiri which is couched in involved language and expressions having acquired variegated dimensions over the past few centuries of its life, with Shamas Faqir, Shah Gaffoor and Samad Mir, among others, hailing from the later generations of sufi poets and claiming to enrich the content and style of the Kashmiri poetry abounded in a vast fund of metaphors and sufistic jargon to convey the spiritual messages. These poems especially of Shamas Faqir have a bewitching effect on

the audience especially when sung to the beat of the musical instruments. In the recent times, the sufistic poetry which owes its origin and diversification largely to the Kubarviyah Order has acquired vast popularity throughout the Kashmir valley and other Kashmiri-speaking areas of Jammu Division where in the process large bands of musicians have now sprung up claiming as high charges as Rs. 700/- to Rs. 1000/- for a continuous spell of six hours mostly from mid-night to dawn when the silence of the night lends the desired environment for meditation to the musician's audience. Such musical concerts are either in the form of 'sufiana' or 'chhakri', the former claiming the audience largely of those conversant with Persian spiritual poetry while the latter being popular with those who may be able to understand only Kashmiri.

Other Shrines

Amongst the other shrines in the district which hold sway over the people, mention may be made of Aastana Sharief, Chadura (Badgam) which is the place of great attraction for Muslims of the Shia sect. This Shrine is named after Mir Shamas-ud-Din-i Iraqi of the Shia sect who believe this to be his burial place. He migrated from Iraq and toured widely in the Kashmir valley and beyond upto Tibet influencing many a people to embrace the Shia sect of Islam.

Imambara Gah, Badgam is yet another important place, built in 1315 Hijri followed by the construction of another one in 1349 Hijri. Thousands of Shia Muslims visit the Imambara on Fridays besides on special occasions for prayers.

Institutions

Amongst the institutes in the district is the Jamia of Babul Ilm, implying gateway to knowledge, founded in 1370 Hijri by the President of Anjuman-i-Sharie Shiyan The institute has produced a Kashmiri translation of Holy Quran, the first volume thereof having been published by Gulshan-i-Adab, Badgam. Free boarding and lodging is provided at this institute to the students hailing from far flung areas to facilitate them receive the education.

Yusmarg

The pasture is widely known as a tourist resort on account of its congenial climate. It is situated about 30 miles to the south-west of Srinagar and measures about 4 sq. miles. The State Government have built a tourist house and three huts at this place for the convenience of tourists. Gujjars migrate in summer to this pasture along with their cattle for grazing purposes. It is also a popular camping ground for trekkers. The place is connected by pucca road with Srinagar.

Tosamarg

This is also known as Tosa Maidan. The foot-path connecting the valley with Punch passes through it. Like other pastures Tosa Maidan also grows a variety of flowers and is famous as a grazing area. The place is connected with Srinagar by road.

Abno Gupta's Cave

This is the only one important cave in the district. It has been built in the close vicinity of Beerwah, a village of district Badgam. According to popular belief, all attempts made in the past to trace the other end of the cave have failed. It is also believed that a Sadhu, Anbud by name, entered the cave along with his twelve disciples for meditation but none of them returned.

Watragang

The spring flows from the foot of the mountain in village Magam. Its water is pure and digestive. Whenever the inhabitants face draught, they immerse the skin of a cow in the water and this, according to their belief is invariably followed by heavy rains.

Narayan Nag

This is in village Khag of tehsil Beerwah. It is believed that whenever any one calls out at the spring, the water starts moving about. This

has not, however, been confirmed.

Sukh Nag

This is in Beerwah tehsil on Zananpather mountain. The water of this spring is said to be very digestive. It has been a place of recreation in the past and many songs have been written by poets in praise of the spring.

Neela Nag

The spring is embosomed in the forest near Nagam. It is a place of tourist interest. The State Government have built two tourist huts for the facility of tourists. The place is connected with motorable road with Srinagar via Looli Pora.

It is said that a Brahman—Chander Dev by name was once busy in his worship in a cave when he was taken out by demons and thrown in the spring. The Brahman in spring finds himself in an open area and witnesses a splendid Mahal. He finds a king in the Mahal and comes before him with folded hands. The king is said to be the 'Nilla Nag' itself. The Brahman reveals the king the excesses of 'demons', who had, it is believed, a predominant position over Kashmir in ancient days. The king taking pity over the Brahman presents him Nillamat puran and advised him that it must be read at sacred places and to avoid any harm, offerings be made to demons.

Brief analysis of P.C.A. data

Part—B of this publication contains data collected during the 1981 census in respect of each village and ward / mohalla of a town in the district on such aspects as area, number of residential houses, number of households, total population with sex-wise break-up, scheduled caste population, literate and educated persons and sex-wise break-up of working population categorised into main workers, marginal workers and non-workers. The information based on the Primary Census Abstract has been summarised in various inset tables giving an insight into the demographic structure of the population of the district at tehsil level. A brief analysis of the data incorporated in the tehsils has been attempted hereafter so as to highlight the various demographic changes that have taken place in the rural and urban areas of the district at tehsil level particularly during the decade 1971-81.

The sub-joined table No. I gives an account of the distribution of population at tehsil level :—

TABLE NO. 1

Population, Number of villages and towns, 1981

S. No.	Name of Tehsil	Population									No. of villages		No. of towns
		Total			Rural			Urban					
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
1.	Chadura	137,973	73,322	64,651	105,411	55,968	49,443	32,562	17,354	15,208	138	131	1
2.	Badgam	129,543	68,821	60,722	110,220	58,436	51,784	19,323	10,385	8,938	178	169	...
3.	Beerwah	99,746	53,252	46,494	99,746	53,252	46,494	...	...	...	180	175	...
	Total District	367,262	195,395	171,867	315,377	167,656	147,721	51,885	27,739	24,146	496	475	1

Note :- Excludes 1 and 4 villages of Chadura and Badgam tehsils forming outgrowths of Srinagar Urban Agglomeration.

It will be seen that as a result of the bifurcation of the Srinagar district into two districts viz; Srinagar and Badgam, the 1981 jurisdiction of Badgam district consisted of three tehsils made up of one town and 501 villages of which 21 villages are uninhabited. Of these, however, five villages (one in Chadura and four in Badgam tehsil) have been treated as outgrowths of Srinagar Urban Agglomeration. The total population returned by all the three tehsils of the district at the 1981 census is 367,262 persons made up of 195,395 males and 171,867 females. Chadura tehsil tops all other tehsils in the size of population while in respect of number of villages this position has been taken by Beerwah tehsil.

There is no urban component in Beerwah tehsil However the urban population shown in respect of Chadura tehsil includes the population of one constituent town, one village forming urban outgrowth of Srinagar Urban Agglomeration and the population of urban blocks/mohallas which though within the revenue jurisdiction of Chadura tehsil constitute parts of Srinagar Urban Agglomeration. Similarly the urban component of Badgam tehsil consists of four villages, the population forming outgrowth of Srinagar Urban Agglomeration and that of the urban blocks/mohallas which though within the revenue jurisdiction of Badgam tehsil constitute parts of Srinagar Urban Agglomeration.

Table No. 2 below depicts the decennial changes in the distribution of tehsil-wise population in the district :—

Table NO. 2

Decadal change in distribution of population

S. No.	Name of Tehsil	Population						Percentage decadal (1971-81) variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Chadura	98,042	90,349	7,693	137,973	105,411	32,562	+40.73	+16.67	+323.27
2.	Badgam	92,795	88,630	41,65	129,543	110,220	19,323	+39.60	+24.36	+363.94
3.	Beerwah	78,196	78,196	—	99,746	99,746	—	+27.56	+27.56	—
	District	269,033	257,175	11,858	367,262	315,377	51,885	+36.51	+22.63	+337.55

The table reveals that the district has registered growth rate of 36.51 percent in its population in the decade 1971-81 which is higher than the growth rate for the State as a whole which stands at 29.69%. Amongst the tehsils, however, Beerwah trails behind Chadura and Badgam tehsils. The growth rate in the population of urban component is still higher in these two tehsils due very much to accelerated pace of expansion of Srinagar city during the decade.

Table No. 3 below deals with the distribution of villages with population ranges :—

TABLE NO. 3

Distribution of villages by population ranges

Range of population (1)	No. of villages in each range (2)	Percentage of villages in each range (3)
— 200	105	22.11
200— 499	156	32.84
500—1,999	189	39.79
2,000—4,999	24	5.05
5,000—9,999	1	0.21
10,000+	...	...
Total	475	100.00

From the above table, it is evident that out of 475 inhabited villages in the district as many as 189 villages or 39 79 percent have population in the range of 500-1999 persons while 32.84 percent have it in the range of 200-499 persons. Villages with population of less than 200 constitute 22.11 percent while those with population of 2000 or more persons form 5.05 percent of the total inhabited villages. There is only one village having returned a population of more than 5000 persons.

Table No 4 below deals with the distribution of villages by density range :—

TABLE NO. 4

Distribution of villages by density

Range of Density (per sq. km.)	Total No of villages in each density range	Percentage of villages in each density range
(1)	(2)	(3)
— 10	....	...
11— 20	1	0.21
21— 50	...	...
51—100	2	0.42
101—200	27	5.68
201—300	66	13.90
301—500	159	33.47
501+	220	46.32
Not known	...	...
Total	475	100.00

It will be seen that the density ranges of 301-500 and 501+persons per sq. km. together claim 379 or 80% of the total villages of the district. Of the remaining 96 villages 66 fall in the density range of 201-300 per sq. km. The share of lower ranges of density is indeed negligible.

Table No. 5 below shows the proportion of scheduled caste population to the total population in the villages :—

TABLE NO. 5

Proportion of scheduled caste population to total population in the villages :-

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
(1)	(2)	(3)
Nil	470	98.95
5 or less	5	1.05
6—10	...	...
11—15	....	...
16—20	...	...
21—30	...	...
31+	...	...
Total	475	100.00

It will be seen that out of 475 inhabited villages in the district, there are only five villages where scheduled castes constitute an element of the population of the village and that also just in the range of 5 percent or less.

Table No. 6 below shows the literacy rate by population ranges of the villages :—

TABLE NO. 6

Literacy rates by population ranges of villages

Range of population (1)	No. of villages in each range (2)	Literacy rate (3)
— 200	105	11.38
200— 499	156	14.31
500—1,999	189	14.59
2,000—4,999	24	16.09
5,000—9,999	1	10.25
10,000+	...	...
Total	475	14.63

It will be seen that generally villages in the population ranges of 200-499, 500-1999 and 2000-4999 are better placed in the matter of literacy level than those in the lower range of population. However, considering the fact that the average rural literacy rate for the State as a whole as returned at the 1981 census is 21.63% which itself is no satisfactory level, none of the population ranges can be treated as possessed of a reasonably satisfactory literacy rate. This is also true for district literacy rate.

Table No. 7 below indicates the urban literacy rate in the district :—

TABLE NO. 7

Literacy rate for towns

Name of town (1)	Literacy rate (2)
Chrari-Sharief	28.65
All towns	37.49

Note :- The literacy rate for the district has been worked out taking into account the total literates, population of the urban component falling in Badgam district. The literacy rate shown for the constituent town do not therefore tally with the total district figures.

It will be seen that on the whole the urban component of the district falls below the State average urban literacy level of 45.56%. Chrari Sharief town stands even below the district urban literacy rate which is 37.49% only. The literacy rate for the district has been worked out taking into account the total literate population of the urban component falling in Badgam district. The literacy rate shown for the constituent town do not therefore tally with the total district urban figures.

The sub-joined table No. 8 gives the tehsil-wise distribution of literates, workers, non-workers and scheduled caste population in the district :—

TABLE NO. 8

Literates, Workers, Non-workers, Scheduled Caste/Tribe population in the district

Name of Tehsil	Total/ Rural/ Urban	Total Population			Percentage of—(Contd.) S. C. population to total population	S. T. population to total population	Literates to total population		
		Persons	Males	Females			Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Chadura	Total	137,973	73,322	64,651	...	...	21.51	31.56	10.12
	Rural	105,411	55,968	49,443	...	...	16.30	26.17	5.13
	Urban	32,562	17,354	15,208	...	...	38.39	48.93	26.35
Badgam	Total	129,543	68,821	60,722	0.03	...	16.67	24.44	7.86
	Rural	110,220	58,436	51,784	0.03	...	13.28	20.81	4.80
	Urban	19,323	10,385	8,938	0.06	...	35.97	44.86	25.63
Beerwah	Total	99,746	53,252	46,494	...	...	14.35	22.24	5.30
	Rural	99,746	53,252	46,494	...	...	14.35	22.24	5.30
	Urban	...	....	...	...	...	...	...	...

We have already seen that both in the matter of rural as well as urban literacy the district has to make a large leeway even to come up to the level obtaining for the State as a whole. Down at tehsil level the position is still worse in respect of Badgam and Beerwah tehsils where the literacy rate has been returned at 16 67% and 14.35% respectively, corresponding to 17.86% for the district as a whole. Chadura, which is a bigger tehsil in population is however better placed with both total and rural literacy being higher than for the district as a whole. As between the two sexes, male literacy level outweighs the female literacy level in all the tehsils. The differential is however, far greater in rural areas than in urban areas.

Percentage of main workers to total population as reproduced in col. 11-13 shows that male work participation rate in urban areas generally trails behind than that in rural areas. The differential is however marginal in all the tehsils. The same position obtains in all cases of female participation rate for Chadura, but for Badgam the position is reverse. Amongst the tehsils the highest rural participation rate for males and females has been returned by Beerwah at 59.96% and 8.44% respectively, corresponding to 57.92% and 5.88% for the district. The urban participation rate in respect of both sexes is also higher in Badgam tehsil than for tne district as a whole.

Marginal workers, as will be noticed from col. 14-16 of the statement, constitute 15.92% of the total population of the district. At the tehsil level, this proportion varies from 8.73 in Beerwah tehsil to 21.27 in Badgam tehsil. It is, however, significant to note that in all towns predominant proportion of the marginal workers is claimed by the female population of the rural component. It is a traditional feature of rural economy that female folk though primarily engaged in household activities contribute their bit by marginal participation in seasonal economic activities like agricultural operations and household industries. It will be seen that proportion of rural marginal female workers to total female population varies from 17.44 in Beerwah tehsil to 47.90 in Badgam tehsil. Even in urban areas where marginal workers claim relatively much smaller proportion in both sexes, the proportion of females outweighs the male proportion in all the tehsils of the district. The proportion of total workers made up of main workers and marginal workers put together is brought out in cols. 17-19 of the table. It will be seen that in the case of male population the proportion of workers outstrips the proportion of non-workers both in rural and urban areas except Chadura urban where the proportion of workers stands at 48.01 corresponding to 51.99% of non-workers. In the case of female population however, the rate of non-workers is higher than that of workers except in Badgam rural where the proportion of female workers is 52.38 corresponding to 47.62% non-workers.

Analysis of Village Directory data

The data collected from the Revenue and other Government agencies regarding availability of various amenities have been tabulated in the main village directory statement. The salient features of this data in broad aggregates is brought out below in the form of inset tables.

The position of availability of various amenities at district/tehsil level is indicated in the following table :—

TABLE NO. 9

Distribution of villages according to the availability of different amenities

Sl. No	Name of Tehsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities: Educa-tion	Medical	Drinking water	Post and telegraph	Market/ Hat	Communi-cation	Approach by pucca road	power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Chadura	131	106	33	124	27	—	58	74	127
			(80.92)	(25.19)	(94.66)	(20.61)	(—)	(44.27)	(56.49)	(96.95)
2.	Badgam	169	111	25	166	19	—	42	68	131
			(65.68)	(14.79)	(98.22)	(11.24)	(—)	(24.85)	(40.24)	(77.51)
3.	Beerwah	175	132	18	172	21	—	48	51	166
			(75.43)	(10.29)	(98.29)	(12.00)	(—)	(27.43)	(29.14)	(94.86)
Total District		475	349	76	462	67	—	148	193	424
			(73.47)	(16.00)	(97.26)	(14.11)	(—)	(31.16)	(40.63)	(89.26)

The table reveals that of the total 475 inhabited villages in the district, 349 accounting for 73.47% villages have one or the other type of educational institutions like primary, middle, high, higher secondary schools located within the villages and this amenity is almost evenly distributed in all the three tehsils. As regards medical facility, however 76 villages have either a dispensary or primary health centre or a hospital which makes a meagre proportion of 16.00% of the total villages. The inter-tehsil comparison shows that the proportion of villages covered under this basic amenity ranges between 10.29 to 14.79% in Beerwah and Badgam tehsils which is lower than even the corresponding proportion of 25.19% in Chadura tehsil. Drinking water facility is however available to almost all the villages in the district from one source or the other. However portable drinking water supply is available to 148 villages only which form just 31% of the total number of villages which makes a poor position indeed. In the matter of Post and Telegraph facilities while the proportion of villages covered is 14.11% at the district level, their distribution is not very uneven at the tehsil level with the proportion of villages ranging from 11.24 in Badgam to 20.61% in Chadura. In communications, the facility of bus stop etc. is available in 148 villages of the district claiming the percentage of 31.16% only. At tehsil level the facility is available in 44.27% of villages of tehsil Chadura. The tehsils of Beerwah and Badgam follow with a proportion of 27.43% and 24.85% respectively.

The pucca road facilities are available in 193 villages of the district claiming a percentage of 40.63. The inter-tehsil position in respect of this basic amenity shows that Chadura tehsil has such facility in 56.49% villages followed by Badgam where 40.24% villages are covered under this facility. Beerwah is the only tehsil where such facility is available in only 29.14% villages.

As regards the power supply 424 villages out of 475 have such kind of facility available claiming a percentage of 89.26. At tehsil level Chadura and Beerwah tehsils have such facility available in 96.95 and 94.86% villages respectively, whereas the villages covered under this facility in Badgam tehsil form a proportion of 77.51% only.

The table No. 10 below highlights the availability of various amenities in terms of proportion of population served by each.

TABLE NO. 10

Proportion of Rural population served by different amenities

Sl. No.	Name of tehsil	Total population of inhabited villages in the tehsil	Proportion of rural population served by the amenity of :-							
			Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Chadura	105,411	93.99	53.59	95.52	39.55	—	56.95	65.85	97.41
2.	Badgam	110,220	86.17	36.11	99.05	29.77	—	39.70	58.86	84.07
3.	Beerwah	99,746	92.93	24.43	98.39	28.11	—	48.46	53.09	96 62
Total district		315,377	90.92	38.22	97.66	32.51	—	48.24	59.37	92.50

It will be noticed that the position is relatively brighter in terms of the population served by various amenities even in fields like medical care, post and telegraph offices and communications than what came out in the earlier table in terms of the proportion of villages both for the district as a whole as also at the tehsil level. Of course the proportion of population benefitted is nearly full or substantial only in the fields of education and power supply besides drinking water, in all the tehsils, except for the fact that in Beerwah tehsil the medical facility is available to only 24.43% of the population which is very low indeed. In case of other amenities while the position is still far from satisfactory in all the tehsils, Chadura seems to be placed relatively better position.

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available are indicated in table No. 11 below :—

TABLE NO. 11

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of :-			
	—5 kms.	5—10 kms.	10+ kms.	Total (Cols. 2—4)
(1)	(2)	(3)	(4)	(5)
1. Education	124	2	...	126
2. Medical	352	40	7	399
3. Drinking water	13	...	...	13
4. Post & Telegraph	357	45	6	408
5. Market/Hat	...	...	...	...
6. Communication	284	40	3	327

This table brings out a more encouraging picture. It will be noticed that 88% of the villages where education, medical, drinking water, post and telegraph and communication facilities are not available within the village itself are situated within a distance of less than 5 kms. from places where these facilities are available.

It is thus obvious that all the basic amenities are available to most of the rural population of the district within a distance of less than 5 kms. from their village, if not within the village itself. The proportion of population which has to travel a distance of more than 5 kms. is only 11%. The number of villages where the said facilities are available at a distance of more than 10 kms. is indeed negligible.

The table No. 12 below gives the distribution of villages according to distance from the nearest town and availability of different amenities :—

TABLE NO. 12

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in Kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of :-							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0— 5	19	16	5	17	4	...	4	7	19
		(84.21)	(26.32)	(89.47)	(21.05)	(...)	(21.05)	(36.84)	(100.00)
6— 15	138	98	24	130	22	...	61	81	127
		(71.01)	(17.39)	(94.20)	(15.94)	(...)	(44.20)	(58.70)	(92.33)
16—50	317	234	47	314	41	...	82	104	277
		(73.82)	(14.83)	(99.05)	(12.93)	(...)	(25.87)	(32.81)	(87.38)
51+	1	1	...	1	...	...	1	1	1
		(100.00)	(...)	(100.00)	(...)	(...)	(100.00)	(100.00)	(100.00)
Unspecified	...	...	...	...	...	...	...	...	...
Total	475	349	76	462	67	...	148	193	424
		(73.47)	(16.00)	(97.26)	(14.11)	(...)	(31.16)	(40.63)	(89.26)

It will be seen that distance from the nearest town does not seem to have any major effect on the provisions of various amenities in the villages except for communication and approach by pucca road facilities where the villages placed at a distance of more than 5 kms. seem, for good reasons to have received relatively better attention than those placed nearer a town. However the difference in the proportion is not as substantial as one should have expected and this might possibly be so due to a relatively less proportion of population inhabiting the more distant villages.

The table No. 13 below gives the distribution of villages according to population ranges and amenities available :—

TABLE NO. 13

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (With percentage) of villages having the amenity of :-							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
— 499	261	141	21	252	7	...	50	64	222
		(54.02)	(8.05)	(96.55)	(2.68)	(...)	(19.16)	(24.52)	(85.06)
500—1,999	189	183	39	186	44	...	81	108	179
		(96.83)	(20.63)	(98.41)	(23.28)	(...)	(42.86)	(57.14)	(94.71)
2,000—4,999	24	24	15	23	15	...	16	20	22
		(100.00)	(62.50)	(95.83)	(62.50)	(..)	(66.67)	(83.33)	(91.67)
5,000+	1	1	1	1	1	...	1	1	1
		(100.00)	(100.00)	(100.00)	(100.00)	(...)	(100.00)	(100.00)	(100.00)
Total	475	349	76	462	67	...	148	193	424
		(73.47)	(16.00)	(97.26)	(14.11)	(...)	(31.16)	(40.63)	(89.26)

As will be readily observed the population size of the villages has a direct bearing on determining the position of various amenities with more populated villages expectedly attracting more attention than less populated villages. The highest beneficiaries are obviously the villages with a population of 2,000 and more in the field of practically each basic amenity. The lone village in the population range group of 5,000 and more is fully covered in respect of all the amenities.

The table No. 14 below indicates the staple food of the inhabitants of the majority of villages in each tehsil :—

TABLE NO. 14

Main staple food in the majority of villages in each tehsil

S. No. (1)	Name of tehsil (2)	Main staple food (3)
1.	Chadura	Rice, Wheat, Maize
2.	Badgam	Rice, Wheat, Maize
3.	Beerwah	Rice, Maize

As is evident from the table the main staple food in majority of villages in all tehsils is rice and maize.

Distribution of villages according to land use is given in the sub-joined table No. 15 :—

TABLE NO. 15

Distribution of villages according to land use

S. No.	Name of tehsil	No. of inhabited villages	Total area	Percentage cultivable area to total area	Presentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1.	Chadura	131	25,965.72	83.49	36.37
2.	Badgam	169	25,123.23	82.14	55.77
3.	Beerwah	175	21,947.22	84.16	60.22
	Total district	475	73,036.17	83.23	50.20

As is clear from the table the percentage of cultivable area to total area in the three tehsils of the district ranges from 82.14% in Badgam to 84.16% in Beerwah. In the matter of irrigated area, out of the total cultivable area, Beerwah tehsil stands at top with a percentage of 60.22 followed by tehsil Badgam with a percentage of 55.77. Chadura tehsil stands at the bottom with a percentage of 36.37 irrigated area to total area.

Brief analysis of town directory data

Separate data in respect of urban population structure, civic finance and availability of various amenities has been compiled in the main town directory tables I to VI. For facilitating a brief assessment of the progress made by urban population some of the important statistics have further been sub-divided in table No. 16 to 21.

The table No. 16 indicates the figures relating to urban population, its percentage variation, density and sex-ratio :—

TABLE NO. 16

Growth, density and sex-ratio of urban population in the district in relation to the State

	District						State					
Census Year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1961	213,918	3,231	1.51	...	1,298	857	3,560,976	593,315	16.66	...	N. A.	844
1971	269,033	11,858	4.41	+267.01	803	882	4,616,632	858,221	18.59	+44.65	N. A.	860
1981	367,262	51,885	14.13	+337.55	1 124	870	*5,987,389	1,260,403	21.05	+46.86	2146	875

*The population figures exclude population of area under unlawful occupation of Pakistan and China where census could not be taken.

As can be readily seen from the table Badgam district lags far behind the State as a whole in its progress towards urbanisation, the position having been consistantly so during the last three decades with the proportion of urban population having increased to only 14.13% in 1981 as against 1.51% in 1961. The corresponding proportion for the State as a whole has increased to 21.05% in 1981 as against 16.66% in 1961. The pace of urbanisation in the district during the decade 1971-81 has also been much lower in the district as compared to the State. As regards density of population, in the absence of area figures for the State urban for 1961 and 1971, comparable picture is available only for 1981 indicating that urban density of population per sq. km. in Badgam district is a little more than half of what it is for the State as a whole. In the matter of urban sex ratio however the district compares favourably with the State.

The table below is intended to identify the towns added or declassified during the 1971-81 decade :—

TABLE NO. 17

New towns added/towns declassified in 1981 census

Name of town (1)	Population 1981 census (2)
(a) **Added**	
(i) **Chrari-Sharief**	6,935
(b) **Declassified**	...

It will be seen that Chrari-Sharief is the only town with a population of 6,935 persons in the newly created district of Badgam. The other urban components as already highlighted are the urban spread of Srinagar Urban Agglomeration.

Table No. 18 below indicates the per capita receipt from various resources and per capita expenditure on various amenities in Chrari-Sharief, the only town of the district :—

TABLE NO. 18

Per capita receipt & expenditure in towns

Class, name & civic status of the town	Per capita								
	Receipt			Expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
V Chrari-Sharief N.A.	31.71	3.59	28.12	5.34	2.36	0.10	2.28	...	0.60
Total	31.71	3.59	28.12	5.34	2.36	0.10	2.28	...	0.60

The table shows that the per capita receipt in Chrari-Sharief is rupees 31.71. Of this total receipt, rupees 3.59 come from taxes and rupees 28.12 from other sources. The total per capita expenditure in the said town is only rupees 5.34 of which rupees 2.36 are consumed on general administration and rupees 2.28 on public works. Surprisingly, the per capita expenditure on public institutions is nil and on public health it is only Rs. 0.10.

The sub-joined inset table No. 19 gives the number of educational institutions per 10,000 population in each town of the district :—

TABLE NO. 19

Schools per ten thousand population in towns

Class, name and civic status of town	No. per ten thousand population			
	Higher Secondary/Inter/ PUC/Junior college	Secondary/ Matriculation	Junior Secondary/ middle	Primary
(1)	(2)	(3)	(4)	(5)
V Chrari-Sharief N. A.	1.44	1.44	1.44	5.77

It will be seen from the table that there is obviously predominance of primary schools in the Chrari-Sharief town per 10,000 population as compared to schools of higher status.

Inset table No. 20 below gives the number of medical institutions per 1,000 population :—

TABLE NO. 20

No. of beds in medical institutions in towns

Class, name and civic status of the town	No. of beds in medical institutions per 1,000 population
(1)	(2)
V Chrari-Sharief N.A.	1.44
Total	1.44

As is evident from the table there are only 1.44 hospital beds per thousand population in the Chrari-Sharief town which is a low proportion indeed.

The below mentioned inset table highlights the extent of most important commodity manufactured, imported and exported in Chrari-Sharief town :—

TABLE NO. 21

Most important commodity manufactured, imported and exported in the towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
(1)	(2)	(3)	(4)
V Chrari-Sharief N.A.	Fire Pots	Fire Pots	C.G.I. sheets

As is clear from the table on the manufacturing side, making of Fire Pots (Kangris) is the chief occupation of people in the town. The same commodity constitute the Chief export of the town while the Chief commodity of import is the C. G. I. sheets.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

A number of codes has been used in the Village Directory. These are emplified below :

Column No. (1)	*Item* (2)	*Code* (3)
5 (Educational* Amenities)	Primary or elementary school	P
	Junior secondary or middle school	M
	Matriculation or Secondary	H
	Higher/Secondary/Intermidiate/ Pre-university/Junior college	PUC
	College, any college (graduate level and above) like Arts, Science, Commerce, ete.	C
	Industrial school	I
	Training school	Tr
	Adult literacy class / centre	Ac
	Other educational institutions, These include Sanskrit Path-shala, Senior basic school, Makhtab, etc.	O
6 (Medical£ Amenities)	Hospital	H
	Maternity and Child welfare Centre	MCW
	Maternity home	MH
	Child welfare centre	CWC
	Health centre	HC
	Primary health centre	PHC
	Primary health sub centre	PHS
	Dispensary	D
	Family planning centre	FPC
	T. B. clinic	TR
	Nursing home	NH
	Registered private practitioner	RP
	Subsidised medical practitioner	SMP
	Community health worker	CHW
	Others	O
7 (Drinking water Amenities)	Tap water	T
	Well water	W
	Tank water	TK
	Tubewell water	TW
	Handpump	Hp
	River water	R
	Fountain	F
	Canal	C
	Lake	L
	Spring	S
	Nallah	N
	Others	O
	Information not available	NA
8 (Post & Telegraph Amenities)	Post office	PO
	Telegraph office	TO
	Post & Telegraph office	PTO
	Telephone Connection	Phone
10 (Communi-cations)	Bus	BS
	Railway station	RS
	Navigable water way (including river, canal, backwaters etc.)	NW

Column No. (1)	Item (2)	Code (3)
11 (Approach to village)	Pucca road	PR
	Kaccha road	KR
	Navigable river	NR
	Navigable canal	NC
	Navigable water-way (other than river or canal)	NW
	Foot path	FP
13 (Power supply)	Electricity for domestic purposes	ED
	Electricity for agriculture	EAG
	Electricity for other purpose like industrial commercial, etc.	EO
	Electricity for all purposes	EA
16 (Irrigated by source)	Government canal	GC
	Private canal	PC
	Well (without electricity)	W
	Well (with electricity)	WE
	Tube-well (without electricity)	TW
	Tube-well (with electricity)	TWE
	Tank	Tk
	River	R
	Lake	L
	Waterfall	Wf
	Others	O
	Total	T
20 Remarks including any place of religious, historical or archaeological interest)	Copies of the newspapers coming in the village	N
	Motorcycle/scooter available in the villages	M
	Cars/Jeeps available in the village	C
	Tractors available in the village	T

NOTE : *Where there are more than one institutions of the same type in the village the same have been indicated in figures against the appropriate abbrevations e. g. P (3), M (2), H (2)

£Where there are more than one institutions of the same type in the village, the same have been indicated in figures against the appropriate abbrevations e. g. H. (2), D (3), etc.

APPENDIX IV—VILLAGE DIRECTORY

LIST OF VILLAGES ACCORDING TO THE PROPORTION OF SCHEDULED CASTES AND SCHEDULED TRIBES TO THE TOTAL POPULATION BY RANGES

DISTRICT : BADGAM

TEHSIL : BADGAM **A—Scheduled Castes**

Name of Scheduled Caste population (percentage) (1)	Location Code No. (2)	Name of Village (3)
*0—5	5	1. Narkara
	19	2. Chagam
	21	3. Naru
	174	4. Soyabug
	175	5. Dehramana
6—10	...	...
11—15	...	...
16—20	...	...
21—30	...	...
31+	...	...

*Excludes villages with no scheduled caste population. There are no scheduled castes in remaining tehsils of the district.

SECTION—II

TOWN DIRECTORY

NOTE EXPLAINING CODES USED IN THE TOWN DIRECTORY

A number of codes have been used in the Town Directory statements. These are given below :—

Statement No.	Col. No.	Item	Code
I	2	Municipal Committee/Municipal Town Committee	M.C.
		Cantonment Board/Cantonment	Cantt.
		Notified Area/Notified Area Committee/Notified Committee	N A.
		Town Committee/Town Area Committee	T.A.
		Census Town	C.T.
II	12	River	R
		Canal	C
IV	6	Pucca Road	PR
		Kaccha Road	KR
IV	7	Sewer	S
		Open surface drains	OSD
		Box surface drains	BSD
		Sylk drains	SD
		Cesspool method	CD
		Pit system	Pt
IV	11	Head loads	HL
		Baskets	B
		Wheel barrows	WB
		Septic tank latrines	ST
		Sewerage	S
IV	12	Tubewell water/Handpump	TW
		Tap water	T
		Well Water	W
		Tank Water	Tk
IV	13	Overhead tank	OHT
		Service reservoir	SR
		River infiltration gallery	IG
		Borewell pumping system	BWP
		Pressure tank	PT
V	4	Hospital	H
		Dispensary	D
		Health Centre	HC
		Family Planning Centre	FC
		T. B. Clinic	TB
		Nursing Home	NH
		Others	O
		Ayurvedic	A

...	...	...	....	...	...	...	...	...

Note :- £Represents provisional geographical area figures supplied by the Surveyor General. Figures for urban area are those supplied by the Local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represents paper area and are derived from the figgures supplied by the Revenue Department.

*Forms part of Srinagar Urban Agglomeration. Consolidated figures of Srinagar Urban Agglomeration along with details of its constituents are given in Annexure—I

Conversion Table :— 1 Acre=0.40469 hectares and 100 hectares=1 Km^2
