One each on other eleven Cities)

State Government Publications

25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

J-1760-i-B (Aur.)

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;
(ii) The four-coloured map of the district ;
(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;
(iv) Supplementary information showing basic amenities available for each village ; and
(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1951 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

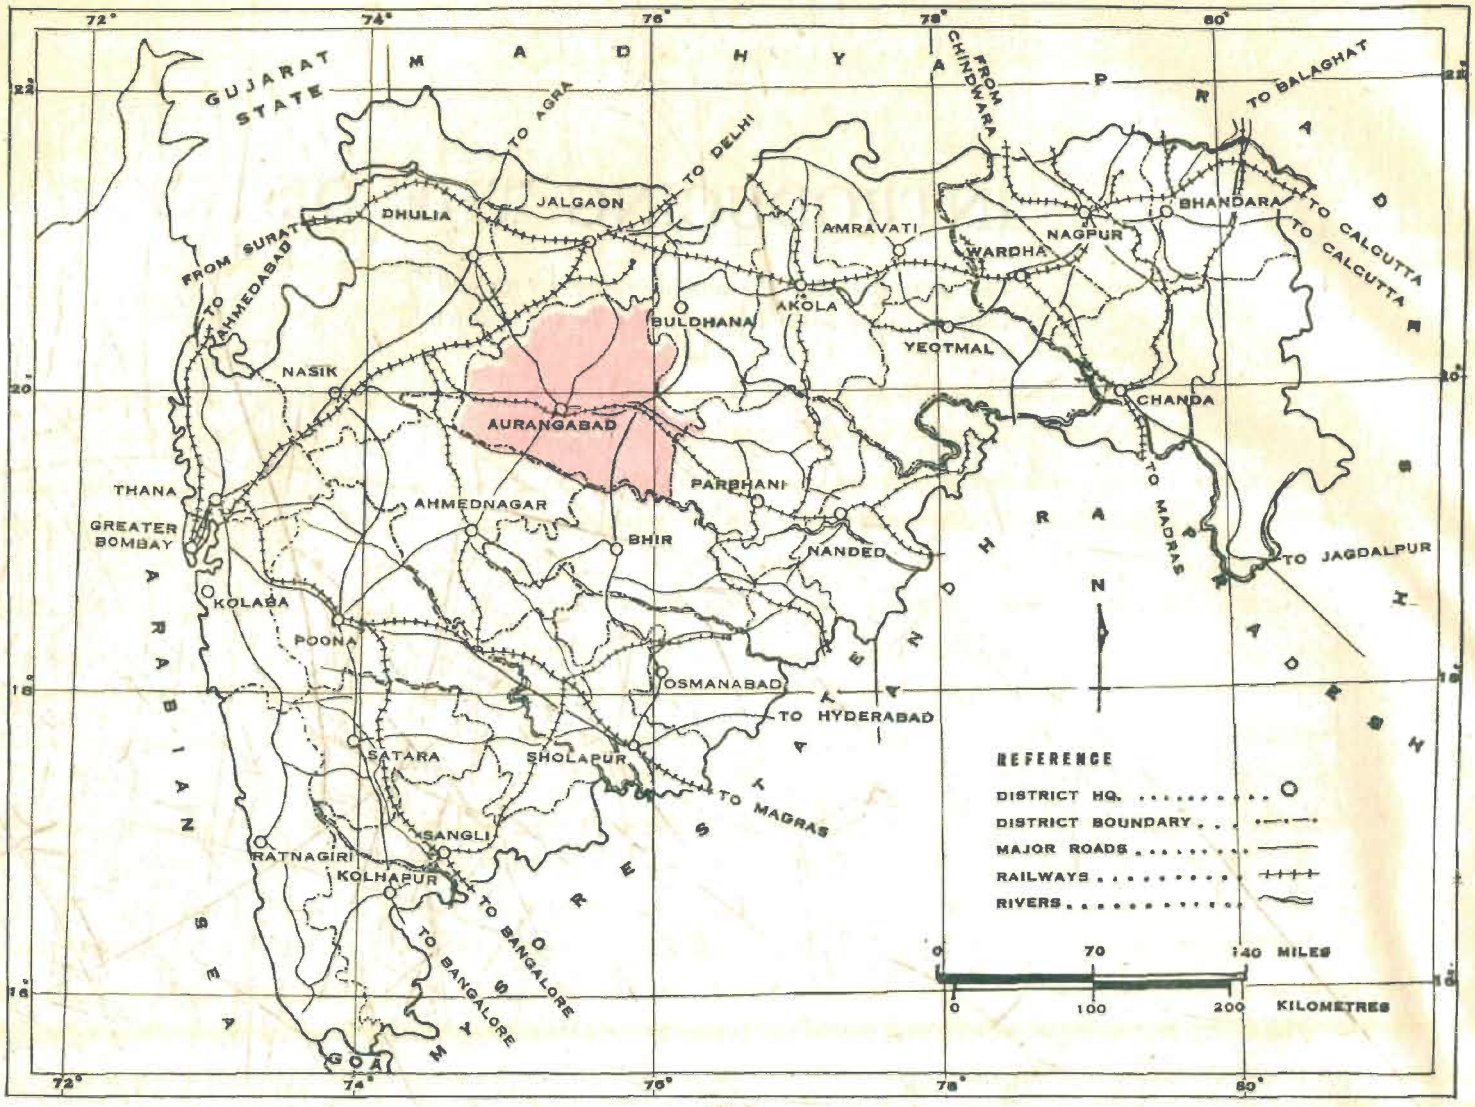

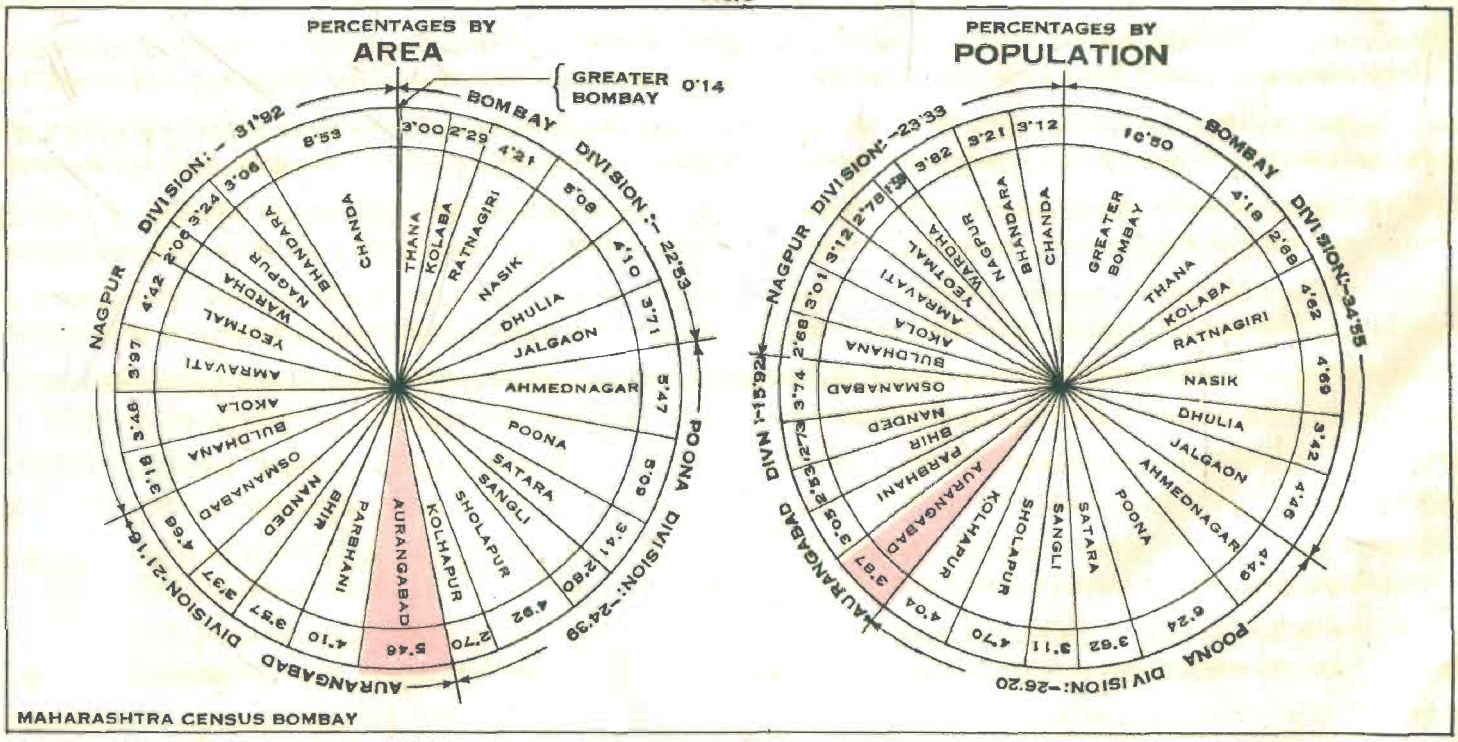

FIG. 3

G.P.Z.P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

The district is situated in the upper Godavari basin. A small area in the north and north-west lying beyond the Satmala hills is actually situated in the Tapi basin. The northern portion lying between the Satmala hills and the central hill range known as Jalna hills is an upland plateau and is drained by the Purna river and its tributaries. The southern portion is comparatively low land flat area terminating at the banks of Godavari river in the south. The general slope is to the south and south-east.

The district lies between 19°18′ and 20°40′ N. latitude and 74°40′ and 76°40′ E. longitude. It is surrounded by Jalgaon district in the north, Parbhani and Buldhana districts in the east, Bhir district in the south and Nasik and Ahmadnagar districts in the west.

The area of the district is 6,454·9 sq. miles and its population in 1961 is 1,532,341. In terms of area and population, it makes 5·46 per cent and 3·87 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

This district has two hill ranges stretching from west to east. The Satmala or Ajanta range enters this district at its north-western corner and runs parallel to the northern border up to the Ajanta caves, beyond which, it forms the Balaghat plateau in Buldhana district. This range acts as a water-shed between the Tapi valley on the north and Godavari valley on the south. The Daulatabad or Jalna hill range, which branches off from the Satmala range, runs through the centre of the district eastwards, acting as a watershed between the two fertile valleys of the Girja on the north and the Dudna on the south. There are important and noted hill projections like Daulatabad, Ajanta, Chowka and Josna. All the hills in the district have a terrace-like appearance with flattened summits.

Important Rivers

The most important river is the Godavari. It forms the southern boundary for about 127 miles and separates the district from Ahmadnagar and Bhir districts. Its principal tributaries are Shivna rising in the Kannad hills, the Dhenda rising near Daulatabad and the Dudna flowing from the hills east of Aurangabad, Kham flowing through Aurangabad taluka, Dheku flowing through Vaijapur taluka, Yerbhadra through Paithan taluka and Gahati through Ambad taluka. Purna is the biggest tributary of Godavari. It rises in the Kannad hills and flows through the northern talukas of the district. Khelna, Girja and Dudna are its important tributaries. Purna meets the river Godavari hundred miles downstream.

Climate

Temperature records for the district are available only for two stations, viz., Aurangabad and Chikhalthana. Table 1 in Part III shows monthly temperature records for ten years 1951 to 1960.

The rainy season starts from June and lasts up to mid-October, dry winter season from mid-October to February and summer from March to May. On the whole the seasons show considerable uniformity and the climate is generally very healthy.

During summer, the days are hot but nights are fairly cool. Occasionally, hot dry winds blow in April and May.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is not uniform in all parts of the district. The areas of assured rainfall are the talukas of Kannad, Jalna and Ambad and Soegaon mahal. The annual average rainfall in this area is above 750 mm. The areas of moderate rainfall from 625 to 750 mm. are Aurangabad, Sillod, Bhokardan and Paithan talukas and Khuldabad mahal. Parts of Gangapur and Vaijapur talukas have low rainfall averaging to less than 625 mm. annually.

The rainfall is mostly from south-west monsoons. The rain starts about the middle of June and lasts till the middle of October. From about mid-October the district also gets a few showers of the north-east monsoons.

The seasonal distribution of rainfall is more or less uniform in almost all the areas.

Dependability of Rainfall and Scarcity Areas

The mean rainfall of Aurangabad is 708·91 mm. Standard deviation is 216·41 mm. Coefficient of variability is 30·51 per cent. Rainfall reliability is measured by the coefficient of variability. Variability is inverse to reliability. It may, therefore, be said that the degree of reliability is slightly low.

Some parts of the district have been affected by scarcity from early times. The areas which have suffered more in the past are in Vaijapur and Gangapur talukas.

The Fact-Finding Committee appointed by the Government of Bombay in 1960 had reported that the rainfall is not dependable in the following areas and they are likely to be affected by scarcity conditions as shown below :—

Area	Grade	Estimated frequency
Vaijapur taluka ..	C	Once in ten years.
Gangapur taluka ..	C	Once in ten years.

Soils

The soils of the district are black cotton soils. They are derived from the trap-volcanic rock and are, therefore, rich in plant food, supporting good kharif and rabi crops like cotton, jowar, bajri, wheat, groundnut and pulses. The soils vary greatly in texture and depth and can be classified as light, medium and heavy, formed as a result of their location. The soils along the river banks are deep black and very fertile, while those on the hill tops or along hill slopes are medium to light with less depth.

In the southern talukas of Vaijapur, Gangapur, Paithan and Ambad, the soils, especially those near the banks of Godavari or its tributaries, are deep black and very fertile.

In Sillod, Aurangabad and Jalna talukas and Khuldabad mahal, the southern portions are of black and fertile soil. The northern and western portions are mountainous and rocky.

Bhokardan taluka has black cotton soil. It is suitable for cotton cultivation.

Major portion of Sillod taluka is hilly. Lands on the bank of the rivers are, however, very fertile.

Minerals

Very few minerals of economic value are found in the district. Those found are jaspers, agata, carnelian, chakedamy, heliotrope and rock crystals, both white and amethystine. Kankar or nodular limestone, basalt and granite occur all over the district, and are utilised for building purposes.

Forests

The area under forests is 345·25 sq. miles. Forests are extensive in Aurangabad and Kannad talukas and Soegaon mahal and scattered in Paithan, Vaijapur, Sillod and Bhokardan talukas and Khuldabad mahal. These forests have thorny shrubs, with barren and rocky patches scattered all over. On the whole, the forests in the district are of an inferior type. Sandal-wood is found in valleys at foot-hills in Bhokardan, Kannad, Aurangabad and Jalna talukas. Wood found in the forest is mostly used for making coal. Other forest produce includes karanj, bagwat, bhilwan, tarwad, honey, etc.

Natural Zones

The district can be very broadly divided into three natural zones. Soegaon mahal which lies to the north of Satmala or Ajanta ranges and makes 3·2 per cent of the area of the district has poorer soils and rainfall and climate like those of Jalgaon. Cotton and garden crops are important and transport and marketing are entirely linked up with the trade centres in Jalgaon district. The other natural division is that of the Purna valley consisting of Sillod and Bhokardan talukas, Jafferabad mahal and northern portions of Kannad taluka and Khuldabad mahal. The last two western areas of this plateau have an elevation of over 2,200 feet above sea level and in spite of poorer hilly soils have large extents of areas under wheat. Eastern portions of the valley are very fertile. The third natural division is of the remaining central and southern talukas of the district constituting the Godavari basin proper. Here again the western areas are distinct because of low unreliable rainfall and the south-eastern portions are perhaps the most fertile lands not only in the district but in the entire upper Godavari basin.

ADMINISTRATIVE SET-UP

Brief History

There were no major changes in the boundaries of the district or its talukas between 1901 to 1941.

Eight villages of Ambad taluka were exchanged with six villages of Pathri taluka of Parbhani district.

Twenty-five enclave villages belonging to the neighbouring districts of Nasik, East Khandesh and Ahmadnagar were transferred to Aurangabad district in 1950.

More than a third of the district was jagir area. The Nizam's own estate called "Sarf-e-Khas" comprised two talukas with headquarters at Khuldabad and Sillod. The Sarf-e-Khas was merged with the Government area under the Sarf-e-Khas (Merger) Regulation of 1949. All the other jagirs were abolished and their villages were taken over under direct Government administration under the Hyderabad (Abolition of Jagirs) Regulation, 1949.

Consequent upon the integration of jagirs and Sarf-e-Khas areas, all the taluka boundaries were reconstituted in April 1950. Two new mahals were created, one with headquarters at Khuldabad and another with headquarters at Jafferabad.

A new mahal with headquarters at Soegaon was created in 1953 by transferring 37 villages from Sillod taluka and 30 from Kannad taluka. All the villages transferred to this mahal are situated to the north of the Satmala hills.

With the Reorganisation of States in 1956, the district was transferred from Hyderabad State to Bombay State. It forms a part of Maharashtra since 1st May 1960.

Present Set-up

For administrative purposes, the district is at present divided in 9 talukas and 3 mahals. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

12 Ambad Taluka	Ambad	874·2	215	1	189,456	13·5	12·4

General Administration and Revenue

The Collector is in charge of General Administration, Law and Order, Elections, Treasury, Land Revenue and Civil Supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold charge of the three revenue divisions and have their headquarters at Aurangabad, Jalna and Vaijapur, respectively. Nine Tahsildars are in charge of nine taluka offices and three Naib-Tahsildars in charge of the three mahal offices.

Land Revenue Settlements

Prior to 1866, the district used to be annually farmed out and the revenue contractors were allowed a percentage commission for collection. The farming system was replaced by regular officers appointed to districts and talukas in 1866. The original survey and settlement was started in 1876 and completed in 1882. This introduced the ryotwari system of land tenure in the district. The original settlement rates were guaranteed for 30 years. The first revision settlements were completed and introduced simultaneously in all the talukas in 1917. Their rates were also guaranteed for 30 years.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified after the first revision settlement and landholders were generally allowed the benefits of improvements effected by them during the term of settlements untaxed. The comparative incidence of land revenue from

field to field is thus still the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments in the district is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small *bandharas* or Government canals, the land revenue is integrated and is inclusive of the charge for water supplied. Unlike western Maharashtra districts the Irrigation Department has not yet started assessment and recovery of water rates on lands irrigated under canals.

In spite of the expiry of the guarantee period in 1946, the land revenue rates have not so far been revised. A special assessment of two annas per rupee, i.e., 12·5 per cent of land revenue on dry lands and one anna per rupee, i.e., 6·25 per cent of land revenue on irrigated lands has, however, been imposed on all the lands in the district under the Hyderabad Land Revenue (Special Assessment) Regulation, 1952. Jagir villages had been surveyed and settled in some cases through the Government Survey and Settlement Department, in others by their own establishments. Land revenue rates in Jagir villages were generally higher than the adjoining Government villages. A majority of such cases had been examined by the Government after abolition of Jagirs in 1949 and those rates have been brought down to the levels of adjoining Government villages.

Table 24 in Part III shows demand and collection of land revenue during the last ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Khuldabad, Jafferabad and Soegaon are new mahals. Because of such territorial changes, there is in each taluka a varied pattern of land revenue assessments. Even then the maximum rates or average land revenue rates per acre fixed at each settlement or revision settlement should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka. The table on page (5) shows these rates for dry, garden or rice lands for each taluka separately.

Assembly and Parliamentary Constituencies

Since 1957 the district has 10 Assembly seats. In 1957, the Jalna constituency was a double-member constituency with one of the two seats reserved for Scheduled Castes. After the abolition of the double-member constituencies in 1961, the seat from Badnapur is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly Constituency	Number of voters on rolls
(1) Aurangabad	63,452
(2) Paithan	74,658
(3) Gangapur	69,738
(4) Vaijapur	76,091
(5) Kannad	83,566
(6) Sillod	81,941
(7) Ambad	65,826
(8) Jalna	60,384
(9) Badnapur	71,336
(10) Bhokardan	93,005
Total ..	739,997

In the 1962 General Elections, the Assembly constituencies Aurangabad, Paithan, Gangapur, Vaijapur, Kannad and Sillod together made one Parliamentary constituency called Aurangabad constituency and the remaining Assembly constituencies Ambad, Jalna, Badnapur and Bhokardan combined with Assembly constituencies Partur and Jintur from Parbhani district made another Parliamentary constituency called Jalna constituency.

The total number of voters on rolls in the district in 1961 was 739,997. The total population 21 years and above according to the 1961 Census is 719,935. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Tahsildars are vested with magisterial powers. But those powers are limited to Chapters VIII to XII of the Criminal Procedure Code and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of the judiciary from the executive had been brought about in the year 1921.

The District and Sessions Judge is assisted by one Assistant Judge and Additional Sessions Judge and one Assistant Judge and Assistant Sessions Judge. They have jurisdiction over the entire district. They attend to civil and criminal work both original and appellate.

*Soegaon mahal was formed in 1954 by transferring 37 villages from Sillod taluka and 30 villages from Kannad taluka. These villages are included under Sillod and Kannad talukas.

†Jafferabad mahal was formed in 1950 after reorganisation of taluka boundaries consequent upon the abolition of Jagirs. It consists of a few villages from Bhokerdan taluka and Jagir areas of Jafferabad and Tembhurni Jagirs. Settlement history of ex-jagir villages is not available. The survey and settlement of all the 89 ex-jagir villages was completed by Government in 1947-48.

(M) = Mot. (P) = Pat. (C) = Canal. NA=Not available

Civil Judge (Senior Division) and Judicial Magistrate, First Class, attends to civil suits in the taluka of Aurangabad and Khuldabad mahal. He also deals with small-cause suits as may arise within the local jurisdiction of the courts in the district presided over by the Civil Judges (Junior Division), and wherein the subject-matter exceeds the pecuniary jurisdiction of the Civil Judge (Junior Division). He also deals with Hindu marriage petitions, land acquisition cases, insolvency petitions, cases under Workmen's Compensation Act and cases under the Indian Succession Act, when contested.

There are nine Civil Judges (Junior Division) and Judicial Magistrates, First Class, with headquarters at different taluka places. They deal with regular civil suits of value of subject-matter below Rs. 10,000, cases under Payment of Wages Act, applications under Indian Succession Act, when not contested, and cases under Minimum Wages Act, arising within their respective jurisdictions.

There is one Special Judicial Magistrate, First Class (Railways). He tries cases under the Indian Railways Act.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by two Deputy Superintendents and two Circle Police Inspectors. There are 36 Police Stations in the district. Their headquarters and jurisdictions are as shown in the next column.

Average number of villages and population per Police Station in the district is 53 and 42,565 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

	Police Station Headquarters	Number of villages
1. Kannad Taluka ..	1. Kannad	52

Municipalities

Nine out of 10 towns in the district have Municipal or Town Committees established under the Hyderabad Municipal and Town Committees Act. The years of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and for women are shown in the following table for each Municipality separately :—

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total No. of Municipal Councillors	Seats reserved for	
							Scheduled Castes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1	Vaijapur	1944	1961	3	13,878	15	1	2
2	Paithan	1943	1961	3	8,556	14	1	1

8	Bhokardan	1944	1961	3	5,340	10	1	1
9	Jalna	1933	1961	3	67,158	34	2	3

The oldest Municipal Committee in the district has completed only thirty years so far.

The nine Municipalities together cover 95·33 per cent of the urban population or 13·48 per cent of the total 1961 population of the district. The one remaining town, viz., Aurangabad Cantonment has a Cantonment Board.

The taxation level of each of the Municipalities is as shown in the next column.

The *per capita* taxation level of the Municipalities has been comparatively lower up to 1961-62. All of them have imposed octroi duties only recently.

Name of the Municipality	1961 Population	Year 1961-62		
		Total Receipts	Receipts from Municipal taxes	Per capita Municipal tax
		Rs.	Rs.	Rs. nP.
1 Vaijapur	13,878	1,67,051	40,668	2 93
2 Paithan	8,556	1,09,152	28,646	3 35

9 Jalna	67,158	7,24,105	12,22,276	3 31

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 12 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries except in the case of municipal towns which are not covered by them. Aurangabad Cantonment town which does not have municipal committee but which is treated as a town in the 1961 Census is, however, excluded from the jurisdiction of the Zilla Parishad. The Zilla Parishad covers 98·7 per cent of the area and 85·86 per cent of the total population of the district. The population covered includes total rural population of the district in 1961. The number of villages, number of non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

——	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of non-municipal towns	Population in 1961	Percentage by area	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Zilla Parishad, Aurangabad	Aurangabad ..	6,350·5	1,879	..	1,315,639	100·0	100·0
1 Kannad Panchayat Samiti ..	Kannad ..	599·4	181	..	119,938	9 4	9 1
2 Sillod Panchayat Samiti ..	Sillod	639·8	160	..	142,673	10·1	10·8
3 Soegaon Panchayat Samiti ..	Soegaon ..	203·5	57	..	33,390	3·2	2·5
4 Bhokardan Panchayat Samiti ..	Bhokardan ..	484·0	160	..	114,717	7·6	8 7
5 Jafferabad Panchayat Samiti ..	Jafferabad ..	320·6	98	..	58,863	5.0	4·5

12 Ambad Panchayat Samiti ..	Ambad ..	854·8	215	..	182,842	13·5	13 9

Constitution

The Zilla Parishad has 53 directly elected councillors. Out of these 53 seats, one seat has been reserved for Scheduled Castes and one for Scheduled Tribes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis (Block Committees) are also *ex-officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase or sale of agricultural produce in the area of the Block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Wherever prescribed by Government, persons belonging to Scheduled Castes or Scheduled Tribes have also been co-opted as members. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the Block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six subject committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two subject committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified subject committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the subject committees concerned. Co-ordination between the subject committees is achieved through the Standing Committee which includes the Chairmen of all the subject committees as members.

The Panchayat Samitis do not have subject committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are, now with the creation of democratic bodies at the district and block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources, expressed through the Zilla Parishad and Panchayat Samitis.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in the Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The village Talati (or Patwari) and the entire work of the village revenue office have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of Records of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Board and District Panchayat Mandal. The functions of the non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will also be paid to the Zilla Parishad. Government also pays to the Parishad what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. Government will also pay to the Parishad an establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants which will be paid by Government to the Zilla Parishad will include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan Schemes are also payable to the Zilla Parishads. If in pursuance of the proposal of a Zilla Parishad or of a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act, is levied by the State Government in the whole of the district or in a block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are 152·6 lakhs. The major portion of the receipts is of receipts from Government. They are 90·70 per cent and the Zilla Parishad receipts are 9·30 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess and profession tax.

The total revenue expenditure is Rs. 155 lakhs. Following are the major items of expenditure :—

General Administration	3·04 per cent
Education	48·40 ,,
Community Development Project	11·98 ,,
Buildings and Communications	8·35 ,,
Miscellaneous	12·56 ,,
Other items	15·67 ,,

The Zilla Parishad has increased the local cess by 30 nP. in order to augment the resources of the Zilla Parishad to wipe out the deficit and to take up new schemes.

Per capita expenditure of the Zilla Parishad on different developmental heads is as follows :—

	Rs.
General Administration	0·36
Education	5·72
Community Development	1·42
Buildings and Communications ..	0·99

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 4 Class I and 48 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV category is 4,950. Moreover an establishment of 397 talatis has been very recently transferred from Revenue Department to the Zilla Parishad.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by the group village panchayats in each taluka are shown below :—

Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Kannad	181	34	56	
2 Sillod	160	37	50	
3 Soegaon Mahal ..	57	13	17	
4 Bhokardan	160	38	45	
5 Jafferabad Mahal ..	98	19	29	
6 Khuldabad Mahal ..	72	26	36	Not available.
7 Vaijapur	156	55	46	
8 Gangapur	204	21	62	
9 Aurangabad	192+1	34	56	
10 Jalna	210	59	62	
11 Paithan	174	29	50	
12 Ambad	215	80	54	
Total ..	1,879+1	445	563	

The break-up of the total annual income of all the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total income
	Rs.	
Grants	1,445	52·87
Taxes on houses and properties	67	2·45
Octroi	*Nil*	..
Other taxes	651	23·82
Total taxes	718	26·27
Income from other sources	570	20·86
Total income	2,733	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The Village Panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The Village Panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

No Village Panchayat has so far imposed octroi duty.

The break-up of the total annual expenditure of all the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total expenditure
	Rs.	
Administration	484	25·98
Health and Sanitation	216	11·59
Public Lighting	206	11·06
Other Items	957	51·37
Total Expenditure	1,863	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of Panchayat Ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—1961.

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Decade Variation	Rate of Variation
1901	733,291	..	..
1911	879,847	+146,556	+19·99
1921	720,699	−159,148	−18·09
1931	956,598	+235,899	+32·73
1941	1,082,729	+126,131	+13·19
1951	1,179,404	+96,675	+8·93
1961	1,532,341	+352,937	+29·93

Figure on page (11) shows the total, rural and urban population of the district for the last seven Censuses.

Many important developments occurred in the decade 1901—11. The opening of the Hyderabad-Godavari Railway line in 1900 connected the district to Bombay and Hyderabad cities and stimulated the growth of trade in the district. Public health improved considerably and the recovery from the famines and severe plague epidemic of the earlier decade contributed to the high growth of population. The decade 1911—21 was the worst in many respects. The failure of agricultural seasons due to deficient and irregular rainfall and, above all, the influenza epidemic of 1918-19 contributed for a decrease of nearly 18 per cent in the population. Aurangabad was one of the worst suffered districts in the influenza epidemic. The relatively favourable seasons, the recovery from the epidemic of 1918 and the expansion

of industries in the district resulted in an increase in the population by 32·7 per cent during the decade 1921—31. The growth of population during the two following decades was little lower than that of 1921—31; the 1941—51 growth was the lowest after 1921. The growth of population during the last decade has again been as much as 29·93 per cent.

The 1951—61 decade variation for the district and each of the talukas is as follows :—

	Percentage Variation 1951—61
AURANGABAD DISTRICT	+29·93
1 Kannad Taluka	+32·81
2 Sillod Taluka	+32·40
3 Soegaon Mahal	+47·48
4 Bhokardan Taluka	+39·06
5 Jafferabad Mahal	+28·85
6 Khuldabad Mahal	+28·63
7 Vaijapur Taluka	+28·70
8 Gangapur Taluka	+30·19
9 Aurangabad Taluka	+34·81
10 Jalna Taluka	+24·62
11 Paithan Taluka	+26·99
12 Ambad Taluka	+22·85

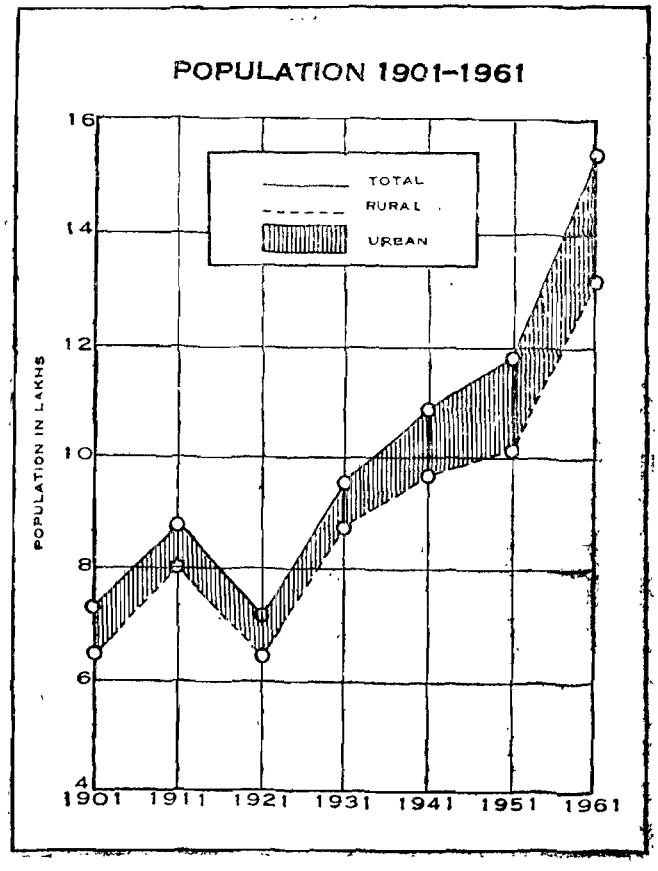

Figure on page (12) will show the areawise pattern of 1951—61 growth of population within the district.

Soegaon mahal has recorded the highest decade growth of 47·48 per cent while Ambad taluka has recorded the lowest decade growth of 22·85 per cent. Soegaon mahal and Bhokardan, Kannad, Sillod, Gangapur and Aurangabad talukas have recorded higher rates of variation than the average for the district and the remaining talukas are below the district average.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Aurangabad District	Maharashtra
1901—1961	108·97	103·97
1921—1961	112·62	89·71
1951—1961	29·93	23·60

During the 40 years of accelerated growth since 1921, the population of the district increased by 112·62 per cent, against 89·71 per cent for Maharashtra. Because of the heavy loss of life in the decade 1911—21 the increase during the 60 years since 1901 is less than that of the last 40 years since 1921. The rate of variation has however been higher than that of the State.

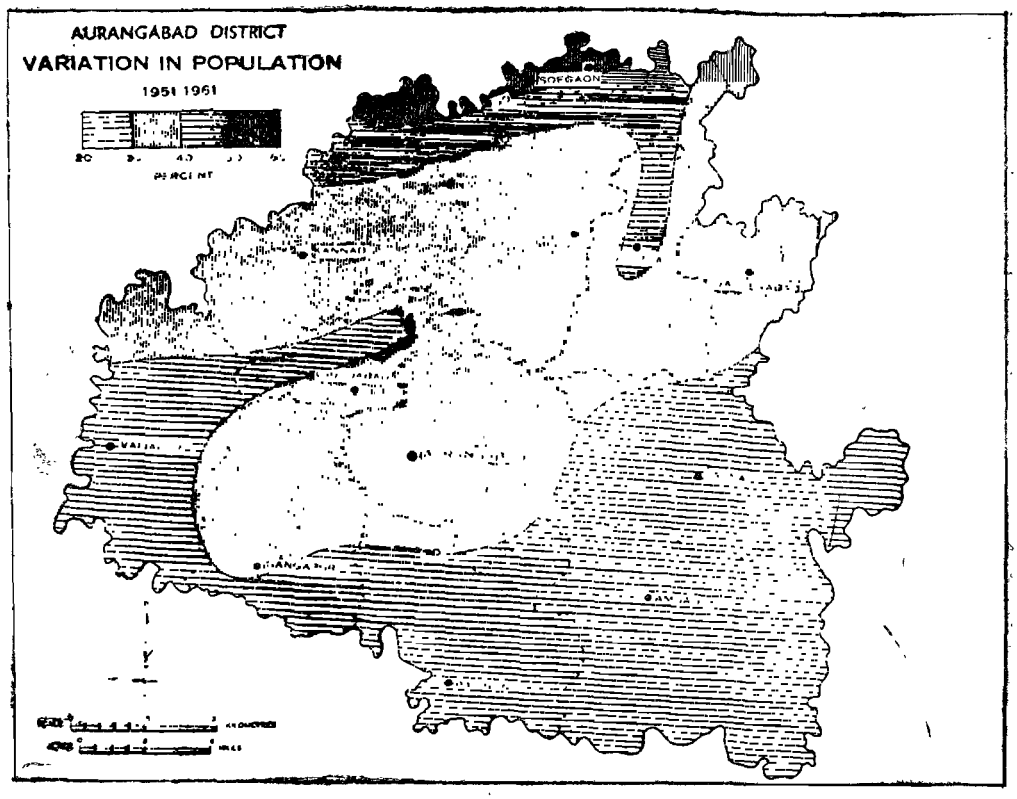

Density of Population

The densities for Maharashtra, Aurangabad district and its talukas for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
AURANGABAD DISTRICT	183	237	100·00
1 Kannad Taluka	158	210	8·29
2 Sillod Taluka	168	223	9·31
3 Soegaon Mahal	111	164	2·18
4 Bhokardan Taluka ..	176	245	7·84
5 Jafferabad Mahal	142	184	3·84
6 Khuldabad Mahal ..	190	245	2·79
7 Vaijapur Taluka	168	216	8·80
8 Gangapur Taluka ..	168	219	7·29
9 Aurangabad Taluka ..	248	334	14·52
10 Jalna Taluka	235	293	14·75
11 Paithan Taluka	168	214	8·03
12 Ambad Taluka	176	217	12·36

There were 114 persons per sq. mile in 1901, 112 in 1921 and 237 in 1961. Thus the density increased sharply in the last forty years. At every Census since 1901, the density of the district has been lower than the average for the State.

Within the district the density varies from 334 persons per sq. mile in Aurangabad taluka to 164 persons per sq. mile in Soegaon mahal. The variation is due partly to the effect of topography and partly to growth of two large urban centres, viz., Aurangabad and Jalna.

The density of the population in rural areas of the district does not show any significant variation. There is thus no specific concentration in any part of the district excepting the two towns of Aurangabad and Jalna.

Figure on page (13) shows the approximate contours of density of population in 1961 within the district.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

	Aurangabad District			Maharashtra		
Year	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901	5	..	11·23	219	..	16·59
1911	5	—7·04	8·70	232	+0·99	15·13
1921	5	—3·54	10·25	238	+18·72	18·50
1931	6	+8·22	8·35	258	+15·54	18·60
1941	7	+44·15	10·64	266	+27·11	21·11
1951	10	+44·63	14·13	383	+62·42	28·75
1961	10	+30·07	14·14	266	+21·32	28·22

In the Figure on page (11) the actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 163·14 per cent as against 246·96 per cent for the State.

The district is less urbanised than the State. The urban population was 11·23 per cent of the total population in 1901. It is 14·14 per cent in 1961 against 28·22 per cent for Maharashtra.

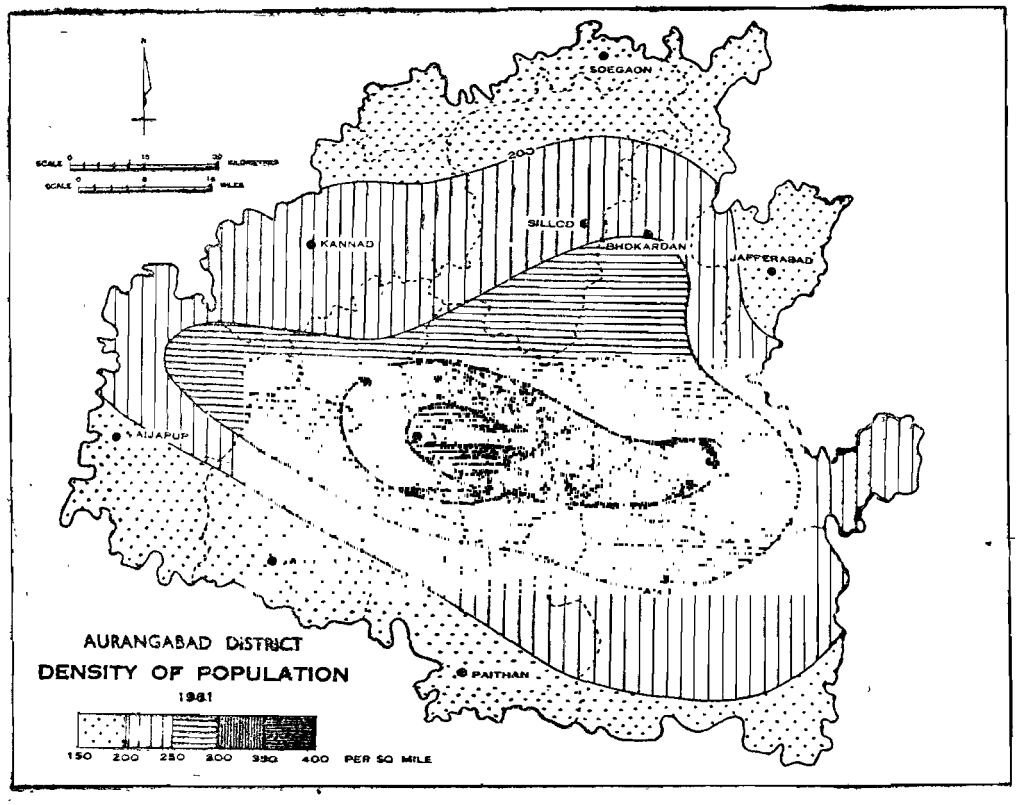

The number of towns increased from 5 in 1901 to 10 in 1961. There was no effect of redefinition of urban area in 1961 on the towns in the district. No town was declassified or added in the decade 1951—61.

Except for the two large towns, Aurangabad and Jalna, other towns are very small and are only administrative centres.

The urban population of the district decreased up to 1921; since then it has been increasing continuously. Though the rate of variation for the district was lower in the decade 1941—51, during 1951—61 the urban population of the district has increased at a higher rate (30·07 per cent) than that of Maharashtra.

Aurangabad and Jalna are the two important towns in the district. Aurangabad is now an administrative and educational centre. Jalna is a famous trade centre. The percentage growth in the Aurangabad town-group and Jalna from 1901 to 1961 was 165·23 per cent and 231·32 per cent and from 1921 to 1961, 164·94 per cent and 297·10 per cent respectively.

There was a setback up to 1921 in the growth of the towns as mentioned earlier. Aurangabad town has increased by 51·13 per cent in the last decade. It may be due to the opening of many new Government offices and educational institutions after 1956.

Jalna population had decreased during 1901—11 due to the temporary abandonment of the cantonment in 1903. It increased by 70 per cent in 1931—41 and by 53·5 per cent in 1941—51. It is an important commercial centre and agricultural market in the region. The increase in its population during 1951—61 is only 15 per cent. Paithan is a pilgrimage centre. It had a larger population in 1901 than in 1961. Khuldabad is another pilgrimage centre and its population has been declining since 1911 mainly because of out-migration to Greater Bombay.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Aurangabad District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	88·77	..	83·41
1911	+23·40	91·30	+12·68	84·87
1921	−19 47	89·75	−6·77	81·50
1931	+35·53	91·65	+14·77	81·40
1941	+10·36	89·36	+8·54	78·89
1951	+4·68	85·87	+7·72	71·25
1961	+29·90	85·86	+24·51	71·78

The net increase in rural population of the district has been 102·11 per cent over that of 1901 and 103·39 per cent over that of 1921. The same figures for the State are 75·53 per cent and 67·08 per cent, respectively. The rates of variation of the rural population given in the table never followed any trend. The percentage of the rural population decreased from 88·77 in 1901 to 85·86 in 1961. During the same period the percentage of rural population decreased from 83·41 to 71·78 for Maharashtra. The percentage of rural population in the district in 1961 is almost the same as in 1951.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Aurangabad District		Maharashtra	
	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	45·88	17·63	47·72	15·02
500—999 ..	34·59	35·09	28·55	25·71
1,000—1,999 ..	15·38	29·26	16·62	28·55
2,000—4,999 ..	3·94	16·10	6·18	22·40
5,000 and over ..	0·21	1·92	0·93	8·32

52·72 per cent of the rural population lived in villages with population less than 1,000 against 40·73 per cent for Maharashtra. Those villages constituted 80·47 per cent of the total number of villages in the

Since 1901 the sex ratio of the population of the district fluctuated between 956 and 998 compared to that of Maharashtra between 936 and 978. At each Census, the district sex ratio for total population or urban population has been higher than that of the State. For rural areas however the State averages have been equal or higher than the district sex ratios. The variation in the sex ratio for the district has not followed any trend. Starting from near equality 998 in 1901 it fell down to 956 in 1941, again rose to 974 in 1951 and fell to 960 in 1961.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas separately :—

	Total	Rural	Urban
0—14	964	970	932
15—34	1,005	1,030	875
35—59	864	873	812
60+	1,053	1,060	1,003
All ages	960	972	892

The sex ratio increases from 964 for age-group 0—14 to 1,005 for age-group 15—34, it again drops down to 864 for age-group 35—59 and increases to 1,053 for age-group 60+. The same pattern is observed both for rural and urban areas. It is difficult to explain the shortage of females in the age-group 35—59 and to some extent also in age-group 0—14 without further local enquiries.

The following are the sex ratios for each taluka in the district for total, rural and urban areas separately :—

District/Taluka	Total	Rural	Urban
AURANGABAD DISTRICT	960	972	892
1 Kannad Taluka	967	969	934
2 Sillod Taluka	973	973	..
3 Soegaon Mahal	966	966	..
4 Bhokardan Taluka ..	961	966	859
5 Jafferabad Mahal ..	981	981	..
6 Khuldabad Mahal ..	971	961	1,077
7 Vaijapur Taluka	952	960	889
8 Gangapur Taluka ..	965	970	893
9 Aurangabad Taluka ..	916	969	852
10 Jalna Taluka	960	974	926
11 Paithan Taluka	983	985	960
12 Ambad Taluka	981	982	953

There are no wide differences between the sex ratios for different talukas. Generally urban sex ratios are lower than those for rural areas. Khuldabad town is the only exception and has excess of females over males due to the migration of Muslim males to Greater Bombay.

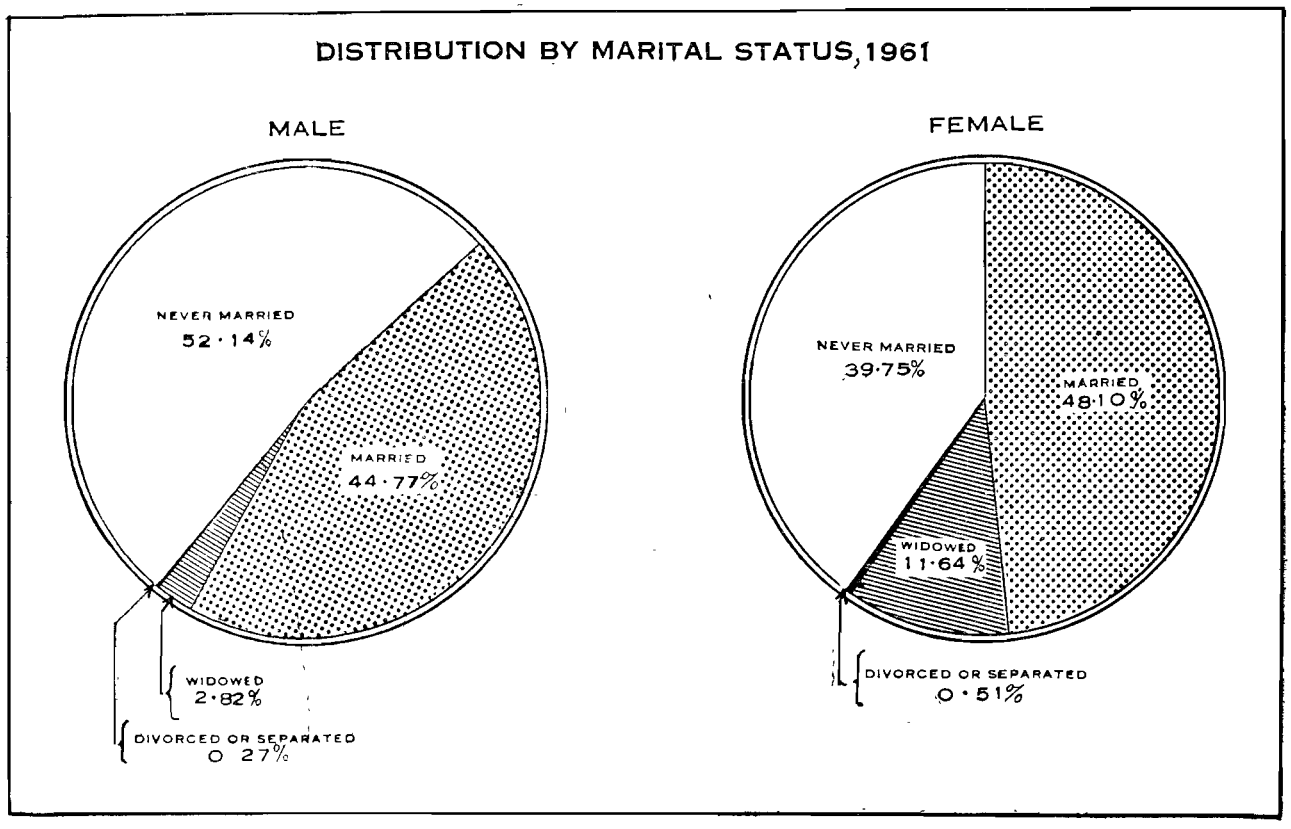

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951:—

Year	Age-groups	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 ..	100	97·78	84·85	2·15	14·77	0·07	0·31	..	0·07
	15—34 ..	100	29·48	2·70	68·83	91·83	1·47	4·93	0·22	0·54
	35—54 ..	100	1·75	0·40	90·93	65·53	6·95	33·57	0·37	0·50
	55+ ..	100	1·96	0·14	75·31	19·54	22·52	80·18	0·21	0·14
	All ages ..	100	49·69	35·75	46·60	49·80	3·55	14·14	0·16	0·31
1961	0—14 ..	100	98·96	91·22	1·03	8·66	0·01	0·07	..	0·05
	15—34 ..	100	31·70	3·36	66·66	92·60	1·17	3·02	0·47	1·02
	35—54 ..	100	1·79	0·22	91·91	70·23	5·80	28·78	0·50	0·77
	55+ ..	100	1·16	0·17	79·68	21·89	18·77	77·68	0·39	0·26
	All ages ..	100	52·14	39·74	44·77	48·11	2·82	11·64	0·27	0·51

Figure on page (17) shows the distribution of the district population by marital status for males and females separately.

During the 1951—61 decade, the proportion of never married has increased both for males and females. The proportion of widowed decreased both for males and females. The proportion of divorced and separated has increased but it is yet insignificant. Consequently the proportion of married decreased for both sexes. The changes in marital status over the decade were similar both for males and females. The proportion of married and widowed was higher in rural areas than in urban. The proportion of widowed for females was much higher than for males in both urban and rural areas. The proportion of never married was higher for males than females in all age-groups. The increase in age at marriage for the total population may be observed from the marital status distribution by age-groups. Over a decade there is a decrease in proportion of married persons in the age-group 0—14. The proportion of never married decreased gradually from younger to older age-groups.

Child-Woman Ratio

The following table will show the child-woman ratios for 1951 and 1961, i.e., the number of children 0—4 years age-group per 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows of 15—44 years age-group to 1,000 married women of 15—44 years age-group is also shown for comparison :—

	Number of Children 0--4 years age-group per 1,000 women of 15—44 years age-group	Number of Children 0--4 years age-group per 1,000 married women of 15 —44 years age-group	Number of Widows per 1,000 married women(both in 15—44 years age-group)
1951 District Total ..	609	711	108
1961 District Total ..	723	807	75
Rural ..	725	803	75
Urban ..	712	835	71

Over a decade the child-woman ratio (CWR) shows an increase even when it is standardised for marital status. CWR in rural areas is slightly higher than in urban areas. But when the ratio is considered in relation to currently married women only the urban areas have a higher CWR. The increase in the CWR may not necessarily be due to an increase in fertility. The CWR is affected by several demographic variables in particular by the changes in age structure.

The number of widows per 1,000 married women in the age-group 15—44 decreased from 108 in 1951 to 75 in 1961. This is a significant reduction in the incidence of widowhood over a decade.

Migration

The 1961 Census showed the following proportions of population enumerated at place of birth and other places :—

Proportions of population by places of birth

(1)	Total population (2)	Place of enumeration (3)	Elsewhere in the District (4)	Outside the district but in Maharashtra (5)	Outside Maharashtra (6)
Persons	1,532,341	997,492	393,980	119,588	18,711
Males	781,635	633,943	94,951	41,199	10,401
Females	750,706	363,549	299,029	78,389	8,310
Percentage to total population—					
Persons	100·00	65·21	25·75	7·82	1·22
Males	100·00	81·22	12·17	5·28	1·33
Females	100·00	48·52	39·91	10·46	1·11

65·21 per cent people were enumerated at their places of birth, 25·75 per cent at other places than their place of birth but in the district. Bulk of the migration seen here is, however, of women living outside the place of birth due to marriage. Among the males 18·78 per cent are found outside their places of birth, 12·17 per cent migrating within the district, 5·28 per cent outside the district but within the State and 1·33 per cent from outside the State. A significant portion of this last category of males may be from nearby districts of old Hyderabad which are now in Andhra Pradesh.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	960	972	892
0—4	1,010	1,015	976
5—9	982	983	975
10—14	881	891	828
15—19	986	1,034	775
20—24	1,147	1,202	900
25—29	978	982	958
30—34	901	902	895
35—39	845	857	769
40—44	900	910	839
45—49	851	858	798
50—54	896	900	869
55—59	813	816	795
60+	1,053	1,060	1,003

Sex ratios by five-year age-groups for total, rural and urban population of the district show that the rural-urban differentials are less in younger and older age-groups. The rural sex ratio is always higher than that for urban. These differentials are more significant in young adult age-groups, among which 15—19 and 20—24 age-groups are the most affected. The rural sex ratio is very high in these age-groups compared to the corresponding ratio for urban areas. The sex ratios of rural and total population are also the highest in the age-group 20—24.

Different age preferences for returning ages among males and females may partly account for some of these differences. They cannot otherwise be explained without further local investigation.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and of non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52.

It will be seen that the proportion of non-workers is less in case of migrants, though not very much less. The proportion of workers engaged in cultivation is also small in case of migrants and they are engaged more as agricultural labourers and in non-agricultural sectors.

	Categories of Workers									Non-Workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	30·36	14·49	1·77	3·22	1·35	0·72	2·19	0·74	4·92	40·24
Born at place of enumeration	33·95	13·67	1·72	2·78	1·00	0·41	1·71	0·48	3·05	41·23
Elsewhere in the district	17·66	20·87	2·10	5·35	2·17	1·76	3·25	1·47	10·33	35·04
Outside the district	9·93	12·95	1·66	4·80	4·19	2·67	6·04	2·61	17·94	37·21

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	6·66	5·90	11·23
2—3 members	22·99	22·84	23·93
4—6 members	44·13	45·12	38·20
7—9 members	19·16	19·22	18·77
10 members and more ..	7·06	6·92	7·87
All sizes	100·00	100·00	100·00

Single member households constitute 6·66 per cent of the total households in the sample. Among the different sizes of households, the size group of 4 to 6 members is more common than others and accounts for 44·13 per cent of the total number of households. Single member households are more in urban areas than in rural areas. The difference is made up by the smaller proportions of the following two size groups in urban areas.

Households having 10 or more members also have a slightly larger proportion in urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is as shown below.

34·85 per cent of the males are heads of households as against 3·19 per cent for the females. Married sons form 8·79 per cent of the total males. 50·44 per cent males and 48·62 per cent females which, incidentally, form the largest group, are never married, widowed or divorced relations. A majority of them are the young never married children of the heads. Percentages of unrelated persons are 1·02 for males and 0·14 for females. Nearly 32 per cent of the females are spouses of the heads. The high percentage of females in other married relations includes the daughters and daughters-in-law of the heads. The differences in the household composition in rural and urban areas are the lower proportions of never married, widowed or divorced relations both for males and females and also a higher proportion of married sons, in rural areas. Unrelated persons constitute a higher percentage in urban households. The lower percentage of married sons in urban areas may be due to the preference of urban households for biological family to a joint family due to the impact of urbanisation.

	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	34·85	3·19	34·96	3·07	34·22	3·96
(2) Spouses of heads of households	0·08	31·53	0·07	31·84	0·13	29·55
(3) Married sons	8·79	..	9·26	..	5·96	..
(4) Other married relations	4·82	16·52	4·88	16·93	4·46	13·91
(5) Never married, widowed or divorced relations	50·44	48·62	49·99	48·04	53·07	52·30
(6) Unrelated persons	1·02	0·14	0·84	0·12	2·16	0·28
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown in the next column.

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951 ..	1,179	*205	*624
Actual 1961 ..	1,532	261	807
Projected 1966 ..	1,769	302	930
Projected 1971 ..	2,016	344	1,057
Projected 1976 ..	2,295	391	1,202
Projected 1981 ..	2,600	443	1,361

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V at page 189 in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari* ..	2·34	2·69	0·23	98·59	1·41
(2) Bhilli ..	0·37	0·43	0·07	97·29	2·71
(3) Gujarati ..	0·28	0·04	1·70	14·30	85·70
(4) Hindi ..	5·64	4·50	12·59	68·44	31·56
(5) Maratni ..	76·19	81·09	46·43	91·38	8·62
(6) Punjabi ..	0·08	N	0·56	4·56	95·44
(7) Sindhi ..	0·12	0·01	0·79	4·36	95·64
(8) Telugu ..	0·94	0·56	3·23	51·43	48·57
(9) Urdu ..	13·70	10·47	33·29	65·63	34·37
(10) Others ..	0·34	0·21	1·11	53·34	46·66
All Languages ..	100·00	100·00	100·00	85·86	14·14

*Includes Lambadi. N=Negligible.

Marathi is the principal language of the district and is the mother-tongue of nearly 76·2 per cent of its population. In rural areas Marathi speakers account for 81 per cent of the population. They make only 46·4 per cent of the population in urban areas. Urdu has the second largest number of speakers. It accounts for 13·7 per cent of the total population of the district. It is, however, spoken more in urban areas where its speakers make as much as 33·3 per cent against 10·5 per cent in rural areas. Hindi is the third largest language in the district. It makes 5·6 per cent of the total population but is spoken more in urban areas where its speakers make as much as 12·6 per cent against only 4·5 per cent for rural areas.

The speakers of the minority languages are concentrated in urban areas. Banjari, Bhilli and Telugu are exceptions.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari*	0·84	1·92	2·34
(2) Bhilli	0·39	0·63	0·37
(3) Gujarati	0·36	0·27	0·28
(4) Hindi	2·10	5·11	5·64
(5) Marathi	79·79	76·28	76·19
(6) Punjabi	0·09	0·04	0·08
(7) Sindhi	*Nil*	0·03	0·12
(8) Telugu	0·95	0·93	0·94
(9) Urdu	12·77	14·23	13·70
(10) Others	2·71	0·56	0·34
All Languages	100·00	100·00	100·00

*Includes Lambadi.

The proportion of Marathi speakers decreased from 79·79 per cent in 1901 to 76·28 per cent in 1951 and remained fairly constant in 1961. The percentage of Urdu speakers increased from 12·77 per cent in 1901 to 14·23 per cent in 1951 and decreased to 13·70 per cent in 1961. The proportion of Hindi speakers increased from 2·10 per cent in 1901 to 5·11 per cent in 1951 and to 5·64 per cent in 1961. Similarly, the proportion of Banjari speakers has also increased from 0·84 per cent in 1901 to 1·92 per cent in 1951 and to 2·34 per cent in 1961.

RELIGIONS

Table C-VII at page 190 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	8·57	9·31	4·11	93·23	6·77
(2) Christians ..	1·10	0·93	2·16	72·17	27·83
(3) Hindus ..	75·60	78·60	57·34	89·27	10·73
(4) Jains	0·78	0·57	2·11	61·96	38·04
(5) Muslims ..	13·85	10·58	33·72	65·57	34·43
(6) Others ..	0·10	0·01	0·56	12·38	87·62
All Religions ..	100·00	100·00	100·00	85·86	14·14

75·6 per cent population reported their religion as Hindu. Muslims are 13·85 per cent in the district. They make 33·7 per cent in urban areas, but only 10·6 per cent in the rural areas. Buddhists account for 9·3 per cent in rural areas and 4·1 per cent in the urban areas. Christians and followers of other religions are similarly more in urban areas. The Hindus and Buddhists are more numerous in rural areas than in urban areas. The Muslims are the most urbanised group and the Buddhists are the least urbanised.

The comparative position of the religions in 1901 and 1961 is as follows :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	8·57
(2) Christians	0·37	1·10
(3) Hindus	84·89	75·60
(4) Jains	0·71	0·78
(5) Muslims	12·67	13·85
(6) Others	1·36	0·10
All Religions	100·00	100·00

The proportion of Christians increased from 0·4 per cent in 1901 to 1·1 per cent in 1961. Jains have almost the same percentage over last sixty years. The proportion of Muslims increased from 12·7 per cent in 1901 to 13·85 per cent in 1961. The percentage of Hindus decreased by 9·29 per cent during the last sixty years. This is because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists has, however, decreased by 0·7 per cent. Data of 1901 Census are for the district as it existed in that year.

Sex ratio in 1961 for the main religions is as follows :—

Buddhists 984, Christians 956, Hindus 960, Jains 929, Muslims 950 and all religions 960.

The sex ratio is more or less uniform for all the religions and the small differences appearing in the sex ratios may be due to the differences in their proportions found in rural or urban areas.

SCHEDULED CASTES

Table SCT-I-Part A at pages 194 to 197 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually, 30 castes are notified as Scheduled Castes in the district but only 15 are reported in the 1961 Census. The distribution of Scheduled Castes by rural and urban areas of the district is as follows :—

Name of Scheduled Caste	Population		Percentage to total population of the district			Percentage of each Scheduled Caste population in	
	Males	Females	Total	Rural	Urban	Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Castes	46,432	46,283	6·05	5·30	0·75	87·64	12·36
(1) Aray (Mala)	7	6	N	N	..	100·00	..
(2) Bhangi	218	208	0·03	0·01	0·02	30·05	69·95
(3) Bindla	1	1	N	..	N	..	100·00
(4) Chambhar †	11,695	11,513	1·52	1·38	0·14	90·55	9·45
(5) Dakkal	8	12	N	N	..	100·00	..
(6) Dhor	1,039	1,068	0·14	0·10	0·04	74·61	25·39
(7) Ellamalwar	65	24	0·01	N	0·01	13·48	86·52
(8) Holeya	1	5	N	N	..	100·00	..
(9) Kolupulvandlu	..	1	N	N	..	100·00	..
(10) Madiga	2	2	N	..	N	..	100·00
(11) Mahar	11,934	11,923	1·56	1·29	0·27	82·65	17·35
(12) Mala	14	20	N	..	N	..	100·00
(13) Malajangam	39	32	N	N	..	100·00	..
(14) Mala Sanyasi	7	4	N	N	..	100·00	..
(15) Mang ‡	21,366	21,447	2·79	2·52	0·27	90·25	9·75

* Inclusive of persons from the Scheduled Castes who have not reported their individual castes.
† Includes Mochi.
‡ Includes Mang Garudi.
N=Negligible.

The remaining 15 Scheduled Castes which are not returned in 1961 Census are as follows :—

(1) Anamuk.
(2) Arwa Mala.
(3) Beda Jangam.
(4) Byagara.
(5) Chalvadi.
(6) Holeya Dasari.
(7) Mala Dasari.
(8) Mala Hannai.
(9) Mala Masti.
(10) Mala Sale.
(11) Manne.
(12) Mashti.
(13) Mitha Ayyalvar.
(14) Samagara.
(15) Sindhollu.

Out of the fifteen Scheduled Castes enumerated in the district, the largest number is of Mangs. The second largest group is of Mahars and the third of Chambhars. The remaining twelve Scheduled Castes have together 2,784 population which is less than 1 per cent of the total population. Bindla, Holeya, Kolupulvandlu and Madiga have less than ten persons each in the district.

The comparative position of the Scheduled Castes population in 1951 and 1961 is as follows :—

	Percentage to total population		
	Total	Rural	Urban
All Scheduled Castes—			
1951	13·76	12·63	1·13
1961	6·05	5·30	0·75

The reduction of proportion from 13·76 to 6·05 is mostly the result of a large number of persons from Mahar caste returning their religion in 1961 Census as Buddhist or Nav-Bauddha. Due to the change of religion they are not treated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. The total population of the Scheduled Castes and Nav-Bauddhas is over 14 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) at page 200 *in Part II show the literacy and educational levels* for each Scheduled Caste. The percentages of literacy for the district population, for all Scheduled Castes and each Scheduled Caste, are as shown below.

The Scheduled Castes of the district are behind in literacy than the general population. Their females are very much behind in this respect. Out of the major Scheduled Castes, the Dhors appear to be *a little more advanced in literacy.*

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average ..	14·27	24·53	3·73	39·76	52·65	25·31
All Scheduled Castes ..	6·63	12·32	0·81	19·58	33·14	7·52
(1) Aray (Mala) ..	30·77	28·57	33·33	..	..	..
(2) Bhangi ..	6·25	10·94	1·56	18·79	31·82	4·86
(3) Bindla ..	..	..	..	100·00	100·00	100·00
(4) Chambhar ..	8·51	15·92	0·92	23·22	40·17	7·41
(5) Dakkal ..	10·00	12·50	8·33	..	..	..
(6) Dhor ..	13·87	25·56	1·44	24·30	39·74	12·75
(7) Ellamalwar ..	41·67	55·56	No literates	12·99	17·88	No literates
(8) Holeya ..	No literates			..	..	..
(9) Kolupulvandlu ..	No literates			..	..	..
(10) Madiga ..	..	..	..	No literates		
(11) Mahar ..	7·63	14·15	0·99	26·08	42·02	11·38
(12) Mala ..	..	..	..	67·65	85·71	55·00
(13) Malajangam ..	4·23	7·69	No literates	..	..	..
(14) Mala Sanyasi ..	72·73	100·00	25·00	..	..	..
(15) Mang ..	4·74	8·80	0·62	10·39	19·28	3·02

Economic Activity

The industrial classification of persons at work and non-workers for the district average for all Scheduled Castes and for each Scheduled Caste is as shown in the next column.

The proportions of workers and non-workers for the Scheduled Castes are more or less the same as for the total population of the district. The proportion of workers in cultivation is very low while that of agricultural labourers is much above the district average. This is due to the association of a few Scheduled Castes with certain services as well as to a fewer persons owning lands among them.

	Percentage of workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average ..	27·90	15·82	9·20	47·08
All Scheduled Castes ..	7·94	32·80	15·81	43·45
(1) Aray (Mala) ..	..	30·77	30·77	38·46
(2) Bhangi ..	8·45	5·40	37·32	48·83
(3) Bindla ..	..	..	50·00	50·00
(4) Chambhar ..	9·53	24·26	20·18	46·03
(5) Dakkal ..	..	10·00	..	90·00
(6) Dhor ..	5·36	17·56	28·15	48·93
(7) Ellamalwar ..	..	..	50·56	49·44
(8) Holeya ..	..	83·33	..	16·67
(9) Kolupulvandlu ..	..	..	..	100·00
(10) Madiga ..	..	..	..	100·00
(11) Mahar ..	11·13	34·56	11·31	43·00
(12) Mala ..	2·94	..	17·65	79·41
(13) Malajangam ..	1·41	8·45	18·31	71·83
(14) Mala Sanyasi ..	9·09	36·37	18·18	36·36
(15) Mang ..	5·47	37·59	15·07	41·87

Size of Land Cultivated

Tables C-I and SCT-V-Part A at pages 184 and 201 in Part II show a broad classification of cultivating households by size of cultivated land for the district rural population and all Scheduled Castes in rural areas respectively. The proportions are as follows:—

Size of land cultivated	District Rural population		All Scheduled Castes	
	Number of sample households	Percentage	Number of sample households	Percentage
All sizes ..	31,026	100·00	793	100·00
Less than 5 acres	4,424	14·26	245	30·89
5—9·9 acres ..	6,530	21·05	250	31·53
10—29·9 acres ..	14,183	45·71	256	32·28
30 acres and over	5,889	18·98	42	5·30

Out of a sample of 31,026 cultivating households, only 793 or 2·6 per cent households are from the Scheduled Castes in rural areas against their population which is 6·2 per cent of the total rural population. 30·89 per cent of the cultivating households of the Scheduled Castes are cultivating less than 5 acres of land against the corresponding average of 14·26 per cent for the district. The percentage of households cultivating land over 5 acres among Scheduled Castes is 69·11 per cent only against the corresponding average of 85·74 per cent for the district. The proportion of households cultivating large holdings is thus smaller for Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I-Part B at page 198 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Four Scheduled Tribes are reported in the district in the 1961 Census. Their population is, however, 24,455 or 1·60 per cent of the total population.

The distribution of the Scheduled Tribe population by rural and urban areas is as follows:—

Name of Scheduled Tribe	Population		Percentage to total population of the district			Percentage of each Scheduled Tribe population in	
	Males	Females	Total	Rural	Urban	Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Tribes	12,199	12,256	1·60	1·56	0·04	97·71	2·29
(1) Andh	81	62	0·01	0·01	N	96·50	3·50
(2) Bhil	12,071	12,126	1·58	1·55	0·03	97·97	2·03
(3) Gond	22	45	0·01	N	0·01	7·46	92·54
(4) Pardhan	2	..	N	N	N	50·00	50·00

* Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe.
N = Negligible.

The remaining three Scheduled Tribes which are not returned in the 1961 Census are as follows:—

(1) Kolam, (2) Koya, and (3) Thoti.

Bhil with 24,197 persons is the largest Scheduled Tribe in the district. The other tribes together have only 212 persons. The Bhils are found in all the talukas of the district. Their numbers are, however, larger in Vaijapur, Kannad, Gangapur and Ambad talukas. Andhs are found in Jalna and Vaijapur talukas only.

The Scheduled Tribes population in the district has increased from 17,236 in 1951 to 24,455 in 1961.

Literacy and Education

The Scheduled Tribes are very much behind in literacy and education. Andhs have no literate females in rural areas of the district.

Economic Activity

More than 88 per cent of the workers from Scheduled Tribes work as cultivators and agricultural labourers. The proportion of cultivators is, however, very low in the district and the participation of the Scheduled Tribes in agriculture is more as agricultural labourers.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of the Standing Committee which is the most powerful Committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(*i*) *Educational.*—These include schemes of granting scholarships, tuition fees and examination fees to poor and deserving students from Scheduled Castes, Scheduled Tribes, Vimukta Jaties (*ex*-criminal tribes) and other backward classes. Besides the tuition and examination fees, college and high school students from those communities are provided with hostel facilities where they are given free lodging and boarding. Primary schools to impart training to children from Vimukta Jaties, in their own languages, have been opened in the localities where these people stay. 8,977 students benefited from and Rs. 1,59,241 were spent on all the educational schemes for them during the year 1962-63. Seven hostels of the Scheduled Castes, one cosmopolitan Scheduled Caste hostel, three Scheduled Tribe hostels and three Vimukta Jaties hostels in the district were together granted Rs. 76,792 in the year 1962-63.

(*ii*) *Schemes for Economic Uplift.*—These include schemes for granting loan-*cum*-subsidy to the extent of Rs. 300 to Rs. 500 to each village artisan from Scheduled Castes, Scheduled Tribes and other Backward Classes, with a view to helping them in the cottage industries and professions. Assistance for purchase of milch cattle is also provided to the Scheduled Castes and other backward classes. Under the scheme of loan-*cum*-subsidy for cottage industries and professions, Rs. 20,150 were given to 174 beneficiaries from the Scheduled Castes, and backward classes from underdeveloped rural areas during the year 1962-63 and Rs. 15,150 were spent on 271 beneficiaries under the scheme of assistance for purchase of milch cattle.

(*iii*) *Housing.*—Under this scheme, assistance is given to the backward classes and Scheduled Castes for constructing model huts and colonies. Assistance is also given for repairs to houses of Scheduled Castes and other backward classes. Building sites are allotted to Harijans and Rs. 1,591 were spent on this item in 1962-63. During the year 1962-63, Rs. 55,250 were spent for 66 beneficiaries and two colonies under the scheme for housing and colonisation of the backward classes, and Rs. 46,500 were spent on 465 beneficiaries under the scheme of repairs to houses of backward classes.

(*iv*) *Drinking Water Wells.*—An amount of Rs. 40,150 was spent under this scheme during 1962-63. Rs. 3,600 were spent for repairs of wells in or near Scheduled Castes localities for 25 beneficiaries, while Rs. 23,700 were spent for sinking new drinking water wells for Scheduled Castes for 49 beneficiaries.

(*v*) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to Scheduled Castes and Rs. 1,391 were spent during the year 1962-63. Under this scheme, costly and patent medicines are purchased on the advice of medical authorities and supplied to T.B. and other victims of deadly diseases from among the Scheduled Castes.

(*vi*) *Agricultural.*—Financial assistance to poor deserving agriculturists from Scheduled Tribes, Vimukta Jaties, underdeveloped rural areas and other backward classes to purchase ploughs, bullocks, implements, seeds, carts, etc., is given and Rs. 46,430 were spent on 439 beneficiaries under this scheme during the year 1962-63. Rs. 7,040 were spent on 78 beneficiaries from Scheduled Castes to purchase improved agricultural implements.

(*vii*) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film show and gatherings are addressed at fairs and other places. Kirtan programmes and Melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the

Third Plan are separately treated as Plan Schemes. The expenditure described above against each scheme is both out of the committed and planned schemes. There are in addition some more schemes sponsored directly by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Caste converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

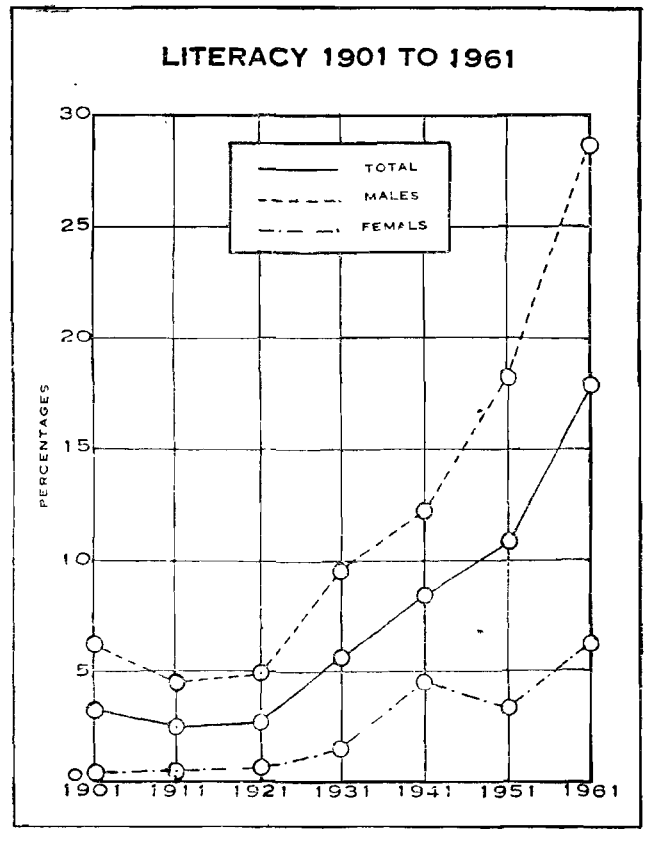

During the last decade there has been a definite improvement in the level of literacy in the district. The number of primary schools and high schools has gone up and facilities for technical education have increased considerably.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows:—

	Total	Males	Females
1901	3·21	6·11	0·31
1911	2·48	4·53	0·41
1921	2·73	4·83	0·61
1931	5·58	9·50	1·51
1941	8·43	12·21	4·48
1951	10·80	18·10	3·30
1961	17·88	28·65	6·67

Figure in the next column shows this growth of literacy in the district for total population, males and females, separately.

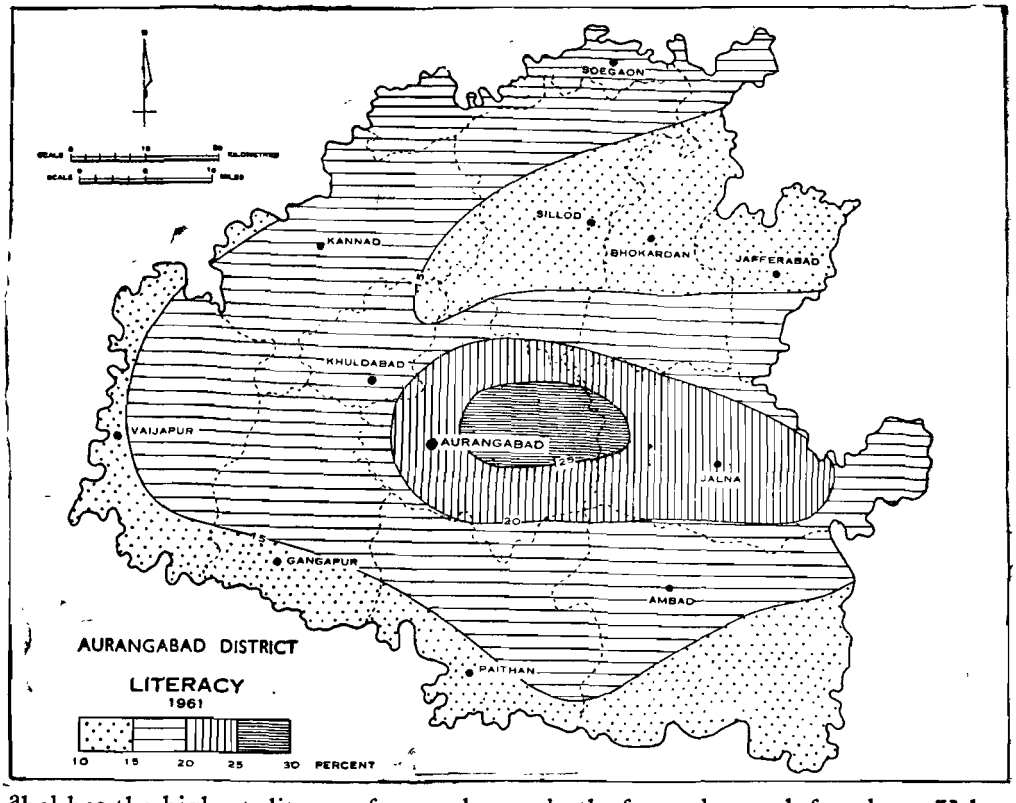

The literacy percentage has increased more than five times during the last sixty years. The improvement has been very substantial in the decade 1951—61. However, the improvement in the level of literacy is due more to the improvement among males. Female literacy still lags far behind the State average. That may be due to historical reasons and the apathy of the Nizam's State Government towards education in rural areas.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town

separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately:—

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
AURANGABAD DISTRICT	17·88	28·65	6·67	14·27	24·53	3·73	39·76	52·65	25·31
1 Kannad Taluka	16·68	27·97	5·01	15·59	26·72	4·10	35·25	48·80	20·74
2 Sillod Taluka	14·23	24·44	3·73	14·23	24·44	3·73	..	..	..
3 Soegaon Mahal	18·36	30·62	5·67	18·36	30·62	5·67	..	..	..
4 Bhokardan Taluka	13·22	23·07	2·98	12·38	22·03	2·37	31·42	44·05	16·73
5 Jafferabad Mahal	14·44	24·89	3·79	14·44	24·89	3·79	..	..	..
6 Khuldabad Mahal	15·35	25·12	5·29	13·95	23·51	4·01	28·96	41·77	17·08
7 Vaijapur Taluka	18·37	30·31	5·82	16·54	28·16	4·43	34·31	48·45	18·39
8 Gangapur Taluka	15·17	25·67	4·29	14·25	24·62	3·56	30·19	42·08	16·86
9 Aurangabad Taluka	27·96	39·37	15·50	13·59	23·43	3·44	46·32	58·54	31·98
10 Jalna Taluka	20·26	31·31	8·74	13·54	23·44	3·38	36·14	49·47	21·73
11 Paithan Taluka	15·25	25·33	5·00	13·91	23·66	4·01	33·23	47·41	18·45
12 Ambad Taluka	14·22	23·97	4·28	13·75	23·46	3·87	27·00	37·79	15·68

Figure to the right shows the spread of literacy in the district by isoplyths. The central portion of the district nearabout Aurangabad town is the most literate area in the district. The next highest literate region includes the most densely populated areas of Aurangabad and Jalna talukas. The literacy rate drops down beyond this region in all directions. Literacy rates are the lowest in parts of Sillod and Bhokardan talukas and Jafferabad mahal in the north and parts of Vaijapur, Gangapur, Paithan and Ambad talukas in the south. Within the district Aurangabad taluka ranks first among all the talukas while Bhokardan taluka stands last in respect of general literacy. Soegaon mahal has the highest literacy for rural areas both for males and females. Urban area of Aurangabad taluka also has the highest literacy rates both for males and females.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as shown below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately. Literacy rates for total, males and females in rural and urban areas are the highest in the age-group 15—34:—

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	17·88	28·65	6·67	14·27	24·53	3·73	39·76	52·65	25·31
0—4	..	..	..	..	..	..	..	..	..
5—14	20·53	30·00	10·45	16·81	26·58	6·47	43·41	50·62	35·45
15—34	25·49	41·68	9·36	20·17	35·76	5·04	55·22	72·34	35·65
35—59	17·53	29·41	3·78	13·93	24·64	1·67	40·81	59·35	17·93
60 +	11·37	21·85	1·42	8·92	17·64	0·69	27·50	43·71	6·37

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka for the year 1961 only.

The number of primary schools and their classification on 31st March 1962 are as follows :—

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total number of schools ..	1,313	27	48	..	816	350	72
Central Government ..	2	..	..	..	1	1	..
State Government ..	1,279	27	48	..	800	333	71
Private ..	32	..	..	..	15	16	1

There has been a rapid growth in the number of primary schools in the district during the last ten years. The number rose from 595 in 1951 to 866 in 1956 and to 1,308 in 1961. On 31st March 1962, it stood at 1,313. Out of the 1,313 primary schools, 1,281 or 97·56 per cent were managed by Government till the establishment of Zilla Parishad. Now, they are handed over to Zilla Parishad, and only 2·44 per cent are managed by private institutions. The State Government's share in expenditure in the year 1961-62 was 99·9 per cent. The expenditure on primary education is incurred by the State Government through grants-in-aid to Zilla Parishads and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made steady progress in the district. There were 75 basic schools in the district on 31st March 1962.

Ten towns and 1,247 villages in the district had primary schools and 169 villages had schooling facilities, i.e., primary schools situated within a mile from the village. 463 villages did not have even schooling facilities. Total number of teachers was 2,724. Out of them, 779 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Aurangabad District	Maharashtra
Average population served by a primary school	1,179	1,135
Average area served by a primary school (square miles)	4·8	3·4
Pupils per teacher	38	38
Pupils per school	79	127
Average annual salary per teacher (Rs.)	1,075	1,250
Average annual expenditure per school (Rs.)	2,516	4,903
Average number of teachers per school ..	2·1	3·3
Percentage of trained teachers	28·6	64·8

Free primary education has been in force in the district since 1922 in accordance with the educational policy of the Nizam's Government. Under the Compulsory Education Act, 1951, of the former Hyderabad State compulsion in primary education for children in the age-group 6 to 11 years, was for the first time introduced under the Hyderabad Act in 1953, in 20 villages of Vaijapur taluka. It was extended to 17 more villages in Sillod taluka during 1956-57. One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11. A provision of Rs. 99·68 lakhs has been made for primary education in the district. During the Plan period, 180 additional teachers would be appointed in primary schools. The number of students is expected to increase by 9,000 as a result of normal expansion of primary education. As a result of extension of the scheme of universal free and compulsory primary education to children in the age-group 6—11 years, the number of students is expected to rise by 70,500 and additional 1,410 teachers would be appointed in primary schools. Similarly, 227 class-rooms are proposed to be constructed during this period.

Secondary Education

Table 15 in Part III shows the number of institutions imparting secondary education and number of pupils both boys and girls for the year 1961 only. A list of high schools with number of students for each of them may be seen in Table 16 in Part III.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Higher Secondary Schools		Middle Secondary Schools
		Multi-purpose	Ordinary	
State	34	2	30	2
Municipal	..	..	..	..
Private	42	4	33	5

Total number of students on roll in the secondary schools as on 31st March 1962 was 25,145. Out of them 19,359 were boys and 5,786 girls. Total number of teachers was 1,052. Out of them 525 were trained teachers. Percentage of trained teachers was thus 49·9. Other indices of secondary education compared to the State averages are as follows :—

	Aurangabad District	Maharashtra
Population served by each school ..	20,365	13,805
Area served by each school (sq. miles) ..	83·1	40·8
Pupil-teacher ratio	24	25
Pupils per secondary school	331	388
Average annual salary per teacher (Rs.)	1,595	1,870
Average annual expenditure (direct) per school .. .. (Rs.)	27,965	39,543
Average number of teachers per secondary school	13·8	13·7

Figure on page (29) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education in Aurangabad district has also been quite rapid especially after 1956. The number of secondary schools increased from 22 in 1950-51 to 28 in 1955-56 and to 71 in 1960-61. This figure stood at 76 on 31st March 1962. The secondary schools are dispersed throughout the district. Aurangabad taluka has the highest number of schools, viz., 23, Soegaon, Jafferabad and Khuldabad mahals and Bhokardan and Paithan talukas have two schools each which is the smallest number per taluka in the district.

Private institutions manage about 55 per cent of the secondary schools in the district. The Government share in the total expenditure on secondary education is 79·6 per cent and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 29,000 by 1965-66 and to 34,000 by 1970-71.

H. S. C. and H. S. (M. P.) S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts these public examinations at the end of the secondary school course. These are different from S. S. C. Examinations held in Bombay and Poona Divisions. Two examinations are held every year in March and October, and Aurangabad, Jalna and Vaijapur are the examination centres in the district. The number of candidates who appeared and passed from the district during the year 1962 are as follows :—

	H.S.C.		H.S. (M.P.) S.C.	
	Appeared	Passed	Appeared	Passed
Examinations held in—				
March 1962 ..	2,042	679	..	..
April 1962 ..	..	..	856	300
October 1962 ..	974	294	581	188
Total ..		973	..	488

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college.

The establishment of Marathwada University at Aurangabad in 1958 marked the beginning of a new era in the field of higher education not only in Aurangabad district but in the whole of Aurangabad Division. In 1950-51 there were only two colleges in Aurangabad district. Their number rose to 12 in 1960-61. In addition there are two recognised research institutions, viz., Shri Eknath Sanshodhan Mandir at Aurangabad and the Jalna Sanskrit Mahavidyalaya at Jalna.

The colleges now provide education in Arts, Science, Commerce, Law, Engineering and Medicine. The number of college students was 2,982 in 1960-61. Four out of the 12 colleges are managed by the State Government. The other eight colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings, from Government.

The Medical College was started in the year 1956-57 and now admits 80 students for the degree course every year. New buildings for the Medical College hostel and other requirements have been completed and a huge hospital building is under construction.

Technical Education

Facilities for technical education have increased in recent years. The Polytechnic at Aurangabad was expanded during the Second Plan period and now it provides teaching for diploma courses in Civil, Mechanical and Electrical Engineering for each of which about 60 students are admitted every year. About 369 students are studying in this institution for diploma courses. There is also an Industrial Training Institute which provides for training in various trades and crafts.

An Engineering College was established in 1960-61 with degree courses in Civil and Electrical Engineering. A degree course in Mechanical Engineering has also been started recently. The Engineering College has been started in the newly constructed Polytechnic building.

Libraries

On 31st March 1962 there were 5 libraries recognised by the Government in the district. An amount of Rs. 1,333 was paid as grant-in-aid to these libraries during 1962-63.

Printing Presses, Journals and Newspapers

There are 22 printing presses in the district. Six periodicals are being published, out of which 2 are dailies, 2 weeklies and 2 journals.

Radio Licences

The number of radio licences in the district rose from 1,311 in 1955-56 to 3,980 in 1960-61.

Cinema Theatres

There are 10 permanent theatres, one quasi-permanent theatre and 5 touring talkies in the district (as on 31st December 1961).

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-Charge of Health Activities in the district.

Drinking Water Supply

Column (5) of the Village Directory in Part I shows the sources and adequacy of drinking water for each village in the district.

Four towns and one village have piped water supply. Out of the remaining 6 towns and 1,878 inhabited villages, 339 villages draw drinking water from rivers, 28 villages from nallahs, one village from canals, 3 villages from tanks, 2 towns and 1,268 villages from wells, 3 villages from springs and 4 towns and 236 villages have more than one of these sources of water. The water supply is not adequate in summer in the case of 4 towns and 306 villages.

Malaria Eradication

Malaria was till a few years ago the most serious public health problem. An intensive drive against malaria was launched during the First Plan period under the Malaria Control Programme. This programme was intensified by opening two sub-centres at Vaijapur and Jalna. The programme of spraying of DDT is undertaken since then every year throughout the district.

Leprosy Control

With a view to expanding hospitalisation facilities and preventing the spread of leprosy, one subsidiary leprosy control centre was opened at Gangapur in 1960.

Anti-T. B. Campaign

Following the recommendations of the Technical Committee of the T. B. Association of India, one T. B. Clinic having two beds and manned by one Medical Officer was started at Aurangabad in the year 1956-57. One more T. B. Clinic of the same pattern was started in 1958-59 at Jalna. During 1960-61 about 1,600 outdoor patients were treated at these clinics.

Family Planning Centres

There are eight family planning centres: two at Aurangabad and one each at Vaijapur, Gangapur, Kannad, Jafferabad, Khuldabad and Ambad.

Medical Facilities

Medical facilities available in the district are shown in Table 17 of Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private hospitals, dispensaries and practitioners are not shown there.

The number of doctors and nurses, number of beds available and number of indoor and outdoor patients treated have all increased between 1955—60. The number of doctors and nurses increased from 22 and 8 in 1955 to 24 and 37 in 1960, respectively. The number of hospital beds increased from 158 in 1955 to 196 in 1960. The number of indoor patients and outdoor patients treated per hospital increased from 3,049 and 42,497 in 1951 to 6,235 and 44,044 in 1960, respectively.

Hospitals.—There was one hospital in 1950-51. The number rose to three in 1960-61. Two are situated at Aurangabad, the headquarters of the district. One is the District Hospital which has an X-Ray department, a maternity ward, a family planning centre and a separate ward for treating infectious diseases. The other is a Government Hospital attached to the Medical College at Aurangabad and the third is at Jalna. A new building for the Medical College Hospital at Aurangabad is under construction. Hospital facilities in the district will greatly expand on its completion.

In addition to the medical facilities provided by the Government there are 2 Missionary Hospitals situated at Jalna and Pachod in Paithan taluka.

There are also 2 Military Hospitals, one each at Aurangabad and Jalna, respectively.

Dispensaries.—In 1960-61, there were 14 Government dispensaries in the district.

Primary Health Centres.—At the end of 1960, there were eight primary health centres with 22 units.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 1,239.

The numbers of persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classification by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 33 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

Sixty-one per cent of all the houses are used as dwellings, 24 per cent as cattle sheds, etc. Eight per cent are reported vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per sq. mile in the district has increased along with the density of population per sq. mile from 33·9 in 1951 to 45·5 in 1961. The number of persons per residential house has, however, decreased from 5·39 in 1951 to 5·22 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by "owned" and "rented" categories, 83 per cent of the dwellings in the district are owned and only 17 per cent are rented. The proportion of owned is higher (89 per cent) in rural areas and very much lower (45 per cent) in urban areas. Even this low proportion of 45 per cent for urban areas in the district is somewhat higher than the average of 30 per cent for urban areas of Maharashtra.

Out of the various materials used for walls, mud appears to be predominant in the district with a proportion of 46·4 per cent. Its proportion in the taluka of Aurangabad is low, as burnt bricks are predominantly used in this taluka. In Jalna and Vaijapur talukas and Khuldabad mahal burnt bricks, stones and unburnt bricks are also used along with mud as material of walls. Mud is not used as much in urban as in rural areas. Its proportion is only 18·8 per cent in urban areas against 50·9 per cent in rural areas. Burnt bricks appear to be predominant in urban areas with a proportion of 55 per cent. Stone is used in 9·2 per cent dwellings in urban areas and 12·8 per cent in rural areas.

Out of the materials of roof, flat roofs of wooden beams or rafters with mud on top are predominant in the district with a proportion of 61 per cent. These types of roofs are, however, more common in rural areas. Their proportion in rural areas is 66·2 per cent against 29·2 per cent in urban areas. In rural areas along with flat roofs, roofs of corrugated iron and zinc sheets which have a proportion of 25·3 per cent are also noticed. Jalna and Aurangabad are the talukas having dwellings with both flat roofs and corrugated iron and zinc sheets while the other talukas have a majority of dwellings with flat roofs. This distribution corresponds mainly to the pattern of annual rainfall in the district.

Corrugated iron and zinc sheets appear to be more in use in urban areas with 48·1 per cent against 25·3 per cent in rural areas.

Classified by the number of rooms occupied, 77 per cent of households are occupying one-room dwellings and 15·4 per cent are occupying two-room dwellings. Households occupying more rooms are more in urban areas than in rural areas. Average number of persons per room is 3·92 for total, 4·10 for rural and 3·12 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important economic activity as it engages 82·62 per cent of the total working population in the district. Most of the remaining workers also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

The statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices, livestock and agricultural implements, etc., are presented in Tables 3 to 10 in Part III.

Cultivating Seasons

As in other areas of the State, there are two agricultural seasons, viz., kharif and rabi. Rice, kharif jowar, bajri, groundnut and cotton are the main crops grown in kharif season and rabi jowar, wheat and gram are the main crops grown in rabi season.

Monthly agricultural operations in respect of principal crops are shown on page (33).

Jowar is grown in both kharif and rabi seasons. But the district has more area under rabi jowar. In 1959-60, the proportion of area under rabi jowar to the total area under jowar was 67·4 per cent. The local varieties of jowar grown in kharif are Maldhamni, Varadi, Puli and Tuljapuri. The varieties grown in rabi season are Dagdi, Malthi and Shalu.

Land Utilisation

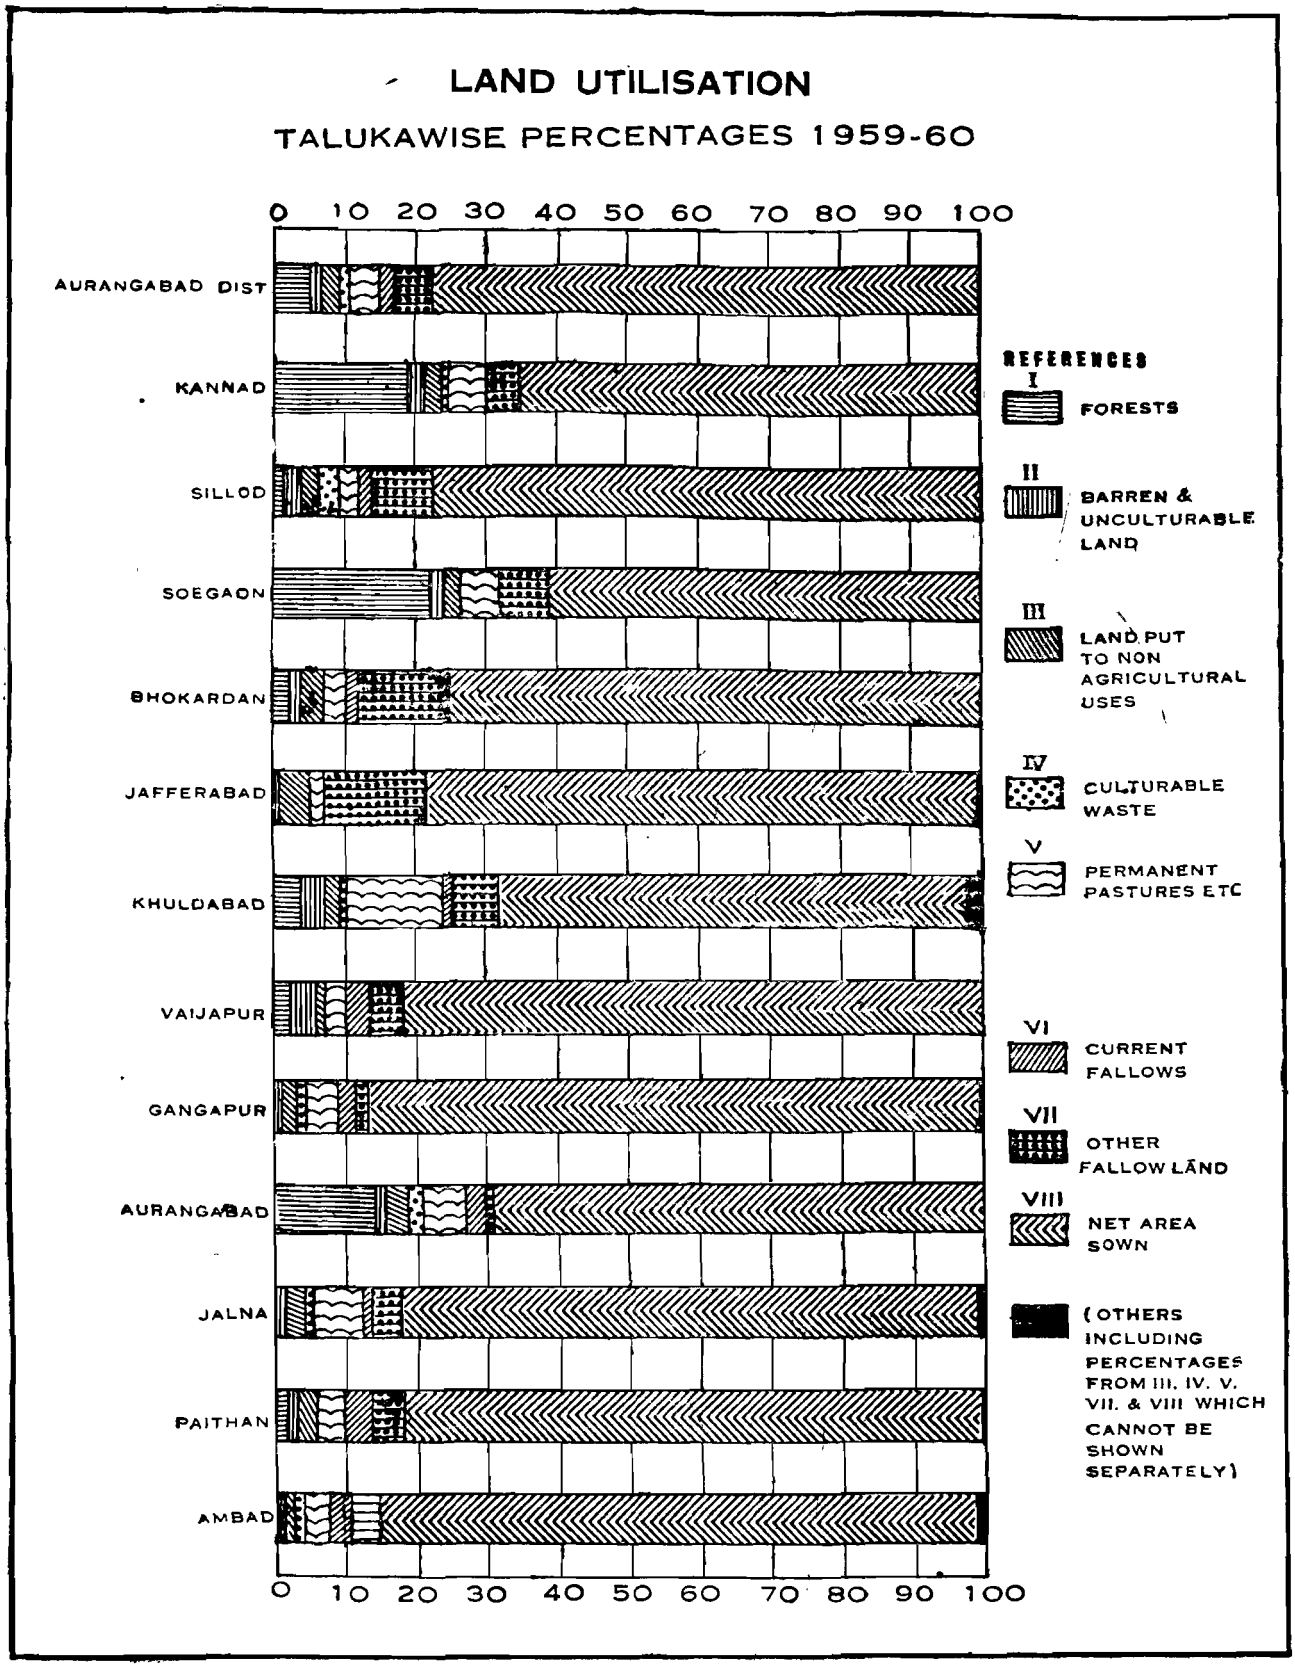

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on averages for three years from 1957-58 to 1959-60 :—

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and unculturable land	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Gross cropped area

III LAND PUT TO NON AGRICULTURAL USES
IV CULTURABLE WASTE
V PERMANENT PASTURES ETC
VI CURRENT FALLOWS
VII OTHER FALLOW LAND
VIII NET AREA SOWN
(OTHERS INCLUDING PERCENTAGES FROM III, IV, V, VII, & VIII WHICH CANNOT BE SHOWN SEPARATELY)

The Figure facing this page shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is 77·17 per cent of the geographical area against 57·69 per cent for the State.

Within the district the proportion of net area sown to the geographical area ranges between 59·41 per cent for Soegaon mahal and 86·82 per cent for Gangapur taluka. The proportion of areas under culturable waste is low in most of the talukas except Sillod taluka (2·69 per cent).

Because of changes in the classification of land utilisation effected in 1950-51 it is not possible to determine if there has been any shift in the pattern of land utilisation over the last 40—50 years. Comparison with the statistics quoted in the Imperial Gazetteer does not indicate any substantial change in land utilisation over the last sixty years.

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All figures are averages for the three years 1957-58 to 1959-60:—

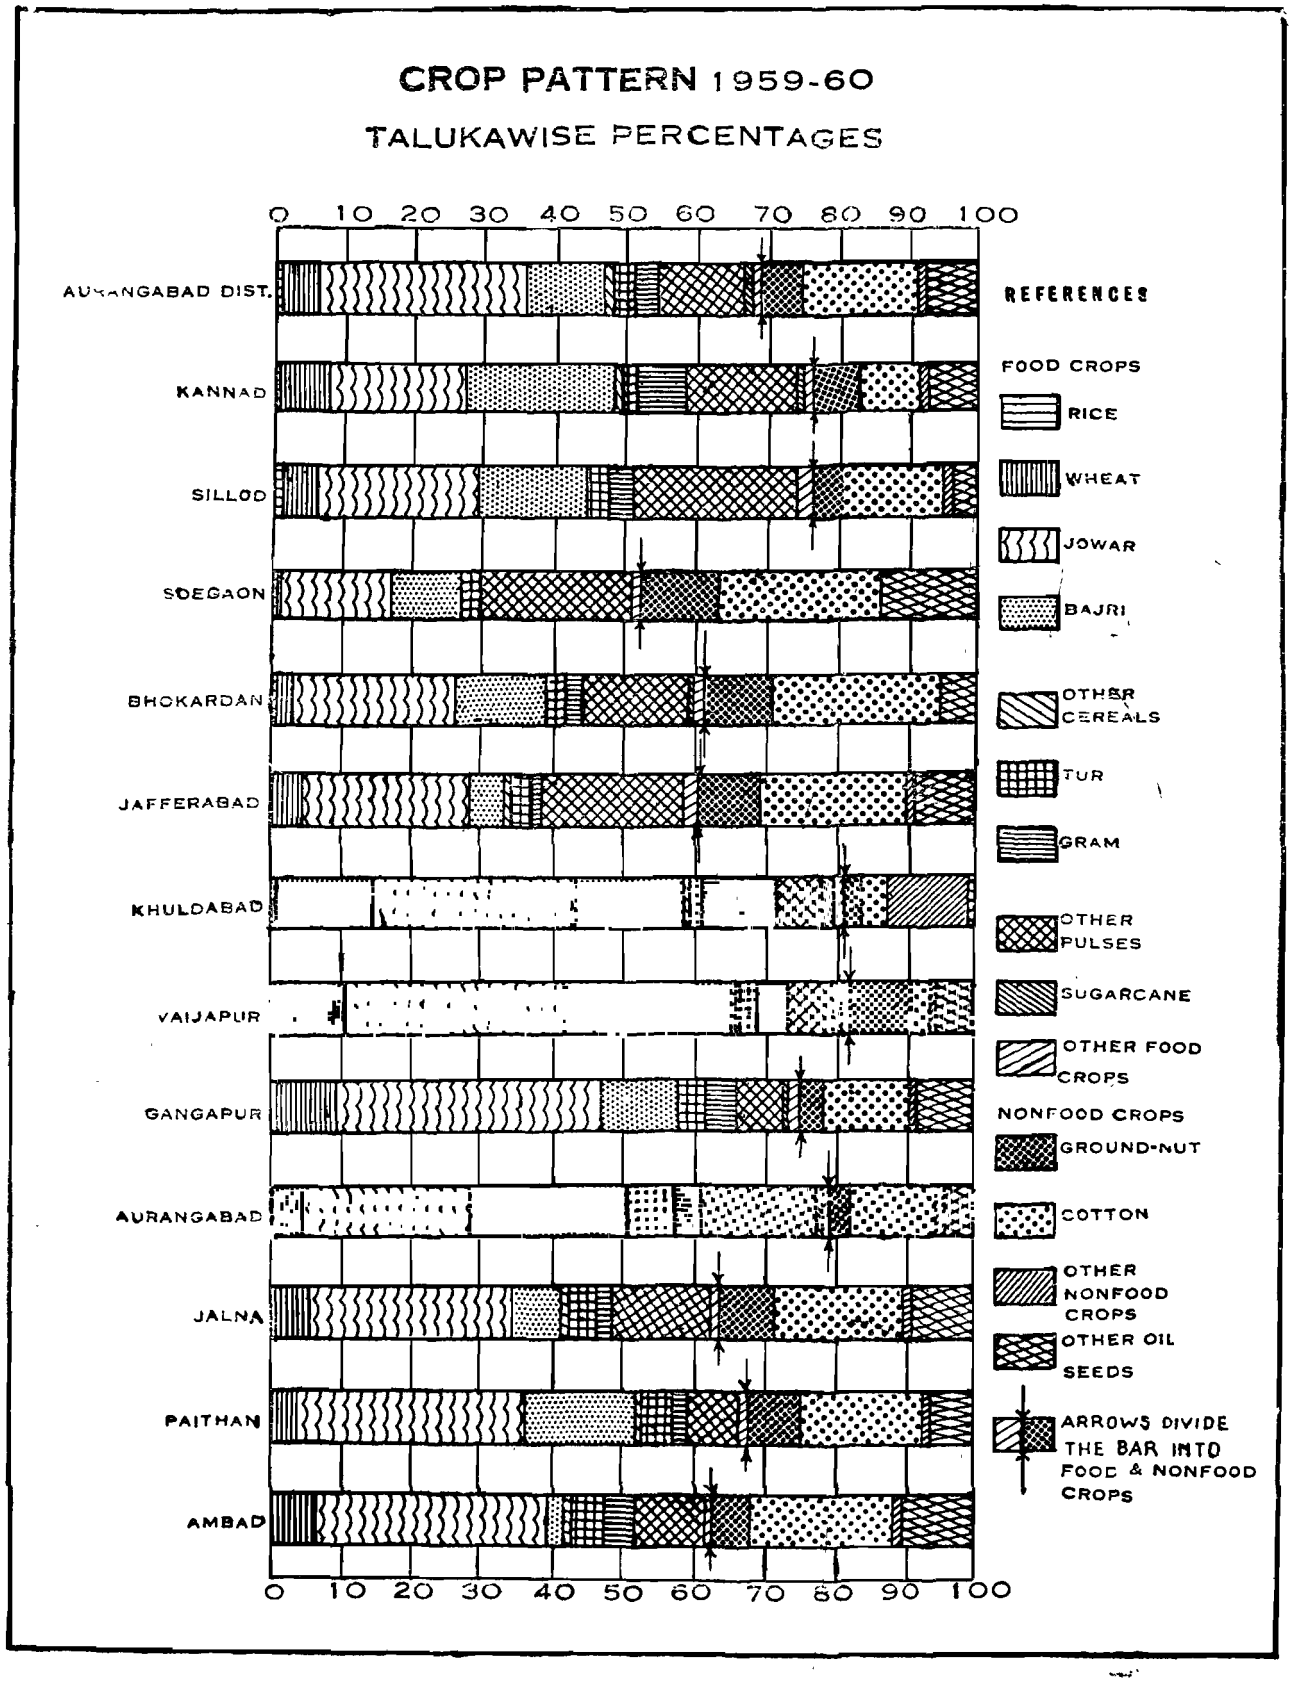

Details of cropped area	Percentage of gross cropped area in													
	Maharashtra	Aurangabad District	Kannad Taluka	Sillod Taluka	Soegaon Mahal	Bhokardan Taluka	Jafferabad Mahal	Khuldabad Mahal	Vaijapur Taluka	Gangapur Taluka	Aurangabad Taluka	Jalna Taluka	Paithan Taluka	Ambad Taluka
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)

Figure on page (36) shows the crop pattern for the district and each taluka separately.

69·27 per cent of the gross cropped area is under food crops. This proportion is almost equal to that of the State. Amongst food crops jowar ranks first and has 27·35 per cent of gross cropped area, bajri has 13·17 per cent, wheat 6·42 per cent and pulses 19·70 per cent. Rice (0·38 per cent) and sugarcane (0·50 per cent) are rarely grown. Compared to the State averages the district has higher proportion of area under pulses and lower proportion of area under other food crops.

Cotton with 15·80 per cent of cropped area is the most important non-food crop occupying more than half the area under non-food crops. The proportion of area under oil-seeds (13·89 per cent) is higher than the State average (8·18 per cent). Groundnut is the most important oil-seed with half the area under that group.

From 1950-51 to 1959-60, there has been no change in the proportions of food crops and non-food crops. But amongst food crops, the proportion of cereals to gross cropped area appear to have increased from 39·5 per cent to 48·18 per cent and the proportion of pulses reduced from 27·9 per cent to 20·03 per cent. Amongst food crops, the increase in the absolute areas under different crops is wheat 69·93 per cent, jowar 40·51 per cent and bajri 65·81 per cent. The area under cotton has increased by 41·07 per cent and that under oil-seeds has reduced by 11·62 per cent. The agricultural statistics of crops were used during the days of levy collections for determining levy demands. The 1951, 1952 and 1953 returns may not, therefore, be very reliable.

Comparable statistics are not available for the entire district for years prior to 1950-51. The proportions of areas under different crops reported by Imperial Gazetteer in 1903 were as follows : Jowar 26·55 per cent, bajri 14·34 per cent, wheat 6·91 per cent, rice 0·51 per cent, pulses 13·32 per cent, cotton 10·29 per cent, oil-seeds 10·96 per cent and sugarcane 0·24 per cent.

Generally speaking the crop pattern in the district is poorer than the average for the State. The State's crop pattern is itself poorer in the all-India setting because of high proportion of jowar, bajri and other low value crops. The district proportions of jowar and bajri are higher and the proportion of rice is lower than the State averages. The average yields for the district are also poorer than State averages.

Within the district, the cropping pattern does not vary considerably. The high proportion of area under food crops is almost even for all the talukas except Soegaon mahal. The proportion of areas under food and non-food crops in Soegaon mahal is nearly equal.

Khuldabad mahal has the highest proportion (14·57 per cent) of area under wheat. Vaijapur taluka has 11·6 per cent and Gangapur 9·54 per cent. Southern talukas have higher proportions under jowar. Gangapur has 36·59 per cent, Ambad 32·68 per cent and Paithan 32·50 per cent. Proportions of bajri are higher in hilly areas in central and western talukas, viz., Vaijapur 23·02 per cent, Aurangabad 23·07 per cent and Kannad 22·07 per cent.

Cotton has the lowest proportion in Khuldabad mahal (3·46 per cent) and highest proportion in Soegaon (24·22 per cent). Bhokardan has 22·79 per cent, Ambad 21·58 per cent, Jafferabad 20·77 per cent and Paithan (20·76 per cent).

Nine-year average yields and 1958-59 acreages and outturns of important crops for the district are shown below taking corresponding figures for Maharashtra as 100 :—

	Nine-year average yield per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100·00	100·00	100·00
Rice	55·31	0·40	0·13
Wheat	93·48	9·90	8·66
Jowar	91·92	6·07	7·10
Bajri	80·72	9·87	6·67
Groundnut	87·10	6·85	3·31
Cotton	87·88	8·48	6·42
Sugarcane	56·83	5·68	3·12
Tobacco	108·44	1·67	1·90

Except for tobacco, the district yields are lower than the State averages. The average yields of rice and sugarcane in the district are very poor compared to State averages. The areas under wheat and bajri in the district are nearly 10 per cent of the total area under each of these crops in the State but comparatively the proportions of their outturn are lower. The district outturns of wheat, jowar, bajri and cotton have substantial proportion in the total outturn of the State of those crops.

The Techno-Economic Survey of Maharashtra has estimated gross value of output per acre of cropped area in 1955-56 at Rs. 56 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated area to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land (acres)	Percentage of irrigated area to gross cropped area
MAHARASHTRA ..	334	69·91	3·50	6·23
AURANGABAD DISTRICT.	237	82·62	4·86	4·40

Jafferabad Mahal	184	88·10	4·93	2·74
Khuldabad Mahal	245	84·06	4·62	7·67
Vaijapur Taluka	216	87·28	5·16	3·18
Gangapur Taluka	219	86·17	5·65	3·89
Aurangabad Taluka ..	334	61·53	4·84	10·35
Jalna Taluka	293	74·33	4·67	5·76
Paithan Taluka	214	87·17	5·11	4·48
Ambad Taluka	217	88·71	5·20	2·45

82·62 per cent of the total workers work on land. 52·73 per cent are cultivators and 29·89 per cent are agricultural labourers. The proportion of workers working on land is higher than the State average (69·91 per cent). The proportion of workers working as agricultural labourers is higher than the State average. This is also discussed later under Broad Aspects of

Economy on page (51). The gross cropped area per worker on land in the district is 4·86 acres against 3·50 acres for Maharashtra.

Within the district the proportion of workers working on land to the total workers is even for most of the talukas. It is however very high (92·06 per cent) for Soegaon mahal. The gross area sown per worker on land ranges between 4·34 acres for Sillod taluka and 5·65 acres for Gangapur taluka.

The proportion of net area sown under double crops to the total net area sown in 1959-60 (4·88 per cent) is slightly lower than the State average (5·05 per cent). In the year 1951-52 that proportion is reported only as 2 per cent. Within the district, the proportion of net area sown more than once to the net cropped area is considerably high in Soegaon mahal (16·46 per cent) and very low in Bhokardan taluka (1·86 per cent). The proportion is higher than the State average in the talukas of Kannad (8·82 per cent), Gangapur (8·32 per cent), Aurangabad (7·28 per cent), Jalna (5·33 per cent) and Khuldabad mahal (5·35 per cent). The high proportion of double cropped area in Soegaon mahal is also a very recent trend and needs further investigation on the field.

Irrigation

The proportion of gross irrigated area to gross cropped area for the district (4·40 per cent) in the year 1959-60 is much lower than the State average (6·23 per cent). In 1950-51 the proportion was 3·6 per cent. In 1901 the same proportion is reported as 3·5 per cent. Thus the fifty years from 1901 did not bring any increase in irrigation. But net irrigated area has increased by 8,600 acres during the last nine years.

Within the district the proportion of gross irrigated area to the gross cropped area ranges between 1·05 per cent in Soegaon mahal to 10·35 per cent in Aurangabad taluka. The proportion is higher than the State average only in Khuldabad mahal (7·67 per cent) and Aurangabad taluka.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation separately for each taluka and the district. Except for negligible areas irrigated by tanks the entire irrigation is by wells. A recent but remarkable improvement is in the number of oil engines from 277 in 1951 to 3,585 in 1961 and of electric pumps from 15 in 1951 to 157 in 1961. Vaijapur taluka has the largest number of oil engines (603) and electric pumps (82).

Crop Pattern under Irrigation

Table 5 in Part III shows the crop pattern under irrigation. In the year 1959-60, 95·04 per cent of the irrigated area was under food crops and 4·96 per cent under non-food crops. (The corresponding figures in the year 1952-53 were 92·84 per cent and 7·16 per cent, respectively, and in the year 1955-56, they were 93·94 per cent and 6·06 per cent, respectively). Comparison with 1952-53 indicates that the crop pattern under irrigation has somewhat shifted from non-food crops to food crops during the last eight years. It may be the reflection of increasing areas under sugarcane encouraged by the newly established sugar factory near Gangapur.

Among the food crops under irrigation in 1959-60 jowar occupied 36·81 per cent, wheat 22·41 per cent, gram 9·55 per cent, sugarcane 13·23 per cent and miscellaneous food crops 18·00 per cent. Among non-food crops bulk of the area is occupied by fodder. Cotton (0·63 per cent) and groundnut (0·07 per cent) occupy negligible proportions. Jowar although has the highest proportion under irrigation amongst all crops, irrigated area under jowar is only 5·54 per cent of the total area under jowar.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains between 1951—56 and 1956—60 compares with 1950-51 as follows :—

	Average production in hundred tons per year during		
	1950-51	1951—56	1956—60
Rice	18	21	24
Wheat	141	249	271
Jowar	712	1,220	1,774
Bajri	169	282	354
Ragi	..	1	1
Other cereals	23	28	18
Total cereals	1,063	1,801	2,442
Pulses	576	526	646
Total foodgrains	1,639	2,327	3,088

In the First Plan period the production of total foodgrains had increased by 41·98 per cent over the 1950-51 production. The corresponding increase in the Second Plan period was 88·41 per cent. The production of all cereals in the Second Plan period was more than double that of 1950-51. The increase in production of pulses during the same period was, however, only 12·15 per cent. The production of wheat and bajri has also doubled and that of jowar has multiplied by nearly 2½ times. These estimates are again based on area figures which at least for two or three years of the levy period may not be very reliable.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the years 1951, 1956 and 1961 are separately shown in Section C of Table 9 in Part III.

The remarkable increase in the number of oil engines and electric pumps used for irrigation purposes has already been described earlier. Between 1951 and 1961 the number of iron ploughs has increased by 52·70 per cent and the number of wooden ploughs is reduced by 21·08 per cent. The number of sugarcane crushers operated by power has multiplied nine times and crushers worked by bullocks has increased from 787 in 1951 to 1,053 in 1961. The total for the two types combined in 1961 is more than double the number in 1951. This increase in the number of sugarcane crushers is consistent with the rise in acreage under sugarcane. The number of tractors used for agricultural purposes has gone down from 449 in 1956 to 73 in 1961. Reasons for such a sudden fall need further investigation.

By using standard average prices to the agricultural implements shown in Table 9 of Part III, the total outlay on them for the year 1961 may be estimated at Rs. 238 lakhs or Rs. 7·68 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 10 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the District Agricultural Development Officer works as Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officer. The latter work as Secretaries to the Taluka Samitis. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are two Agricultural Research Centres carrying out experiments in the district.

The Fruit Experimental Station, established at Aurangabad in 1935, has an area of 36·70 acres. Research is done here on citrus fruit as main crop and grapes as a subsidiary crop. The other Research Centre is at Badnapur in Jalna taluka. Research work is done on wheat as principal crop and cotton, safflower and linseed as subsidiary crops. This station was established in 1951 and has an area of 353 acres.

There is a proposal to establish another Research Station at Vaijapur for research on bajri as principal crop.

Agricultural Improvement

(i) *Increasing the Area under Irrigation.*—Different schemes have been undertaken during the Five-Year Plan periods for agricultural improvements. The most important item for increased production is to increase the area under irrigation. There has been an increase of 9 per cent in the net area under irrigation during the last nine years. No efforts had been made to increase irrigation up to 1951. But during the two Five-Year Plans seven major and medium irrigation projects were undertaken. When completed they will together irrigate 50,000 acres. In addition 13 minor irrigation projects have been undertaken. A few of them have been completed. These minor irrigation works will together add 7,350 acres under irrigation. The Third Five-Year Plan (in addition to the spill-over works) envisages new minor irrigation works irrigating 6,022 acres and involving an outlay of Rs. 39·15 lakhs. The Third Plan also includes the scheme of construction of 2,300 new irrigation wells and installation of 1,000 new pumping sets.

(ii) *Improved Seeds.*—Another item of improving food production is recommendation of appropriate varieties or strains of crops. The Agriculture Department has recommended the following improved varieties or strains of crops for the district:—

Wheat	.. ..	K 28, N 3, PW 5, N 4
Rabi Jowar	..	PJ-4-r, M-35-1
Kharif Jowar	..	PJ-16-K
Cotton	.. ..	197-3 170-Co-2.

Seed farms have been established at 12 places in the district to provide improved seed to the farmers. The combined area of all the seed farms is 1,084 acres.

(iii) *Soil Conservation or Bunding.*—Contour bunding work in the first two Plans was more in the nature of demonstration. The Third Five-Year Plan includes schemes for contour bunding of 1·5 lakh acres and involving an outlay of Rs. 79·69 lakhs.

(iv) *Increasing Area under Cultivation.*—Over 2,000 acres of culturable waste lands have been distributed to Scheduled Castes and other Backward Classes on concessional terms.

Livestock

The number of livestock for the years 1951, 1956 and 1961 has been shown separately for each taluka and the district in Section A of Table 9 in Part III.

The total livestock as per 1961 Livestock Census in the district is 1,379,600. The livestock per 100 acres of cultivated area is thus 42·36 against 138·82 for the State. The number of male bovines over three years are 434,400. This gives 15·00 acres of cultivated area per pair of male bovines. The corresponding figure for the State is 5·48.

The total bovine population in 1961 is 68·58 per cent of the total livestock. The total number of female bovines over three years in 1961 is 269,200. There are thus 175·68 female bovines over three years in the district per 1,000 persons. The corresponding figure for the State is 158·82.

During the decade 1951—61 there has been an increase of 24·04 per cent in the total livestock. The increase is observed in each type of livestock except sheep which has reduced by 6·42 per cent. This reduction would have been much more significant but for the increase of 7·85 per cent recorded during the period 1956—61. The maximum increase is in the number of goats (51·94 per cent) and minimum in number of buffaloes (21·97 per cent). It is interesting to note that the increase in total livestock from 1951—56 and 1956—61 is almost equal. The increase in poultry from 1951 to 1956 was only 34·95 per cent over the number in 1951 but from 1956 to 1961, the increase is 54·29 per cent over that of 1956.

The district does not have any special type or breed of cattle. Cultivators mainly rely on the "Deoni" breed imported from Osmanabad district.

Veterinary Facilities

There are 32 veterinary dispensaries in the district. Their number in 1956 was only five.

Treatment of animal diseases, control of epidemics, castration of bovines and control and destruction of animal parasites are the main services rendered at these dispensaries.

An Artificial Insemination Centre works at Aurangabad with sub-centres at Palsi, Naigaon, Chikhalthana, Daulatabad, Bidkin and Kannad.

There are poultry farms at Aurangabad, Kannad, Vaijapur and Sillod. In addition chicken distribution centres have been opened at Aurangabad, Jalna, Vaijapur and Sillod.

AGRARIAN STRUCTURE AND LAND REFORMS

The system of land tenure prevailing throughout the district is ryotwari under which each field is considered a separate holding, which the ryot holds directly from the State. The holder of the field is called the occupant. The right of occupancy depends on the regular payment of the assessment and in case of failure to pay can be forfeited by the State. Due to faulty registration and lack of record of rights, absentee holders (pattedars) had been recognised as khatadars for land revenue demand and were enjoying a sort of intermediary position. This resulted in inadequate security to the actual holders of land and also led to costly and infructuous litigation in Judicial and Revenue Courts. These tenurial deficiencies in the ryotwari system were removed when the record of rights was prepared in 1952-53 and actual holders were recognised as occupants and direct khatadars for land revenue demand.

The other systems of tenure existing in the past were Jagirs and Inams. Jagirdars were assignees of land revenue. About one-third area of the district consisted of jagirs. They were abolished and their administration taken over under the Hyderabad Jagirs Abolition Regulation in 1949. The Nizam of Hyderabad had his own jagir which was known as *Sarf-e-khas* and consisted among others of two talukas of Khuldabad and Sillod from this district. *Sarf-e-khas* was abolished under the Sarf-e-khas Merger Regulation of 1949. Inams were revenue-free grants of land made in lieu of past services or on condition of continuing services to the State or village community. All inams, excepting Mashrootul Khidmat Inams, have now been abolished under the various measures of land reforms. The exempted category is of lands granted as inam for services to temples, mosques and other religious or charitable institutions.

All hereditary watan lands held for village services have also been abolished and all the village servants now work on a salary basis. The occupancy rights of abolished Inam lands have been conferred on their holders or tenants, as the case may be, on condition of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Record of Rights

A record of rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up to date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the record of rights.

Size of Land Holdings

According to the Census Table B-X in Part II of this Volume 55·04 per cent of the total number of sample households cultivate land and the remaining 44·96 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating households (based on 20 per cent sample) by size of land cultivated and by the interest in the land. 86·52 per cent of the cultivating households cultivate their owned lands only. 3·16 per cent of the households cultivate tenanted lands only and the remaining 10·32 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown below.

The distribution of households in Table B-XI and the same shown in percentages in column 2 below, is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of those ownership holdings is also shown in column 3 below:—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	0·43	2·24
1 to 4·9	13·71	14·68
5 to 9·9	20·88	20·37
10 to 14·9	17·39	15·86
15 to 29·9	28·18	26·26
30 to 49·9	13·21	12·59
50+	6·20	8·00
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 21·54 acres. Average size of the ownership holding in the district was 21·06 acres in 1952-53 against the average of 12 acres for the State.

Ownership Rights to Tenants

Tenancy rights are regulated under the Hyderabad Tenancy and Agricultural Lands Act which is in force since June 1950. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "Land to the tiller" policy, the Act also provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 26th January 1956. This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, ownership rights have been conferred upon 9,153 tenants for 154,910 acres of land in the district. 146 tenants had mutually agreed with the landholders on the price to be paid by them. In the remaining 9,007 cases, the prices were fixed by the Revenue Officers.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came into force from 26th January 1962. Four local areas, viz., Gangapur, Aurangabad, Vaijapur and Khuldabad have been notified in the district with different ceiling areas for dry crop land, viz., 96, 108, 114 and 126 acres, respectively. In the case of irrigated lands, the ceiling areas are the same in all the four local areas, viz., 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1959 and work of consolidation of holdings was started in Aurangabad, Vaijapur and Gangapur talukas from January 1960. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to March 1963, 62 villages have been completed covering an area of 82,000 acres with 9,933 holdings.

The target for work during the Third Plan period is to complete 33 villages with an area of 66,500 acres per year.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows:—

(i) Dry crop lands .. .. .. 2·0 acres.
(ii) Bagait lands .. .. .. 0·5 acre.

All plots of land, less in area than the standard area, are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative activity was initiated in the district in 1915. It did not, however, gain impetus for very long. During the last decade, however, concentrated efforts have resulted in very rapid progress. The number of co-operative societies has increased from 901 in 1951 to 1,371 in 1960. Activities related to production, processing, distribution and marketing are now being organised on co-operative basis. Industrial, processing and farming societies, however, have yet to make good progress.

The following description is based on the Report for the year 1960-61.

Co-operative Credit

Agricultural Credit Societies.—The number and membership of Agricultural Credit Societies have increased at a very rapid pace during the last decade especially during the Second Plan period.

The position of Agricultural Credit Societies in 1950-51 and 1960-61 is as follows:—

	1950-51	1960-61
(1) Number of Agricultural Credit Societies	847	1,078
(2) Number of members	33,909	54,824
(3) Share Capital ..(Rs. in lakhs)	NA	39·27
(4) Reserve and other funds (Rs. in lakhs)	NA	4·11
(5) Working Capital ..(Rs. in lakhs)	13·85	171·25
(6) Number of members to whom loan was advanced	NA	44,670
(7) Amount advanced ..(Rs. in lakhs)	5·16	129·97
(8) Amount recovered ..(Rs. in lakhs)	NA	84·84
(9) Loans outstanding ..(Rs. in lakhs)	NA	139·17
(10) Overdues .. ..(Rs. in lakhs)	NA	17·75

NA=Not available.

Average membership per primary society is 51 against the average of 96 members for Maharashtra. 91·85 per cent villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of the Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 43·48 lakhs and formed 25·33 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the Primary Agricultural Credit Societies in the district amounted to Rs. 129·97 lakhs in 1960-61. The average amount of loan per borrowing member in the district worked out to Rs. 237 as against Rs. 329 for Maharashtra.

With 62 per cent increase in membership and twelve-fold increase in the working capital during the last decade, Agricultural Credit Societies appear to be making good progress in the district.

Crop loan scheme has been introduced recently. This resulted in an increase in the amount of loan advanced and the capacity of farmers to repay the loan.

Central Co-operative Bank.—A Central Co-operative Bank called "The Aurangabad Central Co-operative Bank, Ltd." was established at Aurangabad in June 1917. It was reconstituted in 1958 and is now known as " The Aurangabad District Central Co-operative Bank, Ltd." The Bank has been working as central financing agency, catering for the credit requirement of all the primary co-operatives in the district. Since 1962, the Zilla Parishad also transacts its financial business through this Bank.

In the year 1960-61 the position of the Central Co-operative Bank was as follows :—

(1) Number of members—		
(*a*) Individuals		107
(*b*) Societies		1,139
(2) Paid-up share capital	(Rs. in lakhs)	19·02
(3) Reserve and other funds	(Rs. in lakhs)	1·91
(4) Deposits—		
(*a*) Individuals	(Rs. in lakhs)	21·87
(*b*) Societies and Banks	(Rs. in lakhs)	25·19
(5) Borrowings—		
(*a*) State Co-operative Bank and the Reserve Bank of India	(Rs. in lakhs)	85·50
(*b*) Government	(Rs. in lakhs)	1·74
(*c*) Other sources	(Rs. in lakhs)	2·63
(6) Working Capital	(Rs. in lakhs)	157·86
(7) Cash—		
(*a*) On hand	(Rs. in lakhs)	4·22
(*b*) At Banks	(Rs. in lakhs)	11·12
(8) Investment—		
Government and other Trustee securities	(Rs. in lakhs)	0·67
(9) Percentage of cash in hand to deposits		8·97

(10)	Percentage of investment to deposits	1·42
(11)	Loans outstanding—	
	(*a*) Individuals .. .. .. (Rs. in lakhs)	0·03
	(*b*) Societies .. .. .. (Rs. in lakhs)	135·48
(12)	Percentage of loans outstanding to deposits ..	287·95
(13)	Percentage of loans outstanding to working capital	85·84
(14)	Overdues .. .. (Rs. in lakhs)	22·34
(15)	Percentage of overdues to loans outstanding ..	16·49
(16)	Cost of management .. .. (Rs. in lakhs)	2·82
(17)	Percentage of cost of management to working capital	1·79
(18)	Profit .. .. (Rs. in lakhs)	0·17
(19)	Number of branches and pay offices in the district	13

In one year (1960-61), the membership of the Bank increased by 15·16 per cent, the paid-up share capital by Rs. 7·23 lakhs or 61·32 per cent and the working capital by Rs. 49·18 lakhs or 45·25 per cent. The bank showed a profit of Rs. 0·17 lakh. In the previous year it has suffered a loss of Rs. 0·30 lakh. The Bank has opened two more branches during the year. The percentage of overdues to outstanding loans has, however, increased from 5·13 per cent in the previous year to 16·49 per cent.

Land Mortgage Bank.—The Primary Land Mortgage Bank, Ltd., was established at Vaijapur in 1955-56. One more Bank was opened in 1960-61. In 1960-61 the membership of both the Banks together was 9,662, share capital Rs. 1·89 lakhs and working capital Rs. 26·25 lakhs. The Bank advanced loans of Rs. 11·32 lakhs as against Rs. 9·26 lakhs in the previous year. The two Banks together however suffered a loss of Rs. 37,000 as against a profit of Rs. 14,000 in the previous year.

Agricultural Processing Societies

One cotton ginning and pressing society, one oil crushing society and 13 other agricultural processing societies have been registered in 1960-61. Their combined membership is 835 and paid-up share capital Rs. 3·86 lakhs. The State Government has contributed Rs. 1·15 lakhs and Rs. 64,000 in the paid-up share capital of the cotton ginning society and the oil crushing society, respectively. Government has also advanced a loan of Rs. 70,000 and Rs. 1,000 as subsidy to the societies. The societies have yet to start their operations.

Industrial Societies

On 30th June 1961 there were 18 Weavers' Co-operative Societies and 141 other Industrial Co-operatives in the district. Out of the 18 weavers' societies, 12 are handloom weavers' societies and 6 are wool weavers' societies. The handloom weavers' societies get financial assistance through rebate on the sale of handloom cloth, management grants to sale depots, looms and subsidies for purchase of accessories.

The other types of industrial societies include 29 oil ghanis, 2 cane and bamboo, 18 tanning, 22 leather working, 15 carpentry and smithy, 12 pottery and brick-making, 2 coir and rope, 3 neera and palm gur and 23 miscellaneous societies. Most of them have been established within the last two years and have yet to make a headway.

Forest Labourers Societies

There are three Forest Labourers Co-operative Societies and five Labour Contract Societies. The combined membership of the Forest Labourers and Labour Contracts Societies is 363.

Co-operative Farming Societies

There are three Joint Farming, two Collective Farming, one Better Farming and one Tenant Farming Societies in the district. Their membership is respectively 37, 44, 13 and 45 and paid-up capital Rs. 5,000, Rs. 6,000, Rs. 28,000 and Rs. 2,000 respectively. The Joint Farming Societies cultivated in 1960-61, 200 acres out of 567 acres area commanded, Collective Farming Societies cultivated 523 acres out of 600 acres commanded, Better Farming Societies cultivated 503 acres out of 600 acres commanded. The Tenant Farming Society did not cultivate any land. It has 150 acres under its command.

Co-operative Lift Irrigation

There is one society of this type established in the district at Kannad in 1959-60. It is the "Rajaram Co-operative Lift Irrigation Society". The society has 34 members and the initial capital raised is Rs. 23,000. The society has plans to irrigate 397 acres of area from river Shivna at an estimated cost of Rs. 89,700. In 1960-61, the society received Rs. 27,000 as loan and Rs. 13,000 as subsidy from the Government.

Dairy Societies

One Dairy Union and eight Milk Supply Societies have been organised in the district. The membership of the union is two societies and 36 individuals and its paid-up capital is Rs. 2,000. The union sold milk worth Rs. 22,000 and milk products worth Rs. 1,000 but suffered a loss of Rs. 13,000 during the year.

The combined membership of the societies is 220 individuals and the paid-up capital Rs. 7,000. The value of sales during the year was Rs. 6,000. Out of eight societies, two societies suffered loss and two societies made profit. The other four societies neither showed profit nor loss.

Fishery Societies

One Co-operative Fishery Society has been registered with 21 members in 1960-61. It has yet to start functioning.

Purchase and Sales Societies and Unions

There are 10 Taluka Agricultural Co-operative Associations. During the control and rationing days, they had the monopoly of distribution of controlled commodities. On abolition of the controls, these associations became stagnant. In 1959-60, six of those associations at Jalna, Vaijapur, Sillod, Soegaon, Gangapur and Paithan were converted into Taluka Co-operative Agricultural Marketing Societies and the association at Aurangabad was converted into the District Co-operative Agricultural Marketing Society.

One Central Co-operative Agricultural Marketing Society and 18 Primary Agricultural Marketing Societies were functioning in 1960-61. The central society had a membership of 100 societies and 2,147 individuals, a share capital of Rs. 94,000 and a working capital of Rs. 6·57 lakhs. It had hired 35 godowns. It received Rs. 8,000 loan for construction of godowns. It made a profit of Rs. 1·52 lakhs in that year.

The Primary Marketing Societies together had, in 1960-61, a membership of 623 societies and 6,789 individuals, paid-up capital of Rs. 2·67 lakhs and a working capital of Rs. 5·70 lakhs. These societies covered all the 5 regulated markets and one out of the three other markets in the district. The total sales (as owners and as agents) by these societies amounted in 1960-61 to Rs. 31·69 lakhs. 18,000 rupees were received as commission. Five of these societies sustained a loss of Rs. 41,000, six made a profit of Rs. 39,000 and the remaining seven showed neither profit nor loss.

There are five regulated markets in the district at Aurangabad, Jalna, Vaijapur, Lasur and Paithan. These markets are managed by market committees consisting of elected and nominated members to represent merchants and agriculturists.

The Maharashtra State Warehousing Corporation has set up warehouses at Aurangabad, Jalna and Vaijapur. It is also proposed to set up warehouses at Lasur and Paithan during the Third Plan period.

Consumers' Movement

On 30th June 1961 there were 11 Primary Consumers' Co-operative Stores in the district having seven branches. The number of members was 624, a paid-up capital of Rs. 43,000 and a working capital of Rs. 1·02 lakhs. Nine of these stores made a profit of Rs. 11,000 in 1960-61. The remaining neither showed profit nor loss.

Housing Societies

There were 27 Co-operative Housing Societies in the district, one of which was organised by Backward Class persons. Their total membership was 739, paid-up capital Rs. 59,000 and working capital Rs. 12·13 lakhs. In 1960-61 these societies constructed two independent houses and 25 tenements and also advanced Rs. 1·44 lakhs as loans for construction. The Government has given a loan of Rs. 6·75 lakhs to these societies.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

	No. of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Bank.	..	1	..	..	..	..	1
(2) Agricultural Credit Societies.	57	444	188	32	20	337	1,078
(3) Non-Agricultural Credit Societies.	..	2	3	8	..	10	23
(4) Primary Land Mortgage Bank.	..	1	..	..	..	1	2

FORESTS

The district has an area of 345·25 sq. miles under forests which makes 5·35 per cent of the total geographical area of the district against an average of 17·56 per cent for Maharashtra. The entire forest area is under Forest Department.

The Divisional Forest Officer in charge of forests in the district works under Poona Circle and has his headquarters at Aurangabad. He has jurisdiction over the forests of Aurangabad and Bhir districts. The forest area in the district is subdivided into four ranges, viz., Aurangabad, Jalna, Kannad and Fardapur.

The forests are scattered all over the district in small patches. They fall in the " Southern Dry Deciduous Forests" type. Chief of the species found in the forest is teak which covers considerable portions of Kannad and Fardapur ranges. Another important species is "Anjan" which is predominantly

found in parts of Fardapur range. The other important species found in the forests are : Dhavada, Salai, Char, Chandan, Mohi, Tembru, Kandol, Khair, Mhowa, Palas and Ain.

The forest also has extensive grassy areas. The species of grass found are: Kusal, Paonya and Sheda. Sofia and Motia varieties of Rosha grass are also found.

1,514 persons are reported as working in forestry and logging in 1961 Census.

The forests in the district are in an unorganised state and working schemes for regulating the felling are being evolved.

During the First Five-Year Plan the scheme for afforestation was implemented in 1,270 acres. In the Second Plan period about 1,500 acres of area was planted with various species of plants. The Third Five-Year Plan scheme envisages plantation of sandalwood trees in 1,000 acres involving an outlay of Rs. 0·20 lakh. Afforestation in 500 acres is also to be done for soil conservation for which Rs. 0·50 lakh have been sanctioned.

Wild boar, chital and panther are the types of fauna found in the interior and inaccessible portions of the forest.

FISHERIES

Fishing activity in this district is restricted to inland waters only, rivers and tanks being the chief sources. The river Godavari which passes along the border of the district affords a length of 135 km. of perennial water for fishing. There are also 10 perennial and 7 seasonal tanks which provide 4,925 acres of water-spread area for development of the industry.

The commercially important varieties of fish found in the district are—

Baloo, Murrel, Koli Murrel, Dokh, Tam, Rahoo, Maroof, Singhi, Baam, Kanwa, Kolus, Potiac, Patola, Seengal, Khidla, Boori, Yellshal, Peora, Geehul, Murii, Kaneri, Chapti, Kobir, Pathar, Chatu, Bekdi, Selan, Katarna, Ghegra, Tamboo, Gangaoli, Ghod Zinga, Mungarod Zinga and Matechkal Zinga.

These varieties are however not of fast-growing types. As such, in the Five-Year Plan schemes, for propagation of pisciculture quick growing "Bengal Carps" are stocked in tank waters. The varieties stocked are Catla, Rohu and Mrigal. During the Second Five-Year Plan period 2·01 lakhs of "Bengal Carps" were stocked while during the first two years of the Third Plan the quantity stocked is 2·44 lakhs.

In the 1961 Census 345 persons were reported as engaged in fishing as principal work. 277 of them are males and 68 females. Fishermen in the district belong to the community known as Dheemar, Bhoi, Kahar and Koli. Since the fishing activities in the district are limited, some of them also work on roasting of gram. Fishing is generally done with the help of Drag nets (Mahajal), Gill nets (Yeele or Udan) and Cast nets (Malota or Phekjal). The nets are made of cotton twine.

A fishermen's society has been registered at Paithan during the Second Five-Year Plan. Two more societies are to be registered shortly. Financial assistance in the form of subsidy is granted to fishermen for purchase of cotton and nylon twines.

MINING AND QUARRYING

Mining activities in this district are confined only to quarrying of stones, clay, sand, etc. Deposits of minerals have not been found so far.

In 1961 Population Census, 1,753 persons are reported to be engaged in quarrying of stones, etc. 1,080 of them are males and 673 females.

INDUSTRIES

There are only five large factories worth mentioning. One is the textile mill at Aurangabad. The others are a sugar factory near Gangapur and two art-silk factories and one flour-mill at Aurangabad. The general pattern of non-agricultural employment leans heavily towards crafts and craftsmen working on traditional lines with locally available raw materials or for local demand alone. Absence of adequate power supply may have arrested the growth of industries. Supplies from Purna-Paras grid system may accelerate industrial expansion in future.

There are in all 44,213 workers engaged in industries, 31,938 or 72 per cent of them are in household industries and 12,275 or 28 per cent in non-household industries. The total number of workers in the registered factories in 1961 is 6,305 which makes only 14·26 per cent of all workers engaged in manufacturing industries or only four factory workers per thousand of total population against 20 per thousand total population for Maharashtra. The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of the establishments

and the number of workers for each industry minor group prepared from houselists are also shown separately for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There are five large-scale registered factories in the district working with 50 or more workers and using power. As described earlier one of them is a textile mill, two are art-silk factories, one is a sugar factory and one is a flour-mill. Except for the sugar factory situated near Gangapur the other four establishments are in Aurangabad town.

The cotton spinning and weaving mill at Aurangabad was erected in 1889. It has 271 looms and 12,640 spindles.

The two art-silk weaving units at Aurangabad together have 40 powerlooms.

The sugar factory at Gangapur was commissioned in January 1959. It has a crushing capacity of 1,000 tons of sugarcane per day.

Small-scale Registered Factories

There are a number of registered but smaller establishments like ginning and pressing units in cotton growing areas, oil mills, embroidery, silk weaving, tanning and leather working, wool weaving, paper making by hand, etc.

The total number of registered factories has increased from 85 in 1951 to 104 in 1961. The average number of workers in registered factories has also increased from 3,827 in 1951 to 6,305 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 21·29 lakhs. But due to outstanding loans their working capital is Rs. 3·32 lakhs only. The total value of annual production was Rs. 40·92 lakhs and value added by manufacturing was Rs. 12·54 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1960 was only 0·06 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

The traditional crafts are conducted on household and cottage industries scale. They are mostly servicing and processing establishments. Wood and wooden products industry engages the largest number (7,679) of workers. They are mostly the carpenters who manufacture, fix or repair doors and doorframes, wooden roof beams, furniture, agricultural implements and bullock carts. Basket weaving by Kaikadis is also common in rural areas.

10,305 workers are engaged in production and rearing of livestock. The district has the largest number of cattle markets in Maharashtra.

The next two important industries in the district are miscellaneous textile and rearing of sheep for production of wool in which 4,862 and 4,515 persons are engaged respectively. The former group includes tailors engaged in making garments for men and women. The latter consists of shepherds who keep sheep and weave *kambals*.

3,190 persons are engaged in the manufacture of shoes and leather footwear in the district and 2,572 persons in basket-making and allied products.

Handloom weaving occupies an important place in the district. At the end of May 1961, there were 2,217 cotton handlooms and 36 other registered handlooms. Out of these 1,149 are under the co-operative fold. The biggest handloom society in the district is the Markandey Handloom Weaving Society of Jalna with 87 looms. Their production includes sarees, shirting, cloth and *khans*.

Tanning and leather working industries is next in importance to handlooms and provides employment to 4,057 people in rural areas.

Himroo, Mushroo and Kinkhab weaving is a well-known ancient industry of the district. The floral designs and intricate weaving in all colour schemes and finish, makes the fabric very attractive and famous all over the country. It also has an overseas market. Systematic efforts are being made by the All-India Handicrafts Board for revival and reorientation of this industry and to stimulate interest among the foreign buyers.

Paithan has been associated with fine silk brocade and jari thread industry for centuries. There are now very few people working in that industry.

The other important industries in the district are, mainly, cotton ginning and pressing, oil-mills or ghani oil and handmade paper. There are 30 cotton ginning and pressing units in the district. Some of them have oil-mills for off-season working. The number of oil-mills is 15.

1,946 persons are engaged in bidi-making. Most of the factories are at Aurangabad. Bidi-making seems to have considerable scope for expansion.

There are 912 flour or rice mills engaging 1,381 workers.

The proportion of different groups of artisans to one lakh of total population in the district is as follows :—

Blacksmiths 73, carpenters 217, shoemakers and repairers 230, potters 150, tailors and dress-makers 268, spinners and weavers 193, basket weavers 142.

Peripatetic schools are being organised for technical training in various crafts. A training-*cum*-production centre is also proposed at Aurangabad for development of Bidriware industry. A Village Industries Training Centre exists at Aurangabad. Three more co-operative working centres have been started during the Second Plan period. A training-*cum*-production centre for imparting training in the use of Ambar Charkha has also been set up at Aurangabad.

The Khadi and Village Industries Board has introduced the scheme for developing oil ghanis, match-box making, flaying and Himroo industry in the district.

The "Master Plan" prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district:—

(1) Surgical Cotton.
(2) Solvent extraction of oil-seeds/cakes.
(3) Cotton seed oil.
(4) Fat splitting and distillation of fatty acids.
(5) *Paints, varnishes, boiled oils, enamels, etc.*

Industrial Estates at Aurangabad, Jalna and Paithan (worksheds) are proposed to be established during the Third Five-Year Plan initially on co-operative basis.

POWER

The number of electrified towns and villages in the district is 19. Their talukawise lists are given in Table 31 in Part III. The population of those electrified places is only 14·86 per cent of the total population of the district.

The district consumption of electricity on different items for eight years is shown in Table 30 in Part III.

The existing installed capacity of power generation is quite insufficient to meet local demand for domestic purposes as well as industrial requirements. The *per capita* consumption is naturally very low compared to the State average, as only 19 towns and villages in this district had been electrified up to 1960-61.

The electric supply is through the State Electricity Board. The power supply of Aurangabad town was greatly improved and a new 620K W engine was installed in 1957 and a line of 4½ miles has been laid up to Chikhalthana Aerodrome.

A hydro-electric project on the river Purna (near village Yeldari in Parbhani district) with an installed capacity of 15,000 K W is under construction. The scheme is expected to supply power to some places in the district. Another proposal is to supply power from Paras in Akola district.

TRADE AND COMMERCE

The chief commodities of export from this district are cotton, foodgrains, oil-seeds, livestock, silk-stuff, hides and jaggery. The principal imports are foodgrains chiefly rice, salt, cloth, piece-goods, yarn, sugar, kerosene oil, fruit, raw silk, spices, paper and hardware. Agricultural produce is collected from the producers by the tradesmen who pass on the same to the agents of wholesale exporters at large marketing centres. The distribution of foodgrains and other articles of trade is through shops and pedlars and hawkers. In addition there are weekly markets and fairs where sellers and buyers meet on fixed days of the week or the year.

Shops

Shops are found in almost all villages except in the smallest. These shops are generally managed by the village shopkeeper who usually is a general tradesman, grain-dealer, cloth-vendor and money-lender. There are in all 9,458 shops in the district, 6,456 are in rural areas and 3,002 in urban areas. This does not include the shops temporarily set up in weekly markets or fairs. The number of shops per 1,000 dwellings is 32·1 for the district as a whole, 26·1 for rural areas and 74·1 for urban areas. It will, therefore, be seen that the urban areas have three times more shops than rural areas. The ratio between the shops and 1,000 dwellings for the district is less than the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These are commonly known as " bazars " and are chiefly distributing rather than collecting centres. Internal trade is carried on by means of weekly markets held at different places of the district. The articles sold at these markets are foodgrains, pulses, oils, spices, piece-goods, cloth, fruit and vegetables, brass and copper vessels, cattle, etc. Pedlars and hawkers set up booths on the market days. Agriculturists from the nearby villages also bring their farm produce. In addition, temporary stalls are also set up by traders and shopkeepers who belong to the market place. The weekly markets start by about two in the afternoon and close by six to enable both the buyers and sellers to reach home before it is dark. People from villages within the radius of 4-5 miles are generally the buyers in these markets.

Column (7) of the Village Directory in Part I shows for each village in the district where a weekly market is held and if so on which day of the week.

A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 259 shows locations of all these markets and also the days on which each bazar is held.

There were about 80 weekly markets in the district in 1909. During the year 1960-61 there are altogether 155 weekly and bi-weekly markets in the district. Out of these, 49 are also cattle markets. The district has the largest number of cattle markets in the State. Twenty-six weekly markets are held on Sunday, 18 on Monday, 23 on Tuesday, 20 on Wednesday, 21 on Thursday, 29 on Friday (including Jafferabad and Ambad which are also bi-weekly markets) and 18 on Saturday.

The map facing page 259 will show that four or more weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

Fairs are complementary to weekly markets so far as trade is concerned. They are attended by unusually large gatherings and all sorts of articles of daily use (including cattle at some places) are brought for sale. They are chiefly distributing centres. A list of fairs held in the district showing their locations, duration and dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 260 shows the location of all the fairs in the district having 1,000 or more gatherings. A volume giving details regarding fairs and festivals is also issued separately.

Trade Centres

Apart from the weekly markets and fairs, Aurangabad, Jalna, Lasur, Vaijapur and Paithan are important trade centres in the district, as far as collection and export of agricultural produce are concerned. Agricultural produce markets at these places are regulated under the Hyderabad Agricultural Markets Act No. II of 1339 Fasli and they are managed by market committees, whose members are the elected representatives of both the merchants and agriculturists. Jalna is one of the most important centres of trade in Maharashtra and provides an outlet for agricultural produce from three districts, viz., Aurangabad, Bhir and Parbhani. Aurangabad and Vaijapur are the other important trade centres in the district. The annual turnover in the regulated markets in the year 1958-59 was as follows :—

Trade Centre	Annual Turnover Rs.
(1) Aurangabad	1,75,31,435
(2) Jalna	6,21,50,000
(3) Lasur	44,23,416
(4) Vaijapur	88,74,583

With a view to increasing the warehousing facilities for agricultural produce, godowns to store food-grains, etc., brought by the farmers in the markets, have been opened by the Maharashtra State Warehousing Corporation at Aurangabad, Jalna and Vaijapur. Two more warehouses will be constructed at Lasur and Paithan.

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 18,720 out of which 8,932 or 47·71 per cent are in rural areas and 9,788 or 52·29 per cent are in urban areas. The number of workers in trade and commerce makes 2·31 per cent of all the workers in the district. More than half of the district number are in Jalna (27·03 per cent) and Aurangabad (25·43 per cent) talukas only.

Only 3·55 per cent of the workers in trade and commerce are in wholesale trade, 89·67 per cent are in retail trade and 6·78 per cent in miscellaneous trade and commerce. Ninety-seven per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is only 33. The wholesale trade of cereals and pulses appears to be combined with wholesale trade of sugar, spices, oil, etc., as their number for the combined group is 459 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown below :—

	No. of Banking Offices			
	Scheduled	Non-scheduled	Co-operative	Total
DISTRICT TOTAL ..	7	..	12	19
1 Kannad Taluka ..	..	..	1	1
2 Sillod Taluka ..	..	..	1	1
3 Soegaon Mahal ..	..	..	..	..
4 Bhokardan Taluka ..	..	..	1	1
5 Jafferabad Mahal ..	..	..	1	1
6 Khuldabad Mahal ..	..	..	1	1
7 Vaijapur Taluka ..	1	..	1	2
8 Gangapur Taluka ..	..	..	1	1
9 Aurangabad Taluka ..	3	..	1	4
10 Jalna Taluka ..	3	..	2	5
11 Paithan Taluka ..	..	..	1	1
12 Ambad Taluka ..	..	..	1	1

Jalna and Aurangabad talukas are leading in banking activities in the district. The Central Co-operative Bank has at least one branch office in each taluka. The State Bank of Hyderabad has its branches at Aurangabad, Jalna and Vaijapur.

Financial transactions of the Government are done through the district treasury and branches of the State Bank of Hyderabad. There are sub-treasuries at each taluka headquarters.

COMMUNICATIONS AND TRANSPORT

The Manmad-Secunderabad metre gauge line of the Central Railway passes through the district. Its total length in the district is 98·86 miles and it has 20 railway stations, Aurangabad and Jalna being two most important of them.

Existing Railway mileage in the district is 1·53 miles per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all these roads.

The district is well connected by roads with the adjoining districts of Jalgaon, Nasik, Buldhana, Parbhani, Bhir and Ahmadnagar. The district headquarters is also well connected by roads with all the taluka headquarters. No national highway passes through the district.

During the decade 1951—61, the State highways increased by 26·69 miles, the major district roads by 45 miles, other district roads by 44·91 miles and village roads by 23·18 miles. The total increase in all types of roads (excluding municipal roads) is 139·78 miles.

New Roads

The work of the following roads which remained incomplete during the First Five-Year Plan was completed during the Second Five-Year Plan :—

(1) Jalna-Mantha Road,

(2) Mahora-Jamb Road,

(3) Bhendala-Gangapur Road.

The work on the following roads is in progress :—

(1) Jafferabad-Deolgaon Road,

(2) Bhokardan-Jafferabad Road,

(3) Ajanta-Padali Road,

(4) Kannad-Pishor Road,

(5) Khuldabad-Phulambry Road,

(6) Sillod-Nagapur-Chalisgaon Road,

(7) Paithan-Pachod Road,

(8) Road to Aurangabad Caves.

Nagpur Plan Target

Under the Nagpur Plan the district should have 2,580 miles of roads. On 31st March 1961, it was short of that target by 1,938 miles.

New Bridges

The work on the bridge on Godavari river at Kaigaon-Toka on Aurangabad-Ahmadnagar Road was completed in 1962. A bridge at Tapargaon on Shivna river on Aurangabad-Jalgaon Road has been recently completed.

Airport

There is an aerodrome at Chikhalthana six miles from Aurangabad. Bombay is 173 miles by air and a daily service operates in the fair season from Bombay.

Posts, Telegraphs and Telephones

The district is included in the Aurangabad Postal Division. Head Post Office is situated at Aurangabad and Sub-Offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1960-61, there were 26 sub-post offices and 173 branch post offices in the district. Together, their number has increased by 67·23 per cent over that of 1951-52.

There are Telegraph Offices at the following ten places :—

(1) Aurangabad (HO), (2) Aurangabad Cantonment, (3) Aurangabad City, (4) Ambad, (5) Gangapur, (6) Jalna, (7) Jalna (R.S.), (8) Khuldabad, (9) Fardapur and (10) Vaijapur.

The following four places have telephone connections :—

(1) Aurangabad (HO), (2) Gangapur, (3) Jalna and (4) Vaijapur.

Passenger Road Transport

Passenger road transport in the district had been nationalised as early as in 1932.

The transport organisation used to function as one of the Government departments. It has been amalgamated in the Maharashtra State Road Transport

Corporation since 1st July 1961. Private passenger buses operate on kaccha roads in fair season. By the end of the Second Five-Year Plan the extent of nationalisation of passenger road transport was 52 per cent. It is proposed to extend it to 76 per cent by the end of the Third Five-Year Plan. It is proposed to construct additional bus stations, pick-up stands and provide other facilities for the travelling public during the Third Five-Year Plan.

This district is included in the jurisdiction of Aurangabad division of State Road Transport Corporation. There are two depots in the district. One is at Aurangabad and the other at Jalna. No separate figures of passenger transport are available for the district. The two depots together run buses on 47 routes which make 213 single trips per day.

Goods Transport

Separate figures for lorries operating in the district are not available as the Regional Transport Officer, working at Aurangabad, keeps combined records for his region including Aurangabad, Parbhani, Bhir, Nanded and Osmanabad districts.

Workers in Transport and Communications

5,294 persons are engaged in transport and 552 in postal, telegraphic and telephone communications, etc., in the district. Out of the workers in transport, 864 are in Railway transport, 1,412 in Motor transport and 3,018 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a Railway or a Road or has a Post Office or not.

CONSTRUCTION

The total number of persons engaged in construction is 6,948. 5,646 are males and 1,302 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

8·82 per cent of the workers are engaged in construction and maintenance of dams, waterways and canals, etc., 61·11 per cent in construction and maintenance of buildings and 30·02 per cent in construction and maintenance of roads, bridges, etc. The large proportion engaged in the construction includes persons working in construction of private houses and Government buildings. The Medical College Hospital and University buildings are a few of the important public works now in progress in the district.

All the workers engaged in construction together make only 0·86 per cent of the total workers in the district.

OTHER SERVICES

49,077 persons are engaged in the district in "Other Services". 38,451 are males and 10,626 are females. The major categories out of them are: (i) Public services, (ii) Educational services, (iii) Personal services. "Public services" include administrative employees of Central, State and Local Governments. "Educational services" include all classes of teachers and "Personal services" include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of workers in other services by minor groups is shown in Table B-IV-C in Part II.

6·05 per cent of the total workers in the district are engaged in "Other services" as against 8·53 per cent in the State. 26·19 per cent of the total workers in "Other services" in the district are engaged in "Public services" and 11·14 per cent in "Educational services". The former proportion is higher while the latter is slightly lower than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. The high proportion of "Public services" may be due to comparatively large number of persons in the district working for the administrative services with the Government and quasi-Government organisations in Aurangabad which is the district as well as the divisional headquarters. The lower proportion of "Educational services" may indicate the scope of further expansion in the number of schools and teachers. Even the proportion of "Personal services" in the district (16·81 per cent) is much lower than the State average of 27·15 per cent. It may be so because there are very few urban centres.

The number of domestic servants is 1,839 or one for about 833 population. The number of barbers is 2,612. The number of persons in laundry services is 1,442.

There are 234 legal practitioners and 1,466 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is only 135 and that in other schools and colleges is 5,321.

The number of State Government employees including those now working under the Zilla Parishad is 10,065.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rates

The proportions of workers to total population, males and females for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
AURANGABAD DISTRICT	52·91	59·76	45·79
Kannad Taluka	55·41	59·86	50·81
Sillod Taluka	54·56	60·92	48·02
Soegaon Mahal	55·64	60·34	50·76
Bhokardan Taluka	54·35	61·08	47·34
Jafferabad Mahal	55·68	60·05	51·24
Khuldabad Mahal	53·34	60·62	45·85
Vaijapur Taluka	53·79	59·54	47·75
Gangapur Taluka	55·80	61·78	49·60
Aurangabad Taluka	44·47	54·44	33·58
Jalna Taluka	51·34	59·14	43·21
Paithan Taluka	55·44	61·94	48·83
Ambad Taluka	55·48	62·34	48·49

The labour participation rates, i.e., percentage of workers to total population varies from 55·80 in Gangapur taluka to 44·47 in Aurangabad taluka. Male participation is highest with 62·34 per cent in Ambad taluka and female participation is highest in Jafferabad mahal with 51·24 per cent. Aurangabad and Jalna talukas have lower proportions because of their large urban sectors of population. The district average ratios are however very much higher than the State average for the total as well as for males and females. Age composition of the district population does not much differ from that of State. The higher rates of participation both for males and females would therefore indicate lower *per capita* income and more undeveloped or backward economy in the district.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72·25	12·34	15·41
	Rural	100	88·73	5·68	5·59
	Urban	100	11·97	36·69	51·34
Aurangabad District.	Total	100	84·78	6·12	9·10
	Rural	100	91·22	4·31	4·47
	Urban	100	18·22	24·85	56·93

The primary sector is predominant in the district with 84·78 per cent of the workers engaged against the State average of 72·25 per cent. The proportion engaged in the secondary sector is less than half of the State average. Even the proportion (9·10 per cent) of workers engaged in tertiary sector is considerably lower than the corresponding State average (15·41 per cent). It has already been described that there is no modern manufacturing industry in the district and the proportion of workers engaged in registered factories is only 4 per thousand of population against the average of 20 for Maharashtra.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			AURANGABAD DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46.11	40.69	54.79	52.73	50.81	55.33
II Agricultural Labour ..	23.80	18.12	32.90	29.89	24.24	37.57
III Mining, Quarrying, Livestock, Fishing, etc.	2.16	2.97	0.86	1.98	2.95	0.65
IV Household Industry ..	4.39	4.80	3.74	3.94	5.39	1.97
V Manufacturing other than Household Industry.	6.88	10.22	1.54	1.51	2.27	0.49
VI Construction	1.24	1.69	0.53	0.86	1.21	0.38
VII Trade and Commerce ..	4.52	6.61	1.17	2.31	3.66	0.48
VIII Transport, Storage and Communications.	2.36	3.65	0.29	0.73	1.24	0.04
IX Other Services	8.54	11.25	4.18	6.05	8.23	3.09
Total Workers ..	100.00	100.00	100.00	100.00	100.00	100.00

Proportions of workers engaged in cultivation and agricultural labour are very much higher for the district than those for the State. The ratio between cultivators and agricultural labourers is slightly lower in the district. The comparatively larger proportion as agricultural labour may partly be due to the crop pattern in the district, and partly to

the want of other alternative avocations for employment. The proportion in the category " V-Manufacturing " (1·51 per cent) is less than one-fourth of the State average (6·88 per cent). Lack of industrial development in turn does not allow any scope for expansion of tertiary activities like trade, transport and other services.

The 1961 concepts of workers and non-workers have been described in the Explanatory Note to Part II. In spite of changes in the method of economic classification the 1961 pattern may be broadly compared with the livelihood pattern of 1951. In 1951, cultivators and agricultural labourers (including earning dependents) made 53·98 per cent and 23·62 per cent of the total workers, respectively. In 1961 the corresponding proportions are 52·73 per cent and 29·89 per cent. There is thus a net increase of about 5 per cent for the combined group of workers on land. The proportion of agricultural labourers has increased by more than 6 per cent. A larger proportion of population of workers which is itself 6·27 per cent higher than that of 1951 is thus working in agricultural labour. It is so because there is no alternative employment available to them.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison.

Distribution of workers by nine categories of economic activity is also shown in the Figure at page (53) for the district and each taluka separately.

Labour Participation by Age

The labour participation rates by four broad age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Aurangabad District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All Ages ..	52·91	59·76	45·79	47·91	57·09	38·10
0—14 ..	13·46	13·92	12·99	8·72	8·62	8·84
15—34 ..	83·89	92·79	75·02	74·53	87·45	60·90
35—59 ..	85·85	97·46	72·41	81·57	96·86	63·68
60+ ..	51·66	76·03	28·52	49·13	72·82	26·28

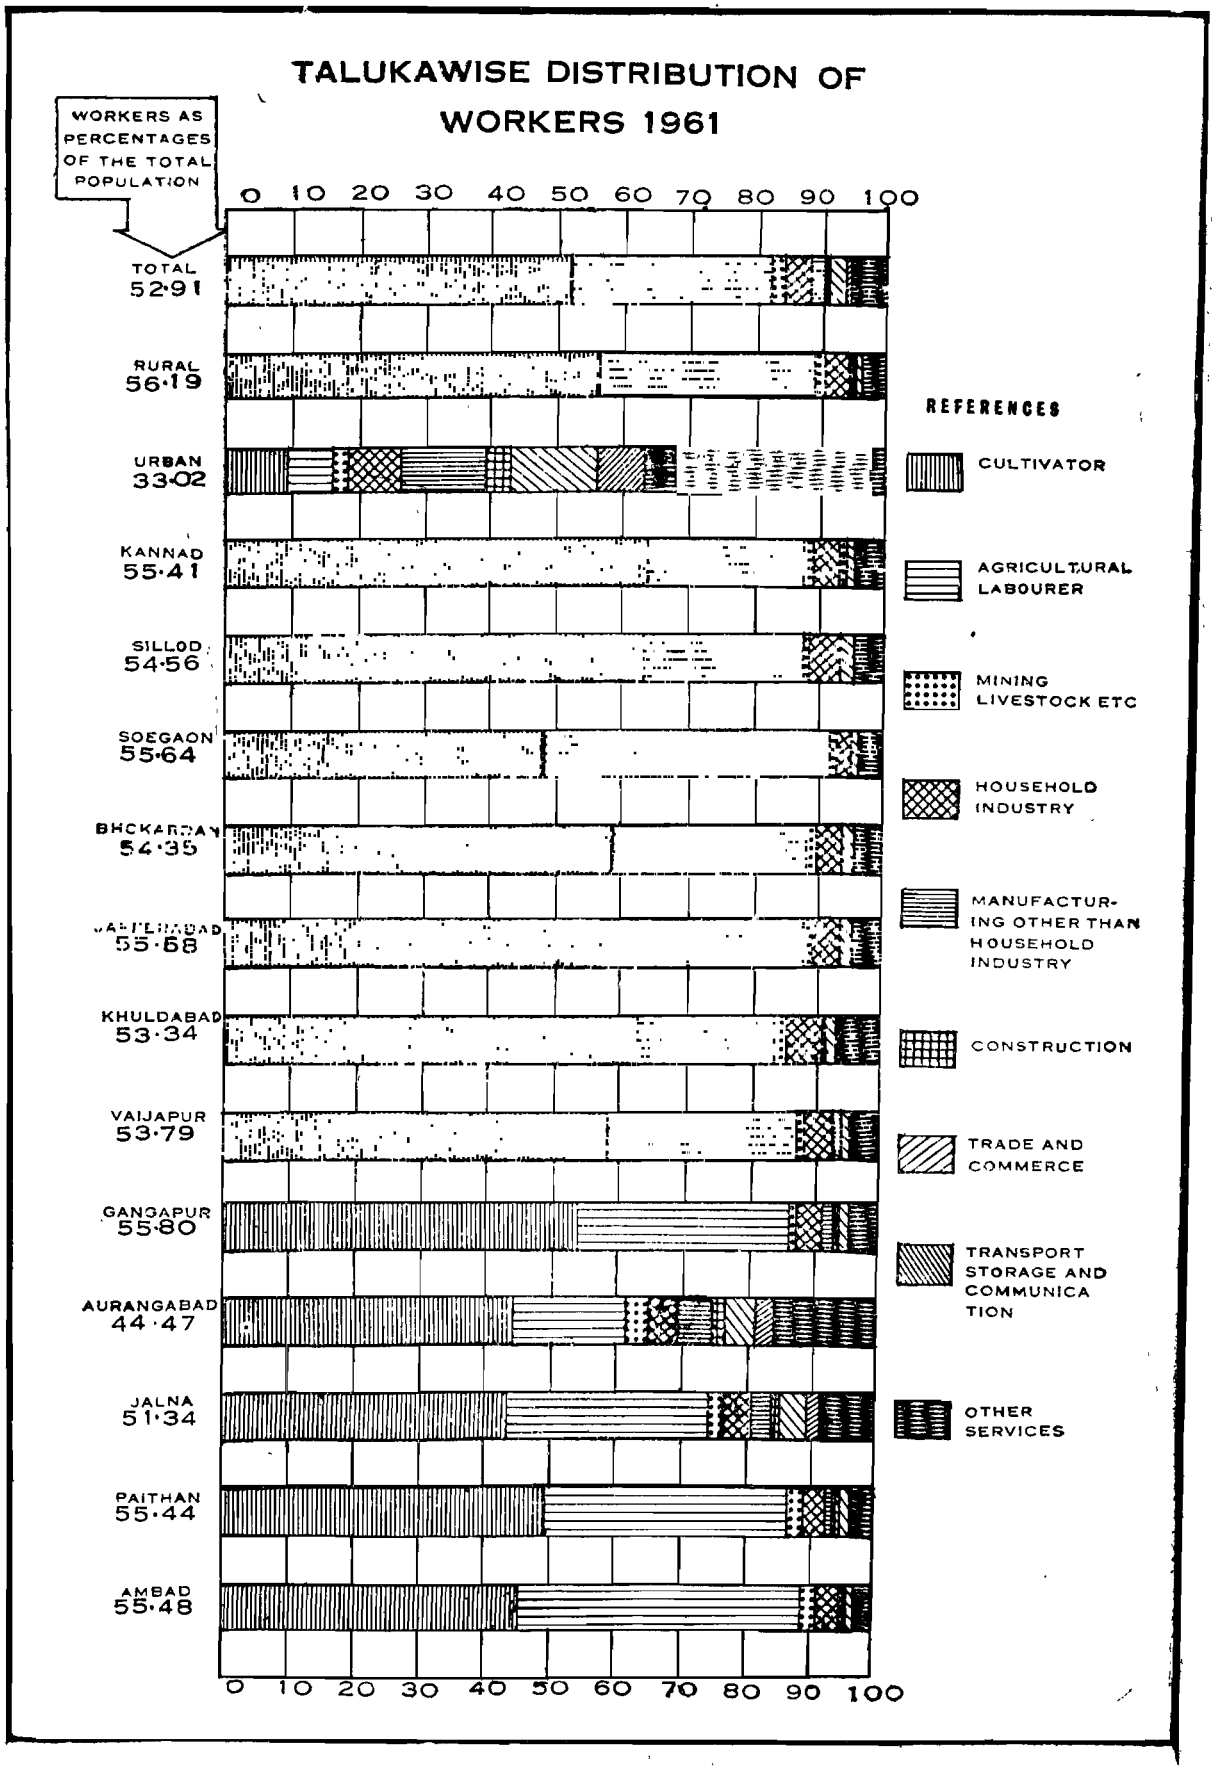

Participation rates in the district are higher than the corresponding State averages both for males and females for all age-groups. This may be an index of undeveloped economy of the district.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Aurangabad District	80·63	11·80	6·26	1·31

State/District/Taluka	I Cultivator	II Agricultural labourer	III Mining, quarrying, livestock, fishing, hunting, etc.	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and Commerce	VIII Transport, storage and communications	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA	46.11	23.80	2.16	4.39	6.88	1.24	4.52	2.36	8.54	100
AURANGABAD DISTRICT..	52.73	29.89	1.98	3.94	1.51	0.86	2.31	0.73	6.05	100
1 Kannad Taluka.. ..	64.06	23.87	1.34	4.00	0.34	0.67	1.60	0.15	3.97	100
2 Sillod Taluka	63.22	24.64	0.73	4.55	0.31	0.37	1.87	0.16	4.15	100
3 Soegaon Mahal	48.75	43.31	0.96	2.10	0.38	0.24	0.90	0.12	3.24	100
4 Bhokardan Taluka ..	59.20	29.04	1.44	4.39	0.23	0.44	1.30	0.10	3.86	100
5 Jafferabad Mahal ..	57.15	30.95	1.48	4.06	0.24	0.43	1.45	0.10	4.14	100
6 Khuldabad Mahal ..	63.44	20.62	.90	4.66	0.35	1.26	1.69	0.18	5.90	100
7 Vaijapur Taluka ..	58.73	28.55	1.51	3.53	1.17	0.50	1.57	0.39	4.05	100
8 Gangapur Taluka ..	54.94	31.23	1.74	3.52	1.87	0.84	1.35	0.45	4.06	100
9 Aurangabad Taluka ..	44.45	17.08	3.62	4.52	5.13	2.01	4.81	2.47	15.91	100
10 Jalna Taluka	43.19	31.14	2.27	4.41	3.13	1.03	4.36	2.00	8.47	100
11 Paithan Taluka	49.53	37.64	2.55	3.14	0.56	1.16	1.47	0.15	3.80	100
12 Ambad Taluka	45.29	43.42	2.24	3.27	0.30	0.53	1.39	0.13	3.43	100

MANUFACTURING OTHER THAN HOUSEHOLD INDUSTRY
CONSTRUCTION
TRADE AND COMMERCE
TRANSPORT STORAGE AND COMMUNICATION
OTHER SERVICES

Because of lower literacy rates in the district the proportion (80·63 per cent) of illiterate workers to total workers is much higher than the State average (68·65 per cent). The proportions of literates without education levels and with Primary or Matriculation levels are consequently lower than those for the State. The proportion of Matriculation and above is less than half the State average.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage of proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II :—

	Total Rural Urban	Total workers	Class of workers			
			Employers	Employees	Single workers	Family workers
Maharashtra	Total	100	3·96	62·18	26·52	7·34
	Rural	100	1·57	46·47	38·58	13·38
	Urban	100	4·98	68·90	21·37	4·75
Aurangabad District.	Total	100	1·95	44·00	43·23	10·82
	Rural	100	0·99	33·43	52·29	13·29
	Urban	100	2·92	54·60	34·14	8·34

Single workers have higher proportions in the district than the State average for total, rural and urban areas and family workers for total and urban areas only. This is a reflection of household industries, village crafts and small trading establishments dominating the scene. The proportions of employers and employees are consequently lower than the State averages.

The proportion of employees, i.e., hired workers and others in household industries in the district for total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

	Total Rural Urban	Total workers	Employees	Others
Maharashtra	Total	100	8·18	91·82
	Rural	100	4·91	95·09
	Urban	100	16·35	83·65
Aurangabad District ..	Total	100	6·52	93·48
	Rural	100	4·92	95·08
	Urban	100	14·24	85·76

Household industries in rural areas have more or less the same proportions of employees and others as those for the State. The household industries in urban areas, however, have a smaller proportion (14·24 per cent) of employees than the State average (16·35 per cent).

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

	Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work		
			I	II	IV
MAHARASHTRA	I Cultivation ..	Total ..	..	17·85	1·97
		Rural ..	..	18·03	1·98
		Urban ..	..	10·54	1·32
	II Agricultural Labour ..	Total ..	13·17	..	0·94
		Rural ..	13·46	..	0·97
		Urban ..	7·12	..	0·31
	IV Household Industry ..	Total ..	14·78	6·97	..
		Rural ..	19·61	9·38	..
		Urban ..	2·70	0·95	..
AURANGABAD DISTRICT.	I Cultivation ..	Total ..	..	12·96	1·05
		Rural ..	..	13·02	1·06
		Urban ..	..	9·35	0·89
	II Agricultural Labour ..	Total ..	7·11	..	0·81
		Rural ..	7·21	..	0·83
		Urban ..	2·53	..	0·06
	IV Household Industry ..	Total ..	7·26	4·88	..
		Rural ..	8·26	5·81	..
		Urban ..	2·41	0·38	..

Proportions of workers engaged in secondary work are lower for the district than the State averages for all the three categories.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maharashtra	Aurangabad District
0	Professional, technical and related workers.	6·42	6·99
1	Administrative, Executive and Managerial workers.	3·89	4·06
2	Clerical and related workers ..	9·13	5·55
3	Sales workers	12·23	12·42
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	12·33
5	Miners, quarrymen and related workers.	0·75	0·91
6	Workers in Transport and Communication occupations.	3·57	2·64
7 & 8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	46·21
9	Service, sport and recreation workers.	10·27	8·89
X	Workers not classifiable by occupation.	0·11	..
	Total ..	100·00	100·00

The occupational distribution of workers for the district does not much differ from that of the State. The proportions for occupational division 2 "Clerical and related workers" is very much lower and that of the workers engaged in occupation division 4 "Farmers, fishermen, etc." very much higher than the State average. Proportions of workers in occupational division 6 "Transport, etc." and in division 9 "Service, sport, recreation, etc." are lower in the district than those for the State.

Non-Workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	28·06	5·48	24·82	3·92	42·29	11·22
(2) Household duties	0·18	30·02	0·17	25·19	0·20	47·82
(3) Dependents, infants and disabled	69·53	63·77	73·74	70·21	51·04	40·03
(4) Retired, rentiers or persons of independent means.	0·75	0·41	0·39	0·40	2·34	0·46
(5) Beggars, Vagrants	0·67	0·28	0·60	0·26	0·97	0·38
(6) Inmates of institutions	0·25	0·01	0·01	..	1·32	0·03
(7) Persons seeking employment for the first time.	0·27	0·01	0·15	0·01	0·79	0·02
(8) Unemployed but seeking work..	0·29	0·02	0·12	0·01	1·05	0·04
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

There is a marked difference in the distribution pattern for non-workers among males and females. 28·06 per cent out of the male non-workers are full-time students while the corresponding proportion for females is only 5·48 per cent. The reason is that 30·02 per cent females engaged in household duties are also included as non-workers. The same trends of distribution of non-workers from males and females are found both in rural and urban areas. But a large percentage of non-workers in rural areas both for males and females is of dependents. Proportions of full-time students both for males and females are naturally higher in urban areas. The difference in the proportion of full-time students among females in rural and urban areas may not however reflect the difference in the number of school-going pupils in the two areas. The proportions are also influenced because of the inclusion of females engaged in household duties as non-workers.

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with word "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) Seventy-five per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown inroman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from census records and not as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

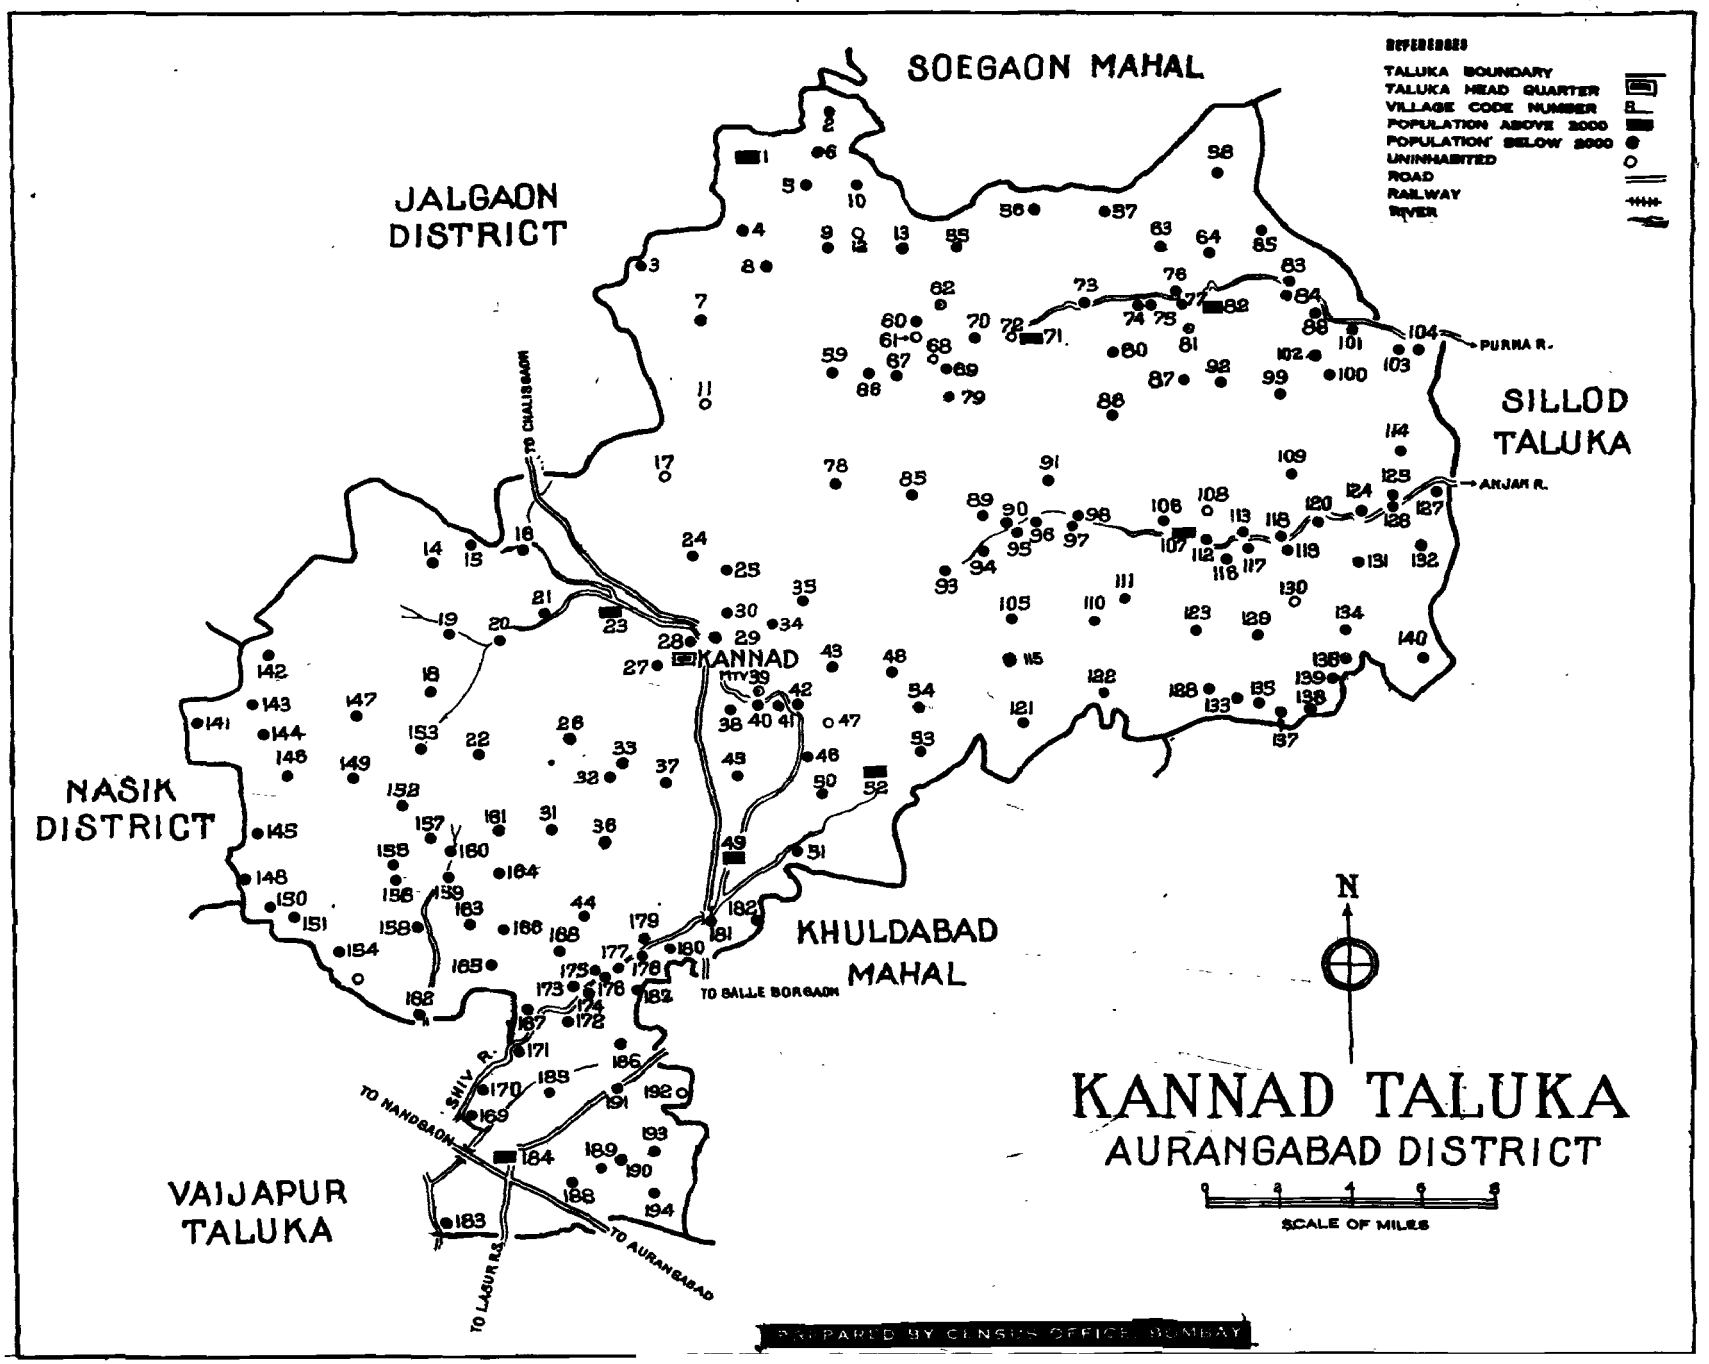

Hos *for* Hospital.

Mp *for* Medical Practitioner

In Column (8)

NA *for* Not Available.

E-II ..	Tenure status of sample census households living in census houses used as dwelling.	205
E-IV..	Distribution of sample households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof.	206
E-V ..	Sample households classified by number of members and by number of rooms occupied.	207
	Number of Establishments and Workers for Industries classified by Minor Groups of Industrial Classification.	208

EXPLANATORY NOTE

THIS PART contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Cen us and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of village or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. This shows the territorial changes that have taken place during the decade. Units which had some change in area in the decade are only shown here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, sea-shore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are : (i) less than 200 ; (ii) 200—499 ; (iii) 500—999 ; (iv) 1,000—1,999 ; (v) 2,000—4,999 ; (vi) 5,000—9,999 ; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population :

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town-group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, *i.e.*, the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The "household" is slightly different from a "family". A "household" is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A "literate" is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I. As Cultivator.
II. As Agricultural Labourer.
III. In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
IX. In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately, while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V	Manufacturing	Division 2 and 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

J-1760—II-15-A (Aura.)

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the household as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for ural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry;

(ii) engaged in cultivation only;

(iii) engaged in household industry only; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79 This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. The table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Tables C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from the household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124 This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Division 2 and 3 —Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services

Division 8—Services—*concld.*

83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations.
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market.)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld.*	
04	*Livestock and Hunting*—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying*—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs*—	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuit, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages*—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products*—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool.*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tunning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection. flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railway bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas. Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade*—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper..	661
	Retail trading in metal, procelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by see or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport*—	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing*—	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institution	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare linic as also by hakimi, unahi, ayurvedic, allopathic and homeopatnic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisation operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hair dressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individulas who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market.. ..	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c.=not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers, and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers, and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e. c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n. e. c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n. e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
X9 Workers not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note—n. e. c. = not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation,vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees.
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above.
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds, *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and foodgrains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liqour such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacutre of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco.
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date palm fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262 2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including raincoats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of waterproof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilt)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstrey filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures
284·1	Lacquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
Major Group 28—Manufacture of Wood and Wooden Products—*concld.*	
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289·4	Manufacture of other wood and allied products n.e.c.
Major Group 29—Paper and Paper Products	
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags
292·2	Papier-mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
Major Group 30— Printing and Publishing	
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work connected with book binding industry
Major Group 31—Leather and Leather Products	
310·1	Flying, processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals)
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Group 32—Rubber, Petroleum and Coal Products	
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including raincoats, oil cloths, waterproof cloths, etc.
Major Group 33—Chemicals and Chemical Products	
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335.6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
Major Group 33—Chemicals and Chemical Products —*concld.*	
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemical products n. e. c.
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal	
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346·1	Making of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment	
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods, n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*	
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n. e. c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n. e. c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
Major Group 38—Transport Equipment—*concld.*	
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n. e. c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc. n. e. c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n. e. c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

J-1760—III-31-B (Aura.)

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. " Normal rainfall " [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, viz., " Daily Rainfall of India " and " Monthly Rainfall of India."

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, riverbeds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years ;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, viz., foodcrops and non-foodcrops. Foodcrops are further grouped by " cereals, pulses and others ". Non-foodcrops are similarly shown under " oilseeds and others ".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, viz., 1950-51, 1956-57 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The " harvest price " is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

" Poultry " in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, viz., 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
