FOREWORD

THE State of Orissa represents 4·9 per cent of the area and 4·02 per cent of the population of India. Nature has been generous in providing the State with untold wealth in minerals, water, fertile land and forests. The rich alluvial soil in the deltaic areas as well as along the river basins, as also most of the uplands, are capable of producing a large variety of crops. The water-shed areas of the major rivers and hill tracts are covered with vast forests of great economic value. The State has roughly half the mineral wealth of India hidden underground awaiting exploitation. Vast quantities of water flow down the rivers which, fortunately for Orissa, are strategically dispersed over the entire State, and, if harnessed properly, will banish the twin spectre of floods and droughts haunting vast areas of culturable lands, and at the same time provide water for irrigating millions of acres in the coastal areas and upland and for generating large quantities of hydro-electric power for use in industry, and also make available hundreds of miles of irrigation-*cum*-navigation waterways for inland transport, and large areas for fish culture, recreation and tourism. These bounties of nature, the variety of picturesque landscapes and the long seacoast have attracted people from different parts of the country so that through the centuries a fine blend of human material and culture has developed. The ancient maritime achievements and the artistic stone edifices of great archaeological value stand out as symbols of the glorious past heritage.

The Census Operations during the past two decades have revealed many interesting statistical details. The Census Report of 1961 embodied in a number of Handbooks, each devoted to one of the 13 districts of the State, contains descriptive and statistical accounts intended to facilitate comprehensive study of conditions obtaining in a district as well as in the smallest village unit within it. I am happy to note that the plan and the scope of the Handbooks have been so designed as to make them useful books of reference.

The narrative account of each district covering geography, political history, population, education, economic activities, industries, agriculture and many other subjects, present a graphic picture of the district. This, along with the latest Census Tables, giving the social, economic, cultural and demographic data of the district, give an extensive array of statistical record.

A notable feature is the detailed statistics given in the Village Directory in the Handbook for each district, containing various items of information relating to each one of the 46,466 inhabited villages. They furnish very valuable information, which would provide indispensable material required by research scholars, anthropologists, social workers and people engaged in rural and regional planning.

Another feature of the District Handbooks is that they have been further enriched by inclusion of maps of the districts as well as maps of all the police stations in the district, giving location, boundary and survey and alignment of each village within a police station. Combination of the maps with the informative data will indeed be very useful and is commended as a utility publication of a high order.

I congratulate the Superintendent, Census Operations, Orissa, Shri M. Ahmed, I.A.S., and his colleagues, staff and others who have helped him in producing the Census Reports in the form of Handbooks through remarkable perseverance and zeal. These Census Reports will rank as outstanding works of public utility.

A. N. KHOSLA

Governor of Orissa

PREFACE

AMONG the many gifts of the Census of India, one is the scheme of preparation and publication of the District Census Handbook which was first introduced in 1951. The Registrar General, India recommended to State Governments that the publication of the District Census Handbooks containing the Census data of 1951 for each district of the State be undertaken by them. In response, a number of States in India undertook the printing of the Handbooks relating to their respective districts at their own cost. In Orissa, however, the printing was not undertaken for reasons possibly of financial nature, but the Census Organization completed its task of preparing manuscript volumes of all the 13 districts of the State. Apprehending that the vast amount of labour and energy spent in the preparation of the complete set of Handbooks for the State would go to waste if printing was not undertaken, the Superintendent of Census Operations took resort to the alternative of cyclostyling about 100 copies of the Handbooks of each district, a measure which ultimately turned out to be no less burdensome than printing, in view of the great bulk of the volumes. These sets were distributed to the State Government, the Central Government and to important institutions and organizations. But it was found shortly afterwards that the demand from various sources was too large to be satisfied with the available number of cyclostyled sets. It was a mistake indeed not to have printed the books.

At the commencement of the Census of 1961, the Registrar General, India recommended to all the Chief Secretaries of State Governments in India in his letter No. 27/1/60-R. G., dated the 21st November 1960 that the State Governments take into consideration the great importance of the series of detailed statistics available up to the level of village for purpose of rural and regional planning, and agree to print at their own cost the District Census Handbooks of all the districts. The matter was given full consideration and ultimately the Revenue Department in their memo. No. VC—19/61-13593-R., dated the 13th March 1962 requested the Superintendent of Census Operations, Orissa, to arrange for preparation of the Handbooks and to send the manuscripts to the Orissa Government Press for printing in due course. The compilation of the present Handbook was undertaken by the Census Organization under the circumstances.

The Handbook as now presented is more elaborate than its counterpart in 1951. The main items of its contents were laid down in the scheme of the Registrar General with a view to ensure as far as possible uniformity of subject matter to be embodied in the Handbooks of all the States in India. According to the scheme, the Handbook is divided into 3 parts. Part I contains a Chapter, namely, 'Introducing the District', which is a descriptive account of the district relating to various aspects which a reader might feel inclined to look for before he enters into the vast array of statistics that follow. Subjects, such as, history, physical features, natural calamities, communication, public health, calendar of events and a multitude of others have been dealt with in a brief but comprehensive scale, relevant for a publication of this nature. Part II of the Handbook contains a series of statistical Tables relating to 1961 Census in their great variety and details. Part III contains many official statistics obtained from various Departments of Government. Names of the Departments furnishing the informations are mentioned at the bottom of the text.

A considerable portion of this Handbook could not have been compiled but for the co-operation and assistance of the State Government and the respective Departments. The Departments concerned extended their unfailing co-operation in furnishing whatever notes or informations were required from time to time. I wish to record my appreciation and thanks for all the co-operation thus received from the Departments of the State Government, particularly from the State Gazetteer Section and the Statistical Units of the Directorates of Health, Public Instruction, Agriculture and Food Production as well as from the offices of the Chief Conservator of Forests, the Registrar of Co-operative Societies, the Director of Community Development and Panchayati Raj and the Regional Director of National Savings, Orissa. I am grateful to the Ministry of Defence, Government of India for having permitted the publication of the maps contained in this volume, and to the Registrar General, India for giving an outline of the scheme according to which the Handbook has been prepared and for giving general guidance from time to time.

I am glad to place on record my unstinted appreciation of the zeal and perseverance with which the officers of this organization contributed to the preparation of the Handbook. Many of the facts and figures embodied herein had to be built up with a great amount of diligence from raw materials, some of which were recovered by contact with the lower administrative units and some picked up and

screened from a mass of reports and annual returns lying unchecked with the top-most departmental authorities. This was entrusted to Shri Shivakinkar Das, Tabulation Officer, who completed the task with admirable resourcefulness. The compilation of the Tables in Part II entailed strenuous work on the Central Tabulation Branch of my office, headed by Shri V. Rajeshwar Rao, Deputy Superintendent, who took pains for their systematic collation and presentation. Shri Binoy Charan Mohanti, another Tabulation Officer of the Organization, was useful in examining economic, industrial and some similar aspects of the district. The text of the political history of the district has been contributed by Dr. N. K. Sahu, M. A., Ph. D., a reputed scholar on the history of Orissa. I am thankful to him for taking trouble to provide an authoritative and illuminating account of the district. Finally, I can visualize the amount of strain which will have to be undergone by the officer who may eventually remain in charge of proof reading and printing, when the stage comes. Without the sincere co-operation of all these officers and the staff under them, it would have been hardly possible to present the formidable array of statistics and many other materials of non-census and census origin which fill the pages of this volume within the scheduled time.

PART I

INTRODUCING THE DISTRICT

Contains

Notes on Location, Boundaries, Physical Features, History, Area and Population, Housing, Administration, Natural Calamities, Communications, Education, Literacy, Economic Activities, Industries, Agriculture, Irrigation, Animal Husbandry, Public Health, Community Development, Panchayati raj, Co-operation, National Savings, Places of Interest and Calendar of Important Events.

INTRODUCING THE DISTRICT—CUTTACK

LOCATION

Cuttack is one of the coastal districts of Orissa and lies between 20° 1′ N and 21° 10′ N latitudes and between 84° 58′ E and 87° 3′ E longitudes. It is bounded on the north by Balasore and Keonjhar districts, on the south by Puri district, on the west by Dhenkanal district and on the east by the Bay of Bengal. The district has been named after the name of its headquarters, the City of Cuttack.

PHYSICAL FEATURES

Topography

The district consists of three distinct tracts. The first is a marshy strip along the coast covered with low forest and wild growth of canes, reeds and brush wood and intersected by innumerable creeks which are sluggish and silty. This low land abounds in swamps and morasses and is subject to inundation of sea water and is therefore uncultivable. The second tract is a deltaic plain, stretching inland for about 40 miles, traversed by many large rivers which throw out a network of branches with twists and interlacings in all directions. It is a fertile country, though afflicted by frequent floods submerging the standing crops and sand-casting the arable lands. The third tract is a hilly region at a distance of 60 to 70 miles from the sea shore. The hills are not continuous and are small in height averaging 500 ft above the sea level. The most interesting ones are the Assia range containing a series of hills, namely, Lalitgiri with its sandal trees and Budhist antiquities; Udayagiri with its collosal image of Budha, a sacred reservoir, some ruined temples and caves; and Alamgir hills, the highest peak in the district rising to 2500 ft above the sea level and containing an old mosque nearly 300 years old.

The district has three main rivers, the Mahanadi, flowing in the south, the Brahmani at the central part and the Baitarani in the north and they throw out many distributaries sometimes re-uniting and sometimes bifurcating as they pass across the level plains. During the hot weather the upper channels of these rivers dry up and maintain thin streams, with little pools of stagnant waters for most part of their course. During the rainy season they used to overflow the banks with enormous mass of water causing havoc to countryside and the crops, but since the last decade, some relief has been caused due to partial control of flood water at the dam at Hirakud. The district has mostly two varieties of soils, namely, alluvial soil in the eastern and lateritic soil in the western region. Besides, there is a small strip of saline soil along the coast. An area of 399 sq. miles is covered with forests of northern tropical semi-evergreen type.

*Climate and rainfall

The climate of the district is characterised by a hot summer, high humidities nearly all the year round and good seasonal rainfall. The cold season from December to February is followed by the hot season from March to May. The period from June to September constitutes the south-west monsoon season and the next two months are the post-monsoon season. The period from March to May is one of steady rise in temperature. May is usually the hottest month with the mean

*Adapted from notes of Deputy Director of observatories (Climatology and Geophysics), India Meteorological Department, Poona

daily maximum temperature of 38·6° C (101·5° F) and the mean daily minimum temperature of 26·7° C (80·1° F). In the coastal parts of the district, there is some relief when the sea breeze sets in generally in the afternoons. With the onset of the monsoons early in June, day temperatures drop appreciably but the night temperatures continue as before. December is the coldest month of the year with the mean daily maximum temperature of 27·4° C (81·3° F) and the mean daily minimum temperature of 14·9° C (58·8° F). The highest maximum temperature recorded at Cuttack was 47·8° C (118·0° F) on 2-5-1957 and the lowest was 7·8° C (46·0° F) on 4-1-1923.

The average rainfall in the district is 1506·8 mm (59·32″). The rainfall generally decreases from south-east to north-west. The rainfall during the south-west monsoon months, namely, from June to September constitutes about 74 per cent of the annual rainfall of the district, July being the rainiest month. Some rainfall mostly as thunder showers is received in May and in October. The variation in the annual rainfall from year to year is not large. On an average there were 71 rainy days in a year.

Relative humidity is generally high throughout the year. The humidity in the coastal parts of the district is comparatively more than in the interior. Winds are generally light, occasionally tending to be moderate. Most of the depressions and storms originating in the Bay of Bengal in the monsoon season cross the Orissa coast and move in an westerly direction, affecting the district and causing widespread heavy rain and gusty winds.

***Geology and Economic Minerals**

The rock formations of the district are Alluvium, Laterite, Athgarh sandstone (Upper Gondwana), Dolerite, Hornblende-granite, Granophyre etc., Chromiferous ultrabasic rocks, Iron-ore series, Charnockite and Khondalite. The rock formations south of the Brahmani river comprise the Charnockite—Khondalite with associated acid intrusions. Charnockites occur in low hillocks or as minor bands in Khondalites.

The Iron-ore series sediments are intruded by Chromiferous ultrabasic rocks, Hornblende-granites and Granophyres as well as Newe Dolerite-Dykes.

A large area to the west and south west of the town of Cuttack is occupied by grits, sandstones and conglomerates with white or pink clay beds. These are known as Athgarh sandstones, the exposures being to some extent obscured by laterite and alluvium. They are bounded by laterite towards the Kuakhai river and extend beyond the district into Puri.

Laterite covers extensive areas in this district and is, at places 9 to 15 metres thick. It is porous, pitted at places, clay-like rock with red, yellow, brown, grey and mottled colours, and contains mainly the hydroxides of iron, alumina and manganese. In the case of Khondalites, laterization is rather poor, as there is much kaolinic or lithomargic material. The laterites derived from granite and granite-gneiss are lithomargic.

The solid geology of a greater portion of the district is covered with alluvium. Much of this is a recent deltaic deposit of the Mahanadi and Brahmani rivers and occupies a flat tract of country extending some 48 kilometres from the sea with the exception of a belt of low sand hills along the coast. In the northwestern part some undulating ground consists of an older alluvium containing *kankar* and pisolitic gerruginous nodules with no well defined boundary line to separate it from the inland laterite on the one hand and from the alluvium of the delta on the other.

The following minerals found in the district have a considerable economic value.

* Adapted from the notes of the Superintending Geologist, Geological Survey of India, Calcutta

Building material

All along the length of Angul-Cuttack Highway between Meramundali Railway Station and Nuapatna, medium to coarse grained Gneiss, Khondalites, Basic rocks, Charnockites, Grits, Conglomerate and Laterite are present. Khondalite has been quarried for railway ballast for many years in the past east of Haridaspur railway station. Small Charnockite outcrops west of the railway line between Jenapur and Haridaspur are also quarried for road metal and building purposes. Laterite which is extensively developed is quarried for building purposes.

Chromite

Large reserves of grey and brown, massive to friable chrome ore are present in the rocks close to the tri-junction among Cuttack, Dhenkanal and Keonjhar districts. The longest of the bodies is more than 1600 metres in length and 8 to 11 metres in thickness. The total inferred reserves of ore in this area within quarriable depths are estimated to be a few million tonnes.

Glass sands

The Athgarh sandstones at Naraj and adjacent village Talgar on the Mahanadi, include fine grained, friable varieties which are used for the manufacture of glass-ware.

Iron-ore

Large deposits of hematite associated with shale and ash beds of the Iron-ore series are found in the Daitari-Tomka ranges in Sukinda Tahsil. Sizable reserves of Float ore are also found in the Tungaisuni Champajhar area. The ore is semi-compact and porous. Bands and lenses of hematite up to a thickness of 1·5 metres are associated with banded hematite-quartzite on the north western and eastern slopes of Tomka hill. About 0·8 kilometres east of Karipadia on the northern side of the hillock, bands or lenses of hematite are associated with shale and tuff over a length of 0·8 kilometres. Sizable deposits are also found in and around the Daitari peak.

The other economic minerals of lesser impotance are magnetite, ochre and soap stone.

HISTORY

The present district of Cuttack was in ancient time a part of the territory of Kalinga which extended from the Ganges to the Godavari along the eastern coast of India. According to Mahabharata the territory of Kalinga could be reached by a route along the sea coast from the mouth of the Ganges. The epic describes the river Baitarani as a river flowing through Kalinga which, however, is wrongly interpreted by some scholars as the northern boundary of Kalinga.

King Srutayudha of Kalinga fought on the side of Duryodhana in the famous war of Kurukshetra where he was killed with his three sons by Bhima. The post-Kurukshetra War period witnessed the revival of Kalinga and we know of several kings like Sattabhu, Nalikira and Karakandu ruling over that territory before the time of Buddha.

In the 4th century B. C. Mahapadmananda killed the last of the line of 32 Kshyatriya kings who ruled over Kalinga since the Kurukshetra War. Under the Nanda rule Kalinga was a prosperous country and canals were excavated there for the first time for improvement of agriculture. Kalinga was conqured by Asoka in 361 B. C. The Kalinga War which caused great horrors and miseries to the people of Kalinga brought about great changes in the impressionable mind of Asoka and transformed him from Chandasoka to Dharmasoka. The political condition of Kalinga after Asoka remains obscure till the 1st century B. C. when that territory came under the rule of the Chedis. Kharavela the third king of the Chedi dynasty was a great ruler. He led several military campaigns all over India and extended the sphere of his influence up to Mathura in the north and Pandya country in the

south. He was a great patron of Jainism and during his rule this religion attained the highest development. During the post-Kharavela period Kalinga came under the rule of Murundas who were a foreign tribe supposed to have come over to India with the Kushans. In the middle of the 4th century A. D. Samudragupta invaded Kalinga region, but the district of Cuttack was outside the route of his campaign. The post-Samudragupta period witnessed the rise of the Matharas who ruled over Kalinga for some time. Their territory extended up to the Mahanadi in the north and the river Krishna in the south. In the 6th century A. D. the territory of Tosali comprising eastern Orissa became very powerful. This territory was divided into two parts—Uttara Tosali and Dakshina Tosali, the river Mahanadi being probably the dividing line. Early in the 7th century A. D. king Sambhuyasa unified both these units of Tosali under his sceptre. The unified Tosali passed to the hands of Sasanka, king of Karnasuvarna sometime before 620 A. D. Orissa was under the occupation of Harsavardhana by the time when the Chinese pilgrim Yuan-Chwang visited this land in 636 A. D. In 736 A. D. the Bhauma-Karas became powerful in Tosali and ruled over the territory with Viraja (modern Jajpur) as their capital. The first Bhauma king Unmattasimha alias Sivakaradeva was a devout Buddhist. He extended his territory up to Radha country in the north and Ganjam in the south. The Bhauma-Karas ruled over eastern Orissa up to the middle of the 10th century A. D. They patronised both Saivaism and Buddhism and magnificient Buddhist monuments at Ratnagiri, Udayagiri and Lalitagiri were built mostly by their patronage. The last Bhauma-Kara monarch Dharmamahadevi died without any heir to succeed her, as a result the Bhauma-Kara kingdom passed to the hands of the Somavamsis of South Kosala. King Yayati II Mahasivagupta, who obtained the Bhauma-Kara kingdom after Dharmamahadevi, succeeded in unifying Kosala and Utkala under his rule. He transferred his political headquarters from Yayatinagara on the Mahanadi to Abhinava Yayatinagar which is probably identified with modern Jajpur in Cuttack district. The Somavamsis ruled over eastern Orissa up to 1110 A. D. when Chodagangadeva invaded their territory (then called Utkala) and killed the last Somavamsi king who was probably Karnadeva. Chodagangadeva built a fort on the right bank of Kathjori river which was known after him as Sarangagarh. He also probably built a fort at Chaudwar.

The Ganga king Anangabhimadeva III (1211—1238 A. D.) built a new township at the bifurcation of Mahanadi and Kathjori and named it as Baranasi Kataka. He transferred his headquarters from Abhinava Yayatinagara (modern Jajpur) to Abhinava Baranasi Kataka which was subsequently known as Kataka (Cuttack). The Muslim chroniclers called the Ganga dominion as Jajnagar after the name of its earlier capital Abhinava Yayatinagara, even after the shifting of the capital to Baranasi Kataka. The Muslim invasion against Jajnagar started as early as 1205 A. D. during the rule of Raj Raj III father of Anangabhimadeva III. The two Khilji brothers—Mahammad-i-Shiran and Ahmed-i-Shiran invaded Jajnagar that year, but had to return without achieving anything. Anangabhimadeva III occupied western Orissa defeating the Kalchuris. He was succeeded by his son Narasimhadeva I who constructed the temple of Sun god at Konarak. When the Sultan Tughral Thughan Khan of Bengal invaded Jajnagar, Narasimhadeva not only defeated him but also marched up to the gate of his headquarters Lakhnauti. During the rule of the Ganga king Bhanudeva III (1352—1378 A. D.) Sultan Firoz Shah of Delhi invaded Orissa and took possession of Baranasi Kataka (Cuttack). The Ganga king took shelter in an island (Dhabaleswar) in the Mahanadi. Firoz Shah, however, returned to Delhi when Bhanudeva agreed to pay annual tribute which probably was never paid. Bhanudeva IV, the last Ganga king, was a weak ruler and the throne of Baranasi Kataka was usurped by his general Kapileswardeva who started the rule of the Suryavamsis in Orissa.

Kapileswardeva (1435—1467 A. D.) was a great warrior and he conquered territories up to the river Kaveri in the south. His son Purusottamdeva (1467—1497 A. D.) defeated Saluva Narasimha the king of Vijayanagar and married his daughter Rupambika. He brought as trophy of his victory the images of Sakhigopala, Ganesh and a jewelled throne from Vijayanagara. The Ratnavedi on which the images of Jagannath stand at present inside the Puri temple is supposed to be that very jewelled throne. Purusottamadeva was succeeded by his son Prataprudradeva who sustained a defeat at the hands of Krishnadev Ray king of Vijayanagar. Sri Chaitanya visited Orissa during his time and travelled various places in the present district of Cuttack. Prataprudradeva died in 1540 A. D. when his general Gobindavidyadhara usurped the throne. During his rule Jamshed Quli Qutb Shah of Golkunda invaded Orissa and took possession of the territories to the south of the Simachala hill. After Gobindavidyadhara Orissa plunged into the whirlpool of anarchy. But subsequently the general Mukunda Harichandan captured the throne of Baranasi Kataka and succeeded in bringing order out of chaos. He was a friend of the Mughal emperor Akbar and there was exchange of embassy between Delhi and Cuttack. But in 1567 when Akbar was engaged in war with Chitore, Sultan Sulaiman Khan Kararani of Bengal sent a large army under his son Bayazid against Orissa. The Muslim army advanced up to Baranasi Kataka and occupied the fort of Barabati. Ramachandra Bhanj, the commander of Sarangarh revolted against Mukundadeva and declared himself as the king of Orissa. In a battle that took place between him and Mukundadeva at Gohiratikiri, north of Jajpur, Mukundadeva died fighting. Ramachandradeva was subsequently killed by Bayazid and Orissa passed into the hands of the Afghans in 1568 A. D.

The Afghan rule in Orissa was, however, short-lived. Daud Khan the successor of Sulaiman Kararani was defeated and killed near Rajmahal by the Mughal power and Bengal and Orissa came under Akbar in 1690 A. D. Raja Mansimha finally subdued Orissa in 1592 A. D.

On 1st May, 1633, during the rule of Shah Jahan a party of English merchants headed by Kartwright came to Cuttack via Hariharpur and stayed there for a week. They did not find the place suitable for their trade. Bruton, who was a member of the party, has left an account of the stately palace of Malkandi at Cuttack which is probably the same as Manakhandi found in other accounts. The Lalbag palace at Cuttack was built in 1633. Its description is found in T. Motte's account who visited Cuttack in 1766 A. D. Close to Lalbag palace was built the Zuma Maszid in 1690 A. D. by Zaib Unnisa Khanam Shahzada Begum, wife of Ekram Khan, the then Governor of Cuttack. The Kadam Rasul of Cuttack was built in 1715 A. D. during the reign of Shah Alam Badshah. In its compound is found the grave of Mahmed Taki Khan who was once the Governor of Orissa and died in 1744 A. D.

Eastern Orissa came under the occupation of the Marathas in 1751 when Alibardhi Khan the Nazim of Bengal concluded a treaty with Raghuji Bhonsla of Nagpur, agreeing to pay annual tribute of Rs. 4 lakhs as Chauth and the revenues of the province of Cuttack to the south of the river Subarnarekha. The town of Cuttack became the headquarters of the Marathas who improved the fortification of Barabati. The English supremacy in eastern India was, however, then growing rapidly and the second half of the 18th century was marked by the cold war between the English and the Marathas for possession of Orissa. During the 2nd Anglo-Maratha war Cuttack was occupied by the English who got possession of the fort of Barabati on the 14th October, 1803. The Raja of Berar ceded Orissa to the English in the treaty of Deogaon on the 17th December, 1803. After occupation of Orissa the English reorganized the revenue administration and appointed Commissioners at Cuttack to carry out administration and Land Revenue Settlement. They experimented several systems of revenue administration till 1822-23 when a quinquinnial

system was adopted in the district of Cuttack. The early years of British rule contributed towards economic disasters and ruined the social life of the people. Many reputed aristrocratic families of Orissa were ruined and reduced to destitution, their lands being grabbed by unscrupulous proprietors from outside Orissa. In 1812 Government declared that the Cowries would no longer be received as revenue. These and other causes led to the Paik rebellion in 1817 under the leadership of Baxi Jagabandhu Vidyadhar. The rebellion, however, later on cooled down and Baxi Jagabandhu surrendered in 1825 when he was allowed to reside at Cuttack.

In 1866 a devastating famine visited Orissa and a large number of people old and young of both the sexes died of starvation and destitutes thronged in Cuttack which presented a ghastly sight. The famine took a toll of ⅓rd of the population. During the post-famine period the British authorities devoted attention towards material development of Orissa. Some progress was made in the sphere of education and the High School at Cuttack was converted into a Secondary College in 1868 although the degree classes were opened 10 years later. Cuttack General Hospital was established in 1874 and the Orissa Medical School started the next year. Towards the end of 19th century there was great intellectual resurgence in Cuttack. Early in the 20th century the Utkala Union Conference was formed by Sri Madhusudan Das for amalgamation of the Oriya speaking tracts. Later on the neo-nationalism was felt when Mahatma Gandhi appeared in the political field of India and the intellectuals of Orissa were inspired by Utkalamani Gopabandhu. In 1921-22, during the Non-co operation Movement, Cuttack witnessed the great patriotic sentiment of the people. In 1930 batches of workers led by Gopabandhu Chaudhury marched from Cuttack to Inchudi salt field to prepare contraband salt in defiance of the British authorities.

The separate province of Orissa was created on 1st April, 1936 with Cuttack as its headquarters and Sir John Huback was made the Governor. The first Congress Ministry led by Sri Biswanth Das was formed in July, 1937, but it was dissolved in October, 1939 on the issue of imperialist war. Krishna Chandra Gajapati Narayan Dev, Maharaja of Paralakhemundi formed a war-time Ministry which could not get popular support and was dissolved after a short time. An important achievement of this Ministry was the foundation of Utkal University at Cuttack. In April, 1946 Dr. Harekrushna Mahatab formed the Congress Ministry. The capital of Orissa, however, shifted to Bhubaneswar from Cuttack in 1948.

AREA AND POPULATION

Area

Cuttack district extends over an area of 4,210·0 square miles according to the estimate of the local Revenue Authorities. Neither the jurisdiction of the district nor the district boundaries have undergone any change during the decade 1951-61. The area of the district according to Surveyor General, India is 4,236 square miles. The difference of 26 square miles cannot be reconciled as the Surveyor General does not maintain the record of administrative areas below the district level. The area of the small administrative units as obtained from the local authorities are added to get the total area of the district as indicated above. This figure is adopted for the calculation of density of population and similar other purposes. The different methods of survey followed by the Surveyor General, India and the local authorities may account for the difference in the two figures.

Area of the lower units

For administrative convenience, the district is divided into four subdivisions and 32 police

stations including the City Police Station. The Table A-I of the General Population Tables gives the particulars of areas, density, villages, towns, houses, households and sexwise population of each of the administrative units. The area of each subdivision together with the number of police stations contained in it is given below :

District/Subdivision	Area in Sq. Miles	Area in Sq. Kms	No. of police stations
Cuttack District ...	4,210·0	10,903·9	32
Sadar Subdivision ...	1,562·0	4,045·6	14
Jajpur Subdivision ...	1,115·9	2,887·9	6
Kendrapara Subdivision ...	977·0	2,530·4	6
Athgarh Subdivision ...	556·0	1,440·0	6

Urban and Rural areas

The urban area of the district has increased from 36 square miles in 1951 to 45·7 square miles in 1961. Addition of two new towns during the decade has contributed to the increase in the urban area. The rural area has correspondingly declined from 4,174 square miles in 1951 to 4,164·3 square miles in 1961. The statement below gives the area of each subdivision along with the number of towns and villages contained in each :

District/Subdivision	Urban		Rural	
	Area in Sq. miles	No. of towns	Area in Sq. miles	No. of villages
Cuttack District	45·7	7	4,164·3	6,373
Sadar Subdivision	28·4	3	1,533·6	2,637
Jajpur Subdivision	9·4	2	1,105·6	1,810
Kendrapara Subdivision	3·9	1	973·1	1,299
Athgarh Subdivision	4·0	1	552·0	627

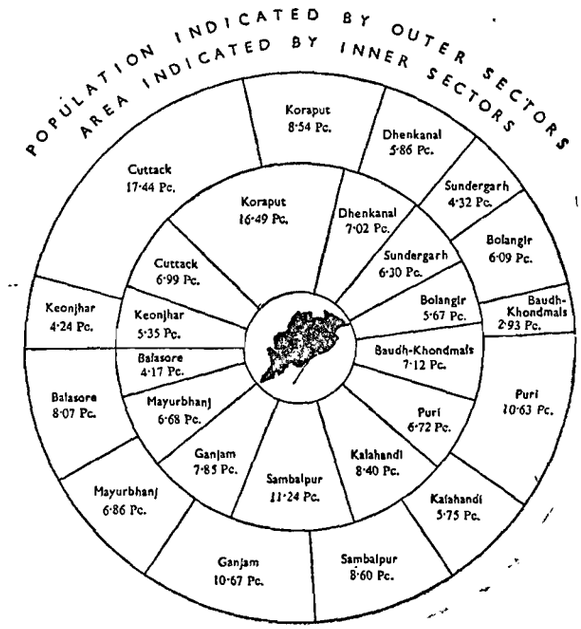

Territorial changes

The district did not have any territorial change during the decade 1951-61. Charbatia police station in Sadar subdivision was only renamed as Chowdwar Police Station during the decade.

Comparison with other districts

Cuttack district which has 6·99 per cent of State's area and 17·4 per cent of State's population is ranked seventh and first respectively among all the districts. The following diagram amplifies the size and population of the district with other districts.

PERCENTAGE OF POPULATION AND AREA OF DISTRICTS

Town

A town is a continuous group of houses inhabited usually by not less than 5,000 persons which, having regard to the character of population, the relative density of dwellings, the importance of the place as a centre of trade, administration and human associations, the Census authorities decide to treat as a town for Census purposes. One important test with regard to the character of the population is that there must be a considerable preponderance of inhabitants dependant on non-agricultural professions as means of livelihood.

Two localities, namely, Chowdwar and Jajpur Road qualified to be declared as towns in accordance with interpretation of the above definition and their inclusion increased the total number of towns to 7. The classification of the towns by population in 1961 Census with variation from 1901 is given in Table A-IV of the General Population Tables. The towns with their class sizes are, however, given below :

Class of town	Name of town	Population		
		Persons	Males	Females
I	Cuttack ...	146,308	84,960	61,348
IV	Kendrapara ...	15,830	8,082	7,748
IV	Jajpur ...	13,802	7,430	6,372
IV	Chowdwar ...	13,478	8,782	4,696
V	Athgarh ...	7,256	3,687	3,569
V	Jajpur Road ...	5,989	3,502	2,487
V	Banki ...	5,934	3,125	2,809

Village

A village means a revenue village or Mouza other than that which is absorbed within the area of a town or city. It may contain one or many groups of houses or hamlets or on the other hand contain no houses at all. The number of villages in the district which initially increased from 5,842 in 1941 to 6,248 in 1951 declined to 5,883 in 1961. The number varies from decade to decade due to various circumstances, such as, merger of small hamlets with big villages or emergence of big hamlets as independent villages. The number of uninhabited villages in the district increased from 111 in 1951 to 490 in 1961. The percentage of villages, and the percentage of population living in them by various population sizes in 1951 and 1961 are given below along with the respective figures for the State for comparative study :

Villages with population of	Census year	Cuttack		Orissa	
		Percentage of No. of villages to total No. of villages	Percentage of population to total population	Percentage of No. of villages to total No. of villages	Percentage of population to total population
Less than 500 ...	1951	74·65	43·41	84·00	51·70
	1961	64·75	31·66	77·80	41·66
500— 999 ...	1951	18·50	33·59	12·09	28·69
	1961	23·90	33·80	15·78	30·30
1,000—1,999 ...	1951	6·40	20·15	3·41	15·24
	1961	10·08	27·73	5·41	20·24
2,000—4,999 ...	1951	0·45	2·85	0·49	4·25
	1961	1·24	6·44	0·97	7·25
5,000—9,999 ...	1951	—	—	0·01	0·12
	1961	0·03	0·37	0·04	0·55

The percentage of small villages and the population living in them declined during the decade in conformity with the general downward trend noticed in the State. Although the percentage of medium sized villages with population 500 to 999 increased from 18·50 in 1951 to 23·90 in 1961, the population living in them did not grow in the same proportion. The rise in the percentage of large sized villages with population of 1,000—1,999 and 2,000—4,999 is perceptible. The increase in the percentage of population in these villages indicates growth of big villages in the district during the decade in question. Only 31·66 per cent of the total population live in small villages having population less than 500 whereas the remaining 68·34 per cent reside in medium and big sized villages having population above 500. This is an indication of the development of rural areas in the district.

Density of population

The density of 727 persons per square mile far exceeds the State average of 292 persons per square

mile. In 1951 the district had a density of 601 persons per square mile which was also higher than the then State figure of 244 persons per square mile. The increase in the density is commensurate with the growth of population during the decade. The rural and urban densities are 685 and 4,564 persons per square mile respectively. Column 4 of the Table A-I gives the density of each administrative unit in the district. The density of each police station compared with that of the district as well as that of the State is given below along with the density of 1951 :

Police stations with density above that of the district			Police stations with density below that of the district but above that of the State			Police stations with density below that of the State		
Name of PS	1951	1961	Name of PS	1951	1961	Name of PS	1951	1961

Tigiria ...	639	762						
Cuttack City ...	4,478	6,361						

Sixteen police stations of this district have recorded densities above the district average while fourteen have densities above the State average but below the district average. Two police stations, namely, Sukinda and Narsingpur are sparsely populated having densities below the State average. Cuttack City, Govindpur, Balikuda, Mahanga, Salepur and Binjharpur police stations are the most thickly populated areas of the district having densities varying from 1,108 to 6,361 persons per square mile.

Growth of Population

The statement below shows the growth of population of the district from decade to decade :

Year	Population	Percentage of variation
1901 ...	2,207,040	—
1911 ...	2,260,585	+ 2·4
1921 ...	2,198,195	— 2·8
1931 ...	2,339,243	+ 6·4
1941 ...	2,448,772	+ 4·7
1951 ...	2,529,244	+ 3·3
1961 ...	3,060,320	+21·0

The growth of population in the district was very low till the last decade. The population which was 2,207,040 in 1901 rose to 3,060,320 in 1961 having an increase of 38·66 per cent only during a period of sixty years. The decade 1901 to 1911 was not at all prosperous. Series of floods, failure of crops and outbreak of epidemics occurred leading to large scale migration of men out of the district in search of work. In 1907 Kendrapara subdivision was the worst flood affected area and in the following year the coastal area was flooded by salt water from the sea. Sadar subdivision experienced shortage of food. The effect of all these adverse conditions resulted in a small increase of population of 2·4 per cent during the decade.

The Census of 1921 showed the first decline in the number of population of the district. The first half of the decade was a period of steady prosperity in spite of seasonal floods but thereafter not only the country was in the midst of war conditions but natural calamities visited the district in succession.

The disastrous epidemic of influenza appeared in the year 1918 and lingered on for a longer period which was more than in any other district of the State. Failure of monsoon resulted in reducing stocks of foodgrain, while prices were increasing on account of war conditions. The last two years of the decade brought more severe floods and more disastrous epidemics of cholera, dysentery and fever. Scarcity of foodgrains was felt all over the district and particularly in Banki, Narsingpur and Baramba. The birth rate was severely affected as a result of repeated visits of epidemics. All these encouraged migration with the result that the population of the district in 1921 was less than in 1911 by 62,390, a loss of 2·8 per cent.

The district had a period of distress in various forms in the decade 1921-31. The aftermath of war was effectively felt in every field. There were natural calamities resulting from floods and epidemics. The number of deaths was in excess of the number of births in 1921 and although the following years were not bad, the year 1924 showed a large increase in death rate which outnumbered birth rate to the extent of 5 per thousand. In the last half of the decade, disastrous floods repeatedly visited the district necessitating extensive distribution of Taccavi loans and gratuitous relief. On the whole, this was a decade of floods and epidemics of cholera, malaria and dysentery. But in spite of all these adverse conditions, the district showed an increase of 141,048 souls, an increase of 6·4 per cent, which is the highest during last half a century. This unprecedented increase amidst adverse conditions is explained partly by the return of emigrants, particularly to Banki and Aul police stations and partly due to rapid growth of the headquarters town Cuttack.

The decade 1931-41 was one of general peace and prosperity. There was steady growth of population which increased by 109,529 or 4·7 per cent. The country had completely recovered from the effcts of the World War I and the people were engaged peacefully in agriculture, industry and other avocations. But the district was not free from adversities. Ruinous floods came in 1933, 1934, 1937, 1939 and 1940. The flood of 1937 was the highest in living memory, causing several breaches in embankments and spreading sand over cultivated lands and causing damage to crops. Other floods of the decade also caused considerable damage to crops. In the year 1936, Jajpur subdivision was subjected to the desolation of a cyclone, greatly damaging crops, while the lower regions of the district suffered from salt water flooding in 1939. There was partial failure of crop in 1933, 1937 and 1939 and the harvest of 1940 was very poor. Public health during the decade was much better than it was previously. But the district was not completely free from epidemics and diseases. Cholera was widespread, throughout the decade but was particularly destructive in the years 1932, 1935, and 1939. The most virulent attack of cholera occurred in the year 1939 when the death rate from this disease alone rose to a high figure of 4·1 per mille. Smallpox was not so active as cholera but it was extensive in 1938 and 1940, particularly in the latter year when the death rate in Cuttack town rose to 2·7 per mille from this epidemic alone. The district was also a frequent sufferer from fever, diarrhoea and dysentery. Kendrapara subdivision particularly, deteriorated during the decade as cases of fever, dysentery and diarrhoea increased highly. Jajpur and parts of Sadar subdivision also suffered extensively, particularly in the year 1936 from fever and in 1938 from dysentery and diarrhoea. In spite of these adverse conditions there was economic and general prosperity and the population grew steadily.

In the decade 1941-51 the population of the district grew by 80,472 out of which Cuttack City alone contributed to an increase of 28,214, leaving 52,258 for the rest of the district. The district had to pass through unfavourable times in various ways during the decade. There were a series of high floods in different years, namely, in 1941, 1943, 1947, 1949 and 1950. The flood of August 1943 was particularly damaging, as all the three principal rivers of the district were in spate simultaneously. The flood of 1947 was also very high which destroyed the standing winter paddy. Due to

these reasons the out turn of crop in the years 1943, 1947 and also in the year 1950 was poor. Public health was by no means good except in Athgarh subdivision where occasional outbreaks of epidemics were not only of limited scope but were also few and far between. In other subdivisions of the district, cholera took away lives year after year throughout this period. In 1943 and 1944 the death rate from cholera alone rose to 3·5 and 4·3 per mille respectively which was the highest in any district of the State. Diarrhoea and dysentery were running parallel claiming heavily at the rate of 4·3 per mille in 1941 and a little less from 1942 to 1944. The outbreak of a severe type of smallpox in 1945 came simultaneously with extensive sufferings from malaria and other fevers in that year. The death rate from fever alone rose to 16·9 per mille in this year. The lower portion of the district particularly Kendrapara subdivision, was consistently under some sort of suffering during the decade. In the Sadar, Jajpur and Kendrapara subdivisions, a number of police stations suffered from a decrease of population on account of unsatisfactory health conditions. These circumstances were responsible in checking the rate of growth of population of the district during the decade which was limited to 3·3 per cent inclusive of the considerable gain made by the City of Cuttack.

The last decade 1951-61 is a period of economic prosperity. A major part of the district was covered by the Community Development Blocks. Special measures were taken for the improvement of public health and malaria is no longer a dread. Improved methods of agriculture were adopted and marketing of agricultural produce through co-operative societies has gained momentum. Chowdwar emerged as an industrial town with the establishment of large scale industries run by Kalinga Tubes, Kalinga Industries, Orissa Textile Mills and Titaghur Paper Mills. Small Industries have developed considerably in the City of Cuttack and its neighbourhood. An Industrial Estate was established where pilot projects have been started by the State Government in co-operation with private enterprisers. Medical facilities have been extended to rural areas besides the expansion of Medical College Hospital at Cuttack. When the development schemes of the first plan period were thus running in full swing a set-back was caused by the devastating floods of 1955 which brought untold misery to the people due to the unexpected breach in the embankment known as 'Dalai Ghai'. Extensive relief measures were, however, promptly organized including the air dropping of food for the marooned people. The spread of epidemics was thereby effectively controlled. The distress caused by the floods was soon forgotten in the following years when agricultural prosperity received and the developmental activities resumed with full swing. The construction of the road bridges over Mahanadi and Birupa also commenced. An Express Highway connecting Sukinda mining area with Paradeep Port was taken up. Mining industry in Sukinda also made a good progress. Construction of Paradeep Port for export of minerals was also started. When the people were at the height of their economic pursuits, nature became revengeful by repeating the flood havocs once again in 1960. Although some damage was done to the crops it did not upset the rural economy to the detriment of population growth. Thus the agricultural advancement combined with industrial developments improved the material prosperity of the people which resulted in a satisfactory growth of population, which stood at 3,060,320, an increase of 21·0 per cent being the highest rate of growth in all Censuses conducted so far. This accelerated growth of population during the decade is phenomenal and marks the turning point in the history of population growth in this district.

The percentage increase of population in each of the police stations is given below :

Increase			
10—19·9 per cent		Above 20 per cent	
Name of PS	Percentage	Name of PS	Percentage
Sadar	16·52	Kissennagar	25·09
Salepur	16·81	Ersama	28·12
Mahanga	18·04	Tangi	25·55
Gobindpur	13·78	Chowdwar	27·00
Jagatsingpur	13·75	Jajpur	21·59

Increase			
10—19·9 per cent		Above 20 per cent	
Name of PS	Percentage	Name of PS	Percentage
Balikuda	15·92	Sukinda	31·49
Tirtol	17·16	Korai	24·78
Banki	14·25	Binjharpur	20·47
Baideswar	15·19	Kendrapara	21·46
Barchana	18·06	Mahakalpara	47·03
Dharamsala	18·88	Aul	24·35
Patamundai	19·44	Rajnagar	39·02
Patkura	16·99	Athgarh	22·52
Tigiria	19·29	Gurudijhatia	22·54
Baramba	18·86	Kanpur	21·47
		Narsingpur	23·35
		Cuttack City	42·73

None of the police stations of this district has recorded increase of population below 13 per cent. Fifteen police stations have growth varying from 13·75 to 19·44 per cent while the remaining seventeen police stations have high growth ranging between 20·47 and 47·03 per cent.

Growth of Urban Population

The following statement shows the growth of urban population from decade to decade :

Year	Persons	Decade variation	Percentage decade variation	Males	Females
1901	78,720	...	...	41,077	37,643
1911	79,882	+ 1,162	+ 1·48	41,754	38,128
1921	76,636	— 3,246	— 4·06	39,541	37,095
1931	88,556	+11,920	+15·55	47,868	40,688
1941	97,359	+ 8,803	+ 9·94	53,333	44,026
1951	136,630	+39,271	+40·34	76,056	60,574
1961	208,597	+71,967	+52·67	119,568	89,029

The period 1901 to 1941 does not show any appreciable rise in urban population. The district had only three towns, namely, Cuttack, Jajpur and Kendrapara in 1901. Till 1951 Census no new towns were added and it accounts for the slow rate of growth of urban population. The decline in the rate of growth of urban population in 1921 is partly due to the epidemic of influenza which appeared in the year 1918 and lingered for quite a long period and partly due to failure of crops. The outbreak of cholera, dysentery and fever towards the latter part of the decade 1911-21 is also to some extent responsible for the decline of urban population of the district. The spectacular growth of urban population in the decades 1941-51 and 1951-61 is to some extent due to inclusion of new towns, namely, Athgarh and Banki in 1951 and Chowdwar and Jajpur Road in 1961. The rapid growth of Cuttack City during the above two decades also accounts for the high rate of growth. The urban sex ratio is found to decline from 796 females per 1,000 in 1951 to 745 females in 1961.

Age

In 1951 Census the age tables were tabulated on 10 per cent sample basis but a departure has been made in the present Census by compiling the tables on full count basis. The sexwise population according to the broad age-groups in the district based on 1961 Census is given below :

Age-group		Persons	Percentage of district population	Males	Percentage of district population	Females	Percentage of district population
All ages	...	3,060,320	100	1,531,240	50·0	1,529,080	50·0
0—14	...	1,135,260	37·1	571,921	18·7	563,339	18·4
15—34	...	969,542	31·7	484,312	15·8	485,230	15·9
35—59	...	735,021	24·0	374,089	12·2	360,932	11·8
60+	...	218,095	7·1	99,579	3·2	118,516	3·9
Age not stated	...	2,402	0·1	1,339	0·1	1,063	N

N=Negligible

Children below 14 years constitute 37·1 per cent of the total population while persons in the working age-groups of 15—34 and 35—59 are 55·7 per cent. The persons above sixty years are 7·1 per cent and 0·1 per cent could not state their age.

Sex

The sex ratio of the district (females per 1,000 males) from 1901 to 1961 is furnished below along with that of the State for comparison :

	Cuttack			Orissa		
Year	Total	Rural	Urban	Total	Rural	Urban
1901 ...	1,068	1,074	916	1,037	1,039	967
1911 ...	1,101	1,109	913	1,056	1,058	947
1921 ...	1,160	1,169	938	1,086	1,089	963
1931 ...	1,112	1,124	850	1,067	1,071	924
1941 ...	1,084	1,096	825	1,053	1,058	914
1951 ...	1,025	1,040	796	1,022	1,029	881
1961 ...	999	1,020	745	1,001	1,015	807

The rise in the sex ratio is noticed during the period 1901 to 1921 after which the ratio manifested a downward trend from 1931 to 1961. Similar trend is observed in the rural areas. In the urban areas, however, the sex ratio has constantly shown a downward trend except in the decade 1911-21 when there was a slight rise in the sex ratio.

Marital Status

The marital status of all persons in the district by their broad age-groups is given in Table C-II of the Cultural Tables. Their proportion per 1,000 persons of each sex to general population compared with the previous censuses of 1941 and 1951 is shown below :

	Males			Females		
Marital status	1961	1951	1941	1961	1951	1941
Never married	524	442	518	397	364	341
Married	436	504	435	452	524	447
Widowed	37	54	47	148	112	212
Divorced/Separated	2	NA	NA	2	NA	NA
Unspecified	1	NA	NA	1	NA	NA

NA=Not Available

The proportion of unmarried males and females has increased from 518 in 1941 to 524 in 1961 and from 341 in 1941 to 397 in 1961 respectively. The percentage of married persons in both sexes shows fluctuations from decade to decade. During the last decade the proportion of widowed males has decreased while there is an increase in the case of widowed females. The distribution of 1,000 married persons by age-groups in each sex compared with the previous censuses of 1951 and 1941 is furnished in the statement below :

Age-group	Males			Females		
	1961	1951	1941	1961	1951	1941
0—14	2	49	7	10	87	45
15—34	382	412	408	610	464	625
35—54	447	377	438	323	330	288
55 & above	168	161	147	57	115	42
Age not stated	1	1	...	N	4	...

N=Negligible

The proportion of married persons of both the sexes in the age-group 0—14 is quite low and this indicates gradual disappearance of child marriage in this district. Among the males the highest proportion of married persons is seen in age-group 35—54 while among the females the highest proportion is noticed in age-group 15—34. The proportion of male married persons in the age-group 35—54 and 55 and above has increased during the last decade whereas it is just the reverse in case of females.

Religion

The distribution of population by religion is given in Table C-VII of the Cultural Tables. The statement below shows the distribution of 1,000 persons in all the principal religions of this district from 1941 to 1961 :

		1961	1951	1941
Hindus	...	968	967	968
Muslims	...	30	31	30
Christians	...	2	2	1
Others	...	N	N	1

N=Negligible

Birth Place		Persons	Males	Females
Persons born at place of enumeration	...	2,096,906 (68·5%)	1,359,737 (88·8%)	737,169 (48·2%)
Persons born elsewhere in the district of enumeration	...	801,261 (26·2%)	111,243 (7·3%)	690,018 (45·1%)
Persons born in other districts of the State	...	117,914 (3·8%)	36,753 (2·4%)	81,161 (5·3%)
Born in other States of India	...	32,957 (1·1%)	17,830 (1·2%)	15,127 (1·0%)
Born in countries outside India	...	5,676 (0·2%)	3,226 (0·2%)	2,450 (0·2%)
Unclassifiable	...	5,606 (0·2%)	2,451 (0·1%)	3,155 (0·2%)
	Total	3,060,320	1,531,240	1,529,080

It would appear from the above statement that 68·5 per cent of the total population are born at the place of enumeration. 88·8 per cent of the males and 48·2 per cent of the females are enumerated at their birth places which indicates that the female migrants constituting 51·8 per cent are much higher than their male counterparts who constitute only 11·2 per cent. The above analysis further discloses that 26·2 per cent of the total population are born in the district, 3·8 per cent are born in other districts of the State, 1·3 per cent are born outside the State and 0·2 per cent have not stated their birth places. 45·1 per cent of the females are born elsewhere in the district which suggests that their movement from one village to another or from one police station to another was necessitated by their marriage while economic pursuits play less significant role. 7·3 per cent of the males who are born in the district are inclusive of those born in the parental residence of their mothers. There is no variation in the percentage of the males and females coming from outside the State which indicates that they have moved with their families in pursuit of economic activities.

There is a slight increase in the proportion of Hindus during the last decade while the Muslim population has decreased a little. The proportion of Christians and those belonging to other religions has remained constant.

Migration

The movement of population within the district, from one district to another within the State and beyond the State or Country is generally necessitated by economic reasons or social ties. 'Place of birth' determines the extent of migration as will be evident from the following figures of the district. The percentages are shown in brackets below the absolute figures :

The influence of migration has considerable effect on the growth of population during the decade. Some of the police stations which have recorded high percentage of growth above 25 per cent have already been mentioned earlier. If the percentage of growth is analysed, the extent of migration in each police station could be detected,

The following statement gives an analysis for the seven police stations in the district after excluding the migrants living for more than 10 years in order to estimate percentage of population movement during the decade 1951-61 :

Name of police station	Percentage increase of population 1951-61	Percentage of migrants to total population of police stations who are born			Percentage of rural immigrants to rural population
		Within the same district	Outside the district but within the same State	Outside the State	
Mahakalpara ...	47·03	19·79	0·72	11·24	31·75
Rajnagar ...	39·02	16·87	0·23	6·22	23·32
Chowdwar ...	27·00	6·83	0·81	0·48	11·47
Sukinda ...	31·49	5·75	5·57	0·63	11·95
Ersama ...	28·12	8·77	0·18	4·13	13·07
Kissennagar ...	25·09	10·94	0·50	0·26	11·70
Tangi ...	25·55	9·19	4·15	1·10	14·45

The migrants within the district constitute the highest percentage in all the above police stations. Mahakalpara, Rajnagar and Ersama police stations show higher proportion of migrants from outside the State. Majority of migrants in these three police stations have come from West Bengal. In addition to this, quite a good number of persons from Pakistan have migrated into Mahakalpara and Rajnagar police stations.

Duration of residence usually determines the purpose of migration and the following statement shows the period of residence of all the migrants in the district :

Duration of residence	Born elsewhere in the district of enumeration		Born outside the district but within the State of enumeration		Born outside the State but within the country		Born outside the country	
	Males	Females	Males	Females	Males	Females	Males	Females
Less than 1 year ...	17,180	32,234	7,684	8,524	2,016	1,292	849	356
1— 5 years ...	32,316	146,044	11,503	17,539	3,654	4,012	757	411
6—10 years ...	19,407	127,770	6,122	12,707	5,596	4,199	580	653
11—15 years ...	15,003	100,860	3,904	13,742	2,757	2,565	527	458
16 years and over ...	20,139	260,117	5,250	26,478	3,041	2,525	351	356
Period not stated ...	7,198	22,993	2,290	2,171	766	534	162	216

The 'Unclassifiables' are omitted from the above statement due to their insignificant number. 50,972 males and 407,101 females have lived in the district for more than a decade and hence they may be regarded as semi-permanent or permanent migrants. 31,705 males and 145,329 females have stayed for periods varying between 6—10 years. Majority of the female migrants have moved consequent to their marriage besides some economic activities while majority of males are to be deemed as job migrants. 48,230 males and 168,006 females have lived for periods between 1—5 years and 27,729 males and 42,406 females for less than a year. The males with short period of residence include birth migrants (those born in the parental residence of their mothers) and students for educational purposes

while a small number might be job migrants. Majority of the females with short period of residence have the common reason of marriage while a small number might be participating in economic activities. Although marriage is the chief motive of female migration, their participation in economic activities cannot be ignored as will be evident from the occupational classification of both sexes.

The industrial classification of the migrants is given below :

	Industrial category	Born elsewhere in the district of enumeration		Born in other districts of the State		Born outside the State	
		Males	Females	Males	Females	Males	Females
I	As Cultivator ...	19,647	11,890	4,781	1,541	5,255	228
II	As Agricultural Labourer ...	7,393	16,384	2,377	1,787	717	85
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ...	1,016	1,910	947	953	104	47
IV	At Household Industry ...	3,916	25,594	1,274	3,085	576	239
V	In Manufacturing other than Household Industry ...	4,880	325	2,275	161	1,243	67
VI	In Construction ...	1,180	26	3,365	49	1,045	54
VII	In Trade and Commerce ...	3,713	4,104	984	548	764	43
VIII	In Transport, Storage and Communications ...	3,448	35	952	111	842	9
IX	In Other Services ...	24,034	21,725	9,456	2,992	2,185	489
	NON-WORKERS ...	42,016	608,025	10,342	69,934	5,099	13,866

Migrants outside the country are not included in the above statement as they constitute a small fraction. The number of non-working females far exceed the males. Female participation is noticed more in categories I, II, IV and IX while in other economic activities it is not so high.

The following statement shows the extent of in-migration and out-migration from selected States in order of their numerical importance :

State	Immigration		Emigration	
	Males	Females	Males	Females
West Bengal	9,073	7,206	Not available	
Andhra Pradesh	2,215	2,769	566	408
Bihar	2,468	2,399	4,787	2,112
Madras	887	975	Not available	
Punjab	953	645	34	19
Uttar Pradesh	616	233	Not available	
Rajasthan	385	388	2	—
Maharashtra	344	297	Not available	
Madhya Pradesh	177	55	Not available	
Assam	42	33	6,947	4,771
Outside India :				
Pakistan	3,034	2,322	Not available	
Nepal	151	86	Not available	

The immigrants from West Bengal, Pakistan, Andhra Pradesh and Bihar constitute the largest number in both the sexes. The largest number of emigrants have gone out to Assam for employment in tea gardens. Bihar also has attracted a good number of emigrants, who have presumably gone there for better economic pursuits. As the information regarding emigrants is not available for all the States, it is not possible to work out the net migration of the district.

Scheduled Tribes

A person is said to belong to a Scheduled Tribe, if he belongs to any one of the tribes specified in the Scheduled Castes and Scheduled Tribes List (Modification) Order 1956. There is no clear indication of the criterion for specifying Scheduled Tribes, but it appears that the following aspects were taken into consideration, namely, (i) tribal origin, (ii) primitive way of life and habitation in remote and less accessible areas and (iii) general backwardness. 62 tribes are notified as Scheduled for this State of whom 30 are found in this district. As the list of tribes changed from Census to

Census the variation of their total population from decade to decade is not a pure index of the growth of tribal population. In 1951 Census, there were only 42 tribes in the State. According to the Scheduled Castes and Scheduled Tribes List (Modification) Order 1956, one tribe, namely, Gorait was omitted from the 1951 list and 21 new tribes were added. The new additions are Bhottada or Dhotada, Bhumia, Bhunjia, Bhumij, Desua-Bhumij, Dharua, Didayi, Gandia, Holva, Kandha Gauda, Kol, Kotia, Lodha, Madia, Matya, Omanatya, Parenga, Pentia, Rajuar, Shabar or Lodha and Sounti. The inclusion of these new tribes has contributed to the increase of the tribal population during 1951—61.

The tribal population of the district increased from 80,194 in 1951 to 85,863 in 1961. The sex composition and the percentage to total population of the district in both the censuses are given below :

	Tribal population of the district	Percentage to total population	Males	Females
1951	80,194	3·2	41,642	38,552
1961	85,863	2·8	43,481	42,382

Although the percentage to total population decreased by 0·4 per cent the growth of Scheduled Tribe population during 1951—61 amounts to 7·1 per cent. The sex ratio has increased from 926 females per 1,000 males in 1951 to 975 females per 1,000 males in 1961.

The population of the nine major tribes of the district is furnished below with sexwise break-up :

Name of the Tribe		Persons	Males	Females
Bhumij	...	1,734	849	885
Ho	...	2,113	1,162	951
Khond, Kond or Kandha, including Nanguli Kandha and Sitha Kandha	...	4,740	2,298	2,442
Kolha	...	9,404	4,791	4,613
Lodha	...	1,013	491	522
Munda, Munda-Lohara or Munda-Mahalis	...	6,742	3,356	3,386
Santal	...	2,391	1,237	1,154
Saora, Saura, Savar or Sahara		12,549	6,448	6,101
Shabar or Lodha	...	39,505	19,637	19,868
	Total	80,191	40,269	39,922

The above tribes together constitute 93·4 per cent of the total tribal population of the district. Eight tribes of this district, namely, Bhumij, Dharua, Holva, Lodha, Matya, Pentia, Shabar or Lodha and Sounti are the new additions in the present Census.

The industrial classification of the tribal population of this district is given below :

	Industrial category		Males	Females
	Workers			
I	As Cultivator	...	10,811	1,355
II	As Agricultural Labourer	...	6,953	2,182
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	...	1,807	1,773
IV	At Household Industry	...	929	988
V	In Manufacturing other than Household Industry	...	58	8
VI	In Construction	...	59	10
VII	In Trade and Commerce	...	381	1,365
VIII	In Transport, Storage and Communications	...	288	85
IX	In Other Services	...	4,593	3,688
	Non-workers	...	17,602	30,928

Majority of the tribal workers in both the sexes are engaged in agricultural occupations and other services. The industrial classification for each of the tribes is given in Table SCT-I Part-B.

The non-workers constitute 40·5 per cent of the males and 73·0 per cent of the females. Their classification is given below :

Classification		Males	Females
Total non-workers	...	17,602	30,928
Full-time students	...	2,187	1,168
Persons seeking employment for the first time	...	48	1
Persons employed before but now out of employment and seeking work	...	10	2
Others	...	15,357	29,757

Persons seeking employment are practically negligible whereas the number of full-time students is very low compared to the total non-workers.

Majority of the males and females appear to have been engaged in household duties.

The marital status of the tribal population is furnished below :

Marital status	Age-groups							
	0—14		15—44		45+		Age not stated	
	Males	Females	Males	Females	Males	Females	Males	Females
Never married	10,263	9,666	7,497	3,113	80	48	...	...
Married	33	308	15,049	18,631	8,812	5,980	...	2
Widowed	...	2	457	736	1,215	3,809	...	...
Divorced/Separated	...	3	52	68	19	12	...	...
Unspecified	...	2	1	...	3	2	...	...

Separate information for each of the tribes is given in Table SCT-II Part B. The proportion of married persons in both the sexes is highest in the age-group 15—44 while the maximum number of widowed persons are found in the age-group 45+. The small number of married persons in the age-group 0—14 confirms the prevalence of child marriages to some extent.

Scheduled Castes

A person is said to belong to a Scheduled Caste, if he belongs to any one of the castes specified in the Scheduled Castes and Scheduled Tribes List (Modification) Order, 1956. 93 castes are notified as scheduled for this State in the said order of whom 67 castes are found in this district. As in the case of Scheduled Tribes, no definite test has been prescribed for the specification of Scheduled Castes. But it appears that originally the prevailing notion of untouchability, though now abolished and forbidden under Article 17 of the Constitution, was the guiding factor in drawing up the list of untouchables or depressed classes which is more or less equivalent to the present day Scheduled Castes. The castes having professions which involve the physical handling of dirty and putrefying matter and other so called unclean jobs, such as, skinning and tanning of hides, sweeping of streets, scavenging, etc., were grouped under this class of backward population. The objective was to confine the list to that section of population which on account of its traditional position in the society suffered from various religious and social disabilities, such as, prohibition from entry into temples or drawing water from the village wells or admission of their children into the village schools. It was recognized that the criterion of classification of such backward population should gradually change from religious or social considerations to the degree of backwardness in economic and educational spheres.

As the list of Scheduled Castes changed from Census to Census, the growth of Scheduled Caste population cannot be strictly compared. There were 92 Scheduled Castes at the time of 1951 Census. By the time 1961 Census took place, the list had been revised by the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. Seven castes, namely, Bhumij, Desua Bhumij, Dharua, Gunju or Ganju, Kumbhar, Pradhan and Sukuli from the 1951 list were omitted; two castes, namely, Mochi or Muchi and Satnami were merged with Chamar and ten castes, namely, Bhoi, Chakali, Chandhai Maru, Gorait or Korait, Kummari, Musahar, Namasudra, Sauntia (Santia), Tanla and Ujia were added to the list. These periodical alteration of the list has rendered difficult the calculation of the growth of population.

The Scheduled Caste population of the district increased from 494,460 in 1951 to 547,922

in 1961. The sex composition and the percentage of Scheduled Caste population to total population in 1951 and 1961 are given below :

	Scheduled Caste population of the district	Percentage to total population	Males	Females
1951	494,460	19·5	253,696	240,764
1961	547,922	17·9	271,982	275,940

The percentage to total population has slightly declined. But there has been an over all growth of 10·8 per cent in Scheduled Caste population during the decade which may be due to the changes in the list of Scheduled Castes. The sex ratio has increased from 949 females per 1,000 males in 1951 to 1,015 females in 1961, which indicates that the growth of females is more marked than of the males.

Thirteen castes which are numerically important in the district are listed below with their sex-wise population :

Name of Caste	Persons	Males	Females
Bagheti or Baghuti ...	6,010	3,239	2,771
Bariki ...	3,475	1,824	1,651
Bauri ...	94,408	46,299	48,109
Bhoi ...	12,139	5,952	6,187
Chamar, Mochi, Muchi or Satnami ...	18,656	9,399	9,257
Dhoba or Dhobi ...	63,033	31,130	31,903
Dom, Dombo or Duria Dom ...	5,180	2,874	2,936
Gokha ...	21,394	10,931	10,463
Haddi, Hadi or Hari ...	13,646	6,808	6,838
Kandra or Kandara ...	128,781	63,177	65,604
Kela ...	4,205	1,986	2,219
Pan or Pano ...	154,113	77,331	76,782
Tanla ...	4,743	2,297	2,446
Total	530,413	263,247	267,166

The above castes constitute 96·8 per cent of the total Scheduled Caste population. As the castewise population for the previous censuses are not available, it is not possible to indicate the increase or decrease of a particular caste during the decade.

The classification of the Scheduled Castes into nine industrial categories of workers and non-workers is given below :

	Industrial category	Males	Females
	Workers		
I	As Cultivator ...	58,390	4,505
II	As Agricultural Labourer ...	52,752	17,885
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ...	2,538	594
IV	At Household Industry ...	7,932	9,351
V	In Manufacturing other than Household Industry ...	1,268	81
VI	In Construction ...	721	38
VII	In Trade and Commerce ...	1,650	1,585
VIII	In Transport, Storage and Communications ...	1,743	59
IX	In Other Services ...	40,268	19,239
	Tanning, Currying of hides and skins ...	742	1,342
	Scavenging ...	861	237
	Non-workers	104,720	222,603

Majority of the workers in both the sexes are engaged in agricultural occupations and other services. Large number of workers in both the sexes are also found in industrial categories III, IV and VII. The industrial classification of each caste is given in Table SCT-I Part A separately for Rural and Urban areas. Number of persons engaged in unwholesome activities are also shown above.

The non-workers constitute 38·5 per cent of the males and 80·7 per cent of the females. Their broad classification is given below :

Classification ...	Males	Females
Total non-workers ...	104,720	222,603
Full-time students ...	23,815	11,566
Persons seeking employment for the first time ...	2,175	11
Persons employed before but now out of employment and seeking work ...	50	7
Others ...	78,680	211,019

10·8 per cent of the total non-workers are full-time students while 0·7 per cent are those in search

of employment. Majority of non-workers appear to be devoted to household duties.

The marital status of Scheduled Castes population by their broad age-group is shown below :

Marital status	Age-groups							
	0—14		15—34		45+		Age not stated	
	Males	Females	Males	Females	Males	Females	Males	Females
Never married	88,308	97,238	36,520	10,223	725	90	27	11
Married	204	1,268	89,217	104,308	44,702	29,556	25	14
Widowed	2	12	3,072	9,219	8,470	23,093	4	—
Divorced/Separated	—	—	377	520	192	168	—	—
Unspecified	5	29	90	138	42	53	—	—

The number of married persons in the age-group 15—44 is the highest in both sexes while maximum number of widowed persons is seen in age-group 45+. The small number of married persons in age-group 0—14 indicates the existence of child marriage in spite of all efforts to root out this evil. Details of each individual caste are given in Table SCT-II Part A.

Language

Out of 58 languages returned as mother tongue in the State, 22 languages are spoken in the district. The number of speakers of each language, sexwise, is given in Table C-V of the Cultural Tables. However, the distribution of 1,000 persons by mother-tongue compared with the proportion for the State is given in the following statement in respect of all the languages spoken in the district.

The proportion of Oriya speakers both in the rural and urban areas of the district is the highest, being much above the corresponding State average. Urdu language which is next in importance has majority of its speakers in the urban areas of the district. Bengali, Santali, Hindi and Telugu languages are next in importance. The numbers of speakers of the remaining languages are negligible.

Language	Cuttack			Orissa		
	Total	Rural	Urban	Total	Rural	Urban
Bengali	8	4	59	7	5	44
Bhumij	4	2	20	5	5	5
Chinese/Chini	N	—	N	N	N	N
English	N	N	1	N	N	1
Gujarati	N	N	5	1	N	7

N=Negligible

HOUSING

Houses in the district

For the first time in India, a housing census was conducted during 1960 which covered all the existing structures, both residential and non-residential houses. Information on items like roof and wall materials, tenure status, number of rooms per household, number of persons per room were collected. In case of factories and workshops certain data on line of production, employment, and fuel or power used were also recorded during this count. The total number of houses according to this housing census was 596,110 in the district of which 13,226 were vacant at the time of house-listing. The various uses which these houses are put to are indicated in the Table below :

	Census houses	
	Number	Percentage to total number of Census houses
Total number of Census houses ...	596,110	100·00
Census houses vacant at the time of house-listing ...	13,226	2·22
Dwelling ...	494, 256	82·91
Shop-*cum*-dwelling ...	2,883	0·49
Workshop-*cum*-dwelling ...	29,220	4·90
Hotels, sarais, tourist homes and inspection houses ...	1,079	0·18
Shops excluding eating houses	11,095	1·86
Business houses and offices ...	2,204	0·37
Factories, workshops and worksheds	2,159	0·36
Schools and other educational institutions including training classes, coaching and shop classes ...	4,922	0·83
Restaurants, sweetmeat shops and eating places ...	431	0·07
Places of entertainment and community gathering (Panchayat Ghar)	2,617	0·44
Public health and medical institutions, hospitals, health centres, doctors' clinics, dispensaries, etc.	726	0·12
Others ...	31,292	5·25

By far, the majority of houses, as in other parts of the State, is the dwelling house, Workshop-*cum*-dwellings constitute the second largest group, and the least number is that of restaurants, sweetmeat shops and eating places.

It is recorded that only 35·33 per cent of houses in urban areas are hired out on rent whereas as much as 64·67 per cent are occupied by their owners. In the rural areas, however, the percentage of rented houses is very much less being only 0·75, the balance of 99·25 being under occupation of the owners.

Density of dwellings

The total number of 494,256 dwellings in the district are spread over in rural and urban areas at 462,579 and 31,677 respectively. In every 100 square miles of area in the district, we thus come across 11,740 dwellings. The density of dwellings per 100 square miles for rural and urban areas of the district are 11,108 and 69,315 respectively.

Materials of walls and roofs

Majority of houses have mud walls and thatched roofs. Walls of mud are found in 90·1 per cent of houses in the rural areas, whereas houses with brick walls form the highest number in the urban areas constituting 44·3 per cent of total houses. Only 2·8 per cent of total houses in the rural areas have brick walls.

Similarly, roofs made of corrugated iron, zinc or other metal sheets, asbestos sheets, bricks and lime and concrete are rarely seen in the rural areas, but nearly 19·6 per cent of such houses are there in the towns. Thatched roofs with grass, leaves, reeds, wood or bamboo cover nearly 98·3 per cent of houses in the rural areas. In urban areas those are also found in large numbers their percentage being 68·9. Among other varieties of roofings, tiles and slate are used but percentage of such houses is small.

Number of rooms and persons residing per room

Houses with 3 rooms and more form the majority in the district and they constitute 43·5 per cent of total houses. About 37·4 per cent of houses have two rooms and the rest have one room. The number of persons inhabiting a room works out to 1·85 in the rural areas and 1·99 in urban areas, against the district and State averages of 1·86 and 2·08 respectively.

ADMINISTRATION

Formation of district

The district of Cuttack was formed in the year 1829, prior to which it was a part of Puri district since 1803, the year of British conquest of Orissa. It remained under the Province of Bengal till April, 1912 when it was transferred to the Province of Bihar and Orissa. It came under Orissa province with effect from 1-4-1936, the date on which the province was formed. The district had 3 subdivisions, namely, Cuttack Sadar, Kendrapara and Jajpur till 1-1-1948, when a fourth subdivision called Athgarh comprising the ex-state areas of Athgarh, Narsingpur, Tigiria and Baramba was formed and added to it. Prior to the merger of states, three villages, namely,Rachhipur, Daniabar and Khandahata of Keonjhar state were lying as enclaves in the Jajpur subdivision and they were transferred from Keonjhar district to Sukinda police station of Jajpur subdivision at the time of reconstitution of districts after merger. There was no other change in the district boundaries till the end of the decade 1951-60.

General administration

A District Magistrate and Collector, usually an officer belonging to the cadre of I. A. S., is in charge of the general administration of the district. He also looks after civil supplies management, treasury and developmental schemes within the district. He is assisted in his work by three Additional District Magistrates who generally belong to Orissa Administrative Service, Class I. There are other officers from Orissa Administrative Service Class II and Subordinate Administrative Service who are put in immediate charge of different subjects of the Collectorate and the sanctioned strength of such officers is 7 and 4 respectively. A subdivision is under the charge of a Subdivisional Officer who also belongs to Class II Administrative Service. A Subdivisional Officer is assisted by other Administrative Officers. The Administrative Officers are vested with the powers of Magistrate of the first, second or third class according to their experience. The subdivisions are divided into a number of police stations which form the lowest administrative units. The separation of judiciary from the executive having been given effect to in the district, the judicial functions of the Administrative Officers are now being discharged by Judicial Magistrates who are subordinate to the District and Sessions Judge of Cuttack-Dhenkanal Judgeship. An Additional District Magistrate (Judicial) posted at Cuttack helps the District and Sessions Judge in this work. The Judicial Magistrates are finally subordinate to the High Court, Orissa. The *sanctioned strength of the Executive and Judicial Magistrates in the four subdivisions of the district is as follows. : .

Subdivisions	No. of Judicial Magistrates	No. of Deputy Collectors and Deputy Magistrates (O. A. S.)	No. of Sub-Deputy Collectors and Sub-Deputy Magistrates (O. S. A. S.)
Cuttack Sadar	7	7	6
Jajpur	2	3	4
Kendrapara	2	2	6
Athgarh	1	1	5

The Revenue Divisional Commissioner of Central Division has jurisdiction over the district and his headquarters is at Cuttack.

Police

The police administration of the district is run by a Superintendent of Police, the post being usually held by an officer of the Indian Police Service. In 1960 there were also one Additional Superintendent of Police and three Deputy Superintendents to assist him in his work. There are 32 police stations in the district. A police station is under the charge of a senior Sub-Inspector of Police and he is assisted by other Sub-Inspectors, Assistant Sub-Inspectors and constables. The work of a number of police stations is supervised by a Circle Inspector. There

Sanctioned strength of Administrative officers quoted from the Government of Orissa Revenue Department Resolution No. 29459-III ER-75/64-R dated 8th May, 1964

is an armed police reserve at Cuttack under a sergeant-major. The total strength of the police-force in the district in 1960 was 1,446. On an average there is one police man to cater to the needs of law and order for an area of 2·91 square miles and a population of 2,116. The expenditure on District Police Establishment during 1960 was Rs. 17,13,537 on bases of which the expenditure on police per-capita works out to Rs. 0·56. The First Battalion of Orissa Military Police is stationed at Cuttack. It is under a Commandant and the total strength of the Battalion in 1960 was 805. The strength of police-force under various categories including the Orissa Military Police, First Battalion during the years 1951, 1956 and 1960 are given in a Table in Part III.

The Deputy Inspector General of Police, Central range stationed at Cuttack exercises control over the police administration of the district. The Inspector-General of Police, Orissa also holds his office at Cuttack. Various other branch offices, namely, Special Branch and Crime Branch of C.I.D., Police Wireless Branch, Vigilance Branch, etc., are also located at Cuttack which is also the headquarters of the Government Railway Police. The details of staff in these offices are given in a Table in Part III.

***Crimes and criminal justice**

During the decade 1951-60, the criminal offences reported to the courts in the district were 103,643. On an average 10,364 cases are filed each year. The number of cases reported each year, cases tried, persons acquitted, discharged or committed to the Court of Sessions are given in a Table in Part III. Majority of the crimes commited during the past decade was theft, the second highest number being burglary. Among other crimes, such as, dacoity, robbery and murder, the highest number was that of murder.

****Judiciary**

The civil justice is administered by the District and Sessions Judge who is stationed at Cuttack. He has jurisdiction over Dhenkanal district also. There are two Additional District and Sessions Judges, and 5 Subordinate Judges who are also posted at Cuttack. Including the Registrar for the District and Sessions Judge Court, there are 10 Munsifs. Five out of them are posted at Cuttack, two each at Jajpur and Kendrapara and one at Athgarh. The District Judge, Additional District Judges and Sub-Judges try civil suits up to any monetary limit, whereas the powers of the Munsif are limited to Rs. 4,000/-.

The Orissa High Court is located at Cuttack. It has four judges besides the Chief Justice.

Parliamentary and Assembly constituencies

The district has been delimited into 3 parliamentary constituencies and 24 Assembly constituencies under the Delimitation of Parliamentary and Assembly Constituencies Order, 1961. One of the Parliamentary constituencies, namely, Jajpur is reserved for a Scheduled Caste candidate and the Assembly constituencies of Cuttack Sadar, Govinpur, Salepur, Patamundai, Sukinda and Jajpur (East) are also reserved for such candidates. The last general elections for the Parliament were held in the year 1962 and that for the State Assembly in 1961.

*****Treasury**

The District Treasury at Cuttack has seven sub-treasuries under it at Athgarh, Banki, Baramba, Jajpur, Kendrapara, Narsingpur and Tigiria. All the subdivisional headquarters thus have treasuries. The banking business at the District Treasury and the sub-treasuries at Jajpur and Kendrapara are transacted by the State Bank of India. There are currency chests in the sub-treasuries at

* Notes on crimes based on Table 6·2 of Quarterly Bulletin of Statistics, June, 1961, issued by Bureau of Statistics and Economics, Orissa

** Letter No. 8200/XXIX-1/63 dated 24-12-1963 from High Court, Orissa

*** Government of Orissa, Finance Department, Notification No. Tr. A 80/62-21466F, dated 16-5-1962

Banki and Athgarh. The District Treasury is under the charge of a Treasury Officer who belongs to Orissa Finance Service (Senior Branch) and he functions under the administrative control of the Collector. The sub-treasuries are either under a full-time officer of Orissa Finance Service (Junior Branch) or under a part-time revenue officer.

Jails

The District Jail is located at Cuttack. There are sub-jails at Jajpur, Kendrapara, Banki, Athgarh and Baramba. The capacity of these jails as in December 1962 were as follows :

Cuttack District Jail	...	479
Jajpur sub-jail	...	15
Kendrapara sub-jail	...	12
Banki sub-jail	...	15
Athgarh sub-jail	...	27
Baramba sub-jail	...	16

Commercial Taxes

The highest income of the district accrues from Sales Tax. The amount exceeds even the land revenue and excise revenue. The collections during the past decade have gone up. The Sales Tax collected during 1960-61 amounted to Rs. 66·72 lakhs against Rs. 43·08 and Rs. 7·91 lakhs obtained from land revenue and excise revenue. The lowest income from Sales Tax was Rs. 34·89 lakhs during 1954-55 and the year 1958-59 recorded the highest collection of the decade, being Rs. 76·67 lakhs.

For assessment and collection of Sales Tax there are 3 circles, two of which are manned by Commercial Tax Officers and the other by an Assistant Commissioner of Commercial Taxes. The first Circle for the district was started in 1947. There are Additional Commercial Tax Officers and Assistant Commercial Tax Officers in these three circles to assist the Commercial Tax Officers and the Assistant Commissioner, Commercial Taxes who are in charge of the circles. The strength of various categories of officers in the circles were as follows ;

Circle	Strength in the year 1964			
	Assistant Commissioner Commercial Taxes	Commercial Tax Officer	Additional Commercial Tax Officer	Assistant Commercial Tax Officer
Cuttack I	1	...	4	9
Cuttack II	...	1	1	5
Cuttack III	...	1	...	6

Though the jurisdiction of Cuttack I & II circles is limited to district boundaries, Cuttack Circle III has its jurisdiction over Keonjhar district also. The Assistant Commissioner of Commercial Taxes belongs to Orissa Finance Service, Class I and the Commercial Tax Officers and Additional Commercial Tax Officers come from Orissa Finance Service (Senior Branch). The posts of Assistant Comercial Tax Officers are manned by officers from Orissa Finance Service (Junior Branch).

The Commissioner of Commercial Taxes who supervises over the working of the Department all over the State, holds his office at Cuttack which is also the headquarters of the Sales Tax Tribunal.

Stamps, Documents registered and Properties transferred

The sale-proceeds from stamps did not make much progress during the decade under report. The income in the various years from 1950-51 to 1960-61 is given in a Table in Part III. The highest annual sale of stamps in the decade was Rs.21,62,443 in the year 1952-53 against which the lowest sale was in the year 1955-56, being Rs. 12,40,338.

There are fifteen Sub-Registration offices at various places in the district. Except in the Sub-Registration offices at Tigiria and Narsingpur there are full-time Sub-Registrars in the other thirteen stations. The work in the offices at Tigiria and Narsingpur is looked after by part-time officers of the Revenue Department. One of the Additional District Magistrates of the district functions as the District Registrar. During the period 1951-60, the total number of documents registered were 761,578, the value of properties thereby transferred being Rs. 28,89,13,695. The number of

registration is, on the whole, increasing. The number of documents registered and the value of properties transferred during 1951—60 have been given in a Table in Part III.

Entertainment Tax

A Table in Part III of this Handbook shows the collections on account of Entertainment Tax during the decade under report. The revenue has been going up from year to year. There are now 8 cinema houses besides 3 open-air and touring cinemas. Out of the 8 permanent halls, 4 are in the City of Cuttack and one each at Chowdwar, Kendrapara, Jajpur and Jajpur Road.

Motor-spirit Tax

Statistics about income from Motor-spirit Tax are available from 1950-51 onwards and these are given in a Table in Part III. Income in some of the years has gone down very much whereas in others it has gone up. On the whole, there has been an increase in the revenue.

Excise Revenue

The Excise administration of the district is in charge of a Superintendent of Excise whose headquarters is at Cuttack. The Excise Commissioner who is in over-all charge of excise administration of the State also holds his office here. The excise revenue has gone down very much in the recent past. The prohibition on manufacture, possession and sale of liquor introduced in 1956 and opium rationing started since 1949-50 are responsible for decreasing the excise revenue. The annual collections are given in a Table in Part III. The highest annual collection during the past decade was Rs. 36,21,715 in the year 1951-52. The revenue during 1960-61 stood at only Rs. 7,90,801.

Land Revenue

Unlike Excise revenue, Land revenue has made good progress during the decade under report. The amount collected on this account stood at Rs. 25·97 lakhs in 1950-51. The receipts increased in subsequent years and during 1959-60 the highest collections were recorded at Rs. 53·07 lakhs. During the year 1960-61 the collections were, however, lower being Rs. 43·08 lakhs.

The Board of Revenue has its office at Cuttack. It is a single-member board and has jurisdiction all over the State with regard to general superintendence of the State revenues. The offices of the Excise Commissioner, Inspector General of Registration and Director of Survey and Settlement are attached to the office of the Board of Revenue.

Urban Local Bodies

1961 Census recorded 7 towns in the district. Out of them only 5 are covered either by Municipalities or Notified Area Councils. The towns which are without any Municipality or Notified Area Council are Athgarh and Banki. The towns which have Municipalities or Notified Area Councils are given below with their year of starting, population and number of councillors :

Name of town	Status of local bodies	Year of start	Population (1961 Census)	No. of councillors
Cuttack	Municipality	1876	146,308	28
Kendrapara	Do	1869	15,830	15
Jajpur	Do	1869	13,802	13
Chowdwar	Notified Area Council	1958	13,478	9
Jajpur Road	Do	1961	5,989	16
			195,407	

The total population covered by the urban local bodies thus stood at 195,407 which works out to 93·68 per cent of the urban population of the district and 6·39 per cent of total population of the district.

At the head of a Notified Area Council or a Municipality is a Chairman. There is also an Executive Officer to discharge the executive functions. The obligatory functions of these institutions are to look after public health including vaccination, maintenance of public tanks and wells, roads, libraries, street lighting and scavenging. The income of the local bodies accrues from taxes on holdings, carriages, etc., lighting and latrine, licence fees from pounds and municipal properties and government grants, etc.

NATURAL CALAMITIES

1770 — The great Bengal famine was grievously felt in the district resulting in considerable loss of lives.

1774-75 — Serious scarcity of foodgrains due to failure of rains

1792-93 — The last great famine of the 18th Century swept away a good fraction of the population.

1866 — The greatest of Orissa's famines called the Na'anka famine resulted in a catastrophe unparalleled in frightful sufferings and countless deaths.

1885 — There was a devastating cyclone known as *Sunia Batasa* which severely affected 45 villages in Patamundai police station.

1892 — A disastrous cyclone visited the district in November and is still remembered for its havocs and destruction by the older generation who call it as *Nagachaturthi Batasa.*

1893 — There was saline inundation in extensive parts of Rajnagar police station resulting in loss of cattle, crops and houses.

1907 — High flood in Kendrapara subdivision resulted in extensive loss of crops and houses.

1908 — Salt water from the sea flooded the coastal areas, rendering arable lands unfit for cultivation for many years.

1918 — The disastrous epidemic of influenza appeared in the district. This was combined with the failure of monsoon resulting in reduction of stocks of foodgrains while prices were increasing on account of war conditions.

1929-30 — Severe floods and disastrous epidemics of cholera, dysentery and fever affected the whole district particularly Banki, Narsingpur and Baramba. Extensive distribution of Taccavi loans and organization of gratuitous relief brought some amount of relief.

1936 — Jajpur subdivision was subjected to the desolation of a cyclone greatly damaging the crops.

1937 — The highest flood in living memory caused several breaches in embankments, spreading sand over cultivated lands and causing damage to crops.

1939 — Partial failure of crop was extensive, resulting partly from salt-water flooding. The epidemic of cholera was highly destructive. The death rate from cholera alone rose to a high figure of 4·1 per mille.

1940 — A virulent attack of smallpox resulted in large scale death particularly in Cuttack town.

1943 — The flood of August, 1943 was severely damaging when all the three principal rivers of the district were in spate simultaneously.

1944 — High death rate from cholera which appeared in a virulent form

1945 — Outbreak of a severe type of smallpox came simultaneously with extensive suffering from malaria.

1947 — High flood destroyed the standing winter paddy.

1955 — High flood and breach in Daleighai causing devastations in a very fertile region

1961 — High flood. Some low-lying areas of Cuttack town remained under water for long and on account of water-logging 74 houses were fully damaged and 3,358 houses were partly damaged.

COMMUNICATION

Roads

Among the thirteen districts of the State, Cuttack has the longest road mileage. It is also one of the two districts of the State which have highest density of road mileage. Every 100 square miles of area in Cuttack is served by 68 miles of road. The State average is 36 miles. The total road mileage of the district is 2,865 miles and one furlong which comprises 73 miles of National Highways, 32 miles and 2 furlongs of State Highways, 539 miles and 3 furlongs of District Roads, 187 miles and 4 furlongs of roads maintained by the urban local bodies and 2,033 miles of important revenue roads. Excepting the roads under the management of the local bodies and the Revenue Department, all other roads are maintained by the P. W. D. The major portion of the P. W. D. roads are under the charge of an Executive Engineer who has his headquarters at Cuttack. The remaining portion is under other Executive Engineers. The roads between the southern border of Balasore district and the Brahmani River which passes through Jajpur subdivision and those between the river Mahanadi and the southern border of Dhenkanal district which are in Athgarh and Cuttack Sadar subdivisions are under the charge of Executive Engineers whose headquarters are at Balasore and Dhenkanal respectively.

The distribution of road mileage among the urban local bodies is as follows :

		Miles	Furlongs
Cuttack Municipality	...	109	0
Jajpur Municipality	...	28	0
Kendrapara Municipality	...	29	4
Chowdwar Notified Area Council	...	21	0

The important revenue roads are maintained by the local staff of the Revenue Department.

Two of the National Highways, namely, Calcutta-Madras and Cuttack-Sambalpur pass through the district. Though during rains the road communication on the former is cut off when the rivers Brahmani, Kharasuan and Baitarani are in floods, all-weather communication is now maintained on the latter as the rivers Mahanadi and Birupa have been bridged since 1964. The only State Highway which passes through the district is the road connecting Panikoili with Champua (Keonjhar district) which runs within Jajpur subdivision. There are many district roads but on account of absence of bridges over a number of rivers and their tributaries, communication to the interior parts of the district is difficult during the rainy season.

Bus services

The State Transport Organization and Orissa Road Transport Company ply passenger service buses on all the important roads in the district. A few private buses also run on some routes of which the Cuttack Town Bus Service, Cuttack-Jagatsingpur Service and Cuttack-Tarpur service are important. Cuttack is connected now with Kendrapara and Athgarh by regular bus Services, but the services to Jajpur and Banki are interrupted during the rainy season. Many buses run between Cuttack and Bhubaneswar, the State capital and all-weather bus communication is maintained with important places of other districts like Puri, Berhampur, Baudh, Phulbani, G. Udayagiri, Dhenkanal, Sambalpur, Sundargarh, Rourkela and

Bolangir. During fair-weather period, buses run from Cuttack up to Jajpur and to Baripada *via* Balasore. Jajpur-Keonjhar Road Railway station is a busy centre from where many important bus services run to different places like Jajpur town, Keonjhar and Ranchi in Bihar State. From Kendrapara road station many buses also run to Salepur, Kendrapara, Marshaghai and other places.

Common Conveyances

Rickshaws ply in towns and in many important rural areas. Bullock-carts though still in use in remote parts which lack in good roads, are rarely found in towns. Buses and Taxis are available in important towns and at busy railheads like Kendrapara Road and Jajpur-Keonjhar Road. Cuttack town which had a large number of hackney carriages in earlier days, is the only town in the district to have still retained a few of them.

According to Police records there were as many as 2,763 motor cars, 357 motor buses and 1,044 lorries in the district on 31-12-1961.

Railways

The main Railway line from Howrah to Madras in the S. E. Railways runs through the district from north to south and serves only Jajpur and Cuttack sadar subdivisions. A branch railway line starting from Nergundi, a station on this route, also runs upto Talcher in Dhenkanal district through Cuttack Sadar and Athgarh subdivisions where there are 4 railway stations. There are 14 railway stations in the district over Howrah-Madras main line among which Cuttack is the busiest station which handled 1,545,492 passengers during 1960-61. The location of Orissa High Court and some important Government offices and institutions like S.C.B. Medical College, Ravenshaw College, etc., and various business and industrial centres at Cuttack has contributed to this heavy passenger traffic. Other important stations on the route are Kendrapara Road and Jajpur-Keonjhar Road. Apart from handling a large traffic for Jajpur subdivision, Jajpur-Keonjhar Road station is the railhead for Keonjhar district. Majority of the stations have waiting halls and only Cuttack has a refreshment room.

The total railway mileage of the district is 127 Kms which gives 1·16 Kms of railway line per 100 sq. miles of area against the state figure of 0·96 Km.

Waterways

The network of rivers in the distirict may give an impression that the district has good water communication facilities, but it is not so. The anicuts on the rivers have prevented direct communication between the lower and upper reaches. Enormous flow of water during rains and insufficient flow during summer also make communication impossible. The little communication available on the rivers Mahanadi, Brahmani and Baitarani are mostly for goods. Paradeep at the mouth of the river Mahanadi is going to be a Port and the construction is in progress. Export of iron-ores to Japan has already started from here. After the Port is complete, the State will be connected with the important places outside the country through sea.

Ferry services at various places function during the rainy season for crossing the rivers which cut off communications. In fair-weather season also a few ferries are maintained. The important among them is the one on the river Kharasuan at Khanditar on Calcutta-Madras National Highway which is run by the P. W. D. Heavy vehicles like trucks and buses are ferried here over large-sized boats.

***Posts and Telegraphs**

The Senior Superintendent of Post Offices, Cuttack Division is in charge of the Post Offices in the district. The Director of Posts and Telegraphs, Orissa Circle also holds his office at Cuttack. It is also the headquarters of the Divisional Engineer, Telegraphs.

* Based on letter No. Est.—Plg.—Misc—1/Ch 11, dated 15-7-1963 from Director, Posts and Telegraphs, Orissa

On 1-4-1951, there were only 297 Post Offices and 31 Telegraph Offices and their numbers increased to 560 and 80 respectively by 1-4-1961. 258 of the existing Post Offices offer Savings Bank facilities. There are Telephone Exchanges at Athgarh, Cuttack, Chowdwar, Jajpur and Jajpur Road. The places having Public Call Offices are Anakhia, Banki, Dharmasala, Kabirpur, Kendrapara, Kendupatna and Paradeep. All of them have extension facilities. Cuttack has the biggest Exchange in the district and it is operated on central battery having a capacity of 1,400 lines. Others are comparatively smaller ones with capacities of 25,100, 50 and 25 lines respectively in Athgarh, Chowdwar, Jajpur Road and Jajpur.

The Postal Department have a Wireless Station at Cuttack. The State Police Department also maintain such a station here and have their control grid here. The station run by the Police is not for public use.

LITERACY AND EDUCATION

Literacy

The district has 912,551 literates of whom 699,090 are males and 213,461 are females. The percentage of literacy thus works out to 29·8 comprising 22·8 males and 7·0 females as against the State averages of 17·4 per cent and 4·3 per cent respectively. The percentage of literacy in 1951 was 23·3. Thus there has been an increase in the percentage of literacy by 6·5 per cent during the decade. Among the males, the percentage of literacy is 45·7 whereas among the females it is 14·4. The corresponding figures of 1951 for males and females are 39·0 and 8·0. Among the literates 797,780 do not have any educational qualification, 85,420 have read up to primary or junior basic standard, while the remaining literates are either matriculates or have higher qualifications.

Persons belonging to the age of 4 years or less, generally do not have any chance of acquiring literacy. If such persons are excluded from the total population, the percentage of literacy for the district becomes slightly higher. The following Table compares the percentage worked out on this basis for the two censuses of 1961 and 1951 :

	Percentage of literacy		
	Persons	Males	Females
1961	34·6	26·5	8·1
1951	26·3	21·7	4·6

Thus in the Census of 1961, an improvement is noticed to the extent of 8·3 per cent in the total population above the age-group of 0—4 years.

Besides providing facilities in the usual manner for improving the literacy and educational standard of the district, an intensive adult education programme was undertaken in recent years. The scheme is run by the Education Department and Community Development Blocks. The adult literacy centres are mainly run at nights by the primary school teachers and volunteers who get a remuneration of Rs. 5/- per adult made literate during a period of six months. There has been a progressive increase in the number of adult literacy centres from year to year. The total number of such centres up to 1960-61 was 2,223 out of which 361 were run by Education Department and 1,862 were started by the Community Development Blocks.

The district being the most advanced district of Orissa has the highest percentage of literacy. The statement below gives the percentage of literacy in each subdivision and police station :

District/Subdivision/Police station		Total number of literates	Percentage of literacy
Cuttack District	...	912,551	29·8
Sadar Subdivision	...	437,979	31·2
Jajpur Subdivision	...	208,001	27·5
Kendrapara Subdivision	...	201,187	31·0
Athgarh Subdivision	...	65,384	26·4
Cuttack City PS	...	78,393	53·6
Sadar PS	...	35,625	26·6
Chowdwar PS	...	15,752	34·2
Tangi PS	...	11,751	30·0
Kissennagar PS	...	14,166	29·0
Salepur PS	...	49,639	30·2

District/Subdivision/Police station		Total number of literates	Percentage of literacy
Mahanga PS	...	25,645	28·2
Gobindpur PS	...	26,020	27·3
Jagatsingpur PS	...	56,051	30·2
Balikuda PS	...	24,642	24·5
Ersama PS	...	17,226	27·3
Tirtol PS	...	52,303	29·1
Banki PS	...	23,444	27·6
Baideswar PS	...	7,322	27·0
Jajpur PS	...	57,959	30·7
Barchana PS	...	29,208	30·2
Dharamsala PS	...	39,949	25·6
Sukinda PS	...	17,086	18·7
Korai PS	...	19,499	27·5
Binjharpur PS	...	44,300	28·8
Kendrapara PS	...	51,731	33·5
Patamundai PS	...	40,087	31·9
Patkura PS	...	44,214	30·0
Mahakalpara PS	...	14,128	29·9
Aul PS	...	37,620	30·9
Rajnagar PS	...	13,407	25·3
Athgarh PS	...	14,105	31·0
Gurudijhatia PS	...	8,340	28·9
Tigiria PS	...	7,741	22·1
Baramba PS	...	14,953	21·1
Kanpur PS	...	9,432	30·4
Narsingpur PS	...	10,813	29·9

The rate of literacy is the highest in the Sadar subdivision and lowest in the Athgarh subdivision. Of all the police stations, Cuttack City police station records the highest percentage while the percentage in the Sukinda PS is the lowest.

Literacy among Scheduled Castes and Scheduled Tribes

The Scheduled Castes and Scheduled Tribes population of this district comprise 17·9 per cent and 2·8 per cent respectively. The statement below shows the total number of literates found amongst them along with the percentage of literacy :

Caste/Tribe	Population	Total literates	Percentage of literacy
Scheduled Castes	547,922	67,701	12·4
Scheduled Tribes	85,863	7,510	8·7

The standard of literacy among both the Scheduled Castes and Scheduled Tribes is far below the district average. The standard of literacy among the Scheduled Castes is, however, higher than that of the Scheduled Tribes.

In order to improve the educational standard of the tribal people special facilities have been provided by establishment of Sevashrams and Ashram Schools. The number of such institutions stood at 49 in the year 1961. Provision has also been made for imparting free education and free supply of reading and writing materials to the students who read in these institutions. Stipends and lump grants are given to them in High Schools, Middle English Schools and Upper Primary Schools. Reading and writing materials like books, slates, pencils, etc., are also supplied to them at primary education stage. A list of Sevashrams and Ashram Schools is furnished in Part III.

Educational Institutions

The district being under direct Government administration for a long time had greater benefit of education than many of the other districts particularly the districts which formed parts of princely states before merger in 1948. There are now 10 colleges including one Medical college and a Law college, one Higher Secondary school and as many as 111 High schools. The number of Primary and M. E. schools were 4,066 and 320 respectively during 1960-61. Among the professional and special schools there are 13 Elementary Training schools, one Industrial school, 2 Industrial Training institutes including a Vocational Training Centre, two Secondary Training schools, two Engineering schools, 42 Sanskrit Tols, 5 Nursing and Dai Training Centres, 8 institutions of music and dance, one Hindi Training school, one School of physical education, two Madrassas and five training centres for subordinate medical staff. Forty-seven Sevashrams and 2 Ashram schools have also been set up for education of tribal students. There are 74 Basic schools also. The

Notes on Education based on Government of Orissa, Education Department brochure "Education in Orissa, 1962"

details of these educational institutions have been given in Part III of this Handbook. The activities under different spheres are broadly indicated below.

Primary Education

In the year 1950-51, there were 2,611 primary schools. Their number increased in the succeeding years going up to 4,066 in 1960-61 which included 43 schools specially meant for girls' education. Out of these primary schools 3,919 are recognized by the Government. Thus there is a primary school in every sq. mile of area and to 753 persons in the district. The State averages of such area and population being 2·9 square miles and 850 persons, the district can be said to have greater facilities for education at the primary stage. This improvement is no doubt due to various measures taken during the past decade for spread of primary education. During First and Second Five Year Plan periods, effective steps were taken in this direction by launching enrolment drives to attract students in greater numbers to the schools by way of providing special facilities like supply of free mid-day meals, grant of various scholarships for merit, merit-*cum*-poverty, for proficiency in arithmetic (to those who secure more than 90 per cent of marks in arithmetic) and grants for maintenance of students in hostels. Additional facilities were provided to encourage women's education, some of which were the appointment of school mothers to look after the girl students in schools, the introduction of attendance scholarships or free supply of dress for regular attendance, and appointment of lady teachers through sympathetic selection methods.

In the rural areas the Zilla Parishad and Panchayat Samitis are now responsible for management of primary education in their respective areas. In the Community Development Block areas, the Panchayat Samitis maintain primary schools, but in other places they are managed by the Zilla Parishad directly. In the towns, which have Municipalities or Notified Area Councils these institutions are maintained by them. The Government grants for primary education are made over to the Zilla Parishad and the concerned Municipality or Notified Area Council.

The scales of pay of primary school teachers, both under the Government and under non-Government management, have also been revised during 1961. According to their qualifications, primary school teachers now get pay in different grades beginning with the scale, Rs. 65—85/-, for Upper primary, Lower elementary trained or Middle English trained to the scale, Rs. 100—155/- for Matric trained teachers. In addition they also get usual dearness allowance.

Secondary Education

In the field of secondary education also, rapid progress has been made in the district during the decade under report. Against only 51 high schools and 127 middle schools existing during 1950-51, the district had by 1960-61 as many as one higher secondary school, 111 high schools and 320 middle schools. Ravenshaw Collegiate High School, located at Cuttack has been converted into a higher secondary school where the courses of study provide education up to Class XII, which is deemed equivalent to Pre-University standard. It is a Government managed institution. Commerce as an optional subject is taught in this school. The final examination is conducted by the Board of Secondary Education, Orissa.

Out of the 111 high schools existing during 1960-61, five admit only girls. Only six of these high schools are under Government management and 57 are aided by the Government. The remaining 48 are run under private management. Out of these privately managed schools, one at Cuttack is managed by the Municipality. Agriculture, as optional subject, is taught in four, commerce in one and drawing in two of these high schools. For every 37·9 square miles of area and 27,570 population in the district, we, thus, have only one high school against the State average of one high school to every 164·4 square miles and

for 47,948 persons. In the field of secondary education, the district thus appears to be served well.

Up to the 1956 Annual examination, Utkal University conducted the final examinations of the high schools. The Board of Secondary Education, Orissa took it over with effect from 1956 Supplementary examination. During 1960, 39 out of 76 high schools sent up students for the High School Certificate Examinations. The number of the students appearing in these examinations and those coming out successful between 1956 (supplementary) and 1960 (supplementary) along with the percentages of success, are given in a Table in Part III of this Handbook.

Out of the M. E. Schools, 18 are exclusively meant for girls, and 299 are recognized by the Government. The examination at the end of M. E. standard was till recently conducted by the concerned District Inspector of Schools. It has now been taken over by the Board of Secondary Education, Orissa.

To encourage secondary education, a number of merit and merit-*cum*-poverty scholarships at middle and high school stages are now given, both for boys and for girls. There are also some special facilities for the girl students. They are not required to pay any school fee up to Class VII. At the high school stage, half fees are charged from those, whose guardians pay income tax or agricultural income tax, while others continue to enjoy free studentship. Award of attendance scholarships and maintenance stipends are also there.

The scales of pay of secondary school teachers underwent a revision in 1961. They now draw pay in six different scales according to their qualifications. An Untrained Matriculate gets pay in the scale of Rs. 80—135 in Government schools and Rs. 80—125 in non-Government schools, whereas a Trained Graduate teacher draws pay in the scales Rs. 185—325 and Rs. 175—300 respectively in Government and non-Government schools.

College Education

In the matter of college education, the district has also made rapid progress during the previous decade. There were only three colleges in 1951. The district has now 10 colleges, seven of which are for general education including science. Others are a Medical College, a Law College and a Teachers' Training College all of which are located at Cuttack. Cuttack town has 7 colleges whereas the remaining three are located at Jajpur, Kendrapara and Banki. Four of the colleges are under private management and the rest are maintained by the State Government. Evening classes held in Ravenshaw College and morning classes in the Christ College provide facilities for education up to Degree standard to employees of Government and non-Government institutions. The Law College also holds its classes in the morning. Radhanath Training College, Cuttack provides education for one year leading to B. Ed. Degree of Utkal University. Attached to this Training College is a Commercial school which imparts training in shorthand and typewriting and book-keeping to matriculates for one year. S. C. B. Medical College, Cuttack admits both boys and girls for M. B. B. S. Degree and also for Post-graduate studies in different subjects of medical science. Details about these colleges are contained in a Table in Part III.

Professional and Special schools

A list of professional and special schools existing in the district is given in Table 25, list of Sevashrams and Ashram schools in Table 26 and a list of Basic schools in Table 27 in Part III. Among the various categories of professional and special schools, the Engineering schools at Cuttack and Kendrapara, Kalavikas Kendra (an institution for music and dance), School for Physical Education, Cuttack and five training centres for subordinate medical staff are important. Engineering schools admit matriculates for diploma course in civil, electrical and mechanical engineering, the last year of the course being utilized for practical training,

Kalavikas Kendra established in the year 1952 runs an academy having the status of a college which imparts training in music and dance for 6-years under Bhatkhande Sangeet Vidyapith, Lucknow. There is a research bureau to conduct research on Orissa folk dance and song and to standardise Oddissi dance and music. The Physical Training Institute which functions at Barabati Stadium, Cuttack trains matriculates for a period of nine months. Students passing out from this institution are qualified to hold posts of Physical Training Instructors in secondary schools. The training centres for subordinate medical staff are the training centres for Health Inspectors, Pharmacists, Radiographers, Laboratory Assistants and Leprosy Assistants. All of them function in the S. C. B. Medical College, Cuttack except the Leprosy Assistants Training Centre which is attached to the Leprosy Home and Hospital, Nayabazar, Cuttack.

Newspapers and Journals

As many as 78 journals and newspapers are issued from the district, majority of which are from Cuttack. Most of them are monthly journals. There are also some weekly, fortnightly and annual publications. All the daily newspapers of the State issue from Cuttack town. Only one out of them is in English and the remaining five are in Oriya. The Samaj, an Oriya daily newspaper is the oldest and has the largest circulation. A list of newspapers and journals is given in a Table in Part III.

Libraries and Reading Rooms.

A list of the important libraries and reading rooms has been given in Table 29 in Part III of this Handbook. There are many other small libraries also. Among the libraries, the important is the Kanika library in Ravenshaw College, Cuttack. It has many rare publications and the total stock of books may be about 53,000. Cuttack town has also the biggest reading room, namely, Padhihari Pathagar.

ECONOMIC ACTIVITIES

The classification of various economic activities adopted in 1951 Census has been substantially changed to facilitate collection of more comprehensive data. "Economic dependence" and "income" which were the chief criteria for classification in 1951 were given up in the present Census. According to the economic classification scheme adopted in the Census of 1961, the population has been divided into two broad classes, viz., "workers" and "non-workers". The term "workers" includes all persons working as well as the working children irrespective of their earning income.

Workers

The working population has further been grouped into nine broad industrial categories, namely, (I) As cultivator ; (II) As agricultural labourer; (III) In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities; (IV) At household industry; (V) In manufacturing other than household industry; (VI) In construction; (VII) In trade and commerce; (VIII) In transport, storage and communications and (IX) In other services.

The working population constitutes 32·9 per cent of total population comprising 885,070 males and 122,197 females. Table B-I of the General Economic Tables shows the total number of workers in each industrial category along with the break-up for each sex and broad age-group. The proportionate distribution of 1,000 persons, males and females under each industrial category in the district as well as in the State with rural and urban break-up is furnished below ;

	Category of Workers	Males Females	Cuttack Total	Cuttack Rural	Cuttack Urban	Orissa Total	Orissa Rural	Orissa Urban
	Total Population	M	1,000	1,000	1,000	1,000	1,000	1,000
		F	1,000	1,000	1,000	1,000	1,000	1,000
	Total Workers	M	578	579	568	608	610	572
		F	80	81	64	266	274	131
I	As Cultivator	M	323	349	23	363	387	42
		F	12	12	1	133	140	9
II	As Agricultural Labourer	M	74	80	6	92	98	12
		F	15	16	1	57	60	4
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	M	7	6	8	11	11	16
		F	2	3	1	4	4	5
IV	At Household Industry	M	34	33	45	33	32	34
		F	25	26	14	28	29	19
V	In Manufacturing other than Household Industry	M	15	7	110	8	2	88
		F	1	N	5	2	1	9
VI	In Construction	M	6	5	16	3	2	25
		F	N	N	N	N	N	2
VII	In Trade and Commerce	M	17	13	73	13	9	68
		F	4	4	4	4	4	11
VIII	In Transport, Storage and Communications	M	9	5	58	6	2	50
		F	N	N	2	N	N	4
IX	In Other Services	M	93	81	229	79	67	237
		F	21	20	36	38	36	68
	Non-workers	M	422	421	432	392	390	428
		F	920	919	936	734	726	869

N=Negligible

Majority of male workers in the rural areas are found concentrated in category I whereas in the urban areas majority of male workers are distributed in various other economic actitivites. The rate of participation of male workers in the rural areas in respect of categories IV, V, VI, VII, VIII and IX is above the corresponding State average. Similarly in the urban areas male workers are found concentrated in categories IV, V, VII and VIII where the rate of participation is higher than the State average. The above figures indicate the diversified economic activities of the working population of the district.

Primary, Secondary and Tertiary Sectors

The nine industrial categories of workers are classed into three sectors, viz., Primary, Secondary and Tertiary. Primary sector consists of workers in categories I and II representing the agricultural classes and workers in category III excluding those working in mines and quarries. Categories IV to VI together with those working in mines and quarries under category III and gas and electric supply of category IX form the Secondary sector. All the remaining categories, namely, VII, VIII and IX excluding the workers in gas and electricity

supply comprise the Tertiary sector. The distribution of 1,000 persons in each of these sectors for rural and urban areas of the district and the State is furnished below :

		Cuttack			Orissa		
		Total	Rural	Urban	Total	Rural	Urban
Total population	...	1,000	1,000	1,000	1,000	1,000	1,000
Primary sector	...	216	230	22	328	348	43
Secondary sector	...	41	36	109	39	34	102
Tertiary sector	...	72	61	221	70	59	230
Non-workers	...	671	673	648	563	559	625

Higher concentration of workers in the rural areas is noticed in the Primary sector whereas in the urban areas concentration of largest proportion of workers is noticed in the Tertiary sector. This signifies agricultural character of workers in the rural areas and diversified economic activities in the urban areas.

Sex ratio of workers

The sex ratio (No. of females per 1,000 males) among total workers and each industrial category of workers is furnished below for the district and the State :

			Cuttack			Orissa		
			Total	Rural	Urban	Total	Rural	Urban
	Total Workers	...	138	143	83	438	456	185
I	As Cultivator	...	36	36	28	367	368	179
II	As Agricultural Labourer	...	206	206	164	619	622	296
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	...	367	397	100	375	391	242
IV	At Household Industry	...	735	794	225	858	890	444
V	In Manufacturing other than Household Industry	...	33	32	35	181	469	79
VI	In Construction	...	14	17	4	60	61	59
VII	In Trade and Commerce	...	246	343	45	321	436	130
VIII	In Transport, Storage and Communications	...	14	6	22	53	27	69
IX	In Other Services	...	225	251	116	479	545	232

The sex ratio of the workers in category III exceeds the ratio of the State in rural areas while the sex ratio in other categories is below that of the State in both rural and urban areas. The sex ratio in category IV is the highest in the district which indicates large scale participation of females in the household industries. Sex ratio in other categories is quite low.

Classification according to ISIC and NCO

The economic classification adopted in the 1951 Census was neither a purely industrial nor purely occupational but was a combination of both. There were only 10 divisions and 88 subdivisions of industries and services. This has been given up in the present Census and tabulation of industries and occupations based on Indian Standard Industrial

Classification and National Classification of Occupations was attempted for the first time. This twofold classification, though primarily intended to secure more detailed classification of the sectors of production and services and of personal talents and skills, will also serve well to maintain comparability of the present with the past.

Indian Standard Industrial Classification

The nine broad divisions of the Indian Standard Industrial Classification more or less correspond to the nine industrial categories. The divisions, major groups and minor groups of categories III to IX are given in Tables B-IV, Parts A, B and C of the General Economic Tables. Comparative figures of their distribution per 10,000 males and 10,000 females in each division for the district and the State are furnished below separately for total and urban areas :

Division of I. S. I. C.		Cuttack		Orissa	
		Males	Females	Males	Females
All Divisions	T	10,000	10,000	10,000	10,000
	U	10,000	10,000	10,000	10,000
0 Agriculture, Livestock, Forestry, Fishing and Hunting	T	778	1,068	1,005	657
	U	163	254	248	249
1 Mining and Quarrying	T	35	85	128	151
	U	7	9	103	266
2 & 3 Manufacturing	T	2,238	4,051	2,265	3,606
	U	2,865	2,950	2,316	2,227
4 Construction	T	338	17	218	26
	U	293	13	473	153
5 Electricity, Gas, Water and Sanitary Services	T	36	1	50	2
	U	91	2	156	13
6 Trade and Commerce	T	965	810	834	537
	U	1,353	716	1,313	930
7 Transport, Storage and Communications	T	505	23	367	39
	U	1,075	274	969	366
8 Services	T	5,064	3,921	5,106	4,970
	U	4,153	5,782	4,421	5,795
9 Activities not adequately described	T	41	24	27	12
	U	...	...	1	1

T=Total U=Urban

Proportion of male workers in divisions 4, 6, 7 and 9 and in the urban areas of divisions 2 & 3, 6 and 7 is above the State average which indicates large-scale participation of male workers in different economic activities of the district. Proportion of female workers in divisions 0, 2 & 3, 6 and 9 is also above the corresponding State average.

National Classification of Occupations

Classification of workers according to divisions, groups and families of the National Classification of Occupations is given in Table B-V of the General Economic Tables. The following Table shows the proportionate distribution in each division for 10,000 males and 10,000 females together with the State figure :

Division of N. C. O.			Cuttack		Orissa	
			Males	Females	Males	Females
All Divisions	...	T	10,000	10,000	10,000	10,000
		U	10,000	10,000	10,000	10,000
0 Professional, Technical and related workers	...	T	676	150	717	106
		U	699	957	770	461
1 Administrative, Executive and Managerial workers		T	195	12	210	13
		U	349	122	353	62
2 Clerical and related workers	...	T	413	15	451	36
		U	1,298	128	1,161	354
3 Sales workers	...	T	994	798	838	527
		U	1,476	539	1,327	810
4 Farmers, Fishermen, Hunters, Loggers and related workers	...	T	762	996	1,025	668
		U	211	278	386	250
5 Miners, Quarrymen and related workers	...	T	38	5	109	107
		U	19	4	49	3
6 Workers in Transport and Communication Occupations		T	466	4	308	19
		U	911	60	729	219
7-8 Craftsmen, Production Process workers and labourers, n. e. c.	...	T	3,452	4,779	5,008	7,595
		U	3,624	5,256	3,842	6,349
9 Service, Sport and Recreation workers	...	T	1,072	1,232	833	615
		U	1,269	2,614	1,190	1,439
X Workers not classifiable by occupation	...	T	1,932	2,009	501	314
		U	144	42	193	53

T=Total U=Urban

The largest proportion of both male and female workers are found concentrated in Division 7-8. In Divisions 3, 6, 9 and X proportion of male workers is above the State average whereas higher proportion of female workers even above the corresponding State figures is noticed in Divisions 0, 3, 9 and X. Proportion of male workers in the urban areas in respect of Divisions 2, 3, 6 and 9 and that of the female workers in Divisions 0, 1, 4 and 9 is also above the corresponding State figures.

Craftsmen and Production Process Workers

The following Table shows the total number of workers in ten selected crafts, in order of their numerical importance. Their proportion to 10,000 persons of all Divisions severally for total males and females is also furnished below :

Description	Number of artisans			Proportion per 10,000		
	Total	Males	Females	Total	Males	Females
Spinners, Weavers, Knitters, Dyers and related workers ...	30,005	18,308	11,697	838	661	1,443
Millers, Bakers, Brew masters and related food and beverage workers ...	21,016	6,670	14,346	587	241	1,770
Basketry weavers and related workers ...	8,384	4,105	4,279	234	148	528
Jewellers, Goldsmiths and Silversmiths ...	7,204	7,186	18	201	260	2

Description	Number of artisans			Proportion per 10,000		
	Total	Males	Females	Total	Males	Females
Carpenters, Joiners, Cabinet makers, Coopers and related workers ...	7,092	7,092	...	198	256	...
Potters and related clay formers ...	6,154	4,243	1,911	172	153	236
Tailors, Cutters, Furriers and related workers	2,860	2,222	638	80	80	79
Blacksmiths, Hammersmiths and Forgemen ...	2,580	2,569	11	72	93	1
Sheet metal workers ...	780	777	3	22	28	N
Leather cutters, Lasters and Sewers (except gloves and garments) and related workers ...	167	158	9	5	6	1

Non-workers

All those who do not come under the nine industrial categories of workers are treated as non-workers. The non-workers constitute 67·1 per cent of the total population of the district comprising 646,170 males and 1,406,883 females. Their activities are classified into the following eight categories :

Classification of non-workers ...	Persons	Males	Females
Total non-working population ...	2,053,053	646,170	1,406,883
Full-time students ...	351,627	241,975	109,652
Household duties ...	861,400	16,287	845,113
Dependents, infants and disabled ...	819,008	373,496	445,512
Retired, rentier or independent means ...	5,305	2,985	2,320
Beggars, vagrants, etc. ...	8,912	4,732	4,180
Inmates of penal, mental and charitable institutions ...	565	521	44
Persons seeking employment for the first time ...	5,420	5,375	45
Persons employed before but now out of employment and seeking work	816	799	17

Majority of the male non-workers are those who are dependents, infants and disabled while among the females those doing household duties are the highest in number. Of the total persons doing household duties, the males number 16,287 which may not be deemed as an abnormal feature as in some households, male members look after the upkeep of the house, tend the cattle and take care of the children, when the women folk are busy in the market or go out in an economic pursuit, such as hawking of garden fruits and vegetables or eatables made at home such as *chura, muri,* etc. In few large families, some male members are not interested in finding out jobs due to their preoccupation at home which are mostly in the form of assisting the elderly members. Such members are classed as persons doing household duties.

The details of non-workers are furnished in Table B-IX.

Industrial Establishments

A comprehensive housing census was undertaken for the first time in 1960 to collect various details about different types of houses existing in the State along with their mode of construction, accommodation, etc. The most valuable of all the details so collected relates to different kinds of industrial establishments beginning from a large-sized factory to a small-scale industry carried in the household. These industries are classified according to the power used viz., factories and workshops run by (i) electricity, (ii) liquid fuel, (iii) coal, wood and bagasse, (iv) other powers and (v) no power. Statistics have also been collected to further classify these industries by size of employment viz, factory employing one person, 2—5 persons, 6—9 persons, 10—19 persons, 20—49 persons, 50—99 persons and 100 persons or more. The data so compiled are furnished in the Table E-III in Part II of this report.

The district has 31,379 houses which are used as workshops, factories or workshop-*cum*-dwellings of which 29,061 are in the rural areas, the rest being

in the urban areas. Number of factories found in the district according to power used and size of employment is furnished below :

Factories classified by power		No. of Factories
Run by electricity	...	237
Run by liquid fuel	...	318
Run by coal, wood and bagasse	...	10,652
Run by other power	...	702
Run by no power	...	19,470
Factories classified by size of employment		
Employing one person	...	14,877
Employing 2—5 persons	...	15,900
Employing 6—9 persons	...	455
Employing 10—19 persons	...	84
Employing 20—49 persons	...	33
Employing 50—99 persons	...	15
Employing 100 persons and above	...	15

There are 103 different kinds of industries in the district as per the classification made under the I. S. I. C. scheme. The following statement shows a few major industries of the district according to their numerical importance.

Name of industry	...	Total No. of establishments
Cotton weaving in hand-looms	...	5,712
Manufacture of materials from cork, bamboo, cane, leaves and other allied products	...	5,577
Manufacture of earthenware and earthen pottery	...	3,810
Manufacture of jewellery, silverware and wares using gold and other precious metals	...	3,532
Manufacture of wooden furniture and fixtures	...	2,716
Manufacture of sundry hardwares	...	1,785
Cotton spinning other than in mills	...	1,366
Production of edible fats and oils (other than hydrogenated oil)	...	703

Workers employed in Household Industries

89,129 persons in the district comprising 51,379 males and 37,750 females are employed in household industries. They constitute 2·9 per cent of the total population and 8·8 per cent of the total workers as against the State averages of 3·0 per cent and 6·9 per cent respectively. Of the total persons employed in household industries 6,541 belong to the urban areas and the rest are from the rural areas.

Small-scale Industries

The survey of the Small-scale Industries conducted by the Director of Industries in 1961, discloses that there are 498 such industries in the district of which 68 have a capital investment of Rs. 50,000 or more in each case. The break-up of these industries according to their line of production is furnished below :

Line of production		Number
Iron and steel processing industries	...	104
Wood engineering industries	...	36
Chemical and pharmaceutical industries		52
Textile industries	...	9
Printing and allied industries	...	68
Electro-chemical industries	...	3
Pottery and ceramic industries	...	20
Leather and foot wear industries	...	8
Cycle industries	...	2
Non-ferrous industries	...	107
Consumer industries	...	63
Servicing industries mechanical	...	26

Factories

Section 2(m) of the Factories Act, 1948 defines a factory as follows :

"Factory" means any premises including the precincts thereof

(*i*) Whereon ten or more workers are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) Whereon twenty or more workers are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on but does not include a mine, subject to the operation of the Mines Act (XXXV of 1952) or a railway running shed.

Section 85 of the said Act, however, authorises the State Government to declare by notification any place wherein a manufacturing process is carried on, to be a factory within the meaning of the Factories Act, although it does not fulfil the above requirement of law.

A list of such factories existing in this district in 1951 and in 1961 has been given separately. Out of 35 registered factories existing in 1951, 4 units were closed by 1961 and 97 new units started functioning during the decade, thus bringing their total number to 128 in 1961.

Supply of electricity

Electricity supplied to this district is from the Hirakud Hydroelectric Project. 36 places of this district including five towns, namely, Cuttack, Jajpur, Kendrapara, Athgarh and Chowdwar have been electrified so far. It is proposed to electrify 16 more places of the district including the town of Banki during the third plan.

Trade and Commerce

33,281 persons consisting of 26,716 males and 6,565 females are engaged in trade and commerce. They constitute 1·1 per cent of the total population. Of them, 1,443 persons are wholesale traders and 31,180 are engaged in retail trade. The remaining 658 workers carry on miscellaneous trade. Of the total wholesale traders, 1,081 are in the urban areas and the rest carry on trade in the rural areas. Out of the total retail traders 17,865 or 57·3 per cent of them deal in cereals and pulses.

The district has a total number of 14,409 shops including shop-*cum*-dwellings, restaurants, etc., out of which 10,169 are in rural areas and the remaining 4,240 are in towns.

Fairs

The main festivals observed by the people of this district are Ratha Jatra, Dola Jatra, Shivaratri, Chandan Jatra, Makar Jatra, Panasankranti, Kali Puja, Durga Puja, Raja Parba and Kartik Purnima Jatra. The Bali Jatra and Durga Puja of Cuttack are quite important and attract a large number of crowd from near by places. The main attractions in these fairs are Pala, Daskathia, Ramalila and Gotipua dance. Brass and bell-metal utensils, agricultural implements, earthenwares, bamboo-made articles and various kinds of cottage industries products including wooden furniture are generally sold and purchased in these fairs. Details about them have been furnished in Part-II.

AGRICULTURE AND IRRIGATION

Workers on land

Orissa is an agricultural State where majority of the people depend on agriculture for their livelihood. 1961 Census registers 73·8 per cent of the total workers as cultivators and agricultural labourers. The percentage of such workers in Cuttack district is slightly less, being 64·5. The lower percentage of workers on land in this district is not due to non-availability of agricultural facilities or cultivable area but because there are other profitable avenues of employment which attract a substantial portion of the working population and on account of women-folk coming in for employment in a lesser number. The following Table compares the density of population, proportion of workers on land to total workers, gross area sown per worker on land in the district with those of the State and the neighbouring districts.

State/ District	Density of population per sq. mile	Total workers	Workers on land (cultivator and agricultural labourer)	Percentage of workers working on land to total workers	Gross cropped area in acres	Gross cropped area per worker on land
Orissa	292	7,661,529	5,656,523	73·8	15,829,316	2·8
Cuttack	727	1,007,267	649,410	64·5	1,973,297	3·0
Balasore	565	453,500	360,960	79·6	1,098,606	3·0
Keonjhar	231	334,911	271,301	81·0	672,554	2·5
Dhenkanal	243	425,260	311,329	73·2	834,959	2·7
Puri	461	649,026	444,057	68·4	1,301,323	2·9

Though the percentage of workers working on land is less, gross cropped area available per worker is slightly more in the district than that in the State as a whole and other neighbouring districts except Balasore which has an equal area per worker. This is so on account of a higher percentage of area being under double and multiple cropping.

Classification of land

The total geographical area of the district is 2,694,400 acres. To the east of the district is a low lying tract having natural fertility but it is exposed to damages by sea waves and saline inundation. Much difficulty is faced in counteracting the saline action and this is usually done by scraping out the surface earth and treating the lands liberally with tamarind. Almost the whole of such land come under the ex-Zamindary area of Harishpur, Kujang, Kanika and Aul. As pressure on land in the district increased, people brought these areas under cultivation by preparing circular embankments called ring bundhs. Large herds of buffaloes can be maintained in this area as swamps and marshy lands provide sufficient fodder for them. With the gradual expansion of cultivation there is considerable diminution in the number of cattle and the area is gradually losing its importance in respect of production of milk and ghee for which it was once famous.

In the deltaic region, there is extensive irrigation system which protects the crops during droughts and enables barren lands to be brought under cultivation. In the central portion of this belt varieties of crops are raised on the lands which are periodically enriched by river silt. Along the western border and near the coast, winter rice is the only crop that is grown, as in the former tract the land is too high to receive deposits of silt and in the latter tract the silt is deprived of most of its fertilizing power by saline deposits of sea water.

The following Table gives the details of land utilization in the district for the year 1959-60 and compares them with those of the State :

		Cuttack		Orissa	
		Area in acres	Percentage to total area	Area in acres	Percentage to total area
Total geographical area		2,694,400	100	38,509,952	100
(1)	Forests	219,968	8·16	8,908,558	23·1
(2)	Barren and unculturable land	44,095	1·64	3,819,723	9·9
(3)	Land put to non-agricultural uses	208,227	7·73	3,382,753	8·8
(4)	Culturable waste	53,317	1·98	2,128,127	5·5
(5)	Permanent pastures and grazing land	142,255	5·28	1,556,709	4·0
(6)	Miscellaneous tree crops and groves	82,014	3·04	1,695,687	4·4
(7)	Current fallow	384,248	14·26	1,465,615	3·8
(8)	Other fallow lands	24,476	0·91	509,924	1·3
(9)	Net area sown	1,535,800	57·00	14,695,526	38·2
(10)	Not reporting area	...	...	347,330	1·0

There are larger areas under permanent pastures and grazing lands, current fallows and also under net area sown. In other categories, the State averages lead. It is indeed a matter of satisfaction that the percentage of area sown is greater in the district than the State average. But the percentage of area under current fallows is much greater.

The percentage of area under forests recorded by the Forest Department is slightly greater being 9·47. The principle for the demarcation of area under forests as adopted by the Forest Department is not followed in compilation of agricultural statistics. This gives rise to discrepancy in the two sets of figures.

Cropped Area

The total area sown (including area sown more than once) was 1,973,297 acres during 1959-60. This constitutes 73·24 per cent of total geographical area of the district. The cropped area comprises 1,591,450 acres or 77·58 per cent of the total area under food crops. Area under double and multiple cropping was 437,497 acres during 1959-60 which gives us 22·2 acres of such area in every 100 acres of gross cropped area. The Table below makes a comparison of gross cropped area, area sown more than once and the percentage of the latter to the former for the year 1959-60 as in the district with those of the State and the adjoining districts :

		1959-60		
		Gross cropped area (acres)	Area sown more than once (acres)	Percentage of area sown more than once to gross cropped area
Orissa	...	15,829,316	1,133,790	7·2
Cuttack	...	1,973,297	437,497	22·2
Balasore	...	1,098,606	22,600	2·1
Keonjhar	...	672,534	10,095	1·5
Dhenkanal	...	834,959	29,215	3·5
Puri	...	1,301,323	264,250	20·3

The district ranks first in the matter of possessing greater percentage of area sown more than once. The district is well-served by rivers and canals and there are also many minor irrigation projects. The percentage of area under irrigation in the district is also higher than the State average. Under these circumstances, it is expected that people in the district should go in for double and multiple cropping in a more extensive scale.

Irrigation

One of the Tables in Part III gives area under different sources of irrigation from 1952-53 to 1959-60. As in 1959-60, tanks irrigated an area of 65,000 acres and 233,000 acres of land were under canal irrigation, the balnce of 51,000 being under irrigation from wells and other sources. There are many minor irrigation projects out of which those with ayacut area of 100 acres or more number 51. A list of such projects has been given in a Table in Part III. The main canal systems in the district are under Delta Irrigation Scheme and Orissa canals. Orissa canals were put into use in 1865 whereas Delta Irrigation came in during 1956-57.

The following Table makes a comparison of irrigated area to net area sown :

		1959-60		
		Net area sown (acres)	Area under irrigation (acres)	Percentage of irrigated area to net area sown
Orissa	...	14,695,526	2,409,667	16·4
Cuttack	...	1,535,800	349,000	22·7
Balasore	...	1,076,006	93,059	8·6
Keonjhar	...	662,459	32,271	4·9
Dhenkanal	...	805,744	214,059	26·6
Puri	...	1,037,073	275,793	26·6

Cropping Pattern

The relative importance of crops in the district will be clear from the figures of area under cultivation recorded for the year 1959-60 as follows :

Crops	Cuttack		Orissa	
	Gross cropped area in acres	Percentage to gross cropped area	Gross cropped area in acres	Percentage to gross cropped area
Paddy	1,316,900	66·7	9,907,301	62·6
Wheat	2,900	0·1	20,640	0·1
Ragi	1,400	0·1	188,721	1·2
Maize	4,800	0·2	86,210	0·6
Kulthi	15,000	0·8	288,681	1·8
Greengram	175,000	8·9	432,518	2·7
Gram	2,500	0·1	70,558	0·5
Redgram	1,425	0·1	114,803	0·7
Sugar-cane	8,085	0·4	66,318	0·4
Groundnut	7,150	0·4	130,536	0·8
Rape	9,800	0·5	213,611	1·4
Sesamum	15,400	0·8	252,325	1·6
Other crops	412,937	20·9	4,057,094	25·6
Total	1,973,297	100·0	15,829,316	100·0

The above Table compares the area under different crops of the district with those of the State. Out of the total cropped area of 1,973,297 acres, cereals were grown on 1,331,915 acres and pulses on 198,925 acres during 1959-60. The total area under food-grains was thus 1,530,840 acres. Among cereal crops, paddy occupies the highest position. In common with other parts of the State, cultivation of paddy receives greater attention in the district. The percentage of such area is even greater than the State average. A large area is given to cultivation of greengram in the district, though this crop is not so much important in the cropping pattern of the State as a whole.

Production rates

A Table has been given in Part III to show the yield rates of various crops in different years from 1951-52 to 1959-60. Production of paddy per acre of land during 1959-60 was 769·52 lbs. Three varieties of paddy, namely, Autumn, Winter and Summer are grown in this district, largest area being given to cultivation of winter paddy.

Sowing and Harvesting seasons

The sowing and harvesting periods of paddy and a few other crops are as follows :

Crops	Month of sowing	Month of harvesting
Rice		
(a) Autumn	April-May	August-September
(b) Winter	May-June	November-December
(c) Summer	January	April-May
Mung		
(a) Kharif	April-May	October-November
(b) Rabi	October-November	March-April
Sugar-cane	October-November	January-March
Sesamum	October-November	January-February

Prices of food grains and other important crops

Wholesale price quotations in respect of staple food grains and a few other crops for the years 1957 to 1960 and monthly rates for 1960 are given in a Table in Part III. The data relate to the 3 of the important marketing centres in the district, namely, Cuttack, Kendrapara and Jajpur Road. The prices have varied from year to year.

Agricultural implements and machineries

A census of agricultural implements and machineries existing in the district was taken during each of the livestock censuses of 1945, 1957 and 1961. These were the only three such censuses taken after formation of Orissa into a separate province. As pointed out earlier, the district underwent territorial changes during the period from 1936 to 1949. Therefore, the statistics of 1945 cannot be compared with those recorded in the years 1957 and 1961. However, the Table on the subject given in Part III shows the number of agricultural implements and machineries in each of these three livestock census years.

Between 1957 and 1961, the numbers of ploughs both wooden and iron, carts, sugar-cane crushers, pumps for irrigation purposes and tractors have increased. There were only 12 tractors in 1957 and their number increased to 24 in 1961. The number of Ghanis were, however, reduced from 726 in 1957 to 477 during 1961.

Agricultural Farms

There are seven agricultural farms in the district. Their location and acreage are as follows :

Name of Farms	Acreage
Cuttack Nursery	7·89
Kujanga Farm	33·39
Athgarh Farm	30·00
Narsingpur Farm	52·90
Jajpur Farm	16·56
Sukinda/Ichhapur Farm	1,441·00
Tirtol Farm	33·09
Banki Farm	43·86
Barchana Farm	35·97

Most of these farms are paddy seed multiplication farms but in some horticulture is taken up.

*ANIMAL HUSBANDRY AND VETERINARY

The animal husbandry and veterinary administration of the district is in charge of a District Animal Husbandry and Veterinary Officer whose headquarters is at Cuttack. His jurisdiction does not extend over Jajpur subdivision which is under the District Animal Husbandry and Veterinary Officer of Keonjhar district. In 1963, there were 32 veterinary dispensaries and 166 stockman centres in the district including Jajpur subdivision. 104 Artificial Insemination centres and 74 bull centres functioned in different areas. A Demonstration Poultry Farm with a strength of 100 birds has been set up at Cuttack. Expanded nutrition programme to provide eggs for feeding expectant and nursing mothers was in operation in 3 of the Development Blocks in the district. Besides, there were also village poultry sub-units managed on co-operative basis in the villages in the Community Development Blocks. There is a State Livestock Breeding Farm at Cuttack with a strength of 90 cows and 56 buffaloes which gives an average yield of 800 lbs milk per day. The common cattle diseases in the district are Haemorrhagic Septicemia, Black-quarter, Rinderpest and Foot and Mouth disease. No serious cattle epidemic occurred in the district during the last decade.

Three livestock censuses were conducted in the years 1945, 1957 and 1961 after formation of the separate province of Orissa. The results of the counts during the 3 years are given in a Table in Part III. But due to territorial changes of the district the statistics for 1945 cannot be properly comparable with those in the subsequent two counts of 1957 and 1961. Cuttack district has the largest number of livestock including poultry in the State. The total livestock recorded at 1,483,031 in 1957 increased to 1,846,895 in 1961 counts. There has been increase in the number of all categories of livestock except horses and ponnies, and pigs whose number went down from 7,872 to 5,415 and from 4,806 to 4,330 respectively. There has been an appreciable increase in the number of goats which is recorded at 225,294 in 1961 against 138,690 in 1957. The district has the largest number of cattle (1,476,500).

PUBLIC HEALTH

Administration

The public health activities and medical administration of the district are under the charge of a District Health Officer and a Civil Surgeon respectively and both of them are stationed at Cuttack. Their jurisdiction covers the entire district. The district had in April, 1961 sixteen hospitals, fortyseven dispensaries and eighteen primary health centres. 1,202 beds in all for in-door patients were available in these hospitals and primary health centres and there were 122 doctors and 7 kavirajas in these institutions. Treatment at the Government institutions is given free. 14 family planning centres were opened in the district, the earliest of them being the one at City Hospital, Cuttack started during 1957. The S. C. B. Medical College Hospital, Cuttack is the largest of the hospitals in the State and had a total bed strength of 756. It has facilities for specialized treatment. The Provincial Pathological and Bacteorological Laboratory is also located at Cuttack. A Red Cross Mental Institute with 30 beds, one Leprosy Home and Hospital with 550 beds and a Red Cross Paediatrics Institute also function at Cuttack City where patients from all parts of the State are treated.

Vital Statistics—Registration System

Cuttack being one of the oldest districts of the State, major part of it enjoyed the benefits of

* Based on letter No. XI-114-62, 13796/vet. dated 7-8-1963 from the Director of Animal Husbandry and Veterinary Services, Orissa

registration system from an earlier period. The ex-state areas which merged with the district during 1948 came under registration system with effect from 1-1-1952. Thus, vital statistics for Cuttack Sadar, Jajpur and Kendrapara subdivisions are available for a larger number of years than those for Athgarh subdivision which comprise the ex-state areas only. After merger of the states, an interim arrangement was made with effect from July, 1948 to collect weekly figures of attacks and deaths from cholera and smallpox in Athgarh subdivision with a view to take preventive measures against epidemics. This arrangement was followed by the introduction of the system of collection of vital statistics in the year 1952. The registration figures for the year 1951, therefore, represent the statistics only for Cuttack Sadar, Jajpur and Kendrapara subdivisions but those of the subsequent years include the figures for Athgarh also. The entire district is now under registration system.

The Bengal Births and Deaths Registration Act (Act IV of 1873) is in force throughout the district. The village Chowkidars collect the vital occurrences in the rural areas and in the Municipal or Notified Area Council areas, it is done by their health staff. According to the defined procedure, the Chowkidar is to collect informations about births and deaths during his rounds in the villages and report them at the police stations on weekly or fortnightly parade days. The Thana Officer is to consolidate the reports for his area thus recorded and send a montly return to the District Health Officer. Similar monthly reports also come from the Municipalities or Notified Area Councils for urban areas. On receipt of these monthly returns, the District Health Officer is to compile the district report and send the same to the Director of Health Services, Orissa every month.

It was observed that the Chowkidars neglected the work as they genearally took it as an imposition on them rather than one falling within their legitimate sphere of duty. The Thana Officers, busy as they are in ever-increasing law and order problems, hardly checked the reports received. Thus the entire structure of vital statistics was built on what is reported by the Chowkidars, the resultant statistics being admittedly far from truth. The transfer of Chowkidars to the pay-roll of the Grama Panchayats during the later part of the past decade was another set-back to the functioning of this system. After their transfer, the Chowkidars avoided coming to parades at the Thanas regularly and hence collection of vital statistics suffered to a still greater extent. Though the collection and reporting of the events were slightly better in the urban areas, omissions in registration also occurred there due to inherent defects in the system.

The urban area of the district for vital statistics purposes up to the end of the decade 1951-60 consisted of Cuttack, Jajpur and Kendrapara towns. The towns which were not treated as such in vital statistics were Chowdwar, Athgarh, Jajpur Road and Banki. The reports for these towns were included in the records of their respective police stations. In the three towns of Cuttack, Jajpur and Kendrapara, the vital occurrences are collected by the health staff of the concerned Municipality.

Births and Deaths

During the decade 1951-60, a total of 473,196 deaths occurred and 747,032 births took place in the district. Thus only 273,836 souls are assumed to have added to the population of the district during this period out of which 146,985 were males and 126,851 females. The increase of population between 1951 and 1961 censuses has, however, been 531,076. The figures for 1951 do not include the events occurring in Athgarh subdivision. The difference between the figures of increase in population indicated by both these two sources is great and cannot be explained to be due to any migration gain or on account of exclusion of records of Athgarh subdivision for the year 1951. On the other hand, under-registration is likely to have caused lower figures in the vital statistics records.

Registration rates

The decennial birth and death rates for 1951—60 are 27·0 and 17·1 respectively against similar rates of 29·3 and 29·1 recorded in the earlier decade of 1941—50. The fall in the death rate is significant. The decennial birth and death rates for 1951—60, however, compare favourably with the State rates, the district rates being higher. Between the rates for urban and rural areas, the former are greater than those of the latter. The decennial birth rate is 44·1 for urban areas against 26·0 in rural areas, mortality rate standing at 19·5 for the former against 17·0 in the latter. For all the years of the decade, birth rates are higher in urban area than in rural area. The mortality rate is also greater in all the years except during 1952 and 1953. The annual birth and death rates for all the years of the decade were as follows :

	Birth rate per 1,000 population			Death rate per 1,000 population		
Year	Total	Rural	Urban	Total	Rural	Urban
1951	24·3	23·7	35·6	21·1	21·1	21·1
1952	28·3	27·9	36·6	23·7	24·1	17·0
1953	27·0	26·2	41·1	20·2	20·2	19·8
1954	29·6	28·5	48·3	15·8	15·7	18·2
1955	30·8	29·5	53·3	14·2	14·0	18·7
1956	29·1	28·2	44·9	18·1	18·0	19·8
1957	26·5	25·5	43·1	19·3	19·1	23·0
1958	24·5	23·4	44·0	15·1	14·9	18·9
1959	27·2	26·0	46·1	11·9	11·4	20·3
1960	23·1	21·7	45·3	13·4	13·2	18·0
1951-60 (Decennium)	27·0	26·0	44·1	17·1	17·0	19·5

It has been mentioned that the birth rates of urban area are much higher than the rural rates for all the years. The rate has gone as high as 53·3 in the year 1955, the lowest rate being 35·6. It is a recognized fact that a good number of maternity cases from outside are received at the hospitals located in the towns and this has great bearing on the birth rates for urban area. The annual birth rates for the district as a whole compare favourably with the State average though they cannot be accepted as true. Death registration in the district has not been satisfactory and large-scale omissions have led to low rates. Death rates recorded for 1959 and 1960 are 11·9 and 13·4 respectively and those cannot be accepted as correct in view of the fact that the registration system suffered to a great extent during the period.

Causes of death

According to recorded causes of mortality, deaths from different diseases and their proportion to total deaths during the decade were as follows :

Causes		Deaths	Percentage to total deaths
Cholera	...	12,062	2·55
Smallpox	...	14,783	3·12
Fever	...	193,270	40·84
Dysentery and diarrhoea	...	52,341	11·06
Respiratory diseases	...	22,080	4·67
Wounds and accidents	...	8,425	1·78
Other causes	...	170,235	35·98
Total		473,196	100

As usual, the highest number of deaths was due to fever and from diseases classified under "Other causes". As compared with other districts, incidence of cholera and smallpox was greater.

Fever

Among the various diseases which prevailed in the district during the decade under report fever caused the greatest sufferings and it accounted for 40·84 per cent of deaths. It is admitted that the primary collectors of vital occurrences, possessing very little knowledge to diagnose the particular cause of death, often misclassify deaths from many other diseases under fever although deaths may not have been caused by fever in all such cases. But such misclassification is not likely to be large enough to alter the general trend to a great extent. We know that the major part of the district lies in flooded area which remains submerged under water for a long time every year. The climate in these areas is unhealthy and malarial. Malaria, the principal disease among fevers is endemic in these parts. Deaths from fever are reported all the year round. It is no wonder that under these circumstances the majority of deaths during the dacade under report was from malaria. Incidence of this disease was so great in the past that special programmes for eradication of malaria had to be taken up.

A total number of 628,577 malaria cases are recorded to have been treated in the hospitals and other medical institutions in the district during this decade. The attendance of such patients at hospitals has, however, gone down from 1958.

Other causes

Next to fever, the largest casualty has been on account of "Other causes". The total mortality recorded is 170,235 which constitutes 35·98 per cent of total deaths. This group combines all diseases other than cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases and wounds and accidents. Thus it is heterogenous and some of the diseases differ from each other in their characteristics. Separate records for individual diseases are not maintained. Similar is the case with dysentery and diarrhoea, respiratory diseases, and wounds and accidents. The specific causes for which statistics are available are cholera and smallpox.

Cholera

Cholera was prevalent in the district throughout the decade and was endemic for all the 10 years though deaths during 1955 and 1959 were negligible being only 96 and 83 respectively. In other years, the casualties were much greater, the greatest mortality being 3,997 in the year 1956. Sporadic deaths were reported from the beginning of the year and the number increased from April. The scourge continued up to the end of December, 1956. Deaths in the months of August and September were very high and were 783 and 776 respectively. Worst affected in this epidemic were the police station areas of Tirtol, Jagatsingpur, Balikuda, Gobindpur, Kendrapara, Patkura, Aul, Jajpur and Binjharpur.

Smallpox

Smallpox was also endemic in the district during these 10 years. Deaths during 1955 and 1960 were only 58 and 98 respectively. The greatest mortality of the decade was in the year 1952 being 4,789. Deaths from smallpox occurred in good number from the beginning of 1951 and in the later part of the year mortality increased further. Early part of 1952 suffered heavily and in the month of February, 1952 as many as 1,068 persons died. The severity of attack was felt till July, 1952 after which the scourge began subsiding. Worst affected in the epidemic were the police station areas of Banki, Kendrapara, Patamundai, Aul, Rajnagar and Binjharpur. During 1958 smallpox appeared again in virulent form and took a toll of 4,740 lives. The deaths in the months of March and April were, of course, very high, being 909 and 615 respectively. Worst affected in the epidemic of 1958 were the police station areas of Banki, Jajpur, Binjharpur, Athgarh, Narsingpur, Baramba, Balikuda and Aul.

Infant deaths

The total infant mortality in the district during the years 1951—60 was 114,326 and it constituted 24·16 per cent of total deaths. The highest number

of deaths is recorded in the year 1952, being 13,553. 34·90 per cent of deaths of the decade was of children of pre-school going age. The decennial infant death rate for the district is 153·0 per mille of live births, and this rate is higher than the State rate which is 145·6. The highest and lowest infant mortality rates of the district are 184·0 recorded during 1952 and 124·9 in 1955.

COMMUNITY DEVELOPMENT AND PANCHAYATI RAJ

Community Development

The Community Development programme aims at all round development of rural areas and it was inaugurated in Orissa in October, 1952. The earliest pattern was Community Projects with a total budgetary allotment of Rs. 65 lakhs and a period of operation for 3 years. This was followed by the Community Development Blocks whose term of operation was also 3 years but the financial provision was reduced to Rs. 15 lakhs. From 1954, however, the pattern changed to a common programme for all areas under which National Extension Service Blocks began to be established. These Blocks had the same population coverage as Community Development Blocks of 1953 series but the budget grant was only Rs. 4 lakhs for 3 years. After the progress of development had reached a certain standard and the Block had done a minimum of about 2—2½ years under National Extension Service, it was converted into a Community Development Block. On its becoming a Community Development Block, the financial grant was raised to Rs. 12 lakhs and the term extended for 3 years more. After completion of the Community Development term the Block was to enter post-intensive phase under which a provision of Rs. 30,000/- was available annually for expenditure on local works and social education for a period of 3 years. This pattern also did not last long and the 3 Stages of development namely, N. E. S., C. D. and Post-intensive were concised into two Stages, called Stage I and Stage II. Each of these phases runs for 5 years. The financial provision for a Stage I Block is Rs. 12 lakhs and that for Stage II Block is Rs. 5 lakhs. Another significant change in the programme was undertaking of pre-extension work for one year in the field of agriculture in the area just before opening of a Stage I Block. A provision of Rs. 18,000 is sanctioned for the purpose for each Block, the expenditure thus incurred being ultimately adjusted against Stage I budget. This revised programme came into operation with effect from 1-4-1958 and is still in force. All the N. E. S. Blocks existing then were taken under Stage I and the Post-intensive Blocks under Stage II. The Community Development Blocks were, however, allowed to complete their full term and then revert to Stage II. With the revision in programme, the number of Blocks increased and the full coverage by Blocks was decided to be achieved by October, 1963.

The normal population coverage for a Block is 66,000 for plain areas and 25,000 to 30,000 for tribal areas and on this basis, Cuttack district has been delimited into 41 Blocks. The first allotment to the district were three N. E. S. Blocks opened at Kendrapara, Dasarathpur and Athgarh on the 1st April, 1954. By 31-3-1961, through different allotment series 27 Blocks functioned in the district and they covered a total area of 2,927 square miles. Out of them, 20 were Stage I Blocks, 2 Stage II Blocks and 5 Pre-Extension Blocks.

The Block programme is executed through the agency of the Grama Panchayats. With the Panchayati Raj scheme coming into action, Panchayat Samitis are now solely responsible for planning and execution of the Block programme according to the felt needs of the people. The Block funds are placed at the disposal of the Panchayat Samitis as grants-in-aid and loans for implementation of the developmental schemes. Although the emphasis is on agriculture and industry, priority is given to provision of supply of water for irrigation, and drinking purposes, education, medical and

communication facilities. A total expenditure of Rs. 1,17,18,694 was incurred in the various Blocks of the district up to the end of 1960-61, the break-up of which under broad heads of development is as follows :

	Rs.
Staff and contingencies and Block buildings	34,05,670
Animal Husbandry and Agricultural Extension ...	9,19,665
Irrigation ...	19,48,998
Health and Rural Sanitation ...	14,20,059
Education ...	7,14,023
Social Education ...	9,20,498
Communication ...	7,30,381
Rural Arts, Crafts and Industries ...	3,61,695
Housing ...	12,97,705

Among the achievements under this programme up to the end of 1960-61, important are undertakings of 74 minor irrigation projects, 1,164 co-operative societies and 13 primary health centres. As a part of social education programme 255 mahila samitis were started and 38,695 adults were made literate. The achievements under communication programme were laying out of 273 miles of roads and construction of 194 bridges and culverts.

Grama Panchayats

In the beginning, Grama Panchayats in this State were responsible mostly for municipal functions in the rural areas. As years went on, their activities extended to execution of developmental works. Under the Community Development Programme which was initiated during the First Five Year Plan period, the Grama Panchayats were given a more active role in the execution of developmental work in their areas. To begin with, they functioned as agencies of the Government for execution of the developmental programmes, but towards the later part of the Second Plan period they also began to plan and execute their own programmes of development. These changes of democratic decentralization of power subsequently brought in the present Panchayati Raj system, which is a 3-tier system with the Grama Panchayat at the village level and the Zilla Parishad at the district level, the intermediate level being taken by the Panchayat Samiti.

A Grama Panchayat normally covers 5,000 persons but this limit is relaxed in special cases. The constitution of Grama Panchayats is regulated by the Orissa Grama Panchayat Act, 1948. A Sarpanch is placed at the head of a Grama Panchayat, and he is assisted by a Naib Sarpanch. The Grama Panchayat members are elected by the villagers on the basis of adult franchise, and from amongst them are elected the Sarpanch and the Naib Sarpanch, all of whom hold their office for a period of 3 years. A paid Secretary maintains the accounts and records of the Grama Panchayat. The Grama Panchayat fund is made up of grants and loans received from the Government, as also of taxes and other internal incomes arising out of various schemes, such as, pisciculture, co-operative societies, poultry development, markets, ferries, etc. The fund is usually lodged in a Savings Bank account at the nearest Post Office. Village sanitation, maintenance of public roads, lighting and public tanks, scavenging, public health, registration of births and deaths are some of the important functions of a Grama Panchayat.

There were 66 Grama Panchayats in the district during 1951-52 and their number increased to 399 in 1957-58. All these Grama Panchayats continued up to the end of 1959-60. With the increase in number, the income and expenditure of the Grama Panchayats also went up. From the total income of only Rs. 43,064 and expenditure of Rs. 35,557 during 1953-54, the amount went up to Rs. 12,76,287 and Rs. 8,58,711 respectively in the year 1959-60. Taxes alone yielded a total revenue of Rs. 3,72,720 during the year 1959-60, the highest collections being on account of Panchayat tax which amounted to Rs. 2,67,937. From other sources, i. e., lease of market sheds, fees from cattle pounds, irrigation, pisciculture, ferries and ghats, licence fees, etc., the Grama Panchayats got Rs. 1,49,241 during 1959-60. Government grants during the year amounted to Rs. 2,42,726. Loans to the tune of

Rs. 5,11,600 including paddy loans for Rs. 3,85,900 and loans for pisciculture amounting to Rs. 73,600 were also received from the Government. The expenditure included pay and allowances of staff and contingencies being Rs. 4,90,983, the costs of developmental and other works being Rs. 3,67,728.

The Grama Panchayats in the district maintained village police, the total number of which was 3,381 during 1959-60.

Adalti Panchayats were also functioning during this decade. But their number went down from 27 in 1955-56 to 5 during 1959-60. The cases handled and disposed of by these Adalti Panchayats are shown in a Table in Part III. This Table also contains the yearwise number of Grama Panchayats, and villages covered by them, number of village police maintained and their income and expenditure.

Panchayat Samitis

In accordance with the provisions of the Orissa Panchayat Samitis and Zilla Parishad Act, 1959, Panchayat Samitis were established in this State. This district has been delimited into 41 Panchayat Samitis, and all of them functioned simultaneously with effect from 26th January, 1961. A Panchayat Samiti is coterminous with a Development Block. Out of these Panchayat Samitis, 27 had either Community Development or Pre-extension Blocks already and the remaining 14 were Shadow Blocks or areas demarcated to have the Blocks in due course.

The Panchayat Samitis are largely elected bodies, and consist of both official and non-official members, the official members being the Block Development Officer and the representatives of various Departments of the State Government ordinarily posted at the Block level. The non-official members are Sarpanchs of Grama Panchayats and an additional representative elected from each Grama Panchayat area not being a member of the Grama Panchayat. Due representation of women and scheduled castes and scheduled tribes is secured in the membership of the Samiti. Both official and non-official members take part in the discussions of the Panchayat Samiti meetings, but the official members do not take part in voting. Non-official members of the Panchayat Samiti hold their office for a period of 4 years. At the head of the Panchayat Samiti there is a Chairman, who is assisted by a Vice-Chairman, and both of them are elected from among the non-official members. The Chairman generally presides over meetings of the Panchayat Samitis, and in his absence the Vice-chairman takes the chair. A Panchayat Samiti meets in the minimum once in every alternate month. The Chairman gets an honorarium of Rs. 100/- per mensem and is provided with rent-free accommodation or Rs. 50/- as houserent allowance in lieu thereof.

A Samiti plans, executes and supervises over all developmental programmes in its area. It is also responsible for control and spread of primary education, management of trusts and endowments which the Government may entrust, vaccination, registration of births and deaths and supervision over the work of the Grama Panchayats within its jurisdiction. Keeping in view the felt needs of the people and broad outlines of the schemes indicated by the Government, the Panchayat Samiti prepares its annual budgets and proposals, and submits them to the Zilla Parishad for approval. The schemes are executed after Zilla Parishad has sanctioned them. There is a Panchayat Samiti Fund fed by grants and loans from the Government and aids from all-India bodies and institutions, donations and contributions, etc., and it is lodged at the nearest Government treasury. The Block Development Officer as the Executive Officer of the Panchayat Samiti operates on this fund, as and when necessary by issuing cheques. The main sources of income of the Panchayat Samiti are the loans and grants from the Government, which are generally routed through the Zilla Parishad. The Community Development funds are, however, directly paid to the Samiti. The work and

accounts of the Panchayat Samiti are open to audit and inspection by the Government officials.

Zilla Parishad

A Zilla Parishad is the highest institution immediately below the State level in the Panchayati Raj system. The Parishad has both official and non-official members. The official members are the Collector, the Subdivisional Officers and the District Heads of different Departments of the State Government. The Chairmen of all the Panchayat Samitis in the district, M. Ps., M. L. As. and Members of Rajya Sabha elected from the district are the non-official members of the Zilla Parishad. One of the non-official members is a female. The Parishad is headed by a Chairman, who is assisted by a Vice-Chairman and both of them are elected from amongst the non-official members. The tenure of office of all the non-official members including the Chairman and the Vice-Chairman is 4 years. The Parishad is required to meet at least once in every 3 months and all such meetings are generally presided over by the Chairman and in his absence by the Vice-Chairman. Official members take part in the discussions in the meetings of the Parishad but have no right of voting. The Chairman of Zilla Parishad gets as honorarium Rs. 200/- and houserent allowance of Rs. 50/- per mensem.

The Zilla Parishad mainly approves of the schemes and budgets of the Panchayat Samitis, distributes fund among them and supervises over the execution of the various schemes. The day to day work of the Parishad is managed by an Executive Officer who belongs to Orissa Administrative Service, Class I. The Zilla Parishad has also a fund to which the grants and loans from the Government, aids from all-India bodies and internal incomes are credited. The money is lodged in an account at the Government Treasury. The Executive Officer of the Zilla Parishad functions as drawing and disbursing officer in respect of this fund.

The Zilla Parishad for Cuttack district functioned with effect from the 15th February, 1961 and its headquarters is at Cuttack.

CO-OPERATION

The co-operative movement plays an important part in providing credit on reasonable terms and conditions to the local people. The re-organization of credit co-operative societies at all levels and the strengthening of credit structure with State-participation in the share-capital is one of the most important features of the co-operative movement during the past decade. The weaker units were provided with share-capital contribution and were given subsidy for maintaining trained and efficient managerial staff. Several new schemes were put into operation and old societies were re-vitalized.

The agricultural co-operative societies advance loans both in cash and kind. Most of them give loans on short-term basis, whereas there are others to advance medium-term credits. There is provision for grant of long-term loans also. Short-term loans generally include cash, nucleus paddy seeds, green manure seeds, chemical fertilizers and other production pre-requisites including insecticides, agricultural implements, etc. Funds required for sinking or repair of wells, purchase of cattle and agricultural machineries and cost of minor improvements to land are some of the items classified under medium-term loan. The non-agricultural co-operative societies do not, however, advance any loan.

The co-operative movement in the district has made steady progress during the past few years, and the total number of primary co-operative societies existing during 1960-61 was 2,110. There were two central banks also. Majority of the societies were small-sized credit societies. Graingolla societies ranked second in numerical strength. In membership and working capital small-sized credit societies lead, the next below them

being the large-sized credit societies. There were 127,445 members of primary co-operative societies in the district. This gives one member to every 24 persons. The working capital being Rs. 5,87,55,784, a sum of Rs. 461 was available on an average per member.

The two central banks are at Cuttack and Banki and they are the central financing agency for all the societies. The bigger of the two is Cuttack Bank, but both of them together had 2,094 members and the working capital available was Rs. 1,07,46,711.

NATIONAL SAVINGS

The National Savings movement was at first started during the earlier years of the Second World War and was then called the Defence Savings Scheme. Its objectives were to collect money for defence purposes and to fight inflation. During the post-war period, the activities of this movement were directed towards inculcating the habit of thrift among the people so as to obtain savings for augmentation of the resources for financing the Five-Year Plans. In recent years, it is also helping in collecting funds to strengthen the defence in the National Emergency. The scheme was more or less on an experimental basis till 1948. In 1949 it was spread over to all the districts in the State including Cuttack.

The various National Savings securities which are available now are the 12-Year National Defence Certificate, the 10-Year Defence Deposit Certificate, the 15-Year Annuity Certificate, the Premium Prize Bonds, the Cumulative Time Deposit Scheme and the Post Office Savings Bank Account. The securities are available in different denominations and carry varying rates of interest. The gross and net sale-proceeds from all the National Savings securities in Cuttack district during the past 3 years are given below :

Years	Gross sale	Net sale
	(In thousands of rupees)	
1960-61	149,10	38,32
1961-62	168,57	44,94
1962-63	209,58	.51,58

The targets, achievements and percentage of achievement in the sale of National Savings securities in the district during these 3 years were as follows :

Years	Target	Achievement	Percentage of achievement
	(In thousands of rupees)		
1960-61	40,00	38,32	95·80
1961-62	52,00	44,94	86·42
1962-63	64,00	51,58	80·59

PLACES OF INTEREST

Cuttack

It was the capital of the State of Orissa till 1949 when the headquarters was shifted to Bhubaneswar. It is the only city in Orissa. It has an area of 23 square miles with a population of 146,308. The town is covered by a Municipality, established in the year 1876. It stands nearly at the apex of a triangle, the two sides of which are formed by the river Mahanadi and its branch Kathjori. The town is served by Cuttack Railway station on the main Howrah-Madras route of the South Eastern Railways. Calcutta-Madras National Highway also passes *via* Cuttack. The town is connected by good roads with different parts of the State on which regular buses ply. It is a trade centre of considerable importance.

Among the important Government Offices which are still located at Cuttack are those of Inspector General of Police, Director of Industries, Director of Public Instruction, Commissioner of Commercial Taxes, Public Service Commission, Board of Revenue and High Court. Institutions

like the S. C. B. Medical College Hospital which has the best medical facilities in the State, the Ravenshaw College, the oldest college which at present has facilities for Post-graduate studies and also for running evening classes, the S. B. Women's College, a Law College, a Teachers' Training College and two other colleges, namely, Christ College and Stewart College are also situated here. The Central Rice Research Institute which provides facilities for fundamental research on all aspects of rice, the only one of its kind in the South-East Asia, is located at Bidyadharpur on the outskrits of the town.

There are a Stadium (Barabati Stadium), 4 cinema and 2 theatre halls and the town has got electricity and water supply. There are daily markets at different parts of the town, important among which are the markets at Chhatrabazar, Buxibazar and Balubazar. The town has got many presses some of which are equipped with up-to-date machineries. All the newspapers of the State, namely, The Samaj, Prajatantra, Kalinga, Matrubhumi Ganatantra (since discontinued) and the English daily 'Eastern Times' issue from this town. In addition to the S. C. B. Medical College Hospital, the premier institution in the State, there are the City Hospital in the heart of the town, the Paediatrics Institute at Lalbag, the Charitable dispensary named as Netaji Subhas Seva Sadan at Oriya Bazar and a Maternity Home. There are a few private nursing homes in some of which major operations are carried out. There are a few big industries inside the town one of which is Kalinga Industries which produces refrigerators, steel almirahs, etc. At its outskirts are located Industrial Estate at Madhupatna and National Foundry and rolling mills at Nayabazar.

Among the antiquities found in the town, important are the Barabati fort now in ruins, the mosqueat Qadam Rasul, the anicut over the river Mahanadi near Jobra and the stone revetment of Kathjori embankment.

The common mode of conveyance in the town is cycle rickshaw. One town Bus service, a few taxis and hackney carriages also ply. The streets are crowded almost from the morning till about the dead of night with cars, buses, cycles, cycle rickshaws and trucks. For carriage of goods inside the town, bullock-carts are also made use of. Though there are a good number of hotels, a very few of them have modern amenities.

Kendrapara

It is the headquarters town of the subdivision bearing the same name. Its population in 1961 Census was 15,813. The town is covered by a Municipality since 1869. On account of its situation in the heart of a fertile country and on the Kendrapara canal, it is an important centre of trade concerning mainly food grains, jute and other crops. The usual subdivisional offices are located in the town. There is a small bazar and the town is provided with electricity. It is connected with the district headquarters by regular bus services. 'Baladevji' is the important deity of the town.

Jajpur

It is the headquarters town of the Jajpur subdivision. The town has also a Municipality since 1869 and its population according to 1961 Census is 13,892. The town is located on the right bank of river Baitarani and contains the usual subdivisional offices. It has got electricity and a cinema hall. The town is 19 miles from Jajpur-Keonjhar Road Railway station on the Madras-Howrah route of S. E. Railways. Regular buses ply at different hours between the railway station and the town. Some of these buses also run to the interior parts beyond the town. Road communication during the rainy season is cut off with the district headquarters. Daily buses, however, run during the fair weather period between the two places. There is a small bazar inside the town. A bi-weekly market (Biraja Hat) which sits in the town every Sunday and Thursday is one of the biggest markets in the district. Jajpur contains many relics of the past and is a place of historical importance. It is also a place of pilgrimage and is popularly known as Birajakshetra.

Banki

It was formerly the headquarters of a large Government estate. It is now the headquarters of the Deputy Collector who is in charge of the area. The town is located on the bank of river Mahanadi. Its population according to 1961 Census is 5,934. Banki is reached by road from Cuttack *via* Barang during fair weather period and *via* Bhubaneswar throughout the year. It is 28 miles from Barang and 30 miles from Khurda Road, on Howrah-Madras route of S. E. Railways. It has got a college since 1961 which teaches science, commerce and humanities subjects. Among the public offices located, mention may be made of the Deputy Collector's office, Treasury, Police station, Tahasil office and Block office. The place is famous for the temple of Charchika. On every Panasankranti day (in April) there is a large gathering, main attraction being the Jhamu Jatra (walk on fire by devotees). A bi-weekly market sits here every Tuesday and Saturday. It is a trading centre of importance in the district, the main commodities of trade being gur, rice and pulses. About 3 to 4 miles away from the town there is a hill called Mahaparbat, on the top of which there is a hole believed to have been caused by a volcano. The local people make offerings at this place on Gahma purnima day (in August). 10 miles away, on the qther side of the river Mahanadi is another hill called Saranda where ruins of an ancient palace are still to be found. At the foot of the hill lies the beautiful lake, Ansupa. The convenient approach to the lake is from Athgarh from where a motorable road leads.

Athgarh

After the merger of the neighbouring princely states, Athgarh became the headquarters of the newly formed subdivision comprising the ex-state areas of Athgarh, Narsingpur, Baramba and Tigiria. It was formerly the headquarters of the Athgarh state. The town has a population of 7,256. It is reached on road from Cuttack and also from Raj Athgarh Railway Station on Talcher branch line of South Eastern Railways. It contains usual public offices. The famous Ansupa lake which provides excellent natrual scenery is reached easily on road from here.

Chowdwar

Formerly a village of not much importance, on the north bank of the river Birupa opposite Cuttack town, Chowdwar is now an important industrial town. Orissa Textile Mills, Kalinga Tubes and Titaghur Paper Mills are the three important industries located here. At a short distance from here is Charbatia Air field which is mostly used by the Military authorities. The Orissa Textile Mills was started in the year 1950. The Kalinga Tubes produces steel tubes, bands, shockets, etc. The town has a Notified Area Council and its population according to 1961 Census is 13,479. The nearest railway station is Neergundi on the Madras-Howrah route of the South Eastern Railways. It is also connected by all-weather road with Cuttack. For some part of the year, a launch service is also maintained between Chowdwar and Cuttack. The town has a small bazar and has got electricity. The common mode of conveyance is the cycle rickshaw. There is a Telephone Exchange at Chowdwar.

Barang

It is a small village with a population of 2,528 and is situated to the south of Cuttack. It is famous on account of the location of Sri Durga Glass Works. Another factory for manufacture of potteries and china and earthen wares has also been set up here. Various glass articles such as bottles, plates, jars, etc., are made in Sri Durga Glass Works. A beautiful picnic spot known as Nandankanan which is also a sanctuary is located here. A vast tank taken up for pisciculture by the Fisheries Department of the State Government adds to the beauty of the place. The thick Chandka forests in which elephants and other wild animals are found, are nearby. The place is close to Barang Railway station on the Madras-Howrah route of the South Eastern Railways. Both Nandankanan and the industrial site of Barang are also easily reached

by road *via* Bhubaneswar all the year round and from Cuttack during fair weather period.

Chandikhol

It is a picturesque spot at the foot of a small hillock in the village Darpangarh under Jajpur subdivision. It contains a temple, a perennial spring and a Dharamsala. It is about 3 miles from Dhanmandal Railway station by road and about 2 miles through paddy fields from Haridaspur Railway Station. About 1½ miles away from here there is a temple of Siva known as Mahavinayak over another hillock. There is a water fall there also, which supplies water to the temple and its premises. On Sivaratri day, people from distant places congregate there for worship.

Paradeep

A deep sea port in the making, about 62 miles from Cuttack by road. The first phase of Stage I of the Master Plan drawn up for the scheme is scheduled to be completed by October, 1965. It will be a major port with a minimum draft of 12·75 metres capable of taking 60,000 ton iron-ore carriers. It will have an efficient mechanically ore-loading plant with a capacity of 2,500 tons per hour and the port will be capable of exporting 2 to 3 million tons of iron-ore per year.

Jajpur Road

Popularly known as Dolipur, Jajpur Road is a town having a population of 5,989 (1961 Census) in Jajpur subdivision. The town has a Notified Area Council and covers the area on both sides of the Railway Station named Jajpur-Keonjhar Road. It is a trade centre of considerable importance on account of its being the rail-head for Keonjhar district and also Jajpur town. Regular bus services are operated by the State Transport Organization from here to various places in Keonjhar district and Jajpur subdivision. One of the buses also runs as far as Ranchi in Bihar State. There is a small bazar and the town has got electricity. There are a cinema hall, a hospital and a high school. It is also the headquarters of a Block. The common mode of conveyance is cycle rickshaw. Some taxis are also available.

Sukinda

Headquarters of a former estate, Sukinda is a village under Jajpur subdivision with a population of 1,700 (1961). It is now the headquarters of a police station, a Tahasil and a Block. The place is connected with Jajpur-Keonjhar Road Railway station which is at a distance of 14 miles.

Assia hills

A range of hills in Jajpur subdivision. Though they are not very high, yet due to the existence of some shrines on their summits and ruins of ancient temples, fort, sculptures, etc., the hills are of interest. The four highest peaks of the range are Alamgiri, Udaigiri, Baradihi and Lalitgiri. On Alamgiri hill stands the mosque of Takht-i-Sulaiman, the walls of which form a conspicuous mark on the hill visible for many miles to the south. Baradihi is the highest of the four peaks and the remains of a fort of an old chieftain is seen at the foot of the hill. Lalitgiri, which is easily approached by road from Kendrapara Road Railway station, consists of three spurs, namely, the Olashuni, Nanda and Parahari. Several temples and Buddhist images of ancient time are found at this place. Udaigiri hill also contains several inscriptions.

Central Rice Research Institute

It is located at Bidyadharpur which stands in the midst of a rice growing tract about 3 miles from Cuttack Railway station. The institute is first of its kind in South-East Asia and it was set up by Government of India in the year 1946 with the object of conducting intensive research on rice. The institute conducts fundamental research on all aspects of rice and also serves as an authoritative information centre on all matters relating to rice crop. The research programmes aim at enabling the country to produce more and better rice through new, cheap and easy methods of paddy cultivation.

Side by side, the institute provides training facilities for specialization in various aspects of agriculture mainly concerning rice. Post-graduate training is imparted here to students in collaboration with the Indian Agricultural Research Institute, New Delhi and Utkal Krushi Mahavidyalaya, Bhubaneswar for M. Sc. degree. Research fellows are also being guided for the Ph. D. degree on cytological, embryological and anatomical aspects of rice. The post-graduate course in rice is also open to foreign students. National training course is being conducted from the year 1960 to train rice breeders and technicians of different States. International training course in rice breeding is also held periodically in collaboration with F.A.O. Refreshers' courses for the extension staff and farmers' training classes for the cultivators of the intensive cultivation centres in Orissa are also conducted periodically.

The institute is recognized by the F.A.O. as one of the World centres for the maintenance of rice genetic stocks registered by various rice growing countries with that body, and the Director of the Institute is in over-all supervision of this project. Further, specialists in different subjects also function as project co-ordinators in a number of International and National research projects connected with rice crop improvement.

CALENDAR OF IMPORTANT EVENTS

1866	—	Great famine in Orissa
1876	—	Establishment of Ravenshaw College as first grade college. It was the only college in Orissa then.
1911	—	Formation of Bihar and Orissa province and transfer of Cuttack district from the province of Bengal to the province of Bihar and Orissa
1922	—	Opening of the present Ravenshaw College building at Chauliaganj
1931	—	Keuta (fishermen) *meli* at Kujang
1942	—	Bombardment in the sea coast near Kujang by Japanese
1943	—	Establishment of Utkal University
1944	—	Establishment of S. C. B Medical College, Cuttack
1948	—	Establishment of High Court at Cuttack
1949	—	Shifting of the capital from Cuttack to Bhubaneswar
1950	—	Bridge over Kathjori and Kuakhai rivers. Beginning of the work of Orissa Textile Mills
1952	—	Abolition of Zamindaries
1955	—	Great flood in the district and devastation of a vast protected area on account of a breach at Daleighai
1958	—	Opening of the port at Paradeep, XVIII National Games at Cuttack
1960	—	Separation of judiciary from executive

PART II

CENSUS TABLES

Contains

General Population Tables—A-I to A-IV with appendices, General Economic Tables—B-I and B-III to B-IX, Household Economic Tables—B-X to B-XVII, Social and Cultural Tables—C-I, C-II, C-III, C-V, C-VII and C-VIII, Housing and Establishment Tables—E-I to E-V, Tables on Scheduled Castes and Scheduled Tribes—SCT-I to SCT-V, SC-I, ST-I and ST-II, Villagewise List of Industries and List of Fairs and Festivals.

TABLE A-SERIES

GENERAL POPULATION TABLES

General Population Tables comprise four Tables, A-I to A-IV which are briefly described below.

2. **Table A-I—Area, Houses and Population**—This Table supplies information regarding area, number of inhabited and uninhabited villages, number of towns and sexwise population for each police station and subdivision in the district.

3. The area shown in Col. 3 (a) is based on the figures received from the local revenue authorities who also maintain the area figures relating to smaller units, such as, police stations. The Surveyor General, India has not got area figures for units below the district and so the area of the district as received from him has not been adopted. The area in sq. kms. shown in Col. 3 (b) has been calculated at the rate of 1 square mile=2·590 square kms.

4. **Definitions**—The definitions of the terms village, town, house, occupied residential house, houseless persons and institutional population are given in the fly-leaf to Table A-I in the Census Report of 1961, Vol. XII (Orissa), Part II-A.

5. There are three appendices to this Table which are as follows :

(*i*) Appendix I shows the changes in the jurisdiction of the Police Stations and Subdivisions since 1951. The annexure to this Appendix gives the names of all villages which are transferred from the jurisdiction of one police station to another.

(*ii*) Appendix II gives the number of villages with population of 5,000 and over and towns with population under 5,000.

(*iii*) Appendix III gives the houseless and institutional population in each police station and subdivision.

6. **Table A-II—Variation in population during sixty years**—This Table furnishes data on the variation of population for seven censuses from 1901 to 1961. Its importance lies in the fact that it gives the growth of population from decade to decade. In the absence of reliable vital statistics or any other source of information it forms the main source of estimation of population. The percentage variation from decade to decade is also shown in this Table.

7. **Table A-III—Villages classified by population**—This Table gives the number and population of groups of villages in the various population sizes, namely, less than 200, 200 to 499, 500 to 999, 1,000 to 1,999, 2,000 to 4,999, 5,000 to 9,999 and 10,000 and above.

8. The information is furnished for each subdivision and police station in the district.

9. **Table A-IV—Towns classified by population with variation since 1941**—This Table shows the growth of each town in this district since the Census of 1941. The area of the town at the 1961 Census, both in square miles and square kilometres is also given. The term 'Town' has already been defined in the fly-leaf to Table A-I published in Part II-A of the Census Report of Orissa.

TABLE A-I—AREA, HOUSES AND POPULATION

Table A-I

District/Subdivision/ Police Station/Town		Total Rural Urban	Area in		Population per square mile	Number of Villages		Number of Towns	Number of occupied residential houses	Population

Foot Notes :—(1)† The Sqauare Kilometres and density figures of Urban Areas of Police Station/Subdivision/District are worked out using the area figures corrected up to two places of decimals obtained by adding the areas of the Towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Km. are further adjusted to make the Police Station/Subdivision/District totals tally.

(2) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(3) Towns treated as such for the first time in 1961 are printed in italics.

The following abbreviations have been used :—

T for Total
R for Rural
U for Urban
PS for Police Station
M for Municipality
NAC for Notified Area Council

APPENDIX I TO TABLE A-I

(Only those areas which have undergone changes since 1951 Census have been shown below)

Police station	1951 Territorial units	Details of gain in territories			Details of loss in territories			Net area gain (+)loss(—)

TABLE-B SERIES

GENERAL ECONOMIC TABLES

The contents of the General Economic Tables which are presented in this volume are briefly explained below :

2. **Table B-I—Workers and Non-workers classified by sex and broad age-groups**—This is a summary table prepared from the Primary Census Abstract giving the total population, the nine industrial categories of workers and also the number of non-workers. Sex split-up is shown in each case. Each category is divided into four broad age-groups, viz., 0—14, 15—34, 35—59 and 60+. The classification of workers and non-workers by age-groups is a special feature of 1961 Census. These age-groups correspond to different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons. Classification of non-working population has not been provided in this table to avoid unwieldiness, but is given in another table.

3. **Table B-III—Industrial Classification of Workers and Non-workers by Educational Levels**—This Table is presented in two parts. Part A relates to Urban areas and Part B to Rural areas. The educational levels which are given in both the parts are shown below :

Part A

Illiterate
Literate (Without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-technical diploma not equal to degree
University degree or Post-graduate degree other than technical degree
Technical degree or diploma equal to degree or Post-graduate degree in the following branches
medicine
Agriculture
Veterinary and Dairying
Technology
Teaching and others

Part B

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation and above

4. The nine industrial categories of workers and also the non-workers are cross-tabulated by literacy and educational standards mentioned above.

5. **Table B-IV Part A—Industrial Classification by Sex and class of worker of persons at work at Household Industry**—The distinction between household industry and non-household industry is drawn for the first time during the current Census. This part deals with workers engaged in household industry only. The data up to Divisions and Major Groups are shown separately for Total, Rural and Urban for this district.

6. **Table B-IV Part B—Industrial Classification by sex and class of worker of persons at work in Non-household Industry, Trade, Business, Profession or Service**—This part deals with categories III, V, VI, VII, VIII and IX. All these categories are sorted into 'Divisions' and 'Major Groups' according to the nature of the industry. They are further cross-tabulated according to the class of worker, namely, employer, employee, single worker and family worker. The data up to Divisions and Major Groups are shown separately for Total, Rural and Urban for the district.

7. **Table B-IV Part C—Industrial Classification by Sex, Divisions, Major Groups and Minor Groups of Persons at wotk other than Cultivation**—As the Minor Groups are not shown in the Tables A and B, this Table combines both in order to give the Minor Groups in addition to the Division and Major Groups. Separate columns are provided for the workers at household industry and non-household industry.

8. Minor Groups having less than 1 per cent of workers of the respective Divisions (less than 0·5 per cent in case of Minor Groups of Division 2 & 3), have not been shown in this Table. Divisions thus affected are marked with an asterisk (*). They are given separately in the Appendix.

9. Complete Code description of Divisions, Major Groups and Minor Groups according to I. S. I. C. are given below for reference as they are used in many Tables ;

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops*	
	Production of cereal crops (including bengal gram) such as, rice, wheat, jowar, bajra, maize ..	000
	Production of pulses, such as, arhar, moong, masur, urd, khesari, other gram ..	001
	Production of raw jute and kindred fibre crops ..	002
	Production of raw cotton and kindred fibre crops ..	003
	Production of oil-seeds, sugarcane and other cash crops ..	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantations, vines and orchards ..	006
	Production of wood, bamboo, cane, reeds, thatching grass, etc. ..	007
	Production of juice by tapping palms ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above ..	009
01	*Plantation Crops*	
	Production of tea in plantation ..	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above ..	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests ..	020
	Felling and cutting of trees and transportation of logs ..	021
	Preparation of timber ..	022
	Production of fuel including charcoal by exploitation of forests ..	023
	Production of fodder by exploitation of forests ..	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests ..	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish firms and fish hatcheries ..	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond ..	032
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power, such as, cow, buffalo, goat ..	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter), such as, pig ..	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming ..	043
	Rearing of bees for the production of honey, wax and collection of honey ..	044
	Rearing of silk worms and production of cocoons and raw silk	045

Major Group (Code)	Description	Minor Group (Code)
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry, products, such as, skin, bone, ivory and teeth ..	048
Division 1—Mining and Quarrying		
10	*Mining and Quarrying*	
	Mining of coal ..	100
	Mining of iron-ores ..	101
	Mining of gold and silver ores ..	102
	Mining of manganese ..	103
	Mining of mica ..	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, lime-stone ..	107
	Mining of chemical earth, such as, soda ash ..	108
	Mining and quarrying of non-metallic products not classified above, such as, precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt ..	109
Division 2 & 3—Manufacturing		
20	*Foodstuffs*	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and food grains ..	200
	Production of sugar and syrup from sugar-cane in mills ..	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy ..	202
	Production of fruit products, such as, jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish ..	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products ..	206
	Production of edible fats and oil (other than hydrogenated oil) ..	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products, such as, sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery ..	210
	Production of country liquor ..	211
	Production of indigenous liquor, such as, toddy, liquor from mahua, palm juice ..	212
	Production of other liquors not covered above ..	213
	Production of aerated and mineral water ..	214
	Production of ice ..	215
	Production of ice-cream ..	216
	Processing of tea in factories ..	217
	Processing of coffee in curing works	218
	Production of other beverages ..	219
22	*Tobacco Products*	
	Manufacture of bidi ..	220
	Manufacture of cigars and cheroots ..	221
	Manufacture of cigarette and cigarette tobacco ..	222
	Manufacture of hookah tobacco ..	223
	Manufacture of snuff ..	224

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jerda and other chewing tobacco ..	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spining (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching ..	233
	Cotton weaving in powerlooms ..	234
	Cotton weaving in handlooms ..	235
	Manufacturing of Khadi textile in handlooms ..	236
	Printing of cotton textile ..	237
	Manufacturing of cotton nets ..	238
	Manufacturing of cotton cordage, rope and twine ..	239
24	*Textile—Jute*	
	Jute pressing and baling ..	240
	Jute spinning and weaving ..	241
	Dyeing and bleaching of jute ..	242
	Printing of jute textile ..	243
	Manufacture of other products like rope, cordage from jute and similar fibre, such as, hemp, mesta ..	244
25	*Textile—Wool*	
	Wool baling and pressing ..	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mill	253
	Wool weaving in powerloom	254
	Wool weaving in handloom ..	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk ..	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom	264
	Printing of silk textile ..	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products ..	270
	Manufacture of hosiery and other knitted fabrics and garments ..	271
	Embroidery and making of crepe, lace and fringes ..	272
	Making of textile garments including raincoats and headgear ..	273
	Manufacture of made up textile goods except wearing apparel, such as, curtains, pillow cases, bedding materials, mattress, textile bags ..	274
	Manufacture of waterproof textile products, such as, oil cloth, tarpaulin ..	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling ..	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas ..	278
	Processing and manufacture of textile products not covered above ..	279

Major Group (Code)	Description	Minor Group (Code)
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood ..	280
	Manufacture of wooden furniture and fixtures ..	281
	Manufacture of structural wooden goods (including treated timber), such as, beams, posts, doors and windows ..	282
	Manufacture of wooden industrial goods other than transport equipment, such as, bobbin and similar equipment and fixtures ..	283
	Manufacture of other wooden products, such as, utensils, toys abd artwares ..	284
	Manufacture of veneer and ply-wood ..	285
	Manufacture of ply-wood products, such as, tea chest ..	286
	Manufacture of boxes and packing cases other than ply-wood ..	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products ..	288
	Manufacture of other wood and allied products not covered above ..	289
29	*Paper and Paper Products*	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill ..	290
	Manufacture of pulp from wood, rags. wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board hand-made ..	291
	Manufacture of products, such as, paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp ..	292
30	*Printing and Publishing*	
	Printing and publishing of newspapers and periodicals ..	300
	Printing and publishing of books ..	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry ..	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather ..	310
	Manufacture of shoes and other leather footwear ..	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur ..	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as, leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles ..	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear ..	315

Major Group (Code)	Description	Minor Group (Code)
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes ..	320
	Manufacture or rubber footwear ..	321
	Manufacture of rubber goods used for industrial purpose ..	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat ..	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries ..	324
	Production of coal-tar and coke in coke oven ..	325
	Manufacture of other coal and coal-tar products not covered elsewhere ..	326
33	*Chemicals and Chemical Products*	
	Manufacture of basic, industrial chemicals, such as, acids, alkalis and their salts not elsewhere specified ..	330
	Manufacture of dyes, paints, colours and varnishes ..	331
	Manufacture of fertilizers ..	332
	Manufacture of amunition, explosives and fire-works ..	333
	Manufacture of matches ..	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap ..	335
	Manufacture of soap and other washing and cleaning compounds ..	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including ynthetic rubber) ..	337
	Manufacture of common salt ..	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats) ..	339
34-35	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products, such as, bricks, tiles ..	340
	Manufacture of cement and cement products ..	341
	Manufacture of lime ..	342
	Manufacture of structural stone goods, stone dressing and stone crushing ..	343
	Manufacture of stonewares, other than images ..	344
	Manufacture of stone images ..	345
	Manufacture of plaster of paris and its products ..	346
	Manufacture of asbestos products	347
	Manufacture of mica products ..	348
	Manufacture of earthenware and earthen pottery ..	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus ..	354
	Manufacture of earthen images, busts and statues ..	355
	Manufacture of earthen toys and artwares except those covered by code No. 355 ..	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above ..	357

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of other non-metallic mineral products not elsewhere specified ..	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms, such as, billets, blooms, tubes, rods ..	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms ..	361
	Manufacture of armaments	362
	Manufacture of structural steel products, such as, joist, rail, sheet, plate ..	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell-metal products ..	365
	Manufacture of aluminium products ..	366
	Manufacture of metal products (other than of iron, brass, bell-metal and aluminium), such as, tin can ..	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares, such as, G. I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery ..	370
	Manufacture and assembling of prime mover and boilers other than electrical equipment, such as, diesel engines, road-rollers, tractors ..	371
	Manufacture of machine-tools ..	372
	Manufacture of textile machinery and accessories ..	373
	Manufacture of heavy electrical machinery and equipment, such as, motors, generators, transformers ..	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery ..	377
	Manufacture of electronic equipment, such as, radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above ..	379
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives ..	380
	Manufacture of wagons, coaches, tramways and other railroad equipment other than that covered by code No. 363 ..	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines) ..	382

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of motor vehicles, engines parts and accessories ..	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories, such as, saddle, seat-frame, gear ..	385
	Building and repairing of water transport equipment, such as, ships, boats and manufacture of marine engines ..	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines ..	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above, such as, animal-drawn and hand-drawn vehicles ..	389
39	*Miscellaneous Manufacturing Industries* ..	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies ..	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies ..	391
	Assembling and repairing of watches and clocks ..	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals ..	393
	Manufacture and tuning of musical instruments ..	394
	Manufacture of stationery articles not covered elsewhere, such as, pencil, penholder, fountain pen ..	395
	Manufacture of sports goods ..	396
	Manufacture and repair work of goods not assignable to any other group ..	399
	Division 4—Construction	
40	*Construction*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations ...	400
	Construction and maintenance of roads, railways, bridges, tunnels..	401
	Construction and maintenance of telegraph and telephone lines ..	40
	Construction and maintenance of waterways and water-reservoirs, such as, bund, embankments, dam, canal, tank, tube-wells, wells ...	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas*	
	Generation and transmission of electric energy ..	500
	Distribution of electric energy ..	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers ..	502
51	*Water-Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers ..	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation ..	511

Major Group (Code)	Description	Minor Group (Code)
	Division 6—Trade and Commerce	
	60—63 *Wholesale Trade*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere) ..	601
	Wholesale trading in all kinds of fabrics and textile products, such as, garments, hessian, gunny bag, silk and woollen yarns, shirtings, suitings, hosiery products ..	602
	Wholesale trading in beverages, such as, tea (leaf), coffee (seed and powder), aerated water ..	603
	Wholesale trading in intoxicants, such as, wines, liquors ..	604
	Wholesale trading in other intoxicants, such as, opium, ganja, etc. ..	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products ..	606
	Wholesale trading in animals ..	607
	Wholesale trading in straw and fodder ..	608
	Wholesale trading in medicines and chemicals ..	610
	Wholesale trading in fuel and lighting products, such as, coke, coal, kerosene, candle ..	611
	Wholesale trading in toilets, perfumery and cosmetics ..	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware ..	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings ..	614
	Wholesale trading in footwear ..	615
	Wholesale trading in tyres, tubes and allied rubber products ..	616
	Wholesale trading in petrol, mobil oil and allied products ..	617
	Wholesale trading in other household equipment not covered above ..	618
	Wholesale trading in bricks, tiles and other building materials ..	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products ..	621
	Wholesale trading in paper and other stationery goods ..	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical ..	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb ..	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eyeglasses, frames ..	635
	Wholesale trading in hardware and sanitary equipment ..	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery ..	638
	Wholesale trading in all goods not covered above ..	639

Major Group (Code)	Description	Minor Group (Code)
64—68	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry ..	640
	Retail trading in beverages, such as, tea (leaf), coffee (seed and powder), aerated water ..	641
	Retail trading in intoxicants, such as, wines, liquors ..	642
	Retail trading in other intoxicants, such as, opium, ganja, etc. ..	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products ..	644
	Retail trading in fuel, such as, coke, coal, firewood and kerosene ..	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles) ..	650
	Retail trading in toilet goods, perfumes and cosmetics ..	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear, such as, hats, umbrellas, shoes and chappals ..	653
	Retail trading in tyres, tubes and allied rubber products ..	654
	Retail trading in petrol, mobil oil and allied products ..	655
	Retail trading in wooden, steel and other metallic furniture and fittings ..	660
	Retail trading in stationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils ..	662
	Retail trading in earthenware and earthen toys ..	663
	Retail trading in other household equipment not covered above ..	664
	Retail trading in bricks, tiles and other building materials ..	670
	Retail trading in hardware and sanitary equipment ..	671
	Retail trading in wood, bamboo, cane, bark and thatches ..	672
	Retail trading in other building materials ..	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances ..	680
	Retail trading in transport and storage equipments ..	681
	Retail trading in electrical goods like electric fan, bulb, etc. ..	682
	Retail trading in skins leather and furs and their products excluding footwear and headgear ..	683
	Retail trading in clock and watch, eyeglass frame ..	684
	Retail trading in scientific medical and surgical instruments ..	685
	Retail trading in precious stones and jewellery ..	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing ..	687
	Book-selling ..	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	*Trade and Commerce—Miscellaneous*	
	Importing and exporting of goods and commodities ..	690
	Real estate and properties ..	691
	Stocks, shares and futures ..	692
	Providents and insurances ..	693
	Money lending (indigenous) ..	694
	Banking and similar type of financial operation ..	695
	Auctioneering ..	696
	Distribution of motion pictures ..	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods, such as, electric fan, microphone, rickshaw, etc. ..	699
Division 7—Transport, Storage and Communications		
70-71	*Transport*	
	Transporting by railways ..	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus) ..	702
	Transporting by road through other means of transport, such as, hackney carriage, bullock-cart, ekka ..	703
	Animal transporting by animals, such as, horse, elephant, mule, camel ..	704
	Transporting by man, such as, carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving ..	705
	Transporting by boat, steamer, ferry, etc., by river, canal ..	706
	Transporting by boat, steamer, ship, cargo boat, by sea or ocean	707
	Transporting by air ..	708
	Transporting by other means not covered above ..	709
	Services incidental to transport, such as, packing, carting travel agency ..	710
72	*Storage and Warehousing*	
	Operation of storage, such as, warehouses ..	720
	Operation of storage, such as, cold storage ..	721
	Operation of storage of other type	722
73	*Communications*	
	Postal, telegraphic, wireless and signal communications ..	730
	Telephone communication ..	731
	Information and broadcasting ..	732
Division 8—Services		
80	*Public Services (This does not include Govt., Quasi-Govt. or local body activities other than administrative, in such fields as, transport, communications, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industry groups)*	
	Public Services in Union and State army including territorial corps and volunteer corps ..	800
	Public Service in Navy ..	801
	Public Service in Air Force ..	802
	Public Service in Police ..	803

Major Group (Code)	Description	Minor Group (Code)
	Public Service in administrative departments and offices of Central Govt. ..	804
	Public Service in administrative departments and offices of Quasi-Government organization, municipalities, local boards, etc.	805
	Public Service in administrative departments and offices of State Governments ..	809
81	*Educational and Scientific Services*	
	Educational services, such as, those rendered by technical colleges, technical schools and similar technical and vocational institutions ..	810
	Educational services, such as, those rendered by colleges, schools, and similar other institutions of non-technical type ...	811
	Scientific services and research institutions not capable of classification under any individual group ..	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organizations and individuals, such as, by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners ..	820
	Veterinary services rendered by organizations and individuals ..	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organizations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organizations ..	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk ..	831
	Welfare services rendered by organizations operating on a non-profit basis for the promotion of welfare of the community, such as, relief societies, red-cross organization for the collection and allocation of contributions for charity ..	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukhtar, pleader, mukurie, munshi ..	840
	Matrimonial services rendered by organizations and individuals ..	841
85	*Business Services*	
	Engineering services rendered by professional organizations or individuals ..	850
	Business services rendered by organizations or accountants, auditors, book-keepers or like individuals ..	851
	Business services rendered by professional organizations or individuals, such as, those of advertising and publicity agencies ..	852
	Business services rendered by professional organizations or individuals, such as, those rendered by news agency, newspaper correspondents, columnists, journalists, editors, authors	853

Major Group (Code)	Description	Minor Group (Code)
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organizations ..	860
	Services rendered by civic, social, cultural, political and fraternal organizations, such as, rate-payers' association, club, library ..	861
	Community services, such as, those rendered by public libraries, museums, botanical and zoological gardens, etc. ..	662
87	*Recreation Services*	
	Production of motion picture and allied services, such as, processing, editing, etc. ..	870
	Recreation services rendered by cinema houses by exhibition of motion pictures ..	871
	Recreation services rendered by organizations and individuals, such as, those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals ..	872
	Recreation services rendered by indoor and outdoor sports by organizations and individulas including horse, motor, etc., racing	873
88	*Personal Services*	
	Services rendered to households, such as, those by domestic servants, cooks	880
	Services rendered to households, such as, those by governess, tutor, private secretary ..	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organizations to provide lodging and boarding facilities ..	882
	Laundry services rendered by organizations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning services ..	883
	Hair dressing, other services rendered by organizations and individuals, such as, those by barber, hair dressing saloon and beauty shops ..	884
	Services rendered by portrait and commercial photographic studio ..	885
89	*Services (not elsewhere classified)*	
	Services rendered by organizations or individuals not elsewhere classified ..	890
Division 9—Activities not adequately described		
90	*Activities unspecified and not adequately described (This includes new entrants to the labour market)*	
	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified ..	900
	Fresh entrants to the Labour Market ..	999

10. Table B-V—Occupational classification by sex of persons at work other than cultivation :— This Table gives the occupational classification of persons who are working in non-agricultural occupation, separately for Total and Urban. Divisions, Groups and Families according to National Classification of Occupations, are shown in it. Information regarding persons working in household industry and non-household industry is also supplied.

11. Families having less than 1 per cent of the workers of the respective Division (less than 0·5 per cent in case of families of Divisions 7-8), have not been shown in this Table, but are given in the Appendix. Divisions thus affected are marked with an asterisk (*).

12. Code description of families not appearing in this Table are given below :

000 Architects
002 Mechanical Engineers
003 Electrical Engineers
004 Chemical Engineers
005 Metallurgical Engineers
006 Mining Engineers
010 Chemists except Pharmaceutical Chemists
011 Pharmaceutical Chemists
012 Physicists
013 Meteorologists
014 Geologists and Geophysicists
015 Mathematicians
019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.
020 Biologists and Animal Scientists
022 Silviculturists
023 Agronomists and Agricultural Scientists
029 Biologists, Veterinarians, Agronomists and Related Scientists, n. e. c.
031 Physicians, Ayurvedic
032 Physicians, Homeopathic
033 Physicians, other
034 Physiologists
035 Dentists
039 Physicians, Surgeons and Dentists, n. e. c.
040 Nurses
041 Midwives and Health Visitors
042 Nursing Attendants and Related Workers
044 Vaccinators
045 Physiotherapists, Masseurs and Related Technicians
046 Sanitation Technicians
047 Optocians and optometrists
053 Teachers, Nursery and Kindergarten Schools
060 Judges and Magistrates
062 Law Assistants
070 Economists
072 Statisticians
073 Geographers
074 Psychologists and Actuaries
075 Personnel Specialists
076 Labour and Social Welfare Workers, Social Workers who are not elected officials
077 Sociologists and Anthropologists
078 Historians, Archeologists, Political Scientists and Related Workers
079 Social Scientists and Related Workers, n. e. c.
080 Authors
081 Editors, Journalists and Related Workers
082 Translators, Interpreters and Language Specialists
083 Painters, Decorators and Commercial Artists
084 Sculptors and Modellers
085 Actors and Related Workers
086 Musicians and Related Workers
087 Dancers and Related Workers
089 Artists, Writers and Related Workers, n. e. c.
090 Draughtsmen
091 Laboratory Assistants
099 Science and Engineering Technicians, n. e. c.
0X0 Ordained Religious Workers
0X3 Librarians, Archivists and Related Workers
0X8 Political Workers (who are not elected officials)

0X9 Other Professional, Technical and Related Workers, n. e. c.
102 Administrators and Executive Officials, Local Bodies
110 Directors and Managers, Wholesale Trade
120 Directors, Managers and Working Proprietors, Banks
121 Directors, Managers and Working Proprietors, Insurance
129 Directors, Managers and Working Proprietors, Financial Institutions, n.e.c.
130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
136 Directors, Managers and Working Proprietors, Other Services
139 Directors, Managers and Working Proprietors, n. e. c.
201 Cashiers
202 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors (Excluding those on moving transport)
221 Punch Card Machine Operators
229 Office Machine Operators, n. e. c.
311 Agents, Brokers and Salesmen, Real Estate
312 Brokers and Agents, Securities and Shares
313 Auctioneers
314 Valuers and Appraisers
319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers, n. e. c.
321 Manufacturers' Agents
329 Commercial Travellers and Manufacturers' Agents, n. e. c.
339 Salesmen, Shop Assistants and Related Workers, n. e. c.
340 Money-Lenders (including Indigenous Bankers)
341 Pawn-Brokers
400 Cultivators (Owners)
401 Cultivators (Tenants)
403 Planters and Plantation Managers
409 Farmers and Farm Managers, n. e. c. (Vegetable and Fruit growers)
410 Farm Machinery Operators
413 Tappers (Palm, Rubber trees, etc.)
414 Agricultural Labourers
420 Hunters
421 Trappers
429 Hunters and Related Workers, n. e. c.
430 Fishermen, Deep Sea
432 Conch and Shell Gatherers, Sponge and Pearl Divers
440 Forest Rangers and Related Workers
443 Charcoal Burners, Kattha Makers and Forest Product Processers,
502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n. e. c.
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas
520 Mineral Treaters
590 Miners, Quarrymen and Related Workers, n. e. c.
600 Deck Officers and Pilots, Ship
601 Ship Engineers
611 Engine-Room Ratings, Firemen and Oilers, Ship
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators
630 Drivers
631 Firemen
640 Tramcar Drivers
650 Conductors
651 Guards
652 Brakesmen
660 Inspectors, Supervisors and Station Masters, Permanent Way Inspectors of Railways
661 Traffic Controllers
662 Signalmen and Pointsmen
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
681 Messengers (including Dak Peons)

690 Ticket Sellers, Ticket Examiners and Ticket Inspectors including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
693 Inspectors, Traffic Controllers and Despatchers, Communication
694 Workers in Communication Occupations, n. e. c.
701 Blow-room Workers and Carders
703 Warpers and Sizers
705 Pattern Card Preparers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
711 Hat and Head-gear Makers
712 Furriers
713 Upholsterers and Related Workers
714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
715 Sewers, Embroiderers and Darners, Textile and Fur Products
719 Tailors, Cutters, Furriers and Related Workers, n. e. c.
720 Shoe Makers and Shoe Repairers
721 Cutters, Lasters, Sewers, Footwear and Related Workers
722 Harness and Saddle Makers
729 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers, n. e. c.
730 Furnacemen, Metal
731 Annealers, Temperers and Related Heat Treaters
732 Rolling Mill Operators, Metal
734 Moulders and Coremakers
735 Metal Drawers and Extruders
739 Furnacemen,. Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers, n. e. c.
740 Precision instrument Makers, Watch and Clock Makers and Repairmen
742 Jewellery, Engravers
750 Fitter-Machinists, Tool Makers and Machine Tool Setters
751 Machine Tool Operators, Knife Makers
752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
755 Plumbers and Pipe Fitters
756 Welders and Flame Cutters
757 Metal Plate and Structural Metal Workers
758 Electro-Platers, Dip Platers and Related Workers
759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers, n. e. c. (including Metal-engravers other than Printing)
760 Electricians, Electrical Repairmen and Related Electrical Workers.
761 Electrical and Electronics Fitters
762 Mechanics-Repairmen, Radio and Television
763 Installers and Repairmen, Telephone and Telegraph
764 Linemen and Cable Jointers
769 Electricians and Related Electrical and Electronics Workers, n. e. c.
771 Shipwrights and Boat Builders (Wood)
772 Sawyers and Wood Working Machinists
773 Coach and Body Builders
774 Cart Builders and Wheelwrights
775 Cabinet Makers
780 Painters and Paper Hangers
792 Glaziers
793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
800 Type-setting Machine Operators
801 Compositors
802 Proof Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photolitho Operators, Photolithographers
806 Engravers, Etchers and Block Makers (Printing)

807 Stereotypers
808 Book-Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n. e. c.
810 Furnacemen, Kilnmen and Ovenmen
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n. e. c.
821 Crushers and Pressers, Oil-seeds
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, Makers of Ice, n. e. c.
830 Batch and Continuous Still Operators
831 Cookers, Roasters and Other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calendrers, Chemical and Related Processes
834 Paper Makers
839 Chemical and Related Process Workers, n. e. c.
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n. e. c.
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
860 Checkers, Testers, Sorters, Weighers and Counters, Weighmen
861 Packers, Labellers and Related Workers
870 Operators, Stationary Engines and Related Equipment
871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and other Construction Machinery, n. e. c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers, n. e. c.
890 Loaders and Unloaders
900 Fire Fighters and Related Workers
902 Customs, Examiners, Patrollers and Related Workers
909 Fire Fighters, Policemen, Guards and Related Workers, n. e. c.
913 Ayas, Nurse-maids
919 House Keepers, Cooks, Maids, and Related Workers, n. e. c.
920 Waiters, Bartenders and Related Workers (Institutional)
930 Building Care-takers
951 Dry-cleaners and Pressers
960 Athletes, Sportsmen and Related Workers
970 Movie Camera Operators
979 Other Photographers
990 Embalmers and Undertakers
X00 Workers without Occupations, Matriculates and above
X08 Workers without Occupations, Literates
X09 Workers without Occupations, Other
X90 Workers not reporting Occupation

13. **Table B-VI—Occupational Divisions of persons at work other than at cultivation, classified by sex, broad age-groups and educational levels in Urban Areas only**—This Table gives the data up to Divisions of the National Classification of Occupations for all the urban areas in the district. It deals with literate workers other than those who work as cultivators and as agricultural labourers. The population under each division is classified by four broad age-groups, 0—14, 15—34, 35—59, 60+ and Age not stated, which are further cross-tabulated according to the educational levels.

14. **Table B-VII Part A—Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural Labourer**—This Table is a cross-tabulation in the case of persons whose principal and secondary work are any two of (i) cultivation, (ii) agricultural labour or (iii) household industry. This is an important Table as it shows the extent to which cultivation is supplemented by household industry and vice versa. The type of household industries for the district are shown in Divisions and Major Groups of I. S. I. C. separately for Total, Rural and Urban. Major Groups having secondary workers less than 5 per cent of the Principal workers are omitted from this Table and shown in Appendix. The affected Divisions are marked with an asterisk (*).

15. **Table B-VII Part B—Industrial Classification by sex of persons working in Non-household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry**—This Table gives the data on the basis of cross-tabulation in the case of persons who are principally engaged in non-household industry, etc. It shows the principal workers in each Division and Major Group followed by additional workers in each Division and Major Group. It is presented separately for Total, Rural and Urban.

16. **Table B-VIII Parts A and B—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels**—This Table which deals with the classification of unemployed persons by their educational standards and age-groups is presented in two parts : Part A for the Urban areas and Part B for the Rural areas in this district. Both these parts give separate data in respect of those who are seeking employment for the first time and for those persons who were employed before but are now out of employment and are seeking work. In the first case the broad age-groups are 15—19, 20—24, 25—29, 30—34, 35+ and in the latter case 15—19, 20—24, 25—34, 35—44, 45—59 and 60+. The educational levels as given in Table B-III Parts A and B are followed in these Tables respectively for finding out the educational qualifications of the unemployed persons in the respective age-groups.

17. **Table B-IX—Persons not at work classified by sex, broad age-groups and type of activity**—This Table deals with the categorization of non-workers according to their eight-fold activities. The data for the broad age-groups are given separately for Total, Rural and Urban in respect of the district; but for each subdivision and police station it is supplied for Rural only. The study of age-groups with reference to age-tables will throw light on the children of school going age who are not attending school and persons in working age-groups who are not working.

APPENDIX TO TABLE B-IV PART C

Minor Groups having less than 1 per cent of the workers of the respective divisions (less than 0·5 per cent in case of minor groups of Division 2 & 3) which have been omitted in the Table B-IV Part C are shown in this Appendix. The figures of these minor groups giving the number of minor group and the number of male and female workers separately for household industry and non-household industry are shown in run on lines.

2. The following abbreviations are used :

H. I. — Household Industry

N. H. I. — Non-household Industry

T — Total

U — Urban

M — Males

F — Females

3. The three digit code number which represents the minor group is followed by household industry or non-household industry with the respective male and female workers within brackets.

APPENDIX TO TABLE B-V

Families having less than 1 per cent of the workers of the respective Divisions (less than 0·5 per cent in case of families of Division 7-8), which are omitted in Table B-V have been shown in this Appendix.

2. Abbreviations—The following symbols and abbreviations are used :

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV—At Household Industry

V—In Manufacturing other than Household Industry

VI—In Construction

VII—In Trade and Commerce

VIII—In Transport, Storage and Communications

IX—In Other Services

M—Males F—Females

3. The three digit code number which represents the occupational family is followed by the industrial category in roman figures with its respective number of male and female workers inside the brackets.

Description of Divisions :

0 Professional, Technical and Related Workers
1 Administrative, Executive and Managerial Workers
2 Clerical and Related Workers
3 Sales Workers
4 Farmers, Fishermen, Hunters, Loggers and Related Workers
5 Miners, Quarrymen and Related Workers

CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

APPENDIX TO TABLE B-VII PART A

This Appendix shows the Major Groups of Household Industry where persons having Secondary work are less than 5 per cent of the persons at the Principal work. The two digit code numbers stand for the Major Groups of I. S. I. C. The figures in brackets represent the male and female workers under the Major Groups shown before the brackets.

The following abbreviations have been used in this Appendix :

T—Total R—Rural U—Urban
II—As Cultivator
III—As Agricultural Labourer
M—Male
F—Female

01 T-II (M-4, F-0), R-II (M-4, F-0),

02 T-II (M-4, F-2), III (M-4, F-6), R-II (M-4, F-2), III (M-4, F-6),

24 T-II (M-9, F-1), III (M-6, F-93), R-II (M-7, F-1), III (M-6, F-23), U-II (M-2, F-0),

26 T-II (M-3, F-0), III (M-5, F-0), R-II (M-3, F-0), U-III M-5, F-0),

29 T-II (M-1, F-0), III (M-1, F-0), U-II (M-1, F-0), III (M-1, F-0),

30 T-II (M-6, F-0), III (M-2, F-0), R-II (M-5, F-0) III (M-1, F-0), U-II (M-1, F-0) III (M-1, F-0),

31 T-II (M-5, F-0), III (M-6, F-0), R-II (M-5, F-0), III (M-1, F-0), U-III (M-5, F-0),

32 T-II (M-6, F-0), R-II (M-1, F-0), U-II (M-5, F-0),

33 T-II (M-13, F-0), III (M-4, F-0), R-II (M-13, F-0), U-III (M-4, F-0),

37 T-II (M-1, F-0), III (M-3, F-0), R-II (M-1, F-0), U-III (M-3, F-0),

38 T-II (M-20, F-0), III (M-1, F-0), R-II (M-20, F-0), U-III (M-1, F-0).

TABLE-B SERIES

HOUSEHOLD ECONOMIC TABLES

Household Economic Tables are compiled for the first time in 1961 Census. The contents of each Table appearing in this volume are briefly explained below :

2. **Table B-X—Sample Households (i) engaged neither in Cultivation nor Household Industry, (ii) engaged in Cultivation or Household Industry, but not in both and (iii) engaged both in Cultivation and Household Industry for All areas**—This Table is prepared on a 20 per cent sample of households and for Total, Rural and Urban households. All the households are divided into four categories :

(*i*) Households engaged neither in Cultivation nor in Household Industry

(*ii*) Households engaged in Cultivation only

(*iii*) Households engaged in Household Industry only

(*iv*) Households engaged both in Cultivation and Household Industry

This Table is important as it divides all the households into three main sectors of economic activity. The information is supplied for the district and each police station in the district.

3. **Table B-XI—Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban areas separately**—This Table, which is prepared on a 20 per cent sample households for Rural and Urban areas separately, presents a more detailed examination of the Cultivating Households which have been separated in the previous Table. Households engaged in cultivation are classified according to the size of land cultivated. The holding sizes in acres are less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9 and 50+ acres. It is further cross-tabulated by interest in land, namely, (*i*) land owned or held from Government, (*ii*) held from private persons or institutions for payment in money, kind or share and (*iii*) partly held from Government and partly from private persons for payment in money, kind or share. This Table gives useful information on the size of the holdings in this district and also in each police station.

4. **Table B-XII—Sample Households engaged in Cultivation only classified by Size of Land Cultivated and number of Family Workers and Hired Workers in Rural and Urban areas separately**—This Table, which is compiled on a 20 per cent sample of households, has made further study of households engaged in cultivation. Each household having a particular size of holding mentioned in Table B-XI has been cross-tabulated with reference to number of persons working in cultivation. Cultivating households according to number of persons of either sex engaged in cultivation are classified into five groups, namely, 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons. The hired workers are separated from family workers whose sex-composition is also given. This is an important Table as the size and scale of agricultural enterprise in the Rural and Urban areas of this district and in the Rural areas of each police station can be deduced from it.

5. **Table B-XIII—Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately**—This Table which is prepared on a 20 per cent sam-

ple of households for Rural and Urban areas, deals with Households engaged both in Cultivation and Household Industry. The nature of Household Industry in which cultivating households with a particular size of holding are engaged, are presented in this Table. The nature of the Household Industry is indicated by Divisions and Major Groups of I. S. I. C. This Table throws light on Household Industries which are carried on as ancillary to cultivation. It endeavours to establish correlation between size and scale of cultivation with that of Household Industry.

6. **Table B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in All areas**—PART A—**Households classified by Major Groups of Principal Household Industry and number of persons engaged,**

PART B—**Households classified by Minor Groups of Principal Household Industry—**

This Table which relates to Households engaged in Household Industry only is prepared on a 20 per cent sample of households. It is presented in two parts. Part A deals with Households classified by Major Groups of Principal Household Industry and number of persons engaged. The number of persons engaged in each Industry are grouped under 1, 2, 3—5, 6—10 and more than 10 persons. This information is supplied for Divisions and Major Groups of I. S. I. C. separately for Total, Rural and Urban. Part B deals with Households classified by Minor Groups of Household Industry. Number of Households engaged in Household Industry under each Minor Group are shown in it for all areas.

7. **Table B-XV—Sample Households engaged both in Cultivation and Household Industry classified by Size of Land in Rural and Urban areas separately**—This Table which is prepared on 20 per cent sample of Households shows the households engaged both in Cultivation and Household Industry by size of holdings in Rural as well as in Urban areas. An analysis has been made of persons working in these households with reference to the size of the holdings. In cases where more than 1 person are employed, the number of family workers and hired workers are separated. This Table establishes correlationship between the scale of Household Industries and the scale of Cultivation.

8. **Table B-XVI—Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in All areas**—This Table which is confined to Principal Household Industry only, is prepared separately for Total, Rural and Urban areas for this district on the basis of 20 per cent sample of Households. It gives data in respect of Households engaged both in Household Industry and Cultivation or in Household Industry without Cultivation. Household Industries dealt in this Table are shown by Divisions and Major Groups. As many of the Household Industries are seasonal, this Table indicates the number of Households engaged in industrial occupations for different periods in the year ranging from 1—3 months, 4—6 months, 7—9 months and 10 months to 1 year.

9. **Table B-XVII—Sample Households classified by (i) number of male and female members by size of Households and (ii) engaged (*a*) neither in Cultivation nor in Industry, (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated**—This Table which is compiled on a 20 per cent sample of Households gives data for Total, Rural and Urban areas of this district. It is intended to show family sizes distributed according to one member, 2—3 members, 4—6 members, 7—9 members and 10 members and over. This is

cross-tabulated by households of rural areas engaged (*i*) neither in Cultivation nor in Household Industry, (*ii*) in Household Industry only and (*iii*) in Cultivation. Households of rural areas engaged in Cultivation are further classified according to the sizes of the holding, i.e., less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9 and 50+acres. This Table is important as it endeavours to correlate the size of the Household with the economic activity of the Household, particularly in the Rural areas.

10. The total number of Households and its sexwise population of this district are given below :

Total Rural Urban	Total No. of House-holds	Total Household Population		
		Persons	Males	Females
1	2	3	4	5
Total	591,792	3,052,946	1,524,747	1,528,199
Rural	554,117	2,845,980	1,406,479	1,439,501
Urban	37,675	206,966	118,268	88,698

TABLE B-X—HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY *FOR ALL AREAS*

(Based on 20 per cent sample)

APPENDIX TO TABLE B-XIII

Major Groups of Household Industry having less than 10 per cent of the respective Divisions, which are omitted from the main Table, are shown in this Appendix. Major Group code numbers followed by the size of land and the number of households within brackets are shown in run on lines.

The following symbols are used in this Appendix :—

Less than 1 acre	..	A
1·0— 2·4 acres	..	B
2·5— 4·9 acres	..	C
5·0— 7·4 „	..	D
7·5— 9·9 „	..	E
10·0—12·4 „	..	F
12·5—14·9 „	..	G
15·0—29·9 „	..	H
30·0—49·9 „	..	I
50+ „	..	J
Unspecified	..	K

Rural— 00 (A-3, B-1, C-1, E-1); 01 (B-1, F-1); 02 (D-1); 03 (A-4, B-18, C-13, D-2, E-2, F-1); 22 (A-8, B-11, C-7, D-1, E-1); 24 (A-7, B-7, C-4); 25 (A-1, B-1, C-2, D-1); 27 (A-10, B-11, C-7, D-7, E-3, F-1); 29 (C-2); 30 (A-4, B-7, C-4, D-1, F-1); 31 (A-6, B-5, C-4); 33 (B-1, C-1, D-1); 36 (A-61, B-149, C-79, D-19, E-8, F-7, G-1, H-3, K-1); 38 (A-1, B-1, C-1, D-1); 39 (A-91, B-129, C-76, D-26, E-8, F-6, H-2, K-3).

Urban— 31 (A-1).

APPENDIX TO TABLE B-XIV PART A

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions, which are omitted from the main Table, are shown in this Appendix. The Major Groups having the number of Households and number of persons engaged in each Household Industry are shown within brackets and are presented in run on lines.

The following symbols are used in this Appendix:—

1	Person	A
2	Persons	B
3—5	Persons	C
6—10	Persons	D
More than 10	Persons	E
	Unspecified	F

Total— 00 (A-4, B-4, C-1); 01 (A-3, C-1), 02 (C-1); 22 (A-25, B-7, C-2, E-2, F-1); 24 (A-11, B-3); 25 (A-4,C-4); 27 (A-70,B-20, C-14, E-1); 29 (A-2, B-2); 30 (A-3, B-4, C-1); 31 (A-13, B-7, C-1, D-1); 32 (A-1); 33 (A-5, B-3, C-2, E-1, F-1); 34-35 (A-100, B-82, C-57, D-8); 36 (A-63, B-50, C-26, D-2, E-1); 38 (A-2)

Rural— 00 (A-2, B-2); 01 (A-3, C-1); 22 (A-17, B-7, C-1, E-1, F-1); 24 (A-11, B-3); 25 (C-2,); 27 (A-44, B-14, C-3); 29 (A-1, B-1); 30 (A-3, B-4, C-1); 31 (A-9,B-5); 33 (A-1, B-2, C-1, F-1); 34-35 (A-86, B-67, C-46, D-6); 36 (A-51, B-43, C-21, D-1, F-1)

Urban— 00 (A-2, B-2, C-1); 02 (C-1); 22 (A-8, C-1, E-1); 25 (A-4, C-2); 27 (A-26, B-6, C-11, E-1); 29 (A-1, B-1); 31 (A-4, B-2, C-1, D-1); 32 (A-1); 33 (A-4, B-1, C-1, E-1); 34-35 (A-14, B-15, C-11, D-2); 36 (A-12, B-7, C-5, D-1); 38 (A-2)

(Based on 20 per cent sample)

PART B—HOUSEHOLDS CLASSIFIED BY MINOR GROUPS OF PRINCIPAL HOUSEHOLD INDUSTRY

Code No. of I.S.I.C.	Household Industry Minor Group (Description)		Number of Households		
			Total	Rural	Urban
1	2		3	4	5
	All Industries	...	**3,474**	**3,003**	**471**
0090	Production of other Agricultural Produce (including fruits and nuts not covered by 006 and flowers) not covered above	...	9	4	5
0151	Pan cultivation	...	4	4	...
0252	Production of lac	...	1	...	1
0300	Production of fish by fishing in sea	...	1	1	...
0310	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries	...	30	30	...
0401	Rearing of goat for milk and animal power	...	12	10	2
0402	Rearing of buffalo for milk and animal power	...	7	6	1
0403	Rearing of cows for milk and animal power	...	112	96	16
0405	Production and rearing of livestock mainly for milk and animal power, n. e. c.	...	94	90	4
0442	Collection of wax and honey	...	2	2	...
0481	Collection of bones	...	1	...	1
0484	Production of other animal husbandry products, such as, skin, ivory, teeth and hair, etc.	...	9	...	9
2002	Hand pounding of rice by Dhekhi or Ukhal	...	1	1	...
2006	Parching of grains	...	86	74	12
2021	Gur and Khandsari making from sugarcane and palm	...	6	2	4
2042	Fish currying or curing and salting (currying applies more to skin and hide)	...	1	1	...
2050	Production of bread, biscuit, cake and other bakery products	...	3	3	...
2060	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products	...	23	21	2
2070	Oil pressing ghani, kolhu or by small machines	...	18	14	4
2092	Making of sweetmeats, laddu, peda, barphi, batasa, etc.	...	116	87	29
2097	Making of other food products for residuary snacks	...	238	230	8
2200	Manufacture of bidi	...	34	25	9
2210	Manufacture of hookah tobacco	...	1	...	1
2250	Manufacture of jerda, kimam, khaini and other chewing tobacco	...	2	2	...
2300	Cotton ginning, cleaning, carding, pressing and baling	...	4	4	...
2310	Cotton spinning (by charkha and takali)	...	51	51	...
2340	Cotton cloth weaving in powerlooms	...	1	1	...
2350	Cotton cloth weaving in handlooms	...	725	640	85
2381	Making of fishing net	...	18	18	...
2442	Dyeing and bleaching of jute	...	14	14	...
2500	Wool baling and pressing	...	2	2	...
2530	Spinning of wool by charkha or takali	...	6	...	6
2711	Making of hosiery goods, such as, banyans, socks, sweaters, mufflers, etc.	...	4	...	4
2721	Embroidery and making of phulkari	...	3	3	...
2732	Traditional garments	...	74	37	37
2771	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre	...	1	...	1
2774	Coconut curing	...	19	17	2
2780	Manufacture and repair of umbrellas	...	4	4	...
2800	Sawing, planing and milling of wood	...	1	1	...
2810	Manufacture of wooden furniture and fixtures	...	111	82	29
2820	Manufacture of structural wooden goods (including treated timber), such as, beams, posts, doors, windows	...	83	83	...
2831	Carpentry works concerned with repair of agricultural implements (wood)	...	16	16	...
2849	Manufacture of other wooden products, n. e. c.	...	28	27	1

(Based on 20 per cent sample).

PART B—HOUSEHOLDS CLASSIFIED BY MINOR GROUPS OF PRINCIPAL HOUSEHOLD INDUSTRY

Code No. of I.S.I.C.	Household Industry Minor Group (Description)	Number of Households		
		Total	Rural	Urban
1	2	3	4	5
2850	Manufacture of match splinters, plywood and veneers ...	1	1	...
2883	Making of mats, handfans and umbrellas from palm leaves ...	86	78	8
2885	Making of baskets and broomsticks ...	320	319	1
2888	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo ...	11	11	...
2889	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products, n.e.c.	179	172	7
2921	Making of envelopes and paper bags ...	1	...	1
2923	Making of kite ...	3	2	1
3010	Printing and publishing of books ...	8	8	...
3102	Currying, tanning and finishing of hides and skins, preparation of finished leather ...	1	1	...
3111	Making of leather boots, shoes or chappals (slippers, sandals) ...	19	11	8
3150	Repair of all other leather products except footwear ...	2	2	...
3200	Vulcanising tyres and tubes ...	1	...	1
3311	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc. ...	1	1	...
3330	Manufacture of fireworks and other explosives, such as, Pataka, etc. ...	3	2	1
3355	Manufacture of kumkum and hinglo ...	1	1	...
3357	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations ...	3	1	2
3358	Manufacture of perfumes, cosmetics and other toilet preparations, n. e. c. ...	4	...	4
3401	Making of bricks ...	4	2	2
3421	Manufacture of lishu ...	2	2	...
3434	Manufacture of other structural stone goods, stone dressing and stone crushing, n. c. c. ...	1	1	...
3440	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone ...	1	1	...
3500	Making of earthenware, such as, pottery, etc. ...	232	197	35
3550	Making of clay models, earthen images, busts and statues ...	3	2	1
3561	Making of earthen toys and artware ...	4	...	4
3640	Manufacture of iron and steel furniture ...	4	4	...
3655	Making of other brass and bell-metal products, n. e. c. ...	49	38	11
3671	Making of tin utensils ...	4	1	3
3672	Making of articles from tin sheets ...	2	2	...
3675	Manufacture of other metal products (excluding iron, brass, bell-metal, aluminium), n.e.c. ...	4	2	2
3691	Manufacture of agricultural implements, such as, ploughshare, khurpi, kudal, etc. ...	22	21	1
3692	Manufacture of light engineering goods including bolts screws ...	1	1	...
3698	Foundry industry (including blacksmithy) ...	56	48	8
3880	Repair of cycle and rickshaw ...	2	...	2
3920	Repairing and servicing of watches and clocks ...	2	...	2
3931	Inlay work with ivory and brass ...	1	1	...
3932	Goldsmithy ...	423	340	83
3933	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones ...	2	2	...
3940	Manufacture, repairing and tuning of musical instruments, such as, harmonium, tabla, sitar, bansuri, etc. ...	8	6	2
3991	Making of tikka and cowdung cakes ...	6	5	1
3993	Making of traditional objects, such as, Orissa, Mysore, and Tanjore paintings, etc. ...	2	2	...
3999	Making and repairing of goods, n. e. c. ...	19	12	7

APPENDIX TO TABLE B-XVI

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions which are omitted from the main Table are shown in this Appendix. These Major Groups followed by number of Households together with the period of working within brackets, are given in run on lines. It is prepared separately for Total, Rural and Urban areas.

The following symbols are used :—

With Cultivation

1 to 3 months	..	A
4 to 6 months	..	B
7 to 9 months	..	C
10 to 12 months	..	D
Months not stated	..	X

Without Cultivation

1 to 3 months	..	E
4 to 6 months	..	F
7 to 9 months	..	G
10 to 12 months	..	H
Months not stated	..	Y

Total — 00 (B-2, D-5, G-1, H-8); 01 (B-1, X-1, H-4); 02 (C-1, (H-1); 03 (B-9, C-6, D-20, X-5, F-11, G-3, H-12, Y-5); 22 (A-1, B-4, C-1, D-19, X-3, E-1, F-3, G-2, H-29, Y-2); 24 (B-3, D-13, X-2, E-1, G-1, H-11, Y-1); 25 (B-2, C-1, D-2, F-2, G-2, H-3, Y-1); 27 (A-1, B-4, C-10, D-22, X-2, F-9, G-4, H-85, Y-7); 29 (D-2, F-1, H-3); 30 (B-1, C-2, D-14, F-1, H-6, Y-1); 31 (A-1, B-4, C-2, D-6, X-3, F-2, G-2, H-18); 32 (H-1); 33 (B-1, D-1, X-1, F-3, G-2, H-7); 36 (A-24, B-78, C-59, D-145, X-26, E-1, F-7, G-12, H-112, Y-10); 38 (B-1, C-1, D-2, G-2)

TABLE-C SERIES

SOCIAL AND CULTURAL TABLES

The contents of the Social and Cultural Tables appearing in this volume are briefly explained below :

2. **Table C-I—Composition of Sample Households by Relationship to Head of Family classified by size of land cultivated (Based on 20 per cent sample)**—This Table shows the family composition of households engaged in different occupations, namely, (*i*) households engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry and (*iii*) households engaged in cultivation. The last category of households are further split up according to the size of the land cultivated by them. It is presented separately for Total, Rural and Urban.

3. This Table gives the sex composition of the members in a household. Heads of households and their spouses, family members and unrelated persons are shown separately. Heads of households can be males or females. Married relations are separated from unmarried family members and among the former the married sons are shown distinct from other married relations. This Table may be of sociological interest indicating the strength of the joint family system.

4. The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of household in the 'Population Record' where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

5. **Table C-II—Age and Marital Status**—This Table shows the marital status of all enumerated persons by their age-groups and sexwise, separately for Total, Rural and Urban. The age-groups conform to international requirements. This is an important demographic Table from which it can be ascertained whether proportions in various marital status conditions have increased or decreased since the last Census and whether any trend is observed in the age of marriage. The data on married females by age-groups can be utilized for forecasting the future births from age specific birth rates.

6. **Table C-III—Age, Sex and Education**—This Table is presented in three parts :

Part A— Age, Sex and Education in All areas

Part B— Age, Sex and Education in Urban areas only

Part C— Age, Sex and Education in Rural areas only

The information which is supplied for broad educational levels is given for five-yearly age-groups up to 34, one age-group 35—44, another for 45—59 and still another for 60+. The educational levels are different for Urban and Rural areas. They are the same as given in Table B-III Parts A and B. This Table is important as it measures the growth of literacy in the total population as well as in different age-groups since last Census.

7. **Table C-V—Mother-tongue (Alphabetical order)**—This Table shows the large number of languages and dialects spoken in the district.

8. **Table C-VII—Religion**—This Table shows the distribution of population according to Religion. It is prepared for Total and Rural areas only.

9. **Table C-VIII—Scheduled Castes and Scheduled Tribes :**

Part A— Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes

Part B— Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes

This Table which gives separate data for Total, Rural and Urban is presented in two parts. Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Both the parts show the distribution of population of Scheduled Castes and Scheduled Tribes respectively by literacy and classification of workers into nine industrial categories and the total number of non-workers. This is a general Table prepared for the first time.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20 per cent sample)

TABLE-E SERIES

HOUSING AND ESTABLISHMENT TABLES

Table E-I—Census Houses and the uses to which they are put—This Table gives details of Census Houses according to their use. It is based on full count figures and furnishes data in respect of the district as a whole. Figures relating to smaller administrative units, viz., subdivisions and police stations with rural and urban break-up will be available in the Report on Housing and Establishments (Census of India, 1961, Vol. XII—Orissa Part IV-B).

2. Census Houses which did not contain any household during house-listing operation have been shown as vacant in this Table. Occupied Census Houses have been classified into various categories as furnished in the Table, such as, dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, etc.

3. To facilitate study of the Table, definitions of terms used are furnished below :

Census House—A Census House means a structure or a part of a structure inhabited or vacant or a dwelling, a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

Shop and shop-cum-*dwelling*—A shop is a place where articles are sold for cash or for credit.

When a part of the Census House is used as shop and the other part as dwelling it is termed as shop-*cum*-dwelling.

Workshop, factory and workshop-cum-*dwelling*—A Census House is considered to be a factory or a workshop if some kind of production, processing, repair or servicing is undertaken therein or if goods or articles are made and sold. The definition is broad enough to cover all kinds of work premises beginning from a big factory to a petty workshed where activities connected with production, processing, etc., are undertaken, however, meagre the scale might be.

When a part of the workshop is used as residence, the Census House is treated as workshop-*cum*-dwelling.

Business Houses—Business Houses are those that are meant for transactions in money or commercial commodities, e. g., bank, exchange, etc.

4. **Table E-II—Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling**—This Table furnishes details in respect of tenure status of households living in Census Houses used wholly or partly as dwelling. It has been prepared on the basis of 20 per cent sample. It gives figures for the district as a whole. Statistics in respect of smaller units, such as, subdivisions and police stations with rural and urban break-up are given in the Report on Housing and Establishments. The total, rural and urban break-up have been further sub-classified according to the tenure status of Census Households.

The term "Census Household" occurring in this Table means a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

"Shop-*cum*-dwelling" and "Workshop-*cum*-dwelling" have been explained in the fly-leaf to Table E-I.

5. **Table E-III—Census Houses used as Factories and Workshops classified by industry, power and no power used and size of employment**—This Table gives the distribution of workshops and

factories in the district with rural and urban break-up by different kinds of fuels used. Factories and workshops are divided into five categories according to the fuel used, viz., factories and workshops run by—

(*i*) Electricity

(*ii*) Liquid fuel

(*iii*) Coal, wood and bagasse

(*iv*) Other power and

(*v*) No power

Factories and workshops classified by different kinds of fuels as above, have further been sub-divided by size of employment, viz., factories employing—

1 Person

2— 5 Persons

6— 9 Persons

10—19 Persons

20—49 Persons

50—99 Persons and

100 Persons and above

6. Size of employment has been determined on the basis of average number of persons employed per day in a factory or workshop. The average number of persons working per day has been worked out from the total number of workers including apprentices, either paid or unpaid employed in the factory or workshop including the owner or proprietor and any of his family members (if working) who were employed during the week preceding the date of enumerator's visit.

7. Figures furnished in Col. 1 of this Table relate to broad group of industries coded under the Indian Standard Industrial Classification Scheme. Further break-up of these industries is available in the Report on Housing and Establishments. The system of notation adopted in the scheme of classification of industries has been explained elsewhere in this volume for convenience of reference.

8. **Table E-IV—Distribution of Sample Households living in Census Houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof**—Like Table E-II, this Table has also been prepared on 20 per cent sample. The number of sample households living in Census Houses used wholly or partly as dwelling has been furnished in this Table separately for each type of predominant materials of wall and of roof. The figures shown are for the district as a whole. Statistics in respect of smaller territorial units, such as, subdivisions and police stations will be available in the Report on Housing and Establishments. This Table classifies various types of predominantly used wall materials into nine categories, viz.,

(1) Grass, leaves, reeds or bamboo

(2) Timber

(3) Mud

(4) Unburnt bricks

(5) Burnt bricks

(6) C. I. sheets or other metal sheets

(7) Stone

(8) Cement concrete

(9) Other materials

9. Likewise, the materials which predominantly compose the roof have been shown under seven different classes, viz.,

(1) Grass, leaves, reeds, thatch, wood or bamboo

(2) Tiles, slate or shingle

(3) Corrugated iron, zinc or other metal sheets

(4) Asbestos cement sheets

(5) Brick and lime

(6) Concrete and stone

(7) Other materials

'Roof' means the outer surface of the roof exposed to weather but not the ceiling. In case of multistoreyed building, the intermediate floors have been treated as the roofs of the corresponding lower floors.

10. **Table E-V—Sample Households classified by number of members and by number of rooms occupied**—This Table, which has been prepared on 20 per cent sample relates to households classified by number of members by males and females separately and by number of rooms occupied. It gives the break-up of the total sampled households into households either having no regular room or each having one room, two rooms, three rooms, four rooms and five rooms or more. The figures furnished in the Table are in respect of the district as a whole. Statistics in respect of smaller territorial units, such as, subdivisions and police stations have been furnished in the Report on Housing and Establishments.

11. A room is defined as a structure which usually has four walls with one door way at least and with roof overhead and is wide and long enough for a person to sleep in, i. e., it should be at least 6 ft long. Unenclosed verandah, kitchen, store, garage, cattleshed and latrine are not treated as rooms.

TABLE-SCT SERIES

TABLES ON SCHEDULED CASTES AND SCHEDULED TRIBES

Special Tables have been devised during the Census of 1961 to give the population figures for each Scheduled Caste and Scheduled Tribe by their religion, age, marital status, education, etc. The contents of each Table appearing in this volume are briefly described below.

2. **Table SCT-I—Industrial Classification of Persons at work and of Non-workers by sex**—This Table is presented in two parts :

Part A— Industrial Classification of Persons at work and of Non-workers by sex for Scheduled Castes only

Part B— Industrial Classification of Persons at work and of Non-workers by sex for Scheduled Tribes only

This Table gives the population of each Scheduled Caste and Scheduled Tribe separately for Rural and Urban. It also shows in which section of industry, members of each Scheduled Caste and Scheduled Tribe are working. Information regarding each caste and tribe which are often required for drawing up various welfare schemes are given in this Table.

3. The total population of the Scheduled Castes and Scheduled Tribes in the district, each subdivision and police station is given in the statement below :

District/Subdivision/Police Station		Scheduled Castes			Scheduled Tribes		
		Persons	Males	Females	Persons	Males	Females
1		2	3	4	5	6	7
CUTTACK DISTRICT	...	**547,922**	**271,982**	**275,940**	**85,863**	**43,481**	**42,382**

Narsingpur PS	...	6,276	3,196	3,080	1,399	699	700

4. Table SCT-II—Age and Marital Status—This Table is presented in two parts :

Part A— Age and Marital Status for Scheduled Castes

Part B— Age and Marital Status for Scheduled Tribes

This Table which corresponds to Table C-II supplies information regarding the marital status of the individual Scheduled Caste and Scheduled Tribe in the broad age-groups of 0—14, 15—44, 45+ and age not stated.

5. Table SCT-III Part A—(i) Education in Urban Areas only for Scheduled Castes, (ii) Education in Urban Areas only for Scheduled Tribes; Part B—(i) Education in Rural Areas only for Scheduled Castes, (ii) Education in Rural Areas only for Scheduled Tribes—The literacy and educational levels for each Scheduled Caste and Scheduled Tribe are shown in this Table. The different educational levels for Urban areas and Rural areas are given below :—

Urban areas	Rural areas
Illiterate	Illiterate
Literate (without educational level)	Literate (without educational level)
Primary or Junior Basic	Primary or Junior Basic
Matriculation or Higher Secondary	Matriculation and above
Technical diploma not equal to degree	
University degree or Post-graduate degree other than technical degree	
Technical degree or diploma equal to degree or Post-graduate degree	

6. Table SCT-IV—Religion—This Table is given in two parts : Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Scheduled Castes may belong to either Hindu or Sikh religion only. None of the members of Scheduled Castes in this State have returned themselves as Sikh. As all the Scheduled Castes are Hindus and as their population is already available in SCT-I Part A, the corresponding portions of this Table is omitted.

7. Part B shows the Scheduled Tribes who may belong to any religion. The religions returned in this State are Christian, Hindu and Sarna.

8. Table SCT-V Part A—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Castes (Based on 20 per cent sample) and Part B—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Tribes (Based on 20 per cent sample)—This Table which corresponds to Household Economic Table B-XI gives useful information regarding the size of holding of Scheduled Castes and Scheduled Tribes separately for rural areas only. The interest in land is classified into three categories mentioned below :

I. Owned or held from Government
II. Held from private persons or institutions for payment in money, kind or share
III. Partly held from Government and partly from private persons for payment in money, kind or share

Each of the above categories is cross-tabulated according to the size of the land cultivated by each household.

9. Table SC-I—Persons not at work classified by Sex, Type of Activity and Educational Levels for Scheduled Castes—This is a special Table prepared for total Scheduled Castes and not for individual caste. Three categories of non-working population, namely, full-time students, persons seeking employment for the first time and persons employed before but now out of employment and seeking work are shown in this Table along with the total non-workers in this district. It gives useful information regarding students and unemployed persons among the Scheduled Castes. The above categories of non-workers are further classified according to their broad educational levels indicated below :

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Above Matriculation or Higher Secondary

10. Table ST-I—Mother-tongue and Bilingualism for Scheduled Tribes—This is one of the Special Tables meant for Scheduled Tribes only. This Table displays the peculiar languages and dialects of the tribal population. The dialect of each of the tribes is given. Those members of the tribes who have moved out of their homes and speak some other language in addition to the mother-tongue as a result of their contact with local population are also shown in this Table. This Table is very useful for the linguistic study of tribal population. It also helps to find out as to how many of the tribes have forgotten their original language after coming in contact with the local language or the language of the majority. Secondary languages having speakers less than 0·1 per cent of the population are omitted.

11. Table ST-II—Persons not at work classified by Sex, and Type of Activity for Scheduled Tribes—This is the second Special Table for the Scheduled Tribes corresponding to SC-I for the Scheduled Castes. It differs from the latter Table in as much as it gives the data for each Scheduled Tribe but does not show the broad educational levels. Besides the total non-working population of each tribe, three categories of non-workers, namely, full-time students, persons seeking employment for the first time and persons employed before but now out of employment and seeking work are presented in it for this district.

LIST OF INDUSTRIES IN THE DISTRICT OF CUTTACK

The Table furnished hereafter gives a list of industries conducted in the urban and rural areas of district Cuttack. The list has been prepared in the following manner :

Various industries existing in a particular village were enlisted at first. The villages were then arranged in the order in which they appear in the Village Directory. In this manner the list of villages within one particular police station was completed. This was followed by similar lists of other police stations, one after the other.

Indication of the existence of a particular industry is given against the village concerned, not by mentioning the descriptive name of the industry, but by recording the code number of the industry, as prescribed under the Indian Standard Industrial Classification Scheme. This code number is followed by another figure enclosed in brackets which represents the total number of establishments relating to that particular industry existing within the village concerned.

In presenting the consolidated list of a police station, first of all the aggregate list of industries for the police station as a unit has been given. This aggregate list is then broken up into a consolidated list for rural areas and a similar list for urban areas, if the police station has got both rural and urban areas. Similar procedure has been adopted in presenting the consolidated list for the district. Lastly comes the individual village list, indicating all such villages as may have one or more industries. Names of villages which have no industry of any approved type, have been omitted from the list.

The industrial code numbers have been exhibited against a village (or police station or district as the case may be) in ascending order. For example, Division "0" of the I. S. I. C. Scheme appears first, followed by Division "2 & 3".

A list of code numbers showing against each, the name of the industry to which it relates is furnished in the note to Table B-IV Part C of the General Economic Tables for convenience of reference.

TABLE ON FAIRS AND FESTIVALS IN THE DISTRICT OF CUTTACK

This Table gives a list of villages where important fairs or festivals of the district are held. The names of the villages have been arranged police-stationwise according to their serial numbers in the Primary Census Abstract. The list includes only those fairs which attract a large number of people of the village or outside.

Column 1 of the Table gives the name of the village together with its serial number. The name of the fair or festival held in the village is furnished in column 2 while columns 3 and 4 respectively furnish the name of the month in which such fair is held and the approximate number of persons attending the fair.

The list is prepared on the basis of information furnished by the primary school teachers of the locality concerned to whom a list of questionnaire was circulated by post with request to furnish the replies. The number of people gathering at the fair is based on eye estimation and may, therefore, be treated as approximate. Name of the month in Column 3 is in terms of English calendar month which does not exactly coincide with the Oriya month. The name of the English month, when the festival usually falls, has therefore, been furnished in this column.

Besides the above information, a few more details were collected through the agency of the primary school teachers. Such details will be available in another volume where the Fairs and Festivals of Orissa are proposed to be published in an elaborate manner.

FAIRS AND FESTIVALS IN RURAL AREAS ONLY

Name of village with its serial number		Name of Fair or Festival	Time of occurrence	Approximate number of persons attending

PART III

OFFICIAL STATISTICS

Contains

Statistics relating to Rainfall, Agriculture, Public Health, Vital Events, Administration, Police, Jails, Co-operative Societies, Revenues, Community Development, Grama Panchayat, Education, Animal Husbandry, Mines, etc.

OFFICIAL STATISTICS

This part presents statistics relating to different Departments of the State Government, such as, agriculture, public health, administration including police and jails, co-operative societies, education, community development, grama panchayats, and mines, etc., which are embodied in 41 Tables. The statistics were collected from different offices mostly by deputing staff from the Census organization. Except only in a few cases where it was possible to take out the figures from published reports of the Departments concerned, most of these had to be gathered from the various official registers and manuscript reports. The names of the Departments, from which the statistics were obtained, are indicated below the Tables concerned. The Tables pertaining to different subjects given in this Part may be broadly classified as follows :

Subjects	Table Nos
Rainfall and Temperature ...	1— 3
Agriculture ...	4 --10
Public Health including Vital Statistics	11— 15
Administration ...	16 -20
Education ...	21—29
Community Development ...	30—32
Grama Panchayats and Panchayat Samitis	33—34
Animal Husbandry ...	35
Co-operation ...	36
Miscellaneous ...	37—41

The district of Cuttack is one of the oldest districts of the State. The records for some of the items are therefore available even for the period prior to the year 1936, when the district came under Orissa province, but those are not in as much details in which they are now maintained. After merger of the neighbouring princely states, the boundary of the district was redrawn in 1949. So the earlier records are not comparable with those of the post-merger years. Hence the collection and production of various official statistics in this Part are limited to the previous decade only. The various Tables presented are briefly explained as follows :

Tables 1-3—Rainfall and Temperature—Two Tables concerning rainfall are presented. Tables 1 (a), 1 (b) and 1 (c) give the monthly rainfall and number of rainy days for three selected rain recording stations in the district for different years of the decade 1951-60. The district has 20 rain recording stations out of which only three stations, namely, Cuttack, Jajpur and Aul were found to be having comparatively more complete records than others. Except Athgarh, all other subdivisions are thus represented. The records for Cuttack may, however, be taken to represent the position for Athgarh subdivision. The figures reproduced in this Table (Table 1 series) have been taken from the rainfall statistics maintained by the Director of Agriculture and Food Production, Orissa, some of which were published in the Orissa Gazette.

Table 2 gives the normals of monthly rainfalls and rainy days based on the records of the 19 rain recording stations of the district during the period from 1901 to 1950. These have been taken from the Memoirs of the India Meteorological Department, Volume XXXI—Part III. This Table also shows the average rainfall and number of rainy days for the district for each of the years during the past decades, based on the records maintained by the Director of Agriculture and Food Production, Orissa.

The rain recording stations work under the responsibility of local officials of various departments, who might be conveniently available at the same station, namely, Thana Officers, Medical Officers, School Teachers, or subordinate Revenue Officers. They are expected to record daily rainfall, if any, and submit monthly reports direct to the Director of Agriculture and Food Prodiction, Orissa. According to the approved arrangement, this report should reach the Directorate of Agriculture and Food Production, Orissa by the 21st

of the following month, but in actual practice, many stations default or delay inordinately in despatching the report. Such default or delay results either due to the post of the Officer-in-charge of the station lying vacant for a considerable length of time, or due to the rain-recording instruments remaining unattended to or unreplaced after damage or loss in some way. For these reasons, the rainfall records of most of the stations in the district were not maintained regularly or properly. In 1960, fifteen out of the 20 stations did not send their reports. Even those five stations, which sent the returns, did not report records for all the months of the year. The rainfall records of the district are, therefore, incomplete and defective.

Table 3 gives statistics about temperature. There is only one observatory in the district at Cuttack. Records of this station for a large number of years are available. The description of climatic condition given in Part I of this Handbook is based on these records. The monthly records of temperature for the year 1961 and normal monthly temperature of Cuttack observatory have been given in this Table. The data was obtained from the Director, Regional Meteorological Centre, Calcutta, and Deputy Director General of Observatories (Climatology and Geophysics), Poona.

Tables 4-10—Agriculture—The agricultural statistics relating to the district are given in the following seven Tables :

Table No	Particulars
4	... Land utilization and area under crops
5	... Classification of area by sources of irrigation
6	... Minor irrigation projects with ayacut area of 100 acres or more each
7	... Estimated yield rates of principal crops per acre
8	... Average wholesale price quotation in respect of staple foodgrains and other important crops during years, 1957 to 1960
9	... Statistics of wages and working hours
10	... Agricultural implements and machineries during the livestock censuses of 1945, 1957 and 1961

The compilation of primary agricultural statistics of a district is done by the District Collector. He furnishes annual statements in prescribed proforma called the Season and Crop Reports to the Director of Agriculture and Food Production, Orissa who is responsible for compilation and presentation of these statistics at the State level. It was noticed that submission of these annual returns during the past decade was delayed or neglected by the Collectors. Further, most of these returns lacked accuracy. An attempt was made to collect these statistics through a second source, i. e., the Community Development Blocks. By the end of 1959-60, only 57·8 per cent of area of the State was covered by the Blocks, and complete data for any district through this source was not available.

Out of the above 7 Tables, Tables 4 and 5 contain statistics about land and areas taken from the Season and Crop Reports, which were further verified in the Directorate of Agriculture and Food Production. None of these reports except the one for 1952-53 has been published so far. The reports for 1950-51 and 1951-52 could not be traced, and those for years beyond 1959-60 had not been compiled. Hence the Tables 4 and 5 contain statistics for only 8 years from 1952-53 to 1959-60.

Areas under the nine categories of land utilization, namely, forests, land put to non-agricultural uses, barren and unculturable land, culturable wastes, fallow other than current, pastures and grazing land, land under miscellaneous tree crops and groves not included in net area sown, net area sown and current fallow are given in Table 4. This Table also gives the areas under some of the important crops and totals of different classification of crops, such as, cereals, pulses, fruits and vegetables, other food crops, non-food crops, etc. The heads of categorization under land utilization adopted in this Table may be defined as follows :

(1) *Forests*—These include all the actually forested areas on land, classed or administered as forests under any legal enactment dealing with forests, whether State-owned or private.

(2) *Land put to non-agricultural uses*—This includes all land occupied by buildings, roads and

railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

(3) *Barren and unculturable land*—All barren and unculturable land like mountains, etc., are shown under this category. The land, which cannot be brought under cultivation except at an exorbitant cost is also classed as unculturable, whether such land is in compact blocks or within cultivated holdings.

(4) *Culturable wastes* -These include land available for cultivation, whether not taken up for cultivation or abandoned after a few years for one reason or the other. Such land may be either fallow or covered with scrubs and jungles which are not put to any use. They may be assessed or unassessed to revenue, and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for 5 years in succession is also included under this category.

(5) *Fallow other than current*—All land, which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than 5 years, are included under this category. These land may have been kept fallow for one or more reasons, namely, poverty of the cultivator, inadequate supply of water, malarial climate, silting of canals and rivers and unremunerative nature of farming.

(6) *Pastures and grazing land*—This includes all grazing land, whether they are permanent pastures and meadows or not. Village commons and grazing land within forest areas are also included under this category.

(7) *Miscellaneous tree crops and groves not included in net area sown*—This includes all cultivable land, which is not included in "net area sown", but is put to some agricultural use.

(8) *Net area sown* - This represents net area sown with crops and orchards, the area sown more than once during a year being counted once only.

(9) *Current fallow* — This represents cropped area which are kept fallow during the current year. For example, if any seedling area is not cropped again in the same year, it may be treated as current fallow.

(10) *Total cropped area*—This represents the total of areas covered with crops, i.e., the sum total of areas covered by all crops, areas sown with crops more than once during the year being counted as separate areas for each crop.

(11) *Area sown more than once*—This covers area on which crops are cultivated more than once during the agricultural year. The acreage is generally obtained by deducting those under "net area sown" from those under "total cropped area".

Table 5 shows the area with facilities of irrigation from different sources, namely, canals, tanks, wells and other sources for the 8 years from 1952-53 to 1959-60.

In Table 6, a list of minor irrigation projects, together with their irrigation potentiality in shape of ayacut areas and location is given. There are many more smaller projects in the district, but only the bigger ones which have ayacut area of 100 acres or more are included in this list. The list was obtained from the Rural Engineering Organization, which is responsible for execution of various minor irrigation works all over the State. Besides executing their own projects, the Rural Engineering Organization is meant to help the Panchayati Raj institutions in the execution of minor irrigation projects costing not more than Rs. 10 lakhs or having an ayacut not exceeding 4,000 acres.

Table 7 gives the rates of yield per acre of 16 principal crops in the district for each year from 1951-52 to 1959-60. The rates have been based on estimated area and production of different crops. The basic data were obtained from the Directorate of Agriculture and Food Production, from which the estimated yield rates were worked out. The estimated yield rates may, however, not be equal to the actual yield rates.

Table 8 relates to price quotations in respect of some of the important crops grown in the district. It has been compiled from the published

reports of the Directorate of Marketing, Orissa. Rates per standard maund or 37·25 Kgs are given in this Table. The 3 marketing centres of the district for which information is given are Cuttack, Kendrapara and Jajpur. They serve all except Athgarh subdivision but the data given for Cuttack may hold good for Athgarh. Annual figures of price quotations for the years 1957 to 1959, and both annual and monthly price quotations for the year 1960 are shown in this Table. Figures for earlier years are not available, and those for the years subsequent to 1960 were not published by the time this Handbook went to the press.

Table 9 shows the average rates of wages and working hours for skilled and unskilled workers during the period from 1956 to 1960, excluding 1958 and 1959. The terms "agricultural labourer" and "subsidiary agricultural labourer" used in this Table are explained at the bottom of the Table.

In Table 10 the number of agricultural machineries and implements recorded in 1945, 1957 and 1961 livestock censuses are given. These were collected from the livestock census reports of the Director of Animal Husbandry and Veterinary Services, Orissa. After formation of the separate Province of Orissa in 1936, livestock censuses were conducted on three occasions during 1945, 1957 and 1961. Data obtained during all these three censuses have been given in this Table. As explained earlier, the statistics for 1945 may not be properly comparable with those for the subsequent two counts of 1957 and 1961.

Tables 11-15—Public health inlcuding vital statistics—The following five Tables on this subject are given :

Table No		Particulars
11	...	Number of live births, still births and deaths in each year during 1951—60 according to sex for rural and urban areas
12	...	Deaths according to causes for rural and urban areas in each year during 1951—60
13	...	Deaths by sex according to age during 1951–60
14	...	Number of births and deaths in each month during 1951—60
15	...	List of hospitals, dispensaries and primary health centres as on 31-3-1961

The birth and death statistics given in Tables 11 to 14 were collected from the registers maintained in the Statistical unit of the Health Directorate, Orissa by the staff deputed from the Census organization. The first three Tables 11, 12 and 13 present only annual figures, whereas the fourth Table contains monthly records. Table 11 gives the number of live and still births and deaths by sex separately for rural and urban areas. Deaths under the seven broad heads, namely, cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases, wounds and accidents and other causes are shown in Table 12 for rural and urban areas. Deaths of males and females in different age-groups are shown in Table 13. Live and still births and deaths due to the seven causes noted above in each month during 1951—60 are given in Table 14.

The terms "live birth" and "still birth", used in these Tables may be defined as follows :

Live birth—Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as, beating of heart, etc.

Still birth—Birth of the already dead or very nearly dead child is considered still birth.

A list of hospitals, dispensaries and primary health centres as on 31-3-1961 showing their location, year of start and number of beds is given in Table 15. These details were supplied by the Health Directorate (Statistical unit), Orissa.

Tables 16-20—Administration—Five Tables have been given on this subject. They are as follows :

Table No		Particulars
16	...	Number of criminal cases reported to different courts, tried and disposed of during 1951—60
17	...	Strength of police during the years 1951, 1956 and 1960
18	...	Statistics of jails
19	...	Receipts relating to land revenue, excise revenue, sales tax, motor spirit tax, entertainment tax and stamps during 1951—61
20	...	Number of documents registered and value of property transferred during 1951—60

The statistics in Table 16 have been partly collected from the published annual reports on criminal justice of the High Court, Orissa and partly from the statement supplied by them in absence of any printed annual reports for the concerned years.

The Inspector General of Police, Orissa supplied information about the strength of police in various ranks for each year during 1951--60. The Table 17, however, shows their number only for 3 years, *viz.*, 1951, 1956 and 1960. Cost of police *per capita* and area and population served per member of the police shown in this Table are based on the 1961 Census population.

The statistics pertaining to jails supplied by the Inspector General of Prisons, Orissa are given in Table 18 which shows the number of jails and subjails, the capacity of district jail and its strength of staff.

The revenue collected in each year in the district during *1951—61* under some of the important items, namely, land revenue, excise revenue, sales tax, entertainment tax, motor spirit tax and sale proceeds of stamps are given in Table 19. These statistics were obtained from the concerned Departments and offices of the State Government and the names of the Departments and offices supplying the data are shown at the bottom of the Table.

Table 20 shows the number of documents registered and value of property transferred between 1951 and 1960. These were collected from the office of the Board of Revenue, Orissa.

Tables 21-29—Education—The Tables given are as follows :

Table No	Particulars
21	... List of colleges, higher secondary and high schools
22	... Number of students appearing at and passing the high school certificate examinations during 1956—60
23	... Number of primary schools existing during 1955-56 and 1960-61
24	... Number of M. E. schools existing during 1955-56 and 1960-61
25	... List of professional and special schools
26	... List of sevashrams and ashram schools
27	... List of Basic schools
28	.. List of newspapers and journals
29	... List of important libraries and reading rooms

The statistics given in these Tables were collected mostly from the office of the Board of Secondary Education, Orissa and the Statistical unit in the office of the Director of Public Instruction, Orissa. Except a published list of high schools and Annual Report of Registrar of Newspapers for India, from which lists of higher secondary and high schools and newspapers and journals were taken, the statistics for no other item were available from any published report. The required information had, therefore, to be collected from the concerned offices.

Table 21 gives a list of colleges, higher secondary and high schools in the district. The number of students appearing at the high school certificate examinations, together with the numbers of successful students and the percentage of success at various examinations conducted during 1956—60 are given in Table 22. Table 23 shows the number of primary schools existing in the district during 1955-56 and 1960-61, the final years of the past two Five Year Plans. Similar information concerning middle schools is given in Table 24. A list of professional and special schools will be found in Table 25. Table 26 gives a list of sevashrams and ashram schools together with the names of the post offices and police stations under whose jurisdiction they lie. Table 27 contains a list of Basic schools.

Table 28 contains a complete list of newspapers and journals issuing from the district. Only *the bigger libraries and reading rooms which are* aided by Government in the Education Department are shown in the Table 29. The location, dates of establishment, Government grant received and the number of books held by some of these libraries are given in the Table.

Tables 30-32—Community Development—The following 3 Tables present the achievements of the Community Development Blocks during the past decade :

Table No	Particulars
30	... List of Blocks with their coverage of villages, Grama Panchayats and area
31	... Achievements in the C. D. programme to the end of 1960-61
32	... Expenditure incurred under broad heads of development in the Community Development Blocks in each year during 1954-55 to 1960-61

The first allotment to the district was a National Extension Service Block in April, 1954. The statistics given in the above 3 Tables, therefore, relate to the period from 1954-55 onwards. The expenditure figures have been compiled from the registers maintained in the office of the Financial Adviser, Community Development and Panchayati Raj Department, and the statistics relating to physical achievements are taken from the reports of the Administrative Intelligence unit of the same Department. Table 30 gives a list of Community Development Blocks in existance on 31-3-1961, together with their dates of start, their headquarters, number of villages, Grama Panchayats and area covered by each. Table 31 shows the physical achievements under some of the important items of the Block programme to the end of 1960-61. The achievements against a few of these items do not relate to all the Blocks as complete information in respect of all of them was not available in the said Department. Such items have been distinguished from the rest.

Details of expenditure under broad heads of the programme, such as, block headquarters staff and contingencies, animal husbandry and agricultural extension, irrigation, health and rual sanitation, education, social education, communication, rural arts, crafts and industries and housing for all the Blocks together for each year between 1954-55 and 1960-61 are given in Table 32. The Blocks submit their monthly expenditure returns to the Financial Adviser's section of the Community Development Branch, where these are compiled and verified with the Accountant General's actuals before adoption for final figures. The statistics given in thisTable have been taken from the expenditure registers thus maintained in the Financial Adviser's office.

Tables 33-34—Grama Panchayats and Panchayat Samitis—Table 33 giving a list of Panchayat Samitis and Grama Panchayats existing in December, 1960, and Table 34 which shows the number of Grama Panchayats with their income and expenditure and number of Adalti Panchayats during the past decade, are the only two Tables given on this subject. The informations given in Table 33 were collected from a published Notification of the Grama Panchayat Department and the statistics in Table 34 have been taken from the Annual reports of the said Department.

Table 35—Animal husbandry—Table 35 gives the number of different categories of livestock recorded in the three livestock censuses of 1945, 1957 and 1961. The numbers for 1961 counts show the livestock belonging to Government, semi-Government and other institutions actually found living on 15-4-61 at sunrise. The census was conducted by the Director of Animal Husbandry and Veterinary Services, Orissa.

Table 36—Co-operation—The number of co-operative societies in different categories, namely, central bank, small-sized, large-sized, multipurpose, grain-golla, marketing, non-agricultural credit, housing, weavers and other industrial co-operative societies, together with their membership and working capital during 1960-61, are given in Table 36. These statistics were supplied by the office of the Registrar of Co-operative Societies, Orissa.

Tables 37-41—Miscellaneous—The following Tables are given on the subjects mentioned against each :

Table No		Particulars
37	...	List of cinema houses and printing presses
38	...	List of railway stations
39	...	Location of mines and production of minerals
40	...	List of industries with capital investment of Rs. 5 lakhs and above
41	...	List of registered factories in 1951 and 1961

The headings of Tables 37-40 are self explanatory. Table 41 contains a list of important registered factories in the district. This has been compiled from the lists obtained from Chief Inspector of Factories, Orissa. The terms 'factory' and 'worker' used in this Table are defined as follows :

Factory means any premises including the precints thereof

(*i*) whereon ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) whereon twenty or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on, but does not include a mine, subject to the operation of the Mines Act, 1952 (XXXV of 1952), or a railway running shed.

Section 85 of the said Act, however, authorises the State Government to declare by notification any place, wherein a manufacturing process is carried on to be a factory within the meaning of the Factories Act, 1948, although it does not fulfil the above requirements of law, provided that the manufacturing process is not being carried on by the owner only with the aid of his family.

Worker is defined to mean a person employed, directly or through any agency, whether for wages or not in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or in any other kind of work incidental to, or connected with the manufacturing process, or the subject of the manufacturing process.
