STATE PUBLICATIONS

DISTRICT HAND BOOKS

District Census Hand Books, for each of the 20 Districts in Andhra Pradesh

PRINTED BY INTEKHAB PRESS, HYDERABAD FOR THE DIRECTOR OF PRINTING, HYDERABAD

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the Census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into two parts. The first part consists of a narrative description of the physical features and history of the district, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a Gazetteer of places and administrative statistics of various departments. The pages of this first part are numbered in Roman numerals. The second part is based mainly on the present Census returns and consists of Statistical Tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc., and a separate Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes and Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health, and transport facilities, etc., if available, would also have been indicated. At the end of the Handbook a tabular statement of fairs and festivals, information about which had been collected through the Census enumerators in answer to a questionnaire, will also be found. The Handbook is enriched with two district maps, one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of 5,000 population and above given at the beginning of Part I and the other showing the talukwise density of population given at the beginning of Part II of this book. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code numbers of each village and town marked will also be found. Thus the District Census Handbook will be a self-contained and convenient book of reference about almost all matters pertaining to the district.

The Handbooks are no doubt coming rather late a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census Tables were time consuming; the administrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and taluk attempted this time also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully is a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well-being over the decades and also serve as a guide in planning for the future. The credit for the compilation of this Handbook goes chiefly to Shri T.J. Solomon, Deputy Superintendent of Census Operations who compiled the greater part of it and to Shri K. M. Ahmed, I.A.S., who took over from him as the Deputy Superintendent of Census Operations. The Handbook Section of the Census Office under the Section Head, Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative Tables. The Cartographic Section in my office in charge of Shri G. Pandurangam, the Head Draughtsman did a magnificient work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR

PART I

INTRODUCING THE DISTRICT

CUDDAPAH DISTRICT

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

CHAPTER I

GENERAL FEATURES

Introductory

Cuddapah district lies in the heart of the tract of land that forms the Southern Deccan Plateau, popularly referred to as the Rayalaseema. Cuddapah Town is the headquarters of the district. The district is made up of eight taluks and an independent sub-taluk comprised in three Revenue Divisions of which Rajampet Division is the Sub-Collector's Division. The area of the district is 5,924 square miles according to the Surveyor General, India. The State Director of Survey and Land Records has computed the area at 5,935.5 square miles of which the rural area is 5,867.1 square miles and the Urban area is 68.4 square miles. The district recorded a population of 1,342,015 (Males : 685,597, Females : 656,418) at the 1961 Census. The statement below gives the area figures and population of each taluk as at 1961 Census.

STATEMENT I-1

Revenue Division	Taluks comprised in Revenue Division	Area in Sq. miles	Population
(1)	(2)	(3)	(4)
CUDDAPAH	Cuddapah taluk	510.0	179,193
	Rayachoti taluk	1,103.0	220,406
	Kamalapuram independent sub-taluk	303.0	83,415
RAJAMPET	Rajampet taluk	1,038.0	206,859
	Sidhout taluk	606.0	84,886
	Badvel taluk	757.0	124,553
JAMMALAMADUGU	Jammalamadugu taluk	613.0	141,772
	Proddatur taluk	436.5	177,752
	Pulivendla taluk	569.0	123,179
	Total	5,935.5	1,342,015

All the taluks are incharge of a Tahsildar, except Kamalapuram independent sub-taluk, which is under the charge of an Independent Deputy Tahsildar. Rayachoti taluk consists of the Lakkireddipalle dependent sub-taluk, with headquarters at Lakkireddipalle village, incharge of a Deputy Tahsildar dependent on the Tahsildar of Rayachoti.

With the ushering in of Panchayati Raj, in 1959, the Zilla Parishad has been established with its headquarters also in Cuddapah Town and the district delimited into 18 Development Blocks, of which the following 14 Blocks had been converted into Panchayat Samithis upto the end of March 1961.

STATEMENT I-2

Sl. No.	Name of Panchayat Samithi	Taluk in which located	Date of Constitution
(1)	(2)	(3)	(4)
1	Cuddapah	Cuddapah	1-11-59
2	Kamalapuram	Kamalapuram	1-11-59
3	Rayachoti	Rayachoti	1-11-59
4	Lakkireddipalle	do	1-11-59
5	Mydukur	Proddatur	1-11-59
6	Jammalamadugu	Jammalamadugu	1-11-59
7	Muddanur	do	1-11-59
8	Pulivendla	Pulivendla	1-11-59
9	Vempalle	do	1-11-59
10	Sidhout	Sidhout	1-11-59
11	Badvel	Badvel	1-11-59
12	Porumamilla	do	1-11-59
13	Kodur	Rajampet	1-11-59
14	Chitvel	do	2-10-60

According to the 1961 Census, there are 9 Urban localities in Cuddapah district, *viz.*, Cuddapah (Population : 49,207), Proddatur (Population : 50,616), Rayachoti (Population : 16,721), Kamalapuram (Population : 7,641), Jammalamadugu (Population : 16,616), Vempalle (Population : 9,051), Badvel (Population : 8,063), Rajampet (Population : 11,636) and Nandalur (Population : 7,742). Of these Cuddapah and Proddatur are first grade Municipalities. There are 971 villages in Cuddapah district of which 897 are inhabited and 74 uninhabited.

The Revenue, Judicial and Police jurisdictions of the district are co-terminus with its geographical boundaries. The District Collector is the head of the administration in the district and he is assisted by three Revenue Divisional Officers, one of whom at Rajampet is usually a Sub-Collector, a junior officer of the I. A. S. Cadre.

The District and Sessions Judge at Cuddapah has jurisdiction over the entire district with an additional Sessions Judge who is also the Judicial District Magistrate. Under the Sessions Judge there are one Sub-Judge, three District Munsifs, two Judicial First Class Magistrates and nine Judicial Second Class Magistrates. There are two Bench Courts one at Cuddapah and the other at Proddatur. There are also two Honorary First Class Magistrates one of whom is a Railway Magistrate.

The Superintendent of Police of the district is at Cuddapah, assisted by one Assistant Superintendent of Police with headquarters at Jammalamadugu and two Deputy Superintendents of Police one at Cuddapah and the other at Proddatur. As the police administration was divested of the responsibility of enforcing Prohibition, the post of the Deputy Superintendent of Police which was previously located at Rajampet, was abolished in 1960.

The Zilla Parishad of Cuddapah has on its rolls 44 members. All the Presidents of the Panchayat Samithis by virtue of their office are members of the Zilla Parishad. This will be dealt with in greater detail under Chapter XI-Panchayati Raj.

The district comprises of 11 State Legislative Assembly Constituencies covered by two Parliamentary Constituencies. The eleven Assembly Constituencies are :

1 Kodur Assembly Constituency
2 Rajampet Assembly Constituency
3 Rayachoti Assembly Constituency
4 Lakkireddipalle Assembly Constituency
5 Cuddapah Assembly Constituency
6 Badvel Assembly Constituency
7 Mydukur Assembly Constituency
8 Proddatur Assembly Constituency
9 Jammalamadugu Assembly Constituency
10 Kamalapuram Assembly Constituency
11 Pulivendla Assembly Constituency

The Cuddapah Parliamentary Constituency consists of the following Assembly Constituencies :

1 Cuddapah Assembly Constituency
2 Badvel Assembly Constituency
3 Mydukur Assembly Constituency
4 Proddatur Assembly Constituency
5 Jammalamadugu Assembly Constituency
6 Kamalapuram Assembly Constituency
7 Pulivendla Assembly Constituency

and the other, Rajampet Parliamentary Constituency, consists of the remaining Assembly Constituencies of the district *viz.*,

1 Kodur Assembly Constituency
2 Rajampet Assembly Constituency
3 Rayachoti Assembly Constituency
4 Lakkireddipalle Assembly Constituency

along with the contiguous Thamballapalle Assembly Constituency, Vayalpad Assembly Constituency and Pileru Assembly Constituency of the adjoining Chittoor district.

Administrative Changes

During the decade 1951-61 there were no administrative changes worth mentioning within the district. The change it saw was that it formed part of the composite Madras State in the early part of the decade. With the formation of Andhra State on 1 October 1953, the district was included in the new linguistic State under the provisions of the Andhra State Act, 1953 (Act XXXVI of 1953). It then became part of the enlarged State of Andhra Pradesh under the States Reorganisation Act with effect from 1 November 1956.

Another change, though very minor, took place during the decade by the transfer of two villages *viz.*, Daddanala and Kallur from Allagadda (Sirvel) taluk of Kurnool district to Proddatur taluk of Cuddapah district.

Population

The following statement gives an abstract of the population particulars of the district according to the 1961 Census :

STATEMENT I—3

Total Rural Urban	Area in Sq. miles	Population per Sq. mile	Occupied Residential Houses		Population			Scheduled Castes		Scheduled Tribes		Literate & Educated Persons	
			No. of Houses	No. of House-holds	P	M	F	M	F	M	F	M	F
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
Total	5,935.5	225	263,493	272,551	1,342,016	685,597	656,418	75,345	73,271	11,683	10,774	230,571	61,383

For further particulars detailed Tables and the Village and Town Directory given in Part II of this Handbook may be referred to.

Physical features

Lying between 13° 43' and 15° 14' of the northern latitude and 77° 55' and 79° 29' of the

eastern longitude, the district spreads northwards beneath the western slopes of the Eastern Ghats as a rough parallelogram dented deeply in its southern, western and northern boundaries. It is bounded on the north by Kurnool district, on the east by Nellore district, on the south by Chittoor district and on the west by Anantapur district.

Situated as it is on the slopes of the Deccan Plateau the district has an irregular landscape. River Penneru cuts through the heart of the district running from west to east, with the northern and the southern slopes of the district draining into it through its important tributaries of Kunderu, Sagileru, Chitravati, Papaghni and Cheyyeru. While certain tracts of the district present a monotonous stretch of black cotton soil, there are others covered by distinct ranges of dignified hills. Though a casual traveller by the main road or railway of the district may not be able to readily observe it, the combination of the rivers and the hill ranges in parts of the district has given rise to certain picturesque spots of unsurpassed beauty, most of which are unfortunately not very easily accessible.

The Hill Ranges

The features of the Cuddapah district are largely determined by its hill ranges. The hills are of ancient crystalline rock and are often steep sided. The system of Cuddapah rocks is of great Geological interest and has been specifically termed, "the Cuddapah Ranges", of the Eastern Ghats. They have been determined as belonging to the pre-Cambrian era, presumably Alogonikan, when life did not exist in this world. They are folded and give rise to flat topped hills. Dudley Stamp says:

" The Cuddapah system is another group of highly folded and highly altered sediments, or schists. With the close of the period when the Cuddapah rocks were folded into the already complex mass of Archean and Dharwar rocks, we are still in the pre-Cambrian era and no sign of life appears in any of these rocks. From that time onwards Peninsular India played its role as a stable rock of the earth's surface."

One can only gaze in mute adoration upon these often bare rocks of the district which stand as the pillars of the ages, proclaiming that the land comprised of these rock system is one of the most ancient ever land masses of the world that existed even before life itself had taken root on earth. These hills also find mention in the Puranas and are called 'Kula Parvata' with the rest of the Eastern Ghats and may be taken to start from Mahendragiri or Mahendrachala in the Ganjam district and run on to the Kulakkal hills, also styled Mahendragiri, in the Tirunalvelly district of the Madras State. Under the name of Mahida (Mahendra in Sanskrit), the Eastern Ghats find mention in the Nasik Eulogy of Gautamiputra Satakarni†.

The Cuddapah system of hill ranges forms part of the central portion of Eastern Ghats. It can be seen that the Eastern Ghats do not possess structural continuity. It does not form an unbroken rampart like its sister ranges in the west. It consists of dissected massifs of some of the older peninsular rocks in the north, relics of ancient mountains such as the Nallamalais, Vellikondas and Palakondas in the centre, gneissic rocks, the Panchamalais and so on in the south. There are thus three distinct systems of ranges in the Eastern Ghats. We are dealing with the central and the most ancient rock systems of the Eastern Ghats, when we speak of the Cuddapah system of hill ranges. These hill ranges present the evolution of a remarkable drainage pattern in the district with its elements of super imposition that make a remarkable geomorphological study.

The Cuddapah system of hill ranges part themselves from the orographical knot at what may be called the Cuddapah outliers at the southern tip of the district near Balapalle pass of Rajampet taluk through which passes the Madras–Bombay Railway line, dividing the Settigunta Reserve Forest and the Balapalle Reserve Forest. Each of these ranges are described below :

Vellikonda Hills : From the knot referred to above the Vellikonda Hills of the Eastern Ghats run northwards going through the eastern borders of Rajampet, Sidhout and Badvel taluks, forming the boundary line between the Cuddapah district and the littoral district of Nellore, almost crescent in shape. These are fine hills and the highest peak located at Thollipenta of Rajampet taluk is estimated to be 2,710 feet high, though, generally, the hills rise between 1,000 and 2,000 feet above sea level. Some of the hills are surrounded by thick undergrowth consisting of primeval forests. It is remarkable that even in these types of deciduous forests, in the interior where depradation by man is less, one comes across luxuriant

† Vide " The Early History of the Deccan " by Dr. C. Yazdani.

vegetation with giant creepers of pythonic dimensions, whose massive tentacles decked with a thousand bright coloured flowers presenting nature in all its glory.

Palakonda Hills : The second hill range called the Palakonda Hills or Seshachelam Hills formed of massive quartzites interbedded with slates and lavas also shoot forth into the district from the southern knot of the district and run along the western border of Rajampet taluk, till this range forks itself into two, near the Kanamolopalle pass of Sidhout taluk – one fork running northwards and the other westwards. The western fork is still called Palakonda or Seshachelam Hills, running along the boundary lines of Cuddapah and Rayachoti taluks, and still keeping westwards, providing the dividing line for the Pulivendla taluk of Cuddapah district and Kadiri taluk of Anantapur district, forms a very fine scarp overlooking the Anantapur–Chittoor basin. It is in this range near Vempalle that we have the beautiful gorge called the Vempalle Gandi of Ramayana fame where the river Papaghni cuts through the range.

Nallamalais and Lankamalais : The northern fork of the hill range now called Nallamalais and Lankamalais run northwards along the boundary line dividing Cuddapah and Sidhout taluks and thence to Proddatur taluk to emerge into the Kurnool district. The Nallamalais are covered by fairly thick forests and abound in wild animals. Between the parallel ranges of Nallamalais and Vellikondas is found the Sagileru basin of Badvel and Sidhout taluks, and also the much smaller Thummaleru basin, in a beautiful regular development of longitudinal valleys. Generally, the hill ranges average a height of 2,500 to 3,000 feet.

Yerramalais : The Cuddapah hill systems have also other subsidiary hill ranges. These are called Yerramalais running along the boundary lines dividing the Pulivendla taluk on one side and the Kamalapuram independent sub-taluk and the Jammalamadugu taluk on the other; and also run into the middle of Jammalamadugu taluk. The red granite rocks, absolutely denuded of growth in most parts, present a desolate appearance of red in contrast to the black cotton fields that they overlook and because of this they acquired the name of 'Yerra' meaning red in Telugu. These are mostly composed of low lying plateau lands, wholly eroded, topped with quartzite range.

One thing is evident from these primeval rocks composing the Cuddapah hill ranges that they are not completely incapable of improvement in its forest wealth. Centuries of depradation by man, specially in the areas of the erstwhile forest panchayats has made them what they are, but with guided care, it may be possible to still develop the interlands of the hills to become useful forests.

River system

Penneru : As already stated, the Cuddapah district is drained by the Penneru basin and its tributaries, which are all spread over the district almost like a fishbone. The River Penneru rises in the Mysore State and after passing through Anantapur district enters this district at the north-western corner near Tallaproddatur in Jammalamadugu taluk. Near Gundlur in Jammalamadugu taluk it is joined by the River Chitravati. The Penneru then flows through Jammalamadugu taluk and at the Historic Fort of Gandikota, it cuts through the Yerramalai hill ranges and the gorge is one of the beauty spots of the district. A splendid view of the gorge can be had from Gandikota Fort and during the floods, the mighty possibility of harnessing the Penneru waters by throwing a dam across the river at this spot at once suggests to the spectator. Touching the village of Khaderbad and Jammalamadugu Town, where there is a causeway across the river, it flows on in a south-eastern direction to form the boundary line between Proddatur taluk and Kamalapuram independent sub-taluk commencing from Chinnadandlur. At Potladurthi there is again a causeway, where the Kallamallavanka joins it. Near Kamalapuram the river is joined by Papaghni and a little further on by the Kunderu River and enters into Cuddapah taluk at Adinimayapalle, where there is the anicut for diverting the water of this river into the K. C. Canal. Flowing slightly eastwards, the river laps the holy hill of Pushpagiri, where is situated one of the ancient temples of Cuddapah district devoted to Lord Chennakesava. Further on at Chennur, the river has been bridged in 1958, removing for ever the curse of the past, when, during the rainy season traffic used to be entirely dislocated and persons

and goods had to be ferried across the river by boats with considerable difficulty and risk. Penneru leaves behind Cuddapah taluk near about Mundlapalle and enters the Sidhout taluk and there is a causeway across it near Sidhout. The rest of the journey of the river lies in Sidhout taluk, where the Sagileru and Cheyyeru rivers join it. After the River Cheyyeru joins Penneru in Sidhout taluk, it bends eastwards towards Nellore district making its way through another gorge near Somasila on the borders of Nellore district. This is the spot where the Somasila irrigation project is planned. The chief northern tributaries to Penneru are the Kunderu and the Sagileru and the southern tributaries, the Cheyyeru, the Papaghni and the Chitravati.

Kunderu : The Kunderu rises in Kurnool district and enters Cuddapah district at the northern tip of Jammalamadugu taluk, near Nagarajupalle and flows through Jammalamadugu and Proddatur taluks. In the Proddatur taluk Uppuvagu and Nallavagu drain into this river. There is a bridge across Kunderu in Proddatur taluk near Alladupalle. The river then courses southwards and joins the Penneru just above Adinimayapalle. Kunderu is a very fast flowing river and is known for the sudden floods that it brings down during the rainy season. As the river flows through steep country, the flood waters attain ferocious velocity until they reach the more even ground through which the Penneru flows.

Sagileru : The River Sagileru rises near Cumbum in Giddalur taluk of Kurnool district and enters Badvel taluk near Gangayapalle and runs southwards in an almost straight line dividing the Badvel valley into two halves. In Badvel taluk, there is a dam across this river to form the lower Sagileru Project, which, besides feeding the Badvel big tank serves as the water source for some 13 other tanks on the way. In Badvel taluk, the Tadukuvagu and the Maderu River drain into the Sagileru at Singayyapalle and Siduganipalle. The river runs through Badvel taluk close to some important villages like Kalasapadu, and Munelli. There is a causeway across this river near Thottideggirapalle village 3½ miles from Badvel Town on the Mydukur–Atmakur Road and again another causeway near Godugumuru on the Badvel-Sidhout Ghat Road about 5 miles from Badvel town. The river enters Sidhout taluk near Puttayapalle village of Badvel taluk and runs along southwards again neatly bisecting the valley through which it flows till it joins the Penneru within Malemaripatnam village limits.

Another small rivulet by name Thummaleru running through the Obulam firka of Sidhout taluk, joins the Penneru.

The Sagileru valley and the Thummaleru valley are regularly sliced by the Vellikonda ridges of Turpukonda Reserve Forest.

Cheyyeru : The Cheyyeru River joins the Penneru at Gundlamada in Sidhout taluk, and comes down with the waters of its small tributaries the Mandavya, the Bahuda and Pincha Rivers. The Mandavya rises near Chinnamandem of Rayachoti taluk and flows by Rayachoti town dividing it from Masapeta, where there is a causeway across this river and then runs by Veeraballe and passes through the Gandikota gorge, another place of great scenic beauty, joining the Cheyyeru near the Rayachoti – Rajampet taluks border above the Balarajupalle causeway. The Pincha tributary rising in Chittoor district, courses through Rayachoti taluk where it is joined by the other tributary, the Bahuda near Rayavaram. Thus conjoined, the river is afterwards called the Cheyyeru. The Pincha project across the Pincha has been built near Mudumpadu. The Cheyyeru thus gathering the waters of its three tributaries runs through the Balarajupalle gorge, where a new project, the Togurpalle project, is now planned. The rest of the course of Cheyyeru is in Rajampet taluk and the railway bridge across this river at Nandalur is on the Bombay-Madras Railway line. A causeway across this river is planned near Nandalur and it is proposed to be taken up soon. It emerges out of Rajampet taluk near Ellampeta of Sidhout taluk. The rivulet Gunjana flowing through Rajampet taluk joins it at Narasingarajupuram.

Papaghni: The River Papaghni is another tributary of Penneru entering Cuddapah district near the south-western tip of Rayachoti taluk and runs northwards. It runs across the borders of Rayachoti and Pulivendla taluks near Idupulapaya and enters the famous Vempalle gorge of Pulivendla taluk and thence onwards the river forms the dividing line between Cuddapah taluk and Kamalapuram independent sub-taluk till it joins the River Penneru. The Mogamureru joins Papaghni in Kamalapuram

independent sub-taluk. There is a railway bridge across this river at Kamalapuram but no causeway has yet been taken up across this river for road traffic.

Chitravati : The Chitravati rising in Dharmavaram taluk of Anantapur district runs about 16 miles in Cuddapah district before joining the Penneru. It enters the district near Pottipadu of Jammalamadugu taluk from the west and joins the Penneru near Gundlur. There is a railway bridge across this river near Kondapuram Railway Station.

Most of the rivers are dry during the summer months presenting a desolate appearance with wide sandy belts, quartzite boulders or shingle with a ribbon of water hardly a couple of yards wide or sometimes even without a drop of water, with cattle and sheep freely walking across the river bed. But during the monsoon months, for brief periods, they get swollen with muddy waters in some cases half a mile or more in width when road traffic gets interrupted, buses and lorries being pulled across the river with the help of a dozen or more pairs of bullocks, the owners of which levy a fee ranging from Rs. 5/- to Rs. 10/- depending upon the flood levels. This indicates that there is need for a good number of causeways though not regular river bridges in this district so that road traffic is maintained throughout the year.

There is a great possibility of developing into attractive tourist centres some of the gorgeous sites that the rivers provide as they cut through the hill ranges. A few of these sites are mentiond below :—

(1) The historic Gandikota gorge in Jammalamadugu taluk where the Penneru cuts across the Yerramalai hill range. The Gandikota project contemplated at the site has been dropped.

(2) The Vempalle Gandi formed by the cutting of the River Papaghni in Pulivendla taluk. It is said that to celebrate the victory of Rama over Ravana, the monkeys set up a golden "Thoranam" across this gorge. It is recorded in the Cuddapah Manual by Mr. Gribble that Col. Munroe died a few days after seeing this "Thoranam" while going through this pass.

(3) The Gadikota gorge formed by the River Mandavya in Rayachoti taluk.

(4) The Balarajupalle gorge of the River Cheyyeru in Rajampet taluk, where the Thogurpet project is now contemplated; and

(5) The now famous gorge of Somasila on the borders of Nellore district.

Most of the rivers barring the Kunderu have river channels and spring channels which provide irrigation in the river valleys and if kudimaramath (repairs by customary labour) is regularly done, the spring channels can in some cases serve as perennial sources of irrigation. Some spring channels provide water for two wet crops, where paddy and turmeric are usually sown. Besides these spring channels, the main rivers and particularly the Penneru and Papaghni provide dependable irrigation through their *doruvu* wells, *i. e.*, wells which have been sunk on the river beds near the banks. These wells when kept in good condition are capable of irrigating patches of land from one acre to five acres for atleast one crop and in some cases two crops also. Adequate supply of electric power to new pumpsets will be a boon for irrigation by *doruvu* wells, and many more can be sunk; and all along the banks, smiling green fields can spell prosperity to the land.

The river system cutting through the rocky gorges seem to be suitable for locating small and medium irrigation projects and a host of schemes have been investigated. Cuddapah district, with vast stretches of barren land and plagued by famines can be converted into a rice bowl if only the waters of its admirable river system are harnessed within the district. Nature has not been so unkind after all to the district if only the volume of water that its streams bring down during the monsoons is considered, and it is on record that as far as the Cuddapah district is concerned, not even 5% of the waters of the rivers flowing in the district have been tapped for the purpose of irrigation. The future planners of the district will no doubt take note of this in evolving long range schemes to ward off famines.

Natural Divisions

The district can be conveniently divided into three distinct natural divisions, which will help us to study the relative economic conditions in the different regions.

The first division is the black cotton plains of the five taluks of Jammalamadugu, Proddatur,

Kamalapuram, Pulivendla and Cuddapah. These plains lie contiguous with similar black cotton plains of Kurnool and Anantapur districts, and can be called the "Western Plains".

The second division is the stretch of land forming the valley between the Vellikonda Hills on one side and Seshachalam, Nallamalai and Lankamalai Hills on the other side comprising the whole of Rajampet Revenue division with the three taluks of Badvel, Sidhout and Rajampet. This natural division can be called the "Eastern Valley".

The third natural division is the rain shadow area of Rayachoti taluk situated on the edge of the Mysore Plateau abutting the district of Chittoor on the south and Anantapur district on the west. This division can be called the "Southern Plateau".

Western Plains : The Western plains are by far the richer areas of the district and both the first grade Municipalities of Cuddapah and Proddatur are situated in this area. It is better served by communications and the K. C. Canal has contributed to considerable Agricultural development in this area. With the improvement works on the K. C. Canal now nearing completion, about 96,74,905 acres would come under irrigation. Ultimately, if the high level canal of Tungabhadra project does come through to command the western portion of this plain, the taluk of Pulivendla and the western portion of Cuddapah taluk would also be brought under irrigation. Educationally and Agriculturally this region is showing good progress. The Cuddapah College is located in Cuddapah town and a Polytechnic has been established at Proddatur. The Industrial Estate now located at Cuddapah is expected to be the forerunner of Industrial development in this area. There is a flourishing Handloom Industry in Proddatur and Jammalamadugu taluks.

Eastern Valley : The eastern valley comes next in prosperity to the plains. It forms a rough parallelogram 140 miles in length and 33 miles in breadth. Agriculture is the main stay of the people of the valley. Though rainfall is better, it is somewhat spasmodic and sometimes for want of timely rains the valley is exposed to severe droughts. The several tanks and river channels help to provide irrigation. Of the recent medium irrigation projects executed in the district, Lower Sagileru project has provided irrigation facilities to 8,000 acres in Badvel taluk. The Thogurpet project contemplated at a spot 5 miles west of Nandalur and expected to irrigate 4,500 acres for which the foundation stone was laid in 1961, will be a boon to Rajampet taluk. Rajampet is well known for its famous *Cheeni* (Batavia oranges) and Mango gardens. The Kodur Fruit Research Station near Anantharajupet is helping to develop Horticulture further in the area. There are absolutely no industries in this area, except for the Handloom Weaving Industry for which the villages around Madhavaram and Pullampet are well known. The area is noted for its forest wealth, of which the unique Red Sanders plant is the pride of the area.

Southern Plateau : The Southern Plateau is the endemic famine zone of the already drought stricken district. Rayachoti taluk contains no less than 1,058 minor irrigation sources most of which are petty ponds which have a capacity of holding not more than one to three months supply of water. Though the people are hard working, the soils are poor and mostly unproductive red ferruginous or red sand. The red sand is the worst soil for Agriculture and it extends over three-fourths of the plateau accounting for the very poor yields. The area is studded with hillocks and every revenue village has a number of small hamlets making it difficult to concentrate developmental activities in any particular village. A village called Settipalle has as many as 48 hamlets. The lack of adequate rainfall and constant erosion of the little surface soil during the rains has rendered the soil very thin, and only the hardy Sajja crop and Horsegram withstand the drought. The staple diet of the people is Sajja, though rice is favoured by the middle classes.

In this region, however, the Pincha reservoir was completed in June, 1958 and Kanchalamma tank has been restored. These have helped the development of Agriculture to some extent, but there is great deal more to be done, and the problem is rendered difficult by the frequent failure of the monsoons. There is difficulty even for drinking water during the drought season in this backward area.

There is no industry of any kind in this area including cottage industries worth recording.

The soils of the district

The soils of the district have been classified into two main classes by Dr. S. P. Roychowdary.

" (1) Red ferruginous soil and (2) patch of black soil (undiff) in east and solid block of black soil (undiff) like a mace head going up to join Kurnool, Mahbubnagar and Nalgonda and round east to Guntur." Each of these two main classes sub-divide themselves into (i) Clay, (ii) Loam, and (iii) Sand. If we therefore take up finer distinctions, the soils could be classified into six sub-divisions. The soil-wise classification for the entire district is given below :

Class	Area in acres	Percentage to total area
1 Black clay	365,463	23.7%
2 Black loam	280,752	18.2%
3 Black sand	59,880	3.9%
4 Red clay	20,190	1.3%
5 Red loam	383,790	25.0%
6 Red sand	423,006	27.5%
7 Special rate	5,745	0.4%
Total	1,538,826	100.0%

The taluk wise particulars of soil with percentages of each variety are given in the tabular statement below :

STATEMENT I-4

Sl. No.	Name of Taluk	Total area in acres	Black clay		Black loam		Black sand		Red clay		Red loam		Red sand		Special rate	
			Area in acres	Percentage to total area	Area in acres	Percentage to total area	Area in acres	Percentage to total area	Area in acres	Percentage to total area	Area in acres	Percentage to total area	Area in acres	Percentage to total area	Area in acres	Percentage to total area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)

	Total	1,538,826	365,463	23.7	280,752	18.2	59,880	3.9	20,190	1.3	383,790	25.0	423,006	27.5	5,745	0.4

A short discussion of soils taluk-wise would be useful, as this explains the occurrence of famine and determines the agricultural practices of the district to some extent.

Black Clay : Black Clay is the most superior soil of the district. It occupies 23.7% of the total classified area of the district. It is found mainly in the Black Cotton plains adjoining the Koilkuntla and Tadpatri belts in Jammalamadugu, Pulivendla, Proddatur and Kamalapuram taluks, and to a small extent in Cuddapah taluk – all along the Kunderu River and the western portion of Khajipet, Chennur, Pendlimarri, and Vallur firkas. In Rajampet taluk also there is a small though sizeable area of black clay in Rajampet firka. Rayachoti taluk also has a very negligible extent of this soil and it lies in patches in Chekrayapeta firka of Lakkireddipalle sub-taluk. "The black clay attains its finest development to the south of Jammalamadugu and Proddatur taluks, where it can sometimes be seen to reach a depth of twenty feet, though its maximum depth is probably much greater." The land being plain, soil erosion has not very much affected this area, and the soil can be regarded as better preserved. The wide plains of Yerraguntla and Gangireddipalle firkas of Kamalapuram independent sub-taluk as well as south-west area of Proddatur taluk show this soil. The qualities of this soil are well known. It retains moisture for long periods and when wet, it is "exceedingly miry and tenacious." Villagers are known to catch wild deer by driving them across these black clay stretches, as they get stuck in the tenacious clay after the first heavy rains. Its origin is stated to be "largely an aqueous deposit of lecustrine origin."

Black Loam : This is an alluvial soil, which varies in texture and colour and occurs in almost all the taluks. But it is richest in the western plains region and responds well for well irrigation, where chillies are known to yield well. The effect of this soil in Rayachoti and Sidhout taluks is rendered infructuous as it is not deep and is subject to a good deal of erosion by the fast flowing "vankas" or hill streams in these taluks. If only contour bunding can be practised to preserve this soil in these two taluks as well as Badvel and Rajampet taluks, we may still obtain maximum benefits from this soil, which forms 18.2% of the soil of the district.

Black Sand : This soil is not of much importance, as its extent is very limited in almost all the taluks. In Jammalamadugu taluk however it occurs on slopy plains, and a poor harvest is reaped. The

ryots however sow cholam intermixed with red gram on these extents also, but as it occurs in patches, along the rich belts of the black soil, even groundnut is grown. It occupies just 3.9% of the classified soils of the district.

Red Clay : From an Agricultural point of view, this soil is not of much consequence in this district, as it extends over very small areas. In Rajampet taluk it occurs in Kodur firka near the hill valleys and is known to be good for the Sajja crop. It occupies just 1.3% of the classified soil of the district.

Red Loam : This variety of soil is exactly a quarter of the soil area of the district. It is to be found very extensively all over the areas of Rajampet and Badvel taluks. The eastern portion of Cuddapah taluk almost parallel along the Lankamalai belt shows red loam. This is of high agricultural value and all varieties of crops and fruit trees can be grown in this soil. The citrus fruits, Mango, Sapota and Guava flourish well in this soil, and Rajampet taluk is well noted for its fruit gardens. Even in Rayachoti taluk, the most barren among all taluks gives a relief pattern where fruit gardens are found in this soil. There is a great possibility of developing crops in this soil by proper conservation and reclamation. It is suitable for wet cultivation and responds well to the application of proper dosages of chemical fertilisers.

Red Sand : The Agricultural history of this soil is the darkest, and it has been described as the most treacherous and unproductive. 43.3% of the extent of this variety of soil in the district occurs in Rayachoti taluk, where it occupies 72.9% of the classified soil area of the taluk. No wonder that this area is notorious for its agricultural backwardness and has become the home of endemic famine. This soil renders land values very low and yield per acre is poor. In stony upland areas it is not even sufficient to meet the expenses of the Agricultural operations of the year and so much so it has rendered the normal ryot in Rayachoti taluk poor and debt-ridden. In the low lands however, this soil is slightly superior being dark red in colour where paddy and ragi are grown under wells. Under tanks paddy is raised to meet the local requirements of rice in a good year. Because of the vast extent of this soil in Rayachoti taluk, soil conservation measures appear to be of utmost importance, so that even the superior dark red variety is kept fully replenished and made to yield better. Contour bunding with construction of waste weirs already attempted has yielded rich dividends, and a concentrated drive in this aspect appears to be of paramount importance. In the Rayachoti Panchayat Samithi 824 acres were protected by soil conservation methods like contour bunding at an approximate cost of Rs.58,000/- during the second plan period.

A demonstration project to propagate the increase of yield due to combined soil conservation measures on Agricultural lands has been started in Cuddapah District an extent of 1,637 acres were protected at an estimated cost of Rs. 62,538/-.

CHAPTER II

HISTORY

Political

Cuddapah is considered one of the backward and perhaps also one of the most remotely situated districts of the State. One hardly realises that the tract covered by the district carries the foot prints of some of the most illustrious rulers of South India. Tipu Sultan, Haidar Ali, Sivaji, Krishnadevaraya, Pratap Rudra are some of the names associated with the history of this tract. The holy names of the rivers that cut across the district give the land a sanctity of their own. The district is made up of a series of beautiful valleys through which flow Papaghni (the destroyer of sin), Chitravati (a Hindu Goddess), Mandavya (a *Rishi*), Pennar or Pinakini ("the sister of Pennaki another name for Siva, meaning the skull-bearer, alluding to one of his incarnations during which he killed a Brahmin, and as a penalty, a skull was attached to his hand until the sin was removed by penance"). Penneru which is the most important river flowing right through the district has a legend which is incorporated in a *Sasanam* at Gandikota. Once subject to a curse, Agastyamahamuni was changed into a river and doomed to flow northwards from the foot of the God at Nandidurg, and to furnish, on its way to the ocean, fresh water for the innumerous *Rishis* or holy men who would settle on its banks, until at last, in the course of countless centuries, the curse would be removed. The Seshachalam range of hills that pass through this district and crowned ultimately with the holy shrine of Tirumala in Chittoor district is named after the Serpent God who served as the bed of Lord Vishnu. Thus, Cuddapah tract associated with such holy rivers and hills should, at one time, have been considered as a truly holy land. This tract has also been identified as the great forest of Dandaka through which the God King Sri Rama and his consort Sita wandered in their 14 years of exile. Thereafter little is known of the history of this land until about the 10th or the 11th centuries A. D. It has been observed that "each stream in this part of the country has its song to sing and every hill its story to narrate" but it is the regret of the historians that "unfortunately they do not narrate them, or, if they do, do it in language unintelligible to the modern historian. These streams and mountains being the only depositaries of the chronicles of Cuddapah, the early history of the district is, and is likely to remain, a sealed book".

The area comprising Cuddapah district and its neighbourhood was situated on the borders of the several great kingdoms of South India which often warred with each other. The tract was the victim of ravage of the victorious hordes of armies. The district was only the tributary of the distant capitals. The local chieftains that had established themselves in the river valleys of the districts owed their allegiance to the changing rulers at the top. "Almost without exception, each of the rivers has a more or less broad belt of alluvial soil rising gradually from either bank; and each of these river basins has, in times gone by, been the centre of a separate political unit – a little state restrained, as it was protected by the line of the hills that hemmed it in on either side. Thus the level lands of the Pennair round Cuddapah and east and west of that town formed the dominions of the Sidhout Raja, and later the seat of the Nabob of Cuddapah; the valley of the Cheyyair was the Raj of Chitwail; the broad plains of Kundairoo belonged to the Poligar of Nossum; those near Gandikota to the petty Raja of that place, and the narrow and the barren defile through which runs the Sagalair supported the families of the Pullalo Cheruvoo and Poremomillah; and this physical isolation of every separate nook and corner of this wild country is the key that unlocks its past history, the fact that explains the successive uncontested conquest, and long continuity of foreign occupations that left the tenants undisturbed under every new master. The Hindu Poligars served the Mughal Emperors, Vijayanagar Princes, Hyderabad Nizams, Maharata Rulers and the Mysore Sultans, with the most perfect adaptiveness to their own interests and the will of their temporary rulers."

The earliest known dynasty that held sway over what can be now roughly called the area comprising the district of Cuddapah, was that belonging to the Pallava Kings. They controlled an extensive

territory which included the present Nellore district and probably all the Telugu country on the East Coast as far as Krishna. From Nellore they penetrated for a time into the north of Cuddapah district, presumably following the course of the Penner upstream, for, it is in the neighbourhood of this river in the taluks of Jammalamadugu and Proddatur, that the earliest historical evidence, in the shape of lithic monuments, has been collected. In the latter part of the fifth century the growing power of the Pallavas seems to have been checked by the Cholas in the south; and in the north the Pallava King suffered defeat at the hand of a Chalukyan adventurer named Vijayaditya who claimed to have come from Oudh. This battle is said to have taken place in Cuddapah district as the queen of Vijayaditya seems to have taken refuge at Peddamodium in Jammalamadugu taluk after the death of her husband in battle. Subsequently the Cholas also overran the Pallava territory and established themselves for a couple of centuries in the black cotton country on the banks of Penner in this district. The rule of the Telugu Cholas appears to have lasted till the latter part of the 8th century. The next dynasty which established its authority for a considerable period in these parts appears to be that of the Banas. This presumption is supported by the discovery of an inscription at Pottipadu in Jammalamadugu taluk, the date of which corresponds to A. D. 884 in which a grant was made by a Bana King.

With the retreat of the Banas fertile plains of north-west Cuddapah came under the sway of a dynasty of kings called the Rashtrakutas from the north and west. Canarese verses in praise of the General of King Indra III (A.D. 915) have been found recorded at the Village of Danavulapad on the north bank of the river Penner five miles south of Jammalamadugu. A latter King Krishna III seems to have further extended his influence over this area and the power of Rashtrakutas had reached its zenith. With his death the power and influence of this dynasty declined.

About this time the Cholas began to establish their authority in these parts, for in the reign of Chola King Rajaraja I, who ascended the throne in A.D. 982, a Vaidumba chief was his feudatory and ruled over the "Inagallur-nadu" which corresponds to a tract in Pulivendla taluk, with the village of Inagalur as its headquarters. The whole of Cuddapah district might have been under their control, for the taluks of Sidhout and Pullampet were under the Telugu Chodas who were also feudatories of the Cholas and originally belonged to the same family.

The Telugu Chodas claim the same ancestry and possess the same family titles as the Cholas. It is on record that one Dasavarman, the grandfather of a Choda chieftain, conquered the Paka - Rashtra and ruled at Pothapi about A.D. 1000. This place has been identified with absolute certainty with the village of that name situated on the bank of the river Cheyyer in Pullampet taluk. A rich harvest of information has been obtained from lithic records discovered in or near several villages on the banks of Cheyyer river in Pullampet taluk, such as Nandalur, Lebaka, and Tangatur. During the reign of Rajarajadeva III (A.D. 1216 to 1243) the power of the Cholas seems to have suffered a temporary eclipse, chiefly due to the aggression of the Pandyas in the south. But due to the prowess and loyalty of the Viceroy of Pakanadu (what now roughly corresponds to the district of Nellore and the eastern division of Cuddapah district) the Chola Kingdom was once again firmly established.

In the latter half of the 13th century A.D. it is found that the Pottapi country *i.e.*, the tract corresponding to the taluks of Jammalamadugu, Proddatur, Cuddapah, Kamalapuram and probably Pulivendla had fallen into the hands of Ambadeva who had temporarily usurped the Kakatiya crown. He ruled from Vallur, ten miles from Cuddapah, and during his time he carried out land survey of Pottapi-nadu under the direction of his subordinate Peddinayaka and a river channel was constructed at Lebaka. Subsequently a Kakatiya King by name Prataparudrudu succeeded to the throne at Warangal after the death or the downfall of the usurper Ambadeva. Thus at the opening of the 14th century we find the whole of Cuddapah district, except Rayachoti taluk, under the sway of the great northern kingdom whose capital was Warangal. But in A.D. 1309 came the invasion of the Deccan by the Muslims during the reign of the Khilji Emperor Allah-ud-din. Warangal fell and with it the Kakatiya dynasty. The whole of the Carnatic and the Coromandel was overrun by the invaders, who penetrated to the extreme south of the Peninsula. The subjugation of the country was completed about A.D. 1325 when Warangal was captured and

King Prataparudra carried a prisoner to Delhi. But in A.D. 1336 the Vijayanagar Kingdom was founded by Harihara and Bukka, two Hindu refugees from Warangal and in A.D. 1344 a Hindu confederation, consisting of the son of Prataparudra of Warangal, Krishna Nayakkar of Vijayanagar, and the Hoysala King from Mysore, with an immense force drove the Muslims out of Warangal and rolled back the tide of their advance. The outcome of this was the establishment of the Vijayanagar Empire. During the two centuries of its ascendency it included the whole of the present Cuddapah district. "During this rule the natural resources of the country must have been greatly developed. The rich Cuddapah valley was highly cultivated and produced grain and cotton. The districts above the ghauts, though poorer as far as soil and water are concerned, were most carefully looked after. The rivers produced gold and precious stones and diamonds were found in the valleys So prolific were their diamond mines that even at the close of the last century, after having been worked for generations, the mines in the Cuddapah valley yeilded an annual income of half a lakh of rupees. All this wealth poured into the neighbouring capital of Vijayanagar, and in the end proved source of its decay."

Within a few years of the founding of the Empire we find the whole of Cuddapah district and probably most of Nellore included in the province of Udayagiri (in Nellore district). This province was ruled over by a son of the Emperor Kampa I as early as A. D. 1356, a fact which illustrates that close relatives of the reigning monarch were appointed as Viceroys of outlying provinces. During the reign of Bukka I (A. D. 1352 to 1376) we learn that his son Bhaskara, then Viceroy of Udayagiri province, constructed the great irrigation tank at Porumamilla in the Badvel taluk in the year A. D. 1369.

Several inscriptions have been found in the district in which mention is made of the Emperor Sadasiva. During his reign and that of his predecessor Achyuta the decline of the Empire began. The Empire was actually governed, while Sadasiva still occupied the throne, by his brother-in-law Ramaraja. The latter was the only ruler of the Empire who ever made any headway against the Muslims. Finally at the famous battle of Talikota in January, 1565, the Hindus and Muslims, with forces of almost fabulous strength, contested for the supremacy of the Deccan. In the result, the Raja was totally defeated and killed in battle.

Though the Hindu power in the south was irretrievably broken, the brother and successor of Ramaraja managed to conserve a part of his territory, which still included the whole of Cuddapah district. He was succeeded by his son Ranga who was followed by his brother Venkatapathi. The latter died in A.D. 1614. For thirty years afterwards his successors continued to rule the remnants of their territory with Chandragiri as their capital, but in A.D. 1646 this stronghold fell into the hands of the King of Golconda. However, it was not till the beginning of the 17th century that the Golconda kings turned their attention to the present Cuddapah district and surveyed the country for revenue purposes. It is not clear as to how much of revenue was collected from this "Kamil assessment", yet this assessment was utilised by later Governments down to the British occupation as a sort of a standard by which to measure the tax-paying capacity of the district. Till the reduction of Golconda by Aurangazeb, the only representatives of the central authority in Cuddapah district appear to have been the Nawabs of Gandikota and Cuddapah, but as they had not the means of reducing the local chiefs who had rendered military service during the Vijayanagar period, their political importance was almost negligible. Subsequently due to the continuous preoccupations of Aurangazeb with the Maharattas, the opening of the 18th century saw Deccan fall into little short of anarchy. This led to the rise of power and influence of the local chiefs and poligars fostered by the absence of any effective central authority. These petty chieftains who in fact exercised sovereign rights within their jurisdiction were finally reduced after about two hundred years by British troops and their allegiance won by the unflinching determination and never failing tact of Sir Thomas Munro.

A long period elapsed between the battle of Talikota and the establishment of Muslim rule in Cuddapah district for the simple reason that the Muslim kings of the Deccan were occupied during the next century in the final annihilation of the Vijayanagar Empire and in continual wars with the Maharattas. It is not until the Nizam of Hyderabad began to rule the Deccan as a practically independent monarch

in the early part of the 18th century that the Nawabs of Cuddapah attained any political significance. The first Nawab of Cuddapah to assert his control of the district was Abdul Nabi Khan whose Governorship began in the year A.D. 1714. He established garrisons at Gandikota in the north and Gurramkonda in the south but did not seem to have made any real attempt to reduce the country to order. In May, A.D. 1740 the Maharattas invaded the country, defeated the Nawab of Kandanur (Kurnool) and marched against Cuddapah with a big force, defeated the Nawab who made peace with them by giving them a sum equivalent to a lakh and a half of rupees and other presents.

The rise of Haidar Ali constituted a new element in the political forces which shaped the destinies of Cuddapah. Haidar Ali obtained possession of Gurramkonda in 1766, temporarily lost it to the Maharattas in 1772, and regained it early in 1774 through his son Tipu. In 1780 Haidar Ali, due to his annoyance with the Nawab of Cuddapah for a supposed disobedience of his orders in the previous year, himself took the field and effecting a junction with Mir Saheb, gave battle to the forces of the Nawab near the small fortified town of Duvvur on the banks of of the Kunder about ten miles north-east of Proddatur. The Nawab's cavalry was defeated, and he himself escaped to the fort of Sidhout, which was immediately afterwards captured by Haidar Ali. The Nawab and his family were then sent as prisoners to Seringapatnam where the Nawab finally died in captivity. Haidar Ali then left for Mysore leaving his brother-in-law Mir Saheb in charge of the whole district. Mir Saheb and his son Kamaluddin were the first rulers of the district who seriously grappled with the problem of the poligars, the importance of which was fully recognised by Haidar Ali. In the words of Munro " The Cuddapah Nawabs expelled some of them (Poligars), but neither they nor the Maharattas were ever able to reduce the rest, or even enforce the regular payment of their Peshkash."

The whole of the Cuddapah district formed a part of the Ceded Countries which fell to the Nizam by the treaties of Mysore and Seringapatnam. The officers of the Nizam for some reason or the other permitted the Poligars to return and in some cases also invested them with the management of Sircar villages in addition to their own.

In the year 1800, the Hyderabad contingent was increased to eight battalions, and districts (including the whole of modern Cuddapah) yielding sixtythree lakhs a year were made over by the Nizam in perpetual sovereignty to the East India Company, under the stipulation that the British Government should guarantee all the remaining tertitories, of the Nizam from every attack. In their order dated October 24th, 1800 the Government of Madras acquainted Major Thomas Munro, with the particulars of this treaty, and posted him as the principal Collector with four Sub-Collectors under his immediate authority. A small military detachment was placed under his control for meeting unavoidable demand for military aid. Less than a month after taking charge, Major Munro reported as follows:-" By every report which has reached me, it appears that almost every Poligar, however, insignificant, who had been expelled since the beginning of Haidar's usurpation, has been within these few years permitted to resume the management of his district."

At the opening of the 19th century we thus enter on a last phase of the History of the Cuddapah district *viz.*, the subjugation of the Poligars, the establishment of a well ordered Government and the inauguration of the Revenue system which obtains at the present day. All this was the work of Munro, who was later knighted and became the Governor of Madras.

Munro enumerates eighty different Poligars, of whom a large number were in the Cuddapah district. Most of these were grouped round the more influential Poligars to whom they paid their allegiance. A peculiarity of these Poligars was that every one, however petty his territory, kept up a mimic court; nominal officers were appointed, holding the same title as similar officers did in the sovereign courts, and a small standing army was maintained of permanently appointed peons, aided by a militia of relatives of these peons, who were liable to be called out in times of disturbance. These small standing armies were but seldom paid, and the greater part of their earnings; were gained by their depradations in time of war. During peace these bodies of peons continued their usual practices and earned their livelihood by pillaging border villages. Where a village was wealthy or populous enough to be able to defend itself against the attack of these border robbers, it advanced in the

course of a few years from the defensive to the offensive, the village chief emerging as a petty poligar. As a result, the hilly areas became infested with bands of robbers and bandits, and the ryots and country people were tormented by a continual state of violence and rapine. Collection of revenue had thus become almost an impossible problem. One of the difficulties confronting Munro at the outset was the presence of bodies of the Nizam's troops who refused to leave the country until their arrears of pay were settled. This Munro did at once, leaving the money to be recovered afterwards. At the same time the Poligars were kept in check by a proclamation declaring that every chieftain who garrisoned a Fort, maintained an armed force, or levied contributions, would be treated as a rebel. This was not a mere threat, as in May, 1801 Major-General Campbell marched against Vemula in the Pulivendla taluk and reduced the Poligar to obedience by demolishing his Fort. From there the General proceeded to Pullampet taluk and forcibly dispossessed the Matla raja of Chitvel. For a time this policy did not meet the approval of the Board of Directors who even threatened to remove Munro from his appointment and never again to appoint him on revenue work. But later Munro by an unassailable defence of his position convinced the Directors of his policy and the latter never again questioned the measures he adopted. Munro's policy gave the district the first taste of tranquility. Each delinquent was steadily followed to the end. All the Poligars one after another were subdued when finally after completing his mission in 1807 Munro resigned his post of Principal Collector and proceeded home on leave, having first received the following handsome acknowledgment of his services from the Madras Government. "From disunited hordes of lawless plunderers and free-booters they (the people) are now stated to be as far advanced in civilization, submission to the laws, and obedience to the Magistrates, as any of the subjects under this Government. The revenues are collected with facility; everyone seems satisfied; with his situation, and the regret of the people is universal on the departure of the Principal Collector."

Before passing over Munro an interesting story, but probably a true one, relating to an incident that occurred in this district may be recorded here. A short time before his death, whilst on his way to Bellary, Sir Thomas travelled through the district of Cuddapah. He passed from the upper table-land of the sub-division to the valley below the ghats by means of the narrow gorge where the Papaghni breaks through the hills. Whilst riding, he suddenly looked up at the steep cliffs above, and remarked to the natives riding behind him, " what a beautiful garland of flowers they have stretched across the valley". They all looked, but said they could see nothing : " Why, there it is; all made of gold". Again they looked, but saw nothing. Sir Thomas made no further remark, but one of his old native servants quietly observed "Alas; a great and good man will soon die!" A few days afterwards, Sir Thomas Munro passed away.

With the assimilation of Cuddapah district to the more orderly parts of the Madras Presidency, its political history remained uneventful except that after the thirties of the twentieth century the people of Cuddapah district too responded to the call of the Nation and whole-heartedly participated in the freedom movement. Among the popular political leaders of the district who played a prominent part in the freedom struggle a few names that can be mentioned are those of Sri Koti Reddy, an ex-minister of Andhra State, his wife Smt. Ramasubbamma and Sri Subba Reddy.

Revenue Administration

Before the advent of the British rule in this area there was neither respect of the central authority nor settled form of administration. And so without the necessary appendage of law and order, proper collection of revenue had become almost an impossible task. Secondly there was no uniform land revenue system. Under the Vijayanagar the Hindu systems of land revenue never concerned themselves with definitions of landed property or State rights. The ryots usually settled among themselves the exact proportion of the whole rent that each individual has to pay. Cultivation was in a sense 'collective', as we understand to day, where there was no question of property in the land and the holdings were interchangeable or liable to redistribution. The really important thing was the division of produce which as far as the ryots were concerned was regulated by the contribution made to the common stock. The State, also asserted its right to a share, the extent of which the State itself determined. The State, however, recognised no limitation except such as arose from its own exigencies

and the ability of the ryot to pay. Usually the State's share was half the produce.

The Kamil assessment introduced under the Golconda kings about the beginning of the 17th century was based on the same principle of the equal division of the crop between Government and the cultivator. This was based upon an actual survey which took four years to be completed. As all rents were to be paid in money the equivalent of half the produce in kind was found by taking the estimated gross produce of the different sorts of dry and wet land and then converting it to money at the average price of the preceding ten years. This survey could not be effectively implemented due to the malpractices adopted by the Revenue authorities. Aurangazeb also adopted the Kamil, but had to make allowances for the loss. This was doubtless due to the depredations of the Poligars who took advantage of the decay of the Golconda power and to the opportunities for the falsification of accounts which the change of Governments afforded to the karnams. Under Haidar-Ali and Tipu Sultan, the Kamil standard was gradually restored by rigorous measures adopted against both the Poligars as well as the fraudulent revenue officials. But once again under the Nizam (1792-1800) misgovernment resulted as usual in decreased cultivation and loss of revenue.

Munro took charge of the Ceded Districts late in the season of 1800-01 (Fasli 1210). The rough and ready method adopted by him for the settlement of assessment was as follows:- He assembled all the headmen and karnams and questioned them as to the value of their own and the adjoining villages. This done, these officers were made severally responsible for the rent (assessment) of their own villages and jointly for those of the taluk.

Ryotwari system was introduced in the following year, Fasli 1211 whereby each ryot held his land immediately from the Government under a patta, and in Fasli 1212 the natural complement of a field survey and assessment was commenced and completed in 1806. Munro then drew up a scale of rates for the different classes under which the fields were classified. For the next seven years the annual revenue was settled on the ryotwari principles thus inaugurated. Loans were freely given and cowles granted for waste land.

In 1804, however, the desirability of a reversion from the ryotwari to a permanent settlement began to be discussed. Munro who was asked to report on the proposal to rent out the whole village at a fixed annual sum to Zamindars sent his reply defending the ryotwari settlement which he had with such pains introduced in the district. He indicated the evils that are likely to result from the proposed plan. He anticipated mismanagement and oppression if a speculator or an adventurer was allowed to come between the Government and the cultivator. A settlement direct with the cultivators appeared to him more suited to the manners and prejudices of the inhabitants, more adopted to the narrowness of their circumstances in that it did not insist on the same amount of revenue being paid every year but limited it by the actual extent of cultivation, more likely to reclaim them from their wandering habits and fix them to their fields by giving them an interest in the improvement of these, less liable to embarass the Government, and more calculated to promote the general prosperity of the country and the people. Munro also believed that a saleable value should be given to the land, for the ryots to acquire proprietary interest in their holdings. Hence he recommended that the total assessment should not exceed one-third of the gross outturn. He, therefore, suggested a reduction of 25 per cent on all rates with an additional 8 per cent on lands under wells and small tanks on condition that the ryots kept them in repair. He believed that the initial loss of revenue would soon be counterbalanced by the extension of cultivation induced by these measures.

After the departure of Munro and Lord William Bentinck, the strongest supporters of ryotwari system, it was ordered early in 1808 that villages should be leased out to the village headmen and chief cultivators for a term of three years on conditions stipulated by the Government. The triennial lease was not a success. The headmen fearful of being ousted by new comers accepted higher conditions of rent than they could meet. The ryots were unduly oppressed and the cultivation fell off. The failure was attributed to the shortness of the lease and hence in Fasli 1222 (1812-13) the decennial lease was introduced. It resulted in even a worse failure. Cultivation decreased and many villages reverted to the Government. Finally the results of a bad season in Fasli 1226 made the abandonment of the renting

system inevitable. When on his return in 1816 Munro was consulted, he advised that the ryotwari system should be re-established after carrying out the reductions of 25 per cent and 33 per cent he had formerly proposed. Final orders to this effect were passed by Munro himself as Governor in 1820 and the new settlement was indroduced in 1821. The assessment thus arrived at remained in force for upwards of fifty years which remained an uneventful period in the revenue history of the district, being marked by the removal of a few glaring inequalities of assessment and the reduction of some exceptionally high rates. Remissions on waste and on lands under ruined irrigation sources gradually became more liberal.

The Settlement Department started its operations in Jammalamadugu taluk in 1864. The settlement mainly effected for the admininstration, led to a simplification of the accounts, and for the ryots a more equitable incidence of assessment. Its financial results represented an increase in the land revenue of a little over 9 per cent. Resettlement was carried out in the district between 1908-12. This resettlement of the district resulted in a net decrease of Revenue by 7 per cent which is almost entirely attributable to transfers of double crop to single crop and wet to dry, as well as the more favourable rates allowed for the composition of the double crop charge.

After this, the history of the Revenue Administration has been one of a continuous progress of tranquility and good Government. In 1800 when the Ceded Districts passed into the hands of the East India Company from the Nizam, the entire tract of the Ceded Districts was placed in charge of the Principal Collector and Major Munro, took charge on the 1 November 1800. He was assisted by four Subordinate Collectors stationed at Cuddapah, Cumbum, Harpanahally and Aodni. In 1808, a year after Munro resigned and left, the Ceded districts were divided between two Collectors and Mr. W.W. Chaplin, the Subordinate Collector of Cumbum who took charge of Cuddapah district transferred his headquarters to Sidhout, which for some years subsequently remained the headquarters of the district and then shifted to Cuddapah which became the permanent headquaters of the district ever since. Today the District Collector, who represents the Government at the district level governs the district with the help of his Divisional Officers and his Tahsildars. He is assisted by the Superintendent of Police in the maintenance of law and order. This system of the District Revenue Officer in charge of the overall administration of the District has been found to be so fruitful that it has been retained as the most effective institution of administration even after India attained Independence. Today the office of the District Collector is an embodiment of that civil authority without which it is difficult for a backward and a surging Nation like India to have stable and unified administration.

CHAPTER III

PEOPLE

Population

On 1 March, 1961, the reference date of the Census, 1,342,015 persons were found in the district of Cuddapah which means an increase of 15.40% over the 1951 population. There are 226 persons per square mile in the district as against 339 in the State as a whole. The density of the population in the district was only 196 in the 1951 Census. The density of the urban population in the district is 2,591 per square mile as against 4,340 for the urban portion of the State. The urban density figures for the 1951 Census stood at 2,097 for the district and 4,074 for the whole State. Amongst the districts of the State, both in regard to population as well as area, Cuddapah district constitutes one of the back numbers occupying 16th rank as regards its total and urban population and 17th as regards rural population.

Distribution and density of population

Rayachoti taluk has the most number of people (220,406) living in it closely followed by Rajampet (206,859), Cuddapah (179,193) and Proddatur (177,752) taluks. The taluks of Jammalamadugu, Badvel and Pulivendla have population ranging from 100 to 150 thousands, while Sidhout taluk and Kamalapuram independent sub-taluk have less than 100,000 population each. Proddatur taluk is the most densely populated with 407 per square mile followed by Cuddapah (351), Kamalapuram (275), Jammalamadugu (231), Pulivendla (216), Rayachoti (200), Rajampet (199), Badvel (165), and Sidhout (140) taluks.

Rural and Urban composition

There are nine towns and 971 (897 inhabited and 74 uninhabited) villages in the district. 86.80% of the total population live in villages and only 13.20% live in towns. The town of Cuddapah which is also the district head-quarters with a population of 49,027, accounts for 27.68 % of the district urban population and 3.65% of the total general population of the district. However, Cuddapah town occupies only a second place in the district as regards the population. Proddatur with a population of 50,616 comes first.

Sex Ratio

There are 957 females against every thousand males in the district as a whole. This shortage of females was larger (952) in the 1951 Census. Shortage of females in the urban areas may be a normal phenomenon due to the migration of males to the rapidly developing urban areas, but in Cuddapah district shortage of females is noticeable even in the rural areas where there are only 958 females against every thousand males. There may be several reasons contributing to this disparity. This district was often subject to famines which might have taken a heavier toll of the females. Early marriages and mortality during the primary confinement should have also been one of the contributing factors. Again there is an inherent neglect of the infant girls as compared to boys. Since early marriages are quite common in the rural areas of the country, this shortage of females must be a cause of great strain among the young male folk. This may even act as a sufficient inducement for the male youth to migrate to other places in search of females—a good subject for the Sociologist interested in such matters.

Age structure

Able bodied persons of above 15 years and below 55 years constitute 51.48% of the total population, the remaining being accounted for by children and young persons of age below 15 years (39.78%) and old persons of 55 years and above and of those whose age is not specified (8.74%). The age distribution of every hundred persons in the population is shown below:—

STATEMENT III-1

Age-group	Total persons	Percentage to total pesons
(1)	(2)	(3)
0-4	183,830	13.70
5-9	195,000	14.53
10-14	155,024	11.55
15-24	220,712	16.45
25-34	199,788	14.89
35-44	153,664	11.45
45-54	116,681	8.69
55-64	73,241	5.46
65-69	14,024	1.04
70 and above	29,945	2.23
Age not stated	106	0.01
Total	1,342,015	100.00

From this table it is seen that very few people survive to old age due to the rigours of climate and the hardships that life seem to offer in Cuddapah district.

Marital status

As elsewhere in the country, marriage is universal. Only 4.24% of females and 28.83% of males of age above 15 years were found to be unmarried. Out of the total number of 533,854 persons below 15 years of age, 4,392 were found to be married, out of which 4,136 were females. These figures of matrimonial status of children below fifteen years of age throws a strange light. Very few boys as compared to girls seem to get married in this age-group. The only inference that can be derived from this is that young girls are married off to older men, though such marriages are very few compared to the total number of marriages. Another strange phenomenon is revealed from the study of Tables on matrimonial status of the population of Cuddapah district. As per the 1961 Census there is a shortage of 29,179 women as compared to the total number of men in the district. In spite of this shortage of women it is seen that the total number of women married (375,566) is more than the total number of married men (296,022). The percentage of unmarried men to the total male population of over 15 years of age is 28.83. This trend clearly indicates that some men are married to more than one woman leading to a further scarcity of marriageable females. This problem will once again form a very interesting subject for sociological study.

Literacy and Education

21.75 persons out of every hundred in the population of the district are literate as against the corresponding figure of 21.19 for the State as a whole. The low percentage of literacy in the State may be contributed mainly by the backward Telangana region. Compared to the Coastal Andhra region, where the average literacy is 24.7, Cuddapah has no reason to feel particularly proud. The incidence of illiteracy among females is heavy. As many as 90.65% of females are illiterate. 33.63% of the males claim literacy. The following table will illustrate the literacy in the district according to the different age-groups.

STATEMENT III-2

Livelihood pattern

Persons engaged in productive work whether they derive income or not have been treated as "Workers" in the 1961 Census. In respect of seasonal work like Cultivation, Livestock, Household Industry *etc.*, if the person had some regular work for more than one hour a day throughout the greater

part of the working season, he has been recorded as a Worker. Persons temporarily incapacitated and under-trial prisoners, if they had been working before, have also been treated as Workers. Those that were treated as "Non-Workers" were students, housewives, dependants, persons permanently disabled from work, retired persons, people of independent means for which they need not work, beggars, convicts in jails, unemployed persons *etc.*

From the above classification of "Workers" and "Non-Workers", it is obvious that the definition of a "Worker", has been very liberally conceived. Anyone who generally spends more than an hour per day on any particular productive occupation has been considered a "Worker". In spite of this liberal concept it is rather surprising to find that only 53.14% of the total population of the district indulge in some form or other of productive occupation. This obviously leads us to the next inference that 46.86% of the total population of the district depend on the rest for their sustenance.

There are 533,854 persons between the ages of 0-14 years representing 39.78% of the total population. The recent trend has been to regard this age-group as the population of school-going age. With the introduction of compulsory education this age-group will henceforth be automatically eliminated from the working population. In the Census of 1961 it is seen that 72,138 persons of this age-group belonged to the working population. That is 10.11% of the working population is consituted of non-adults.

The figures of the district indicate that the working women are not in keeping with their numbers. 62.31% of males are Workers while only 43.57% of females are Workers. The only field in which women seem to outnumber the men is "Agricultural Labour". There are 109,287 females as compared to 91,233 males working as Agricutural Labourers. Women are also considered to be more suited to this type of work. These figures suggest that women are not unwilling to do productive work whenever opportunities are available. It is only the lack of such opportunities to women in this disrtict that has converted them into mere unproductive whole time housewives and mothers.

Persons dependent on Agriculture (Cultivation and Agricultural labour) for their principal source of income constitute 37.43% of the total population. The following statement based on 20% sample enumeration gives figures of sample Households engaged in Cultivation classified by interest in land and size of land cultivated in total, rural and urban areas separately.

STATEMENT III-4

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN TOTAL, RURAL AND URBAN AREAS SEPARATELY

(Based on 20 % Sample)

Interest in land cultivated	No. of cultivating Households	Households engaged in cultivation by size of land in acres

Non-Agricultural occupations provide employment to 15.72 per cent. The remaining 46.85 per cent are Non-Workers. The following table illustrates the most important items of occupation other than Agriculture and the number of persons in each with their percentage to the total population.

	Total persons	Percentage to total population
Household Industry (IV)	101,286	7.55
Other services (IX)	50,518	3.77
Trade and Commerce (VII)	28,202	2.10
Mining and Quarrying (III)	9,031	0.67
Other than Household Industry (V)	8,454	0.63
Construction (VI)	6,884	0.51
Transport (VIII)	6,561	0.49

Medical facilities are grossly inadequate for the population of the district. There are only 55 practitioners of modern Medicine of whom only 8 are women. This means that there is one Doctor for 24,400 people and one lady Doctor for 82,052 women. Further there are only eight Dentists, 91 Nurses and 146 Midwives. There are about 280 persons who practise the Ayurvedic and Homeopathic systems of medicines. There are also 402 persons who profess to be Physicians and have been classified under 'Others'. These are the unqualified persons who, due to experience have created confidence in their medical or supernatural abilities among the people to cure all forms of diseases. These exploiters of human misery due to the lack of qualified medical men, have spread their influence amongst the ignorant countryfolk. Their doubtful abilities can only be replaced, if the qualified young men flock to the villages and willingly serve the 'poorer India'.

There are 183 Architects, Engineers and Surveyors in the district. Of these 115 are Civil Engineers, 9 Mechanical Engineers, 11 Electrical Engineers, 2 Mining Engineers, 32 Surveyors and 14 others who have not been elsewhere classified.

On the educational side there are 91 University Teachers, 683 Secondary School Teachers, 3,239 Middle and Primary School Teachers, 18 Nursery and Kindergarten School Teachers and 1,041 Teachers who have not been elsewhere classified.

On the Juristic side there are fifteen Judges and Magistrates, 129 Legal Practitioners and Advisers and 8 Law Assistants.

On the communications side there are 131 Railway Engine Drivers and Firemen. There are 1,151 Motor Vehicle and Motor Cycle drivers, 157 Rickshaw drivers and Rickshaw pullers and 1,295 animal drawn vehicle drivers.

The fifth table in the 'B' series gives all details regarding the various other occupations and services available in the district classified by sex of persons. All the occupations have been classified and coded according to the National Classification of Occupations. It makes an interesting study to the discriminating reader and will help to assess the requirements and the availability of resources and talent.

Housing

Shelter to a man is as essential as food and clothing. But unfortunately it is not an uncommon sight to find half naked people sleeping on pavements and other unsheltered places braving the rigours of pouring rains and freezing winters. Housing as a means to a more human existence has, therefore, become a very vital problem especially in the context of a rapidly growing population.

Prospects of employment in the urban areas together with increasing pressure on land has, during the last decade, led to large scale migrations from the rural to the urban areas. Slums and unhealthy localities have sprung up everywhere leading to unimaginable sub-human living conditions.

With a view to remedying the situation and for collecting the more important statistics required for Planning Housing Programme, the Government of India suggested that the National Building Organisation under the Ministry of Works, Housing and Supply should arrange to collect all the basic data on Housing required by the Planning Commission, in collaboration with the Registrar General, India during the 1961 population Census. Accordingly an attempt was made in the 1961 census, for the first time in the Indian Census History, to collect uniformly throughout the country more comprehensive data on Housing to meet the needs of the National Building Organisation.

This data on Housing does not merely confine itself to residential housing but brings under its fold

places of business, workshops, schools, restaurants, places of entertainment, hospitals *etc.* From the information so gathered it has now become possible to assess not only residential housing requirements but also the adequacy or otherwise of the requirements of Industry, Commerce, Education, Public Health Institutions *etc.*

In Cuddapah district as anywhere else houses used wholly or partly for dwelling purposes form the largest proportion of the Census Houses. 250,085 Houses out of a total 324,489 are used wholly as dwellings, 1,870 houses as shop-cum-dwellings. Some of the part dwellings like laundry-cum-dwellings, barber's saloon-cum-dwellings, though small in number have been included under the category of 'Others'. If those houses are also taken into account the proportion of the houses used wholly or partly as dwellings would be slightly higher.

It is seen that the proportion of dwellings to population in the rural areas is more than in the urban areas. Thus for a rural population of 1,164,902 persons there are 220,943 dwellings, while for an urban population of 177,113 there are only 29,142 dwellings. This means in the urban areas there are only 165 dwellings for every thousand population and in the rural areas190 houses accommodate every thousand persons. It is obvious from these figures that there is over crowding in the residential houses. Thus proportionate increase in residential accommodation has not kept pace with the growing needs of a fast developing population.

The proportion of Census Houses used as *Shop-cum-dwellings* is very small and is only 6 per thousand houses in the district.

Workshop-cum-dwellings are more numerous than shop-cum-dwellings in the district. But their proportion among the total houses is however, not high, being only 27 per thousand houses in the district. This seems to indicate the lack of adequate workshop facilities in this area or even suggest the lack of demand for any such services. This also illustrates the backwardness of the district in the use of machines and other mechanical implements. This backwardness is more pronounced in the rural areas, for, 1,524 out of 8,716 workshop - cum - dwellings are located in the urban areas of the district.

Hotels, Hostels, Dharmasalas etc. account for a very small proportion of the total Census Houses. But, however, Cuddapah district has the highest proportion *i.e.* four of such houses for every thousand Census Houses when compared with the rest of the districts in the State. The proportion is higher in the rural than in the urban areas, and this is also very much unlike the other districts. This may be attributable to a large number of choultries in this district which abound in history.

Shops excluding eating houses are less than 10 per 1,000 in the district and this figure is less than the State average of 1.3%. The urban proportion as everywhere else in the State is considerably higher than the rural proportion. The small number of shops in the district clearly indicates the comparative commercial unimportance of this district.

The proportion of *Business houses and Offices* to the total Census Houses is very very small in the district *i. e.*, 671 out of a total number of 324,489 houses. The number of houses of this category in the urban areas is only slightly more than in the rural areas unlike in other districts where the proportion of the business houses and offices is markedly higher in the urban areas than in the rural areas.

There are 1,353 Census Houses in the district which are used *as Factories and Workshops*—765 in the rural areas and 588 in the urban areas. There are less than five factories and workshops per every thousand houses in the district. The proportion is higher in the urban areas of the district than in the rural areas. The only obvious inference that can be drawn from this data is that the place is far from industrialised and offers hardly any scope for industrial employment.

There are 1,752 Census houses in the district which are used as *Schools and other Educational institutions*. Of these 1,553 are in the rural areas and 199 in the urban areas. For every 1,000 houses there are 5 houses under this category in the district. This district like West Godavari district has high proportion of such houses in the State. In the rural areas the proportion is higher than the corresponding proportion in the urban areas. There is one school for every 750 persons in rural areas while it is one for 890 in the urban areas of this district.

The proportion of *Restaurants, Sweetmeat Shops and Eating places* to the total number of Census Houses is very small for the district being only 207 out of a total 324,489 Census Houses. Out of this number 118 are in the urban areas. In the rural areas there is not even one restaurant or eating place per 1,000 houses.

Places of *Entertainment, Recreation etc.*, including Temples, Mosques and Churches constitute 5,091 houses–4,714 in the rural and 377 in the urban areas. The higher proportion in the rural areas is naturally due to the larger number of places of workshops as well as the existence of the village chavadis and pials in almost all the villages.

There are 235 Census Houses used as *Hospitals, Public Health Institutions, Dispensaries, Clinics etc.*, in the district. Of these 118 are in the rural areas and 117 in the urban areas. The proportion to population, therefore, in the urban areas is much higher. It is a well known fact that medical and public health facilities are grossly inadequate in our country and hence no further comment is considered necessary on the existing state of affairs.

As explained earlier, the category of '*Others*' includes houses put to miscellaneous uses like 'cattle-sheds', 'garages' *etc.* Consequently no distinct pattern is discernible in this category of houses in the rural and urban areas of the district. However, the proportion of houses in this category is less (1,651) in the urban areas than in the rural areas (22,666).

Scheduled Castes and Scheduled Tribes

The total Scheduled Castes population of Cuddapah district is 148,616 persons representing 11.07 per cent of the total population. The Scheduled Tribes population stands at 22,457 persons representing 1.67 per cent of the total population. The highest concentration of Scheduled Castes is found in the Sidhout taluk representing 20.13 per cent of the general population of that taluk. Rajampet taluk has 17.42 per cent followed by Badvel taluk (11.83 per cent), Cuddapah taluk (11.23 per cent), Rayachoti taluk (10.70 per cent), Kamalapuram independent sub-taluk (10.12 per cent), Pulivendla taluk (8.42 per cent), Jammalamadugu taluk (6.13 per cent), and Proddatur taluk (5.36 per cent). The percentage of the Scheduled Castes is only 11.07 per cent which is less than the State average of 14.88 per cent. As regards Scheduled Tribes the district average is only 1.67 per cent which is much less compared to the State average of 4.27 per cent. The Scheduled Tribes population is quite negligible, while the Scheduled Castes population although less than the State average, is quite large considering the numbers that it represents.

Of the total population of Scheduled Castes, 75,345 are males and 73,271 are females and this shortage of females is not different from the general population trends. There is a shortage of 28 females for every thousand males. General standard of literacy among the Scheduled Castes is quite low and more so among the females. Only 1,289 females (1.76 per cent) and 11,772 males (15.62 per cent) are literate.

91,304 persons of the Scheduled Castes are workers representing 61.44 per cent of the total Scheduled Castes population. 65.35 per cent of men and 57.42 per cent of women come under this category. Their major occupation is working as Agricultural labourers and as usual women outnumber the men in this field. Very few have taken to Manufacturing, Construction, Trade and Commerce, Transport and Communications. This seems to be due to the lack of appropriate training and orientation. There are very few persons who have reached even the Matriculation or the Higher Secondary School stage. The actual figure for this stage is 217 males and 16 females representing 0.29 per cent and 0.02 per cent of their respective numbers. There are only five non-technical and 3 technical graduates. These figures by themselves amply illustrate the need for the upliftment of these communities through more advanced education and technical training. It is also seen that though there are more number of workers than the district percentage among these communities, yet the sort of work that is being done is only of the lowest category. From this it becomes obvious that their economic and social standards are also very low.

The following statement shows the population particulars of the various Scheduled Castes enumerated in Cuddapah district at the 1961 Census:—

STATEMENT III-5

Sl No.	Name of the Caste	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)
	Total Scheduled Castes . .	148,616	139,245	9,371
1	Adi Andhra . . .	4,930	3,726	1,204
2	Adi Dravida . . .	119	108	11
3	Arundhatiya . . .	959	959	..

5	Dandasi . . .	4	4	..
6	Dom, Dombara . . .	162	38	124
7	Jambuvulu . . .	2	2	..
8	Madasi Kuruva or Madari Kuruva.	37	37	..
9	Madiga	73,762	70,886	2,876
10	Madiga Dasu and Mashteen .	23	23	..
11	Mala	65,239	62,041	4,198
12	Mala Dasu . . .	1,203	1,182	21
13	Mundala . . .	1	..	1
14	Thoti	871	20	851
15	Scheduled Castes not specified .	293	219	74

The Scheduled Tribes population of the district is only 1.67 per cent. Their economic and social condition is no better than those of the Scheduled Castes. Their educational achievements are hardly worth mentioning. Only twenty two persons have reached Matriculation or the Higher Secondary School stage. Most of them work as Agricultural labourers and a few work in Household Industry, Mining, Quarrying *etc.*

The following statement illustrates the population particulars of the various Scheduled Tribes enumerated in Cuddapah district in the 1961 Census :—

STATEMENT III-6

Sl No.	Name of the Tribe	Total	Rural	Urban

6	Yerukulas . . .	8,316	7,786	530
7	Scheduled Tribes not specified .	79	78	1

Social and religious groups

Hindus and Muslims form the bulk of population of the district. Between them they constitute 95.51 per cent of the people, the Hindus being 81.51 per cent and Muslims 14.00 per cent. These two major religious groups are followed by the Christians (4.47 per cent), and the Jains 0.01 per cent. There are a few Sikhs and one Budhist (Female) also living in the district.

CHAPTER IV

AGRICULTURE

Agricultural practices :

It has already been indicated that the district of Cuddapah can be divided into three natural divisions, Agricultural practices largely depending on the conditions in each of these divisions. Several of the Agricultural operations are, no doubt, common to all the three divisons.

The ryot starts considering the Agricultural year, as the Ugadi (Telugu New Year's Day) approaches. The new *Panchangam* (Almanac) becomes available as soon as the Ugadi comes and consultations are held among the ryots most informally and often the largest land holder among the ryots leads the Agricultural operations. Even *purohits* are consulted, most probably, round the street corners. Then as soon as the first rains called "*Tolakari Chinukulu*" occur, the village community is alive with activity. A day is decided and the first aspect of the Agricultural operations start with preparatory cultivation by ploughing the land by the application of the *guntaka.*

Taking the western plains, here also the *guntaka* is used and then the land is ploughed, but as deep ploughing is necessary in these black cotton soils, it has now been the common practice to use the heavier iron plough. Previously the local variety called *peddamadaka* was used and is still in vogue in many areas though the iron ploughs advocated by the Agriculture Department are becoming popular. The ryots use the *peddamadaka* or iron plough once in five years normally. In the case of wet lands, the land is ploughed as in the case of dry lands but compact plots are formed for containing water with the help of ridges and elongated bunds. The usual form of sowing in dry land is by *gorru.* This helps line sowing which in its way helps inter-cultivation. The *gorru* or seed drill conists of 3 to 6 teeth (in the western plains it usually has six teeth). The teeth are of iron, supported by wooden backing and are hollow. Connected with each of them is a hollow bamboo and the upper ends of these are brought together and fixed into a hopper called *gulgam.* The seed dropped in the hopper passes down the bamboo tubes through the holes in the teeth and sow into the miniature furrows in the field which the teeth make as the instrument is dragged over by the pair of bullocks. The seed having been sown, the *guntaka* is again lightly used to cover the furrows. In the wet soils the practice of transplantation is the rule for both the first and second crops all over the district. Sajja (Bajra) in Sidhout, Badvel and Rajampet taluks, Ragi in Rayachoti taluk, Chillies in Badvel and Pulivendla taluks are also transplanted. Paddy is not transplanted in unirrigated conditions where *gorru* sowing is adopted and irrigated later. The paddy seedlings are later thinned from the lines so that the crop can grow into its usual stature.

Because *gorru* sowing is adopted all over the district, inter-cultivation is in vogue in this area from ages immemorial. The process of inter-cultivation in the dry land is carried out by the help of *guntakas* of various sizes so as to synchronise with the seed spacing followed in the *gorru.* In the case of wet lands, paddy inter-cultivation is done by the use of push-hoes advocated by the Agriculture Department. Where the ryot is poor he uses the hand-rakes for weeding, an another important Agricultural operation in dry lands all over the district. Labour is employed for two days on dry lands and on wet lands for three days per acre so that weeds are plucked out with manual labour.

Manurial practices in the Agricultural operations though not common throughout the district, do receive considerable attention of the ryot. In areas, specially in the eastern valley and the southern plateau regions, green leaf manure is invariably used in wet lands. In the dry lands, penning of sheep and goats where the ryot can afford is a very common practice. The cost would be from 10 to 40 Rupees for about 1 to 4 thousand of sheep and goats. While this is a very good method, it is not of course practicable to cover all areas, simply because there is not sufficient number of sheep and goats to go round. Rural compost has come into its place, because of

the extension work done by the Blocks, but it is practised intensively in the eastern valley and the southern plateau rather than in the western plains. Some progressive ryots raise manure crops like Pillipesara, and Indigo which are ploughed into the land. It is not the practice to waste cow dung for fuel purposes.

Harvesting is done by manual labour only. It is a glorious sight to watch rows of men and women with their simple sickle cutting the crop with machine like precision during harvests. Groundnut is either lifted in pods by working the *Peddaguntaka* or by beating with wooden flails to separate the pods from the plant. Thick stemmed plants like Redgram or Castor are harvested with knives. Cotton is picked by the hand, and collected in the hollow of the saree formed by tucking in at the waist in front.

The district is noted specially in the eastern valleys and the southern plateau for its horticulture plantations. The citrus, and the mango among others are the bounteous crops of these areas. Mention must also be made of the melon fruits of this district grown on the river beds particularly along the Penneru bed in Cuddapah, Sidhout, Jammalamadugu and Kamalapuram taluks. This crop has much commercial possibilities and the Research Station at Sidhout is helping in this aspect.

The crops are normally rotated so that the natural soil content is conserved. The common rotation in dry lands are—

(1) Cotton-Groundnut-Jonna as a three year rotation.

(2) Groundnut-Korra-Jonna or Groundnut-Jonna-Sajja as another three year rotation; and

(3) Groundnut-Redgram as a two year rotation

Wet land is rotated with Paddy and Groundnut or Sugarcane and Onion in Proddatur taluk; with Paddy and Ragi or Turmeric and Ragi in Cuddapah taluk; with Groundnut, Sugarcane, Betelvine or Ragi in Kamalapuram independent sub-taluk, with Bengalgram and Coriander apart from Cotton in Pulivendla taluk; with Jonna and Horsegram and if irrigated with Ragi in Badvel taluk; Groundnut and Ragi, Groundnut and Cotton, Groundnut and Chillies in dry lands are normally rotated in several areas of the district. In garden lands Sajja and Ragi or Sajja and Coriander are often rotated. In dry lands the pattern is that deep rooted crops are followed by light rooted ones, heavy feeding crops by light feeding ones and leguminous by non-leguminous varieties.

A statement showing the sowing and harvesting months of the important crops of the district are indicated below for ready reference :

STATEMENT IV-1

Crops (1)		Sowing season (2)	Harvesting season (3)
Paddy	Winter 1st crop	August-October	November-January
	Autumn 2nd crop	February	August-September
	Summer 3rd crop	January	March-May
Jonna		August-September	December-January
Sajja		July-August	December
Ragi		November-January	January-April
Varagu	Kharif	August-September	November-December
	Rabi	July-August	October-November
Samai	Kharif	August-September	October-December
	Rabi	July-August	October-November
Horsegram		October-November	February-March
Green-gram	Kharif	August-October	January-February
	Rabi	December	March
Blackgram		August-October	January-February
Bengalgram		November-December	February-March
Redgram		July-August	January-February
Onions		January	May
Chillies		September	March
Groundnut		July-August	November-December
Gingelly		June-July	September-October
Castor		July-August	January-March
Catton		August-September	February-April
Mesta (Gogu)		July-August	December-January
Tobacco		October	February

Calendar of Agricultural operations for Cuddapah district:

A general calendar of Agricultural operations during a normal year in the district of Cuddapah is attempted. It is an often quoted statement that Agricultural operations in dry areas of the district is a gamble on the monsoons. It is, therefore, necessary that not only should the South-West and the North-East monsoons be timely but to be effective, the following amounts of rainfall are necessary for successful Agricultural operations. Wide deviations would spell difficulties to the ryots. The average rainfall of the district is about 28 inches a year as indicated in the statement given below.

STATEMENT IV-2

South-West Monsoon.	June	2.50	inches
	July	4.50	,,
	August	4.50	,,
	September	4.00	,,
North-East Monsoon.	October	5.00	,,
	November	3.50	,,
	December	1.50	,,
Winter period.	January	0.50	,,
	February	0.50	,,
Hot weather period	March	Nil	
	April	0.50	,,
	May	1.00	,,
	Total	28.00	,,

Thus in this drought stricken district with poor soils an even distribution of rainfall from June to December is absolutely necessary for all the taluks so that Agricultural operations are successful and famines are avoided. Monthwise discussion of the general calendar for the district is undertaken below:

June:- The South-West monsoon commences in this month, and hence Agicultural operations start in this month. Though showers are occasional, the ideal would be about 2.50 inches of rainfall. Absence of rainfall postpones cultivation under the spring channels and the ploughing of land. The rainfall not only helps the standing crops sown in May, but would be very useful, as the ryots sow about 10% of area under Sajja, 10% under Turmeric, 50% under Castor and small extents under Sugarcane, Chillies and Onions. Petty extents of late third crop Paddy may be harvested under wells during this month. Excessive rainfall also retards ploughing of dry lands. In a normal year there should be 5 to 6 wet days in this month.

July:- The busiest month for sowings and the South-West monsoon should therefore be normally active. July is the month for planting Turmeric,the money crop of the irrigated area, and the sowing of Groundnut and Cotton, the money crops of the dry area. About 4.50 inches of rainfall would be ideal for helping Agricultural operations to the full. About 2% under Paddy and 80% under Turmeric are planted. The following extents of dry crops in terms of percentages to cover all cultivated areas are generally sown in this month.

Jonna	10%	of the district area
Sajja	40%	do
Korra	15%	do
Arika	25%	do
Groundnut	60%	do
Cotton	80%	do
Castor	50%	do
Sugarcane	50%	do
Chillies	50%	do
Onions	50%	do

There is never any harvesting during this month. Absence of rainfall upsets the scheme of sowing violently while continuous rainfall would be bad for the tender sprouting crop as a result of sowing in this month. Re-sowings after stoppage of rains may have to be resorted to. Water is let into the K. C. Canal and it reaches Cuddapah during the first week of July. The smaller tanks having a capacity of three months and less should get filled up in this month. There would be 6 to 7 wet days in July.

August :- In this month the monsoon continues to be very active. Heavy rainfall as far as Cuddapah district is concerned should normally be expected in this month. A rainfall of 4.50 inches would be most suited for the standing crops in the district. If far too heavy, the rainfall may spoil the crop that is ready for harvest and also prevent sowing in this month and ruin the tender crop sown in the last week of July. In the case of irrigated crops 21% of area under Paddy and about 10% of area under Turmeric would be transplanted. As regards dry sowings, the following extent of crops would be sown in a normal year.

Cholam	30%	of the district area
Sajja	40%	do
Korra	45%	do
Arika	40%	do
Groundnut	25%	do
Cotton	40%	do
Horsegram	50%	do

Absence of rainfall postpones the sowing of these dry crops and also the raising of wet crops under irrigated conditions. In this month ryots would also be doing some harvesting. Sajja would be harvested over 10%of the district area; Korra, Paddy and Groundnut on smaller extents.

In a normal year the ryot expects all the tanks in the Eastern Valley and the Southern Plateau regions to be full by the end of August.

September:- The South-West monsoon continues and by the end of the month it tapers off. Normally the ryot would expect in the first fortnight of September, in an ideal year, about 4% of rainfall. If the rains are heavy the late sowings would be automatically retarded and the young seedlings among the standing crops would be spoiled. The rains help to fill the rain fed tanks at least by the middle of September, if they were not full by the end of August. Sowings are continued in this month as well. 40% of the area under Paddy would be transplanted during this month. The dry crops sown would be in the following percentages:-

Cholam	30%	of the district area
Sajja	10%	do
Ragi	5%	do
Korra	30%	do
Arika	20%	do
Groundnut	5%	do
Cotton	30%	do

This month also sees harvesting during the last week when the South-West monsoon would have normally abated and gives a free hand for the ryots to complete harvesting operations. 40% of the

district area under the Sajja crop, 25 % of the Korra crop, 10% of the Arika crop and 15% of the Groundnut crop would be harvested in a normal year.

Good rains increase supplies under the K.C. Canal which would facilitate transplantation of crops. Absence of rainfall retards late sowings and also the raising of wet crops under the irrigation sources, barring the K.C. Canal. There would be 7 to 10 wet days during this month.

October:- This month ushers in the North-East monsoon, and if there is any cold season at all in Cuddapah district we can say that by the end of October it commences. But it would be more correct to say that in the month of October the climate is just pleasant. If there is a heavy rainfall, harvesting operations are retarded simultaneously dislocating sowings of Groundnut and Cotton in parts. In the wet crops 15% of Paddy and 20% of Ragi are transplanted. As regards dry crops 15% of the District area under Jonna, Arika, and Cotton are sown. This month marks the harvest of Sajja crop, especially in Rayachoti and Rajampet taluks. 40% of the crop under Sajja, 25% under Korra and 10% under Arika, 15% under Cotton and small extents of Jonna are harvested. In a normal year the ryot would expect about 5.00 inches of rainfall with 7 to 10 wet days.

November:- The North-East monsoon continues during the course of the month and in a normal year rains to the tune of 3.50 inches could be expected. Heavy or continuous rainfall would interfere with the harvest of Paddy, Jonna, Sajja and Korra in some parts. As regards sowings this is the month for the heavy transplantation of Ragi to the extent of 40% of the total cultivated area. Small extents under Paddy are also transplanted to an extent of about 3%. About 5 % of Jonna is also sown during this month in a normal year. As regards harvests, the season commences from this month. About 5 % of Cholam, 16% of Sajja, 25 % of Korra, 35% of Arika and 15% of Groundnut of the district area would be harvested in a normal year. As the extents under Korra and Arika would not be heavy except in the western plains this month is not regarded as the busiest month for the purpose of harvests, though harvests during this month would occupy some of the ryots in the eastern valley and the southern plateau regions. The month of November has 6 to 7 wet days.

December:- The North-East monsoon tapers off and it would be normal not to expect any rain after the 15th December though about 1.50 inches of rainfall in the first fortnight of December would help sowings of this month. This may be called the cold weather month of Cuddapah district. As regards sowings, this is the best month after June for Onions. 50 % of the district area that is dedicated to Onions is sown in this month. 2 % of Winter Paddy, about 5% of Cholam, 5% of Ragi and about 10% of Gingelly crops are sown during this month. Next to January this can be regarded as the heaviest month for harvesting. Almost all the wet crops and the dry crops are harvested during this month. The following percentages of the district area under each crop is harvested during the season.

Paddy	20
Cholam	35
Sajja	3
Ragi	2
Korra	2
Groundnut	40
Redgram	50
Greengram	50
Chillies	50
Onions	50

While the absence of rainfall facilitates the harvest of crops it would no doubt affect the raising of the second crop Paddy.

January:- This being the first dry month after the North-East monsoon, it is reasonable to expect occasional showers spread over during the month to an extent of about half an inch rainfall. The second crop Paddy to an extent of 10% of the area would be sown or transplanted. The following extents would also be sown in a normal year.

Ragi	..	20
Gingelly	..	33
Redgram	..	50
Greengram	..	50

This month together with February can be regarded as the best sowing season for pulses specially for Redgram and Greengram. The river channels during this month would be flowing well and rainfall would be beneficial specially in the eastern valley region for the tender Paddy raised in the area.

In a wider sense, January could be regarded as the season of harvests. *Sankranti*, the festival of harvests falls in this month, and one expects large areas under each crop would be harvested. The

following percentages of areas in a normal year would be harvested during this month:

Paddy	50%
Jonna	30%
Ragi	25%
Arika	25%
Cotton	25%
Redgram	50%
Greengram	50%
Chillies	50%
Castor	50%
Groundnut	15%
Korra	15%

Small extents under Sajja would also be harvested.

February:- Days begin to get warm from this month onwards. Normally the month is rainless. But about half an inch of rainfall would help sowings of dry crops to the following extents:

Gingelly	30%
Redgram	50%
Greengram	50%

Korra and Ragi and a very small extent of Jonna are also sown in this month. This month also is a busy month for harvests. Ragi, Castor and Cotton would be harvested on large extents. The following percentages of areas under each crop would be harvested in a normal year:

Paddy	20%
Jonna	50%
Sajja	8%
Ragi	35%
Arika	10%
Groundnut	5%
Cotton	35%
Turmeric	10%
Castor	50%

March:- By the time we are in this month Cuddapah district goes hot. March is normally rainless and the dry weather facilitates the harvest of second crop paddy, that has been left over from February. If there is rain in this month it is retarded. Even small rainfall would delay the harvests of Turmeric, Ragi and Paddy. But it is no doubt very helpful for the Cotton crops. In this month normally Gingelly is sown on about 30% of the district area. No other sowings are normally undertaken, except in very insignificant patches of Paddy and Ragi under private wells. The harvests would, however, be continued with great vigour. Large extents of Turmeric, Horsegram, Sugarcane and Onions would be harvested. This month can be rightly regarded as the month of harvest for Turmeric. The percentages of areas harvested are indicated below:-

Paddy	3%
Jonna	10%
Ragi	30%
Korra	10%
Cotton	30%
Gingelly	15%
Turmeric	80%
Horsegram	50%
Onions	50%
Sugarcane	50%

April:- This is the hottest month of the year with May. No sowing operations are carried out in this month. But left over extents of March are harvested. About 4% of paddy which is normally of the second crop is harvested. The following extents besides Paddy would normally be harvested in this month.

Ragi	8%
Korra	15%
Cotton	10%
Gingelly	15%
Turmeric	10%
Horsegram	50%
Sugarcane	50%

May:- This is the hottest month of the year, with April when *Rohini Karthi* dominates. A moderate rainfall of say 1.00" helps the ryot to prepare his dry fields with ploughing and spreading of manure *etc.* The raising of small extents of Paddy, Ragi, under the spring channels, and harvests of about 35% of area under Gingelly and 5% under Groundnut are accomplished. There would be 1 to 3 wet days during this month.

In the western plains this is the idle season, when ryots have plenty of leisure and attend to matrimonial matters in the family, or sometimes indulge in settling old family scores.

The police are often kept busy this month rounding up factionists. Even in the Eastern Valley and in the Southern Plateau time hangs heavy on the ryot during this period. Cock fighting provides a common pastime. At nights the tropical Moon is very conducive for rural games like *Chedugudu* etc.

Several new strains were introduced particularly in Paddy, Jowar, Ragi, Sajja, Korra, Variga, Redgram, Horsegram, Groundnut, Cotton, Sugarcane, Chillies and Castor. This has undoubtedly resulted in better yields of the better varieties of crops.

Seed Farms

Seed Multiplication in Cuddapah district is being carried out by the numerous seed farms established in the district. During 1957-58 five seed farms were working at (1) Utukur, (2) Chamerlapalle, (3) Mydukur, (4) S. Uppalapadu and (5) Peddapasupula. Besides continuing these farms, 11 seed farms were sanctioned in G.O. No. 858, dated 22-4-1959. There are also seed farms at Chemmumiahpet, Bhoomayapalle and Peddasettipalle.

Special Schemes

The following are the two of the more important special schemes which are in vogue in Cuddapah district.

(*1*) *Cotton extension scheme*: The scheme has to a great extent, enlarged the area of Cotton under the H. 420 strain. Under this scheme during the period 1953-60, 10,794 acres were brought under extensive cultivation and 321,014 acres under intensive cultivation.

(*2*) *Oil Seeds Development Scheme*: This scheme has popularised the spread of the strains TMV 3 and TMV 2 in Groundnut. The Proddatur seed farm has been a product of this scheme.

Fodder crops: The ryots of the district are not rich enough to set apart special extents exclusively for the cultivation of fodder crops. But the fodder which is the by-product of the main crops is usually sufficient for local requirements. The reader would be interested to scan the statement indicating the position of fodder available in the district. The statement indicates the average production of fodder in a representative year.

STATEMENT IV-3
GRAIN CUM FODDER

Name of Crop	Area in acres	Yield per acre (dry matter in lbs.)
(1)	(2)	(3)
Paddy	143,000	2,500
Jowar	270,000	2,250
Bajra	95,000	1,000
Ragi	50,000	1,500
Korra	90,000	750
Variga	23,000	750
Pulses	52,708	500

Assistance to cultivators in the field of Agriculture: It has been found in Cuddapah district as elsewhere in the State that to improve the pace of Agricultural production, it is necessary to afford financial assistance to Agriculturists. The following loan schemes are in vogue in the district.

Takkavi loans : Seed and Manure loans to a limit of Rs. 120/- per head is distributed through the Agriculture Department.

Loan for Agricultural implements: A loan upto a maximum of Rs. 100/- per individual operator (at a rate of interest fixed by the Government from time to time) recoverable in one instalment is also disbursed through the Agriculture Department.

Intensive Manure Scheme: The scheme was introduced in Cuddapah district during 1951-52. The maximum amount that can be granted to an individual ryot is Rs. 500/- at an interest of 4½%, recoverable in one year.

Besides the above three schemes, the centre is advancing loans through the State Government to deserving agriculturists upto a maximum of Rs 3,000/- per individual for raising new gardens at the rate of Rs. 300/- per acre in the case of citrus and Rs. 150/- in respect of mango, sapota, and guava. The loan is repayable in 10 annual equal instalments commencing from the 6th year after disbursement with an interest of 4¼%.

Short term loans are also given for the rejuvination of old orchards at Rs. 45/-per acre upto a maximum of Rs. 450/- for fertilisers and purchase of seedlings, the interest being 3-1/8 % for a maximum duration of 15 months. The loan is recoverable in 18 months from the date of disbursement.

Long term loans are given to individual growers of cashewnut at the rate of Rs. 100 per acre upto a maximum of two thousand at 4¼ % interest.

Kharif and Rabi loans :-In order that intensive efforts may be made for allround Agricultural production a scheme of granting loans for the Kharif and Rabi campaigns were inaugurated during the Rabi season in 1958 and the loans upto a maximum of Rs. 50 at the rate of Rs. 25 per acre for purchase of seeds, manures, implements *etc.*, are granted by Agricultural Assistants and Agricultural Extension Officers of the samithis after the loans are sanctioned by the District Agricultural Officer. There has been a great demand for this type of loans and the allotments are quickly spent.

Hire Purchase Scheme:-This scheme provides hire purchase loans for (1) Oil engines and electric motors, (2) tractors and (3) Agricultural implements.

Rabi and Kharif Campaigns:-Under the direction from the Planning Commission, the State Government have instituted Rabi and Kharif Campaigns in the district from the year 1958. Under the scheme squads are formed from progressive ryots. Seeds, pesticides, implements are supplied to the very door of the ryots by the squads and the extension staff. Plant protection aids are fully employed. The ryot is educated to implement new techniques in Agricultural production. This method of obtaining allround people's co-operation in Agricultural sector has increased the yield of the various crops ranging from 10 to 30 per cent in the district. Areas covered during each campaign in the district are furnished below:

	Year	Paddy	Jonna	Ragi	Korra
(1)	(2)	(3)	(4)	(5)	(6)
Rabi . .	1958-59	101,336	80,390	42,459	..
Kharif . .	1959	131,817	159,519	16,000	130,000
Rabi . .	1959-60	10,885	81,240	43,330	..
Kharif . .	1960	132,000	160,000	16,000	130,000
Rabi . .	1960-61	11,211	82,120	44,420	..

The Cuddapah district won the regional prize in Jonna with a yield of 800 lbs. for Cuddapah, Chittoor and Anantapur region.

Package Programme:- As a corollary to the Kharif and Rabi campaigns a scheme called the Package programme, now in operation in West Godavari District, has also been introduced in this district on a smaller scale in Ravulapalle village of Kazipet firka in Cuddapah Panchayat Samithi during 1960 and in Vontimitta village of Sidhout Panchayat Samithi during the Rabi season of 1960-61. Under the scheme compact areas of about 500 acres of wet land are selected and all the Agricultural requirements of this area are catered for.

Japanese method of paddy cultivation

Propagated in the District from 1951, and based on the scientific system of harnessing the hereditary and environmental sectors, to improve Paddy yields the Japanese Method of Paddy cultivation in the villages covered by K. C. Canal has made much head-way, as a result of Agricultural Extension Work of the Community Development programme, under the guidance of the District Agricultural officers.

From 1951 to 1953, the programme was mostly in the stage of propaganda. The figures given below give the extents under the Japanese method of cultivation from 1954 onwards to date:

Year	Achievement in acres	
(1)	(2)	
1954-55	4,462	
1955-56	16,490	
1956-57	24,267	
1957-58	29,997	
1958-59	53,390	
1959-60	52,292	
1960-61	32,210	Period of adverse seasonal conditions
1961-62	46,853	

Agricultural Research Centres

The following Agricultural Research Centres are located in Cuddapah district so that scientific techniques could be handed over to the ryot in the field.

(1) Regional Fruit Research Station at Anantharajupet (near Kodur) for Mango, Lime, Citrus, Sapota, Guava, Jack *etc*.

(2) New Root stalk trial Station at Kodur for Citrus.

(3) Melon Research Station at Sidhout for Melons.

(4) Betelvine Research Station at Cuddapah for betelvine.

(5) Onion Research Station at Anantharajupet for Onions.

(6) Rice Research Station at Kamalapuram for lift irrigation scheme.

Thus the Department of Agriculture has been serving the needs of the ryots in multifarious ways. The following statement showing the distribution of seeds and manures through the Department for a year indicates the remarkable Agricultural progress through the efforts of the Department.

(1) Seeds and manures distributed for 1961-62.

Paddy	364	Tons	1,242	Pounds
Jonna	9	,,	122	,,
Groundnut	34	,,	961	,,
Ground manure	28	,,	920	,,

(2) Chemical Fertilisers distributed.

Urea	730	Tons
Ammonium Sulphate	478	,,
Ammonium Nitrate	374	,,
Rural compost	355,239	,,

It is also proposed to sell plant protection equipment through the Department. Soil conservation scheme is also in vogue in this district.

The Second Plan envisaged an ambitious outlay of Rs. 44.48 lakhs for the district. This amount was fully utilised resulting in allround development in the field of Agriculture.

The district allotment under Agriculture for the Third Plan is Rs. 38.625 lakhs. The Industrial and Research aspect of Agriculture has been well emphasised in the outlay of the plan as Rs. 10 lakhs for the fruit preservation factory at Kodur and Rs. 14.75 lakhs for the Regional Fruit Research Station at Kodur have been set apart. By the end of the Third Plan it is expected that Kodur would become an important Research Centre for the State.

CHAPTER V

ANIMAL HUSBANDRY AND FISHERIES

Animal Husbandry

The livestock population of Cuddapah district is as given below:

Year (1)	Livestock population (2)
1945	1,161,849
1951	1,778,235
1956	1,393,212
1961	1,438,080

For detailed break-up of these figures the reader is referred to the tables given under Administrative Statistics of this volume. It will, however, be seen that there has been a big fall in the livestock population between 1951-56. As an explanation the reader would be interested to know the opinion of the Director, Bureau of Economics and Statistics in this respect. Speaking of the 1956 figures he says "the figures of the previous Census of 1951 cannot however said to be as accurate as those obtained in the present Census (1956). Due to the improvements in procedure adopted in the present enumeration the figures of 1951 Census have therefore to be taken with a measure of caution." There has, however, been a tangible increase from 1956 to 1961.

The main stock, comprising livestocks are cattle, buffaloes, sheep, goats, horses and ponies and other livestocks. Poultry is not included under livestock figures.

The total poultry population in Cuddapah district is as given below:

Year (1)	Poultry population (2)
1945	373,620
1951	582,806
1956	830,532
1961	880,369

The activities of Animal Husbandry Department in Cuddapah District :– The above figures would indicate that there is a good deal of work to be accomplished by the Animal Husbandry Department so that there is grading in livestock as well as in poultry to enrich the food values in an Agricultural district like Cuddapah.

The activities of the Animal Husbandry Department have therefore had a two pronged drive (1) in respect of Animal Husbandry and (2) in respect of Veterinary.

Animal Husbandry :–In this branch the district activities have been directed towards the development of all species of livestock generally. The key village scheme at Gundlakunta of Jammalamadugu taluk has been a high light in this respect. Extensive and intensive propaganda on the value of scientific breeding, feeding and management of livestock has been undertaken by the department. The grading up of the local buffaloes with Murrah buffaloes was undertaken by distribution of Murrah bulls at half cost and through the bulls stationed at the veterinary institutions and key village centre. Artificial insemination through the key village centres was also effectively implemented.

Veterinary :– In this respect, the preventive and curative aspect of diseases to which the livestock fall pray to, has been attended to during the decade with increased success. The routine duties of the veterinary staff like castration, anti-rabies treatment of animals bitten by dogs, ranikhet disease vaccination among poultry, have been extensively carried out.

Administration :–The following personnel man the Animal Husbandry programmes of the district on the technical side:

District Veterinary Officer	One
Veterinary Assistant Surgeons	Four (incharge of Veterinary hospital at Cuddapah and Veterinary Dispensaries at Badvel, Proddatur and Rajampet),
Touring Veterinary Assistant Surgeons	Eight (at Rayachoti, Kamalapuram, Sidhout, Pulivendla, Onipenta, Muddanur, Madhavaram and Kodur).
Touring Veterinary Assistant Surgeon	One (in charge of touring Billet at Kalsapadu).
Extension Officers attached to Panchayat Samithis	Thirteen (at Lakkireddipalle, Rayachoti, Jammalamadugu, Sidhout, Muddanur, Pulivendla, Porumamilla, Kodur, Mydukur, Cuddapah, Badvel, Vempalle and Kamalapuram)
Veterinary Livestock Inspectors	Two (one at the Veterinary hospital Cuddapah and the other in-charge of follow up campaign)

Compounders	Four (at Veterinary Hospital, Cuddapah, Veterinary Dispensary, Rajampet, First Aid Centre, Chinnamandem and First Aid Centre, Tekurpet)
Veterinary Vaccinators	Ten (for the rinderpest follow-up campaign)
Attender	One (at the clinical laboratory attached to veterinary hospital, Cuddapah).

Better Breeds :-The following statement will indicate in general the efforts made to improve the breed of the local cattle.

Bulls on premium scheme in the district :

STATEMENT V-2

Breed of bull	No. of bulls	No. of services	No. of services verified	No. of calves born		No. of calves inspected	
				M	F	M	F
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Ongole breeding bulls							
Balance on 1-4-1960	68	1,443	144	220	196	48	46

Balance on 31-3-1961	18	1,152	153	162	131	44	46

Bulls on co-operative basis: Cattle breeding societies on co-operative basis, have also been started, one at Obulam in Sidhout taluk and the other at Chitvel in Rajampet taluk. The cattle breeding society at Obulam has been doing good work and it is maintaining one Ongole breeding bull. Unfortunately the cattle breeding society at Chitvel failed to maintain its two Ongole bulls according to the rules and conditions stipulated by the department and hence the bulls had to be withdrawn with effect from 6-5-1962. It would be of interest to note that in Cuddapah district about 2,500 Ongole bulls are bought each year from Nellore and Guntur districts and about 250 Hallikar bulls are being bought from Chittoor and Anantapur districts.

This would indicate that, with more Ongole breeding bulls in the western plains, and Hallikar bulls in the eastern valley and the southern plateau the district should be made self-sufficient for its draught animals. But in the case of she-buffaloes about 1,500 are exported every year to Madras, though most of them are of the local variety with average milk yielding capacity. This definitely indicates that the supply of milk gets limited for local consumption. It is therefore, essential to increase the local milk yield by cross breeding the local variety with Murrah buffaloes. This work can be effectively carried out by increasing the number of key villages to serve larger areas of this district.

One key village scheme was introduced at Gundlakunta village of Jammalamadugu taluk during the year 1960-61. Five Ongole and four Murrah buffaloes were provided at this centre which is under the administrative control of the Inspector of Key Villages, Nellore. A vehicle is also provided for quick and effective transport of semen.

Veterinary

The veterinary aspect of the Animal Husbandry programme has been attended to with much vigour as a result of the Five Year Plans of the district. At present the following institutions cater to the needs of cattle wealth in the veterinary field.

A veterinary hospital is situated at Cuddapah. There are 3 veterinary dispensaries at Rajampet, Badvel and Proddatur and 10 minor veterinary dispensaries at Kamalapuram, Yerraguntla, Sidhout, Pulivendla, Rayachoti, Rayavaram, Onipenta, Muddanur, Kodur, and Madhavaram. There are two first class First Aid Centres started at Chinnamandem of Rayachoti taluk and the other at Tekurpet of Badvel

taluk. There is also one touring billet at Kalsapadu of Badvel taluk. In addition there are 33 First Aid Centres situated in the following places:

Peddaorampadu, Rekalakunta, V. Kothapalle, Nallapureddipalle, Kodur, Chilekampalle, Nuliveedu, Narasapuram, Chapad, Porumamilla, Mydukur, Mirjakhanpalle, Kuruguntapalle, Vaddirala, Peddapasupula, Settipalle, Devapatla, Diguvagottiveedu, Thangedupalle, Penikalapadu, Gundlur, Chinnadandlur, Peddacheppalle, Chennur, Obuluvaripalle, Lakkireddipalle, Payasampalle, Kadapayapalle, Vontimitta, Lavanoor, Palugurallapalle, Motur, and Vempalle.

The First Aid Centre started at Pydikalva village is sustained by public contribution. The Veterinary Assistant Surgeon of Kamalapuram attends to the work in this centre once a week.

Besides these, the Panchayat Samithis have also a programme under Animal Husbandry looked after by the Extension Officers, (Animal Husbandry) in their respective jurisdictions. Their headquarters are as given below :

Lakkireddipalle, Rayachoti, Jammalamadugu, Sidhout, Muddanur, Pulivendla, Porumamilla, Kodur, Mydukur, Cuddapah, Badvel, Vempalle, and Kamalapuram.

Rinderpest was one of the dreaded diseases from which the cattle usually suffered. Fortunately this disease is almost eradicated under the Rinderpest eradication scheme. The work of vaccinating imported cattle is being attended to by the regular staff of the Animal Husbandry Department and the Panchayat Samithis.

In the realm of poultry development, the department has started a poultry farm at Cuddapah on 12-11-1948 to improve the poultry breeding in the district by rearing the exotic breed of poultry. This farm also supplies eggs for hatching and cockerels for grading up the *desi* breed. The following is the strength of poultry as on 19-4-1962.

Rhode Island Reds	Chicks	637
	Cockerels	38
	Pullets	87
	Cocks	8
	Hens	91
	Total	861
White leghorn	Chicks	569
	Cockerels	15
	Pullets	35
	Cocks	8
	Hens	100
	Total	727

Besides the supply of eggs and cockerels from the farm the Panchayat Samithis have a definite programme through which supply of eggs and exotic cocks is made to the villages on contribution or on exchange basis. It would be of interest to know that every day about 350 fowls are exported to Bombay where there is a good market. Slaughtered birds packed in ice are also being exported to Bombay and Poona for table purposes. Since poultry is the poor man's wealth in the villages, greater efforts should be made to increase this wealth. The Veterinary Department should, therefore go all out to eradicate the dreaded Ranikhet disease, which is taking a toll of nearly 3 to 4 lakhs of birds every year. Even if a bird is taken to cost on an average of Rs. 3/- the loss to the district each year is to the tune of Rs. 9 to 12 lakhs.

Another aspect of the Animal Husbandry programme is dairying animal supply. Milk supply co-operative societies have been started in the district. The following statement gives the details of the institutions and the Blocks in which they are located and the financial assistance rendered to them during the Second Plan period.

Name of Block	Name of Milk supply society	Amount of loan advanced during Second Five Year Plan
(1)	(2)	(3)
		Rs.
Jammalamadugu	Jammalamadugu Milk Supply Co-operative Society	2,000
Badvel	Badvel Milk Supply Co-operative Society	5,700
Cuddapah	Cuddapah Milk Supply Co-operative Society	11,600*
Rayachoti	Rayachoti Milk Supply Co-operative Society	2,400
Chitvel	Chitvel Milk Supply Co-operative Society	5,000
Non-Block area	Proddatur Milk Supply Co-operative Society	4,250
	Total	30,950

* A subsidy of Rs. 1,200 is included in this amount.

Fisheries

The activities of the Fisheries Department in Cuddapah district is naturally limited as the water spread area under the control of the Department is scanty. There is, however, a growing demand for fish in the district but the supplies are very little. It will be seen that in Cuddapah district there are only 33 tanks under the Fisheries Department covering an area of 4,472 acres during the rainy season and 1,523 acres during summer. Of these one at Patha-Cuddapah is a demonstration tank, 24 are provincialised tanks and 8 are departmental tanks. With such a limited area it is not possible for the Fisheries Department to meet the demand of the public for fish. Due to the spread of knowledge regarding the food value of fish, there is a great deal of demand even in the rural areas of the district. At present the Assistant Director of Fisheries stationed at Kurnool is in charge of the Fisheries operations in this district assisted by two Assistant Inspectors of Fisheries at Cuddapah and Rajampet. The following are the activities of the Fisheries Department in this district:

(1) The supply of yarn and fishing tackles at subsidiary rates to the needy fishermen.

(2) To encourage co-operation among fishermen.

(3) Propagation among Agriculturists for the use of fish manure for paddy fields; and

(4) The collection and supply of fish seed to the Panchayat Samithis and private parties.

The Fisheries Department is trying to control Malaria, Guinea-worm and other water-borne diseases through the medium of fish.

For the control of Malaria the following fish have been bred in the stagnant waters of the tanks and pools and other malarial centres of the district.

(i) Gambusia
(ii) Aplochlus
(iii) Tarchogater

For combating Guinea-worm and other water-borne diseases the following species of fish have been introduced in the district.

(i) Bystroples
(ii) Ambaras

Among edible fish, our entire fresh water breed from Java is found to be Gourami, most suited for the district and naturally very forcibly advocated by the Fisheries Department. The other varieties cultivated are:-

(i) Labeofimbriatus
(ii) Cirrhinafulangi
(iii) Cirrhina reba
(iv) Barbus-species

Even if all the irrigation tanks of the district are stocked with quick growing fish it will not be possible to meet the requirements of the important towns like Cuddapah and Proddatur. An attempt was previously made in the composite Madras State to supply iced-fish from Mettur. Somehow this project was not a success and hence had to be given up. The only method, therefore seems to be to make better arrangements to supply fish from the nearest coastal areas.

The local crops found in this district are voracious feeders and they feed upon the fingerlings of Gourami and other varieties introduced by the Fisheries Department and thus denude the tanks of fast growing fish. Another danger is that the few tanks not under the control of the Fisheries Department are being depleted of their fish resulting in the stocks not forthcoming in the future seasons. Nature's balance must be maintained specially when the water spread area is limited within the district. It is also noticed that fish are being gathered in large numbers near the Adinimayapalle anicut by the local fishermen who indulge in indiscriminate fishing. In order to prevent this tendency to deplete the stock of breeders it would be advisable to declare this area as a prohibited area for fishing and conservancy effected.

Co-operative Societies:- The Fisheries Department have so far founded two co-operative societies in Cuddapah district, *viz.*, Gangavaram Fishermen Co-operative Society and Bestapalle Fishermen Co-operative Society. These two societies are stated to be working satisfactorily. The membership of these two societies is 110 with a share capital of Rs. 1,000/-. More co-operative societies may be useful in providing fish to the public.

Fish Farm:- There is a fish farm at Patha-Cuddapah in this district. Its construction was taken up under G. O. Ms. No. 4786 (Development), dated 20-3-1950 at a cost of Rs. 3,950/- and completed during 1950. The farm is situated in the Patha - Cuddapah tank bed about two miles from Cuddapah town. It is a three acre farm with one market pond and 4 nurseries. The market pond is one acre in extent and the nurseries ten cents each. The farm is intended to supply fish to Cuddapah town. The Assistant Inspector, Cuddapah is in charge of this farm.

The inland fishery resources of this district have not been fully exploited. Many large tanks, wells and reservoirs under projects are yet to be developed. A special staff to undertake survey of waters, location of spawning and breeding grounds, may give very valuable data for the development of fisheries in the district to meet atleast 75% of the requirements from within the district.

CHAPTER VI

CO-OPERATION

The co-operative movement has come to occupy prominent place in the social and economic regeneration of the country and accordingly a great deal of impetus has been given to this movement in Andhra Pradesh. Cuddapah district has had its own development in this sector and many major and highly important institutions have sprung up during this decade.

Administratively the Co-operative Department consists of two circles in Cuddapah district, *viz.*, Cuddapah North and Cuddapah South. The bifurcation came into being on 10-5-1955 under two Deputy Registrars of Co-operative Societies as the work had increased enormously. The South Circle comprises of the four taluks of Cuddapah, Rajampet, Rayachoti, and Sidhout with its headquarters at Cuddapah and the North Circle consists of the remaining five taluks of Proddatur, Jammalamadugu, Pulivendla, Kamalapuram, and Badvel with its headquarters also at Cuddapah.

The following are the various institutions in both the circles comprising the co-operative sector.

(1)	North circle (2)	South circle (3)	Total (4)
I. *Agricultural Credit Societies*			
1 Rural Banks	1	2	3
2 Large sized Co-operative Societies	12	9	21
3 Unlimited liability Credit Societies (small size)	353	283	636
4 Primary Mortgage Banks	2	2	4
II. *Agricultural Non-Credit Societies*			
1 Marketing Societies	6	5	11
2 Poultry Farming Societies	2	Nil	2
3 Fishermen Co-operative Societies	1	1	2
4 Milk Supply Societies	4	14	18
5 Palm Jaggery Societies	15	17	32
6 Land Colonisation Societies	1	1	2
7 Collective Farming Society	1	Nil	1
8 Cattle Breeding Societies	3	6	9
9 Gramdan Sarvodaya Co-operative Societies	3	Nil	3
III. *Non-Agricultural Credit Societies*			
1 Urban Banks and other Credit Societies	14	23	37
IV. *Non-Agricultural Non-Credit Societies*			
1 Students' Stationery Stores	7	11	18
2 Handloom Cotton and Silk Weavers' Co-operative Societies	57	31	88
3 Forest Coupe Societies	6	5	11
4 Labour Contract Societies	2	Nil	2
5 House Building Societies	2	2	4
6 *Other Societies including Supervising* Unions	2	6	8

(Source : Administration Reports of Co-operative Department, Cuddapah District 1960-61)

The above figures would indicate the existence of a fairly large co-operative sector working to enrich the district. Still, there seems to be scope for further enlargement.

During the Second Five Year Plan the expenditure in the co-operative field is given below :

1 Expansion of Rural Credit Societies	Rs. 4.772 lakhs
2 Education of Members and Office bearers	Rs. 0.076 lakhs
3 Research Surveys and Statistics	Rs. 0.095 lakhs
4 Development of Land Mortgage	Rs. 0.180 lakhs
5 Labour Contract and Forest Coupe Societies	Rs. 0.145 lakhs
6 Development of Co-operative Marketing	Rs. 5.505 lakhs
7 *Co-operative Farming*	Rs. 0.253 lakhs
8 Share capital and working capital loans to Weavers' Societies	Rs. 4.787 lakhs
9 Rebate on sale of Handloom cloth	Rs. 15.293 lakhs
Total	Rs. 31.106 lakhs

(Source : Second Five Year Plan-Cuddapah District-Review of Progress 1956-61)

Some particulars of the more important institutions are given below :

Rural Banks : The Rural Banks in the district are located in the villages of (1) Kondapuram, (2) Kotapadu and, (3) Uppapalle with a membership of 1,616 and paid up share capital of Rs. 146,108/-.

Large Sized Co-operative Societies : Large Sized Co-operative Societies are located in the following villages; (1) Gundlakunta, (2) Anantarajupuram, (3) Chinthakunta of Proddatur Taluk, (4) Chiyyapadu, (5) Ankalammagudur, (6) Chinthakunta of Jammalamadugu taluk, (7) Peddarajupalle, (8) Muddanur, (9) Payasampalle, (10) Vankamarri, (11) Obulrajupalle, (12) Korrapadu, (13) Chitvel, (14) Cuddapah, (15) Chennur, (16) Veeraballe, (17) Devagudipalle, (18) Cherlopalle and three other villages. The membership of these Societies is 5,655 with a paid up share capital of Rs. 4,51,763/-.

Co-operative Central Banks: There is only one Central Bank in this district at Cuddapah under the jurisdiction of the Deputy Registrar of Co-operative Societies, Cuddapah South. As the

Bank was facing heavy debts on account of which it was not able to obtain credit facilities from the Reserve Bank of India, an outright grant of Rs. 3.25 lakhs was sanctioned to the Bank to enable it to provide full cover for its bad debts and this has made the Central Bank start functioning again.

House Building Societies : The House Building Societies are located at Cuddapah, Rayachoti, Proddatur, and Kamalapuram.

The Cuddapah Co-operative House Building Society has been in existence from as far back as 1925. There are 163 members with a paid up share capital of Rs. 1,61,580/- at the end of the year 1960-61. The Society has completed construction of 77 houses and 3 houses are under construction at the end of the year.

The Rayachoti House Building Society came into existence in 1948. It has on its rolls 90 members with a paid up share capital of Rs. 88,400/-. It has completed 52 houses by the end of 1960-61 and 18 houses are under construction.

The Proddatur House Building Society was also registered in 1948. There are 172 members with a paid up share capital of Rs. 57,388/-. 91 houses under A, B, C, D classes have been proposed for construction. Upto 1960-61, 12 houses have been completed.

The Kamalapuram Co-operative House Building Society was registered on 31-5-61 and just started its work. It has 32 members on its rolls with a paid up share capital of Rs. 2,160/-. The Society is taking steps to acquire land.

Weavers' Co-operative Societies : Considerable encouragement had been given to Handloom Industry in Cuddapah district through Co-operative movement with the result that there are 85 Weavers' Co-operative Societies. The membership on rolls for 1960-61 was 12,111 with a paid up share capital of Rs. 3,73,537/-.

Administration: The administrative strength of the Co-operative Department consists as follows :

	Cuddapah North	Cuddapah South
1 Deputy Registrars	1	1
2 Co-operative Sub-Registrars	4	4
3 Senior Inspectors	14	10
4 Junior Inspectors	9	8
5 Clerical staff	4	4
6 Other staff like peons, *etc.*	11	12

It would also be useful to know the physical achievements in the co-operative sector during the Second Plan period. The statement below gives the achievements in the Second Plan period :—

	Achievements
1 Organisation of Large Sized Societies	21
2 Organisation of Rural Banks	3
3 Organisation of Small Societies	343
4 Enrolment of members	53,918
5 Education of—	
(a) Members (office bearers)	220
(b) Panchayatdars	5,608
(c) Members	2,215
6 Construction of godowns	21
7 Installation of cotton gins	1
8 Land brought under cultivation	232 acres
9 Landless agriculturists provided with lands	93
10 Issue of loans	1.97 crores
11 Dormant societies revived	149

(Source : Review of Progress—1956-61 Second Five Year Plan)

Almost all the villages in the district have been covered by the Co-operative Societies by the end of the Second Plan.

Co-operation has always been the hand-maid of planned progress and this aspect has been, in great measure, achieved through Co-operative Societies in Cuddapah district. While there is still more to be done to strengthen Rural Credit, what has been done so far has been a matter of satisfaction to the Co-operative Department.

CHAPTER VII

FORESTS

The Cuddapah district contains 1,189,712 acres of Reserved Forests according to the figures furnished by the District Forest Officers, Cuddapah South and North Divisions. Of this extent the area under South Division is 621,879 acres and North 567,833 acres. The particulars of these forests, range-wise, may be of interest to the reader.

STATEMENT VII-1

Name of the Range	Name of the Taluk	Class of Forests	Area of Forests in acres
(1)	(2)	(3)	(4)
CUDDAPAH NORTH DIVISION			
1 Sidhout Range	Sidhout	Class I	83,289.90
2 Badvel Range	Badvel	Class I	50,873.52
	Sidhout	Class I	42,040.05

	Rajampet	Estate Forests	19,375.00
13 Kodur Range	Rajampet	Class I	72,572.23

[Note: The figures given by the District Forest Officers range-wise do not tally with overall totals.]

From this it will be realised that the district of Cuddapah contains large and important forests, the systematic conservancy of which dates from the passing of the Madras Forest Act of 1882. They are mainly situated on the principal hill ranges *viz.*, the Veligonda, Seshachalam, Palakonda, Lankamalai, and Nallamalai hills of Badvel, Sidhout, Rajampet, Cuddapah, and Proddatur taluks. Isolated blocks of forests are situated in Pulivendla and Jammalamadugu taluks.

The forests can be divided into "dry deciduous forests" and "tropical thorn forests."

The dry deciduous forests form the bulk of forest tract of Cuddapah district and present considerable diversity in composition, density, and quality. These forests often may also be open and have luxuriant undergrowth of grass. In some parts of the Nallamalais and also in Seshachalam hills, the Forest Department has encouraged and conserved teak plantation though it is confined to very small areas. The commonest species of teak met are Chloroxylon swietenia, Hardwickia binata, Anogeissus latifolia, Erythroxylon monogynum, Terminalia tomentosa, Pterocarpus marsupium, Adina cordifolia and Layesteomia periflora mixed with bamboos. But these teak plantations have not shown the same amount of prolific growth as in the forest areas of Kurnool district or the Agency tracts. If, however, the deciduous forests of Cuddapah district are not so rich in teak plantation, they aptly compensate the deficiency by the most valuable species, Pterocarpus santalinus (Red Sanders) found in them. No account of forests in Cuddapah district would be complete if a clear picture of the Red Sanders is not presented. The following is an extract from the Souvenir of the Forest Department issued in 1959 in connection with "The World Agricultural Fair".

"Red Sanders can be said to be the pride of Andhra Pradesh forests. Its natural home is the forests of Cuddapah district where it is found growing gregariously on the hill slopes and sparingly round the neighbouring forests adjoining the boundaries of

the district. In low altitudes it is found in all aspects, but in higher altitudes it restricts itself to cooler aspects. It occurs mainly in dry deciduous forests. Since this is an unique species of Andhra Pradesh, its silvicultural requirements and character are dealt with in detail.

It requires good drainage and is found chiefly on the sedimentary rocks consisting of quartzites, stratified shale, slates, and lime stone. It requires hot and dry climate. It occurs in elevations between 800′ to 1000′ and endures a maximum temperature of 115° F. The main associates of this species are Anogeissus latifolia, Chloroxylon swietenia, Hardwickia binata, Terminalia tomentosa, Terminalia chebula, Pterocarpus marsupium, Tectona grandis. The undergrowth generally consists of Crotons scabiosus and Gmelina asiatica. These associates form 30% of the crop. In the valleys and moist localities it grows in association with evergreen species and the undergrowth in such places is usually Strobilanthus. Red Sanders is a moderate sized tree having a clean bole and rounded crown. It flowers during April to June and fruits mature in February to March. It is fire hardy but suffers from continuous drought. Under fire and drought conditions seedlings die back but send up shoots year after year and when the root system is well established they do not die back. It usually grows to a height of 30′ and puts on a girth of 30″. In plateau areas one occasionally meets with taller plants of big dimensions. It commences to form heart-wood at an age of 18 years when it puts on a girth of 6″ to 9″ at breast height. It coppices well and the heart-wood in coppice shoots develops as early as 15 years of age and shoots attain girths varying from 9″ to 15″ at this age. At the time of its maturity it usually attains a girth of 40″ to 50″. Natural regeneration by seed is noticed in the forests. Artificially it can be propagated either by sowing seeds in situ or by planting seedling or stumps. The standard technique in Andhra Pradesh is to plant two years old stumps taken out from dry nursery beds (watering is resorted to after sowing till germination takes place and 15 to 20 days afterwards). Seeds take 10 to 12 days to germinate after soaking in water for 48 hours.

There are two types of Red Sanders. One having a smooth bark and light heart-wood while the other having rough bark and darker heart-wood. The wavy grained heart-wood tree is highly priced on account of its demand for export to Japan. Unless heart-wood is exposed, it is difficult to predict from the morphological characteristics whether the tree contains Japanese variety of wood or the ordinary one. The main problem facing the department is the determination of the Japanese variety among the standing trees and the ways and means of propagating this variety in plantations. The only method of finding a Japanese variety is by exposing the heart-wood. If this operation is to be done on thousands of trees, we will not only be damaging the present stock but also exposing the stand to the vagaries of disease and death. Under such circumstances the only alternative is to sample the growing stock by the presslers borer and examine the wood column for wavy grain.

The other method of fixing the wavy grained tree is to number and indicate the stools which have produced wavy grained timber for taking special care of the coppice growth for future research and experiment."

A more detailed account of the Red Sanders plant is also found in the District Gazetteers of Cuddapah of 1914 on pages 94 to 99. One of the ways of preserving this very valuable species which is to be found nowhere in the world except in this area is to declare it as the Royal tree of Andhra Pradesh. It has been left to Japan, a foreign nation, to indicate to us the importance and utility of this rare species. A great deal of research is necessary for the vegetative propagation of the Japanese variety of Red Sanders. The Japanese variety is used in Japan for making their traditional instrument called "Samisen" a guitar-like stringed instrument.

There are other important timber trees in the deciduous forests such as Anogeissus latifolia, Terminalia tomentosa, Chloroxylon swietenia, Buchanania latifolia, Diospyros ebenum, Shorea tumbaggaia and talura. In the deciduous forest all along the Red Sanders belt the most predominent species is Eugenia alternifolia.

As regards the tropical thorn forests, one finds that they are confined mostly to the outer edges of the hill slopes. They are in a transitory stage and are giving way to grass lands. Erosion is found in

very advanced stages here and anti-erosion and afforestation measures can alone improve their plight. A description of the trees and shrubs found in this area taken from the Cuddapah District Gazetteer is given below and is true to this day.

Diospyros chloroxylon (*Ullinda*)– A large shrub or small tree, useful for fuel.

Maba buxifolia (*Uti*) – A small tree, useful for fuel.

Erythroxylon monogynum (*Devadari*)– A small tree. The wood is strong, hard and pretty but is little used except for fuel. The leaves are said to be eaten under famine conditions.

Mimusops Indica (*Pala*) *and Hexandra* (*Pogada*)– Fine large trees. Wood is very hard and heavy, and is valued as fuel. The fruit is edible. The bark is used for native medicinal purposes. The wood can be used as timber, but its great weight and hardness and the existence of better timber trees are against it in this respect.

Strychnos nux-vomica (*Mushti*) – A moderate-sized tree or shrub. Leaves, bark, fruit and especially the seeds are poisonous. The latter yield alkaliods, strychnine, and brucine. With two exceptions the tree is untouched by animals. The Langur monkey is able to eat even the seed with impunity, while the goat occasionally browses and may even make a hearty meal off the very young shoots.

Strychnos potatorum (*Chilla*)– A moderate-sized tree. Non-poisonous. The seeds are used to clear muddy water by rubbing the inside of the vessels with them. It is known as "clearing nut" tree. The plup of the fruit is edible and is made into preserve. The wood is good and is used for ploughs, building purposes and cart wheels.

Eugenia Jambolana (*Neredu*) – A good timber tree. Useful for building timber and also for agricultural implements. The bark is used in native medicine as a specific for dysentery.

Pterospermum suberifolium (*Tada*)–A moderate-sized tree. The wood is used chiefly for fuel but also for making carts.

Sapindus emarginatus (*Kunkudu*) – A large tree. The fruit is used for washing as a substitute for soap, and is known as the "soap nut". The wood is good but is not much used.

Vitex altissima (*Nemaliadugu*) – A good timber tree used in building and cart-making.

Webera corymbosa (*Kommi*) – A large shrub.

Ixora parviflora (*Kurivi*) – A shrub. The green branches are used for torches.

Carissa carandas (*Kalivi*) – A shrub. Extremely thorny. The branches are used for fencing. The wood is used for fuel.

Dodonaea viscosa (*Bandaru*) – A shrub. Its branches are used to support the earth of a flat roof.

Marraya Konigii (*Karepaku*) – A small tree. The wood is used for agricultural implements. The leaves are used to flavour curries.

Forest conservation in Cuddapah district has of late been systematic. Centuries of depradation by man and animals has rendered these forests not fully revenue fetching but the State Silviculturist-cum-utilisation officer posted from 1955, under the forest utilisation scheme has made some suggestions which, if implemented could help the forests to become more remunerative.

Forest development has, had an increased impetus during the Second Plan period. The progress of development has a three pronged drive *viz.*, (1) extending and improving forest areas (2) meeting the increased demand for timber and forest produce for the immediate requirments and (3) planning for the long range utilisation of the forest resources. Thus various regeneration and afforestation programmes were undertaken. Afforestation was done both on river banks as well as on denuded hills in the reserved forests. The afforestation programme on river banks was mainly with a view to preventing sand drift to the villages and on nearby agricultural lands and hence in the Chitvel range, Prosophis juliflora to an extent of 380 acres was planted. Contour trenching method to prevent soil erosion was adopted, as an afforestation programme in the denuded hills within the reserved forests. The species planted in the afforestation programme were Red Sanders, Eucalyptus, Cashew, Neem, Palmyrah and other

miscellaneous species. The areas planted in each range are given below :

1	*Red Sanders* :	
	Balupalle range	204 acres
	Chitvel range	70 ,,
	Vontimitta range	100 ,,
	Sidhout range	100 ,,
2	*Eucalyptus* :	
	Kodur range	35 ,,
	Rayachoti range	1 ,,
3	*Cashew* :	
	Kodur range	5 ,,
	Rayachoti range	20 ,,
	Rajampet range	20 ,,
	Vempalle range	20 ,,
	Cuddapah range	40 ,,
4	*Neem* :	
	Kodur range	60 ,,
5	*Palmyrah* :	
	Vempalle range	4 ,,
6	*Prosophis juliflora* :	
	Muddanur range	320 ,,
7	*Miscellaneous species* :	
	Onipenta range	20 ,,
	Total	1,019 ,,

Illicit felling of various trees has been the curse of the district. This aspect has been evading due attention for want of proper roads, lack of effective thanas and rigorous implementation of the timber transit rules. Hence, an amount of Rs. 4.226 lakhs has been spent on forming forest roads in Cuddapah district. The particulars of forest roads laid are furnished below :

Tadula-Jyothi road	13 Miles
C.L. Bavi Road	8 ,,
Kodur-K.V. Bavi road	6 ,,
Rajampet-Tummalabylu road	13 ,,
Rachapalle-Kangamadugu road	10.2 ,,
Kodur-Ummethala road	6 ,,
Bugga-Pullalamadugu-Korthimadugu road	5 ,,
Guvvalacheruvu-Korthimadugu road	5 ,,
Total	66.2 ,,

The 11 thanas since established and the provision of jeeps for the two District Forest Officers has helped in the prevention of illicit felling in the reserved forests to a great extent. Particulars of various schemes implemented in the district are given below :

STATEMENT VII-2

FOREST SCHEMES IMPLEMENTED IN THE DISTRICT DURING THE SECOND FIVE YEAR PLAN

Name of the scheme	Expenditure (1951-61) Rs. in lakhs	Item	Achievement
(1)	(2)	(3)	(4)
1 Afforestation of river banks and denuded forest areas	0.880	Plantation	1,019 Acres
2 Forest roads	4.226	Formation of roads	66.2 miles
3 Enforcement of timber transit rules	0.188	(a) Establishment of Thanas	11
		(b) Appointment of Thanedars	11
4 Construction of quarters	0.451	Staff quarters	14
5 Supply of Jeeps	0.306	Jeeps	2
Total	6.051		

CHAPTER VIII

IRRIGATION

General

The history of irrigation in Cuddapah district runs concurrently with that of Kurnool-Cuddapah Canal familiarly known as the K. C. Canal, this being the major source of irrigation in the district. A detailed picture of the K. C. Canal has therefore been given to begin with and the other aspects of irrigation through Medium Irrigation Projects, Minor Irrigation works like tanks, river channels, and wells *etc.*, have been discussed later on.

Kurnool-Cuddapah Canal

The Kurnool-Cuddapah Canal project is one of the three works suggested by Sir Arthur Cotton in the Tungabhadra basin for the development of the Rayalaseema area which was very frequently affected by failure of rains. The original design to layout a canal from Vallabhapuram to Sunkesula and another from Cuddapah to Krishnapuram was subsequently dropped and only the project comprising of an irrigation-cum-navigation canal from Sunkesula to Cuddapah was sanctioned for execution and the work was commenced in 1863.

This work was executed by a private irrigation company called the Madras Irrigation Canal Company Limited founded in 1858. The inception of the K. C. Canal project inaugurated the policy of introducing into India, British capital and enterprise in the construction of irrigation works in the middle of the last century. The private firm was authorised by an act of Parliament to raise a capital of one million pounds. 5 % interest on outlay was guaranteed by the Secretary of States who reserved to himself the right to control the proceedings of the company and purchase the works after twenty five years. As the works were not being properly managed by the company, the works were taken over by the Government on 1 July 1882 on a payment of 3.02 crores of rupees and since then it has been under the Government control for maintenance and water distribution.

The K. C. Canal takes off from the Tungabhadra at Sunkesula anicut built across the river seventeen miles north-west of Kurnool town and runs through Kurnool, Nandikotkur, Atmakur, Nandyal, and Allagadda taluks of Kurnool district and Jammalamadugu, Proddatur, and Cuddapah taluks of Cuddapah district. The canal is 189 miles and 79 chains long and the bed width at the head is 140 feet with 7 feet depth at F. S. L.

The canal runs in contour from the head to 73 miles and 20 chains where it crosses the watershed between the Tungabhadra and Penneru Rivers. The canal is taken across the River Hundri through an aqueduct at 17 miles 36 chains within Kurnool town limits.

There are many inlets and outlets along this canal to pass the stormy water which enters it. There are three important lagoons-*viz.*, the Vedurur, Pagidyala and Tangadancha. These three lagoons have now been drained by the construction of underwater tunnels.

As there is not much irrigation below the 75th mile till the 93rd mile, the major quantity of water is let down into Nippulavagu and picked up near Santhajutur anicut in Nandyal taluk. From 73 mile 220 chains to 93 mile 49 chains, it runs on ridge and it crosses the Palleru valley at Santhajutur anicut. From Santhajutur to the 117th mile, the canal runs in contour irrigating on the right side. At about the 97th mile the drainage of the Maddileru enters into it. At about 106th mile the Paleru crosses it by an under-tunnel. Water is also drawn for Nandyal town water supply. From 117th mile it follows the ridge down to Rajoli anicut at 145 miles 64 chains, where it picks up the flow in the Kunderu. It is at this point that it enters Cuddapah district. It runs on contour down to 171 miles 40 chains and on ridge to 180 miles 48 chains, where it crosses the river Penneru near Adinimayapalle anicut. It continues on a ridge down to 189 miles 79 chains, from which a supply channel to Patha-Cuddapah tank takes off. The K. C. Canal feeds ten tanks at different points along its long course.

The main canal can be divided into five reaches as follows :

Reach 1	From head (mile 0/0) upto Lockinsula (mile 74/58) (the lined canal where the Rs. 4 crore improvements were carried out).
Reach 2	From Lockinsula (mile 74/58)upto Santhajutur anicut (mile 93/5).
Reach 3	From Santhajutur anicut(mile 93/5) upto Rajoli anicut (mile 145/6)
Reach 4	From Rajoli anicut (mile 145/6) up to Adinimayapalle anicut (mile 180/6).
Reach 5	From Adinimayapalle anicut (mile 180/6) upto tail-end (mile 189/0)

Reaches 4 and 5 are within the Cuddapah district.

Rajoli anicut is across the river Kunderu and the Adinimayapalle anicut is across the river Penneru. The K. C. Canal is now improved to carry full 3,000 cusecs from the head at Sunkesula down to the 75th mile upto Lockinsula.

Further improvements, by widening and raising of the banks to increase the F. S. depth in the main canal reaches below the 75th mile right upto the tail-end at 189/0 and improvements to the existing distributory system including laying out new distributories and minor canals within the ayacut area for the development of field bodies alignments, are all nearing completion under the scheme of Rs. 2 crores sanctioned by the Government of India.

When the improvements are completely carried out, it is expected that all the 2,00,000 acres of additional ayacut planned under the K. C. Canal would be served with water to the last acre. Previously the irrigation covered only one lakh acres on an average in any year. The average acreage of major crops irrigated are given below approximately :

Paddy	50,000	acres
Cholam, Korra and other cereals	10,000	,,
Betel leaves and Gadi crops	10,000	,,
Chillies	25,000	,,
Groundnut	5,000	,,
Total	1,00,000	,,

Supplemental Schemes

Connected with K. C. Canal system are some important irrigation works known as the Mydukur and the Chapad channel projects.

Chapad Channel : The work was commenced in 1897 at Rajoli anicut at mile 145/6 and was, with interruptions in the middle, completed in 1904. The project costed Rs. 6.0 lakhs and it had originally five distributories and a sixth one was subsequently designed and completed. An ayacut of 10,379 acres is served by this channel and its distributories.

Mydukur Channel : Mydukur channel takes off from the left bank of the K. C. canal at 171 miles 40 chains near Mydukur and the project was designed to improve the tract covering a distance of 14 miles. The channel provides irrigation facilities for nine villages irrigating about 8,000 acres in all. The ayacut now proposed under this channel is 14,891.75 acres.

Etur Channel : Etur channel takes off at 171 miles 12 chains and this has an irrigable ayacut of 3,500 acres. The ayacut now localised under this channel is 9,510.41 acres.

Ukkayapalle Channel : The Ukkayapalle channel was excavated in 1916-17 and this has a commandable ayacut of about 1,600 acres. The channel helps to drain off any surplus water in the K. C. Canal, finally into the Penneru river. The ayacut now localised is 1,078.10 acres.

The following schemes to help quick development of the ayacut under the K. C. Canal have been proposed :

Scheme A :- Starting of a research-cum-demonstration farm in the K. C. Canal area for growing suitable strains and for demonstrating to the ryots the benefits of mechanised farming, dry irrigation, rotation of crops *etc.*

Scheme B :- Opening of an Agricultural school for farmers and their sons for the proper appreciation of mechanised farming, cropping pattern *etc.*, as an adjunct to the demonstration farm.

Scheme C :- Appiontment of a team of agricultural demonstrators for carrying on propaganda regarding cropping pattern system of irrigation *etc.*

Scheme D:- Disbursement of loans required by the agriculturists in the K. C. Canal area for purchase of cattle for reconditioning of ayacut lands by machinery and manual labour and for purchase of seeds, machines and improved agricultural implements.

Scheme E:- Reclaiming of lands by a fleet of bull-dozers and tractors.

Medium Irrigation Projects

Besides the K. C. Canal there are three medium irrigation projects in the district. A short account of each is given below :

Upper Sagileru Project :- The project which was designed to improve the supply to the Porumamilla tank, consists of an anicut across the Sagileru about three miles north of Kalsapadu and a main channel takes off at this point and extends over a distance of ten miles. By means of sluices at various points in its course the channel affords supply to the four smaller tanks of Kalsapadu, Pendlimarri, Pidugupalle and Akkisettipalle and between the 8th and 9th mile passes through the Chintapalle tank before finally crossing the Cumbum road and tailing into the Porumamilla tank. The work was taken up in 1898 and completed by the 31st March, 1907. This is a very old project.

Pincha Project in Rayachoti taluk :- The scheme was sanctioned in 1954 at a cost of Rs. 26.82 lakhs for the construction of a reservoir across the Pincha river near Muderupad and excavation of two channels therefrom on either side to irrigate an extent of 3,826.08 acres.

The extents of areas developed in the fasli 1371 under the Pincha are 1,033.36 acres of 1st crop and 208.22 acres of 2nd crop against a target of 2,000 acres. The targetted extent could not be developed in fasli 1371 as the level of the reservoir could not be raised beyond 990′ but since the huts in Karnamuvaripalle village of Vayalpad taluk which are on the foreshore of the reservoir would be submerged.

In 1962 it has been decided to raise the reservoir level upto 995 feet. The Chief Engineer has provided necessary funds for payment of compensation to the affected persons of Karnamuvaripalle. The Board of Revenue has fixed a target of 2,500 acres for development during 1962-63.

The laying of the road from Pincha to Rayachoti, 23 miles 6 furlongs, is under execution by the Executive Engineer, Zilla Parishad, Cuddapah.

Lower Sagileru project in Badvel taluk: The scheme was sanctioned in 1954 for 37.37 lakhs to benefit 3,000 acres *i.e.*, the gap of 1,900 acres in the ayacut of 14 tanks and an additional extent of 1,100 acres of irrigable dry and dry lands under these tanks. The work was completed at a cost of Rs. 55.62 lakhs. The ultimate ayacut under the project including the existing ayacut under various tanks is 8,000 acres. An extent of 7,160 acres has been localised so far, as against 8,000 acres and the extent so far localised has been tentatively approved by the Collector.

The target fixed for 1961-62 for development is 7,500 acres. An extent of 6,299.76 acres was developed against this target during the first crop season and an extent of 3,102.41 acres was raised during the second crop season.

Minor Irrigation Projects

The following eleven new Minor Irrigation schemes were taken up in this district during the last decade.

(1) Construction of a separate sluice and excavating a field channel to Korlakunta tank in Rajampet taluk.

(2) Construction of an anicut across Bokkineru near Kondarajupalle village of Badvel taluk.

(3) Construction of an anicut and excavating a supply channel to Nagulakunta of Somavaram village of Rayachoti taluk.

(4) Excavation of a spring channel from the river Penneru to irrigate lands in Yerragudi village of Jammalamadugu taluk.

(5) Errapotpulakunta of Yerraguntlakota of Rajampet taluk.

(6) Chopparlakalva of Tangutur village in Rajampet taluk.

(7) Goderu reservoir in Thippireddipalle village, Proddatur taluk.

(8) Construction of a dividing dam for equitable distribution of water to Koppolu and Gotur tanks.

(9) Kothacheruvu of V. Kothapalle village of Pulivendla taluk.

(10) Peddacheruvu of Devapatla in Rayachoti taluk.

(11) Construction of a bund and a wall across Apparajucheruvu moravavanka of Tsundupalle village in Rayachoti taluk.

The irrigation potential in this district appears to have been far from fully exploited. A series of schemes, numbering over 40 have been under the active consideration of the District Irrigation Consultative Committee. The inherent genius of the local cultivator enables him to make constructive suggestions and it is upto the administration to give them the fullest and the most careful consideration.

All the Minor Irrigation sources have been transferred to the Zilla Parishad and Panchayat Samithis from 1-4-1961 for the limited purpose of maintenance and repairs. However, the powers relating to the distribution of water in the minor irrigation sources still vests with the Revenue Department.

Besides tank irrigation referred to above, Cuddapah district, especially in the eastern hill valley and the southern plateau has many river and spring channels and wells which facilitate irrigation in these regions. The rivers Papaghni and Chitravati to a great extent and Penneru to a limited extent provide facilities for the system of river channels. As the rivers are seldom in floods for more than a few days, the river channels have open heads. Water is diverted into them by means of temporary earth dams and channels in the river beds are dug by the ryots after the floods subside. These river channels often flow for long distances in the bed or along the bank of the river before reaching their ayacuts. If properly maintained by seasonal labour for which the villagers elect normally a *kalva pedda*, they are capable of affording supply even for two Paddy crops. As already stated, owing to the steepness of its banks the river Penneru, which is the longest in the district provides only limited scope for the river channels unlike its tributaries. The river Kunderu has absolutely no river channels.

The following table indicates the number of spring and river channels in the district for each taluk.

Name of taluk	No. of river channels	No. of spring channels
(1)	(2)	(3)
1 Jammalamadugu .	4	27
2 Proddatur .	..	..
3 Badvel .	..	6
4 Pulivendla .	7	46
5 Kamalapuram independent sub-taluk .	7	21
6 Cuddapah .	25	12
7 Sidhout .	1	6
8 Rajampet .	33	20
9 Rayachoti .	178	145

Wells

The distribution of wells in the district is largely determined by the nature of the soil. The western black clay plains are not found conducive for well irrigation. It is in the eastern valley and the southern plateau regions that well irrigation is a great success.

The area irrigated under wells is 96,100 acres in the entire district for fasli 1360. The largest area under wells, 26,000 acres approximately, is in Rajampet taluk followed by 16,100 acres in Rayachoti taluk and 15,400 acres in Sidhout taluk. The extent in each of the other taluks is given below :

Badvel taluk	10,100	acres
Proddatur taluk	9,800	,,
Cuddapah taluk	6,700	,,
Jammalamadugu taluk	4,800	,,
Pulivendla taluk	1,800	,,
Kamalapuram independent sub-taluk	6,400	,.

Government have put their faith in the sinking of more wells to ensure proper irrigation facilities in the district. The new wells subsidy scheme introduced in 1947–48 has been increasingly popular and every year more wells are being sunk. During the Second Plan period a sum of Rs. 16.606 *lakhs was disbursed as subsidy loans for the sinking* of 2,094 wells.

The following are the number of irrigation wells in the district.

Taluk	Private wells	Doruvu wells
(1)	(2)	(3)
1 Badvel taluk	3,631	361
2 Proddatur taluk	3,077	22
3 Sidhout taluk	3,491	313
4 Rajampet taluk	8,164	183
5 Cuddapah taluk	1,767	109
6 Jammalamadugu taluk	1,828	49
7 Pulivendla taluk	2,715	9
8 Rayachoti taluk	4,479	3,236
9 Kamalapuram Ind. sub-taluk	1,892	52
Total	31,044	4,334

The following Statement indicates the various irrigation schemes taken up in the district during the Second Five Year Plan and their stage.

STATEMENT VIII-1

IRRIGATION SCHEMES IN CUDDAPAH DISTRICT UNDER SECOND PLAN

Sl. No.	Name of the Irrigation Scheme	Size	Taluk in which located	Stage of work	Expenditure incurred by the end of Second Plan (in Rs.)	Irrigation potential created in acres
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1	K. C. Canal improvement scheme	Medium	Kurnool, Cuddapah and Proddatur taluks	Nearing completion	1,55,73,000	61,049
2	Lower Sagileru project	Medium	Badvel taluk	Completed	26,45,800	8,000
3	Pincha reservoir scheme	Medium	Rayachoti taluk	Completed	21,38,409	3,800
4	Construction of a separate sluice and excavation of field channel to Korlakunta tank	Medium	Rajampet taluk	Completed	19,600	567
5	Construction of a ogee weir across Bokkineru near Kondarajupalle	Medium	Badvel taluk	Completed	15,650	70
6	Construction of an anicut across Uppetivanka to feed Vakulakunta of Somavaram	Medium	Rayachoti taluk	Completed	17,456	63
7	Excavation of a spring channel from river Penneru to irrigate lands in Yerragudi	Medium	Jammalamadugu taluk	Completed	88,149	300
8	Restoration of breached Kanchalamma tank	Minor	Rayachoti taluk	Work nearing completion	2,62,652	..
9	Restoration of Ottacheruvu of Thimmasamudram	Minor	Rayachoti taluk	Work in progress	1,26,076	..
10	Construction of an anicut across Mekalakunteru near Mysoorivaripalle	Minor	Rajampet taluk	Work taken up	7,130	..
11	Repairs and improvements to Pullangeru anicut	Minor	Rajampet taluk	Work taken up	6,005	..
12	Improvements to 14 tanks of Lower Sagileru project	Minor	Badvel taluk	Completed	52,444	This is included in item 2
13	Construction of an anicut across T. Vanka to feed Rekulakunta (v) tanks	Minor	Sidhout	Work in progress	1,09,203	..

CHAPTER IX

COMMUNICATIONS

Railways

Cuddapah district is poorly served by Road and Railway communications. Though the Madras-Bombay broad gauge Railway line runs from the south-east corner to the north-west corner over a distance of 150 kilometres across the district almost bifurcating it, it fails to connect some important business centres like Proddatur which is the most populous town in the district. The Railway line passes through 22 Railway stations of which the following are the more important Railway stations:

Cuddapah
Nandalur
Kodur
Kamalapuram
Yerraguntla; and
Kondapuram

The Railway communications are obviously inadequate; several of the taluk headquarters are not connected by Railway. The single line cutting across the district was opened in 1864–1866 and though a century has passed since then, no further addition has been made to this solitary line. There have been many proposals to improve the Railway communications in the district, the most notable being to connect Kurnool district *via* Allagadda and Proddatur with Cuddapah station.

Roads

While studying the physical features of the district we have seen that well formed ranges of hills spread across the district; the Penneru river and its tributaries running through the districts form distinct valleys. All these, while contributing to the picturesqueness of certain areas of the district, present serious problems in so far as communications are concerned. Though the average annual rainfall in the district is poor, when once the rivers get into spate, it becomes impossible for one to pass through any of the roads from one end to the other without being held up by an overflowing causeway. The only road of which the district may feel satisfied about is the Kurnool-Chittoor road which is black-topped throughout its length. This road crosses the Penneru river at Chennur and till about 1955 no bridge was constructed across the Penneru and during the rainy season the road used to be generally cut off. After opening the bridge the road has become passable throughout the year. Almost all other roads in the district are in poor condition. During a heavy rainy season quite a few places in the district become inaccessible. The Cheyyair cuts off Rajampet. The Mandavya cuts off Rayachoti and Penneru cuts off Sidhavattam. Though these rivers are almost dry during the major part of the year, during the floods they can cause considerable inconvenience. It appears desirable to bridge all of them. During the Second Plan period substantial amounts have been spent on construction of new roads and also repair of neglected roads. The most popular programme in the Blocks (now samithis) has been generally under communications. This has no doubt contributed to various inter and intra village road works. Though it is a recognised fact that a well developed road system is vital to the devlopment of the potentialities of the district, there is still much head-way to be accomplished in this direction for the district.

The main agency of development of roads is the State Highways Department. The Zilla Parishad has also executed road works under the head "Roads in Village Plans" and under "Village Road Development Co-operative Scheme". In addition a number of small road works were also undertaken under the local developmental works. The Blocks have incurred considerable expenditure on communications. The Public works Department has also taken up road works and has spent as much as Rs. 12.84 lakhs for various road works undertaken by them. Besides this the Forest Department has also executed a number of road works in its jurisdiction which has thus enabled the interior villages in the forest areas to be connected to the villages in the plains. The expenditure under the scheme "Roads in Village Plans" amounted to Rs. 1.62 lakhs during the Second Plan period and as many as 38 road works were taken up in the various Blocks. An amount of Rs. 90,920/-

was also spent on eleven road works taken up under the "Village Road Development Co-operative Scheme". The more important road works undertaken by the Public Works Department are given below. The expenditure incurred by this department has been the heaviest during the Second Plan period.

STATEMENT IX-1

Sl. No.	Name of scheme	Expenditure incurred under Second Five Year Plan (in Rs.)	Stage of progress
(1)	(2)	(3)	(4)
1	Providing black top surfacing to Chittoor-Kurnool road	77,814	6 miles 5 furlongs completed
2	Black topping in urgent reaches on Nellore-Bellary-Bombay road	57,694	3 miles completed
3	Black topping Cuddapah-Balapalle road from 0/0 to 69/3	1,03,923	3 miles completed
4	Black topping Cuddapah-Balapalle road from 0/0 to 56/4	1,17,839	10 miles 1 furlong black topped
5	Widening narrow culverts on Nellore-Bellary-Bombay road	1,57,385	52 culverts completed
6	Widening and strengthening culverts on Chittoor-Kurnool road	31,787	3 culverts completed
7	Construction of minor bridges and culverts on Mydukur-Cumbum road	44,240	11 culverts completed
8	Widening metalled width in Ghat 86/0 to 95/0 on Chittoor-Kurnool road	33,260	3½ miles widened
9	Porumamilla to Seetharamapuram in Nellore upto district limit (0/0 to 5/4)	51,182	5 miles 4 furlongs metalling completed
10	Widening Ghat portion 14/0 to 20/0 Rajampet-Kadiri road	75,038	6 miles completed
11	Construction of a cause-way at mile 13/7 and 8 of Rajampet-Kadiri road	2,57,720	Work length of road improved
12	Improvements to culverts and dips on Jammalamadugu-Nossam road	44,795	Culverts and dips completed
13	Widening and strengthening bridges on Muddanur-Pulivendla road	12,635	Work under progress
14	Widening narrow culverts on Mydukur-Cumbum road 0/0 to 30/0	11,950	Work under progress
15	Construction of culverts in mile 15/0 to 21/4 on Mydukur-Cumbum road	10,101	Work under progress
16	Widening and strengthening culverts on Rajampet-Chitvel road	15,176	Work under progress
17	Construction of culverts and cause-way in 42/0 to 55/6 of Cuddapah-Balapalle road	44,945	Work under progress
18	Construction of two bridges at 34/5 and 35/4 of Cuddapah-Balapalle road	15,246	Work under progress
19	Widening and strengthening culverts on Rayachoti-Vetigalli road	21,925	Work under progress
20	Improvements to culverts on Rayalapuram-Gandlur road	6,263	Work under progress
21	Upgrading the carriage-way and providing black top to Velpula branch road	8,619	Work under progress
22	Strengthening culverts on Rayalapuram-Gandlur road	3,771	Work under progress
23	Improvements to carriage-way on Rayalapuram-Gandlur road	44,222	Work under progress
24	Improvements to carriage-way on Rayachoti-Vempalle road	25,000	Work under progress
25	Improvements to carriage-way on Rayalapuram-Gandlur road	11,894	Work under progress
	Total	12,84,424	

(Source :— Second Five Year Plan-Cuddapah District-Review of Progress-1956-61.)

The number of works taken up and the amount spent in each Block is also given below :—

STATEMENT IX-2

Sl. No.	Name of Block	Expenditure (in Rs.)	No. of Works completed
(1)	(2)	(3)	(4)
1	Cuddapah	23,809	7
2	Jammalamadugu	11,934	3
3	Muddanur	1,930	2
4	Mydukur	35,601	9
5	Lakkireddipalle	6,249	2
6	Vempalle	5,100	2
7	Porumamilla	1,663	..
8	Kodur	3,746	1
9	Chitvel	5,415	2
10	Badvel	27,115	6
11	Non-Block areas	39,613	4
	Total	1,62,175	38

But the most notable achievement under communications during the decade has been the construction of the bridge at Chennur across the river Penneru, which has solved a great problem by keeping the road connecting Cuddapah to Proddatur, Jammalamadugu and Kurnool districts free even during the rainy season.

There are many cause-ways still to be built across the rivers of this district to facilitate easy movement of traffic during the rainy season. A list of such cause-ways has already been given under the caption Rivers in chapter I and does not require repetition here.

CHAPTER X

INDUSTRIES

Cuddapah district is, perhaps, the most backward of all the districts in the State in industries and the entire history of industrialisation can be summed up by saying that there is not even a medium sized or minor industry in this district worth the name. Private capital has been very shy and except for the Handloom Weaving Industry no other industry has made any headway so far.

Handloom Weaving is the only significant industry which has come down through the ages as a hereditary occupation in the district for Thogatas, Sales and Devangas. Malas and Muslims are also engaged in weaving rough handloom fabrics. This industry centres mainly round Pullampet village of Rajampet taluk, Madhavaram of Sidhout taluk, Jammalamadugu, Veparala, Dommaranandyala, Moragudi and Khaderabad villages of Jammalamadugu taluk, Proddatur, Dorasanipalle and surrounding villages of Proddatur taluk and in one or two villages of Rayachoti taluk.

The development of villages with small scale industries, has, of course, been tackled during the Second Plan period through the setting up of training-cum-production centres, where artisans have been trained to pursue their avocations with improved techniques and tools. As many as 24 common facility centres and production-cum-training centres have been started during the Second Plan period in the various Blocks of the district and 176 artisans have been completely trained in improved techniques, and 155 artisans were still undergoing training at the close of Second Plan period. A list of these centres together with their location in the various Blocks in the district is furnished below:—

STATEMENT X-1

PRODUCTION-CUM-TRAINING CENTRES *etc.*, STARTED IN VARIOUS BLOCKS IN THE DISTRICT

Name of Block	Common facility/Production-cum-training centre/Demonstration-cum-training centre	No. trained
(1)	(2)	(3)
1 Jammalamadugu	(a) Leather goods production cum-training centre, Jammalamadugu	10 trained 10 under training
	(b) Carpentry-production-cum-training centre	36 trained 12 under training
	(c) Blacksmithy-production-cum-training centre, Jammalamadugu	44 trained 12 under training
2 Mydukur	(a) Common facility centre for leather goods, Duvvuru	20 trained
	(b) Tape weaving peripatetic centre, Mydukur	18 under training
3 Muddanur	Common facility centre in leather goods	7 trained
4 Cuddapah	Bamboo and rattan basket making, Chinnachowk	10 under training
5 Badvel	(a) Mat weaving and Rope making training centre, Ammakampalle	20 trained 10 under training
	(b) Common facility centre in leather goods manufacturing, Badvel	11 trained
	(c) Training-cum-production centre, handloom weaving, Thiruvengalapuram	10 under training
6 Porumamilla	(a) Common facility centre in blacksmithy, Rajashirpet	..
	(b) Tape weaving centre, Porumamilla	10 under training
	(c) Jammu mat weaving training centre, Siddayyapalle	10 under training
	(d) Common facility centre in leather goods, Porumamilla	12 under training
	(e) Common facility centre, Kalsapadu	10 under training
7 Pulivendla	(a) Common facility centre in Agricultural implements, Bojjayapalle	15 under training
	(b) Common facility centre in carpentry, Pulivendla	10 under training
	(c) Common facility centre in leather goods, Simhadripuram	10 trained
8 Sidhout	(a) Common facility centre in carpentry, Sidhout	..
	(b) Peripatetic demonstration unit in tape weaving	..
9 Kodur	(a) Handloom weaving, dyeing, and designing centre, Pullampet	8 trained 6 under training
	(b) Wooden toys making centre, Lakshmigaripalle	10 trained
10 Rayachoti	Rural community workshop, Rayachoti	..
11 Kondapuram	Common facility centre in carpentry, Yerraguntla	..
	Total	176 trained
	,,	155 under training

(Source: Second Five Year Plan-Cuddapah District-Review of Progress 1956-61)

An attempt has also been made to bring all artisans in the district under co-operative enterprises. Industrial Co-operatives were organised during the Second Plan period and by the end, the total membership rose to 1,890 and financial assistance to the tune of Rs. 3.381 lakhs was rendered through these Industrial Co-operative centres. A list of the Industrial Co-operative Societies, Block-wise is given below :—

STATEMENT X-2

LOCATION OF INDUSTRIAL CO-OPERATIVES IN THE BLOCKS

Name of Block	Name of institution and location	No. of members	Financial assistance rendered during the Plan period in Rs.
(1)	(2)	(3)	(4)
1 SIDHOUT	(a) Tanning and Leather Workers Industrial Co-operative Society, Lingampalle	50	8,425
	(b) Tanning and Leather Workers Industrial Co-operative Society, Mantapampalle	21	7,220
	(c) Hand-pounding of Paddy Industrial Co-operative Society, Beripalle	75	28,308
	(d) Carpentry and Blacksmithy Industrial Co-operative Society, Madhavaram	N. A.	1,980
	(e) Mat Weaving Industrial Co-operative Society, Kotapadu	42	140
	(f) Women's Cottage Industrial Co-operative Society, Mantapampalle	20	Nil
	Total	208	46,073
2 MUDDANUR	(a) Tanning and Leather Workers Industrial Co-operative Society, Muddanur	21	6,720
	(b) Soap Manufacturing Industrial Co-operative Society, Kondapuram	38	16,400
	Total	59	23,120
3 KAMALAPURAM	(a) Tanning and Leather Workers Industrial Co-operative Society, Palagiri	52	18,000
	(b) Hand-pounding of Paddy Industrial Co-operative Society, Kamalapuram	42	5,223
	(c) Hand-pounding of Paddy Industrial Co-operative Society, Nalligayapalle	40	4,605
	Total	134	27,828
4 PORUMAMILLA	(a) Tanning and Leather Workers Industrial Co-operative Society, Porumamilla	50	6,720
	(b) Hand-pounding of Paddy Industrial Co-operative Society, Kalsapadu	32	2,760
	(c) Pottery Industrial Co-operative Society, Kalsapadu	19	2,000
	(d) Rajasahebpet Blacksmithy Industrial Co-operative Society	23	..
	Total	124	11,480
5 KODUR	(a) Hand-pounding of Paddy Industrial Co-operative Society, *Venkatarajupalle* Kandrika	20	4,115
	(b) Hand made paper Industrial Co-operative Society, Pullampet	20	..
	(c) Bamboo and Basket Industrial Co-operative Society, Kodur	11	5,560
	(d) Toy Makers Co-operative Society, Lakshmigaripalle	22	..
	Total	73	9,675
6 MYDUKUR	(a) Tanning and Leather workers Industrial Co-operative Society, Duvvur	32	21,070
	(b) Bukkayapalle Leather Workers Co-operative Society	20	6,720
	(c) Village Oil Industrial Co-operative Society, Mydukur	22	- 8,000
	(d) Carpentry and Blacksmithy Industrial Co-operative Society, Chapad	16	..
	(e) Non-Ferrous Metal Workers Co-operative Society, Onipenta	27	..
	Total	117	35,790
7 BADVEL	(a) Tanning and Leather Workers Industrial Co-operative Society, Badvel	25	18,000
	(b) Tanning and Leather Workers Industrial Co-operative Society, Narsampalle	27	2,200
	(c) Hand-pounding of Paddy Industrial Co-operative Society, Badvel	63	3,011
	(d) Pottery Industrial Co-operative Society, Badvel	37	2,000

(1)	(2)	(3)	(4)
7. BADVEL (*contd.*)	(e) Mat Weaving Industrial Co-operative Society, Ammagampalle	25	3,420
	(f) Fibre Rope Industrial Co-operative Society, Thimmarayapalle	53	2,425
	(g) Basket Makers Industrial Co-operative Society, Gopalapuram	22	2,000
	Total	252	33,056
8 CUDDAPAH	(a) Tanning and Leather Workers Industrial Co-operative society, Sunkesula	19	18,000
	(b) Village Oil Industrial Co-operative Society, Alamkhanpalle	26	6,865
	(c) Hand-pounding of Paddy Industrial Co-operative Society, Cuddapah	44	20,128
	(d) Hand-pounding of Paddy Industrial Co-operative Society, Chinnamachupalle	50	2,250
	(e) Carpentry and Blacksmithy Industrial Co-operative Society, Chennur	39	4,660
	(f) Bamboo and Basket Industrial Co-operative Society, Chinnachowk	20	400
	Total	198	52,303
9 JAMMALAMADUGU	(a) Tanning and Leather Workers Industrial Co-operative Society, Gundlakunta	13	6,720
	(b) Hand-pounding of Paddy Industrial Co-operative Society, Peddapasupula	40	3,150
	(c) Khadi Spinners and Weavers Industrial Co-operative Society, Palur	76	..
	Total	129	9,870
10 RAYACHOTI	(a) Hand-pounding of Paddy Industrial Co-operative Society, Masapeta	30	4,840
	(b) Pottery Industrial Co-operative Society, Masapeta	25	2,000
	Total	55	6,840
11 PENDLIMARRI	Hand-pounding of Paddy Industrial Co-operative Society, Nandimandalam	52	4,115
12 PULIVENDLA	(a) Tanning and Leather Workers Industrial Co-operative Society, Simhadripuram	48	18,000
12 PULIVENDLA (*contd.*)	(b) Tanning and Leather Workers Industrial Co-operative Society, Thelluru	25	18,000
	(c) Tanning and Leather Workers Industrial Co-operative society, Nallapureddipalle	27	18,000
	(d) Hand-pounding and Paddy Industrial Co-operative Society, Rayalapuram	30	6,365
	(e) Carpentry and Blacksmithy Industrial Co-operative Society, Pulivendla	20	600
	(f) Bullock-cart makers Industrial Co-operative Society, Bojjayapalle	49	..
	Total	199	60,965
13 CHITVEL	Hand-pounding of Paddy Industrial Co-operative Society, Singareddipalle	31	6,335
14 PRODDATUR	(a) Metal and Brass Industrial Co-operative Society	92	7,672
	(b) Women's Cottage Industrial Co-operative Society, Proddatur	167	3,000
	Total	259	10,672
	Grand Total	1,890	3,38,122

Source : (Second Five Year Plan-Cuddapah District-Review of Progress 1956-61.)

The Blocks have also been giving loans to the artisans to buy improved tools and raw material.

The following schemes are expected to be taken up in Cuddapah district during the Third Five Year Plan.

STATEMENT X-3

Sl. No.	Name of Scheme	Plan Provision for 1961-66 (in lakhs)
(1)	(2)	(3)
	Small Scale Industries	
1	Scheme for raw material servicing centre, Cuddapah	2.00
2	Production-wing attached to the carpentry Production-cum-Training centre, Cuddapah	0.166
3	Provision for purchase and disbursement of hand tools to carpentry and blacksmithy artisans in Community Development Blocks	2.00
	Handicarfts	
4	Scheme for providing subsidy for supervision to the bamboo workers co-operative society Ltd., Kodur	0.012

An Assistant Director of Industries with qualified technical supervisors under him functions in the headquarters of the district at Cuddapah.

An industrial estate at Cuddapah has been the outstanding achievement in the district in this sector during the Second Plan period and it has been helpful in giving a fillip to minor industries. The industries proposed to be started are—manufacture of rolling shutters, expanded metal, wire drawing, paper bags, safety pins, agricultural implements, tin cans and containers, wire-nails, weld-mesh and wire netting, sheet metal works, general purpose engineering workshop, Barium products, and tube lights. The estate is likely to go into production soon. An assisted private Industrial Estate at Proddatur is expected to be taken up during the Third Plan period. The selection of site and industries have been completed.

A polytechnic school started at Proddatur is another important step forward for providing technical personnel. Inspite of the above achievements and proposed projects the district continues to be backward and a great deal of propaganda appears necessary for channelising private capital for the industrial advancement of the district. Considering the limitations imposed by nature resulting in periodical famines, the only salvation to this district seems to lie in its industrial advancement. Technical know how can be provided by the small industrial board and other institutions which the Government have instituted. It may be of intrest to know that many people from the villages have now ventured to take up contract works in the irrigation schemes of the State, like K. C. Canal development works, Tungabhadra Project, Nagarjunasagar Project *etc.*, and these people have developed, in the course of their financial ventures in the contract works, a mental approach which could be utilised for the institution and propulsion of local industries. The presence of iron ore, asbestos, and barytes indicate the fields in which the industrial programme could be implemented and developed. But the psychology of excessive dependence on Government aid has to be deftly diverted to be replaced by a forward and a progressive approach towards investment of private capital.

CHAPTER XI

PANCHAYATI RAJ

Early efforts

Panchayati Raj in Andhra Pradesh can be said to have had its roots from as far back as one and half decades. It was based on the Gandhian principle of Rural rejuvination to usher in a balanced progress of the countryside. Late Shri T. Prakasam, a stout believer of the Gandhian policies promulgated the scheme of rural development called the "Firka Development Scheme" in 1946, when he was the Chief Minister of the Composite Madras Province. The name was changed to "Rural Welfare Scheme" in 1950. This scheme covered harijan uplift programmes as well as the khadi schemes, besides rural reconstruction work. It had a three pronged drive for the economic and social reconstruction of rural life through (1) self-help (2) co-operative approach and (3) State aid. As in all nascent institutions, the issues were then not so well crystallized as now, and the present scheme of Panchayati Raj, may in no way resemble those initial attempts, though it may have evolved from those humble beginnings.

In Cuddapah District, the firka development scheme was first inaugurated in 1946 in Proddatur firka and was extended on 1-4-1959 under the Rural Development scheme to Chapad and Arakatavemula firkas of Proddatur taluk. In 1952 it was extended to Talamanchipatnam firka of Jammalamadugu taluk. From the 2nd October, 1953 the rural welfare scheme was merged with the N. E. S. scheme which was launched all over the country. The rural development scheme was based on people's participation and for every grant made by the Government, matching contributions of the people by way of money and labour had to be collected and the District Collector was put in over-all charge of the programme. A Rural Welfare Officer of the grade of a Deputy Tahsildar was in-charge of each selected firka.

Under the rural development scheme the following were the achievements in Cuddapah district in the four firkas in which the scheme was put into operation.

1	Drinking water wells constructed	..	61
2	New roads formed	..	38 miles 4 furlongs
3	Culverts constructed	..	72
4	New schools opened	..	26
5	New school buildings constructed	..	7
6	Radio sets instituted	..	13
7	Waste land reclaimed	..	375 acres
8	Model farms	..	12
9	New dispensaries started including Ayurvedic dispensaries	..	11

Local Development Works

A scheme of local development works was then introduced as a preparatory stage to the introduction of the National Extension Service scheme. The primary intention of the local development works was to attract people's participation in Governmental undertakings. The people were required to voluntarily contribute 50% of the cost of works in cash or kind, 25% of the people's contribution could be given by local bodies and in Panchayat areas they could contribute upto $33\frac{1}{3}\%$. The maximum Central Government aid was, however, limited to Rs. 10,000/- and no village could receive more than this amount. The year-wise details of the local development works are given below:-

STATEMENT XI-1

Year	Works taken up		Works completed		
	No.	Estimated cost in lakhs	No.	Estimated cost in lakhs	Central Government contribution
(1)	(2)	(3)	(4)	(5)	(6)
1956—57 ..	78	6.24	31	2.96	2.48
1957—58 ..	87	8.06	54	4.72	3.01
1958—59 ..	92	9.82	26	2.74	1 06
1959—60 ..	101	2.23	2	0 02	0.14
1960—61 ..	47	3.06	85	1.33	0 90
Total ..	405	29.41	198	11 77	7.59

(Source : Second Five Year Plan-Cuddapah District-Review of Progress 1956-61.)

Community Development Programme

The pattern of Community Development programme inaugurated on 2-10-1952 has been changed to suit the needs of our rural communities. The central object of the Community Development programme was to secure the fullest development of the material and the human resources of the area based on the fact that all aspects of rural life are inter-related and that no lasting results can be achieved if individual aspects of it are dealt in isolation. The approach was to apply the co-operative principle in its infinitely ranging forms for solving all problems of rural life.

The genius of the country and the set up of our rural economy is well suited to administration by Panchayats. We know historically that centuries ago during the reign of the Kakatiyas of Warangal, a very fine system of Panchayats prevailed in this district as in all other parts of their kingdom. No wonder, in its evolution Community Development programme has culminated itself into our present system of Panchayati Raj. The experiment of Community Development programme was started in this district, with the introduction of Community Projects in the wake of the rural development schemes. When the Community Projects were first inaugurated all over India in October 1952, the K. C. Canal villages of Cuddapah, Proddatur, and Jammalamadugu taluks, 97 in number were constituted to form part of the K. C. Canal Community project with headqarters at Nandyal of the Kurnool district under a Project Executive Officer. Limited resources of the Community project and due to the agitation of the people to have similar benefits in all other villages, the pattern of the Community Projects was changed over to cover smaller projects, smaller in coverage with lesser costs. These were called the National Extension Service Blocks each covering an area of 150 to 170 square miles with a population of 66,000 people and costing Rs. 4.50 lakhs. Accordingly, a N. E. S. Block was started in Talamanchipatnam of Jammalamadugu taluk on 4-4-1954 with jurisdiction over the whole of the Jammalamadugu taluk excluding the six K. C. Canal villages. The operation period of each N.E.S. Block was normally for three years. Any time within that period, depending on the performance in the realm of people's participation, physical attainment, and expenditure, the N.E.S. Block got converted into a Community Development Block with a bigger outlay of 15 lakhs of rupees inclusive of the expenditure already incurred in the N. E. S. stage. Accordingly, the Talamanchipatnam N. E. S. Block was converted into a Community Development Block on 1-4-1955 with headquarters at Jammalamadugu and it has been called ever since the Jammalamadugu Block and now the Jammalamadugu Panchayat Samithi. The National Development Council in June, 1957 decided that the Block should be treated as a unit for the purpose of Planning and Development and it should be the agency through which the resources of the Government flow to the people. Accordingly, Cuddapah district was delimited into 18 Blocks. The delimited jurisdiction of these Blocks is given in the statement below:-

STATEMENT XI-2

COMMUNITY DEVELOPMENT BLOCKS

Name of taluk (1)	Name of Block (2)	Firkas included in each Block (3)

(Source : G. O. Ms. No 932 Planning and Development Department, dated 3rd October 1959)

The outlay on the National Extension Service and Community Development Blocks of the Second Plan period was reduced to Rs. 4 lakhs and Rs. 12 lakhs respectively and thereafter the Community Development Blocks would enter on the post-intensive phase, which was normally three years after the commencement of the Community Development Blocks. In the post-intensive stage, provision was made for the normal National Extension Service Staff and a sum of Rs. 30,000/- (Rs. 25,000/- for works and Rs. 5,000/- for Social Education) and this stage was called the normalised stage of development.

In the Second Plan period the following 14 Blocks were started in Cuddapah district on the dates indicated against each :-

Sl. No.	Name of Block	Date of starting	Remarks
(1)	(2)	(3)	(4)
1	Badvel	1- 4-1956	Formerly Pondlachennupalle Block
2	Porumamilla	1- 4-1956	
3	Pulivendla	2-10-1956	Formerly Balapanur Block
4	Kodur	2-10-1956	
5	Cuddapah	2-10-1956	
6	Mydukur	2-10-1956	
7	Kamalapuram	1- 4-1957	Formerly Yerraguntla Block
8	Sidhout	2-10-1957	Formerly Bhakrapet Block
9	Lakkireddipalle	2-10-1957	Formerly Konampet Block
10	Rayachoti	1- 4-1958	
11	Muddanur	2-10-1958	On normalisation of Jammalamadugu Block
12	Vempalle	2-10-1958	
13	Chitvel	2-10-1959	
14	Pendlimarri	1 -4-1960	

As the K. C. Canal villages of Cuddapah and Mydukur Blocks had gone through the intensive stage in the K. C. Canal Community Project (akin to the N. E. S. and Community Development stages in a regular Block), they entered the post-intensive stage directly on their inauguration on 2-10-1956. No doubt these two Blocks also included certain non-K. C. Canal villages which did not have the benefit of the Community Development Programme, but had to face the post-intensive stage without the prior intensive development period. But as the Blocks had already been delimited as to their jurisdiction, this anomaly could not be helped, and the Blocks were asked to concentrate to the extent of their resources on the non-K.C. Canal villages. The Government also provided the same facilities as regards the quantum of people's contribution *etc.*, as during the intensive period for these villages, and certain departmental schemes were also ordered to be taken up to bridge the lee-way between the K.C. Canal villages in those Blocks.

The study team for Community Development and the National Extension Service headed by Shri Balwant Rai G. Mehta recommended certain revolutionary changes. The Ministry of Community Development accepted these proposals and accordingly removed the distinction between the different types of Blocks and replaced the three stages of N.E.S., Community Development and post-intensive into two stages effective from 1-4-1958. According to the Government Memorandum No. 82000/ Proj. I/58-1 dated 23-5-1958 Stage-I will be the intensive development phase with a provision of Rs. 12 lakhs and Stage-II,post-intensive phase with a sum of Rs. 5 lakhs. Both stages were to be of a duration of five years. In view of the emphasis on Agriculture, each Block was to have a Pre-Extension stage. A Pre-Extension Block would operate for one year devoted exclusively to Agricultural development before it passed on to Stage-I Block. Even though these were different types of Blocks, the basic organisation and method and purpose of all were identical. All Blocks which were N. E. S. before 1-4-1958 came under Stage-I, and all post-intensive Blocks under Stage-II. The Community Development Blocks which existed as such before 1-4-1958 saw their full period without any change and then entered the Stage-II phase. The budget pattern of Stage-I and II Blocks is given below :

	Head of activity	(Rs. in lakhs) Stage-I	Stage-II
	(1)	(2)	(3)
I	Block headquarters	3.15	0.85
II	Agriculture and Animal Husbandry	0.50	0.50
III, IV	Irrigation and Reclamation	3.40	0.85
V	Health and rural sanitation	1.15	0.50
VI	Education	0.60	0.50

(1)		(2)	(3)
VII	Social Education . . .	0.70	0.50
VIII	Communications . . .	0.85	0.50
IX	Rural Arts, Crafts and Industries .	0.65	0.50
X	Housing for project staff and rural housing.	1.00	0.30
	Total	12.00	5.00

For the Blocks that were inaugurated from 1-4-1959 onwards there was a Pre-Extension stage, with a Block Development Officer, Extension Officer, and five Grama Sevaks and an outlay of Rs. 18,000/-. The staff and outlay were to be merged later into the schematic provision of the Stage-I Block. The Pre-Extension Blocks as already indicated were designed to prepare the ground for full extension work immediately the regular Stage-I Block began to operate. Thus by the end of the Second Plan period there were 15 Blocks in operation. During the first year of the Third Plan the Proddatur Pre-Extension Block on 1-4-1961 and the Rajampet Pre-Extension Block on 1-10-1961 were started. The Pre-Extension Block at Tsundupalle was inaugurated on 1-4-1962. Thus the entire Cuddapah district has been covered with 18 Blocks as delimited.

Decentralisation

In a democracy it is the people who should administer their own affairs with the Government assisting them by way of technical advice through their experts, and also creating the needed facilities. It is with this ideal that the State Government readily accepted the recommendations of Shri. B. G. Mehta and on the 1st July, 1958 launched on an experimental basis one *adhoc* Panchayat Samithi in each district. Porumamilla Block, because of its performance, was selected as an *adhoc* Panchayat Samithi. This Samithi was entrusted with all developmental works of Community Development to the people's own elected representatives.

The one year performance of the twenty *adhoc* Samithis all over the State had so amply justified the confidence of the Government in the ability of the people to manage their own affairs that the Government thought of introducing Panchayati Raj on a more extensive scale and on a sounder footing.

It is in this context that the democratic decentralisation was conceived, and the nucleus for this revolutionary reform had naturally to be the Village Panchayat. Thus a three-tier system of people's institution was evolved, the Village Panchayat at the village level, the Panchyat Samithi at the Block level comprising of the Presidents of village Panchayats, and finally the Zilla Parishad at the district level comprising of the Presidents of the various Panchayat Samithis and also the Legislators of the State and the Centre. The formation of Village Panchayats was expedited and therefore, as against 141 Panchayats at the close of the First Plan period in the district, the figure rose to 602 by the close of the Second Plan period.

The Andhra Pradesh Panchayat Samithis and Zilla Parishads Act of 1959 was brought into force on 24-9-1959 in Shadnagar Block of Hyderabad district, and on 2-10-1959 in the rest of the State, except the Agency areas in Andhra region, and areas within the jurisdiction of Municipalities in Andhra and the City Municipalities in the Telangana region. Accordingly, the first of the initial batch of statutory Panchayat Samithis was inaugurated at Shadnagar on 1-10-1959 by the Prime Minister of India. In Cuddapah district the first batch of 13 Panchayat Samithis was constituted on 1-11-1959, Chitvel on 2-10-1960, Pendlimarri on 1-9-1961 and Proddatur on 1-6-1962. Two more Pre-Extension Block areas *viz.*, Rajampet and Tsundupalle have yet to be constituted into Panchayat Samithis to obtain full coverage of the district.

Section 18 of the Andhra Pradesh Panchayat Samithis and Zilla Parishads Act of 1959 lays down the powers and functions of the Panchayat Samithis and Section 47 those of the Zilla Parishads. The statutory set up of each Panchayat Samithi will be the set up of the Block as introduced on 1-4-1958 with Stage-I and Stage-II patterns.

Panchayat Samithis

As already stated a Panchayat Samithi was constituted for each Block area and the Presidents of all the Panchayats within that Block area were to be automatically members of that Samithi. The members of the Legislature were also permitted to attend the meetings of the Panchayat Samithi or its Standing Committees situated within the constituencies they represent and may also take part in the proceedings. But, however, a Member of the Legislative Assembly representing a constituency which comprises of more than one Block or portions of two Blocks may be a member of the Panchayat Samithi of any one such Block but may speak in and otherwise take part in the proceedings

of any meeting of a Panchayat Samithi or a Standing Committee of the other Blocks comprised within the constituency, but is not entitled to vote at any such meetings. The Member of the Legislative Council may also be a member of only one Panchayat Samithi in the district; and where he is a registered voter in any Block in such district, he should be a member of the Panchayat Samithi of only that Block; but if he is not a registered voter in any Block in the district, he may be a member of only one Panchayat Samithi of his choice in the district. The members of the Panchayat Samithi have to elect the following members from among the persons who are registered voters in the Block but who are not already members of the Panchayat Samithi.

(a) two women;

(b) one representative of the Scheduled Castes;

(c) one representative of the Scheduled Tribes if their population in the Block is not less than five per cent of the total population of that Block; and if the population of the Scheduled Tribes is less than such percentage, another representative of the Scheduled Castes; and

(d) two persons interested in rural development.

The Presidents of all Village Panchayats in a Block automatically become members of the Panchayat Samithi. The Revenue Divisional Officer has a right to take part in the proceedings of a Panchayat Samithi meeting or its Standing Committee situated within his jurisdiction. All the members of the Panchayat Samithi so constituted should elect from among themselves a President and a Vice-President.

The Panchayat Samithi is in complete charge of the administration of the Block including the implementation of the Community Development Programmes. In addition to this, Government have entrusted the functions of the various developmental departments of the Government such as Agriculture, Animal Husbandry, Fisheries, Industries, Education, Co-operation, Social Welfare and Women Welfare within the Block area to the Panchayat Samithis. The annexure to G.O.Ms. No. 1711, dated 23-12-1961 gives clearly the powers and functions including the nature of funds entrusted to the Panchayat Samithis. Most of the functions of the former District Boards in respect of elementary education, Public Health, Medical facilities *etc.*, have also been transferred to the Panchayat Samithis. The ultimate aim of the Government seems to make the Panchayat Samithi the sole agency of all developmental activities at the Block level and this is being achieved by the transfer of these normal functions to the developmental departments within the Samithis.

For discharging these various functions efficiently the Samithi has the following seven Standing Committees:-

(i) *Standing Committee for Planning and Production*: Planning, Food and Agriculture including Irrigation Wells, Animal Husbandry, Reclamation including Soil Conservation, Contour bunding, Forests and Fisheries;

(ii) *Standing Committee for Co-operation and Industries:* Co-operation, thrift and small savings, industries including cottage, village and small scale industries, trusts, rural housing, statistics, and prohibition of or temperance in the consumption of intoxicating drinks and of drugs which are injurious to health;

(iii) *Standing Committee for Education:* Education including Social Education, Medieal relief, Public Health and Sanitation including drainage, Relief to the distress in grave emergencies, and Self-help programmes;

(iv) *Standing Committee for Women Welfare:* Welfare of women and children;

(v) *Standing Committee for Social Welfare:* Social Welfare;

(vi) *Standing Committee for Communications:* Communications, rural water supply, power and irrigation excluding irrigation wells; and

(vii) *Standing Committee for Taxation and Finance:* Taxation and Finance:

The Panchayat Samithi has to elect two persons who are not its members but have experience and knowledge of Co-operation and Cottage Industries as members of the Standing Committee on Co-operation *etc.* These Standing Committees have independent powers of sanction within specified financial limits and should be able to execute works and schemes within those limits.

The Block Development Officer is the Chief Executive Officer of the Panchayat Samithi and the

services of the extension staff have been placed at the disposal of the Panchayat Samithi and they are subordinate to the Samithi. The President of the Panchayat Samithi exercises full control over the Block Development Officer and his staff for the purpose of implementation of the resolutions of the Panchayat Samithi and of its Standing Committees. He also writes the periodical confidential reports on the work and conduct of the staff.

The funds of the Panchayat Samithi are comprised of :-

(i) an amount equal to 25 nP. per head of population of the Block from land revenue for general purposes;

(ii) an amount equal to 30 nP. per head of population of the Block earmarked for communications;

(iii) one-fifth of the proceeds from the duty levied on transfer of property.

(iv) funds for community development under the schematic budget;

(v) funds from All India Boards *etc.*

(vi) contributions levied from Panchayats; and

(vii) people's contributions.

The dates of the constitution of the following 16 Panchayat Samithi in the district are given below:

STATEMENT-XI-3.

	Name of Panchayat Samithi	Date of constitution	No. of members	Number of Panchayats comprised
	(1)	(2)	(3)	(4)
1	Porumamilla	1-11-1959	41	35
2	Kamalapuram	1-11-1959	48	42
3	Muddanur	1-11-1959	49	43
4	Mydukur	1-11-1959	43	27
5	Kodur	1-11-1959	32	26
6	Cuddapah	1-11-1959	36	30
7	Pendlimarri	1- 9-1961	40	34
8	Rayachoti	1-11-1959	34	28
9	Lakkireddipalle	1-11-1959	46	40
10	Jammalamadugu	1-11-1959	40	34
11	Chitvel	2-10-1960	39	33
12	Pulivendla	1-11-1959	44	38
13	Vempalle	1-11-1959	40	34
14	Badvel	1-11-1959	40	34
15	Sidhout	1-11-1959	55	49
16	Proddatur	1- 6-1962	35	29

Zilla Parishad

At the district level there is a Zilla Parishad consisting of the following members :-

(a) The Presidents of all Panchayat Samithis in the district;

(b) The District Collector;

(c) The members of the Legislative Assembly of the State elected from the district;

(d) Such members of the Legislative Council of the State as the Government may by order specify;

(e) The members of the House of the People elected from the constituency which forms part of the district;

(f) Such members of the Council of States as the Government may by order specify; and

(g) For every Block for which no Panchayat Samithi is constituted, one person residing in that Block elected by the Presidents of the Panchayats within such Block.

All these members elect two women, one representative of Scheduled Castes, and one representative of Scheduled Tribes according to their population and, if the population of the Scheduled Tribes is less than the prescribed percentage, another representative of Scheduled Castes. A member of the House of the People representing a constituency which comprises portions of more than one district may be a member of only of the Zilla Parishad of the district in which he resides.

The Chairman and Vice-Chairman are elected by the Members from among the non-official Members. A person can be a Chairman of only one Zilla Parishad. The President of a Panchayat Samithi, if elected as the Chairman of the Zilla Parishad, ceases to be the President of the Panchayat Samithi. The Government appoints a Secretary to the Zilla Parishad who ordinarily attends the meetings of the Zilla Parishad or any Standing Committees thereof and is entitled to take part in the discussions but is not entitled to vote.

The following are the Standing Committees of the Zilla Parishad.

(i) *Standing Committee for Planning and Production*: Planning, Food and Agriculture including Irrigation wells, Animal Husbandry, Reclamation including Soil Conservation, Contour bunding, Forests and Fisheries;

(ii) *Standing Committee for Co-operation and Industries*: Co-operation, thrift and small savings, industries including cottage, village and small scale industries, trusts, rural housing, statistics, and prohibition of or temperance in the consumption of intoxicating drinks and of drugs which are injurious to health;

(iii) *Standing Committee for Education*: Education including Social Education, Medical Relief, Public Health and Sanitation including drainage, Relief to distress in grave emergencies, and self-help programmes;

(iv) *Standing Committee for Women Welfare*: Welfare of women and children;

(v) *Standing Committee for Social Welfare*: Social Welfare;

(vi) *Standing Committee for Communications*: Communications, rural water-supply, power and irrigation excluding irrigation wells; and

(vii) *Standing Committee for Taxation and Finance*: Taxation and Finance.

The Chairman of the Zilla Parishad and the District Collector are ex-officio Members of all the Standing Committees and the remaining members are elected by the members of Zilla Parishad from among themselves. The Collector is the Chairman of all the Standing Committees. District Officers in-charge of developmental activities have the right to speak in and otherwise take part in the proceedings of the meetings of the Zilla Parishad or any Standing Committee thereof. They, however, do not have the right to vote.

At the district level, the Zilla Parishad consolidates plans prepared in respect of all the Blocks in the district and co-ordinates the activities of the Samithis. It examines and approves the budgets of the Panchayat Samithis in the district. It functions as a Panchayat Samithi in Blocks for which no Panchayat Samithi is constituted. It establishes, maintains or expands secondary, vocational and industrial schools. It also advises Government on all matters relating to developmental activities *etc.*

The following are the sources of finance of the Zilla Parishad :

(a) The Central or State Government funds allotted to the Zilla Parishad;

(b) Grants from All India bodies and institutions for the development of cottage, village, and small scale industries and the like;

(c) Such share of the land cess, tax or fees as may be prescribed;

(d) Proceeds from taxes or fees which the Zilla Parishad may, under any law, levy;

(e) Income from endowments for trusts administered by the Zilla Parishad;

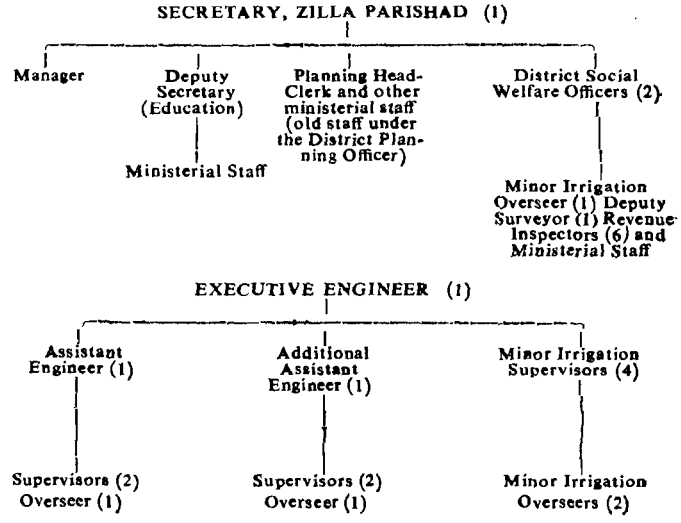

(f) Such income of the District Board as the Government may by order allocate to it;

(g) Donations and contributions from Panchayat Samithis or from the public in any form; and

(h) Such contributions as the Zilla Parishad may levy from the Panchayat Samithis with the previous approval of the Government.

Administration

The administrative set-up of the Zilla Parishad is given below :-

It would be interesting to give a general perusal of the financial position of the Zilla Parishad, Cuddapah at least for the year 1960-61, so that the readers would get to know the financial working of the Zilla Parishad.

During the year 1960 - 61 the Zilla Parishad of Cuddapah invested a total sum of

Rs. 2,14,500/- in various interest bearing securities. A total sum of Rs. 69,245.27 was realised by way of interest from various securities previously held. Out of the total demand of Rs. 1,32,000/-under education cess, an amount of Rs. 44,000/- was left uncollected at the end of the year.

Government grants to the tune of Rs. 20,71,468.64 were received by the Zilla Parishad during the year 1960-61.

The other receipts like taxes, remunerative enterprises, railway cess, receipts on welfare account and miscellaneous items amounting to Rs. 12,74,387.62 were received by the Zilla Parishad during the year as shown below :

(i)	Taxes	Rs.	1,38,156.58
(ii)	Remunerative enterprises	,,	1,459.10
(iii)	Elementary education receipts	,,	10,27,264.92
(iv)	Railway cess receipts	,,	579.83
(v)	Receipts on welfare	,,	3,57,303.09
(vi)	*Miscellaneous items*	,,	*3,04,877.56*
	Total receipts	,,	18,29,641.08
	Deduct refunds on taxes	,,	5,55,253.46
	Net receipts	,,	12,74,387.62

Government grants and other receipts amounting to Rs. 9,36,082.54 were received during the year. Thus the total receipts under 'Ordinary' and 'Capital' received during the year were Rs. 42,81,938.80 as shown below:

Ordinary receipts	Rs.	33,45,856.26
Capital receipts	,,	9,36,082.54
Total receipts	,,	42,81,938.80

Against this, the total expenditure incurred under all heads of accounts during the year was Rs. 40,28,995.64 as shown below:—

Ordinary expenditure	Rs.	30,35,960.93
Capital expenditure	,,	9,93,034.71
Total expenditure	,,	40,28,995.64

The financial position of the Zilla Parishad was considered to be generally satisfactory.

In giving this picture of the Panchayati Raj an attempt has been made to review the system from its early inception as it has been considered one of the major revolutionary changes introduced in the administrative pattern of the Government after Independence.

CHAPTER XII

BRIEF GAZETTEER OF PLACE NAMES

CUDDAPAH TALUK

Cuddapah—the headquarters of the district, lies in the angle formed by the two branches of the Palakonda hills, one of which proceeds northwards and merges into the Lankamalais while the other passes due westwards a few miles south of the town. It is a first grade municipality with a population of 49,027 according to the 1961 census. It contains the usual public offices of a district headquarters.

The origin of the name Cuddapah cannot be determined with any certainty. It is generally considered to be so called on account of its position on the threshold (Gadapa) of the pass that leads to the Vontimitta valley and thence to the sacred hill of Tirupati. Others derive the word from 'Kripa' signifying in Sanskrit 'mercy'. In old records, until the 18th century, the name of the place was written as Kurpa or Kurpah. It is possible that Patha-Cuddapah, the original village, is identical with Karige or Karipe which occurs in geographical treatise of Ptolemy of Alexandria compiled in the 2nd century A.D. The present town of Cuddapah is believed to have been founded in the latter part of the 16th century. After the battle of Talikota A.D. 1565 which marked the disruption of the Vijayanagar Empire, the country was overrun by bands of Musalman adventurers in search of new settlements. Neiknam Khan, a Pathan Officer in the army of Golconda, penetrated in this region and because of its fertility and strategic position he decided to remain here. His proposal to found a Musalman settlement here was approved by the Sultan of Golconda and he was permitted to name it Neiknamabad. The first Nawab of Neiknamabad was a relative of the Sultan and Neiknam Khan himself was appointed the Nawab's Chief Minister. In course of time, Neiknamabad began to grow and prosper and ultimately became Cuddapah. It contains no Hindu temple of any antiquity except the Anjaneya temple. Many old mosques and Muslim cemeteries are found in the different quarters of the town. Abdul Nabi Khan second in the line among the Nawabs of Cuddapah is credited to have constructed the Patha-Cuddapah tank, for the supply of which he built an anicut, which was destroyed in the floods of 1903 and the tank is now supplied by a channel from the Kurnool-Cuddapah canal tail end.

Cuddapah town enjoys a good water supply from the municipal water works which was opened in 1890, though it has not proved quite adequate to the needs of the municipality in the hot weather. As a trade centre Cuddapah stands second only to Proddatur in the district. But in a sense it is more important, as it taps a larger area within the district. Most of the trade of Badvel, Sidhout, Pulivendla and Rayachoti taluks passes through Cuddapah and its situation on the main railway line to Bombay facilitates the export of its more peculiar products, such as melons and turmeric, to all parts of India.

The most imposing building in Cuddapah is the Collectorate building constructed in 1897 with granite stones located in a central portion of the town. The Cuddapah Arts College is of a more recent origin and is located near the railway station. The Industrial Estate is also located near the railway station. It is a safe forecast, that the railway station area would be the future industrial area of the town. In between the railway station and Cuddapah town is located the Municipal Travellers' Bungalow.

The main street in Cuddapah town is the Trunk Road fully cemented. The town is well connected by buses with all taluk headquarters and the various important towns in the district.

Besides the Arts College, there are four High Schools in the town, one of which is a Girls' High School. There is also a Secondary Grade Teachers' Training School.

Chennur—has a population of 8,755 and is situated on the right bank of the Penneru, seven miles north-west of Cuddapah. The wet lands of the village are irrigated by channels from the Kurnool-Cuddapah Canal and are very valuable. The town is noted for melon cultivation in the Penneru river bed during the summer months and the melons are exported all over India. The betel gardens of this village

are equally famous and this has led to a flourishing trade in betel leaves.

There is a High School in this village with a good reading room abutting the river Penneru. This is the firka headquarters and the village chavidi is well maintained and is useful for camping.

The antiquity of Chennur is proved by an inscription on a stone in the oldest part of the village, from which we learn that in the early part of the 16th century when the Emperor Sri Krishnadevaraya was ruling at Vijayanagar it was the headquarters of an administrative unit consisting of several villages and extending as far as Potladurti. This old division of Chennur was included in the Gandikota district of the Udayagiri province.

The village contains about half a dozen Hindu temples, a mosque of some importance and a darga. It is connected by a cement road from Cuddapah. Chennur is the biggest village in Cuddapah taluk.

Nandimandalam—with a population of 5,609 is a large village situated on the right bank of the Papaghni about six miles north-east of Vempalle, at the trijunction of the three taluks of Pulivendla, Kamalapuram and Cuddapah. The village is said to have been an important place many years ago and was considered the seat of the Chandravamsa clan of Kshatrias, who styled themselves as 'Nandimandalam Rajulu'.

An enclave in the Palakonda hills to the south of the village, approached by a narrow winding gorge, contains some perennial springs and a temple to Shri Chennakesavaswami. The God is also called Kona Chennarayaswami on account of the locality. It is the second biggest village in Cuddapah taluk after Chennur.

There is also a High School in the village.

RAYACHOTI TALUK

Rayachoti—is the headquarters of Rayachoti taluk and has a population of 16,721. It is a Class I Panchayat and contains, besides a Travellers' Bungalow, all the offices usual to a taluk headquarters. It is also the headquarters of the Rayachoti Panchayat Samithi. From old inscriptions it appears that the original name was Raja-vidu or the 'King's dwelling-place; but the early history of the village is obscure. The distance to Cuddapah on the north is thirty three miles, and Rajampet and Kadiri lie some thirty five miles east and west respectively. Rayachoti is thus very centrally situated in the taluk. Most of the surplus produce of the taluk finds its way to the weekly market which is held here every Sunday. Trade is chiefly carried on with Cuddapah, Rajampet and Vempalle. Handwoven clothes are embroidered by weavers of the Sale caste and sold locally. The town has no other industry of any importance.

There is an important temple of Veerabhadraswami at Rayachoti which contains some old inscriptions recording grants to the temple by local chiefs at various periods. Some curious practices are observed in connection with the worship of this God.

In old Rayachoti near the river to the west of the town is a stone very conspicuously set up, with a Tamil inscription dated S.S. 1155 which corresponds to A.D. 1233. It records a grant to a temple by a certain king, but none of the names given can be identified with any place in the vicinity. The king is called Nissankapratapa Raya, Lord of Karkatapura. Another inscription of the same date at Abbavaram, a village included in the Rayachoti Union, mentions the name of another king, Thomba, who was first ruling from Kalukatayapuram and then from Marujavaduyandapuram his capital. It is probable that Karkatapura and Kalukatayapuram refer to the same place and it is possible that Thomba who was first ruling there was expelled therefrom by Nissankapratapa who called himself "lord of Karkatapura". It is not known to what dynasties these kings or chiefs belonged."

There is a High School in Rayachoti.

Tsundupalle—with a population of 6,247, is situated on the left bank of the Bahuda river, twelve miles south-east of Rayachoti. It contains a police station, a branch post office, and a Zilla Parishad High School. The arable lands of the village extend some miles to the west of the river and some are watered by fairly good tanks, but the most valuable irrigated lands are those under the river channels, the ayacuts of which are very extensive.

A weekly market is held every Monday, in a compound specially constructed by the then Local Board (now under the Zilla Parishad). This attracts also merchants from the neighbouring Vayalpad taluk of Chittoor district.

The village contains 26 irrigation sources of which about a dozen are channels dug from the Bahuda river. Two crops are raised under these channels and paddy forms the principal crop. Groundnut and Mango command good export from this village.

This is the headquarters of the Tsundupalle Panchayat Samithi.

In the temple of Ghatturayaru there is a copper plate with an inscription dated S. S. 1463 (A.D. 1541) which tells of a caste dispute between the Padma Sales and Jandras. The point of dispute appears to have been which of the two castes could really trace their origin to the Goddess Lakshmi. The Padma Sales approached their guru whose name was Tallapaka Tiruvengalanadhayya whom they requested to discover the truth of the matter. He prayed to the Goddess Lakshmi at Tiruchanur to settle the point. The Goddess gave her decision in favour of the Padma Sales and they in their gratitude had the temple constructed with stone from Allaghattu east of Chandragiri.

Settipalle—With a population of 5,999 is situated 17 miles south-east of Rayachoti. It is the biggest village in Rayachoti taluk consisting of 49 hamlets. It contains 21 irrigation sources out of which Narappa tank is the biggest with an ayacut of 108. 62 acres. The groundnut crop constitutes the chief export of the village.

Galiveedu—with a population of 5,962, is situated about 18 miles west of Rayachoti on the State Highways road leading to Kadiri. There is a Travellers' Bungalow, about three miles west of the village, at Veligallu. A weekly market is held here every Wednesday. The village site lies on the right bank of the Chinna Eru (Kushawati river) which enters the taluk from the south and flows into the Papaghni near the north-west corner of the village boundary. Some channels taking off from this stream irrigate small areas on both its banks. There is one large tank and several small ones, but the entire irrigated area is small in comparison with the extent of arable land in the village which mostly consists of coarse red soil so characteristic of this taluk. Horsegram and groundnut are the principal crops of this village. A cattle show is held annually on the 20th of April at Vadiselavanka, hamlet of Galiveedu village.

There is a ruined fort close to "casba" the history of which is not known. It was probably an outpost of the Ekili poligars, as some of their descendants called Ekilivandlu or Ekili Nayanivarlu, still reside in the village.

There is a curious old sakti stone just outside the village, inscribed with unintelligible symbols, to which puja is done in times of trouble.

Chinnamandem—with a population of 5,768 is situated some ten miles south-west of Rayachoti on the right bank of the Mandavya river and a little west of the road to Gurramkonda. A weekly market is held every Friday. About three miles further south, on the other side of the road, there is a Travellers' Bungalow near the hamlet of Kesapuram. In this hamlet also is a village Goddess, Paleti Gangamma, who is regarded with more than usual importance. Her annual festival in March attracts a concourse of about two thousand people, many of whom come from Vayalpad and Madanapalle taluks. There is a High School in this village.

The main sources of irrigation are tanks and channels. Groundnut, which is grown on dry lands, is the main exportable commodity of this village.

There are two ruined forts in the village, the history of which is not known.

There is a sacred pool in the hills which separates the village of Paramatikona, once a part of Chinnamandem from Tsakibanda. The hill in which it is situated is locally known as Akkadevatala Konda or 'hill of the holy sisters'. The pool has the appearance of the well sunk in the solid rock and is about fifteen feet in diameter. A few hundred yards west of the pool is a natural cave which is called the temple of the "Akkadevatalu". Six or seven stones within the cavern represent the goddesses and their footprints are clearly visible on the flatstone in front of the temple entrance. People desirous of some blessing especially the childless who wish for a family, perform their vows at the temple and feed an assembly on the hill. This place is generally visited in the month of November.

Veeraballe—lies under the Seshachalam hills on the right bank of the Mandavya river. It has a large number of hamlets, with a total population of 5,313. There is a direct road to Rayachoti which is ten miles in length running south-west. Two miles south of the village-site is one of the largest tanks of the taluk known as "Peddacheruvu" with an ayacut of approximately four hundred acres. In the heavy floods of 1903 when numerous small tanks in the taluk were destroyed this one sustained a big breach in the middle of the bund near the principal sluice and was subsequently repaired by the Public Works Department. This is now under good repairs.

A stone with an inscription in archaic characters, formerly set up on the bank of Mandavya,

has now fallen into the river. The inscription,which has not yet been satisfactorily deciphered owing to a defect in the impression obtained, would probably defy examination.

A weekly market is held in this village every Saturday.

Chief crop of the village with its 27 irrigation sources is paddy. Groundnut from the dry fields forms the chief export. In the month of Vaisakham a festival takes place in honour of the Hindu Goddess, "Veera Nagamma" whose shrine lies at the foot of Seshachalam hills.

There is a High School in this village.

PULIVENDLA TALUK

Pulivendla—the headquarters of the taluk, is situated on the road from Kadiri to Muddanur, twenty seven miles north of Kadiri and twenty three miles south of Muddanur railway station. It is a Class I Panchayat and contains a population of 7,309. This is the headquarters of the Panchayat Samithi. The name Pulivendla is said to denote the 'haunt or abode of tigers', though no tigers can be seen now a days. The Pulivendla vanka, a tributary of the Mogameru, flows through the village, and a number of spring channels rising in its vicinity provide good irrigation to the low-lying fields bordering the village on the north and east, where betel vines, plantains and other fruits, as well as flowers, are grown in plenty. The Local Fund Market at Pulivendla is the largest of its kind in the district. It is held every Thursday in an extensive and commodious walled compound and attracts a great deal of business. Traders from Anantapur district frequent it, and it forms a convenient link between the plateau taluks and the main line of the railway at Muddanur or Kondapuram. More than twenty thousand rupees worth of merchandise is said to be brought to the market every week, mostly in the shape of various grains and country cotton goods.

It is a peculiarity of this village that its principal temple is situated a mile away to the west in the midst of fields. In spite of this, daily worship is conducted and some thousands of people attend its two principal festivals. At one of these festivals the Pavithrotsavam, which lasts for three days, a colonnade of bamboos decorated with flowers is erected from the mula vigraham to the gateway of the temple.

There is a ruined fort on a small hill above the village, a reminiscence of the political ascendency of the poligars, which is specially characteristic of this part of the district. Pulivendla was under the poligars of Vemula.

There is a Zilla Parishad High School in this place.

Vempalle—with a population of 9,051 is the only town in the taluk. It is situated eighteen miles east of Pulivendla village, the headquarters of the taluk and about thirty miles south-west of Cuddapah. The wet lands of Vempalle, which are unusually extensive, enjoy the best irrigation that the taluk affords and are the source of its prosperity. It exports large quantities of rice to the less favoured villages of the taluk as well as to Rayachoti and Kadiri and a brisk trade is maintained by means of weekly markets. It is said that merchandise of the average value of more than six thousand rupees changes hands at the Vempalle market which is held every Friday. The village of Alireddipalle which is situated on the right bank of the Papaghni opposite to Vempalle once formed part of it. In this village there is a temple to Vrishabachaleswaraswami, conspicuously situated on a hill, visible from some distance on the Vempalle side of the river. The curious name of the God is accounted for by a myth which relates that a Rakshasa named Vrishabhasurudu once inhabited the neighbourhood and caused general unpleasantness until he was vanquished by Vishnu after a seven days contest. The scene of the Rakshasa's defeat is the hillock and the temple was built thereon in honour of Vishnu's victory. The brahmotsavam takes place in the month of Vaisakham and lasts for nine days.

There are several other temples of less importance and two mosques. Vempalle is a Class I Panchayat and is the headquarters of the Panchayat Samithi. There is also a Zilla Parishad High School in this town.

Balapanur—is a large village of over five thousand inhabitants, (5,627) situated on the road to Kondapuram about eight miles north-west of Pulivendla. It marks the southern extremity of the great black cotton plain which stretches north and west from here towards Jammalamadugu and Tadpatri. It holds four hamlets with an area of 14.40 square miles. Groundnut, chillies and cotton are the main commercial crops.

It is said that this village was a Brahmin agraharam in the time of the Vijayanagar Emperors but was resumed by the Cuddapah Nawabs who set

apart certain inams for the Brahmins. In the early part of the 18th century it was included in the poliem of Tondur and protected by the poligar with the usual fort and watch-tower. The latter as well as the gateway of the fort are still standing.

In a taluk practically devoid of good tanks, the vurakunta of Balapanur deserves mention. It provides irrigation to its ayacut for over six months in a good year and furnishes the principal drinking water supply of the village. The water is said to be unusually palatable and the situation of the tank by the road side is considered a boon to thirsty travellers.

An appreciable proportion of the population of the village is employed otherwise than in agriculture. Weaving provides occupation to considerable numbers. Some Voddes and Yerukulas have also settled in the village. The former are masons and the latter make bamboo tatties and baskets which they sell principally at the Pulivendla market.

KAMALAPURAM INDEPENDENT SUB-TALUK

Kamalapuram—with a population of 7,641 is the headquarters of an independent sub-taluk and a Deputy Tahsildar is incharge of it. This is also the Panchayat Samithi headquarters. The Kamalapuram tank lies north of the railway line about a mile west of the station. It is the largest in the taluk and the valuable lands which it irrigates have mainly contributed to the prosperity of the town. Rice is exported on a large scale to the principal towns in the black cotton tract of the district. Jasmine flowers are grown in some abundance and find a market in Proddatur and Cuddapah.

When the country was ceded to the British, Kamalapuram was made the headquarters of the troops to reduce disorderly poligars.

The Zilla Parishad High School caters to the needs of education of this place.

JAMMALAMADUGU TALUK

Jammalamadugu—with a population of 16,616 is the headquarters of the taluk and of the Divisional Officer and is situated in a central position on the north bank of the Penneru, twelve miles from Muddanur railway station. The town is compactly built round the fort which commands the river. All the offices that are usual to a taluk are situated in the town. This is the headquarters of a Panchayat Samithi as well.

Kanyakaparameswari temple has been built by the Vysya community with the hall at the entrance containing two tall pillars of elaborate workmanship. The Rangarajus of this place have also constructed an equally artistic edifice to their goddess, Amba Bhavani. There is a big temple for Narapuraswamy lying in the northern side of the town. The annual festival in his honour is celebrated in the middle of May and is attended to by many people from various parts of the taluk. The festival culminates in climax on the seventh day when Narapuraswamy will be seated on the Ratham (big car).

The principal trade of the town is in cotton. Weaving of a more ambitious character than usual is carried on by families of Maharatta extraction. In addition to turbans which are chiefly exported to Maharashtra State there is also a considerabe manufacture of coloured table-cloths, curtains and similar articles which are dyed by Rangarajus and block stamped with patterns of animals and birds. The largest temple in the place, dedicated to Venkateswara Swami, lies about half a mile to the south-west of the town literally in a sand-heap on the banks of the Penneru. In the Muslim cemetery on the bank of the river–is the grave of the first and the last Nawab of Jammalamadugu, Abdul Syed Khan, to whom the town and the surrounding territory were granted as a jaghir by Tipu. Legend relates that the Nawab declined to allow his last resting place to be covered even with the slab of stone which is shown close by, and the simple earthen mound is in striking contrast to the large and ornate tomb of his wife not far distant. A descendant of the Nawab still receives an allowance from the Government for the upkeep of the mosque.

The Campbell Memorial Hospital, an old institution has earned a very good reputation for medical relief.

There are two Zilla Parishad High Schools, one for boys and the other for girls.

Dommaranandyala—population 6,794 is situated two miles north-west of Jammalamadugu on the northern bank of the river Penneru. Its only hamlet, Karamalavandlapalle is at a distance of 1½ miles north of the village. It is purely a dry village without any irrigation sources. About 50% of the population are Thogatas who are weavers and there are about 2,000 looms in this village. It can be said that this village is an imortant commercial centre for Handloom

sarees in this area. The annual festival of Choudaswami, a Hindu diety is performed with great pomp in the Telugu month (Vaisakha Purnima).

Gandikota—with a population of 1,167 is a village situated on a hill about five miles west of Jammalamadugu. The name is comprised of two Telugu words Gandi, a gorge, and kota, a fort; and in these lie all the interest and importance that the place possesses. It is perhaps the most striking spot in the district. The gorge where the Penneru has cut its way through sheer rugged cliffs of bedded sandstone, some two or three hundred feet high is four miles long and the height overlooking the river on the south bank is crowned by extensive fortifications, which, even apart from their historical associations, are well worthy of a visit.

Within the fort are several wells, strongly revetted and provided with stone steps, and a koneru known as Rayalacheruvu the springs of which are perennial. These provide irrigation for the numerous lime and plantain gardens which are a feature of the place. Gandikota village is noted for its vegetable produce that keep up supplies to Jammalamadugu town. These are grown in small patches of land from 5 cents to 75 cents reclaimed from the hill boulders. Hence these lands are most valuable ranging from Rs. 10,000/- per acre to Rs. 15,000/-.

PRODDATUR TALUK

Proddatur—with a population of 50,616 is the taluk headquarters and is situated on the north bank of the Penneru eight miles from Yerraguntla Railway Station. It is a first grade municipality and the largest town of the district in respect of population and exceeds the 50,000 population limit.

Proddatur is certainly the wealthiest town in Cuddapah district. In its pressing and ginning factories large quantities of raw cotton are prepared for the market by power driven machinery. The trade of the town, the bulk of which is concerned with cotton, indigo and food grains is chiefly in the hands of the rich Vysya community. This is also an important trading centre for Kurnool and Anantapur districts. Evidence of their prosperity is seen in their substantial stone-houses and jewellers' shops with which the place abounds. The town has a very busy bazaar and a Local Fund market where country produce is brought in and sold every day. The Government offices lie to the north of the town, and the cluster of houses near them, are inhabited chiefly by officials and lawyers. The reservior from which the town gets its water supply is fed by a channel from the Penneru.

Of the four large temples in the town the only one possessing any special interest is that of the goddess Kanyakaparameswari in the main bazaar, which was erected by the Vysya community at a cost of a lakh of rupees. The front is most elaborately carved and is an excellent specimen of modern art. The god Subramania riding a yali in puttees and boots adds a touch of modernity. These carvings are the work of the famous sculptors of Gumpramanudinne.

Proddatur is also the headquarters of a Panchayat Samithi. The Office of the District Munsiff is located here. The Proddatur Polytechnic School has added to the prominence of this prosperous town. The Co-operative House-building Society has helped to alleviate housing congestion.

Yerraguntla Railway Station on the Madras-Bombay line at a distance of about 8 miles provides the railway link to this town.

There are two High Schools in Proddatur town, out of which one is exclusively for girls.

Onipenta—with a population of 5,260 is the largest village of the taluk. Its importance is of comparatively recent origin, being mainly due to the development of the non-ferrous metal working industry. The workers are principally Muslims, but the industry is financed by Komatis (Vysyas) through whose enterprise the village has also become a trading centre of some local importance. It is situated at the foot of the Nallamalais about fifteen miles east of Proddatur on the road to Porumamilla. The utensils produced in this village are sold all over the State. Turmeric, onions, and chillies are raised under private wells and they are exported. Groundnut is also raised in dry fields.

BADVEL TALUK

Badvel—with population of 8,063 is a Panchayat and also the headquarters of the taluk and the Panchayat Samithi. Its nearest railway station is Vontimitta at a distance of nearly thirty miles to the south. It contains all the offices usual to a taluk headquarters. The great tank at Badvel is its principal source of wealth. It affords irrigation to seven villages, of which Badvel receives the greatest share. It has an area of about a

thousand acres under the tank and paddy is the principal crop. Turmeric and indigo find a market in Cuddapah. Its position on the main roads connecting Cuddapah with Cumbum and Nellore renders Badvel a trade centre for the eastern taluks, only second in importance to Rajampet. In the making of shoes and sandals it has developed a small industry.

Though there are Hindu temples they present no feature of particular interest. There are two dargas in the town and these have been recently electrified.

There is a Zilla Parishad High School for boys and girls in this town.

Porumamilla—with a population of 5,581 is situated some twenty miles north of Badvel on the Cuddapah-Cumbum road. Like Badvel it derives its importance from its great tank. On the bund opposite to the ruined temple of Bhairavaswami are two large stones bearing an inscription of considerable historical interest, recording that the tank was constructed by Prince Bhaskara, Viceroy of the Udayagiri province, in the reign of his father the Emperor Bukka. The tank forms the chief source of irrigation and paddy is produced in the fields of the village. There is a sub-branch of the Roman Catholic Mission which runs an orphanage, a school and a hospital. There is a ruined fort in the town, reputed to be of great antiquity.

There is a Zilla Parishad High School in this village. This is the headquarters of the Panchayat Samithi. The Forest Rest House is spacious and well maintained.

Sankavaram—is a prosperous village lying about three miles north of Porumamilla near the road to Kalsapadu. It has a population of 5,028. It has a large area of irrigated land under the Mudireddipalle, Chintalapalle and Porumamilla tanks, of which the latter two are fed by the Sagileru project channel. The ryots sell their surplus produce at Porumamilla, notably turmeric and jaggery.

To the west of the village is a small fort with a circular tower said to have been built by "the Kondavandlu family" of Kapus who were very famous and powerful in old times, possibly the Reddis of Kondavidu who continually menaced the northern frontier of the Udayagiri province, and occupied a portion of it about the end of the 15th century, from which they were ousted and defeated by the Emperor Sri Krishna devaraya of Vijayanagar, (A. D. 1514). At a subsequent period it was occupied by certain Desay Marka Reddi, who seems to have been a powerful poligar during the 18th century. His descendants own some shrotrium villages in the neighbourhood which are said to have been granted to the family by Sir Thomas Munro.

About a hundred yards north of the fort are the remains of an old temple, which, tradition says, was built by a Vijayanagar king. On a stone close by is a faded inscription wherein are only legible a date S. S. 1517 (A. D. 1595), and the name of Venkatapathi Raja of Vijayanagar. This illustrates how the Vijayanagar suzerainty was acknowledged at least in name, many years after the battle of Talikota. During the whole of his reign Venkatapathi Raja resided at Chandragiri in the present Chittoor district.

Another inscription records that the temple of Iswara which is built on the slope of a hill about five miles north of the village was constructed in the year S.S. 1205 or A.D. 1282 in the time of Thrighavari Deva Maharaja of the Kayastha family. The Kayasthas were powerful feudatories of the Kakatiya kings of Warangal who extended their authority over most of the Cuddapah district in the last quarter of the 13th century. Ambadeva who usurped the sovereignty about A.D. 1287 belonged to the Kayastha family.

Sankavaram is the biggest village in Badvel taluk with an area of 19.71 sq. miles. There are seven tanks fed by Upper Sagileru channel in the village and paddy forms the chief crop and it is known as the granary of the Badvel taluk. Sugarcane, turmeric, onions and betel vines are the other crops raised here.

Kandimallayapalle—a hamlet of Somireddypalle, a place of religious importance and a pilgrimage centre for the Hindus. It is connected by a regular bus service. The festival of Veerabrahmam will be celebrated on the sacred day of Sivarathri in the Telugu month of Magham and the Aradhana festival in Vaisakham. People from far and near from many districts congregate here and participate in the celebrations. The presiding deity of the temple is Sri Pothulur Veerabrahmam who is said to have attained "Jeevasamadhi" here some four centuries ago. His reputed work is "Kalagnanamu" which is stated to throw light on future events.

SIDHOUT TALUK

Sidhout or Sidhavattam—with a population of 3,307 is the headquarters of the taluk as well as the Panchayat Samithi. A metalled road connects Sidhout with the Vontimitta Railway Station at a distance of eight miles. After the departure of Munro and the bifurcation of the Ceded districts, Sidhout was for some years the residence of the Collector, but was abandoned in favour of Cuddapah in the year 1817.

The historical interest of Sidhout centres in its fort. Within it are to be seen traces of Hindu temples of which, prior to the Musalman ascendency, there were three, named the Siddheswaraswami, Siddhavateswaraswami and Ranganathaswami temples. Early in the 17th century Anantaramaraju, a powerful prince of the Matli family whose authority over this part of the country was practically unchecked, was invited by the Brahmans of Sidhout to visit the temples on his return from Badvel to his headquarters in Pullampet taluk. During his halt there he gave orders that the temples should be surrounded with a strong compound wall. On the south-east side of the wall an inscription records its construction by Matli Anantaramaraju in the year S.S. 1527 (A.D. 1604). This wall became the nucleus of the fort which was built by Abdul Alam Khan, Nawab of Cuddapah, about A.D. 1755. A moat was dug and water let into it from the Penneru. Upon the southern wall of the fort, the Nawab constructed a mosque, with a residence for himself close by. The mosque being still in use is kept in good repair. When the river comes down in full flood and washes the foot of the wall the view from the top of it across half a mile of swirling torrent to the hills on the south is sufficiently striking to repay the trouble of a visit. After the Musalman occupation the Hindu temples within the fort were dismantled and the idols removed and installed in fresh temples. It was in Sidhout fort that Nawab Alam Khan was finally captured by Haidar Ali in 1779 and sent as a prisoner to Seringapatam. About a mile west of Sidhout in a little village called Rajampet which forms part of the union of Sidhout is a well called 'Bhogandani bhavi' curiously built, with pillared verandahs on every side. It is said to have been constructed by Alam Khan at the request of his favourite dancing girl, who lived in a two storied house close by, and hence its name. The Bhogandani well is included in the list of ancient monuments conserved by the Archaeological Department.

Three miles west of Rajampet is another little village on the same side of the river, named Joti. It contains a temple of Siddheswaram which is almost completely buried in the sand. It is an ancient structure and is supposed to contain very valuable inscriptions. There are also two Vishnu temples of archaeological interest about a mile west of the village.

Owing to some resemblance, real or imaginary in its situation on the Penneru and the relative position of neighbouring village, Sidhout is sometimes known as Dakshana Kasi or southern Benaras. That the Penneru was thus associated with the Ganges from the very early times is also indicated by the existence of two villages called Pennaperur and Gangaperur on the southern bank of the river, a few miles north of Vontimitta. Again, in such matters as ceremonial bathing and cremation, the Penneru is held to be endowed with very great religious efficacy.

The cultivation of "Cuddapah melons" in the river bed is carried out more extensively at Sidhout than anywhere else in the district. They are raised between December and March, that is to say, as soon as the freshes run dry after the cessation of the cold weather rains. The Agriculture Department have instituted a Melon Research Centre at Sidhout.

There is a High School in this village.

Vontimitta—the largest village in the taluk, is situated about eight miles south-east of Sidhout on the main road to Cuddapah. The Railway Station is three quarters of a mile to the east of the village. Its population, inclusive of outlying hamlets, is 6,023. This place has a Travellers' Bungalow incharge of the Forest Department, two Local Fund choultries, a post office and a police station. The Vontimitta tank, which is the largest in the taluk lies between the railway line and the road, the latter passing over the bund. It has an excellent catchment area and a large ayacut of over a thousand acres but the tank being porous, it is not very effective. The chief crop raised under the tank is paddy besides turmeric, ragi, onions and chillies.

The village is remarkable for its temple of Kothandaramaswami, one of the largest in these parts. It has three gopurams, of which the central and the loftiest is adorned with carved figures, while the others are plain. Within the courtyard are two mantapams, a large one with thirty two pillars and

a smaller with fourteen. The former is the place where the utsava vigrahams are decorated during festivals, and the latter is the kalyana mantapam where on the day preceding the car festival the ceremony of the God's marriage with Sita is performed. The great annual festival is conducted with much splendour for nine days during April in connection with the Sri-ramanavami and attracts a few thousands of people. The temple is preserved under the Ancient Monuments Preservation Act.

One school of thought still claims that the great saint-poet of telugu literature, Pothana came from this village. There is a small hillock with a shrine on top of it, where the poet is said to have written his immortal Bhagavatham.

There is a High School in this village, catering to the needs of the surrounding villages.

Madhavaram—with a population of 4,902 is situated on the Pottapi-Vontimitta road on the right bank of the Penneru, about two miles west of its confluence with the Cheyyeru. About a mile beyond Madhavaram the road turns sharply to the west and passes over an outlying spur of the Palakondas into the Vontimitta valley. The distance to Vontimitta Railway Station is about ten miles. The village contains a travellers' bungalow and four choultries. There are numerous tiled houses, with upper stories. Its prosperity is principally due to the silk weaving industry. About three-quarters of the inhabitants belong to the weaving caste of the Padma Sales and are the most skilful silk weavers in the district.

There is a temple of Bhavanarayanaswami or Bhavana Rishi, the caste God of the Padma Sales which has been designed on a grand scale and is considered as an important feature of the place.

There is a Zilla Parishad High School in this village.

RAJAMPET TALUK

Rajampet—with a population of 11,636 is the fourth largest town in the district. It was made the headquarters of the taluk in preference to Pullampet. It is situated on the left bank of the Pullangi which flows into the Cheyyeru four miles further north. On the other bank of the stream, opposite the town, is a hill called Kondur Tippa which bears traces of old fortifications. It is said to have been an outpost of some ruling chiefs, now spoken of as the Kondur Rajas, who founded the adjoining town and called it Rajampet.

History does not have much to say about Rajampet. Its importance is of modern origin and dates from the opening of the railway by which it received a great stimulus to trade and rapidly became the principal centre of distribution not only for Pullampet but for much of Sidhout and Rayachoti taluks. The transfer of the taluk office to Rajampet from Pullampet increased its importance. Subsequently the Sub-Collector's Office was also located here.

A large weekly market is held every Wednesday. Weaving is the only industry that provides occupation to any considerable section of the population. Petty shop-keepers and traders, large and small, constitute the majority.

There are two High Schools in this place, one for the boys and the other for girls.

Kodur—is a large village with numerous hamlets and an inclusive population of 12,003 and is the headquarters of the Panchayat Samithi. It is situated on the Gunjana river, a mile north-east of the Railway Station of the same name and contains a travellers' bungalow belonging to the Forest Department. The making of bamboo cots, baskets, tatties and the like, material for which is obtainable from the adjoining forests, constitutes the other important industry in the place with fruit export. A metalled road following the course of the Gunjana river connects Kodur with the principal villages of the Chitvel valley, exports from which are generally entrained at the Kodur Railway Station, while its comparative proximity to Madras gives it some advantage over Rajampet in the distribution over the same area of rail-borne goods from the south of the State. A power-driven factory has been established for the cleaning of turmeric preparatory to its export to the north of India. Plantains, Cheeni, Limes, besides firewood, constitute the main export of the village. There is a church under the American Mission, which is maintaining a leprotorium at Krupapalle, which lies about a mile and a half south-east of Kodur. Kodur is a Class I Panchayat and there is a Zilla Parishad High School in this village.

Nandalur—is situated on the left bank of the Cheyyeru about six miles north of Rajampet. It is

a mile south-east of the railway station which lies in Nagireddipalle village. Its population is 7,742. A District Munsiff's court, travellers' bungalow, post office and some other offices are also situated in Nagireddipalle. There is a well established High School in this place.

The wet lands of Nandalur are irrigated by river channels from the Cheyyeru and by the Kannekala tank which is also river fed. The tank is rather unfavourably affected by the railway line but in good years it affords an excellent supply to its entire ayacut. "Kannekala cheruvu" means "the tank of the maidens", and tradition relates that seven virgins were sacrificed at the time of its construction to ensure that it would never breach.

The temple of Saumyanathaswami at Nandalur is of immense antiquity and was formerly held in great reverence. It contains on its walls and elsewhere no less than fifty four inscriptions dating from the 11th century, to Vijayanagar times, from which much information of historical value has been obtained.

Anantharajupet—with a population of 6,583 is situated two miles north-west of Kodur. It lies on the State Highway running from Cuddapah to Renigunta. There is a big choultry, though in a ruined condition. The village is noted for its fruit research station, and fruit preservation factory now converted into a "Regional Fruit Research Station for the South for Horticulture." The soils are fertile and suitable for raising gardens. Cheeni forms the chief export. Paddy is the chief crop while Ragi, Cumbu, Korra are also grown in this village. An Onion Research Station has been started here. An Hydro-Electric Sub-Station is also situated near this place.

Malemarpuram—with a population of 5,748 is situated 2 miles north-west of Chitvel and it lies on the banks of the Gunjana river. There is a tank adjoining the village having an ayacut of 312.02 acres. The main occupation of the villagers is Agriculture and therefore paddy constitutes the chief produce.

Pondalur—with a population of 5,259 is situated about 10 miles north-east of Rajampet and is connected by a metal road. This village is famous for its handloom goods manufactured at Chakrapunayunipet by the Padma Sales. There is a channel irrigation system in the village, and paddy is the chief crop. Mangoes are exported from this village. There are ancient temples of "Kailasanathaswamy" and "Varadarajaswamy".

Chinnaorampadu—with a population of 5,084 is situated north-east of the Orampadu Railway Station. The local tradition states that both Peddaorampadu and Chinnaorampadu situated on north and south respectively of the great Peddaorampadu tank were founded about two hundred years ago on the site of a town called Bukkapatnam which had been founded by the Vijayanagar Emperor, Bukka and subsequently destroyed by the Musalmans. The story is however not supported by history.

The tank is one of the largest in the taluk and is the source of irrigation in about half a dozen villages. It is fed by a hill stream from the Seshachalams called Pamuleru and the surplus water flows into the Pullangeru. Part of the bund is formed by a hillock. In the foreshore of the tank is a hamlet of fishermen called Bestapalle, all the inhabitants of which belong to the Besta caste of fishermen, and subsist solely on their hereditary occupation.

Peddaorampadu tank is the main source of irrigation and paddy is the main crop. Betelvines are raised and the betel leaf is exported on a large scale to Madras and Hyderabad. Plantains, cheeni and onions are also raised and exported. Fuel obtained from Gadela forest reserve area commands good export on a large scale from this place.

There is a Zilla Parishad Middle School in this village.

Pullampet—formerly the headquarters of the taluk, is situated about seven miles south-east of Rajampet. It has a railway station now. It has a population of 4,012 and contains a dilapidated travellers' bungalow, a Sub-Registrars' office, a Police Station and a flourishing High School. There is a choultry on the Madras road. A metalled road branches from the main road at Pullampet and passes over the low hills eastwards to Chitvel in the Gunjana valley. It crosses the Pullangeru close to Pullampet, which probably derives its name from this river.

The weavers of Pullampet have a reputation for excellent workmanship. They belong to the Sale caste, the most skilful weavers of the district. There are three sub-divisions of this caste in these parts

viz., the Padma Sales, the Pattu Sales and the Kanna Sales. One sub-caste does not take food from another and inter marriage is of course prohibited. The first two named wear the sacred thread. They are all non-vegetarians. Fine white turbans and white or coloured cloth-pieces are woven by the Sales of Pullampet, who specialise in the manufacture of gold and silver embroidery with which these are so often embellished. No better embroidery of the kind is made in the district.

ANNEXURE-A

GEOLOGY AND MINERAL RESOURCES OF CUDDAPAH DISTRICT

By

M.L. Jhanwar

Geological Survey of India

Geological History

In Cuddapah district the oldest rocks known are those of the Dharwars, a formation made up partly of basic igneous rocks and partly of highly altered sedimentary beds. By far the greater part of this ancient formation has been removed either by denudation or by absorption in the later invading magmas.

The next chapter in the history was the wide spread invasion on a very large scale of a granite magma known under the designation of the Peninsular gneisses. This granite seems to have attacked the Dharwar rocks from below through joint planes, fissures, bedding and foliation planes. Towards the end of the peninsular gneiss period, the remains of the Dharwars were still further crushed and foliated by strong earth movement, which at the same time foliated the surrounding peninsular granites. This was injected by some basic dykes followed by quartz veins.

After an immensely long exposure to the disintegrating forces of weathers, large portions of the land were submerged beneath the shallow seas of the Purana era and received their deposits. The Purana sediments form two groups—one the Cuddapah group and the other Kurnool group. The Cuddapahs were older and they were succeeded by rocks of the Kurnool group after time interval marked by earth movements and erosion. Lower Cuddapahs have been intruded by trap stills at many places. The Cuddapahs were folded and metamorphosed to some extent though the intensity of the forces at play was much feebler than that which acted at the close of the Dharwar era. Still much weaker forces acting after the deposition of Kurnool group have affected them to some extent.

Geological formations

Thus the geological formations met with in the descending order of their antiquity are as follows :-

Superficial deposits (Alluvium, gravels, soils etc.)	Recent & sub-recent
Kurnool group (Quartzites, shales & lime-stones)	Puranas
Cuddapah group (Quartzites, dolomites, shales or slates & traps)	Puranas
Crystallines (Gneisses, granites, traps etc.)	Archaeans
Dharwars-schists, quartzites	Archaeans

Two distinct rock areas

If Cuddapah district were to be denuded of the superficial deposits which so largely form the surfaces of its great plains and basins, it would be seen to be divisible into two well-marked areas of very different kinds of rocks. All that part of the country lying to the south and west of Guvvalacheruvu and Yerraguntlakota hill ranges with their extensions northwards to Parnapalle and south wards the Tirupati hills is made up of rocks of the gneissic series or as it is otherwise termed the metamorphic or crystalline series. The remainder of the district viz., that lying to the eastward of, and including, the hill ranges just mentioned, consists of a succession of quartzites (altered sandstones, etc.), shales or slates, dolomites or limestones and traps and their accompaniments, all of which have been classified into two groups called the Cuddapah and the Kurnool groups.

Archaean Group

The greater part of Rayachoti taluk is occupied by a complex group of gneisses and schists of Archaean age. They include both sedimentary and igneous materials which have been highly metamorphosed and invaded by various igneous intrusives. The Dharwar schists and amphibolites intruded by granite-gneiss are the oldest rocks found as small

inliers in this district. The gneiss is very granitoid, scarcely any foliation or stratification being visible even over wide extent of the country. This rock might in hand-specimens be considered a fine-grained granite, for it has the composition of that rock; but there is no evidence of its being intrusive or of its having altered other rocks in its vicinity. They are of grey and pink varieties.

Granite bodies

Of the intrusive rocks associated with the gneiss, the granite occurs mostly in two forms. The larger bodies are of very coarse texture, often largely crystallised, and generally consisting of a white binary granite of quartz and orthoclase, though often containing mica and sometimes common epidote (pistacite). This coarser granite is easily weathered or decomposed, as compared with the other rocks; and it is in great part owing to this that the harder gneiss traversed by it is often left standing out over the country in isolated masses. Besides the larger and more marked bodies, there are numerous other smaller ones often of great length but generally only a few inches in thickness and running in straight lines, of very coarse-grained white and pale flesh-coloured granite.

Trap dykes

The Dharwars and granites are traversed by a swarm of basic dykes, specially so in the Rayachoti country. These are of a very compact, nearly black or dark green greenstone or dolerite, which is occasionally porphyritic with large crystals of white or very pale green felspar distributed through the hornblende paste. Their direction is generally east-west, but some of them run north-south or nearly so; while their inclination is very nearly vertical, or at very high angles to east or west. They are often traceable for many miles, one to the eastward of Rayachoti being about 45 Km. long. The east and west dykes are not traceable so continuously, but some of them run for 32 Km. The east-west dykes appear to have been first formed; they were then broken and displaced to some extent by sideshifting during the filling in of the dykes of the north-south system.

Brecciated quartz reefs

The remaining rocks of any physical importance in the upland south of Guvvalacheruvu are the brecciated quartz rocks. These generally consist of amorphous quartz much seamed with oxide of iron, as also with strings of more compact silicious matter and they are mostly of dirty white colour. The rock looks as though it had been crushed and broken up and then re-cemented by silicious infiltration.

Cuddapah Group

The rocks of Cuddapah group are very well developed in the type area of Cuddapah district. They are divided into four series, as below :–

KURNOOL GROUP

—Unconformity—

CUDDAPAH GROUP		
	Kistna Series	Srisailam quartzites Kolamnala shales Irlakonda quartzites
	Nallamalai Series	Cumbum shales Bairenkonda quartzites
	Cheyair Series	Tadpatri (Pullampet) shales Pulivendla (Nagari) quartzites
	Papaghni Series	Vempalle dolomites and mudstones Gulcheru quartzites

—Unconformity—
Archaeans

The lower three series occur in full force in Cuddapah district whereas the upper most Kistna series is perhaps not represented.

Papaghni Series

The Gulcheru quartzite consists of conglomerates, quartzites, and sandstones with thin intercalation of shales. They are grey, red, buff and dirty white in colour. They are fine to coarse grained, sometimes flaggy and gritty. This formation is prominently exposed and attains its best development in the area between Guvvalacheruvu and the Papaghni river where they stand as steep cliffs over the undulating floor of gneiss, which to an ordinary observer looks like a fort wall. At the type locality near Guvvalacheruvu they attain a maximum width of 5 to 6 Km. and are as high as 60 metres. When continued westward and then towards north they dwindle both in width and height.

The Vempalle formation consisting of dolomites of different colour, mudstones and silicious strata lies conformably over the Gulcheru quartzite. They are well exposed from Guvvalacheruvu to Parnapalle and beyond. The dolomites and associated rocks of this formation are easily identified in the field by the generally barren and rugged nature of the land in which they crop out. The hills composed of these rocks have rounded tops and exhibit a contoured appearance on account of their differential weathering of the individual beds. They contain numerous desposits of Barytes and a few of chrysotile Asbestos, the latter being developed at the zone of contact with trap sills traversing the dolomites.

Faulting near Cuddapah

The Guvvalacheruvu hills between the Cuddapah and Guvvalacheruvu road and the Papaghni are rather curiously cut up and broken by a series of stepped faults running in a nearly east-west direction, by which a long patch of the crystalline rocks has been left inside the area of quartzites.

Cheyair Series

Commencing at the southern end of the district near the Balapalle bank and cutting the Madras-Bombay Railway and forming the Palakonda hills are very hard splintery, compact, variegated quartzite followed by shales. It is a series of great thickness consisting of two formations, the lowest being conglomerates and variegated quartzites with intercalated shale bands which are very well represented in the famous Tirupati hills and the summit of Nagari hills. On these quartzites lies the great shale (or slate) formation so well represented near Pullampet in Cheyair valley. There are also many bands of dolomitic limestone among these shales.

The Cheyair series is continued westward into Pulivendla taluk, but the character of the series is totally changed or at any rate much modified by the occurrences of great flows of trap and ash-beds of great thickness, while the bands of dolomitic limestones are less numerous and thinner than in the Cheyair valley. Here it consists of a lower Pulivendla quartzites and the upper Tadpatri shales.

Nallamalai Series

A further and higher set of quartzites overlies the Cheyair beds of the Pulivendla valley *viz.*, those of the Jammalamadugu hills, through which the grand gorge of Penneru at Gandikota has been cut. These belong to, and are the lowest beds of, the Nallamalai series, known as Bairenkonda quartzite being named after the hill of Bairenkonda in Kurnool district where these are exposed in full force. These belong to, and are the lowest beds of Nallamalai series, but their continuity with the greater mass in the Nallamalai series is hidden by the strata of Kurnool series in the Kundair valley. Towards east of it, they form Lankamalai hill ranges and eastern flanks of Palakonda hills.

The upper beds of this series are composed of shales or slaty shales known as Cumbum shales (after the town of Cumbum in Kurnool district where they occur in full force) with intercalated bands of dolomitic limestones and quartzites. In this district they cover a greater part of the Badvel and Sidhout taluks.

Kurnool Group

The Cuddapah group is followed by the Kurnool group comprising of four formations as shown below :-

Kundair formation	Nandyal shales Koilkuntla limestones
Paniam formation	Paniam Quartzites
Jammalamadugu formation	Auk shales Narji limestones
Banganapalle formation	Banganapalle sandstones

Cuddapah Town on Nandyal shales

The town of Cuddapah stands on a wide plain underneath the soil of which, and visible in most of the wells, are reddish-purple and chocolate coloured calcareous shales lying nearly horizontal or undulating slightly; these have been called Nandyal shales. They show all up the middle of Kundair valley and repose on, but graduate quickly down into, pale grey and dark limestone flags and thicker beds of limestone called the Koilkuntla limestones. The latter dip or rise up gently from under the purple shales to the south of Cuddapah and to the west of

the town in a narrow belt by Kamalapuram, Proddatur and so into the Koilkuntla taluk of the Kurnool district, whence they are named.

Underneath the Koilkuntla limestones are sandstones or quartzites known as Paniam quartzites, after the town of that name. These do not occur in any importance in this district. Again still further underneath is a thin band of white, pale yellow and buff non-calcareous shales, traces of which show near the railway line about 12.8 Km. north-west of Cuddapah. These are underlaid by a set of beds in the Cuddapah district, called the Narji limestones, which are quarried to a great extent near Yerraguntla and Narji and sold under the name of 'Cuddapah Slabs'.

The Narji beds are typically very compact, cryptocrystalline, and extremely fine grained. They are generally of grey colour with a blue shade, sometimes nearly black, and occasionally of light yellowish or greenish grey, or pale buff and fawn colours. These strata crop up on either side of the Cuddapah basin and its extension northwards. They are well exposed in the taluks of Jammalamadugu, Proddatur and Cuddapah.

The lowest formation of Kurnool group i. e., Banganapalle sandstones which is well known for its lower diamondiferrous conglomerate beds are not represented in this district.

Recent deposits

The special superficial deposits worthy of notice, leaving out the usual sandy soils of red or brown colours which are mainly derived from the disintegration of the adjacent rocks by atmospheric agency, are the gravels and alluvial deposits of the proper plains of the district, the cotton soil, and to a small extent the blown sands. The alluvial deposits are mainly of two kinds-a hard calcareous clayey drift with bands of heavy conglomerate and shingle, and a set of softer, somewhat sandy loams. Stone implements have been found lying among the much more recent sandy soils, a short distance to the east of Rayachoti. The upper alluvial deposits occupy a large part of the middle of the Kundair valley and nearly the whole of the Cuddapah plain, but they are every now and then covered up by extensive patches of cotton soil, particularly in the wide valley, west and north of Pulivendla. The heavier clays and gravels only show on the east side of the Kundair valley. The diamond mines of Chennur were worked in some gravel banks of these deposits. Blown sands are only exceptionally accumulated in the district, and mainly along the bank of the Penneru.

Structure

The lie of Cuddapah rocks until they get close to the Nallamalai is tolerably easy, that is, they are dipping gently to the north-east as the edging beds of a great bay or gulf. In the Palakonda hill range and southwards all along the eastern side of the Cheyair valley considerable crushing, folding and breaking of the strata have been superinduced and have in great measure helped to elevate the varied strata in the great mountain mass, with its flanking valleys and ridges carved out by the great denuding forces which were afterwards brought to bear upon this part of the surface of the Indian Peninsula.

Mineral riches

The district is fairly important from the point of mineral resources, such as Asbestos, Barytes, iron ore *etc.*, which are mined economically. It is well endowed with regard to building material and road metal, in that it has extensive outcrops of gneiss, quartzite, dolomite and limestone.

Asbestos

This area was investigated in 1941 by Geological Survey of India, with the help of the drill supplied by the Government of Madras. The detailed survey of the Asbestos belt was undertaken by the Geological Survey of India during the field season 1961-62. About 50 Sq. Km. have been regionally mapped on 1:15,840 scale. About 4.5 Sq.Km. have been mapped on 1:2400 scale using plane table and telescopic alidade. This covers the Chinnakudala and Ippatla areas of the

Asbestos belt. Underground mapping of Reddi Mines—the only working mine for asbestos has been completed. The detailed survey will be continued during the ensuing session.

Asbestos of the chrysotile variety is found in serpentine developed at the contact of a trap sill with the Vempalle dolomite in several places in this district. Some veins occur also in the trap itself at the contact. The serpentine zone may be a few metres thick but the asbestos is confined to a width of 0. 6 to 1 metre from contact. The asbestos is of cross fibre type including much brittle variety. The veins range in thickness from a fraction of a cm. to as much as 18 cm. the average being 1.3 cm. The veins behave capriciously as regards thickness and continuity and are rarely uniform for more than 10–12 metres. The undisturbed vein material is nearly white, pale green or pale yellow and occasionally translucent.

The best developed zone is in the 11 Km. belt stretching from near Lingala to Brahmanapalle, a little to the west of Pulivendla. The reserves estimated in the Brahmanapalle and Chinna Kundala areas, in this belt, for a total length of 4.8Km. of asbestos-bearing serpentine zone along the strike and 200 metres along the dip is of the order of 250,000 tons of good chrysotile of all grades.

Short workable zones are found near Lopatanutula, near Tallapalle-Velamvaripalle, N. N. W. and N. of Vempalle near Errapalle and on the eastern side of hillock .964 about 1200 metres W. S. W. of Rajupalem.

Barytes

Almost all the Barytes deposits of the Ceded districts occur either as fillings in fault fissures or as replacement veins in the Vempalle dolomites or in associated traps, the largest deposit in the Cuddapah district occuring in and adjacent to the traps. Over 90 per cent of Barytes is off-coloured. Barytes may be associated with quartz but rarely with calcite. Some of the important occurrences are described here.

Kottapalle- About 25 Km. south of this village there are several pits for barytes over a distance of 4 Km. along a faulted zone. These are the most important deposits of which the estimated reserves are of the order of a quarter million tons upto a depth of 30 metres.

Vemula-About 2.5 Km. S. S. W. of this village a series of Barytes pits has been put down at the contact of the trap Pulivendla quartzite, is a faulted one. The mineral here is of fair quality and reserves estimated are of the order of 140,000 tons upto a depth of 30 metres.

Velpula-About 600 metres N. 70° W. of Velpula a series of pits for extracting Barytes is found in patta land. One of these pits has been worked upto 15 metres. The average thickness of the veins is about 0.6 metre. They are highly irregular but the Barytes is of fair quality. The estimated reserves are of the order of 24,600 tons upto a depth of 30 metres.

Ippatla-About a mile west of Ippatla Barytes is being worked where the veins are 1 to 1.5 metres thick. The Barytes is of pink colour and may yield about 35,000 tons upto a depth of 30 metres.

The other important occurrences are near Mittamidapalle, Rajupalem, Cheemalapenta, Kotturu, Nandipalle, Tallepalle, Chinnakundala, Ellamvaripalle, Lopatanutula, Bestavaripalle, Karnapapayapalle and Nerijampalle. Some of the abandoned workings are noticed near Vempalle, Maddimadugu, Bakkanagaripalle, Polatala, Tummuluru, Uppalapalle, and Parnapalle.

Clay

Hastavaram-White clays have been worked at the south-eastern foot of the hillocks west of Hastavaram. They have been derived from the alteration of the shales of the Cheyair Series. The reserves in an area of 460 × 90 metres and 9 metres depth are 900,000 tons capable of yielding 66 per cent refined clay on washing.

Kodur-Light and dark grey clays are seen in the Mushtiyeru (river) 9 Km.

S.W. of Kodur, for a distance of 160 metres. The reserves to a depth of 6 metres are about 100,000 tons (86,000 tons by N. V. B. S. Dutt).

Anantarajupeta-Weathered buff and purplish shales are seen in a stream 1.2 and 2.8 Km. north-east of this village. The amount available in the two localities are respectively 5,000 tons and 72,000 tons of good clay. Some pockets of white clay occur in these. (744,000 tons by N. V. B. S. Dutt).

Nandalur-Nearly 3.2 Km. W. N. W. of Paturu is a deposit of white clay in a small valley surrounded by flaggy shales. To the south and south-west of the white clay are exposed buff shaly clays. The reserves of white clay here are estimated at 80,000 tons and buff clay at 55,000 tons.

Chinnaorampadu- Weathered grey and purple shales are seen between here and Ungareddipalle and also south of Gadela. The reserves of clay here are estimated at 160,475 tons. (144,000 tons by N. V. B. S. Dutt).

Rampatadu-Somewhat calcareous white clays are seen 200 metres west of this place in stream sections. They are about 2 metres thick under the soil cover. The amount of clay available would be 160,000 tons in the area.

Bhakrapeta-White to purplish shaly clays are seen 5 Km. W.S.W. of Bhakrapeta in a valley 400 metres south of a well called Kadikona bhavi. The reserves here would be 112,000 tons.

The other occurrences with small reserves are near Chitvel, Obali, (33,000 tons) Pullampet, Tallapaka, and Porumamilla.

Most of the clays in Cuddapah are fairly plastic and are refractory or show incipient fusion at 1250° C. They can be used for making stone-wares, tiles, sewer pipes, hollow blocks, etc.,

Diamond

Diamonds have been worked for and found only in one part of the district at or in the neighbourhood of Chennur on the right bank of the Penneru, about eleven or twelve Km. north of Cuddapah. The diamonds were obtained from a hard gravelly deposit at a depth of a few metres below prevalent black soil, the gravel being largely of chert, jasper and quartz pebbles. It is said to have been a fairly rich field but re-working in the 1830's did not seem to have been profitable.

The other localities are Bayanapalle, Gurapur near Chennur, and Lamdur and Pinchetgapadu to the west of Chennur are mentioned by Heyne and Newbold.

An attempt was made in 1869 to work the mines near Chennur but did not prove successful, though there is a tradition mentioned by King that two stones, eventually sold for £5,000 and £3,000 respectively had come from this field.

Kanuparti or Kondapeta (Bayanapalle) lies on the left bank of the Penneru river opposite to Chennur. The mines were visited at the close of the eighteenth century by Heyne and again about the year 1840 by Newbold. The excavations cover an area of more than 2.6 Sq.Km. In former times, large stones are said to have been found here but in recent years, except in 1934, the operations had not been profitable.

The mines of Olavampalle or Woblapalli (Dorlampalle) mentioned by Heyne, Voysey and Newbold are close to Kanuparti and are of the same description. Newbold mentions a diamond, sold for Rs. 1,450 which was found here in 1839.

Iron

Chabali- Iron ore in the form of haematite occurs in an area of about 2.6 Sq. Km. about 1.5 Km. south of Chabali. On an average it contains 62.82 per cent of iron with negligible traces of sulphur and titanium. The silica is also low (less than 10%) and phosphorous 0.066%. A rough estimate of the reserves is a little over 40,000 tons.

Iron ore (very small extent) also occurs near Pagadalapalle, Pendlimarri, Mantapampalle and Erraguntlakota.

Lead

Zangamrajupalle-The best known old workings for lead are 4 Km. S.W. of the village while others are found at the end of a low ridge N.N.E. of the village. The country rock is a dolomitic limestone associated with slaty rocks, these being traversed by blue and white quartz veins, the former containing disseminations of galena. Though little or no ore is seen at the surface at present the veins may contain ore at some depth.

Nagasanipalle-Some old excavations for lead are noticed on the hill slopes 4 Km. S.E. of the village. The surface indications in the area are very poor.

Building material

The district is well endowed in building material in that it has extensive outcrops of quartzite, dolomite and limestone. Narji limestone popularly known as 'Cuddapah slabs' is extensively quarried at Narji about 38 Km. west north-west of Cuddapah. The Vempalle dolomite formation extends from near Cuddapah through Vempalle, Pulivendla to Parnapalle and is well suited for building purpose. Quartzites belonging to various formations occur extensively in the area.

In the Rayachoti taluk the prevalent rock is a variety of gneiss and is used for building purposes in this part.

Red and Yellow Ochre

Iron stone and red oxide associated with ochre are found 2.5 Km. north of Mantapampalle and also 5 Km. to the South and S.S.W. of Erraguntlakota. The material appears to be suitable for the manufacture of paints.

Yellow ochre occurs in small seams and pockets in Vempalle limestones and shales 3.2 Km. to the north-east of Nandimandalam and also east of Uppalapalle. Some fairly large pockets are seen also 3 Km. south-east of Mittamidapalle. From here about a couple of hundred tons of good yellow ochre seem to have been exported before 1942. Several hundred tons more were still available at that time. (Records Geological Survey of India, Vol. 79, Page 326).

Steatite

A deposit of steatite is found at a distance of about 1,200 metres E. S. E. of Parnapalle as an alteration product of dolomite. The deposit appears to be promising. Low grade steatite deposits occur, also as an alteration product of dolomite, about 1.6 Km. south of Lingala. Recently the reserves here have been estimated to the order of 7,500 tons upto 6 metres along dip by Geological Survey of India. This steatite is locally used in the manufacture of slate pencils.

Hastavaram: The data of reserves already given are 900,000 tons. These are capable of yielding 66% refined clay on washing which comes to 600,000 tons and this agrees with the data given by N. V. B. S. Dutt. The minor differences in the data for other places are also due to similar reasons.

Anantarajupeta: The data for reserves given by Jhanwar *viz.*, 72,000 tons is correct as verified from original report. The data given by N. V. B. S. Dutt *viz.*, 744,000 appears to be due to printing error.

References

The earliest reference to the geology of this district is by W. King, entitled "Kaddapah and Kurnool formations" published in Memoirs of the Geological Survey of India, Vol. VIII, 1872. The Barytes and Asbestos deposits of the district were studied in detail by A. L. Coulson and his account was published in Memoirs of the Geological Survey of India, LXIV Part I (1933) and part II (1934). These deposits were re-examined by M. S. Krishnan and M. S. Venkatram in 1941-42 whose observations are recorded in the bulletin of the Geological Survey of India Series, A-Economic Geology, No. 5-Asbestos and Barytes in Pulivendla taluk, Cuddapah

district (1953). Since then most of the area has been mapped on modern topographic sheets on 1" to 1 mile scale, the account of which remains in the various unpublished progress reports of the Geological Survey of India. Details of mineral resources by M. S. Krishnan entitled "Mineral Resources of Madras" have been published in Memoirs of the Geological Survey of India, Vol. 80 (1951).

2 Agricultural Extension Scheme . . .	..	..	..	..	..	..	..	..	..	..
3 Experiments in double and triple cropping . .	..	..	..	..	..	..	..	..	..	..

Note :—The Rice Research Station, Kamalapuram was started in November 1956 and crops were actually raised from 1957 onwards

TABLE 2.13—GOVERNMENT EXPERIMENTAL FARMS

Sl. No.	Name of Farm	Location and distance from Railway Station	Year of Establishment	Whether Research, Multiplication or Demonstration Farm	Management *i.e.*, State, University or Private	Annual Rainfall	Type of soil	Programme of Research
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
			CUDDAPAH DISTRICT					
1	Fruit Research Station, Anantharajupet	Anantharajupet, 3 1/2 miles from Kodur Railway Station	1935	Research and multiplication farm	State Government	R. F. 36 inches	Red to grey loamy soils	Research on citrus, mango, guava, sapota and other miscellaneous fruits of tropical variety, production and supply of pedigree plants and seeds etc.
2	Onion Research Station, Anantharajupet	Anantharajupet, 3 1/2 miles from Kodur Railway Station	1957	Research	State Government	R. F. 36 inches	Red to grey loamy soils	Research on onions to find out the most suitable varieties to the tract and the most profitable methods of cultivation and storage.
3	New Root Stock Trial Fruit Research Station, Kodur	Kodur, 1 1/2 miles from Kodur Railway Station	1951	Research	State Government	R. F. 36 inches	Red to grey loamy soils	Research on citrus, mango, grape etc. (Particularly on root stocks for sathgudi, acid lime and lemon).
4	Betel Leaves Research Station, Utkur	Utkur, 3 miles from Cuddapah Railway Station	1959	Research	Partly by State Government and partly by I.C.A.R.	R. F. 27.2 inches	Red loamy soils	1. Varietal collection plot 2. Manurial trials 3. Irrigation trials (summer, winter and rainy) 4. Propping trials 5. Control of pests and diseases.
5	Oil Seeds Extension Farm, Proddatur	Proddatur	1958-59	Multiplication farm	Partly by State Government and partly by I.C.O.C.	R. F. 25.90 inches	Light black soils	Increasing the production of oil seeds by multiplication and distribution of improved strains.
6	Rice Research Station, Kamalapuram	Kamalapuram, 1 1/2 miles from Kamalapuram Railway Station	1956	Research	Partly by State Government and partly by I.C.A.R.	R. F. 618 m.m.	Clay loamy with sandy layers	1. Collection of the improved strains of department and also local varieties of paddy that are cultivated in the districts of Cuddapah, Chittoor, Anantapur and parts of Kurnool. 2. Study of the above strains and also local varieties for their adoptability to the tract and to isolate promising and higher yielding strains for local varieties. 3. Comparative yield trials of the improved strains, local varieties and other single plants, progressively based on their performance in the previous season.

TABLE 5.13—LIST OF COLLECTORS THAT WORKED IN CUDDAPAH DISTRICT FROM 1800

Name (1)	Date of taking charge (2)
Lieut. Col. Thomas Munro	November, 1800
W. Chaplin	November, 1807
G. Gregory	May, 1809
C. R. Ross	January, 1810
A. E. R. Macdonell	July, 1816
J. Hanbury	April, 1817
J. W. Russell	April, 1824
G. M. Ogilvie	March, 1827
C. Harris	September, 1827
W. G Mason	February, 1828
J. A. Dalzell	March, 1828
A Freese	December, 1830
H. Lacon	January, 1831
A. P. Onslow	January, 1835
G. J. Casamaijor	October, 1835
J D. Gleig	April, 1836
T. L. Blanc	March, 1837
J. D. Gleig	July, 1837
J. Orr	January, 1838
T. L. Blanc	June, 1838
W. Lavie	November, 1839
C. H Hallett	February, 1841
W. Ashton	July, 1841
W. U. Arbuthnot	March, 1842
W. Ashton	November, 1843
W. A. D. Inglis	July, 1844
J. H. Cochrane	February, 1845
M. Murray	November, 1850
H. Forbes	July, 1851
M. Murray	January, 1852
J. Fraser	April, 1859
A. Wedderburn	March, 1860
J. R. Cockerell	August, 1863
H. G. Smith	November, 1865
F. B. Molony	February, 1868
G. Vans Agnew	November, 1868
C. G. Master	September, 1870
W. D. Horsley	June, 1871
J. R. Daniel	July, 1876
J. D. B. Gribble	March, 1876
J. F. Price	January, 1877
J. D. B. Gribble	November, 1878
S. T. McCarthy	September, 1879
A. J. B. Atkinson	April, 1881
L. R. Burrows	July, 1881
C. A. Bird	October, 1883
W. J. H. Lefanu	December, 1885
G. Stokes	May, 1886
J. H. Tremenheere	December, 1887
E. J. Sewell	April, 1888
F. D. A. O Wolfe-Murray	March, 1891
J. W. F. Dumergue	July, 1892
J. N. Atkinson	September, 1892
F. D. A. O. Wolfe-Murray	October, 1892
C. H. Mounsey	January, 1893
J. Hewetson	December, 1893
J. H. Munro	September, 1895
A. C. Tate	September, 1895
A. T. Forbes	October, 1895
A. C. Tate	January, 1897
E. L. Vaughan	January, 1898
E. L. R. Thornton	May, 1898
H.O.D. Harding	June, 1898
R.V. Srinivasa Ayyar	June, 1900
H.O.D. Harding	August, 1900
J.H. Robertson	October, 1901
B. Macleod	February, 1902
F.A. Coleridge	July, 1904
B. Macleod	August, 1904
E.L. Vaughan	February, 1905
J. J. Cotton	February, 1907
E.L. Vaughan	February, 1908
J.G. Burn	April
J.G.D. Partridge	July
R.A. Jenkins	May, 1910
P.S.P. Rice	July. 1910
R.A. Jenkins	November, 1910
J.G.D. Partridge	January, 1911
E.A. Davis	April, 1912
J.F. Bryant	November, 1912
E.A. Davis	March, 1914
T.E. Moir	September, 1914
A.R. Banerjee	January, 1915
C.B. Cotterell	April, 1916
P.C. Dutt	May, 1916
E. Packenham Walsh	January, 1918
H.H. Burkitt	April, 1918
H.G. Gharpurey	May, 1918
A. Upendra Pai	April, 1921
R. F. B. L. Guppy	October, 1923
A. Galletti	November, 1923
Bazl-ul-lah Sahib Bahadur	May, 1924
A. Panchapakesa Ayyar	August, 1925
P. C. Dutt	September, 1925
P. Sitaramayya	March, 1926
P.T. Srinivasa Acharya	August, 1927
K. C. Manavedan Rajah	February 1928
A. G. Blake	November, 1931
E. E. Gosbald	January, 1932
J. Hussain	November, 1932
M. Narasimha Panthulu Garu	March, 1934
K. C Manavedan Rajah	June, 1935
V. S. Hejmadi	May, 1936
T. Siva Sankar	April, 1939
V. V. Subramanyam	February, 1941
K. Srinivasan	February, 1941
W. W. Georgeson	April, 1941
S. Ranganathan	May, 1941
N. Raghavendra Rao	May, 1943
W. H. Mitchell	October, 1943
S. K. Chettur	February, 1944
M. R. Bangara	February, 1945
R. M. Seshadri	June, 1945
T. S. Ramachandran	October, 1946
Ismail Saheb	February, 1947
R S. Malayappan	August, 1947
W. H. Mitchell	November, 1947
T. Prabhakar Rao Naidu	March, 1948
B. Madhava Rao Naidu	August, 1948
C Vivekananda Moorthy	2nd November, 1950
N. S. Quraishi	February, 1951
C. Vivekananda Moorthy	August, 1951
P. C. James	19th April, 1952
A. Krishnaswamy	5th December, 1953
H. Samba Moorthi	4th September, 1954
B. R. K. Sastry	22nd February, 1956
Syed Ahmad	8th October, 1956
A. Ramachandra Reddi	7th January, 1958
P. L. Sivaram	30th July, 1959
M. Gopalakrishnan	7th April, 1961

TABLE 5.14—LIST OF JUDGES WHO PRESIDED OVER THE CIVIL OR DISTRICT AND SESSIONS COURT OF CUDDAPAH

Name (1)	Date of taking charge (2)
John Henry Peile	14th May, 1806
Thomas Newnham	1st September, 1809
Septimus Money	30th November, 1821
Edward H. Woodcock	9th March, 1824
James Haig	27th July, 1824
George Jenkins Waters	18th April, 1825
James Haig	11th January, 1826
Peter Henry Strombom	18th March, 1832
Edward Binney Glass	3rd May, 1836
Anthony Edward Angelo	2nd August, 1836
John Paternoster	18th August, 1837
Peter Henry Strombom	21st August, 1838
Edward Newbury	26th April, 1839
George Jenkins Waters	13th September, 1839
John Walker	1st October, 1839
William Arthur David Inglis	25th February, 1842
William Lavie	25th June, 1844
William Arthur David Inglis	21st January, 1845
Mackenzie Murray	9th October, 1846
Thomas Onslow	17th December, 1847
Edward Maltby	28th February, 1848
William Elliot	1st May, 1849
Samuel Nevil Ward	26th November, 1850
William Elliot	31st July, 1851
John Ratliff	29th July, 1859
Robert Davidson	26th February, 1861
Frederick Samuel Child	16th June, 1862
Edward Croft Greenway Thomas	18th September, 1865
Thomas Alexander Nicholas Chase	28th February, 1866
William Dowdeswell Horsley	18th June, 1866
John Ratliff	10th August, 1866
William Dowdeswell Horsley	11th October, 1866
William Hodgson	31st March, 1868
William Dowdeswell Horsley	13th August, 1868
Arthur Coke Burnell	18th October, 1870
Philip Percival Hutchins	25th June, 1871
Hantly Pryse Gordon	21st June, 1872
James William Best	13th January, 1873
Edmund Foster Webster	18th March, 1873
Francis Raidon Hastings Sharp	13th February, 1874
Hantly Pryse Gordon	21st December, 1875
Alexander Cruickshank	11th February, 1876
James Henry Nelson	15th July, 1876
Samuel Trant Mccarthy	10th July, 1878
James Henry Nelson	12th April, 1879
John Wallace	23rd June, 1879
James Henry Nelson	22nd November, 1879
Joseph Charles Hughesdon	6th April, 1880
William Francis Grahame	21st June, 1880
Charles Augustus Bird	17th September, 1880
John Wallace	19th October, 1880
James Dunning Baker Gribble	11th June, 1883
William Francis Grahame	7th August, 1884
Charles Herbert Mounsey	30th March, 1886
Charles Lennox Bruce Cumming	April, 1886
William Jacob Tate	1st November, 1886
Lewis Moore	9th December, 1886
Arthur Frederick Cox	11th June, 1887
Robert Sewell	7th November, 1887
William Henry Welsh	3rd September, 1888
Walter Miller Thorburn	1st February, 1889
Henry Richard Farmer	22nd August, 1889
Hugh Gore Joseph	1st August, 1890
Walter Miller Thorburn	6th January, 1891
Charles James Weir	12th November, 1892
Walter Miller Thorburn	13th December, 1892
M.D. Bell	20th May, 1893
W.H Welsh	16th January, 1894
W.G. Underwood	13th December, 1894
S. Gopala Achariyar	10th August, 1897

TABLE SERIES 6—PUBLIC HEALTH

TABLE 6.1—LIST OF MEDICAL AND PUBLIC HEALTH INSTITUTIONS

Name of Hospital/ Dispensary	Name of Town/ Village where located	No. of sanctioned beds
(1)	(2)	(3)
1 CUDDAPAH TALUK		
Government Headquarters Hospital	Cuddapah	250
Primary Health Centre	Khajipet Sunkesula	..
Rural Dispensary	Chennur	..
do	Valluru	..
do	Nandimandalam	..
do	Vellatur	..
do	Paidikalva	..
do	Chintakommadinne	..
2 RAYACHOTI TALUK		
Government Hospital	Rayachoti	12
Primary Health Centre	Surabhu	..
do	Devapatla	..
Rural Dispensary	Chinnamandem	..
do	Galiveedu	..
do	Lakkireddipalle	..
do	Chekrayapeta	..
do	Nuliveedu	..
do	Tsundupalle	..
do	Veeraballe	..
do	Hasanapuram	..
3 PULIVENDLA TALUK		
Government Dispensary	Pulivendla	4
Mission Hospital	Simhadripuram	N.A.
Primary Health Centre	Bidinamcherla	..
Local Fund Dispensary	Vempalle	..
Rural Dispensary	Koraguntlapalle	..
do	Chandragiri	..
do	Lingala	..
do	Thonduru	..
do	Vemula	..
4 KAMALAPURAM INDEPENDENT SUB-TALUK		
Government Dispensary	Kamalapuram	4
Primary Health Centre	Payasampalle	..
Local Fund Dispensary	Yerraguntla	..
Rural Dispensary	Gangireddipalle	..
do	Pandillapalle	..
5 JAMMALAMADUGU TALUK		
Government Dispensary	Jammalamadugu	4
Mission Hospital	Jammalamadugu	100
Primary Health Centre	Kondapuram	6
do	Vaddirala	..
Local Fund Dispensary	Muddanur	..
Rural Dispensary	Thallaproddatur	..
do	Peddamudiam	..
do	N. Kottalapalle	..
do	Gundlakunta	..
6 PRODDATUR TALUK		
Government Hospital	Proddatur	17
Primary Health Centre	Kalluru	6
do	Duvvur	..
Local Fund Dispensary	Onipenta	..
Rural Dispensary	Mydukur	..
do	Chiyyapadu	...
do	Arakatavemula	..
7 BADVEL TALUK		
Government Hospital	Badvel	22
Mission Hospital	Porumamilla	N.A.
Primary Health Centre	Kodur	..
do	Narasapuram	..
Rural Dispensary	Porumamilla	..
do	Kalsapadu	..
do	Kodigundlapadu	..
do	Tekurpet	..
do	Palugurlapalle	..
8 SIDHOUT TALUK		
Government Dispensary	Sidhout	4
Primary Health Centre	Madhavaram	..
Rural Dispensary	Yellampet	..
do	Vontimitta	..
do	Kothur	..
do	Mantapampalle	..
do	Kamalakur	..
do	Kondur	..

TABLE SERIES 12—IMPORTANT HISTORICAL EVENTS

TABLE 12.1—CALENDAR OF OUTSTANDING OCCURRENCES

(Historical and Religious Events)

Month and Year	Nature of occurrence
(1)	(2)

Section I—Commonly known throughout the district

1857	The Great Indian Mutiny
1858	Proclamation of Queen Victoria
1865	Disastrous tidal wave of Masulipatnam
1876—77	Great famine (Dathu Karuvu)
1887	Diamond Jubilee of Queen Victoria's Reign
1891	First Census
1901	Second Census
1902	Death of Queen Victoria Coronation of Edward-VII
1910	Heley's comet Death of Edward-VII
1911	Delhi Coronation of King George-V Third Census
August, 1914	First World War
22 September, 1914	Shelling of Madras by German War-ship "Emden".
1918	Great fever
11 November, 1918	Armistice
13 April, 1919	Massacre of Jaliyanwala Bagh
1920	Civil disobedience movement
1921	No Tax campaign Moplah rebellion Census
5 February, 1922	Chowri Chowra Riotings - Mass Civil disobedience movement by Gandhiji in consequence
1924	Floods in River Cauvery in South India
1928—29	Visit of Simon Commission and its boycott
1930	Dandi Salt Satyagraha - march by Gandhiji
1931	Census
4 March, 1931	Gandhi-Irwin's pact
1932	Gandhiji's fast and Poona Pact
September, 1932	Non-Co-operation Movement
15 January, 1934	Bihar Earth Quake
31 May, 1935	Quetta Earth Quake
1935	Silver Jubilee of King George-V
1936	Death of King George-V
1 April, 1937	Formation of interim Ministry by Sri K. V. Reddy Naidu at Madras
14 July, 1937	Formation of first Congress Ministry by Sri C. Rajagopalachari
3 September, 1939	Beginning of Second World War
October, 1939	Resignation of Congress Ministry
1941	Census
6 April, 1942	Bombing of Visakhapatnam Port by the Japanese
August, 1942	Quit India Movement and its disturbances
October, 1943	Japanese Bombing of Madras
1945	End of Second World War
1946	General Elections to Legislative Assembly Formation of Congress Ministry at Centre Second Congress Ministry at Madras
15 August, 1947	Independence day
December, 1947	N. G. G.O's strike
30 January, 1948	Death of Mahatma Gandhi
September, 1948	Police Action on Hyderabad State
1951	Famine
1952	General Elections Starting of Famine relief works and gruel centres
1 October, 1953	Formation of Andhra State with Kurnool as its capital
December, 1954	Resignation of Shri Prakasam's Ministry and advent of Governor's Rule
March, 1955	General Elections in Andhra
1 November, 1956	Formation of Andhra Pradesh State with Hyderabad as its capital

Section II—Commonly known in Particular Taluks

CUDDAPAH TALUK

November, 1903	Floods in Cuddapah Town
1937	General Elections
17 October, 1956	Floods in Bugga Vanka
17 October, 1958	Unprecedented rainfall and floods in Cuddapah Town
12 August, 1959	Hunger strike by Bathala Ramadoss

RAYACHOTI TALUK

1914	Construction of Lakkireddipalle Deputy Tahsildar's Office
1931	Abolition of Sub-Divisional Magistrate's Court at Rayachoti
1937	General Elections
1951–52	Famine

PULIVENDLA TALUK

1931	Murder of four persons at Musalreddipalle and life imprisonment for fourteen persons
1934	Famine dry remission
1937	General Elections

KAMALAPURAM INDEPENDENT SUB-TALUK

1951	Famine
1952	Opening of relief works and gruel centres

JAMMALAMADUGU TALUK

1902	Railway accident at Mangapatnam
1937	General Elections
1951	Famine
1952	Opening of famine relief works and gruel centres
7 October, 1958	Unprecedented rainfall

PRODDATUR TALUK

1924	Moharrum disturbances
1937	General Elections

BADVEL TALUK

1951	Famine
1952	Starting of Lower Sagileru Project Opening of gruel centres
1959	Completion of Lower Sagileru Project

SIDHOUT TALUK

1951	Famine
1952	Opening of famine relief works and gruel centres
1954	Completion of causeway on river Penneru

PART II

A - SERIES

GENERAL POPULATION TABLES

CUDDAPAH DISTRICT

(TALUKWISE DENSITY OF POPULATION)

G. P. RANGAM

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad

TABLE A-I

AREA, HOUSES AND POPULATION

This table, the basic population table, shows for the Total, Rural and Urban portions of each taluk as well as for the district and for each town in the taluk, area in Sq. miles as well as in Sq. Kilometres, persons per Sq.mile, number of villages inhabited and uninhabited, number of towns, number of Occupied Residential Houses and Population by persons males and females. The figures have been given separately one below the other under Total, Rural and Urban. In this table as in all other tables, the taluks have been arranged in the order of the Location Code Numbers adopted at the 1961 Census and not in an alphabetical order. The district of Cuddapah has been allotted district Location Code No. 9 and all nine taluks in the district have been numbered off continuously in a clock-wise order starting from the headquarters taluk where the district headquarters is situated *i.e.*, from Cuddapah Taluk as indicated below.

Name of the taluk	*Location Code Number*
Cuddapah	... 1
Rayachoti	... 2
Pulivendla	... 3
Kamalapuram Independent Sub-Taluk	... 4
Jammalamadugu	... 5
Proddatur	... 6
Badvel	... 7
Sidhout	... 8
Rajampet	... 9

2. The Urban units (Towns) in each taluk have been allotted code numbers in Roman figures in a separate series. The taluk headquarters town, if it is recognised as a town for the purpose of 1961 Census, is allotted No. I and the remaining towns, if any, in the taluk numbered in a clock-wise order.

3. One of the main changes in presentation of this table since the last Census is that the particulars of each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages in each taluk.

4. The district area shown against (x) in column 3(a) in brackets is that supplied by the Surveyor-General of India. Area figures furnished for the district and the taluks by the State Central Survey Office, Hyderabad and the area of each town furnished by the local authorities concerned have been shown under column 3 (a). The Urban area of each taluk has been worked out by adding the areas of all the Urban units in the taluk and the Rural area of the taluk is obtained by deducting the Urban area of the taluk from the total area of the taluk.

The area in Sq. kilometres under column 3 (b) is obtained by converting the area given under column 3 (a). The area figures for district Total/Rural/Urban, taluk Total/Rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total the converted Total/Rural/Urban area figures of the taluks have been either added or chopped off on prorata basis according to area ratios of the taluks. The area of each town both in Sq. miles under column 3 (a) and in Sq. kilometres under column 3 (b) have been given upto second decimal place while the Total/Rural/Urban area of the taluks as well as of the district has been given only upto first decimal place.

The total area of the district as furnished by the State Central Survey Office shown under column 3 (a) differs from the area of the district furnished by the Surveyor General of India due to the difference in the methods of computation.

5. The density of persons per Sq. mile for the district and for each of the taluks and towns has been worked out according to the area given under column 3 (a).

6. "Village" referred to in this table and in all other tables in this book is the Revenue administrative unit within the defined boundaries. Village having one or more groups of habitations is treated as an inhabited village and village with no habitations is treated as uninhabited village. The number of inhabited and uninhabited villages in each taluk and in the district is shown under columns 5 and 6 of this table. In computing the number of villages in a taluk

the villages which are either completely included in an Urban unit (town) or hamlets to a main Revenue village, are not taken into account. All the Revenue villages within the taluk are demarcated and numbered off continuously from North-East. The number so assigned to each village is the 1961 Census Location Code Number, distinct from Revenue Survey Number and will be referred to hereafter as Location Code Number.

7. "Town" is a place of usually not less than 5,000 inhabitants possessing distinct Urban characterristics and should satisfy certain criteria prescribed.

For recognition of any place as a town at the present Census it should be either covered by a City Corporation, Municipality or a Cantonment Board or it should generally satisfy the following criteria:

(i) It should have a minimum population of 5,000;

(ii) The density of population should not be less than 1,000 per square mile; and

(iii) At least 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each taluk and in the district is given under column 7 of this table.

8. "House" is defined, for purpose of 1961 Census, as a structure or part of a structure, a dwelling, a shop, work-shop or factory, place of business, a shop-*cum*-dwelling giving on the road or a common stair-case or a common court-yard leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such residential houses in the town/taluk/district have been given in column 8. Houses utilised wholly for purposes other than for residence are not therefore taken into account in this table.

9. The total population, by persons, males and females for the district as well as for each taluk and town have been given separately under columns 9, 10 and 11 in this table.

10. Besides the main table there are also three Appendices to this table.

In Appendix I to this table the growth of the district to the present area since the last Census is traced by giving the territorial changes that have taken place during the last decade together with the name and area involved in the changes.

One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and over. However, several places with a population of 5,000 and over did not qualify to be treated as towns while a few places with less than 5,000 population might have been treated as towns for good reasons at the present Census. Appendix II to this table will give the number of such places with their population.

Appendix III to this Table shows the taluk-wise figures for the Houseless Population and Institutional Population separately. Houseless Population is comprised of that group of people who have no fixed place of residence and no regular home to live in. Institutional Population is a group of unrelated persons living and messing together under the management of a head of the household appointed either by rules governing the institution or by common consent of its members. For purposes of studying different characteristics this population will be included along with Household Population.

TABLE A-I

1. Under columns 3 (a) and 3 (b), (x) represents the area figures furnished by Surveyor General of India, and (y) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a District/Taluk is obtained by subtracting from the State Survey area, the urban area.

2. The Sq. Km. and density figures of urban areas of Taluk/District are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of the towns in the respective units and not using the area figures given In the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Taluk/District totals tally.

3. The following abbreviations have been used for the status of a town :- M : Municipality, P : Panchayat.

APPENDIX I TO TABLE A–I

Statement showing the 1951 Territorial Units constituting the present set-up of each taluk of Cuddapah District and details of net area gain or loss in the changed Territories during the decade 1951–1961

(Only those names/areas which have undergone changes since 1951 have been shown in this Appendix.)

District/Taluk	1951 Territorial Units	DETAILS OF GAIN IN TERRITORIES			DETAILS OF LOSS IN TERRITORIES			NET AREA (Gain '+' Loss '—')	
		Brief description	Area		Brief description	Area			
			Sq. miles	Sq. Km.		Sq. miles	Sq. Km.	Sq. miles	Sq. Km.
1	2	3	4	5	6	7	8	9	10
CUDDAPAH DISTRICT	CUDDAPAH DISTRICT	2 Villages [Daddanala (Code No. 82) and Kallur (Code No. 83)] transferred from Allagadda (Sirvel)Taluk of Kurnool District to Proddatur Taluk.	6.5	16.8	..	..	..	+ 6.5	+ 16.8
Proddatur Taluk	Proddatur Taluk	2 Villages [Daddanala (Code No. 82) and Kallur (Code No. 83)] transferred from Allagadda (Sirvel)Taluk of Kurnool District.	6.5	16.8	..	..	..	+ 6.5	+ 16.8

APPENDIX II TO TABLE A–I

Number of Villages with a Population of 5,000 and over and Towns with a Population under 5,000

(Units of territory which have nothing to show for this statement have been excluded)

	District/Taluk	Villages with a Population of 5,000 and over			Towns with a Population of under 5,000

TABLE A–II

VARIATION IN POPULATION DURING SIXTY YEARS—[1901-1961]

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Censuses. The figures released at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis for comparision.

2. As this Table gives the growth of population from decade to decade, this data forms the main source for estimation of population in the absence of reliable Vital Statistics. One of the main changes in presentation of this Table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

3. During the last decade only two villages *viz.*, Daddanala and Kallur have been transferred from Allagadda (Sirvel) Taluk of Kurnool District to Proddatur Taluk of Cuddapah District. There are no other territorial changes in this district during decade 1951 to 1961.

4. Appendix to this Table shows the 1951 population according to their territorial jurisdiction in 1951, changes in area and the population involved in the changes that have taken place during the last decade. The details of transfers of areas in each case together with the names and area in Sq. miles and the number and date of Notification of each transfer to the extent available are also given in the foot note.

TABLE A-II

VARIATION IN POPULATION DURING SIXTY YEARS (1901-1961)

District	Year	Persons	Decade Variation	Percentage decade variation	Males	Females
	2	3	4	5	6	7
CUDDAPAH . . .	1901	880,891	..	..	445,705	435,186
	1911	894,807	+ 13,916	+ 1.58	454,462	440,345
	1921	888,791	- 6,016	- 0.67	452,616	436,175
	1931	950,542	+ 61,751	+ 6.95	484,486	466,056
	1941	1,057,576	+ 107,034	+ 11.26	541,589	515,987
	1951	1,162,888	+ 105,312	+ 9.96	595,663	567,225
	1961	1,342,015	+ 179,127	+ 15.40	685,597	656,418

APPENDIX TO TABLE A-II

Statement showing 1951 Population according to their Territorial Jurisdiction in 1951, changes in Area and Population involved in those changes

District/Taluk	Area in 1961		1961 Population	Area in 1951		1951 Population according to jurisdiction prevailing in 1951	Population in 1951 adjusted to jurisdiction of 1961	Net increase or decrease between Cols. 7 & 8

7 Badvel Taluk . .	757.0	1,960.6	124,553	757.0	1,960.6	108,711	108,711	..
8 Sidhout Taluk . .	606.0	1,569.5	84,886	606.0	1,569.5	75,704	75,704	..
9 Rajampet Taluk . .	1,038.0	2,688.5	206,859	1,038.0	2,688.5	185,942	185,942	..

(a): 2 villages *viz*, Daddanala and Kallur with an area 6.5 sq. miles of Allagadda (Sirvel) Taluk of Kurnool District transferred to Proddatur Taluk of this District *vide* G. O. Ms. No. 2114, Revenue, dated 11-8-1951.

NOTE 1. Area figures furnished under columns 2 and 5 are according to State Survey Department and they are according to the jurisdiction prevailing in 1961 and 1951 respectively.

2. The figures given in brackets in columns 5 and 6 represent the difference in area between 1951 and 1961 and the figures in brackets in column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

TABLE A–III

VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in each taluk of the district, arranged on population basis under the following groups :—

1 Less than 200 population
2 200–499
3 500–999
4 1,000–1,999
5 2,000–4,999
6 5,000–9,999
7 10,000 and above

2. The villages which are either uninhabited or wholly included in Urban units are not taken into account in this table. The following statement gives at a glance the break-up of all the inhabited villages of Cuddapah District classified by population into four broad groups *viz.*,

Class	*Number of inhabited villages*
Less than 499	270
500–1,999	443
2,000–4,999	165
5,000 and above	19
Total villages	897

3. For definition of 'village' and 'inhabited village' see fly leaf to Table A–I.

TABLE A-III

TABLE A-IV

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in Sq. miles and Sq. Kilometres, Population with sex break-up, decade variation in total Population and percentage of decade variation are given for each town in this Table.

2. For definition of "Town" and "Town-Group" see fly leaf to Table A-I.

3. The towns have been classified into six classes according to their population in the latest Census as detailed below.

Class	*Limits of Population*
I	100,000 and above
II	50,000–99,999
III	20,000–49,999
IV	10,000–19,999
V	5,000– 9,999
VI	Less than 5,000

Class I towns with a population 100,000 and above are termed as cities. The total number of towns under each class in the district at 1961 Census are given below.

Class	*No. of Towns*
I	Nil
II	1
III	1
IV	3
V	4
VI	Nil
Total	9

4. All the towns treated as such at 1951 Census have also been treated as towns at 1961 Census and no new place has been treated as town for the first time at 1961 Census in this district and no town of 1951 Census has been deleted at the 1961 Census.

5. Since the prime purpose of this Table is to show the growth of towns as towns and not how certain places have grown into towns from villages, the population of a place which at any particular Census year was not treated as a town is not given in this table (*i.e.* If a town was newly recognised at the 1961 Census, figures for 1961 only are given. If a town was treated as a town in 1951 and is continuing in 1961 as a town, the figures for 1951 and 1961 are given. If a town was recognised as a town in 1941 and continued to be treated as a town in the successive Censuses till the present, then figures for each of the Censuses *viz.*,1941,1951 and 1961 are given. When a place treated as a town in 1961 Census was dropped as a town, say in 1951 Census, but was a Census town as early as say in 1941 and not at the earlier Censuses, the population against that town for 1941 and 1961 only is given and indicated as declassified against the year 1951.) The population of each town at each of the last seven Census years *i.e.*, since 1901 is, however, given in Table A-IV in Part II-A General Population Tables of Andhra Pradesh (State Volume). If any town recognised as such in any previous Census has been merged with neighbouring town at a subsequent Census then the population of the merged town has been included in the population of the town into which it is merged for the earlier Census and shown accordingly in this table.

6. The civic status of the town *i.e.*, whether the town is a Municipality, or a Panchayat, or a Cantonment is indicated after the name of the town in the abbreviated letters M,P. etc.

7. One of the main changes in presentation of this Table since the last Census is that the areas of towns and town-groups and the percentage of decade variations of total population of the town are also given.

8. The Appendix to this table gives the names of towns treated as such at the present Census together with the names of villages either fully or partly included in them.

TABLE A-IV

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

Name of Town	Status of Town	Name of Taluk	Year	Area in Sq. miles	Area in Sq.Km.	Persons	Decade variation	Percentage decade variation	Males	Females

VILLAGE AND TOWN DIRECTORY

VILLAGE AND TOWN DIRECTORY

This Directory renders an account of each village, as also of each Ward and of each Enumerator's Block of a town. It gives the Location Code number and name of each village/town, area of the village/town, and where inhabited, the number of Occupied Residential Houses, Census Households, Total Population, Population of Scheduled Castes and Scheduled Tribes, Literate Population and Workers classified into the following nine Industrial categories of Workers, and the Non-Workers.

I Cultivator
II Agricultural Labourer
III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
IV Household Industry
V Manufacturing other than Household Industry
VI Construction
VII Trade and Commerce
VIII Transport, Storage and Communications
IX Other Services; and
X Non-Workers

2. The data is presented talukwise, first for the Rural portion in the "Village Directory" and next for the Urban portion in the "Town Directory". In the Village Directory the villages have been arranged in the ascending order of the Location Code Numbers assigned to the villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. A taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Numbers of each village and town and other particulars help the easy location of the villages.

3. In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly outside the town limits the particulars for that portion included in the town limits *i.e.*, "Urban Portion" are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits *i.e.*, "Rural portion" the data is given in the Village Directory along with other villages. The term "Rural" is indicated immediately after the name of such villages to make the position clear. In the presentation of data for the towns the particulars have been exhibited in ascending order of Municipal Wards or Blocks and also by Enumerator's Block and not according to the villages constituent in the town. In order that each Enumerator's block may be located, the jurisdiction of each block *i.e.* the houses covered by each Enumerator's Block in towns are indicated at the beginning of the Town Directory.

4. Under col. 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and the Municipal Authorities concerned. In respect of certain villages where the area particulars are not available it has been shown as "N.A." As the area of a taluk comprises not only the area of the villages but also the area of reserved forests etc., within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

5. Under Cols. 9 to 41 the Total population, Scheduled Castes and Scheduled Tribes population, Literate population, total number of Workers, and Workers under each of the nine categories and Non-Workers is given by sex for each village / town.

6. The Taluk map found at the beginning of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines lying, the rivers, if any, running in the taluk. In this map the Location Code Number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance, if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages, villages by different sizes of population *i.e.*, below 2,000, 2,000 - 4,999, 5,000 and above, are shown by distinct different designs. An alphabetical list of villages with the census Location Code Numbers

indicated against them given after the Taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

7. The information relating to Educational facilities, Medical and Public Health facilities, Drinking water facilities, Communication and Transport facilities, and Electrification is also given village-wise in this section besides the population data. These facilities are shown by symbols as explained below against the names of the villages under cols. 3 to 7.

(*i*) *Educational facilities are shown by the following symbols under col. 3:—*

P: Primary School
M: Middle School
H: High School
C: Higher Institutions including Colleges
T: Technical Institutions

(*ii*) *Medical and Public Health facilities are shown by the following symbols under col. 4:—*

D: Dispensaries
Rhc: Rural Health Centres
Hos: Hospitals
Mcw: Maternity Child Welfare Centres

(*iii*) *Drinking Water facilities are shown by the following symbols under col. 5:—*

S: Safe or Protected water supply including Tube Wells etc.
W: Well
Tk: Tank
Riv: River

(*iv*) *Communications and Transport facilities are shown by the following symbols under col. 6:—*

Po: Post Office
To: Telegraph office and Public Call office
Rh: Rest Houses and Choultries
R: Road
Rly: Railway

(*v*) *Electrification facilities are shown by the following symbols under col. 7:—*

E: Electricity
E (I): Electricity in Industrial use
E (A): Electricity in Agricultural use
E (D): Electricity in Domestic use

Where figures like 5P, 2H etc. occur they denote that the village or town has 5 Primary Schools, 2 High Schools etc.

8. Besides presenting the information relating to the above facilities in the Village / Town Directory, certain other important particulars *viz.*, source of irrigation, crops raised, value of land, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainment (Cinemas), Industrial Establishments and Rural Handicrafts are also given talukwise in separate Sub-Tables immediately after the Town Directory.

9. In the Sub-Table relating to the source of irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land, the various important crops raised and the source of irrigation are given village-wise. Only the Location Code Number has been given without giving the name of the village. Villages having land of same value are grouped together. The following abbreviations are used in this Sub-Table.

Cereals

A: Arika
J: Jonna or Cholam or Jowar
K: Korra
P: Paddy
R: Ragi
S: Sajja or Cumbu

Pulses

Bg: Bengal Gram
Gg: Green Gram
Hg: Horse Gram
Rg: Red Gram

Other Crops

Bl: Betel vines
C: Cotton
Ch: Chillies
Cs: Castor Seeds

Other Crops—*Contd.*

G: Groundnut
Gi: Gingelly
O: Onions
Pl: Plantains
Su: Sugar Cane
T: Tobacco
Tu: Turmeric

Irrigation Sources

C: Canal
Riv: River
Sc: Spring Channel
Sw: Spring Well
Tk: Tank
Tw: Tube Well
W: Well

10. In the Sub-Table relating to Co-operative Societies the various types of Co-operative Societies functioning in each village are presented. The data for the district is given in the beginning followed by the particulars relating to taluk. The abbreviations used for the different types of Co-operative Societies are given below. If a village is served by a co-operative society of another village it has been indicated accordingly.

Co-operative Societies

AGCS	Agricultural Co-operative Society
BHSCS	Board High School Co-operative Society
CBCS	Cattle Breeding Co-operative Society
CS	Co-operative Society
FCS	Forest Co-operative Society
HBCS	House Building Co-operative Society
HSSCS	High School Stores Co-operative Society
LCS	Labour Co-operative Society
LCCS	Labour Contract Co-operative Society
LSCS	Large Sized Co-operative Society
MCS	Marketing Co-operative Society
MPCS	Multipurpose Co-operative Society
MSCS	Milk Supply Co-operative Society
NCS	Neera Co-operative Society
N&JPSCS	Neera and Jaggery Production and Sales Co-operative Society
N&JSCS	Neera and Jaggery Sales Co-operative Society
PBCS	Poultry Breeding Co-operative Society
PSCS	Public Servants' Co-operative Society
RCSCS	Railway Consumers' Stores Co-operative Society
RHCS	Rural Housing Co-operative Society
SSCS	Students Stores Co-operative Society
TCS	Thrift Co-operative Society
TSSSCS	Training School Students' Stores Co-operative Society
WCS	Weavers' Co-operative Society

11. In the other Sub-Tables relating to Police Stations, Veterinary Hospitals, and places of Public Entertainment (Cinemas) also the data is presented in the same form as explained above *i.e.*, first for the district and then for each taluk. Only the names of places where such facilities are existing are given.

12. In the three Sub-Tables relating to Handicrafts information is given about the various Crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of very skilled Craftsmen of each community. These particulars were mainly collected through a schedule of Industries and Crafts issued to the village school teachers in Rural areas and to the Municipal Authorities in the Municipal Areas. In respect of Cities the information was collected through the staff of the Tabulation Offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the House lists prepared at the time of Housenumbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India, 1961–Volume II–Andhra Pradesh–Part VII A" and may be referred to.

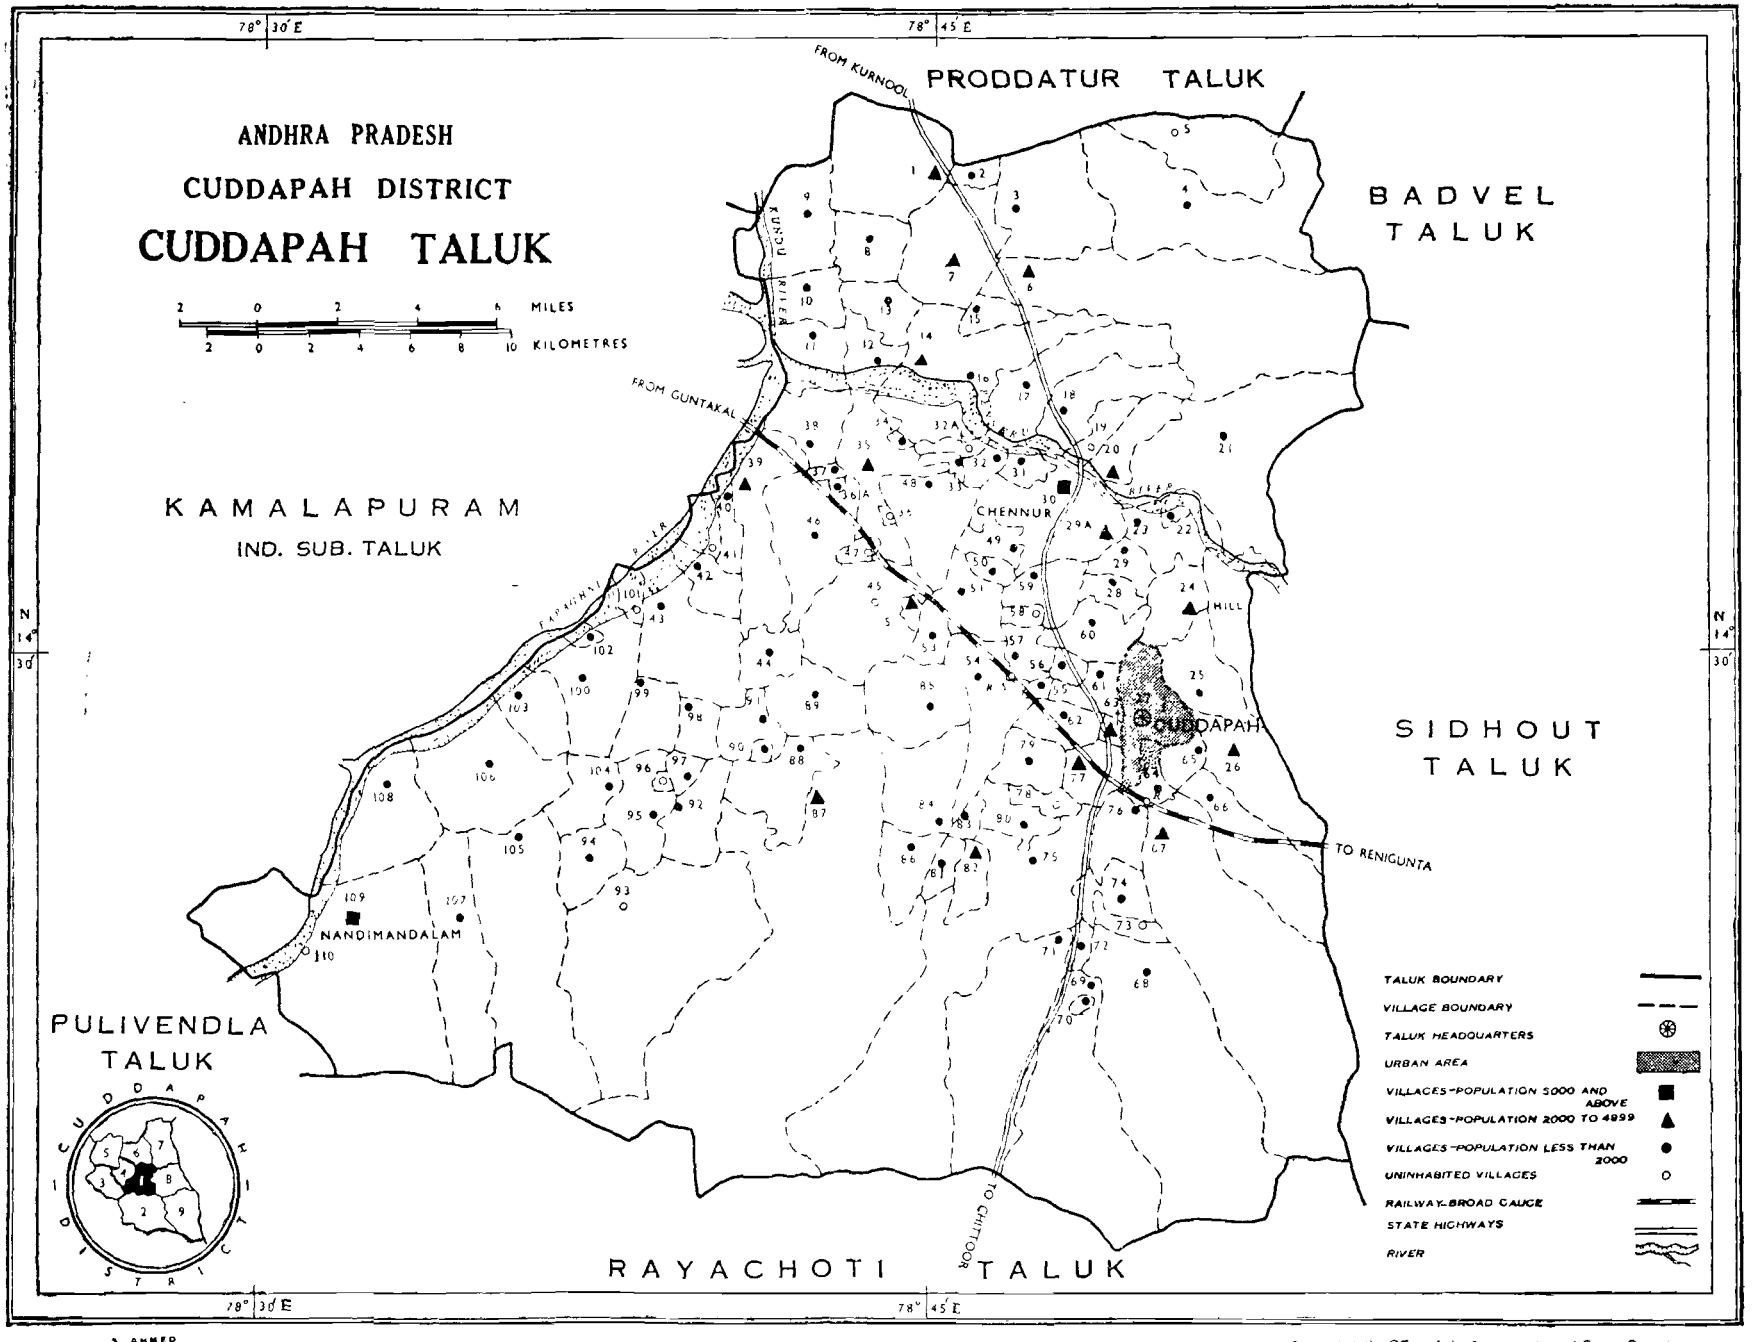

13. In the Sub-Table relating to Industrial Establishments, the units of various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of Industries and Crafts issued to the village school teachers in connection with the Rural Craft Survey. In this schedule the data was to be given by the numbers of families and, as such, the families which had members engaged in any of the industries had been taken as units for that industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data was taken from other sources as well such as the Village Directory furnished by the Tahsildars and the Survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are however, likely to be very few. The particulars are given separately for the Rural and Urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups, showing the total number of establisments within brackets next to each Minor Group code number, for Total, Rural and Urban separately. Then, the figures for the various taluks are presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each village/town are shown the Minor Group code numbers of the Industries or Crafts found in that village/town with the number of units engaged in that Minor Group in brackets against each of the groups.

14. In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, special significance, if any, of the festival, the size of congregation etc. are

given for each village having such importance. A detailed report on the Fairs and Festivals is given in "Census of India 1961-Volume II-Andhra Pradesh Part VII-B" and may be referred to.

15. All the information given in the various Sub-Tables in this section is based on the information furnished by the Tahsildars and Municipal authorities concerned.

CUDDAPAH TALUK

S. AHMED
DRAUGHTSMAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

DRAUGHTSMAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh (Hyderabad)

ALPHABETICAL LIST OF VILLAGES

RAYACHOTI TALUK

1961 Location Code No.	Name of Village
89	Abbavaram
4	Addalamarri
107	Akkampalle
73	Anantapuram
27	Araveedu
71	Bandlapalle
114	Bhagampalle
58	Bonamala
50	Bottacheruvu
34	Brahmanayerragudi
92	Chaamalavaripalle
8	Chekrayapeta
91	Chennamukkapalle
65	Cherlopalle
9	Chilekampalle
57	Chinnamandem
72	Chitluru
33	Dappepalle
60	Devagudipalle
97	Devapatla
35	Dinnepadu
93	Doollavaripalle
101	Dudyala
78	Edapalle
28	Eguvagottiveedu
79	Gadikota
26	Galiveedu
23	Garugupalle
7	Gondikovvur
37	Gopagudipalle
29	Gopanapalle
64	Gorlamudivedu
14	Gotlamitta
41	Gudlavaripalle
30	Gundlacheruvu
117	Gundlapalle
103	Gunnikuntla
48	Guntimadugu
102	Gurigin jakunta
99	Guttapalle
38	Guvvalacheruvu
84	Hasanapuram
1	Idupalapaya
88	Indukurpalle
70	Kakulavaram
55	Kalibanda
20	Kallurupalle
36	Kalpanayanicheruvu
90	Kasba Gollapalle
49	Katimayakunta
19	Katineni Yerragudi
15	Korlakunta
5	Kumarakalva
17	Kuppam
44	Kurnootala
42	Lakkireddipalle
43	Maddirevula
51	Madhavaram
108	Madithadu
13	Mahadevapalle
61	Mallur
2	Marellamadaka
69	Masapeta
86	Matli
95	Motakatla
118	Mudumpad
74	Nallaguttapalle
62	Narayanareddipalle
39	Neelakantaraopeta
11	Nerusupalle
31	Nuliveedu
87	Odivedu
22	Pandikunta
47	Pandillapalle
56	Paramatikona
67	Peddakalvapalle
111	Peddanenikalva
83	Peddiveedu
94	Pemmadapalle
105	Polimerapalle
85	Pottukurupalle
32	Pulikunta
24	Pyarampalle
76	Rachapalle
18	Rajupalle
59	Ravutukunta
68	Rayachoti
110	Rayavaram
116	Reddivaripalle
96	Sambepalle
80	Sanipaya
75	Saraswathipalle
100	Settipalle
3	Shotrium Anjaneyapuram
112	Shotrium Chinnaiahgaripalle
53	Shotrium Diguvagottiveedu
12	Shotrium Kondappagaripalle
46	Shotrium Naraharibatlapalle

The following abbreviations have been used in the above Village and Town Directories

(*i*) *Educational facilities are shown by the following symbols under col. 3:*—
P: Primary School, M: Middle School, H: High School, C: Higher Institutions including Colleges, T: Technical Institutions

(*ii*) *Medical and Public Health facilities are shown by the following symbols under col. 4:*—
D: Dispensaries, Rhc: Rural Health Centres, Hos: Hospitals, Mcw; Maternity Child Welfare Centres

(*iii*) *Drinking Water facilities are shown by the following symbols under col. 5:*—
S: Safe or Protected water supply including Tube Wells etc., W: Well, Tk: Tank, Riv: River

(*iv*) *Communications and Transport facilities are shown by the following symbols under col. 6:*—
Po: Post Office, To: Telegraph office or Public Call Office, Rh: Rest Houses and Choultries, R: Road, Rly : Railway

(*v*) *Electrification facilities are shown by the following symbols under col. 7:*—
E: Electricity, E (I) : Electricity in Industrial use, E (A): Electricity in Agricultural use, E (D): Electricity in Domestic use

The following abbreviations have been used in the above Sub-Table :—

N.A.: Not Available.

Irrigation Sources

C: Canal
Riv: River
Sc: Spring Channel
Sw: Spring Well
Tk: Tank
Tw: Tube Well
W: Well

Cereals

A: Arika
J: Jonna or Cholam or J. war
K: Korra
P: Paddy
R: Ragi
S: Sajja or Cumbu

Pulses

Bg: Bengal Gram
Gg: Green Gram
Hg: Horse Gram
Rg: Red Gram

Other Crops

Bl: Betel vines
C: Cotton
Ch: Chillies
Cs: Castor Seeds
G: Groundnut
Gi: Gingelly
O: Onions
Pl: Plantains
Su: Sugar Cane
T: Tobacco
Tu: Turmeric

Detailed description of Industrial Code (Minor Group) numbers under which the Industrial Establishments are arranged in the above Sub-Table.

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
044	Rearing of bees for the production of honey, wax and collection of honey
200	Production of rice, atta, flour, etc., by milling dehusking and processing of crops and foodgrains
202	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy
205	Production of bread, biscuits, cake and other bakery products
207	Production of edible fats and oils (other than hydrogenated oil)
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge
212	Production of indigenous liquor such as tody, liquor from mahua, palm juice
214	Production of aerated and mineral water
215	Production of ice
218	Processing of coffee in curing works
220	Manufacture of bidi
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
232	Cotton spinning and weaving in mills
233	Cotton dyeing, bleaching
235	Cotton weaving in handlooms

SUB-TABLE 10 TO VILLAGE & TOWN DIRECTORY—*concld.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
238	Manufacturing of cotton nets
241	Jute spinning and weaving
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
264	Weaving of silk textile by handloom
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including raincoats and headgear
280	Sawing and planing of wood
281	Manufacture of wooden furniture and fixtures
284	Manufacture of other wooden products such as utensils, toys artwares
288	Manufacture of materials from cork, bamboo, cane, leaves and other allied products
289	Manufacture of other wood and allied products not covered above
292	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp
302	All other types of printing including lithography, engraving, etching, block making, and other work connected with printing industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other foot-wear
313	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles
314	Repair of shoes and other leather foot-wear
320	Manufacture of tyres and tubes
331	Manufacture of dyes, paints, colours and varnishes
335	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap
336	Manufacture of soap and other washing and cleaning compounds
340	Manufacture of structural clay products such as bricks, tiles
342	Manufacture of lime
343	Manufacture of structural stone goods, stone dressing and stone crushing
344	Manufacture of stonewares, other than images
350	Manufacture of earthenware and earthen pottery
359	Manufacture of other non-metallic mineral products not elsewhere specified
363	Manufacture of structural steel products such as joist, rail, sheet, plate
365	Manufacture of brass and bell metal products
367	Manufacture of metal products (other than of iron, brass, bell metal, and aluminium) such as tin can
368	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products
369	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in *major groups* 36, 37, 38 and 39)
384	Repairing and servicing of motor vehicles
388	Repairing of bicycles and tricycles
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery, silverware and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
395	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen
399	Manufacture and repair work of goods not assignable to any other group

B - SERIES

(i) GENERAL ECONOMIC TABLES

ECONOMIC TABLES

The Economic Tables for the 1961 Census are based on the principal work of a person and the concept of dependency has been abandoned altogether for economic classification. The entire population has been divided into the following nine categories of workers for broad economic classification based on the National Classification of Industries adopted by the Government and the Non-workers being shown as a separate category.

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

X Non-Workers

The following seventeen Economic Tables, nine of which relate to the General Population and the remaining eight relate to 20% sample of Households, have been prepared at the present Census.

B-I Workers and Non-Workers classified by sex and broad age-groups

B-II Workers and Non-Workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups.

B-III *Part A*-Industrial Classification of Workers and Non-Workers by educational levels in *Urban areas only.*

Part B-Industrial Classification of Workers and Non-Workers by educational levels in *Rural areas only.*

B-IV *Part A*-Industrial Classification by sex and class of worker of persons at work at Household Industry.

Part B-Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service.

Part C-Industrial Classification by sex and divisions, major groups and minor groups of persons at work other than Cultivation.

B-V Occupational Classification by sex of persons at work other than Cultivation.

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad age-groups and educational levels in *Urban areas only.*

B-VII *Part A*- Persons working principally (i) as Cultivators (ii) as Agricultural labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural labourer.

Part B- Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry.

B-VIII *Part A*-Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *Urban areas only.*

Part B-Persons unemployed aged 15 and above by sex, and educational levels in *Rural areas only.*

B-IX Persons not at work classified by sex, broad age-groups and type of activity.

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry (ii) engaged either in Cultivation or Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry for all areas.

B-XI Sample Households engaged in Cultivation classified by interest in land & size of land cultivated in Total, Rural and Urban areas.

B-XII Sample Households engaged in Cultivation only classified by size of land cultivated, and number of family workers and hired workers, in Total, Rural and Urban areas.

B-XIII Sample Households engaged both in Cultivation and Household Industry, showing size of land cultivated classified by principal Household Industry, in Rural and Urban areas separately.

B-XIV *Part A*-Households classified by major groups of principal Household Industry and number of persons engaged.

Part B-Households classified by minor groups of principal Household Industry.

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land in Total, Rural and Urban areas.

B-XVI Sample principal Household Industry classified by period of working and total number of workers engaged in Household Industry in all areas.

B-XVII Size of sample Households classified by participation in Household Cultivation or Industry.

All the above Tables pertaining to the district except Table B-II are reproduced in this Hand Book.

The Household Economic Tables are a special feature of this Census and are prepared on the basis of 20% sample of the returns in the Household Schedules filled up at the time of enumeration.

The working population in each of the nine categories of workers and the non-working population is divided by broad age-groups *viz.*, 0-14, 15-34, 35-59, 60+ and Age not stated in some of these Economic Tables.

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for Total, Rural and Urban population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad age-groups 0-14, 15-34, 35-59 and 60+ years. This is the basic Economic Table and the age-groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle aged persons, and elderly persons. The classification of non-working population is made in other succeeding Tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be selfsupporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependency. The following explanation makes it clear as to who is treated as a Worker.

Workers

All persons who were engaged in some productive work during any of the 15 days preceding the day on which enumerated irrespective of the fact, whether they derive income or not, are treated as Workers. In respect of seasonal work like Cultivation, Livestock, Household Industry etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he is recorded as a Worker. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Persons under training as apprentices with or without wages are recorded as Workers. Family Workers i.e., who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in household duties and in no other economically productive work i.e., a housewife, is not however treated as a Worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or political activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers

All persons who are not workers i.e., those falling under the following categories are treated as Non-Workers.

(i) Full time students or children attending schools and who do no other work.

(ii) Persons engaged in unpaid home duties such as housewife.

(iii) Any dependant including an infant or child not attending school or a person permanently disabled from work because of illness or old age.

(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work.

(v) Beggars, vagrants or independent women without indication of source of income and others with unspecified source of existence.

(vi) A convict in jail or an inmate of a penal, mental or charitable institution.

(vii) Unemployed persons seeking employment for the first time.

(viii) Person employed before but now out of employment.

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This Table is divided into two parts. Part A relates to Urban areas and Part B relates to Rural areas. In this Table each of the nine categories of Workers and also the Non-Workers is shown by educational levels.

In Part A which relates to Urban areas only, the data are given for all the Urban areas of the district put together by the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation or Higher Secondary

Technical diploma not equal to degree

Non-Technical diploma not equal to degree

University degree or post-graduate degree other than Technical degree

Technical degree or diploma equal to degree or post-graduate degree

Engineering

Medicine

Agriculture

Veterinary and Dairying

Technology

Teaching

Others

In Part B the data which relate to Rural areas only are given for the district, followed by taluks by the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation and above

"Literate" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can neither read nor write or can merely read and cannot write is considered an illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV

INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows Industrial classification by sex and class of worker of persons at work at Household Industry for Total, Rural and Urban Population. The data are shown first for the Division followed by Major groups in the order laid down in the Indian Standard Industrial Classification under that Division.

Part-B Shows the Industrial Classification by sex and class of worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the Total and Urban population. In this part also the data are presented first for the Division followed by the Major groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major groups and Minor groups of persons at work other than cultivation for Total and Urban population. The data are presented first for the Divisions followed by Major groups in the order laid down in the Indian Standard Industrial Classification. Under each Major group the corresponding Minor groups are shown. The taluk-wise particulars are, however, exhibited Division-wise and for Rural population only. Minor groups having less than 1% of workers of the respective Division (0.5 %in the case of 2 & 3 Division) are not shown in this Table.

"*Household Industry*" is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in the Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An "*Employer*" is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An "*Employee*" is a person who usually works under some other person for salary or wages in cash or kind. Persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers are not regarded as employers.

A "*Single Worker*" is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single worker also includes a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives is recorded as a "*Single Worker*".

A "*Family Worker*" is a member who works, without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an Industry, whether run at home or away from home in town or village and even away from village in the Rural area should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker is not entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note :- In respect of Household Industry, by the very nature of the participation of the workers in a Household Industry all the four categories of workers are not recognised. Only the "employees" if any in a Household Industry are categorised as such. The rest are clubbed together as "others".

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note : Minor Groups having less than 1 % of workers of the respective Division (Less than 0.5 % in case of Minor Groups of Division 2 & 3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification (1)	Total		
	Total		
	Persons (2)	Males (3)	Females (4)
			CUDDAPAH
ALL DIVISIONS	210,936	147,382	63,554
* *DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING*	29,368	21,506	7,862
Major Group 00—Field produce and Plantation crops	1,677	1,477	200
Minor Group 006—Production of fruits and nuts in plantations, vines and orchards	1,226	1,059	167
Major Group 01—Plantation crops	17	17	..
Major Group 02—Forestry and Logging	2,042	1,005	1,037
Minor Group 023—Production of fuel including charcoal by exploitation of forests	1,129	806	323
Minor Group 024—Production of fodder by exploitation of forests	389	7	382
Minor Group 026—Production and gathering of other forest products not covered above	419	92	327
Major Group 03—Fishing	602	512	90
Minor Group 031—Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	602	512	90
Major Group 04—Livestock and Hunting	25,030	18,495	6,535
Minor Group 040—Production and rearing of livestock (Large heads only) mainly for milk and animal power such as cow, buffalo, goat	14,352	8,736	5,616
Minor Group 041—Rearing of sheep and production of wool	8,931	8,398	533
Minor Group 042—Rearing and production of other animals (mainly for slaughter) such as pig	1,239	1,096	143
* *DIVISION 1—MINING AND QUARRYING*	2,208	1,593	615
Major Group 10—Mining and Quarrying	2,208	1,593	615
Minor Group 101—Mining of iron ores	271	237	34
Minor Group 107—Quarrying of stone (including slate), clay, sand, gravel, limestone	1,804	1,301	503
Minor Group 109—Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	120	45	75
* *DIVISION 2 & 3—MANUFACTURING*	87,195	53,347	33,848
Major Group 20—Foodstuffs	7,587	2,102	5,485
Minor Group 200—Production of rice, atta, flour etc., by milling, dehusking and processing of crops and foodgrains	861	558	303
Minor Group 206—Production of butter, ghee, cheese and other dairy products	4,526	148	4,378
Minor Group 207—Production of edible fats and oils (other than hydrogenated oil)	1,003	770	233
Minor Group 209—Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	1,051	494	557
Major Group 21—Beverages	266	248	18
Major Group 22—Tobacco products	1,645	1,277	368
Minor Group 220—Manufacture of bidi	1,576	1,260	316
Major Group 23—Textile-cotton	43,061	22,222	20,839
Minor Group 231—Cotton spinning (other than in mills)	1,413	50	1,363
Minor Group 235—Cotton weaving in handlooms	41,266	21,874	19,392
Major Group 24—Textile-jute	976	560	416
Minor Group 244—Manufacture of other products like rope cordage from jute and similar fibre such as hemp, mesta	828	443	385
Major Group 25—Textile—wool	2	..	2
Major Group 26—Textile—silk	3	1	2
Major Group 27—Textile—miscellaneous	5,544	5,170	374
Minor Group 273—Making of textile garments including raincoats and headgear	4,974	4,642	332
Minor Group 274—Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	484	480	4

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note : Minor Groups having less than 1 % of workers of the respective Division (Less than 0.5 % in case of Minor Groups of Division 2 & 3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification	Total		
	Total		
	Persons	Males	Females
(1)	(2)	(3)	(4)
Major Group 28—Manufacture of wood and wooden Products:	9,889	6,402	3,487
Minor Group 281—Manufacture of wooden furniture and fixtures	897	891	6
Minor Group 288—Manufacture of materials from cork, bamboo, cane, leaves and other allied products	6,621	3,185	3,436
Minor Group 289—Manufacture of other wood and allied products not covered above	2,051	2,033	18
Major Group 29—Paper and paper products	15	13	2
Major Group 30—Printing and publishing	147	145	2
Major Group 31—Leather and leather products	5,654	5,530	124
Minor Group 311—Manufacture of shoes and other leather footwear	5,059	4,992	67
Major Group 32—Rubber, Petroleum and Coal Products	50	50	..
Major Group 33—Chemicals and chemical products	326	173	153
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and coal	5,848	3,834	2,014
Minor Group 342—Manufacture of lime	741	453	288
Minor Group 343—Manufacture of structural stone goods, stone dressing and stone crushing	1,117	590	527
Minor Group 350—Manufacture of earthenware and earthen pottery	3,625	2,539	1,086
Major Group 36—Basic Metals and their products except machinery and transport equipment	1,871	1,800	71
Minor Group 369—Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36,37,38 and 39)	1,247	1,191	56
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	68	68	..
Major Group 38—Transport equipment	584	581	3
Major Group 39—Miscellaneous Manufacturing Industries	3,659	3,171	488
Minor Group 393—Manufacture of jewellery, silverware and wares using gold and other precious metals	2,583	2,524	59
Minor Group 399—Manufacture and repair work of goods not assignable to any other group	874	517	357
DIVISION 4—CONSTRUCTION	6,884	5,828	1,056
Major Group 40—Construction	6,884	5,828	1,056
Minor Group 400—Construction and maintenance of buildings including erection flooring, decorative constructions, electrical and sanitary installations	5,349	4,415	934
Minor Group 401—Construction and maintenance of roads, railways, bridges, tunnels	1,043	997	46
Minor Group 402—Construction and maintenance of telegraph and telephone lines	113	113	..
Minor Group 403—Construction and maintenance of water ways and water reservoirs such as bund embankments, dam, canal, tank, tubewells, wells	379	303	76
* *DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES*	1,041	970	71
Major Group 50—Electricity and Gas	807	803	4
Minor Group 500—Generation and transmission of electric energy	14	14	..
Minor Group 501—Distribution of electric energy	791	787	4
Major Group 51—Water Supply and Sanitary Services	234	167	67
Minor Group 510—Collection, purification and distribution of water to domestic and industrial consumers	27	27	..
Minor Group 511—Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	207	140	67
* *DIVISION 6—TRADE AND COMMERCE*	28,202	21,503	6,699
Major Group 60-63—Wholesale Trade	1,610	1,604	6
Minor Group 601—Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff, (not covered elsewhere)	393	393	..

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note : Minor Groups having less than 1 % of workers of the respective Division (less than 0.5 % in case of Minor Groups of Division 2 & 3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification	Total		
	Total		
	Persons	Males	Females
(1)	(2)	(3)	(4)
Minor Group 602—Wholesale trading in all kinds of fabrics, and textile products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	615	613	2
Major Group 64-68—Retail trade	24,090	17,961	6,129
Minor Group 640—Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	6,849	5,537	1,312
Minor Group 641—Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	390	313	77
Minor Group 644—Retail trading in tobacco, bidi, cigarettes and other tobacco products	869	692	177
Minor Group 645—Retail trading in fuel such as coke, coal, firewood and kerosene	1,264	901	363
Minor Group 646—Retail trading in food stuffs like sweetmeat, condiments, cakes, biscuits, etc.	1,388	616	772
Minor Group 650—Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	2,546	2,508	38
Minor Group 689—Retail trading in goods unspecified	9,100	5,899	3,201
Major Group 69—Trade and Commerce miscellaneous	2,502	1,938	564
Minor Group 699—All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	2,043	1,504	539
* *DIVISION 7 —TRANSPORT, STORAGE AND COMMUNICATIONS*	6,561	6,533	28
Major Group 70-71—Transport	5,583	5,566	17
Minor Group 700—Transporting by railways	1,229	1,217	12
Minor Group 701—Transporting by tramway and bus services	1,319	1,316	3
Minor Group 702—Transporting by motor vehicles (other than omnibus)	1,181	1,181	..
Minor Group 703—Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	1,305	1,303	2
Minor Group 705—Transporting by man such as carrying of luggage hand-cart driving, rickshaw pulling, cycle rickshaw driving	523	523	..
Major Group 72—Storage and Ware Housing	6	6	..
Major Group 73—Communications	972	961	11
Minor Group 730—Postal, telegraphic, wireless and signal communications	931	922	9
* *DIVISION 8 —SERVICES*	45,449	33,662	11,787
Major Group 80—Public Services (This does not include Government, Quasi-Government or local body activities, other than administrative, in such fields as transport, communications, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industrial groups)	9,753	9,453	300
Minor Group 803—Public services in Police	2,124	2,123	1
Minor Group 805—Public services in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	1,576	1,343	233
Minor Group 809—Public services in administrative departments and offices of State Governments	5,868	5,803	65
Major Group 81—Educational and Scientific Services	5,475	4,634	841
Minor Group 811—Educational Services such as those rendered by colleges, schools and similar other institutions of non-technical type	5,377	4,554	823
Major Group 82—Medical and Health Services	1,619	1,311	308
Minor Group 820—Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinics as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	1,491	1,186	305
Major Group 83—Religious and Welfare Services	684	644	40
Major Group 84—Legal Services.	258	258	..
Major Group 85—Business Services	88	88	..

TABLE B-V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the Total and Urban Population, the Occupational Classification of persons working in non-Agricultural occupations. The data is presented first for the Division followed by the Occupational Groups in the order of the National Classification of Occupations. Under each Group the detailed Occupational Families are shown. Occupational Families, accounting for less than 1% of the Workers of the respective Division (less than 0.5 % in case of Families under Division 7–8) are not given in this Table. The particulars for the district are given down to Occupational Family, while the taluk-wise particulars are given upto Division only.

TABLE B–V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

[Note:—Occupational Families accounting for less than 1 % of the workers of the respective Division (less than 0.5 % in case of Families under Division 7–8) have not been shown in this Table but shown in the Appendix to this Table. Divisions thus affected are marked with an asterisk (*).]

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS, AND EDUCATIONAL LEVELS *IN URBAN AREAS ONLY*

This Table shows only for the Urban areas in the district the Occupational Divisions of persons at work other than cultivation. The data is presented only upto the Division of the National Classification of Occupations under the four age-groups 0-14, 15-34, 35-59, 60+, and Age not stated and further classified according to the educational level. This data is, however, not given for the Rural parts of the district and also not given separately for each of the Urban units in the district.

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS *IN URBAN AREAS ONLY*

Occupational Division	Age-group	Total Workers			Total Literate Workers		Literate (without educational level)		Educational levels

TABLE B–VII

Part A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Part B INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided into two parts:

Part A shows the persons working principally as Cultivator or as Agricultural Labourer or at Household Industry and who have secondary work in the other two alternatives at Household Industry or as Cultivator or as Agricultural Labourer. The data for the district is given for Total, Rural and Urban population by Divisions and Major groups. For the taluk, however, it is given for Rural population and by Divisions only.

Part B shows the persons working principally in non-Household Industry, Trade, Business, Profession or Service and also engaged at Household Industry as secondary work by Divisions and Major groups. The data is presented for the district for the Total, Rural and Urban population by Divisions followed by the Major groups of that Division. The taluk-wise data is presented for Rural population by Industrial Divisions only.

TABLE B-VII Part A

PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Principal work: Cultivator, Agricultural Labourer, or Household Industry (Division and Major Group)	Total Rural Urban	Secondary Work: At Household Industry Males	At Household Industry Females	As Cultivator Males	As Cultivator Females	As Agricultural Labourer Males	As Agricultural Labourer Females

TABLE B–VIII

PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the persons unemployed aged 15 and above by sex and educational levels for Urban and Rural areas separately in two parts.

In Part-A, which relates to the Urban areas, the unemployed have been sub-divided into two classes, *viz*; (i) Persons seeking employment for the first time (ii) Persons employed before but now out of employment and seeking employment, and the data has been given by broad Age-groups and by educational levels.

In the first case the Age-groups will be 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and in the second case 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated.

Part-B relates to Rural areas. The data in this part is given taluk-wise by educational levels. The data in this Table is not however given by Age-groups.

TABLE B-IX

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the Total, Rural and Urban populations, the persons not at work classified by sex, broad Age-groups and type of activity. The Non-Workers are divided into eight categories according to their activities *viz.*, (i) Fulltime students; (ii) those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired Rentier or persons of independent means (v) Beggars, vagrants etc.; (vi) Inmates of institutions; (vii) Persons seeking employment for the first time; and (viii) Unemployed but seeking work. These eight categories are based on the recommendations of the United Nations. This Table provides information about those who have an income without working, about house-wives, about school going children, besides other types of non-working population. The data for the district are presented for Total, Rural and Urban populations. The taluk-wise data are however, presented for the Rural population only.

A total number of 6 males and 1 female have been returned as fulltime students in the Age-group 35-59 in this district. These elderly persons might be pursuing advanced studies in religion such as Christian missionary trainees, or in Vedas, Music or other Fine Arts *etc.*, and hence classified as fulltime students.

B-SERIES

(ii) HOUSEHOLD ECONOMIC TABLES

TABLE B–X

SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR IN HOUSEHOLD INDUSTRY (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY

This Table is prepared on 20 % Sample of Households based on the returns in the Household schedules. In presenting the data all Households are divided into three important sections of economic activity *viz.*, (i) Households engaged neither in Cultivation nor in Household Industry (ii) Households engaged either in Household Industry or in Cultivation (iii) Households engaged both in Cultivation and in Household Industry. The data are given taluk-wise and also for Rural and Urban Households in the district separately.

Cultivation includes ownership, tenancy, and cultivation.

Household Industry is an industry conducted by the head of the Household himself and/or mainly members of the Household at home or within the village in Rural areas and only at home in Urban areas and not on the scale of a registered factory.

This is the first census in which the data on Household basis are collected, tabulated and presented.

TABLE B–X

SAMPLE HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR IN HOUSEHOLD INDUSTRY (ii) ENGAGED EITHER IN CULTIVATION OR IN HOUSEHOLD INDUSTRY BUT NOT IN BOTH; AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY

(Based on 20% Sample)

TABLE B–XI

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED

This Table prepared on 20% sample of Households based on the returns in the Household Schedules shows separately for Total, Rural and Urban areas, the Households engaged in Cultivation classified by interest in land and size of land cultivated. The Rural figures are presented Talukwise whereas the Urban figures are for the district as a whole.

A more detailed analysis of the cultivating Households is made in this Table by classifying them according to the size of land Cultivated and according to the interest in land. The holding sizes adopted are less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9, 50.0+ acres. The above holding sizes will therefore give an indication of the number of holdings likely to be (i) deficit (ii) self sufficient and (iii) surplus for self consumption. It has, however, not been possible to give the sizes of the holding according to the type of land *i.e.*, wet or dry. Only the extent of the land was ascertained at the Census enumeration.

TABLE B-XI

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED

(Based on 20% Sample)

Interest in land cultivated	No. of cultivating Households	Households engaged in Cultivation by size of land in acres										
		Less than 1	1.0—2.4	2.5—4.9	5.0—7.4	7.5—9.9	10.0—12.4	12.5—14.9	15.0—29.9	30.0—49.9	50+	Unspecified

TABLE B-XII

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS

This Table prepared on 20 % sample of Households based on the returns in the Household Schedules shows a further analysis of the Households engaged in Cultivation only and furnishes information on the extent of under employment in Agriculture and also on the size and scale of Agricultural enterprise. The data are presented both according to the number of persons in the Household and according to the size of land cultivated by the Household besides giving separately the number of family workers and hired workers in Cultivation in each such household.

TABLE B-XIII

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY

This Table prepared on 20% sample of Households based on the returns in the Household schedules shows the number of Households engaged both in Household Industry and in Cultivation. It indicates the nature of Industry in which cultivating Households with a particular size of holding are engaged and thus throws light on the Household Industries which are carried on as ancilliary to Cultivation. A correlation between size and scale of Cultivation and size and scale of Household Industry is attempted to be established in this Table. The Household Industry is presented by Division and by Major Group only of the Indian Standard Industrial Classification.

TABLE B-XIII

TABLE B–XIV

SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY

This Table prepared on 20% sample of Households based on the returns in the Household Schedules is divided into two parts.

Part A relates to Households classified by Major Groups of principal Household Industry and number of persons engaged in each Major Group *i.e.* one person, two persons, 3–5 persons, 6–10 persons, and more than 10 persons. The data are given for the Total, Rural and Urban Households separately by Divisions and by Major Groups only.

In part B the number of Households engaged in Household Industry under each Minor Group is given separately for Total, Rural and Urban areas.

This Table therefore indicates the extent of underemployment by a comparison of the nature of the Industry and the number of persons employed and also gives a measure of the scale of Household Industry.

TABLE B—XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND

This Table prepared on 20% sample of Households based on the returns in the Household Schedules shows the number of Households engaged both in Cultivation and Household Industry. While in Table B-XIII the number of Households engaged both in Cultivation and in Household Industry is given by size of land cultivated classified by principal Household Industry, in this Table an analysis is made of persons working in these Households with reference to the size of holdings. In the case of Households employing more than one person the number of family workers and hired workers are given separately. This Table establishes a correlation between the scale of Household Industry and the scale of Cultivation.

The data are given separately for Total, Rural and Urban areas of the district and for the Rural areas of each of the taluks in the district.

TABLE B-XV

SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY CLASSIFIED BY SIZE OF LAND

(Based on 20% Sample)

Size of land (class range in acres)	Total of cultivating Households which are engaged in Household Industry				Cultivating Households according to number of persons engaged in Cultivation						
					1 Person			2 Persons			
	Households	Family workers		Hired workers	Households	Family workers		Households	Family workers		Hired workers
		Males	Females			Males	Females		Males	Females	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)

TABLE B-XVI

SAMPLE PRINCIPAL HOUSEHOLD INDUSTRY CLASSIFIED BY PERIOD OF WORKING AND TOTAL NUMBER OF WORKERS ENGAGED IN HOUSEHOLD INDUSTRY

This Table prepared on 20% sample Households based on the returns in the Household Schedules is confined only to Principal Household Industry. The data in respect of Households engaged in Household Industry only or both in Household Industry and Cultivation are given separately. Household Industry in this Table is classified according to the period of working of the Industry *viz.*, 1-3 months, 4-6 months 7-9 months, 10 months to 1 year, and under each category number of Households, number of family workers and number of hired workers are given. This Table thus gives the seasonality of the various Household Industries together with seasonality of Cultivation and throws some light on relative employment. The data are presented for the whole district.

TABLE B-XVII

SIZE OF SAMPLE HOUSEHOLDS CLASSIFIED BY PARTICIPATION IN HOUSEHOLD CULTIVATION OR INDUSTRY

This Table is prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration. It gives information about the size of sample Households classified by participation in Household Cultivation or Industry. The data in this Table are presented separately for Total, Rural and Urban Households of the district. This Table is intended to give family sizes distributed according to the number of members in the Household *i.e.*, single member Households, Households containing 2-3 members, 4-6 members, 7-9 members, and 10 members and above. The particulars of the Households engaged (i) neither in Cultivation nor in Household Industry, (ii) in Household Industry only, and (iii) in Cultivation are given separately. The Households engaged in Cultivation are shown according to the size of their land holdings. Though the Census Household is not exactly the same as the 'Family' to the extent that the former includes persons who were not members of the family, yet this Table will give general idea of family sizes as in the majority of families outsiders are not likely to be present.

TABLE B-XVII

SIZE OF SAMPLE HOUSEHOLDS CLASSIFIED BY PARTICIPATION IN HOUSEHOLD CULTIVATION OR INDUSTRY

C - SERIES

SOCIAL AND CULTURAL TABLES

SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to composition of sample Households, Age, Sex, Marital Status, Education, Mother Tongue, Bilingualism, and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below:

C-I Composition of Sample Households

C-II Age and Marital Status

C-III Age, Sex and Education

Part A— All areas

Part B—Urban areas

Part C—Rural areas

C-IV Single Year Age Returns

C-V Mother Tongue (in alphabetical order)

C-VI Bilingualism

C-VII Religion

C-VIII Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers

Part A—Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

All the above Tables pertaining to Cuddapah district except Tables C-IV Single Year Age Returns and C-VI Bilingualism are reproduced in this book.

TABLE C–I

COMPOSITION OF SAMPLE HOUSEHOLDS

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households separately for Total, Rural and Urban areas in the district. The composition of the Households is given in terms of the heads of Households, spouses of heads of Households, married sons and other married relations, other relations and unrelated persons. This Table will thus indicate the strength of the joint family system and will therefore be of sociological interest.

TABLE C-I
COMPOSITION OF SAMPLE HOUSEHOLDS
(Based on 20% Sample)

TABLE C-II

AGE AND MARITAL STATUS

This Table prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for Total, Rural and Urban population in the district, and for the Rural population in each of the taluks. This is a very important demographic Table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Statuses and also in different Age-groups. The Age-groups *viz.*, 0–9, 10–14, 15–19, 20–24, 25–29, 30–34,35–39, 40–44, 45–49, 50–54, 55–59, 60–64, 65–69, 70+ and Age not stated adopted in this Table conform to international requirements. Age-group 0–9 is automatically treated as 'never married' for the propose of this Table. The proportion of increase or decrease in the various Marital Statuses since the last Census and the trends in the age of marriage can be studied from this Table. From the data on married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III

AGE, SEX AND EDUCATION

This Table gives the distribution of Total population by broad Educational levels, Sex and by broad Age-groups. The Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to Urban and Rural areas respectively. The educational levels given for all areas and Rural areas in Part A and Part C are the same while in respect of Urban areas in Part B more detailed educational levels have been adopted. These educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by educational levels. This table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-III PART A

TABLE C-V

MOTHER-TONGUE

This Table exhibits separately for the Total, Rural and Urban population of the district and only for the Rural population of each taluk the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in this Table in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII

RELIGION

This Table gives separately the distribution of Total, Rural and Urban population of the district and Rural population only of taluks according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion wise down to the village level. Since the 1951 Census this practice has been discontinued.

TABLE C-VII

Note : Under Hindus 21 Males and 25 Females were added in Urban area whose religion was given as "Radhaswamy"

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

Part A—Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately, the total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of Workers into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates amongst the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to Cuddapah District have also been prepared and incorporated in this book under the series " SCT Tables. "

D-SERIES

MIGRATION TABLES

MIGRATION TABLES

The Tables in this series show the migration trends analysed on the results of the 1961 Census. The data are presented in the following seven Tables, which are reproduced upto district level and for all Cities and Town-Groups in the publication "Census of India 1961–Volume II–Andhra Pradesh–Part II–C Cultural and Migration Tables" and these may be referred to for details.

D–I Non-Indian Nationals

D–II Place of Birth

D–III Migrants classified by place of birth and duration of residence in place of enumeration

D–IIIA Migrants from other States and outside India (less than 5 years duration) classified by Age-groups

D–IV Migrants to Cities classified by Sex, broad Age-groups, educational levels and in case of Workers also by Occupational Divisions and Groups

D–V Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities

D–VI Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this book only Tables D–I and D–II showing the Non-Indian Nationals, and other migrants in Cuddapah district are reproduced.

TABLE D–I

NON–INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sex-wise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups *viz.*,

(i) Nationals of Countries in Asia beyond India (including U. S. S. R.)

(ii) Nationals of Countries in Europe (excluding U. S. S. R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of countries in Oceania

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have beeen shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'born in India'.

† Includes four Dutch Nationals (2 Males, 2 Females,) and one German National (1 Male)

TABLE D–II

PLACE OF BIRTH

This Table prepared as in all previous Censuses gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and *vice-versa*. The particulars are given in this Table upto taluk level for Rural areas and upto district level for Urban areas.

TABLE D—II

E - SERIES

HOUSING TABLES

HOUSING TABLES

The Tables in this series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to a Census House was collected on a standardised All India Schedule called 'House List' which is reproduced below :

CENSUS OF INDIA 1961

HOUSE LIST

Name of District.....(Code No. .....)

Name of Island / Taluk / Tehsil / Thana / Anchal / Town.....(Code No. .....)

Name of Village / Ward / Mohalla / (Enumerator's Block).....(Code No. .....)

Line No.	Building number (Municipal or local authority or Census Number, if any)	Building number (Col. 2) with sub-numbers for each Census house	Purpose for which Census House used, *e.g.*, dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc.,	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product (s), repair or servicing undertaken	Average No. of persons employed daily last week (including proprietor, or household members, if working)	Kind of fuel or power if machinery is used
1	2	3	4	5	6	7	8

Description of Census House		Sub-number of each Census Household with Census House number (Column 3)	Name of head of Household	No. of rooms in Census Household	Does the Household live in own or rented house? (a) Own (O), (b) Rented (R)	No. of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
9	10	11	12	13	14	15	16	17	18

The data have been collected uniformly for the first time at the present Census in the above form and is presented in the following five Tables.

E-I Census Houses and the uses to which they are put

E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling

E-III Census Houses used as factories and workshops classified by Industry, *power* and *no power* used and size of employment

E-IV Distribution of sample Households living in Census Houses used wholly and partly as dwellings by predominent material of wall and predominent material of roof

E-V Sample Households classified by number of members and by number of rooms occupied

All the above Tables give information upto taluk level, except Table E-III which contains figures upto the district level only, and also in respect of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, Vol. II-Andhra Pradesh, Part IV-Housing and Establishment Tables" and it may be referred to for full details. In this book only "Table E-I Census Houses and the uses to which they are put" pertaining to the Cuddapah district is reproduced.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

"Census House" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-cum-dwelling, a place of business, workshop, school *etc.*, with a separate entrance. If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common stair case, or a common courtyard, leading to a main gate they are considered as separate Census Houses. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

District/Taluk/Town with population of 50,000 or more	Total Rural Urban	Total No. of Census Houses	Census Houses vacant at the time of House listing	Occupied Census Houses used as											
				Dwellings	Shop-cum-dwellings	Workshop-cum-dwellings	Hotels, sarais, dharamashalas, tourist homes and inspection houses	Shops excluding eating houses	Business houses and offices	Factories workshops and worksheds	Schools and other Educational institutions including training classes, coaching and shop classes	Restaurants sweetmeat shops and eating places	Places of entertainment and Community gathering (Panchayat Ghar)	Public Health and Medical institutions Hospitals, Health Centres Doctor's Clinics, Dispensaries etc.	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)

SCT - SERIES

SPECIAL TABLES FOR
SCHEDULED CASTES AND SCHEDULED TRIBES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables:

SCT-I	Industrial classification of persons at work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes
SCT-II	Age and Marital status for Scheduled Castes and Scheduled Tribes
SCT-III	Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes
SCT-IV	Religion for Scheduled Castes and Scheduled Tribes
SCT-V	Sample Households engaged in Cultivation classified by interest in land and size of land cultivated *in Rural areas only* for Scheduled Castes and Scheduled Tribes

All the above Tables are reproduced upto district level in this book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I	Persons not at work classified by sex, type of activity and educational levels *for Scheduled Castes only*
ST-I	Mother-Tongue and Bilingualism *for Scheduled Tribes*
ST-II	Persons not at work classified by sex and type of activity *for Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures for the taluks are also given in this book in respect of Scheduled Castes or Scheduled Tribes where they are larger in proportion than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these communities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The villagewise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) published in the Notification of the Ministry of Home Affairs New Delhi, dated 29th October, 1956. The list of Scheduled Castes in Andhra Pradesh is given below:

Note: Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Budhism cease to belong to these castes.

(1) Throughout the State:

1 Chalavadi
2 Chamar, Mochi or Muchi
3 Madiga
4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts;

1 Adi Andhra
2 Adi Dravida
3 Arundhatiya
4 Bariki
5 Bavuri
6 Chachati
7 Chandala
8 Dandasi
9 Dom, Dombara, Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali
15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala

21 Paky or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellamalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Malajangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below:

Note: Members of Scheduled Tribes may belong to any Religion.

(1) Throughout the State:

1 Chenchu or Chenchwar
2 Koya or Goud with its sub-sects Rajah or Rasha Koyas Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts:

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Kondareddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia-Bentho Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras-Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts:

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the districts of the State.

An abstract of the total Scheduled Castes and Scheduled Tribes population in Cuddapah district and its percentage to the total general population is given talukwise in the statement below:

District/Taluk	Total Rural Urban	General population	Scheduled Castes population together with percentage to general population	Scheduled Tribes population together with percentage to general population

TABLE SCT-I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the Rural and Urban areas of the district, the population of each Scheduled Caste and Scheduled Tribe classified by Industrial Category of persons at work and Non-Workers by sex. The Table is divided into two parts. *Part A* relates to Scheduled Castes while *Part B* relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them and the sector of Industry in which the working population is engaged. The data are presented for the Rural and Urban areas separately.

TABLE SCT-II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital Status. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population; however the Age-groups are restricted to 0-14, 15-44, 45+ and the Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of the Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group. Such Castewise data by Age and Marital Status for Scheduled Castes and Scheduled Tribes are being given for the first time at the present Census. The Age distribution and Marital Status data will give an indication as to whether the population of a Caste/Tribe is growing or declining.

TABLE SCT-III

EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled Tribe separately for Rural and Urban areas. This Table is divided into *Part A (i)* and *Part A (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Urban areas and *Part B (i)* and *Part B (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Rural areas. In the case of Urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III Part A and in the case of Rural areas the data are given as in Table B-III Part B. This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-III Part A (i)

EDUCATION IN URBAN AREAS ONLY *FOR SCHEDULED CASTES*

Name of Scheduled Caste	Total		Illiterate		Literate (without educational level)		Educational levels

TABLE SCT-IV

RELIGION FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. In both the parts the data are given for Rural and Urban areas. Both the parts of this Table are intended to show the Religion of each Scheduled Caste and Scheduled Tribe. Members of Scheduled Castes can belong only either to the Hindu or the Sikh Religion. Though Scheduled Tribes may belong to any Religion, in this district all of them profess the Hindu faith.

TABLE SCT-V

SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN *RURAL AREAS ONLY*

This Table shows the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. The sizes of landholdings and types of interest in land cultivated adopted in this Table are the same as those adopted in Table B-XI.

TABLE SCT-V Part A

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AREAS ONLY *FOR SCHEDULED CASTES*

Interest in land cultivated	No. of cultivating Households	Households engaged in cultivation by size of land in acres										
		Less than 1	1.0-2.4	2.5-4.9	5.0-7.4	7.5-9.9	10.0-12.4	12.5-14.9	15.0-29.9	30.0-49.9	50+	Unspecified

TABLE SC–I

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS *FOR SCHEDULED CASTES*

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity *viz.*, fulltime students, persons seeking employment for the first time, unemployed but seeking work, and others, by educational levels. The educational levels adopted are broadly illiterate, literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual caste and the figures are exhibited for Total, Rural and Urban population. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

This Table has also been prepared for Rural areas of Sidhout and Rajampet taluks in the district as the percentage of Scheduled Castes population in the Rural areas of the above two taluks exceeds the State's average proportion of 14.88 %.

TABLE ST-I

MOTHER-TONGUE AND BILINGUALISM

FOR SCHEDULED TRIBES

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the Total, Rural and Urban areas in the district. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary language is indicated in brackets after the subsidiary language under column 6 of the Table.

TABLE ST–II

PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY

FOR SCHEDULED TRIBES

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I *viz.*, fulltime students, persons seeking employment for the first time, persons unemployed but seeking work and others. In this Table the particulars are given according to the individual Tribe while in Table SC–I similar particulars in respect of Scheduled Castes are given for Total Scheduled Castes as a whole by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

FESTIVALS

Name and description of the deity connected with the fair or festival	Estimated congregation—Local or otherwise—Do all communities participate?	Any handicrafts or artistic works, brought to the fair or festival for sale deserving a mention	Facilities for visitors, if any, and other special features	L.C. No.
(7)	(8)	(9)	(10)	(1)
TALUK				
Gangama, image in female form	4 to 5 thousands; local and from the neighbouring villages; all communities	A few shops	There are choultries. Bhajanas, sport, magic, swings, circus and kolatams afford entertainment to the pilgrims.	1 (c)
Sri Chennakesavaswamy, stone image in human form resembling that of Sree Venkateswara of Tirumalai Hills, with four hands wearing sankhu, chakra, etc.	10,000; local and from various parts of this district and the neighbouring districts; all communities	Utensils, eatables, lanterns mirrors, combs, pictures, photos, books, handloom and mill cloth, earthen and wooden toys	There are choultries. The place takes its name from the sacred hill of Pushpagiri the most important religious centre in the district. Vaishnavaites sometimes call it Tirumala Madhya Ahobilam from its position being mid-way between the famous shrines at Ahobilam in Kurnool and Tirumalai while Saivites speak of it as Madhya Kailasam as it is situated between Varanasi and Chidambaram which are known to devout Saivaites as Uttara and Dakshina Kailasam. There is one fantastic story to account for the name of 'Pushpagiri' or Hill of Flowers. Some say that a Brahmin desirous of mixing the bones of his father in holy Ganges passed this way and setting down his burden went to bathe in Pennar. On his return he found the bones had been turned into Jasmine flowers. Content with this miracle and assured that his father's soul had gone to Heaven, he resolved to go no further and cast the flowers upon the waters of the Pennar. The place where the miraculous conversion of bones into flowers took place gradually assumed the form of a hill to which the name of Pushpagiri was given to mark its wonderful origin.	14 (e)
Ankalamma	Local congregation; Hindus	..	..	16
Sri Venkateswara Swamy, black stone image in human form beautifully sculptured	2,000; local and from the nearby villages; all communities	A few shops	There are choultries. Free feeding is arranged to all communities.	25 (a)
