## MOTIF

' Anandwan '—a garden of happiness for thousands of leprosy patients in the country—is at Varoda town in Chandrapur district. The prophet of 'Anandwan'—Baba Amte—represents hope in an area of darkness to the thousands of leprosy patients. No one has done so much to alleviate the suffering of these forgotten people as the legendary social activist from Maharashtra. His tremendous work for the sick and handicapped has earned him many laurels including ' Padmashree ' and Ramon Magsaysay Award.

# FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census hand book is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part–A related to village and town directory, Part–B to village and town PCA and Part–C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC & ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class–I and Class–II towns (Statement IV–A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part–A of the volume contains village and town directory and Part–B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,
the 26th April 1982.

## ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping etc. deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

*Note.*— The source for the total area figures in respect of the districts is the Surveyor General, of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not therefore strictly add upto the corresponding figures shown against the district.

Names of towns treated as such for the first time in 1971 which continue as towns in 1981 have been marked with an asterisk (*) on the left.

Names of towns treated as such for the first time in 1981 have been printed in italics.

## *APPENDIX 1 TO SUMMARY TABLE 1*

*Tahsilwise number of Villages with population of 5,000 or over and of Towns with population under 5,000*

( Tahsils which have nothing to show for this statement have been omitted from presentation )

| District/Tahsil | Villages with population of 5,000 or over | | | Towns with population under 5,000 | | |
|---|---|---|---|---|---|---|
| | Number | Population in the concerned villages | Percentage to rural population of the respective District/ Tahsil | Number | Population in the concerned towns | Percentage to urban population of the respective District/ Tahsil |

# ANALYTICAL NOTE

## HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive accou nt of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other states in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts–Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health subcentres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

### Brief History of the District

The ancient history of the district earlier known as Chanda and now Chandrapur is shrouded in mystery. Tradition and legends tell that the name of this place was Lokapura which was first changed to Indupur and subsequently to Chandrapur. During the period of the British Raj, Chandrapur came to be called as Chanda which was again changed to its original name Chandrapur around 1964. Other places of the region in ancient times include Wairagad, Kosala, Bhadrawati and Markanda. Hindu and Budhist kings are said to have ruled the area for a long time. Later on Mana Chiefs who ruled the Chandrapur were over taken by Gonds around 9th century. Gond kings ruled the area till 1751 when Maratha period started. Raghuji Bhonsale, the last king of the dynasty, died heirless in 1853 and Nagpur province together with Chandrapur was declared annexed to the British Empire.

Till as late as 1854 Chandrapur formed an independent district and upto 1874 it comprised of three tahsils viz; Mul, Warora and Brahmapuri. In 1874, however, upper Godavari district of Madras was abolished and four tahsils were added to Chandrapur district to form one tahsil with Sironcha as its headquarters. In 1895, the headquarters of one of tahsils was transferred from village Mul to Chandrapur. 1905 witnessed the creation of a new tahsil with headquarters at Gadchiroli by effecting the transfer of Zamindari estates from Brahmapuri and Chandrapur tahsils. A small Zamindari tract from Chandrapur district was transferred to newly formed Durg district in 1907. In the same year an area of about 1,560 $Km^2$ comprising of three divisions of the lower Sironcha tahsil namely Cherla, Albaka and Nugur were transferred to Madras State.

No major changes occurred in the boundaries of the district or its tahsils between 1911–1955.

Consequent upon the reorganisation of states in 1956, the district was transferred from Madhya Pradesh to Bombay State. In the same year Rajura tahsil, a part of Adilabad district of Hyderabad State, was transferred to Nanded district. Subsequently it was transferred to Chandrapur district in 1959. The district became part of State of Maharshtra since its creation in May 1960.

At the time of 1961 census, the district comprised of 6 tahsils which in themselves included 2,755 inhabited villages and 5 towns. At the time of 1971 census, the district had the same 6 tahsils of 1961 but inhabited villages and towns increased to 2,840 and 7 respectively. The number of inhabited villages and towns further increased to 2,978 and 8 respectively at the time of 1981 census. The main reason for substantial increase in number of inhabited villages was upgrading of hamlets/wadis in the district.

### Location, Relief and Drainage

Chandrapur district lies between 18°41′ and 20°50′ north latitude and 78°48′ and 80°55′ east longitude. It is surrounded by Wardha, Nagpur and Bhandara districts in the north, Madhya Pradesh in the east, Andhra Pradesh in the south and Wardha and Yavatmal districts in the west.

The district is spread over an area of 25,923 $km^2$ and is inhabited by 2,055,642 persons. In fact it is the biggest district of Maharashtra, so far as area is concerned. It is, however, a sparsely populated district and ranks 13th when compared with the population of other districts of the state.

The district lies in the Godavari basin. Wardha, Wainganga and Indravati the three tributories of Godavari respectively drain the western, central and eastern regions of the district.

The main rivers of the district are Wardha, Wainganga, Pranhita, Indravati and Godavari. The whole of the western border is bounded partly by Wardha, Pranhita and Godavari rivers. Wardha river receives Wainganga and Erai during its south-easterly direction. After its confluence with the Wainganga the combined stream is known as Pranhita. The Pranhita joins the Godavari near Sironcha. Further south at the southern corner of Sironcha tahsil, Indravati (which drains eastern part of the district) flows in the Godavari along the south-east boundary of the district.

Wainganga enters the district near the centre of the northern boundary and slices it into two unequal parts, the eastern part containing Warora, Chandrapur, Brahmapuri and Rajura tahsils and the eastern part being composed of Gadchiroli and Sironcha tahsils. This river receives numerous tributories on either bank and drains the entire central portion of the district. Chief tributories of the Wainganga are Garhavi, Khobragadi, Kathani and Potphodi on the left bank and Andhari on the right bank.

Chimur and Mul hills constitute the main hill ranges of the district and serve as a watershed between the valleys of the Wardha and Wainganga rivers. The Chimur hills commence east of Chimur in the north of the Warora tahsil and stretch south-wards. The Mul hills lie further to the south of Chimur hills. East of and parallel to the Chimur hills, runs a range known as Parasgarh hills. It forms the boundary between the Warora and Brahmapuri tahsils.

The other important hill ranges lie in the south. They are mainly the Tipagarh range, the Sirkonda range, the Gadulgutta hills and the Surjagarh hills. To the south-west of Surjagarh hills, beyond Indravati river, lies the famous Bhamaragad hill which over looks the confluence of three mountain rivers and is known as an unrivalled beauty spot in the district.

The hills in the western half of the district are generally of little height and serve as watersheds between the numerous valleys formed by the tributories of Wardha and Wainganga. The hills in the southern region are, however, of considerable height.

**Climate**

Chandrapur is the hottest district of Maharashtra and the district headquarter records the temperature higher by a degree or so than Nagpur, in hot weather. Nights are, however, tolerable but for May and June the hottest months of the year, which are some what uncomfortable. The mean daily maximum temperature in May is about 43°C and the mean daily minimum temperature is about 29°C.

Since the major parts of the district are surrounded by dense forests, the atmosphere is chilly, damp and sultry throughout the rainy season.

The rainy season sets in usually in the second or third week of June and last till the middle of October. The cold season commences from the beginning of November and lasts till the middle of February. February is characterised by the blowing of wild and violent winds heralding the approach of hot season which lasts till the middle of June.

The rainfall in the district is, more or less assured and the south-western monsoon is the main source of rains. Intensity of the rainfall increases from west towards east. The district may be divided into he following three rainfall zones :—

(i) Gadchiroli, Sironcha and Brahmapuri constitute the eastern zone and receive heavy rainfall. The mean rainfall in this zone is about 1,524 milimetres.

(ii) The central zone is comprised of Chandrapur and Rajura tahsils. This zone also receive sufficient rainfall and the average rainfall is 1,302 milimetres.

(iii) Warora tahsil makes the western zone and receives moderate rainfall of 1,216 milimetres.

Intensity of rainfall is highest in the month of July.

**Soil**

The soil of the district is well defined and conducive for growing crops of various kinds. The most fertile soils are found in the Wardha and Wainganga valleys. The numerous varieties of soil are known by many local names yet they are grouped under the following representative classes :- Kali Kanhar, Barsi Kanhar, Morand, Khurdi Wardi, Retari or Bardi, Pandhari and Kachhar. On the extreme west, on the left bank of Wardha and subsequently the Godavari, there is a broad strip of black soil known as Kali. It is retentive of moisture and thus suitable for the field crops such as cotton, wheat, gram, jowar and linseed. Further inland, but immediately adjoining this open tract there is a range of small hills with poorer soil at their feet and in the intervening strips. This soil is of little use without irrigation. Given the irrigation facility it is ideal for growing rice and sugarcane. Further eastwards, on either tank of the Wainganga the black loam reappears and is accompanied by a few rice growing villages. Eastward of Wainganga valley, the soil becomes poor and hills are in abundance. Rice is the staple crop of this tract.

**Census Houses and Households**

Columns 4 and 5 of the primary census abstract reveal the total number of occupied residential houses as also the households in the district. In Indian Census a 'Census House' is a building or a part there of having a main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant, residential, non-residential or both. A 'household' is a group of persons who commonly live together and take their meals from a common kitchen, unless the exigencies of work would prevent them from doing so. A 'household' may be comprised of persons related by blood or of unrelated persons or a mix of both. There may

be a single member or more than one member households. Households comprised of unrelated persons termed as 'institutional households' include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. Houseless population or houseless households include persons who do not have any fixed place of residence but go on moving from place to place, camp at night, or just live on the streets, pavements, in gardens or in open places.

In 1981 census, the total number of occupied residential house has been returned at 382,047 accommodating 400,892 households. This implies that there are some houses shared by more than one household. Further, the average size of a household in case of the district works out to 5.13 persons which is lower than the state's average size of household of 5.37 persons,

**Distribution of Population in Rural and Urban Areas**

At the 1981 census, the population of the district has been returned at 2,055,642 comprising of 1,045,692 males and 1,009,950 females. This population is spread over an area of 25,923 km². When compared with the figures at the state level, it is seen that while the population of the district constitutes 3.27 per cent of the population of the state, its area forms 8.43 per cent of the states area. The district is essentially rural in character, 87.27 per cent of its population lives in countryside.

From amongst the six tahsils of the district, Chandrapur is the most populous one with a population of 550,165 persons and Rajura has the least population of 167,784 persons. In other words the least populous tahsil is about one third of the most populous one. Other tahsils in order of their population sizes are : Gadchiroli (457,898), Waroda ( 370,530 ), Brahmapuri ( 329,827 ) and Sironcha (179,438). ( Table 1 )

TABLE 1

*Population, Number of Villages and Towns, 1981*

| Sr. No. | Name of Tahsil | Population | | | | | | | | | No. of villages | | No. of towns |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Total | | | Rural | | | Urban | | | | | |

| 4 | Gadchiroli .. | 457,898 | 229,831 | 228,067 | 442,395 | 222,140 | 220,255 | 15,503 | 7,691 | 7,812 | 1,016 | 934 | 1 |
| 5 | Sironcha .. | 179,438 | 91,885 | 87,553 | 179,438 | 91,885 | 87,553 | .. | .. | .. | 654 | 579 | .. |
| 6 | Rajura .. | 167,784 | 85,806 | 81,978 | 150,022 | 76,591 | 73,431 | 17,762 | 9,215 | 8,547 | 279 | 253 | 2 |
| | District total .. | 2,055,642 | 1,045,692 | 1,009,950 | 1,793,907 | 908,497 | 885,410 | 261,735 | 137,195 | 124,540 | 3,454 | 2,978 | 8 |

For census purposes, a revenue village is a basic unit in the rural areas. A village may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas, on the other hand, are specially defined for census purposes. The criteria adopted for 1981 census is :

(a) All places with a municipality, corporation or cantonment board or notified town areas.

(b) All other places which satisfy the following criteria :

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(iii) A population of at least 400 persons per km².

**Size Class and Status of Towns**

To study in detail the various demographic characteristics, towns have been divided into the following classes by population size :

| | | |
|---|---|---|
| Class I | .. | 100,000 and above |
| Class II | .. | 50,000—99,999 |
| Class III | .. | 20,000—49,999 |
| Class IV | .. | 10,000—19,999 |
| Class V | .. | 5,000— 9,999 |
| Class VI | .. | Below 5,000 |

For 1981 census, Majari has been treated as an urban place and considered as a town for census purposes (Table 2).

TABLE 2

*New Town/Towns declassified in 1981 Census*

| Name of towns 1 | Population 1981-Census 2 |
|---|---|
| (*a*) Added— | |
| (*i*) Majari (C. T.) .. .. | 1,894 |
| (*b*) Declassified—Nil | Nil |

Of the 8 towns in the district, Chandrapur, Ballarpur and Waroda qualify to be Class I, II and III towns respectively. Desaiganj, Rajura and Ghugus are Class IV towns, while Sasti and Majari are Class V and VI towns respectively (Statement–I).

**Urban Agglomeration**

There is no urban agglomeration in this district.

**Standard Urban Area**

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are :—

(*i*) It should have a core town of a minimum population of 50,000 ;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Chandrapur standard urban areas in Chandrapur district are as follows :–

Chandrapur SUA : Urban Components :

1. Chandrapur City (M)

Rural Components :

1. Dewai Govindpur Raiyyatwari 2. Dewai Govindpur Tukam 3. Wadgaon 4. Lakhamapur Raiyyatwari.

In all there are 2,978 inhabited villages in the district. Of these 1,004 constitute (33.72%) of all the villages and have a population between 500–1,999 (Table 3).

TABLE 3

*Distribution of inhabited villages by population ranges*

| Range of Population 1 | No. of villages in each range 2 | Percentage of villages in each range 3 |
|---|---|---|
| —200 .. .. | 967 | 32.47 |
| 200—499 .. .. | 897 | 30.12 |
| 500—1,999 .. .. | 1,004 | 33.72 |
| 2,000—4,999 .. .. | 87 | 2.92 |
| 5,000—9,999 .. .. | 15 | 0.50 |
| 10,000+ .. .. | 8 | 0.27 |
| All ranges .. | 2,978 | 100.00 |

There are 967 (32.47%) villages with a population of less than 200 each. Against this 8 villages (0.27%) are such as have more than 10,000 population. The remaining 897,87 and 15 fall respectively in the population range of 200–499, 2,000–4,999 and 5,000–9,999. For a broader classification villages have been further grouped as : small sized population below (500), medium sized (500–1,999), large sized (2,000–4,999) and exceptionally large sized (5,000+). Accordingly there are 1,864 small sized, 1,004 medium sized, 87 large sized and 23 exceptionally large sized villages in the district. It may, however, be said that an inhabited village on an average has a population of 602 persons. This is much lower than the average size of the village in the state (1,037).

**Population Growth, Density and Sex Ratio**

At 1981 census the population of the district has been returned at 2,055,642 persons against 1,640,137 persons recorded in 1971. Thus the district has added 4,15,505 persons during the decade. In other words the district has registered a growth rate of 25.33 per cent which is higher than the state growth rate of 24.54 per cent during the same period. Within the district Chandrapur tahsil has registered the highest growth rate of 37.27 per cent followed by Rajura tahsil with 33.23 per cent. Sironcha tahsil occupies the third place with a growth rate of 27.71 per cent. The remaining three tahsils have revealed moderate growth rates ranging between 17.21 per cent and 19.96 per cent which are obviously lower than the district growth rate (Table 4).

TABLE 4

*Decadal Change in Distribution of Population*

| Name of Tahsil | Population | | | | | | Percentage decadal (1971–81) variation | | |
|---|---|---|---|---|---|---|---|---|---|
| | 1971 | | | 1981 | | | | | |
| 1 | Total 2 | Rural 3 | Urban 4 | Total 5 | Rural 6 | Urban 7 | Total 8 | Rural 9 | Urban 10 |
| 1 Chandrapur .. | 400,781 | 283,117 | 117,664 | 550,165 | 357,776 | 192,389 | +37.27 | +26.37 | +63.51 |
| 2 Waroda .. | 309,798 | 284,421 | 25,377 | 370,530 | 334,449 | 36,081 | +19.60 | +17.59 | +42.18 |
| 3 Brahmapuri .. | 281,394 | 281,394 | .. | 329,827 | 329,827 | .. | +17.21 | +17.21 | .. |
| 4 Gadchiroli .. | 381,723 | 369,940 | 11,783 | 457,898 | 442,395 | 15,503 | +19.96 | +19.59 | +31.57 |
| 5 Sironcha .. | 140,506 | 140,506 | .. | 179,438 | 179,438 | .. | +27.71 | +27.71 | .. |
| 6 Rajura .. | 125,935 | 113,659 | 12,276 | 167,784 | 150,022 | 17,762 | +33.23 | +31.99 | +44.69 |
| District total .. | 1,640,137 | 1,473,037 | 167,100 | 2,055,642 | 1,793,907 | 261,735 | +25.33 | +21.78 | +56.63 |

As would be seen from the same Table 4, the urban population has registered a much higher growth rate than the rural one during the decade 1971–81. The rate of growth in the former case has been of the order of 56.63 per cent ; whereas it has been just 21.78 per cent in the rural areas. Again, within the district the highest urban growth rate 63.51 per cent has been recorded in Chandrapur tahsil. Other tahsils have, however, revealed a growth rate lower than the district average. Higher growth rate in the urban population may be due to the pull factor of migration that works in favour of the urban areas in general. (Table 5).

TABLE 5

*Growth, Density and Sex-ratio of urban population in the district in relation to the state*

| Census Year | District | | | | | | State | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Total population | Urban population | %Urban population | Decadal percentage variation in urban population | Density (population per Km.²) | Sex ratio (No. of females per 1,000 males) | Total population | Urban population | %Urban population | Decadal percentage variation in urban population | Density (population per Km.²) | Sex ratio (No. of females per 1,000 males) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1951 | 1,052,975 | 96,435 | 9.16 | +21.46 | N.A. | 979 | 32,002,564 | 9,201,013 | 28.75 | +62.42 | N.A. | 807 |
| 1961 | 1,238,070 | 95,690 | 7.73 | —0.77 | 1,396 | 901 | 39,553,718 | 11,162,561 | 28.22 | +21.32 | 1,694 | 801 |

| 1981 | 2,055,642 | 261,735 | 12.73 | +56.63 | 2,305 | 908 | 62,784,171 | 21,993,594 | 35.03 | +39.99 | 3,736 | 850 |

N. A.— Not Available

As discernable from Table 5, it may be seen that Chandrapur district is very much less urbanised. Only 12.73 per cent of the total population is living in urban areas as per 1981 census. The same percentage was 9.16 in 1951. It, however, declined to 7.73 per cent in 1961 but again registered an upward trend in 1971 with the proportion of urban population standing at 10.19 per cent. In 1981 the same has been found at 12.73 per cent which is much below the state average figure of 35.03 per cent. As regards the decadal variation, the same was found at 21.46 per cent in 1951 against the corresponding state's variation of 62.42 per cent. A negative growth was, however, observed in 1961, –0.77 per cent. A urban growth rate of 74.63 per cent has been revealed in 1971 against the corresponding urban growth of 40.75 per cent at the state level. In 1981, the same has sharply declined to 56.63 per cent at the district level and mildly to 39.99 per cent at the state level.

Looking at the trend of the growth retrospectively it is seen that during the decade 1901–11 the population of the district has increased by nearly 27 per cent. This rate of growth has been surpassed in 1971 only 32.48 per cent. The highest ever growth rate in 1971 can be attributed to the heavy inflect of refugees from Bangla Desh. Needless to say, the refugees from Bangla Desh were dispersed over various states of the country and Chandrapur district of this state had to make room for many such refugees. In the decade 1911–21, influenza epidemic took a heavy toll of life and the same is revealed by a decrease of population by about 2 per cent. In the successive decades till 1961 the population of the district increased at moderate rates with some fluctuations.

As already said the district is the largest district of the state and at the same time it is sparsely populated also. The density of 79 persons per km² is the lowest in the state. It stands no where when compared with the states density of 204 persons per km². Sironcha is the least dense tahsil of the district with an average density of 22 persons per km². Gadchiroli is yet another tahsil with an average density lower than the one found at district level 62 persons per km². The remaining tahsils, however, have a density higher than the district average. Amongst these Chandrapur has the highest density of 181 persons per km².

TABLE 6

*Distribution of villages by density*

| Range of density (per km.²) | Total No. of villages in each density range | Percentage of villages in each density range |
|---|---|---|
| 1 | 2 | 3 |
| —10 .. .. | 124 | 4.16 |
| 11—20 .. .. | 127 | 4.26 |
| 21—50 .. .. | 407 | 13.67 |
| 51—100 .. .. | 605 | 20.32 |
| 101—200 .. .. | 877 | 29.45 |
| 201—300 .. .. | 399 | 13.40 |
| 301—500 .. .. | 254 | 8.53 |
| 501+ .. .. | 165 | 5.54 |
| Not known .. .. | 20 | 0.67 |
| All density ranges .. | 2,978 | 100.00 |

In the district there are 124 villages each having a density of upto 10 persons per km². Against this 165 villages have an average density of more than 500 persons per km². The largest chunk of villages numbering 877 have an average density

of 101–200 persons per km². The remaining villages fall in various ranges as would be seen in Table–6. There are, however, 20 villages in whose case density could not be worked out for want of area figures.

In the urban areas of the district the density has revealed an increasing trend since 1961. Against 1,396 persons per km² in 1961, the same increased to 1,544 persons per km² in 1971. It again gave out an upward trend in 1981 with an average density of 2,305 persons per km². Among the various towns in the district, Rajura recorded the highest density (12,434) as per 1981 census (Statement I).

At 1981 census the sex ratio in the district has been found at 966 females per 1,000 males. This is some what higher than states sex ratio of 937 females per 1,000 males. The following table reveals the trend of sex ratio since 1901 in the district as also in the state.

TABLE 6 (i)

*Sex Ratio 1901–1981*

| Year | District | State |
|---|---|---|
| 1901 | 1,023 | 978 |
| 1911 | 1,005 | 966 |
| 1921 | 1,004 | 950 |
| 1931 | 990 | 947 |
| 1941 | 989 | 949 |
| 1951 | 996 | 941 |
| 1961 | 985 | 936 |
| 1971 | 970 | 930 |
| 1981 | 966 | 937 |

The general trend of the sex-ratio in the district as would be seen from the above table is decreasing one since 1901. It has come down from 1,023 in 1901 to 966 in 1981. More or less similar decreasing trend is observed for the state but with reduced margin of variation. It has varied between 930 and 978 during the same period. At each census since 1901 the sex ratio of the district has been found higher than that of the state. Within the district, the sex-ratio differs from tahsil to tahsil. Brahmapuri tahsil with a sex-ratio of 996 ranks at the top, followed by Gadchiroli tahsil with sex ratio of 992. Chandrapur tahsil is at the bottom with 942 females per 1,000 males. For other tahsils Table 6 (ii), given below, may be seen.

TABLE 6 (ii)

*Sex Ratio by Tahsils, 1981*

| District/Tahsils | Females per 1,000 males |
|---|---|
| **Chandrapur District** .. | **966** |
| Chandrapur tahsil .. | 942 |
| Waroda tahsil .. | 955 |
| Brahmapuri tahsil .. | 996 |
| Gadchiroli tahsil .. | 992 |
| Sironcha tahsil .. | 953 |
| Rajura tahsil .. | 955 |

1981 census reveals that urban sex-ratio (908) in the district is much higher than that for the state as a whole (850). Prior to 1981 the sex ratio in urban areas has shown a downward trend since 1951 in the district (Table 5).

**Scheduled Castes and Scheduled Tribes**

Scheduled castes and scheduled tribes are two such sections of the Indian population as are backward since antiquity. The backwardness of these sections has duly been recognised and their uplift has been enshrined in the constitution of the Indian Republic. With a view to ameliorate their socio-economic condition the government need data relating to socio-economic, cultural and demographic characteristics of these communitics. In fact census organisation is the only agency that can make available such data as it reaches the threshold of each household at the time of census. One of the highlights of 1981 census, as also that of 1971 and 1961 was the collection of detailed information on the socio-economic characteristics of the members of these two communities. In fact there is no standard definition of a Scheduled Caste or a Scheduled Tribe. Scheduled Castes, however, include such of the castes, races or tribes as are declared so by the President of India by public notification under article 341 (i) of the Indian Constitution. Similarly, Scheduled tribes include all such tribes or tribal community or part or group within such tribes or tribal communities as are declared so by the President under article 342(i) of the Indian Constitution. For Maharashtra State, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively and the same are listed below.

**Scheduled Castes and Scheduled Tribes in Maharashtra State**

**I. LIST OF SCHEDULED CASTES**

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.

43. Sawar, Sawara.
44. Thakur, Thakar. Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded. Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

At 1981 census the Scheduled caste population in the district has been returned at 134,322 persons comprising of 68,681 males and 65,641 females. Thus the Scheduled caste population constitutes 6.53 per cent of the population of the district as against 4.69 per cent in 1971. However the persent proportion of scheduled caste population in the district is lower than the corresponding proportion of 7.14 per cent found at the state level. As regards the rural/urban dispersal of scheduled caste population, 83.78 per cent of total scheduled caste population have been found living in the countryside and the remaining 16.22 per cent in the urban areas of the district. Within the district the highest concentration of such population has been found in Sironcha tahsil 11.39 per cent. From amongst the 2,978 inhabited villages in the district, 1,418 (47.62%) do not have Scheduled Caste population at all. Of the remaining, 868 (29.15%) villages have upto 5 per cent of such population. Against this, there are 91 villages (3.05%) which have such a population to the tune of more than 30 per cent.

Another 298, 151, 81 and 71 villages have the Scheduled Caste population respectively in the percentage range of 6–10, 11–15, 16–20 and 21–30, as is clear from the Table 7.

TABLE 7

*Proportion of scheduled caste population to total population in the villages*

| Percentage range of scheduled caste population to total population 1 | No. of villages in each range 2 | Percentage of villages in each range 3 |

| All ranges .. | 2,978 | 100.00 |

Table 7 (i) reveals the tahsilwise proportion of scheduled caste and scheduled tribe population to the total population in the district for 1971 and 1981.

TABLE 7 (i)

*Scheduled Caste and Scheduled Tribe Population 1971 and 1981*

| District/Tahsil 1 | Percentage of Scheduled Caste population to total population | | Percentage of Scheduled Tribe population to total population | |
|---|---|---|---|---|
| | 1971 2 | 1981 3 | 1971 4 | 1981 5 |
| **Chandrapur District** .. | 4.69 | 6.53 | 14.11 | 26.73 |
| Chandrapur tahsil .. | 4.20 | 6.34 | .. | 15.60 |
| Waroda tahsil .. | 4.12 | 6.34 | .. | 26.41 |
| Brahmapuri tahsil .. | 2.71 | 4.92 | .. | 21.74 |
| Gadchiroli tahsil .. | 3.79 | 5.09 | 32.28 | 34.06 |
| Sironcha tahsil .. | 11.97 | 11.39 | 52.90 | 52.74 |
| Rajura tahsil .. | 6.80 | 9.53 | 26.87 | 25.93 |

Scheduled tribe population of the district stands at 549,503 persons comprising of 276,657 males and 272,846 females. In other words, scheduled tribe population forms 26.73 per cent of the total population of the district which is much higher than the one observed at the state level 9.19 per cent. In 1971 the scheduled tribes constituted only 14.11 per cent of the total district population. It is seen that during 1971–81 the proportion of scheduled tribe population registered an increase by about 12 points. Spurt in the proportion of scheduled tribe population in the district as in the other parts of the state is primarily the result of the removal of area restrictions for recognising the tribal population as scheduled tribe in the state. As is clear from table 7 (i) Chandrapur, Waroda and Brahmapuri tahsils had no scheduled tribe population in 1971, but in 1981 the population of this community constituted 15.60 per cent, 26.41 per cent and 21.74 per cent respectively of their respective populations.

95.69 per cent of the scheduled tribe population has been found inhabiting the rural areas of the district and the remaining 4.31 per cent have been found in the urban areas. The concentration of scheduled tribe population in the rural areas of the district may be due to the fact that substantial area of the district, comprises of mountains and forests inducing the settlement of scheduled tribe population.

There are 217 villages (7.29%) in the district which have no scheduled tribe population at all. On the contrary 1,360 (45.67%) have such population to the extent of more than 51 per cent. Again 226 (7.59%) have upto 5 per cent scheduled tribe population. Of the remaining inhabited villages 375, 291, 226 and 283 have such population in the percentage range of 6–15, 16–25, 26–35 and 36–50 respectively (Table 8).

TABLE 8

*Proportion of scheduled tribe population to total population in the villages*

| Percentage range of scheduled tribe population to total population 1 | No. of villages in each range 2 | Percentage of villages in each range 3 |
|---|---|---|
| No S. T. Population .. | 217 | 7.29 |
| —5 .. .. | 226 | 7.59 |
| 6—15 .. .. | 375 | 12.59 |
| 16—25 .. .. | 291 | 9.77 |
| 26—35 .. .. | 226 | 7.59 |
| 36—50 .. .. | 283 | 9.50 |
| 51+ .. .. | 1,360 | 45.67 |
| All ranges .. | 2,978 | 100.00 |

In urban areas, the scheduled castes and scheduled tribes constitute 8.33 per cent and 9.05 per cent of the total urban population respectively (Table 9).

TABLE 9

*Proportion of Scheduled Castes/Scheduled Tribes Population in towns*

| Name and civic status of the town 1 | Total population 2 | Total scheduled caste population 3 | Total scheduled tribe population 4 | Percentage of scheduled caste population to total population 5 | Percentage of scheduled tribe population to total population 6 |
|---|---|---|---|---|---|
| Ballarpur (M. Cl) .. .. | 61,398 | 5,143 | 4,934 | 8.38 | 8.04 |
| Chandrapur City (M. Cl) .. .. | 115,777 | 6,814 | 12,429 | 5.89 | 10.74 |
| Desaiganj (M. Cl) .. . | 15,503 | 809 | 1,182 | 5.22 | 7.62 |
| Ghugus (C. T.) .. .. .. | 15,214 | 2,084 | 752 | 13.70 | 4.94 |
| Majari (C. T.) .. .. .. | 1,894 | 125 | 174 | 6.60 | 9.19 |
| Rajura (M. Cl) .. .. .. | 10,569 | 892 | 1,069 | 8.44 | 10.11 |
| Sasti (C. T.) .. .. .. | 7,193 | 3,177 | 268 | 44.17 | 3.73 |
| Waroda (M. Cl) .. .. .. | 34,187 | 2,747 | 2,883 | 8.04 | 8.43 |
| All towns .. | 261,735 | 21,791 | 23,691 | 8.33 | 9.05 |

Among the towns, Sasti town has 44.17 per cent of its 1981 population as scheduled caste population. With respect to other towns the proportion ranges between 5.22 per cent and 13.70 per cent. Highest concentration of 10,.74 per cent of scheduled tribe population has, however, been observed in Chandrapur town followed by Rajura town with 10.11 per cent.

**Literacy**

Any person who is able to both read and write with understanding in any language is recorded as a literate by the Indian Census. Educationally the district appears to be a very backward. At the 1981 census, the district literacy rate was 34.69 per cent which is much lower than the average literacy rate of the state returned at 47.18 per cent. Amongst the various districts of the state, Chandrapur ranks 23rd in the field of literacy. Positive corelation between the size of the village and literacy rate can be observed from Table 10.

TABLE 10

*Literacy rates by population ranges of villages*

| Range of population | No. of villages in each range | Literacy rate |
|---|---|---|
| —200 .. | 967 | 12.24 |
| 200—499 .. | 897 | 24.35 |
| 500—1,999 .. | 1,004 | 31.04 |
| 2,000—4,999 .. | 87 | 33.63 |
| 5,000—9,999 .. | 15 | 43.90 |
| 10,000+ .. | 8 | 51.81 |
| All ranges .. | 2,978 | 31.28 |

Within the district the literacy is highest in Waroda tahsil (44.00%). Chandrapur occupies second place with a literacy rate of 41.22 per cent. Brahmapuri also has a literacy rate above the district average (35.45%). The remaining 3 tahsils have revealed a literacy rate below the district average.

From among the various towns of the district, Waroda has returned the highest literacy rate of 67.04 per cent which is higher than the average urban literacy rate of 58.06 per cent. Chandrapur town ranks second with a literacy rate of 64.50 per cent. All other towns have literacy rates lower than the district average (Table 11).

TABLE 11

*Literacy rates for towns*

| Name and civic status of the town 1 | Literacy rate 2 |
|---|---|
| Ballarpur (M. Cl.) .. | 51.47 |
| Chandrapur (M. Cl.) .. | 64.50 |
| Desaiganj (M. Cl.) .. | 46.66 |
| Ghugus (C. T.) .. | 38.75 |
| Majari (C. T.) .. | 51.16 |
| Rajura (M. Cl.) .. | 56.86 |
| Sasti (C. T.) .. | 37.04 |
| Waroda (M. Cl.) .. | 67.04 |
| All towns . | 58.06 |

In a span of last 80 years the literacy in the district progressed from 1.94 per cent in 1901 to 34.69 per cent in 1981. Progress in literacy from census to census since 1901 is revealed in the Table 11 (i).

TABLE 11 (i)

*Progress of Literacy, 1901–81*

| Year | Total | Males | Females |
|---|---|---|---|
| 1901 | 1.94 | 3.85 | 0.07 |
| 1911 | 2.36 | 4.59 | 0 15 |
| 1921 | 2.95 | 5.57 | 0.42 |
| 1931 | 3.50 | 6.49 | 0 49 |
| 1941 | 6.99 | 12.52 | 1.40 |
| 1951 | 10.90 | 19.20 | 2.50 |
| 1961 | 17.27 | 28.58 | 5.79 |
| 1971 | 26.77 | 38.63 | 14.54 |
| 1981 | 34.69 | 46.73 | 22.22 |

As would be seen from the above table literacy percentage has increased about 10 times during the last 50 years. It has appreciably progressed especially since the dawn of independence. As regards the literacy in males the same has increased from 3.85 per cent in 1901 to 46.73 per cent in 1981. Female literacy has also picked up appreciably. From 0.07 per cent in 1901, the same has been found at 22.22 per cent in 1981. From the Table 11 (i), it can be seen that sex differentials in literacy is narrowing down though it continues to be wide in itself. Like male-female differentials there exists disparity in the literacy rates of rural and urban areas. As against 31.28 per cent of literates in rural areas as per 1981 census, there are 58.06 per cent literates in urban areas of the district. A satisfactory upward trend is ditcernable both in case of males as also in females of rural and urban areas. Even then the district lags much behind the other districts of the state.

**Working Population**

'Work' may be defined as participation in an economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction.

There has been some conceptional change for defining the worker at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered. Conceptually, the main workers plus the marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Further, for 1981 census, on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers i. e. cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categgories of workers in 1971 and 1961.

For main workers major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties, students, dependants, retired persons, rentiers, beggars are some of the categories grouped as non-workers.

At 1981 census, the main workers in the district constituted 42.80 per cent of the population. The marginal workers accounted for 7.23 per cent and the remaining 49.97 per cent were recorded as non-workers (Table 12).

TABLE

*Literate Workers, Non-Workers, Scheduled*

| Name of tahsil | Total Rural Urban | Total Population | | | Percentage of | | | | |

| 42.80 | 54.59 | 30.59 | 7.23 | 2.02 | 12.63 | 50.03 | 56.61 | 43.22 | 49.97 | 43.39 | 56.78 |
| 45.08 | 56.00 | 33.88 | 8.09 | 2.15 | 14.18 | 53.17 | 58.15 | 48.06 | 46.83 | 41.85 | 51.94 |
| 27.13 | 45.26 | 7.16 | 1.37 | 1.17 | 1.59 | 28.50 | 46.43 | 8.75 | 71.50 | 53.57 | 91.25 |

The corresponding proportions at the state level were returned at 38.71 per cent, 3.85 per-cent and 57.44 per cent respectively. Thus, while the district's 50 per cent population is engaged in the economically productive activity, the corr-esponding proportion of economically active popu-lation at the state level has been found at 42.56 per cent. A comparison with 1971 returns reveals that against 40.51 per cent main workers in 1971, the same have increased to 42.80 per cent in 1981. Almost a similar trend has been observed at the state level where the participation rate has increased from 36.48 per cent in 1971 to 38.71 per cent in 1981. In the district, the work participation rate for main workers has, however, significantly increased in case of females. The same has imporved from 25.46 per cent in 1971 to 30.59 per cent in 1981. Against this it reveals a slight decline in the case of males from 55.12 per cent in 1971 to 54.59 per cent in 1981. It may, however, be noted that male participation rate for main workers 54.59 per cent is nearly double than that of female 30.59 per cent at 1981 census.

Again, rural-urban differentials at 1981 census reveal that in the rural areas the main workers constitute 45.08 per cent of the population, whereas they form only 27.13 per cent of the popu-lation in urban areas of the district. Between the two sexes, the differential is much larger among the females 33.88 per cent in rural and 7.16 per cent in urban than males 56.00 per cent and 45.26 per cent in urban areas.

Within the district the highest propotion of main workers (49.01%) has been found in Brahma-puri tahsil followed by Gadchiroli tahsil with (45.44%) . Other tahsil with a proportion of workers above the district average are Sironcha (44.59%) and Rajura (44.14%).

As already said for 1981 census main workers have been sub-divided into four categories viz: cultivators, agricultural labourers, workers engaged in household industry and other workers. Cultivators in the district account for 46.75 per cent of the main workers. The corresponding propor-tion of cultivators has been found at 35.12 per cent at the state level. Sex differentials of culti-vators show that the proportion of male culti-vators in the district is substantiallty higher than the one found in the state 48.63 per cent and 33.69 per cent. However, in case of female culti-vators the gap is not so large. Against 43.28 per cent female cultivators in the district, there are 38.48 per cent such cultivators in the state.

As regards the agricultural labourers, they work out to 30.21 per cent of the main workers in the district against 26.63 per cent in the state. Variations in respect of male and female agri-cultural labourers are not much at the district and state level.

Workers engaged in the household industry account for 2.56 per cent in the district against 2.55 per cent in the state. The proportion of male main workers engaged in household industry is some what higher in the district than in the state (District 3.01%, State 2.61%).

Expectedly, the proportion of main workers engaged in the category "other workers" is lower than the one observed in the state. In the former case it works out to 20.48 per cent and in the latter case to 35.70 per cent. A similar trend is discernable in case of male and female workers.

**Availability of Amenities–Education**

Educational amenity is available in 2,066 villages in the district encompassing a rural population of 1,648,481 persons. In other words about 7 of the 10 villages (69.38%) and 9 of the 10 rural inhabitants (91.89%) have the benefit of educational amenity (Table 13 and 14).

| | Total of all tahsils .. | 1,793,907 | 1,648,481 (91.89) | 459,435 (25.61) | 1,793,907 (100.00) | 688,978 (38.41) | 473,194 (26.38) | 544,971 (30.38) | 702,752 (39.17) | 959,124 (53.47) |

Within the district, the highest proportion of villages (87.86%) availing the amenity of schooling has been found in Brahmapuri tahsil. Waroda takes the second place with such facility available to 86.99 per cent of its villages. Chandrapur tahsil has the educational amenity available to 330 (83.12%) of its 397 villages. Sironcha tahsil ranks at the bottom with this amenity available to 55.27 per cent of its villages. Brahmapuri also leads in so far as the proportion of rural population covered by this amenity is concerned. 97.90 per cent of its rural population is reaping the benefit of this amenity. Waroda and Chandrapur claim the second and the third positions respectively.

From amongst the 2,066 villages having the benefit of this amenity, 987 have less than 500 population each and 22 have more than 5,000 population each. Remaining 971 and 86 villages fall in the population ranges of 500–1,999 and 2,000–4,999 respectively (Table–15).

TABLE 15

*Distribution of villages according to population range and amenities available*

| Population range | No. of inhabited villages in each range | No. ( with percentage ) of villages having the amenity of | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Educational | Medical | Drinking water | Post and Telegraph | Market/ Hat | Communi-cations | Approach by pucca road | Power supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| —500 .. .. | 1,864 | 987 (52.95) | 25 (1.34) | 1,864 (100.00) | 28 (1.50) | 41 (2.20) | 118 (6.33) | 217 (11.64) | 156 (8.37) |
| 500—1,999 .. .. | 1,004 | 971 (96.71) | 99 (9.86) | 1,004 (100.00) | 236 (23.51) | 128 (12.75) | 179 (17.83) | 279 (27.79) | 458 (45.62) |
| 2,000—4,999 .. .. | 87 | 86 (98.85) | 48 (55.17) | 87 (100.00) | 72 (82.76) | 44 (50.57) | 45 (51.72) | 51 (58.62) | 76 (87.36) |
| 5,000+ .. .. | 23 | 22 (95.65) | 20 (86.96) | 23 (100.00) | 20 (86.96) | 19 (82.61) | 19 (82.61) | 22 (95.65) | 21 (91.30) |
| All ranges .. .. | 2,978 | 2,066 (69.38) | 192 (6.45) | 2,978 (100.00) | 356 (11.95) | 232 (7.79) | 361 (12.12) | 569 (19.11) | 711 (23.88) |

There are, however, 912 villages as do not have this amenity available at all. Of these 877 have a population of less than 500 each, 33 fall in the population range of 500–1,999 and one each falls in the subsequent population ranges of 2,000–4,999 and 5,000+. Again, the inhabitants of 485 of such villages have to cover a distance upto 5 kms. to obtain this amenity, wheras

those of 205 villages have to negotiate a distance of 5–10 kms. for the purpose. The inhabitants of yet another 222 villages have to tread more than 10 kms. to a nearest school (Table 16).

TABLE 16

*Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available*

| Villages not having the amenity of | Number of villages where the amenity is not available and available at a distance of | | | | |
|---|---|---|---|---|---|
| | –5 kms. | 5–10 kms. | 10 kms.+ | Distance unspecified in region | Total (Cols. 2–5) |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 Education .. .. | 485 | 205 | 222 | .. | 912 |

| 6—15 .. .. .. | 253 | 229 (90.51) | 18 (7.11) | 253 (100.00) | 45 (17.79) | 21 (8.30) | 45 (17.79 | 77 (30.43) | 120 (47.43) |
| 16—50 .. .. .. | 859 | 667 (77.65) | 57 (6.64) | 859 (100.00) | 116 (13.50) | 85 (9.90) | 124 (14.44) | 185 (21.54) | 283 (32.95) |
| 51+ .. .. .. | 1,808 | 1,121 (62.00) | 113 (6.25) | 1,808 (100.00) | 186 (10.29) | 123 (6 80) | 181 (10.01) | 285 (15.76) | 268 (14.82) |
| Unspecified .. .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| All ranges .. .. | 2,978 | 2,066 (69.38) | 192 (6.45) | 2,978 (100.00) | 356 (11.95) | 232 (7.79) | 361 (12.12) | 569 (19.11) | 711 (23.88) |

In so far as the availability of this amenity in the towns of the district is concerned the population to institution ratio is, 10,000 : 0.84 Higher Secondary/Inter/PUC/ Junior Colleges: 10,000 : 1.30 Secondary/Matriculation Schools; 10,000 : 1.34 Junior Secondary / Middle Schools and 10,000 : 2.98 Primary Schools. (Table 18).

TABLE 18

*Schools per ten thousand population in towns*

| Class, name and civic status of town | | No. per ten thousard population | | | |
|---|---|---|---|---|---|
| | | Higher Secondary Inter/PUC/Junior College | Secondary/ Matriculation | Junior Secondary/ Middle | Primary |
| 1 | | 2 | 3 | 4 | 5 |
| II | Ballarpur (M. Cl.) .. .. .. .. | 0.16 | 0.81 | 0.65 | 1.79 |
| I | Chandrapur City (M. Cl.) .. .. .. | 1.38 | 1.38 | 1.47 | 3.37 |
| IV | Desaiganj (M. Cl.) .. .. .. .. | .. | 1.94 | 1.94 | 5.16 |
| IV | Ghugus (C. T.) .. .. .. .. | .. | 0.66 | 0.66 | 1.97 |
| VI | Majari (C. T.) .. .. .. .. | 5.28 | 5.28 | 5.28 | 5.28 |
| IV | Rajura (M. Cl.) .. .. .. .. | 1.89 | 1.89 | 2.84 | 3.78 |
| V | Sasti (C. T.) .. .. .. .. | 1.39 | 1.39 | 1.39 | 2.78 |
| III | Waroda (M. Cl.) .. .. .. .. | 0.29 | 1.46 | 1.46 | 2.93 |
| | All towns .. | 0.84 | 1.30 | 1.34 | 2.98 |

In other words, it can be said that a Higher Secondary/Inter/PUC/Junior College is available to about 11,897. Secondary/Matriculation Schools to every 7,698, Junior Secondary/Middle School to every 7,478 and Primary School to every 3,356 urbanites in the district.

**Medical**

The district looks grossly neglected in so far as the provision of medical amenities is concerned. Hardly 192 (6.45%) of its 2,978 villages have one or the other medical facility available (Table 13).

As regards the proportion of rural population covered by this amenity, Table-14 reveals that 25.61 per cent has the benifit of the same. In other words it may be inferred that medical facility of whatever kind is available after every 16 villages in the district. This neglect may be due to the unwillingness of medical personnel to work in the rural areas of this district.

Of the 2,786 villages as do not have any medical amenity available 1,839 have a population of less than 500 each whereas, 905 have a population between 500 and 1,999. 39 villages devoid of this amenity are large enough each with a population of 2,000–4,999. There are another 3 villages deprived of this facility with a population over 5,000 (Table-15).

Amongst the 2,786 villages devoid of any medical amenity the inhabitants of 714 have it available at a distance upto 5 kms. Against this the inhabitants of 965 have to tread a distance of 5–10 kms. in search of medical aid. The inhabitants of the largest number of villages (1,107) have to negotiate more than 10 kms to obtain the medical aid (Table 16).

Table 19 depicts the proportion of beds available to 1,000 urban population of the district.

TABLE 19

*No. of Beds in Medical Institutions in towns*

| Class, name and civic status of the town | | | No. of beds in medical institutions per 1,000 population |
|---|---|---|---|
| II | Ballarpur (M.Cl) | .. .. | 0.36 |
| I | Chandrapur City (M.Cl) | .. .. | 7.08 |
| IV | Desaiganj (M.Cl) | .. .. | 0.45 |
| IV | Ghugus (C. T.) | .. .. | .. |
| VI | Majari (C. T.) | .. .. | .. |
| IV | Rajura (M.Cl) | .. .. | 1.51 |
| V | Sasti (C. T.) | .. .. | 0.56 |
| III | Waroda (M.Cl) | .. .. | 1.08 |
| | All towns | .. | 3.46 |

On an average there are 3.46 beds per thousand of population in the urban areas of the district. In other words a bed is available to every 289 urbanites. Amongst the towns of the district, it is Chandrapur city only where there is a bed available for every 141 of its citizens. The bed position with respect to other towns is : Ballarpur 1 : 2,791; Desaiganj 1: 2,215; Rajura 1: 661; Sasti 1 : 1,798 and Waroda 1 : 924. Ghugus and Majari towns do not have any medical institution.

**Drinking Water**

This facility is available in all the villages of the district.

**Post and Telegraph**

In the district post and telegraph facilities are available in 356 (11.95%) villages inhabiting 688,978 persons (38.41%). In other words after every 8 villages this amenity is available. In Brahmapuri tahsil 19.94 per cent of the villages have the advantage of post and telegraph amenity. Sironcha tahsil ranks at the bottom with this amenity available to just 5.53 per cent of its villages (Table 13 and 14).

Of the 356 villages having the network of post and telegraph amenity, 28 have a population of less than 500 each. Against this 20 villages catered by the amenity have a population of more than 5,000 each. The remaining 236 and 72 fall respectively in the population ranges of 500–1,999 and 2,000–4,999 (Table-15).

There are 2,622 villages devoid of this amenity. Of these the inhabitants of 1,120 have post and telegraph facility at a distance of less than 5 kms. Inhabitants of 795 villages have this amenity available within a distance of 5–10 kms. The inhabitants of yet another 707 have to cover a distance of more than 10 kms for the nearest post and telegraph amenity (Table 16).

**Market/Hat**

For the sale and purchase of goods and commodities market/hat is held in 232 (7.79%) villages of the district and 473,194 (26.38%) rural inhabitants of the district benefit from the same. The largest number of villages 73 where these markets/hats are held fall in Brahmapuri tahsil (Table 13 and 14).

41 villages where this facility is available have a population of less than 500 each; whereas 19 have more than 5,000 population. The remaining 128 and 44 villages having this facility fall in the population ranges of 500–1,999 and 2,000–4,999 respectively.

2,746 villages in the district are devoid of this facility. Of these the inhabitants of 788 have such markets/hats available within the distance of less than 5 kms. Inhabitants of another 990 villages have to travel a distance of 5–10 kms. Inhabitants of 968 villages have such a facility available at a distance of more than 10 kms.

**Communications**

Communications facilities include bus stop/railway station/water way etc. 361 (12.12%) villages encompassing a population of 544,971 (30.38%) persons have the benefit of one or the other communication facility. Within the district Chandrapur tahsil has 21.16 per cent of its villages provided with communication facilities. Waroda tahsil ranks second with such facilities available to 17.06 per cent of its villages. Gadchiroli ranks at the bottom with such facilities available in only 7.28 per cent of its villages (Table 13 and 14).

Of the villages having the communication facilities 118 fall in the population range of less than 500, 179 have a population of 500–1,999 persons, 45 lie in the population range of 2,000/– 4,999 and the remaining 19 villages with a population of more than 5,000. Out of the total 2,617 villages where communication facility is not

available within the villages itself, the same is available within 5 kms. for 693 villages, between 5 to 10 kms. for 783 villages and more than 10 kms. for 1,141 villages.

**Approach by Pucca Road**

569 (19.11%) villages having a population of 702,752 (39.17%) persons are connected by pucca roads. In other words every fifth village is connected by pucca roads. The largest number of villages in a tahsil (28.21%) connected by pucca roads has been found in Chandrapur tahsil. Against this Gadchiroli ranks at the bottom with 13.28 per cent of its villages connected by pucca roads.

Amongst the villages connected by pucca roads 217 are such which have less than 500 population each. Against this 22 have more than 5,000 population. The remaining 279 and 51 fall in the intervening population ranges of 500–1,999 and 2,000–4,999 respectively.

**Power Supply**

Only 711 (23·88%) of the 2,978 villages of the district have been electrified. The rural population having the benefit of electricity number 959,124 persons. In other words every fourth village in the district is electrified. Chandrapur tahsil has the largest proporation of villages with electric power supply (45.84%). Brahamapuri ranks second with 45·09 per cent of its villages electrified. The situation in Sironcha tahsil is remorseful where only 5 out of its 579 villages have the facility of electricity.

Of the electrified villages in the district each of the 156 (8.37%) villages have less than 500 population. On the contrary there are 21 villages with a population of more than 5,000 persons each. The remaining 458 and 76 fall in the intervening population ranges of 500–1,999 and 2,000–4,999 respectively. Villages which do not have any amenity (except for drinking water) are 839 in number (Appendix III) which account for about 28 per cent of total inhabited villages. Tahsilwise break-up of these villages is Chandrapur (55), Waroda (49), Brahmapuri (30), Gadchiroli (385), Sironcha (248) and Rajura (72). Gadchiroli and Sironcha tahsils are the worst affected tahsils so far as different amenities are concerned.

**Land Utilisation**

The land use pattern in respect of each village of the district is given in columns 15 to 19 of the village directory. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

**Forest**

More than one-fourth of the total area of the district is under forests. This implies that the district is much more forested than the state as a whole. Within the district Sironcha tahsil has the highest proportion of area under forests. Gadchiroli takes second position. Against this Chandrapur and Waroda tahsils have very little area under forests.

The species in the forests of the district range from well known valuable teak of Allapalli to low quality miscellaneous ones of Waroda. In fact the forests of the district came under the teak producing zone of the country. But in its natural growth, teak is confined to small area scattered throughout the district, the beggest block being in the vicinity of Allapalli. Other forest species include ain, bija, tendu, dhawra, moyain, mohwa and aonla.

Bamboo forests are also spread over a large area in the district. Good quality bamboos are found in the remote areas of east Chandrapur division and also on the better areas of Allapalli, Bhamragarh and West and Central Chandrapur divisions. Other forest products are tender leaves, lac, gum, kath, beheda, hirda etc.

**Irrigated, Un-irrigated and Culturable Waste areas**

Columns 16, 17 and 18 of the Village Directory reveal the data pertaining to irrigated area (by source), un-irrigated area and culturable waste respectively. Within the district Chandrapur and Waroda are the two tahsils with over two-thirds of cultivable area. On the whole 59.05 per cent of the district area is cultivable. Sironcha tahsil has the lowest cultivable area (32.68%). The remaining three tahsils have the proportion of cultivable area as : Brahmapuri (67.82%), Gadchiroli (53.63%) and Rajura (62.59%). 14.08 per cent of the cultivable area of the district has irrigation facilities. Brahmapuri has the covetous position with 36.19 per cent of its total cultivable area having the irrigation facility. Chandrapur and Gadchiroli occupy second and third positions in this regard with the proportions of irrigated area returned at 18.46 per cent and 16.63 per cent respectively. Rajura tahsil has just 0.85 per cent of its cultivable area with irrigation facilities (Table 20).

TABLE 20

*Distribution of villages according to the land use (in hectares)*

| Serial No. | Name of tahsil | No. of inhabited villages | Total area | Percentage of cultivable area to total area | Percentage of irrigated area to the total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Chandrapur .. .. .. | 397 | 199,723.33 | 73.09 | 18.46 |
| 2 | Waroda .. .. .. | 469 | 225,786.00 | 76.98 | 7.06 |
| 3 | Brahmapuri .. .. .. | 346 | 151,877.00 | 67.82 | 36.19 |
| 4 | Gadchiroli .. .. .. | 934 | 398,048.25 | 53.63 | 16.63 |
| 5 | Sironcha .. .. .. | 579 | 250,886.26 | 32.68 | 3.55 |
| 6 | Rajura .. .. .. | 253 | 166,788.42 | 62.59 | 0.85 |
| | Total of all tahsils .. | 2,978 | 1,393,109.26 | 59.05 | 14.08 |

**Staple Food**

Chandrapur, Gadchiroli and Sironcha are the tahsils of the district where rice and jower is staple food in the majority villages. Jowar is the staple food in the villages of Rajura tahsil. Wheat and jowar in Waroda tahsil, and rice and wheat in Brahmapuri tahsil is consumed as staple food (Table 21).

TABLE 21

*Main staple food in the majority of villages in each tahsil*

| Sr No. 1 | Name of tahsil 2 | Main staple food 3 |
|---|---|---|
| 1 | Chandrapur .. | Rice, Jowar |
| 2 | Waroda .. | Wheat, Jowar |
| 3 | Brahmapuri .. | Rice, Wheat |
| 4 | Gadchiroli .. | Rice, Jowar |
| 5 | Sironcha .. | Rice, Jowar |
| 6 | Rajura .. | Jowar |

**Municipal Finance**

The average per capita receipts in the towns of Chandrapur district is Rs. 58.28. Of these Rs. 25.99 are raised through taxes and another Rs. 32.29 through other sources. Against this the per capita expenditure works out to Rs. 44.62. An expenditure of Rs. 8.23 is incurred on general administration; Rs. 8.54 on public health and conveniences; Rs. 9.43 on public works; Rs. 8.41 on public institutions and Rs. 10.01 on other aspects (Table 22).

TABLE 22

*Per capita receipt and expenditure in towns*

| Class, name and civic status of the town | Per capita | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Receipt (in Rs.) | | | Expenditure (in Rs.) | | | | | |
| | Total | Receipt through taxes | Receipt from all other sources | Total expenditure | General administration | Expenditure on public health and conveniences | Public works | Expenditure on public institutions | Other aspects |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| II Ballarpur (M. Cl.) .. | 69.07 | 26.74 | 42.33 | 52.61 | 18.75 | 4.51 | 0.98 | .. | 28.37 |
| I Chandrapur City (M. Cl.) .. | 69.78 | 31.99 | 37.79 | 53.98 | 4.08 | 13.12 | 19.12 | 12.99 | 4.67 |
| IV Desaiganj (M. Cl.) .. | 35.86 | 18.11 | 17.75 | 33.48 | 15.58 | 11.89 | 3.90 | 0.03 | 2.08 |
| IV Ghugus (C. T.) .. | 1.98 | .. | 1.98 | 1.89 | 0.39 | 0.14 | 0.67 | 0.03 | 0.66 |
| VI Majari (C. T.) .. | 162.62 | 1.06 | 161.56 | 8.97 | 2.11 | .. | 5.28 | .. | 1.58 |
| IV Rajura (M. Cl.) .. | 68.13 | 26.14 | 41.99 | 46.15 | 10.04 | 4.00 | 6.12 | 20.19 | 5.80 |
| V Sasti (C. T.) .. | 4.64 | 3.14 | 1.50 | 4.40 | 1.22 | 1.24 | 0.36 | .. | 1.58 |
| III Waroda (M. Cl.) .. | 37.66 | 25.59 | 12.07 | 32.55 | 4.78 | 5.87 | 1.38 | 14.11 | 6.41 |
| Total .. | 58.28 | 25.99 | 32.29 | 44.62 | 8.23 | 8.54 | 9.43 | 8.41 | 10.01 |

**Minerals**

The district abounds in mineral wealth and it is the richest of the minerally important districts in the state, with large reserves of high grade iron ore and coal. Other minerals include chromite, building stone, limestone and clay. Prospecting has also been done for copper and barite. Coal reserves of the order of 4,100 million tonnes are estimated in Chandrapur, Ballarpur, Ghugus, Telwasa, Sasti, Rajura, Waroda, Majari and Bandar. 204.9 million tonnes of iron ore are estimated in Asola, Lohara, Pipalgaon, Demalgaon, Fusser and Surjagarh areas. Limestone reserves of 1,026 million tonnes are expected from Kondhala, Puskepar, Kamargahan, Marda, Niljai and Sangoda.

**Fisheries**

The district is naturally endowed with good potential water resources and fishing activity is confined to inland waters such as rivers, tanks and ponds. Wardha, Wainganga and Pranhita are the important rivers with a potential for pisciculture. The total length of perennial rivers is 480 kms. There are 99 tanks in the district belonging to irrigation department covering an area of 7,616 hectares. In addition, there are 3,650 small tanks belonging to Zilla Parishad covering about 7,841 hectares of area.

The commercially important varieties of fish found in the district are : Murrel, Dhadkya, Botri, Padhan, Tambu, Karvadi, Poshti, Dhosra, Gane or Kanheri, Chile, Katva, Seenghan, Chandni, Mahaseer, Kolus, Magur and Zinga.

**Industries**

Despite the fact that the district is rich in mineral, agriculture and forest wealth which is not industrially advanced. There are hardly four large scale industries in the district manufacturing paper, glass, pottery and oil. These are Ballarpur paper and Straw Board Mills at Ballarpur, Swastik Glass Works at Chandrapur, Dadabhoy Potteries at Ballarpur and Bashir Oil Mills at Waroda. The general pattern of non-agricultural employment, however, leans heavily towards small scale and household industries. Besides these major industrial units there are many categories of medium industries scattered over the district. Such industrial units comprise of oil mills, saw mills, paddy processing mills, cotton ginning mills, tile manufacturing, bidi manufacturing, soap manufacturing, cotton weaving (Handloom), basket making, pottery making, tasar silk weaving and rope making.

**Trade and Commerce**

The main products manufactured in the district include paper, Mangalore tiles, poha, cement, coal and sweet-oil. As revealed by Table-23 the district chiefly exports paper, firewood, rice, jowar, coal and chillies.

TABLE 23

*Most important commodities manufactured, imported and exported in towns*

| Class, name and civic status of the town | Most important commodities | | |
|---|---|---|---|
| | Manufactured | Exported | Imported |
| 1 | 2 | 3 | 4 |
| II Ballarpur (M. Cl.) .. | Paper | Paper | Bamboo |
| I Chandrapur City (M. Cl.) .. | Mangalore tiles | Firewood | Wheat |
| IV Desaiganj (M. Cl.) .. | Poha | Bamboo | Rice |
| IV Ghugus (C. T.) .. | Cement | Rice | Wheat |
| VI Majari (C. T.) .. | Information not available | | |
| IV Rajura (M. Cl.) .. | Tiles | Jowar | Foodgrains |
| V Sasti (C. T.) .. | Steam coal | Steam coal | Explosives |
| III Waroda (M. Cl.) .. | Sweet oil | Chilli | Wheat, cloth |

In addition to the above items of export timber is also exported to Gujarat, Madras, Bombay, Mysore and Andhra Pradesh. Mats made from bamboo, cotton, oilseeds and pulses are also exported to other districts of the state. The items of import into the district include bamboo, wheat, rice, foodgrains, spices, metals, sugar and explosives.

Important foodgrain trade centres of the district are Chandrapur, Waroda, Nagbhir, Brahmapuri, Mul, Rajura and Desaiganj. Timber trade centres are Waroda, Wirur, Warsa, Gadchiroli and Allapalli. Charcoal trade centres are Chandrapur, Ballarpur, Bhandak, Tadali, Waroda and Wirur. Delhi-Madras broad gauge line of the Central Railway has helped to boost the trade in the district. District headquarter town Chandrapur is also connected by road with adjoining districts of Nagpur, Wardha, Yavatmal and Bhandara. However, within the district there are no good roads connecting the district headquarter with the tahsil headquarters. Many approaches are cut off during the rainy season. The eastern part of the district is a thick forest area and, therefore, roads are very few in Sironcha, Gadchiroli and Brahmapuri tahsils.

**Slum Population**

Notified slums have been found only in Ballarpur town of the district. Population in these slums constitutes 37.97 per cent of the total population of the town and the density per km² works out to 48,565 persons (Table 24).

TABLE 24

*Proportion of slums population in towns*

| Class, name and civic status of the town | Proportion of the slums population to total population of the town | Density in slums (per Km².) |
|---|---|---|
| 1 | 2 | 3 |
| II Ballarpur (M. Cl.) .. .. .. .. | 37.97 | 48,565 |
| I Chandrapur City (M. Cl.) .. .. .. .. | There are no notified slums, within the municipal limits, hence the information shows nil. | |
| Total .. | 37.97 | 48,565 |

**Places of Tourist Importance**

Chandrapur district with its wild life, richly preserved game sanctuaries, spots of scenic beauty and spots of archaeological interest, also affords excellent opportunities to develop tourist interests.

*Ballarpur* :—Ballarpur is a rapidly developing municipal town situated on the Chandrapur-Madras railway route. It was a royal city in ancient times and signs of its splendour and glory are still seen scattered in its environs. Today it is known not so much for its ancient glory but for its collieries having nearly 2,000 million tonnes of coal deposits and large quantities of fine teak and other varieties of timber that are brought from the surrounding forests and sold at Ballarpur.

*Bhadrawati or Bhandak* :—Bhadrawati or Bhandak is a flourishing ancient village in Waroda tahsil and today it is better known to the general public as a place of Jain religious importance for majestic temple of Parsvanatha than for its historical importance or archaeological remains. The architectural remains in and around the village are of remote antiquity and great interest.

*Chandrapur* :—Chandrapur the headquarters of the district is the largest town in the district with ancient history. The town practically lies in the angle formed by the junction of the Erai and Jharpat rivers and is surrounded by a continuous line of battlements over 7 miles in length which constitutes the most striking example of Gond methods of fortification which has come down to the present age. Viewed from within, the city presents a pleasing appearance giving the general impression of the space and vendure. Major Lucie Smith described Chandrapur as follows : "Dense forest stretches to the north and east; on the south rise the blue ranges of the Manikdurg, and westward opens a cultivated rolling country with distant hills. Set in this picture, sweep the long times of fortress wall, now seen, now lost among great groves of ancient trees; in front glitters the broad expanse of the Ramala tank; and the Jharpat and the Erai gird on either side".

The town occupies a site that is underlain by coal bearing rock formation; and a number of collieries dot the surface with their waste mounds along the rims of the town. The most important of the collieries is the Hindustan Lalpeth Colliery situated on the outskirts of the Chandrapur city.

In the city the object that attracts the most is the walls around the town. The walls are surmounted by a heavy looking crenellated parapet, they are ten feet in thickness and within runs a broad rampart broken down in places but on the whole in fair preservation. In addition to the walls, number of temples attract the tourists.

*Ghugus* :—It is a mining village in Chandrapur tahsil. Two collieries are yielding a good variety of non-cooking coal.

*Markanda* :—It is a small village in Gadchiroli tahsil on the left bank of Wainganga river and known amongst the Hindus as a place of pilgrimage. Number of beautiful old temples of archaeological importance with picturesque background attracts tourist. The largest and the most elaborately sculptured temple of the group is that of rage Markandeya dedicated to Siva.

*Mul* :—Mul is the largest village in Chandrapur tahsil. It is picturesquely situated in the neighbourhood of the hills named after it, a river, which also bears its name in the maps but which is locally called Huma, flows in a shallow bed, a mile or two to the east of the village site.

*Somnur* :—It is a small village in Sironcha tahsil and is a spot of great scenic beauty. Three rivers meet in valley glade formed by numerous hills clothed with Lush green forests. Surroundings are enchanting enough to attract even foreign tourists.

*Tadoba* :—Tadoba National Park is the most attractive spot in Chandrapur district. It is situated in the heart of the Government Reserved Forest of West Chandrapur Division and has become an ideal resort for the visitors who want to get away from the din and bustle of the city life and the modern civilization, since here they can observe, undisturbed, amidst tranquil conditions, the splendid wild life in its natural surroundings, hues and colours.

It is a picturesque spot lavishly endowed by nature and lies about 28 miles from Chandrapur. Its forests are inhabited by a large variety of wild animals excepting lion, elephant, rhino and a few other species.

The beautiful Tadoba lake has been formed by bunding up a 'nala' and joining three hillocks which surround it. On the hillock which is reached after crossing the Kumbhi nala is a rest house from where a view of the lake nestling amidst well maintained forests can be had. The site almost enthrals the visitors.

*Wairagad* :—Wairagad is situated in Gadchiroli tahsil, it is a place of great antiquity and is supposed to have been founded in 'Dwapar Yuga' Historically the place was ruled by Mana Chiefs before the Gonds.

PART A--VILLAGE AND TOWN DIRECTORY

SECTION I

# VILLAGE DIRECTORY

## SECTION I—VILLAGE DIRECTORY

*Note Explaining the Abbreviations used in the Village Directory*

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "uninhabited" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i. e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (*ii*) Land utilisation data for census towns ;

Appendix (*iii*) Tahsilwise list of villages with no amenities available ; and

Appendix (*iv*) Tahsilwise list of villages according to proportion of Scheduled Caste/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :-

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in $Km^2$.

Column 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges *viz.*, upto 5 km., 5–10 km. and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities *viz.* primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.)

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i.e.* secondary, middle and primary

school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :

| | |
|---|---|
| Primary or Secondary School .. | P |
| Junior Secondary or Middle School .. | M |
| Matriculation or Secondary School .. | H |
| Higher Secondary / Intermediate / Pre-University /Junior College (PUC) | PUC |
| College, any college (graduate level and above) like Arts, Science, Commerce etc. | C |
| Industrial School .. | I |
| Training School .. | Tr. |
| Adult Literacy Class/Centre .. | AC |
| Other Educational Institutions .. | O |

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms., 5–10 kms. and above 10 kms. of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

| | |
|---|---|
| Hospital .. .. | H |
| Maternity and Child Welfare Centre .. | MCW |
| Maternity Home .. .. | MH |
| Child Welfare Centre .. .. | CWC |
| Health Centre .. .. | HC |
| Primary Health Centre .. .. | PHC |
| Primary Health Sub-Centre .. | PHS |
| Dispensary .. .. | D |
| Family Planning Centre .. .. | FPC |
| T. B. Clinic .. .. | TB |
| Nursing Home .. .. | NH |
| Registered Private Practitioner .. | RP |
| Subsidised Medical Practitioner .. | SMP |
| Community Health Worker .. | CHW |
| Others .. .. | O |

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

| | |
|---|---|
| Tap water .. .. | T |
| Well water .. .. | W |
| Tank water .. .. | Tk |
| Tube-well water .. .. | TW |
| Hand pump .. .. | Hp |
| River water .. .. | R |
| Fountain .. .. | F |
| Canal .. .. | C |
| Lake .. .. | L |
| Spring .. .. | S |
| Nallah .. .. | N |
| Others .. .. | O |
| Information Not Available .. | NA |

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

| | |
|---|---|
| Post Office .. .. | PO |
| Telegraph Office .. .. | TO |
| Post and Telegraph Office .. .. | PTO |
| Telephone Connection .. .. | Phone |

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relates to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail, and water-way and the same has been indicated as follows :—

| | |
|---|---|
| Bus Stop .. .. | BS |
| Railway Station .. .. | RS |
| Navigable Water-way (including river, canal and back-water etc.) | NW |

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information :—

| | |
|---|---|
| Pucca Road .. .. | PR |
| Kaccha Road .. .. | KR |
| Navigable River .. .. | NR |
| Navigable Canal .. .. | NC |
| Navigable Water-way (other than river or canal) | NW |
| Foot Path .. .. | FP |

Column 12 gives the distance in Kilometres within brackets from the nearest town. In case, the nearest town is located in another State the name of the State has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

| | |
|---|---|
| Electricity for Domestic purpose .. | ED |
| Electricity for Agriculture .. .. | EAg |
| Electricity for Other purpose like Industrial, Commercial etc. | EO |
| Electricity for All purposes listed above | EA |

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :-

(1) Forests

(2) Not *available for cultivation*—
  (*a*) lands put to non-agricultural uses.
  (*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow lands.
  (*a*) Permanent pastures and other grazing lands.
  (*b*) lands under miscellaneous tree crops and grooves not included in the net area sown.
  (*c*) culturable wastes.

(4) Fallow lands.
  (*a*) Fallow lands other than current fallows.
  (*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, hat portion is included under the appropriate heading of cultivated or un-cultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation *e. g.* canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

| | |
|---|---|
| Government Canal .. | .. GC |
| Private Canal .. | .. PC |

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other grooves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses, Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

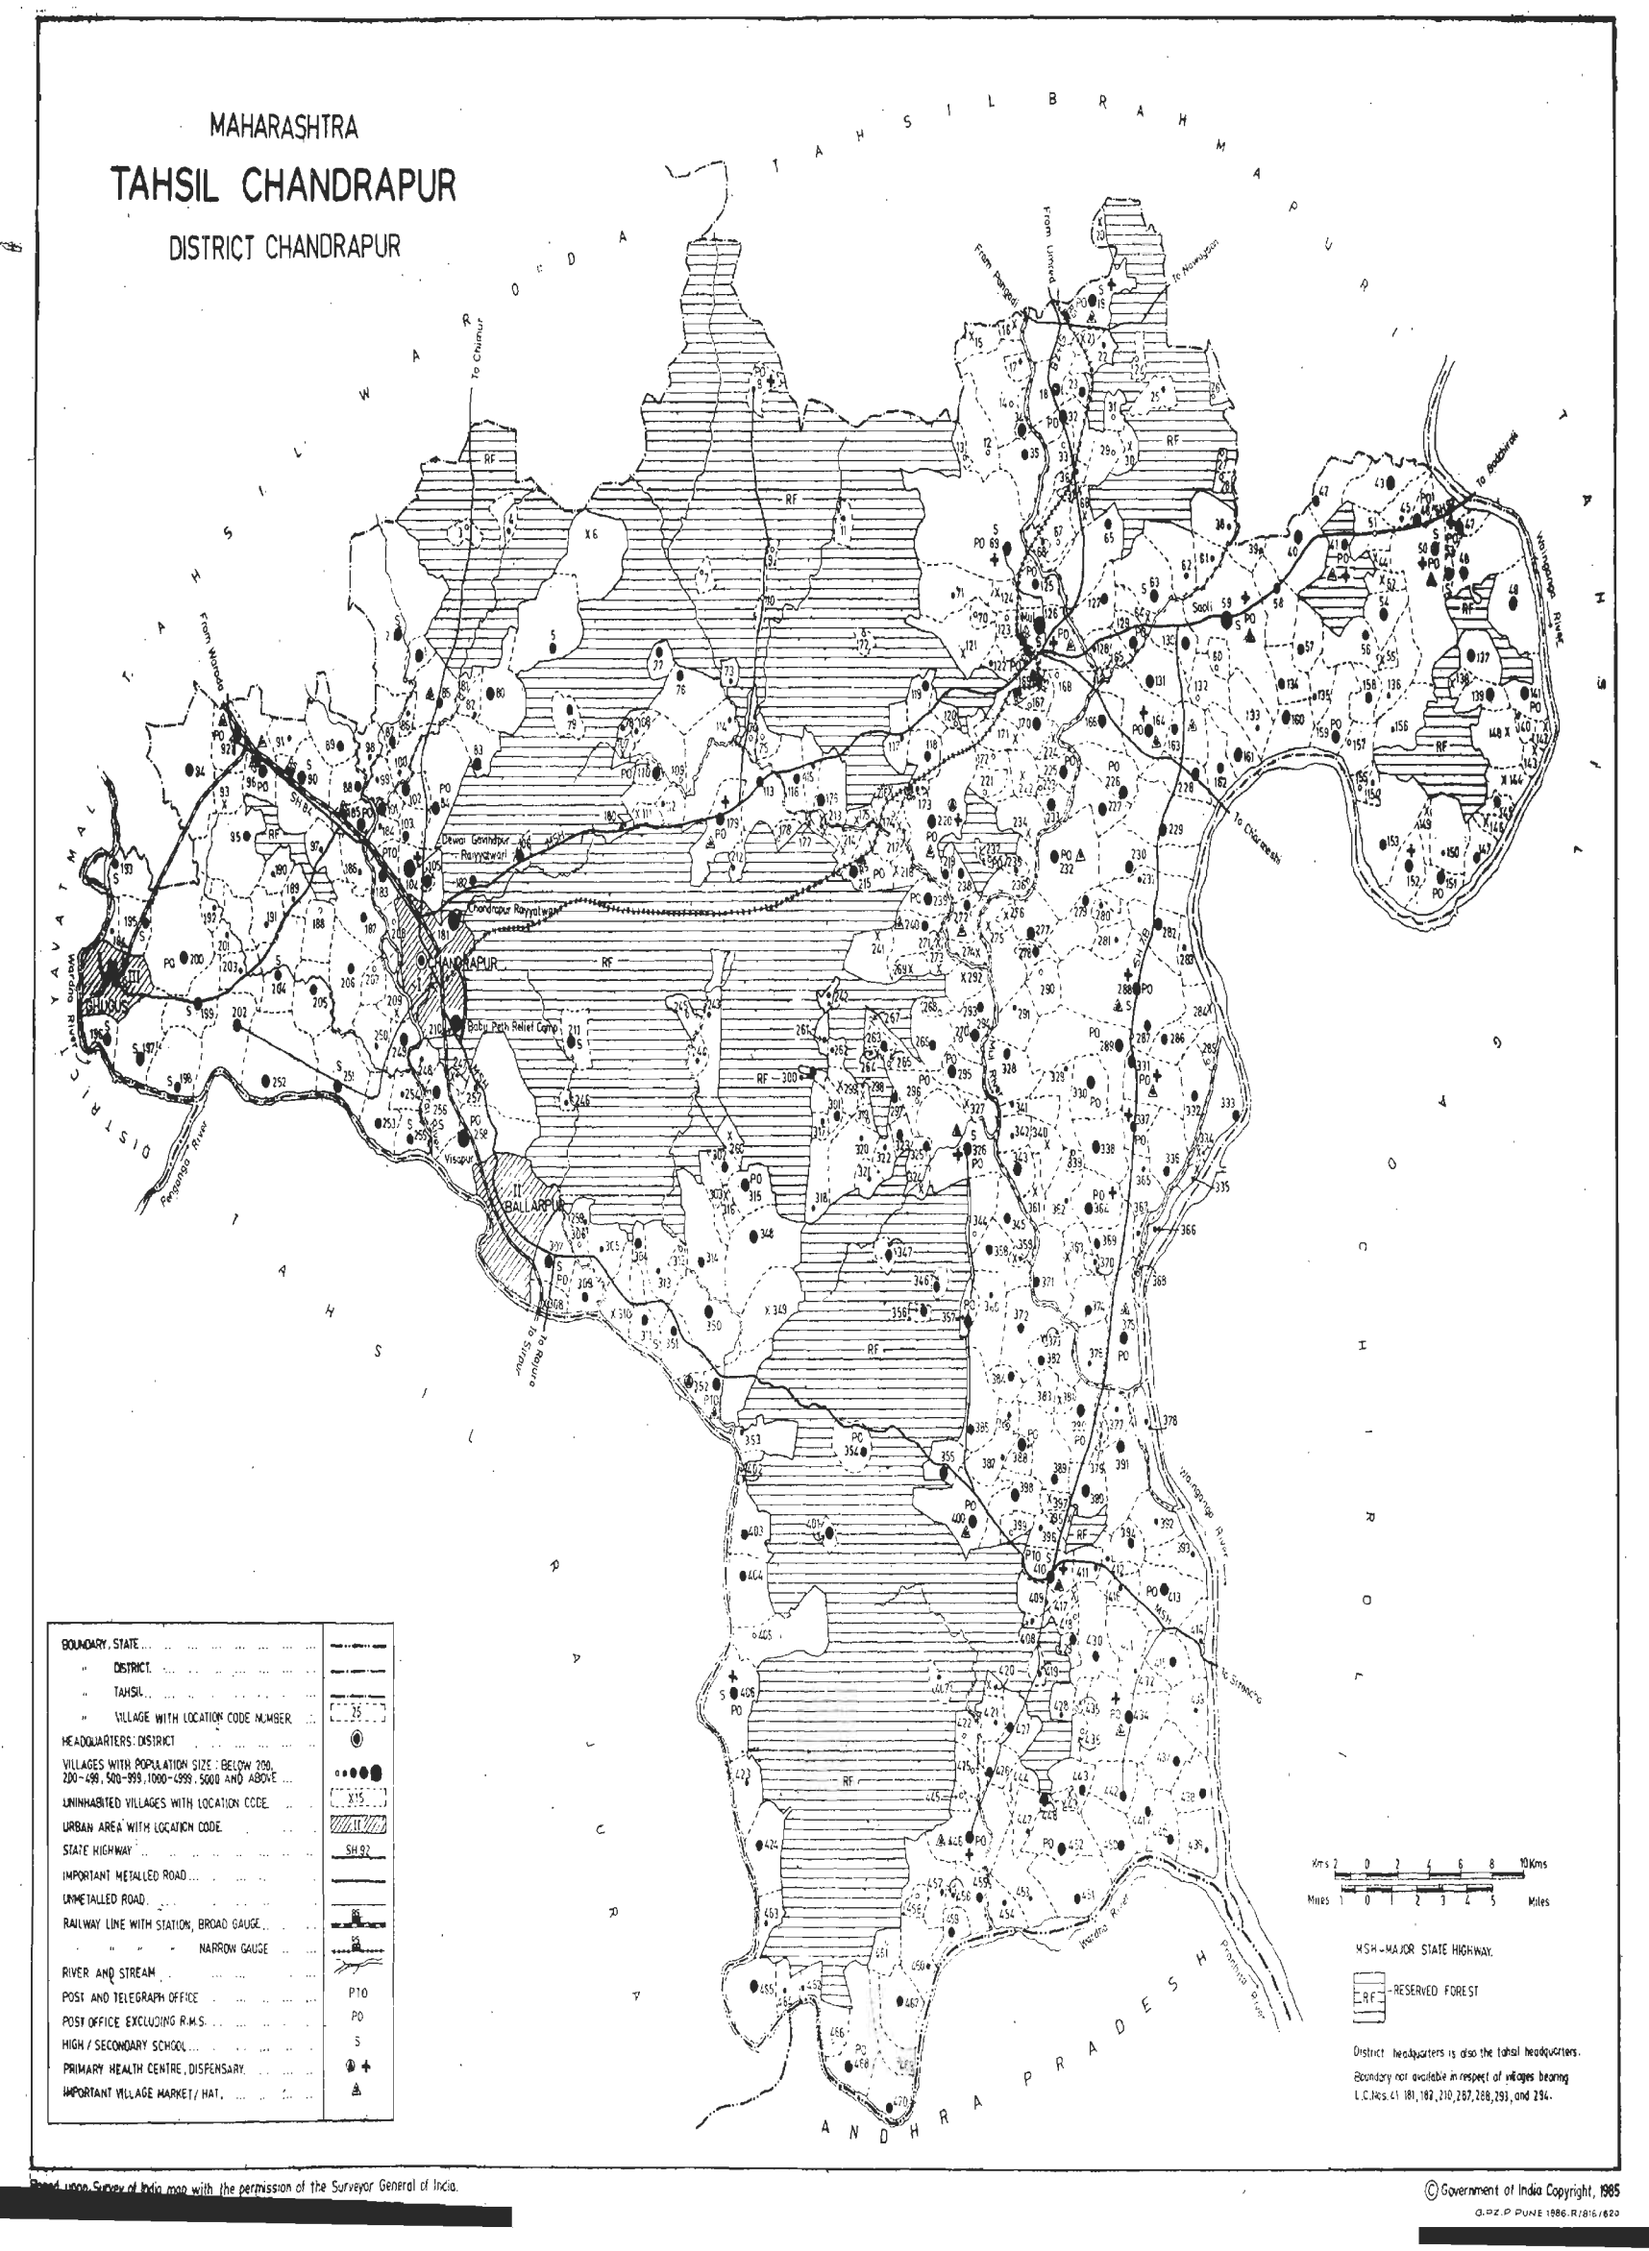

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

| | | |
|---|---|---|
| N | .. | Copies of Newspapers coming in the village. |
| M | .. | Motor cycles/scooters available in the village. |
| C | .. | Cars/jeeps available in the village. |
| T | .. | Tractors available in the village. |
| PS | .. | Police Station. |

* Excludes villages with no. S. C. and S. T. population, as also totally uninhabited villages.

( N. B. — Ranges with ' nil ' entries have been omitted ).

SECTION II

# TOWN DIRECTORY

## SECTION II—TOWN DIRECTORY

*Note Explaining the abbreviations used in town Directory*

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously seperate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and Civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town:-

| | |
|---|---|
| Municipal Corporation/Corporation | M. Corp. |
| Municipality .. .. | M. |
| Municipal Council .. .. | M. Cl. |
| Non-Municipal .. .. | N.M. |
| Cantonment Board/Cantonment .. | C.B. |
| Notified Area/Notified Area Committee/ Notified Committee. | N.A.C. |
| Census Town .. .. | C.T. |

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in $Km^2$, number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director, General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district. and tahsil head quarters and the nearest city (Urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river-canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town, Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

| | |
|---|---|
| Pucca road .. .. | PR |
| Kuccha road .. .. | KR |

Columns 7 to 11 reflect the information on system of severage, number of latrines and method of disposal of night soil.

Codes used are :—

| | |
|---|---|
| Sewer/Sewerage .. .. | S |
| Open surface drains .. .. | OSD |
| Box surface drains .. .. | BSD |
| Sylk drains .. .. | SD |
| Cesspool method .. .. | CD |
| Pit system .. .. | Pt |
| Head Loads .. .. | HL |
| Baskets .. .. | B |
| Wheel Barrows .. .. | WB |
| Septic Tank Latrines .. .. | ST |

Columns 12 and 13 indicate sources of protected water supply to the inhabitant of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used :—

| | |
|---|---|
| Overhead Tank .. .. | OHT |
| Service Reservoir .. .. | SR |
| River Infiltration Gallery .. | IG |
| Borewell pumping system .. | BWP |
| Pressure Tank .. .. | PT |
| Tubewell water/Hand pump | TW |
| Tap Watar .. .. | T |
| Well water .. .. | W |
| Tank water .. .. | TK |

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town. the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

| | |
|---|---|
| Hospital .. .. .. | H |
| Dispensary .. .. .. | D |
| Health Centre .. .. | HC |
| Family Planning Centre .. | FC |
| T. B. Clinic .. .. .. | TB |
| Nursing Home .. .. | NH |
| Ayurvedic .. .. .. | A |
| Unani .. .. .. | U |
| Homoeopathic .. .. | Hom |
| Others .. .. .. | O |

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :—

| | |
|---|---|
| Arts only .. .. .. | A |
| Science only .. .. .. | S |
| Arts and Science only .. .. | AS |
| Commerce only .. .. | C |
| Arts and Commerce only .. | AC |
| Combined for all categories–Arts, Science and Commerce | ASC |
| Law .. .. .. | L |

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/ dancing institute, nursing school, etc. Various codes used for indicating this data are :—

| | |
|---|---|
| Shorthand .. .. .. | SH |
| Typewriting .. .. .. | Type |
| Shorthand and Typewriting .. | Sh. Type |
| Others .. .. .. | O |

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

## STATEMENT I

*Note* :–(1) The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.
(2) Names of towns treated as such for the first time in 1971 which continue as towns in 1981 have been marked with an asterisk (*) on the left.
(3) Names of towns treated as such for the first time in 1981 have been printed in italics.
