PREFACE

Though compiled in the Census Office, District Census Handbooks are actually State Government publications. They were published for the first time in the 1951 Census. So varied have been their uses and so great their value that there can be little doubt that the Handbooks have come to stay as a regular feature of every census. In 1961, while the tradition has been continued, efforts have been made to enlarge the scope and enrich the contents of the Handbook in several ways. Much of it is, of course, due to the able guidance and inspiration from Sri Asok Mitra, the Registrar General of India, to whom no words of gratitude can really do full justice.

The main attraction of the District Census Handbook lies in the portion relating to Village Statistics which presents primary census data for each village in the district. To facilitate reference, this table has been supplemented by a Village Directory which, apart from cataloguing some additional information, gives an alphabetical list of villages in each Anchal. The arrangement of villages in the Village Statistics portion is according to the jurisdiction of Panchayats and Anchals. No authentic list of villages comprised in each Panchayat or Anchal was readily available before the Census of 1961. Much pioneering effort had, therefore, to be made in the preparation of these lists. It is possible that some errors, particularly in the delineation of Panchayat jurisdiction, might have crept in because of these limitations or subsequent modifications in boundaries. It may be noted also that the statistics reproduced here are generally related to March, 1961 unless otherwise indicated.

The Anchal maps are a special feature of the Handbook this time. They have been prepared from 1″=1 mile Anchal maps which were traced from the old Revenue Thana maps. Though revenue thanas had long ceased to be of much significance in day-to-day administration, no attempt appears to have been made in the past to prepare police station or anchal maps delineating the village boundaries. The Census of 1961 in Bihar can justly claim the preparation of these anchal maps, both on 1″=1 mile scale as well as on the reduced scale in which they are presented in this book, among its major achievements. Of course this was made possible mainly because of the keen interest and helpful attitude of the State Government which not only placed the relevant materials at my disposal but also agreed to meet the entire cost of the scheme. For all this I am greatly indebted to Sri S. J. Majumdar, the then Chief Secretary, Sri S. K. Chakravorty, the then Revenue Secretary, and Sri J. P. Shrivastava, the then Director of Land Records, Bihar. I owe a special debt of gratitude to Sri M. P. Singh, Deputy Director of Surveys, Bihar, who not only helped with some of his experienced staff but also provided valuable technical supervision from time to time.

The Village Statistics and the Village Directory, together with the Anchal maps, should provide a complete index and statistical guide to each village in the district. Among other items of interest, mention may be made of the note introducing the district, brief gazetteer of places, glossary of ancient monuments and official statistics. These are, of course, in addition to the census tables for the district. It is regretted that paucity of space stood in the way of reproducing a good many of the other census tables in the Handbook. For instance, Migration and Housing Tables have been excluded completely. These may be looked for, if necessary, in the relevant State volumes.

This Handbook is the product of hard toil and patient labour of several persons and agencies. No list can really be comprehensive enough to include them all. An acknowledgement appears elsewhere mentioning some of those who were associated with this work in the Census Office. Outside sources and agencies have been mentioned, as far as practicable, at appropriate places in the book itself.

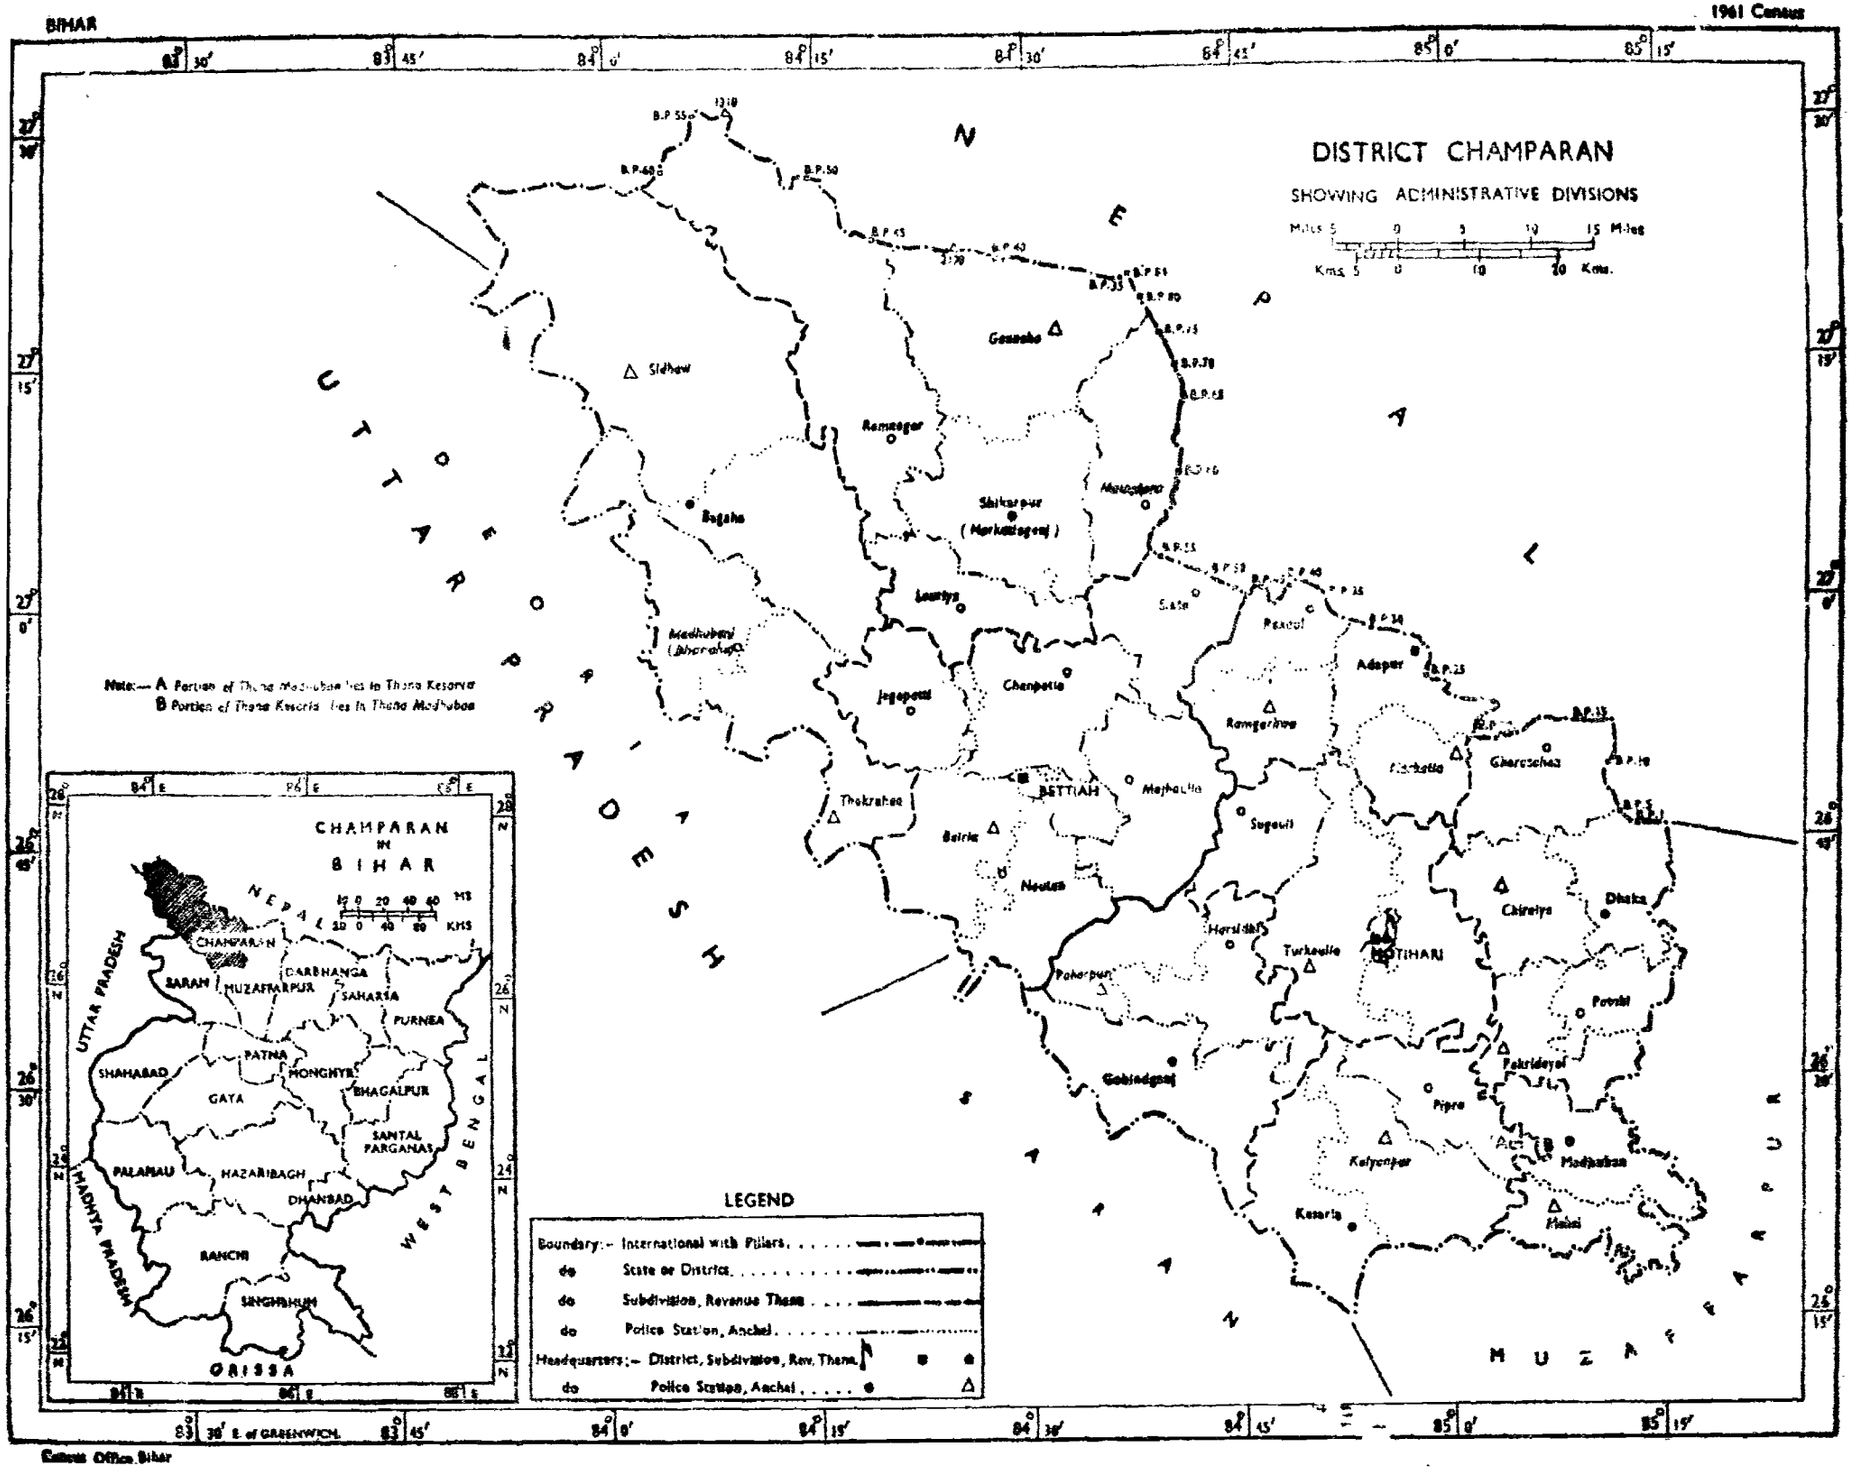

My thanks are also due to the Law Publishing House, Allahabad for the care and interest taken in printing this volume.

S. D. PRASAD
Superintendent of Census Operations, Bihar

PATNA :
July, 15, 1966.

BIHAR

1961 Census

Census Office, Bihar

INTRODUCING THE DISTRICT

1. GENERAL

The district of Champaran lies in the north-western corner of the State of Bihar. It is situated between latitude 26°16′ and 27°31′ North, and longitude 83°50′ and 85°18′ East. It is bounded on the north by Nepal, on the east by Sitamarhi subdivision of Muzaffarpur, on the south by Sadar subdivision of Muzaffarpur and Gopalganj subdivision of Saran, and on the west by Deoria district in Uttar Pradesh.

Champaran Sadar and Bettiah are the two subdivisions in the district which has 26 police stations (inclusive of Motihari and Bettiah Town Police Stations) and 36 anchals distributed as under:

Subdivision	Number of Police stations	Number of Anchals
Sadar	13	20
Bettiah	13	16
TOTAL	26	36

2. BRIEF HISTORY

Ancient Period

Mythology avers that Champaran contained forest hermitages of many great sages and *Rishis* in the Vedic period. The Vishnu and Brihad Vishnu Puranas contain mention of *Champak Aranya* (literally, 'forest of Champa trees'). References are also found of Tappa Duho Suho being the territory of King Uttanpada, father of the devout boy-saint, Dhruva. Sangrampur is locally believed to have been the arena of battle in which Lava and Kush engaged their father, Lord Ramchandra. But the Ramayana mentions the site of the battle as being located on the bank of river Tamasa (existing Tons).

During historical period Champaran constituted a part of the ancient Kingdom of Videha, the Aryan Videhas having been ordained to settle east of the Gandak river. Among the greatest of the Videha kings was Janak, himself a scholar and author of the Upanishads, whose chief priest, Yajnavalkya, was the renowned codifier of Hindu Law. After the decline of the Videha empire, Champaran formed part of the Vrijjian oligarchical republic with its capital at Vaishali (in Muzaffarpur district). The Lichchavis were the most prominent of the clans which constituted the Vrijjian confederation.

Ajatasatru, the Magadh emperor succeeded in subduing the Lichchavis and occupying their capital at Vaishali. He extended his sovereignty over the present district of Champaran which continued under the Mauryan rule for the next hundred years. Ashoka's pillars have been found at Lauriya (Nandangarh), Rampurwa and Areraj within Champaran district. After the Mauryas, the Sungas and Kanvas ruled over Magadh and its territories. Archaeological evidences pointing to the material culture of the Sunga and Kanva periods have been found in Champaran.

The Kushans, who were migrant Turks, overran the entire northern India in the first century A. D. At that time Champaran probably formed part of the Kushan empire. The Kushans gave way to Banphar Rajputs in the 3rd century A. D. Champaran later became part of the Gupta empire but the excavations and investigations so far carried out have not thrown sufficient light on the material culture of the district in that age. Along with Tirhut, Champaran was possibly annexed by Harsha in whose reign Hiuen Tsang, the famous Chinese pilgrim, visited India.

In the early medieval period, the Palas (750—1155 AD) were in possession of the eastern India, and the territory of Tirabhukti (which embraced Champaran) formed part of the Pala Empire, as evidenced from an edict commemorating the grant of a village in Tirabhukti. Towards the end of the 10th century, Gangeya Deva of Kalachuri dynasty conquered Champaran. He gave way to Vikramaditya, son of Emperor Someshwar I of the Chalukya dynasty, who was accompanied by adventurers from the Carnatic. One of the latter founded the Sena dynasty of Bengal. Another, Nanyadeva, founded the Carnatic dynasty of Mithila with its capital at Simraon on the Indo-Nepal border in Champaran. Nanyadeva was succeeded by Gangeya Deva, Narsimh Deva, Ramsimh Deva, Sakti Simh Deva and finally Harsimh Deva, the last of the line.

Medieval Period

Muslim influence was first extended to Tirabhukti by Ghyas-uddian Iwaz, Muhammadan Governor of Bengal, between 1211 and 1226. It was, however, not a complete conquest and he was only able to extract tribute from Narsimh Deva, the Simraon king. In about 1323 Ghyas-uddin Tughlak annexed Tirabhukti and placed it under Kameshwar Thakur, the founder of the Sugaon or Thakur dynasty and the Brahmin Raj-Pandit. Kameshwar Thakur was installed because Harsimh Deva, the last Simraon king, had fled to Nepal. The Sugaon dynasty continued to hold Tirabhukti as a tributary province for about a century after the capture of Harsimh Deva. The most famous of the whole line was Raja Shiva Singh, the son of Kameshwar Thakur, and a great patron of literature. Vidyapati, the renowned Maithili poet, was a courtier

in his court, and a copper plate records the grant of village Bisapi, the village of his birth, to the poet. Shiva Singh succeeded in establishing independence in 1402, but he was defeated three years later and carried off to Delhi. His wife, Lakshima, fled to Nepal and after a lapse of twelve years (during which she heard nothing about her husband), committed *sati*. During the rule of Lakshminath Deva, Tirabhukti was attacked from the east by Sultan Allauddin Hussain Shah of Bengal and Sikandar Lodi of Delhi. However, they concluded a treaty in 1499 according to which Tirabhukti was to be left to Sikandar Lodi. Subsequently Sikandar Lodi attacked Tirabhukti and made the prince a tributary chief. However, in contravention of the treaty concluded by his father, Nasrat Shah, son of Allauddin Shah, attacked Tirabhukti in 1530, annexed the territory, killed the Raja and ended the Thakur dynasty.

Nasrat Sah appointed his son-in-law as Viceroy of Tirhut and thenceforward it was governed by Muhammadan Governors. In 1526 Babar defeated Sikandar Lodi but Champaran did not come into prominence until the last days of the Muhammadan rule.

Alivardi Khan succeeded as the Mughal Viceroy of Bihar in 1729. He attacked the Raja of Bettiah and induced him to pay revenue. In 1748 there was an insurrection of Afghans under the leadership of Mustafa Khan who murdered Alivardi's son-in-law, then Governor of Bihar, at Patna. Alivardi Khan hurried up from Bengal and defeated the Afghans. The leader of Afghans was Shamsher Khan. The women of his family fled to the protection of the Raja of Bettiah, who was ready to pay Rupees three lacs to Alivardi Khan for the refugees but the latter refused the deal. He insisted on the unconditional surrender of the family members of the Afghan Chief and advanced towards Bettiah to enforce his demands. The Raja thereupon quietly gave up the wife and daughter of Shamsher Khan but the women were treated with utmost courtesy by Alivardi Khan.

In the last days of Mughal empire, Champaran again suffered the ravages of contending armies. Prince Ali Gauhar (later known as Shah Alam) invaded Bihar in 1760 and Khadim Hussain, the Governor of Purnea, moved with his army to join him. Meanwhile, Nawab Sirajudaulla of Bengal had already been defeated and killed as a result of the joint conspiracy of Mir Jafar Khan and the British, in June 1757. Before Khadim Hussain could meet Shah Alam's forces, Captain Knox led a British force and defeated Khadim Hussain at Hajipur who then fled to Bettiah. Miran and a force commanded by Major Caillaud set out in pursuit and Khadim Hussain was defeated again. His men were encompassed between the hills. By that time monsoon had set in and this resulted in Caillaud's remaining at Bettiah till he had subdued the Raja. But the submission of the Raja of Bettiah was temporary. Mir Kasim was forced to send another expedition which captured Bettiah in 1762. In the meantime, Prince Gauhar was proclaimed the Emperor of India and Mir Kasim the Governor of Bihar.

In January, 1763, Mir Kasim invaded Nepal. The army was led by Nawab Gurgin Khan. Gurgin Khan advanced his force and entered Champaran. His army entered the mountains of Nepal while the Nawab still remained at Bettiah. He was met by the Nepalese who were defeated. When the victorious army was entrenched on the summit of the hill, the Nepalese attacked at night and drove them back in disorder. This expedition caused a heavy drain on the resources of the Nawab in money and manpower, as well as widespread humiliation and loss of prestige.

British Period

In 1764, Champaran passed with the rest of Bengal to the East India Company, but military expeditions were necessary to curb the independent spirit of the chiefs of the district. In 1766, British forces under Robert Barker marched into Champaran, overcame the little resistance offered by local chiefs and forced them to pay revenue which they had so long desisted from doing. However, the Raja of Bettiah did not pay revenues regularly, and revolted, only to be crushed. He fled to Bundelkhand and his estate was confiscated. But the British found it difficult to manage the estate in the face of strong popular resentment, and when an uprising was in the offing, the estate was restored to the Raja in 1771.

Meanwhile, important developments of far-reaching consequence were taking place in Nepal. The Gurkhas, under their chief Prithvi Narayan, became powerful and were engaged in the conquest of the Nepal Terai. They became a threat to the Newar Raja of Nepal who appealed to the British for assistance in 1767. The British responded to the appeal of the Raja in the interests of their trade with Nepal and sent a force under Major Kinloch. The force had to put up with serious obstacles in their march in the hilly terrain where there was no proper line of communication and supplies often ran short. The force, therefore, had to return after three months without achieving anything. However, in order to recoup the expenses of the expedition, the entire *terai* was occupied in January, 1768. A treaty with the Gurkhas was concluded at Dinapur in 1781 by which a residency was established in Kathmandu. But the treaty was short-lived as it was dissolved in 1804. Thereafter followed a period of constant border troubles. In 1811 Lakshman Gir, the Gurkha Governor of Rautahat crossed the frontier with a force and occupied some villages then under the Raja of Bettiah. However, the people resisted the aggression and killed Lakshman Gir. This was followed by a bigger attack from Kathmandu. This time the invaders succeeded in occupying twenty-two villages which had previously been under dispute. Negotiations followed for the restoration of the territory to the British, but to no avail. Hence war was formally declared on 1st November, 1814. Though there was no fighting inside Champaran district, conditions were naturally very disturbed. The British forces occupied the entire terrain and on the 28th November, 1815 a treaty was concluded at Sugauli. The treaty, however, was not ratified by the Nepali Durbar until another British expedition of 20,000 men was sent under General Ochterlony in 1816. According to the treaty the British were granted the *terai* between the Rapti and the Gandak rivers excepting Butwal Khas. They also retained the portion between the Gandak and Kosi which they had already occupied. There was peace

for 25 years following this treaty but trouble started again in 1840 when a section of the Gurkha troops entered the estate of the Raja of Ramnagar and put forward a claim to a part of his territory. On determined resistance, however, the Gurkha troops withdrew and evacuated the villages they had occupied. Later, the Nepalese proved faithful allies of the British in suppressing the National Movement of 1857.

The Great Movement of 1857

The repression of the Wahabi movement at Patna gave further impetus to the seething discontent among tenants against the activities of the administration and the indigo-planters. The cultivators were compelled to grow indigo in spite of losses sustained on this account. Moreover, many kinds of illegal realisations were also made by the landlords. The administration always turned a blind eye to these oppressions.

When the news of the uprising in June, 1857 reached Champaran, the Britishers in the district were in great discomfiture. At that time the 12th Irregular Cavalry, was stationed at Sugauli under the Command of Major Holmes. He apparently panicked and proclaimed martial law on his own authority though this measure did not receive the whole-hearted support of higher authorities. The oppressive measures of Major Holmes and the execution of some sepoys fanned resentment and the members of the cavalry revolted. The Major, his wife and other British residents were killed and the soldiers proceeded towards Siwan to join other forces who had risen against the British authority. The resurrection was, however, subdued by the Britishers. They appointed Honorary Magistrates from among the indigo-planters and also authorised them to raise local police. Some of the big estate-holders like the Raja of Bettiah also gave support to the British. Gurkha troops also proved a great asset to the British during this time.

Later Period

The later history of the district is intimately connected with indigo plantation. Britain used to get supplies of indigo from her American colonies but this ceased after the War of Independence in 1776 as a result of which the colonies became free. This led to a falling back upon India for supplies of indigo. Many factories were set up by Europeans in the indigo-producing areas of Bengal and Bihar. The Bettiah and Ramnagar estates gave leases of land to them for indigo cultivation on rather easy terms. By the end of 19th century, about one lakh acres of the most fertile lands in the ditrict were owned by European planters who had set up more than 30 factories. The arrangements made for cultivation of indigo were mainly of two kinds.

(*i*) *Zirat*—In this system, the ownership of land vested in the proprietor of the factory and the cultivators were paid wages for the work they did in the fields.

(*ii*) *Teenkathia*—In this system indigo was grown by factory tenants who, according to the terms of contract, were obliged to grow indigo on at least three *kathas* per *bigha* of their holdings.

On the face of it, there was nothing much wrong with either of the two systems; but in practice, the peasants suffered greatly. The wages paid to labourers were extremely low and entirely inadequate, though they were made to work very hard and were severely punished for alleged slackness on their part. In the *teenkathia* system, the tenant was made to set apart the most fertile section of his holding for growing indigo. He was required to prepare the fields in accordance with the rigid specifications laid down by the planters, the slightest deviation from which was fraught with levy of heavy fines and, often, even mercilessly thrashing. In fact, the planters had let loose a reign of terror in the district. They were held in such a great awe that none dared pass their *kothis* wearing shoes or cap, and nobody could be seated on a vehicle or horse-back when a *Saheb* was present. Even members of marriage parties had to remove their headgear and footwear, while passing the house of a European planter. The administration was apathetic to the discontent among the peasants. Thus, some of the planters were even immoral in their behaviour and cared little for the chastity of the local women. On economic side, the illegal and arbitrary realisations (called *abwab*) made from the tenants were numerous. Some of them are indicated below:

1. *Bapahi-Putahi*—a levy realised when a son inherited his father's property.
2. *Ghorahi* and *Bhainsahi*, by which old and useless horses and buffaloes of the European planters were disposed of by lottery and every tenant was compelled to participate in the lottery by paying a rupee each.
3. *Bangalahi*—a levy realised for effecting repairs to bungalows occupied by planters.
4. *Haq-talbana*—a kind of process fee payable by tenants.
5. *Faguahi*—a levy realised on the occasion of *Holi*.
6. *Motarahi*—a levy realised for the purchase of motor car for the use of European planters.

The above merely illustrates the wide range of illegal exactions made by the planters for personal ends against which the tenants were unable to do anything. The discontent arising from the unwarranted tyranny on indigo cultivators kept growing but an organisation to voice their grievances could be set up only in 1897-98. The tenants were exhorted to stop cultivating indigo. The campaign was led by Sheikh Ghulam and Sheetal Rai and received considerable support. To thwart the uprising, the planters got the leaders of the agitation appointed as special constables under the Police Act and on their refusal to work as such, they were convicted. The peasants were thus bereft of their leadership. The agitation fizzled out for the time being until the release of Sheikh Ghulam and other leaders by the High Court of Calcutta, after their conviction under the Police Act was set aside. The movement was renewed and even newspapers and journals advocated the cause of the peasants. However, the administration crushed the agitation with a heavy hand. They raised a police force at the cost of the impoverished tenants and posted them in large numbers in rural areas. Wanton arrests of peasants commenced in large numbers. Popular disaffection

continued to grow and the Government was forced to appoint a Commission to enquire into the causes of unrest. The report of this Commission was never made public. In June, 1910 assurances were given that undue realisations would cease but they remained merely hollow promises. Things continued in the same state of affair until the arrival of Mahatma Gandhi on the scene.

Shri Raj Kumar Shukla, an indigo cultivator of the district, had heard of Mahatma Gandhi and his non-co-operation movement in South Africa. He met Gandhiji and apprised him of the miserable plight of indigo cultivators in the Champaran district and persuaded him to agree to visit the district. At about the same time, the Indian National Congress in its annual session held in December, 1916 at Lucknow passed a resolution urging upon Government to appoint a committee comprising both of officials and non-officials to enquire into the agrarian trouble in this district.

Gandhiji's visit to Champaran was stoutly opposed by the British rulers. An order under section 144 Cr. P. C. asking him to leave was served as soon as he arrived at Motihari. Gandhiji defied the order. Of several prominent persons who rallied round him, mention may be made of Dr. Rajendra Prasad, Acharaya Kripalani, Sri Mahadeo Desai, Sri C. F. Andrews, Sri H. S. Pollock, Sri Anugraha Narain Sinha, Sri Braj Kishore Prasad, Sri Ram Navami Prasad and Sri Dharnidhar. After considerable struggle, Government relented and lifted the ban on Gandhiji's stay. Champaran can rightly claim to be the first arena in the country where Ghandhiji's unique weapon of *satyagraha* was put to test with great success. Specific instances of highhandedness on the part of planters were obtained through evidences recorded by Gandhiji and his team mates. Eventually, a committee of enquiry was appointed by Government under the chairmanship of Sir Frank Shy, of which Gandhiji was also a member. As a sequel to the recommendations made by this committee, the Champaran agrarian law (Bihar and Orissa Act I of 1918) was passed, and with it, the age of planters' tyranny. Also, in course of time, the development of synthetic dyes made the cultivation of indigo redundant and now it is hardly grown at all.

Gahdiji made an extensive tour of Bihar in 1920 on the eve of the launching of non-co-operation movement which received full support in the district. Champaran sent a group of volunteers to demonstrate against Simon Commission in 1929. In the same year, the 21st session of the Bihar Students' Conference was held at Motihari.

The salt *satyagraha* was started on the 15th April, 1931. Many volunteers prepared salt and courted arrest in the district. When the top Congress leaders were arrested, ***hartals*** were observed at Bettiah and Motihari. Foreign goods were boycotted and shops displaying such goods picketted. The payment of Chaukidari tax was suspended. Champaran was among the outstanding districts in the State in regard to the national movement. On their part Government took repressive measures and besides the arrest of prominent Congressmen, considerable amount of properties were confiscated or destroyed.

After the failure of the Round Table Conference in 1932 there was a popular assemblage at Motihari for taking the independence pledge. This gathering was lathi-charged and fired upon by the police.

After the introduction of the Government of India Act, 1935 general elections were held all over the country in 1937. Champaran elected Congress representatives in the elections based on the Government of India Act, 1935. The Quit India Movement of 1942 found large numbers of votaries in the district. The Indian National Flag was hoisted on prominent Government buildings in Motihari. Railway lines and telegraph wires were tampered with and communications disrupted. Many police stations were stormed and temporarily occupied. Military had to be called from Muzaffarpur and the mass uprising could be quelled by sheer force of arms and brutal assaults and killings. Later, people had to pay large amounts of punitive fines on collective basis.

The struggle, sacrifice and sufferings of a large mass of people for several decades eventually culminated in achievement of full independence on August 15, 1947.

3. PHYSICAL FEATURES

Natural Divisions

The district of Champaran consists of four broad natural divisions. These are : (i) the mountainous area in the extreme north, lying at the foot-hills of the Himalayas; (ii) the sub-montane *terai* region just south of the mountainous region ; (iii) the northern alluvial plain and (iv) the southern alluvial plain.

The mountainous area consists of the Sumeshwar and Dun ranges with their foot-hills, thickly forested with useful timber. The hill ranges are only 1,500 feet in average height and extend for about 66 miles along the northern contour of the district covering an area of about 364 sq. miles.

The *terai* (literally foot-hills) is still largely under forests which, however, have been progressively cleared for cultivation. The area is damp and swampy and, therefore, somewhat unhealthy. The land contains alluvium brought down by hill streams which, however, are useless for irrigation purposes and often adversely affect the land with their deposits of sand. The *terai* is the home of the Tharus of Bihar and contains vast pastures and arable land for paddy cultivation.

To the south of the *terai* and north of the *Sikrahna* is the northern alluvial plain, composed chiefly of old alluvium. It is low-lying and hence, particularly suited to paddy cultivation.

Finally, the southern alluvial region consists of the more recent deposits of the Gandak which has since changed its course and flows further west. This region is more suited to the cultivation of ***kharif*** and ***rabi*** crops. The soil is lighter in texture.

A notable feature of the district is the chain of 43 lakes extending over an area of 139 sq. miles. They

obviously represent old beds of the Narayani Gandak. The lakes are 3—20 feet deep and contain water through out the year. The water is not drinkable and, peculiarly, fish are not found in them.

Topography and Hills

Roughly resembling a parallelogram in shape, the district of Champaran lies between the Himalayan range in the north and the great Gangetic plain in the south. The general aspect of the southern and eastern parts of the district is almost the same as that of the rest of North Bihar.

The Sumeshwar and Dun hills in the extreme north occupy about 364 sq. miles and constitute the lowest and outermost of all the Himalayan ranges with an average height of about 1,500 feet in the district.

The Sumeshwar hills form a section of the continuous range which runs through Nepal. They are chiefly composed of imperfectly compacted sandstone. The highest point is Fort Sumeshwar (2,884 feet above sea level) which commands an excellent view of the high snow-capped Himalayan peaks such as Dhaulagiri (26,826 feet high).

The Dun hills comprise a range of low hills running far about 20 miles from the north-west corner of the district in a south-easterly direction. The average breadth is about 4 miles.

Between the Sumeshwar and Dun ranges is the Dun Valley, comprising of an elevated table-land.

Rivers

The general line of drainage is first from north to south, and then from north-west to south-east, the latter being the predominant course of the rivers.*

The Gandak (also known as the Great Gandak, Narayani and Saligrami) is the most important river of the district. It rises in the central mountain basin of Nepal known as Sapt-Gandaki from the seven streams which unite to form this river. After flowing for about 30 miles beyond the Indian border, the river descends to the plains at Tribeni, at its confluence with the Sonaha and the Panchnad. From here, the Gandak flows in a south-easterly direction, roughly forming the boundary with the Deoria district in Uttar Pradesh and further south with the Saran district in Bihar. The river joins the Ganga near Hajipur opposite Patna, after traversing a distance of 173 miles from Tribeni. Being snow-fed, the Gandak is a torrential stream until it leaves the hills, after which it becomes wider and less turbulent. It is navigable upto Tribeni, timber being the chief product transported by river. Embankments have been constructed on both sides of the river to prevent over-flooding of the adjoining areas during the rains. The catchment area of the river upto the Indo-Nepal border is 14,612 sq. miles. The Gandak Irrigation and Power Project has been taken up to tap the potential available from this river.

* Bihar and Orissa District Gazetteers, Champaran, page 4, para 3.

The Sikrahna or Little Gandak is the next largest river in the district. It originates in the Chautarwa *Chaur*, and flows in south-easterly direction through the central portion of the district till it turns south at Lakhaura, north of Motihari. The southern portion of the river is known as Burhi Gandak. It flows into Muzaffarpur at village Simra. The Sikrahna often causes floods in Champaran as it often changes its course along the friable sandy banks. The maximum depth of the river is only 18 feet, its width varying from 260 to 975 feet. The Sikrahna, which is practically a continuation of the Manguraha, has a catchment area of 1,172 sq. miles of which 961 sq. miles lie in Nepal. Flood protection embankments have been constructed along the river (41 miles on the right bank and 31 miles along the left). It is further proposed to have continuous embankments on both sides.

The *Lal Bakeya* originates in the foot-hills of Nepal and flows through the district in a southerly direction. It forms the eastern boundary with Muzaffarpur till it meets the *Bagmati* at village Khori Pakar.

The *Bagmati* also rises in Nepal and enters the State near village Rasulpur in Muzaffarpur district. It takes a south-westerly course till it crosses the Raxaul-Darbhanga section of the North Eastern Railway near Dhang Railway Station. The river flows for 12 miles in the district of Champaran.

Flora and Fauna

Flora—Champaran, which was once densely wooded and derived its name from the thick forests of *Champa* trees, has suffered large scale denudation of forests, specially during the last fifty years. It had 427 sq. miles of forest area in the beginning of the century which came down to 355.50 sq. miles in 1959-60. Of late, afforestation schemes have been taken up but even now, only 10.03 per cent of the total land area of the district is covered by forests as against the minimum of 33 per cent laid down in the National Forest Policy.

Except in the extreme north, the land is too productive to be spared for wild growth. Forests are, therefore, confined to the northern tract only. The Sumeshwar and the Dun ranges are covered with forests. Among the trees found in this region are *Sal* (*Shorea robusta*), *Sisu* (*Dalbergia Sissoo*), *Tun* (*Cedrala toona*), the red cotton tree (*Bombax malabaricum*) and *Khair* (*Acacia catechu*). In the moist lands of the *terai*, clumps of bamboos, *sabai* grass (*Ischoemum angustifolium*) and *narkat* reed (*Amphadonax falcata*) are found in abundance. The cultivated area in the remaining portion of the district is dotted with clumps of bamboos, palm trees and mango orchards. River banks, which are subject to floods, are covered with growths of reeds and bushes. *Sisu* trees also grow on patches of waste land and on ridges. Sluggish streams and stagnant lakes are full of water weeds. Mango, *sisu*, tamarind and jack-fruit trees and various species of the *ficus* are found near habitations. Palmyra (*Barassus flabellifer*) and date plam (*Phoenix sylvestris*) also occur.

Fauna—Tiger, panther, bear, deer, sambhar, wild boar, leopard and bison (*Bibos ganrus*) are the wild animals found in the forests of Champaran. The rhino (*Rhinoceros unicornis*) sometimes appears from the neighbouring forests of Nepal. Monkeys, wolves (*Connis Pallipes*) and wild goats of various types are found in large numbers.

Three types of quails of the amazonian species are seen in Champaran. They are the bustard quails, button quails and the little button quails (*Turnix Sylvatica*). The little button quail is locally known as *lawa*, while the button quail is called the *burra lawa*. The bustard quail is called *gulu*. The Nepal kaleej pheasant, which is a large ground bird like a fowl, is also found in the district. Green pigeon are also met with.

Amongst the common birds found in the district are the brown fly-catcher the grey shrike which is of a french grey colour with black stripe above the eye and is usually of the size of a *myna* ; the green willow warbler, an olive green bird, the various types of *mynas* ; the tree pipit; and the different types of vultures.

Ducks are found in the marshes and on the river banks. Among the waders seen in the district are storks, herons,ibises and the spoon-bills.

The *rohu*, *naini*, *katla*, *tengra*, *buali*, *sauri*, and the *bansari* are the big fish found in the bigger rivers and lakes of the district. Among the common small fish are the *rewa*, *bachwa*, *pothia*, *garai*, *bulla*, *tengra* and the *jhinga*, *kewai*, *mangur* and *senghi* are also found.

Snakes are quite common in the district. Python, cobra, king cobra, *karait*, *dhamin*, *ghorkarait*, *sugwa*, *dommoha*, *dhonrh*, *paniadarad*, *sankhar* and *harhara* are the snakes occasionally met with. Crocodiles and alligators are sometimes found in the larger rivers.

Climate and Rainfall

The climate of Champaran is cooler than that of the adjoining districts of Saran and Muzaffarpur. The *terai* area, comprising mainly of Ramnagar, Bagaha and Shikarpur revenue thanas, is still comparatively unhealthy and moist but malaria has largely been controlled.

The mean temperature of Motihari is 75—77°F. The maximum reaches 110°F while the minimum is about 39°F. Winter begins in November and lasts till February, followed by the hot summer months and rains from the latter part of June. There is some winter rain also, 4.85 inches having been recorded in November, 1956—February, 1957.

The average annual rainfall in the years 1951—60 is given below :

Year	Average rainfall (in inches)	Year	Average rainfall (in inches)
1951 ..	49.27	1956 ..	61.35
1952 ..	54.98	1957 ..	41.48
1953 ..	60.26	1958 ..	61.60
1954 ..	44.33	1959 ..	50.42
1955 ..	59.38	1960 ..	54.01

The normal annual rainfall in Champaran at 56.18" is higher than that of any other district in the State except Ranchi and Purnea. Saran (44.91") and Muzaffarpur (46.44") are comparatively drier.

The average annual rainfall recorded at different stations in the district is given below :

Station	Geo. co-ordinates				No. of years	Annual rainfall (in mm)
	Lat.		Long.			
	D	M	D	M		
Champaran District Normals (13 stations)	..	..	..	..	..	1,391.5
Motihari ..	26	40	84	55	50	1,311.2
Bettiah ..	26	48	84	30	50	1,253.1
Bagaha ..	27	05	84	06	50	1,461.2
Burharwa ..	27	14	84	38	50	1,183.1
Ramnagar ..	27	07	84	23	49	1,569.0
Narkatiaganj ..	27	05	84	30	44	1,492.2
Kesaria ..	26	21	84	53	46	1,203.4
Dhanaha ..	26	55	84	05	46	1,462.5

Lauriya (Nandangarh)	26	58	84	15	28	1,326.2

4. COMMUNICATIONS

Roads

Champaran had no proper road till the year 1800. The planters constructed some roads and in 1841, the road from Mehsi to Bettiah (about 50 miles) was "excellent".* By 1876, total road mileage in the district rose to 438 which was more than doubled to 1,081 in 1906 and again to 2,356 in 1932. However, even in 1932 only 91 miles were metalled.

Table CMN-I at page 134 of Part I gives the mileage of extra-municipal roads according to which the total length of bituminous, concrete and waterbound macadam roads under the P.W.D. was 383.25 miles. The revised figures furnished by the department (for which break up are not available), however, put the length of surfaced roads managed by the P. W. D. to 432.14 miles. With 78 miles of National Highways, the surfaced road mileage in the district has 510.14 miles.

The National Highways passing through the district are —

No. 28 : Muzaffarpur-Pipra-Gorakhpur-Lucknow.

No. 28-A : Pipra-Sugauli-Raxaul-Nepal border.

The sections of above roads within the district are—

(*i*) Muzaffarpur border-Champaran-Sugauli Road (40 miles).

(*ii*) Sugauli-Raxaul Road (20 miles).

(*iii*) Pipra Kothi-Dumrighat Road (18 miles).

Important among the State highways and District roads are—

(*i*) Imampati-Motihari-Turkaulia-Gobindganj Road — 22 miles.

(*ii*) Motihari-Madhubani Ghat Road — 10 miles.

(*iii*) Dhaka-Ghorasahan Road .. 11 miles.

(*iv*) Sugauli-Bettiah Road .. 18 miles.

(*v*) Motihari-Dhaka Belar Ghat Road — 24 miles.

(*vi*) Bettiah-Bagaha Road .. 40 miles.

(*vii*) Lauriya-Shikarpur-Thori Road — 28 miles.

(*viii*) Bagaha-Bhaisalotan (Tribeni) Road — 23 miles.

District and Local Board roads, about 1,000 miles in length, are mostly unsurfaced.

Passenger buses ply between the following points:

(*i*) Motihari, Gobindpur, Areraj, Ghorasahan, Bettiah and Muzaffarpur.

(*ii*) Raxaul and Muzaffarpur

(*iii*) Bettiah and Pahleza Ghat *via* Ramnagar, Bagaha and Lauriya.

Railways

The railways were introduced in 1888 when Bettiah was linked with Muzaffarpur. The line was extended subsequently to Bhikna Thori on the Indo-Nepal border. A short line runs from Sugauli to Raxaul, providing connection with the Nepal Light Railway at Raxaul. The third line runs from Bagaha to Bairgania in Muzaffarpur district. The total railway mileage in the district is 198¼.

Landing Grounds

Motihari and Bettiah have landing grounds for planes. A large aerodrome has been built at Raxaul, primarily for defence requirements.

5. THE DISTRICT ADMINISTRATION

General Administration

Champaran originally formed a part of the district of Saran with headquarters at Chapra. A Joint Magistrate was posted at Motihari in 1837 with criminal jurisdiction over the present area of the Champaran and powers of a Deputy Collector. He was subordinate to the Magistrate and Collector of Saran. The Bettiah subdivision was constituted in 1852 and the Champaran district in 1866. The Sadar subdivision was put under a Subdivisional Officer in 1916. The district forms a part of the Tirhut division.

In the present set up the District Magistrate and Collector is at the head of civil, revenue and criminal administration of the district. He is also the Chief Development Officer in as much as he co-ordinates the activities of different Development Departments in the district. He is assisted by two senior officers—one on the revenue side and the other on development side. The former is designated as Additional District Magistrate and Additional Collector and the latter as District Development Officer. Besides these two Officers, he has a number of Deputy Collectors, Sub-Deputy Collectors and other officers posted at the district headquarters to assist him. The Commissioner of Tirhut Division with his headquarters at Muzaffarpur exercises general supervision and control over the Collector of Champaran.

Each of the two subdivisions is under the charge of a Subdivisional Officer drawn either from the Indian Administrative Service or the Bihar Civil Service. The Subdivisional Officer works under the direct control of the District Officer, and is assisted by a number of Deputy and Sub-Deputy Collectors.

The district has 24 police stations (excluding the two town police stations) and 36 anchal-cum-development

*Bengal and Agra Guide and Gazetteer, 1841, quoted in Champaran Gazetteer (1932), p. 102.

blocks, made up as follows:

Police station	Anchal
Sadar subdivision	
1. Motihari Mufassil	1. Motihari 2. Turkaulia
2. Sugauli	3. Sugauli
3. Adapur	4. Adapur 5. Narkatia
4. Raxaul	6. Raxaul 7. Ramgarhwa
5. Dhaka	8. Dhaka 9. Chiraiya
6. Ghorasahan	10. Ghorasahan

8. Kesaria	13. Kesaria 14. Kalyanpur
9. Pipra	15. Pipra
10. Madhuban	16. Madhuban 17. Mehsi
11. Gobindganj	18. Gobindganj
12. Harsidhi	19. Harsidhi 20. Paharpur
Bettiah subdivision	
13. Bettiah	21. Bettiah
14. Jogapatti	22. Jogapatti
15. Majhaulia	23. Majhaulia
16. Nautan	24. Nautan 25. Bairia
17. Sikta	26. Sikta
18. Chanpatia	27. Chanpatia
19. Bagaha	28. Bagaha 29. Sidhaw
20. Dhanaha	30. Madhubani 31. Thakrahan
21. Sikarpur	32. Narkatiaganj 33. Gaunaha
22. Ramnagar	34. Ramnagar
23. Mainatanr	35. Mainatanr
24. Lauriya	36. Lauriya

Anchal-*cum*-development blocks were constituted primarily with a view to having smaller units of administration to facilitate the implementation of land reforms measures and community development schemes. Each anchal is incharge of an Anchal Adhikari, who also becomes the Block Development Officer when the Community Development programme is introduced. The Anchal Adhikari-*cum*-Block Development Officer is drawn from the Bihar Civil Service or the Bihar Junior Civil Service. He is incharge of revenue, development and welfare activities in the area and also works as a magistrate on special occasions. He has a large staff sanctioned on uniform basis throughout the State. The lowest rung of the hierarchy in anchal-*cum*-development blocks consists of the *Karmachari*, the *Jansewak* and the *Panchayat Sewak*. The *Karmachari* is the revenue official and the *Jansewak* (V.L.W.) the main agent of development activities. Both are incharge of a *halka*—an anchal consists ordinarily of 8—12 *halkas*. The *Panchayat Sewak* is a functionary of the *Gram Panchayat* Each *Panchayat* has a population of about 4,000 and, on an average, a *halka* consists of 2-3 *panchayats*. These averages are, however, too general and wide variations can be met with.

Revenue Administration

The tenantry nowhere in Bihar suffered as much as in Champaran at the hands of the European indigo planters. Earlier in the section dealing with 'brief history', a short account of these sufferings has been given. It was this consideration more than any thing else that prompted Mahatma Gandhi to launch his first *Satyagraha* in this country in Champaran.

Since then several laws have been enacted with a view to ameliorating the conditions of the peasantry. The Bihar Land Reforms Act, 1950 was easily the most significant step in this direction. Under its provisions all intermediary interests such as the *zamindaris*, *patnis*, tenures, etc., were abolished and the tenant was brought directly under the State. The taking over of the estates was done in two stages. In the first stage estates with income of Rs. 50,000 or more were taken over; and in the second, all remaining intermediary interests vested in Government in 1955 by a general notification under section 3(*b*) of the Act. With these measures develoved on the State Government the huge task of building up an effective machinery for rent collection and other revenue work. The carving out of the State into 575 anchal-*cum*-development blocks provided a suitable opportunity for dove-tailing the needs of revenue and development work through a unified executiveagency.

For revenue work, each anchal-*cum*-development block is divided into 8—12 *halkas* of 10—12 villages each. Each *halka* is manned by a revenue official known as *Karmachari*. At the anchal level a Circle Inspector is posted to assist the Anchal Adhikari-*cum*-Block Development Officer in revenue work. At subdivisional level the Subdivisional Officer is assisted by an officer of the rank of Deputy. Collector incharge of land reforms work. The Additional Collector is similarly incharge of revenue work at the district level subject, of course, to the overall control and supervision of the Collector of the district. In suitable cases, the work of rent collection has been entrusted to Gram Panchayats.

The following table shows the revenue demand of the district chronologically:

Period	Assessment associated with	Total demand (in Rs.)	Area settled (in sq. miles)
1582	Raja Todarmal	137,835	148
1685	Aurangzeb	210,151	..
1750	Aliwardi Khan	200,000	..

Period	Assessment associated with	Total demand (in Rs.)	Area settled (in sq.miles)
Taken over by the British Government from the East India Company—			
1773	..	139,389	..
1843—49	1st Revenue Survey ..	508,737	3,579
1892—99	Cadastral Survey	515,803	3,244
1913—19	Revisional Survey	515,135	..
After Zamindari Abolition in 1950—55—			
1956-57	..	4,506,669	..

Criminal Administration

The District Magistrate is in overall charge of criminal a dministration of the district. It has two wings—the magistracy and the police. The former consists of the Additional District Magistrate (where there is one), the Subdivisional Magistrates and other Magistrates of Ist, IInd or IIIrd class powers. The police force in the district is headed by the Superintendent of Police, generally a member of the Indian Police Service (Senior Scale). He works under the control of the Deputy Inspector-General of Police, Northern Range, with headquarters at Muzaffarpur. He is assisted in each subdivision by an Assistant Deputy Superintendent of Police. Next in the hierarchy are Circle Inspectors who are in charge of police circles, of which there are four in the Champaran district. Police stations are usually headed by Sub-Inspectors of Police, assisted by Assistant Sub-Inspectors, Havildars and constables. Dafadars and Chaukidars comprise the rural police. The strength of police force in Champaran in 1960 was as follows :

1.	Superintendent of Police	1
2.	Deputy Superintendent of Police ..	2
3.	Inspectors and Sub-Inspectors ..	48
4.	Sergeants, Assistant Sub-Inspectors and Havildars	75
5.	Constables	648
6.	Dafadars	149
7.	Chaukidars	1,574

Judicial Administration

A sessions court for Champaran was set up at Motihari for the first time in 1945. Prior to this, the District and Sessions Judge of Muzaffarpur used to hold circuit court at Motihari which then had the Court of a Subordinate Judge with the powers of an Assistant Sessions Judge. The District and Sessions Judge, Champaran, with headquarters at Motihari, is now the head of judicial administration of the district. He is a member of the Bihar Civil Service (Judicial Branch) drawing pay in the senior scale of the Indian Administrative Service. He is assisted by Subordinate Judges, Munsifs and Munsif-Magistrates and an Additional Sessions Judge if the volume of work so demands. Munsif and Judicial Magistrates are also posted at Bettiah.

There has been a complete separation of the executive and judiciary in the district from the 1st April 1957. Although cognizance of offences continues to be taken by Subdivisional Magistrates, the trial of criminal cases is done by officers entirely under the control of the District Judge and the High Court. Only cases under the preventive sections of the Code of Criminal Procedure continue to be tried by other magistrates.

Gram Kutcherries set up in each *Gram Panchayat* are empowered to try petty civil and criminal cases instituted with them. Legal practitioners are debarred from appearing before them.

6. AREA, VILLAGES AND TOWNS

Area

Champaran is the largest district of Tirhut division though it ranks only tenth among the districts of Bihar. Its area is 3,531 sq. miles (9,145 sq.km.) according to the State Survey, and 3,553 sq. miles (9,202 sq. km.) according to the Survey of India. The small difference of 22 sq. miles may be attributed to different methods of computation. Though the area of Champaran is somewhat smaller than the average (3,937 sq. miles) for the State it is larger than several districts such as Darbhanga, Muzaffarpur, Saran, Patna, Bhagalpur, Saharsa and Dhanbad.

Villages

The term 'village' has the same meaning in census as a revenue *mauza*, which was defined as follows in the Code of Census Procedure, 1961 :

> "A *mauza* means a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all or, on the other hand, several hamlets each bearing a different name."

Of 2,849 villages in the district of Champaran, 2,642 were inhabited while 33 were included within the 9 towns, 30 wholly and 3 only partly. The number of villages in Champaran is smaller than in all but three districts of the State, none of which is in the Tirhut division. Naturally, the average area of a village in Champaran (1.24 sq. miles) is much larger than that in the State (0.85 sq. mile). In fact, the size of an average village is larger than Champaran's only in the districts of Ranchi (1.80 sq. mile) and Saharsa (1.55 sq. miles).

With relatively larger areas, the average population of a village in Champaran (1,055 persons) is also much higher than that in the State (588 persons). Although Ranchi also contains large sized villages, the density of population in that district is rather low and the average population per village much smaller than in Champaran. However, the average population of a village in Saharsa (1,272 persons) is much higher than that of Champaran. In addition to Saharsa, the densely populated district

of Darbhanga and Patna also have higher populations per village than Champaran.

The following statement shows the distribution of inhabited villages and population contained in them by different size classes of population :

Distribution of villages and population by different size classes, 1961

Villages containing	Proportion per 1,000			
	Champaran district		Bihar State	
	Villages	Population	Villages	Population
Less than 500 persons	370	92	627	216
500—999 persons	281	186	204	228
1,000—1,999 persons	218	281	113	247
2,000—4,999 persons	111	310	49	228
5,000—9,999 persons	17	99	6	68
10,000—persons and above	3	32	1	13

Villages containing less than 1,000 persons each constitute as much as 65 per cent of the total villages but contain only 28 per cent of the entire rural population. The corresponding proportions for the State are 83 and 44 per cent respectively. It is evident that the district has a larger concentration of villages as well as population in higher size classes than the State as a whole. As many as seven villages in the district have populations exceeding 10,000 each and are even more populous than the town of Raxaul Bazar (population 9,699). The villages are :

	Name of village (Thana no.)	Anchal	Population, 1961
1.	Dhekaha (214)	Motihari	11,769
2.	Pachrukha (65)	Turkaulia	12,885
3.	Khartare (129)	Chiraiya	11,404
4.	Madhubani (176)	Gobindganj	11,373
5.	Semra Iabedaha (52)	Madhubani	19,252
6.	Dumari (262)	Madhubani	10,954
7.	Thakrahan (433)	Thakrahan	14,479

Towns

The district contained 10 towns in 1951. Of them, Kesaria Bazar was delisted in 1961 because of its predominantly rural characteristics and concentration of agriculturists in the male working population. The district headquarters of Motihari and the subdivisional town of Bettiah, have been treated as town in all censuses. Champatia Bazar became a town in 1941 while the remaining six towns (Raxaul Bazar, Bagaha, Sugauli, Shikarpur, Chakia and Lauthaha) entered the urban list only in 1951. No new town was added in 1961. While Motihari and Bettiah have municipalities, Lauthaha and Raxaul Bazar are covered by Notified Area Committees, there being no separate civic administration in the others. The population trend of the towns is discussed under the section "The Urban Population".

7. POPULATION

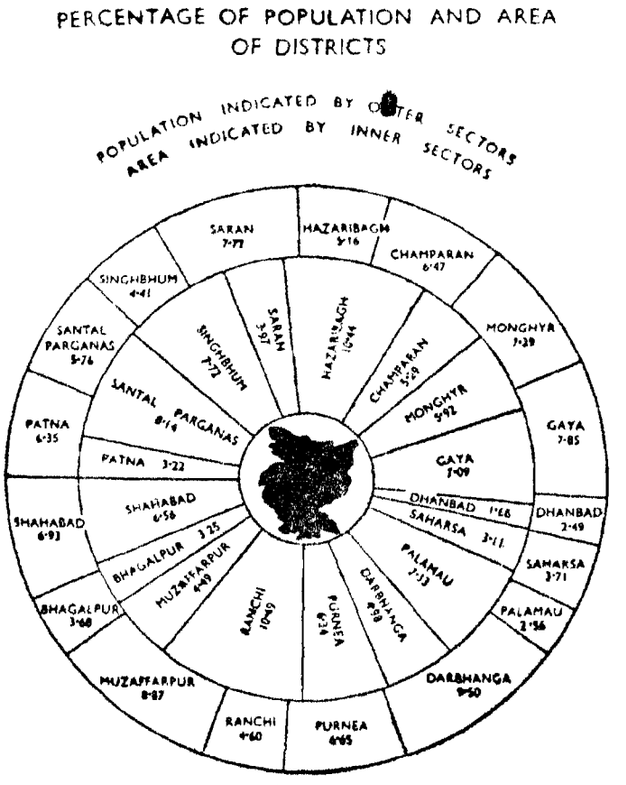

General

With a population of little over 3 millions (3,006,211) Champaran ranks eighth among the districts of Bihar, a position which it held also in 1951. Each of the three other districts of Tirhut division have always returned higher population than Champaran. Gaya, Shahabad and Monghyr have also ranked higher both in 1951 and 1961. Patna, with a much smaller area, had a higher population in 1951 but a comparatively lower growth rate in Patna in the last decade has enabled Champaran to steal a march over it. But the phenomenal growth of population in Purnea made it surpass even Champaran which, in the result, remained where it was in 1951 in its relative ranking.

Although smaller than the State average in area, the population of Champaran (which constitutes 6.5 per cent of the State population) is well above the State average of 2.73 million per district. Champaran is, in fact, more populous than New Zealand (2.4 millions, 1961) and more than half as much as Cambodia (4.8 millions, 1959).

The populations of individual towns and anchals are given at page 6 of Part I.

The diagram given alongside shows the percentages of population and area of districts in Bihar.

Distribution of Population

The eastern part of the district comprising the Sadar subdivision contains 1,681,089 persons or 55.92 per cent of the district population, and is the most populous subdivision in the State. The average population per anchal in the district is 83,506 persons. The more populous ones, containing more than 100,000 persons each, are 8 in number and evenly distributed in the two subdivisions. Of them, Motihari, Turkaulia and Pipra anchals in the Sadar subdivision and Chanpatia in the Bettiah subdivision also have densities of 1,000—1,200 persons per sq. mile. Gobindganj (in Sadar subdivision) and Bagaha, Narkatiaganj and Majhaulia (in Bettiah), although having large populations, are not as densely populated (800—1,000 persons per sq. mile). In addition to the above mentioned 8 anchals, another 8 have higher than average populations. These 16 Anchals, comprising 44 per cent of the total, contain as much as 55 per cent of the district population. The lowest population is contained in the small anchal of Mehsi in the south-eastern extremity of the district.

Density of Population

With a much higher density (851 per sq. mile) than the State average (694 per sq. mile) Champaran is the most sparsely populated district in the Tirhut division. The districts of Patna, Monghyr and Dhanbad also have higher densities than Champaran.

The physical characteristics of the district are well reflected in the densities of its anchals. Sidhaw in the north-western end has a density of less than 400. In the four other adjoining border anchals of Thakrahan, Madhubani, Ramnagar and Gaunaha, the density varies between 400 and 600. It is noteworthy that these 5 anchals are the most sparsely populated ones in the whole of the Tirhut division. They are largely comprised of *sub montane* regions and are thickly forested or form a part of the *diara* areas of the Gandak. On the other hand only two anchals, Bettiah and Raxaul, have densities over 1,200 and each of them contains a town. All other anchals (except Mainatanr) have densities ranging from 800—1,200 persons per sq. mile. Thus the density of population, rather low in the north-west, increases towards the south-east, where conditions for living and cultivation are more favourable.

The map in the frontispiece shows the population densities of anchals in different ranges.

Growth of Population

The following statement shows the growth of population in the district at each census from 1872 onward. The corresponding percentage variations in the State population have also been indicated alongside for comparison :

Growth of Population in Champaran, 1872—1961

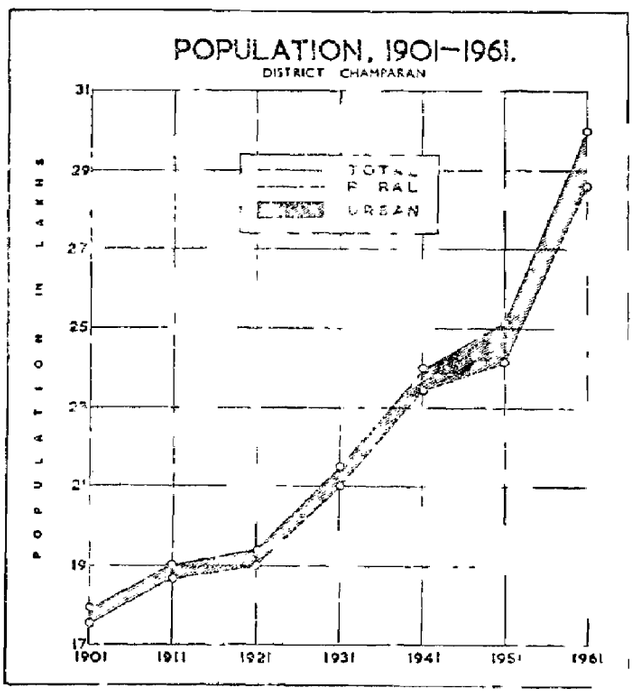

Year	Poputation	Variation	Percentage variation: Champaran district	Percentage variation: Bihar State
1	2	3	4	5
1872 ..	1,440,815	..	..	..
1881 ..	1,721,608	+280,793	+19.49	+15.56*
1891 ..	1,859,465	+137,857	+8.01	+5.94*
1901 ..	1,790,463	—69,002	—3.71	+0.22*
1911 ..	1,908,385	+117,922	+6.59	+3.67

*Unadjusted for changes in territory after 1951.

Growth of Population in Champaran, 1872—1961—*concld.*

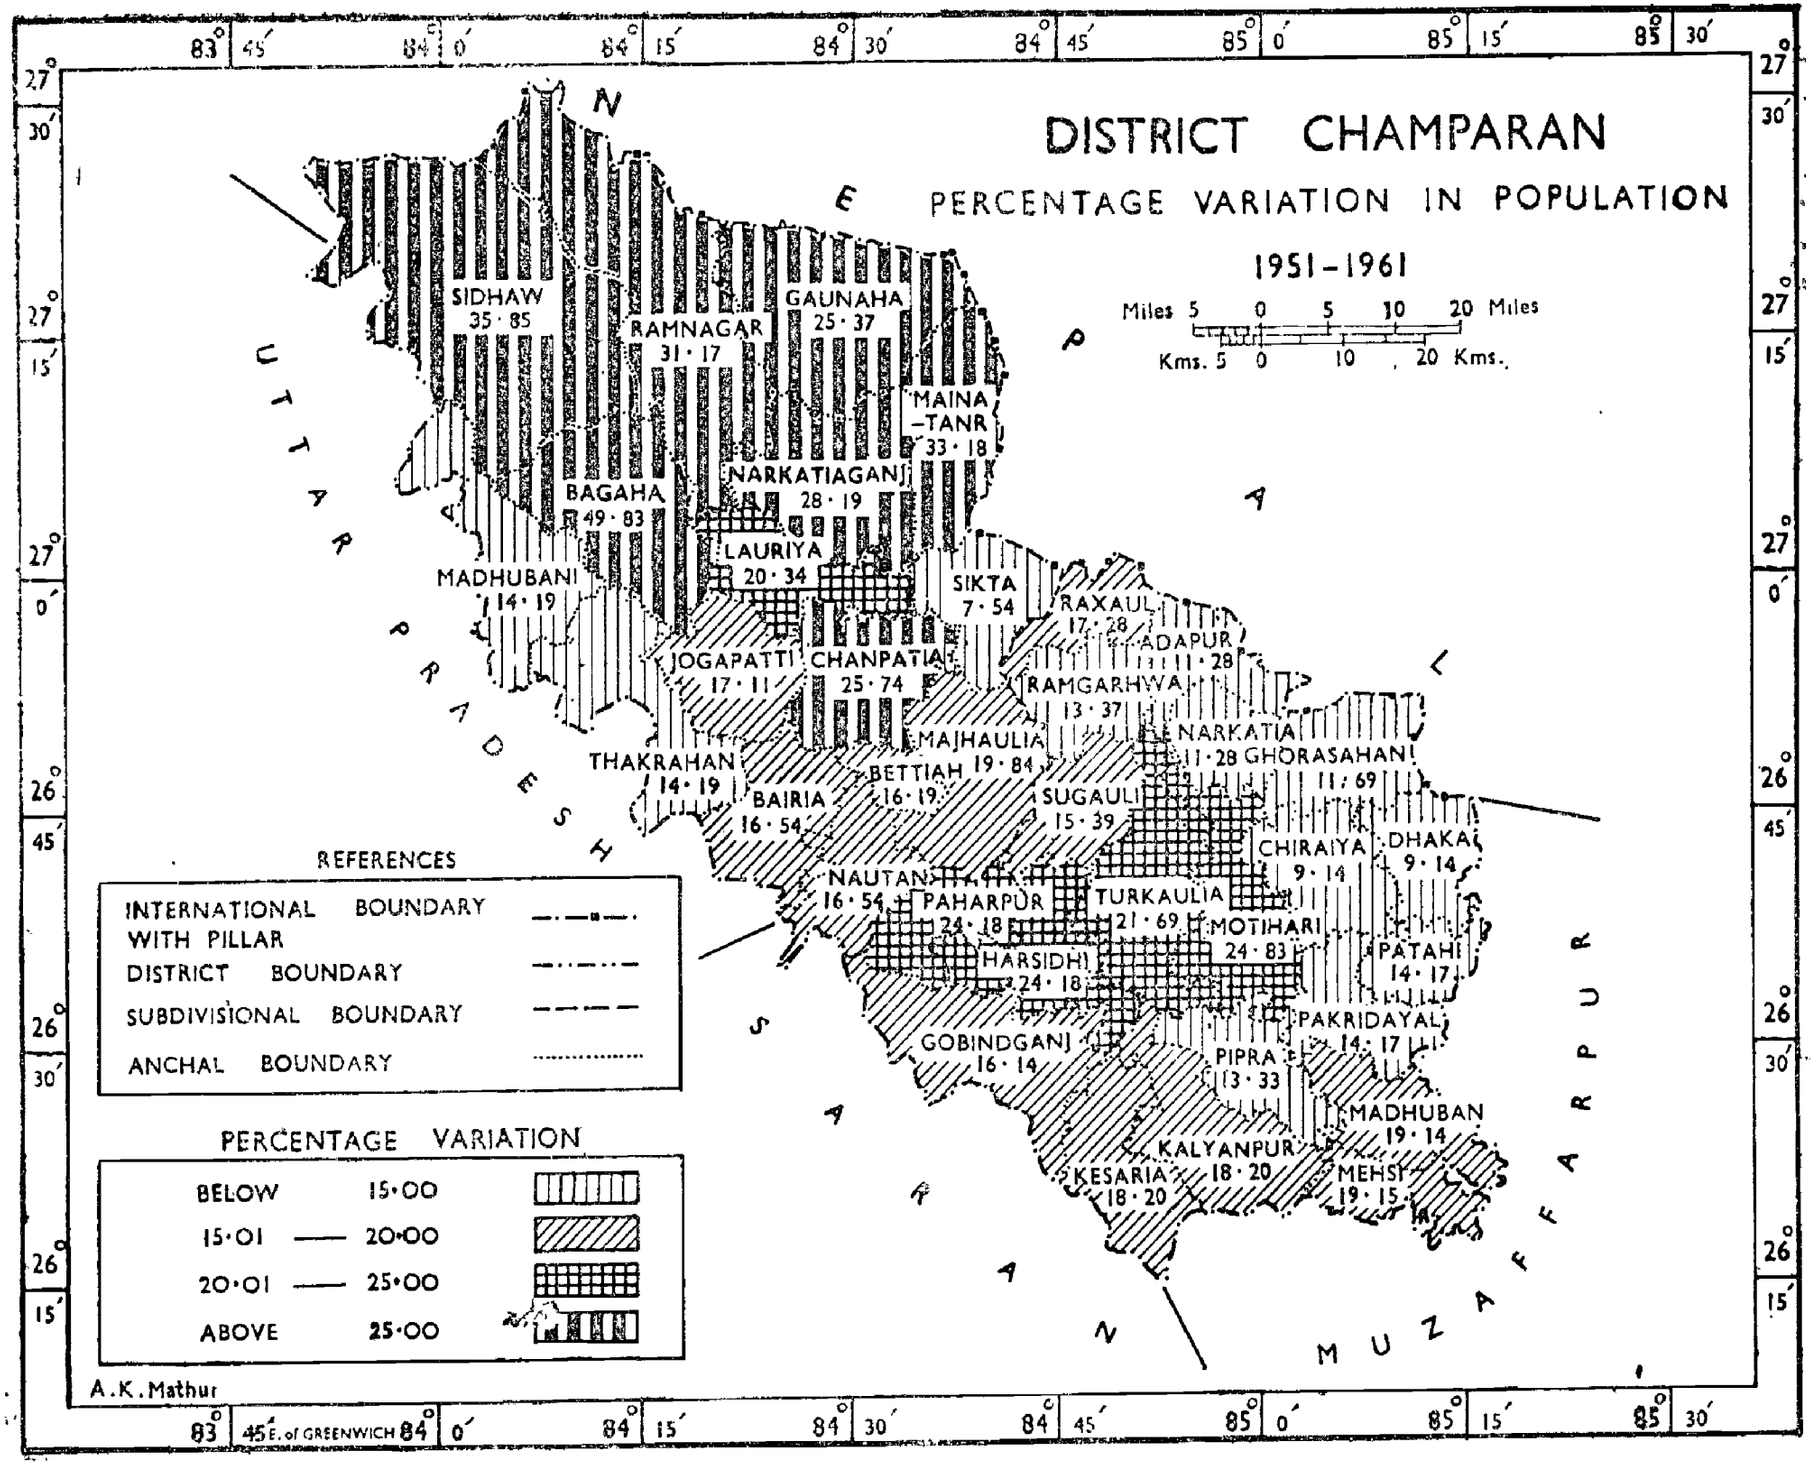

Year	Population	Variation	Percentage variation: Champaran district	Percentage variation: Bihar State
1921 ..	1,940,841	+32,456	+1.70	—0.66
1931 ..	2,145,687	+204,846	+10.55	+11.45
1941 ..	2,397,569	+251,882	+11.74	+12.20
1951 ..	2,515,343	+117,774	+4.91	+10.27
1961 ..	3,006,211	+490,868	+19.51	+19.77

The diagram below shows the growth of total, rural and urban populations since 1901 :

The population of Champaran has more than doubled itself in the 90 years since 1872. The large increase in the two decades 1872—91 was mainly due to immigration from other districts though consistently better and more comprehensive enumeration may also have accounted for it.

In the next decade, persistent unhealthiness and a severe famine in 1897 caused a depletion of the population. The increase in 1901—1911 reflected the improved public health and economic conditions, immigration having been practically stopped. In most parts of the State, the population actually decreased during 1911-21 but the cholera and influenza epidemics of 1917-18 were obviously not so severe in the district though their presence can be felt in only marginal growth rate during the decade. Fluctuations in growth rates are less marked after 1921, and it is evident that there has been considerable growth since then. The population increased rapidly in the twenties and thirties. In 1941—51, however, the decennial growth rate was only 4.91 per cent, less than half of the State rate of growth. This is ascribable to the ravages of small-pox and cholera and greater out-migration from the district during the decade.

The rate of growth in the last decade has been the highest ever on record, though even this is somewhat short of the State average. The increase in population during the last decade for the district, subdivisions and anchals is given in the following statement:

Per cent variations of population in the district, subdivisions and anchals, 1951—61

District/Subdivision/ Anchal	Population 1961	Population 1951	Variation	Per cent decade variation
1	2	3	4	5

Lauriya	85,140	70,748	+14,392	+20.34

NOTE: 1951 population of anchals have been taken from 'E' Summary Tables of 1951 Census. Where a police station of 1951 has been split into two or more anchals, the 1951 population of police station has been distributed among the anchals in the same proportion as in 1961.

The map at page. XII shows the percentage variation of population, 1951—61, in the different anchals of the district.

The growth of population in Champaran district during the last decade has been higher than that of any other district in the Tirhut division. If has been particularly high in the less densely populated subdivision of Bettiah than Sadar. In fact, there is hardly much difference in the rates of growth of population in Champaran Sadar subdivision and the adjoining subdivisions of Sitamarhi, Muzaffarpur Sadar and Chapra. The greater part of the increase in Champaran has, therefore, been occasioned by the growth of 23.68 per cent in the population of Bettiah subdivision, a proportion which is of the same dimension as in the subdivisions of the Chotanagpur plateau, with which it can draw some similarities in physical characteristics as well as population density. In this subdivision, Bagaha anchal registered unusual growth rate of over 40 per cent. The neighbouring anchals of Sidhaw, Ramnagar and Mainatanr also witnessed high rates varying between 31 and 36 per cent. Among other anchals in which the growth has been more than 20 per cent are Chanpatia, Narkatiaganj, Gaunaha and Lauriya. Thus the rate of growth has been more than 20 per cent in all the anchals of Bettiah subdivision in which the density of population is even now below 800 per sq. mile. The exceptions are Madhubani and Thakrahan anchals in which the rate of growth was 14 per cent only, chiefly because they are seriously affected by the ravages of the Gandak and much of their area has become unsuitable for proper cultivation.

On the other hand, there are three anchals which have registered growth rate of less than even 10 per cent. Of them, while Dhaka and Chiraiya in the Sadar subdivision have densities exceeding 1,000, Sikta (in Bettiah) has somewhat lower density. Other anchals have shown increases of 10—20 per cent.

The Rural Population

The following statement shows the percentage decade variations in rural population and the percentage of rural to total population in Champaran district and Bihar State during 1901—61:

Percentage decade variation in rural population and percentage of rural to total population in Champaran district and Bihar State, 1901—61

Year	Percentage decade variation in rural population: Champaran district	Percentage decade variation in rural population: Bihar State	Percentage of rural to total population: Champaran district	Percentage of rural to total population: Bihar State
1	2	3	4	5
1901 ..	..	..	97.85	96.01
1911 ..	+6.60	+3.90	97.87	96.22
1921 ..	+1.87	—1.04	98.04	95.86
1931 ..	+10.38	+10.99	97.88	95.46
1941 ..	+11.51	+11.21	97.68	94.62
1951 ..	+3.11	+8.75	96.00	93.31
1961 ..	+18.46	+17.54	95.16	91.57

The rural element in the district of Champaran has always been higher than that in the State of Bihar which is saying a lot, for in Bihar itself more than 91 per cent of the population in 1961 was rural. Further, the gap between the proportions of rural population in Champaran and Bihar has progressively increased since 1901 except in 1911 and 1951. This implies that the

intensely rural character of the district tends to linger on in the face of marked 'de-ruralization' in the State as a whole. But it is noteworthy that against almost 98 persons out of every 100 living in rural areas in 1901, there were only 95 such persons in 1961. Slow urbanisation is, however, a feature that Champaran shares with other districts of Tirhut division in which the rural element is of similar dimension.

The Urban Population

The following statement gives the proportions and rates of growth of the urban population in Champaran district and Bihar State, 1901—61 :

Growth of Urban Population, 1901—61

Year	No. of towns		Percentage decade variation in Urban Population		Percentage of Urban Population to Total Population	
	Champaran district	Bihar State	Champaran district	Bihar State	Champaran district	Bihar State
1	2	3	4	5	6	7
1901	2	57	..	..	2.15	3.99
1911	2	59	+ 5.84	—1.74	2.13	3.78
1921	2	63	—6.27	+ 8.17	1.96	4.14
1931	2	66	+ 19.33	+ 22.00	2.12	4.54
1941	3	84	+ 22.09	+ 33.66	2.32	5.38
1951	10	108	+ 81.06	+ 38.14	4.00	6.69
1961	9	153	44.84	+ 49.03	4.84	8.43

Although the growth of urban population in Champaran has been of the order of 279 per cent in the present century (as against 259 per cent in the State), the rate of urbanisation has not kept pace with that of the State, resulting in the great disparity between the urban proportions in the district and the State.

The following statement traces the growth of individual towns in the district since 1901:

Growth of Population in individual towns, 1901—61

Name of the town	Population						
	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8
Motihari (M)	32,620 (+ 33.20)	24,489 (+18.21)	20,717 (+ 18.08)	17,545 (+ 26.88)	13,828 (—7.04)	14,876 (+ 8.35)	13,730 (..)
Bettiah (M)	39,990 (+ 12.22)	35,634 (+ 17.57)	30,309 (+ 8.48)	27,941 (+ 15.03)	24,291 (—5.82)	25,793 (+ 4.44)	24,696 (..)
Lauthaha (N)	1,982 (+ 39.87)	1,417 (..)	.. (..)	.. (..)	.. (..)	.. (..)	.. (..)

NOTE : **Figures within brackets under population give the percentage increase (+) or decrease(—) in the decade.**

(M)—Municipality (N)—Notified Area

Till 1931 the district had only 2 towns—Motihari and Bettiah. The former, though headquarters of the district, has always been a good deal smaller than the latter, the headquarters of the northern subdivision. In 1961 Champaran had a total urban population of 145,645 as against only 38,426 in 1901. It contributes 3.72 per cent of the State's urban population. With 4.84 per cent of its people living in towns, it has a higher urban proportion than any district in North Bihar except Purnea.

Apparently free from the ravages of epidemics, both Motihari and Bettiah had higher populations in 1911 than in 1901. The decade 1911—21 has been the only one in which their population decreased. So far as Bettiah is concerned, it is stated in the Census Report of 1921 that "the loss in Bettiah would not have been so high but for the fact that the Lieutenant Governor and his staff were in camp there at the census time in 1911 and people had come into the town to see the *tamasha*". Both Motihari and Bettiah made good the deficit by 1931 with a handsome margin to spare. The development of trade and expansion in the number of courts and educational institutions are ascribed as reasons for the growth in 1921—31.

In 1901 Bettiah had a population of 24,696 as against Motihari's 13,730. Bettiah was the headquarters of the famous Bettiah Raj and was certainly more developed than Motihari. However, Motihari has been catching up, its rate of increase being uniformly higher than Bettiah's at every census. The increase of 33 per cent during 1951—61 in Motihari is in part attributable to the increase of the town area from 6 sq. miles in 1951 to 7.75 sq. miles in 1961. Lauthaha, a suburb of Motihari, attained urban status only in 1951. The district courts and officers' quarters are located here. The increase of 39.78 per cent during 1951—61 is an index of the rapid expansion in Government offices and agencies. The pace of increase in Bettiah town has definitely slackened. It was a little above 12 per cent in 1951—61 as against nearly 18 per cent in the previous decade. There has been a slight shrinkage of its area but that does not wholly explain the large decrease. Its fortune seems to be on the wane with the liquidation of the erstwhile Bettiah Raj.

Of the remaining six towns, only Chanpatia Bazar has been enjoying urban status since 1941. Others have been towns only since 1951. None has registered any decrease. Chanpatia Bazar (1961 population—14,559) has in fact revealed a phenomenal increase as its population has almost trebled between 1951 and 1961. This is accounted for as much by the increase in its area from 2.90 sq. miles to 6.22 sq. miles (1961) as by its development as an important trading centre, chiefly in foodgrains as well as manufacture of sugar.

Bagaha has witnessed the maximum increase. Its population of 19,411 in 1961 is higher than the 1951 figure by 13,591 or over 233 per cent. It is an important railhead and centre of trade located in a well cultivated portion of the district. Its area has also increased from 4.70 to 11.04 sq. miles in 1961.

The growth of 66.89 per cent in the population of Shikarpur Bazar (10,975) in 1951—61 has not been caused by any increase in area. It is an industrial town with 24.18 per cent of its workers engaged in industries other than household industries. The growth of 47 per cent in Raxaul Bazar (9,699) may be attributed largely to the increase in area from 1.40 sq. miles in 1951 to 4.89 sq. miles in 1961. The populations of Sugauli (10,447) and Chakia (5,962) have recorded only small increases during 1951—61. In these cases also the chief reason seems to lie in the sugar mills located there.

8. MIGRATION

In Indian census migration is determined solely by the concept of place of birth. Thus, if a person was born at a place other than the village or town of enumeration, he will be treated as an immigrant to the place of enumeration. Immigrants can be classified according to their place of birth as intra-district immigrants (those born elsewhere in the district of enumeration), inter-district but intra-State immigrants (those born in other districts of the State), inter-State immigrants (those born in other States of India) and international immigrants (those born outside India). Emigrants from the district are those who were born in the district but enumerated outside it within a district of the State or in another State. No information is available for persons born in the district but emigrated outside the country.

The distribution of population enumerated in the district of Champaran in 1961 by place of birth is given in the following statement.

Distribution of Population in Champaran district by place of birth, 1961

Birth Place	Total			Rural			Urban		
1	Persons 2	Males 3	Females 4	Persons 5	Males 6	Females 7	Persons 8	Males 9	Females 10
Total Population	**3,006,211** (100.00)	**1,519,803** (100.00)	**1,486,408** (100.00)	**2,860,566** (100.00)	**1,440,285** (100.00)	**1,420,281** (100.00)	**145,645** (100.00)	**79,518** (100.00)	**66,127** (100.00)
Persons born—									
(i) At the place of enumeration	2,087,444 (69.44)	1,356,393 (89.25)	731,051 (49.18)	1,999,071 (69.88)	1,303,547 (90.51)	695,524 (48.97)	88,373 (60.68)	52,846 (66.46)	35,527 (53.73)
(ii) Elsewhere in the district ..	760,744 (25.31)	114,469 (7.53)	646,275 (43.48)	722,790 (25.27)	98,545 (6.84)	624,245 (43.95)	37,954 (26.06)	15,924 (20.03)	22,030 (33.31)
(iii) In other districts of Bihar..	75,915 (2.52)	21,708 (1.43)	54,207 (3.65)	63,921 (2.23)	14,765 (1.03)	49,156 (3.46)	11,994 (8.24)	6,943 (8.73)	5,051 (7.64)
(iv) In other States of India* ..	42,093 (1.40)	16,602 (1.09)	25,491 (1.71)	36,508 (1.28)	13,561 (0.94)	22,947 (1.62)	5,585 (3.83)	3,041 (3.82)	2,544 (3.85)
(v) Outside India	40,015 (1.33)	10,631 (0.70)	29,384 (1.98)	38,276 (1.34)	9,867 (0.68)	28,409 (2.00)	1,739 (1.19)	764 (0.96)	975 (1.47)

NOTE : Figures within brackets indicate percentage to total population. *Includes birth place unclassifiable.

69.44 per cent of the total population was enumerated at the place of birth against 69.31 per cent in the State. Those born elsewhere in the district constituted about one-fourth (25.31 per cent). Persons from other districts of the State comprised only 2.52 per cent, a proportion only slightly lower than the combined strength of those coming from other States of the country (1.40 per cent) and other countries (1.33 per cent).

The bulk of female migration is accounted for by the movement of females consequent upon their getting married. Thus, while 89.25 per cent of the males were enumerated at the place of their birth, the corresponding proportion among females was only 49.18 per cent, and a considerable portion of them no doubt included unmarried girls in their teens or below. Migration of females on account of marriage is, however, largely confined within the district. Thus, against 96.78 per cent males born and enumerated in Champaran, the proportion for females is as high as 92.66 per cent.

Among immigrants to Champaran from other districts of the State females (54,207) out number males by two and a half times, the bulk of them coming from the adjoining districts of Muzaffarpur (40,018) and Saran (8,720). Because of its geographical situation in the extreme north-west of the State, and being bordered by Uttar Pradesh and Nepal, marriage migration continues to have a dominating influence on the overall pattern of inter-State and international immigrants. Thus, Uttar Pradesh sends more females (23,645) than males (14,331). The same is true of Nepal which sends 22,920 females as against 3,946 males. The setting up of refugee resettlement camps in Champaran accounted for as many as 13,073 persons born in Pakistan having been enumerated in the district.

The extent of inter-district but intra-State migration from and to Champaran is indicated below :

	Emigrants from Champaran to other districts of Bihar	Immigrants from other districts of Bihar to Champaran	Excess of emigrants over immigrants
Persons	78,346	75,915	(+) 2,431
Males	18,298	21,708	(—) 3,410
Females	60,048	54,207	(+) 5,841

Thus, in the sum-total, the district loses a little over two thousand in the balance of migration within the State among the districts. In regard to males, however, there is an excess of immigrants over emigrants in this category.

The districtwise distribution per 1,000 of such inter-district but intra-State immigrants to and emigrants from Champaran is given below, separately for males and females :

Distribution of 1,000 inter-district immigrants to and emigrants from, Champaran, 1961

District	Immigrants to Champaran from		Emigrants from Champaran to	
	Males	Females	Males	Females
1	2	3	4	5
Total ..	**1,000**	**1,000**	**1,000**	**1,000**
Patna ..	36	14	106	26
Gaya ..	13	5	10	2
Shahabad ..	27	5	19	12
Saran ..	423	161	91	142
Muzaffarpur ..	376	738	371	746
Darbhanga ..	81	54	66	23
Monghyr ..	17	10	24	5
Bhagalpur ..	8	5	23	3
Saharsa ..	3	1	21	4
Purnea ..	4	3	112	19
Santal Parganas	2	1	13	2
Palamau ..	1	N	6	1
Hazaribagh ..	2	1	22	3
Ranchi ..	3	2	28	3
Dhanbad ..	3	N	44	4
Singhbhum ..	1	N	44	5

N—denotes negligible figures

The adjoining districts of Saran and Muzaffarpur account for nearly 90 per cent of female immigrants and 80 per cent of male immigrants. However, the adjoining districts comprise only 46 per cent of the maleemigrants from Champaran, Purnea and Patna accounting for over 10 per cent each. Information relating to emigrants from a particular district of one State to other States has not been recorded after 1921. In that year, as against 23,036 persons migrating from Champaran to other States, there were 24,166 inmigrants from other States to Champaran district.

9. AGE, SEX AND MARITAL STATUS

Age

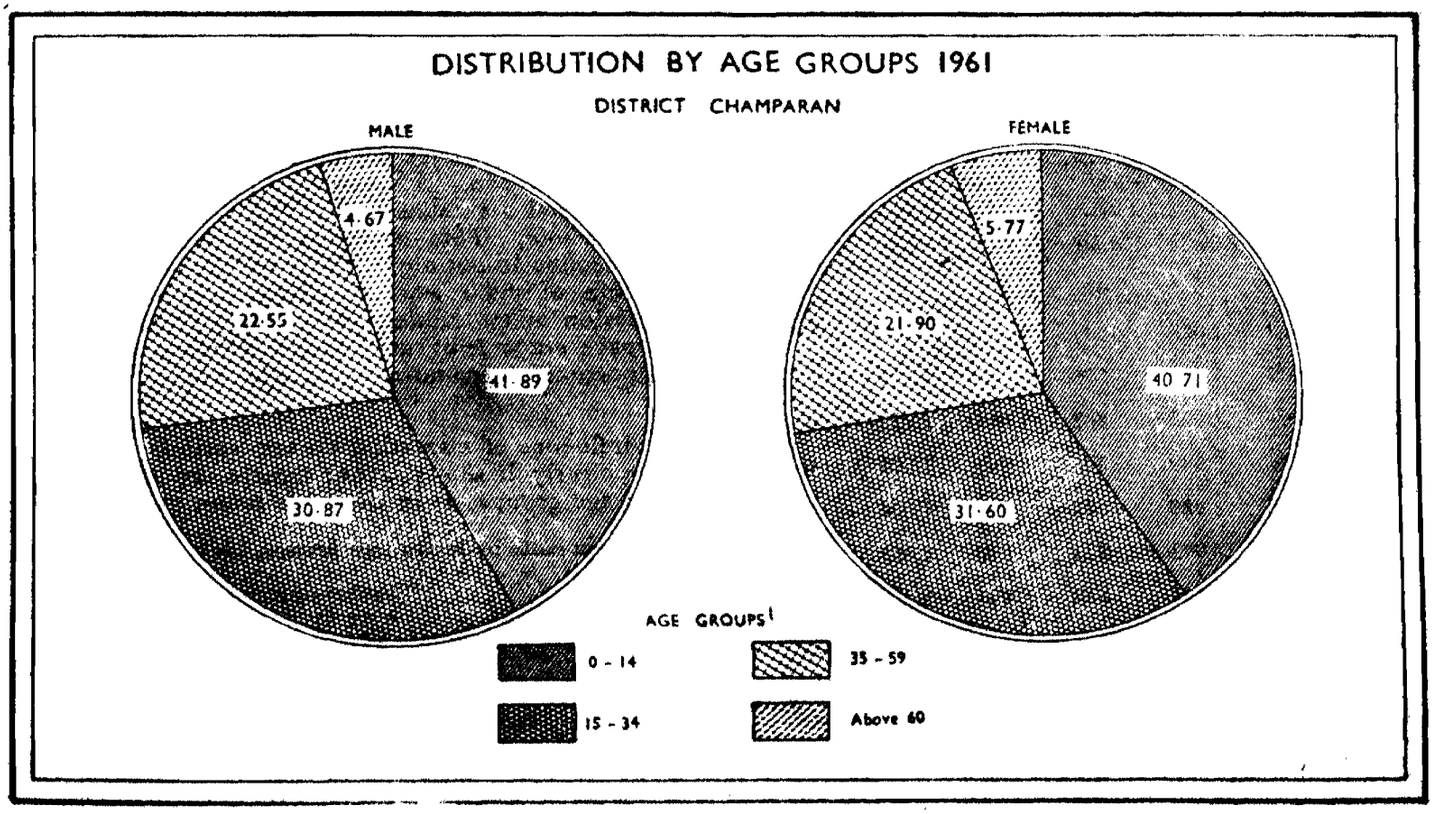

Single year age returns have been presented in Table C-IV of 1961*. This table has not been reproduced in the present volume for want of space. However, Table C-II, showing the classification of population by quinquennial age groups and marital status, is given at page 52 of Part I. The classification of population by sex, age groups and literacy and educational levels is given in Table C-III at page 55 of Part I. Broad age groups are also shown in Table B-I, the age groups being 0—14, 15—34, 35—59 and 60+corresponding to children, young persons, middle aged persons and elderly persons respectively.

The following statement shows the distribution of population by sex and broad age groups in Champaran district and Bihar State :

Distribution of Population by sex and broad age groups, 1961

Age groups	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0—14	1,241,784 (41.31)	636,650 (41.89)	605,134 (40.71)	19,653,328 (42.31)	10,112,846 (43.40)	9,540,482 (41.21)
15—34	938,745 (31.23)	469,078 (30.87)	469,667 (31.60)	14,335,615 (30.86)	6,976,349 (29.94)	7,359,266 (31.78)
35—59	668,318 (22.23)	342,732 (22.55)	325,586 (21.90)	9,845,764 (21.19)	5,006,949 (21.49)	4,838,815 (20.90)
60 + ...	156,816 (5.21)	71,016 (4.67)	85,800 (5.77)	2,608,218 (5.61)	1,197,596 (5.14)	1,410,622 (6.09)
Age not stated	548 (0.02)	327 (0.02)	221 (0.02)	12,685 (0.03)	7,709 (0.03)	4,976 (0.02)

The following diagram shows the percentage distribution of male and female population by the four broad age groups :

*Census of India, 1961, Bihar, Vol. IV, Part II-C, Social and Cultural Tables.

The district has a slight edge over the State in regard to proportion of population in the working force age group 15—59 the sexes being almost equally represented in this category in the district. According to Sundburg, "half the total population is always made up of persons between 15 and 50 years of age, while the fluctuations in the lower and higher categories respectively indicate whether the population is progressive, stationary or retrogressive."* Thus, a proportion of 40 per cent or more in the age group 0—14 is indicative of the population being progressive, 33 per cent of its being stationary and 20 per cent of its being retrogressive. By these criteria it may be surmised that both Champaran district and Bihar State have highly progressive populations though, comparatively, the former is less so than the latter.

The differences in the proportions of the two sexes are particularly striking in the age group 60 ' , pointing towards apparently greater longevity among women.

Sex Ratio

The sex ratio is determined by the number of females per 1,000 males.

Champaran has a sex ratio of only 978 as against 994 for the State. While the districts of Patna, Bhagalpur, Saharsa, Purnea, Dhanbad and Singhbhum have lower sex ratios than Champaran, it is significant that the three other districts of Tirhut, namely Saran, Muzaffarpur and Darbhanga, as well as Gaya, not only have higher sex ratios than Champaran, but actually contain more females than males. This phenomenon is probably explained by a much larger scale of emigration of male labour than is attained by Champaran.

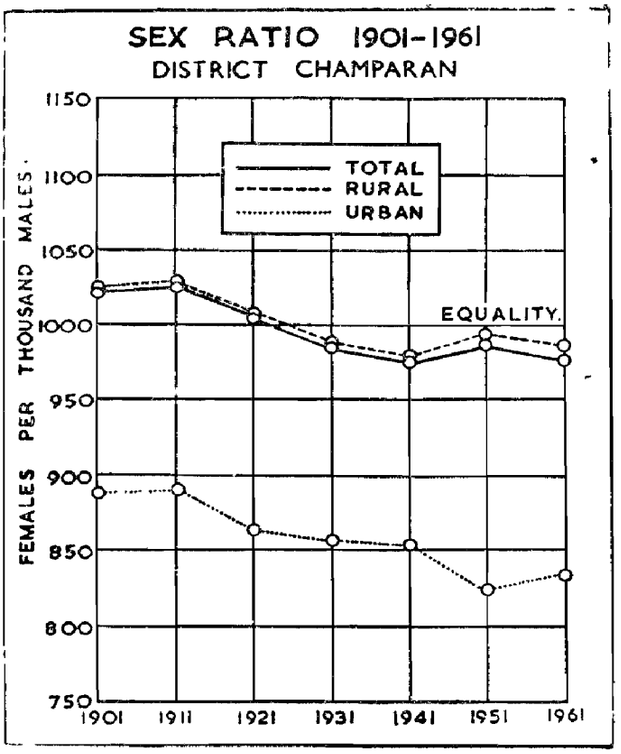

The following statement traces the variations in the sex ratios in the district and State from 1901—61.

Variations in sex ratio, 1901 61

Census	Number of females per 1,000 males					
	Champaran district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901 ..	1,022	1,025	889	1,054	1,057	997
1911 ..	1,026	1,029	890	1,044	1,048	936
1921 ..	1,004	1,007	862	1,016	1,023	869
1931 ..	985	989	806	994	1,003	813
1941 ..	976	980	852	996	1,006	828
1951 ..	985	992	822	990	1,001	841
1961 ..	978	986	832	994	1,012	811

The diagram given in the next column depicts the above statistic for the district separately for total, rural and urban populations.

* Census of India 1931, Vol. VII, Bihar and Orissa, Part I Report by W. G Lacey, p. 122.

The sex ratios for total as well as rural population in the district have always been lower than those of the State, the differences in the rural ratios being of a higher order in 1961. The urban ratios have also been generally smaller than the State's except in 1941 and 1961.

It is seen that in the beginning the sex ratio was favourable in the district (as also in the State) implying that till 1921, the district presumably had an adverse balance of migration. After that, the pattern seems to have recorded a sudden change consistent with the State as a whole. This seems to have been brought about by decline in outmigration as well as increase in in-migration of male workers. Reclamation of land and extension of cultivation have been going on at a greater pace since 1921 and naturally, more employment opportunities are now available within the district itself.

The influence of migration on sex ratio is brought out more clearly if the relevant figures are examined for broad age groups, as in the table below :

Sex ratio by broad age groups, 1961

Age group	Number of females per 1,000 males	
	Champaran district	Bihar State
0—14	950	943
15— 34	1,001	1,055
35—59	950	966
60 + ...	1,208	1,178
Age not stated	676	645

That females preponderate in the age-group 15—34 indicates that male emigrants are mostly drawn from this age group. This includes emigrant labourers in search of work no less than students who move out in pursuit of higher education. That females outnumber males among elderly persons is a pointer towards the former's greater longevity.

Marital Status

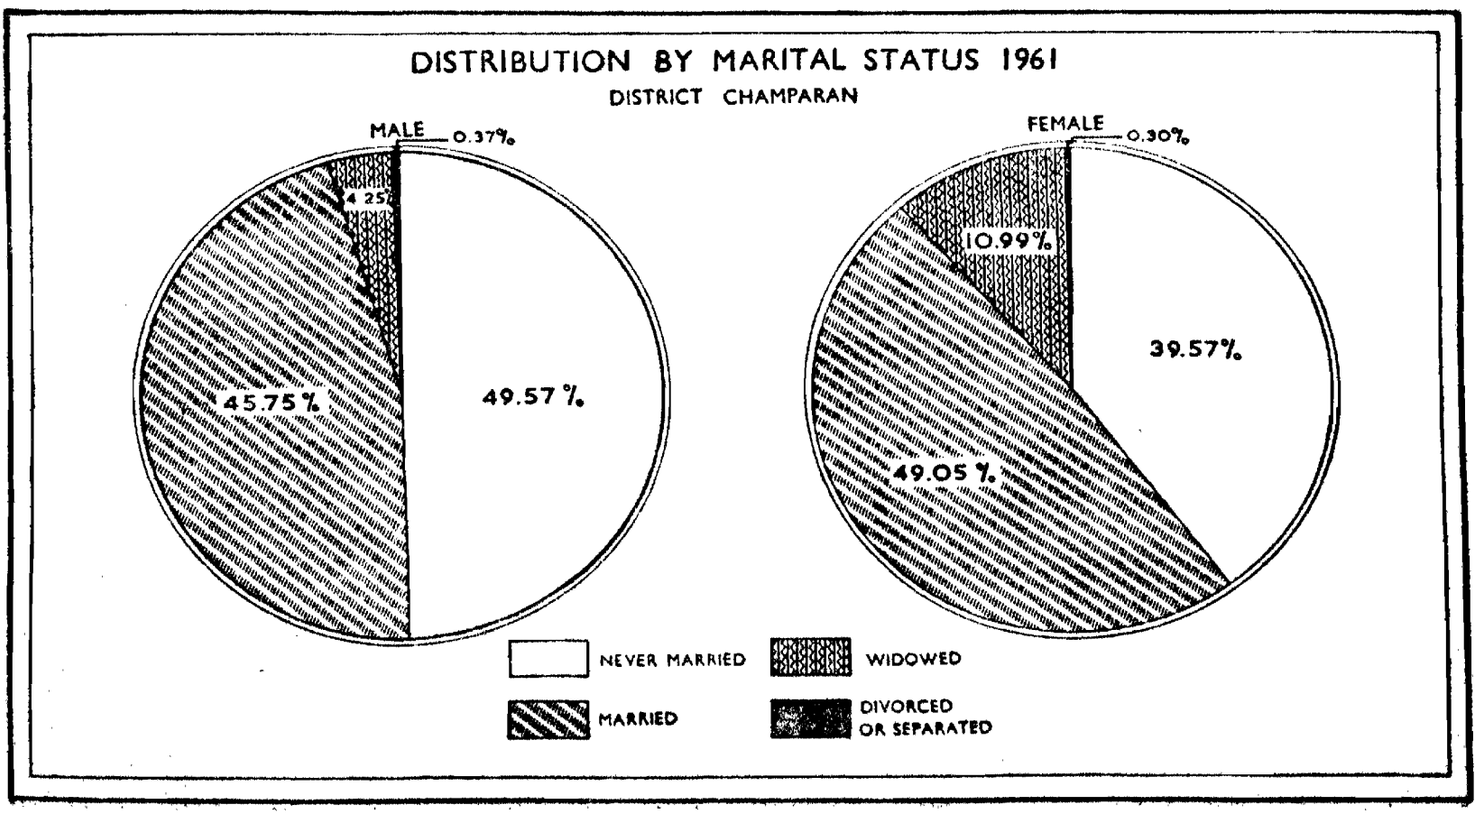

Table C-II at page 52 of Part I furnishes the statistics relating to marital status. The following statement gives the distribution of 1,000 persons, males and females by marital status.

Distribution of 1,000 persons, males and females separately by marital status, 1961

Civil condition	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married	446	496	396	447	498	396
Married	474	457	490	476	459	492
Widowed	76	42	110	74	39	109
Divorced or separated	3	4	3	3	3	2
Unspecified status	1	1	1	N	1	1

NOTES: (1) All persons in the age group 0—9 have been treated as 'never married' irrespective of the recorded returns.
(2) N—denotes negligible figure.

The diagram below gives the percentage distribution of never married, married and widowed males and females separately. The figures for divorced persons and those of unspecified status are too small for diagrammetic representation.

The proportions in each category in Champaran are very similar to those for the State. Nearly half the males are 'never married'. The corresponding proportion among females is much less (39.6 per cent). Of the remaining 60.4 per cent, 49.0 per cent belonged to the category 'married'. The extent of widowhood has been on the decline as the figures given alongside will show.

Census year	Widowed per 1,000	
	Females	Males
1921	164	58
1931	145	53
1941	149	64
1951	138	58
1961	110	42

A better appreciation of marital status can be had from an analysis by broad age groups, as in the following statement:

Marital status by broad age groups, 1961

Marital status	Males				Females			
	0—14	15—34	35—59	60+	0—14	15—34	35—59	60+
1	2	3	4	5	6	7	8	9
Total	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married	964	238	31	25	917	51	6	4
Married	35	738	875	684	82	915	726	261
Widowed	N	17	89	287	1	29	264	732
Divorced or separated	1	6	4	3	N	4	3	2
Unspecified status	N	1	1	1	N	1	1	1

The incidence of child marriages among either sex is lower in the district than in the State. This may be due to a smaller concentration of members of the socially backward communities who are more given to early marriages of their offspring. That marriage is almost universal is evidenced by the very small proportions of 'never married' people in the age group 35—59 and 60+. Among females, the proportions are below 1 per cent. Champaran has relatively more middle aged bachelors than the State, though spinsters in this category are fewer.

10. LITERACY AND EDUCATION

The test of literacy was ability to read and write a simple letter in any language. In the case of a person who had attained some educational level, the highest examination (written) passed by him was noted.

It is distressing to find that the extent of literacy in Champaran is the lowest in the State. The following gives comparative figures for persons, males and females :

Percentage of literates to total population, 1961

	Champaran district	Bihar State
Persons	13.2	18.4
Males	21.6	29.8
Females	4.6	6.9

The above proportions indicate what may be termed 'crude' literacy rates. Children upto 4 years of age are, by definition, illiterate. The 'effective' literacy rate is, therefore, measured by the proportion of literate and educated persons to the population aged 5 years and above.

The following statement compares the growth of effective literacy in the State and Champaran from 1901 to 1961 :

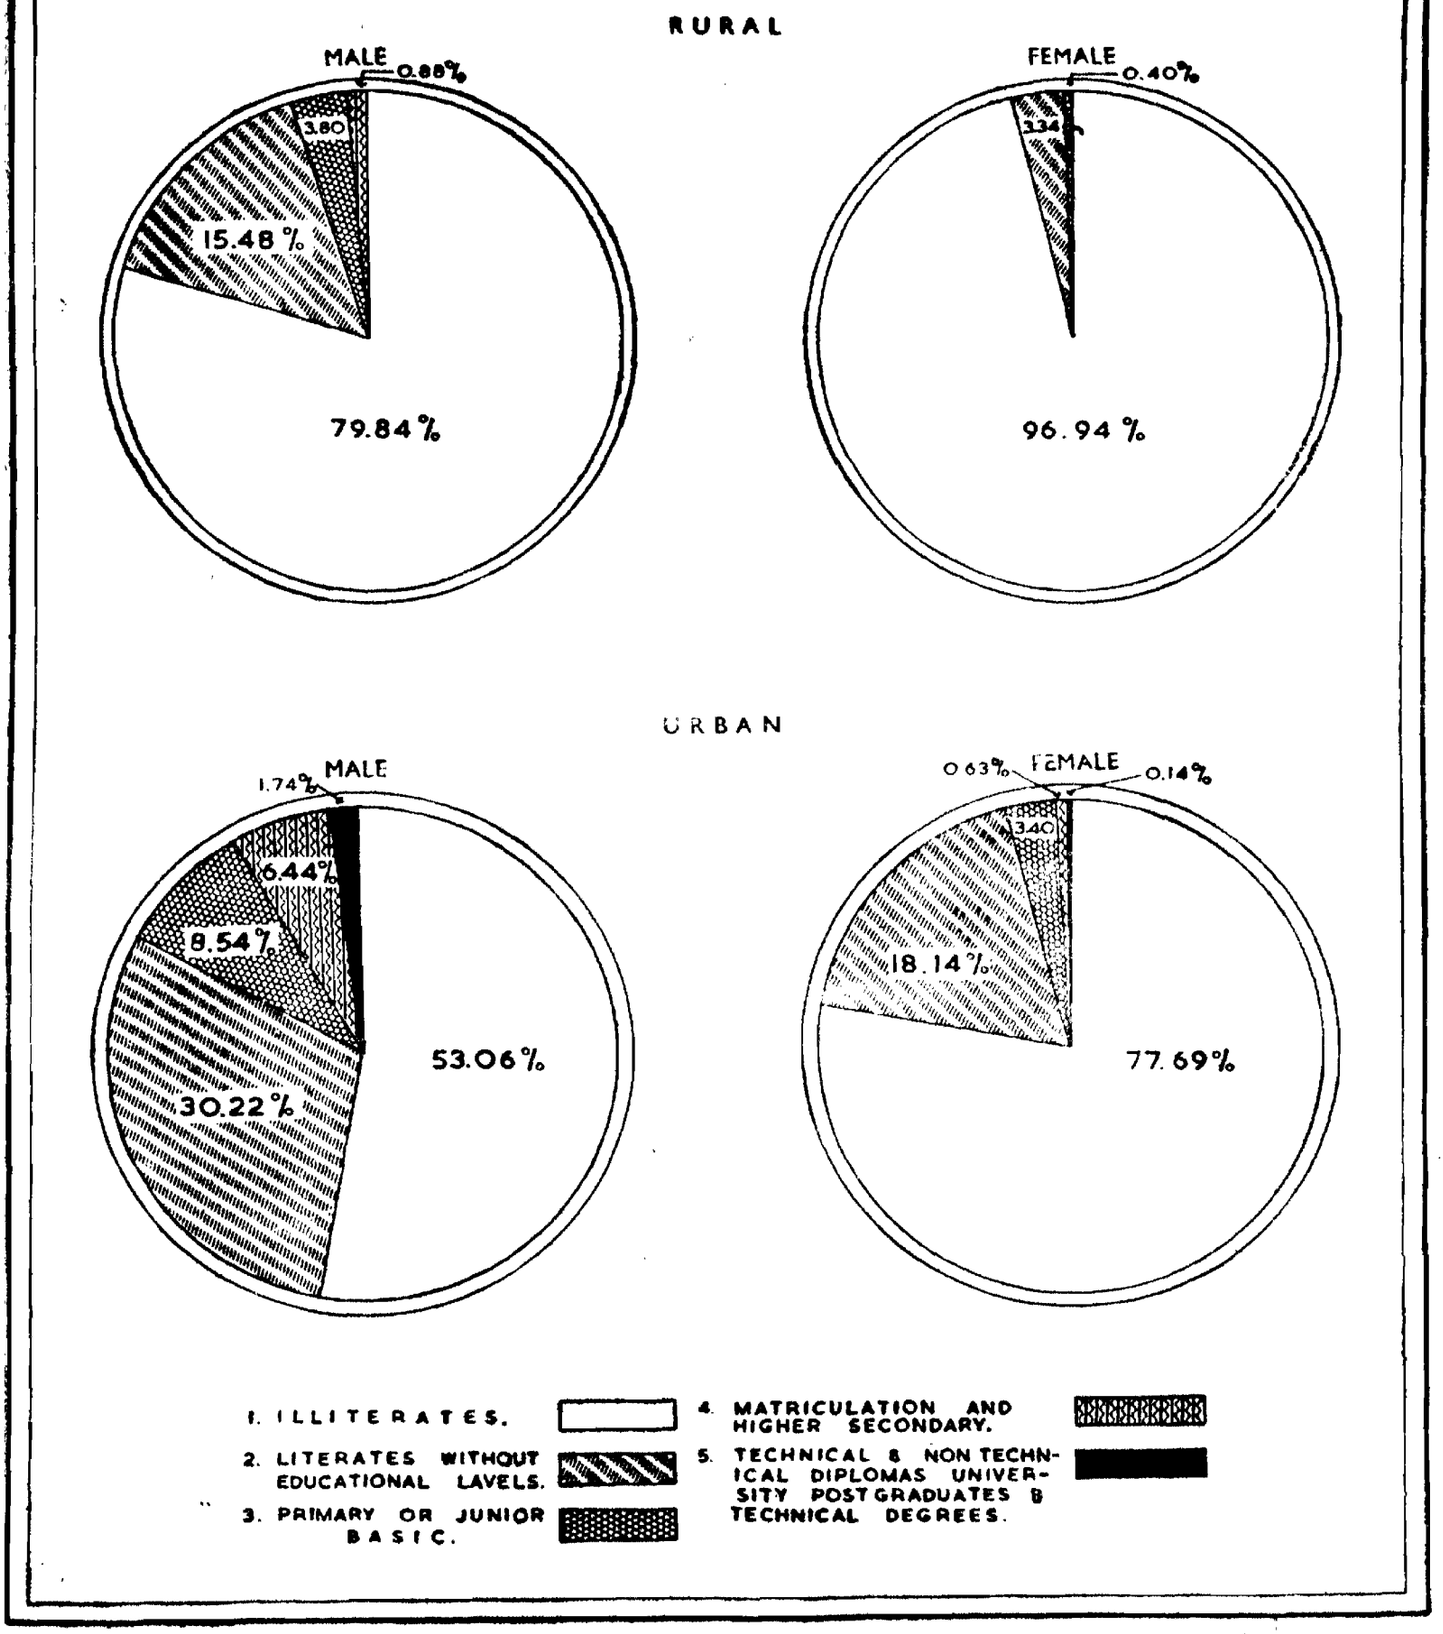

Effective literacy rates in Champaran district and Bihar State, 1901—61

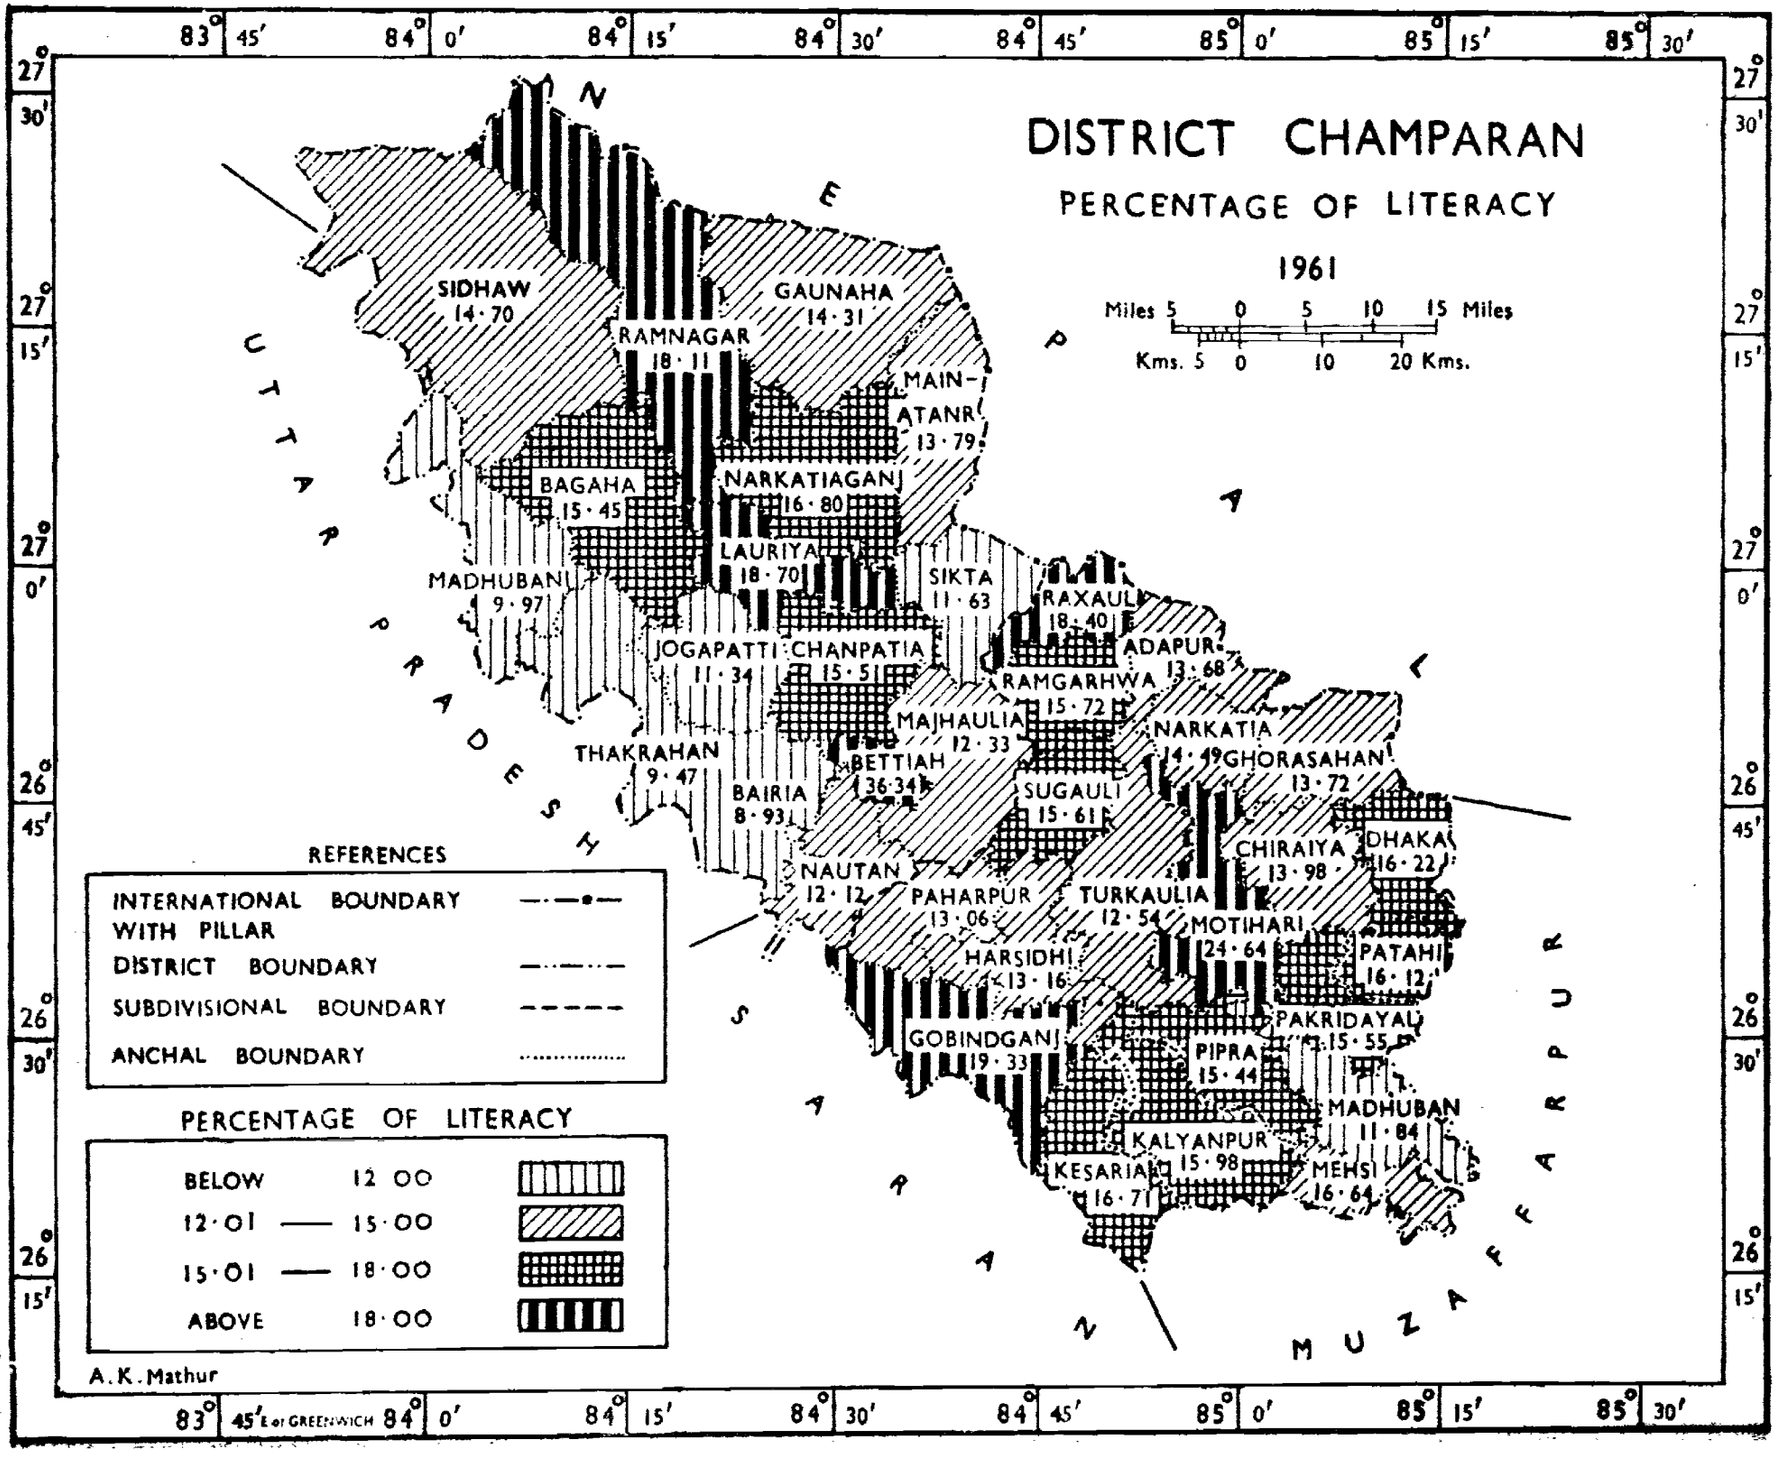

Number of literates per 10,000 aged 5 and above

Census Year	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1901 ..	258	506	13	394	777	29
1911 ..	301	581	26	443	854	45
1921 ..	345	645	44	494	926	66
1931 ..	340	621	50	489	893	77
1941 ..	681	1,197	148	1,072	1,873	261
1951 ..	748	1,290	209	1,345	2,194	474
1961 ..	1,546	2,520	541	2,175	3,519	817

A graph illustrating the growth of literacy in Champaran during the last 60 years is also given below :

Till 1931 the growth of literacy was rather slow in the district as well as the State. The sudden leap of over hundred per cent in 1941 was evidently the result of the famous Mass Literacy Campaign during the first Congress Ministry in 1937. It may be noted, however, that the rate of growth of literacy in Champaran during this decade was much less than that of the State as a whole. The progress made in the following decade (1941—51) was slower still. In 1951 Champaran was more than a decade behind the State in the matter of literacy. In the last decade, however, there has been a greater fillip to literacy in Champaran than the State as a whole, its effective literacy rate having been more than doubled. If this tempo is maintained it may not be long before Champaran catches up. But there should be no mistaking about its backwardness even now in this regard. The literacy rate in Champaran is 28.92 per cent less than the rate for the State.

The differences between rural and urban areas in effective literacy rates are brought out by the figures below :

Effective literacy rates in rural and urban areas, 1961

	Number of literates per 10,000 aged 5 and above					
	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
Total ..	1,546	2,520	541	2,175	3,520	817
Rural ..	1,413	2,360	443	1,909	3,219	613
Urban ..	4,125	5,329	2,625	5,021	6,363	3,310

It is evident that the gap between the district and the State in literacy rates is not as wide in urban areas as in rural. It is interesting to note that the differences are less marked among females in urban areas.

The extent of literacy in different parts of the district is indicated by the following statement :

Effective literacy rates in Anchals of Champaran district, 1961

District / Anchal ..	Number of literates per 1,000 aged 5 and above			
	Persons	Males	Females	Rank
1	2	3	4	5
CHAMPARAN ..	**155**	**252**	**54**	**16**

Gaunaha ..	143	242	38	22
Ramnagar ..	181	279	72	6
Mainatanr ..	138	231	43	24
Lauriya ..	187	293	75	4

Bettiah is the most literate anchal in the district. Apart from 64 per cent of its population being urban, the impact of Christian mission schools on the spread of female literacy is quite apparent. As against a literacy rate of 5.4 per cent among females in the district, that in Bettiah is 24.5 per cent. Motihari, also having 28 per cent urban population, is the only other anchal in the district with an over all literacy rate of over 20 per cent, but it lags far behind Bettiah.

A literacy map showing anchalwise variations in the district is given at page xxii. Of the very high literacy anchals, only Lauriya and Ramnagar constitute a block. Four others, viz., Bettiah, Motihari, Gobindganj and Raxaul are scattered. It may be noted however that apart from Bettiah and Motihari, other anchals in this group are only on par with the average literacy in the State. In the next category (15—18 per cent) the most conspicuous concentration is of seven anchals in the south-east comprising Mehsi, Kesaria, Kalyanpur, Pipra, Pakridayal, Patahi and Dhaka. As we move

diagonally towards the north-west, literacy rate has a tendency to drop, the exceptions generally being anchals of urban concentration. Gobindganj does not answer to this explanation and its literacy rate follows the neighouring anchals of Gopalganj (20.35 per cent) and Barauli (17. 39 per cent) in Saran district. The anchals of Madhubani, Thakrahan, Jogapatti and Bairia in the mid-west along with Sikta and Madhuban have particularly low literacy rates.

The break up of the literate population by educational levels further shows the leeway that has to be made in regard to educational progress.

Classification of literate and educated population in Champaran by broad educational levels, 1961

Educational level		Number of literates			Proportion per 1,000 population			Proportion per 1,000 literates		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1		2	3	4	5	6	7	8	9	10
Literate (without educational level)	T	306,295	246,907	59,388	102	162	40	774	754	872
	R	270,265	222,874	47,391	94	155	33	786	768	889
	U	36,030	24,033	11,997	247	302	181	692	644	813
Primary or Junior Basic	T	69,467	61,574	7,893	23	41	5	176	188	116
	R	60,433	54,785	5,648	21	38	4	176	189	106
	U	9,034	6,789	2,245	62	85	34	173	182	152
Matriculation and above	T	19,968	19,172	796	7	13	1	50	58	12
	R	12,952	12,668	284	5	9	N	38	43	5
	U	7,016	6,504	512	48	82	8	135	174	35

Nil denotes negligible figure.

The diagram at page XXI indicates the literacy and educational levels for males and females separately for rural and urban areas.

Even with the rather low overall literacy rates, it is seen that more than three-fourths of literate males have not even passed the primary or junior basic standard, while the proportion of such females is over 87 per cent. Barely 6 per cent of literate males and about 1 per cent of such females have passed the matriculation or higher examinations. Their proportions to total population are 1.3 per cent for males and 0.1 per cent for females. As is expected, urban areas invariably have higher proportions than rural areas.

11. LANGUAGE

The number of speakers of different languages and dialects in the district and anchals is given in Table C-V at page 57 of Part I. The statement below shows the distribution of major languages (having more than 1,000 speakers) by rural and urban areas of the district :

Distribution of major languages in Champaran district, 1961

Language/dialect returned as mother-tongue	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
All languages ..	**100.00**	**100.00**	**100.00**	**95.16**	**4.84**
1. Bengali ..	0.58	0.57	0.87	92.72	7.28
2. Bhojpuri ..	61.86	62.79	43.70	96.58	3.42
3. Hindi ..	26.52	26.10	34.74	93.65	6.35
4. Maithili ..	0.42	0.42	0.43	95.04	4.96
5. Marwari ..	0.07	0.04	0.71	52.33	47.67
6. Nagpuri-Eastern Magahi	0.05	0.05	..	100.00	..
7. Nepali ..	0.09	0.07	0.35	80.69	19.31
8. Urdu ..	10.31	9.91	18.13	91.48	8.52
9. Others ..	0.10	0.05	1.07	48.87	51.13

Champaran falls within the Bhojpuri belt as is evident from the fact that over three-fifth of its population have returned Bhojpuri as their mother-tongue. The actual proportion of speakers of Bhojpuri must in fact be more because it is well known that for some reasons or other (discussed in the General Report), considerable number of people preferred to return Hindi or Urdu as their mother-tongue even though this was not quite correct. However, speakers of Bhojpuri, Hindi and Urdu taken together comprise 98.69 per cent of the population.

Bengali with 17,461 speakers is the next most widely prevalent language in the district. In the past, Champaran was never known to be a place of Bengali immigration. Thus in 1951, there were only 632 speakers of Bengali in the whole district. The big spurt in the last decade is primarily due to the rehabilitation of a large number of Hindu refugees from East Pakistan. Bettiah had a large camp for this purpose. Some non-refugee Bengalis are also employed in the sugar mills. Maithili has only 12,692 adherents in Champaran district. That more than half the speakers of Marwari should be from rural areas indicates that Rajasthani businessmen do not confine their activities to towns only.

12. RELIGION

The distribution of the population by religion is given upto anchal level in Table C-VII at page 62 of Part I. The following statement shows the percentage distribution of population by religion in total, rural and urban areas separately of the district :

Distribution of population by religion in total, rural and urban areas of Champaran, 1961

Religion	Percentage to total Population			Percentage of each religion in	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
All religions ..	**100.00**	**100.00**	**100.00**	..	..
Buddhists ..	N	N	N	66.67	33.33
Christians ..	0.12	0.05	1.47	41.75	58.25
Hindus ..	83.28	83.83	72.49	95.78	4.22
Jains ..	N	N	0.03	45.95	54.05
Muslims ..	16.59	16.12	25.86	92.45	7.55
Sikhs ..	0.01	N	0.15	26.58	73.42
Other religions and persuasions	N	N	N	73.91	26.09
Religion not stated	N	N	N	75.00	25.00

N—denotes negligible figure

Champaran is one of the five districts in the State having lower proportion of Hindus than the State average of 84.7 per cent. The proportion of Muslims (16.59 per cent) is, however, higher than the State average of 12.4 per cent. The two communities taken together comprise 99.9 per cent of the district population.

The following table traces the growth of the six main religious groups in the district during the last sixty years. Figures for Buddhists, Sikhs and Jains are small and so they have been given in the footnote below the table :

Population of different religious groups at each census, 1901—61

Year	Hindus		Muslims		Christian	
	Number	Percentage decade variation	Number	Percentage decade variation	Number	Percentage decade variation
1901	1,523,950	..	264,086	..	2,417	..
1911	1,619,463	+6.27	286,098	+8.34	2,775	+14.81
1921	1,635,223	+0.97	302,728	+5.81	2,782	+0.25
1931	1,787,274	+9.30	354,235	+17.01	3,655	+31.38
1941	1,969,339	+10.19	404,434	+14.17	3,629	—0.71
1951	2,115,840	+7.44	397,689	—1.67	1,695	—53.29
1961	2,503,503	+18.32	498,629	+25.38	3,674	+116.76

N.B : Absolute figures for Sikhs, Buddhists and Jains are given below :

	1901	1911	1921	1931	1941	1951	1961
Sikhs ..	2	..	..	32	29	119	301
Jains ..	..	48	101	5	30	..	74
Buddhists ..	7	..	..	..	3	..	3

Though generally following the trend of growth of the general population, the extent of decadal increase among the Hindus has always been of a lower order except in 1941—51. On the other hand, the Muslims have consistently recorded higher rates of growth than the general population, again 1941—51 being the exception. The abnormal conditions prevalent after the partition of the country in 1947 and leading to the vast movements of population on either side seem to explain the unusual phenomenon in the decade 1941—51. It may be noted, however, that the last decade has witnessed quite a striking growth of Muslim population in the Champaran district. In 1901 the Hindus comprised 85.11 per cent and the Muslims 14.75 per cent of the district population. As we have seen, the corresponding proportions in 1961 were 83.28 and 16.59 per cent respectively. Percentage increase in the population of the three major religious communities in the district in the last sixty years have been as under : Hindus—64.28; Muslims—88.81, and Christians—52.01. The Christians, localised mainly in the Bettiah subdivision, are no more numerous now than they were thirty years ago. Successive declines in their numbers in 1941 and 1951 were large enough to offset the phenomenal growth of 116 per cent in the last decade. The Sikhs have also registered significant increase though not of much importance numerically. It may be presumed that they are mostly refugees from West Pakistan. The Buddhists and Jains hardly count in this district so far as numbers go.

The sex ratio or number of females per 1,000 males throws interesting light on the composition of each

religious group. The following figures give a comparative picture for the last sixty years :

Sex ratio among the three major religious groups in Champaran, 1901—61

Census	Number of females per 1,000 males		
	Hindus	Muslims	Christians
1	2	3	4
1901 ..	1,017	1,046	1,242
1911 ..	1,020	1,060	1,091
1921 ..	997	1,040	1 211
1931 ..	979	1,013	1,174
1941 ..	976	991	1,180
1951 ..	989	961	1,257
1961 ..	970	1,020	1,146

Both the Muslims and the Christians have had very favourable sex ratios as compared to the Hindus. Apart from biological factors, migration has great influence in shaping the sex ratios. A favourable sex ratio generally implies out-migration of male members in pursuit of employment elsewhere. An adverse sex ratio, on the other hand, indicates the presence mainly of male workers from outside. It is interesting to note that in 1961, the sex ratios among the Jains, Sikhs and Budhists in Champaran were 752, 601 and 500 respectively.

13. SCHEDULED CASTES AND SCHEDULED TRIBES

According to the Census of 1961, the total population of scheduled castes in Champaran is 437,713 and of scheduled tribes, 2,879. They comprise 14.66 per cent of the district population. Gaya, Darbhanga and Muzaffarpur have larger concentrations of scheduled castes, but their proportions (except in Gaya) to the respective district populations are about the same as in Champaran. The anchals of Sidhaw, Ramnagar, Gaunaha and Mainatanr in the north and Pipra in the east contain in their population 18—24 per cent of scheduled castes. Of them Ramnagar and Mainatanr (alongwith Jogapatti) are the only anchals in the district having significant population of scheduled tribes.

The statement below gives the population of scheduled castes having more than 1,000 persons in the district :

Population of certain scheduled castes in Champaran, 1961

Name of the scheduled caste	Population, 1961	Number per 1,000	
		Total scheduled caste population in the district	Population of the respective scheduled caste in the State
Total	**434,712**	**993**	**79**
1. Chamar or Mochi ..	209,437	478	111
2. Dusadh, Dhari or Dharhi ..	109,884	251	64
3. Musahar	60,793	139	60
4. Dhobi	29,621	68	89
5. Dom or Dhangad ..	16,954	39	107
6. Pasi	4,105	9	16
7. Hari, Mehtar or Bhangi ..	3,918	9	43

A little less than half of the total scheduled caste population of the district consists of Chamar or Mochi, and one-fourth of Dusadh, Dhari or Dharhi. It may be noted that at least one out of every 10 Chamars or Doms in the State comes from the district of Champaran.

1,704 members of the scheduled castes in the district were treated as 'unclassified' for want of precise information in their enumeration slips. Other scheduled castes in the district are Nat (692), Halalkhor (367), Kanjar (117), Dabgar (85), Bantar (23), Ghasi (12) and Turi (1).

The rate of growth of scheduled caste population in the district during 1951—61 was 17 per cent. This is somewhat below the general growth rate of 19.51 per cent and almost half the growth rate of scheduled castes in the State (33 per cent).

The scheduled tribe population of Champaran fell from 20,998 in 1951 and 13,179 in 1941 to 2,879 only in 1961. The bulk of the tribals enumerated in 1961 were Oraons (population 2,065 or 71.7 per cent of the tribals), who numbered 1,216 in 1941. While the growth of the tribal population in 1941—51 may have been over-assessed, it is possible that many Oraons could not be enumerated in the district as scheduled tribes in 1961 since they are more commonly known by the name of Dhangars. Members of the Chero tribe were also enumerated in fair number, 686.

In the tabulation stage, the instructions originally envisaged that individual slips without entries of specific scheduled tribes should be disregarded. Although the instructions were revised later, some omissions may have resulted from strict application of the earlier instructions.

14. HOUSING

Tables on Housing and Establishments (Tables E-I to E-V) have been published in Part IV-B and the Report in Part IV-A of the 1961 Census Publications for Bihar. They contain information on various aspects of housing in rural and urban areas of the district and anchals. They have not been reproduced in this volume for want of space. Brief references to the salient features relating to Champaran, are, however, given below :

With a total of 652,142 houses in all, Champaran had more houses than any other district in Bihar except Gaya, Muzaffarpur and Darbhanga. These constituted 7.46 per cent of the total houses in the State. Nearly 99 per cent of the houses in the district were found occupied at the time of house-listing in September-October, 1960. This was a higher proportion than any other district in the State. 72.3 per cent of the houses were used as dwellings including shop-*cum*-dwellings and workshop-*cum*-dwellings.

The overall density of houses in Champaran (185 per sq. mile) was higher than in the State (131 per sq. mile) but lower in the urban areas (665 per sq. mile against 1,016 in the State).

Relatively more households of Champaran live in owned houses than in the State, both in rural (98.9 per cent against 97.5 per cent in the State) and urban areas (78.8 per cent against 56.5 per cent in the State).

In regard to the construction of the houses, a little less than half (45.8 per cent) of rural households lived in mud-walled houses. Almost the same proportion of households (45.2 per cent) lived in houses made of grass, leaves, reeds or bamboo walls, this proportion being higher only in the districts of Saharsa and Purnea. Less than a tenth (8.7 per cent) of the dwelling houses in rural areas had burnt brick walls.

Thatch was the main roofing material, which, with reeds, grass, leaves, wood and bamboo, accounted for 57.1 per cent of rural dwellings, those with brick and lime roofs constituting a bare 1.8 per cent against 16.4 per cent in urban dwellings. Thatch, etc., constitutes the largest single element in urban roofing as well (45.2 per cent).

The classification of households by number of rooms in their dwelling, separately for rural and urban is given below :

Number of rooms	Percentage of households	
	Rural	Urban
1	2	3
1 room	27.4	34.7
2 rooms	31.1	29.1
3 rooms	20.8	17.5
4 rooms	10.8	8.6
5 rooms or more	9.7	9.9

Urban households are obviously more cramped in regard to living space.

15. SIZE AND COMPOSITION OF HOUSEHOLDS

Size of Households

A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. A *census house* is a structure or part of a structure, a dwelling, a shop, a workshop, factory or place of business, or a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It follows that while the census house is a physical unit, the census household is a social unit.

In Champaran, the average size of a household is 5.44 persons. This is a trifle smaller than the average for the State (5.49 persons). Rural areas have somewhat larger households than urban areas. Comparative figures for the State and the district are noted below :

	Number of persons per household	
	Champaran district	Bihar State
Total	5.44	5.49
Rural	5.45	5.51
Urban	5.27	5.33

An idea of the distribution of 1,000 households by number of members can be had from the following :

Distribution of households in Champaran district by their size, 1961

Size of households	Champaran district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
All sizes	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Single member	54	53	90	57	53	99
2—3 members	222	221	243	211	209	232
4—6 members	435	437	377	436	442	376
7—9 members	195	195	190	202	203	191
10 members and above	94	94	100	94	93	102

The most common size of households consists of 4—6 members. Large households (having more than 6 members) or small households (having less than 4 members) also account for over 25 per cent each. Urban areas have relatively greater proportion of small sized households except that the proportion of very large households consisting of 10 members or more is slightly greater in urban areas, both in Champaran and the State. The overall distribution of households in Champaran district by the number of members closely follows the State pattern.

Composition of Households

The statement on the next page shows the composition of households by relationship to the head of the household.

Composition of households in Champaran district, 1961

Relationship	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Total	**100**	**100**	**100**	**100**	**100**	**100**
Heads of households	33.42	3.07	33.46	3.09	32.54	2.78
Spouses of heads of households ..	0.03	27.23	0.03	27.14	0.07	29.27
Married sons	10.83	..	10.92	..	9.15	..
Other married relations	5.71	21.17	5.72	21.24	5.49	19.67
Never married, widowed or divorced relations	48.61	48.31	48.70	48.34	46.85	47.49
Unrelated persons	1.40	0.22	1.17	0.19	5.90	0.79

One out of every 3 male members is head of household; the corresponding proportion among female members is one out of every 33. There is nothing to be surprised at with these proportions, for the patriarchal system of family is almost universal throughout the State. Even the small proportion of female heads of households presumably relates to elderly widows, mothers or such other persons who may have been treated as such out of sheer regard for them. In some cases continued absence of husbands for long period on work elsewhere may also have resulted in their wives being treated as heads of households. These conclusions are fully corroborated by the fact that only 0.03 per cent of males are spouses of heads of households (who must in such cases be females.)

Never married, widowed or divorced relations comprise the largest group of members of household in rural as well as urban areas. The proportion of married relations is naturally higher for both sexes in rural areas where the joint family system has been disrupted to a less extent. Unrelated persons of either sex have noticeably higher proportions in urban areas due to the more prevalent practice of engaging domestic help on salary-*cum*-food basis.

16. ECONOMIC CHARACTERISTICS

Workers and Non-workers

The economic classification of 1961 Census envisages a broad division of the entire population into two categories, namely, workers and non-workers. A 'worker' is a person who is engaged in some kind of economic activity. For example, he may be working as a cultivator, or as an agricultural labourer, or at a household industry, or doing any other work of productive and/or gainful nature. Work includes not only actual work but effective supervision or direction of work. Persons engaged in seasonal work like cultivation, livestock, dairying, household industry, etc., were deemed to be workers if they had regular work for more than an hour every day for the greater part of the last working season. Persons engaged in trade, profession, business or service were treated as workers if they were employed during any of the fifteen days just preceding the date of enumeration. A person who is not working is a 'non-worker'. Non-workers may be full-time students or children doing no other work, housewives or other persons engaged in home duties only, infants or disabled persons incapable of doing any work, retired persons (not re-employed), rentiers, beggars, vagrants, convicts in jails, inmates of penal, mental or charitable institutions, and unemployed persons. For a fuller understanding of these concepts, reference may be made to the flyleaf to the Primary Census Abstract in Part II-A (General Population Tables) or to the Introductory Note in Part II-B (i) (General Economic Tables) of the 1961 Census Publications relating to Bihar.

Primary Census Abstract gives the distribution of workers by nine categories of economic activity.

Participation Rates

The participation rate (also called the labour participation rate) refers to the number of workers per 1,000 of population. The statement on the next page gives the participation rates separately for persons, males and females as well as for total, rural and urban areas in Champaran district and Bihar State according to the 1961 Census.

Distribution of 1,000 persons, males and females by workers (with break up for the primary, secondary and tertiary sectors of industry) and non-workers, 1961

District/State	Persons Males Females	Total population	Workers				Non-workers
			Total	Primary sector	Secondary sector	Tertiary sector	
1	2	3	4	5	6		8
			TOTAL				
Champaran ..	P	1,000	413	360	24	29	587
	M	1,000	584	500	35	49	416
	F	1,000	238	216	13	9	762
Bihar	P	1,000	414	326	41	47	586
	M	1,000	556	421	57	78	444
	F	1,000	271	231	24	16	729
			RURAL

			URBAN				
Champaran ..	P	1,000	358	102	90	166	642
	M	1,000	547	132	146	269	453
	F	1,000	130	67	22	41	870
Bihar	P	1,000	332	46	114	172	668
	M	1,000	517	59	180	278	483
	F	1,000	104	29	32	43	896

There are 413 workers out of every 1,000 persons in the district, a proportion which is only nominally below the State average. It may be noted, however, that the participation rate in Champaran district is considerably higher than the rates in the three other districts of Tirhut division (where they vary from 335 to 356), though much lower than those in some of the Chotanagpur districts, e.g., Ranchi(563), Santal Parganas (525) and Singhbhum (517). In keeping with the pattern in other parts of the State, the participation rate among males is much higher than among females. It will be noticed, however, that the disparity between male and female rates is considerably wide in Champaran. This is borne out of the fact that while the male rate in Champaran is higher than the State average by 5.04 per cent, the female rate is lower by as much as 12.18 per cent.

As in the State so in the district of Champaran, the rural areas have a noticeably higher participation rate (416) than the urban areas (358). This observation holds good for both sexes. Thus, the participation rates for males are 586 and 547 respectively in rural and urban areas, while the corresponding rates for females are 243 and 130. A considerable section of urban males consists of students, job seekers and retired persons who augment the proportions of non-workers. Among urban females, the scope of employment in agriculture and household industry (where they are mostly engaged) is naturally limited in towns.

Special interest attaches to the distribution of workers by the three main sectors of economy in the above table. The *primary sector* includes workers in cultivation, agricultural labour, livestock, forestry, fishing, hunting, plantations and orchards and allied activities. The *secondary sector* comprises workers engaged in mining and quarrying, household, industry, manufacturing, construction, and gas and electricity. The *tertiary sector* relates to workers in trade and commerce, transport, storage and communications, and other services.

It is at once evident that as compared to the State, Champaran has a higher concentration of workers in the *primary sector*. Thus, out of a little over 41 per cent of the population returned as working both in Champaran and the State, 36.0 per cent are engaged in the *primary sector* in the former as against 32.6 per cent in the latter. The proportions in the *secondary* and *tertiary sectors* in the district are correspondingly lower. This is yet another index of the comparative backwardness of the district. Even in urban areas of the district, the participation rates in *secondary* and *tertiary sectors* are appreciably lower than those in the State. It follows that the working population of Champaran, though of the same proportion as in the State, is dependent to a greater extent upon agriculture and animal husbandry.

Industrial Categories of Workers

Workers have been classified into nine industrial categories depending upon the sector of economic activity in which they are engaged. In the case of a person engaged in more than one kind of work, such classification is based on the principal work which is determined by the one on which he spends the greater part of his working time. The statement below shows the distribution of 1,000 workers by the nine industrial citegories for Champaran district and Bihar State separately for persons, males and females in 1961.

Distribution of 1,000 workers by industrial categories separately for persons, males and females, 1961

Working	Proportion per 1,000 workers					
	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
I As Cultivator	487	521	403	539	534	547
II As Agricultural labourer ..	368	318	494	230	199	294
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	16	18	10	34	42	18
IV At Household Industry ..	41	36	54	55	46	73
V In Manufacturing other than Household Industry. ..	13	18	2	22	30	6
VI In Construction	4	5	N	5	8	1
VII In Trade and Commerce ..	20	24	10	27	35	12
VIII In Transport, Storage and Communications. ..	5	7	N	12	17	N
XI In Other Services	46	53	27	76	89	49

N—denotes negligible figure.

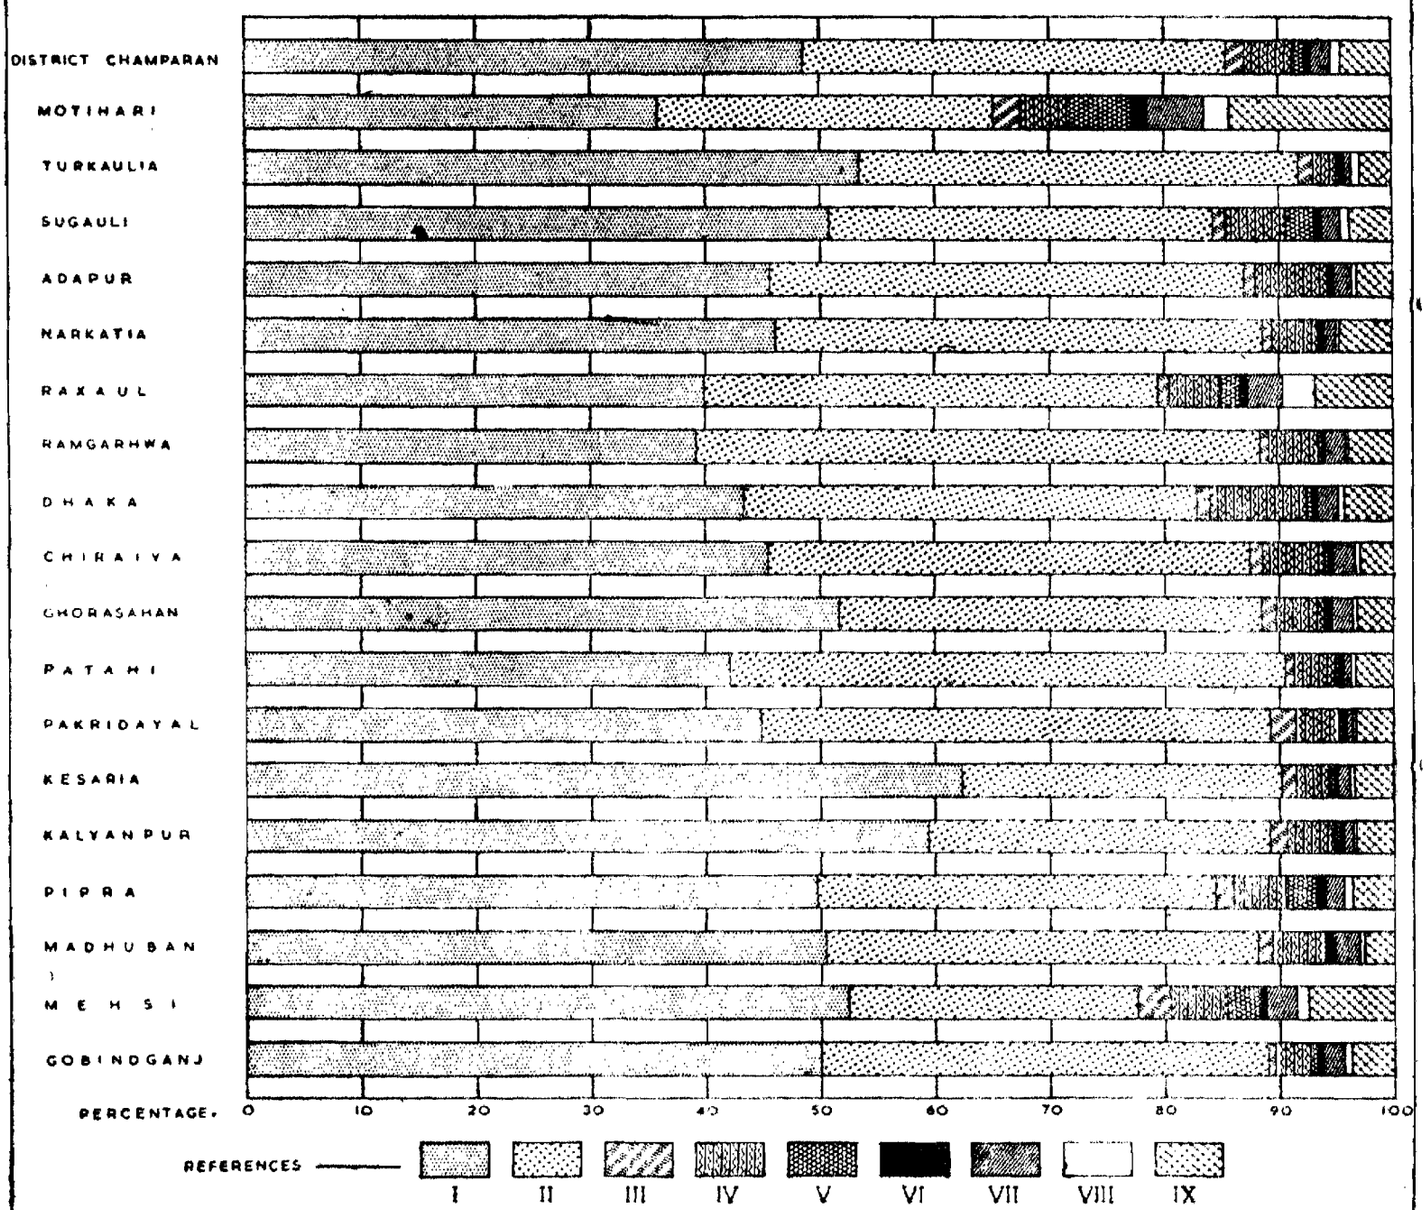

More than 85 per cent of workers in Champaran district are engaged in cultivation or agricultural labour. The corresponding proportion for the State is 76.9 per cent. It is evident that the extent of employment in agriculture in Champaran is very high. What is more depressing is the fact that while the proportion of cultivators (48.7 per cent) is lower than that of the State (53.9 per cent), the proportion of agricultural labourers (36.8 per cent) is considerably higher than the State average(23.0 per cent). It may be noted that agricultural labourers are persons who work in other people's land for wages in cash, kind or share without having any right, title or interest in such land. These proportions, therefore, tell their own tale about the State of agriculture in the district. It is also to be noted that the proportion of agricultural labourers is particularly high among females. In fact, almost half the population of working females in the district is employed as agricultural labourers. More than two-thirds of them are members of the scheduled castes.

The proportions in the remaining seven industrial categories are by comparison, very low and much less than the corresponding averages for the State. Non-household industries account for only 13 per 1,000 workers, while trade and commerce has 20. Other services have 4.6. The remaining two categories put together do not add up to even 1 per cent of the total workers in the district.

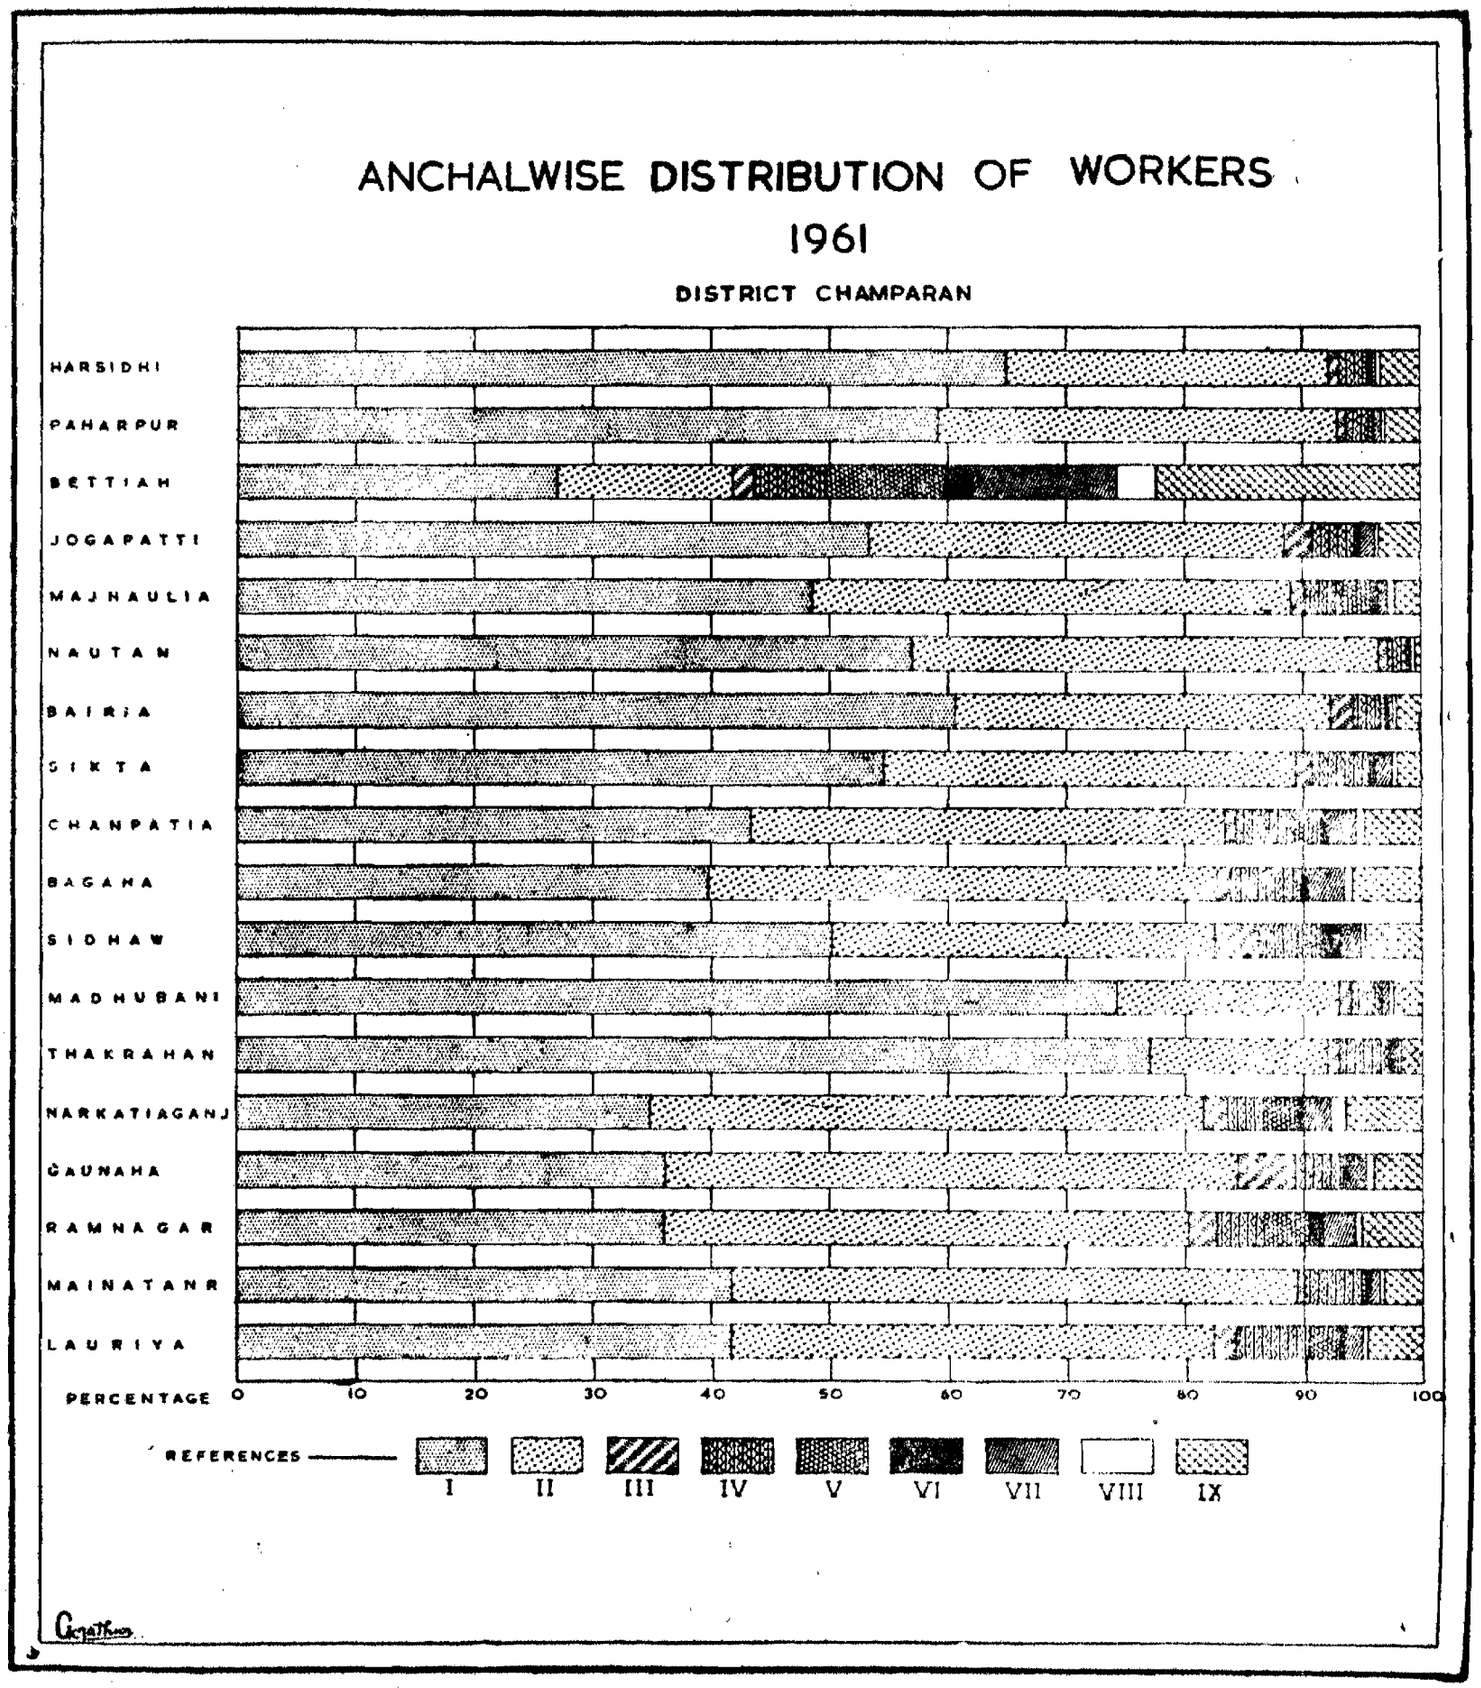

Female Participation

An idea of female participation in the economic field can be had by considering the sex ratio among workers in each industrial category. The statement at page xxxiii gives the relevant figures for Champaran district and Bihar State separately for total, rural and urban areas as well as for each industrial category, total workers and total population.

VIII	2	3	1	12	11	13
IX	204	211	181	267	802	181

In the State as well as the district, agricultural labour and household industry provide the greatest scope for female participation in economic activity. For every 10 males working in these categories in Champaran, there are at least 6 females. The corresponding proportions in the State are higher still. In fact it is noteworthy that female participation in the State is appreciably higher in each industrial category except III and VII which account for less than 4 per cent of total workers in Champaran. As is expected, female participation is negligible in categories VI and VIII, where the proportion of workers is also very small. Champaran has quite a few sugar mills whose workers come under category V. The very low sex ratio (30) in this category indicates that female employment in these factories is far from significant.

Participation Rates in Anchals

The participation rates at lower units namely subdivisions and anchals may now be considered as these will give a clue to local variations within the district.

The following statement gives the relevant information :

Percentage of workers to total population in subdivisions and anchals of Champaran district, 1961

District/Subdivision/Anchal	Percentage of workers to total population	
	Males	Females
1	2	3

36. Lauriya	58.84	24.95

Percentage of workers to total population in subdivisions and anchals of Champaran district 1961—*concld.*

There is a marked difference in participation rates, particularly for females, between the two subdivisions. Bettiah, acquits itself more creditably than Sadar, presumably because the former contains large hilly areas inhabited by Tharus and scheduled castes among whom participation rates are high.

So far as male participation is concerned, the rates vary from 60 to 65 per cent in ten anchals of Bettiah subdivision and Adapur anchal of Sadar subdivision. In the remaining anchals the rates fluctuate between 50 and 60 per cent, the south-eastern anchals having lower rates than others. It is pertinent that most of the anchals with high participation rates lie in the north-western part of the district comprising the greater part of Bettiah subdivision. Thus, out of 16 anchals in Bettiah subdivision, 10 have rates exceeding 60 per cent and 5 have 58—60 per cent. Only Bettiah anchal has a male participation rate of 53.26 per cent only. It is significant that the percentage of scheduled castes is over 18 per cent in the four northern anchals of Sidhaw, Ramgarhwa, Gaunaha and Mainatanr, while it varies from 12 to 18 per cent in others. The small number of scheduled tribes are largely concentrated, as mentioned earlier, in Ramnagar, Mainatanr and Jogapatti anchals. It may also be noted that the Tharus of Champaran, though not classified as scheduled castes or scheduled tribes have strong tribal characteristics.

In regard to female participation the picture is more or less the same. The border anchals of Bettiah subdivision have higher participation rates than others. Thus, female participation in Sidhaw anchal in the north-west is 45 per cent and in Sikta 44 per cent. The rates in Bairia, Madhubani, Gaunaha, Mainatanr, Ramgarhwa and Adapur vary between 30 and 40 per cent. In the remaining anchals of Bettiah subdivision (except Bettiah anchal, 15·63 per cent) the female participation rates lie between 20—30 per cent. In the Sadar subdivision, however, there are only 5 anchals (Sugauli, Paharpur, Harsidhi, Pipra and Kalyanpur) in this range, all others have participation rates below 20 per cent. It is clear that the participation rates are lower in the south and east as compared to north and west.

Workers by Age group

The statement below shows the percentage of workers in broad age groups in Champaran district and Bihar State separately for persons, males and females :

Percentage of workers in broad age groups, 1961

Age groups	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All ages	**41.29**	**58.44**	**23.77**	**41.40**	**55.60**	**27.12**
0—14	7.60	10.58	4.46	7.84	9.64	5.94
15—34	62.51	91.04	34.03	63.90	87.65	41.39
35—59	71.94	97.30	45.25	73.29	97.40	48.34
60+	50.48	84.61	22.24	50.26	82.26	23.09

The proportion of child workers in Champaran is only a trifle lower than that in the State as a whole. Boys, however, have higher and girls lower, proportions than those of the State. The proportions of workers among the young and middle aged persons are also lower than the State. Significantly enough, young males in the age group 15—34 have a higher proportion of workers in Champaran. A high participation rate in the age group 0—14 or 15—34 implies low literacy rate and poor economic condition which compels young children to be working when they should be studying. Participation is highest (97.30 per cent) among males in the age group 35—59. The high proportion (nearly 85 per cent) of male workers even in the age group '60 and above' is explained by the fact that even effective supervision and direction have been deemed to be work.

Workers by Literacy and Educational level

The following table gives the distribution of 1,000 workers by literacy and educational levels in Champaran district and Bihar State :

Distribution of 1,000 workers by literacy and educational level, 1961

Educational level	Number per 1,000 workers	
	Champaran district	Bihar State
Illiterates	**838**	**785**
Literates	**162**	**215**
(*i*) Literate (without educational level) ..	122	158
(*ii*) Primary or Junior Basic	29	39
(*iii*) Matriculation and above	11	18

Champaran has the lowest literacy among the districts of Bihar. The above table shows that the literacy among workers is also much below the State average. The disparities between the State and district proportions become all the more striking when educational levels are considered. As against 18 per 1,000 workers in the State who are at least matriculates, Champaran has only 11. The low rate of participation in the secondary and tertiary sectors of economy is explained to some extent by the low proportions of literacy and education, for these sectors absorb more of skilled and educated persons.

Status of Employment

Workers in industrial categories III and V—IX have been classified by four kinds of employment status, viz., employer, employee, single worker and family worker. An *employer* is a person who has to employ other persons in order to perform the work in which he is engaged. An *employee* is a person who usually works under some other person for salary or wages in cash or kind. A *single worker* is a person who works by himself, *i.e.*, he is not employed by anyone, nor does he employ anyone, not even members of his household except casually. A *family worker* is a member who works without receiving wages in cash or kind in an industry, business or trade conducted mainly by members of a family and ordinarily does at least one hour of work every day during the working season. For further elucidation of these terms a reference may be made to the flyleaf to Table B-IV Part B*. The statement on the next page shows the distribution of 1,000 workers (categories III & V—IX) in Champaran district and Bihar State by employment status.

*Census of India, 1961, Bihar, Volume IV, Part II-B(i), General Economic Tables.

Distribution of 1,000 workers by employment status, 1961

NUMBER PER 1,000 WORKERS

Employment status	Champaran district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total workers	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Employers	59	47	92	41	30	67
Employees	429	432	421	463	407	590
Single workers	374	385	341	377	419	280
Family workers	138	136	146	119	144	63

Employees constitute the largest proportion (42.9 per cent) of workers in Champaran. This is true of both rural and urban areas. As compared to the State, the proportion of employees is higher in rural areas but much lower in urban areas of Champaran. Single workers constitute the next important group. Their proportion is almost the same as that in the State. Champaran has a higher proportion of family workers than the State. In urban areas of the district it is more than twice as much as in the State. Employers, though constituting the smallest proportion among the four categories, are noticeably over-represented in Champaran.

Households and their Economic Activities

The information collected purely on the basis of individuals has been supplemented in 1961 by information on economic activities of the household as a unit. Tables B-X, B-XI, B-XVII and C-I given in this volume are based on 20 per cent sample of the household schedules. Other household economic tables have been published in Parts III (i) and III (ii) of the 1961 Census Publications relating to Bihar. It is well known that the main economic activities of households in the State are cultivation and household industry. The following statement gives the distribution of 100 sample households according to their participation in cultivation and household industry:

Distribution of households by their economic activity, 1961

Kind of activity	Champaran district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All households	**100**	**100**	**100**	**100**	**100**	**100**
Households engaged—						
(i) Neither in cultivation nor household industry	26	24	69	28	23	81
(ii) In cultivation only	68	70	24	64	68	13
(iii) In household industry only ..	1	1	5	2	2	5
(iv) In cultivation and household industry	5	5	2	6	7	1

NOTE: Households engaged in cultivation exclude those which are engaged wholly in agricultural labour.

Cultivating households including those engaged in household industry comprise nearly three-fourths of the total, a proportion which is somewhat higher than the State average of 70 per cent. The proportion of urban households in the district engaged in cultivation is almost twice as much as in the State. The participation of households in household industry is, however, much less in Champaran as compared to the State.

Nature and Size of Land holdings

55 per cent of the cultivating households in Champaran district cultivate lands owned by them. 11 per cent of the households cultivate unowned land held from private persons or institutions for payment in money, kind or share. This category evidently includes households of lease-holders and share-croppers. The remaining 34 per cent have mixed tenancies in the sense that they cultivate lands partly owned by them and partly held from others. The possibility of concealment in furnishing information relating to the extent of share-cropping cannot be ruled out. It is noteworthy, however, that Champaran has a higher proportion of share-croppers than the State as a whole.

The following statement shows the distribution of cultivating households in rural areas by the size of land cultivated by them :

Distribution of cultivating households in rural areas by the size of land, 1961

Size of land (in acres)	Percentage of cultivating households to total cultivating households in rural areas	
	Champaran district	Bihar State
1	2	3
All sizes	**100.00**	**100.00**
Less than 1	25.68	21.51
1.0 —2.4	29.46	26.65
2.5 —4.9	20.88	23.34
5.0 —7.4	9.74	12.20
7.5 —9.9	4.22	5.10
10.0—12.4	2.86	3.70
12.5—14.9	1.64	1.80
15.0—29.9	3.89	4.21
30.0—49.9	1.11	1.01
50 + ...	0.49	0.42
Unclassified	0.03	0.06

More than 76 per cent of the cultivating households in Champaran have holdings below 5 acres of land. The corresponding proportion for the State is 71.50 per cent. Thus the incidence of small sized holdings is more frequent in Champàran than in the State. Over a quarter of the cultivating households in the district have less than 1 acre each ; more than a half cultivate holdings smaller than 2.5 acres; and more than three-fourths do so in less than 5 acres. No more than 9.9 per cent, or barely one out of every ten cultivating households has holdings of 10 acres or more. It is rather startling to find that barely one out of every 200 cultivating households has a holding of 50 acres or more.

Non-working Population

Table B-IX at page 32 of Part I gives the classification of non-workers by different kinds of activity. It is to be noted that 587 persons out of every 1,00° in Champaran district are non-workers. While the corresponding proportion among males is 416, among females it is as high as 762. The following statement gives the distribution of 1,000 non-workers in Champaran district and Bihar State by their type of activity separately for persons, males and females :

Distribution of 1,000 non-workers by type of activity, 1961

Type of activity	Number per 1,000 non-workers					
	Champaran district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
1. Full-time students	88	202	25	126	273	36
2. Engaged in household industry	290	1	451	270	3	435
3. Dependants, infants and disabled persons.	616	786	521	596	709	526
4. Retired, rentier or persons having no independent means.	1	1	N	2	3	1
5. Beggars, vagrants, etc.	4	6	3	2	3	2
6. Inmates of penal, mental and charitable institutions.	N	1	N	1	2	N
7. Persons seeking employment for the first time.	1	2	N	2	4	N
8. Persons employed before but now out of employment and seeking work.	N	1	N	1	3	N

N—denotes negligible figure.

Dependants, infants and disabled persons comprise the largest proportion (61.6 per cent) among non-workers. 78.6 per cent of non-workers among males and 52.1 per cent among females belong to this category. The next important category among males consists of full-time students, who account for a little over onefifth of the non-working population. This proportion, it may be noted, is far below the State average of 27.3 per cent. Literacy and education is, therefore, hardly likely to progress at a sufficiently fast pace in Champaran in the present decade so as to enable it to catch up with the rest of the State. Among females 45.1 per cent of the non-workers are engaged in household duties. This proportion is also slightly higher than the State average. Champaran has more than a fair share of beggars, vagrants, etc. The figures relating to unemployed persons give an impression of well nigh full employment. An explanation will become obvious if the basis of economic classification at the 1961 Census is taken into account. Much of the unemployment in this country, particularly in the rural sector, is in the nature of under-employment. A reference to the concepts and definitions discussed earlier would show that most under-employed persons would have been returned as workers in census. Even students or other categories listed among non-workers would have figured as working if engaged in some kind of work or the other. Non-workers, by definition, are only those who are not engaged in any kind of productive or economic activity. The number fo such persons is naturally very limited.

17. VITAL STATISTICS

The two vital events of life are birth and death. Statistics relating to these are collected in Bihar under the Bengal Births and Deaths Registration Act, 1873 which makes the registration of births and deaths compulsory. This Act extends over the whole of Champaran district. As in the past, the village chaukidars continue to be the primary reporting agency in rural areas. Since 1959-60, however, the work has been entrusted to the Panchayat Sevaks who are now the registering authority within their respective areas. In municipal areas, the municipal bodies are supposed to maintain the necessary records and transmit the statistical data to higher authorities. Compilation and analysis of data are done in the Directorate of Statistics, Bihar at the State level through the agencies of District Statistical Officers and Junior Statistical Supervisors at the district and block levels respectively. Table VS-I at page 97 of Part I gives the number of births and deaths with mid-year rates separately for each year from 1951 to 1960. An abstract of births and deaths during the decade 1951—60 is given below:

	Births	Deaths	Difference
Persons	450,546	228,834	221,712
Males	236,293	125,234	111,059
Females	214,253	103,600	110,653

Thus, according to the above figures, the net addition to the population of Champaran on account of natural increase, should have been 221,712 persons. According to the Census of 1961 the increase over the 1951 population of the district in the last decade was 490,868 persons. The difference between the two figures cannot be accounted for by the excess of immigration over emigration, for there were actually more emigrants. These figures only serve to underline the gross under-reporting of birth and death data.

18. NATURAL CALAMITIES

The following is a chronological record* of major natural calamities in the district :

Year	Calamity	Year	Calamity
1865	.. Drought	1889	.. Scarcity
1866	.. Famine	1897	.. Famine (severe)
1874	.. Famine	1898	.. Flood
1906	.. Flood	1931	.. Hailstorm
1910	.. Flood	1934	.. Earthquake
1915	.. Flood	1938-39	.. Flood
1923	.. Flood (slight)	1951-52	.. Scarcity
1924	.. Flood (slight)	1953-54	.. Flood

19. AGRICULTURE AND IRRIGATION

Table AS-III at page 105 of Part I gives the statistics on land utilisation. Out of a total area of 22.60 lakh acres, the cultivated area (consisting of area sown and current fallows) is 16.25 lakh acres or about 72 per cent of the total. This represents a small decrease of 0.39 lakh acres from the cultivated area (16.64 lakh acres) in 1951. This decrease is partly accountable by extension of the area under forests and partly due to more land remaining fallow.

The *per capita* availability of land in the district has declined from 0·90 acre in 1951 to 0.75 acre in 1961. This is considerably lower than the corresponding State average of 0·92 acre in 1961. A better idea of the pressure on land can be had by considering the proportion of net area sown to the total population. This is termed as agricultural holding *per capita*. The agricultural holding *per capita* in Champaran district is 0.49 acre as compared to 0.43 acre for the State. The average size of agricultural holding per cultivating household is 4.50 acres in Champaran against 4·85 acres in the State. Thus, the State has a slight edge over the district in the matter of size of agricultural holding per cultivating household.

In regard to intensity of cropping, the index for Champaran is 129.68 as against 138.28 for the State (assuming the net area sown to be 100). Among the districts of North Bihar Plain, Saran, Darbhanga and Purnea have higher intensities of cropping while Muzaffarpur and Saharsa have lower intensities.

The gross irrigated area in the district is 1.49 lakh acres or about 8 per cent of the gross cropped area. Out of 18.83 lakh acres of gross cropped area 1.97 lakh acres were irrigated in 1951. Thus there was a small decrease of irrigated area in 1961. This may have been caused by a relative failure of the monsoon.

Champaran is fortunate in having three big canals, viz., Dhaka, Tiur and Tribeni. Together they have an irrigation potential of about 1.07 lakh acres. The construction of Dhaka and Tribeni canals was started as relief work after the great famine of 1896. The Tiur Canal, completed in 1879, was constructed mainly at the expense of some *zamindars* of the area but it was taken over by Government in 1886 and has been maintained at State expense ever since. The Tribeni Canal Extension Scheme, executed at a cost of Rs. 1.13 crores has raised its irrigation potential by another 0.54 lakh acres.

In the sum total, 10.06 per cent of the net area sown in Champaran district is irrigated, the corresponding percentage for the State being 25.67. It is evident that Champaran lags far behind the State in regard to irrigation facilities.

Rice is the main crop of the district. It accounts for an area of 7.72 lakh acres or 41.42 per cent of the gross area sown. Next in importance from the point of acreage is sugarcane with 1.29 lakh acres or 6.92 per cent followed by wheat with 1.06 lakh acres or 5.69 per cent. Jute is also grown in 0.23 lakh acres or 1.23 per cent.

The dependence of the bulk of the population on agriculture has been alluded to earlier. Every 100 acres of net area sown provides employment to 41

*District Gazetteer of Champaran, by Sri P. C. Raichaudhury.

cultivators and 31 agricultural labourers. The latter consist mostly of field workers whose daily wages varied from Rs. 1.40 in 1951 to Rs. 1.19 in 1960 for males, and from Rs.1.37 to Rs 0.94 for females. Children get Rs. 0.94 per day. Table AS-VII at page 108 of Part I gives data relating to average daily wages. It is rather strange to find that the wages of agricultural labourers have declined in this district over the years. This trend is discernible since 1955 onwards.

Table AS-VI at page 107 of Part I gives the yield rates of principal crops during the decade 1951—60. Sugarcane and jute are the two crops whose yield rates have recorded commendable increase in recent years.

20. LIVESTOCK

According to the Livestock Census of 1961, the total livestock population of Champaran district was 1,988,708 an increase of 434,353 over 1956 figure. Champaran ranks seventh among the districts of the State in regard to number of livestock.

The number of cattle (cows, bulls and bullocks) has increased by only 14 per cent in 40 years, after wide fluctuations in successive enumerations. During the decade 1951—61, after a drop of over 4 per cent in 1951—56, there was an increase of 13 per cent in 1956—61.

Buffaloes have flared better, with an average increase approaching 1 per cent per annum over 1920—61, the overall increase being 36 per cent, and decrease being confined to the decade 1930—40. During the last decade the number of buffaloes increased by about 5 per cent in 1951—56 and 27 per cent in 1956—61.

The number of sheep has almost been halved during the last 40 years there being a decrease by about 40 per cent during 1920—61.

Table LVT-II at page 116 of Part I gives the figures relating to livestock and poultry from 1920 to 1961 and also indicates the variation from one census to another.

Table LVT-I at page 115 of Part I gives the number of veterinary hospitals, dispensaries and doctors for each year of the decade. Champaran has 3 veterinary hospitals and 34 dispensaries manned by 38 veterinary doctors. Though the number of dispensaries has increased from 6 to 34 and that of doctors from 9 to 38 during the last decade, the facilities for curative and preventive treatment of animals and birds are yet far from adequate.

21. INDUSTRIES

Tables IND-I at page 117 and IND-II at page 118 of Part I give statistics of industrial establishments. According to the Chief Inspector of Factories, Champaran had 228 establishments which provided employment to 8,036 persons per day on an average in December, 1960. Of these, 140 establishments giving employment to 6,767 persons on an average were located in rural areas. The corresponding figures for urban areas were 88 and 1,269 respectively. All the sugar mills except one in Champaran are located in rural areas. Some of the important sugar mills are—

1. Champaran Sugar Co., Ltd., Chanpatia Factory, P. O. Chanpatia, Champaran.
2. North Bihar Sugar Mills, Ltd., Narainpur, Champaran.
3. Harinagar Sugar Mills, Ltd., P. O. Harinagar, Champaran.
4. The Sugauli Sugar Works, Ltd., P. O. Sugauli, Champaran.
5. New Swadeshi Sugar Mills, Ltd., P. O. Narkatiaganj, Champaran.
6. M/s. Shri Hanuman Sugar Mills, Ltd., village Bariarpur, P. O. Motihari, Champaran.
7. Motilal Padampat Sugar Mills Co., Ltd., P. O. Majhaulia, Champaran.
8. Champaran Sugar Co., Ltd. (Barrah Sugar Factory), P. O. Barrachakia, Champaran.
9. Sri Krishna Gyanoday Sugar Mills, Ltd., P. O. Lauria, Champaran.

Household Figures relating to Industrial Establishments.

During the houselisting operations preceding the 1961 Census, an attempt was made to assess the number and nature of industrial establishments, registered or otherwise, engaged in any kind of "production, processing, repair or servicing or where goods or articles are made and sold". The enquiry revealed that Champaran had, in all, 12,857 industrial establishments—11,203 in rural areas and 1,654 in urban areas. In rural areas, nearly 50 per cent of the establishments used some kind of fuel or power while the remaining 50 per cent used no power. The corresponding ratio in urban areas was about 3 : 2.

The statement on the next page gives the subdivisionwise break up of some important industries in the district.

Important Industrial establishments in Champaran district

			District total	Sadar sub-division	Bettiah sub-division
1.	207	Production of edible fats and oils (other than hydrogenated oil).	2,362	1,085	1,277
2.	369	Blacksmithy	1,912	1,053	859
3.	350	Manufacture of earthenware and earthen pottery.	1,309	831	478
4.	209	Production of sweets, condiments, *muri*, *murki*, *chira*, *khoi*, cocoa, chocolate, toffee, lozenge.	1,245	485	760
5.	273	Making of textile garments including raincoats and headgear.	1,195	510	685
6.	28	Manufacture of wood and wooden articles.	1,117	693	424
7.	393	Manufacture of jewellery ..	944	463	481
8.	235	Cotton weaving in handloom	722	708	14
9.	200	Production of rice, *atta*, flour, etc., by milling, dehusking and processing of crops and foodgrains.	578	304	274

Household Industries

In view of the importance of household industries to the economy of this country, data for workers engaged in household industries were separately recorded and tabulated in Census of 1961. A household industry was defined thus :

> "An industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be at the scale of a registered factory. A household industry would relate to production, processing, servicing and repairing and includes makers and sellers of goods."

In the district of Champaran, 50,629 persons were found to be engaged in household industries. They comprised nearly 4 per cent of the total working population of the district. The number of males and females engaged in the ten numerically important household industries is indicated below :

Minor Group of I. S. I. C.		Workers
040	Production and rearing of livestock mainly for milk and animal power such as cow, buffalo, goat.	9,724
207	Production of edible fats and oils (other than hydrogenated oil).	4,539
288	Manufacture of materials from cork, bamboo, cane, leaves and allied products.	4,386
209	Production of other food products such as sweetmeat and condiments, *muri*, *murki*, *chira*, *khoi*, cocoa, chocolate, toffee, lozenge.	3,519
350	Manufacture of earthenware and earthen pottery.	3,140
393	Manufacture of jewellery, silverware and wares using gold and other precious metals.	2,705
273	Making of textile garments including raincoats and headgears.	2,647
200	Production of rice, *atta*, flour, etc., by milling, dehusking and processing of crops and foodgrains.	2,590
206	Production of butter, *ghee*, cheese and dairy products.	2,466
289	Manufacture of other wood and allied products not covered above.	2,214

22. TRADE AND COMMERCE

Champaran's rich forests have opened the doors of a flourishing trade in timber. The district borders Nepal on the north over a long stretch of land. At two points of the district, the Nepal border can be approached by rail. There are some road routes also connecting the district with Nepal. Naturally, therefore, a good bulk of the Indo-Nepal trade is carried on through the district. Nepalese rice, timber and Ganja (Indian hemp) are imported into India through Champaran while textiles, petroleum products, etc., are exported to Nepal.

The trade of contraband Nepalese Ganja is carried on by some people inhabiting the border areas.

The chief commodities imported and exported are indicated below :

Imports	Exports
1. Cotton piece goods.	1. Salt-petre.
2. Coal.	2. Jute and Mesta.
3. Salt.	3. Oilseeds.
4. Iron and steel.	4. Timber.
5. Grains and pulses.	5. Sugar.
6. Kerosene oil.	6. Foodgrains.
7. Petrol.	7. Railway sleepers.
	8. Ballast.
	9. Hides.
	10. Turmeric.
	11. Bones.

According to 1961 Census, 24,794 persons out of a total working population of 1,241,384 of the district are engaged in trade and commerce, comprising 2.0 per cent of the working population. Their distribution by sex and class of workers is as follows :

Persons at work in trade and commerce	Males	Females
Total	**21,199**	**3,595**
Employer	3,926	205
Employee	1,982	22
Single worker	10,109	2,220
Family worker	5,182	1,148

Their distribution according to engagement in wholesale or retail trade is given below :

Serial no.	Major Group	Description of trade	Number of workers: Males	Females
1	60—63	Wholesale trade ..	1,031	31
2	64—68	Retail trade ..	19,805	3,560
3	69	Trade and commerce Miscellaneous	363	4

According to the houselists prepared on the eve of the 1961 Census, Champaran had the following types of

business establishments :

Serial no.	Nature of business	Number of establishments	
		Rural	Urban
1	Shop-*cum*-dwellings	5,845	654
2	Shops excluding eating houses ..	6,952	1,851
3	Restaurants, sweetmeat shops and eating places.	165	19
4	Business houses and offices ..	1,252	473

Table ADM-X at page 129 of Part I gives a list of banking offices operating in the district. The State Bank of India has four offices, one each at Bettiah, Raxaul, Harinagar and Motihari. The Central Bank of India has also set up branches at each of these places except at Harinagar.

23. POWER

The district's power supply is managed by the Bihar State Electricity Board. It has a power house at Bettiah. While 7 out of 9 towns of the district are electrified, only 149 out of its 2,642 inhabited villages have been electrified upto March, 1961. The consumption of electric energy under Bettiah Electricity Division during the year 1961-62 was 6,704,712 Kilowatts. Its break up is given below :

	Nature of consumption	Kilowatts
1.	Domestic—(*a*) Heat and small power ..	42,488
	(*b*) Light and Fan ..	1,575,514
2.	Commercial —(*a*) Heat and small power ..	865,590
	(*b*) Light and fan ..	243,466
3.	Industrial—(*a*) Low and medium voltage	1,506,806
	(*b*) High voltage	161,507
4.	Public lighting	246,891
5.	Irrigation	1,842,404
6.	Public water works and sewage pumping	220,046

24. PUBLIC HEALTH AND MEDICAL FACILITIES

Public Health

Champaran which at one time was ravaged by cholera, plague, Kala-azar and malaria has been the site of concentrated activities of public health staff during the post-independence era. As a result of intensive work, incidence of these diseases has come down-plague and Kala-azar having been almost extinguished.

The Civil Surgeon and Senior Executive Medical Officer is at the head of the preventive and curative branches of public health measures in the district. He is assisted by the District Medical Officer of Health and Assistant Health Officers on the preventive side and Deputy Superintendents of Hospitals and Civil Assistant Surgeons on the curative side.

The Leprosy Control Enquiry Committee estimated the incidence of leprosy in Champaran at 1.4 per 1,000 persons in the thirties. According to a recent survey, the incidence is about 2 per thousand. A leprosy subsidiary centre is working at Bakhri since June, 1957.

Goitre is the most common disease in the district particularly in Bettiah subdivision and has posed a major problem. Iodine deficiency is believed to be at the root of this disease. Iodised salt is sold in the district to supplement the iodine intake of the population.

Medical Facilities

There are 5 full-fledged hospitals in the district. Medical facilities below the subdivisional level are available at the 37 dispensaries (21 State managed and 16 run by the District Board). Besides these, 22 primary health centres also provide medical facilities.

The total number of beds available in the various hospitals and dispensaries of the district is 384. This gives a ratio of 1 bed for every 7,829 persons. Similarly, there is on an average only one hospital dispensary to serve an area of 84 square miles. The 22 primary health centres have not, of course, been included in these calculations. Table PH-I at page 133 of Part I included in this volume furnishes the statistics dealing with medical facilities. Part A of the table gives the number of diploma holders registered in the district during each year of the decade.

Family Planning Centres are attached to the district and subdivisional hospitals. Both Motihari and Bettiah have a T. B. Centre/Clinic each.

The number of physicians, surgeons, nurses, pharmacists and allied workers enumerated in the district at the 1961 Census is given below :

Family of National Classification of Occupations	Category of worker	Persons	Males	Females
1	2	3	4	5
030	Physicians and Surgeons, Allopathic.	100	96	4
031	Physicians, Ayurvedic ..	82	82	..
032	Physicians, Homoeopathic..	134	134	..
033	Physicians, Others ..	145	144	1
034	Physiologists	4	4	..
035	Dentists	4	4	..
039	Physicians, Surgeons and Dentists, n. e. c.	100	98	2
040	Nurses	150	21	129
041	Midwives and Health Visitors.	177	18	156
042	Nursing Attendance, and Related Workers.	113	69	44
043	Pharmacists and Pharmaceutical Technicians.	187	181	6
044	Vaccinators	73	73	..
046	Sanitation Technicians ..	202	199	3
049	Medical and Health Technicians, n. e. c. (excluding Laboratory Assistants).	64	61	3

Details of their employment by industrial categories are given in Table B-V of part II-B(*ii*), 1961 of this State.

BRIEF GAZETTEER OF PLACES

[Compiled from village notes prepared by enumerators during the 1961 Census; accuracy of the information has not been checked in every case]

Adapur (Jamunbhar)

A large village (population 904), headquarters of an anchal and police station, and a railway station. Situated about 20 miles north of Motihari. The village has a post and telegraph office.

Atawar Kuria

A medium sized village situated about 9 miles south of Majhaulia. A big cattle fair is held on the occasion of *Chaitra Ram Navami*, lasting for about a week.

Bagaha

A town since 1951, has an area of 11.04 sq. miles and population of 19,411 persons. It is situated on the eastern bank of the Gandak about 35 miles north-west of Bettiah, and is the terminus of the Bairgania-Bagaha branch of the N. E. Rly. Headquarters of an anchal and police station. The town has a state hospital, inspection bungalow and post and telegraph office. It is a flourishing centre for trade in timber and grain and has a sugar factory.

Bairati

A medium sized village (population 628), in Sidhaw anchal with epicla association. Tradition avers that during their period of exile, the Pandavas stayed here for some time before proceeding to Biratnagar. The village has a *Devi-Sthan* ascribed to Yudhishthira, the eldest of the Pandavas.

Bairia

A large village (population 3,563), the headquarters of an anchal, situated 6 miles west of Bettiah town. Refugees have been settled here in some of the buildings acquired by the Rehabilitation Department.

Baisakhwa

A large village (population 2,071) in Sikta anchal situated on the metalled Bettiah-Mainatanr road about 10 miles from Sikta railway station. The village has a cattle pound, a community hall and a field veterinary centre.

Bangaon (Barganw)

A large village (population 3,858), lying about 5 miles from Bagaha. Known for the Chautarwa Dome Settlement Colony set up by the Welfare Department of the State Government for the rehabilitation of the *domes* who were previously classified as a criminal tribe.

Bansighat

A ghat on the Bansi river which forms the boundary between Bihar and Uttar Pradesh. Its religious importance in the area is vividly brought out by the saying: "*Sau Kashi aur Ek Bansi*". Tradition holds that on his way from Janakpur after betrothing Sita, Lord Ramchandra bathed and stayed here for sometime. A fair is held annually on the occasion of *Kartik Purnima*.

Banwaria

A medium sized village (population 777), situated 6 miles north of Narkatiaganj. Noted for its Shiva temple scenically situated between two tanks. Pilgrims congregate especially in the months of *Phalgun* and *Baisakh* every year, and the fairs held on these occasions are known for the large variety of wooden furniture and fixtures put on sale.

Barharwa Lakhansen

A large village (population 3,893) in Dhaka anchal. Famous due to Mahatma Gandhi's having stayed here for sometime. Gandhiji also established a middle school in the village which is still running.

Behra

A large village (population 4,243), situated about 4 miles south-west of Sikta railway station, on a District Board road going to Nepal. The village has a Shiva temple. Bi-weekly markets are held.

Bettiah

The largest town of the district (population 39,990) and a subdivisional headquarters lying on the bank of the Chandravati. Brass and other metalware and leather goods are manufactured. The town is chiefly a service town.

Bhaisalotan

A medium sized village (population 1,496), in Sidhaw anchal situated on the Indo-Nepal border 26 miles north-west of Bagaha to which it is connected by a metalled road. Contain headworks of the Triveni Canal and some inspection bungalows for visitors. An annual fair is held on the occasion of *Maghi Amavasya*. Besides a Shiva temple constructed by the Bettiah Raj, there are also ancient temples of Nara-Devi and Gauri-Shankar.

Bharwalia

A medium sized village (population 1,130), situated about 10 miles from Majhaulia Noted for its annual cattle fair held in *Chaitra*.

Bhikhnathori

A small village (population 205), lying in the northern border of the district in Gaunaha anchal and situated on the Someshwar hill at a height of about 600 feet

above sea level. It is the terminus of the Narkatiaganj-Bhiknathori branch of the N. E. Rly. Coming up as a tourist centre, it has a youth hostel.

Bhitharwa

A small village (population 471) in Gaunaha anchal lying about 2 miles north of Amowla railway station on the Narkatiaganj-Bhiknathori Branch. Noted as the centre from which Mahatma Gandhi launched his campaign against the tyrannical indigo-planters. The village has a *pucca* building, where Gandhiji stayed and which now houses the Gandhi *Ashram*.

Bhopatpur

A large village (population 6,691), lying about 10 miles north of Kesariya Bazar. Formerly important on account of the location of a *Tahsil* office of the Bettiah Raj, the village has a health sub-centre and field veterinary dispensary.

Brindaban

A small village in Chanpatia anchal where Gandhiji stayed in 1939 and started an *Ashram* which is still functioning.

Chakia

A small town with an area of 2.95 sq. miles and population of 5,962. It attained urban status in 1951. Headquarters of an anchal, the town has a post and telegraph office. It is a railhead and lies on the Motihari-Muzaffarpur road. Well connected by both road and rail, Chakia is an important centre for the export of jute. It has a sugar mill and power station of the State Electricity Board.

Chandi Asthan

A small village (population 477) in Gobindganj anchal famous for its temple of Goddess Chandi. There are signs of ancient tanks, where *yajnas* were performed in the ancient days. Ancient coins and idols have also been found.

Chanpatia Bazar

A growing township (population 14,559), the headquarters of an anchal and police station. It has a District Board dispensary, Union Board Office and a combined post and telegraph office. A large sugar mill known as Champaran Sugar Company Limited is located here.

Chhapainia

A small village (population 371), situated on the bank of Sikrahna river about 7 miles south of Sikta railway station. There is a temple of Lord Shiva where 5,000 people congregate on the occasion of *Phalgun Shivaratri* every year.

Chiraiya

Lying on the northern bank of the Gandak about 6 miles south of Kesariya Bazar, the village has a big *Math*. There is an inspection bungalow of the Irrigation Department.

Dhaka

A large village (population 5,691), situated 16 miles east of Motihari. It is the headquarters of an anchal and police station.

Gauripur

A medium sized village (population 1,160) lying 2 miles south-east of Marzadwa railway station. The village is electrified and is an important commercial centre lying on the road from Mainatanr to Marzadwa. It has a number of diesel machines for dehusking paddy and crushing oil.

Gawnaha

A medium sized village (population 916), the headquarters of an anchal and a blg commercial centre of Tharuhat, the home of the Tharus of the district. There is a railway station and rest bungalow.

Ghorasahan

A very large village (population 5,146), situated near the Indo-Nepal border. An important commercial centre for agricultural produce, the market are held at Ghorasahan and Balua Bazar. There is a rice mill and a high school.

Goabari

A village in Dhaka anchal, situated a mile from Bairgania railway station. The village lies on an embankment and is approachable by an embankment road.

Gobindganj (Munra)

A medium sized village (population 1,026), the headquarters of an anchal and police station, situated about 19 miles south of Motihari.

Gurharwa

A medium sized village in Dhaka anchal known for its cattle fair held twice every year.

Harinagar

It is a railway station on the Narkatiaganj-Bagaha branch. A road, motorable during the dry weather, runs northwards to the summit of the Someswar *hill* at a height of 2,884 feet above the sea level. The ascent to the summit lies along the Someswar pass up to the bed of the Juri Pani Stream amid grand scenery. The summit overlooks the Mauri Valley in Nepal and commands a fine view of Mount Everest and of the great snow peaks of Dhaulagiri, Gossainathan and Annapurna.

Harnatanr

A small village (population 440) in Sidhaw anchal situated about 12 miles north of Bagaha railway station on the metalled Bagaha Harnatanr road. An important commercial centre in Tharuhat. A fair lasting for a week is held on the occasion of *Ramnavami*. It has a high school.

Harsidih (Pakariya Harsidhi)

A large village (population 4,254), the headquarters of an anchal and police station situated about 16 miles east of Motihari.

Hasanpur

An ancient village of Bagaha anchal said to have been the site of reception of the bridegrooms party on the occasion of the marriage of the epical princess Uttara. The name is supposed to have been derived from its earlier name of Hastinapur.

Huseni

A very large village (population 7,342), noted for its 'jhil' which attracts large number of game birds. It is situated 33 miles from Motihari and 5 miles from Kesaria Bazar.

Jogapatti (Laukaria Jogapatti)

Headquarters of an anchal and police station. It is a medium sized village with a population of 881 persons. Formerly renowned centre of indigo production.

Juafar

A large village (population 1,474) in Adapur anchal. Contains old ruins.

Kaleyanpur

A large village (population 3,955) situated 19 miles south of Motihari, the headquarters of an anchal and police station.

Kesaria

The headquarters of an anchal and police station. Kesaria Bazar (Thana No. 204) was classified as a town in the Census 1951 when it had a population of 4,307. However, since the bulk of the population depended for their livelihood on agriculture the place was declassified in 1961 when the village contained a population of 4,836. There is a high brick mound with a brick tower on its top which marks the ruins of a Buddhist Stupa dating back to the second century A. D.

Kudarkat

A large village (population 2,691) in Narkatia anchal known for its historical sites. The ruin of temple, built of stone were discovered about 60 years back. A stone tablet with inscriptions yet exists.

Lakhaura (Dhrubgarh)

A large village (population 4,881) situated about 8 miles north of Motihari town. It is believed to have been the birth place of the devout boy saint Dhruva.

Lal Saraia

A large village (population 2,790) situated in Sugauli anchal. Formerly renowned as centre of indigo production, the village has now a colony of displaced persons from East Pakistan.

Laukaria

A large village (population 4,588) in Bairia anchal, situated 12 miles from Bettiah, known as the birth place of Shri Khenahar Ray, who was associated with Mahatma Gandhi in the struggle against the tyranny of white indigo planters.

Machharganw

A large village (population 2,559) in Jogapatti anchal, situated 2 miles from the anchal headquarters. An important commercial centre.

Madanpur

A medium sized village in Bagaha anchal, situated 10 miles north of the anchal headquarters on the bank of the Gandak. Old brick remains are said to be ruins of the palace of the king.

Madhuban

Situated about 20 miles south-east of Motihari, it is a very large village (population 5,256) and headquarters of an anchal and police station. It has a weekly market. A large fair is held on the occasion of *Dusschra*.

Madhubani

A large village (population 5,641), noted for the Gramsevakkendra started in 1934. Khad and woollen cloth are manufactured here.

Mahajogin

Small village (population 207) in Gaunaha anchal, traditionally believed to contain a fort and a monastery of the Mauryan period of which, however, no remains exist have been found. The Shiva temple in the village is situated on a 50' high mound believed to contain remains of the Buddhist monastery.

Mainatanr

A medium sized village (population 1,858), the headquarters of anchal and police station. It is situated 23 miles north of Bettiah town. It has a State dispensary, a dak bungalow and a high school.

Majhawalia

A large village (population 2,634), the headquarters of an anchal and police station lying 8 miles east of Bettiah. Majhaulia is connected by road and is the railhead. It has a large sugar factory.

Mehsi (Kasba Mehsi)

A large village (population 2,833), the headquarters of an anchal situated 26 miles south-east of Motihari. It is a railhead on the Muzaffarpur-Narkatiaganj Section of the N. E. Railway.

Narkatiaganj (Shikarpur)

A very large village (population 10,975), the headquarters of an anchal and police station. An important rail-head of the N. E. Railway lying on the Indo-Nepal border. It has a sugar factory and a distillery as also many rice and flour mills and brick kilns.

Nautan Khas

A medium sized village (population 1,084), situated 8 miles south of Bettiah town, the headquarters of an anchal and police station.

Nawalpur

A large village (population 3,458), situated on the Bettiah-Bagaha road about 5 miles north-west of the anchal headquarters at Jogapatti. The bi-weekly market held in the village serves a large area in the *diara* belt. A fair is held on the occasion of *Ramnavami*.

Padumker

A large village (population 2,906) in Patahi anchal situated 8 miles north-east of the anchal headquarters. Noted for a big tank about 2½ miles long and ¼ mile wide, said to have been excavated by a king of Nepal named Shivai Singh who was cured here from a chronic disease and had performed *Yajna*. The rice grown at the site of the Yajna has the odour of ghee and is known as Padamkaria rice.

Pakri Deal

A large village (population 4,065) situated about 12 miles east of Motihari town. It is the headquarters of an anchal.

Parsa

A large village in Jogapatti anchal. It has a sugar mill. The Parsa Seed Multiplication farm is situated at some distance away. A colony has been set up for displaced persons from East Pakistan.

Patahi Jadu

A large village (population 4,654), the headquarters of an anchal and police station, situated about 20 miles east of Motihari town.

Pipra

Headquarters of an anchal, situated about 9 miles from Motihari, having a population of 1,398 persons. It has a high school.

Purnahia

A large village (population 3,727) in Ghorasahan anchal, formerly renowned as in indigo producing centre and containing a revenue collection office of the Bettiah Raj.

Rajghat

The ghat on the eastern bank of the Kohra river. It has a temple of Lord Shiva constructed by the Bettiah Raj. A large fair is held on the occasion of *Shivaratri*. The ghat in situated about 2 miles east of Majhaulia village.

Ramnagar

A large village (population 4,131), the headquarters of an anchal and police station, situated 27 miles north of Bettiah town. It has a sugar factory and two rice mills and contains the administrative office of the Triveni Canal Scheme. There is a Shiva temple constructed about 100 years ago by the Raja of Ramnagar, which draws large crowds to the annual fair held on the occasion of *Shivaratri*.

Rampurwa

A very small village with population of less than 100 persons, situated just south of Gaunaha railway station. Contains an Ashokan pillar.

Raxaul Bazar

A small town (population 9,699), headquarters of an anchal and police station, situated 31 miles north of Motihari town. Important as a commercial centre on the Indo-Nepal border. Well connected by road, rail and air.

Sahodarsthan

A religious place containing a temple of Sahodaramai held in deep reverence by the Tharus, The Goddess is propitiated by sacrifices of goats and buffaloes. A large fair is held on the occasion of *Ramnavami*.

Sangrampur

A very large village (population 8,788), situated 7 miles south of the anchal headquarters Gobindganj. The village derives its name from the traditional belief that the epical fight between Lord Ramchandra and his two sons Lava and Kush took place here.

Saraia Gopal

A large village (population 3,183), in Patahi anchal, situated about 4 miles north of Patahi. The village contains a mound known as Kasturiadih which is believed to cover the remains of an ancient town. The mound has yet to be excavated.

Sariswa

A large village (population 2,578), situated 8 miles north of Majhaulia railway station. It is a large commercial centre for agricultural produce, about 75,000 mds. of paddy alone being bought and sold.

Sarayaman lake

A beauty spot 4 miles west of Bettiah town, which attracts large varieties of birds. The lake water is of medicinal value for alimentary disordes. There is a forest bungalow nearby.

Semra

A village 10 miles north of Majhaulia anchal, known for its old Madarsa, set up about 150 years ago. It has a library containing rare and ancient manuscripts.

Sikta (Haripur)

A large village (population 4,323), the headquarters of an anchal and police station. An important commercial centre. It has some rice mills a State dispensary and veterinary dispensary.

Singasani

A large village (population 4,272), situated about 7 miles north of Sugauli. It has a large mound named Unchadih, believed to cover remains of an old fort.

Sirsiya

A medium sized village (population 1,844) in Sikta anchal situated about 4 miles south of Sikta railway station. A large fair lasting for 10 days and attracting about 6,000 persons daily is held on the occasion of *Ramnavami*. Cattle and wooden furniture are the main commodities sold in the fair.

Someshwar fort

The fort stands on the summit of the Someshwar hill (in Ramnagar Anchal) on the Indo-Nepal border. The fort is now in ruins. The ridge which contains the fort affords a magnificient view. There is an inspection bungalow nearby.

Suganw

A very large village in Sugauli anchal (population 6,485), situated 4 miles from the anchal headquarters. The village is said to have been the capital of Tirhut under Kameshwar Thakur and his family which ruled for over 300 years.

Sugauli

A town with a population of 10,447 persons.The headquarters of an anchal and police station. It is a rail-head and lies on a national highway. It has a fairly large market. Particularly for dairy produce and jute. The Anglo-Nepali Treaty of 1885 was signed at Sugauli.

Thakraha

A very large village with population of 14,479. It is situated 23 miles south-west of Bettiah and is the headquarters of an anchal and police station. Situated in a low lying area the village is approachable only by boat from June to October during which period it is surrounded by flood water.

Tinkoni

A large village (population 3,744) in Adapur anchal. Remains of old buildings have been found. It is said that in the remote past there existed a palace of Rani of Behula. Excavation have not been carried out.

Turkauliya

Very large village (population 9,907), the headquarters of an anchal and police station. Reputed to have been one of the largest indigo concerns in the district.

Udaipur forest

The forest in Bairia anchal extends over more than 900 acres. Managed by the Forest Department there is a forest bungalow and a lake for boating.

A GLOSSARY OF THE BETTER KNOWN ANCIENT MONUMENTS IN THE DISTRICT OF CHAMPARAN

NOTE

Along with the houselisting operation conducted in October, 1960, a village note was also filled in by the enumerators for each *mauza* or enumerator's block. The enumerators were required to record information on ancient monuments according to the following instructions :

"Part B (3) : Ancient Monuments

A monument means ' anything that preserves the memory of a person or an event, a building, pillar, tomb, tablet, statue, mound, etc.'. The idea here is to collect information about monuments which are of some importance and antiquity. By antiquity, the idea is that the period to which the monument relates should not be less than 150 years old. Religious shrines of some antiquity will be noted under this head as well as item 11 of Part A."

Admittedly, the extent of details collected in th survey is rather meagre and, perhaps, not very authenti This could not be otherwise, considering the sever limitations and general handicaps of the enumeratio agency. Even so, the comprehensive coverage ha yielded some significant data which are presented belo for further investigation and research by intereste persons.

The list is presented in the same order of Subdivi sions and anchals as in the Village Directory and Vil lage Statistics.

Details of monuments in villages Bediban, Sagar Sitakund, Lauriya, Chanki and Lauriya Nandangarh have been adapted from *Antiquarian Remains in Bihar* written by D. R. Patil published by Kashi Prasad Jayaswal Research Institute, Patna.

SADAR SUBDIVISION

Anchal—Motihari

Paterhwa (Thana no. 145)—Contains a high brick tower built about 300 years ago, and having stones with inscriptions.

Anchal—Sugauli

Muswa (Thana no. 28)—There is an ancient mound of bricks now overgrown with bushes and grass. It is locally held that the mound covers the fort of some Sildah King.

Anchal—Adapur

Bhawanipur (Thana no. 82)—There is a memorial pillar known as ' Bhisa ' which is said to be over a thousand years old. It is 30 ft. high and lies in a brick-walled enclosure covering three quarters of an acre. Pieces of silver and gold and some *kouris* have been found.

Anchal—Chiraiya

Masaha (Thana no. 160)—Contains a 10 feet high dome said to be some 200 years old.

Anchal—Kesaria

Tajpur Deur (Thana no. 235)—Contains the ruins of Dewal Fort, said to have been built by King ' Ben'. The remains are about 300 ft. high covering an area of some two and a half acres. The site is preserved.

Anchal—Kalyanpur

Siswa Kharar (Thana no. 38)—There is an old mound known as the ' Unchi-Dih', said to be 200 years old, covering the fortress of some kings. It covers an area of about 25 acres.

Anchal—Pipra

Madhuban Bediban (Thana no. 103)—The village, situated about half a mile from Pipra railway station, contains the remains of an ancient fort in an area of 925×670 feet, with an average height of 12 feet above the surrounding country. The ramparts are made of mud with a broad moat all round.

Close to the north of the fort is a lofty terrace, 91′× 68′ and 20′ high, surrounded by a brick wall with two long flights of steps on the north and east. On this terrace is a Hindu temple consisting of the sanctum and a portico in front and facing east. In the shrine the object of worship is a 2′ square stone slab containing 7 lines of Arabic inscription, worshipped locally as *Bhagwan-Ka-Charanpada* (footprints of God). The inscription is probably of A. D. 1450. Local belief is that the terrace, on which the temple stands, was once a sacrificial altar (or *Vedi*) from which the name Bediban (*i.e.* the forest of the sacrificial altar) has been derived.

Sagar (Thana no. 97)—Sagardih lies about 4 miles south-west of Pipra. There are two ancient monuments, the Sagardih or Stupa mound and tank called Gaya Pokhar. The mound is situated on the eastern bank of an old tank, named Gaya-Pokhar near the village. The mound measures 500′×300′ and was about 37′ high when Cunningham saw it in 1880. According to Cunningham there was, on the top of the mound a solid brick Stupa, which was despoiled for bricks. He carried out an excavation here and exposed the ruins of a Stupa 22′ in diameter at base. The base was found decorated with bands of bricks mouldings of which the upper portions

were divided into 14 faces by plain plasters. Beneath the Stupa Cunningham discovered a raised terrace 20 feet above the surrounding ground level. After a careful examination he concluded that the terrace below belonged to earlier structure possibly a Stupa, since the size of its bricks was different from those of the upper Stupa. About the age of the two structures Cunningham could not be definite, but he would assign the latter Stupa to 9th century and the earlier one to several centuries before the 9th century A. D. This Stupa has been attributed to the legendery King Sagar of the famous "Solar race". At present the Sagar Bhisa (*i.e.* mound) is nothing but a mound of earth and brickbats.

To the south-east of the Sagardih about 300 yards away, is a large tank called Buddha Pokhar. The name Buddha Pokhar may have been derived from the Sagardih mound which was once a Buddhist Stupa.

Sitakund (Thana no. 104)—This village is situated 10 miles to the south-east of Motihari near the Pipra railway station.

The village possesses an ancient site of a fort which "is evidently an old one, but nothing whatever of its history, and not even its name is known to the ignorant *jogis* who now live there". The ramparts of the fort are 21½' thick and consist of two separate brick walls. The area enclosed is an irregular square of 450'. Cunningham thought it to be a fort of pre-Musalman times, but there is nothing found here to indicate this age: for neither the temples nor the images found inside a temple, necessarily belong to pre-Muslaman days.

Inside the enclosure is the sacred circular tank known as *Sitakund*, surrounded on three sides by stone and brick built stairs or *ghats*.

On the western side of the tank is the main temple of *Sitahund*. Inside the temple under a separate canopy were enshrined seven black stone images representing Hindu deities like the Sun-God, Durga, Ganesa, Mahishasura-Mardani-Durga, Vishnu and more interesting figure of a male with 5 heads and 20 arms, which Cunningham thought to be that of Ravana and which the local people worship as Vishnu.

It is, however, not clear how the fort was connected with the temple in points of age and historical associations.

Anchal—Mehsi

Bahadurpur (Thana no. 142)—It has the grave of Jamauddin Hussain, which is about 200 years old.

Kasba Mehsi (Thana no. 143)—It has a tomb of Mirza Haleem said to be 576 years old, containing undecipherable inscriptions.

Purani Mehsi (Thana No. 136)—It has the grave of Bedil-Quadir who was the teacher of the poets during the reign of Aurangzeb.

Anchal—Gobindganj

Bahadurpur (Thana no. 101)—It has a statue of Brahma. Close to the statue of Brahma there is a big tank covering an area of one *bigha*. This is about 150 years old.

Chandi Asthan (Thana no. 99)—Contains the remains of an old fort said to be about 2,000 years old.

Lauriya (Thana no. 89)—The village is situated about 16 miles west of Motihari on the road to Govindganj. There is an Asokan pillar situated close to the east of the village and is locally called as Laur or Phallus of Siva and is worshipped as such. It is a single block of polished sand stone, 36½' in height above ground with a base diameter of 41·8" and the top diameter of 37.6". There must have been several feet of the shaft under ground and the whole would weigh, according to Cunningham, about 40 tons.

Inscription: The pillar contains the first six of the pillar edict of Asoka in well preserved and neatly engraved.

Anchal—Harsidhi

Math Lohiyar (Thana no. 134)—It has a monastery of Mannoo Baba constructed during the time of Shah Alam.

Anchal—Paharpur

Gobardhanpur (Thana no. 58)—It has a high mound covering an old fort.

Sonual (Thana no. 33)—The fort of the King of Sonbal, known as Fulbaristhan is located in the village.

BETTIAH SUBDIVISION

Anchal—Jogapatti

Nankar (Thana no. 405)—There is an old mound surrounded by mud-walls.

Anchal—Majhaulia

Mahanagni (Thana no. 203)—There is a temple of Chitradharnath, a saint and a preacher. The temple is situated at the place where he took *Samadhi*. This is about 200 years old and is of considerable local importance.

Anchal—Bairia

Patjirwa (Thana no. 107)—There isan old monument.

Anchal—Bagaha

Jhar Mahui (Thana no. 218)—There is a 300 years old brick-built grave of Malang.

Anchal—Sidhaw

Bhaisalotan (Thana no. 2)—There is the Nardevisthan where Alha-udal used to perform human sacrifice to attain perfection.

Daruabari (Thana no. 8)—There is a thousand year old brick-built fort said to have been built by Alha-udal.

Paikaulia (Thana no. 123)—There is a mound known as Guruj.

Anchal—Narkatiaganj

Banwaria (Thana no. 361)—There are two fortresses resembling a raised mound, below which there are walls. This appears to be a passage between Chankigarh and Nandangarh. Some old statues belonging to the Kanishka period have been found.

Chanki (Thana no. 671)—The village is also known as Janakigadh and is situated about 6 miles east of Ramnagar railway station. There is big Gadh known as Chankigadh. The mound lies to the east of the village. It is a mass of solid brick-work, 90′ high, the bricks in the ruins measuring $12\frac{1}{2}'' \times 12\frac{1}{2}'' \times 2\frac{1}{2}''$ and resembling those found in Mauryan sites. The mound is L shaped, the longer arm being indicated by the lofty main ridge, running east to west and showing traces of massive brick walls at its sides. The shorter arm is a continuation of the main ridge from its eastern end towards the south, where, after a short distance, it turns to the west in a gradual slope merging with the ground level and forming a sort of tank in between the angles. The top of the main ridge is level flat, about 400′×150′, where on one side is a low platform held sacred by the local people as Devi Asthan, In about 1887 a Subdivisional Officer of Bettiah made a small excavation at the mound and discovered a cannon ball, an iron spike and some copper coins ; but these antiquities could not be traced afterwards. Cunningham was confident that if it were " judiciously excavated " " neither labour nor time expended upon it would be wasted, the mound bears every appearance of an excellent field for discovery". No such excavation had been undertaken here so far.

Marhia (Thana no. 349)—Statues of Kanishka period have been found in the village.

Tarharwa (Thana no. 271)—Contains the gurguj pillar built of very old bricks.

Anchal—Gaunaha

Dewarh (Thana no. 193)—There is a mound from which images of Lord Buddha, Ram and Sita were found in the excavations carried out some five years back.

Anchal—Lauriya

Deurwa (Thana no. 404)—There is an old temple near the grave of a Gosain Baba.

Lauriya (*Nandangadh*) (Thana no. 432)—This large village is situated about 14 miles north-west of Bettiah. There is a stone pillar of Asoka. The pillar is situated half a mile north-east of the village, near the western bank of the rivulet called as Turkaha. The main shaft of the pillar is a monolith of highly polish and sand stone 32′ 9″ high surmounted by the lion capital 6′ 10″ in height. In about 1880 Carlleyle excavated round the base of the pillar, which revealed that the pillar continues to a depth of 10 feet below and rests on a stone platform, 7′ 4″ square. The total height of the pillar is thus nearly 50 feet of which about 10′ is rough dressed, concealed under ground, the rest of the pillar being polished. The capital of the pillar is bell-shaped with a circular abacus supporting a life size figure of a lion facing north. The abacus is ornamented with a row of about a dozen Brahmani geese " all walking to left lowered heads as if in procession round the lion above. As compared with other Asokan pillars this pillar is much more slender and elegant in appearance. The pillar is an object of worship as a phallus or lingam.

PART I

CENSUS TABLES, OFFICIAL STATISTICS AND VILLAGE DIRECTORY

NOTE

The Census tables have been published in Parts II to V (with their various sub-parts) of the 1961 Census Publications for Bihar. However, many of the important Census tables are also being reproduced in the District Census Handboks, and some of these give information for units upto the Anchal.

The Census tables are classified into different series according to the nature of information presented in them. These are :

A-Series—General Population Tables ;

B-Series—Economic Tables, comprising :

(i) General Economic Tables, and

(ii) Household Economic Tables ;

C-Series—Social and Cultural Tables ;

D-Series—Migration Tables ;

E-Series—Housing Tables ;

SCT-Series—Special Tables for Scheduled Castes and Scheduled Tribes.

Selected tables from all the above series except D and E are being reproduced in this Handbook. Each series of tables is preceded by a brief explanatory note indicating the contents of the tables and the concepts used.

EXPLANATORY NOTE

A-Series comprises 4 General Population Tables, *viz.*

A-I—Area, houses and population ;

A-II—Variation in population during 60 years ;

A-III—Villages classified by population ; and

A-IV—Towns (and Town-groups) classified by population in 1961 with variation since 1901.

Only Tables A-I (together with Appendices and Annexures) and A-IV (with Appendices) are being reproduced in this Handbook and for the latter, the variation of population has been shown from 1941 instead of from 1901.

The particulars of these tables are given below:

Table A-I—Area, Houses and Population

This table furnishes for each subdivision, anchal, town-group and town, the area (in Sq. miles and Sq. Km.), density (number of persons per Sq. mile), number of occupied residential houses and population classified by sex. It also gives the numbers of villages (inhabited or uninhabited) and towns upto anchals. The terms and concepts used in this table are defined below :

Town

A town includes every municipality, notified area, civil lines or cantonment. Certain other selected places were also treated as towns for the 1961 Census provided that they ordinarily fulfilled the following criteria, *viz.*, (*i*) having a population of not less than 5,000 persons, (*ii*) density of not less than 1,000 persons per sq. mile, and (*iii*) at least 3/4th of the adult male populaiton engaged in non-agricultural activities.

Town-group

If two or more towns are contiguous and so constituted that they form together a compact block, each part having separate civic bodies, the entire area is treated as a town-group. There is howver, one town-group in the district of Champaran.

Village

A village means a revenue *mauza* which is defined as follows :

> " A *mauza* means a parcel of land which, as a rule, is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of cadastral survey or at the time of revenue survey. It may contain no houses at all, or on the other hand, several hamlets each bearing a different name."

House

A house is a structure or part of a structure inhabited or vacant, a dwelling, a shop, a workshop, factory or place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. The term " occupied residential houses " refers only to such houses as are used for dwelling purposes or where any other purpose of use is accompanied by the element of dwelling, *e.g.*, shop-*cum*-dwelling, workshop-*cum*-dwelling, etc.

Appendix I to Table A-I shows the 1951 territorial units constituting the district and indicates the changes in their jurisdiction after the 1951 Census. The details of villages affected in these changes are shown in Annexure II to Appendix I. Since there is no territorial change in the district of Champaran after 1951, Appendix I and Annexure II to Appendix I are not presented.

Annexure I to Appendix I to Table A-I shows the inter-relationship among revenue thanas, police-stations and anchals.

Sub-Appendix to Appendix I to Table A-I shows the areas in 1951 and 1961 of those municipal towns which have under- gone changes in their jurisdiction within the last decade.

Appendix II to Table A-I gives the number of villages with a population 5,000 and above, and of towns with a population under 5,000 upto the level of anchal. It is seen that in Champaran district, only 52 villages have a population of more than 5,000, while only 1 town has a population under 5,000.

List A Shows the places with a population of less than 5,000, treated as towns for the first time in 1961 Census Since there is no such place in the district of Champaran List A is not presented.

List B Shows the places with a population of under 5,000 in 1951 which were treated as towns then, but have been declassified in 1961.

Table A-IV—Towns (and Town-groups) classified by Population in 1961 with variations since 1941

This table traces the growth of town since 1941. The area of each town is given in sq. miles as well as sq. km. The towns are divided into 6 classes according to their population sizes as under :

Class I	..	100,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000—9,999
Class VI	..	Less than 5,000

The class totals have been worked out by considering the population of towns falling in different classes on the basis of their actual population and class in previous censuses. Towns delisted in 1961 have been considered in the class to which they belonged in previous censuses according to their population figures in those years.

One town namely Kesaria Bazar of 1951 was declassified in 1961, the details of which are given in the Appendix to Table A-IV and its Explanatory Note B. No new town was added to the list of towns in 1961.

Special Appendix to Table A-IV, prepared in two parts, gives details of the villages constituting the towns together with their status and boundaries.

TABLE A-I—AREA, HOUSES AND POPULATION

District/Subdivision/ Anchal/Town-group or Town	Total Rural Urban	Area		Population per Sq mile. †	Number of villages		Number of towns	Number of occupied residential houses	Population

NOTES: (1) †The Sq. Km. and density figures of urban areas of Anchal/Subdivision/District are worked out using the area figures corrected up to two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Anchal/Subdivision/District totals tally.

(2) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(3) The following abbreviations have been used for the status of town, *e.g*:

(M)—Municipality (N)—Notified Area

Where no symbol occurs but the place is shown as urban, it means that the place has been treated as town for census purposes.

(4) The rural areas of units smaller than the district do not add up to the total rural area of the district, because the rural areas of units smaller than the district have been computed from Thana Jurisdiction Lists, while the total rural area of the district has been arrived at by subtracting the total urban area of the district as supplied by the District Officer, from the total area of the district as supplied by the State Survey Office.

ANNEXURE I TO APPENDIX I TO TABLE A-I

NOTES : (1) Figures within brackets following each Revenue Thana in column 1 indicate the number of villages in it according to actual counting of entries in the Thana Jurisdiction List.

(2) Villages included wholly within towns have been shown against them. But villages included partly in towns have been exlcuded therefrom and counted entirely in the rural portion.

(3) Figures shown against Anchals include those for urban areas within the Anchals.

(4) (M), (N) or Town has been mentioned against each town according as it is a "Municipality", "Notified Area" or a Town without status.

EXPLANATORY NOTE

I. General Economic Tables

There are 9 Economic Tables (excluding sub-parts) compiled from information collected in the census Individual Slips. Termed collectively as the General Economic Tables, these are :

B-I—Workers and non-workers classified by sex and broad age-groups.

B-II—Workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups.

B-III Part A—Industrial classification of workers and non-workers by educational levels in *urban areas only*.

B-III Part B—Industrial classification of workers and non-workers by educational levels in *rural areas only*.

B-IV Part A—Industrial classification by sex and class of workers of persons at work at household industry.

B-IV Part B—Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service.

B-IV Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.

B-V—Occupational classification by sex of persons at work other than cultivation.

B-VI—Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in *urban areas only*.

B-VII Part A—Persons working principally (i) as cultivators, (ii) as agricultural labourers, or (iii) at household industry classified by sex and by secondary work (i) at household industry, (ii) as cultivator or (iii) as agricultural labourer.

B-VII Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.

B-VIII Part A—persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *urban areas only*.

B-VIII Part B—Persons unemployed aged 15 and above by sex and educational levels in *rural areas only*.

B-IX—Persons not at work classified by sex, broad age-groups and type of activity.

Of these, the following tables have been reproduced in this Hand book :

B-I	..	.. Up to district
B-III Part A	..	.. Up to district
B-III Part B	..	.. Up to Anchals
B-VIII Part A	..	.. Up to district
B-VIII Part B	..	.. Up to Anchals
B-IX	..	.. Up to Anchals

The Economic Classification adopted in 1961 is based on the division of the entire population in two basic groups, namely, workers and non-workers. Workers are persons engaged in the production of goods and/or exchangeable services. The concept of work is not tied to the securing of an income, hence even family workers who do not receive any wages in cash or kind (but supplement the family income by engaging in any kind of productive work) have been treated as workers. On the other hand, persons who have earnings, but do not work (*e.g.*, beggars, rentiers and pensioners) are classed as non-workers. The workers have been further classified into nine industrial categories according to the sector of economic activity in which the persons are engaged. This classification, therefore, is entirely, industrial, and based upon the Indian Standard Industrial Classification Scheme adopted by the Government of India. It may be noted that occupational classification has also been done, the results being given in Tables B-V and B-VI, printed in Part II B(*ii*) of this State which, however, are not reproduced in this volume. The nine industrial categories are :

I Working as Cultivator

II Working as Agricultural labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry.

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

In previous Censuses, the non-working or non-earning section of the population was tagged on to each livelihood class so that the total number of dependants of each livelihood class was easily determinable. In 1961, all non-workers have been pooled together into one category and it is no longer possible to say what is the extent of dependancy among persons, say, engaged in cultivation. However, in accordance with the recommendations of the United Nations, the non-workers

have for the first time in the Indian Census been further classified into the following 8 groups:

1. Full time students,
2. Housewives and persons engaged in unpaid home duties,
3. Infants and other dependants including permanently disabled or old persons,
4. Retired persons, rentiers and others who are in receipt of income without any work,
5. Beggars, vagrants or independant women and others of unspecified source of existence,
6. Convicts in jail, inmates of a penal, mental or charitable institution,
7. Persons not employed before but now seeking employment for the first time, and
8. Persons employed before but now out of employment and seeking work.

The particulars of the tables, being reproduced herein are given below:

Table B-I—Workers and Non-workers classified by Sex and Broad Age-groups

This table gives for each industrial category of workers and also non-workers the classification by sex and broad age-groups, 0-14, 15-34, 35-59 and 60+, besides the rubric" age not stated."

Cultivation involves production of crops like cereals and vegetables on land owned or held on lease. Thus, tenant cultivators are included, but not plantation growers.

An Agricultural labourer is a person who works on another person's land for wages in cash, kind or share without having any right on the land. He has also no right to take a decision as to which crop will be sown and when.

Household industry means an industry, not on the scale of registered factory, conducted by the head of the household himself and/or members of the household at home or within the village in rural areas and only at home in urban areas.

Table B-III Part A—Industrial Classification of Workers and Non-workers by Educational Levels in *Urban Areas only*

Table B-III Part B—Industrial Classification of Workers and Non-workers by Educational Levels in *Rural Areas only*

These tables give the classification of workers and non-workers by sex, literacy and educational levels separately for urban and rural areas. All persons in the age-group 0-4 are, by definition, illiterate. The classification of persons with some educational standard is common upto the stage of Matriculation or Higher Secondary for both rural and urban areas. However, in urban areas, persons with qualifications above Matriculation or Higher Secondary have been further classified into (i) person holding technical diploma not equal to degree, (ii) non-technical diploma not equal to degree, (iii) University degree and (iv) technical degree or diploma equal to degree or post-graduate degree in Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others.

Illiterate means a person who can neither read nor write or can merely read but not write in any language.

Literate means a person who can both read and write a simple letter.

For a literate person who had also passed a written examination or examinations as proof of the educational standard attained, the highest examination was noted in the Individual Slip. This formed the basis for grouping under the different educational levels.

Table B-VIII Part A—Persons Unemployed aged 15 and above by Sex, Broad Age-groups and Educational levels in *Urban Areas only*

Table B-VIII Part B—Persons Unemployed Aged 15 and above by Sex and Educational Levels in *Rural Areas only*

These tables give figures of unemployed persons aged 15 and above by sex and the same educational standards as in Table B-III. The unemployed person given in these tables are those (*i*) seeking employment for the first time and (*ii*) having been employed before, but now out of employment and seeking work. Table B-VIII Part A also shows classification by age-groups.

Table B-IX—Persons not at Work classified by Sex, Broad Age-groups and Type of Activity

This table gives the figures of the non-working population classified by sex and broad age-groups (0-14, 15-34, 35-59 and 60+) into the 8 different categories of non-workers, *viz.*,

1. Full-time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time their own family cultivation, industry, trade, or business.

2. Persons engaged in unpaid home duties (like housewives or other adult females) but doing no other work, such as make articles at home for sale or wages, nor helping regularly even part-time in family cultivation, industry, trade or business.

3. Dependants, including infants or children not attending school, persons permanently disabled from work because of illness or old age.

4. Retired persons not employed again, rentiers persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independant means, for securing which they do not have to work and who do no other work.

5. Beggars, vagrants or independant women without indication of source of income and others of unspecified source of existence.

6. Convicts in jails (undertrial prisoners were treated as workers if they used to work before being apprehended) or inmates of penal, mental or charitable institutions.

7. Persons who had not been employed before but were seeking employment for the first time during enumeration.

8. Persons employed before but now out of employment and seeking work at the time of enumeraiton.

II. Household Economic Tables

The Household Economic Tables have been prepared from the data collected in the Household Schedule canvassed for each and every household in the State. In preparing the tables however, a 20 per cent systematic sample was drawn separately for rural and urban areas. Thus, all the tables in this series are based on a 20 per-cent sample. The tables are :

B-X—Sample Households (i) engaged neither in cultivation nor in household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry for *all areas*.

B-XI—Sample Households engaged in cultivation classified by interest in land and size of land cultivated in rural and urban areas separately.

B-XII—Sample Household engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers in rural and urban areas separately.

B-XIII—Sample Households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in rural and urban areas separately.

B-XIV—Sample Households engaged only in household Industry classified by principal household industry in *all areas*.

B-XV—Sample Households engaged both in cultivation and household industry classified by size of land in rural and urban areas separately.

B-XVI—Sample Principal Household industry classified by period of working and total number of workers engaged in household industry in *all areas*.

B-XVII—Sample Households classified by (i) Number of male and female members by size of households and (ii) Engagement (*a*) neither in cultivation nor in industry, (*b*) in household industry only and (*c*) in cultivation sub-classified by size of land cultivated.

The Household Economic Tables being reproduced in this Handbook are :

Table B-X—Sample Households (i) Engaged neither in Cultivation nor in Household Industry (ii) Engaged either in cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for *all areas*.

This table gives the classification of sample households by the following four types of economic activity :

(i) households engaged neither in cultivation nor in household industry ;

(ii) households engaged in cultivation only ;

(iii) households engaged in household industry only ; and

(iv) households engaged both in cultivation and household industry.

Cultivation involves " ploughing, sowing and harvesting and does not include fruit-growing or keeping orchards or groves or working for plantations like, tea, coffee, rubber, cinchona and other medicinal plantation."

Household Industry means "Industry (not on the scale of registered factory) conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas."

Table B-XI—Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban Areas separately

This table gives the classification of sample cultivating households by the following 10 size-ranges of land cultivated in acres :

Less than 1 ; 1.0 to 2.4 ; 2.5 to 4.9 ; 5.0 to 7.4 ; 7.5 to 9.9 ; 10.0 to 12.4 ; 12.5 to 14.9 ; 15.0 to 29.9 ; 30.0 to 49.9 ; 50 + and ' unspecified.'

The information is cross-tabulated with reference to the following 3 kinds of interest in land :

(i) owned or held from Government ;

(ii) held from private persons or institutions for payment in money, kind or share ; and

(iii) partly held from Government and partly from private persons or institutions for payment in money, kind or share.

Table B-XVII—Sample Households classified by (i) Number of male and female members by Size of Households and (ii) Engagement (*a*) Neither in Cultivation nor in Industry, (*b*) in Household Industry only and (*c*) in Cultivation Sub-classified by size of land Cultivated

This table gives the distribution of sample households by the following size-classes : (i) 1 member (ii) 2-3 members, (iii) 4-6 members, (iv) 7-9 members and (v) 10 members or more. For urban areas the figures are for total sample households. For rural areas, however, the size-class of houshold is cross-tabulated with reference to the economic activity of the household, *viz.*,

(*a*) households engaged neither in cultivation nor in household industry ;

(*b*) households engaged in household industry only; and

(*c*) households engaged in cultivation only.

These are further categorised into 10 size-classes by the extent of holdings.

EXPLANATORY NOTE

The following tables constitute the C-Series :

C-I—Composition of sample households by relationship to head of family classified by size of land cultivated.

C-II—Age and Merital Status.

C-III Part A—Age, Sex and Education in *All Areas*.

C-III Part B—Age, Sex and Education in *Urban Areas only*.

C-III Part C—Age, Sex and Education in *Rural Areas only*.

C-IV—Single year age returns.

C-V—Mother-tongue.

C-VI—Bilingualism.

C-VII—Religion.

C-VIII Part A—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes.

C-VIII Part B—Classification by Literacy and Industrial Category of Wokrers and Non-workers among Scheduled Tribes.

Table C-I has been prepared from the data collected in the Household Schedules on the basis of a 20 per cent sample. The remaining tables of this series have been prepared from information gathered in the Individual Slips.

The tables reproduced in this Handbook are given below, along with the unit upto which they have been furnished :

Table C-I—For district classified by total, rural and urban.

Table C-II—Up to subdivisions, classified by rural and urban.

Table C-III Part B—For district only.

Table C-III Part C—For district only.

Table C-V—Up to Anchals for total only.

Table C-VII—Up to Anchals.

Table C-VIII Part A—Up to Anchals.

Table C-VIII Part B—Up to Anchals.

Relevant particulars of the above tables are given below :

Table C-I—Composition of Sample Households by relationship to head of family classified by size of land cultivated

The table gives separately for total, rural and urban, areas the composition of sample households by heads of households, their spouses, relations (separately for married and heves married, widowed and divorced or separated) and unrelated persons. The information relating to rural areas is cross-tabulated with reference to (*i*) households engaged neither in cultivation nor in household industry, (*ii*) household engaged in household industry only, and (*iii*) households engaged in cultivation, the last named category being further classified by the size of holding into 10 size-classes.

Table C-II—Age and Marital Status

This table gives, separately for rural and urban population, the marital status of males and females for the entire population and also for quinquennial age-groups beginning from 10-14 years. All persons up to 9 years of age have been treated as ' Never Married.'

' *Married* ' implies a living spouse, whether of the first or a subsequent marriage and includes any husband-wife relationship customarily recognized by society as well as *de facto* union.

' *Widowed* ' means married but spouse dead, no remarriage having taken place.

' *Divorced* ' means a person divorced in a lawful manner either by a decree of a law court or by a regular social or religious custom, but not remarried and ' *Separated* ' means a person separated from wife or husband and living a part with no apparent intention of living together again.

' *Age*, means number of completed years on the 1st March 1961, the reference day for the 1961 Census. Infants below one year have 0 year as their age.

Table C-III Part B—Age, Sex and Education in *Urban Areas only*

Table C-III Part C—Age, Sex and Education in *Rural Areas only*

In both the tables, educational standards of the population (classified by sex) are given for all ages and quinquennial age-groups commencing from 5-9 years to 30-34 and broader age-groups thereafter. Those within 0-4 years of age were, by definition, treated as illiterate.

Table C-V—Mother-tongue

This table gives the number of speakers of each mother-tongue returned in the Census. The mother-tongues have been given in alphabetical order and are classified by the Linguist in the office of the Registrar General, India, on the basis of Grierson's Linguistic Survey. They have been marked appropriately to indicate :

(*i*) mother-tongues of countries outside the Indian sub-continent (printed in *italics*) ;

(*ii*) mother-tongues unclassified in the Linguistic Survey of India (with asterisk) ;

(*iii*) mother-tongues though classified in the Linguistic Survey of India, either tentatively reclassified by the Linguist or considered by him to be unclassifiable (with dagger) ; and

(*iv*) mother-tongues unclassified by the Linguistic Survey of India but tentatively classified by the Linguist (with asterisk and dagger).

In ' Nagpuri-Eastern Magahi ', the hyphenated words have been inserted by the linguist to indicate the affiliations, of the mother-tongue 'Nagpuri'

Mother-tongue is the language ' spoken in childhood by the person's mother to the person or mainly spoken in the household.'

Table C-VII—Religion

This table gives figures for the following six main religious groups, arranged in alphabetical order :

(*i*) Buddhists,

(*ii*) Christians,

(*iii*) Hindus,

(*iv*) Jains,

(*v*) Muslims, and

(*vi*) Sikhs.

There is a residuary group of 'other religions and persuasions' as also a group comprising of persons who did not state their religion.

Table C-VIII—Scheduled Castes and Scheduled Tribes, classified by literacy and industrial categories of workers and non-workers

Part A of the table furnishes data for the combined population of all Scheduled Castes and Part B for the combined population of all Scheduled Tribes. -

The population is categorised by sex into (*i*) illiterate, and (*ii*) literate and educated, and also by the nine industrial categories of workers and non-workers.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% sample)

NOTES: (*i*) Mother-tongues printed in *italics* belong to countries outside the Indian sub-continent.
(*ii*) Names occurring after hyphen (-) have been introduced by Linguist to indicate groupings.
(*iii*) Asterisk (*) means that the mother-tongue is unclassified in Linguitic Survey of India.
(*iv*) Dagger (†) denotes that the mother tongue though classified in Linguistic Survey of India is either tentatively re-classified or considered unclassifiable by the Linguist.

EXPLANATORY NOTE

Special table for the Scheduled Castes and Scheduled Tribes, separately for each caste or tribe are an innovation of the 1961 Census. The tables in this series are the following :

SCT-I Part A—Industrial classification of persons at work and non-workers by sex for Scheduled Castes.

SCT-I Part B—Industrial classification of persons at work and non-workers by sex for Scheduled Tribes.

SCT-II Part A—Age and marital status for Scheduled Castes.

SCT-II Part B—Age and marital status for Scheduled Tribes.

SCT-III Part A (i)—Education in urban areas only for Scheduled Castes.

SCT-III Part A (ii)—Education in urban areas only for Scheduled Tribes.

SCT-III Part B (i)—Education in rural areas only for Scheduled Castes.

SCT-III Part B (ii)—Education in rural areas only for Scheduled Tribes.

SCT-IV Part A—Religion for Scheduled Castes.

SCT-IV Part B—Religion for Scheduled Tribes.

SCT-V Part A—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for Scheduled Castes.

SCT-V Part B—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for Scheduled Tribes.

SC-I—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes.

ST-I—Mother-tongue and bilingualism for Scheduled Tribes.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes.

The tables being reproduced in this Handbook and the levels up to which they are reproduced, are indicated below :

SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B)—For the district as a whole.

SC-I—Persons not at work classified by sex, type of activity and educational level for Scheduled Castes—For the district as a whole and rural areas of such Anchals in which the combined Scheduled Caste population is higher than the average Schedule Caste population per Anchal in the district.

ST-I—Mother-tongue and bilingualism for Scheduled Tribes—For the district and selected Anchals in which the combined strength of Scheduled Tribes is higher than the average population of Scheduled Tribes in an Anchal.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes —For the district and selected Anchals in which the Scheduled Tribes population is higher than the average Scheduled Tribes population per Anchal.

The Scheduled Castes and Scheduled Tribes have been notified as such under Notification no. SRO-2477-A, dated the 29th October, 1956, issued by the Government of India, Ministry of Home Affairs in accordance with the provisions contained in Articles 341(1) and 342(1) of the Constitution of India. The list of Scheduled Castes and Scheduled Tribes, thus notified, for the district of Champaran is given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhumij
5. Chamar or Mochi
6. Chaupal
7. Dabgar
8. Dhobi
9. Dom or Dhangad
10. Dusadh, including Dhari or Dharhi
11. Ghasi
12. Halalkhor
13. Hari, Mehtar or Bhangi
14. Kanjar
15. Kurariar
16. Lalbegi
17. Musahar
18. Nat
19. Pan or Sawasi
20. Pasi
21. Rajwar
22. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Binjhia
7. Birhor
8. Birjia

B. Scheduled Tribes—concld.

9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohara or Lohra
22. Mahli
23. Mal Paharia
24. Munda
25. Oraon
26. Parhaiya
27. Santal
28. Sauria Paharia
29. Savar

Table SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B) for the district as a whole

Part A gives the same information for each of the Scheduled Castes as given in Table B-I, *i.e.*, industrial classification of workers and non-workers. However, the data are not classified by broad age-groups. Information is also given of the number of males and females of each caste engaged in the unwholesome occupations of (*i*) tanning and currying of hides and skins, and (*ii*) scavenging.

Part B of this table gives the industrial classification by sex of each Scheduled Tribe into nine categories of workers and non-workers.

Appendix to Table SCT-I—Shows the total population of Scheduled Castes and Scheduled Tribes in each Anchal of Champaran district

Table SC-I—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes

This table gives for the Scheduled Castes as a whole, the classification of non-workers by sex, type of activity and also educational levels. Instead of 8 detailed groups of activities relating to non-workers vide Explanatory Note to General Economic Tables, at page 16, the groups are restricted to four, namely, (*i*) full-time students, (*ii*) persons seeking employment for the first time, (*iii*) persons employed before, but now out of employment and seeking work, and (*iv*) others.

> 'Others' include persons engaged in unpaid home duties (such as housewives), dependants, retired persons, beggars, and inmates of penal and mental institutions.

The classification by educational levels is by illiterate, literate without educational level, primary or junior basic, matriculation or higher secondary, and above matriculation or higher secondary.

Table ST-I—Mother-tongue and bilingualism for Scheduled Tribes

This table gives the extent of prevalence of tribal languages spoken as mother-tongue by each of the Scheduled Tribes and the number of speakers of subsidiary language in each tribe.

Table ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes

This table gives information similar to that in Table SC-I, in respect of the Scheduled Tribes. However, information about the four types of activities of non-workers, though given separately for each Scheduled Tribe, is not, as in the case of Scheduled Castes, classified by educational levels.

TABLE SCT-I PART A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

EXPLANATORY NOTE

Information relating to the nature and number of houses was collected during the period of houselisting in September-October, 1960 in the Houselist Form. The data processed from these lists were compiled under the E-Series tables. Although none of the E-Series tables is reproduced in the Handbook, the information collected in the houslists is given in two tables: (i) Classification of rural population by size-class of villages determined by the numbers of houses in them and (ii) Villagewise industrial data.

Classification of rural population living in villages of various sizes

The villages are classified into seven categories by the size class of number of houses contained in each. These are :

1. 5 and below
2. 6 —15
3. 16—25
4. 26—35
5. 36—50
6. 51—100
7. Above 100

Villagewise Industrial data

This table gives information about the number of industrial establishments in each village. The name of the village is followed by the three-digit code number of the industrial establishment indicating the Division, Major Group and Minor Group of the Indian Standard Industrial Classification. A list of the Divisions, Major Groups and Minor Groups together with their code numbers occurring in the table is reproduced in the Annexure to this Note. Figures within brackets indicate the number of establishments relating to the industry concerned in the village. Data relating to towns have been given separately.

ANNEXURE

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division 2 & 3—Manufacturing	
20	*Foodstuffs*—	
	Production of rice, *atta* flour, etc., by milling, dehusking and processing of crops and foodgrains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, *gur* from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat, and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, *ghee*, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of other food products such as sweetmeat and condiments, *muri*, *murki*, *chira*, *khoi*, cocoa chocolate, toffee, lozenge	209
21	*Beverages*—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of indigenous liquor such as toddy, liquor from *mahua*, palm juice.	212
	Production of aerated and mineral water ..	214
	Production of ice cream	216
22	*Tobacco Products*—	
	Manufacture of *bidi*	220
	Manufacture of *hookah* tobacco ..	223
23	*Textile—Cotton*—	
	Cotton ginning, cleaning, pressing and baling.	230
	Cotton spinning (other than in mills) ..	231
	Cotton dyeing, bleaching	233
	Cotton weaving in handlooms	235
	Manufacturing of *khadi* textile in hand looms.	236
	Printing of cotton textile	237

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division 2 & 3—Manufacturing—*contd.*	
	Textile—cotton—concld.	
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*—	
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
27	*Textile—Miscellaneous*—	
	Manufacture of carpet and all other similar type of textile products.	270
	Making of textile garments including raincoats and headgear.	273
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279
28	*Manufacture of Wood and Wooden Products*—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures.	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products*—	
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board andpulp.	292
30	*Printing and Publishing*—	
	Printing and publishing of books ..	301

ANNEXURE—*concld.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Division 2 & 3—Manufacturing—*contd.*	
30	*Printing and Publishing*—concld.	
	All other types of printing including lithography, engraving, etching, block-making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products*—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of leather products (except those covered by code nos. 311, 312) such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, suddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products*—	
	Manufacture of tyres and tubes ..	320
33	*Chemicals and Chemical Products*—	
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
34 & 35	*Non-metallic Mineral Products other than Petroleum and Coal*—	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of lime	342
	Manufacture of stonewares, other than images.	344
	Manufacture of earthenware and earthen pottery.	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of glass bangles and beads ..	353
	Manufacture of earthen image, busts and statues.	355
36	*Basic Metals and their Products except Machinery and Transport Equipment*—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes rods.	360
36	*Basic Metals and their Products except Machinery and Transport Equipment*—concld.	
	Manufacture of brass and bell metal products.	365
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*—	
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of textile machinery and accessories.	373
	Manufacture of all kinds of battery ..	377
	Manufacture of electronic equipment such as radio, microphone.	378
38	*Transport Equipment*—	
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Repairing and servicing of motor vehicles ..	384
	Repairing of bicycles and tricycles ..	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries*—	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Assembling and repairing of watches and clocks.	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments.	394
	Manufacture and repair work of goods not assignable to any other group.	399

EXPLANATORY NOTE

Besides giving the Census tables, the District Census Handbook of 1951 contained information on vital statistics, rainfall, agriculture, livestock, industries and wholesale prices. The present Handbook seeks not only to continue the tradition but also to enlarge its scope by furnishing official statistics on several other topics. The data contained in the following pages are complementary to the Census tables, and attempt to give a complete statistical picture of the district.

The materials in this section have been obtained from various sources indicated in the tables. They can be broadly divided into eight groups, namely, Vital Statistics, Agricultural Statistics, Livestock, Industry, Administration, Education, Public Health and Communications.

The salient features of the tables under each group are briefly summarised below :

VITAL STATISTICS

Table VS-I—Registered Births and Deaths with mid-year Rates

This table gives for the district as a whole the number of births and deaths registered during the years 1951—1960. The birth and death rates have been calculated both on the 1951 Census and the estimated mid-year population, *i.e.*, the population on the 30th June of each year.

Table VS-II—Deaths and Death Rates due to selected Causes

This table furnishes figures of death by selected causes for 1951—1960. The death rates have been calculated for 1951 on the figures for the Census of that year, and in other cases, on the estimated mid-year population. Data in respect of four causes of death could be had only for 1960 and, therefore, they have been presented separately. in the Supplement to this table.

AGRICULTURAL STATISTICS

Table AS-I—Rainfall

Monthly rainfall data for the years 1951—1960 are presented for the five selected rainfall recording stations at Motihari, Bettiah, Dhaka, Narkatiaganj, and Madhuban. The district average has also been given.

Table AS-II—Highest and Lowest Temperatures

This is a table on temperature. The mean maximum, highest, mean minimum and lowest temperatures recorded at Motihari during all the twelve months of the decade 1951—1960 have been given.

Table AS-III—Land Utilisation and Area under different crops

This table presents land utilisation statistics for the district as a whole. The figures relate to the six Census years beginning from 1911. The manner in which the figures have been worked out is indicated in a note appended to the table.

The terms and concepts used in the table are defined below :

Geographical area : It represents the total land area of the district. The 1951 and 1961 area figures tally with the areas worked out by the Bihar Survey. In other cases there are slight differences which may be due to computational errors.

Forests : All actually forested areas on the land classed or administered as forest under any legal enactment dealing with forests, whether State-owned or private.

Barren and unculturable land : All barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation unless at a high cost is classed unculturable, whether such land is in isolated blocks, or within cultivated holdings.

Land put to non-agricultural use : All lands occupied by buildings, roads and railways or under water, *e.g.*, rivers and canals and other lands put to uses other than agricultural.

Culturable waste : All lands available for cultivation whether not taken up for cultivation or abandoned after five years for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Permanent pastures and other grazing lands : All grazing lands, whether they are permanent pastures and meadows or not. Village common and grazing lands within forested areas are included under this head.

Miscellaneous tree crops and groves : All cultivable lands, which are not included under net area sown, but are put to some agricultural use. Lands under casuarina trees, thatching grass, bamboo bushes and other groves for fuel, etc., which are not included under 'orchards' are classed under this category.

Other fallow land : All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

Current fallows : Lands which are left fallow during the current year only.

Net area sown : The net area sown represents the area sown to crops, counting areas sown more than once in the same year only once.

Cultivated area : The sum of net areas sown and area under current fallows gives the cultivated area.

Section B of the table furnishes details of the area covered by different crops. The total area sown under all crops is in fact the gross cropped area, which term means "the sum of areas under all crops and represents the sum of net sown area and area sown more than once in the year."

The cropped area is divided into three main groups, *viz.*, under food crops, non-food crops and miscellaneous crops. The food crops have been further subdivided into basic food crops and other food crops. The former includes rice, wheat, pulses, fruit and vegetables, and the latter, sugarcane, condiments, and other food crops. Non-food crops have also been likewise subdivided into oilseeds, fibres (which term includes cotton, jute and

other fibres) and tobacco. Miscellaneous crops cover fodder and other non-food crops.

Table AS-IV—Gross Area irrigated by crops

This table gives the gross cropped and irrigated area for the district as a whole. The break-up of the irrigated area by crops (food and non-food) has also been indicated.

Table AS-V—Gross Area irrigated by sources

This table shows the gross area irrigated in the district by different sources for the six Census years beginning from 1911.

Table AS-VI—Yield rates of principal crops

This table furnishes the average yield in maunds per acre in respect of the principal crops of the district for the period 1951-52 to 1959-60.

Table AS-VII—Statistics of skilled and unskilled Agricultural Labourers

This table indicates the average daily wages paid to skilled and unskilled agricultural labourers during the *rabi* and *kharif* seasons.

Skilled labourers include carpenters, blacksmiths and mochis (cobblers). Among the unskilled are the field labourers, herdsmen and other agricultural labourers Separate figures have been given for men, women and children so far as the unskilled labourers are concerned.

Table AS-VIII—Monthly ruling wholesale prices of staple foodgrains

The wholesale price of staple foodgrains, namely, rice (medium), wheat (red), and gram for all the twelve months during the year 1952-60 are presented in this table for the district. Figures for the year 1951 could not be had.

Subsidiary Tables

Seven subsidiary tables have been prepared. They are all subsidiary to Table AS-III.

Subsidiary Table AS-III.1—Land Utilisation :—It gives the break up of 1,000 acres of the land area in the district by area under forests, etc., and total cultivable area. The net area sown per 1,000 acres of the land area has also been indicated. The distribution of every 1,000 acres of the total cultivable area in the district by the net area sown and area of fallow and other uncultivated land has also been given. The proportion of the cultivable area, net area sown, net area irrigated, etc., in the district to every 1,000 acres in the State has also been worked out to facilitate comparative study.

Subsidiary Table AS-III.2—Progress of Cultivation during the last three decades—This table traces the progress of cultivation since 1931 in terms of area under foodgrains and other crops, net area sown and area sown more than once.

Subsidiary Table AS-III.3—Components of Land Area Cultivable and Cultivated Area per 100 *persons during the last three decades*—It shows the incidence of land area, area cultivable, net area sown, etc., per 100 persons in the district. The figures relate to the last three decades.

Subsidiary Table AS-III.4—Cropping Pattern—The table indicates the cropping pattern as in 1951 and 1961. The crops have been grouped under two heads, namely, food and non-food. The area covered by different crops per 1,000 acres of the gross area sown in the district as also their proportion to every 1,000 acres in the State as a whole, has been shown.

Subsidiary Table AS-III.5—Density of Total Rural Population per 100 *acres of area under Foodgrains and net area sown*—This table furnishes the density of total and rural population per 100 acres of area under food-grains, other crops, net area sown and area sown more than once for the last three decades.

Subsidiary Table AS-III.6—Density of Cultivators and Agricultural labourers per 100 *acres of net area sown in* 1951 *and* 1961—This table gives the density of cultivators and agricultural labourers per 100 acres of net area sown in 1951 and 1961. Separate figures have been furnished for the total and rural population.

Subsidiary Table AS-III.7—Rainfall, Area Sown and Irrigated, density, etc.—The table furnishes data on rainfall and gross area sown and irrigated (by different crops) together with yield rates. The density per 1,000 acres of the cropped area and the area under foodgrains has also been given.

LIVESTOCK

Table LVT-I—Government Veterinary Facilities

Veterinary facilities existing in the district during the years 1951-52 to 1960-61 are indicated in this table. The number of hospitals, dispensaries and veterinary doctors has been given year by year.

Table LVT-II—Livestock and Poultry

This table presents the population of livestock and poultry for eight livestock censuses beginning from 1920. The variation in the numbers from census to census has also been indicated. Figures preceded by a plus (+) sign denote increase and those by minus (—) sign indicate decrease from previous figures.

Livestock means all domesticated animals of economic importance and includes cattle, buffaloes, sheep, goats and pigs.

Poultry means domestic avian such as fowls and ducks.

INDUSTRIES

Table IND-I—Employment in Textile and Non-textile Industries (as on 31st December, 1960)

The number of industrial establishments in the district with daily average employment in each has been furnished in this table. The industries have been divided into two broad groups—textile and non-textile. While the former category has no industry, the latter embraces 14 industries detailed in the table. The rural and urban break-up of the industrial establishments has also been given.

Table IND-II—Name of Industry with number of Households and persons employed in Rural Areas only (as in September-October 1960)

This table furnishes anchalwise industrial data for all the rural areas of the district. These have been extracted from the Houselists prepared during September-October, 1960, as a preliminary step to the 1961 Census. Here also the industrial establishments have been grouped into two broad divisions—textile and non-textile. The textile

establishments include weaving and spinning. Non-textile establishments cover leather works, black smithy, carpentry, earthenware making, goldsmithy, laundry, tailoring, bamboo products making, bidi making, manufacture of oil, preparation of sweets, etc. The number of villages where the particular type of industrial establishment is found along with the number of households and number of persons engaged in it has been indicated anchalwise.

The industries which are not common in many of the anchals have been shown in the Supplement to this table to save space.

ADMINISTRATION

Table ADM-I—General results of trial of Criminal Cases

General results of trial of criminal cases in the district for the period 1951—60 have been shown in this table. Section A gives the manner of disposal of criminal cases in terms of persons affected in the lower courts while section B deals with the results of appeals and revisions.

Table ADM-II—Punishments inflicted in Criminal Cases

This table gives for the district data on punishments inflicted in criminal cases during the period 1951—60.

Table ADM-III—Strength of Police

The strength of Police force in the district during the years 1951—60 has been shown in this table for every category of policemen.

Table ADM-IV—Places of confinement and distribution of convicts by Age-groups and Literacy

This table gives the average daily number of prisoners in the district jail of Motihari and other sub-jails. The number of convicts and their distribution by age-groups and literacy has also been indicated. The figures relate to the years 1951—60. M. and F. in column 5 and 6 onwards represent males and females respectively.

Table ADM-V—Co-operative Societies

The data regarding Co-operative Societies are presented in this table for the years 1950-51 to 1959-60. The Societies have been grouped into four broad categories, namely, Primary Agricultural Societies, Non-agricultural Societies, Provincial and Central Credit Societies, and Central Co operative Banks and Unions. The first two have been further subdivided into Non-credit and Credit Societies. For each type of Co-operative Society information is given about the number of societies, number of members, working capital (in rupees) and profit or loss (in rupees). Figures preceded by plus (+) sign denote profit and those by minus (—) sign indicate loss.

Table ADM-VI—Receipts of Excise, Revenue, Sales Tax, Entertainment Tax, Motor-Spirit Tax, Stamps, etc.

This table gives for the district details of collections made under various heads such as excise, salestax, entertainment-tax, motor spirit tax etc. during the years 1951-52 to 1960-61. Figures for registration fee relate to the calendar years 1951—60.

Table ADM-VII—Land Revenue/Rent

Figures relating to the demand and collection of land revenue/rent for the district along with the percentage of collection to the demand have been given in this table. The State Government started taking over the zamindari interests under the Bihar Land Reforms Act, 1950 in 1954-55. Prior to this the zamindars paid land revenue to Government and the Raiyats generally paid rent to the zamindars. The demand and collection for the years 1952-53 and 1953-54 given in a note to the table relate to land revenue. The collection of rent by Government started in 1954-55 consequent upon the vesting of the zamindari interests in the State.

Table ADM-VIII—Number of registered documents and value of properties transferred

Registration statistics are presented in this table for the decade 1951-60. The number of instruments registered and the value of property transferred are given in this table along with gross receipt and expenditure for the district as a whole.

Table ADM-IX—Sale and discharge under Small Savings Scheme

This table furnishes data relating to the sale and discharge of certificates under the Small Savings Schemes. Figures have been given separately for the Treasury Savings Deposit, Post Office Savings Bank, 15-Year Annuity Certificate and National Plan Savings Certificate for the period, 1951-52 to 1960-61.

Table ADM-X—List of Banks

It contains a list of Banks in the district. Column 1 gives the names of places where banking facilities exist, while column 2 indicates the names of Banks.

Table ADM-XI—Progress of Life Insurance

This table traces the progress of Life Insurance in the district from the year 1957 onward.

Table ADM-XII—Number of Motor Vehicles

The number of motor vehicles in the district during the period 1950-51 to 1960-61 is shown in this table. Separate figures have been given for different types of automobiles. State figures have also been given to facilitate comparison.

EDUCATION

Table EDN-I—Educational Institutions and Pupils

This table gives the number of various types of educational institutions with pupils therein. Column 10 of the table shows the population in the relevant age-group the pupils of which generally receive schooling in the institutions noted against it in column 1. Column 7 furnishes figures of enrolment in 1960-61. The percentage of the pupils enrolled to the total population in the relevant age group has been given in column 13. Since enrolment in schools for professional and special education is open to pupils belonging to a very wide age group no figures similar to column 8 onwards have been furnished for such institutions.

Table EDN-II—List of Educational Institutions

The table gives a list of middle and higher educational institutions. Column 1 shows the type of institution and column 2 the location in alphabetical order. Where two or more educational institutions exist, the names of such institutions have been indicated within brackets immediately after the name of the locality.

Table EDN-III—Press and Journals

This table shows the number of printing presses in the district, and the publications brought out by them during the period 1951-52 to 1960-61.

Table EDN-IV—List of Cinema Houses

It gives a list of cinema houses in the district.

PUBLIC HEALTH

Table PH-I—Medical Facilities

This is a table on medical facilities. Part A of the table gives the number of degree or diplom holding medical practitioners registered in the district at each year 1951—60. Part B indicates the number of hospitals and dispensaries. Part C is a list of other health institutions, *viz.*, Family Planning Centres, Leprosy Centre, Maternity and Child Welfare Centres and T. B. Centre' Clinics.

COMMUNICATIONS

Table CMN-I—Mileage of extra municipal roads mainined by Public Authorities

The mileage of various types of roads in the district maintained by the Public Works Department and the Local Bodies other than municipalities is indicated in this table.

Table CMN-II—List of Inspection/Dak Bungalows

This is a list of Inspection/Dak Bungalows with details of amenities existing in each.

Table CMN-III—Polymetric Table of distances (in miles)

This is a polymetric table of distances in miles. The district, subdivisional and anchal headquarters, numbering 36, find place in the table. Each place is connected with the remaining ones by a vertical line. The road distance between any two places on the table can be read along the vertical line connecting the two places. Rail distances are given within brackets for places connected by rail as well.

VITAL STATISTICS

TABLE VS-I—REGISTERED BIRTHS AND DEATHS WITH MID-YEAR RATES

Births and Deaths	1951-60	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960

TABLE AS-III.1—LAND UTILISATION

(*Subsidiary Table* I)

(*Area in acres*)

Serial no.	Classification of land	Year 1961	Year 1951
1	2	3	4
1	Total land area according to the Surveyor-General	2,274,112	2,271,928
2	Total area for which village papers are available	2,259,840	2,256,000
3	Per 1,000 acres of the land area in the district		
	(i) Area under forests or otherwise not available for cultivation	194	155
	(ii) Total cultivable area ..	806	845
	(iii) Net area sown ..	654	681
4	Per 1,000 acres of total cultivable area in the district		
	(i) Net area sown ..	812	806
	(ii) Area under fallow lands ..	106	86
	(iii) Area under other uncultivated land excluding fallow land	82	108
5	Proportion per 1,000 acres of the State		
	(i) Total cultivable area ..	65	64
	(ii) Net area sown ..	77	76
	(iii) Net area irrigated ..	N A	N A
	(iv) Area sown more than once ..	58	63
	(v) Area irrigated more than once	N A	N A

NOTE : Figures for the Census year 1951 give the average of five crop years with the Census year 1951 as the mid-year. The 1961 data are the average of the five crop years including and preceding 1960-61.

N A—Not available

SOURCE : Directorate of Statistics, Bihar.

TABLE AS-III.2—PROGRESS OF CULTIVATION DURING THE LAST THREE DECADES

(*Subsidiary Table* II)

(*Area in acres*)

Particulars	1961	1951	1941	1931
1	2	3	4	5
Area under foodgrains	1,575,472	1,635,636	1,685,160	1,704,500
Area under crops other than food-grains	288,656	247,681	337,940	262,960
Net area sown ..	1,479,002	1,536,494	1,422,500	1,366,660
Area sown more than once	382,043	339,111	600,500	600,700

NOTES : (1) Figures for the Census year 1931 to 1951 give the average of five crop-years with the relevant Census year as the mid-year in every case. The 1961 data are the average of the five crop years including and preceding 1961.

(2) Figures relating to the net irrigated area and area irrigated more than once are not available.

SOURCE : Directorate of Statistics, Bihar.

TABLE AS-III.3—COMPONENTS OF LAND AREA, CULTIVABLE AND CULTIVATED AREA PER HUNDRED PERSONS DURING THE LAST THREE DECADES

(*Subsidiary Table III*)

(*Area in acres*)

Particulars	1961	1951	1941	1931
1	2	3	4	5
Land area ..	75	90	94	105
Area cultivable ..	61	76	77	87
Net area sown ..	49	61	59	64
Net irrigated area ..	N A	N A	N A	N A
Area sown more than once ..	13	13	25	28
Area irrigated more than once	N A	N A	N A	N A
Area under foodgrains ..	52	65	70	79
Area under crops other than foodgrains	10	10	14	12

Land area—Total Geographical area according to the Surveyor General, India

Area cultivable—Includes (i) Net area sown, (ii) current fallows, (iii) Cultivable wastes, (iv) Fallows other than current, (v) Pastures and grazing land, (vi) Miscellaneous tree crops and groves not, included under net area sown.

Net area sown—Represents the area sown, counting area sown more than once, in the same year, only once.

Net irrigated area—Represents the area irrigated from different sources, counting area irrigated more than once in the same year, only once.

Area irrigated more than once—Represents area which receive irrigation more than once in raising the same crop again or other crops in the same year.

NOTE: Figures for the Census year 1931-51 give the average of five crop years with the relevant Census year as the mid-year in every case. The 1961 data are the average of the five crop years including and preceding 1961.

N A—Not available.

CMN III

POLYMETRIC TABLE OF DISTANCES

(IN MILES)

(FIGURES WITHIN BRACKETS INDICATE RAIL DISTANCES)

NOTE:— THE DISTANCE BETWEEN ANY TWO PLACES IS INDICATED AT THE INTERSECTION OF THE VERTICAL AND HORIZONTAL LINES CONNECTING THEM.

EXPLANATORY NOTE

The Village Directory is primarily an Anchalwise list of villages arranged in alphabetical order. While serving this purpose, it also gives certain information about gross cropped and gross irrigated areas (cols. 5 and 6), irrigation facilities (cols. 7—11), drining water-supply (cols. 12—14) and availability of transport (cols. 15 and 16) for each village. The 1951 Census population of each village has also been shown in col. 4 for comparative purposes. All such informations should have been actually gone into the Village Statistics portion (*see* Part II), but this could not be done for want of space. However, the Village Directory read with the Village Statistics should give detailed information for each and every village. Cols. 2 and 3 of the Village Directory give the cross reference to the Village Statistics.

The data relating to irrigation facilities, drinking water-supply and transport have been compiled from the Village Note prepared for every village at the time of the Houselisting (September-October 1960) for the 1961 Census. The gross cropped and irrigated areas noted in cols. 5 and 6 respectively have been obtained from the District Statistical Officer, Champaran.

The term '*mauza*' (col. 1) has the same meaning as a 'Revenue village' (*see* page 2 of Part II).

The different abbreviations used in this Table are explained below :

Cols. 7 *to* 14 :

B—Bandh (including *Ahar, Pyne, and Nala*)
C—Canal
K—*Kacha* well
Ors.—Others, such as river, water-fall, etc.
P—*Pakka* well
Riv—River
T—Tank (including *Garha*)
Tw—Tube-well
W—Well

Cols. 15 *and* 16 :

B—Bullock-cart
C—Cycle

Figures under cols. 7, 9, 10, 12, 13, 15 and 16 indicate numbers, while figures under col. 8 give the distances in miles. The figures preceding the abbreviations in cols. 1 and 14 denote the numbers relating to them N A means not available and U denotes Uninhabited.

PART II

VILLAGE AND TOWN STATISTICS

EXPLANATORY NOTE

VILLAGE STATISTICS

Village statistics containing a reproduction of the Primary Census Abstract were presented for the first time in 1951 in Part II of the District Census Handbooks. This innovation has been followed in 1961 with certain improvements. The main object of this table is to furnish for every village certain basic data such as area, number of occupied residential houses and households, general population as well as population of Scheduled Castes and Scheduled Tribes, literate and educated persons, and workers and non-workers classified into various industrial categories separately for each sex.

Definitions

Village : The term "village" has the same meaning as a revenue *mauza*. A *mauza* means "a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which are defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all, or on the other hand, several hamlets each bearing a different name".

House : A "house" means a "structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, factory, a place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance".

"Occupied residential house" refers only to such houses as are used for dwelling purposes either wholly or in part.

Household : A "household" means "a group of persons who commonly live together in the same house and take their meal from a common mess unless the exigencies of work prevent them from doing so".

Workers : Workers are those who are engaged in some kind of economic activity. They have been classified into the following nine industrial categories :

I Cultivator.

II Agricultural labourer.

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

IV Household Industry.

V Manufacturing other than Household Industry.

VI Construction.

VII Trade and Commerce.

VIII Transport, Storage and Communications.

IX Other Services.

Non-Worker : A person who is not working is a non-worker. The following is the list of non-workers of different kinds :

(1) Full time students or children doing no other work, such as make articles at home for sale nor even help part-time in their own family cultivation, industry, trade or business;

(2) Housewives or such other persons engaged in unpaid home duties, doing no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business;

(3) Dependants such as infants or children not attending school, persons permanently disabled from work because of illness or old age;

(4) Retired persons (not employed again), rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work;

(5) Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence;

(6) Convicts in jail (undertrial prisoners were treated as workers if they used to work before being apprehended), inmates of a penal, mental or charitable institution;

(7) Persons not employed before but now seeking employment for the first time; and

(8) Persons employed before but now out of employment and seeking work.

Column Headings

Col. 1 [*Serial no.* (*Thana no.*)] : The figure within brackets immediately after the serial number under this column is intended to indicate the revenue thana number of the village. The names of Revenue Thanas have been shown in bold capital letters above the village names in column 2.

Col. 2 (*Name of village*) : Within an Anchal, villages have been arranged according to the Gram Panchayat (where constituted at the time of census arrangements for 1961) to which they belong; or according to their thana numbers in blocks of 5, where no Gram Panchayat was then constituted.

If the Gram Panchayat bears the name of one of its constituent villages, it has been indicated by printing the name of such village in *italics*. Where this is not so, the name of the Gram Panchayat has been printed in *italics* at the head of its constituent villages.

It may be noted here that at the time of preliminary arrangements for 1961 Census, the jurisdictions of many Gram Panchayats were not finally settled. Some were in the process of proposed changes. Great difficulty was also experienced in obtaining a complete and authentic list of Gram Panchayats with the names of their constituent villages. Efforts were no doubt made to verify the lists with those maintained in the District Gram Panchayat Offices. But it is possible that in some cases the jurisdiction as indicated herein is not in strict conformity with the actual position. However, this is the first time that such information is being made available in print and few discrepancies here and there may be excused.

Several symbols and abbreviations have been used under this column to the left or right of the village names. These indicate various kinds of amenities found in the village. For full explanation of these, a reference may be made to the relevant section below.

Col. 3 (*Area in acres*): Village areas have been reproduced from the Thana Jurisdiction Lists. The Anchal area is the arithmetical total of village areas.

Cols. 6 *to* 36: In these column headings, P stands for Persons, M for Males, and F for Females.

Dots under columns 9 to 36 indicate 'nil' figures.

Sources of Information

Information about village amenities other than post offices and post and telegraph offices have been compiled from the Village Notes prepared by the census agency at the time of houselisting, which operation was conducted in September-October, 1960. Locations of post offices and post and telegraph offices have been shown on the basis of the information obtained from the office of the Post Master General, Bihar Circle.

Figures relating to occupied residential houses and households (columns 4 and 5) have been obtained from the Household Schedules filled in at the time of census enumeration between the 10th February and 5th March, 1961.

All other data have been processed from the Individual Slips, which were prepared separately for each individual at the time of enumeration.

Symbols and Abbreviations

The various symbols and abbreviations used under column 2 of the table relate to the existence of certain amenities in the villages concerned. Their significance is explained below:

Symbols

+—Post Office.

†—Post and Telegraph Office.

‡—Electrified village.

*—Rest House, Inspection Bungalow, Dak Bungalow, etc.

Abbreviations

A—Allopathic medical practitioner.

B—Senior Basic School.

C—Community Building.

Cc—Cane-growers' Co-operative Society.

G. P.—Gram Panchayat.

H—Homeopath.

h—High School.

Hos—Hospital/Dispensary.

Ic—Industrial Co-operative Society.

K—Makhtab.

L—Public Library.

M—Middle School.

m—Madersa.

Mc—Multipurpose Co-operative Society.

Oc—Other Co-operative Societies.

P—Primary School.

Rhc—Rural Health Centre.

Rvc—Rural Vaccination Centre.

S—Sanskrit Pathshala.

T. no.—Thana number.

U—Unani Hakim.

V—Vaidya.

Where the amenities existing in the village exceeded one, their number has been given immediately after the abbreviation.

EXPLANATORY NOTE

TOWN STATISTICS

Town Statistics give the same data as Village Statistics, but for urban areas.

According to the definition adopted for the 1961 Census a town included "(*i*) every municipality or notified area ; (*ii*) all civil lines not included within municipal limits; (*iii*) every cantonment; and (*iv*) such other places which have (*a*) a population of not less than 5,000, (*b*) density not less than 1,000 persons per square mile, (*c*) at least 3/4th of the adult male population engaged in non-agricultural livelihood, and (*d*) which have been declared to be a town for census purposes by the Superintendent of Census Operations because of the historical or administrative importance of the place, or such other factor."

As areas of individual wards were not available, only the town areas have been given.

Other concepts and explanations are the same as in the case of Village Statistics.
