A—SERIES TABLES

TABLE A-I—AREA, HOUSES AND POPULATION

Fly-leaf

1. Introduction

This basic table presents the relative strengths of different territorial units of Calcutta in terms of Area, Population and Census-houses. Here Calcutta has been defined in terms of the Calcutta Municipal Act of 1953 (Section 102) together with the area under command of the Fort William and Port. Thus Calcutta contains a total area of 39.75 Sq. miles or 103.00 Sq. Km. of which 36.92 Sq. miles or 95.62 Sq. Km. is under the jurisdiction of the Calcutta Municipal Corporation. Since 1951 Calcutta has increased in size by 6.6 Sq. miles or 17.1 Sq. Km. by virtue of the Calcutta Municipal (Amendment) Act of 1953 through the annexation of the Tollygunge Municipality from the District of 24-Parganas.

2. Territorial Subdivision of Calcutta for the Census —1961

For the purpose of 1961 Census enumeration, Calcutta was subdivided into 84 charges, of which Nos. 1—80 coincided with the 80 municipal wards. Therefore Census Charges Nos. 1—80 only could be located on maps and territorial subdivision thereof could be attempted. The charges Nos. 81, 82, 84 and 85 represent, on the other hand the fort, canals, port—sea going vessels and inland vessels respectively.

The 80 municipal wards were further subdivided into several circles (619 in number excluding the special areas) and each circle into several 'blocks'. The Census enumeration blocks were made to include approximately 120 households or about 600 persons. By virtue of such definition the demarcation of geographical boundaries of the Census-blocks has not been attempted. The boundary definitions of the wards and circles have been given in Appendix I.

The computation of the area in acres of the Census-circles were made by the Geography Section of the Calcutta Metropolitan Planning Organisation and that for the wards by the Calcutta Municipal Corporation. Conversion of these acreage figures into Sq. miles/Sq. Kms., when deemed necessary, has been done in the Census Office. Therefore, the discrepancies between the summation of the area of the relevant Census-circles and that of the wards or of the entire city are essentially errors of approximation. The area sizes of the Censns territorial units have been shown in columns 2(a) and 2(b).

It may be seen that the Ward or Charge No. 75 is the largest areal unit (2,280 acres) and the Wards 23 and 27 are the smallest units (53 acres). Similarly the largest Census-circle is located in Ward 54 having an area of 440.7 acres, while the smallest one is located in Ward No. 13 having an area of 3.8 acres.

3. Density of Residential Population

Total number of persons, together with their break down into male and female sexes for each of the Census territorial units have been shown in Cols. 5, 6 and 7 respectively. It may be seen that the largest ward in population strength is No. 75 (82,892 persons) located in the Dock area, while the smallest is No. 38 (6,537 persons) located in the 'Central Business District'.

The density of population has been derived by computation of the figures in Col. 5 against those in Col. 2(a). For wards density in terms of both population per Sq. mile and acre has been given while for circles it has been shown as population per acre only. The highest density is seen in Ward No. 25 (509,150 souls per Sq. mile) and the lowest density in Ward No. 54 (8,317 persons per Sq. mile).

4. Occupied Residential Houses

For the purpose of 1961 Census the term 'Census-house' was defined as follows :

"A census house is a structure or part of a structure inhabited or vacant or dwelling, a shop-*cum*-dwelling or a place of business, workshop, school etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house."

Occupied residential house meant the same thing as an occupied Census-house. All Census-houses used wholly or partly as dwellings, including a parlour or sitting-room, a kitchen, a latrine which were located in structures auxiliary to the main house were counted as occupied Census-houses, but cow-sheds, grain golas etc., though auxiliary to the main house, were excluded. The total number of occupied Census-houses in each Enumeration block was recorded by the Enumerator in his Household Schedule Abstract which was later

totalled in Tabulation Offices and entered in the Primary Census Abstract and A-I Table.

The number of occupied residential houses, it should be noted carefully, does not necessarily represent the number of occupied buildings in area used for that purpose.

5. Deviation from Union Table A-I

In the Union Table A-I, (Part II-A, General Population Tables) informations on houseless and institutional population have been furnished in an Appendix to Table A-I. In this volume these informations have been given in additional column numbers 8—11, for all the territorial units of Calcutta. The maximum houseless population were found (924) in Ward No. 23. The maximum persons living in institutions in a particular ward are 13,880 found in Ward No. 52. For the purposes of all other census tables (including Cols. 5, 6 and 7 of this Table A-I) this population has been included in the total population.

The term houseless population relates to persons who live in the open and not in any dwelling houses. The definition of houseless population was the same as in 1951.

Census of houseless population was conducted throughout the City on the night of 28th February, 1961. Each Census enumerator was required to go round his block during a specific period on the night of the 28th February, 1961 and take census of the persons living in open.

Institutional population relates to population enumerated in institutions like a penal, charitable or mental institution, hostel, hotel, hospital, boarding house etc., and institutions, therefore, meant an establishment where persons not related to one another lived.

NOTE: The area and population figures of Calcutta (Municipal Area) include the area and population of the Port land area falling within different wards of the Corporation. 2,804 acres of Port land area are included in the wards of Calcutta Corporation. 986 acres or 1.54 Sq. miles of River Hooghly representing Calcutta's share of the river are shown against Special Charges 84 and 85.

†The land area appertaining to these three Special Charges was amalgamated with the wards of which they formed part or with the contiguous wards. Figures under these charges, therefore, relate only to the population on boardships or on boats. As ships and boats were not treated as buildings or Census-houses there are no figures under head 'Occupied Residential Houses' for these charges.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

Fly-leaf

1. *Introduction*

This table shows the inter-censal variation of population of Calcutta since 1901. For the convenience of comparison the population figures of census-decades from 1901 to 1951 have been adjusted in terms of the territorial definition of Calcutta during 1961 Census (see Table A-I).

The inter-censal variation of population shows more or less a rising rate of growth upto 1941. Since then Calcutta is experiencing a falling rate of growth. It may be mentioned that this rate of growth of population of Calcutta has been inversely associated with the ratio of females per 1,000 males in the successive census decades, that is to say a rising rate of growth of population has coincided with a falling ratio of females and *vice versa.*

Year	Percentage decade verification	Females per 1,000 males
1901	. .	518
1911	8.86	492
1921	3.63	487
1931	10.63	468
1941	86.00	456
1951	24.50	580
1961	8.48	612

2. *Changes in the definition of the census-territory of Calcutta since 1901*

(a) Cossipur-Chitpur was a separate town in 1901, 1911 and 1921 with a population of P. 40,750 (M. 26,189, F. 14,561), P. 48,178 (M. 30,793, F.17,385) and P. 56,474 (M. 36,289, F. 20,185) in the respective Census years. In 1931 this town was merged in Calcutta. The 1901, 1911 and 1921 population figures of Calcutta shown in this table include the figures for Cossipur-Chitpur.

(b) Maniktala was a separate town in 1901, 1911 and 1921 with a population of P. 32,387 (M. 19,142, F. 13,245), P. 53,767 (M. 31,735, F. 22,032) and P. 67,372 (M. 40,996, F. 26,376) in the respective Census years. In 1931, this town was merged in Calcutta. The 1901, 1911 and 1921 population figures of Calcutta shown in this table include the figures for Maniktala.

(c) In 1931 Garden Reach having a population of P. 55,872 (M. 36,131, F. 19,741) was include in Calcutta. In 1941 it again became a separate municipal town. The 1931 population figures for Calcutta, therefore, does not include the figures for Garden Reach.

(d) Tollygunge was a separate town in 1901, 1911, 1921, 1931, 1941 and 1951 with a population of P. 12,821 (M. 7,222, F. 5,599), P. 18,433 (M. 11,183, F. 7,250), P. 21,637 (M. 13,326, F. 8,311), P. 24,476 (M. 14,800, F. 9,676), P. 58,594 (M. 36,498, F. 22,096) and P. 149,817 (M. 84,178, F. 65,639) in the respective Census years. In 1961 this town was merged in Calcutta. The 1901-1951 population figures of Calcutta shown in this table include the figures for Tollygunge.

PRIMARY CENSUS ABSTRCT

Fly-leaf

This is the most important of all the Census tables to those, who want to examine the data in terms of smallest territorial units. Here as in Table A-I, areal units recognised are Calcutta, Calcutta under the Municipal Corporation, wards and circles. The area of each territorial unit, with the exception of the circles, has been computed in Sq. miles.

The categories of information presented are the number of occupied houses and households, total number of enumerated persons, of Scheduled Castes, Scheduled Tribes, literate and educated persons and the number of workers. For each category of information on population, the incidence of either sex has been shown separately wherever relevant.

The total workers, both male and female, have been further classified into nine broad industrial categories. The incidence of total non-workers, both male and female, has also been shown at the end. The definition of worker and the industrial classification of workers may be seen in Appendices II and III.

No attempt has been made to present any information on the relative strength of the individual tracts in terms of any specific item of the information-spectrum mentioned above.

*The Area and Population figures of Calcutta (Municipal Area) include the area and population of the Port land area falling within different wards of the Corporation. 2,804 acres of Port land area are included in the wards of Calcutta Corporation. 986 acres or 1·54 Sq. miles of River Hooghly representing Calcutta's share of the river are shown against Special Charges 84 and 85.

†The land area appertaining to these three Special Charges was amalgamated with the wards of which they formed part or with the contiguous wards. Figures under these Charges, therefore, relate only to the population on board ships or on boats. As ships and boats were not treated as buildings or Census-houses there are no figures under head "Occupied Residential Houses" for these Charges.

B—SERIES TABLES

TABLE B-I AND B-II—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

Fly-leaf

1. Introduction

This is the basic economic table of 1961 Census. It gives the primary economic classification of the population for each of the administrative division *i.e.,* 80 different wards and 4 additional Census charges. In this respect this table is similar to the preceding table—Primary Census Abstract, which presents data up to the level of Census circles.

The entire population consists of two main sectors—workers and non-workers. A worker is a person who participates in the production of economic goods or services either for consumption or for sale or exchange. Apart from actual work, participation includes effective supervision and direction of work. A person's principal work has been taken into consideration for the purpose of the preparation of this table.

Workers have been further classified into nine broad industrial categories according to the sectors of economy in which they are engaged. The nine industrial categories of workers are those engaged :

I—As Cultivator;

II—As Agricultural Labourer ;

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities ;

IV—At Household Industry ;

V—In Manufacturing other than Household Industry ;

VI—In Construction ;

VII—In Trade and Commerce ;

VIII—In Transport, Storage and Communications ;

IX—In Other Services.

Category X relates to non-workers. A break-up of non-workers by sex, broad age-groups and types of activity is given in Table B-IX.

For the definitions of the workers and non-workers Appendix II to this volume may be seen.

Both the workers and non-workers have been classified by four broad age-groups *viz.*, 0-14, 15-34, 35-59 and 60+, corresponding to different stages of life *viz.*, children, young persons, middle-aged persons and elderly persons.

2. Labour Participation Ratio

The labour participation ratio (*i.e.*, percentage of workers to total population) for the entire City of Calcutta is 40.41. For every one thousand of Calcutta's male population 614 are workers and amongst females only 61 have been treated as workers for every one thousand of their total number.

The Ward No. 38 has exhibited the highest labour participation ratio for total persons (73.83 per cent) and also for males (84.54 per cent). The Ward No. 80 shows the least participation by working persons (24.98 per cent) and also by working males (43.06 per cent). The least participation by female workers is seen in the Ward No. 27 (2.06 per cent) and the highest participation by them is observed in Ward No. 54 (17.07 per cent).

Participation by the City's working population in the primary sector of industries has been negligible. Every fourth worker of Calcutta is engaged in the manufacturing industries. About 24 per cent of them are engaged in trade and commerce, 12 per cent in transport and communications and 3.2 per cent in construction. 34.98 per cent of the total workers and 81.13 per cent of the female workers of the City are engaged in other services.

One in every one hundred of the City's working population belongs to age-group 0-14. These child workers make only 1.46 per cent of total child population in the City. Majority (57.27 per cent) of the child workers are engaged in other services including personal services. 21.70 per cent of them are engaged in manufacturing industries and 14.27 per cent in trade and commerce.

Thirty per cent of the elderly persons above 60 years of age in the City are workers. They form 3.31 per cent of Calcutta's total working population. For every ten of the elderly workers four are engaged in the other services, three in trade and commerce, two in manufacturing industries.

3. Comparison with Past Censuses

This table corresponds to Table A-V of 1951 in which distribution of population of each ward of Calcutta has been shown by six livelihood classes, the Classes I-III (cultivators, cultivating labourers and their dependants) having been combined together in one group as in the economic life of the City they play a less significant role. In Table C-II of 1951 a cross-tabulation of the livelihood classes by age-groups for sample population for the City as a whole has been shown. In 1941 no economic tables were prepared. Table X (Part II) of 1931, Table XVII (Part II) of 1921, Part A of Table XV of 1911 furnish information on occupations or means of livelihood of the City's total population. Part B of Table XV gives information on occupations for the City of Calcutta in 1901.

A comparative statement of workers and non-workers of 1901 to 1951 according to 1961 broad industrial categories has been given in the Appendix VII.

TABLE B-III—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Fly-leaf

1. This table reveals the employment pattern of persons in different industrial categories of workers and non-workers by their educational level. Such information is very useful in assessment of availability of qualified man-power and also of the manner of its utilization.

The range of information furnished in this table by different educational level relates to :

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical Diploma not equal to Degree
Non-technical Diploma not equal to Degree
University Degree or Post-graduate Degree other than Technical Degree
Technical Degree or Diploma equal to Degree or Post-graduate Degree :
- Engineering
- Medicine
- Agriculture
- Veterinary and Dairying
- Technology
- Teaching
- Others

2. For definition of literate and educated persons Appendix II at the end of the volume may be referred to. Literate without any educational level signifies those who can both read and write but have not passed any written examination at least of the Primary or Junior Basic standard. 46.84 per cent of total literates in the city are without any educational level.

3. A correspondance of the figures appertaining to certain educational levels given in this table is expected with those furnished in Table B-V under certain professional occupations which are associated with the possession of requisite educational qualifications.

As per Table B-V there are 5,358 engineers (occupational families 000 to 006) including, of course, overseers in the city of Calcutta. But as this table furnishes 3,675 males and 16 females have been returned as possessing degree in Engineering.

4,658 persons of Calcutta hold degree in Medicine of whom 592 have been shown as non-workers. In Table B-V 4,012 persons have been returned as physicians and surgeons, and physicians others (occupational families 030 and 033—Table B-V.)

9,248 persons have returned themselves as secondary school teachers (family 051, Table B-V). But only 1,714 persons, of whom again 298 are non-workers have got a degree in Teaching.

4. This table recalls Union Table D-VII of 1951 which classified the entire literate and educated population into different educational levels and also into eight livelihood classes for the city of Calcutta as a whole.

TABLE B-IV—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK AT HOUSEHOLD INDUSTRY AND IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE

Fly-leaf

This table furnishes the number of total persons at work other than at agriculture by sex by different divisions and major groups of industries (S.I.C.) for the entire city and its 80 different wards and 4 special charges.

2. The workers engaged in different non-agricultural pursuits are broadly divided into two categortes, *viz.*, those engaged in household industries and those in different non-household industries, trade, business, profession or service.

3. The workers at household industry within each division and major group have further been classified according to the status of employment *i.e.*, those working as employees and others. 'Employees' are workers who are hired from outside the household which owns the industry and 'others' include those workers who belong to the household.

4. Similarly workers in non-household industry, trade, business, profession or service *i.e.*, workers in industrial categories III, V, VI, VII, VIII, and IX at each division and major group have been classified by sex by four different status of employment *viz.*, employer, employee, single worker and family worker.

5. The Union Table B-IV has been presented in three parts in Vol. XVI, West Bengal and Sikkim, Part II-B(i), General Economic Tables, whereas here in this volume the entire data have been presented under one compass.

In Table B-IV Part C in the West Bengal Part II-B(i) volume, data have been presented for Calcutta city for each minor group of industries (S.I.C.).

6. For economy of space, major groups having less than 1 per cent of workers of all divisions in the city or in any ward instead of being shown in the main table have been shown in an appendix to the table.

7. For definitions of worker, household industry, employer, employee, single worker or family worker, Appendix II at the and of this volume may be seen. The details of the major and minor groups of industries as conceived in the Standard Industrial Classification have been given in Appendix III. A list of common household industries has also been given in Appendix IV.

8. Table B-IV of 1961 recalls Union and State Table B-III of 1951. Union Table B-III of 1951 classified self-supporting persons as employers, employees and independent workers in industries and services by divisions and subdivisions of the Indian Census Economic Classification. In State Table B-III the livelihood classes V to VIII were split up into livelihood divisions, subdivisions and groups.

9. A Comparative statement of 1961 Standard Industrial Classification and 1951 Indian Census Economic Classification has been given in Appendix VIII to this volume.

TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

Fly-leaf

1.1 This table gives the occupational classification by sex of persons at work in the non-agricultural sector of the economy. The occupational classification in terms of the National Classification of Occupations is presented for each division and group separately for each of the Industrial Categories III to IX. For convenience of reference the categories are briefly described below :

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities ;

IV—At Household Industry ;

V—In Manufacturing other than Household Industry ;

VI—In Construction ;

VII—In Trade and Commerce ;

VIII—In Transport, Storage and Communications ;

IX—In Other Services.

2.1 For economy of space groups having less than 1 per cent of the workers of all divisions for the city and its different wards instead of being shown in the main table have been given in an appendix to the table.

2.2 In the Union Table B-V presented in the Vol. XVI, West Bengal & Sikkim, Part II-B (ii), General Economic Tables, 1961 Census, figures for each family (N. C. O.) for the entire city of Calcutta have been shown.

2.3 A complete list of the divisions and groups of the National Classification of Occupations have been given in Appendix V to this Volume.

3.1 One of the distinctive features of the 1961 Census economic classification scheme is the application of a two-fold classification of all non-agricultural workers by (*i*) *industry* i.e., branch of economic activity and (*ii*) *occupation* i.e., function or exact work. In the earlier censuses the economic classifications were based on neither a purely industrial nor a purely occupational classification of population, but were practically a combination of both.

3.2 By occupation was usually indicated the means of subsistence of the supporting sector of the economy in the past censuses. In the present census the term occupation implies mainly the function or exact work which a person performs.

3.3 Concept of industry is distinctly separate from that of occupation. Industry means that sector of economic activity in which the earner is engaged *e. g.*, textile industry, steel industry, automobile industry, cement industry etc., whereas occupation describes the exact function that an individual performs in any sector *e. g.*, fitter, carpenter, accounts clerk, office peon etc. Occupation is thus eventually related to the nature of function or duties performed, while industry is related to the kind of produce(s) manufactured or service(s) performed.

4.1 In the sorting and tabulation stage, classification of working population by industry was finalised at an early stage, although coding for both industry and occupation was done simultaneously.

4.2 The figures according to iudustrial classification of population were published before the occupational classifications and subsequently cross tabulations between industry and occupation were finalised. On finalisation of Table B-V, certain cases of apparently incompatible cross classification between industry and occupation came to notice.

4.3 It is difficult to conceive that there are architects or computing clerks or tabulation machine operators in household industries ; spinners, knitters or dyers in mining and quarrying etc. ; tram car drivers in manufacturing or in construction ; quarrymen, drillers or miners in trade and commerce ; craftsmen and production process workers in transport services ; etc. etc.

4.4 Such misclassification has occurred due to one or more of the following reasons : (i) incomplete or wrong entries in the enumeration slips, (ii) wrong economic classification of an individual at the sorting stage, (iii) error in assignment of industrial or occupational code number. Considering all conceivable cases of misclassification, the number of workers affected is even less than 2 per cent of the total working population of the city *i.e.*, less than 0.9 per cent of the total population of Calcutta.

5. Craftsmen, production process workers and labourers not elsewhere classified preponderate in the city of Calcutta. This group of workers account for 32.20 per cent of the total non-agricultural workers of Calcutta. They are followed by sales workers. Service, sports and recreation workers follow very closely the sales workers. A statement is given below showing the percentage of workers in each division of the National Classification of Occupations to total workers in all divisions.

TABLE B-VI—OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BOARD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

Fly-leaf

This table reveals the educational level of the City's literate workers in non-agricultural activities by their different classes of occupation. Occupational break-up is limited to each division of the National Classification of Occupations. The data have been presented by sex and broad age-groups *viz.*, 0-14, 15-34, 35-59, and 60+.

2. The census concept of literacy and the details of the National Classification of Occupations have been given in Appendices II and V to this volume respectively. Literates have been classified according to different levels of education as :

Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-technical diploma not equal to degree
University degree or post-graduate degree other than technical degree
Technical degree or diploma equal to degree or post-graduate degree :
Engineering
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching
Others

3. The educational levels shown in columns 8 to 33 are mutually exclusive. The figures for lower educational levels do not include the numbers which appear in higher categories.

4. Figures of total workers under each division have not been shown by broad age-groups as such data were not tabulated.

5. This table indicates the manner of utilisation of qualified man-power in different classes of occupation. For every one thousand of the working population of Calcutta 652 are literate. Majority of the workers in divisions 0, 1 and 2 are literate. The statement below gives the percentage of literate workers to total workers in each occupational division.

Division	*Occupation*	*Percentage of literate workers to total workers*
All Divisions		65.15
0	Professional, Technical and Related Workers	87.70
1	Administrative, Executive and Managerial Workers	89.56
2	Clerical and Related Workers	86.83
3	Sales Workers	73.36
4	Farmers, Fishermen, Hunters, Loggers and Related Workers	41.65
5	Miners, Quarrymen and Related Workers	20.09
6	Workers in Transport and Communication Occupations	55.43
7-8	Craftsmen, Production Process Workers, and Labourers not elsewhere classified	55.89
9	Service, Sport and Recreation Workers	45.47
X	Workers not classifiable by Occupation	50.55

6. Amongst the administrative, executive and managerial workers of Calcutta, 6,324 persons (about 10.44 per cent of their total number) are illiterate and 12,526 persons (20.68 per cent) can just read and write but have not passed any written examination. One third of the working males having passed primary or junior basic are craftsmen and production process workers and 42 per cent of matriculate males are clerical workers ; but among such female workers majority (about 54 per cent) are professional workers and 28 per cent of female matriculates of Calcutta have clerical occupation. 35 per cent of the male workers having university degree or post-graduate degree are clerks, 27 per cent of them are professional workers and every fifth such man works as an administrator, executive or manager. Amongst lady workers holding graduate or post-graduate degree a little more than two third are professional workers and about one fifth of them are clerical workers. 70 per cent of male workers having engineering degree are professional or technical workers, 17 per cent in management jobs and 7 per cent are sales workers. There are 12 ladies having engineering degree, 11 of whom are professional workers and one is in sales service. There are 29 males and 10 females in the City having degree in teaching but working in clerical service.

7. For the engineers and doctors experience counts much for management and sales service. Majority of the engineers in divisions 1 and 3 are of the age-group 35-59. Majority of the doctors in Calcutta having a degree in medicine are in the higher age-group 35 and above. Amongst the lady doctors, of course, majority belong to 15-34 age-group.

8. Literacy is more pronounced in the age-group 15-34 amongst the workers of Calcutta. But in certain occupational divisions *viz.*, 1 (administrative, executive and managerial workers) and 4 (farmers, fishermen, hunters, loggers and related workers) literacy is more pronounced in the age-group 35-59.

TABLE B-VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

Fly-leaf

This table deals with certain specified principal and secondary work. It relates to persons whose principal work is non-household industry, trade, business, profession or service (categories III, V, VI, VII, VIII or IX) and additional work household industry (category IV). It thus shows the extent by which household industries supplement non-household industries.

2. A person's principal work was taken in the Census of 1961, to be the one on which he spent most of his time. Figures for principal work have been tabulated with reference to additional work, both being spelled out for each division and major group of the Standard Industrial Classification, a complete list of which has been given in Appendix III to this volume.

3. This table corresponds in part to Table B-II of 1951 Census where secondary means of livelihood of self-supporting persons and earning dependents were shown.

TABLE B-VIII PART A—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

Fly-leaf

1. The Table

1.1 The economic tables from B-I to B-VII given earlier relate to the working population. This table B-VIII and the next one B-IX are on non-workers.

1.2 The non-working population has, for the first time, been classified into eight categories according to the nature of activities returned. These are outlined in the fly-leaf to Table B-IX. The present table is restricted to statistics of unemployed persons aged 15 and above comprising of two categories of non-workers, *viz.*, (i) those seeking employment for the first time, and (ii) those employed before but now out of employment and seeking work. For the first group of unemployed persons data have been presented for the age-groups 15-19, 20-24, 25-29, 30-34 and 35+, but for the second category the age-groups are 15-19, 20-24, 25-34, 35-44, 45-59, 60+. The educational levels in both the cases are the same as in Table B-III Part A.

1.3 This table reveals the position of educated unemployment in the City and at the same time helps in assessing the extent and quality of available man-power.

2. The Unemployed

2.1 Only 4.19 per cent of the total non-workers of Calcutta are unemployed as per returns of 1961 Census. Amongst males this percentage is 9.33, but for females it is insignificant. Only 8 out of every one thousand non-working females are unemployed, of whom again 6 returned themselves to be new entrants to the employment market.

2.2 Unemployment is more acute among educated females than males. About 32 per cent of the unemployed females of Calcutta have obtained an educational level of matriculation and above, while this percentage for males is only 23. For every one hundred unemployed females 18 are matriculates, 7 have non-technical diplomas and 6 are graduates or post-graduates, while the corresponding figures for the males are 13, 5 and 4 respectively. In absolute number, of course, unemployed males whether educated or uneducated outnumber their female counterparts by quite a significantly higher proportion.

2.3 In Calcutta 50 persons holding a degree in engineering (49-M and 1-F) are unemployed. 58 of the unemployed persons have a degree in medicine and 6 in agriculture, 2 in technology, and 19 in teaching of whom 13 are females.

2.4 Majority of the unemployed persons of Calcutta (about 47 per cent) belong to the age-group 15-24. The next higher age-group of 25-34 accounts for 35 per cent of the unemployed females and 31 per cent of the unemployed males. 18 per cent of the unemployed women are above 35 years of age while this percentage for males is 22.4.

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

Fly-leaf

1. Non-workers

1.1 This is entirely a new table for the 1961 Census. In any earlier Census no question was canvassed to ascertain how non-workers spent their time.

1.2 Even a significant deviation has been made in this Census from the previous ones as regards the collection of economic data. Discarding the earlier criteria of income or economic independence stress has been laid in 1961 on work, so that the population is divided into two classes : (i) all people who work, including family workers who do not receive any income and (ii) those who do not work including rentiers etc., who earn but do not work. The latter class of people has been broadly defined as non-workers. The non-working population have again been divided into eight different classes according to their different types of activities, which are given below :

(i) a full time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business ;

(ii) a person engaged in unpaid home duties (like house-wife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business ;

(iii) any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age ;

(iv) a retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work ;

(v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence ;

(vi) a convict in jail (an undertrial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution ;

(vii) a person who has not been employed before but is seeking employment for the first time ; and

(viii) a person employed before but now out of employment and seeking employment.

2. The Table

2.1 In a sense this table B-IX supplements the information given in the first economic Table B-I. In Table B-I, the workers and non-workers have been shown under five broad age-groups. In the present table also for the same age-group classification (*i. e.*, 0-14, 15-34, 35-59, 60+, and age not stated), the non-working population in each age-group is further classified into eight different types of activity.

3. Full-time Students

3.1 Majority of the male non-workers of Calcutta are full-time students. They account for 46 per cent of the total non-working males of the city. Amongst females full-time students constitute about 21.36 per cent of their total number. Among the whole time students 390 males and 1,896 females belong to age-group 35-59. Does it tend to show that persons who had discontinued their studies early in life on financial reasons for taking up odd jobs have again reverted to schools and colleges as soon as they have been able to lay by small resources to finance their education ? Such aged full-time students are larger in number among women than men. The widowed or unecumbered women possibly re-enter schools or colleges at higher ages.

3.2 In Calcutta 201,713 boys and 168,415 girls of the age-group 0-14 are literate, as given in Table C-III Part B. But this table B-IX reveals that 221, 816 boys and 151,871 girls of the same age-group are full-time students. Generally, the students reading in primary schools form a substantial portion of the students community in the age-group 0-14 years. Children reading in the primary standard being overwhelmingly illiterate, the number of literates is generally less than the number of students in the age-group 0-14 years. But among girls of the age-group 0-14 of Calcutta the number of literates is more than the number of full-time students. The proportion of the home educated is obviously larger among girls than boys.

4. House-wives

4.1 As many as 47.52 per cent of the total non-working female population of the City are housewives who do the very important job of looking after the household affairs but have not been classified as doing an economically productive work.

4.2 The total absence of male figures under the head 'Household duties' needs a little explanation. In the Instructional Booklet issued by the Registrar

General, India, on Enumeration, the following direction was given about the circumstances under which a person could be returned as a non-worker under the Category HW (Housewives) :

"For a person engaged in unpaid home duties (like house-wife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business write HW."

4.3 It was noticed that by way of illustrating the types of persons who could be returned as HW, the Registrar General mentioned "Housewife or other adult female".

4.4 In another context, in connection with filling up answers to Questions 11(a) and 11(b) of the Enumeration Slip, the Registrar General had stipulated that "in the case of married or grown-up women who do any of the work mentioned above in addition to the usual household duties such work should be fully described and HW written in brackets after the full description." Accordingly, as the meaning of the term "Housewife" as given in the Chambers' Dictionary is "the mistress of a house ; a female domestic manager", the enumerators were directed not to record any male under the Category of "Housewife". An adult female, for purpose of this classification, was a female above the age of 18 years.

5. Rentiers

5.1 About 5 per cent of the male non-workers (0.41 per cent for females) are rentiers or retired persons who earn income without doing any work.

6. Beggars

6.1 In Calcutta there are 17,050 beggars, vagrants, independent women without indication of source of income etc. They constitute 1.57 per cent among male non-workers and 0.58 per cent among female non-workers. Male beggars etc. are predominantly found in Ward Nos. 19, 26, 3, 39, 64 and 21. Females have been mostly enumerated Ward Nos. 78, 20, 3, 75 and 19.

7. Inmates of Institution

7.1 Inmates of Institutions shown in this table do not necessarily correspond to the Institutional population figures shown in columns 10-11 of Table A-I. The figures in Table A-I represent the number of persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc., irrespective of the means of livelihood of these persons. But a person was classified as an inmate of institution for purposes of this table on different considerations. For an undertrial prisoner enumerated in a jail, he was returned not as a non-worker, but for the work or kinds of work he was doing before he was apprehended. Similarly a person temporarily in hospital or a similar institution was recorded for the kind of work he was doing before he was admitted into the hospital or institution. But a convict in a prison, or a long term inmate of a penal, charitable or mental institution was classified as a non-worker under the group Inmates of Institutions.

HOUSEHOLD ECONOMIC TABLES

Tables B-X to B-XVII

Fly-leaf

1. The tables that follow from B-X to B-XVII are conveniently grouped as Household Economic Tables. For the first time in Indian Census an attempt was made in 1961 to collect economic data on the basis of households in addition to what is collected for each individual citizen. The tables present the distribution of households classified by the nature of their participation in two major household economic activities of the country, *viz.*•Family Cultivation and Household Industry.

2. In a predominantly agricultural country where most of the population is in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as entity. A decision was therefore taken that the information relating to the economic activities of the majority of Indian households *viz.*, Cultivation and Household Industry, should be collected at the Census.

3. A Household Schedule was used at the Census for the purpose. In the schedule information on the extent of land cultivated by the household either owned or held from Government or held from private persons or institutions for payment in money, kind or share ; land given to private persons for cultivation for payment in money, kind or share ; nature of household industry conducted by the household and the duration of the industry in a year alongwith number of family workers and hired workers engaged in cultivation or household industry or in both were collected. At the back of the Household Schedule there was a Census Population Record as counted at the Census in each household giving the essential information for each individual enumerated in the household like name, sex, relationship to Head of household, age, marital status and description of work, if working. The procedure adopted was to copy out part of the information collected in the individual slip on to the Census Population Record. A copy each of the Household Schedule and Census Population Record is reproduced in Annexure I to this fly-leaf.

4. The Household Economic Tables have been prepared on the basis of 20 per cent sample of households. The following instructions were issued regarding the selection of Sample Households :

"For purposes of tabulation every schedule from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluk and for urban areas of a district *i.e.*, the households left over in a household schedule and pad should be carried over the next household schedule pad for the selection of sample household.

Before marking the sample households the household schedule pad should be arranged in the order of location code number of villages in a tahsil/taluk in the case of rural areas and in the order of location code number of towns in a district for urban areas. The first sample schedule should be chosen randomly among the first five households in the first household schedule pad and stamped (S) as selected. This random number (random start) should be chosen separately for rural areas of each tahsil/taluk and for urban areas of the district. From the first random household every fifth household should be continuously stamped as selected. A rubber stamp will have to be specially prepared for this purpose. The samples should be continuously marked for all pads of villages in tahsil/taluk or urban area in a district. If in a particular household schedule pad at the end, some households (this will be four or less) are left after marking sample households, the households left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household.

In short the following points should be strictly followed while selecting the sample households.

(i) (a) All pads of household schedules of rural areas of one tahsil should be arranged in order of ascending number of location codes of villages. If in a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.

(b) Similarly all pads of urban areas in a district should be arranged in ascending order of location code numbers. Within an urban area these pads will be arranged in the order of block numbers.

(ii) After selection of the first sample schedule the sample will be continuously picked up without a break until the last pad of the Tahsil is exhausted in the rural areas and the district in urban areas.

(iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner with a rubber stamp (s).

(iv) The sample schedules (*i.e.* those having rubber stamp mark) will be carefully, removed from the pad and tied together for a tahsil in the sequence of villages within the tahsils and in the sequence of towns in the case of urban areas the slips being arranged in the same order as when the samples were removed.

(v) These bundles should be despatched to the R. G.'s office.

(vi) In case two or more household schedules are utilised for a household on account of large size of the household, all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.

(vii) The programme of selection of sample household schedules should be arranged in such a way that selected household schedules for one district are sent to this office every month by each Tabulation Office.

(viii) We are not concerned with institutions, and therefore, in taking out sample we should discard institutions and confine the samples only to family household. In counting every fifth household schedule therefore, the schedule for institutional household should be left out, the order of the sample being confined only to the schedules of households".

5. The operations of coding, punching and machine processing of the sample household schedules as well as the construction of the tables were done by the Central Mechanical Tabulation Unit of the Registrar General's Office, New Delhi.

6. The following household economic tables have been prepared on the basis of the data collected on the Household Schedule :

TABLE B-X—In this table all households are divided into four categories *viz.*, (i) households engaged neither in Cultivation nor Household Industry ; (ii) households engaged in Cultivation only ; (iii) households engaged in Household Industry only and (iv) households engaged both in Cultivation and Household Industry.

TABLE B-XI—In this table a more detailed examination of the cultivating households which have been separated in the previous table is made. The cultivating households are classified according to the size of land cultivated. It is further cross-tabulated by the interest in land. The holding sizes in acres are less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9 and 50+. The interest in land is classified in three types *viz*, (a) owned or held from Government ; (b) held from private persons or institutions for payment in money, kind or share and (c) partly held from Government and partly from private persons for payment in money, kind or share.

TABLE B-XII—In this table a further study of households that are engaged only in Cultivation has been made. Each household having a particular size of holding mentioned against Table B-XI has been further cross-tabulated with reference to the number of persons working in Cultivation. The holding has been grouped into the following size ranges (in acres) : Less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0-49.9, and 50+. In the case of households where more than one person is working the number of family workers and hired workers have been separated. Family workers have been separately tabulated by sex.

TABLE B-XIII—This table makes a study of households engaged both in Cultivation and Household Industry. There is a cross-classification of the size of holdings and Household Industry. The Household Industries are given upto Major Groups of the Indian Standard Industrial Classification. The table gives figures only for Major Groups of Household Industry where the number of households is 10 per cent or more of the total number of households in the respective Division. Major Groups of Household Industry where the number of Households is less than 10 per cent of the total number of households in the respective Division are given in the Appendix to the Table.

TABLE B-XIV—This table relates to households engaged in Household Industry only. There are two parts to the Table.

In Part A—the households are classified by nature of Household Industry and the number of persons engaged in each grouped under 1, 2, 3-5, 6-10 and more than 10 persons. The Household Industries are given upto Major Groups of the Indian Standard Industrial Classification. The table gives figures only for Major Groups of Household Industry where the number of households is 10 per cent or more of the total number of households in the respective Division. Major Groups of Household Industry where the number of households is less than 10 per cent of the total number of households in the respective Division are given in the Appendix to the Table.

Part B—gives the number of households engaged in Household Industry. For this purpose under each Major Group a list of Common Household Industries was drawn up. These were given the respective Minor Group numbers. If, in a Minor Group, there were more than one Household Industry these were represented by sub-groups as 005.1, 005.2 etc.

TABLE B-XV—This table relates to households engaged both in Cultivation and Household Industry. This table is a counter part to Table B-XII. Table B-XII relates to households engaged in Cultivation only whereas this table relates to households engaged both in Cultivation Household Industry.

TABLE B-XVI—This table relates to households engaged in Household Industry. Data are given separately for households, engaged in (a) Household Industry with Cultivation and (b) Household Industry without Cultivation. The Principal Household Industry is classified according to the period of working of the industry. The period are 1-3 months, 4-6 months, 7-9 months and 10 months to 1 year and months not stated. The households under each period of industry are further classified by family workers and hired workers. Family workers are tabulated by sex.

The table gives figures only for Major Groups of Household Industry where the number of households is 10 per cent or more of the total number of households in the respective Division. Major Groups of Households Industry where the number of households is less than 10 per cent of the total number of households in the respective Division are given in the Appendix to the Table.

TABLE B-XVII—In this table all households have been divided into three categories *viz.*, (i) households engaged neither in Cultivation nor Household Industry ; (ii) households engaged in Household Industry only and (iii) households engaged in Cultivation. All rural households engaged in Cultivation have been further classified according to the size of land cultivated. Each of the above categories has been classified by the size of the households. The sizes are (a) households with single member, (b) households with 2-3 members, (c) households with 4-6 members, (d) households with 7-9 members and households with 10 members and over. In the case of urban areas the total number of households have been divided according to sizes.

C—SERIES TABLES

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY

(Based on 20% Sample)

Fly-leaf

This table broadly corresponds to Table C-I —Household (Size and Composition) of 1951. But the contents are different.

This table like the previous ones on Household Economic Tables has been based on a 20 per cent sample of households. The details of the instructions on sampling have been given in the fly-leaf to the Household Economic Tables at page 341.

Household was defined as the entire group of persons who commonly lived together in the same census house and took their meals from a common kitchen unless the exigencies of work prevented them from doing so. If in a census house there was more than one group of persons and each group had its own separate kitchen every such group was treated as a separate household.

Institutions like boarding houses, messes and chummeries etc., were also regarded as census households of unrelated persons living together but such households were excluded for the purpose of this table.

This table indicates the strength of the joint family system in the City of Calcutta. In fact the table gives the total sample household population, number of heads of households, spouses of heads of households, married relations, other relations and unrelated persons, separately for each sex.

Average size of sample household in Calcutta is 4.89. 105,170 persons are heads of households and there are 32,480 unrelated persons on the basis of 20 per cent sample households of Calcutta.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY

(Based on 20% Sample)

Urban	Total No. of Sample Households	Total Sample Household Population			Composition of Households										
					Heads of Households		Spouses of Heads of Households		Married relations			Never married, widowed and divorced or separated relations		Unrelated persons	
		Persons	Males	Females	Males	Females	Males	Females	Sons	Other Males	Other Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
							CALCUTTA								
Urban	105,400	515,700	301,823	213,877	96,457	8,723	851	61,543	10,979	23,803	22,099	141,180	117,585	28,553	3,927

Note 1 The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of household in the 'Population Record' Where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

TABLE C-II—AGE AND MARITAL STATUS

Fly-leaf

1. The Table

1.1 This table presents distribution of population by sex and marital status, cross-classified by age-groups.

1.2 The cross-classification by age is shown by vertical spread under column 1 and is in 14 age-groups, *viz.*, 0-9, 10-14 and consecutive five-year age-groups upto 65-69 and 70 years and above. Age here, as in all the other 1961 Census Tables, is in years completed at the last birthday. The last group 'age not stated' includes those for whom age had not been recorded in the Individual Slip at the 1961 Census.

2. Concepts and Definitions

2.1 A person married, whether for the first or another time, has been treated as 'married'. So are persons recognised by custom or society as married, and persons in stable *de facto* union. Even if a marriage was disputed in the locality, the entry was made as 'married' if the person concerned said that he or she was married or in stable *de facto* union.

2.2 A 'widowed' person is one whose husband or wife is dead, and who has not married again.

2.3 The last category relates to a person who has been divorced in a lawful manner, either by decree of a law court or by a regular social or religious custom but who has not re-married, or a person who has been separated from wife or husband and is living apart with no apparent intention of living together again. The marital status of a prostitute was entered as returned by her.

3. Age-group 0-9

3.1 It was directed by the Registrar General, India, that during Sorting Operation all Slips in age-groups 0-4 and 5-9 were to be classified as "Never Married", irrespective of the actual entry recorded on the Slips. The idea behind this instruction was that population in these age-groups, even if married, does not enter the fertility picture of the country, and the purpose of the table is a study of the fertility history and growth potentiality. Of course, in Calcutta not a single person belonging to these age-groups returned himself or herself as married in 1961 Census. In West Bengal as a whole 2,090 males and 11,854 females in these Age-groups were returned as married, 63 males and 285 females as widowed, 28 males and 294 females as divorced.

4. Trends of Variation of Marital Status

4.1 This is a very important demographic table. From this table can be studied trends of variations in the proportions of the various marital status conditions over the last ten years. The table can also be utilised for an examination of a discernible change in the age at marriage. It will also give an indication of mortality in different marital statuses and age-groups. The data on married females by age-groups can also be availed of for forecasting the future births from age specific birth rates.

4.2 About 51.05 per cent of the males and 48.58 per cent of the females of Calcutta are unmarried. The proportion of married persons are 46.71 per cent for males and 41.21 per cent for females. In 1961 more people have remained unmarried than in 1951. Marriage at lower ages has been gradually diminishing which is evident from the following Statement.

Proportion of unmarried or married to total population by sex and age-groups for 1961 as compared to 1951

		Unmarried		Married

1	2	3	4	5	6

4.3 The incidence of widowhood, divorce or separation has also come down in course of the last census decade. In 1961 only 2.20 per cent of the males and 10.20 per cent of the females are widowed or divorced against the corresponding figures of 4.1 per cent for males and 15.0 per cent for females in 1951. Divorced males outnumber their female counterparts in the City of Calcutta. Majority of the divorced persons belong to the broad age-group 25-44.

5. Previous Censuses

5.1 The table corresponds to Table C-III of 1951 (prepared on 10 per cent sample), Table VII of 1941 (prepared on 2 per cent sample for certain selected subdivisions), and Table VII of 1931, 1921, 1911 and 1901 Censuses, all on full count. Upto 1941, no separate classification of 'divorced or separated' persons was done. In 1951 also, widowed and divorced persons were clubbed together in the main table, but separate figures were given in respect of divorced persons in the fly-leaf. In this Census for the first time, figures on full count are being presented separately for widowed and 'divorced or separated' persons. The age-groupings in 1951 were 0, 1-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75 and over and age not stated.

TABLE C-III—AGE, SEX AND EDUCATION

Fly-leaf

This table reveals the available educated man-power in the City of Calcutta. Under quinquennial age-groupings upto 34 starting from the age 5 and subsequently for age-groups 35-44, 45-59, 60+ and 'Age not stated', it shows the population classified by literacy and different levels of education.

For definitions and concepts of literacy and educational levels see Appendix II to this volume.

In the City of Calcutta 593 persons per *mille* are literate (636 amongst males and 523 amongst females), evidently the highest rate of literacy observed in 1961 Census amongst all the administrative districts of the State of West Bengal. 27.8 per cent of the people of Calcutta are just literate *i.e.*, have only the rudimentories of learning, 19.8 per cent have passed the primary or junior basic standard and 11.7 per cent are matriculates or post-matriculates. Amongst post-matriculates maximum are the graduates or post-graduates. Technical degree holders outnumber technical diploma holders in Calcutta. There are 16 females having degree in engineering, 313 females with degree in medicine. Women with degree in teaching outnumber their male counterparts in Calcutta.

This table corresponds to Table C-IV 'Age and Literacy' of 1951. The present table covers the entire population, while in 1951, this table was based on a 8.3 per cent sample. Another distinguishing feature is a variation in the adoption of age brackets ; in 1951 the statistics were presented by the age-groups 0-4, 5-9, 10-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75 and over and 'Age not stated.' The age-groups adopted for this table are 0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59, 60+, and 'Age not stated.' The other and more important departure in 1961 was the tabulation by a number of educational levels attained besides the classification of 'Illiterate' and 'Literate' to which 1951 was limited. It also corresponds to Table XI of 1941 (based on 2 per cent sample), Table XIII of 1931 and Table VIII of 1921, 1911 and 1901.

TABLE C-V—MOTHER TONGUE

Fly-leaf

1. This table shows the linguistic composition of the population of Calcutta for each of its administrative wards. A sub-total has been provided for every ten wards taken together.

1.1 This table recalls the union Table D-3, Part I of the 1951 Census, Table XV, Part I of 1931, Table X of 1921, Table X of 1911 and Table X of 1901.

2. The definition of 'mother tongue' is the same in 1961 as in 1951. The instructions to the Enumerators in regard to this question read as under :

'Write the mother tongue in full including dialect as returned by the person enumerated. Mother tongue is the language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy write the language mostly spoken in the person's home in childhood. In the case of infants and deafmutes give the language usually spoken by the mother'.

3. The mother tongue returns are given in alphabetical order in column 2. Those printed in italics belong to countries outside the Indian Subcontinent. Names occuring after hyphens (-) have been introduced by the Linguist to the Registrar General to indicate groupings. An asterisk (*) against a mother tongue means that the mother tongue is unclassified in the Linguistic Survey of India. A Dagger (†) means that the mother tongue though classified in the Linguistic Survey of India is either tentatively re-classified or considered unclassifiable by the Linguist. A combination of an asterisk and a dagger (* †) means that the mother tongue is unclassified by Grierson but is tentatively classified by the Linguist.

4. As many as 84 mother tongue names have been returned by the people of Calcutta. But the wardwise distribution of the different mother tongues, even of the major languages spoken by the people does not show any uniform pattern. The percentage share of all the major mother tongues of the City as a whole is given below in the statement which also shows the proportion of sexes (i.e., females per 1,000 males) of the people under each of those mothertongues. Only those mother tongues have been shown here which comprise at least 0.1 per cent of the total population of the city.

Sl. No.	Mother tongues	Percentage	Sex Ratio
1.	Bengali	63.84	766
2.	Hindi	19.34	380
3.	Urdu	8.98	403
4.	Oriya	2.10	122
5.	English	0.95	1,374
6.	Gujarati	0.71	850
7.	Gurmukhi	0.67	336
8.	Nepali	0.59	361
9.	Tamil	0.52	523
10.	Marwari	0.46	453
11.	Telugu	0.44	468
12.	Chinese	0.30	729
13.	Marathi	0.21	276
14.	Punjabi	0.21	790
15.	Rajasthani	0.19	1,466
16.	Malayalam	0.18	354

4.1 More women have preferred Rajasthani and Punjabi to Marwari and Gurmukhi as their mother tongue. Rajasthani and Marwari comprise almost the same language. Linguistically Marwari is a dialect of Rajasthani, which includes many other famous dialects of Rajasthan. Thus Rajasthani has a wider and more dignified connotation than Marwari. Gurmukhi is the script for Punjabi. Perhaps Gurmukhi is returned by those who are more inclined to show their attachment towards Sikhism and also possibly are not very much aware of the linguistic character of these mother tongues.

4.2 A closer study of the table gives a clear idea of the different zones of concentration of the people speaking different mother tongues. Bengali speaking people are primarily found in the built-up residential areas, in the newly developing residential tracts between the central business district, centring round the Dalhousie Square area and the peripheral industrial tracts. Hindi speakers are more concentrated in the industrial tracts and the central business district. Those having the mother tongue of Oriya are more found in the industrial zone in the east, in the tracts along the river Ganga (Ward Nos. 18 and 19) and the areas containing various boarding houses and chummeries. English speaking people forms a compact block in the high income group residential area south of Park Street. Gujarati speakers almost sarround the English speaking compact block. Gurmukhi and Punjabi speakers are quite dispersed but are largely associated with transport centres. Marwari and Rajasthani speakers are more concentrated in the area immediate north to the central business district. Telugu speakers are more found in the port area. Tamil speakers are generally found in the southern fringe of the residential areas. Malayalam speaking people are generally more concentrated at the south eastern portion of the residential locality.

5. Linguistic classification of the mother tongues for the City of Calcutta has been given in the Appendix IX to this volume at pages lvi and lvii.

TABLE C-VII—RELIGION

Fly-leaf

1. This table shows the number of persons classified by sex professing different religions. The main table presents data of six numerically important religions of India *viz.*, Buddhism, Christianity, Hinduism, Islam, Jainism, and Sikhism. Figures relating to other religions and beliefs which are numerically less important have been grouped together in column 'Other Religions and Persuasions' (Col. Nos. 18 & 19), the details of which have been shown in the Supplement accompanying the table.

2. A comparative statement is given below to show the distribution of the population of the City by major religions for 1961 as compared to 1951.

Religion	Percentage to total population	
	1961	1951
Hindus	83.94	83.41
Muslims	12.78	12.00
Christians	1.82	2.98
Jains	0.58	0.46
Sikhs	0.51	0.56
Buddhists	0.31	0.37
Others	0.06	0.22

2.1 There has been a decrease of Christian population in the City to the extent of 30.38 per cent during the last ten years period. The Jains have registered an increase of 44.94 per cent over the decade of 1951-61. The Hindu population have grown only by 8.45 per cent and the growth of the Muslims is marked by a percentage increase of 19.01. The Sikhs have grown only by 2.08 per cent.

3. This table corresponds to table D-II of 1951, Table XIII of 1941, Table XVI of 1931 and Table VI of 1921, 1911 and 1901. In all-India Censuses down to 1941 the primary sorting of Enumeration Slips was done on the basis of religion. Therefore, population figure for each unit from the village upwards was available classified by religion. This grouping by religion had been maintained till the final stages of sorting and as a result many important social and demographic tables like Age, Marital Status, Literacy etc. could be presented religionwise. From 1951 classification by religion conceded its pride of place to economic classification. The information extracted at the 1951 and 1961 Censuses of Religion has been restricted to the ascertainment of numbers only.

4. The instructions in 1961 as in 1951, required the Enumerator to record Religion as returned by the respondent.

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

PART A—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS AMONG SCHEDULED CASTES

PART B—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS AMONG SCHEDULED TRIBES

Fly-leaf

1. It is for the first time that a detailed tabulation of Census data relating to the social and economic conditions of the members of individual Scheduled Castes and Scheduled Tribes has been attempted. A number of special tables have been prepared which will be published in Part V-A, Vol. XVI, West Bengal and Sikkim, Census of India 1961.

2. This table corresponds to Table D-III of 1951. In 1951 the total of all members of Scheduled Castes/Scheduled Tribes population was classified by ten livelihood classes adopted for the Census. This table classifies the workers among members of the Scheduled Castes/Scheduled Tribes by the nine industrial categories of workers and also gives the figures for non-workers. In addition, this table also gives the figures for literate population among members of the Scheduled Castes/Scheduled Tribes. Part A of the table deals with Scheduled Castes and Part B with Scheduled Tribes.

3. The question adopted in 1961 Census elicit information about members of Scheduled Castes and Scheduled Tribes was :

Q. 5 (c). S./C./S. T.

Instructions to Enumerators to record answers to this question were as follows :

'The answer to this question will be recorded only if a person belongs to a Scheduled Caste or Scheduled Tribe. If the person belongs to a Scheduled Caste or Scheduled Tribe obtaining in your State, or in your district, write the name of the caste or tribe to which he belongs. For all others, write 'X' in this column. A list of Scheduled Castes and Scheduled Tribes obtaining in your State or in your district is given elsewhere in these instructions.

If the person belonging to a Scheduled Caste or Scheduled Tribe returns his caste or tribe by a synonym or a generic name of a caste or tribe as given in your list, write the name as returned and the name of the relevant caste or tribe, as per printed list, within brackets.

Do not write the names of Scheduled Castes in general terms as 'Harijan', 'Achhut'. You should ascertain the name of the caste when it is returned and write it. If a person is negligent and insists on calling himself merely 'Harijan' tell him that this description will not earn the person any benefits under the Constitution permissible to Scheduled Castes and Scheduled Tribes. This may persuade him to give out the correct name.

Scheduled Castes can belong only to the Hindu or Sikh religions. If a person belongs to a Scheduled Caste, there will be either 'H' or 'S' in the answer to question 5 (*b*). Scheduled Tribes may belong to any religion.'

4. The President's Order classifying the Scheduled Castes and Tribes is contained in the "Scheduled Castes and Scheduled Tribes Lists Modification Order 1956." This list gives only the names of the main castes or tribes. A caste may also be known by a local name which may be either a generic name or a synonym of the main caste, and a tribe by the name of its sub-tribe or class. It was not possible to include all these nomenclatures in the President's Order. In the 1951 Census, due to the strict application of the "Order" many persons who returned themselves by generic names or synonyms of castes were omitted to be enumerated as members of Scheduled Castes. In order to avoid such difficulties in the 1961 Census it was decided by the Registrar General to ascertain for each district whether any generic name or synonym was found in the case of Scheduled Castes or whether the Tribes were generally known by the name of sub-tribe or class and to prepare lists accordingly for circulation to the Enumerators for reference at the time of Enumeration. A list was accordingly prepared in consultation with the District Magistrates and referred to the Director of Tribal Welfare, Government of West Bengal for scrutiny. The final list of synonyms and sub-caste/sub-tribe names that emerged from his scrutiny was circulated to the Enumerators along with the list as per the President's Order. A list of those synonyms and the sub-caste/sub-tribe names against each main caste/tribe is given in an Appendix to this fly-leaf.

5. It is seen that only 4·33 per cent of the population of Calcutta belong to the Scheduled Castes and negligible fraction only 0·09 per cent to the Scheduled Tribes. As expected, members of the Scheduled Castes or Tribes are engaged in any sort of productive occupation in a better proportion than the people in general of the city. About 46·58 per cent of the Scheduled Castes and 55·63 per cent of the Tribes are workers against the labour participation ratio of 40·41 amongst the general

population of Calcutta. Literacy is more pronounced amongst the tribes than those belonging to Scheduled Castes. 33.61 per cent of the Scheduled Tribes have claimed to have known the rudiments of learning in 1961 Census against this percentage of 26.49 amongst the Scheduled Castes. In Calcutta taking all people together the percentage of literates is 59.29.

D—SERIES TABLES

TABLE D-I—NON-INDIAN NATIONALS

Fly-leaf

1. This table gives the number of persons by males and females belonging to different foreign nationalities who were resident in the City of Calcutta during the 1961 Census enumeration. It excludes Non-Indian Nationals employed in Foreign Embassies, Missions, etc.

1.1. The foreign nationals have been classified into the following five broad groups :

(i) Nationals of countries in Asia beyond India (including U. S. S. R.) ;
(ii) Nationals of countries in Europe (excluding U. S. S. R.) ;
(iii) Nationals of countries in Africa ;
(iv) Nationals of countries in two Americas ; and
(v) Nationals of countries in Oceania.

1.2. In each group, separate figures are given for selected countries. Entries relating to the remaining countries in each group have been lumped together under the head 'Elsewhere', whose details are given in Appendix to the table.

2. This table corresponds to Table D-VI of 1951. Before 1951, no question was asked about a person's nationality in the Indian Censuses.

3. Out of a total number of 12,774 foreign nationals in Calcutta, about four thousand are Pakistan Nationals, a little more than two thousand each belong to Chinese and Nepal Nationalities. U. K. nationals in Calcutta are a little more than three thousand in number.

TABLE D-II—PLACE OF BIRTH

Fly-leaf

1. This table gives an indication of the volume of life-time inmigrants into the City of Calcutta. The population have been classified according to the place of birth in this table.

2. In Indian Census, migration is determined solely by the concept of place of birth. Thus, if a person was born at a place other than the place of enumeration (which, according to census procedure, generally coincides with the place of his normal residence), he will figure as a migrant in census returns. On the other hand, a person wandering all over the world ever since birth will not be classed as a migrant if, during the period of enumeration, he was found to have returned to the place of his birth. Thus, true migration often gets artificially inflated, while re-migration to place of birth is sometimes masked. These limitations, inherent in the census concept of migration, must be kept in mind while interpreting the data.

3. Migration is an important factor in the study of social, economic and demographic trends. In previous censuses the migration statistics were produced by birth places alone. Before 1951, only one question relating to the place of birth was asked. In 1951, information about the displaced persons from Pakistan and the year of their arrival were also collected on account of their topical interest. On the basis of these materials alone, it was not possible to study the volume and trend of migration in detail. In 1961, the scope of enquiry was considerably widened with the result that the data on migration now presented cover the following characteristics of migrants :

(1) Birth place ;
(2) Rural and Urban classification of birth place ;
(3) Rural and Urban classification of place of Enumeration ;
(4) Duration of Residence in Place of Enumeration ;
(5) Nationality ;
(6) Migrants to Cities classified by Age-groups, Educational Levels and Occupational Divisions and Groups in case of Workers ; and
(7) Industrial categories of Workers and Non-Workers by the Place of Birth.

4. Another important change in birth place data introduced in the 1961 Census is the classification of places of birth into Rural, Urban and Unclassifiable areas. The benefit accruing from this change is that inter-migration between rural and urban areas can be studied because places of enumeration have also been classified into rural and urban areas. A person has been treated as born in an urban area if the place of his birth was considered urban at the time of his birth.

5. This table corresponds to Table D-IV of 1951, Table VI of 1941 (prepared for the State as a whole only on 2 per cent sample of selected subdivisions), Table VI of 1931 and Table XI of 1921, 1911 and 1901.

TABLE D-III—MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

Fly-leaf

1. This table classifies the migrants by place by birth and duration of residence at the place of enumeration. An innovation of the 1961 Census, this table helps in the study of inmigration in greater details. A new question was asked in 1961 Census on the duration of residence of a migrant at the place of enumeration.

2. The period of residence represents the number of completed years that the migrant has been in the city. The Enumerator was instructed not to take into account period of temporary absence on leave or holiday or tour or business.

3. Data relating to place of birth have been classified in the table under seven heads, *viz.*,

(1) Born elsewhere in the district of enumeration,
(2) Born outside the district of enumeration but within the State,
(3) Born in other States of India,
(4) Born in Nepal,
(5) Born in Pakistan,
(6) Born in other countries outside India, and
(7) Birth place unclassifiable.

While information under (1), (2) and (3) above has been presented separately for birth place classified into rural, urban and unclassifiable, migrants from the two neighbouring countries, Nepal and Pakistan have been shown separately without any such classification of birth place. Migrants from other countries have been clubbed together and shown under the head 'Born in other countries outside India.'

4. The duration of residence of migrants in place of enumeration has been divided into six periods of stay, as indicated below :

Less than 1 year
1—5 years
6—10 years
11—15 years
16 years and above
Period not stated

TABLE D-IV—MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

Fly-leaf

This table is also an innovation of the 1961 Census. It gives the distribution of migrants to the city by sex, broad age-groups and educational levels. For workers, other than cultivators and agricultural labourers, the Occupational Divisions and Groups of the National Classification of Occupations to which they belong are also indicated. The character of inmigration into the city-age-specific or job-specific and also the educational standard of the migrants can be studied from this table.

Age-groups

The following age-groups have been adopted in this table :

(i) 0-14
(ii) 15-34
(iii) 35-59
(iv) 60 +
(v) Age not stated.

Educational Levels

The migrants have been classified according to the following literacy and educational levels :

1. Illiterate
2. Literate (without educational level)
3. Primary or Junior Basic
4. Matriculation or Higher Secondary
5. Technical diploma not equal to degree
6. Non-technical diploma not equal to degree
7. University degree or post-graduate degree other than technical degree
8. Technical degree or diploma equal to degree or post-graduate degree ;

(i) Engineering
(ii) Medicine
(iii) Agriculture
(iv) Veterinary and Dairying
(v) Technology
(vi) Teaching
(vii) Others

Occupational Divisions

Information is given first for total migrants to the city, then for workers and at the end for non-workers. Among workers, data have been presented separately for Cultivators and Agricultural Labourers in the beginning. Then follow workers in Industrial Categories III-IX (for details, please *see* fly-leaf to Table D-VI). Workers coming under this head have been classified further by Occupational Divisions and Groups of the National Classification of Occupations. A list of Occupational Divisions and Groups with their descriptions, as extracted from the National Classification of Occupations (which has been followed), is given in an Appendix to this volume.

It may be noted that Occupational Division 4 in the table excludes Occupational Families 400 (Cultivators-Owners), 401 (Cultivators-Tenants) relating to Industrial Category I (Cultivators) and 414 (Agricultural Labourers) relating to Industrial Category II (Agricultural Labourers). Occupational Division 'X' excludes Occupational Group XO (Workers without occupations).

TABLE D-V—CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

Fly-leaf

This table is also an innovation of the 1961 Census. It shows the population born locally and the magnitude of inmigration to city from rural and other urban areas, separately for males and females. The immigrants from rural or other urban areas have been further classified with reference to their place of birth and duration of residence in the city in the manner indicated below :

Born in rural / other urban areas

(i) of the same district and resident in the city for less than 3 years ;

(ii) of the same district and resident in the city for 3 years and more ;

(iii) outside the district but within the State and resident in the city for less than 3 years ;

(iv) outside the district but within the State and resident in the city for 3 years and more ;

(v) outside the State and resident in the city for less than 3 years ; and

(vi) outside the State and resident in the city for 3 years and more.

Migrants falling in the following categories have been excluded from this table :

(i) Migrants with their birth place outside India.

(ii) Migrants with their birthplace unclassifiable *i e.*, migrants whose place of birth has not been properly indicated.

(iii) Migrants in whose case the rural or urban character of birth place was unclassifiable.

(iv) Migrants whose duration of residence in the city, was not stated.

In view of the above, the total population of the city as shown in this table in columns 3-5 will not correspond with its actual population.

(vi) Born in Urban Areas outside the State and resident in the City for 3 years and more	125,854	90,689	35,165

NOTE: The total population shown against the total Migrants in columns 2, 3 and 4 of this table does not indicate the population as given in the Primary Census Abstract but shows only the total of items under A, B and C of column 1. This total does not indicate that portion of the immigrant population (i) who were born outside India, (ii) whose birth places were not recorded as rural or urban and (iii) whose duration of residence was not stated.

TABLE D-VI—DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND NON-WORKERS BY PLACE OF BIRTH

Fly-leaf

1. This is a very valuable table as it shows the sectors of economic activities which attract migrants to the city. It gives the distribution of population by sex, birth place and industrial categories of workers and non-workers. The places of birth have been categorised in column 1 in the same manner as in Table D-II. The total number of workers and their industrial categories have been shown in columns 6 to 25. Columns 26 and 27 relate to non-workers. Workers have been divided into the following nine industrial categories :

Working

I As Cultivator
II As Agricultural Labourer
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities
IV At Household Industry
V In Manufacturing other than Household Industry
VI In Construction
VII In Trade and Commerce
VIII In Transport, Storage and Communications
IX In Other Services

2. In the table, all categories of birth place have been shown in column 1. Under Group A-II 'States in India beyond the State of enumeration', however, figures for only those States have been presented which sent at least 1 per cent of the total immigrants to the city from other States in India.

2. 1 Details in respect of States not printed in Group A-II have been given in Appendix I to the table.

3. The line for 'unclassifiable' under column 2 has been omitted wherever the total for it in any case is less than 5 per cent of the total immigrants in that group. Since in all cases the total for 'unclassifiable' in column 2 is less than 5 per cent of the total entries in the main group, the line 'unclassifiable' along with its entries has not been printed.

4. As in Table D-II, only selected countries have been shown in the Groups B, C, D, E, and F under column 1. Entries in respect of the remaining countries in each group have been clubbed together under 'Elsewhere' in that group. The details of combined entries under 'Elsewhere' in each group are given in Appendix II to the table. Persons born in Sikkim have been treated as born in India.

SCT—SERIES TABLES

TABLE SCT-I—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND TRIBES

Fly-leaf

This table is in two parts—Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. It is an important table as it gives the population of each Scheduled Caste and Scheduled Tribe and also shows in which sector or sectors of industry members of each Scheduled Caste and Scheduled Tribe are working, and how many. The classification is first into workers (columns 5 & 6) and non-workers (columns 25 & 26) and then, of workers into the nine categories of economic activity (columns 7-24).

The collective population of the Scheduled Castes and the Scheduled Tribes have already been given in the Primary Census Abstract. The economic characteristics and the state of literacy of the Scheduled Castes and Scheduled Tribes collectively have been shown in Table C-VIII (Parts A & B). The present tables further supplement the Table C-VIII A & B, in so far as the economic characteristics of the individual Scheduled Castes and Tribes living in this City have been furnished here.

A special feature of Table SCT-I Part A is the presentation of data on the unwholesome occupations of (i) tanning and currying of hides and skins, and (ii) scavenging, in which some members of Scheduled Castes are working.

From the first regular Indian Census of 1872, caste and tribal denominations of the population have been regularly recorded till 1941, though variations exist in the extent of detailed tabulation. Census officials diligently strove to sort out and classify the innumerable returns. It is not without reason that the enumeration and tabulation of castes and tribes have been held to be one of the most complicated and perhaps the least dependable among Census statistics. Even so, the mere recording of castes and tribes was not enough, and attempts were made to work out social gradations and, more particularly, the evaluation of the numbers of the less fortunate groups as well as the social and religious disabilities suffered by them.

For the first time, caste as such was not recorded in the Census of 1951. Instead of a question of "race, tribe or caste", as in the past, the question in the Individual Slip was headed "special groups". The caste or tribe of a person was entered if he belonged to the "Scheduled Castes", or "Scheduled Tribes" or "Backward Classes".

The recording or castes for the general population was dispensed with in the 1961 Census also. However, in better fulfilment of the constitutional responsibilities, a more detailed tabulation of statistics relating to the Scheduled Castes and Scheduled Tribes was undertaken.

Data on Scheduled Castes and Tribes in greater details have been furnished in the Census of India, 1961, Vol XVI, West Bengal & Sikkim, Part V-A (i) & Part V-A (ii).

TABLE SCT-III—EDUCATION AMONG SCHEDULED CASTES AND TRIBES

Fly-leaf

The statistics pertaining to literacy and education among the individual Scheduled Castes and Scheduled Tribes are presented in two parts of the present table. Part A(i) relates to the Scheduled Castes and Part A (ii) to the Tribes. This table is similar to the Table C-III for the general population.

For definitions see Appendix II to this volume.

TABLE ON INDUSTRIAL ESTABLISHMENTS

Fly-leaf

This table has been specially prepared for the District Census Handbooks. It gives an account of the distribution of different industrial establishments as carried on in census house(s), returned in the Housing Census of October, 1960 for the different administrative wards of Calcutta.

The nature of industries has been indicated by the minor groups of the Standard Industrial Classification, details of which may be found in Appendix III to this volume. The number of establishment(s) against each different types of industries has been shown within brackets against the minor groups of industries.

The data have been collected from the houselists prepared during the house-numbering operation. At the time of houselisting details of the industries were collected if any census house was used as an industrial establishment.

NUMBER OF ESTABLISHMENTS FOR INDUSTRIES CLASSIFIED BY MINOR GROUP OF INDUSTRIAL CLASSIFICATION

[(a) For description of Code, see Appendix III to this Volume.
(b) The figure in the bracket indicates number of Establishments.]

APPENDIX II

DEFINITIONS

Census House :

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place or business workshop, school, etc , with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

Census Household :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Literacy :

A person who can neither read nor write or can merely read but cannot write in any language was treated as illiterate. A literate is a person who can both read and write with understanding. The test for reading is ability to read any simple letter either in print or in manuscript with felicity. The test for writing is ability to write a simple letter.

If the person can both read and write and has also passed a written examination or examinations as proof of as educational standard attained the highest examination passed to denote the educational level attained by him was recorded.

Mother-tongue :

Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood was taken as mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother was written.

Worker :

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which the household was visited for enumeration. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other causes are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working. Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in a furthering the political activity of his party will be regarded as a worker.

Status of Employment :

(*i*) An *Employer* is a person who has to employ other persons in order to perform the work. That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(*ii*) An *Employee* is a person who usally works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(*iii*) A *Single Worker* is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a persons who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' Co-operatives should be recorded as 'Single Worker'.

(*iv*) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business, or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Such an industry should be on a scale larger than what has been covered in 'Household Industry' whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Household Industry :

A Household Industry is defined as an industry conducted by the Head of the household himself and or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the Urban areas the industry should be confined to the house.

A Household Industry should relate to production, processing, servicing, preparing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

Non-workers :

All persons who are not workers are non-workers. They should fall under any one of the following categories :

1. Full time student or child attending school who does no other works.
2. A person engaged in unpaid home duties (like housewife or other adult female).
3. Any dependent, including an infant or child not attending school or a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural, royalty, rent or dividend or any other persons of independent means for securing which he does not have to work and who does no other work.
5. Beggars, vagrant or independent women without indication of source of income and others of unspecified source of existence.
6. A convict in jail or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twin	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256

STANDARD INDUSTRIAL CLASSIFICATION—*contd.*

Major Group (Code)	Description	Minor Group (Code)
Division 2 & 3 Manufacturing—*contd.*		
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274

	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen images, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of nonferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in majcf groups 36, 37, 38 and 39)	369
37	*Machinery (All knids other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesal engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulted wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379

APPENDIX IV

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group	
00	*Field Produce and Plantation Crops*
005.1	Production of Vegetables
005.2	Production of roots etc., not included above
006.1	Production of fruits and nuts in plantation, vines and orchards
006.2	Production of copra (from coconuts)
007.1	Production of thatching grass
007.2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008.1	Production of juice (neera) by tapping coconut trees
008.2	Production of juice by tapping other palms like date, palmyra n.e.c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group	
01	*Plantation Crops*
013	Production of tobacco in plantation
015.1	Pan Cultivation
015.2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group	
02	*Forestry and Logging*
023.1	Production of charcoal
023.2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025.1	Production of Katha
025.2	Production of Lac
025.3	Production of gum
025.4	Production of resins, barks, herbs, wild fruits, berries and leaves etc., n.e.c.
026	Production and gathering of other forest products not covered above
Major Group	
03	*Fishing*
030	Production of fish by fishing in sea

A COMPARATIVE STATEMENT OF 1961 INDIAN STANDARD INDUSTRIAL CLASSIFICATION AND 1951 INDIAN CENSUS ECONOMIC CLASSIFICATION

1961 I. S. I. C.	1951 I. C. E. C.
DIVISION 0—Agriculture, Livestock, Forestry, Fishing and Hunting :	Livelihood Class I+ Livelihood Class II+ Livelihood Class III+ Subdivisions 0.1 to 0.6
Industries	
MAJOR GROUP :	Livelihood Class I+ Livelihood Class II+ Livelihood Class III
00 Field Produce and Plantation Crops :	
INDUSTRIAL CATEGORIES I AND II MINOR GROUPS 000 TO 005	
Groups :	*Subdivisions :*
000 Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	Livelihood Class I—Cultivators of land, wholly or mainly owned ; Livelihood Class II—Cultivators of land, wholly or mainly unowned ; Livelihood Class III—Cultivating labourers
001 Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	
002 Production of raw jute and kindred fibre crops	
003 Production of raw cotton and kindred fibre crops	
004 Production of oilseeds, sugarcane and other cash crops	
005 (Part) Production of other crops (including vegetables) not covered above	
INDUSTRIAL CATEGORIES III AND PART OF IV MINOR GROUPS 005 TO 109	
005 (Part) Production of other crops (including vegetables) not covered above	0.3 (Included in major group 01) (Included in minor groups 000 to 005)
006 Production of fruits and nuts in plantation, vines and orchards	
007 Production of wood, bamboo, cane reeds, thatching grass, etc.	
008 Production of juice by tapping palms	
009 Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	2.4 (Included in major group 21) (Included in minor groups 000 to 005)
01 Plantation Crops :	*0.3*
010 Production of tea in plantation	0.3 Plantation Industries
011 Production of coffee in plantation	
012 Production of rubber in plantation	
013 Production of tobacco in plantation	
014 Production of ganja, cinchona, opium	
015 Production of other plantation crops not covered above	
02 Forestry and Logging :	*0.4*
020 Planting, replanting and conservation of forests	0.4 Forestry and collection of products not elsewhere specified
021 Felling and cutting of trees and transportation of logs	
022 Preparation of timber	
023 Production of fuel including charcoal by exploitation of forest	
024 Production of fodder by exploitation of forests	
025 Production of gums, resins, lac, barks, herbs, wild fruits and leaved by the exploitation of forests	
026 Production and gathering of other forest products not covered above	
03 Fishing :	*0.6*
030 Production of fish by fishing in sea	0.6 Fishing
031 Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	
032 Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	
04 Livestock and Huning :	*1.0, 0.2, 0.5*
040 Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	0.1 Stock Raising
041 Rearing of sheed and production of wool	
042 Rearing and production of other animals (mainly for slaughter) such as pig	
043 Production of ducks, hens and other small birds, eggs by rearing and poultry farming	0.2 Rearing of small animals and insects
044 Rearing of bees for the production of honey, wax and collection of honey	
045 Rearing of silk worms and production of cocoons and raw silk	
046 Rearing of other small animals and insects

1961 I. S. I. C.	1951 I. C. E. C.
047 Trapping of animals or games propagation	0.5 Hunting (including trapping and game propagation)
048 Production of other animal husbandry products such as skin, bone, ivory and teeth	0.1 (Included in minor groups 040 to 042)
DIVISION 1—Mining and Quarrying :	**1.0 to 1.7**
10 Mining and Quarrying	*1.0 to 1.7*
100 Mining of Coal	1.1 Coal mining—Mines primarily engaged in the extraction of anthracite and of soft coals such as bituminous, sub-bituminous and lignite
101 Mining of iron ores	1.2 Iron ore mining
102 Mining of gold and silver ores 103 Mining of Manganese	1.3 Metal mining except iron ore mining
104 Mining of Mica	1.6 Mica
105 Mining of other non-ferrous metallic ores	1.3 (*Included in minor groups* 102 & 103)
106 Mining of crude petroleum and natural gas	1.4 Crude Petroleum and Natural Gas
107 Quarrying of stone (including slate), clay, sand, gravel, limestone	1.5 Stone-quarrying, clay and sand pits
108 Mining of chemical earth such as soda ash	1.7 Salt, saltpetre and saline-substances
109 Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	1.0 Non-metallic mining and quarrying not otherwise classified—including mining and quarrying of such materials as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt, bitumen
INDUSTRIAL CATEGORIES IV AND V DIV. 2 AND 3	
DIVISION 2 & 3—Manufacturing :	**2.0 to 2.9, 3.0 to 3.8, 4.0 to 4.9**
20 Foodstuffs :	*2.0 to 2.3*
200 Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and food grains	2.1 Grains and pulses
201 Production of sugar and syrup from sugarcane in mills 202 Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	2.3 Sugar Industries
203 Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits 204 Slaughtering, preservation of meat and fish and canning of fish	2.0 Food Industries otherwise unclassified
205 Production of bread, biscuits, cake and other bakery products	2.1 (Included in minor group 200)
206 Production of butter, ghee, cheese and other dairy products 207 Production of edible fats and oils (other than hydrogenated oil) 208 Production of hydrogenated oils (Vanaspati)	2.2 Vegetable oil and dairy products
209 Production of other food products such as sweetmeat and condiment, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	2.0 (Included in minor groups 203 & 204)
21. Beverages :	*2.4*
210 Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery 211 Production of country liquor 212 Production of indigenous liquor such as toddy, liquor from mahua, palm juice 213 Production of other liquors not covered above 214 Production of aerated and mineral water 215 Production of ice 216 Production of ice cream 217 Processing of tea in factories 218 Processing of coffee in curing works 219 Production of other beverages	2.4 Beverages

APPENDIX IX

LINGUISTIC CLASSIFICATION OF MOTHER TONGUE RETURNS, 1961 FOR CALCUTTA

Sir George Abraham Grierson was the pioneer in the modern linguistic survey and classification studies in India. He based his survey work on the Census of 1891. His work started in early nineteen of the 19th century and it took 31 long years to complete the work. He published the first volume of his monumental and unrivalled work in 1904 and subsequently the remaining ten volumes came out.

Grierson classified the languages mainly on the basis of their structures for which purpose he exploited all the available materials. Broad groupings were made following the traditional geneological classifications. Thus he classified all the languages according to the four great families of India *viz.* : Austric, Dravidian, Indo-European and Tibeto-Chinese. He made further classifications such as Sub-family, Branch, Group etc. For any Census Study since 1901, Grierson's classification of languages had been followed. To quote Census 1961, Vol. I, India, *Part II-C(ii)—Language Tables, (Page clxi)*, 'In so far as the schemes of classification of languages in the Indian Censuses were concerned they were based on 1901 and in all subsequent censuses upto 1931, on the classification proposed by Grierson in 1901 and later in his Linguistic Survey. This effort seeks to continue the Indian tradition of re-examination of the linguistic structure of India in the light of the results of the decennial census of 1961.'

The mother tongues that are returned from Calcutta have been classified in the same manner and they are given below :
