FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri S. N. Ghosh, the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head-quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal on behalf of the Govt. of West Bengal containing census statistics besides other invaluable data of local importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is the fourth in the series.

The Census of 1981 was conducted in February 1981 with sunrise of 1st March, 1981 as the reference date by Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the successful conduct of the operation goes to him. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal, in public interest. The present publication is the product of his hard labour, meticulous planning and able administrative capabilities. Without the active involvement and inspiring support of Shri Ghosh, the present publication would not have seen the light of the day.

The Census statistics in the Primary Census Abstract and non-Census data in the Town Directory included in this publication relate to the district of Calcutta.

A brief analytical note containing a number of inset tables based on census and other non-census data and included in this publication is expected to meet the requirements of the readers.

As mentioned earlier, the Census operation in the city was conducted by Shri S. N. Ghosh, as Director of 1981 Census, under the inspiring leadership of Shri P. Padmanabha, former Registrar General and Ex-officio Census Commissioner of India without whose deep understanding, enthusiastic interest and mature guidance, the operation would not have been possible in these difficult days. Our tributes are due to both Shri Ghosh and Shri Padmanabha.

Shri V. S. Verma, the present Registrar General, India, has kindly overseen the timely completion of the project and has been guiding us soon after his assumption of office of the Registrar General, India in 1983. Without his active interest we would not have progressed much in printing out this publication.

We are also grateful to Shri V. P. Pandey, Joint Registrar General, India, for helping us in various phases of the project both in technical as well as administrative matters. He never failed us his mature advice and helpful guidance. We are grateful to Shri Pandey.

Dr. N. G. Nag, Deputy Registrar General, India, in-charge of the Social Studies Division, in the office of the Registrar General, India and his colleagues had provided us technical guidance right from the start of the project. We acknowledge our gratitude to him and his colleagues.

We are also indebted to Shri K. K. Chakravorty, former Dy. Registrar Genaral, India (C & T) and Shri N. G. Rama Rao, Asstt. Registrar General for their helpful suggestions. Dr. B. K. Roy, Dy. Registrar General, in-charge of the Map Division of the Office of the Registrar General, India, kindly provided us the technical guidance in Cartographic matters. We cannot forget his kind help.

We are grateful to Shri Aloke Kumar Mukherjee, Dy. Director of Census Operations in-charge of the Calcutta City, Shri Loke Nath Chatterjee, Asstt. Director of Census Operations, Calcutta City, Shri A. Sengupta, now Joint Director (DP) in the Office of the Registrar General, India, formerly Dy. Director (DP) in the Census Directorate, West Bengal, Shri S. K. Mazumdar, Asstt. Director of Census Operations, West Bengal, Calcutta City (since retired) and their inumerable colleagues including the Zonal Census Officers, Charge Superintendents, Circle Supervisors, Census Enumerators and also the Deputy Director in-charge of the regional tabulation office, Coders, Checkers, Tabulators, Supervisors etc. We acknowledge their contributions to the preparation of the volume.

The final tabulation and compilation of the data have been done by Sm. Anjali Das and Sm. Sucheta Dutta, both Statistical Assistants, Sm. Mira Banerjee, and Smt. Atashi Dasgupta, Amala Patutunda and Nandita Dutta, all Computors under the supervision of Shri Swapan Kumar Guha, Investigator, first under the guidance and direction of Shri M. N. Sarkar, Asstt. Director of Census Operations (since retired) and later under Sri A. K. Dutta, Dy. Director of Census Operations. Without their unfailing sincerity the data could not have been finalised. The analytical note was prepared by Sri Swapan Kumar Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Dy. Director of Census Operations, West Bengal. The publication marks the fruition of their labour.

For the map the credit goes to the Map Unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal who was assisted by Shri Chaurajit Singh, Senior Geographer, Sri Bimalesh Das, Sr. Artist (since retired) and other colleagues.

The printing of this volume was overseen by Shri Himangshu Saha Chaudhury, Printing Inspector assisted by Sm. Sucheta Dutta, Statistical Assistant and Sm. Anjali Banerjee and Sm. Nira Chakraborty, Computors in the matter of proof-reading and machine calculations. The entire printing job was supervised very effectively by Shri S. K. Guha, Investigator under the able guidance of Shri A. K. Dutta, Dy. Director without whose active involvement the publication would have been wellnigh impossible. Without Shri Dutta's lively interest and inspiring guidance the publication would not have been printed at all.

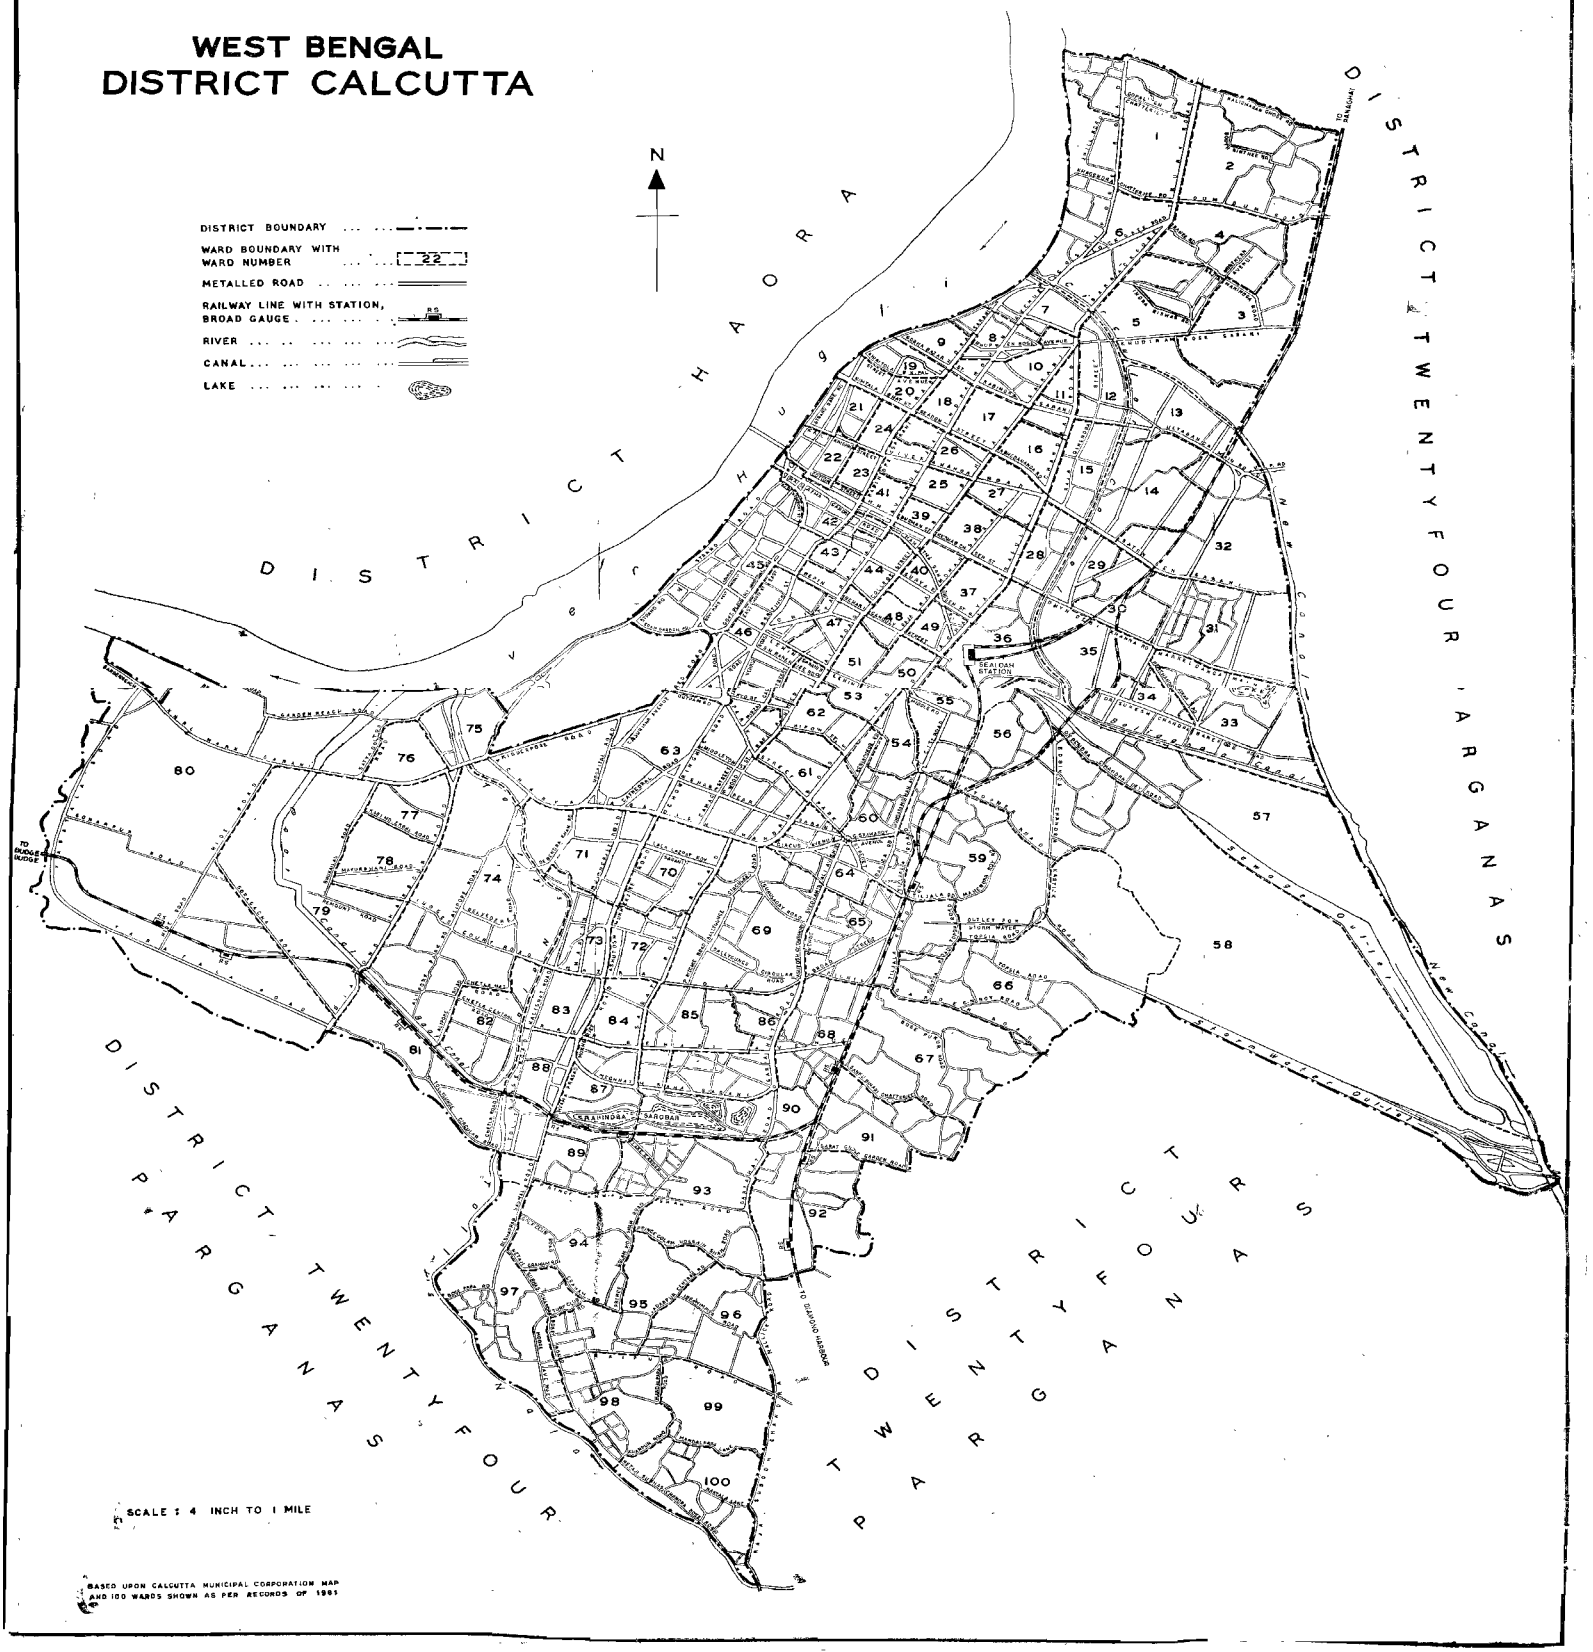

All said and done, we cannot forget the singular contribution to the project of the administrative support provided by the State Govt. Among the officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Choudhury, WBCS., and Shri B. Bhattacharyya, WBCS., both Dy. Secretaries to the Govt. of West Bengal, Home (C&E) Department and their colleagues to whom we respectfully acknowledge our gratitude. Mention may also be made of the Dy. Controller of Stationery, Govt. of West Bengal for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to M/s. Mili Art Press for printing this publication.

ANALYTICAL NÓTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows .

(a) all places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

(b) all other places which satisfied the following criteria :

(i) a population of 5,000 as the minimum,

(ii) density per square kilometre would be a minimum of 400, and

(iii) at least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, i.e. it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

CENSUS HOUSE

We defined the census houses in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both." Actually to make the concept understandable and applicable in field we had to introduce the concept of Singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use."

HOUSEHOLD

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both."

SCHEDULED CASTES/SCHEDULED TRIBES

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

LITERATES

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

MAIN WORKER

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz. main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, services, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the Household." In 1971, the following definition was applied : "A worker is a person whose main activity participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration."

Further, those who did not do any work in the manner described above, yet did some work to come under the category of Secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons..... participation of work that goes to augment the income of the household will only be treated as economic activity."

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration

In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workers in 1981 Census. This is a mojor departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

MARGINAL WORKER

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

NON-WORKERS

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institution, (vi) Dependents and (vii) Others.

BRIEF HISTORY OF THE DISTRICT

It was 1690, a day in August, the foundation of a new metropolis was laid by Job Charnock which became the nerve centre of the trade and commerce of the east. Within the limits of the present city of Calcutta stood formerly three villages viz. Sootalooty, Kalikata and Govindapur The earliest British connection with these villages was in 1686, when Job Charnock withdrew the English factory from Hooghly to Sootalooty, but it was not till August, 1690 that he succeeded in establishing a firm footing in that village. There are two fortunate circumstances which favoured the English position. The first was the revolt of Sobha Singha and others against the Burdwan *Rajas* in 1696. It continued for two years and the foreign settlements viz. European, French and Dutch, were authorised by the *Nawab* to defend themselves against the insurgents. They made best use of the opportunity by fortifying their factories. The second fortunate circumstance which helped the Englishmen was the appointment of Azim-us-shan, the grand son of the Emperor Aurungzebe as *Nawab* of Bengal in 1698. The Englishmen gained his favour by obtaining permission to purchase the villages of Sootalooty, Kalikata and Govindpur from the land owners.

Since then Calcutta continued to attract large inhabitants. The growing importance of the colony prompted the company in the 1707 to declare Calcutta a separate presidency, accountable to the Directors in London of the East India Company. In 1717, the company obtained permission from the Moghal Empire to purchase thirty eight villages extending down both sides of the Hooghly on a stretch of 16 kms. distance. With these rights, the English Company firmly established their foothold and the settlement grew into a thriving town.

The population of Calcutta was estimated at 10,000 to 12,000 in 1710 although it is quite impossible to certain what was the actual population at that point of time.

In 1831, Captain Steel, the then Superintendent of Police took a census of the town which revealed that the town contained 187,081 inhabitants. According to the census of the town conducted by Captain F.W. Birch, the then Superintendent of Police accounted for 229,714 population in the town.

The modern Calcutta dates back to the year 1757, i.e. after the battle of *Plassey* when the English Supremacy was established in Bengal clearly. Calcutta came to be the Capital of India in 1773 which position it retained till 1912 when the Capital was shifted to Delhi. But till this day Calcutta claims to be the city of vital national importance from both political and economical point of view. Not only it is the Capital City of West Bengal, but also a dominant urban centre of the entire eastern and north-eastern regions of the country.

DISTRICT CENSUS HANDBOOKS

The District Census Handbook as part of Census publications is being printed since 1951. The Government and the Development agencies felt necessity of the data at micro level for the Social and Economic development, all over the Country during the post independence era. The compilation of data was limited to district, police station and town levels only. In 1951 it was extended up to the mouza level.

The District Census Handbook in 1961 was enlarged further with the introduction of Official Statistics. The District Census Handbook of 1971 had undergone the major changes. The District Census Handbook 1971 had three parts viz. Part XA, Part XB and Part XC. The first part dealt with the village and Town Directories. In this part, the villagewise data on amenities and land use pattern were furnished, likewise information in respect of each town was given in the Town Directory portion.

The Part XB consisted of village and townwise (wardwise for municipalities, town committees and all statutory towns) Primary Census Abstract of the concerned district.

The third part i.e. Part XC dealt with the non-census information and as well as social, economic and cultural tables. All the three parts were printed either in two volumes; i.e. Part XA & Part XB and Part XC or in three volumes Part XA, Part XB and Part XC separetely according to the size of the publications.

The scope of the District Census Handbook 1981 has been enlarged considerably specially with regard to the amenities available in the villages and towns and land use pattern in villages and Non-municipal towns. The presentation of data in respect of recognised slums of Class I and Class II towns of the State is a new addition in the Town Directory portion of the District Census Handbook of 1981. The format of the Primary Census Abstract has to be re-structured consequent on the change in economic questions. The data pertaining marginal workers obtained through the canvassing of individual slips is an important addition. Whereas this time the workers have been categorised in four groups instead of nine made in the Census of 1971.

SCOPE OF TOWN DIRECTORY

The Town Directory has been prepared for all the statutory towns like, Municipal Corporation (M.C.), Municipalities (M), Notified Areas (N.A.), Town Commities (T.C.) and Cantonment areas as well as the non-statutory census towns (N.M.) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or recognised slums having a population of 50,000 or more. The towns having outgrowths have been identified with the asterisk mark (*) and the informations available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In those cases information not available (N.A.) has been noted in the respective columns.

The population in each town during 1981 Census has been taken into account for determining the size class of the towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1	Population one lakh and above	..	Class	I
2	Population from 50,000 to 99,999	...	,,	II
3	Population from 20,000 to 49,999	.	,,	III
4	Population from 10,000 to 19,999	..	,,	IV
5	Population from 5,000 to 9,999	..	,,	V
6	Population less than 5,000	..	,,	VI

A brief discussions on the statements (seven in numbers) are given below :

STATEMENT I

This statement provides some basic data based on the Primary Census Abstract. It deals with the status and growth history of the town. The column No. 1 to 5 gives information on class, civic status, name of the town and its location code with the police station where the town belongs to. The area of the town in square kilometer has also been given. The column Nos. 6 to 19 provide demographic information of the town. Where the town does not have any urban status for the reference year(s), a 'dash' (—) has been given under those column(s). The decadal growth in percentage has been shown below the population figures in column Nos. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

STATEMENT II

This statement deals with the physical aspects and location of the town as on April 1980. This statement is divided into two parts, first one is dealing with the climatological data which include rainfall and maximum-minimum temperatures. The information on climatological aspects are, however, not available in respect of some of the towns. In those cases the information of the nearest place where it is available are noted. This alternative could not be followed uniformly due to the fact that the data even for the nearest places are not always available. In such cases the information not available (N.A.) has been stated. In the second part i.e. in column Nos. 6 to 12, the locational particulars have been stated for the referrent town.

STATEMENT III

Data on municipal finances for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have beed shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (N.A.).

STATEMENT IV

This statement contains 19 columns. The column Nos. 1 to 5 provide general information of the town and the column Nos. 6 to 19 deal with the amenities available in the referrent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referrent town gets services has been given. In the absence of any public amenities the relevant columns 6 to 19 have been depicted with dash (—) and when information are not available (N.A.) has been noted in the respective columns.

STATEMENT IVA

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in class I and class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been given separately for each slum.

STATEMENT V

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions

run by or aided by Government, Semi-Government, Local Bodies, Charitable Institutions, Social Service Agencies like Missioaries etc. have been counted for the purpose of being presented in this statement.

Where these facilities were not available, the distance of the nearest place where these facilities were available had been noted. The Family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The Maternity and Child Welfare Centres, Veneral Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and included in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as adopted in village directory has been followed in respect of the school and college education. The column 6 includes educational institutions like Teachers' Training College, Basic Training College etc. The information on short hand, typewriting and other vocational training institutions have been given in column 10. In this case only the recognised institutions have been considered. The "recognised" means recognised by any statutory authority—like the Education department, Commerce department, Labour department etc. of the Government or Semi-Government or autonomous bodies, public sector projects like municipality, corporation etc.

The vocational institutions like Music/Dancing School, Art College, Painting/Clay-modelling institutions etc. have been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been taken in Col. No. 15 under "Others". The columns 17-20 deal with the recreational and cultural facilities of the town.

STATEMENT VI

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and Non-agricultural Credit Societies.

SCOPE OF PRIMARY CENSUS ABSTRACT

The Primary Census Abstract is the basic table prepared from the total count of census. It has been presented at three levels, viz. (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations. The District Primary Census Abstract presented here corresponds the 1971 pattern and contains the following items :— Area of the police stations/towns in Km2, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled tribes population and its division into males and females, the sex division of the literates, total male main worker and total female main worker, total male cultivators and total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers. All these information have been covered in 39 columns.

The urban/village PCA contains 28 cols. which depicted viz. occupied residential houses, number of households, population, scheduled castes population, scheduled tribes population, literates, main workers showing its four broad divisions, marginal workers and non-workers. All these data have been shown with breakdown by sex. The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and for the rest mouzawise.

The primary census abstracts of scheduled castes and scheduled tribes represent separately information such as scheduled castes and scheduled tribes population, literates, main-workers with board categories, marginal workers and non-workers by sex breakdown of males and females covered in 31 columns.

The 1981 Census classified workers into four major categories. The first and second categories i.e. cultivators and agricultural labourers correspond the categories as followed in 1971. The third category however represents workers corresponding to category v(a) of 1971. Where as all other remaining workers have been grouped together in category iv of 1981. This category includes the workers as categories III, IV, V(b), VI, VII, VIII and IX in 1971.

PHYSICAL ASPECTS

Calcutta, the metropolis of West Bengal, lies within 22°33′ North Latitude and 88°23′ East Longitude. It is situated about 160 Kilometres from the sea on the left bank of the Western branch of the Ganges, called **Hooghly** or **Bhagirathi**. The width of the river Hooghly varies, for instance it is 550 metres at Armanian Ghat and 1.6 Kilometres at its widest points elsewhere. Calcutta occupies a space along the bank of the river about 7.2 Kilometres, estimated from Chitpur on the north to Kidderpore on the south and with an average width of a 2.4 Kilometres from East to West, i.e. from the river bank of the circular road, which forms the eastern boundry. The area of the Calcutta district is 104.00 Square Kilometres while the Municipal Corporation covers 98.79 Square Kilometres. The remaining areas are accounted by the Port and Military establishments. The total road length of the district is 860.00 Kilometres.

The ground on which Calcutta has been built up is a part of the alluvial deposits of the gangetic delta and is elevated not more than 5 or 6 metres.

As Calcutta is situated almost at the limits of the torrid zone and within a degree of the tropic of cancer, the climate of Calcutta is less uniform than the places nearer to the equator. Further more, the contrast of the season is not

so much discernible as evident in the northern region of the country. In fact three seasons can be roughly deleneated viz. (1) the hot season lasting from the middle of March to the setting in of the rains in June, (2) the rains which usually set in about the middle of June and last till the end of September or sometime upto the middle or latter part of the month of October, and (3) the cold season from November to the early part of March. The average temperatures recorded in 1979 were 37°8′ centigrade maximum and 14°7′ centigarade minimum. The annual rainfall recorded in Calcutta in the same year was 1321.1 mm.

Job Charnock is said to have selected the spot being enamoured of the rural beauty of the place. At that time, Fort William, the Esplanade and their surroundings were covered with forests. The forest streched from Chandpal Ghat to Kiddirpure. The heart of the city-chowringhee where now stand the multistoried buildings, was a small village with a number of thatched houses surrounded by a pool of water. Chowringhee was infact considered outside the town limit at that time.

MAJOR CHARACTERISTICS

many years has been a major industrial centre, a major centre of administration, a major centre of trade and commerce and also India's major port. It has housed a large proportion of the nation's banking, insurance and other business and financial institutions. The districts has a good net-work of railways, air and water ways. The two railway headquarters viz., Eastern Railway and South Eastean Railway are situated in Calcutta. The international air port Dum Dum in located at a close proximaty of the city. The Eastern command headquarter is located within the city. According to 1981 census, the city has more than twenty seven thousand shop-cum-residence, about eighteen thousand workshop-cum-residence including Household Industry, about eight hundred Hotels and Sarais, and over forty six thousand shops excluding Eating Houses. Business houses and offices, Factories, Workshops and worksheds and Restaurents, sweetmeat shops and eating places numbering over thirteen thousand, sixteen thousand and one thousand respectively.

PLACES OF TOURIST INTEREST

Calcutta has many a spots of tourists interest. Among them, Zoological Garden, Eden Gardens, Indian Museum, Birla Industrial and Technological Museum, Sahid Minar, Nehru Children Museum, Victoria Memorial, Fort William, Netaji Indoor Stadium, Rabindra Sarobar, Birla Planetorium, Paresh Nath Temple, Kali Temple at Kalighat, Circular Rail are most prominent. The Metro Rail in the city of late has added further attraction to the tourists.

ANALYSIS OF DATA

The following inset tables based on the data extracted from the Primary Census Abstract and Town Directory of the District of Calcutta have been prepared.

TABLE 1

Populalion, Number of Villages and Towns, 1981

Sl. No.	Name of District	Population									No. of Village		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Calcutta	3,305,006	1,930,320	1,374,686	..	..	..	3,305,006	1,930,320	1,374,686	.	..	1

Table 1 indicates the population of Calcutta with break up by males and females separetely. It may be noted here that Calcutta city is coterminus with the Calcutta District of the State of West Bengal.

TABLE 2

Decadal Change in Distribution of Population

Name of District	Population						Percentage decadal Variation (1971-81)		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
Calcutta	3,148,746	..	3,148,746	3,305,006	..	3,305,006	4·96	..	4·96

The percentage decadal variation during 1971-1981 has been shown in table 2. The decadal growth of the district of Calcutta has been registered as 4.96 percent for the decade which is lowest since the inception of Census in 1981. This is due to the fact that the city has reached saturation point from the point of absorption of people and there is little possibility of further horizental or vertical expansion of the city.

TABLE 3

Proportion of Scheduled Castes/Scheduled Tribes Population in Town

Name of the Town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Caste Population to total Population	Percentage of Scheduled Tribe Population to total Population
1	2	3	4	5	6
Calcutta	3,305,006	149,903	4,420	4·54	0·13

Table 3 above presents the proportion of Scheduled Castes and Scheduled Tribes population to total population in the district of Calcutta. It is seen from the table that 4.54 percent of the total population of the district belongs to Scheduled Castes and Scheduled Tribe consititutes only 0.13 percent of the total population.

TABLE 4

Literacy rates for Towns

Name of the Town	Literacy Rate
1	2
Calcutta	69·12

The district of Calcutta being totally an urban area, it is not surprising that there should be a high percentage of 69.12 literates in the population. Sexwise the proportions are 73.47 percent males and 63.01 percent female.

TABLE 5

Table 5 deals with percentage of Scheduled Castes and Scheduled Tribes population, literates, main workers, marginal workers, non workers in Calcutta. It is seen from the table that 34.87 percent of the total population of the district is main workers. The marginal workers constitute 0.32 percent only.

Main workers and the marginal workers together constitute 35.19 percent working force in the district. The total male workers being 55.74 percent and famales 6.33 percent. It is therefore evident that in the district more than 40% males and 90% females are non workers.

Table 6 depicts growth rate, density and sex ratio of the urban population of Calcutta in relation to the State urban population. The population of Calcutta district is totally urban. The table reveals that there has been a downward

trend in regard to the decadal growth of population in the district during the post decades. The decadal growth rate in 1951 was as high as 24.50 percent which was due to large influx of population consiquent on the partition of Bengal in 1947. Whereas lowest decadal growth of 4.96 percent has been recorded this time. The rising trend in respect of density per square kms. has been noted during this period. There is also a noticeable upward trend in the sex ratio. In fact the 1981 census has registered a sex ratio of 712 females per thousand males in the city.

TABLE 7

1	2	3	4	5
1 Calcutta (MC)	0.62	1.51	1.51	5.36

Table 8 presents figures in respect of schools per 10,000 population in Calcutta. The district has less than one institution per 10,000 population at Higher Secondary/PUC level. The Secondary/Matriculation institutions constitute about two per 10,000 population. On the other hand, over five institutions in the primary category per 10,000 population are found in this District.

TABLE 9

No. of Beds in Medical Institution in Towns

Class	Name and Civic Status of the Town	No. of Beds in Medical Institutions per 1,000 Population
	1	2
I	Calcutta (MC)	4.14

The number of beds in the medical institutions per 1,000 population in Calcutta district has been furnished in table 9. In the district the number of beds in the hospitals works out to over 4 per 1,000 population.

TABLE 10

Proportion of Slums Population in Towns

Class, Name and Civic Status of the Town	Proportion of the Slums Population to total Population of the Town	Density in Slums (per Sq. km)
1	2	3
1 Calcutta (MC)	30.26	162,866

Table 10 gives information of the slum population in Calcutta. 30.26 percent of the total population of Calcutta lives in slums. The density per square kilometre in slums works out to 162,866. In comparison, the density of Calcutta district as a whole is 5,462 persons per square kilometre only.

1	2	3	4
1 Calcutta (MC)	Engineering goods	Jute Products	Petrolium

Table 11 gives an account of the most important commodities that are exported and imported in the district. Calcutta with an important port and vast hinterland is a district of great economic activities. It not only manufacture of various products but is also credited with the import and export of various commodities.
