1951 DISTRICT CENSUS HANDBOOK
BROACH DISTRICT

Broach district consisted, at the time of the 1951 Census, of Ankleshwar, Broach, Jambusar and Vagra talukas of the former combined district of Broach and Panchmahals less 24 villages transferred to Surat districtand 1 village transferred to West Khandesh district, with the addition of the former Rajpipla State, 4 villages of the former Baroda State and 2 villages of West Khandesh district. The district had a 1951 population of 706,035 and an area of 2,911·4 square miles according to the area figure furnished by the Surveyor General o India.

This Handbook contains tables for Broach district, compiled after the 1951 Census of India. The main results of the 1951 Census are embodied in the State Tables published for the States of Bombay, Saurashtra and Kutch. In this Handbook, the data are exhibited in greate detail. The numbers given to tables in this publication correspond to those given in the State Census Report. The following tables for the district have, however, not been included in this Handbook :—

A-II Variation in population during fifty years.

A-IV Towns classified by population with variations since 1901.

D-IV Migrants.

In the E-Summary table, in this Handbook, some columns have been omitted. In the case of the C-series of tables, except C-I, the data were extracted on the basis of a sample count of approximately 10 per cent of the Census slips, instead of a full count of all the slips. The C-I table was prepared from a four per cent sample of the household recorded in the National Register of Citizens relating to each town or village.

In 1941, the population figures were exhibited according to communities in the "Village Handbooks" published by the Government of Bombay. In 1951, the basis of classification at the Census was changed from a social to an economic one, and the figures for villages given in the Primary Census Abstracts and in tables A-V, B-I, B-II, C-II and E, are according to the following eight Livelihood Classes :—

Agricultural Classes

I. Cultivators of land, wholly or mainly owned ; and their dependants.

II. Cultivators of land, wholly or mainly unowned ; and their dependants.

III. Cultivating labourers ; and their dependants.

IV. Non-cultivating owners of land ; agricultural rent receivers and their dependants.

Non-Agricultural Classes

Persons (including dependants) who derive their principal mean of livelihood from :—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

Dependants, whether earning or non-earning, were classified at the census according to the principal means of livelihood of the persons on whom they were dependent.

The Primary Census Abstracts, which contain basic information in respect of every village and town, have been arranged according to talukas and petas, units into which every district is divided for administrative purposes. The taluka was, however, too small a unit to adopt for preparing the main census tables. Therefore, in the B, C and D-series of tables figures have been given for tracts and not for talukas and petas. Before sorting the census slips and tabulating the results, tracts were formed by combining the rural and urban areas of two or more talukas or petas. The tracts into which Broach district was divided for this purpose are shown below :—

Rural Tracts

(1) Rural area of Broach taluka.

(2) Rural areas of Nandod, Jhagadia and Dediapada talukas and Valia and Sagbara petas.

(3) Rural areas of Ankleshwar, Vagra and Jambusar talukas and Amod and Hansot petas.

Urban Tracts

(1) Urban areas of Broach and Nandod talukas.

(2) Urban areas of Ankleshwar and Jambusar talukas and Amod and Hansot petas.

Urban areas comprise the towns shown in table A-V.

Shortly before the 1951 population census, a census of Small Industries was taken, and the results of this census are given in the table called "Small Scale Industries Census-Employment in Establishments", included in this Handbook.

The intention was to find out something about Cottage and Home industries and small workshops. The larger establishments, that is, power-using establishments with 10 or more workers, and non-power using establishments with 20 or more workers, were excluded from the scope of the enquiry as they now submit returns under the Factory Act.

The enquiry did not concern itself also with workers functioning on their own and not employing other people, except when looms were used. If even one loom was used a return was required. Otherwise, the concept was of an enquiry which embraced all forms of associative activity where articles were produced, repaired or otherwise treated for sale, use or disposal.

11. Valia ..	184·5	98	..	7,825	7,825	..

Note.—(1) In the Primary Census Abstracts the area figure of each village is given. The arithmetical totals of these areas, however, do not add up to the area figures supplied by the Collector for talukas and petas. In column 2 of this table and column 2 of the E-Summary Table the area figures of talukas and petas supplied by the Collector from the annual land revenue return District Form No. 1 have been utilised. On the basis of those figures the total area of the district comes to 2,934·2 square miles. This is only 22·8 square miles more than the area figure of 2,911·4 square miles supplied by the Surveyor General of India. The taluka or peta area figures supplied by the Collector may be assumed to be more accurate than the arithmetical totals of village areas shown in the Primary Census Abstracts.

31	50,131	..	25,680	25,680	..	24,451	24,451	..

(2) The number of villages shown in column 3 is the number of revenue villages, excluding uninhabited villages and villages which form part of Municipal areas.

(3) The number of towns given in column 4 is the number of towns shown in table A-V. In general, a town means a Municipal area, Cantonment area or a place which has a population of 5,000 or more persons and exhibits urban characteristics.

(4) The number of occupied houses given in columns 5, 6 and 7 is the number of census houses that were occupied at the time of the census.

A house for census purposes meant " a dwelling with a separate main entrance ". Thus more than one household might be found in the same census house.

DISTRICT : BROACH

NOTE :— Where a person was in receipt of an income and that income was sufficient at least for his own maintenance then he, (or she, as the case might be) was to be regarded as a self-supporting person for purposes of the census enquiry. Any one who was not a self-supporting person in this sense was a dependant. A dependant might be either an earning dependant or a non-earning dependant. The test was whether he secured a regular income even though it might be small. Where the income which he secured was not sufficient to support him that person was an earning dependant. A person who did not earn any income either in cash or in kind was a non-earning dependant.

ECONOMIC

EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN

DISTRICT

NOTES :—(1) In this table, the self-supporting persons in the non-agricultural classes have been classified according to the productive industries and services in which they were engaged. In addition to the 54,203 self-supporting persons shown in the table, there were 1,273 self-supporting persons who derived their livelihood from unproductive activities as shown below :—

Non-productive means of livelihood	Persons	Males	Females
(1) Persons living principally on income from non-agricultural property	236	158	78
(2) Persons livinig principally on pensions, remittances, scholarships and funds.	333	316	17
(3) Inmates of jails, alms houses and recipients of doles.	1	...	1
(4) Beggars and vagrants ...	703	508	195
(5) All other persons living principally on income from non-productive activities.	...	...	...

TABLE-B—III

INDUSTRIES AND SERVICES BY DIVISIONS AND SUB-DIVISIONS

BROACH

(2) The census definitions of the terms employer, employee and independent worker were as follows :—

Employer :—A person who had necessarily to employ other persons in order to carry on the business from which he secured his livelihood. (Thus, if a person employed a cook or other person for domestic service, he was not to be recorded as an employer merely for that reason.)

Employee :—A person who ordinarily worked under some other person for a salary or a wage in cash or in kind, as a means of earning a livelihood.

Independent Worker A person who was not employed by anyone else and who did not also employ anyone else in order to earn his livelihood.

DISTRICT INDEX OF NON-AGRICULTURAL OCCUPATIONS

DISTRICT BROACH

This index shows the number of self-supporting persons, males and females, having as their principal means of livelihood, the productive occupations shown in the index.

The index should be read with Economic table B-III. There were 1,273 self-supporting persons who derived their principal means of livelihood from unproductive activities as mentioned in the note to that table.

The group code numbers shown in column '2' of the index are the numbers given to the various occupations under the Indian Census Economic Classification Scheme.

Occupation	Group Code No.	Population.		
		Persons	Males	Females
Aerated waters and other beverages manufacture.	2.40	34	34	..
Aerated waters and ice vendors in shops ..	6.12	72	71	1
Artists, sculptors and image makers ..	9.71	49	49	..

Primary Census Abstracts

These abstracts show figures of population according to eight livelihood classes for every town and village. In the case of most municipal areas, figures have been given for wards as well. These abstracts are in essence a village directory, with the data exhibited according to livelihood classes, instead of communities as in 1941.

The area figures given in column 3 have been obtained from the District Inspector of Land Records of Broach or from local records. The total area of Broach District as calculated by the Surveyor General, India, is 2911.4 square miles.

The figures given in columns 4 and 5 and 9 to 12 have been extracted from the National Registers, prepared by enumerators after the census. These Registers consisted of a transcription of the replies to the more important census questions in respect of every person enumerated. Figures of literates according to tracts, derived from the census slips, shown in table D-VII, are more reliable than the village figures derived from the National Registers. The census slip on which the replies to the census questions were recorded was the main document. The National Register was merely a copy. In addition, mistakes seem to have occurred while extracting literacy figures for villages in the Tabulation Office. The percentage of literacy in the district was 27.90 per cent. according to table D-VII. It was 27.52 per cent. according to the 10 per cent. sample table C-IV and 25.45 per cent. according to the figures given in the Primary Census Abstracts.

Information contained in columns 29 to 33 has been extracted from the data collected for each village by the Bombay District Gazetteers (Revision) Editorial Board.

The following abbreviations have been used in the abstracts :—

M. for Municipality.
P. S. for Primary School.
V. P. for Village Panchayat.
C.C.S. for a Co-operative Credit Society.
C. S. for a Co-operative Society of any other kind.
Sun. for Sunday.
Mon. for Monday.
Tues. for Tuesday.
Wed. for Wednesday.
Thurs. for Thursday.
Fri. for Friday.
Sat. for Saturday.

Total for peta ..		171.1	8,649	9,508	44,984	23,403	21,581	872	242

Note :— The total area figure for the peta supplied by the Collector from the annual land revenue return District Form No. 1 is 114,895 acres and 18 gunthas, *i. e.* 179.5 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the peta as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the District comes to 2,934.2 square miles, and this figure differs from the District area figure supplied by the Surveyor General, India, by only 22.8 square miles.

Note :—The total area figure for the taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 102,334 acres and 29 gunthas, i. e. 159.9 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the District comes to 2,934.2 square miles, and this figure differs from the District area figure supplied by the Surveyor General, India, by only 22.8 square miles.

Note :—The total area figure for the taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 161,715 acres and 29 gunthas, i. e. 252.7 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934.2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles.

	Total for villages and taluka	**379.2**	**4,158**	**4,759**	**30,051**	**15,647**	**14,404**	**61**	**10**

Note :— The total area figure for the Taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 250,677 acres and 13 gunthas, *i. e.* 391·7 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934·2 square miles, and this figure differs from the *district area figure* supplied by the Surveyor General, India, by only 22·8 square miles.

Note :— The total area figure for the peta supplied by the Collector from the annual land revenue return District Form No. 1 is 98,548 acres and 12 gunthas i. e. 154.0 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the peta as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934.2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles

Note:—The total area figure for the Taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 246,954 acres, 31 gunthas, *i. e.* 385.9 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934-2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles.

Total for villages and taluka		**292.8**	**13,755**	**15,168**	**81,201**	**41,794**	**39,407**	**205**	**131**

Note :— The total area figure for the Taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 200,783 acres and 14 gunthas i.e. 313·7 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934·2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22·8 square miles.

	Total for villages ..	**428.0**	**14,150**	**14,816**	**82,750**	**42,694**	**40,056**	**153**	**44**
	Total for taluka ..	**429.3**	**17,861**	**18,703**	**100,170**	**51,683**	**48,487**	**254**	**87**

Note :— The total area figure for the taluka supplied by the Collector from the annual land revenue return District Form No. 1 is 279,494 acres and 13 gunthas i. e. 436·7 square miles. This figure does not agree with the arithmetical total of the area figures forvillages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector , the area of this district comes to 2,934·2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles.

Note :— The total area figure for the peta supplied by the Collector from the annual land revenue return District Form No. 1 is 81,656 acres and 9 gunthas i. e. 127.6 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the peta as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934.2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles.

	Total for villages and taluka	**308.0**	**7,696**	**9,186**	**44,717**	**23,130**	**21,587**	**1,487**	**1,173**

Note:—The total area figure for the taluka supplied by the Collector from the annual land revenue return District Form No.1 is 222,740 acres and 39 gunthas i. e. 348.0 square miles. This figure does not agree with the arithmetical total of the area figures for villages given in column 3 of the Abstract, but it may be taken to be more accurate for the taluka as a whole because, on the basis of this and the other taluka area figures supplied by the Collector, the area of the district comes to 2,934.2 square miles, and this figure differs from the district area figure supplied by the Surveyor General, India, by only 22.8 square miles.
