Appendix III - Publication Plan 393 - 395

FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third part, Part C of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this Statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations is the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D.Block level will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of the State Govt./UT administration and the Census Organisation. The data have been collected and compiled under the direction of Ms. Sobha Nambisan, Director of Census Operations, Karnataka on behalf of the State Govt. administration which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr.K.P.Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M.Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K.Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K.Singh, Deputy Director who was assisted by S/Shri V.K.Jain and Hariram, Investigators and staff. Technical guidance in the preparation of the maps was initially provided by Dr.B.K.Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992.

A.R.Nanda
Registrar General, India

PREFACE

In the foreword to the 1991 series of the District Census Handbooks, Sri A.R.Nanda, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain the salient data on the population for every village and town as revealed by the 1991 Census. They also contain a wealth of information regarding these villages and towns which, although not part of the population census, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information has also considerable importance in the context of planned development.

The District Census Handbook is therefore divided into two parts: Part A containing information regarding each village and town (Village Directory and Town Directory) which is not census data and part B which contains the data on the population collected during the 1991 Census - the Primary Census Abstract. The data published in Part B was collected in February 1991 at the time of the population census. This data was then manually tabulated in the Regional Tabulation Offices set up for the purpose. Subsequently, as a part of the countrywide project taken up in collaboration with the National Informatics Centre, the Primary Census Abstract data was computerised. The data for Part B of the District Census Handbook was therefore available on tape for the entire country by November 1992. The State Informatics Officer of the National Informatics Centre at Bangalore supplied the print-outs of the Primary Census Abstract data which helped us to bring out the Part B portion of the District Census Handbook of each district fairly quickly.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in early 1990 and continued till the middle of 1992. For operational convenience, the Village Directory format was divided into two portions, one relating to the area and land use particulars and the other relating to the amenities available in each village. The relevant formats were mailed to the Deputy Commissioners of Districts and Chief Secretaries of Zilla Parishads for obtaining the villagewise particulars. Similarly the Town Directory formats were mailed to the Deputy Commissioners and Commissioners of Corporations. The villagewise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1981 District Census Handbooks.

Since the Primary Census Abstract data was available on the computer, it was decided to publish the District Census Handbooks in two separate volumes, with Part B appearing in print first.

In the preparation of the District Census Handbooks the role of the Census Directorate is that of data collector. For accomplishing this task we have had the ready co-operation of the staff of different departments of the State Government. The cost of printing of the District Census Handbooks is borne by the Government of Karnataka.

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation of this volume.

I am thankful to Shri A.Venkateshan, the State Informatics Officer, National Informatics Centre, Bangalore for all the assistance he and his staff members have rendered for computerisation of the data and for preparation of the camera ready copy of the manuscripts of all the Districts.

I am deeply grateful to Shri A.R.Nanda, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Shri M.K.Jain, the present Deputy Registrar General (SS) as well as to Mrs. Minati Ghosh, Deputy Registrar General (Map).

Lastly, I am thankful to the Government of Karnataka for having readily agreed to bear the cost of printing these District Census Handbook volumes and to the Director of Printing, Stationery and Publications for the keen interest he has evinced in bringing out these publications.

Bangalore,
Date: 16-11-1992

ANALYTICAL NOTE

Brief History of the District Census Handbook :-

The District Census Handbook series was, for the first time, included in the census publication programme at the 1951 census in order to satisfy the growing demand for micro-level data by the administrators, the planners and the other census data users. The District Census Handbooks sought to replace 'Part IV - Taluk Tables' and 'Part V - Village Tables' of the earlier censuses and to present the basic demographic and economic data in the form of 'Primary Census Abstract' in respect of each and every village and town within the jurisdiction of the district concerned. In addition, these volumes were to contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

At the 1961 census, the scope of the District Census Handbook was greatly enlarged by incorporating in it - (i) a descriptive account of the district, (ii) a set of non-census tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban (census enumeration block level) Primary Census Abstract containing the ninefold industrial classification of workers. In a somewhat general way, information on the availability of certain basic amenities in villages and towns, such as the sources of drinking water and educational institutions, was also presented in these volumes. These general guidelines were, by and large, followed in Karnataka too. However, the scope of the District Census Handbooks of 3 out of the then existing 19 districts, namely Bangalore, Dharwar and Mysore, was confined to the publication of the village-wise and urban (census enumeration block wise) Primary Census Abstract only.

The 1971 census witnessed an overall improvement in the matter of compilation as well as presentation of the data. A country-wide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. In 1971, the District Census Handbook was split up into three portions - (i) Part A - consisting of land use data on villages and also the data on the nature and extent of amenities and services available in the villages and towns of the district - presented in the form of Village Directory and Town Directory respectively, (ii) Part B - consisting of the Primary Census Abstract (including the nine-fold industrial classification of workers) for the district, the taluks, the towns, the villages and the census enumeration blocks in case of towns; and (iii) Part C - consisting of an analytical note based on an analysis of the census data as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in minute detail, a set of statistical tables based on the census data in respect of the district and the constituent taluks and towns thereof besides a set of tables generated on the basis of the villagewise census data in association with the villagewise data on the availability of amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overview of the developmental programmes implemented in the district during the preceding decade. Publication of the District Census Handbooks was planned in such a way as to minimise the delay inherent in the compilation of a voluminous mass of data gathered from different sources. Accordingly, 'Part A', comprising the Village Directory and the Town Directory for the finalisation of which there was no apparent need to wait till the completion of the tabulation of the data gathered at the census, was to be published first and 'Part B', consisting of the Village/Urban Primary Census Abstract was to be released next. A lower priority was assigned to 'Part C' for the obvious reason that besides administrative statistics it was to include a set of socio - demographic and economic tables generated on the basis of the data gathered at the census and an analytical note prepared thereof. In Karnataka, however, 'Part A' and 'Part B' portions of the District Census Handbooks were combined together and published in a single volume for each district except Bangalore. In the case of Bangalore District, since it was felt that the size of such a combined volume would be unweildy, Part A and Part B were published separately. As regards 'Part C', compilation of data took more time than anticipated and, in addition, there was an inordinate delay in executing the printing job at the State

Directorate of Printing. As a result, only a portion of Part C (depicting some of the census tables) relating to Bangalore District was published somewhat belatedly and the proposal to publish the remaining portion of Part C for Bangalore District as well as the entire portion of Part C for the other districts was finally abandoned.

Instead of witnessing an expansion as in the past two censuses the scope of the 1981 series of the District Census Handbooks was curtailed to a considerable extent in that it was confined to the publication of Village Directory, Town Directory and the Village/Urban Primary Census Abstract. Thus, at the initial stage itself there was no proposal to compile and publish the administrative statistics and the various socio-demographic and economic tables based on the census data, that is, the portion which constituted 'Part C' of the 1971 series. But for this change, the approach in 1981 regarding uniformity and comprehensiveness were very much the same as in 1971. In order to avoid delay in publication, as in the past, the District Census Handbook was proposed to be published in two parts, namely, 'Part A' consisting of the Village Directory and Town Directory and 'Part B' consisting of the Village/Urban Primary Census Abstract besides the Special Primary Census Abstracts at taluk/town level in respect of the Scheduled Castes and Scheduled Tribes population of the district.

At the 1981 census, the contents of the Village Directory and the Town Directory were slightly enlarged and the formats were restructured. In the Village Directory all the amenities except power supply were brought together under a broad heading with the provision that 'in case an amenity is not available in the referent village, the distance to the nearest place where that particular amenity is available may be indicated in broad ranges'. A new item 'approach to the village' was included. In the remarks column, a provision was made to report the number of copies of newspapers in circulation in the village as also the number of motor cars, the number of motor cycles and the number of tractors available in the village. Further, in order to examine whether there is any correlation between the availability of amenities and the population size of a village, an additional column was provided in the Village Directory to indicate the population and number of households. The contents of Part A were further enlarged by including two appendices, namely, a list of villages not having any amenities and a distribution of villages according to the proportions of Scheduled Castes and Scheduled Tribes in the total population of the village. The Town Directory formats were also modified by the addition of a few items such as class of town, population, Scheduled Castes and Scheduled Tribes population, decadal growth rate of population, working women's hostel, adult literacy classes/centres, storage system regarding drinking water supply etc., and also by providing for recording the information about the nearest place (and distance) having educational, medical and fire-fighting facilities in case such a facility is not available in the referent town. As compared to 1971, while one statement indicating religion-wise population of the town was dropped, another statement to provide information about the amenities available in notified slums in Class I and Class II towns was added. As regards the Primary Census Abstract of towns, the urban block-wise presentation of data was given up and details were presented only upto the level of Wards/Divisions. However, information on the number of persons belonging to Scheduled Castes and Scheduled Tribes was furnished for each census enumeration block within the town in the form of an appendix and an annexure thereto provided the description of the boundaries of each census enumeration block. Further, instead of the nine-fold classification of workers adopted at the 1971 census, on this occasion the classification was restricted to 4 categories. In Karnataka, in 1981 also, both Part A and Part B portions of the District Census Handbooks were published together in a single volume for each district. However, because of certain technical compulsions, all the information relating to Scheduled Castes and Scheduled Tribes was excluded from the main formats and was presented separately at the end in the form of a Supplement (separate booklets were brought out in the case of Bidar and Mandya Districts).

2. Scope of the 1991 District Census Handbooks:

As in 1981, in 1991 too, the District Census Handbooks are proposed to be brought out in two portions, namely Part A consisting of the Village Directory and the Town Directory and Part B

consisting of the Village/Urban ward-wise Primary Census Abstract in addition to the District Primary Census Abstract and the Special Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes. Though, the scope of the 1991 series of the District Census Handbooks has, by and large, remained the same as in 1981, a few significant changes have been made in the Village Directory format as well as the Primary Census Abstract format. In Karnataka, unlike at the previous censuses, on this occasion, the 'Part A' and 'Part B' portions of the District Census Handbooks of each district are being brought out in separate volumes.

The manner of presentation of data has also undergone a significant change in that the Village Directory and the Primary Census Abstract data are presented according to the location of villages and towns within the jurisdiction of a Community Development Block rather than their location within a taluk*. In other words, the traditional practice of taluk-level presentation of data has now been givenup in preference to the Community Development Block level presentation of data which is considered as more meaningful in the present day context. Since C.D.Block is the lowest administrative unit for developmental planning, the choice of the C.D. Block as the unit for data presentation is expected to help the planners in formulating micro-level developmental plans. Another innovation at the 1991 census is the arrangements made for the dissemination of the data in collaboration with the National Informatics Centre through its country-wide computer network. In the published volumes of the District Census Handbooks, therefore, the computer codes assigned to the villages in the 1991 census and the corresponding codes in 1981 are presented so as to facilitate the data users who may prefer to use the data either from magnetic tapes or floppies.

(i) Village Directory :

The Village Directory format adopted for the 1991 series has 18 columns. When examined with reference to the 1981 format it will be noticed that two columns have now been left out - while one of these columns refers to the 'staple food' the other refers to the 'remarks' under which, information about the places of religious, historical or archaeological interest in the village as also information about the number of copies of newspapers in circulation, the number of motor cars, motor-bicycles and tractors available in villages was published in 1981. As compared to 1981, there is no change in the scope and coverage of the information presented in the 18 columns of which 8 are devoted for amenities and 6 are meant for indicating the area of the village and the land use pattern. The remaining four columns are meant for indicating the location code and name of the village, total population and the number of households enumerated in the village and the name of the nearest town as also the distance to that town. The aspects covered under the amenities are: educational, medical, sources of drinking water supply, postal and telegraph, weekly market, communication, nature of approach road and power supply. Further, if a village did not have any educational facility at all, instead of merely reporting the fact and stopping at that, an indication of the distance (in ranges) that the villagers have to traverse to reach a place with educational facilities (at the basic level) is reported. The same procedure of reporting is adopted regarding medical facilities, drinking water supply, postal and communication as well as weekly market facilities. The distance ranges adopted for reporting are the same as in 1981, namely -5 km, 5 - 10 km and 10+km. In an explanatory note, which precedes the presentation of the Village Directory Statements, details about the abbreviations used under various columns are furnished.

* *In Karnataka, the "Taluk Panchayat Samiti" corresponds to the Community Development Block, and for the sake of maintaining uniformity with the all-India pattern, the term C.D.Block has been used throughout in the District Census Handbooks. The jurisdiction of a Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns.*

The main agency which has furnished the villagewise information on amenities is the Zilla Parishad which in turn has collected the relevant particulars through its field formations, namely the Chief Executive Officers (i.e., the Block Development Officers) of the various *Taluk Panchayat Samitis*. These details were examined for consistency as well as with reference to the particulars reported in 1981 and cases of deterioration or of abnormal developments were referred back for reverification and rectification. For instance, as compared to 1981, for several villages, Wells and Tanks did not find a mention as a source of drinking water supply. When referred back, the concerned Chief Executive Officers clarified that in most of these cases, the drinking water wells of yester years have either dried up or fallen into disuse on account of the increasing number of borewells drilled in such villages and also because of the implementation of the National Rural Water Supply Scheme, the Mini-Water Supply Scheme and Accelerated Water Supply Scheme etc. So also regarding the availability of pucca approach road facility several instances of deterioration were noticed. Such cases too were referred back so that the factual data may be verified again and reported for publication. Information about the number of educational institutions, nature of government run medical institutions and postal, phonocom and telegraph facilities as furnished by these officers have been cross-checked with the data obtained from the concerned Departments as well to ensure a higher level of reliability.

In case of uninhabited villages, i.e., villages which returned 'nil' population at the 1991 census count, except the name and the total area no other information is furnished. Instead of putting a dash under each column to indicate this fact, the word 'uninhabited' is printed along the line.

In order to facilitate easy reference, an alphabetical list of villages is given at the begining in respect of each C.D.Block. This list indicates the code numbers assigned to the villages for purposes of census enumeration as well as the computer codes assigned (at the stage of computerisation) as also the corresponding codes according to the 1981 census. At the end of the Village Directory the following appendices are given:- C.D. Block-wise abstract of amenities; list of villages not having any amenities except Drinking Water, land utilisation data in respect of non-municipal towns and distribution of villages according to the proportion of Scheduled Castes population and Scheduled Tribes population.

(ii) Town Directory :

As in 1981, in 1991 too, there are seven statements which furnish information on the following aspects - growth history; physical aspects and locational particulars; municipal finance; civic and other amenities; civic amenities available in the notified slums of Class I and Class II towns; medical, educational, recreational and cultural facilities; and trade, commerce, industry and banking. The scope of the various column headings adopted in 1981 has remained unchanged in 1991. However, in Statement-I, slight modifications have been made to accomodate the 1991 census data - an additional column is provided for indicating the 1991 population and the growth rate registered by the town during the decade 1981-91. In Statement-I an additional column has been provided for indicating the name of the C.D.Block within the jurisdiction of which the referent town is located. It may be incidentally mentioned that, in Karnataka, the civic bodies functioning in the Statutory Towns do not fall within the administrative jurisdiction of the C.D.Blocks (i.e., Taluk Panchayat Samitis).

In the Town Directory statements, the towns are arranged in an alphabetical order of their names and the aggregate particulars about urban agglomerations if any in the district have also been furnished in the same order. Where an urban agglomeration includes two or more independent towns, the names of these constituent towns are shown in the correct sequence as per the alphabetical arrangement of their names. But, the details which ought to have been furnished in the subsequent columns have been skipped with a view to avoiding repetition. Instead, immediately after the name of the town, a cross reference is given by printing the message "see ..... urban agglomeration". The name of the core town of the urban agglomeration too appears at its correct sequence with the legend printed thereafter and immediately below that, i.e., in the next line the same name with the suffix urban agglomeration appears again without bearing any

serial number. Against this name the cumulative totals for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is then followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core town and followed by the others arranged in an alphabetical order of their names. This procedure, it may be recalled, is the same as that adopted in 1971 as well as in 1981 and this enables one to have a fairly good assessment of the data relating to the smaller civic administrative units that form part of the larger unit and also of the aggregate data relating to the larger unit itself. In case there are 'outgrowths' which are not 'urban areas' in their own right, the particulars relating to such areas are merged with the data relating to the concerned core town. Such towns which have 'outgrowths' are marked out by an asterisk mark and for all purposes, the term 'town' would cover the core town as well as its outgrowths. In an appendix the names of the revenue villages which have been identified as outgrowths and the population thereof are indicated separately. In the case of villages certain parts of which are regarded as outgrowths while the other parts are considered as 'rural', the data relating to the outgrowths (i.e., the urban component) is included in the Town Directory statements and the data pertaining to the rest of the portion retained in the rural frame appears in the Village Directory. In Statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole, the legend 'see the constituent towns' is printed against the name of the urban agglomeration instead of allowing the entire line to remain blank.

The particulars furnished in Statement I which deals with the growth history are entirely based on the current as well as the previous censuses. As such, this has been compiled in the Census Directorate without seeking information from the concerned civic bodies. The details presented in the remaining statements have been furnished mainly by the concerned civic authorities such as the Municipal Commissioners, Chief Officers of towns, Secretaries of Mandal Panchayats, Administrative Officers etc. Except for the information regarding municipal finance, most of the information on other apsects had to be gathered by the civic authorities from several offices and institutions located in the town through correspondence and or by deputing officials for the purpose. The particulars so furnished were scrutinised in the first stage and cases of abnormal variations as compared to the situation in 1980 and also inconsistencies were referred back to the reporting agency for reverification and rectification so as to ensure that the details now given in the Town Directory represent the factual position.

The scope of the information presented under various columns and the abbreviations used are explained in a note which precedes the presentation of the Town Directory statements.

(iii) Primary Census Abstract :

The Primary Census Abstract is presented village-wise in the case of 'rural' areas and town-wise (upto ward or division level) in the case of urban areas. The outgrowths of a town are treated at par with a ward or division of the core town irrespective of the number of census enumeration blocks into which it is constituted. Within the district, the Community Development Blocks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each C.D.Block, the total figures with the rural-urban break-up is given first and this is followed by the village-wise data and then by the ward-wise data for the towns if any, within the jurisdiction of the C.D.Block. In the case of a village of which only a portion has been incorporated in a town or has been recognised as an outgrowth of a town, the details relating to only that portion which is not so incorporated or so recognised but has been retained in the rural frame is presented under various columns. The names of villages (and their respective areas) which are fully included in urban areas or have been recognised as outgrowths of towns for purposes of the 1991 Census (but are retained in the jurisdictional lists of the Survey and Settlement authorities) if any within the boundaries of the C.D.Block are indicated in the flyleaf which precedes the PCA statement for the C.D.Block

After presenting the PCA data for all the villages and towns covered by the C.D.Blocks in the district,

the PCA data relating to all the urban areas of the district (i.e., statutory as well as non-statutory towns) are furnished. For this purpose, the towns/urban agglomerations are arranged in an ascending order of their location code numbers. And, for each town the ward or division-wise details are presented here.

In Karnataka, as already mentioned, the jurisdiction of a C.D.Block is coterminus with that of the Taluk of the same name, but excludes the areas incorporated in statutory towns and cities. By and large, a C.D.Block corresponds to the rural areas of the taluk. However, if there are any non-municipal census towns and areas which have been identified as outgrowths of statutory towns within the jurisdiction of the taluk, then such towns and outgrowths are also regarded as lying within the jurisdiction of the concerned C.D.Block. The PCA particulars relating to such units are presented under the concerned C.D.Blocks against the urban category and are repeated again at the end under the caption 'District Urban'.

In the case of an urban agglomeration, the aggregate figures obtained by the addition of the data relating to the constituent towns and outgrowths thereof if any are presented against its name. Thereafter, the data for the constituent towns starting from the core town including the location code, are presented in a continuous sequence. In case a town has outgrowths (which are not towns in their own right) in the first line the aggregates relating to the core town as well as its outgrowths are given and this is then followed by the details relating to the core town and the outgrowths separately. Each outgrowth is treated at par with a municipal ward or division while presenting the ward-wise PCA for towns.

3. Brief note on Census concepts :

Census taking is a massive operation carried out in a short span of time with the active participation of a very large number of census enumerators. The reference moment for the 1991 census count is the sunrise of March 1, 1991. However, the enumeration of the population was spread over a period of 20 days from 9-2-1991 to 28-2-1991 followed by a revisional round from 1-3-1991 to 5-3-1991 for updating the population count with reference to the sunrise on March 1, 1991. The questionnaires canvassed by the enumerators, namely the Household Schedule and the Individual Slip are brief in their wordings and the concepts used for purposes of the 1991 Census Operations and the manner in which the schedules are to be filled in have been explained in a booklet entitled Instructions to Enumerators for filling up the Household Schedule and the Individual Slip. Some of the important concepts and the relevant explanations are indicated in the following paragraphs.

(i) **Urban areas** :- The definition adopted in 1961 and adhered to in 1971 as well as in 1981 (though with a slight modification regarding the classification of fishing and forestry) has been retained for the 1991 census also. According to this definition the urban areas include :

i) all places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees, etc.

ii) all other places which satisfy the following criteria :

a) a minimum population of 5,000

b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits and

c) a density of population of at least 400 per square kilometre (1000 per square mile)

d) all places which, though not satisfying the above criteria, had pronounced urban characteristics.

(ii) **Urban Agglomeration:** This concept, which replaced the concept of 'town-group' in 1971, has been retained for the 1991 census. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to, but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called "urban

agglomeration". An urban agglomeration may consist of :

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a) ; or

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Geographical contiguity with the statutory limits of the core town is the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the urban agglomeration. This is purely a statistical concept and for carrying out the actual census, the administrative jurisdictions of the city or the towns concerned as well as of the outgrowths have been kept quite intact. The data are presented for the urban agglomeration as a whole and also severally for each of the constituent units.

(iii) **Rural areas - i.e., villages** : Areas which are not classified as 'urban' according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages, the boundaries as determined by the local usage have been adopted. The revenue village may consist of a single nucleated settlement or comprise of several settlements or clusters of houses located at several places within the territorial limits of the village or the village may not be having any human settlements at all (i.e., it may be totally uninhabited). The census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule:

1) When the main settlement of the village with or without the surrounding open lands is constituted into an urban area, the remaining tracts of the revenue village are together treated as a separate unit for purposes of census i.e., the truncated portion itself is considered as an independent revenue village.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by a Government Notification such areas, whether populated or not, are excluded from the revenue village concerned and the village boundaries are redefined for census purposes.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged completely under reservoir projects but are still retained in the jurisdictional lists of the Survey and Settlement authorities pending a resurvey and such other procedures, are taken note of as revenue villages but are omitted for census purposes i.e., these are not treated as census villages. Similarly, entire revenue villages, which have been identified as outgrowths of urban areas for purposes of 1991 census are treated not as census villages but as urban areas. The names of such villages, if any, in a Taluk/C.D.Block are indicated in a fly leaf.

4) If there are forest areas that do not form part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit into which such forest areas are divided (eg.Forest Beat) is reckoned as the census village. A Forest Range may consist of several such census villages. (In Karnataka this phenomenon is noticeable only in Kollegal Taluk of Mysore District).

(iv) **Census Enumeration Block :** The smallest unit adopted for census taking is the Census Enumeration Block. Generally, the towns and cities are divided into wards or divisions and, wherever such units exist, their distinctive identities have been maintained. The geographical area comprised in each such ward or division or, the town in its entirety, is constituted into several blocks in such a way that every bit of land specifically stands included in one or the other enumeration block and also that there is no over-lapping of areas. In the urban areas, the Census Enumeration Blocks are constituted in such a way that each such Block contains about 120 households covering a population of about 600 persons. However, in view of the condition that

each block should have clear-cut boundaries easily recognisable on the field, blocks which are either larger or smaller than the norm have also been constituted. In the case of non-municipal towns, if the town boundaries are not specifically notified, the jurisdiction of the entire revenue village concerned is regarded as the jurisdiction of the town as well. In the case of towns which are under the administration of Mandal Panchayats, the Panchayat jurisdiction need not necessarily be identical with the jurisdiction of the non-municipal census town.

In the case of villages, depending upon the population data based on the Houselisting Operations carried out during 1990, each village has been constituted into one or more number of Census Enumeration Blocks. The work-load norm for the rural areas is 150 households covering an approximate population of 750 persons. However, numerous Census Enumeration Blocks with below-norm population have been constituted and a single enumerator has quite often been entrusted with the enumeration work in 2 or more contiguous blocks so as to ensure that the aggregate population is quite close to the norm. Further, in each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting the Blocks. Each hamlet or island, if any, found within the jurisdiction of the village - irrespective of its population size - has been constituted into a separate Block in order to maintain its geographical identity. Further, even the villages known to be uninhabited at the time of houselisting operations have been constituted into separate blocks. In other words, a complete coverage of the territorial jurisdiction of each and every village has been ensured.

(v) **Location Code Number** : Every State in the Country, every District in the State, every Taluk or Town in the District, every C.D. Block (or its equivalent) in the District, every village in the taluk and every ward or division in the city or town and every enumeration block in the village or town is assigned a number in a particular order for carrying out the census enumeration. When these numbers are written side by side in the same order, starting from the State and separated by an oblique mark, the identity of any particular census enumeration block can be known quite easily. The numbers assigned are in Arabic numerals, except in the case of towns in which case Roman numerals have been adopted. For assigning the location code numbers the States in the Country, the Districts in the State, the Towns in the District and the Taluks/C.D.Blocks in the District are arranged in the alphabetical order of their names. The villages in a taluk are organised into revenue circles or hoblis for administrative purposes and each such unit will have a headquarter town or village. The identity of such units is maintained while assigning the location code numbers. Starting from the circle of which the Taluk Headquarters happens to be the Circle headquarters as well, the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction or in a serpentine manner starting from the north-west corner. After exhausting all the villages in that circle, the villages of the adjacent circle are assigned numbers in the same manner. The numbering of villages run continuously for the Taluk through the different Circles or Hoblis.

The entire set of the 1991 census data relating to the village directory and the village/urban ward-wise PCA has been computerised. For this purpose a separate code structure has been developed. The computer codes assigned to the villages in each Taluk or C.D.Block are indicated in the alphabetical list of villages along with the corresponding location code numbers assigned for enumeration purposes. So also particulars about the codes assigned to towns are indicated in the alphabetical list of towns which precedes the presentation of the PCA statements in respect of the urban areas of the district.

(vi) **Building** : A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office-*cum*-residence, etc.

(vii) **Census House** : A 'census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

(viii) **Household** : A 'household' is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households having unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashramas* etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not have a house to live in and may temporarily dwell on the roadside pavement, in hume pipes, temples, *mantaps*, platforms etc., or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households, referred to as 'Houseless Households' for census purposes, were enumerated on the night of February 28, 1991.

ix) **Criteria for enumeration of a person in a particular household :**

1) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1991 (both days inclusive);

2) All those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 - 28, 1991) but are not present at the time of the enumerator's visit ;

3) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1991 and

4) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

(x) **Literate** : A person who can both read and write with understanding in any language is 'literate'. A person who can merely read but cannot write, is not 'literate'. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 6 years or less are treated as illiterate.

(xi) **Workers and Non-workers** : For census purposes 'work' is defined as 'participation in any economically productive activity'. Such participation may be physical or mental in nature and would involve not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The reference period for determining whether a person is a worker or a non-worker is the year i.e., the 365 days, preceding the date of enumeration. The criterion is liberal and, even a person who has participated in the production of goods and services for a very brief period is entitled to be categorised as a worker. Depending upon the nature of his or her activity during the reference period, every person enumerated at the census is classified as either a worker or a non-worker.

Among 'workers' however there are two categories:

Main Workers : Those who have worked for a major part of the year i.e., for 183 days or more (6 months or more) during the reference period even though this may be in broken spells and in different occupations.

Marginal Workers : Those who have not worked for a major part of the year under reference i.e., those who have worked for less than six months (i.e., for less than 183 days) during the entire reference period.

In view of the past experience that women are often classified as non-workers because of non-reporting of their work or as those who have not worked for a major part of the year, special efforts have been made at the 1991 census for eliciting accurate information by asking probing questions.

In respect of main workers as also marginal workers, further details on the sector of economy in which they worked, the actual nature of work done by them, their employment status (i.e., employer, employee, unpaid family worker or own account single worker) have been gathered at the census.

Important terms such as cultivators, agricultural labourers and household industry are explained below.

a) **Cultivators**: For purposes of census, a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation as well. A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land, will not be treated as 'cultivator'. Similarly, a person working in another person's land for wages in cash or kind or a combination of both will not be treated as ' cultivator'.

Cultivation involves ploughing, sowing and harvesting. For certain reasons, the growing of certain crops is not considered as cultivation and a person engaged in growing of such crops is not regarded as a cultivator. A person can be classified as cultivator or not, *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation.

1. Cereal and Millet crops : Paddy, wheat, jowar, bajra, maize, ragi, barley, etc.
2. Pulses : Arhar, gram, kesari, moong, masur, urd, etc.
3. Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred crops.
4. Oil Seeds : Sesamum, ground-nut, rape seed, mustard, linseed, sunflower, castor, etc.
5. Cash crop : Sugarcane

The growing of the following crops *is not considered* as cultivation :

1. Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. Edible nuts (other than groundnut) : Walnut, almond, cashewnut, etc.
3. Fruits : Bananas, apples, grapes, mangoes, oranges etc.
4. Coconut
5. Ganja, cinchona, opium and medicinal plants.
6. Betel nuts (areca)
7. Flowers
8. Roots and tubers, chillies and spices
9. Vegetables
10. Other crops not specifically included under cultivation.

b) **Agricultural Labourer** : A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on the land on which he or she works.

c) **Household Industry** : Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in the case of urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry

should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. The goods produced should not be exclusively for consumption by the household itself but should be wholly or partly for sale.

d) **Other Workers** : All workers, i.e., those who have been engaged in some economic activity during the reference period of last one year, who are not Cultivators or Agricultural Labourers or workers in Household Industry were categorised as 'Other Workers' (OW) at the time of census enumeration and further details about the nature of industry, trade or service in which they were engaged were gathered by the enumerators. On the basis of this descriptive information, at the tabulation stage, each such worker has been further categorised as belonging to one or the other of the following Industrial Categories based on Revised National Industrial Classification - 1987.

III Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities;

IV Workers in mining and quarrying activities;

V(b) Workers in manufacturing, processing, servicing and repairs which are carried on as other than household industry;

VI Workers in construction;

VII Workers in trade and commerce;

VIII Workers in transport, storage and communications, and

IX Workers in other services.

(xii) **Non-workers** : All those who have not at all participated in any economic activity during the reference period of one year preceding the date of enumeration are classified as non-workers.

Depending upon the manner in which such non-workers engaged themselves for most of the time during the reference period of one year they are classified into one or the other of the following six categories at the time of census enumeration itself. However, the Primary Census Abstract presented in this volume does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) **Household duties** : This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) **Students** : This will cover all full-time students including children attending school.

c) **Dependents** : This category includes all dependents such as infants, children not attending school and permanently disabled from work because of illness or old age. Dependents will include even able bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) **Retired Persons or Rentiers** : A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he or she does not have to work, will come under this category.

e) **Beggars** : This will cover beggars, vagrants or cases such as persons without indication or source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

f) **Inmates of Institutions** : This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institutions would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

4. Brief History of the District*

Bijapur district has a glorious past dating back to the legendary period and the pre-historic times. Several places of this district such as Aihole, Badami, Dhulkhed, Galagali, Mahakuta, etc., find a mention in Ramayana and are associated with legends connected with sages and demons of the remote past. According to one such legend, two demons - Ilvala of Aihole and Vatapi of Badami - were tormenting the righteous people of this region until they were ingeniously destroyed by sage Agastya. Another legend identifies Dhulkhed as the place where Daksha Prajapati - father of Dakshayini the consort of Shiva - performed the great sacrifice. Sage Galava is believed to have had his hermitage at Galagali on the banks of the river Krishna. A temple at Hippargi is pointed out as the one originally built by sage Jamadagni, the father of Parashurama. The fact that certain tracts of this district were inhabited by early man during the pre-historic times has been substantiated by archaeological discoveries. Several palaeolithic sites have been found on both the banks of the Malaprabha river. One of these, the site at Khyad in Badami taluk, has yielded several hundreds of tool specimens. Herkal, another site located on the banks of the Ghataprabha in Bagalkot taluk, has yielded fine specimens of neoliths and microliths, polished and painted pottery, shell ornaments, terra-cotta figurines and iron-slag in large quantities. Megalithic tombs are found in large numbers around Badami and Aihole. In his travelogue, Ptolemy, the Greek Geographer (150 A.D.) mentions several places of this district (eg., Badami, Indi, Pattadkal, Kalkeri etc.,).

As in most parts of North Karnataka, in Bijapur district too, the available earliest local historical records belong to the sixth century A.D. In an inscription dated in 543 A.D., Badami - the place of considerable historical importance - is stated to have been fortified by Pulikeshi-I. It appears to have been a stronghold of the Pallavas during the 5th as well as the early part of the 6th century A.D. Chalukyan King Pulikeshi-I wrested Badami from the Pallavas during the middle of 6th century A.D., fortified it and made it his capital. The cave temples at Badami were constructed during the reign of his sons Krith-varman and Mangalesha. Pulikeshi-II, who ascended the throne in 610 A.D., was the most powerful and illustrious ruler of the early Chalukyan dynasty. By virtue of his own powers and intelligence, he quelled the internal rebellion and began a chain of conquests. He overthrew the Kadambas of Banavasi, the Gangas of Talakad, the Alupas of Humcha, the Mauryas of Konkan, the Malavas of Gurjara, the Kosalas, the Kalingas as well as the Pallavas and the Cholas to establish a vast empire from Cauvery to Narmada. He had his capital at Badami of this district. He vanquished Harshavardhana of Kanuaj and gained the title 'Parameshvara' or Supreme Lord. The Chinese pilgrim, Hiuen Tsang, who toured India from 629 to 645 A.D., visited the Chalukyan capital and has left a vivid description of certain parts of the Chalukyan Kingdom. However, towards the close of his reign, Pulikeshi-II was defeated by the Pallava King Narasimhavarman-I and it was left to his son, Vikramaditya (651-681 A.D.) to avenge this defeat and re-establish the Chalukyan empire.

The Chalukyan domination came to an end in 757 A.D. when Krithvarman-II was overthrown by Rashtrakuta King Taila-II. The supremacy of the Rashtrakutas lasted till 973 A.D., and during the period between 757 A.D., and 973 A.D., the Chalukyas lingered on to power in a feudatory capacity in different parts of the Rashtrakuta empire. In 973 A.D., Taila II, a Chalukyan Prince who was ruling over a portion of Bijapur district took advantage of the weak rule of Kakkala the younger brother of Krishna III, killed him and occupied the throne putting an end to 220 years old rule of the Rashtrakutas. Taila II, first established himself at Manyakheta, the capital of the Rashtrakutas and later on, moved his capital to Kalyana of Bidar district.

*Source : *Gazetteer of India - Mysore State, Bijapur District, Bangalore, 1966.*

Vikramaditya VI (1076-1126 A.D.) is perhaps the greatest ruler of this dynasty. He established a new era in which all his grants are dated and which was in use in the Chalukyan territory for nearly a century. During the reign of Taila III (1151-1163 A.D.), his Bijapur vassal was the Sinda Mahamandaleshvara Chamunda II who was in charge of Bijapur territory. His commander-in-chief was Mahamandaleshvara Bijjala of the Kalachuri family. Bijjala, usurped the throne, assumed all the royal titles and established himself as the undisputed monarch. The Kalachuri rule however lasted for a period of about 2 decades, for in 1182 A.D., Someshvara IV, son of Taila III of the Chalukyan dynasty regained the kingdom and established a semblance of Chalukyan sovereignty for a period of about 7 years. After 1189 A.D., the Western Chalukyan dominions were divided between the Hoysalas from the south and the Yadavas of Devagiri from the north.

The Yadavas of Devagiri (1185-1312 A.D.) were a dynasty of powerful kings who held the whole of western Deccan before they were vanquished by the Muslim invaders. Their capital was originally at Tenevalage identified by some with Teligi and by others with Tadavalaga (both of which are in Bijapur district), then at Bijapur and finally at Devagiri the modern Daulatabad. Bhillama is the first independent king of this family and he is believed to have founded the city of Devagiri which was subsequently developed as a capital by his son Jaitugi I. Singhana (1210-1247 A.D.) was the most powerful king of this dynasty and a large number of his inscriptions are found in Bijapur district. He was succeeded by his grandson Krishna or Kannara (1247-1260 A.D.). Ramachandra, the son of Kannara who succeeded Mahadeva by-passing the claims of the latter's son Ammana was the last of the great Yadavas of Devagiri. Though the earlier part of his reign was peaceful, the later part was fraught with dangers which resulted in the downfall of the Kingdom and his death in 1310 A.D.

In 1294, Alauddin Khilji invaded the Deccan, sacked Devagiri and forced Ramachandra to acknowledge the supremacy of the Delhi emperor. In 1306, Alauddin Khilji who, murdering his uncle, had usurped the Delhi throne deputed his general Malik Kafur to subdue a great part of the Maratha country including the territory of the Yadavas. In the confusion at Delhi, which followed the assassination of Alauddin Khilji in 1316 A.D., Harapala the son-in-law of Ramachandra restored the former Devagiri territories to independence. However, Bijapur seems to have remained under the control of the Delhi emperors as the seat of a governor. In 1316 and in 1320 A.D., Karimuddin is mentioned as the emperor's governor at Bijapur. In 1318 emperor Mubarak led an army into the Deccan, captured Harapala and flayed him alive. In 1327 A.D., emperor Mohammad Bin Tughlak (1325-1351 A.D.,) established his overall supremacy in the Deccan. From this period onwards, Bijapur, by and large, continued under the authority of the Delhi emperors, even though at about this time Vijayanagar empire was established in the south with Harihara Raya (1335-1350 A.D.) as its first king. Harihara's conquests apparently did not extend beyond the Krishna river in the north.

In 1347 A.D., the *amir* or Chief of Bijapur Ala-ud-din Gangu Bahmani rebelled against the Mughal emperor and founded the Bahmani kingdom at Gulbarga. Within a short period, the whole country between the Bhima and Adoni and between Chaul and Bidar, the northern part of Karnataka and the central Konkan was brought under the authority of Alauddin, the first Bahmani ruler (1347-58 A.D.). During this period, the kindgom had been divided into four provinces centred round Doulatabad, Berar, Bidar and Gulbarga. Of these, the province of Gulbarga which included Bijapur, was regarded as the most important and was entrusted to the person who commanded the greatest confidence of the King and was therefore called the Malik Naib. In 1424 A.D., Ahmed Shah shifted the capital of the kingdom from Gulbarga to Bidar.

In 1478 A.D., the Bahmani Prime Minister Khwaja Muhammed Gavan introduced several

far-reaching reforms in the administration and reconstituted the territory into 8 provinces. The province of Bijapur, together with Mudgal and Raichur, came to be assigned to the Prime Minister, i.e., Muhammed Gavan himself. Later, as a result of a conspiracy, Muhammed Gavan was charged with treason and put to death in 1481 A.D. Consequently Bijapur was conferred on Yusuf Adil Khan and he was appointed as the *tarafdar* of Bijapur. The wrongful execution of Mohammed Gavan, as the remorseful King soon realised, was a grevious blow to the kingdom. The rivalries and the intrigues of the two powerful factions - the Deccanis under the leadership of Nizam-ul-mulk and the Foreigners including the Turks, Arabs, Persians, Afghans and Mughals under the leadership of Yusuf Adil Khan came to the fore and the inevitable faction fights led to the disintegration of the Bahmani kingdom into five separate Sultanates, namely, the Adil Shahi of Bijapur under Yusuf Adil Shah, the Nizam Shahi of Ahmednagar under the Malik Ahmed Bhairi, the Qutb Shahi of Golconda under Sultan Qutb-ul-mulk, the Barid Shahi of Bidar under Quasim Barid and Imad Shahi of Berar under Fatullah Imad-ul-mulk. Though the Bahmani kings were regarded as supreme and continued to rule as late as 1526 A.D., their power was only nominal, for their supremacy actually ceased from about 1489 A.D., when Yusuf Adil Khan threw off his allegiance to the king and established himself as the independent ruler of Bijapur. The Adil Shahi rule which started thus at Bijapur in 1489 A.D., lasted for nearly two hundred years.

Yusuf Adil Khan (1489-1510 A.D.) frequently came into conflict with the Vijayanagar Kings as also was at war with the Muslim kingdoms of the neighbourhood - mainly because of his public profession of the Shia faith. He attacked Krishnadeva Raya when the latter was returning to his capital after defeating Mahmud Shah II, the Bahmani king. In this encounter, Yusuf Adil Khan sustained a defeat and lost his life. He was succeeded by his son, Ismail Adil Shah, then a boy of five. The minister Kamal Shah who was appointed the regent during the young king's minority banned the public profession of Shia faith and later tried in vain to usurp the Bijapur throne and lost his life in the attempt. As soon as Ismail Adil Shah assumed the reigns, he restored the Shia faith which was forbidden by the regent. In 1514 A.D., when Bijapur was attacked by the confederate forces of Berar, Ahmadnagar and Golconda under the leadership of Mahmad Shah II, the Bahmani king, Ismail Adil Shah scored a decisive victory and captured Mahmad Shah II and his son Ahmad whom he treated with courtesy. This battle was followed by the marriage of Ismail's sister with Ahmad, the Bahmani prince. His successor, Ibrahim Adil Shah I (1534-1557 A.D.) gave up the Shia faith and professed the Sunni faith. He was constantly at war with the neighbouring Muslim kingdoms as also with the Vijayanagara. However, at the time of his death in 1557 A.D., Ibrahim was in a treaty of mutual alliance with the Vijayanagar king. He was succeeded by Ali Adil Shah I (1557-1580 A.D.), who, in view of his adherence to the Shia faith had incurred the displeasure of his father and kept in confinement at Miraj. During the initial period of his ascension to the throne, the alliance between Bijapur and Vijayanagara became very close. In fact, when Ali Adil Shah paid a visit to Vijayanagara to offer his condolence to Rama Raya (who had lost his son), Rama Raya's wife adopted Adil Shah as her son. In 1558 A.D., the two kings invaded Ahmadnagar with complete success. However, a few years later, Ali Adil Shah formed a close alliance with the king of Ahmadnagar for the overthrow of Rama Raya. This alliance was cemented by the marriage of Ali Adil Shah with Chand Bibi the daughter of Hussain Nizam Shah of Ahmadnagar. Soon thereafter the kings of Golconda and Berar also joined the confederacy. The four kings finally set out on their expedition against Rama Raya and marched to Talikota (about 64 km. south-east of Bijapur) and made it the headquarters. The 'battle of Talikota' (1565 A.D.) which actually took place near Rakkasa Tangadgi (about 50 km south of Talikota) witnessed the death of Rama Raya

(the Vijayanagara King), treacherous defection of two prominent Muslim nobles with their large battalions to the enemy camp and the brutal massacre of the encircled Vijayanagara army during the confusion that ensued the two above mentioned events which occurred in quick succession. In 1580 A.D., when Ali Adil Shah was assassinated, his nephew Ibrahim Adil Shah II (1580-1626 A.D.) ascended the Bijapur throne. It was during his reign that for the first time, the Bijapur troops were attacked and defeated by the invading Mughal forces at the battle of Sonepur. Ibrahim made overtures to Emperor Akbar for peace and concluded an alliance in 1601 A.D. He is hailed as 'a man of high culture and a glorious king who ruled the longest and the best of all the Adil Shahi monarchs'. He was succeeded by Mahmud Adil Shah (1626-1656 A.D.). In 1631 and again in 1635 A.D., Bijapur was attacked by the Mughals and the distressed king bought peace by agreeing to pay an yearly tribute of Rs.20 lakhs to Emperor Shah Jahan and to cease his association with Shahji who was still up in arms against the Emperor. Again, at the outset of his career, Ali Adil Shah II (1656-1672 A.D.) who succeeded Mahmud Adil Shah had to face an attempt by the Mughals to destroy his kingdom, for he had ascended the throne without any reference to the Emperor and without the observance of any homage. Aurangzeb invaded the kingdom. The siege of Bijapur was carried on with such vigour that in spite of a most stubborn and united defence the city would have fallen had not Aurangzeb, hearing that his father lay at the point of death, concluded a hasty peace, raised the siege and hurried to Delhi. In 1665 A.D., Emperor Aurangzeb resolved to capture Bijapur and sent Raja Jaysingh to invade the Deccan. Though Bijapur was successful in repelling the attackers on this occasion, Ali Adil Shah knew by this time that his State could no longer resist the Mughal power. In 1668 A.D., a treaty was concluded by which the Bijapur kingdom was shorn of its greatness and the river Bhima became its northern boundary. In 1672 A.D., Ali Adil Shah died and Sikandar, a boy of 5 years, ascended the throne. Khawas Khan was appointed as the head of a regency constituted to look after the affairs of the State. Because of internal rivalries and quarrels among the ministers, Khawas Khan opened traitorous negotiations with the Mughals in a bid to hold on to his position. His treason was discovered and he was put to death. The Mughal power nevertheless grew stronger and gradually the task of governing the kingdom became more and more difficult. In 1683 A.D., Aurangzeb left Delhi with a vast army with the intention of conquering the Deccan. The campaign against Bijapur began in 1685 A.D. and in October 1686, Aurangzeb entered the conquered city in State. With this, the rule of the Adil Shahi dynasty came to an end and thenceforth, for a period of 39 years (1686-1723 A.D.), Bijapur was a province of the Mughal empire. Aurangzeb is said to have stayed at Bijapur for about 2 years after its capture and to have carried on operations in the South. He moved out to Akluj in 1689 A.D., when plague broke out in a fierce form in the city and his queen died of the disease. For governing Bijapur, two Mughal officers- one with the title of *Faujdar* and another with the title of *Khalsa Diwan* were appointed.

In 1703 A.D., Chin Kilich Khan (who about 20 years later established the family of Nizams of Hyderabad) was made the governor of Bijapur. However, shortly before his death, in 1707, Aurangzeb appointed his third son Kam Baksh as the governor of Bijapur. On the death of the Emperor, the claims of his eldest son were disputed by Azam in the north and Kam Baksh in the south. After quelling the rebellion in the north, Bahadur Shah marched south against Kam Baksh who had by then assumed the signs of royalty. The inducements and concessions offered by him did not satisfy Kam Baksh. Consequently Bahadur Shah attacked Bijapur and in a battle near Hyderabad Kam Baksh was slain. By 1708 A.D., Sambhaji's son Shahu had established himself at Satara. In 1759 A.D., Peshwa Balaji and his cousin Sadashiv Bhau entered the Mughal

territory and defeated Salabat Jang and his brother Nizam-Ali. Under the treaty which followed, the greater part of Bijapur passed to the Marathas and part of Hungund remained with the Nizam. In 1764 A.D., Haidar Ali of Mysore expanded his kingdom north across the rivers Malaprabha and the Ghataprabha upto the banks of the Krishna. The very next year, Peshwa Madhava Rao (1761-1773 A.D.) succeeded in driving Haidar Ali out of these parts and in regaining the lost territory. However, in 1776 A.D., Haidar Ali crossed the Tungabhadra, defeated the combined armies of the Marathas and the Nizam and made himself the master of the whole country south of the Krishna. After 20 years, in 1787 A.D., his son and successor Tippu Sultan gave up his claims to south Bijapur whereafter the whole of the territory was ceded to the Marathas except part of Hungund which was restored to the Nizam. In 1817 A.D., war broke out between the British and the Marathas and by May 1818, the whole of Bijapur was annexed by the British. The British era which thus started on 17th May 1818 lasted till the dawn of independence on August 15th, 1947.

After the fall of the Peshwas, the areas comprising the present Bijapur district fell to the British under the proclamation of the 11th February 1818. Of these, Bijapur taluk was made over to the Raja of Satara; Indi and Muddebihal were placed under the Sub-Collectorate of Bagalkot. These two taluks at first formed part of Dharwad Collectorate and then of Solapur Collectorate for some time. A new taluk, with its headquarters at Hippargi, was formed in 1839 by transfer of some villages from Indi and Muddebihal. In 1842, there was another large addition as a consequence of an exchange of territory with the Raja of Satara and, another taluk was formed with its headquarters at Mangoli (Bagewadi). On the death of the Chief of Kagvad, 14 villages of Chimalgi Paragana were included in Mangoli taluk. When the Raja of Satara died without heirs, Bijapur was taken over by the British and incorporated with Satara Collectorate in 1848 and later, in 1862, it was transferred to Solapur Collectorate. Indi, Muddebihal, Hippargi (Sindgi), Mangoli (Bagewadi) and Bijapur taluks, which lie between the rivers Bhima on the north and Krishna on the south, belonged to Solapur Collectorate till November 1864. The taluks of Bagalkot, Badami and Hungund formed part of Dharwad Collectorate from 1818 to 1837 whereafter these taluks were transferred to the newly constituted Belgaum district. The death of Govind Rao Patwardhan of Chinchili in 1839-40 and the conviction of Bhaskar Rao in 1857-58 resulted in the addition of 30 villages to these taluks. In pursuance of the recommendations by the Revenue Commissioner of the Southern Division of the Bombay Province, for administrative convenience, a new Collectorate, comprising of 8 taluks and one sub-taluk, was formed in December 1864 with its headquarters at Kaladgi. In 1868, the names of Hippargi and Mangoli were changed to Sindgi and Bagevadi respectively. The headquarters of the district was shifted from Kaladgi to Bijapur in 1885 and from then onwards the district came to be known as 'Bijapur District'. From time to time, thereafter, there were several instances of exchange of villages between Bijapur and its adjoining districts. Jamkhandi and Mudhol, which had previously formed parts of princely States were reconstituted as separate taluks soon after their merger with the Union of India in 1948. The district which formed part of Bombay Province came to be integrated with Mysore i.e., Karnataka State, in November 1956 as a result of the Re-organisation of States. Bilgi, which continued as a *Petha* or Sub-taluk was converted into a taluk with effect from 1st October 1959 bringing the total number of taluks in Bijapur district to its present strength, namely eleven.

5. Location and Physical Aspects

Bijapur district is located in the central sector of the northern-most portion of Karnataka State. The district covers a geographical area of 17,069 sq.km. in the dry and arid zone of the Deccan and happens to be the largest amongst the 20 districts of Karnataka. It lies between the North Latitude parallels of 15 degrees 50 minutes and 17 degrees 28 minutes and the East Longitude parallels of 74 degrees 59 minutes and 76 degrees 28 minutes. Bijapur district is bounded on the north-west and the north by the districts of Sangli and Solapur of Maharashtra State. On all the other sides, it is bounded by districts belonging to Karnataka State itself - on the east by Gulbarga district; on the south-east by Raichur district, on the south by the districts of Raichur and Dharwad and on the west by Belgaum district.

The lands of the district are broadly divided into two types separated by the Krishna until they meet and merge into one another in Muddebihal taluk in the eastern portion of the district. The distinct types of landscapes found in Bijapur district are that of the Deccan trap, the Kaladgi series and the peninsular gneiss. The land between the Bhima in the north and the Krishna in the middle is mainly underlain by the traps. The topography presents a uniform appearance of an undulating plain extensively furrowed by the streams. The area lying between the Krishna and the Malaprabha consists of the sedimentary and slightly metamorphosed rocks which are collectively known as the Kaladgi series and which generally occur in horizontal bands. Here the hills present a dip slope on one side and an escarpment on the other. The outcrops of Kaladgi quartzites occur in two broad bands which, in their residual form, are known as the North Ghataprabha range and the North Malaprabha range. The peninsular gneissic complex forms the basal rock for all other types of lands occuring in the district. However, gneiss appears on the surface mainly in the south-eastern tracts of the district.

Krishna, Bhima, Dhone, Ghataprabha and Malaprabha are the important rivers which flow in the district. The Krishna rises near Mahabaleshwar hills of the Sahyadri mountain range in Maharashtra and enters Bijapur district in Jamkhandi taluk. In its meandering course of about 200 km, cutting across from west to east, the river divides the district into two unequal segments of which the southern one is smaller. In the western sector, for a short distance, the river forms the natural boundary between the districts of Bijapur and Belgaum. Likewise, in the eastern sector too, the river forms the natural boundary between the districts of Bijapur (Muddebihal taluk), Gulbarga (Shorapur taluk) and Raichur for a short distance. In between, the river separates the taluks of Bijapur, Basavana Bagevadi and Muddebihal on the north respectively from the taluks of Bilgi, Bagalkot and Hungund in the south. Under the Multipurpose Upper Krishna Project, work relating to the construction of dams across this river has been taken up near Almatti of Basavana Bagevadi taluk and at Narayanapur near Siddapur P.Nalatwad village of Muddebihal taluk. On completion of this project, the canal network thereof is expected to provide assured irrigation to about 8.43 lakh hectares of land belonging to the districts of Bijapur, Belgaum, Gulbarga and Raichur.

The Bhima river also rises in the Sahyadri mountain ranges in Maharashtra and touches Bijapur district near Desur (Indi taluk). Thereafter, it flows east and constitutes a natural boundary between the districts of Bijapur and Solapur (Maharashtra State) for about 50 km and then turns south-east and forms the boundary between the districts of Bijapur and Gulbarga for a stretch of another 50 km downstream. The Bijapur district, therefore, has only the right

*Source : *Gazetteer of India - Mysore State - Bijapur District, Bangalore 1966.*

bank of the river (i.e., the southern or the western) within its administrative jurisdiction. The bed of the river has a cover of alluvium, about 3 metres thick, below which the hard trap rock is reached. The land along the river is a rolling plain which is quite fertile in several parts wherein fodder crops are raised to feed the cattle. Bhima is one of the chief tributaries of the Krishna.

The Dhone river, also spelt as Don, Done and Dhoni, rises near Jath in Maharashtra. Flowing east and south-east, the river passes through Athni taluk of Belgaum district before entering Bijapur district near Honwad (Bijapur taluk). The river runs across the taluks of Bijapur and Bagevadi in an easterly direction and takes a southern course near Talikota of Muddebihal taluk whereafter it crosses over to Gulbarga district near Shivapura. The outer portions of this river basin are noted for deep black soils which are remarkably fertile. The Dhone valley enjoys the reputation as a rich food-grain producing area, especially during the years of good rainfall. It is famous for rabi crops, particularly wheat and safflower. The water of this river is somewhat brackish and at several places the water turns saline during the drier months of the year. On such occasions salt encrustation also occurs on the banks and dry bed of the river. During the rainy season, the river is subject to flash floods which render crossing of the river extremely dangerous. Even after the rains subside, the river cannot be forded except where there are continuous patches of gravel, for the banks and the drying river beds remain muddy or slushy for several days and it is said that the depth of such loose mud reaches upto 10 metres at certain places.

The Ghataprabha rises at a place called Ramghat about 40 km west of Belgaum city. After flowing for about 200 km in an easterly direction, the river enters Bijapur district near Dhavaleshwar (Mudhol taluk). The river continues its easterly course upto Bagalkot where it suddenly heads towards the north-east and flows into the Krishna near Sangam. Before that, the Ghataprabha flows in a region of sandstone and quartzite hills. Near Herkal village, the river develops into a beautiful gorge. The total length of this river in Bijapur district is about 112 km and it drains a relatively hilly tract. The Ghataprabha Left Bank Canal which takes off from the Dhupdal waste weir in Belgaum district has been providing irrigation facilities to the lands belonging to several villages of the taluks of Jamkhandi and Mudhol. The construction of the dam across the river Krishna near Almatti - a place which is quite close to Sangam as well - is likely to result in the submersion of lands situated on the banks of the Ghataprabha including the important town of Bagalkot.

The Malaprabha rises in the western-most portion of Belgaum district near Kanakumbi. After flowing east across the Belgaum district, it touches Karalakop (Badami taluk) and then forms the natural boundary for a short stretch between the districts of Bijapur and Dharwad before it turns north-east and enters Badami taluk near Manneri village. The river then flows north and north-east across Badami taluk and then for a short distance forms the boundary between the taluks of Badami and Hungund, cuts across Hungund taluk before joining the Krishna near the village named Sangam or Kapila Sangam. The river has a course of nearly a hundred kilometres and it is along the course of this river that places of great historical importance such as Khyad, Aihole, Pattadkal and Nandikeshvar are located. After touching Cholachagud and Munavalli, the Malaprabha flows directly from south to north and on account of this unique feature at this place the river is called *Uttara Vahini* and is regarded as specially sacred. The waters of this river have recently been harnessed for providing irrigation facilities to about 2.14 lakh hectares of land including some lands belonging to the Badami taluk.

Geologically, the oldest rocks occuring in the district are found mainly in its south-eastern parts as schists, phyllites and banded hematite-quartzites.

The schists include hornebl̀ende-schists, mica-schists, chlorite-schist, talc-schist and hematite-schist. The granites gneiss of the Archean age occur as rounded massive boulders and small isolated rocky hills and knolls near several places such as Bilgi, Rolli, Chimmalgi, Guledagudda, Pattadkal and Muddebihal. These rocks found to the south-west of Bijapur are overlain by a series of unfossiliferous, metamorphosed, sedimentary rocks known as the Kaladgi series. The Upper series of these rocks occuring in folds in the Kaladgi basin in the vicinity of Kaladgi and Bagalkot (about 1000 metres in thickness) consist of conglomerates quartzites, shales, limestones and hematite-schists. The Lower series, (about 2400 to 3000 metres thick) consist of basal conglomerates, arkoses, sandstones, quartzites and mud-stones overlain by silicious-limestones, hornstones and shales. Another set of unmetamorphosed sediments known as Bhima series, overlies the ancient gneissic rocks north of Muddebihal. These differ considerably from the Kaladgi series which are much older in age. The Upper Bhima series includes shales and limestones and occur around Talikota whereas the Lower Bhima series comprising quartzites, grits, sandstones and shales occurs along the southern fringe of the Deccan trap north of the Krishna.

Almost the entire region north of the Krishna river is covered by the sub-acrial Deccan lava flows of the Lower Eocene age, in the form of nearly horizontal beds, overlying the earlier formations. The traps vary from a hard, compact blueish and dark-grey basalt to the comparatively softer, purple, amygdaloidal and scoriaceous types with vesicular cavities generally filled with zeolite, calcite and quartz.

Bijapur district is poor in mineral deposits. However, a few minerals of economic importance like limestones and asbestos occur in the taluks of Mudhol and Bagalkot. Though iron ore is known to occur at several places, especially to the south of the Krishna river, it is not being mined as it is found to be uneconomical. Traces of copper have been noticed on the laminae of talcose limestone at Khajjidoni near Kaladgi. Small quantities of manganese ore occur in hillocks near Kagalgomb, near Bagalkot as also near Kamatagi. Rocks suitable for use in building construction and as road metal and railway ballast as also for use as ornamental stones, roofing and flooring slates etc., are also found to occur in large quantities throughout the district. Numerous quartzite and sandstone ridges to the south of the Krishna river and the sandstone ridges north of Muddebihal yield enormous quantities of building stones. The beautiful granites of light grey to pink colour occuring near Bilgi, Rolli, Pattadkal etc., are noted for their capacity to withstand the pressures and vibrations involved in imparting a fine polish in order to render such stones fit for use as pieces of ornamental stones. A few quarries of slate are found near Kadarkop of Mudhol taluk as also near Kaladgi, Silikeri and Talikot.

The climate of the district is dry and healthy. The main seasons follow the pattern for the Deccan. The hot or summer season begins by mid-February and lasts till the end of May or early June. Thereafter the south-west monsoon sets in and this season extends upto the end of September. During this period, the weather is cool and damp. The north-east or the retreating monsoon season covers the months of October and November. The cold and dry season i.e., winter season, accounts for the remaining months of November, December, January and the first half of February. The period from December to May happens to be the driest period of the year and on certain days the humidity would be as low as 10 per cent. Even during the monsoon months, the average level of humidity is much below the saturation level. Most parts of the district are subject to strong surface winds almost throughout the year. December is generally the coldest month of the year when the average minimum temperature moves down to 14.8 degree celsius. The day temperature begins to rise from mid-February and attains the mean maximum of about 38.6 degree celsius in the month of May.

Generally, the Bagalkot-Badami region is considered to be much hotter than the other parts of the district.

The large amount of variations noticeable in the rainfall from year to year both in the amount and in its distribution through the season has over the years rendered the district liable for drought and famine. The normal annual rainfall for the district is 550 mm - a figure which happens to be the lowest amongst the 20 districts of the State. On an average, there are about 37 rainy days in a year. Generally, the south-west monsoon sets in during June and during this month, as well as the next two months, the rainfall would be quite moderate. The precipitation would generally be heavy during September and normally the amount of rainfall during this month alone constitutes about 27 per cent of the total annual rainfall. The major portion of the district consists of deep black-cotton soil which is well known for its high moisture-retention capacity. Thus, a single heavy rainfall is at times sufficient to enable the agriculturists to carry on with the agricultural operations and secure a moderate yield of the crops sown.

6. Administrative Divisions and Jurisdictional changes

Karnataka State is organised into four Divisions for purposes of Revenue and General Administration. These Divisions are named after their respective headquarters which are located at Bangalore, Belgaum, Gulbarga and Mysore. Bijapur district belongs to the Belgaum Division. This district is in turn divided into 11 taluks which are grouped into four revenue Sub-divisions. In accordance with the general pattern, the taluks and the sub-divisions are named after the corresponding towns in which their headquarters are located. The jurisdiction of Bijapur Sub-division extends over the taluks of Bijapur, Basavana Bagevadi and Muddebihal. Bagalkot Sub-division covers the taluks of Badami, Bagalkot and Hungund. Of the remaining 5 taluks, while Indi and Sindgi belong to Indi Sub-division, Bilgi, Jamkhandi and Mudhol belong to Jamkhandi Sub-division. The district has not witnessed any jurisidictional changes - either with regard to its outer boundaries or with regard to the boundaries of the taluks comprised in it - during the decade 1981-91. According to the 1991 census, Bijapur district contains 1253 villages and 18 towns within its jurisdiction. A talukwise distribution of these villages and towns is indicated in the statement given below (see page 22). Particulars about the changes in the number of villages and towns if any which have occurred during the decade have also been furnished in the statement.

For purposes of Development Planning and implementation of various programmes thereof, Zilla Parishads have been constituted in the State. The jurisdiction of the Zilla Parishad is coterminous with that of the corresponding district and covers the entire rural and semi-urban areas but excludes the statutory towns. Accordingly, a Zilla Parishad has been constituted for Bijapur district and its jurisdiction extends over 11 Taluk Panchayats. The jurisdiction of each Taluk Panchayat is coterminous with that of the taluk of the same name but excludes the areas incorporated in the statutory towns or cities located if any within the taluk concerned. Thus, all villages and places classified as non-municipal towns and places recognised as outgrowths of towns at the 1991 census, come under the jurisdiction of the Taluk Panchayats. For instance, Mahalbagayat has been identified as an outgrowth of Bijapur city and in accordance with the above procedure, while Mahalbagayat falls within the jurisdiction of Bijapur Taluk Panchayat, Bijapur city as such does not. Taluk Panchayat is analogous to the unit more popularly known throughout the country as the "Community Develo pment Block" - which happens to be the smallest unit recognised for development planning. In order to conform to the All India pattern in the presentation of the 1991 census data, instead of the term 'Taluk Panchayat', the term 'C.D.Block' has been made use of at appropriate contexts in this volume also.

Statement showing the number of villages/towns in each taluk of the District, decadal variations if any and reasons thereof.

Sl.No.	Taluk	Total No. of Villages according to the list finalised for		No. of Towns as per 1991 census list	Reasons for variation in the No. of Villages between 1981 and 1991 census
		1991 Census	1981 Census		
1	2	3	4	5	6
1.	Badami	146	159	3	The following 13 amalgamated villages were reported as independent villages in 1981. These are now omitted. 1.Balageri(B), 2.Rangasamudra, 3.Shivapur, 4.Anantapur, 5.Aralikatti, 6.Ingalagundi, 7.Lingadal, 8.Kadlimatti, 9.Kanakapur, 10.Kadapatti SK, 11.Akkarogal, 12.Nagalapur and 13.Suggewad.
2.	Bagalkot	90	90	1	-
3.	Basavana Bagevadi	119	120	2*	Katapur an amalgamated village was wrongly reported as an independent village in 1981. This village is now omitted.
4.	Bijapur	108	109	1	Mahalbagayat an erstwhile revenue village of 1981 is now treated as urban being the outgrowth of Bijapur City.
5.	Bilgi	65	65	-	-
6.	Hungund	160	170	2	The following 10 amalgamated villages were wrongly reported as independent villages in 1981. These are now omitted. 1.Nilugal, 2.Ningapur, 3.Kadapatti, 4.Kongavad, 5.Solabgeri, 6.Chickhunakunti, 7.Chickupnal, 8.Sangapur, 9.Yattinahatti and 10.Rayanakoppa.
7.	Indi	123	122	1	In 1981, Indi village was reported as fully incorporated in the limits of Indi Municipal Town and was not listed in the 1981 list of villages. Now the area lying outside the Municipal limits of Indi have been identified and this portion of Indi revenue village is included in the list of villages as 'Indi (Rural)'.
8.	Jamkhandi	71	71	3	-
9.	Muddebihal	150	154	2	The following 4 amalgamated villages were reported as independent villages in 1981. These are now omitted from the list of villages. 1.Masangeri, 2.Belavantarkanti, 3.Fattepur D.Nalatwad and 4.Malakpur.

Note :

* The jurisdiction of this town extends over the villages belonging to the two taluks of Bagalkot and Basavana Bagevadi.

@ The remaining portion of this village is treated as urban being the outgrowth of Bijapur City

$ The municipal jurisdiction of this town extends over the villages located in the limits of Jamkhandi and Mudhol Taluks.

7. BRIEF ANALYSIS OF DATA

i) Area and Population

According to the Surveyor General, India, the total geographical area of Bijapur district is 17069 square kilometres. Areawise, Bijapur is the largest among the 20 districts of Karnataka State. According to the village records, as reported by local officers, the aggregate area of the villages and towns of the district is 17135 square kilometres. The slight difference between the two figures is attributable to the difference in the methods employed by the two agencies for measuring the area of the district. Incidentally, it may be mentioned that the smallest unit for which the area figures are furnished by the Surveyor General is the district. As a result, the village records constitute the main source of information regarding the area figures at the taluk level. The total area of the district is unevenly distributed among the 1253 villages and 18 towns belonging to the 11 taluks into which the district is constituted. Among the taluks of the district, Bijapur is the largest and covers an expanse of 2659 square kilometres. The taluks of Indi (2225 square kilometres) and Sindgi (2176 square kilometres) rank next to Bijapur and are obviously quite large in geographical size. These three taluks together account for 40.62 per cent of the total area of the district. Bilgi, which has an area of 782 square kilometres only, is the smallest taluk and its share in the total area of the district works out to 4.56 per cent. The other comparatively small taluks of the district are Bagalkot (935 square kilometres) and Mudhol (950 square kilometres). The remaining 5 taluks may be regarded as medium sized taluks with an area in the range of 1000-2000 square kilometres.

According to the 1991 Census, the total population of Bijapur district is 2,927,990 persons. This population is unevenly distributed among the 11 taluks of the district and the average population per taluk works out to 266,181 persons. Bijapur, which is the largest taluk in terms of area, is also the most populous taluk of the district. The population of Bijapur taluk alone, which is 473,047, constitutes 16.16 per cent of the total population of the district. The other taluks which are fairly large are Jamkhandi and Indi. These two taluks account for 11.59 per cent and 10.35 per cent of the total population of the district respectively. In terms of area, while Jamkhandi is quite small and holds the eighth rank, Indi covers a vast area and ranks next only to Bijapur. Sindgi taluk, which is the third largest in terms of area, holds the fourth ranking in terms of population. The population of each one of the remaining 6 taluks is lower than the taluk-average. Bilgi, which has a population of 118,998 persons is the smallest among the 11 taluks of the district. In terms of area also Bilgi is the smallest taluk. Bilgi taluk accounts for 4.56 per cent of the total area and 4.06 per cent of the total population of the district.

ii) Rural-Urban Composition

Among the 2,927,990 persons enumerated at the 1991 Census in Bijapur district, 2,239,244 persons are residing in rural areas and the remaining 688,746 persons are residing in urban areas. In other words, the rural-residents and the urban-residents constitute 76.48 per cent and 23.52 per cent of the total population of the district. The corresponding proportions for Karnataka State as a whole are 69.08 per cent and 30.92 per cent respectively. Bijapur district has obviously an above-average rural-resident component in its population. Talukwise details presented in Table 4 reveal that all the persons enumerated in Bilgi taluk are residing in rural areas. None of the places in Bilgi taluk has been classified as an 'urban area' for purposes of the 1991 Census. The other 10 taluks have both rural and urban categories of population, though in different proportions. The rural component exceeds 90 per cent in the two taluks of Sindgi (94.24 per cent) and Indi (91.71 per cent); lies between 75-90 per cent in the three taluks of Basavana Bagevadi, Hungund and Muddebihal; lies between 60-75 per cent in the four taluks of Badami, Bagalkot, Jamkhandi and Mudhol, and is below 60 per cent in the remaining taluk, viz., Bijapur (59.17 per cent).

The jurisdiction of the Taluk Rural corresponds to that of the Community Development (i.e., corresponding Taluk Panchayat). The following

table gives a talukwise (C.D.Blockwise) distribution of the rural population of the district and also indicates the number of villages in each taluk (C.D.Block). The table reveals that the average rural population and the average number of populated villages of a taluk of Bijapur district are 203,568 persons and 113 villages respectively.

Table 1 : Population and Number of Villages, 1991

Sl. No.	Name of C.D.Block/ Taluk-Rural	Population of Villages			No.of Villages	
		Persons	Males	Females	Total	Inhabited
1	2	3	4	5	6	7
1.	Badami	187,544	93,950	93,594	146	146
2.	Bagalkot	132,135	66,042	66,093	90	89
3.	Basavana Bagevadi	234,095	118,885	115,210	119	119
4.	Bijapur	279,916	144,616	135,300	108	107
5.	Bilgi	118,998	59,491	59,507	65	65
6.	Hungund	189,826	94,647	95,179	160	160
7.	Indi	278,012	143,693	134,319	123	122

10.	Mudhol	163,458	82,777	80,681	78	77
11.	Sindgi	264,732	135,712	129,020	143	142
District Rural		2,239,244	1,137,566	1,101,684	1253	1247

At the 1991 Census, 6 out of 1253 villages of the district have returned a 'nil' population. These uninhabited villages constitute a negligibly small proportion of the total number of villages viz., 0.48 per cent and are evenly distributed among the six taluks of Bagalkot, Bijapur, Indi, Muddebihal, Mudhol and Sindgi. It may be mentioned in passing that this district too had a fairly large number of uninhabited villages in the past. During the later half of the decade 1961-71 all such revenue villages which had returned a 'nil' population at the 1961 Census were amalgamated with one or the other adjacent populated village for administrative convenience. As a consequence, the amalgamated uninhabited villages lost their independent status and have therefore not been included in the list of villages adopted for census purposes. The 1247 populated villages are distributed unevenly among the 11 taluks and the average number of villages per taluk works out to 113. The number of villages in a taluk varies between 65 in Bilgi and 160 in Hungund. Apart from Bilgi which is the smallest, there are 3 more taluks with less than 100 villages each. In terms of number of villages, Jamkhandi, Mudhol and Bagalkot rank amongst the small taluks of the district. On the other hand, Muddebihal is the second largest and it is followed by Badami and Sindgi. However, in terms of population size, Bijapur (107 villages) tops the list and is followed by Indi (122 villages) while Bilgi (65 villages) holds the bottom-most place.

The rural population is unevenly distributed among 11 taluks. Bijapur is the most populous taluk and Indi ranks next. These two taluks respectively account for 12.50 per cent and 12.42 per cent of the rural population of the district. Sindgi, Basavana Bagevadi and Jamkhandi are the other taluks with an above-average population. The share of these three taluks in the rural population of the district comes to 11.82 per cent, 10.45 per cent and 9.52 per cent respectively. Bilgi is the smallest taluk and Bagalkot holds the penultimate rank. The contribution of these two taluks to the rural population of the district is 5.32 per cent and 5.90 per cent respectively. The range of variation among the taluks is quite large. The population of the largest taluk viz., Bijapur, is two times and a half that of the smallest taluk namely, Bilgi.

Bijapur district has as many as 18 towns and the aggregate population of these towns is 688,746 persons. Table 2, given below, presents a sexwise distribution of the urban population amongst the 18 towns of the district. The population of the towns varies between a minimum of 4594 persons in Almatti-Sitimani town and a maximum of 193,131 persons in Bijapur city. The average population of a town of the district comes to 38,264. As may be seen from Table 2, the townwise population is greater than the average in the case of only 5 towns out of the 18. Apart from Bijapur, the other towns with a large population are : Bagalkot (76,903), Rabkavi-Banhatti (60,609), Jamkhandi (46,143) and Ilkal (40,101). Among these five towns, Bijapur belongs to Class I category (population 100,000 plus), Bagalkot and Rabkavi-Banhatti belong to Class II category (population 50,000 to 99,999) and the other two belong to the Class III category (20,000 to 49,999). The table further indicates that 7 more towns, viz., Basavana Bagevadi, Guledagudda, Indi, Muddebihal, Mudhol, Mahalingpur and Talikota also belong to Class III category (population 20,000 to 49,999). The towns of Badami, Hungund, Kerur, Sindgi and Terdal which have a population in the

range of 10,000-19,999 belong to Class IV category and the remaining town viz., Almatti-Sitimani which incidentally is the smallest town of the district, belongs to Class VI category (below 5,000). The distribution of the urban population among the towns is most uneven. While Bijapur city alone accounts for 28.04 per cent of the district's urban population, the two Class II towns of Bagalkot and Rabkavi-Banhatti account for 11.16 per cent and 8.80 per cent respectively. The remaining 52.00 per cent is shared unequally by the 9 Class III towns (39.13 per cent), 5 Class IV towns (12.20 per cent) and the single Class VI town (0.67 per cent). The population of the largest town of the district is 42 times the population of the smallest town.

Table 2 : Population and Number of Towns, 1991

Sl. No.	Name and Civic Administration Status of Towns	Population		
		Persons	Males	Females
1	2	3	4	5

	District Urban	688,746	353,459	335,287

*Includes the population of Outgrowths.

Note : Abbreviations used in column 2 for denoting civic administration status are :

(CMC) : City Municipal Council

(TMC) : Town Municipal Council

(NAC) : Notified Area Committee

iii) Classification of new places as towns, de-classification and/or merger of towns during the decade 1981-1991

The total number of towns in Bijapur district has moved down from 19 in 1981 to 18 in 1991. The net decrease is due to the declassification of two erstwhile towns and the classification of a new place as a town for purposes of the 1991 Census. The details are set out in the following table.

Table 3 : New Towns/Towns Declassified, Merged in 1991 Census

Particulars	Name of Town	Population
1	2	3
(a) Added	(i) Almatti-Sitimani	4,594 (1991 Census)
(b) Declassified	(i) Bilgi	10,047 (1981 Census)
	(ii) Kamatagi	11,090 (1981 Census)
(c) Wholly merged with other town	Nil	-

Bilgi and Kamatagi lost the status as statutory towns as a consequence of the dissolution of the respective Town Municipalities. Further, the 1981 Census data relating to these two places did not satisfy the empirical criteria laid down for classifying a place as 'urban' for purposes of the 1991 Census. As a result, Bilgi and Kamatagi were declassified and included in the list of villages of the taluks concerned.

After the 1981 Census, certain adjacent portions of Almatti village of Basavana Bagevadi taluk and Sitimani village of Bagalkot taluk were combined and brought under the administrative control of the newly constituted Notified Area Committee. This place acquired the status of a statutory town and has therefore been classified as a town for purposes of the 1991 Census.

iv) Decadal variation in population 1981-1991

The population of the district has increased from 2,401,782 persons in 1981 to 2,927,990 persons in 1991. During the decade, the district has witnessed a net addition of 526,208 persons. This addition is shared unequally by the rural and urban areas of the 11 taluks comprised in the district. A comparative idea about

the decadal variation in the population of the district and the taluks thereof, with the rural-urban break up, may be had from the details presented in the following table.

Table 4 : Decadal change in distribution of Population

Taluk	Population						Percentage decadal variation (1981-91)			Percentage of urban population	
	1981			1991							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1981	1991

10.Mudhol**	164389	125224	39165	220620	163458	57162	34.21	30.53	45.95	23.82	25.91
11.Sindgi	222712	206901	15811	280915	264732	16183	26.13	27.95	2.35	7.10	5.76
District	2401782	1823154	578628	2927990	2239244	688746	21.91	22.82	19.03	24.09	23.52

* The jurisdiction of Almatti-Sitimani town extends over the lands belonging to the villages of two different taluks. As the major portion of this town lies within the limits of Basavana Bagevadi taluk, for purposes of this table, Almatti-Sitimani is included in Basavana Bagevadi taluk.

** The jurisdiction of Mahalingpur town extends over the lands belonging to the villages of two different taluks. As the major portion of this town lies within the limits of Mudhol taluk, for purposes of this table Mahalingpur is included in Mudhol taluk. In 1981 too the position was very much the same.

As may be seen from Table 4, the population of Bijapur district has registered a decadal growth rate of 21.91 per cent. Incidentally it may be mentioned that this growth rate is slightly higher than the overall decadal growth rate returned by the State, which is 21.12 per cent. The talukwise details indicate that the population has registered a positive growth in all the taluks and also that though the district average is 21.91 per cent, the growth rate at the taluk level varies between 11.40 per cent in Hungund and 34.21 per cent in Mudhol. The range of variation is quite wide. Apart from Mudhol, the other taluks which have registered an above-average growth rate are : Sindgi (26.13 per cent), Jamkhandi (25.24 per cent), Bijapur (24.84 per cent) and Indi (24.09 per cent).

The rural-urban break-up shows that the rural population which accounts for 76.48 per cent of the total population of the district has increased by 22.82 per cent whereas the urban population has increased by 19.03 per cent. The rural areas have registered growth at a considerably higher rate than its urban counterpart. This trend, it may be incidentally noted, differs from the general trend noticed in the State as a whole. The decadal growth rates for the rural and urban segments of the population of Karnataka are 17.66 per cent and 29.62 per cent respectively. However, at the taluk

level, the decadal growth rate for rural population is higher than that for the corresponding urban population in the five taluks of Bagalkot, Bilgi, Hungund, Jamkhandi and Sindgi. The difference is highly pronounced in the case of Bilgi taluk as also the taluks of Hungund and Sindgi. As a result of the declassification of the erstwhile Bilgi town - the only place of the taluk which was regarded as 'urban' at the 1981 census - the entire population of the taluk now belongs to the rural category. In Hungund taluk too one of the towns at the 1981 census, namely Kamatagi, has now been declassified while the other two places have continued as towns and have registered a positive growth during the decade. The net result, however, is a decrease in the urban population of the taluk to the extent of 10.06 per cent. On the other hand, the rural population has registered a decadal growth rate of 19.76 per cent. In Sindgi taluk which has only one town as in 1981, the urban population has experienced a marginal growth by 2.35 per cent while the rural population has increased by 27.95 per cent. The reasons for this vast difference are not explicit.

The decadal growth rate for the rural population is lower than that for the corresponding urban population in the six taluks of Badami, Basavana Bagevadi, Bijapur, Indi, Mudhol and Muddebihal. The difference is highly pronounced in the case of Basavana Bagevadi taluk - as against a decadal growth rate of 16.38 per cent for the rural population, the urban population of this taluk has returned a decadal growth rate of 46.33 per cent. The difference is quite narrow in the case of Badami taluk, for in this taluk, the decadal growth rates for the rural and urban segments of the population are 19.25 per cent and 20.17 per cent respectively.

If the growth of population in rural areas of the taluks is examined, it is noticed that the decadal growth rate is higher than the district average of 22.82 per cent in the case of only 4 out of the 11 taluks. Bilgi taluk (34.91 per cent) tops the list and is followed by Jamkhandi (31.94 per cent). At the other end Bagalkot has registered the lowest growth rate of 15.30 per cent and the position of Basavana Bagevadi (16.38 per cent) is better in comparison to that of Bagalkot only. When the growth of population in urban areas of the taluks is examined it is seen that the decadal growth rate is above the district average of 19.03 per cent in the case of 6 taluks. The highest growth rate of 46.33 per cent is recorded by Basavana Bagevadi taluk and it is followed by 45.95 per cent registered by Mudhol taluk. Among the 11 taluks, Bilgi has suffered most - the urban population has suffered a cent per cent decline. In Hungund taluk, the urban population has declined by 10.06 per cent. Though Sindgi has registered a positive growth, the growth rate is a meagre 2.35 per cent. The foregoing analysis clearly shows that the decadal population growth noticed in the urban and rural areas of the different taluks of the district do not fit into any particular pattern.

v) Trends of Urbanisation

The proportion of urban population to the total population of an unit is a measure of urbanisation. According to the 1991 Census, the proportion of the urban population to the total population of Bijapur district works out to 23.52 per cent. In 1981, this proportion was a little higher, namely 24.09 per cent. Obviously during this decade Bijapur district has suffered a setback in its march towards a higher level of urbanisation. Talukwise data presented in Table 4, reveal that the proportion of urban population has declined in 5 out of the 11 taluks of the district. This decline is total, that is cent per cent, in the case of Bilgi taluk. This reverse trend is due to the fact that the only place in the taluk which was classified as an urban area at the 1981 census is now classified as a village. The other taluk which has suffered most is Hungund where this proportion has moved down from 28.02 per cent to 22.62 per cent. In this case too, Kamatagi, an erstwhile town, is now regarded as a village. Sindgi, Jamkhandi and Bagalkot are the other taluks which have witnessed a slight decrease in the proportion of urban population. This proportion has moved up marginally in the 6 taluks including Bijapur where the increase is from 38.88 per cent in 1981 to 40.83 per cent in 1991. Among the 11 taluks of the district, Bijapur is the most highly urbanised taluk and Jamkhandi ranks next. In 1981, however, Jamkhandi held the first place and Bijapur ranked next. Bilgi is the taluk which is least urbanised. The proportion of urban population to the total is less than 10 per cent in the taluks of Indi (8.29 per cent) and Sindgi (5.76 per cent). The level of urbanisation of these two taluks is quite low.

The number of places classifed as towns within a district or taluk is also an important index of urbanisation. On this count too, Bijapur district has suffered a setback during the decade, for the number of towns in the district has decreased from 19 to 18 during this period. Bilgi and Hungund are the taluks which have witnessed a fall in this index.

vi) Population size of villages

The rural population of Bijapur district is dispersed among 1247 inhabited villages spread over unevenly in 11 taluks. The average population of a village of this district as per 1991 Census, works out to 1796 persons. The taluk level (i.e. C.D.Block level) data indicate that among the taluks, Jamkhandi has a maximum of 3003 persons per village and it is followed by Bijapur with a tally of 2616 persons. At the other end, the average population per village works out to 1186 persons in the case of Hungund taluk. The position of Muddebihal taluk is almost the same as that of Hungund, for in this case the average population per village comes to 1189 persons. Evidently, the number of persons in a village is subject to considerable variations within the district and more so within each one of the taluks therein. A distribution of the villages by population size-class is given in table 5.

Table 5 : Percentage distribution of villages by population ranges, 1991

Taluk/C.D.Block	No. and Percentage of inhabited villages	No. and percentage of villages in each range (figures in paranthesis indicate percentage of villages in each range)					
		Less than 200	200 - 499	500 -1999	2000 - 4999	5000 - 9999	10,000 & above
1	2	3	4	5	6	7	8
1. Badami	146	5	20	95	26	-	-
	(100.00)	(3.42)	(13.70)	(65.07)	(17.81)	-	-
2. Bagalkot	89	3	11	58	15	1	1
	(100.00)	(3.37)	(12.36)	(65.17)	(16.84)	(1.13)	(1.13)
3. Basavana Bagevadi	119	5	12	62	31	7	2
	(100.00)	(4.20)	(10.09)	(52.10)	(26.05)	(5.88)	(1.68)
4. Bijapur	107	-	4	52	39	11	1
	(100.00)	-	(3.74)	(48.60)	(36.45)	(10.28)	(0.93)
5. Bilgi	65	2	5	37	19	1	1
	(100.00)	(3.08)	(7.69)	(56.92)	(29.23)	(1.54)	(1.54)
6. Hungund	160	6	41	94	14	3	2
	(100.00)	(3.75)	(25.63)	(58.75)	(8.75)	(1.87)	(1.25)
7. Indi	122	-	8	66	39	7	2
	(100.00)	-	(6.55)	(54.10)	(31.97)	(5.74)	(1.64)
8. Jamkhandi	71	-	1	25	33	11	1
	(100.00)	-	(1.41)	(35.21)	(46.48)	(15.49)	(1.41)
9. Muddebihal	149	3	27	101	17	-	1
	(100.00)	(2.01)	(18.12)	(67.79)	(11.41)	-	(0.67)
10. Mudhol	77	1	4	42	25	4	1
	(100.00)	(1.30)	(5.19)	(54.55)	(32.47)	(5.19)	(1.30)
11. Sindgi	142	4	7	87	38	4	2
	(100.00)	(2.82)	(4.93)	(61.26)	(26.76)	(2.82)	(1.41)
District Rural	1247	29	140	719	296	49	14
	(100.00)	(2.32)	(11.23)	(57.66)	(23.74)	(3.93)	(1.12)

Small villages with less than 500 inhabitants each, medium villages with 500-1999 inhabitants each and large villages with a population of 2000 or more respectively constitute 13.55 per cent, 57.66 per cent and 28.79 per cent of the total number of inhabited villages in the district. Table-5 reveals the existence of a small number of very small villages as also the existence of a small number of very large villages, (each having 10,000 inhabitants or more). At the taluk level, the highest proportion of small villages is noticeable in Hungund (29.38 per cent) followed by Muddebihal (20.13 per cent) and the lowest proportion is noticeable in Jamkhandi (1.41 per cent). The proportion of medium-sized villages is the least in the case of Jamkhandi taluk (35.21 per cent) and the highest in the case of Muddebihal taluk (67.79 per cent). More than 50 per cent of the villages of Jamkhandi taluk - 63.38 per cent to be precise - belong to the category of large villages. In the taluks of Hungund and Muddebihal such villages constitute a comparatively low proportion of about 12 per cent. As may be inferred from Table 5, medium and large villages are preponderant in most of the taluks of the district.

vii) Density of population

The overall density of population in Bijapur district as per 1991 Census is 172 persons per square kilometre. The rural-urban break up shows that the density figures for the rural and urban areas of the district respectively work out to 134 persons per sq.km. and 2222 persons per sq.km. The overall average density of population for Karnataka as per 1991 Census is 236 persons per sq.km. The density figures for the rural and urban areas of the State are 166 and 3257 persons per sq.km. respectively. In Bijapur district the urban areas are more densely populated than the rural areas and this feature conforms to the general pattern noticed in the State.

As in the matter of population, in the matter of geographical area too, the villages of the district differ from each other to a considerable extent. Density of population at the village level is an important tool for comparative analysis. Accordingly, a distribution of the 1247 populated villages of the district by density ranges is presented in the following table.

Table 6 : Distribution of villages by density ranges

Range of Density (population per sq.km)	Total no. of villages in each range	Percentage of villages in each range
1	2	3
- 10	4	0.32
11-20	3	0.24
21-50	40	3.21
51-100	304	24.38
101-200	673	53.97
201-300	160	12.83
301-500	43	3.45
501 and above	20	1.60
Not known	-	-
All ranges	1247	100.00

Villages having densities in the range of 101-200 persons per square kilometre constitute the single largest group followed by those having densities in the range of 51 to 100 persons and those with densities in the range of 201 to 300 respectively. These three groups together account for 91.18 per cent of the villages in the district. Villages coming under the broad density range of 51 to 300 are preponderant. Though there are villages with considerably low densities, such villages are quite few. However, villages which are more densely populated (densities exceeding 300 persons per square kilometre) are also found in the district and the proportion of such villages to the total works out to 5 per cent which is quite significant.

If the density of population in the rural areas of the taluks (i.e. in C.D.Blocks) is examined it is noticed that the density exceeds 150 persons per square kilometre in the taluks of Jamkhandi (182), Mudhol (171) and Bilgi (152). The average density is below 125 persons per sq.km. in the taluks of Sindgi (122), Muddebihal (118), Basavana Bagevadi (118) and Bijapur (105).

viii) Sex Ratio

Among the 2,927,990 persons enumerated in Bijapur district at the 1991 Census, 1,491,019 are males and the remaining 1,438,971 are females. The sex ratio for the district, expressed as the number of females per thousand males, works out to 964. This figure is slightly higher than the average sex ratio for Karnataka State which is 960. In 1981, however, Bijapur district returned a sex ratio of 982 as compared to 963 registered by the State. Between

1981 and 1991, the sex ratio has decreased in the State as a whole and in Bijapur district as well. The decline is more pronounced in the district than in the State. It may be incidentally mentioned that at the All India level too, the sex ratio has suffered a perceptible setback during the decade, for in the country as a whole the sex ratio has moved down from 933 in 1981 to 927 in 1991.

The rural-urban break-up of the population data shows that the sex ratio is generally higher in the rural areas than that in urban areas. The sex ratio for these two categories of population of Bijapur district works out to 968 and 949 respectively. The corresponding figures for the State are 973 for the rural population and 930 for the urban population. As compared to the overall situation in the State, the rural population of Bijapur district has fewer females than its urban counterpart. The situation, however, is not quite uniform throughout the district. The rural population is scattered unevenly in 11 taluks i.e. C.D.Blocks and, as the data presented in table 7 clearly show, the sex ratio for rural areas at the taluk level varies between a minimum of 935 in Indi taluk and a maximum of 1006 in Hungund taluk. Apart from Indi, only 3 taluks have returned a below-average sex ratio. These are Bijapur (936), Sindgi (951) and Jamkhandi (958). On the other hand, apart from Hungund, Bagalkot taluk has a marginal surplus of females and Bilgi taluk has a balanced sex ratio of 1000 females per thousand males. The talukwise data are presented in the following table.

Table 7 : Sex Ratio for Rural Population of C.D.Blocks, 1991

Sl.No.	Name of C.D.Block/Taluk	No. of females per 1000 males
1	2	3
1.	Badami	996
2.	Bagalkot	1001
3.	Basavana Bagevadi	969
4.	Bijapur	936
5.	Bilgi	1000
6.	Hungund	1006
7.	Indi	935
8.	Jamkhandi	958
9.	Muddebihal	996
10.	Mudhol	975
11.	Sindgi	951
	District Rural	968

In the case of urban areas i.e., towns, though the average sex ratio for the district is 949, the townwise particulars presented in table 8 reveal that the sex ratio varies between 868 and 1020. The margin of variation is indeed quite wide. Among the 18 towns of the district as many as three towns have a surplus of females. These towns are : Kerur (1020), Mahalingpur (1003) and Guledagudda (1001). In Bijapur, the most populous town, the sex ratio is quite low, namely 922-a figure which is far below the district average of 949. The other towns with a still lower sex ratio are the following: Sindgi (868), Indi (917), Bagalkot (915) and Almatti-Sitimani (913). It may be incidentally noted that Bagalkot is the second most populous town of the district and also that Almatti-Sitimani is the town with the smallest population (less than 5000). Further, while Bijapur and Bagalkot, are old and traditional towns, Almatti-Sitimani is a new town which has come up in a project area where a huge dam is being built across the Krishna river to store water for purposes of irrigation. The reasons for the low sex ratio returned by Sindgi town are not quite explicit. In 1981 too, Sindgi had returned the lowest sex ratio (798) among the towns of the district. The townwise sex ratio figures as per 1991 Census are as follows :

Table 8 : Sex Ratio for Towns, 1991

Sl. No.	Name and Civic Administration Status	No. of females per 1000 Males
1	2	3
1.	Almatti-Sitimani (NAC)	913
2.	Badami (TMC)	964
3.	Bagalkot (CMC)	915
4.	Basavana Bagevadi (TMC)	954

18.	Terdal (TMC)	972
	District Urban	949

* Includes the population of Outgrowths.

ix) Scheduled Castes

In a total population of 2,927,990 persons enumerated in Bijapur district at the 1991 Census, 509,862 persons have returned themselves as belonging to the Scheduled Castes. Of them, it may be noticed, 421,185 (i.e. 82.61 per cent) are rural residents and the remaining 88,677 (i.e., 17.39 per cent) are urban residents. In terms of proportions, the Scheduled Castes constitute 17.41 per cent of the total population of the district - a figure which is slightly higher than the average for the State which is 16.38 per cent. The proportions of Scheduled Castes in the rural and urban segments of the population of the district works out to 18.81 per cent and 12.88 per cent respectively.

If the villages of the district are classified according to the proportion of Scheduled Castes population to the total population of the village concerned the distribution of the villages would be as shown in the table given below.

Table 9 : Proportion of Scheduled Castes Population to Total Population in villages, 1991

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
0-5	83	6.74
6-10	225	18.28
11-15	301	24.45
16-20	229	18.60
21-30	243	19.74
31 and above	150	12.19
All ranges	1231	100.00

Only 16 out of the 1247 inhabited villages of the district do not have any Scheduled Castes population. The relative strength of the Scheduled Castes is not quite significant in 6.74 per cent of the villages where they constitute 5 per cent or less. On the other hand they are found in substantial strength in 31.93 per cent of the villages where they account for more than 20 per cent.

Townwise information furnished in the table given below reveals that the persons belonging to Scheduled Castes are found in varying numbers in all the towns of the district. The proportion of Scheduled Castes to total population is above the district average of 12.88 per cent in the case of 9 towns and below this average in the case of the other 9 towns. This proportion is seen to be the highest in Indi town (24.25 per cent) followed by Basavana Bagevadi (22.53 per cent) and the least in Guledgudda town (7.11 per cent). In Almatti-Sitimani i.e., the town which has the smallest population, the Scheduled Castes constitute 12.49 per cent - a figure which is marginally lower than the district average. On the other hand in Bijapur, the most populous town of the district, the Scheduled Castes account for 11.74 per cent of the population. The position is not in any way better in Bagalkot the second most populous town, for in this town the proportion of the Scheduled Castes to the total population comes to 9.58 per cent. However, if the distribution of the numerical strength of the Scheduled Castes community residing in the urban areas of the district as such is considered it is evident that their main centres of concentration are Bijapur and Bagalkot, besides Jamkhandi. These three towns respectively account for 25.56 per cent, 8.31 per cent and 8.36 per cent of the urban-resident Scheduled Castes population of the district.

Table 10 : Percentage of Scheduled Castes Population in towns, 1991

Sl. No.	Name of Town	Total Population	Total Scheduled Castes Population	Percentage of Scheduled Castes Population to Total Population
1	2	3	4	5
1.	Almatti-Sitimani (NAC)	4,594	574	12.49
2.	Badami (TMC)	19,982	3,026	15.14
3.	Bagalkot (CMC)	76,903	7,370	9.58
4.	Basavana Bagevadi (TMC)	23,022	5,188	22.53
5.	Bijapur (CMC)*	193,131	22,667	11.74
6.	Guledagudda (TMC)	33,895	2,410	7.11
7.	Hungund (TMC)	15,391	2,091	13.59
8.	Ilkal (TMC)	40,101	3,863	9,63
9.	Indi (TMC)	25,121	6,091	24.25
10.	Jamkhandi (TMC)	48,143	7,410	15.39
11.	Kerur (TMC)	15,199	1,338	8.80
12.	Mahalingpur (TMC)	26,067	3,683	14.13
13.	Muddebihal (TMC)	20,094	2,414	12.01

17.	Talikota (TMC)	21,882	2,010	9.19
18.	Terdal (TMC)	17,334	3,304	11.74
	District Urban	688,746	88,677	12.88

* Includes the population of Outgrowths.

x) **Scheduled Tribes**

In a total population of 2,927,990 persons enumerated in Bijapur district at the 1991 Census, 39,535 persons have returned themselves as belonging to the Scheduled Tribes. The proportion of the Scheduled Tribes population to the total population of the district works out to 1.35 per cent. It may be incidentally observed that this figure is far lower than the State average which is 4.26 per cent. Further, among the Scheduled Tribes found in the district, the rural-residents are far more numerous than the urban-residents - while the rural-residents form 86.17 per cent their urban counterparts account for the remaining 13.83 per cent.

If the villages of the district are classified by ranges according to the proportion of Scheduled Tribes to the total population of the concerned villages, the distribution of the villages would be as shown in Table 11 which is given below. At the outset it may be noticed that persons belonging to Scheduled Tribes are found in only 325 out of the 1247 populated villages of the district. In other words, persons belonging to Scheduled Tribes are met with in only 26.06 per cent of the villages of the district. The table further discloses that their presence is only nominal in 229 out of these 325 villages (70.46 per cent) where they form 5 per cent or less of the total population of the village concerned. Their relative strength exceeds the 25 per cent mark in 20 villages (6.15 per cent) including 4 villages where they constitute more than 50 per cent of the population.

Table 11: Proportion of Scheduled Tribes Population to Total Population in Villages, 1991

Percentage range of Scheduled Tribes Population to total Population	No. of villages in each range	Percentage of villages in each range
1	2	3
0-5	229	70.46
6-15	65	20.00
16-25	11	3.39
26-35	8	2.46
36-50	8	2.46
51 & above	4	1.23
All ranges	325	100.00

Townwise particulars regarding the relative strength of the Scheduled Tribes population, which are presented in Table 12, reveal that persons belonging to the Scheduled Tribes are found in all the towns including Almatti-Sitimani where, however only a solitary individual has returned himself as belonging to a Scheduled Tribe. If this particular town is not taken into account, it is noticed that the numerical strength of the Scheduled Tribes in the towns of the district varies between 38 in Basavana Bagevadi and 1283 in Bijapur City. When viewed in relation to the total population of the town, the proportion of the Scheduled Tribes population in towns is seen to vary between 0.17 per cent in the towns of Basavana Bagevadi and Mahalingpur and 2.87 per cent in Hungund, i.e., if the position of Almatti-Sitimani town is not taken into consideration. This proportion is 0.50 per cent or less in the case of 10 towns including Almatti-Sitimani, lies between 0.51 per cent and 1.00 per cent in the case of 3 towns and exceeds the 2 per cent mark in the case of only one town, namely Hungund.

Table 12 : Percentage of Scheduled Tribes Population in Towns, 1991

Sl. No.	Name of Town	Total Population	Total Scheduled Tribes Population	Percentage of Scheduled Tribes Population to Total Population
1	2	3	4	5
1.	Almatti-Sitimani (NAC)	4,594	1	0.02
2.	Badami (TMC)	19,982	178	0.89

	District Urban	688,746	5,467	0.79

*Includes the population of Outgrowths.

xi) Literacy

According to the definition of a 'literate' adopted for purposes of the 1991 Census, all the children belonging to the age-group of 0-6 years are *per se* to be treated as illiterate. Therefore, while computing the literacy rates, all such children are to be excluded. The 1991 census reveals that out of the 2,927,990 persons enumerated in Bijapur district, 556,196 are children in the 0-6 year age-group and amongst the 2,371,794 persons aged 7 years and upwards 1,307,674 have returned themselves as literate. The literacy rate for Bijapur district works out to 55.13 per cent. The sexwise details reveal that among the 1,206,614 males aged 7 years and upwards, 840,868 i.e., 69.69 per cent are literate and that among the 1,165,180 females aged 7 years and upwards 466,806 i.e., 40.06 per cent are literate. The corresponding literacy rates for the State as a whole are : 56.04 per cent for total population, 67.26 per cent for males and 44.34 per cent for females. The female literacy rate returned by Bijapur district is obviously lower than that returned by the State to a significant extent.

Particulars relating to the rural areas of the district indicate that in the total rural population (excluding 0-6 age-group), viz., 1,799,861 persons, the number of literates is 916,365. In other words, the literacy rate for the rural areas of the district, is 50.91 per cent. Sex-wise break-up further shows that the literacy rates for males and females work out to 66.09 per cent and 35.29 per cent respectively. The taluk-level (i.e., C.D.Block level) data for the rural population, furnished in Table 13, provide a comparative idea about the magnitude of inter-taluk differences regarding total as well as sexwise literacy rates.

Table 13 : Literacy Rates for Rural Population of Taluks (C.D.Blocks) by sex, 1991 (Excluding children in the age-group 0-6)

Sl.No.	Name of Taluk/C.D.Block	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
1.	Badami	55.57	72.37	39.95
2.	Bagalkot	51.92	70.11	33.89
3.	Basavana Bagevadi	56.13	71.29	40.54
4.	Bijapur	45.57	59.51	30.66
5.	Bilgi	47.64	64.09	31.31
6.	Hungund	55.43	74.31	36.87
7.	Indi	60.24	71.79	47.78
8.	Jamkhandi	38.31	51.50	24.51
9.	Muddebihal	49.33	68.85	29.81
10.	Mudhol	44.95	57.93	44.01
11.	Sindgi	51.47	66.21	36.01
District Rural		50.91	66.09	35.29

Among the 11 taluks of the district, Indi has returned the highest literacy rate of 60.24 per cent and Basavana Bagevadi ranks next to Indi. In 5 taluks, the literacy rate is lower than the district average and it is the least in the case of Jamkhandi taluk (38.31 per cent). In Bijapur, the taluk with the largest population the literacy rate is 45.57 per cent - a rate which is considerably lower than the district average. The position of Bilgi taluk appears to be slightly better, for the literacy rate returned by this taluk which has the smallest population and incidentally does not have any urban areas in the immediate vicinity of its villages is 47.64 per cent

If the literacy rates for males are examined it is seen that the rate varies between a minimum of 51.50 per cent in Jamkhandi taluk and a maximum of 74.31 per cent in Hungund taluk. Indi taluk, which ranks first in the matter of literacy rate for total population, takes up the third place in this regard and ranks after Badami which has a tally of 72.37 per cent. The position of Bijapur taluk (59.51 per cent) is better as compared to that of only Mudhol (57.93 per cent) and Jamkhandi (51.50 per

cent). In the case of female population of the taluks, the literacy rate is seen to vary between 24.51 per cent in Jamkhandi and 47.78 per cent in Indi. The female literacy rate is fairly high in the taluks of Mudhol (44.01 per cent), Basavana Bagevadi (40.54 per cent) and Badami (39.95 per cent). However, the female literacy rates returned by Bijapur (30.66 per cent) and Bilgi (31.31 per cent) are well below the district average of 35.29 per cent.

As in the case of rural areas, in the case of urban areas too there are considerable differences in the literacy rates. The literacy rate for the urban population of the district (excluding 0-6 age-group) works out to 68.42 per cent. The sexwise break-up shows that literacy rates for the male and female segments of the urban population are 80.89 per cent and 55.27 per cent respectively. Townwise literacy rates which are presented in the following table indicate that amongst the 18 towns, Almatti-Sitimani, which incidentally is the smallest town and a new town located in a project area, has returned the highest literacy rate of 85.48 per cent for the total population as well as the highest literacy rate for the male population (95.24 per cent) and the highest literacy rate for female population (74.79 per cent). With the literacy rates of 74.54 per cent and 74.70 per cent respectively, Bijapur and Bagalkot, which are the first and second most populous towns of the district, occupy the third and the second place. At the other end, Basavana Bagevadi (56.55 per cent) holds the bottom-most place and Terdal (57.01 per cent) occupies the penultimate rank. The literacy rates for males are seen to vary between 69.86 per cent in Terdal and 95.24 per cent in Almatti-Sitimani. This rate is fairly high (i.e., above 85 per cent) in the towns of Bagalkot (86.20 per cent), Muddebihal (86.10 per cent) and Bijapur (85.07 per cent). In 6 towns including Terdal, the male literacy rate is below 75 per cent. In the case of females, the literacy rates vary between 41.67 per cent in Basavana Bagevadi and 74.79 per cent in Almatti-Sitimani. In this matter, Bijapur (63.09 per cent) ranks next only to Almatti-Sitimani and it is followed by Bagalkot (62.07 per cent). The female literacy rate is below the 50.00 per cent mark in the 7 towns of Ilkal (46.76 per cent), Kerur (47.56 per cent), Mahalingpur (46.75 per cent), Mudhol (49.58 per cent), Rabkavi-Banhatti (47.81 per cent) and Terdal (43.79 per cent) besides Basavana Bagevadi.

xii) Main Workers, Marginal Workers and Non-workers

Every person enumerated at the 1991 census has been classified either as a main worker or as a marginal worker or as a non-worker depending on whether or not the person concerned participated in any economically productive activity and if he or she did so participate, the total duration of participation in terms of days during the reference period of one year preceding the date of enumeration. According to such a classification, in the total population of Bijapur district, 1,110,288 persons are main workers, 108,867 persons are marginal workers and the remaining 1,708,835 persons are non-workers. In other words, the main workers, marginal workers and non-workers respectively constitute 37.92 per cent, 3.72 per cent and 58.36 per cent of the total population of the district. This set of figures may be compared with the corresponding set of figures

for the State which are 38.45 per cent (main workers), 3.54 per cent (marginal workers) and 58.01 per cent (non-workers). Whereas the proportion of main workers in the district is slightly lower than the State average that of the marginal workers is slightly higher and the overall position is that the district has a marginally lower proportion of total workers than the State as a whole.

In this matter, there are considerable differences within the district - between the rural and urban segments of the population as also amongst the various rural and urban units and between the males and females in such units. For instance, the main workers constitute 41.02 per cent in the rural population whereas their counterparts in the urban population account for just 27.85 per cent of urban population. Similarly, while the marginal workers form 4.56 per cent of the rural population their urban counterparts constitute just 0.98 per cent of the urban population. A comparative idea about the variations in the proportions of main workers, marginal workers and non-workers among the males and females in the case of the rural-resident population may be had from the Talukwise details (i.e. C.D.Blockwise details) furnished in Table 15. At the outset it may be noticed that the male-segment of the population has a higher proportion of main workers in it (52.08 per cent as compared to 29.79 per cent among females) and the female-segment has a higher proportion of marginal workers (8.78 per cent as compared to 0.48 per cent among males) as well as a higher proportion of non-workers (61.63 per cent as compared to 47.44 per cent among males). The relatively high proportion of workers among males conforms to the general pattern noticed in the State and lends support to the general notion in the society that man is the main bread winner of the family.

Table 15 : Percentage of Main Workers, Marginal Workers and Non-Workers for Rural Population of Taluks (C.D.Blocks), 1991

11.	Sindgi	39.25	50.22	27.72	4.64	0.41	9.08	43.89	50.63	36.80	56.11	49.37	63.20
District Rural		41.02	52.08	29.79	4.56	0.48	8.78	45.58	52.56	38.37	54.42	47.44	61.63

The taluk-level data disclose that the proportion of main workers is above the district average of 41.02 per cent in 5 taluks and that it is the highest (44.80 per cent) in the case of Mudhol taluk followed by Bilgi (44.48 per cent). In Bijapur, the most populous taluk of the district, the main workers constitute 40.46 per cent only. This proportion is quite low in Basavana Bagevadi taluk (40.35 per cent) as well as in Sindgi taluk (39.25 per cent) and the least in the case of Jamkhandi taluk (38.20 per cent). Sexwise particulars reveal that among the males, the proportion of main workers exceeds the 50 per cent mark in the case of all the 11 taluks of the district and that the district average is 52.08 per cent. This proportion varies between 50.22 per cent in Sindgi and 55.69 per cent in Mudhol taluk. Jamkhandi which holds the bottom-most place when total main workers are considered is seen to rank next only to Mudhol taluk when the proportion of main workers in the male population is considered. In Jamkhandi taluk the main workers among the males constitute 54.46 per cent. In Bijapur taluk too, this proportion is above the district average. If the position among females is examined it is noticed that the proportion of main workers varies between a minimum of 21.24 per cent in Jamkhandi taluk and a maximum of 35.16 per cent in Bilgi taluk. The range of variation is considerably higher than that among the males. This proportion is lower than the district average of 29.59 per cent in the case of only 3 out of the 11 taluks viz., Bijapur (27.88 per cent), Sindgi (27.72 per cent) and Jamkhandi (21.24 per cent). The extremely low rate returned by Jamkhandi taluk has obviously pulled down the district average.

Marginal workers are found among males as well as females in the rural areas of all the taluks. The proportion of marginal workers to total population varies between 2.65 per cent (Bijapur taluk) and 7.62 per cent (Badami taluk). This proportion is lower than the district average of 4.56 per cent in 5 taluks including Mudhol (3.53 per cent) and Bilgi (4.34 per cent) which incidentally have returned a high proportion of main workers. The difference based on sex is highly pronounced in the rural areas of the district, for as compared to a mere 0.48 per cent among males, among the females the marginal workers constitute as much as 8.78 per cent. At the taluk level, among the males, the proportion of marginal workers varies between 0.29 per cent (in the taluks of Bagalkot and Jamkhandi) and 1.02 per cent (in Bilgi taluk). This proportion is less than 0.50 per cent in as many as 6 taluks and exceeds 0.60 per cent in only two taluks viz., Indi (0.65 per cent) and Bilgi (1.02 per cent). In the case of female population, however, the proportion of marginal workers is more than 5.00 per cent in all the 11 taluks. This proportion varies between 5.08 per cent in Bijapur taluk and 14.72 per cent in Badami taluk and exceeds the district average of 8.78 per cent in 6 taluks. Incidence of marginal workers is comparatively higher in the female segment of the rural population of the district than in its male segment.

The broad category of workers includes 'main workers' as well as 'marginal workers' and presents a more balanced picture regarding the work participation rates. Accordingly, in the rural areas of the district, 45.58 per cent are workers - 52.56 per cent among males and 38.37 per cent among females. This proportion varies within a narrow margin of about 7 percentage points between 42.03 per cent in Jamkhandi taluk and 49.38 per cent in Badami taluk. Among males, this proportion exceeds 50 per cent in all the taluks (the least being 50.63 per cent in Sindgi taluk) and touches the highest figure of 56.21 per cent in Mudhol taluk. In the case of females, however, the maximum is 45.35 per cent (Badami taluk) and the minimum is 28.76 per cent (Jamkhandi taluk). The categories of workers and non-workers are complimentary to each other. Thus, in any particular unit of population, if the proportion of workers is high that of the non-workers is low to a corresponding extent and the *vice versa* is also true. As may be seen from Table 15, the non-workers constitute 54.42 per cent of the rural population of the district. This proportion happens to be the least (50.62 per cent) in Badami taluk and the highest (57.97 per cent) in Jamkhandi taluk. In the case of male population, this proportion varies between 43.79 per cent in Mudhol taluk and 49.37 per cent in Sindgi taluk whereas in the case of female population it varies between 54.65 per cent in Badami taluk and 71.24 per cent in Jamkhandi taluk.

A townwise percentage distribution of the urban population of the district by sex according to the categories of main workers, marginal workers and non-workers is presented in Table 16. In the total

urban population of the district, the main workers, the marginal workers and the non-workers respectively constitute 27.85 per cent, 0.98 per cent and 71.17 per cent.

* Includes the population of Outgrowths.

In eleven out of the 18 towns, the proportion of main workers to the total population of the town is higher than the district average of 27.85 per cent. This proportion touches the maximum of 32.43 per cent in the case of Rabkavi-Banhatti town and it is followed by 32.34 per cent noticeable in the case of Terdal. Both these towns belong to Jamkhandi taluk and are noted centres of weaving industry. At the other end, the lowest proportion of 23.44 per cent has been returned by Almatti-Sitimani which incidentally happens to be a new town located in a Project Area and is the smallest town of the district in terms of population size. The other towns where the proportion of main workers is relatively very low are Muddebihal (24.61 per cent), Bijapur (24.82 per cent) and Bagalkot (24.99 per cent). Of these three towns, populationwise, Muddebihal is a medium sized town whereas Bijapur and Bagalkot are quite large and happen to be the first and second most populous towns of the district.

Sexwise break up shows that in the male segment of the population of towns, the main workers constitute 45.32 per cent. Amongst the 18 towns, Terdal tops the list (51.98 per cent) and it is followed by Rabkavi-Banhatti (51.12 per cent) and Mahalingpur (50.11 per cent). This proportion exceeds the 50 per cent mark in the case of only these three towns. While Muddebihal has returned the lowest rate of 39.95 per cent, the towns of Almatti-Sitimani (41.01 per cent), Bagalkot (42.19 per cent) and Bijapur (42.65 per cent) have returned rates which are far below the district urban average of 45.32 per cent. In the female segment of the population of towns, the main workers account for 9.43 per cent - a figure which is approximately one-fifth the proportion returned by the male population. This proportion varies between 4.19 per cent in Almatti-Sitimani town and 15.23 per cent in the towns of Basavana Bagevadi and Guledagudda. The other towns where this proportion is fairly high are Hungund (14.54 per cent), Mudhol (13.16 per cent) and Rabkavi-Banhatti (13.01 per cent). Apart from Almatti-Sitimani, the other towns where the female main workers constitute less than 10 per cent of the female population are - Indi (9.91 per cent), Jamkhandi (9.21 per cent), Muddebihal (8.27 per cent), Talikota (7.97 per cent), Bagalkot (6.18 per cent) and Bijapur (5.49 per cent). This proportion is seen to be very low in the smallest town as well as the first and the second most populous towns of the district. The work participation rate among the male and female segments of the population of the town depends to a large extent on the economic characteristics of the concerned town and the recent trends of development noticeable therein.

It may be seen from Table 16 that there are marginal workers in all the 18 towns of the district. The proportion of such workers however is seen to vary between 0.22 per cent in Badami and 7.48 per cent in Kerur. The range of variation is very wide indeed. A closer look at the table however discloses that the highest proportion returned by Kerur town is somewhat an exception, for in no other town this proportion touches even the 3 per cent mark. Apart from Kerur, there are only 4 towns which have returned a proportion of marginal workers which exceeds the 2 per cent mark. These towns are Basavana Bagevadi (2.89 per cent), Hungund (2.72 per cent), Talikota (2.09 per cent) and Indi (2.07 per cent). In the case of males, the proportion of marginal workers in the least (0.05 per cent) in Rabkavi-Banhatti and the highest in Kerur (1.56 per cent). The only other town where this proportion is above 0.50 per cent is Hungund (0.53 per cent). On the other hand, as may be seen from Table 16, this proportion below 0.10 per cent in as many as 4 towns (excluding Rabkavi-Banhatti) viz., Muddebihal (0.08 per cent), Badami (0.07 per cent), Mahalingpur (0.07 per cent) and Bijapur (0.08 per cent). In the case of females, the proportion of marginal workers varies between as low a figure as 0.35 per cent in Bagalkot and as much as 13.29 per cent in Kerur. In this case, the margin of variation is very wide. This proportion is below one per cent in 4 towns, lies in the range of 1 to 2 per cent in the case of 7 towns and lies between 2 to 5 per cent in the case of 5 towns. With a tally of 5.65 per cent, Basavana Bagevadi ranks next to Kerur.

A consideration of the proportion of total workers to total population would yield a more balanced picture regarding the work participation rates in towns. Accordingly, it may be seen from table 16 that in the urban areas of the district, the workers constitute 28.83 per cent and the non-workers account for the remaining 71.17 per cent. Amongst the 18 towns, Kerur town has the largest proportion of workers in its population viz., 37.56 per cent and it is followed by Basavana Bagevadi (34.51 per cent). At the other end, Almatti-Sitimani has returned the lowest rate of 24.18 per cent. In Bijapur, the most populous town of the district, the workers account for 25.31 per cent - a figure which is slightly higher than that noticed in the case of Bagalkot (25.22 per cent) the second largest town of the district. Since the categories of workers and non-workers are complimentary to each other, the towns with a high proportion of workers will have a correspondingly low proportion of non-workers and vice-versa.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

The Primary Census Abstract furnishes, in a nutshell as it were, vital information on the basic demographic and economic composition of the population. This statement, referred to as PCA, summarises the whole mass of data gathered at the Census. The smallest geographical unit with a clearly defined boundary identifiable on the field that has been delineated for ensuring cent per cent coverage of the area under the jurisdiction of various administrative units is the Census Enumeration Block. The details gathered in the household schedules in respect of each and every person enumerated in each such block have been meticulously tabulated to prepare this Primary Census Abstract. The tabulation has been done entirely by manual processing of the data at the Regional Tabulation Offices. The village PCA is derived from the Block PCA and in case of urban areas, the Block PCA has yielded the ward and Town PCA. In turn, the Taluk (Rural) and Taluk (Urban) as well as Taluk (Total) PCA statements as well as the C.D.Block-wise PCA Statements are built up on the basis of Village-wise and Town-wise data. This process goes on until it yields the data for higher and higher administrative divisions, such as the District and the State, culminating at the apex in the form of a single line statement for the country. The entire edifice thus rests on the information contained in the household schedules filled up by the enumerator.

The District Primary Census Abstract is presented immediately after this Explanatory Note. This statement gives the aggregate figures for the district with the rural-urban break up, the aggregate figures for each C.D.Block (with the rural-urban break up) and the aggregate figures for each town/urban agglomeration within the district. It is important to note that the lowest unit for which the data are presented here is the C.D.Block and not the traditional taluk*. Thereafter the C.D.Blocks within the district are taken up one by one in the alphabetical order of their names. For each C.D.Block, an alphabetical list of villages (which indicates the code numbers assigned to villages in 1991 as well as the corresponding code numbers assigned in 1981) precedes the presentation of the village-wise PCA followed by the ward-wise PCA in respect of towns and outgrowths if any within the jurisdiction of the concerned C.D.Block. After thus exhausting all the C.D.Blocks in the district, the town/urban agglomerations are covered one by one in the ascending order of their location code numbers without regard to the fact whether any of these towns or portions thereof (eg. outgrowths) have already been covered under one or the other of the Community Development Blocks. As in 1981, on this occasion too, the PCA has been compiled separately in respect of the Scheduled Castes and Scheduled Tribes Population of the District. The District PCA for Scheduled Castes and for Scheduled Tribes are presented after the PCA for the urban areas. The pattern of presentation of data in these two statements is the same as that adopted for presentation of data in the District PCA.

It may be recalled that in Karnataka the term Community Development Block is not in vogue and that its equivalent is the Taluk Panchayat Samiti. The jurisdiction of each Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns. In other words, the administrative jurisdiction of a Taluk Panchayat Samiti covers all the villages of the Taluk (as listed out for the 1991 census) as also the villages or parts thereof which have been classified as non-municipal towns for purposes of the 1991 census and the revenue villages or portions thereof which have been identified as outgrowths of statutory towns and have therefore been excluded from the purview of Rural PCA. It is important to remember that in this statement, the particulars relating to the non-municipal towns (such as those administered by Mandal Panchayats) and those relating to the outgrowths (places which are not towns in their own right) are repeated - for these appear once below the concerned C.D.Block and again under the 'urban areas' of the district.

* *For purposes of comparison with 1981 data the Taluk wise District PCA with Rural - Urban breakup is given in Appendx I.*

The Primary Census Abstract has 21 main columns to furnish information about the name of the unit, area, number of occupied residential houses, number of households, population, number of persons in the age-group of 0-6, number of persons belonging to Scheduled Castes and Scheduled Tribes, number of literates, number of main workers and their distribution among nine industrial categories, number of marginal workers and the number of non-workers. In the District PCA, each column indicating the data on population characteristics is sub-divided into 3 columns in order to indicate the total as well as the sex-wise break-up whereas in the village/town PCA, each such column (with the exception of Total Population and Population in the 0-6 age group) is sub-divided into two columns to indicate the sex-wise break-up only.

It may be mentioned at this juncture that for each town/urban agglomeration in the district, information regarding the total population, Scheduled Castes Population and Scheduled Tribes Population of each census enumeration block as also the particulars regarding the boundaries of each Census Enumeration Block have been compiled and are kept for the census data users' reference in the Library of the Office of the Director of Census Operations, Karnataka.

COLUMN 1 : Location Code Number :- The location code number assigned to the village or the town as the case may be is entered in this column.

COLUMN 2 :- Name of Village/Town/Ward :- The name of the village or the town as finally adopted for the 1991 census purposes is entered in this column. The towns and cities are often divided into smaller geographical segments called wards, mohallas or divisions for purposes of administration. Such units bear distinctive locality names or specific numbers. It is this name or the number of the ward or its equivalent unit that is mentioned here in the case of towns.

Irrespective of whether a town is divided into administrative wards or not, every town is invariably constituted into territorial divisions for the conduct of civic elections. This delimitation of constituencies is done as an essential and preliminary process of civic elections scheduled to be held periodically. So, in some cases the name or number reported in this column refers to such territorial divisions and not to administrative divisions.

COLUMN 3 : Area of the Village in Hectares and of Town in Square Kilometres :- For the villages, the area is reported here in hectares upto two places of decimal and for the towns, as also the wards or divisions thereof, the area figures are furnished in square kilometres upto two places of decimal. It may be incidentally mentioned here that for none of the towns in the State, Ward/Division-wise area figures are available. If the area figures are not available for any reason, a dash (-) is entered in this column.

COLUMN 4 : Number of Occupied Residential Houses :- A 'Census House' could be wholly residential or partly residential or else completely non-residential according to the use to which it is put. All census houses enumerated as either wholly or partly residential at the time of the census count are added together to get the data for the block and from thence to derive the data for higher units. Houses found vacant at the time of the census count are not reckoned as occupied residential houses. The information for this column has been compiled from the Abridged Houselists.

COLUMN 5 : Number of Households :- This information too is compiled from the Abridged Houselists. The actual total number of households including the 'normal', 'institutional' and the 'houseless' that were enumerated at the census count is mentioned in this column. Generally, the number of households in any unit would be equal to or more than the occupied residential houses in that unit because of the houseless households that one may come across in that unit and also because of the occasional instances of two or more households sharing a common census house.

COLUMNS 6, 7 AND 8: Total Population (including Institutional and Houseless Population):- The total population as on the reference date is furnished in column 6 while in the next two columns the sex-wise break-up is given. The institutional population refers to such of those who were enumerated in institutions like hostels, chummeries, hospitals, prisons etc. The houseless persons

represent those who were enumerated on the night of 28th February 1991 at the places where they were found at that time, provided they had not already been enumerated elsewhere.

COLUMNS 9, 10 and 11 : Population in the age group (0 - 6) :- The total number of children belonging to the age-group of 0-6 in the total population as also the number of males and females among them are reported under these three columns. This information is of considerable significance since all such children are regarded as illiterate at the 1991 Census.

COLUMNS 12 AND 13 : Scheduled Castes :- Number of males and females belonging to Scheduled Castes is indicated in these two columns. Whether a person belongs to a Scheduled Caste or not has been determined with reference to the List of Scheduled Castes in Karnataka according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No. 108 of 1976) (See Appendix). Scheduled Castes may belong to either the Hindu or the Sikh or the Buddhist religion.

COLUMNS 14 AND 15 : Scheduled Tribes :- Number of males and females belonging to Scheduled Tribes is reported under these columns. Whether a person belongs to a Scheduled Tribe or not has been determined with reference to the 'List of Scheduled Tribes in Karnataka' according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No.108 of 1976) (See Appendix for the list). Scheduled Tribes may belong to any religion.

COLUMNS 16 AND 17 : Literates :- Sex-wise break up of the total number of persons who are literate, irrespective of their levels of educational attainments is given in these two columns. By definition a literate is a person who can both read and write with understanding in any language. It is important to note that for purposes of the 1991 census by definition all children in the 0 - 6 age group are regarded as illiterate. Even if such a child is going to school and has picked up reading and writing a few odd words it is treated as illiterate.

COLUMNS 18 AND 19 : Total Main Workers:- A worker is a person who participates in economically productive work. The reference period for judging whether a person is a worker or not in the year preceding the day of enquiry. If a person had worked even for one day during this entire period he or she is entitled to be classified as a worker. If for any such worker the period of work is 183 days or more then that person is a main worker. On the other hand, if such period is less than 183 days then that worker is a marginal worker. In columns 18 and 19 the total number of main workers is furnished sex-wise and a sex-wise break up of these main workers according to the nine-fold 'industrial classification of workers' is presented in the *next 20 columns i.e., from column 20 to column 39.*

COLUMNS 20 AND 21 : Cultivators (Category-I) :- These two columns give out the number of male and female workers who satisfy the conditions laid down in the definition of a cultivator. A cultivator may be an employer, a single worker or an unpaid family worker. Participation in work may be by way of physical labour or by way of supervision and direction. The lands cultivated may be owned by the household or taken on lease for payment in money or kind or share in the produce. Cultivation, as already emphasised involves ploughing, sowing and harvesting and allied activities in the production of cereals and millet crops, pulses, raw jute and kindred fibres, sugarcane, tapioca and oil seeds.

COLUMNS 22 AND 23 : Agricultural Labourer (Category -II) :- A person who works in another person's land for wages in money or kind or share and does not have any lease or contract on the land on which he or she works is an agricultural labourer. In this case too, the crops grown on the lands are quite pertinent and the difference between a cultivator and an agricultural labourer lies in the fact that the former works on his own or leased in lands as an independent worker while the latter works for wages having no right whatsoever on the lands on which he works. The sex-wise break-up of such workers is given in these two columns.

COLUMNS 24 AND 25 : Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities (Category - III) :- A sex-wise break up of the workers who were mainly engaged in activities connected with livestock rearing, forestry

and logging, hunting, fishing, plantations, orchards etc., is given under these columns.

COLUMNS 26 AND 27 : Mining and Quarrying (Category - IV) :- A sex-wise break up of the workers mainly engaged in activities connected with mining and quarrying is given under these columns.

COLUMNS 28 AND 29 : Manufacturing, Processing, Servicing and Repairs - Household Industry (Category - V[a]) :- Household industry belongs to the broad category of 'manufacturing, processing, servicing and repairs' and represents a particular sector therein. Household industry is generally conducted by the head of household himself or herself and or mainly by the members of the household, at home or within the village in the case of those dwelling in rural areas and only within the residential premises occupied by the household in the case of those living in urban areas. A person may be a labourer or a petty employee in the household industry run by some other household. By and large the household industry is carried on by individuals on a small scale with or without the assistance of family members all of whom work as unpaid family workers and the entire earnings are treated as family income.

COLUMNS 30 AND 31 : Manufacturing, Processing, Servicing and Repairs - Non-household Industry (Category - V[b]) :- A sex-wise break up of the workers who were engaged in manufacturing, processing, servicing and repair activities in establishments which do not qualify to be classified as household industry as defined above {category V(a)} is given here.

COLUMNS 32 AND 33 : Construction (Category-VI) :- Workers engaged in construction, maintenance, upkeep, repair and similar activities of buildings, roads, railways. bridges, dams, canals, electrical and water supply installations, communication systems etc., are shown under this category.

COLUMNS 34 AND 35 : Trade and Commerce (Category - VII) :- In these two columns the number of male and female workers engaged in wholesale or retail trade in goods or engaged in dealing with insurance, stocks and shares, banking and financial institutions etc., either as proprietors or in any other capacity are indicated.

COLUMNS 36 AND 37 : Transport, Storage and Communications (Category - VIII) :- A sex-wise breakup of the workers in establishments such as railways, road transport, transportation by water-ways or by air, postal and telegraphs, telecommunications etc., which are engaged in transport, storage and communication activities is given in these columns.

COLUMNS 38 AND 39 : Other Services (Category - IX) :- This residuary category includes employees of the Central and State Governments, local bodies and other organisations and institutions engaged in educational, scientific, medical and health services, religious and welfare services, community services, recreational services, personal services and other miscellaneous activities not covered in the 8 categories specified above.

COLUMNS 40 AND 41 : Marginal Workers :- Males and females who are workers but have worked for less than 183 days during the reference year are reported under these two columns. Such workers, irrespective of the economic sector in which they work, are considered together and reported here.

COLUMN 42 AND 43 : Non-workers :- Irrespective of age and sex, all those who are not economically active are non-workers and a sex-wise break-up of such persons is given in these two columns. The aggregate of the main workers, marginal workers and non-workers would be equal to the total population of that unit.

NOTE 1 : The area figure for the district given under column No.4 against "Total" represents "Geographical Area" and has been furnished by the Surveryor General, India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D.Blocks/Taluks in the district will not tally with the district figures (except urban), because the area figures for C.D.Blocks/Taluks represent the land-use area based on village wise area figures as reported by the Local Officers. The total area of the taluk includes the area of the statutory as well as non-statutory towns within the jurisdiction of the concerned taluk. The total area of the C.D.Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2 : Outgrowths of towns in urban agglomerations are denoted by letter "OG".

3 : The following abbreviations have been used to indicate the Civic Administration Status of Town.

MC : Municipal Corporation
CMC : City Municipal Council
TMC : Town Municipal Council
NAC : Notified Area Committee
CB : Cantonment Board
SB : Sanitary Board
MP : Mandal Panchayat
NMCT : Non-Municipal Census Town

BIJAPUR C.D.BLOCK

Note :

Mahalbagayat revenue village which had been assigned Location Code No.2 has since been classified as outgrowth of Bijapur City. Hence this village do not find a mention in the alphabetical list of villages as well as in the PCA statement. This explains the gap in location code number in the list of villages and the PCA statement of Bijapur C.D.Block. However this unit appear in the urban category as part of Bijapur Urban Agglomeration.

APPENDIX II

List of Scheduled Castes and Scheduled Tribes as per the Scheduled Castes and Scheduled Tribes orders (Amendment) Act, 1976, (No. 108 of 1976 dated the 18th September, 1976) adopted for the 1991 Census.

SCHEDULED CASTES

1. Adi Andhra
2. Adi Dravida
3. Adi Karnataka
4. Adiya (in Coorg District)
5. Ager
6. Ajila
7. Anamuk
8. Aray Mala
9. Arunthathiyar
10. Arwa Mala
11. Baira
12. Bakad
13. Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14. Bakuda
15. Balagai
16. Bandi
17. Banjara, Lambani
18. Bathada
19. Beda Jangam, Budga Jangam
20. Bellara
21. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
22. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23. Bhovi
24. Bindla
25. Byagara
26. Chakkiliyan
27. Chalavadi, Chalvadi, Channayya
28. Chandala
29. Chenna Dasar, Holaya Dasar
30. Dakkal, Dokkalwar
31. Dakkaliga
32. Dhor, Kakkayya, Kankayya
33. Dom, Dombara, Paidi, Pano
34. Ellamalwar, Yellammalawandlu
35. Ganti Chores
36. Garoda, Garo
37. Godda
38. Gosangi
39. Halleer
40. Halsar, Haslar, Hulasvar, Halasvar
41. Handi Jogis
42. Hasla
43. Holar, Valhar
44. Holaya, Holer, Holeya
45. Holeya Dasari
46. Jaggali
47. Jambuvulu
48. Kadaiyan
49. Kalladi
50. Kepmaris
51. Kolupulvandlu
52. Koosa
53. Koracha
54. Korama
55. Kotegar, Metri
56. Kudumban
57. Kuravan
58. Lingader
59. Machala
60. Madari
61. Madiga
62. Mahar, Taral, Dhegu Megu
63. Mahyavanshi, Dhed, Vankar, Maru Vankar
64. Maila
65. Mala
66. Mala Dasari
67. Mala Hannai
68. Mala Jangam
69. Mala Masti
70. Mala Sale, Netkani
71. Mala Sanyasi
72. Mang, Matang, Minimadig
73. Mang Garudi, Mang Garodi
74. Manne
75. Masthi

76. Mavilan
77. Meghval, Menghvar
78. Moger
79. Mukri
80. Mundala
81. Nadia, Hadi
82. Nalkadaya
83. Nalakeyava
84. Nayadi
85. Pale
86. Pallan
87. Pambada
88. Panchama
89. Panniandi
90. Paraiyan, Paraya
91. Paravan
92. Raneyar
93. Samagara
94. Samban
95. Sapari
96. Sillekyathas
97. Sindhollu, Chindollu
98. Sudugadu Siddha
99. Thoti
100. Tirgar, Tirbanda
101. Valluvan

SCHEDULED TRIBES

1. Adiyan
2. Barda
3. Bavacha, Bamcha
4. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5. Chenchu, Chenchwar
6. Chodhara
7. Dubla, Talavia, Halpati
8. Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9. Gond, Naikpod, Rajgond
10. Gowdalu
11. Hakkipikki
12. Hasalaru
13. Irular
14. Iruliga
15. Jenu Kuruba
16. Kadu Kuruba
17. Kammara (in South Kanara District and Kollegal Taluk of Mysore District)
18. Kaniyan, Kanyan (in Kollegal Taluk of Mysore District)
19. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20. Kattunayakan
21. Kokna, Kokni, Kukna
22. Koli Dhor, Tokre Koli, Kolcha, Kolgha
23. Konda Kapus
24. Koraga
25. Kota
26. Koya, Bhine Koya, Rajkoya
27. Kudiya, Melakudi
28. Kuruba (in Coorg District)
29. Kurumans
30. Maha Malasar
31. Malaikudi
32. Malasar
33. Malayekandi
34. Maleru
35. Maratha (in Coorg District)
36. Marati (in South Kanara District)
37. Meda
38. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
39. Palliyan
40. Paniyan
41. Pardhi, Advichincher, Phanse Pardhi
42. Patelia
43. Rathawa
44. Sholaga
45. Soligaru
46. Toda
47. Varli
48. Vitolia, Kotwalia, Barodia
49. Yerava

Appendix III - PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All - India and for each State and Union Territory. The publication series is as follows:

Series No

1. India

In each of these series (for all - India and each State/Union Territory) the different series of tables (A Series - General Population Tables, B - Series - General Economic Tables, etc.,) will be brought out as different Parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all - India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan:

Part No. and subject covered	Sub-part No. if any, and the topics covered
1	2
Part I - Administration Report (for Office use only)	Part I-A - Administration Report Enumeration
	Part I-B - Administration Report Tabulation
Part II - General Population Tables	Part II-A - General Population Tables - A-Series
	Part II-B - Primary Census Abstract
Part III - General Economic Tables	Part III-A - B-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
	Part III-B - B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers seeking/available for work will be entered on full count basis.
Part IV - Social and Cultural Tables	Part IV-A - C-Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism.
	Part IV-B - C-Series tables covering mother tongue, religion of population and household composition.

Part V - Migration Tables	Part V-A - D-Series tables of first stage covering tables based on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories. Part V-B - D-Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.
Part VI - Fertility Tables	F-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
Part VII - Tables on Houses and Household Amenities	H - Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on Scheduled Castes and Scheduled Tribes. This volume will contain analytical notes also.
Part VIII - Special Tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for Scheduled Castes and Scheduled Tribes respectively. The data relating to Scheduled Castes and Scheduled Tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each Scheduled Caste/Tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of Scheduled Castes and Scheduled Tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part IX - Town Directory, Survey Report on Towns and Villages	Part IX - A - Town Directory Part IX - B - Survey Report on selected Towns Part IX - C - Survey Report on selected Villages
Part X	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes

Part XI - Census Atlas	Union and State/Union Territory Census Atlases
Part XII - District Census Handbook	Part XII - A - Village and Town Directory
	Part XII - B - Village and Town wise Primary Census Abstract

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Areas

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1981-1991life tables and age data

(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks will be available for sale at the Government Central Press, Bangalore and the other publications at the Office of the Director of Census Operations, Karnataka, Bangalore and the Manager of Publications, Civil Lines, New Delhi - 6.
