MOTIF

Improvement in the rural health service is one of the objective of the State Government. Establishment of rural health centres was one of the steps in this direction. Opening of medical colleges in the backward areas is another step. In order to serve rural masses and to encourage students from rural areas, a medical college has been established in 1976 at Ambejogai in Bid district. The college named after Shree Swami Ramanand Tirtha is attached to the hospital by the same name.

Ambejogai is about 96 kms. away from the district headquarter town-Bid.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approached to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has

been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,

the 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook Project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc. deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.

Dated 26th January 1984 (Republic Day).

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 District Census Handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts, Part A related to the village and town directory. Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other States in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts – Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health sub-centres and community health workers, has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly the additional data for town directory in respect of civic and other amenities in Class I and II towns are oriented to "minimum needs programme" especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

The district has been named after its headquarter town Bhir. The town by itself is set in a hallow or a 'Beel' into the scrap of the Balaghat plateau trenched by Bandsura river; and hence the name Bhir. The word 'Beel' seems to have degenerated into 'Bhir' and subsequently with the passage of time into Beed or Bid. Again the persian word 'Bhir' implying water may also explain the origin of the name; because the location provides abundance of subterranean water supplies tapped by unfailing wells.

Pre-historic account of the district is not available. In course of time when Aryans came down-to south. kingdoms were founded. These were ruled by Hindu Kings in the ancient period; by Muslim Kings in the mediaeval period and later by Britishers. Bid District was a part of these kingdoms.

Kaij taluka, which is a tahsil of the present district also, was abolished to merge with Amba taluka in 1905. The name of Amba taluka was subsequently charged as Mominabad Taluka. Between 1906 and 1948 there were no major changes in the boundaries of the district. In 1950 twenty six enclave villages of Ahmadnagar district were transferred to Bid district and in return twenty one villages from Patoda and Ashti tahsils were transferred to Ahmadnagar district.

One fourth area of the district was a Jagir. The present Patoda tahsil was mostly Nizam's own estate and was called "Sarf-e-khas." It was taken over under the Sarf-e-khas (Merger) Regulation of 1949. With the abolition of all the Jagirs their villages were taken over under direct Government administration in 1949 under the Hyderabad (Abolition of Jagirs) Regulation 1949. Consequent upon the integration of Sarf-e-Khas and Jagirs, boundaries were reconstituted of all the tahsils in the district in the year 1950. A new tahsil 'Kaij' was recreated with its headquarters at Kaij. Patoda tahsil which was previously under Sarf-e-Khas was converted with a 'mahal'. Reorganisation of states in 1956 resulted in the transfer of the district from Hyderabad State to Bombay State. Since 1st May 1960 it forms a part of Maharashtra State. In 1962, Mominabad tahsil and town was renamed as Ambejogai since then there is no jurisdictional change in the district boundaries. However, number of inhabited and uninhabited villages has increased from 1,043 in 1961 to 1,268 in 1981. As regards towns, the number remained at 7 since 1961 till 1981.

Location, Relief and Drainage

The district lies between 18.28° and 19.27° north latitude and 74.54° and 76.57° east longitude. But for the projection of Ashti tahsil towards Ahmadnagar in the west, the district assumes the shape of trapezium with southern and northern sides running almost parallel. Paithan and Ambad tahsils of Aurangabad district and Partur tahsil of Parbhani district flank the district in the north and again Pathri and Gangakhed of the Parbhani district and Ahmedpur of Osmanabad district are contiguous in the east. The boundaries of Osmanabad district cover almost 60 per cent of southern side of the district and the rest touches Jamkhed Tahsil of Ahmadnagar district. The entire western side and even a part in the north is bounded by the various tahsils of Ahmadnagar district.

Balaghat hill range which traverses the central portion of the district from the Ahmadnagar border in the west to the district boundary in the east divides the district in two zones. One low-lying portion in the north known as Gangathadi and the other consisting of uplands locally known as Ghat or Balaghat. The general slope in the northern portion is towards north and north-east while that in the southern upland portion is towards south and south-east. The general slope in Ashti tahsil is towards the south.

District Bid covers an area of 11,085.0 km² and has a population of 1,486,030 as per 1981 census. It ranks 14th in area and 25th in population among 26 districts in the state. This indicates that Bid district is one of the very thinly populated districts in the state. Its rank for the density is 24th in the state.

All the streams in the district drain into one or the other of the three principal rivers viz; Godavari along the northern, Manjra along the southern and Sina along the south western boundaries of the district The tributaries of Godavari traverse the district from Kuran-Pimpri below Paithan to Borkhed above Wansangaon. The river drains the northern part of the district and flows in a deep bed with high banks rising to 15 metres even but on an average to 10 metres above the bed of the river. As a result, the water of the river is not easily available for irrigation purposes. The tributaries of Godavari are Lendi, Amrita, Sindphana, Saraswati, Gunwati and Wan. Lendi rises in the low hills to the south-west of Chakalamba village and flows northwards passing by that village on its east and after a further flow of 2 kms from the district boundary for a greater part of its course. In its lower most reach it again flows within the district to join the Godavari.

Amrita also has the same source as Lendi and takes in general, a north easterly course leaving Umapur a kilometre to the north-west of it and flowing by Dhondrai joins the Godavari at Sawleshwar.

Sindphana river rises in the Chincholi hill at the north-west appex of the Balaghat plateau and flows in a northeasterly course past Amalner. After having a long and haphazard course it joins Godavari at Kshetra Manjrath.

The remaining three tributaries of Godavari viz. the Saraswati, Gunwati and Wanganga are of considerable size. The Saraswati and Gunwati rise very near each other. The Saraswati flows northwards passing by Hingri, Dundrur and after Belur turns eastwards to join the Godavari. The Gunwati takes a north easterly course and passes by Hiwra to join Godavari a kilometre and a half below the Saraswati Sangam.

Wan or Wanganga has its source to the north of Dharur and has a fairly long deeply incised easterly and south easterly course in the Balaghat plateau itself. It takes a sharp turn northwards to the northwest of Ambejogai cutting through the scrap and then flows in a north easterly direction towards the Godavari.

Manjra emanates in the mountains in Patoda tahsil and flows along the southern border of the district.

Sina river flows on the south western boundary of the district. Talwar, Kamli, Rooti and Mehkari are its tributaries.

Climate

The climate of the district is pleasant for the major part of the year. The year may be divided into four seasons. The cold season from December to February is followed by the hot season from March to May. The south-west monsoon season falls between June and September and the post-monsoon season from October to November.

Within the district a cool climate is found even during summer in Patoda and Kaij tahsils. The climate of Bid, Manjlegaon and Georai on the low lands is warm and humid. Village Chincholi of Patoda tahsil is at a higher elevation from the sea level and its climate, as such, is just that of a hill station. Among all the tahsils of the district, the climate of Ambejogai is very pleasant and it is because of this season that a T. B. Sanitorium has been set up there.

Maximum and minimum temperatures in the district range between 43°C and 13°C. The average annual rainfall for the district is 750 mm. The rainfall in the district increases from the west to the east, varying from 665.3 mm. at Ashti near western border to 850.6 mm. at Ambejogai near the eastern border. About 80 per cent rainfall is received in the south-west monsoon period. The variation in the rainfall from year to year is also fairly large.

Soil

The district is underlain by the Deccan traps. The trap rocks belong to the type called "Plateau Basalt" and are uniform in composition corresponding to that of dolerite or basalt. They are dark grey or dark greenish grey in colour.

The Deccan traps by decomposition under tropical conditions give rise to a porous rock laterite. The laterite form a thin cap over the Deccan traps at many places, and is at places rich in iron ore which was used by the primitive smelters.

The traps move often within into a rich and fertile black cotton soil which forms vast spreads in different places in the district, especially in Georai and Manjlegaon tahsils. In the remaining tahsils the soils are light shallow and stony interspread by strips of black soil on the banks of rivers and nallahs. Soils in the northern and eastern parts are, however, undulating and light. The soils in the river valleys are very fertile, deep black and capable of growing variety of crops.

Census Houses and Households

Columns 4 and 5 of the primary census abstract reveal the number of occupied residential houses and households in the district. For purposes of census, a census house has been defined as a building or a part thereof having a main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant, residential, non-residential or both.

"A household" is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. It may comprise of persons related by blood or unrelated persons or having a mix of both. The households comprising of unrelated persons are called "institutional households" and include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc.

Yet another category of population comprises of houseless households and include persons who do not have any fixed place or residence but move from place to place, camp at night at their own choosing or just live on streets, pavements, gardens or in open places.

Total number of occupied residential houses in the district stood at 266,402 and that of households at 270,999 at the time of 1981 census. Average household size works out to 5.5 persons. The number of households per km^2 has increased from 20 in 1971 to 24 in 1981. The same in rural areas has gone up from 18 to 21 and in urban areas it has jumped up from 85 to 173 during the same period i. e. 1971-81.

Distribution of Population in Rural and Urban Areas

At 1981 census the population of the district has been returned at 1,486,030 persons comprising of 755,971 males and 730,059 females. Thus the population of the district constitutes 2.37 per cent of the population of the state dispersed over 3.60 per cent of the area. The district comprises of 7 tahsils and Ambejogai is the most populous one with 333,558 persons. (Table 1)

TABLE 1

Population, number of villages and towns, 1981

	District Total ..	1,486,030	755,971	730,059	1,256,259	636,075	620,184	229,771	119,896	109,875	1,268	1,256	7

Against this Patoda is the least populous tahsils inhabiting 128,216 persons. The remaining tahsils in order of their population are : Bid (250,553), Manjlegzon (220,494), Kaij (213,444), Georai (188,521) and Ashti (151,244).

A revenue village is the basic administrative unit in the rural areas of the counrtry. It may be defined as a statutory recognised unit having definite boundary and separate land records. On the other hand urban areas are specially defined for purposes of census. The criteria adopted for 1981 census is :—

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria :—

(*i*) A minimum population of 5,000 ;

(*ii*) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per km^2.

Most of the population of the district lives in its rural areas. To substantiate, out of a total population of 1,486,030 persons, those living in the countryside number 1,256,259 persons. In other words 84.54 per cent of the population lives in rural. Bid and the remaining 15.46 per cent lives in the urban areas. When compared with the rural-urban differentials at the state level it is seen that the district is significantly less urban, than the state as a whole, the proportion of urban population at the state level stands at 35.03 per cent.

Size, Class and Status of Towns

Towns have been divided into the following classes by population size to make a comprehensive study of their varied demographic characteristics :

Class I	100,000 and above
Class II	50,000 – 99,999
Class III	20,000 – 49,999
Class IV	10,000 – 19,999
Class V	5,000 – 9,999
Class VI	Below 5,000.

In 1981 no town has been added nor has any town been declassified from amongst the 7 towns of the district in 1971 census (Table 2).

TABLE 2

(a) Added	..	Nil
(b) Declassified	..	Nil

No town in the district qualifies to be a Class I town according to the above classification. The only Class II town is Bid with a population of 80,287. Three towns viz. Ambejogai (42,362), Manjlegaon (22,555) and Parali (48,946) qualify to be class III towns. Dharur (12,836) and Georai (15,495) are class IV towns and the remaining one town viz. Ashti is a class V town with a population of 7,290.

There are 1,256 inhabited villages in the district (*Table* 3).

TABLE 3

Distribution of Inhabited Villages by population ranges

Range of population		No. of villages in each range	Percentage of villages in each range
1		2	3
- 200	..	44	3.50
200- 499	..	328	26.12
500-1,999	..	778	61.94
2,000-4,999	..	93	7.40
5,000-9,999	..	11	0.88
10,000+	..	2	0.16
All ranges	..	1,256	100.00

44 villages constituting 3.50 per cent of the total villages have less than 200 population. Against this 2 villages (0.16 %) have more than 10,000 population. The largest number of villages numbering 778 and constituting 61.94 per cent of the total villages in the district fall in the population range of 500-1,999 followed by 328 (26.12 %) villages in the size class of 200-499 population. The remaining 93 and 11 villages fall, respectively, in the population range of 2,000-4,999 and 5,000-9,999. Villages may further be divided as small sized (population below 500), medium sized (500-1,999), large sized (2,000-4,999) and exceptionally large sized (5,000 +). Within the district it may be seen that there are 372 (29.62 %) small sized villages. The medium and large sized villages 778 (61.94 %) and 93 (7.40 %), respectively. There are, however, 13 (1.04 %) villages as can be called exceptionally large villages according to the above classification.

Population Growth, Density and Sex Ratio

During 1971-81 a significantly lower growth rate of 15.54 per cent has been found in the district when compared with the ones observed during 1951-61 and 1961-71. 1981 census added 199,909 persons to its predecessor 1971. Again this rate of growth is much lower than that of the state (24.54 %). A look on the growth history of the district reveals an increase of about 26 per cent during 1901-11. May be the increase is due to the recovery from the severe famine witnessed by the district during the earlier decade. The influenza epidemic of 1918-19 seems to have taken a heavy toll of life as is evident through a negative growth rate of 25.12 per cent during 1911-21. A record from this epidimic is discernable from the highest ever growth rate of 35.88 per cent during 1921-31. Interestingly the 1931 population figure is very near the one returned at 1911. Subsequently, a steady rate of growth of 12.21 per cent and 13.44 per cent has been found during 1931-41 and 1941-51 respectively. Increase is again seen during *1951-61 and 1961-71.* The corresponding growth rates stand at 21.24 per cent and 28.42 per cent. This increase may be the result of reduction in death rate through the extension of health schemes in the rural areas, control of small-pox, malaria, etc. which otherwise would take a heavy toll of life. The lower growth rate of 15.54 per cent during 1971-81 may be due to the migration of people to the industrial areas of the state for better economic persuits.

Within the district the highest growth rate of the order of 26.35 per cent during 1971-81 has been observed in Ambejogai tahsil, followed by 23.51 per cent in Manjlegaon tahsil. Bid tahsil has also given out a higher growth rate of 21.53 per cent than the district average of 15.54 per cent. All the remaining four tahsils of the district have returned a growth rate which is lower than the district average. The lowest (1.43 %) has been observed in Kaij tahsil (Table 4).

TABLE 4

Decadal change in distribution of population

Name of tahsil	Population						Percentage decadal (1971-81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
1. Bid ..	206,173	156,208	49,965	250,553	170,266	80,287	+21.53	+ 9.00	+60.69
2. Georai ..	170,117	159,577	10,540	188,521	173,026	15,495	+10.82	+ 8.43	+47.01
3. Manjlegaon ..	178,523	164,924	13,599	220,494	197,939	22,555	+23.51	+20.02	+65.86
4. Ambejogai ..	264,004	205,210	58,794	333,558	242,250	91,308	+26.35	+18.05	+55.30
5. Kaij ..	210,434	199,890	10,544	213,444	200,608	12,836	+ 1.43	+ 0.36	+21.74
6. Patoda ..	120,638	120,638	—	128,216	128,216	—	+ 6.28	+ 6.28	—
7. Ashti ..	136,232	130,373	5,859	151,244	143,954	7,290	+11.02	+10.42	+24.42
District total ..	1,286,121	1,136,820	149,301	1,486,030	1,256,259	229,771	+15.54	+10.51	+53.90

At the district level, 1971-81 rural-urban differentials reveal phenominal higher rate of growth in urban areas than in the rural ones. The rural growth rate has been found at 10.51 per cent and the corresponding urban growth rate at 53.90 per cent. Similarly, in each tahsil we find urban growth rates higher than the one found in rural areas, which could be the result of migration from rural to urban areas, more particularly so to the industrial towns.

The highest urban growth rate to the tune of 65.86 per cent has been given out by Manjlegaon tahsil. Bid tahsil follows with 60.69 per cent urban growth. Ambejogai ranks third with 55.30 per cent rate of growth. All the remaining tahsils have also registered a growth but the same is below the district average of 53.90 per cent. There is, however, one tahsil viz. Patoda which has no urban population.

Over the years, we find in general an increasing trend in percentage urban population. Since 1951 till 1981, percentage urban population has increased but for slight decrease in 1961 from 10.47 per cent to 15.46 per cent. However, as compared to state proportions of percentage urban population. Bid district lags behind in urbanisation. Percentage urban population for the state has increased from 28.75 per cent in 1951 to 35.03 per cent in 1981 (Table 5).

TABLE 5

Growth, density and sex-ratio of urban population in the district in relation to the state

N. A.—Not Available.

The population of 1,486,030 persons of the district in 1981 is spread over an area of 11,085.0 km² then by yielding a density of 134 persons per km². This is, however, lower than the state density of 204 persons per km². Within the district there are two tahsils viz. Ambejogai and Bid which have a density higher than the district average. The same has been returned at 202 and 166 persons per km². Density in all the remaining tahsils is lower than the district average and Patoda has the lowest of 97 persons per km².

Of the 7 towns in the district Bid town has the highest density of 9,685 persons per km² as per 1981 census. Manjlegaon ranks second with 4,769 persons and Ambeiogai third with 4,161 persons per km². There is yet another town namely ; Parali has more than 1,000 persons per km . The density in respect of the remaining 3 towns is between 141 and 296 persons per km (Statement 1) Over all the density for all the towns together stands at 978 persons per km which can be compared with the state urban density of 3,736.

There are 1,256 inhabited villages in the district of which 10 (0.80%) villages are such as have a density of 10 or less than 10 persons per km². The highest proportion of villages numbering 481 and constituting 38.30 per cent of all the villages of the district have a density of 101-200 persons per km². Another 408 villages comprising 32.48 per cent of total villages fall in the density range of 51-100 persons per km². There are, however, 561 villages working out to 44.67 per cent of all the villages of the district which have a density of more than 100 persons per km². From amongst these 6 have more than 501 persons per km. The density in respect of 101 villages (8.04%) could not be worked out for want of area figures in their case (Table 6).

TABLE 6

Distribution of villages by Density

Range of density (per Km²)	Total no. of villages in each density range	Percentage ofh villages in eac density range
1	2	3
- 10 ..	10	0.80

21- 50 ..	160	12.74
51-100 ..	408	32.48
101-200 ..	481	38.30
201-300 ..	63	5.02
301-500 ..	11	0.87
501+ ..	6	0.48
Not known ..	101	8.04
All density ranges ..	1,256	100 00

Sex ratio measured as number of females per 1,000 males has been returned at 966 at 1981 census for the district. In fact it is higher than the one found at the state level (937). The following Table 6 (i) reveals the behaviour of sex ratio in the district as also in the state since 1901.

TABLE 6 (i)

Sex Ratio 1901-1981

Year	District	State
1901 ..	985	978
1911 ..	980	966
1921 ..	963	950
1931 ..	949	947
1941 ..	941	949
1951 ..	957	941
1961 ..	968	936
1971 ..	954	930
1981 ..	966	937

As is clear from the above table, except for 1941, the district has all along returned a higher sex ratio than the state. While at the state level the sex ratio has registered a gradual fall upto 1931, the district has revealed almost an identical trend upto 1941. Since 1941 in the case of the district, the sex ratio reveals an upward trend though fluctuating slightly.

Within the district, tahsilwise sex ratios from the following Table 6 (ii) indicate that only Bid, Ambejogai and Kaij tahsils have returned the sex ratio lower than the district average. The other four tahsils have the same above the district average.

TABLE 6 (ii)

Sex ratio by tahsils, 1981

District/Tahsil	Females per 1,000 males
Bid District ...	**966**
Bid tahsil ...	954
Georai tahsil ...	985
Manjlegaon tahsil ...	969
Ambejogai tahsil ...	949
Kaij tahsil ...	965
Patoda tahsil ...	997
Ashti tahsil ...	970

As would be seen from Table 1, both in rural as also in urban areas of the district males out number the females. This is, however, in keeping

with the general demographic trend in the country in so far as the composition of population is concerned. In the rural Patoda tahsil a marginal difference between the population of two sexes is observed. Against 641,95 males there, are 64,021 females. A similar phenomenon is seen in Kaij town where against 6,522 males there are 6,314 females. In rest of the tahsils and towns, the difference is significant one.

Scheduled Castes and Scheduled Tribes

In our Indian society there are two communities as are socially, economically and culturally backward since ancient times. The members of these communities have been clubbed under two separate headings i. e. Scheduled Castes and Scheduled Tribes. In fact both are one but differ from another according to their traits, habits, living style and economic persuits. There are certain defined castes in the society as have been classified as scheduled castes and similar is the case with certain tribes. Since the members of these communities remained under serirtude and supression for a considerable part of our history, the popular government, immediately after taking over from Britishers, assigned topmost priority to the uplift of these two communities. The guarantee to ameliorate their condition has been enshined in our constitution. To plan the development of these communities, the Planning Commission and other agencies needed facts and figures. Since the census organisation reaches the threshold of each member of the society, it started collecting the information about the socio-economic, cultural and demographic characteristics of the members of these communities since 1961. Separate questions in the census questionnaire have been incorporated for this purpose.

There is no standard definition for a scheduled caste or scheduled tribe. There are, however, certain castes among the Hindus and Sikhs as have been declared as constituting scheduled caste under a Presidential declaration under article 341 (i) of the Constitution. Similarly certain tribes have also been declared to constitute scheduled tribes under article 342 (i). It may be relevant to point out that these castes and tribes differ from state to state. In the light of the above, in Maharashtra State there are 59 castes and 47 tribes that have been declared to costitute scheduled castes and ascheduled tribes respectively. The list is given below :—

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona. Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana. Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari,
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.

47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Manghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Madia, Hadi.

54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59 Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tataria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi, Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor, Kathodi, Dhor, Kathkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia, Nayaka Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwaia, Barodia.

The scheduled caste population in the district has been returned at 170,482 persons at 1981 census. Males and females stand at 86,421 and 84,061 respectively. Thus the scheduled caste population constitutes 11.47 per cent of the total population of the district. This proportion is significantly higher than 7.14 per cent found at the State level. As regards the sex differentials males comprise 11.43 per cent and females 11.51 per cent of the male and female population of the district. The rural-urban differentials reveal that rural scheduled caste population constitutes 12.24 per cent in the district as against 7.29 per cent urban areas.

In all there are 1,256 inhabited villages in the district and of these there are 60 (4.78%) which have no scheduled caste population at all. 286 (22.77%) villages have the same to the less than 5 per cent. The largest number of villages i. e. 322 comprising 25.64 per cent of all the villages of the district have the scheduled caste population between 6 to 10 per cent. Against this 28 villages

though forming 2.23 per cent of the villages in the district have more than 30 per cent of such population. The remaining villages have the same between 11 to 30 per cent (Table 7).

TABLE 7

Proportion of Scheduled Caste population to total population in the villages

The following table will show in detail the proportion of scheduled caste and scheduled tribe population in various tahsils of the district for the censuses of 1971 and 1981.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Bid District ..	12.53	11.47	0.34	0.90
Bid tahsil ..	11.37	10.03	0.20	0.49
Georai tahsil ..	12.21	11.49	1.27	1.03
Manjlegaon tahsil ..	13.26	11.50	0.07	1.00
Ambejogai tahsil ..	13.44	12.14	0.06	0.68
Kaij tahsil ..	14.58	13.95	0.11	1.19
Patoda tahsil ..	9.42	9.39	0.29	0.57
Ashti tahsil ..	11.58	10.59	0.72	1.67

The scheduled tribe population in the district is less than the scheduled caste population. The members of this community number 3,405 persons comprising of 6,867 males and 6,538 females. In other words scheduled tribe population constitutes (0.90) per cent of the total population of the district. Over the years the scheduled tribe population has been increased. In 1961, the members of this community formed 0.24 per cent of the total population. In 1971 it constituted 0.34 per cent and in 1981, 0.90 per cent. Most of the scheduled tribe population is found living in the countryside (92.67%).

In the district 730 villages (58.12%) do not have scheduled tribe population at all. 485 villages constituting 38.61 per cent of all the villages of the district have the same upto 5 per cent. There is only 1 village which has more than 51 per cent population of this community. The remaining villages have it between 6 and 35 per cent (Table 8).

TABLE 8

Proportion of Scheduled Tribe population to total population in the villages

Percentage range of scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. T. Population	730	58.12
- 5 ..	485	38.61
6-15 ..	32	2.55
16-25 ..	6	0.48
26-35 ..	2	0.16
36-50 ..	..	..
51+ ..	1	0.08
All ranges ..	1,256	100.00

The urban population of the district has been returned at 229,771 persons at 1981 census. The urban scheduled tribe population stands at 982 persons. It constitutes 0.43 per cent only.

The highest proportion (14.19%) of scheduled caste population is seen in Dharur town followed by Ambejogai with 10.40 per cent. In the remaining towns the proportion ranges between 4.59 per cent and 8.15 per cent. As regards the distribution of scheduled tribes, the highest proprotion of 0.79 per cent has been returned from Parli town followed by Dharur with 0.77 per cent. In other towns the proportions range between 0.20 per cent and 0.67 per cent (Table 9).

TABLE 9

Proportion of scheduled castes/scheduled tribes population in towns

Name and civic status of the town	Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population
1	2	3	4	5	6
Ambejogai (M. Cl.) ..	42,362	4,407	145	10.40	0 34
Ashti (C. T.) ..	7,290	594	49	8.15	0.67
Bid (M. Cl.) ..	80,287	5,053	161	6.29	0.20
Dharur (M. Cl.) ..	12,836	1,821	99	14.19	0.77
Georai (M. Cl.) ..	15,495	1,023	90	6.60	0.58

Literacy

A person who can both read and write with understanding in any Language is literate for the purposes of Indian Census. Proficiency in reading and writing does not have the precondition of having received formal education in any institute. Bid district is one of the educationally backward areas of the state. In the field of literacy it ranks 24th. The literacy rate as returned at 1981 tands at 31.79 per cent which is much below the state average of 47.18 per cent.

TABLE 10

Literacy rate by population ranges of villages

Range of population	No. of villages in each range.	Literacy rate
1	2	3
-200 ..	44	24.10
200-499 ..	328	22.63
500-1,999 ..	778	26.66
2,000-4,999 ..	93	32.03
5,000-9,999 ..	11	37.32
10,000+ ..	2	39.75
All ranges ..	1,256	28.19

In a general way it may be seen from Table 10 that population size of the village and literacy rate are positively corelated. Townwise literacy rates put Ashti town at the top with a literacy rate of 57.45 per cent followed by Bid town with 57.04 per cent. Third position is occupied by Ambejogai town with a literacy rate of 54.61 per cent. The literacy rate in respect of other town ranges between 44.82 per cent and 45.94 per cent (Table 11).

TABLE 11

Literacy rates for towns

Name and civic status of the town	Literacy rate
1	2
Ambejogai (M. Cl.) ..	54.61
Ashti (C. T.) ..	57.45
Bid (M. Cl.) ..	57.04
Dharur (M. Cl.) ..	45.94
Georai (M. Cl.) ..	45.38
Manjlegaon (M. Cl.) ..	45.90
Parli (M. Cl.) ..	44.82
All towns ..	51.50

Over the years the progress of literacy in the district since 1901 is revealing Table 11 (i). The literacy rate in 1901 stood at just 3.02 per cent. It maintained a very low profile of less than 3 per cent literacy between 1911 and 1931. Since 1941 an appreciable upward trend in the field of literacy is seen. From 2.49 per cent of 1931, the same reached 7.42 per cent in 1941. However, a marginal improvement has been found in 1951 (8.60 %). Since 1961, however, a real break through seems to have been made with the literacy rate touching an average of 15.09 per cent. A further leap ahead is discernable at 1971 and 1981 when the literacy rates have been returned at 24.01 per cent and 31.79 per cent respectively. Exactly the identical behaviour is found in the progress of male literacy. Female literacy has, however, revealed a more than threefold increase since 1961 i. e. from 5.27 per cent to 17.27 per cent.

TABLE 11 (i)

Progress of literacy 1901-81

Year	Total	Males	Females
1901 ..	3.02	5.93	0.06
1911 ..	2.54	4.91	0.12
1921 ..	2.51	4.65	0.29
1931 ..	2.49	4.42	0.45
1941 ..	7.42	11.15	3.46
1951 ..	8.60	14.70	2.20
1961 ..	15.09	24.60	5.27
1971 ..	24.01	36.25	11.17
1981 ..	31.79	45.82	17.27

While the male literacy at district level is some what encouraging (45.82 %) that of females is deplorably low (17.27 %). Both these rates are much lower than the respective state averages of 58.79 per cent for males and 34.79 per cent for females.

Within the district there are only two tahsils viz; Bid and Ambejogai have a literacy rate higher than the district average. In the case of the former the same stands at 36.93 per cent and in the latter case it has been returned at 33.87. In other tahsils the literacy rates are below the district average and range between 27.52 per cent and 31.52 per cent. As regards the sex-differentials in literacy at tahsil levels, it is seen that Bid, Ambejogai and Ashti have returned a male literacy rate higher than the one found at the district level. The same stands at 50.86 per cent, 47.22 per cent and 46.16 per cent respectively. The lowest male literacy of 40.88 per cent has been observed in Manjlegaon tahsil. In the field of female literacy only Bid and Ambejogai have returned a literacy higher than the district average. Manjlegaon tahsil stands at the bottom with a female literacy rate of just 13.72 per cent (Table 12).

As regards the rural-urban differentials, literacy in the rural areas of the district has been returned at 28.19 per cent and the same in respect of urban areas stand at 51.50 per cent. These can be compared with the respective state averages of 38.15 per cent for rural and 63.92 per cent for urban areas. Kaij, Ashti and Patoda are the three tahsils of the district where the rural literacy rate is higher than the district average. It has been found at 30.13 per cent, 30.21 per cent and 28.70 per cent respectively. The lowest rural literacy rate of 25.42 per cent has been returned from Manjlegaon tahsil. On the urban side, the literacy rate for the district has been found at 51.50 per cent. There are, however, two tahsils namely; Ashti and Bid having an urban literacy rate of 57.45 per cent and 57.04 per cent which is obiviously higher than the district average. The lowest urban literacy rate has been observed in Georai tahsil (45.38 %).

Working population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental in nature. It involves not only the actual work but also effective supervision and direction. At 1981 census the population has been divided into three categories i. e. main workers, marginal workers and non-workers; against workers and non-workers only as in 1961 and 1971. To make the data comparable with the previous censuses, the main workers together with marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Again, on the recommendation of the Planning Commission and the Central Statistical Organisation, only four categories of main workers viz. cultivators, agricultural labourers, workers engaged in household industry and other workers have been adopted against the nine industrial categories of workers adopted in 1961 and 1971.

Main workers are those workers who were engaged in an economically productive activity during the major part of the preceding year (at least 6 months or 183 days). Marginal workers on the other hand comprise of those who worked for sometime, but not for major part of the year. Nonworkers are those who had not worked at all during the last year e. g. persons engaged in household duties, students, dependents, retired persons, rentiers, beggars etc.

27.48	44.71	8.68	0.82	0.51	1.16	28.30	45.22	9.84	71.70	54.78	90.16

As would be seen from Table 12, the main workers in the district account for 40.36 per cent of its population. This population is higher than the one found at the state level (38.71 %). The sex differentials of the main workers reveal that male and female main workers in the district are proportionately more than those found at the state level. It may also be noted that district participation rate for main workers has increased from 35.23 per cent in 1971 to 40.36 per cent in 1981. The main reason for this increase is substantial rise in female workers. It has jumped from 17.60 per cent in 1971 to 26.19 per cent in 1981. Corresponding male participation has increased by two points (52.05 % to 54.04 %) only. The rural-urban differentials show that the proportion of rural main workers is significantly higher than urban main workers. They account for 42.72 per cent in the former case against 27.48 per cent in the latter.

Within the district the highest proportion of main workers of the order of 46.07 per cent has been returned from Georai tahsil followed by Kaij tahsil with 43.17 per cent. Other tahsils having the proportion of such workers higher than the district average are Patoda (41.02 %) and Manjlegaon (40.74 %). The lowest proportion of such workers has been returned from Bid tahsil (37.39 %) (Table 12).

Marginal workers in the district account for 5.63 per cent of its population. Male marginal workers constitute just 1.35 per cent against 10.07 per cent female marginal workers. The higher proportion of female marginal workers is not surprising because females in addition to the household chores engage themselves in one or the other marginal activity. This participation in the marginal activity is more pronounced in the rural areas where females keep themselves busy with one or the other activity to augment the family income. It is, therefore, we find 11.65 per cent rural female marginal workers against 1.50 per cent male marginal workers. The proportion of marginal workers in the urban areas of the district is very insignificant (0.82 %). But here again we find female marginal workers proportionately out number the males.

Main workers in the district constitute 40.36 per cent of the total population. They have been sub-divided into four main categories viz; cultivaters, agricultural labourers, those engaged in household industry and other workers. Cultivators comprise 47.68 per cent of the main workers against 35.12 per cent for the state. Proportion of male cultivators in the district (50.58 %) is substantially higher than that for the state male cultivators (33.69 %).

The agricultural labourers work out to 31.20 per cent of the main workers in the district against the state average of 26.63 per cent. The proportion of female agricultural labourers both at the district as also at the state level is much higher than the proportion of male agricultural labourers. In the district the former account for 50.80 per cent and the latter 22.03 per cent. The corresponding state proportions have been returned at 45.61 per cent and 18.51 per cent respectively.

In the field of household industry the district, however, trails behind the state. Against 2.55 per cent of the main workers engaged in household industry at the state level, there are olny 1.75 per cent of main workers engaged in this activity at the district level. Sex differentials also put the state above the district. Against 2.61 per cent and 2.40 per cent male and female workers engaged in household industry at the state level, the corresponding proportion at the district level have been returned at 2.01 per cent and 1.20 per cent.

Higher proportions of main workers engaged in cultivation and agricultural labour, in the district indicate predominantly agricultural economy. Hence comparatively lower proportion of main workers as other workers is seen, when compared with the state proportions. Against 35.70 per cent other workers in the state, there are 19.36 per cent of such workers in the district.

Availability of Amenities—Education

Education is one of the basic amenities and it is available in 1,249 of 1,256 inhabited villages in the district. From the population point of view 1,254.855 persons from the districts population of 1,256,259 avail of it. In other words 99.44 per cent villages and 99.89 per cent inhabitants of the district have one or the other amenity of education. From amongst the various tahsils of the district; but for Bid, Georai and Ambejogai tahsils, all the villages of rest of the tahsils have been brought on the map of education (Table 13 and 14).

TABLE 13

Distribution of villages according to the availability of different amenities

There are 372 villages in the district within a population range of less than 500 persons. Of these 365 have been provided with the amenity of education. In the subsequent population ranges of 500–1,999, 2,000–4,999 and 5,000+ there are 778, 93 and 13 villages respectively with this amenity available (Table 15).

TABLE 15

7 villages and obviously their inhabitants do not have this facility within thier villages. The inhabitants of 4 have to cover a distance upto 5 kms. to get it in the neighbouring village/town. The inhabitants of 1 village have, however to tread a distance of 5–10 kms to obtain this facility. There are yet another 2 villages whose inhabitants have to negotiate a distance of more than 10 kms. to obtain it from a nearby village or town (Table 16).

To gauge the impact of towns on the satellite villages Table 17 works as a guide. It presents distribution of villages according to the distance from the nearest town and availability of different amenities.

TABLE 17

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Comm- unications	Approach by pucca road	Power supply

Class, name and civic status of town	No. per ten thousand population			
	Higher secondary/Inter/ PUC/ Junior college	Secondary/ Matriculation	Junior secondary/ Middle	Primary
1	2	3	4	5
III Ambejogai (M. Cl.) ..	2.12	1.42	1.42	3.78
V Ashti (C. T.) ..	2.74	2.74	2.74	2.74
II Bid (M. Cl.) ..	1.37	1.49	0.75	1.49
IV Dharur (M. Cl.) ..	0.78	0.78	0.78	3.12
IV Georai (M. Cl.) ..	1.94	1.94	1.94	1.94
II Manjlegaon (M. Cl.) ..	0.89	1.33	1.33	3.10
II Parli (M. Cl.) ..	1.23	1.02	1.43	3.06
All towns ..	1.48	1.39	1.22	2.57

Table 18 reveals the proportion of various educational institutions to the urban population of the district. As would be seen the ratios of these institutions to 10,000 urban population are : 10,000: 1.48 Higher Secondary/Inter/PUC/Junior colleges; 10,000 : 1.39 Secondary/Matriculation; 10,000 : 1.22 Junior Secondary/Middle and 10,000 : 2.57 Primary Schools. To make it some what more comprehensible it may be said that there is higher Secondary/ Inter/PUC/Junior College for every 6,758 persons; a Secondary/Matriculation Schools for 7,180 persons; a Junior Secondary/Middle School for 8,206 persons and a Primary School for 3,894 persons in the district.

Medical

The district appears to be in a bad shape so far as the availability of medical amenities is concerned. Hardly 171 (13.61 %) villages encompassing a population of 381,932 (30.40 %) have the benefit of medieal amenity. It may be inferied that one out of 10 villages and 3 out of 10 persons in the rural areas have the availability of medical facilities. From amongst tne various tahsils in the district Bid tahsil, which is the district headquarter also, is in a real poor shape on this account. Here out of 214 villages only 12 (5.61 %) have the availability of this amenity. The highest proportion of villages (18.42 %) with this amenity is in Ashti tahsil (Table 13). With regard to coverage of population Georai tahsil leads with 35.87 per cent of its population being covered by this amenity. Against this Bid tahsil has it available to 18.26 per cent only (Table 14).

Distribution of villages with medical amenity into various population ranges as revealed by Table 15, shows that 11 villages have a population of less than 500 persons. 84 villages have the population between 500–1,999. Another 63 villages fall in the population size class of 2,000–4,999. There are in all 13 villages in the district as have more than 5,000 population and all these villages have been provided with the medical facilities. It may be noted that as the population size of the village increases, proportion of villages with medical facility also increases correspondingly.

As already said the performance of the medical department is very poor in this district. This is substantiated by the fact that 1,085 villages do not have the medical facilities available. The inhabitants of 412 have to travel upto 5 kms to obtain medieal aid. The inhabitants of another 446 villages have to negotiate a distance of 5–10 kms to obtain the medical amenity. There are yet another 227 villages whose inhabitants have to tread a distance of more than 10 kms to avail medical amenity (Table 16). This state of affairs of medical aid to people is deplorable.

The availability of medical amenity in the urban areas of the district is equally disheartening. On an average there are 0.70 beds per 1,000 urban population. In other words a bed is available to every 1,427 urban people. From amongst the various towns in the district Ashti town appears to be in a better position with a bed available to every 365 persons. Bid town follows, though not closely, with a bed available to every 956 urbanites. A remorseful situation is, however, seen in Ambejogai town where the ratio of bed to population is 1 : 8,472 persons (Table 19).

TABLE 19

Drinking Water

It is heartening to see that all the villages in the district have the amenity of drinking water.

Post and Telegraph

The post and telegraph amenities are spread over to 347 villages in the district. This shows that 27.63 per cent villages have the network of post and telegraph facility. From the population point of view 51.21 per cent of the rural population is benefitted by this amenity. From amongst the various tahsils of the district Ashti leads with 33.55 per cent of its villages having the benefit of post and telegraph network. Kaij ranks second with 31.46 per cent of its villages benefitting from the same. The coverage of villages in the remaining tahsils ranges between 21.50 per cent and 28.34 per cent (Table 13).

Of the 347 villages with the post and telegraph amenity 15 have less than 500 population and 231 fall in the next population range of 500–1,999. The remaining 88 and 13 fall in the population range of 2,000–4,999 and 5,000+ respectively.

There are, however, 909 villages in the district which do not have the benefit of this amenity. Out of these the inhabitants of 591 villages have it available within a distance of about 5 kms. Inhabitants of another 271 villages have to walk a distance of 5–10 kms to obtain this facility. There are yet another 47 villages whose inhabitants have to tread a distance of more than 10 kms to get this amenity.

Market/Hat

In all there are 130 villages working out to 10.35 per cent of the total villages where market/hats are held for the sale and purchase of goods and commodities. The largest number of villages (31) where such markets/hats are held, has been found in Manjlegaon tahsil and serves about 31.98 per cent of its population. Georai tahsils occupies second place with 24 villages where such markets/hats are organised. Ashti tahsil ranks at the bottom with 10 villages only where such markets/hats are held. The population covered by these markets/hats in the district works out to 25.92 per cent (Table 13 and 14). Amongst the villages where markets/hats are held, 8 have less than 500 population and 54 fall in the population range of 500–1,999. Another 55 and 13 fall respectively in the subsequent population ranges of 2,000–4,999 and 5,000+ (Table 15). There are 1,126 villages in the district where the markets/hats are not organised.

The inhabitants of 513 have to travel upto 5 kms to the nearest place where the market/hat is held. To avail this facility the inhabitants of another 467 and 146 have to tread a distance of 5–10 kms and more than 10 kms respectively (Table 16).

Communications

Communication facilities which include road transport, railways and navigation are available to 502 villages (39.97 %) in this district. In other words 55.30 per cent of the rural population has the benefit of communication amenity. In this field Ambejogai ranks at the top with 140 (70.35 %) of its 199 villages having one or the other means of communication available. Georai ranks second. In other tahsils the proportions of villages having the communication facilities range between 24.62 per cent and 40.16 per cent (Table 13 and 14).

Of the 502 villages in the district availing the facility. 73 have less than 500 population and 13 are such as have more than 5,000 population. The remaining 348 and 68 fall in the intervening population ranges of 500–1,999 and 2,000–4,999 respectively (Table 15). Here also it may be seen that larger population size villages have proportionately more communication facilities. As would be seen from Table 16, there are 754 villages in the district as do not have this facility at all. The inhabitants of 408 have such facilities available upto a distance of 5 kms; while the locals of another 273 have to negotiate a distance of 5–10 kms to obtain it. The population of remaining 73 villages have it at a distance of over 10 kms.

Approach by pucca road

365 villages (29.06 %) covering 41.61 per cent of rural population of the district have the facility of pucca roads. From amongst the various tahsils of the district the largest net work of such roads catering to 36.92 per cent villages has been observed in Bid tahsil. Patoda tahsil follows with such roads available to 35.43 per cent of its villages. The proportions in respect of other tahsils are between 15.08 per cent and 33.16 per cent (Table 13). 52 villages with pucca approach roads have a population of less than 500 each. Against this there are 13 villages as have a population of more than 5,000 each. The remaining 252 and 48 fall in the intervening population groups of 500–1,999 and 2,000–4,999 respectively (Table 15).

Power Supply

794 villages (63.22 %) in the district have been electrified. In other words it may be said that 6 out of 10 villages have the amenity of electricity. In this field Ambejogai tahsil leads the other tahsils of the district. Of the 199 villages in the tahsil, 177, (88.94%) have been electrified i. e. about 9 of the 10 villages have the benefit of electricity. Bid tahsil has this amenity available to 75.23 per cent of its villages. Proportion of villages electrified in other tahsils varies between 34.65 per cent and 70.05 per cent (Table 13). Table 14 reveals that about 75 per cent population of the district has the benefit of electricity. In Ambejogai tahsil 93.64 per cent of its population avails the amenity. Bid tahsil ranks second with electricity available to 82.22 per cent of its rural population. The proportion of population covered in respect of other tahsils of the district ranges between 53.13 per cent and 80.13 per cent.

Of the villages electrified, 175 have a population of about 500 each. 13 electrified villages have more than 5,000 population. The intervening population groups of 500–1,999 and 2,000–4,999 claim 522 and 84 villages respectively (Table 15).

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

The district has an area of 1,414,384.71 hectares and the forests are spread over an area of 19,136.71 hectares. Thus, forests constitute only 1.35 per cent of the total area of the district. From amongst the various tahsils of the district Patoda has the forest area to the extent of 3.24 per cent of its geographical area. Ashti ranks second with a forest area of 2.54 per cent. Forest produce is mainly fuel, wood and grass.

Irrigated, Un-irrigated and Culturable Waste Areas

Again, out of the total area of 1,409,887.68 hectares, the cultivable area stands at 1,284,014.49 hectares yielding a proportion of cultivable area to total area of 91.07 per cent (Table 20).

TABLE 20

Distribution of villages according to the land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Bid ..	214	150,823.63	88.30	5.30
2	Georai ..	187	198,940.66	95.19	3.80
3	Manjlegaon ..	199	210,792.86	95.37	0.91
4	Ambejogai ..	199	168,033.60	86.59	3.08
5	Kaij ..	178	213,682.76	87.74	1.42
6	Patoda ..	127	310,849.46	92.75	3.62
7	Ashti ..	152	156,764.71	88.78	12.16
	Total of all tahsils ..	1,256	1,409,887.68	91.07	3.94

As already mentioned Godavari is only perrenial river in the district and all others are seasonal. As a result the proportion of irrigated area to cultivable area is insignificant. The same stands at just 3.94 per cent. Ashti tahsil leads in the proportion of irrigated area to cultivable area (12.16 %). Bid tahsil has the second highest proportion of irrigated area (5.30 %) and Manjlegaon has the lowest (0.91 %).

Staple Food

Table 21 shows Jowar as having the first priority as staple food in Bid, Georai, Manjlegaon and Patoda. Against this Bajra has first priority in Kaij and second in Georai and Manjlegaon. It is Ambejogai and Ashti only where wheat is staple diet along with jowar.

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of tahsil	Main staple food	Serial No.	Name of tahsil	Main staple food
1	2	3	1	2	3
1	Bid ..	Jowar	5	Kaij ..	Bajra, Jowar
2	Georai ..	Jowar, Bajra	6	Patoda ..	Jowar
3	Manjlegaon ..	Jowar, Bajra	7	Ashti ..	Wheat, Jowar
4	Ambejogai ..	Wheat, Jowar			

Municipal Finance

There are 7 towns in the district. The aggregate *per capita* receipts work out to Rs. 45.85. Rs. 23.02 are collected through taxes and the remaining Rs. 22.83 through other sources. On the expenditure side, it is seen from Table 22 that total *per capita* expenditure works out to Rs. 37.24.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III Ambejogai (M. Cl)....	27.78	14.44	13.34	30.28	6.31	11.21	6.20	0.04	6.52
V Ashti (C.T.) ...	19.36	6.05	13.31	22.46	6.86	7.43	6.58	..	1.59
II Bid (M.Cl.) ...	50.34	26.55	23.79	36.30	7.90	14.15	8.01	0.01	6.23
V Dharur (M. Cl.) ...	43.63	17.30	26.33	23.21	9.97	7.01	0.39	..	5.84
IV Georai (M. Cl.) ...	67.70	27.36	40.34	58.47	15.49	12.52	2.39	1.03	27.04
III Manjlegaon (M.Cl.)...	36.90	18.88	18.02	32.57	11.37	9.26	9.38	0.50	2.06
III Parli (M. Cl) ...	55.84	29.20	26.64	46.09	14.18	14.65	13.77	1.57	1.92
Total ...	45.85	23.02	22.83	37.24	9.88	12.51	8.19	0.47	6.19

Out of this, expenditure on general administration is Rs. 9.88; on public health and conveniences Rs. 12.51; on public works Rs. 8.19; on public institutions Rs. 0.47 and on other aspects Rs. 6.19. From amongst the various towns of the district the highest *per capita* receipts to the tune of Rs. 67.70 have been observed in Georai town. It has the highest *per capita* expenditure also (Rs. 58.47). Parli ranks second with *per capita* receipts and expenditure returned at Rs. 55.84 and Rs. 46.09 respectively.

Minerals

There are no minerals of any consequence found in the district. The mining activity is, therefore, confined only to quarrying of stones, clay, sand etc.

Fisheries

Fishing is confined to inland waters only and rivers and tanks are the main source. Perennial rivers in the district have a length of about 160 kms. In addition, about 1,742 acres of water spread area is available for fishing from 5 perennial and 4 seasonal tanks. The commercially important varieties of fish found in the district are Baloo, Murrel, Koli murrel, Dokh, Tam, Rahoo, Maroof, Shinghi, Baam, Kanwa, Kolus, Potac, Patola, Seengal, Khidle, Boori, Yellbhal, Peora, Geehul, Murli, Kaneri, Chapti, Kobur, Patharchatu, Bekdi, Selan, Katarna, Ghegra, Tamboo, Gangoali, Ghod Zinga, Mungarod Zinga and Matechkal Zinga.

Industries

In fact there are no major industries/factories in the district. However, the industries on a small scale are rice flakes, Safflower oil, woolen blankets, groundnut oil and electric bulbs.

Trade and Commerce

The commodities exported from the district comprise of jowar, bajra, groundnut oil and Arhar dal. On the other hand the imports include oil seeds, kerosene, cloth, sugar and wheat (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities

Places of Tourist's Importance

The inscription found in the Ganesh mandir gives a detailed accounts of the prosperity of the town, its beautiful buildings and temples and its strong defence fortifications. Ambejogai is known as a great centre of education. The saint poet Dasopant lived and died here.

Ashti is the birth place of the famous historical figure and philanthropist Ahilyabai Holkar. There is the dargah of Hazrat Sah Bukhari a Muslim avaliya.

Dharmapuri is a village in Ambejogai tahsil well known for the Kedareshvar temple of considerable antiquity. The temple of Dhareshwar was originally a Jain temple. The Sabhamandap of the temple is rectangular and has 24 stone pillars to support it. On each of these pillars are carved images of various deities and Tirthankaras.

Georai has temples indicated to Mahadev built in the Hemad panti style. Khandoba on the top of a nearby hill called Palkhy Dongar and Laksmi Narayan.

Kaij village, it is noted for the samadhi of Uddhav Swami a favourite disciple of Ramdas Swami, a temple dedicated to Balaji and a dargah built by Qutbuddin grandson.

In the Pali village there is a set of images of Shankar with trisul in hand and Ganapati and Parvati to his right and left respectively.

Parali is well known for the shrine of Vaijanath containing one of the famous twelve jyotirlingas of India.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Diectory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available heve been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The " un-inhabitated " villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i. e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (i) Tahsilwise abstract of educational, medical and other amenities;

Appendix (ii) Land utilisation data for census towns;

Appendix (iii) Tahsilwise list of villages with no amenities available; and

Appendix (iv) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (iii) and (iv), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under:—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in Km^2.

Column 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the correlation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (—) is shown in the column and next to it, brackets the distance from the village in broad ranges viz., upto 5 km, 5-10 km, and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i. e.* secondary, middle and and primary school. In case, there are more han one institutions of any type in a village, their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :

Primary or Secondary School	..	P
Junior Secondary or Middle School	..	M
Matriculation or Secondary School	..	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).		PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.		C
Industrial School	..	I
Training School	..	Tr.
Adult Literacy Class/Centre	..	AC
Other Educational Institutions	..	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5-10 kms, and above 10 kms, of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows:—

Hospital	..	H
Maternity and Child Welfare Centre	..	MCW
Maternity Home	..	MH
Child Welfare Centre	..	CWC
Health Centre	..	HC
Primary Health Centre	..	PHC
Primary Health Sub-centre	..	PHS
Dispensary	..	D
Family Planning Centre	..	FPC
T. B. Clinic	..	TB
Nursing Home	..	NH
Registered Private Practitioner	..	RP
Subsidised Medical Practitioner	..	SMP
Community Health Worker	..	CHW
Others	..	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village:—

Tap water	..	T
Well water	..	W
Tank water	..	Tk
Tube-Well water	..	TW
Hand pump	..	Hp
River water	..	R
Fountain	..	F
Canal	..	C
Lake	..	L
Spring	..	S
Nallah	..	N
Others	..	O
Information Not Available	..	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are:—

Post Office	..	PO
Telegraph Office	..	TO
Post and Telegraph Office	..	PTO
Telephone Connection	..	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows:—

Bus Stop	..	BS
Railway Station	..	RS
Navigable Water-way (including river, canal and back-water etc.).		NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information:—

Pucca Road	..	PR
Kaccha Road	..	KR
Navigable River	..	NR
Navigable Canal	..	NC
Navigable Waterway (Other than river or canal).		NW
Foot Path	..	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes:—

Electricity for Domestic purpose	..	ED
Electricity for Agriculture	..	EAg
Electricity for Other purpose like Industrial, Commercial etc.		EO
Electricity for All purposes listed above		EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories:—

(1) Forests.

(2) Not available for cultivation.—

(a) lands put to non-agricultural uses,

(b) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.

(a) permanent pastures and other grazing lands;

(b) lands under miscellaneous tree crops and groves not included in the net area sown;

(c) culturable wastes.

(4) Fallow lands;

(a) fallow lands other than current fallows;

(b) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private .n case, any portion of such land is not actuthy wooded but put• to some agricul tural use, Ilaat portion is included under the ap propriate heading of cultivated or un-cultivated land

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under:—

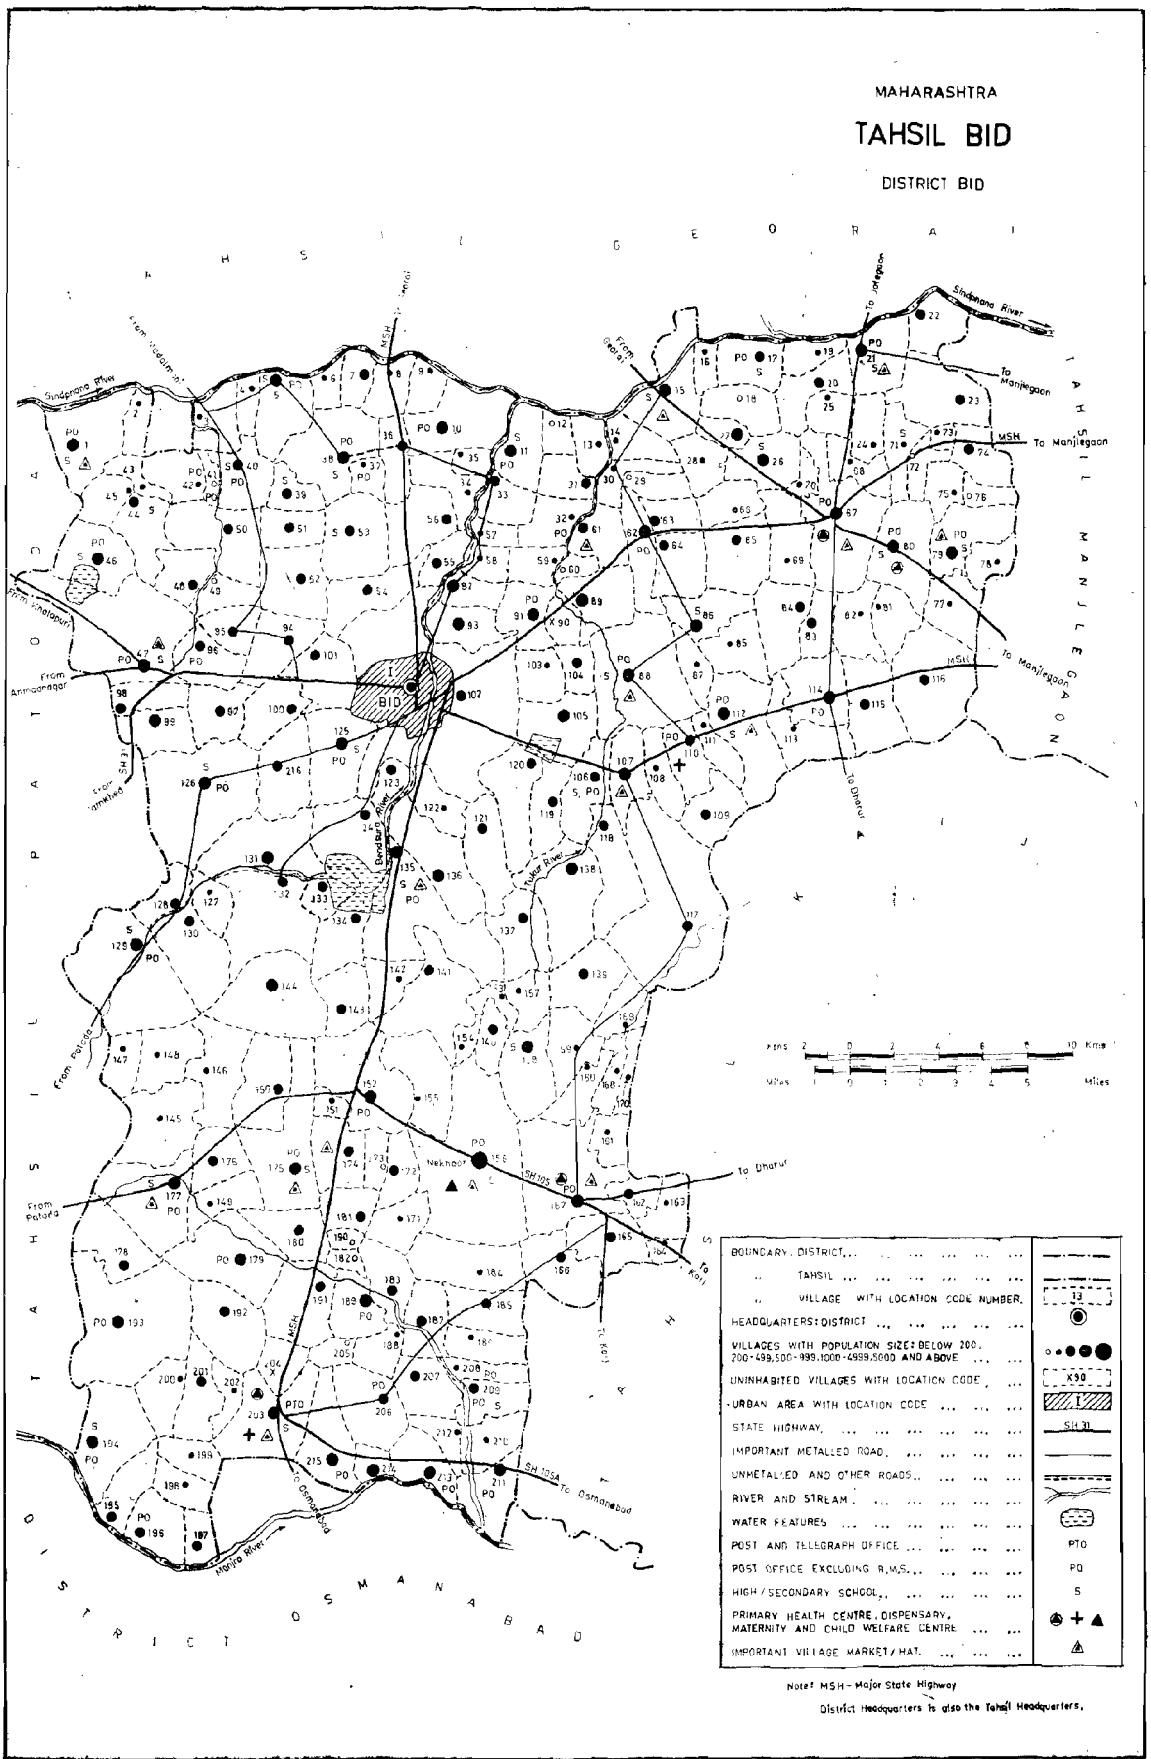

Government Canal	..	GC
Private Canal	..	PC
Well (without Electricity)	..	W
Well (with Electricity)	..	WE
Tube Well (without Electricity)	..	TW
Tube Well (with Electricity)	..	TWE
Tank	..	Tk
River	..	R
Lake	..	L
Water Fall	..	WF
Others	..	O
Total	..	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc. which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under building, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used:—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

N. B.—Ranges with 'nil' entries have been omitted.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining The Abbreviations used in Town Directory

The ' Town Directory ' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities. and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns, in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town:—

Municipal Corporation/Corporation	..	M. Corp.
Municipality	..	M.
Municipal Council	..	M. Cl.
Non-Municipal	..	N. M.
Cantonment Board/Cantonment	..	C. B.
Notified Area/Notified Area Committee/Notified Committee		N. A. C.
Census Town	..	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km^2 number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil head quarters and the nearest city (Urban area with a population of 1,00,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	..	PR
Kuccha road	..	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are :—

Sewer/Sewerage	..	S
Open surface drains	..	OSD
Box surface drains	..	BSD
Sylk drains	..	SD
Cesspool method	..	CD
Pit system	..	Pt
Head Loads	..	HL
Baskets	..	B
Wheel Barrows	..	WB
Septic Tank Latrines	..	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used:—

Overhead Tank	..	OHT
Service Reservoir	..	SR
River Infiltration Gallery	..	IG
Borewell Pumping System	..	BWP
Pressure Tank	..	PT
Tubewell water/Hand pump	..	TW
Tap water	..	T
Well water	..	W
Tank water	..	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the

number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	..	H
Dispensary	..	D
Health Centre	..	HC
Family Planning Centre	..	FC
T. B. Clinic	..	TB
Nursing Home	..	NH
Ayurvedic	..	A
Unani	..	U
Homoeopathic	..	Hom
Others	..	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	..	A
Science only	..	S
Arts and Science only	..	AS
Commerce only	..	C
Arts and Commerce only	..	AC
Combined for all categories—Arts, Science and Commerce.		ASC
Law	..	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B.Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are:—

Shorthand	..	SH
Typewriting	..	Type
Shorthand and Typewriting	..	Sh. Type
Others	..	O

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the informa on regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of he spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas as also the rural areas, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.
