1981 CENSUS—PUBLICATION PLAN

(1981 Census Publications, Series 11 in All India Series will be published in the following parts)

GOVERNMENT OF INDIA PUBLICATIONS

Part I-A . . .	Administration Report-Enumeration
Part I-B . . .	Administration Report-Tabulation
Part II-A . . .	General Population Tables
Part II-B . . .	Primary Census Abstract
Part III . . .	General Economic Tables
Part IV . . .	Social and Cultural Tables
Part V . . .	Migration Tables
Part VI . . .	Fertility Tables
Part VII . . .	Tables on Houses and Disabled Population
Part VIII . . .	Household Tables
Part IX . . .	Special Tables on Scheduled Castes and Scheduled Tribes
Part X-A . . .	Town Directory
Part X-B . . .	Survey Reports on selected Towns
Part X-C . . .	Survey Reports on selected Villages
Part XI . . .	Ethnographic Notes and special studies on Scheduled Castes and Scheduled Tribes
Part XII . . .	Census Atlas
Paper 1 of 1982 . .	Primary Census Abstract for Scheduled Castes and Scheduled Tribes
Paper 1 of 1984 . .	Household Population by Religion of Head of Household

STATE GOVERNMENT PUBLICATIONS

Part XIII-A&B District Census Handbook for each of the 45 districts in the State.
(Village and Town Directory and Primary Census Abstract)

प्राक्कथन

जनगणना संगठन द्वारा राज्य सरकारों की ओर से संकलित जिला जनगणना पुस्तिका जनगणना की एक बहुमूल्य उपलब्धि है। जिला जनगणना पुस्तिका की योजना निर्माताओं, प्रशासकों, विद्वानों और अनुसंधानकर्ताओं को बार-बार आवश्यकता होती है। अन्य बातों के साथ-साथ इस पुस्तिका का उपयोग निर्वाचन क्षेत्रों के परिसीमन, स्थानीय स्तरों के निर्धारण और क्षेत्रीय योजनाएं बनाने में भी किया जाता है। यह पुस्तिका जिला प्रशासन चलाने में भी सहायक होती है। जिला जनगणना पुस्तिका ही एक मात्र ऐसा प्रकाशन है जिससे ग्रामीण क्षेत्रों के ग्राम स्तर तक के एवं प्रत्येक नगरीय क्षेत्र के वार्ड वार प्राथमिक जनगणना सार के आंकड़े उपलब्ध होते हैं इसमें ग्रामों और नगरों आदि में उपलब्ध आंतरिक सुविधाओं के बारे में भी जानकारी मिलती है।

जिला जनगणना पुस्तिका की श्रृंखलाओं का प्रारम्भ 1951 की जनगणना में किया गया था। इसमें जिले के प्रत्येक ग्राम और नगर का प्राथमिक जनगणना सार और जनगणना की महत्वपूर्ण सारणियां होती है। 1961 के दौरान जिला जनगणना पुस्तिका के विषय क्षेत्र का विस्तार किया गया। इसमें जिले का विस्तृत ब्यौरा, प्रशासनिक सांख्यिकी, जनगणना सारणियां और प्राथमिक जनगणना सार को मिलाकर ग्राम और नगर निर्देशिका भी शामिल की गई। 1971 की जिला जनगणना पुस्तिका की श्रृंखलाओं को तीन भागों में बाटा गया था। क—भाग में ग्राम और नगर निर्देशिका, ख—भाग में ग्राम और नगर का प्राथमिक जनगणना सार और ग—भाग में विश्लेषणात्मक रिपोर्ट, प्रशासनिक सांख्यिकी, जिला जनगणना सारणियां, प्राथमिक जनगणना सार पर आधारित कुछ विश्लेषणात्मक रिपोर्ट और ग्रामों के बारे में वहां उपलब्ध सुविधाओं के आंकड़े शामिल थे। तथापि, कुछ राज्यों मे इसमें केवल जिला जनगणना सारणियां ही दी गई थी। कुछ ऐसे भी मामले थे जहां संकलन और मुद्रण में देरी होने से उक्त पुस्तिका प्रकाशित ही नही की गई।

1981 की जिला जनगणना पुस्तिका के फार्म तैयार करते समय ग्राम और नगर निर्देशिका के फार्मों में कुछ नए कालम जोड़कर उन्हें फिर से तैयार किया गया। उक्त फार्म बनाते समय 1971 के आंकड़ों की तुलनात्मकता को भी ध्यान में रखा गया है। ग्रामों में बिजली की आपूर्ति के अलावा बाकी उपलब्ध सभी सुविधाओं को ग्राम निर्देशिका में इस अनुदेश के साथ दिखाया गया है कि यदि कोई विशिष्ट सुविधा किसी ग्राम में उपलब्ध नही है तो जिस भी निकटतम ग्राम में उक्त सुविधा उपलब्ध है तो उसकी दूरी भी बताए। ग्राम निर्देशिका के फार्मो को पुनः तैयार करते समय ग्रामीण क्षेत्र में उपलब्ध समस्त आंतरिक सुविधाओं, विशेषकर सुविधाओं और भूमि उपयोग की किस्मों के बारे में और व्यापक आंकड़े समाविष्ट करने से यह आशा की जाती है कि इससे माइक्रोस्तरीय योजना की आवश्यकता और पूरी हो सकेगी। इससे न केवल स्थानीय क्षेत्रों में योजना तैयार करने में सहायता मिलेगी अपितु माल और सेवाओं को भी विनियमित करने और विकास प्रक्रिया में क्षेत्रीय असंतुलन को कम करने में भी सहायता मिलेगी। संशोधित न्यूनतम आवश्यकता कार्यक्रम की कुछ आवश्यकताओं की पूर्ति के लिये संबंधित जानकारी की कुछ नई मदें जोड़ी गई हैं। ये नई मदें है : प्रौढ़ शिक्षा केन्द्र, प्राथमिक स्वास्थ्य—उप केन्द्र और ग्रामों में सामुदायिक स्वास्थ्य कार्यकताओं से संबंधित मदों को उक्त उद्देश्य को ध्यान में रखते हुए ग्राम निर्देशिका में जोड़ा गया है। किसी गांव में आने-जाने के साधनों के बारे में जो नया मद जोड़ा गया है उसका अभिप्राय जिले के उन ग्रामों की जानकारी एकत्रित करनी है। जिसमें आना-जाना बहुत कठिन है अर्थात् जो अगम्य है। एक नया कालम "कुल जनसंख्या और परिवारों की संख्या" को यह ज्ञात करने के लिये जोड़ा गया है कि उनके गांव की जनसंख्या और परिवार सख्या कितनी है और उनके अनुसार कितनी सुविधाएं उपलब्ध हैं। दो नए परिशिष्ट और जोड़े गए है जिनमें से एक उन ग्रामों के बारे में है जहां कोई सुविधा उपलब्ध नहीं है तथा दूसरी, कुल जनसंख्या के अनुपात में अनुसूचित जाति और अनुसूचित जनजाति की जनसंख्या से संबंधित है।

नगर निर्देशिका के फार्मों में भी कुछ संशोधित किए गए हैं जिससे की कुछ मदों के बारे में जानकारी मिल सके और न्यूनतम आवश्यकता कार्यक्रम की आवश्यकताओं की पूर्ति हो सके। इसी उद्देश्य को ध्यान में रखते हुए श्रेणी-I और श्रेणी-II के कस्बों की गन्दी बस्तियों में नागरिक और अन्य सुविधाओं के बारे में एक नया विवरण (विवरण-IV क) जोड़ा गया है। आशा की जाती है कि इससे प्राप्त जानकारी आयोजकों को गन्दी बस्तियों के सुधार के लिये कार्यक्रम तैयार करने में सहयोग देगी। इसी बात को ध्यान में रखते हुए नागरिक और अन्य सुविधाओं के बारे में विवरण IV में अनुसूचित जातियों और

अनुसूचित जनजातियों से संबंधित कालम और विवरण-V में शैक्षिक सुविधाओं के अंतर्गत प्रौढ़ शिक्षा कक्षाएं/केन्द्रों के बारे में अन्य बातों के साथ-साथ कालम जोड़ें गए हैं। नगर निर्देशिका में एक महत्वपूर्ण परिवर्धन है। सभी सातों विवरणों में कस्बे की श्रेणी के बारे में कालम I देश के नगरीय क्षेत्रों, में उपलब्ध आंतरिक सुविधाओं की जानकारी का कस्बे की श्रणी को ध्यान में रखते हुए सर्वोत्तम विश्लेषण किया जा सकता है। कुछ विवरणों में नागरिक प्रशासन की स्थिति और जनसंख्या के कालम जोड़ने से भी इस उद्देश्य की पूर्ति होती है।

1981 की जनगणना से भरी गई व्यक्तिगत पर्चियों के आर्थिक और अन्य प्रश्नों में जो भी परिवर्तन किए गए, उन्हीं परिवर्तनों को ध्यान में रखते हुए ग्रामों और नगरों के प्राथमिक जनगणना सार के फार्म तैयार किए गए हैं।

1981 की जिला जनगणना पुस्तिका के प्रकाशन में विलम्ब न हो, इस बात को ध्यान में रखते हुए उक्त खण्ड के भाग–क में ग्राम एवं नगर निर्देशिका तथा भाग—ख में तहसील/कस्बा स्तरों तक जनगणना का प्राथमिक सारांश के साथ अनुसूचित जातियों और अनुसूचित जनजातियों के प्राथमिक जनगणना सार को भी सम्मिलित किया गया है। जिला जनगणना पुस्तिका के महत्व को सवर्धित करने के लिये उसके प्रारम्भ में एक विस्तृत विश्लेषणात्मक टिप्पणी दी गई है जिसमें विभिन्न इनसेट सारणियां सम्मिलित हैं। जो प्राथमिक जनगणना सार और अन्य सुविधाओं से सबधित गैर जनगणना आंकड़ों पर आधारित हैं। प्रकाशन को पुनः और उपयोगी बनाने की दृष्टि से उपयुक्त स्थानों पर जिला और तहसील/पुलिस स्टेशन/सामुदायिक विकास खण्डों आदि, को मानचित्र में दिया गया है। मानचित्रों में इनकी सीमाएं और अन्य महत्वपूर्ण विशेषताए दिखाई गई हैं।

यह प्रकाशन राज्य सरकार और जनगणना सगठन के सयुक्त प्रयास का फल है। राज्य में आंकड़ों का संकलन श्री के. सी दुबे, निदेशक जनगणना परिचालन मध्यप्रदेश के मार्गदशन पर राज्य सरकार की ओर से किया गया है। राज्य सरकार न ही इसके मुद्रण का खर्च वहन किया हैं। इस प्रकाशन की योजना, रूपरेखा और इसके समन्वय का कार्य मेरे कार्यालय में सामाजिक अध्ययन प्रभाग में उप महारजिस्ट्रार श्री एन. जी. नाग द्वारा किया गया। डा. बी.के. राय, उप महारजिस्ट्रार (मानचित्र) ने मानचित्रों को तैयार करने में तकनीकी मार्गदर्शन किया। जन-गणना निदेशालयों से प्राप्त आंकड़ों की सवीक्षा श्री एम. एम. दुआ, अनुसधान अधिकारी के मार्गदर्शन में मुख्यालय के सामाजिक अध्ययन प्रभाग में की गई। इस परियोजना से संबधित सभी कर्मचारियों को मैं धन्यवाद देता हूं।

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State governments is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is inter alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables, village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objectives in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement

are also added *inter-alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/police station/C D Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K.C. Dubey, the Director of Census Operations, Madhya Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B.K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in the project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982

PREFACE

One of the most important publications of the Census are the District Census Handbooks. This publication was begun in this caption since 1951 Census. But prior to this, a similar publication was released in the Census earlier than 1951. That publication was on the title of Village Statistics and it contains only village names and total population thereof. The 1951 Census could, therefore, be said to represent a significant step in the process of making detailed Census statistics available down upto the village level.

In fact the District Census Handbook is the most important publication at the Census and is also perhaps the most widely used. Also perhaps this is the only publication used at the micro-level down upto the tahsil and development block.

The form of the District Census Handbook has gone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view of making the basic statistics available with the data users as early as possible, the District Census Handbooks have been split into 2 parts. Part A contains the Introductory Note on the district and Town/ Village Directory. This volume will be found useful to get almost all the non-Census statistics available at one place. Part-B also contains an introductory note and the Primary Census Abstract.

One of the innovation of the present Census has been in terms of allotment of Location Code numbers to the villages. In the earlier Censuses the Location Code system was such that the villages of a Patwari Circle were found at different serial numbers. Since the Patwari Circle still remains an important administrative unit, the Location Code numbers have been so given in the present Census that it may be possible to locate all the villages of a particular Patwari Circle at one place one below the other.

When the planning for the present Census was started in 1979 the tahsils were still revivable as an important unit of the administration, the whole planning was, therefore, done taking tahsil as the unit. It was during the course of the Census that some requests were informally received for making blockwise data available. Since these requests were received very late and were also received only in an informal manner, it has not been possible to disturb the original planning of villages arranged according to the location code numbers taking tahsil as one unit. However, additional exercise has been done and in addition to the tahsil figures blockwise figures have also been indicated. It is hoped that the availability of these blockwise data will enhance the utility of this publication.

It is hoped that this handbook will provide the basic statistical support to executive and developmental administration. It is needless to state that the proper implementation of policy depends on the ability of the administration authorities concerned.

It may be remembered that the villagewise area figures given in the Primary Census Abstract and the Village Directory are those besed on the village papers while the tahsil totals given in the PCA are obtained from the Land Records department which in many cases exclude forest areas.

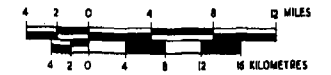

The statistics that are contained in the District Census Handbooks are the result of a massive and marathon exercise in the compilation and tabulation of voluminous statistics. The compilation of the statistics contained in this volume was carried out by 9 Regional Tabulation Offices each under a Regional Deputy Director of Census Operations. These Regional offices were run with the help of purely temporary staff-roughly about 1,500 Tabulators, about 250 Checkers and about 80 Supervisors. I am grateful to my colleagues the Regional Deputy Directors and those temporary staff for the speed and accuracy in the editing and basic compilation of more than nearly 522 lakhs slips and nearly 1 lakh of household schedules. The compilation of village Directory was taken up at the Headquarters and I am equally grateful to the officers and staff who have worked whole heartedly on the job in a collective and co-operative venture. It is not possible nor fair to name in this. The maps contained in the Handbook have been prepared in the Cartographic Section of my office. However, the analytical note included in this volume has been prepared by Shri M L. Sharma, Deputy Director of Census Operations.

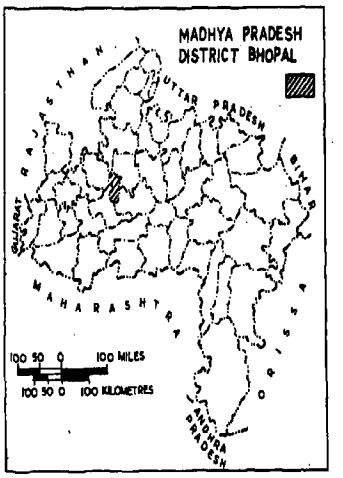

I am thankful to all who have contributed to bring this publication possible. The Census Organisation is also grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these handbooks and to the Controller, Printing and Stationery, Madhya Pradesh, Bhopal and his staff for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri P. Padmanabha, to whom we are all deeply grateful. Our thanks are also due to Shri N.G. Nag, Deputy Registrar General (Social Studies) for all the help that we received from him and his section.

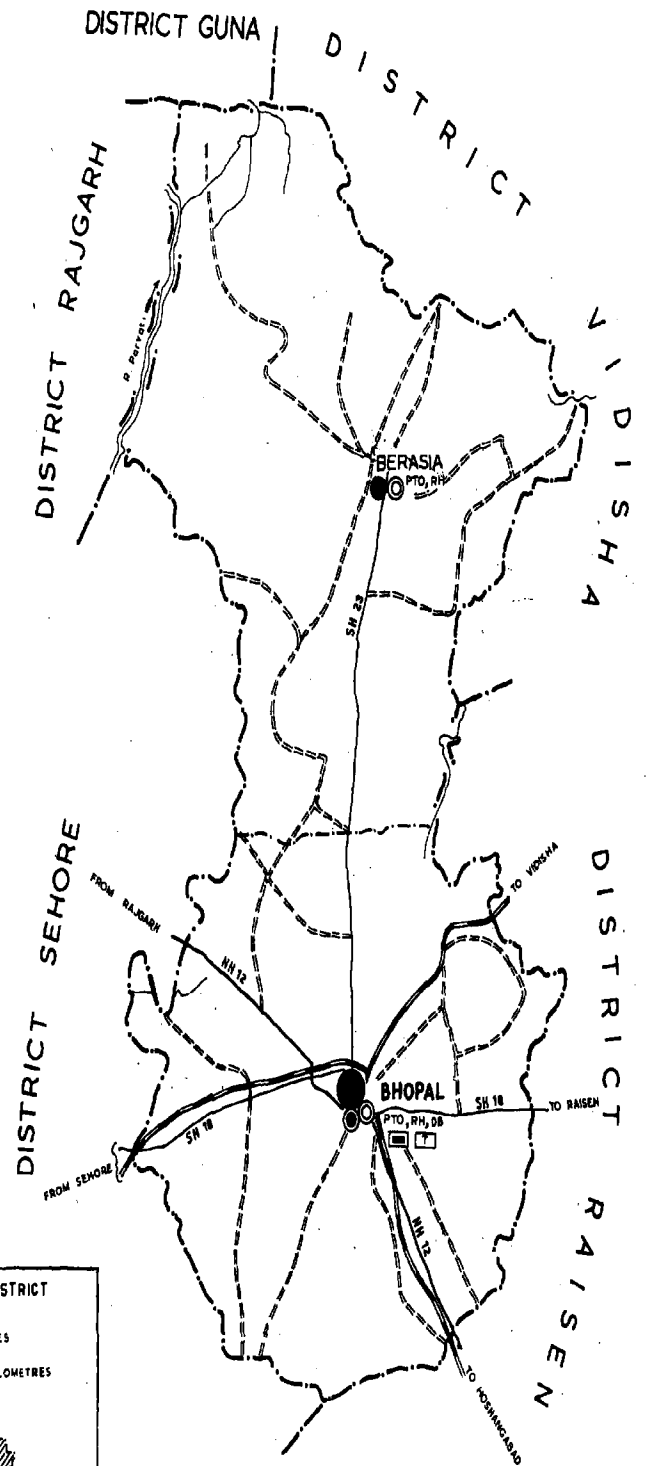

K. C. DUBEY
Director of Census Operations,
Madhya Pradesh.

* Includes 77 inhabited villages which have been treated wholly as urban outgrowth of near by City/Town.

** Includes 58 Uninhabited villages of which Abadi Area have been merged in near by City/Town.

विश्लेषणात्मक टिप्पणी

ANALYTICAL NOTE

NOTES AND EXPLANATIONS

This note gives the meanings and explanation of terms and concepts used in this handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker etc., it is not possible to appreciate the data presented in the handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a bit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manners of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent.

Concepts and Definitions

Rural/Urban :

It has been the tradition of the Indian Census to present the Census data for rural and urban areas separately. In fact, in all the Censuses throughout the world this classification of census data into rural and urban units is generally recognised. However, distinction between rural and urban is not yet amenable to a single definition which would be applicable to all countries.

The definition of an urban unit at the 1971 Census was as follows :—

(a) All places with a municipality, corporation, cantonment board or notified town area;

(b) All other places which satisfied the following criteria;

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile).

The same criteria is retained at the 1981 Census also so that comparability with the previous Census could be ensured and which should provide basis for analysing of figures and urbanization in the country. But it has to be remembered that the urban criterion of 1981 varies slightly from that of 1961 and 1971 Censuses in that the males working in activities such as fishing, logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 Censuses, whereas in the 1981 Census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Applying the criteria described above, a list of 327 towns was finalised and it is these 327 towns which are treated as urban areas for the purpose of 1981 Census. The Additional Secretary to the Government of India in the Ministry of Home Affairs sent a letter to the Chief Secretaries of the State Governments as back as 10th May, 1979, requesting them to ensure that no changes are made in the jurisdiction and boundaries of municipalities and revenue villages, tahsils, sub-divisions and districts during the period from 1-1-1980 to 30 6-1981. However, subsequent to our finalisation of rural and urban frame the State Government in the Local Government Department notified many places as notified areas and municipalities. Such places have not been treated as towns for the purpose of Census and the Secretary to Government in the Local Government Department had agreed to this arrangements. Similarly the State Government raised the status of 6 municipal committees to that of municipal corporations. These new municipal corporations are also treated as municipal committees.

While dealing with the subject of rural and urban break up mention may be made of the area under the Special Area Development Authority. The

Special Area Development Authority have been constituted under the Madhya Pradesh Nagar Tath i Gram Nivesh Adhiniyam, 1973 and they enjoy the power to function as a municipality so far as the municipal management of that area is concerned. The limits of these Special Areas include large portions of rural areas comprising number of villages situated around the core town or village of such Special Area. For example, Orchha is a SADA area in Tikamgarh district but there is no town in this area. Similarly, Malanjkhand in Balaghat district, Bhedaghat in Jabalpur district, Mandav in Dhar district and similar other cases are SADA areas but there is no urban area within that. The objective of the SADA area perhaps is to control the future development of these in a planned manner and that is all. It was therefore, not considered desirable to treat such SADA areas at par with other urban bodies like municipal corporations, municipal committees etc, and only that part of it is treated as urban which is really so. As such in the Korba SADA area only Korba town has been treated as urban and rest of the area remains in the rural frame.

Urban Agglomeration :

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. Very often large railway colonies, university campuses port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a contiguous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglo neration may constitute :—

(i) A city with continuous outgrowth, (the part of outgrowth being outside the statutory limits but failing within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a); or

(c) A city and one or more adjoining towns with their outgrowths all of which from a continuous spread.

Standard Urban Area :

A new concept of Standard Urban Area introduced in 1971 Census will also be followed for the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are:—

(i) it should have a core town of a minimum population of 50,000 (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data have been presented for the Standard Urban Areas in 1981 also. The idea is to present basic data for these Areas for four to five decades so that the urbanisation process in these areas can be studied. However, there have been minimum changes in the constituent units of the Standard Urban Areas of 1981 Census as compared to those of 1971, but the list of Standard Urban Areas remains unchanged.

Size Class of Towns :

The urban areas are classified into 6 classes referred to as towns of Class I to VI. The classification is shown below :—

Class I	100,000 and above
Class II	50,000 to 99,999
Class III	20,000 to 49,999
Class IV	10,000 to 19,999
Class V	5,000 to 9,999
Class VI	Less than 5,000

It is customary to treat a town having a population of 1 lac and above as a city.

Census House :

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc, used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building had a number of flats or blocks which were independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they have been considered as a separate census houses.

In some cases, however, it was difficult to apply the definition strictly. For example, in an urban area, a flat has five rooms, each having direct entrance to the common staircase or courtyard which by definition, had to be treated as five Census houses. If all these five rooms were found occupied by single household entire flat was treated as one census house. In such cases singleness of use was taken into consideration to avoid undue proliferation of the number of census houses.

An occupied residential census house means a census house which is actually used for residential purposes, either wholly or partly by one or more households.

Household :

The term household in census is defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any one of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messess, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional households. There may be one member households, two member households or multimember households. For census purposes, each one of these types is regarded as a 'household'.

There are three types of households viz , normal, institutional and houseless households. A houseless household is that which is normally found to be residing on the road side, pavements, in hume pipes, under staircases, or in open, temple, mandaps, platforms and the like. Institutional households have been explained above. Those households which do not fall in the category of institutional household and houseless household have been categorised as normal households, The enumerator was required to indicate in the Household Schedule whether the household belonged to 'Institutional household' or 'Houseless household'. For institutional 'I' was written against the question "Type of household" and 'O' was indicated in the case of houseless household. For normal household, no entry was required to be made.

The enumeration of institutional households was done in the manner the normal households were enumerated during the enumeration period from 9th February to 28th February, 1981. The houseless households were enumerated on the night of 28th February, 1981.

Scheduled Castes and Scheduled Tribes :

Scheduled Castes and Scheduled Tribes are those found in the Notification of Scheduled Castes/ Scheduled Tribes Order (Amendment) Act, 1976 (108 of 1976). By this amendment, area restrictions for most of the Scheduled Castes and Scheduled Tribes have been removed. However, the area restrictions still remains in respect of Dhobi (in Bhopal, Raisen and Sehore districts): Kotwal and Pardhi (in Bhind, Dhar, Dewas, Guna, Gwalior, Indore, Jhabua, Khargone, Mandsaur, Morena, Rajgarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha Districts) and Kumhar (in Chhatarpur, Datia, Panna, Rewa, Satna Shahdol, Sidhi and Tikamgarh districts) Scheduled Castes. Likewise Keer and Pardhi Scheduled Tribes are still restricted only in Bhopal, Raisen and Sehore districts; Mina in Sironj sub-division of Vidisha district; Panika in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi and Tikamgarh districts, Pardhi, Bahelia, Bahellia. Chita Pardhi, Langoli Pardhi, Phanse Pardhi, Shikari, Takankar, Takia in [(1) Bastar, Chhindwara, Mandla, Raigarh, Seoni and Surguja districts, (2) Baihar tahsil of Balaghat district, (3) Betul and Bhainsdehi tahsils of Betul district, (4) Bilaspur and Katghora tahsils of Bilaspur district, (5) Durg and Balod tahsils of Durg district, (6) Chowki, Manpur and Mohala Revenue Inspectors Circles of Rajnandgaon district, (7) Murwara, Patan and Sihora tahsils of Jabalpur district, (8) Hoshangabad and Sohagpur tahsils of Hoshangabad district and Narsimhapur district (9) Harsud tahsil of Khandwa district, (10) Bindra-Nawagarh, Dhamtari and Mahasamund tahsils of Raipur district.]

Persons belonging to the castes/tribes mentioned above found in the districts other than those where

scheduled have not been treated as scheduled castes or scheduled tribes as the case may be. It may be mentioned here that scheduled castes can be belong to the Hindu or the Sikh religion only, while the scheduled tribes belong to any religion. The list of Scheduled Castes and Scheduled Tribes relating to Madhya Pradesh relevant to 1981 Census has been given immediately after this note as Annexure –I

Literates and Educated Persons

A person who can both read and write with understanding in any language is treated as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed and minimum educational standard.

The test for literacy was necessary only when the enumerator had any doubt about any person returning as 'literate'. The test for literacy was ability to read any portion of the Enumerator's Instruction Booklet and to write a simple letter. Ability merely to sign one's name was not considered adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not familiar, the respondent's word was taken as correct.

All children of the age of 4 years or less were treated as illiterate even if they might be going to school and had picked up reading and writing a few words.

Classification of workers by Industrial Category :

At the 1981 Census, the questions which were canvassed in the Individual slip to elicit information on economic characteristics of the population were as follows :–

(i) **Q. 14A** Worked any time at all last Year ?

Yes
No(H/ST/D/R/B/I/O)

Q. 14B If yes in 14A, did you work for major part of last year ? Yes (1)/No(2)

(ii) **Q. 15A** Main activity last year ?

Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

14B Yes-Any other work any time last year ?
Yes (C/AL/HHI/OW)/No

Q. 15B

14B No-Work done any time last year ?
(C/AL/HHI/OW)

(iii) **Q. 16**-If no in 14A or 14B, seeking/available for work ? Yes (1)/No(2)

The above questions were formulated after detailed discussion at the Data User's Conference and technical group. At the 1961 and 1971 Censuses, the economic questions were based on different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively. Current status approach was thought to be irrelevant in the context of our country where usual status of a worker is considered to be more appropriate.

The above questions are in three parts and have been designed in such a way that first of all it attempts to divide the population into two broad groups viz.,

(1) those who have worked at all during the last year, and (2) those who have not worked at all.

The latter group consists of the non-workers. This information is obtained in Q. 14A Having classified the population into two groups, the next attempt has been to classify those who have worked any time into Main workers and Marginal workers, on the basis of time spent on work as well as secondary work, if any, of the Main workers. It a person had worked for six months or more (180 days or more) he was treated as Main Worker and if the period of work was less than six months he was regarded as a Marginal Worker. In Q. 15B details of secondary work or marginal work are obtained. Finally an attempt has been made to determine whether those who are non-workers or marginal workers are seeking or are available for work.

It will thus be seen that these questions on economic aspects have been so designed as to identify all workers, full time workers or seasonal workers or marginal workers and non-workers with reference to the activities during the last one year period prior to the date of enumeration.

The various terms and definitions used in collecting the economic data have been explained briefly in the following paragraphs.

Definit.on of work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

For persons on regular employment or engaged in regular type of work, temporary absence during the reference period on account of illness, holiday, temporary closure, strike etc., was not a disqualification for treating them as workers.

Persons under training, such as apprentices, with or without stipends or wages were also treated as workers. In the case of a person who had been offered work but had not actually joined, he was not treated as a worker. Rent receivers, pensioners etc., were not treated as economically active unless they also engaged themselves in some economic activity.

In all these questions, the reference period is the one year; preceeding the date of enumeration. Certain tapes of work such as agriculture, household industry like *gur* making etc., are carried on either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In all such cases the reference period has been the broad time span of the agricultural seasons preceeding the enumeration.

Main Workers :

The main workers are those who have worked for a major part of the year preceeding the enumeration. Main activity of a person who was engaged in more than one activity was reckoned in terms of time disposition. For example, if a person had worked as daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months, he was treated as a Main worker on the basis of total time spent on work and his main activity have been reckoned as Daily Wage Labourer since he spent major part of his time on work in this activity than as cultivator or agricultural labourer.

Marginal Workers :

Marginal workers are those who have worked any time at all in the year preceeding the enumeration but have not worked for a major part of the year. For example, if a person who is mostly doing household duties, or is mainly a student, or mainly a dependent or a rentier or a beggar and the like who is basically a non-worker had done some work at some time during the reference period, he was treated as a marginal worker.

Non-Workers :

Non-workers constitute of householders, students, dependents, retired persons or rentiers, beggars, inmates of institutions, unemployed persons etc. They are persons who have not worked any time at all in the year preceeding the enumeration.

Main activity of workers :

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work in the PCA at the 1981 Census. A significant departure has, therefore, been made this time while presenting the data on economic activity which relate to only four broad categories indicated above as against nine industrial categories of the 1961 and 1971 Censuses. The nine categories of the 1971 census were (i) Cultivators, (ii) Agricultural labourers, (iii) Livestock. Forestry, Fishing Hunting & Plantations, Orchards & allied activities; (iv) Mining, & Quarring (v) Manufacturing, Processeing and servicing with sub-categories (a) At Household Industry and (b) Other than Household Industry (vi) Construction, (vii) Trade and Commerce, (viii) Transport, Storage and Communications; and (ix) Other workers. The correspondencc between the categories of 1981 and 1971 are as under :—

1981 Categories	1971 Categories
I	I
II	II
III	V(a)
IV	III,IV,V(b),VI,VII,VIII & IX

Cultivator :

For purposes of Census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land

owned or held from Government or held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnuts, tapioca, etc. and pulses, raw jute and kindered fibra crop, cotton etc., and 'does not' include fruit growing, vegetable growing or keeping orchards or groves or working of plantation like tea, coffee, rubber, cinchona, opium and other medicinal plantations.

Agricultural Labourer :

Person working in another person's land for wages in money, kind or share has been treated as agricultural labourer. An agricultural labourer has no risk in the cultivation and he has no right of lease or contract on land on which he works.

Household Industry :

Household Industty is defined as an industry conducted by the head of the household himself/herself and or by the members of the households at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify or has to be registered under the Indian Factories Act.

Household industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithing, tailoring etc. It does not include professions such as a pleader or doctor or barber or dhobi even if such professions are run at home by members of the household.

Other Workers :

All workers i.e. those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry are 'Other workers'. The type of workers, that come under this category include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc.

ANNEXURE I

MADHYA PRADESH

[The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976.]

Dated the 18th September, 1976.

Scheduled Castes :

1 Audhelia
2 Bagri, Bagd.
3 Bahna, Bahana
4 Balahi, Balai
5 Banchada
6 Bargunda
7 Barahar, Basod
8 Basor, Burud, Bansor, Bansodi, Bansphor, Basar

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The History of the District Census Handbook could be traced from the 'Village lists' brought out for every district in 1901 and 'Village Statistics' for every district in 1911. But this was discontinued in 1921 and 1931. In 1941, however, 'village statistics' were brought out by the then Central Provinces and Berar Government. It was for the first time in 1951 the practice of bringing out a single volume known as the District Census Handbook, giving villagewise statistics and other census tables for the district at the cost of the State Government was initiated and is continuing since then.

The District Census Handbook, compiled by the Census Organisation of behalf of the State Government is one of the most important publication of the census and is widely used by planners, administrators, academicians and researchers.

The scope of the District Census Handbook has gone considerable change since 1951. In 1951 the District Census Hondbooks contained only the Primary Census Abstract and the Census tables. In view of the usefulness of this publication, improvements were made in 1961 by including non-census data like climate, agriculture, co-operation, industry, education, health etc., as also an 'Introductory Note' for each district. Unfortunately, the desire to make the District Census Handbook more comprehensive delayed its publication. Therefore in 1971, it was decided to publish the District Census Handbook in three parts in order to release the maximum data as and when finalised. Part A contained the Village Directory which gives villagewise non-census statistics of land use area and amenities available within the village, Part B contained the Villagewise Primary Census Abstract and Part C contained various administrative statistics. Parts A and B were however, published in one volume since it was economical to do so as data for both the parts become available early. Parts A and B were published separately in Hindi and English versions. Collection of data for Part C was cumbursome and it took unduly long time in its finalisation, and ultimately this publication had to be abondoned in view of the enormous delay in its printing.

In 1981 Census, with a view to avoid delay in bringing out the DCH series, the part containing the administrative statistics has been dropped. Thus the present series of District Census Handbook consists of two volumes viz DCHB Part A and DCHB Part B. Part A contains the village/Town Directory and Part B contains the Town/Villagewise Primary Census Abstract of the concerned district.

Part A—Village Directory contains information about the name of village, total area of village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc.

In addition there are four appendices to the Village Directory as under :—

(1) Tahsilwise abstract of educational, medical and other amenities.

(2) Land utilization data in respect of census towns.

(3) Tahsilwise list of villages where no amenities are available, and

(4) Tahsilwise list of villages according to the proportion of Scheduled Castes / Scheduled Tribes population by ranges.

The last two appendices have been included for the first time in 1981 Census. Appendix-III will be helpful for planning input in areas/villages where basic infrastructure is lacking and Appendix - IV will be helpfull for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to area development orientation programmes.

Similarly the Town Directory contains seven statements as below :—

Statement I—Status and growth history.

Statement II—Physical aspects and location of towns.

Statement III—Municipal Finance.

Statement IV – Civic and otheramenities.

Statement V—Medical, educational, recreational and cultural facilities.

Statement VI—Trade, Commerce, Industry and Banking.

An additional statement IV-A is meant only for Class-I and Class-II towns giving the civic and other ameni-ties in notified slums. This statemnet has been intruduced for the first time in 1981 census.

Part B – The town/villagewise Primary Census Abstract gives the basic data like area of the village, occupied residential houses, total number of households, population by sex, as also the sexwise population of Scheduled Castes and Scheduled Tribes, literacy and population by sex into four broad industrial categories viz., cultivators, agricultural labourers, household industry and other workers; marginal workers and non-workers.

The inclusion of Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level is another important feature of the DCHB series of 1981 Census.

An appendix containing Development Blockwise 'Vikash Khandwar' totals of PCA figures has also been included.

ANALYTICAL NOTE

Bhopal is a new district carved out of the erst-while Sehore district of Bhopal division under the M. P. Govt. Notification No. 2477/1977/सात/सा. एक dated 13th September 1972. The district lies in the eastern edge of Malwa plateau and is situated in the central part of the State between latitude 23°05' and 23°55' northern and longitude 77°10' and 77°39' eastern. The district is bounded by Rajgarh district in the noth-west; Guna district in the north; Vidisha district in the north-east; Raisen district in the east and south-east and Sehore district in the west and south-west.

The district derives its name from the district headquarters town Bhopal which is also the capital of Madhya Pradesh. The etymology of the term Bhopal has been derived from its former name Bhoj-pal as would be evident from the following extract from the Imperaial Gazetteer of Central India, 1908-P.240.

"Bhopal is popularly derived from Bhojpal or Bhojas dam, the great dam which now holds up the Bhopal city lakes, and is said to have been built by a Minister of Raja Bhoj, the Paramara ruler of Dhar, the still greater work which formerly held up the Tal lake being attributed to this monarch himself. The name is, however, invariably pronounced, Bhupal and Dr. Fleet considers it to be derived simply from Bhupala, a king, the popular derivation being an instance of the striving after a meaning so common in such cases."

Sir John Malcolm has also made a mention on this in his report of "Malwa and adjoining district P-7" as under:

Bhopal, we are told derived its name from its Rajput founder who is said to have been the minister of the celebrated Raja Bhoj and was built at the same time that his master formed the present district of Tal into a lake and founded near it the city of Bhoj-pur now in ruins."

Initially the lake was quite big but as time has elapsed only a small portion of it has remained to be seen as 'Bada Talab' *ie* the upper lake. Since long time past there is a famous saying about Bhopal lake.

"ताल में भोपाल ताल और सब तलैया"

(only the Bhopal lake is worthy of being called a lake, others are mere ponds.)

The district comprises of the tahsils viz, Huzur and Berasia of the former Sehore district of 1971 Census.

Physiography :

The district can be divided into two broad regions (i) Berasia Shruby Forests and (ii) Bhopal plateau on the basis of the physio-cultural characteristics. A brief description of these two regions is as below :

(i) **Berasia Shruby Forests :**

The region is situated in the northern part of the district and covers major part of Berasia tahsil and a small portion of Huzur tahsil. This is on the edge of Malwa Plateau and therefore a large part of it is uneven. There are strong hill ranges spread over the tract. The one situated on the northern part in north-south derection has an average height of 500 metres. This range separates the water catchment zones of Parbati river in west and Bean Banjari in the east. Another hill range with a height of 594 metres is located in the south-eastern part of this tract but a major portion of it falls in the neighbouring district of Raisen. A number of scattered hillocks appear on the east of Berasia which forms a zone separating the water flow direction.

The main reserve forest ranges are Berasia, Bhopal Ramtek and Sohayn. Besides, some pockets of protected forests are also located in this tract.

(ii) **Bhopal Plateau :**

This region is situated on the southern part of the district and covers the major portion of Huzur tahsil. Lying on the edge of Malwa plateau, maximum and minimum height of the region varies between 630 and 472 metres (MSL). Most part of this plateau is disected with streams and thus the surface is rugged. The Central part is at a higher altitude and the tract resembles the shape of a dome. It is the originating place of a number of streams draining in all directions. Noteable among them are Halali and Bean and Chamari in north Kolana in the west, Kerwa and Kaliasot in the south and Ajnar in the east. Since these streams originate from this area their impact on the topography is not very significant. The location of *Baratal* ie Bhopal lake is an important physical feature of this region. A pocket of Bhopal reserve forest is located in the southern part of the region.

Flora and Fauna :

(a) **Flora :** The area under forests in the district is 435 sq. km accounting for 15.7 per cent of the total geographical area. The forests of the district are southern tropical Dry-Deciduous with Dry Deciduous Scrub Forests. Except for small patches of teak forests, it is mostly the mixed forests. The species of trees found in the forests of the district are; Teak (*Tectona grandis*). dhaora (*Anogeissus-latifolia*), Salai (*Boswellia Serrata*), Saj (*Terminalia tomentosa*) bija (*Pterocarpus marsupium*), Mahua (*Madhuca indica*), Semal (*Salmelia malabricum*), Haldu (*Adina cardi folia*), tendu (*Diospyros-melanoxylon*), Achar (*Buchanania latifolia*) etc. Bomboos are also found in small measure in mixed forests.

(b) **Fauna :**

Once the forest was said to be thick and wild life more plentiful. Due to deforestation and indiscriminate shootings in the past, the wild life has become scarce. Bigger animals like Tiger (*Felis tigris*), Panthers, Hyenae etc have become rare. Sambhar, Cheetal, black buck are met with in thick forests. Jackals are fairly common.

Climate :

The district has three clearly distinguishable seasons which divide the year into three more or less equal parts. They are the summer season, rainy and winter roughly corresponding to March-May, June-September and November to March. The month October, however, witnesses a transition from the rainy to the cold weather.

The district receives rains from the Arabian sea monsoon which commences by early June. July and August are the peak rainy months. The following table gives the rainfall data of 10 years average (1951-60) and those recorded in 1981 in two rain gauges of the district.

Sl.	Stations	Average annual rainfall (in mm)	
		Average of (1951-60)	1981
1	2	3	4
1	Berasia	897.5	677.1
2	Bhopal	1000.8	996.9

There has been a shortfall in rainfall during the year 1981. It appears to be a general feature which may be atributed to large scale destruction of forests.

The monsoon begins to taper off by September and by October it is almost over and a noticeable change in weather is observed. December and January are the coldest months. The mercury touches 2°-4° when there is a cold wave, but on the whole it is generally very pleasant.

By March it begins to grow warmer and the summer season commences from April. May is the hottest month when the average mean maximum and minimum tempartures are 32°C and 19°C respectively. Earlier the nights in summer months used to be not unpleasant but of late a change is noticeable.

History :

There is a legend that Bhopal, long ago, was a part of 'Mahakautar' a barrier of dense forests and hills outlined by the Narmada separating the north from the south which was traversed by Muni Agastya of revered memory on his way from north to south.

Early history of the territory comprising Bhopal district is in oblivion. It was in the tenth century, the names of Rajput clans began to appear in Malwa. The most notable was Raja Bhoj (1010–53), who was both a great scholar and a great warrior. West of Bhojpur, once lay a vast lake, but nothing remains except the ruins of the magnificent old dams by which its water were held up. The site was chosen with a great skill, as a natural wall of hills enclosing the whole area except for two gaps, in width 100 yards and 500 yards respectively. Traditions ascribe this great work to Raja Bhoj of Dhar (1010–53). The story goes about Raja Bhoja that he went to Bithur for pilgrimage with large number of Brahmins as his usual habit of accompaning them whenever he use to move on religious mission. All the Brahmins gave him blessings except one. He was an aggrieved person who held Raja Bhoja responsible for the death of his (Raja Bhoj's) mother since she died at the time of delivery. It was a severe blow to the Raja. To do away with this stigma, Raja Bhoja consulted great scholars, sages, astrologers, etc. All of them with one voice said "If the Raja will link up nine rivers and ninetynine streams and then take bath therein and distribute ninetynine cows by way of charity and take the blessings of ninetynine Brahmins, and give away ninetynine tolas of Silver, then in that case the blot can be removed from him, otherwise the Raja will be bitterly involved in the cycle of transmigration of soul".

Raja Bhoj had a very wise and experienced Vazir, Kalyan Singh who made a tour of the territory comprising Malwa and Gondwana. Kalyan Singh could locate the place where Betwa river was flowing with its seven tributaries. Thus he could concieve of bringing the water of the ninth river by constructing a dam which is now the Bhopal lake (Bara Talab) whose ripples are visible on the wide expanse of Bhopal City. Then he got one rivulet issued from this lake which was later called as 'Kalyan Saut' and now as 'Kaliyasaut'. Kalyan Singh cleared the way of this river to join the Keron stream and was able to bring together the water of nine rivers at one place.

Thus Raja Bhoj performed the ceremonies prescribed by the Pandits for the purification of the soul. This place was later developed into a village where the Bhojpur temple was built as a massive structure with a massive single stone **Shivling.**

Kalyan Singh was awarded with handsome Jagir for this meritorious work. He got one village established towards east of Bhopal which was named after him as Kalyan Kheri. Later on this village popularly became known as Kalya Kheri. Subsequently it was renamed as Goharganj by Her Highness Sultan Jahan Begum, the ruler of Bhopal State

A fort was built in the city by Raja Bhoj and later the Rani of Raja Udayaditya. Paramara (1059–80), grandson of Bhoj built a temple known as the Sabha Mandal which was completed in 1184. It is alleged that this Sabha Mandal was destroyed by Sultan Shamsuddin Altamash at the time of his assault at Malwa in 1236. After the invasion by Altamash in 1935, the Mohammadans began to infiltrate into Malwa which included Bhopal as a part. In 1401 Dilwar Khan Ghori took charge of this territory. He made Dhar as the capital of his kingdom. He was succeeded by his son, Hoshang Shah (1405–34) who founded Hoshangabad. The massive dam (Bhojpur lake) of which remains is the present Bhopal lake was destroyed by Hoshang Shah. According to Gond tradition, it took an army of them three months to cut through the dam, and that the lake took three years to empty, while its bed was not habitable for 30 years afterwards.

In the beginning of 14th Century, a Gond Warrior named Yadoram established the Gond kingdom with his headquarters at Garha Mandla. The Gond dynasty had a number of powerful kings like Madan Shah, Gorakhdas, Arjundas and Sangram Shah. During the Mughal invasion in Malwa, a sizeable area of the territory comprising Bhopal State was under the possession of Gond kingdom. These territories were known as chaklas of which Chakla Ginnour was one consisting of 750 villages. Bhopal was a part of it. The Gond king Nizam Shah was the ruler of this area. He had seven queens, one of whom was kamlapati the daughter of Kriparam Chandan Gond. Kamlapati was so beautiful that a verse is famous about her.

"Only the Bhopal lake is worthy of being called a lake, Others are mere ponds beside it;

Only Queen Kamlapati is worthy of being called a queen, others are mere fools beside her"

("ताल में भोपाल ताल और सब तलैया, रानी तो बस कमलापति बाकी सब रनैया")

Nizam Shah's nephew, Chain Shah was the chief of Bari at that time. He in fact wanted to marry Kamlapati but was unsuccessful and started creating nuisance in Ginnor Chakla.

Nizam Shah died of poisoning by Chain Shah. His widow, Kamlapati and son, Neval Shah became helpless. Naval Shah was a minor then. Rani Kamlapati came to an agreement with Dost Mohammad Khan to manage the affairs of the State and to avenge the death of her husband. Under the agreement Dost Mohammad Khan was asked to kill Chain Shah and bring his eyes to Rani Kamlapati to get a reward of Rs. ten thousand.

It was in 1917-18 that Dost Mohammad Khan got a good opportunity to come in contact of Rani Kamlapati and thus he obliged her by fulfilling her wishes.

How fat it is true is not known, but it is said that Dost Mohammad khan later on killed Naval Shah by giving him poison.

According to one opinion Rani Kamlapati commited suicide by jumping into the lower lake when Dost Mohammad tried to molest her. There is yet another opinion. according to which Rani Kamlapati did self immolation by burning herself before the Kamlapati Palace which now stands in Kamla Park. This has been confirmed by the famous historian and archaeologist, Shyam Sunder Saxena. The self immolation by Rani Kamlapati is further corrobrated by the fact that whi e digging near Kamla Park for laying pipeline for water supply to BHEL, some mortal remains like human bones, teeth etc. were found near the tomb of Faiz Bahadur Saheb.

Dost Mohammed Khan was a shrewd and cunning Afghan Sardar who began acquiring smaller principalities. After the death of Rani Kamlapati, Dost Mohammed seized the fortress of Ginnor, curbed the rebels, bestowing the grants according to their degree upon the rest earned their gratitude.

By treachery and deceit, Dost Mohammed Khan destroyed the Deora Rajputs, slaughtering and fighting them into the stream, since then known as Halali, river of slaughter. He shifted his headquarters to Islamnagar and built a fort. Dost Mohammed died in 1726 at the age of 66. By this time he had carved out the State of Bhopal and placed it on a firm footing. It was Dost Mohammed who had decided to build his capital at Bhopal in 1722. His successor, Yar Mohammed Khan, however, went back to Islamnagar.

On his death Yar Mohammed Khan, however, managed to make his entry in Bhopal and became the ruler of Bhopal. But actually he could never assume the title of Nawab. He was also ambitious like his father by acquiring possession of Udaipur, Sewans and Pathari.

Marathas had a contest with Yar Mohammed Khan in which many lives were lost. The Marathas were making inroads in Malwa. In 1737, Yar Mohammed Khan tried to make friendship with the Marathas by paying them handsome ransom, requesting, however that his territories might not be devastated. Yar Mohammed Khan ruled for fifteen years. He died in 1742 and was buried in Islamnagar where his tomb is still standing.

On the death of Yar Mohammed Khan, his eldest son, Faiz Mohammed Khan succeeded him with the assistance of Diwan Bijai Ram. In the mean time Sultan Mohammed Khan, the brother of Yar Mohammed Khan proclaimed himself as a ruler and obtained possession of Fatehgarh Fort at Bhopal. Again with the help of Bijai Ram, Faiz Mohammed Khan compelled Sultan Mohammed to denounce all claims in Bhopal in lieu of some Jagirs elsewhere. Faiz Mohammed Khan attacked Raisen fort and took possession of it.

It was in 1745, the Peshwa made inroads in the territory of Bhopal. He got help from Sultan Mohammed Khan. The Bhopal army was unable to resist the onslaught of Marathas and thus some surrounding areas–Ashta, Doraha, Ichhawar, Bhilsa, shujalpur and sehore etc were ceded to them.

Faiz Mohammed Khan died on 12th December 1777. Since he was childless, his brother Hayat Mohammed Khan succeeded him with the help of lady Mamola, the widow of Yar Mohammed Khan. But the Begum Salaha, widow of Faiz Mohammed Khan wished herself to take the command of

the State. Rivalries had started brewing and chaotic condition prevailed. To pacify the deteriorating conditions, Lady Mamola took active part in making Hayat Mohammed Khan, as the deputy of Begum Salaha. This arrangement was discarded by Hayat Mohammed who revolted and assumed the title and power of Nawab.

The East India Company had established its footings in India. Colonel Goddard of the East India Company had marched through Bhopal on his way to Bombay. Hayat Mohammed Khan maintained good relations and was faithful to them.

Nawab Faulad Khan was the Diwan but developed the enimity with Lady Mamola and was slain by a member of the royal family. Chhota Khan was appointed Diwan in his place. In a fierce fight which took place at Phanda, there was a loss of troops and Chhota Khan lost his life. It is Chhota Khan who had built a stone bridge to dam the lower lake which is still known as 'Pul Pukhta'. Ameer Mohommed Khan succeeded his father. Since his behaviour was not good he was ousted by the Nawab. Due to internal disturbances, Nawab Hayat Mohammed Khan confined to his palace without taking any active part in the affairs of the State. He died on 10th Nov. 1808.

After the death of Hayat Mohammed Khan, his son Ghaus Mohammed became the Nawab but he was not so effective. Wazier Mohammed Khan in fact wielded power and tried to influence the Britishers. At this time the Maratha power was being built up.

Nazar Mohammed Khan became the successor and remained in power from 1816 to 1819. By persistent endeavours he succeeded in entering into a pact with the Britishers. He was married to Gauhar Begum, also known as Qudsia Begum on 28th Feb 1818. The important provisions of the treaty was that the British Government will guarantee and protect the principality of Bhopal against all enemies and will maintain friendship with it. Nazar Mohammed Khan died accidentally in November 1019.

On the death of Nazar Mohammed Khan, Gohar Begum was invested with the supreme authority in the State by the Political agent in Bhopal.

In November 1837, Nawab Jehangir Mohammed Khan was invested with powers of chief of the State. It was Nawab Jehangir Khan who built a new colony which is known as Jehangirabad. His relations with Sikandar Begum became strained after some time. The Begum moved to Islamnagar and gave birth to a daughter who was known as Shah Jehan Begum. Later on Sikandar Begum came to power.

On the death of Sikandar Begum, Shahjehan Begum became ruler of Bhopal with full powers. She did good work for the welfare of the State. Her highness earned the approbation of the Governor General for good administrative ability.

With the consent of the British Government and concurrence of the family her second marriage was solemnised with Syed Sidiq Hasan Khan. Sidiq Hasan Khan belonged to Wahabi sect well known for anti-British feelings. He died in 1890.

On the Death of Shahjehan Begum, her daughter, Sultan Jehan Begum became the ruler. She was married to Ahmad Ali Khan who was given the title of 'Wazirud-Daula'. He died on 4th Jan 1902 due to heart-attack.

A number of important buildings were constructed during the regime of her highness, Sultan Jehan Begum. She was a patron of learning. It was during her time, the Sultania Girls' School and the Alexanderia Noble school (Now known as Hamidia High School) were established.

On the occasion of the Prince of Wales visit on 4th Feb 1922, Her Highness announced a new constitution for the Bhopal State which consisted of the establishment of an Executive Council and a Legislative Council. The president of the Council was Her Highness herself.

Nawab Hamidulla Khan assumed the reign in 1926. His Highness was twice elected as the Chancellor of the Chamber of Princes once in 1931-32 and again in 1944-47 and took part in important deliberations affecting the political evolution of the country. With the announcement of the plan of independence of the country, the Nawab of Bhopal resigned in 1947 from the Chancellorship of the Chamber of Princes.

In 1947, a new Ministry with a non-official majority was appointed by His Highness, but in 1948 His Highness expressed his desire to retain Bhopal as a separate unit. However the agreement for merger was singed by the Ruler in April 30, 1949 and the State was taken over by the Union Government through a Chief Commissioner on June 1, 1949.

After the merger, Bhopal State was formed as a Part 'C' State of the Indian Union. Later as a consequence of the Reorganisation of States on linquistic basis on 1st Nov. 1956, the Part C State of Bhopal was merged with other territories to from the New State of Madhya Pradesh. The new district of Bhopal was carved out on 1-10-1972 which continues to be one of the 45 districts of the State.

Distribution of Area and Population :

With an area of 2,772 sq. km. according to the figures supplied by the Surveyor General of India, Bhopal district occupies 0.62 per cent of the total geographical area of the State. It is the second smallest district in the State being next to Datia. If we compare the size of the districts in Madhya Pradesh, they present a contrast. Bastar, the biggest district is 14 times bigger than Bhopal.

According to 1981 Census 894,739 persons with 477,531 males and 417,208 females have been enumerated in the district. 212,886 persons live in 503 inhabited villages and another 681,853 persons reside in two urban units of the district. The average population per village in the district works out to 423 which is much below the State average of 582. The district is therefore characterised with small sized villages. The percentage of urban population to total population of the district is as high as 76.21 which is the highest among the 45 districts of the State.

The following table gives the area, population, density of the district, tahsils and towns.

	District/Tahsil/ City/town	Total/ Rural/ Urban	Area in sq. kms.	Population			Density per sq. km.
				Persons	Males	Females	
	1	2	3	4	5	6	7
	Bhopal District	**T**	**2,772.0**	**894,739**	**477,531**	**417,208**	**323**
		R	**2,486.5**	**212,886**	**112,883**	**100,003**	**86**
		U	**285.5**	**681,853**	**364,648**	**317,205**	**2,388**
1	**Berasia Tahsil**	**T**	**1,424.3**	**131,636**	**69,744**	**61,892**	**92**
		R	**1,423.3**	**120,801**	**34,003**	**56,798**	**85**
		U	**0.6**	**10,835**	**5,741**	**5,094**	**18,364**
	Berasia (M)	**U**	**0.59**	**10,835**	**5,741**	**5,094**	**18,364**
2	**Huzur Tahsil**	**T**	**1,283.4**	**763,103**	**407,787**	**355,316**	**595**
		R	**998.5**	**92,085**	**48,880**	**43,205**	**92**
		U	**284.9**	**671,018**	**358,907**	**312,111**	**2,355**
	Bhopal (MC)	**U**	**284.90**	**671,018**	**358,907**	**312,111**	**2,355**

The area figure for the district total is according to the Surveyor General of India while those of the tahsils are based on State Survey Department. Urban area figures are as supplied by the local bodies concerned.

The density of population for the district is 323 persons per sq. km, which is very high as compared to the State average of 118. Of the two tahsils in the district. Berasia is very sparsely populated while the density in Huzur tahsil is very high. This is obviously because it contains the capital city of Bhopal which is a powerful growth centre and is growing very fast.

The following table gives the distribution of villages according to the availability of different amenity.

Table 1

Distribution of villages according to the availability of different amenities

Sl. No.	Name of Tahsil	No. of inhabited village	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Berasia	285	169 (59.30)	17 (5.96)	285 (100.00)	31 (10.88)	8 (2.81)	47 (16.49)	45 (15.79)	66 (23.16)
2	Huzur	218	132 (60.55)	7 (3.21)	218 (100.00)	22 (10.09)	3 (1.38)	31 (14.22)	54 (24.77)	84 (38.53)
	Total : District	**503**	**301 (59.84)**	**24 (4.77)**	**503 (100.00)**	**53 (10.54)**	**11 (2.19)**	**78 (15.51)**	**99 (19.68)**	**150 (29.82)**

It is a very happy feature indeed that drinking water facility is avaibable in almost all the villages of the district.

It may be observed from the above figures that about 60 per cent of the villages in the district have one or more educational institution though mostly of primary level.

So far as the availability of medical amenities in villages is concerned, there are only 24 villages out of a total of 503 villages where medical institutions are available. This hardly accounts for 5 per cent coverage and is therefore grossly inadequate. The reason being that the district is having large number of small villages and such amenities are available only in big villages.

Amenity like post and telegraph is available in 10.54 per cent of the villages which is again indequate but as compared to many advanced districts the position is not that bad.

The amenity of market or *hat* is very meagre which is hardly sufficient to cater to the need of the rural population.

Other amenities like communications, approach to villages by pucca road and power supply are also not adequate for the economic development of the area. The result is that the pace of development is very slow.

The following table gives the proportion of population served by different amenities.

Table 2

Proportion of Rural Population Served by different amenities

Sl. No.	Name of Tahsil	Total Population of inhabited villages in the tahsil	Proportion of rural Population served by the amenity of							
			Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Berasia tahsil	120,801	101,233	21,966	120,801	36,299	12,671	35,158	32,511	44,299
2	Huzur tahsil	92,085	79,025	9,386	92,085	23,603	5,170	19,500	30,357	46,798
	Total : District	**212,886**	**180,258**	**31,352**	**212,886**	**59,902**	**17,841**	**54,658**	**62,868**	**91,097**

Entire population of the district enjoys the facility of drinking water within the precincts of the village. Well is the main source of drinking water.

Regarding the availability of educational amenity the villages having it cover about 85 per cent of the total rural population. Huzur tahsil is slightly better than Berasia in terms of spread of literacy.

Only 14.73 per cent of the rural population can avail of the medical amenity within easy reach, while a majority of the population has to depend on nearby village or town where such facility existis. Berasia *tahsil is better placed both in terms of number of* institutions and population coverage.

As regards other amenities like post & telegraph, market or *hat*, communications, approach by pucca road, power supply majority of the rural population has to depend on other nearby villages or towns where such amenities exist.

The following table gives the distribution of villages not having certain amenities arranged by distance range from the place where these are available.

Table 3

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		-5 Kms.	5-10 Kms.	10+Kms.	Total (Cols.2+4)
	1	2	3	4	5
1	Education	188	10	4	202
2	Medical	139	151	189	479
3	Drinking water	...	...	...	...
4	Post and Telegraph	324	81	45	450
5	Market/Hat	122	164	206	492
6	Communication	252	143	30	425

Out of 202 non-educational institution villages, 188 villages are situated at a distance range of less than 5 km. from such village or towns where this facility exisits. But for the educational amenity, which is available at a reasonable distance the residents of non-amenity villages have to cover longer distances to avail of them. The distance factor is more meaningful in a situation where communication facility is very poor. The district has to strive hard to achieve the declared objectives of "universal education" and "health for all by 2000 AD".

The following table gives the distribution of villages according to the distance range from the nearest town.

Table 4

Di tribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kilometres)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
0–5	25	15 (60.00)	... ...	25 (100.00)	1 (4.00)	... ...	1 (4.00)	8 (32.00)	12 (48.00)
6–15	189	127 (67.20)	10 (5.29)	189 (100.00)	23 (12.17)	2 (1.06)	32 (16.93)	45 (23.81)	68 (35.98)
16–50	289	159 (55.02)	14 (4.84)	289 (100.00)	29 (10.03)	9 (3.11)	45 (15.57)	46 (15.92)	70 (24.22)
Total	**503**	**301 (59.84)**	**24 (4.77)**	**503 (100.00)**	**53 (10.54)**	**11 (2.19)**	**78 (15.51)**	**99 (19.68)**	**150 (29.82)**

A little more than half (57.46%) the total number of villages in the district are situated at a distance range of 16–50 kms. from the nearest town which is an indication of the fact that not many of them are exposed to urban influence. Normally, nearer the village from a town greater is the urban influence over it and thereby it gets equipped with various amenities. But it is somewhat peculiar that in the case of Bhopal district, those villages which are situated 6–15 km. away from a town are having better amenities than those situated within a distance range of 5 kms. or less.

The following table gives the distribution of villages according to population range and amenities available.

Table 5

Distribution of villages according to population range and amenities available

Population Range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
-499	363	162 (44.63)	3 (0.83)	363 (100.00)	5 (1.38)	... ...	31 (8.54)	45 (12.40)	82 (22.59)
500-1,999	135	134 (99.26)	18 (13.33)	135 (100.00)	44 (32.59)	9 (6.67)	45 (33.33)	51 (37.78)	64 (47.41)
2,000-4,999	5	5 (100.00)	3 (60.00)	5 (100.00)	4 (80.00)	2 (40.00)	2 (40.00)	3 (60.00)	4 (80.00)
5,000+	...	...	...	...	...	...	...	...	...
Total	**503**	**301 (59.84)**	**24 (4.77)**	**503 (100.00)**	**53 (10.54)**	**11 (2.19)**	**78 (15.51)**	**99 (19.68)**	**150 (29.82)**

The district has a preponderance of small villages which accounts for 72.17 per cent of the total number of villages. Bigger the villages, greater the amenities available in them which is evident from the figures given in the above table.

The following table gives the main staple food in majority of the villages in each tahsil of the district.

Table 6

Main staple Food in the Majority of villages in each tahsil

Sl. No.	Name of Tahsil	Main Staple food
1	Berasia	Wheat, Jowar
2	Huzur	Wheat, Jowar

Wheat is the most important crop grown in the district. Gram is however the next important crop grown but among the cereal crops, Jowar forms the next important crop. Thus wheat and Jowar are the main staple food of the rural population of the district.

The following table gives the distribution of villages according to land use.

Table 7

Distribution of villages according to land use

Sl. No.	Name of Tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Berasia	285	137,200.26	98,161.79 (71.55)	3,283.47 (3.34)
2	Huzur	218	96,557.12	75,015.33 (77.69)	7,347.00 (9.79)
	Total : District	**503**	**233,757.38**	**173,177.12 (74.08)**	**10,630.47 (6.14)**

According to village papers, 1979-80, the percentage of cultivated area to total geographical area of the district works out to 74.08 which is much higher than the State average of 42.38 per cent. The district has not fully exploited its irrigational potential as the percentage of irrigated area to total cultivable area is merely 6.14 per cent. Huzur tahsil is better placed in terms of land use for cultivation and irrigated area. The following table gives the cropping pattern of the district.

Table 7.1

Cropping pattern, 1980-81

Crop	Area in hectares	Percentage to total cropped area
1	2	3
Cereals		
Rice	1,716	1.08
Jowar	22,071	13.87
Maize	3,845	2.42
Wheat	68,426	43.01
Barley	9	0.01
Others	3	Nil
Pulses		
Gram	27,500	17.29
Tur	2,651	1.67
Others	7,049	4.43
Sugarcane	887	0.56
Condiment & spices	337	0.23
Fruits & Vegitables	959	0.60
Green fodder	43	0.03
Oilseeds	4,222	2.65
Fibre	129	0.08
Chari Crops	19,201	12.07
Others	10	0.01
Total	**159,094**	**100.00**

Wheat is the most important crop which alone accounts for 43.01 per cent of total cropped area, followed by gram with 17.29 per cent. With little of irrigation, the cultivation is mostly of dry-type.

The following table gives the growth, density and sex-ratio of urban population in the district.

Table 8

Growth, Density and sex-ratio of Urban Population in the District in relation to the State

	District						State					
Census year	Total Population	Urban Population	%Urban Population	Decadal Percentage variation in urban population	Density (Population per sq. km.)	Sex-ratio(No. of females per 1,000 males)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio(No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	235,665	102,333	43.42	+ 28.92	3,592	894	26,071,637	3,132,937	12.02	+33.16	2,034	907
1961	371,715	229,186	61.66	+123.96	2,405	773	32,372,408	4,627,234	14.29	+47.70	2,482	856
1971	572,169	392,641	68.62	+ 71.32	3,181	823	41,654,119	6,784,767	16.29	+46.63	2,378	868
1981	894,739	681,853	76.21	+ 73.66	2,388	870	52,178,844	10,586,459	20.29	+56.03	2,170	884

The district has a preponderance of urban population. The component of urban population of the district was 43.42 per cent in 1951 which has gone up to 76.21 per cent in 1981 while for the State as a whole it was 12.02 per cent in 1951 which has increased to 20.29 per cent in 1981. Thus there has been a tremendous growth of urban population in Bhopal district. The reason is not far to seek. Consequent upon the Reorganisation of States on linguistic basis, Bhopal was made the capital of the new State of Madhya Pradesh on 1st November, 1956 which resulted in a large influx of population in Bhopal

from the integrating units and later the establishment of Bharat Heavy Electricals Ltd. in the year 1959 has accelerated the growth of urban population. It is evident from the above figures that the decadal growth rate of 123.96 per cent during 1951–61 has been an all time high.

Density :

The density of population per sq. km. in urban area of the district has been fluctuating from census to census, though there has been successive increase of urban population. This is due to the variation in area figures of towns which is due to extension of municipal limits where by large chunk of inhabited area is added.

Sex-ratio :

The sex-ratio *ie* the number of females per 1000 males in urban areas of Bhopal district has always been lower than that of the State ever since 1951. The steep fall in the figures of sex-ratio in 1961 is mainly on account of large influx of male population due to the shifting of the Capital to Bhopal and also the establishment of BHEL. Due to paucity of residential accomodation the family members had to be left behind. Subsequently when the residential colonies came up, the family members followed and thereby subsequent decades show reduction in the sex imbalance. Urban areas generally exhibit low sex-ratio which being adverse to females. This trait is common throughout the country.

The following table gives the details of new towns/towns declassified in 1981 Census.

Table 9

New Towns/Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
1	2
(a) Added	—
(B) Declassified	—

No new town has been added in the district in 1981. As against 4 towns viz Bhopal, Bairagarh, Govindpura and Berasia in 1971 there are only two (Bhopal and Berasia) in 1981. Owing to the extention of municipal corporation limits of Bhopal, the two towns viz. Govindpura (HEL) and Bairagarh being contiguous got merged in it. Their identity as separate towns has lost because of their ceasing to be independent civic bodies.

The following table gives the per capita receipt and expenditure in towns.

Table 10

Per capita receipt and expenditure in towns

Class, Name and civic status of the towns	Per capita								
	Receipt			Expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and convenience	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV Berasia (M)	80.54	25.83	54.71	31.40	6.87	10.81	5.84	0.70	7.18
I Bhopal (M. Corp.)	53.42	11.32	42.10	38.91	7.78	8.78	1.99	0.17	20.19
Total District	**53.83**	**11.55**	**42.30**	**38.79**	**7.76**	**8.81**	**2.06**	**0.18**	**19.98**

The per capita receipt has been much higher than the per capita expenditure in both the towns. Berasia is a small and a growing town has a better financial standing which spends fairly adequate sum on public health conveniences, and on public works. It is for the civic authorities to aim at its planned growth rather than getting into a mess at a late stage. Bhopal has the distinction of being the capital of the largest State in the country. The civic authorities has a much greater responsibility in providing basic amenities in this fast growing city. Its expenditure on public welfare activities does not appear to be really encouraging. There is much to be desired.

The following table gives the number of schools per 1000 population in towns.

Table 11

Institutions per ten thousand population in towns

Class, Name and civic status of town	No. of Institutions per ten thousand population			
	Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior/ Middle	Primary
1	2	3	4	5
IV Berasia (M)	1.85	...	4.61	5.54
I Bhopal (M. Corp.)	0.77	...	3.07	6.20
District	**0.79**	...	**3.09**	**6.19**

In terms of number of institutions per 1000 population, Bhopal (MC) has a higher average of 6.19 in respect of Primary level institution while for Middle schools and Higher Secondary institutions, Berasia town occupies higher position with better averages. Higher average may not necessarily be an index of better situation. Bhopal city with lower average has a wider coverage because the institutions are relativey bigger in size and content and are more effective so far the spread of literacy is concerned.

The following table gives the member of beds in medical institutions in towns.

Table 12

No. of Beds in Medical institutions in Towns

Class, name and civic status of town	No. of beds in medical institutions per 1,000 population
1	2
IV Berasia (M)	1.48
I Bhopal (M Corp.)	2.85
Total : District	**2.83**

Bhopal being the district headquarters as well as the capital city possesses very big hospitals with better amenities but the number of beds per 1000 population is not adequate. The position in Berasia is still worse.

The following table is meant for showing the population of slum population in Class I & II towns but there is only one Class I town viz Bhopal of which the information has been furnished below.

Table 13

Proportion of Slums Population in Towns

Class, name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (per sq. km.)
1	2	3
I Bhopal (M.C.)	6.22	73,268

The brisk construction activity in Bhopal has attracted a large number of labourers from outside the city. The make-shift shelters of these labourers have led to proliferation of jhuggis in a number of vacant places in Bhopal. They have grown like mushrooms

and are of common sight every where. The density of population in these slums show a staggering figure of 73,268 persons per sq. km.

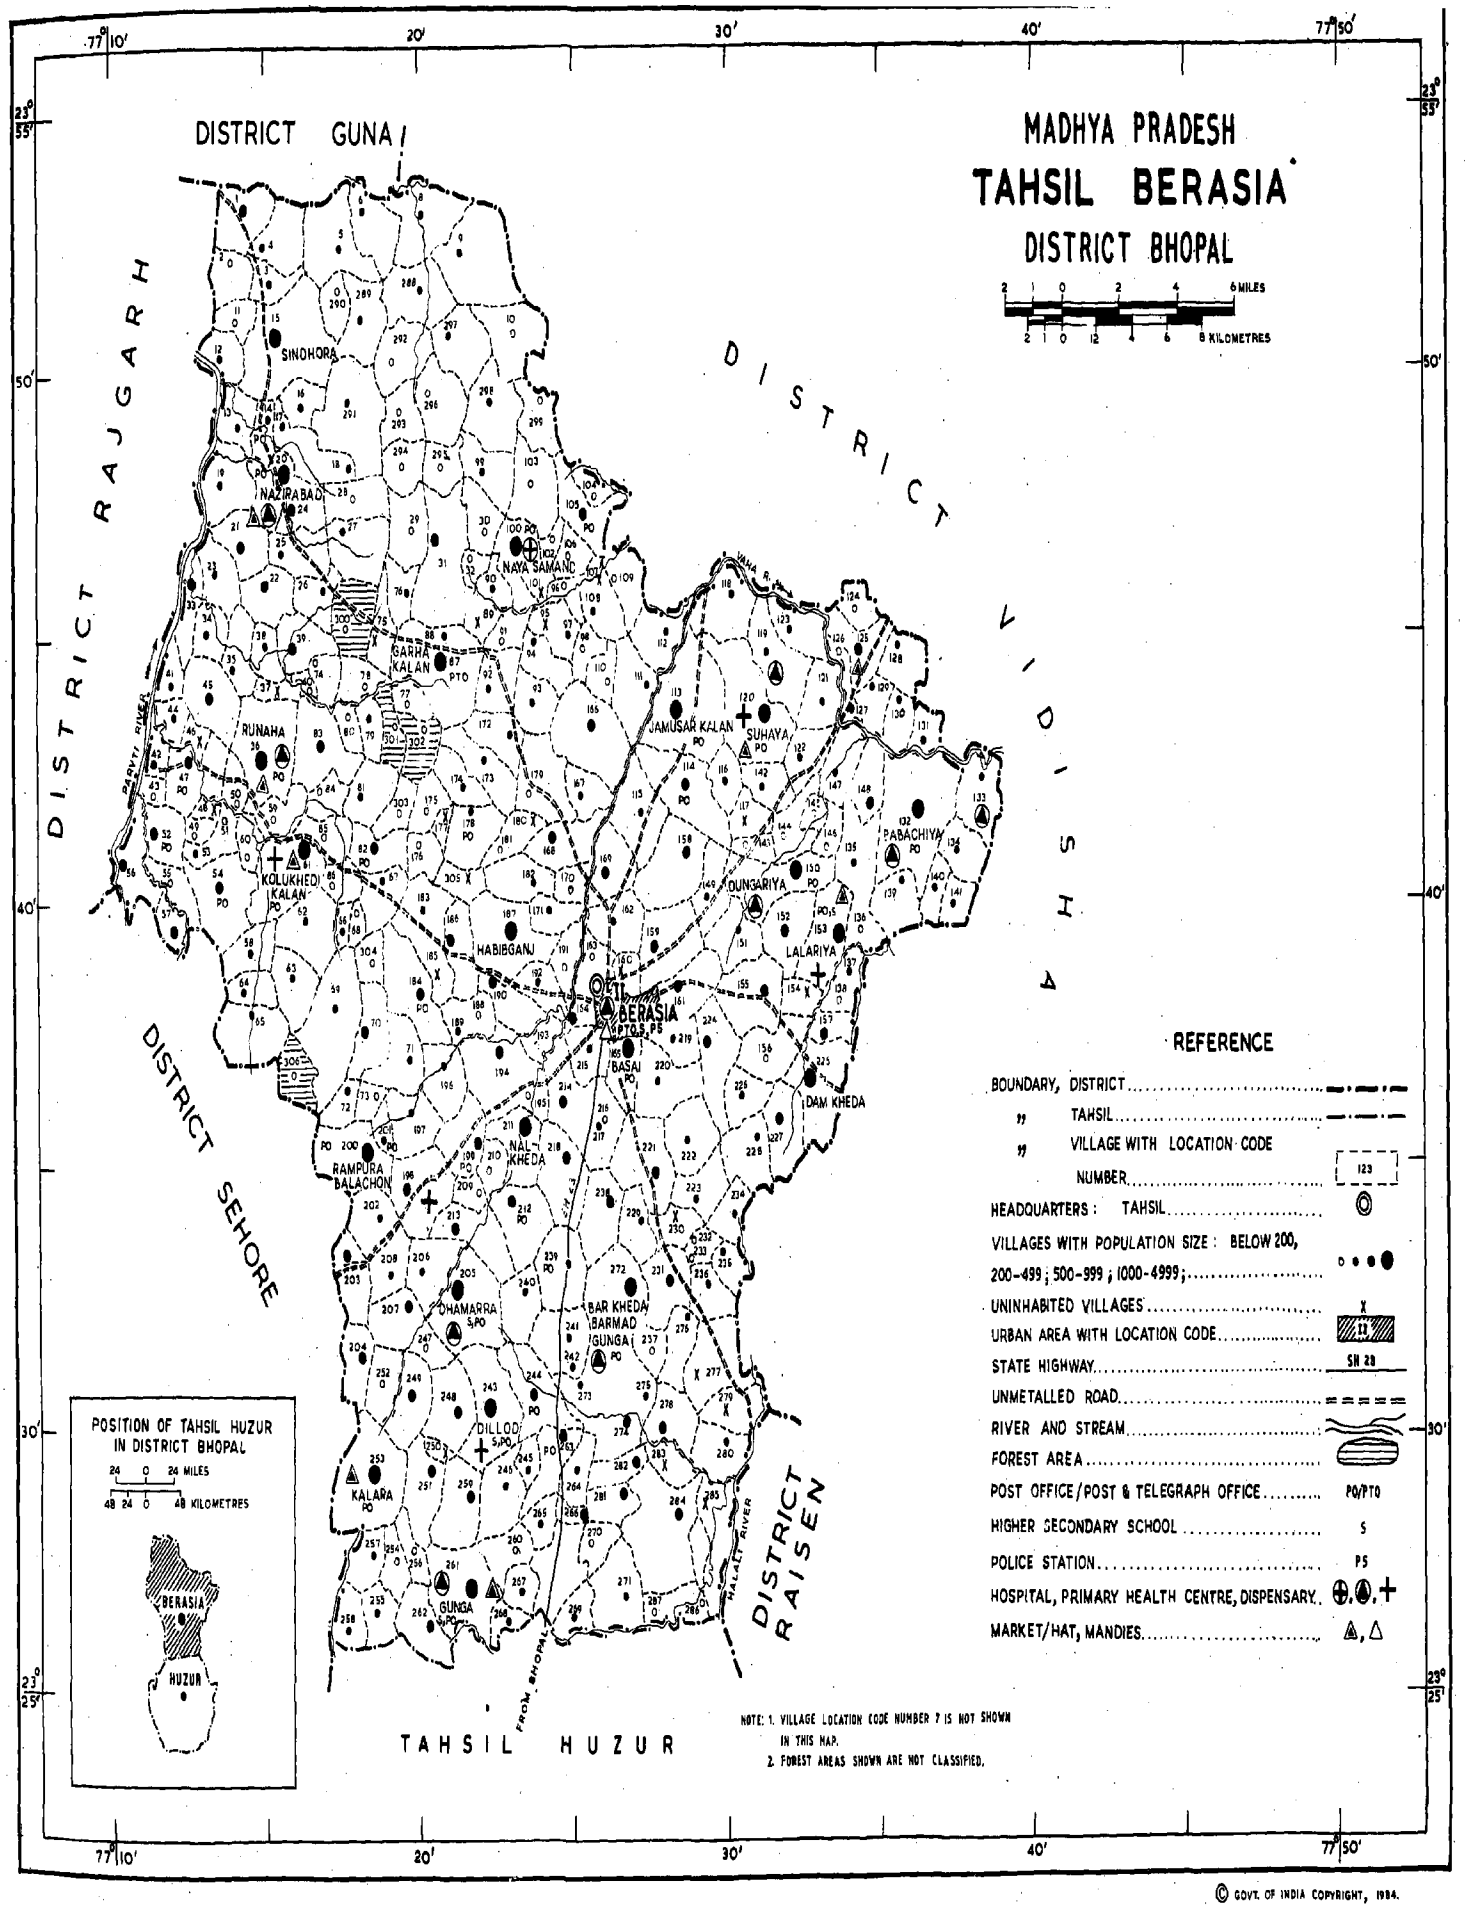

The following table gives the most important commodity manufactured, imported and exported in towns.

Table 14

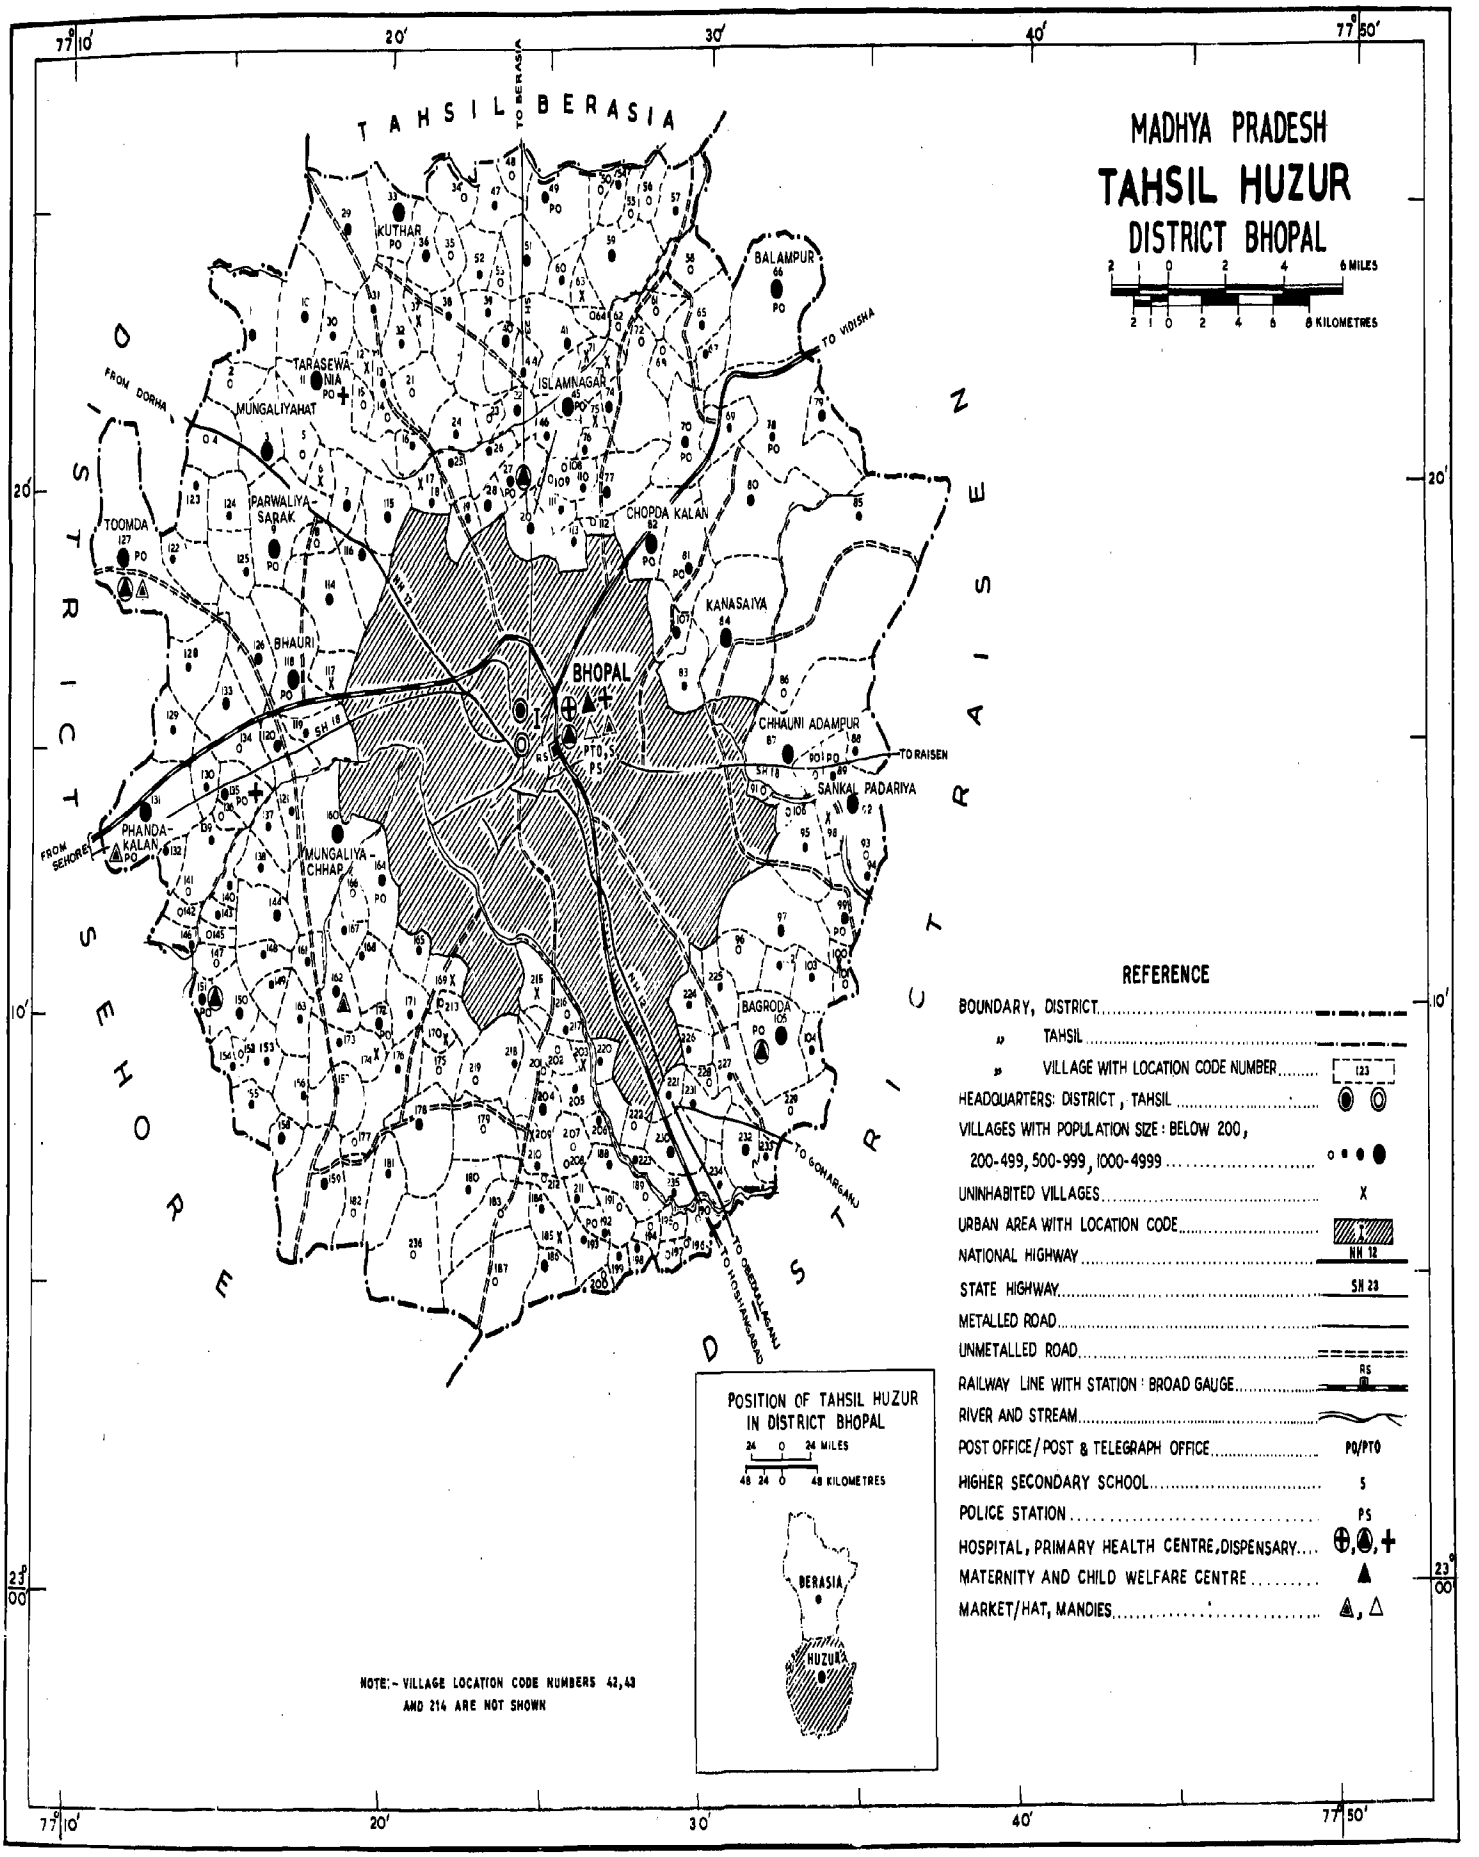

Most important commodity manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV Berasia (M)	...	Wheat	Sugar
I Bhopal	Heavy Electricals Equipments Sub-mersible Pump	Wheat	Fibre-glass

Berasia is just a small town with no industry and as such its score under manufacturing is nil Bhopal is having the Bharat Heavy Electricals Ltd. manufacturing mainly heavy equipments like transformers, turbines etc. which are exported outside, though not indicated in the above table. This may be because the bulk which counts. Bhopal district is in the wheat producing belt and therefore wheat forms an important commodity of export.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The Village Directory contains information about the name of village, total area of village, total population and the number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc This is further supplemented by information on copies of newspapers coming in the village, number of motor cycles/scooters/cars/jeeps and tractors available in the village.

Every village in a tahsil has been assigned a serial number which is the location code of the village to facilitate identification. Apart from the revenue villages, forest villages have also been listed. Villages that have been treated wholly or partly as urban outgrowths because of their being contiguous to an urban area have also been listed and a note indicating "included wholly or partly as urban outgrowth of such and such town" has also been given against each such village.

Information about the amenities available has been given in columns 5 to 10 of the Village Directory with the abbreviations used in different columns as indicated below :—

Where there are more than one institution of a type the number of such institutions has also been shown within brackets. If no facility or amenity is available within the village, a 'dash' is shown and next to it in brackets the distance in broad ranges viz., 5 km., 5-10 km. etc. of the nearest place where the facility/amenity is available has been indicated.

Column 5 : Educational facilities have been shown by adopting the following abbreviations :

P—Primary School

M—Junior Secondary or Middle School

H—Matriculation or Secondary School

PUC—Higher Secondary / Intermediate / pre-University/Junior College.

C—College (graduate level and above) lik Arts, Science, Commerce etc.

I—Industrial School

Tr.—Training School

AC—Adult literacy class/centre.

O—Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P (3), M (2), H (1) etc. occur these denote that the village has three primary, two middle and one Higher Secondary School

If there are composite school like Middle School with Primary classes or Higher Secondary school with Middle classes, these have been included in the number of Primary Schools and Middle schools as the case may be.

Columa 6 : Medical facilities have been shown by the use of the following abbreviations :

H—Hospital

MCW—Maternity and Child Welfare Centre

MH—Maternity Home

CWC—Child Welfare Centre

HC—Health Centre

PHC—Primary Health Centre

PHS—Primary Health Sub-Centre

D—Dispensary

FPC - Family Planning Centre

TB—TB Clinic

NH—Nursing Home

RP—Registered Private Practitioner.

SMP—Subsidised Medical Practitioner

CHW—Community Health Worker

O—Others

Column 7 : The tppes of the potable drinking water supply and the sources available in the village have been indicated by the following codes :

T—Tap Water

W—Well Water

TK—Tank Water

TW—Tubewell Water

HP—Hand Pump

R—River Water

F—Fountain

C—Canal

L—Lake

S—Spring

N—Nullah

O—Others

NA—Information not available

Column 8 : Post and telegraph facilities have been shown by adopting the following abbreviations :

PO—Post Office

TO—Telegraph Office

PTO -Post and Telegraph Office

Phone—Telephone connection

Column 10 : Communication facilites have been indicated by the following codes :

BS—Bus Stop

RS—Railway Station

NW—Navigable Waterway (including river, canal, backwaters, etc.)

Only public transport like Bus, rail and waterway have been considered for this purpose.

Column 11 : Approach to village- This refers to the State of road etc leading to the village. This has been indicated by the use of following codes

PR—Pucca Road

KR—Kaccha Road

FP—Foot Path

Column 12 : Nearest town and distance – The distance in km of the nearest town (whether located in the state or in another state) has been given in brackets under this column.

Column 13 : Power supply : For this purpose, the following codes have been used under this column

ED—Electricity for Domestic Purpose

EAg—Electricity for Agriculture

EO—Electricity for other purposes like industrial, commercial, etc.

EA—Electricity for all purposes listed abpve.

Column 15-19 : Land use : Break-up of area under different type of land use viz., forest, irrigated area, unirrigated area, culturable waste and area not available for cultivation has been furnished under columns 15-19.

(a) Forest – This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land.

(b) Irrigated and unirrigated (land use) -The two columns (cols. 16 and 17) cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of n t less than a year and more than five years These columns do not include gross area sown or gross cropped area.

(c) Culturable waste - It includes lands fit for

cultivation whether or not taken up for cultivation or once taken up for cultivation but not cultivated for more than 5 years. Grazing land and land under groves have been included under culturable waste but this dose not include 'orchards'. To be more precise culturable waste includes :

(a) Permanent pastures and other grazing lands.

(b) Land under miscellaneous trees, crops and groves.

(c) and cultivable lands not put to agriculture.

(d) Area not available for cultivation This column gives the area of barren and uncultivable lands and lands put to non-agricultural uses like village sites, roads, water, roeks and hills ete.

Column 20 : This is a remark column but it has been used to indicate some important information relating to the village. For example, if there is any famous religious, historical or archaeological place in the village it has been indicated in this column. Some useful information like number of copies of news-papers coming in the village, no. of motor cycles, scooters, jeeps, cars, tractors, etc,. are available in the village has been given. The abbreviations used to indicate the above information relating to the village are as below :

N— Copites of the news papers coming in the village

M— Motorcycles/scooters availbale in the village.

C— Cars/Jeeps available in the village.

T— Tractors available in the village.

In case there is 'Nil' information for a village a 'dash' has been shown.

Section II-Town Directory

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The details of statement presented in the Town Directory 1981 are given below :—

Statement I—Status and Growth History

This statement provides some basic data based on the Primary Census Abstract (PCA). In column 2 of the statement the class of the town has been indicated according to 1981 Census Population of the core town as follows :—

Population	Class
1,00,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

The Civic administration status of the town as in 1980 has been indicated. Where there is no civic body in the town it has been treated as Census Town. The following abbreviations have been used to denote the civic status of the town :—

Municipal Corporation	M Corp.
Municipal Committee/Municipality	MC
Cantonment Board	CB
Notified Area Committee	NAC
Gram Panchayat	GP
Special Area Development Authority	SADA
Cansus Town	CT

Column 5 : Area (Sq. Km.) as supplied by the local bodies.

Statement II-Physical aspects and Location of Towns.

This statement gives for each town, physical aspect and location of towns. In columns 6 to 12 the name or and road distance in Kms. shown within brackets, from the State headquarters; District headquarters; Tahsil headquarters, nearest city with population I lac and above, Railway Station; Bus route, Navigable river/Canal (if within 10 Km.) have been presented. If the name mentioned in these columns are the same as the referrent town itself the distance has been recorded as '0' (Zero). In case the railway station (Col. 10) or bus route (Col. 11) is not available in the referrent town, the name of nearest town where the facility is available with distanee in kms. from the referrent town has been presented. If navigable river/canal is passing within a distance of 10 Km. from the town the name of river/canal with distance has been presented in column 12. The abbreviation R and C stand for River and Canal respectively.

Statement III-Municipal Finance 1978-79

The data for this statement is collected from local administrative bodies and has been presented not only in respect of statutory bodies but also in respect of non-statutory bodies managing the civic administration of the town if they have separate budgets and accounts of thier own pertaining to the town.

Under column 12, the expendititure incurred by the civic authority on 'public safety' includes such items as firefighting service, rescue operations during floods and fairs, etc. Like wise, column 15 pertains includes expenditures incurred on maintanence of Schools, colleges and other institutions like public libraries, museum etc. The exact items covered, may however. vary from town to town, which would depend on the practice followed in this regard by each local authority.

Statement—IV Civic and other Amenities, 1979

The information given under. columns 2 to 6 are

new additions. Information under column 6 represents pucca and Kachha roads for which abbreviations used are PR and KR respectively. In column 7 the various types of sewerge/drainage systems have been presented as given below :-

Sewer	S
Open surface Drains	OSD
Box surface Drains	BSD
Sylk Drains	SD
Cesspool Method	CD
Pit System	PT

In Columns 8, 9 & 10 : Information collected from respective local bodies on different types of latrines has been presented. It includes public as well as private latrines.

In **Column 11**, the abbreviations used for the various prevailent methods of disposal of night soil are given below. Where more than one method is used, the information given upto two methods.

Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrine	ST
Sewerege	S

In **column 12 and 13** the sources of protected water supply and the system of storage with capacity therein within brackets have been presented with the following abbreviations. Where more than one Source or more than one system of storage exist, the information is restricted to tow major sources or systems.

Column 12

Tube well water/Hand pump	TW
Tap water	TA
Well Water	W
Tank Water	TK

Column 13

Overhead Tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell Pumping System	BWP
Pressure Tank	PT

In case of availability of fir-efighting service in a town 'Yes' has been indicated, otherwise the name of the nearest place where available and the distance in Km within brackets, have been shown.

Statement-IV (A) : Civic and other amenities in notified Slums-1979.

Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented.

Statement-V : Medical, Educational, Recreational and Cultural Facilities 1979.

In Columns 4 & 5, the information collected from the State Health Department has been presented. The institutions run by private doctors have not been included. The information is limited for those institutions as are run by or aided by Government/Semi Government/Local bodies and charitable institutions or social service agencies like the missionaries. Where the family planning centres are attached to hospital or maternity and child welfare centres or primary health centres, those have been treated as independent unit and presented separately. The maternity and child welfare centres, veneral disease clinic, chest clinic panel leprosy clinic have not been given separately. These have been indicated alongwith other medical institutions in column 4. The following abbreviations have been used.

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	PC
T. B. Clinic	TB
Nursing Home	NH
Others	O

If there are more than one institutions of any type the number of such institutions have been

indicated within brackets e. g. dispensaries (2) nursing homes (4) etc.

All types of hospitals/dispensaries etc. whether allopathic or ayurvedic or unani or homeopathic have been covered in column 4. These institutions have been indicated with the following abbreviations.

Ayurvedic	A
Unani	U
Homeopathic	Hom

In case of allopathic, no abbreviation is given

If no medical facility is available in the referrent town the name of the nearest town with distance thereof has been given. The information on number of beds has not been given as it was not provided by the authorities concerned. In Column 6 & 9, the information collected from the Educational Department has been presented with the following abbreviations.

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all categories Arts, Science and Commerce	ASC
Law	L

If there are more than one institutions of a type, the number has been against each in brackets.

Column 10—The Information has been collected from the Educations Department. Where the institutions are found to be located just beyond the boundaries of the town but near the referrent town and for all purpose are considered as belonging to the referrent town only, such marginal cases have been included in the town directory. If there are more than one institutions of such type the number has been given against each in breckets. The following abbreviations have been used :—

Shorthand	SH
Typewriting	Type
Shortnand & Typewriting	SH. Type
Others	O

The vocational institutions like Applied Art/ painting College, Pharmacy College, B.Ed. College Teacher's Training Institutions, Music / Dancing School, Nursing School, etc, have been covered under "Others". However the type of institutions included under 'Others' have been described in the introductory note.

Column 11 & 14- The information has been collected from the district Education Officers. The following abbreviations have been used :—

Primary	P
Junior Secondary or Middle School	M
Matriculation or Secondary	Such type of institution does not exit in Madhya Pradesh.
Higher Secondary/Intermediate/Pre-University/ Junior College / (10+2) System whether held in Schools or Colleges.	PUC

If there are composite schools like middle schools with Primary classes, or Higher Secondary Schools with Middle classes, these have been included in the number of Primary and Middle schools respectively. For example, if in a town, there are two primary schools and one middle school with primary classes, the number of primary schools in the town have been given as three and that of middle schools as one even though there may be only three educational institutions. This also applies in the case of higher secondary Schools.

If there are more institutions of a type in the town, these have been indicated with number within brackets against the abbreviations e.g. P(3), M(2), H(2), etc.

Column 15—The number of Adult literacy classes has been shown.

In an educational facility is not available in the town, the name of the nearest place where the facility is available, have been given with distance in Km from the referrent town.

Column 17-19—The information has been collected from the Excise Department and concerned local bodies. Touring Cinema talkies have not been taken into account. Community halls have been included in column (19).

Column 20—The information has been collected from Education Department and the local bodies who maintain public libraries and reading rooms and the following abbreviations have been used in presenting them.

Public Library	PL
Reading Room	RR

Statement VI—Trade, Commerce, Industry and Banking 1979.

The Statement depicts information relating to three most important commodities, imported, exported and manufactured. The commodities have been mentioned in order of volume. Besides, information relating to the number of banks,number of agricultural and non-agricultural socities also been furnished.
