INTRODUCTORY NOTE

1. History of District Census Handbook.

It has been customary to bring out vital statistics at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. Such information was, however, not brought out in 1901. Village Directories were prepared for all districts in 1911, but could be published only for thirteen due to the outbreak of the First World War. At the 1921 Census, these were published for all districts in the form of District Census Statistics. In 1931 villagewise statistics were compiled but could not be published owing to financial stringency, resulting in loss of valuable data. At the 1941 Census, restricted tabulation was undertaken in the wake of the Second World War, but the utility of Census statistics was recognised and these were published. The District Census Handbook in its present form was brought out at the 1951 Census, and was published alongwith another volume titled District Population Statistics. In 1961 Census, attempts were made to render the District Census Handbook more informative, as in addition to Census data pertaining to each village, data about its level of develoment and amenities were also collected. At the 1971 Census, efforts have been made to compile both Census and non-Census statistics at village/town level in a uniform manner with an enlarged scope.

As the District Census Handbook makes Census statistics available for the smaller territorial units, it is constantly referred to for several purposes of administration, demarcation of electoral constituencies, planning the development and so on. To ensure that these statistics are available to the users early, the District Census Handbook has been divided for being published separately into three parts :

Part A : Town and Village Directory

Part B : Village and Town-wise Primary Census Abstract

Part C : Analytical Report and Administrative Statement—District Census Tables.

2. Scope of District Census Handbook.

Part A of the Handbook comprises the Town and Village Directory. In village Directory, particulars of amenities in regard to Education, Medical, Power supply, drinking water supply, Post and telegraph and Communications have been given. Besides, it contains land-use statistics, days of weekly markets and places of religious, historical or archaeological interest in each village. The Town Directory comprising seven statements throws light on the status of the town, its origin, growth of population, functional category, location and physical aspects, Municipal finances, Civic and other amenities, Medical and Educational facilities and statistics pertaining to Trade, Commerce, Industry and Banking. Apart from these, it also gives the distribution of population of the town by Religion and Scheduled Castes/Scheduled Tribes.

Part B represents data down to village level for rural area and block level for towns. It contains the Primary Census Abstract which incorporates figures of area, number of occupied residential houses and households, total population and its break-up by sex,

scheduled caste and scheduled tribe, literate population, working population by nine-broad industrial categories of cultivators, agricultural labourers, workers engaged in forestry and livestock etc., in mining and quarrying, in manufacture or repair, in construction, in trade and commerce, in transport and communications and in other services as well as the non-working population.

Part C deals with the administrative statistics pertaining to the district in all field of development. The Census tables pertaining to language, religion, migration and economic activities are being reproduced in this part. A write up indicating changes in socio-economic and demographic characteristics of the district during the last decade is also being included in it.

3. Town Directory given in Part A presents data for all the Census towns of the district. There is no uniformly accepted definition of a town. The historical, political, cultural and administrative considerations are generally taken as criteria for rural-urban classification. An urban area, in contradistinction to the rural, comprises a large majority of inhabitants who are engaged in industrial and non-agricultural activities. In addition to its size, population and occupational characteristics, an urban area provides such facilities as transportation, banking, commercial and technical services, community facilities and other civic services. According to the State Government, all Municipal Corporations, Municipal Boards, Cantonment Boards, Notified Areas and Tow Areas are considered as town, and according to thier average annual income from their own resources, these have been classified into different classes of local bodies. The Criteria adopted under the Census Operations is slightly different from the State Government. In 1971 Census all places satisfying the following conditions have been treated as Towns :—

1. All Municipal Corporations, Municipal Boards, Cantonments & Notified Areas.
2. All localities though not in themselves local bodies but forming part of a city or town agglomeration.
3. Other places satisfying all the three undermentioned conditions :
   (i) Population exceeds 5,000.
   (ii) At last 75% of the male working population engages in non-agricultural pursuits, and
   (iii) The density of population exceeds 1,000 persons per sq. mile (386 persons per sq. km.).

The information given in the Town Directory relates to the year 1969. The data has been presented in the following seven statements :

(a) Statement I —This statement presents the population of the towns at the end of each decade from 1901 to 1971, the Civic status of the towns and their functional categories at 1961 and 1971, Censuses. The functional categories given in columns 14 and 15 have been determined on the basis of the predominant functional character of the town,

to derive which, the working population under the broad industrial categories has been regrouped into five broad functional classifications: —

(i) Primary Activities-Categories I, II, III, & IV
(ii) Industry-Categories V (a) V (b) and VI
(iii) Trade and Commerce-Category VII
(iv) Transport-Category VIII, and
(v) Services-Category IX

For each town, the percentage of workers under each of the aforesaid classes to total workers is worked out, and where the workers under one of the classes comprise 40% or more of the total workers, the town is taken as mono-functional. In other cases, the next predominant occupation is taken into account and if the total of the two comes to 60% or above, the town is designated as bi-functional. If the total does not yield 60%, the third predominant occupation is also taken and such a town is treated as multi-functional.

The notations used in column 5 of the statemnt are :

C—Municipal Corporation

M—Municipal Board

NAC—Notified Area Committee

TC—Town Area Committee

CB—Cantonment Board

If the village is un-inhabited or power is being used for agricultural purpose only, these characteristics have been indicated in the remarks column.

The land use statistics are constantly in demand for Agricultural production programme. These statistics have been given in columns 11 to 15 under the headings (i) Forest, (ii) Irrigated, (iii) Unirrigated, (iv) Cultivable waste and (v) Area not available for cultivation. In column 12, the irrigated area under different sources of irrigation has been separately given.
