# FOREWORD

THE State of Orissa represents 4·9 per cent of the area and 4·02 per cent of the population of India. Nature has been generous in providing the State with untold wealth in minerals, water, fertile land and forests. The rich alluvial soil in the deltaic areas as well as along the river basins, as also most of the uplands, are capable of producing a large variety of crops. The water-shed areas of the major rivers and hill tracts are covered with vast forests of great economic value. The State has roughly half the mineral wealth of India hidden underground awaiting exploitation. Vast quantities of water flow down the rivers which, fortunately for Orissa, are strategically dispersed over the entire State, and, if harnessed properly, will banish the twin spectre of floods and droughts haunting vast areas of culturable lands, and at the same time provide water for irrigating millions of acres in the coastal areas and upland and for generating large quantities of hydro-electric power for use in industry, and also make available hundreds of miles of irrigation-*cum*-navigation waterways for inland transport, and large areas for fish culture, recreation and tourism. These bounties of nature, the variety of picturesque landscapes and the long seacoast have attracted people from different parts of the country so that through the centuries a fine blend of human material and culture has developed. The ancient maritime achievements and the artistic stone edifices of great archaeological value stand out as symbols of the glorious past heritage.

The Census Operations during the past two decades have revealed many interesting statistical details. The Census Report of 1961 embodied in a number of Handbooks, each devoted to one of the 13 districts of the State, contains descriptive and statistical accounts intended to facilitate comprehensive study of conditions obtaining in a district as well as in the smallest village unit within it. I am happy to note that the plan and the scope of the Handbooks have been so designed as to make them useful books of reference.

The narrative account of each district covering geography, political history, population, education, economic activities, industries, agriculture and many other subjects, present a graphic picture of the district. This, along with the latest Census Tables, giving the social, economic, cultural and demographic data of the district, give an extensive array of statistical record.

A notable feature is the detailed statistics given in the Village Directory in the Handbook for each district, containing various items of information relating to each one of the 46,466 inhabited villages. They furnish very valuable information, which would provide indispensable material required by research scholars, anthropologists, social workers and people engaged in rural and regional planning.

Another feature of the District Handbooks is that they have been further enriched by inclusion of maps of the districts as well as maps of all the police stations in the district, giving location, boundary and survey and alignment of each village within a police station. Combination of the maps with the informative data will indeed be very useful and is commended as a utility publication of a high order.

I congratulate the Superintendent, Census Operations, Orissa, Shri M. Ahmed, I. A. S., and his colleagues, staff and others who have helped him in producing the Census Reports in the form of Handbooks through remarkable perseverance and zeal. These Census Reports will rank as outstanding works of public utility.

A. N. KHOSLA

*Governor of Orissa*

# PREFACE

AMONG the many gifts of the Census of India, one is the scheme of preparation and publication of the District Census Handbook which was first introduced in 1951. The Registrar General, India recommended to State Governments that the publication of the District Census Handbooks containing the Census data of 1951 for each district of the State be undertaken by them. In response, a number of States in India undertook the printing of the Handbooks relating to their respective districts at their own cost. In Orissa, however, the printing was not undertaken for reasons possibly of financial nature, but the Census Organization completed its task of preparing manuscript volumes of all the 13 districts of the State. Apprehending that the vast amount of labour and energy spent in the preparation of the complete set of Handbooks for the State would go to waste if printing was not undertaken, the Superintendent of Census Operations took resort to the alternative of cyclostyling about 100 copies of the Handbooks of each district, a measure which ultimately turned out to be no less burdensome than printing, in view of the great bulk of the volumes. These sets were distributed to the State Government, the Central Government and to important institutions and organizations. But it was found shortly afterwards that the demand from various sources was too large to be satisfied with the available number of cyclostyled sets. It was a mistake indeed not to have printed the books.

At the commencement of the Census of 1961, the Registrar General, India recommended to all the Chief Secretaries of State Governments in India in his letter No. 27/1/60-R. G., dated the 21st November 1960 that the State Governments take into consideration the great importance of the series of detailed statistics available up to the level of village for purpose of rural and regional planning, and agree to print at their own cost the District Census Handbooks of all the districts. The matter was given full consideration and ultimately the Revenue Department in their memo. No. VC—19/61-13593-R., dated the 13th March 1962 requested the Superintendent of Census Operations, Orissa, to arrange for preparation of the Handbooks and to send the manuscripts to the Orissa Government Press for printing in due course. The compilation of the present Handbook was undertaken by the Census Organization under the circumstances.

The Handbook as now presented is more elaborate than its counterpart in 1951. The main items of its contents were laid down in the scheme of the Registrar General with a view to ensure as far as possible uniformity of subject matter to be embodied in the Handbooks of all the States in India. According to the scheme, the Handbook is divided into 3 parts. Part I contains a Chapter, namely, 'Introducing the District', which is a descriptive account of the district relating to various aspects which a reader might feel inclined to look for before he enters into the vast array of statistics that follow. Subjects, such as, history, physical features, natural calamities, communication, public health, calendar of events and a multitude of others have been dealt with in a brief but comprehensive scale, relevant for a publication of this nature. Part II of the Handbook contains a series of statistical Tables relating to 1961 Census in their great variety and details. Part III contains many official statistics obtained from various Departments of Government. Names of the Departments furnishing the informations are mentioned at the bottom of the text.

A considerable portion of this Handbook could not have been compiled but for the co-operation and assistance of the State Government and the respective Departments. The Departments concerned extended their unfailing co-operation in furnishing whatever notes or informations were required from time to time. I wish to record my appreciation and thanks for all the co-operation thus received from the Departments of the State Governments, particularly from the State Gazetteer Section and the Statistical Units of the Directorates of Health, Public Instruction, Agriculture and Food Production as well as from the offices of the Chief Conservator of Forests, the Registrar of Co-operative Societies, the Director of Community Development and Panchayati Raj and the Regional Director of National Savings, Orissa. I am grateful to the Ministry of Defence, Government of India for having permitted the publication of the maps contained in this volume, and to the Registrar General, India for giving an outline of the scheme according to which the Handbook has been prepared and for giving general guidance from time to time.

I am glad to place on record my unstinted appreciation of the zeal and perseverance with which the officers of this organization contributed to the preparation of the Handbook. Many of the facts and figures embodied herein had to be built up with a great amount of diligence from raw materials, some of which were recovered by contact with the lower administrative units and some picked up and

screened from a mass of reports and annual returns lying unchecked with the top-most departmental authorities. This was entrusted to Shri Shivakinkar Das, Tabulation Officer, who completed the task with admirable resourcefulness. The compilation of the Tables in Part II entailed strenuous work on the Central Tabulation Branch of my office, headed by Shri V. Rajeshwar Rao, Deputy Superintendent, who took pains for their systematic collation and presentation. Shri Binoy Charan Mohanty, another Tabulation Officer of the Organization, was useful in examining economic, industrial and some similar aspects of the district. The text of the political history of the district has been contributed by Dr. N. K. Sahu, M. A., Ph. D., a reputed scholar on the history of Orissa. I am thankful to him for taking trouble to provide an authoritative and illuminating account of the district. Finally, I can visualize the amount of strain which will have to be undergone by the officer who may eventually remain in charge of proof reading and printing, when the stage comes. Without the sincere co-operation of all these officers and the staff under them, it would have been hardly possible to present the formidable array of statistics and many other materials of non-census and census origin which fill the pages of this volume within the scheduled time.

# PART I

## INTRODUCING THE DISTRICT

*Contains*

Notes on Location, Boundaries, Physical Features, History, Area and Population, Housing, Administration, Natural Calamities, Communications, Education, Literacy, Economic Activities, Industries, Agriculture, Irrigation, Animal Husbandry, Public Health, Community Development, Panchayati Raj, Co-operation, National Savings, Places of Interest and Calendar of Important Events.

# INTRODUCING THE DISTRICT—GANJAM

## LOCATION

Ganjam, one of the southern districts of Orissa lies between 18° 46′ N and 20° 17′ N latitudes and between 83° 48′ E and 85° 11′ E longitudes. It is bounded on the north by Baudh-Khondmals and Puri districts, in the south by Srikakulam district of Andhra Pradesh, in the west by Baudh-Khondmals and Koraput districts and in the east by Puri district and the Bay of Bengal.

## PHYSICAL FEATURES

### Plains and Table-land

The district divides itself easily into two broad divisions, the coastal plain areas in the east and the table-land in the west. The eastern and northern frontiers of the coastal plains consist of thick forests with well-grown *sal* trees. Towards the centre and the south it is hilly with beautiful well-watered valleys running towards the sea. The south-eastern portion is fertile and contains extensive multi-cropped areas, well served by many irrigation projects, both major and minor. The extreme south-east is occupied by a portion of the Chilka lake, its immediate vicinity being good for fishery and salt manufacture though not so good for cultivation. The table-land of the western sector of the district is a continuation of the great line of the Eastern Ghats, and is chiefly formed by two plateaus conspicuously featured by some of the highest mountains of Orissa. The northern plateau lies between the hill ranges of Baliguda in the north and R.Udayagiri in the south, covering over 1,000 sq. miles and containing hills ranging from 2,000 ft to 4,476 ft in height. The southern plateau which lies between R.Udayagiri and Parlakhemundi plains is higher in elevation and contains some of the noted mountains stretching eastwards from the boundary of Andhra Pradesh. The highest hills in this range are Singaraju Parbat (4,973 ft), Mahendragiri (4,923 ft) and Devagiri (4,534 ft). The two plateaus are the homeland of many tribes, the Konds predominating in the north and the Saoras in the south.

### Soil and Forests

The district has alluvial soil in its eastern part and laterite soil in the west, with small patches of black cotton soil at the centre and in the north-east close to the Chilka lake. Forests cover a total area of 1640 sq. miles. Northern tropical semi-evergreen forests are seen in Parlakhemundi area, but in Bhanjanagar the forests may be classified as northern tropical moist deciduous type. The important species found in these forests are *sal, asan* and *bija*.

### *Climate and Rainfall

The climate of the district is characterized by an equable temperature all through the year, particularly in the coastal regions and by high humidities. The cold season from December to February is followed by hot season from March to May. The period from June to September makes the south-west monsoon season. October and November constitute the post-monsoon transition period.

---

*Adapted from the notes of Deputy Director of Observatories (Climatology and Geophysics), India Meteorological Department, Poona.

May is the hottest month with the mean daily maximum temperature of 32·3°C (90·1°F) and the mean daily minimum temperature of 26·8°C (80·2°F). With the arrival of the monsoon by about the second week of June, day temperatures decrease to a small extent while night temperatures continue as they were in the summer. At the end of September when the south-west monsoon withdraws, temperatures decrease progressively, the drop in the night temperature being more rapid. December is the coldest month with the mean daily minimum temperature of 16·2°C (61·2°F) and the mean daily maximum temperature of 26·9°C (80·4°F).

The average annual rainfall in the district is 1295·6 mm (51″). The rainfall generally increases from the coast towards the interior hilly tracts of the district. R.Udayagiri, which is on the western border, has an annual rainfall of 1551·6 mm (61·09″) while Gopalpur on the coast gets nearly 1148·6 mm (45·22″). The south-west monsoon commences in the district by the second week of June and withdraws early in October. About 66 per cent of the annual rainfall is received during the south-west monsoon period. August is the rainiest month. The variation in the annual rainfall in the district from year to year is not large. On an average there are 65 rainy days in a year.

Relative humidities are high throughout the year specially in coastal areas. Winds are fairly strong particularly in coastal regions in summer and monsoon months. In the rest of the year the wind is generally moderate. Depressions and cyclonic storms originating in the Bay of Bengal in the pre-monsoon, monsoon and post-monsoon months cross the east coast causing heavy rain. Thunderstorms, sometimes violent, occur in the pre-monsoon months.

***Geology**

The geological formations in the district are alluvium, blown sand, laterites, gondwanas, cuddapah, newer dolerite and archaean comprising igneous metamorphic rocks and metamorphic rocks of sedimentary origin. The sedimentary archaean of the Eastern Ghats in Ganjam is highly metamorphosed, the chief rock type being khondalite. These khondalites form a very conspicuous feature of the geology of the district and occur as broad bands in the gneisses and charnockites and in places enclose intrusions of a massive granite. Next to khondalites, granitoid and garnetiferous are met with in a number of places. A large area in the district is covered with irregular deposits of laterites at various altitudes. The coastal tracts contain deposits of deltaic alluvium which contain older sediments occupying the higher ground and recent alluvium of clays and fine sands. Blown sands resulting in ridges of sand hills are found along the coast.

**Economic Minerals**

Among the economic minerals found in the district are noted the abrasives and grinding materials, building materials, clay, coal, iron-ore, limestone (kankar), manganese, monazite sand and talc. Garnetiferous granitic gneisses and charnockites are used for manufacture of grinding stones in the district, particularly in Chatrapur subdivision. Khondalites, quartzites, garnetiferous granitic gneisses and charnockite rocks provide building materials, of which the former two are quarried at many places in the district. White clay deposits occur in different areas of the district. Deposits of coal and iron-ore are rarely reported. Limestone so far investigated in Ganjam district is in the form of kankar found in the alluvium, which overlies all other formations. Manganese is found associated with garnet gneisses (khondalites) in many places. Black sand found along Ganjam coast consists of ilmenite, monazite, zircon and garnet. Talc occurs only in R. Udayagiri area.

---

*Adapted from the notes on Physiography and Geological antiquity of Ganjam District of Directorate of Mines, Orissa.

# HISTORY

The earliest historical relics in this district are the Rock Edicts of Asoka inscribed on a hill (then known as Khapingala Parbata) at Jaugada on the river Rishikulya. The Ganjam area was a part of ancient Kalinga which was occupied by Asoka after a fierce battle in 261 B. C. Close to the hill containing the Edicts was located the township of Samapa which was the second capital of Kalinga under Asoka and was the seat of administration of an Executive Officer called Rajavachanika. This area continued to be in the Maurya empire probably till the last Maurya king. In the first century B. C. Kharavela made Kalinga powerful and prosperous and led his invincible army in all directions of India. The Ganjam area came under the rule of the Satavahanas in the 2nd century A. D. The port of Palura which was probably the same as Dantapura developed during the early Christian centuries into an important emporium of trade and carried on commercial relations with different parts of Roman empire. Dantapura was the capital of king Guhasiva of Kalinga who was a worshipper of the Tooth relic of Buddha enshrined in that city. Guhasiva died fighting with Khiradhara, a neighbouring king who invaded Kalinga to take possession of the Tooth relic. But before his death he sent away the sacred Tooth in custody of his daughter Hemamala and son-in-law prince Dantakumara to the court of his friend Mahadisena, king of Ceylon. The sacred Tooth reached Ceylon about 310 A. D., in the 9th regnal year of king Sirimeghavanna, the son of Mahadisena.

In the middle of the 4th century A. D., Kalinga region was invaded by Samudragupta the king of Magadha. By that time this region comprised several petty principalities, viz., Kottura ruled by Swamidatta, Pistapura ruled by Mahendragiri, Erandapalla ruled by Damana, and Devarastra by Kuver. Out of these, Kottura of Swamidatta was, without doubt, in the territory comprising the present Ganjam district. During the post-Samudragupta period a new dynasty called Mathara came to power in Kalinga with their capital first at Sripura (Batia Sripura near Parlakhemundi) and then at Simhapura (modern Singupura). Under the rule of this dynasty the Ganjam region became very prosperous. The Matharas ruled up to 500 A. D., when the Eastern Gangas came to power and ruled over the territory comprising the southern part of Ganjam district and Srikakulam district of Andhra Pradesh. About 570 A. D., kings of Vigraha family became powerful in north Ganjam. But by the 7th century A. D., the Sailodbhava dynasty founded a new state called Kongodamandala comprising north of Ganjam district and southern part of Puri district. The Eastern Gangas and the Sailodbhavas ruled as contemporary powers for some time over southern and northern parts of Ganjam respectively. This region was by that time coveted by many famous monarchs of India, notable among them being Pulakesin II of south India, Harshavardhana of north India and Sasanka of east India. Harshavardhana was defeated by Pulakesin II whose brother Vishnuvardhana extended his authority over south Ganjam. The Sailodbhavas of north Ganjam were for some time under king Sasanka of Karnasubarna. Towards the end of the 7th century A. D., Tivara Deva of Kosala invaded Ganjam but was defeated by the Sailodbhava king Dharmaraja.

In the 8th century A. D., the Bhauma-Karas rose to power in Utkal with Viraja (modern Jajpur) as their capital. Kongoda then comprising the north Ganjam area became a feudatory state under the Bhauma-Karas. A new Ganga family founded a territory called Swetaka with Swetakapura (modern Chikiti) as headquarters and ruled as feudatory of the Bhauma-Karas. In the 9th century A.D., the Bhanjas of Baudh region were driven out by the Somavamsis and founded a kingdom comprising north-western part of Ganjam and western part of Puri district. They were also the feudatory of the Bhauma-Karas and ruled from their headquarters Vanjulvaka which is not properly identified. About the 10th century A. D., a new Bhanja house came to power in Russelkunda

region with Kolada-kataka as headquarters and this family continued to rule till 1835 when they were ousted by the British.

The Bhauma-Karas were supplanted by the Somavamsis in the 10th century A. D., and under them the Eastern Gangas of south Ganjam and Bhanjas of north Ganjam continued to rule as feudatories. In 1022 A. D., Rajendra Chola took possession of the major part of modern Ganjam district. The Eastern Ganga king Vajrahasta V became independent after the death of Rajendra Chola in 1040 A. D. His son Rajaraja became master of an extensive territory and defeated Karna Deva, the Somavamsi king of Utkal. The Gangas were, however, driven away by the army of the Pala king of Gauda. Rajaraja was succeeded by his son Chodaganga Deva who occupied Utkal in 1110 A. D., and organized an extensive empire from the Ganges to the Godavari. The present district of Ganjam remained as part of the empire of the later Gangas and after its fall in 1435 as part of the empire of the Suryavamsi Gajapati kings. During the rule of the Suryavamsis a number of feudal states were created in Ganjam region and many of these states continued till the British period. The major part of Ganjam was, however, organized as an administrative unit which continued to be so till the rule of the Moghuls. During the rule of the last Suryavamsi king Prataparudra Deva, Ganjam became a strategic area at the time of war between Orissa and Vijayanagar. Krishnadev Raya the monarch of Vijayanagar led a successful campaign up to Simhachalam near Vizagapatnam and Prataparudra had to cede part of his territory to the south of the Godavari to the victor. After the death of Prataparudra Deva (1540) Quli Qutb Shah of Golkunda extended his territory quite close to the present district of Ganjam. Orissa was occupied by the Muslims in 1568 when Mukunda Harichandan, the last independent king was killed in the battle. In 1571 Ibrahim Qutb Shah taking advantage of the chaotic condition of Orissa organized his authority over Chicacole Sircar which included the district of Ganjam south of the Rishikulya river. In 1687 the emperor Aurangzeb annexed the Qutb Shahi kingdom to Moghul empire. But soon after his death the affairs of the Deccan became chaotic and the Marhattas extended their power over Ganjam about the year 1740. By that time the English and the French entered into struggle for getting privileges in south India and the French with the help of Nawab Salabatjang got supremacy over the Northern Sircars including the Chicacole Sircar. In 1757 the French commander Bussy personally marched into Ganjam and realised the arrears of tribute from the feudal chiefs. The English, however, were ultimately successful in defeating the French in the Deccan and the latter had to abandon Ganjam in 1759. In 1765 the Northern Sircars were granted to the English by the Moghul emperor Shah Alam and the Firman was ratified by the Subedar of the Deccan. In 1787 the Circuit Committee investigated the revenue resources of the Ganjam district and submitted report on the 25th April, 1788 on which was based the Permanent Settlement effected in the district by Mr. Peter Cherry in 1804. The office of the Collector of Ganjam was established in 1794. Early in the 19th century Ganjam became a hot bed of political troubles as most of the Zamindars revolted against the British authorities. The disturbances in Ghumsur, Mohiri and Parlakhemundi became very serious since 1817. Orders were restored with great difficulty after military operation for a long period which ended in 1836.

In 1839 the hill areas of Ganjam and Vizagapatnam districts were excluded from the jurisdiction of the Civil Court and placed under the Agent to the Governor. In 1845 a Special Commissioner was appointed for suppression of *Meriah* sacrifices among the Khonds. In 1856 disturbances broke out among the Sabaras in Parlakhemundi headed by Radhakrishna Dandasena of Gaiba. The rebellion was put down in Parlakhemundi, but it extended towards Kalahandi and Phulbani through a veteran leader Chakrabisoi, who could not be suppressed by the British. During the second half of the 19th century the British rule was consolidated and Ganjam breathed an atmosphere of peace and order.

With the beginning of the 20th century, struggle for amalgamation of the Oriya tracts was keenly organized in Ganjam. Oriya had been recognized as official language in the district in the year 1896 and a definite move for amalgamation of Oriya speaking tracts started in the year 1902. The agitation in Ganjam culminated in the foundation of Utkal Union Conference in 1903, under the leadership of Mr. Madhusudan Das. As a result of the agitation the Phillip Duff Commission in 1922 and O'Donnel Commission in 1932 recommended amalgamation of major portion of the then Ganjam district with Orissa. On 1st April, 1936 when the separate province of Orissa was formed, the present district of Ganjam became a part of the new province.

## AREA AND POPULATION

### Area

Ganjam district, which is the fourth largest in the State, extends over an area of 4,725·0 square miles, according to the estimate of the local Revenue authorities. Neither the jurisdiction of the district nor the district boundaries have undergone any change during the decade 1951-61. The area of the district, according to the Surveyor General, India, stands at 4,824·0 square miles. The difference of 99 square miles cannot be reconciled as the Surveyor General does not maintain the record of areas of administrative units below the district level. The area of the small administrative units, as obtained from the local authorities, were added to find out the total area of the district, indicated above. This figure is adopted for the calculation of density and similar other purposes. The different methods of survey, followed by the Surveyor General, India and by the local authorities, may account for the difference in the two figures.

### Area of the lower units

For administrative convenience, the district is divided into four subdivisions, ten taluks and twenty two police stations. Large number of police stations are apportioned between different taluks, as will be evident from the Table A-I, which supplies the particulars of area, density, villages, towns, houses, households and sexwise distribution of population of each of the administrative units. The area of each subdivision, together with the number of taluks and the number of police stations contained in it, are given below :

| District/Subdivision | Area in Sq. miles | Area in Sq. Kms | No. of taluks | No. of police stations |
|---|---|---|---|---|
| Ganjam District | 4,725·0 | 12,237·8 | 10 | 22 |
| Chatrapur Subdivision | 827·0 | 2,142·0 | 2 | 5 |
| Berhampur Subdivision | 886·3 | 2,295·5 | 3 | 5 |
| Ghumusur Subdivision | 1,558·1 | 4,035·5 | 3 | 7 |
| Parlakhemundi Subdivision | 1,453·6 | 3,764·8 | 2 | 5 |

### Urban and Rural Areas

The urban area has increased from 18 square miles in 1951 to 23·4 square miles in 1961. The addition of four new towns during the decade has contributed to the increase in urban area of the district. The rural area has correspondingly declined from 4,707 square miles in 1951 to 4,701·6 square miles in 1961, comprising 4,264 villages in all. The respective areas of each subdivision, together with the number of towns and number of villages, are given below :

| District/Subdivision | Urban | | Rural | |
|---|---|---|---|---|
| | Area in Sq. miles | No. of towns | Area in Sq. miles | No. of villages |
| Ganjam District | 23·4 | 10 | 4,701·6 | 4,264 |
| Chatrapur Subdivision | 2·5 | 3 | 824·5 | 862 |
| Berhampur Subdivision | 9·7 | 2 | 876·6 | 1,011 |
| Ghumusur Subdivision | 9·8 | 4 | 1,548·3 | 1,013 |
| Parlakhemundi Subdivision | 1·4 | 1 | 1,452·2 | 1,378 |

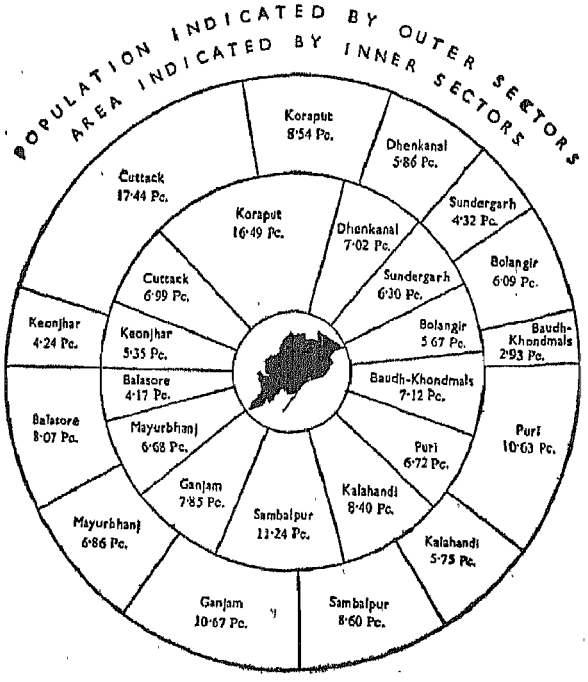

### Territorial changes

A new subdivision, known as Parlakhemundi, was created with Government Notification No. 1424-XIII-33/56-R, dated the 24th August 1956, comprising the areas in Parlakhemundi Taluk, R. Udayagiri Taluk and Mohana ex-Agency excluding Jerrow Merikote and Gourgotha Muthas. Digapahandy and Chikiti Taluks were newly formed in Berhampur subdivision in 1953, the former, comprising portions of Nuagam, Hinjili and Pattapur police stations and the latter, comprising portions of Nuagam, Jarada and Berhampur Taluk police stations. One hundred and fortyfour villages of Nalaghat out post and sixtynine villages of Bamunigam police station were merged with Mohana police station.

### Comparison with other districts

Ganjam district, which has 7·85 per cent of the State's area and 10·67 per cent of the State's population is ranked fourth and second respectively among all the districts. The following diagram shows the size and population of the district, compared with other districts :

PERCENTAGE OF POPULATION AND AREA OF DISTRICTS

### Towns

A town is a continuous group of houses inhabited usually by not less than 5,000 persons, which, having regard to the character of population, the relative density of dwelling, the importance of the place as a centre of trade, administration and human associations, the Census authorities decide to treat as a town for Census purposes. One important test with regard to the character of the population is that there must be a considerable preponderance of inhabitants dependent on non-agricultural professions as means of livelihood.

Four localities, namely, Hinjili, Bellaguntha, Gopalpur and Khallikote, have qualified to be declared as towns in accordance with the liberal interpretation of the above definition. Their inclusion has increased the total number of towns in the district to ten. The classification of the towns by population in 1961 Census, with variations from 1901, is given in Table A-IV of the General Population Tables. However, the towns with their class-sizes are given below :

| Class of town | Name of town | | Population | | |
|---|---|---|---|---|---|
| | | | Persons | Males | Females |
| II | Berhampur | ... | 76,931 | 39,890 | 37,041 |
| III | Parlakhemundi | ... | 22,708 | 11,477 | 11,231 |
| V | Bhanjanagar | ... | 9,952 | 5,231 | 4,721 |
| V | Aska | ... | 9,024 | 4,399 | 4,625 |
| V | Surada | ... | 8,703 | 4,496 | 4,207 |
| V | Hinjili | ... | 8,028 | 3,967 | 4,061 |
| V | Chatrapur | ... | 7,835 | 4,087 | 3,748 |
| V | Bellaguntha | ... | 5,762 | 2,809 | 2,953 |
| VI | Gopalpur | ... | 3,536 | 1,801 | 1,735 |
| VI | Khallikote | ... | 3,365 | 1,708 | 1,657 |

### Villages

A village means a revenue village or Mouza other than that which is absorbed within the area of a town or city. It may contain one or many groups of houses or hamlets, or on the other hand, may contain no house at all. The number of villages, which initially increased from 3,928 in 1941 to 4,513 in 1951, declined again to 3,773 in 1961. The

number varies from decade to decade due to various circumstances, such as, merger of small hamlets with big villages or emergence of big hamlets as independent villages. The number of uninhabited villages increased from 317 in 1951 to 491 in 1961.

The percentage of villages and the percentage of population living in them, by various population-sizes in 1951 and 1961, are given below along with the respective figures for the State for comparative study :

| Villages with population of | Census year | Ganjam | | Orissa | |
|---|---|---|---|---|---|
| | | Percentage of No. of villages to total No. of villages | Percentage of population to total population | Percentage of No. of villages to total No. of villages | Percentage of population to total population |
| Less than 500 ... | 1951 | 78·95 | 36·77 | 84·00 | 51·70 |
| | 1961 | 70·26 | 27·10 | 77·80 | 41·66 |
| 500—999 ... | 1951 | 13·69 | 29·09 | 12·09 | 28·69 |
| | 1961 | 17·57 | 27·33 | 15·78 | 30·30 |
| 1,000—1,999 ... | 1951 | 5·96 | 24·46 | 3·41 | 15·24 |
| | 1961 | 9·17 | 27·23 | 5·41 | 20·24 |
| 2,000—4,999 ... | 1951 | 1·40 | 9·68 | 0·49 | 4·25 |
| | 1961 | 2·89 | 16·99 | 0·97 | 7·25 |
| 5,000—9,999 ... | 1951 | — | — | 0·01 | 0·12 |
| | 1961 | 0·11 | 1·35 | 0·04 | 0·55 |

The percentage of small villages and the population living in them declined during the decade in conformity with the general downward trend noticed in the State. Although the percentage of medium villages with population of 500 to 999 increased from 13·69 in 1951 to 17·57 in 1961, the population living in them decreased below the level of 1951. The rise in the percentage of large-sized villages with population of 1,000—1,999, 2,000—4,999 and 5,000 and above, is perceptible, being much above the corresponding percentages of the State. Although the increase in the percentage of population living in villages of population-size 1,000—1,999 is not conspicuous, the spectacular increase in the percentage of the population living in villages with population of 2,000—4,999, and 5,000 and above pinpoints the growth of big villages during the decade in the district. The percentages are much higher than the State figures. The low percentage of population living in small villages with population of less than 500 and the high percentage of population living in big villages with population above 1,000 signify the developing characteristics of rural areas in the district.

**Density of Population**

The density of 396 persons per square mile is much above the State average of 292 persons per square mile. The density of 344 persons per square mile in 1951 was equally higher than the then State figure of 244 persons per square mile. The increase in the density is commensurate with the growth of population during the decade. The rural and urban densities are 365 and 6,660 persons per square mile respectively. Column 4 of the Table A-I gives the density of each administrative unit in the district. The density of each police station above or below that of the district as well as that of the State is given below along with the density of 1951 ;

| Police stations with density below that of the the State | | | Police stations with density above that of the State, but below that of the district | | | Police stations with density above that of the district | | |
|---|---|---|---|---|---|---|---|---|
| Name of PS | 1951 | 1961 | Name of PS | 1951 | 1961 | Name of PS | 1951 | 1961 |
| Ramagiri | 116 | 129 | Nuagam | 340 | 390 | Chatrapur | 524 | 593 |
| Jarada | 223 | 245 | Bhanjanagar | 310 | 353 | Rambha | 387 | 454 |
| Tarasingi | 238 | 272 | | | | Purushottampur | 1,152 | 1,316 |
| Buguda | 226 | 263 | | | | Hinjili | 650 | 762 |
| Surada | 207 | 240 | | | | Kodala | 388 | 480 |
| Bodogodo | 233 | 284 | | | | Berhampur Taluk | 1,067 | 1,219 |
| Mohana | 89 | 101 | | | | Pattapur | 471 | 547 |
| Serango | 192 | 211 | | | | Gangapur | 368 | 416 |
| R. Udayagiri | 126 | 132 | | | | Aska | 414 | 494 |
| | | | | | | Parlakhemundi | 577 | 634 |
| | | | | | | Berhampur Town | 7,232 | 8,945 |

The nine police stations in the first category which have recorded densities below the State average, are sparsely populated localities and five of them, namely, Ramagiri, Surada, Mohana, Serango and R.Udayagiri, constitute the agency portion of the district. Portions of the remaining police stations are also covered by forests. The two police stations in the second group which have densities exceeding that of the State, however, have densities below that of the district. The eleven police stations in the third category which are thickly populated, have contributed to the high density of the district exceeding that of the State.

**Growth of Population**

The statement below shows the growth of population of the district from decade to decade :

| Year | | Population | Percentage of variation |
|---|---|---|---|
| 1901 | ... | 1,141,963 | |
| 1911 | ... | 1,269,686 | +11·2 |
| 1921 | ... | 1,228,465 | — 3·2 |
| 1931 | ... | 1,391,069 | +13·2 |
| 1941 | ... | 1,560,669 | +12·2 |
| 1951 | ... | 1,624,829 | + 4·1 |
| 1961 | ... | 1,872,530 | +15·2 |

The district suffered from famine frequently during the second half of the 19th century and thereafter. The more serious famines are those that occurred in 1865-66, 1888-89, 1896-97, 1908-09 and 1919. The famine of 1865-66 affected chiefly the northern part of the district. Deaths from starvation were numerous and the total mortality during this famine was very large. In 1871, there was considerable failure of crop. In 1878, there was great distress caused by high price of grains in consequence of export to the famine striken parts of southern India. In 1888-89, another severe famine occurred, and great mortality resulted specially from cholera. The distress resulted by continued failure of crop as there was extremely deficient rainfall in every year between 1881 and 1888 except in the year 1886. Nearly six lakhs of rupees were spent on relief work. The next famine of considerable distress visited the district in 1896-97. The rainfall in 1896 was nearly half of the annual normal rainfall, resulting in failure of crops. But the people showed great strength of mind and powers of resistance in order to tide over the distress. The villagers did not care to work at the famine wages in the test works although many of them went long distances to do earth work for annas two per day only.

With all these natural calamities visiting the district again and again under which growth of population could not but be restricted, the district in its present territorial set up had a population of 1,141,963 in the Census of 1901 of which 1,002,421 belonged to Ganjam Plains and 139,542 to the Ganjam Agency.

The district then enjoyed a period of quick recovery, in spite of occasional adversities. There were unfavourable seasons for crops in the years 1905, 1906 and 1907 in the agency tracts of the district. The inadequacy of rains in the later part of 1907 caused total failure of crops throughout this tract. Except in 1910, none of the years of the decade had normal rainfall. In 1908-09, another famine occurred mostly affecting the agency tracts of Parlakhemundi Zamindary and Berhampur taluk. Between April and September 1908 severe distress was felt in 131 villages of Khonds and Savaras in Berhampur taluk and in the villages of Mohiri Khonds and Savaras in Parlakhemundi Agency taluk. The situation was met with gratuitous relief and test works. This famine, however, did not affect other parts of the agency area and also the plains. There was satisfactory growth of population during this decade and when the Census of 1911 came, the district gained by 127,723 over the population of 1901, namely, 20,306 in the agency and 107,417 in the plains of the district.

The decade 1911-21 was on the whole a period of unsatisfactory public health. There was excessive rainfall in the years 1914, 1915, 1917 and 1919 and very poor rainfall in 1911, 1918 and 1920. The grain outturn was poor in 1918 and reserve stocks of food became unusally low. This misfortune was not to come alone. The devastating epidemic of influenza broke out in July 1918, reaching its climax towards the last quarter of the year. The immediate effect was the excessive rise in the death rate to nearly double the normal level and the severe fall in the birth rate. The effect was most grievously felt in Ganjam Plains though the Agency was not altogether spared. But this was not the end of evil days. In 1919, came another famine, severely affecting Ghumusur, Kodala and Chatrapur taluks. The main reason for this famine was the general deficiency of rainfall in 1918 and particularly the complete failure of the north-east monsoon. The reserve stock of food was quickly depleted and prices rose sharply. Test and relief works were opened in Ghumusur, Khallikote and Athagarh and charitable relief given extensively in order to mitigate the distress. Bad public health during the decade and excess deaths caused by influenza and famine encouraged large scale emigration to Burma and other places. The result was a decrease of population by over 41,000 during the decade in the district, namely, 36,586 in the Plains and 4,635 in the Agency. The total population of the district stood at 1,228,465 in 1921.

During the decade 1921-30, the district quickly recovered from the after-effects of the great influenza epidemic of 1918 and the famine of the following year. Except for sporadic outbreaks of epidemics, general health during the decade continued to be good. The harvests were also plentiful. Towards the last year of the decade, there was a large number of returning emigrants from Burma coming to their homeland in this district on account of the anti-Indian riots in Rangoon in 1930. This fact attributed partly to the high increase of population in many taluks as seen in the Census of 1931. In this Census, the district gained by 13·2 per cent of population over what it had 10 years before.

During the next ten years from 1931 to 1940 the satisfactory rate of growth of population as noticed in the previous decade was practically maintained. There was general peace and prosperity during the decade although it was not completely free from natural calamities. The district was hit hard by the effect of a severe cyclone in 1933. In October 1938, another cyclone accompanied by heavy rain passed over the district and severely affected crops. Remission of rent was granted to agriculturists having an outturn of 4 annas or less. In the year 1940, there was heavy rain and high flood at the commencement of the cultivating season and the position was later saved partially by taking resort to transplantation. During the years 1934 and 1935, there was shortage of rainfall and harvest was poor. During the decade the villages round the Chilka lake became malarious and unhealthy and so also some of the villages nearby the sea coast. There were large number of deaths due to fever in most of the years of the decade. In 1937, 417 villages were affected by malaria and

73,000 cases were treated. The next year also was malarious and unhealthy for the district. In spite of these adverse circumstances, the district had good times otherwise, particularly because the general health was good. The district made an addition of 169,600 persons in the Census of 1941 which means a satisfactory growth of population.

The next 10 years from 1941 to 1950 were a period less favourable for the growth of population. Rainfall was deficient in most of the years, namely, 1941 1942, 1943, 1945, 1948 and 1950. Paddy crop was affected in 1941 in parts of Ghumusur, Aska, Berhampur and Chatrapur taluks on account of insufficient rainfall between September and November. This necessitated grant of remission of rent in deserving cases. In the year 1942, a severe cyclone passed over the district in November damaging crops, houses and cattle. Outturn of crop was poor and gratuitous relief was given. In the year 1943, the rains were irregular and brought no good crop. In 1944, on the other hand, the rainfall was heavy leading to submersion of crops and necessitating remission of rent. The same phenomenon was repeated in the year 1947. To add to the vicissitudes of the season, there was marked deterioration in public health during the decade. A severe outbreak of cholera in 1941 led to the high death rate of 2·6 per mille from this cause alone. Malaria was spreading fast, particularly in the coastal villages of the Chilka and the sea. Death rate from fever alone was 22·5 per mille in 1944. In 1945 also, the death rate was high from the same cause. Diarrhoea and dysentery were also responsible in keeping up mortality rate high particularly in the opening years of the decade. There was some improvement in public health, however, in the second half of the decade, but there was excessive rise in the number of emigrants to the Assam tea gardens during all the years of the decade.

The decade 1951-61 is a period of economic prosperity and planned development. A Major part of the entire district was covered by Community Development and National Extension Service Blocks. Improved techniques were adopted for higher yields in agriculture. Minor irrigation works on large scale were implemented. Public health improved considerably. Social Welfare schemes sponsored through the agency of National Extension Service Blocks received good response, and trade and commerce expanded. Thus the result of the multisided development activities and improved agricultural economy manifested themselves in the growth of population of the district to an extent of 15·24 per cent during the decade. The percentage increase of population in each of the police stations, is given below :

Increase

| Up to 9·9 per cent | | 10·0—19·9 per cent | | Above 20 per cent | |
|---|---|---|---|---|---|
| Name of PS | Percentage | Name of PS | Percentage | Name of PS | Percentage |
| Jarada | 9·78 | Chatrapur | 13·25 | Kodala | 23·66 |
| Serango | 9·88 | Rambha | 17·28 | Bodogodo | 22·08 |
| R. Udayagiri | 5·14 | Purushottampur | 14·26 | Berhampur Town | 23·40 |
| | | Hinjili | 17·28 | | |
| | | Berhampur Taluk | 14·26 | | |
| | | Ramagiri | 11·00 | | |
| | | Nuagam | 14·71 | | |
| | | Pattapur | 16·05 | | |
| | | Bhanjanagar | 14·17 | | |
| | | Tarasingi | 13·97 | | |
| | | Gangapur | 13·03 | | |
| | | Buguda | 16·79 | | |
| | | Surada | 15·69 | | |
| | | Mohana | 13·08 | | |
| | | Aska | 19·34 | | |
| | | Parlakhemundi | 10·02 | | |

While none of the police stations suffered adversely, three police stations mentioned in the first group had low increase of population, namely, below 10 per cent. Three other police stations in the third group had the highest growth, varying between 22 to 24 per cent and the remaining police stations in the other group had moderate growth between 10 and 20 per cent. In spite of increase of population in all the police stations, the moderate average growth of 15·24 per cent for the whole district is below the State average of 19·82 per cent. The population at the close of the decade 1961, stood at 1,872,530.

**Growth of Urban Population**

The following statement shows the growth of urban population from decade to decade :

| Year | Persons | Decade variation | Percentage decade variation | Males | Females |
|---|---|---|---|---|---|
| 1901 | 43,065 | ... | ... | 20,142 | 22,923 |
| 1911 | 60,780 | +17,715 | +41·14 | 29,205 | 31,575 |
| 1921 | 62,075 | + 1,295 | + 2·13 | 29,807 | 32,268 |
| 1931 | 69,585 | + 7,510 | +12·10 | 33,761 | 35,824 |
| 1941 | 90,165 | +20,580 | +29·58 | 45,099 | 45,066 |
| 1951 | 114,313 | +24,148 | +26·78 | 57,104 | 57,209 |
| 1961 | 155,844 | +41,531 | +36·33 | 79,865 | 75,979 |

Berhampur and Parlakhemundi were towns existing in 1901. The addition of two towns, namely, Bhanjanagar and Aska in 1911 contributed to the high growth of urban population, namely, 41·14 per cent during the next decade. The increase in the following two decades, 1921 and 1931, is not conspicuous as no new area was added. In 1941, Chatrapur and Surada were declared as towns which brought about an increase of 29·58 per cent of the urban population. The slight decline in the percentage of 1951 is offset by the substantial rise of 36·33 per cent in 1961 consequent to the declaration of four new towns, namely, Hinjili, Gopalpur, Khallikote and Bellaguntha. This district has the largest number of towns in the State now. The excess of females over males is observed from 1911 to 1931. The small decrease in the number of females in 1941 was again restored in 1951 when their number exceeded the males. But abrupt downward trend is noticed for the first time in 1961 when the urban sex ratio declined to 951 females per 1,000 males.

**Age**

In 1951 Census, the data as to age were tabulated on 10 per cent sample basis. But a departure has been made in the present Census by compiling the Tables on full count basis. The sexwise population according to the broad age-groups in the district, based on 1961 Census, is given below :

| Age-group | | Persons | Percentage of district population | Males | Percentage of district population | Females | Percentage of district population |
|---|---|---|---|---|---|---|---|
| All ages | ... | 1,872,530 | 100 | 899,329 | 48·0 | 973,201 | 52·0 |
| 0—14 | ... | 763,017 | 40·7 | 385,212 | 20·6 | 377,805 | 20·1 |
| 15—34 | ... | 577,798 | 30·9 | 269,862 | 14·4 | 307,936 | 16·5 |
| 35—59 | ... | 415,785 | 22·2 | 193,921 | 10·3 | 221,864 | 11·9 |
| 60+ | ... | 114,471 | 6·1 | 49,503 | 2·6 | 64,968 | 3·5 |
| Age not stated | ... | 1,459 | 0·1 | 831 | 0·1 | 628 | N |

N=Negligible

Children below 14 years constitute 40·7 per cent of the total population, while persons in the working age-groups of 15—34 and 35—59 are 53·1 per cent. Persons above sixty years are 6·1 per cent, while 0·1 per cent could not state their age. Although there is no marked sex disparity in the age-groups, the percentage of females is higher than the males in the age-groups 15—34, 35—59 and 60+.

**Sex**

The sex ratio of the district from 1901 to 1961 is traced below, along with that of the State, for comparison :

| Year | | Ganjam | | | Orissa | | |
|---|---|---|---|---|---|---|---|
| | | Total | Rural | Urban | Total | Rural | Urban |
| 1901 | ... | 1,119 | 1,119 | 1,138 | 1,037 | 1,039 | 967 |
| 1911 | ... | 1,159 | 1,163 | 1,081 | 1,056 | 1,058 | 947 |
| 1921 | ... | 1,223 | 1,231 | 1,083 | 1,086 | 1,089 | 963 |
| 1931 | ... | 1,191 | 1,198 | 1,061 | 1,067 | 1,071 | 924 |
| 1941 | ... | 1,169 | 1,180 | 999 | 1,053 | 1,058 | 914 |
| 1951 | ... | 1,113 | 1,122 | 1,002 | 1,022 | 1,029 | 881 |
| 1961 | ... | 1,082 | 1,095 | 951 | 1,001 | 1,015 | 807 |

The quick rise in the sex-ratio from 1,119 females per 1,000 males in 1901 to 1,223 females in 1921 disappeared from 1931, when the ratio manifested the downward trend. The decline from decade to decade is perceptible from 1931 to 1961. The sex ratio of 1,082 females per 1,000 males in 1961 is much above the corresponding figure for the State. Similar trend is observed in the rural areas. The sex-ratio for urban areas, however, manifest a broadly consistent pattern of decline althrough, with slight disturbances in two decades ending with 1921 and 1951. The precipitant fall in the sex-ratio of females per one thousand males in the decade ending with 1961 was occasioned due to the growth of male population. However, this ratio is much higher than the State figure.

**Marital Status**

The marital status of all persons in the district by their broad age-groups is given in Table C-II of the Cultural Tables. Their proportion per 1,000 persons of each sex to general population compared with the previous Censuses of 1941 and 1951 is shown below :

| Marital status | Males | | | Females | | |
|---|---|---|---|---|---|---|
| | 1961 | 1951 | 1941 | 1961 | 1951 | 1941 |
| Never married | 509 | 482 | 486 | 383 | 379 | 350 |
| Married | 464 | 483 | 484 | 476 | 433 | 488 |
| Widowed | 24 | 35 | 30 | 137 | 188 | 162 |
| Divorced/Separated | 2 | NA | NA | 3 | NA | NA |
| Unspecified | 1 | NA | NA | 1 | NA | NA |

NA—Not Available

The proportion of unmarried males and females has increased from 486 in 1941 to 509 in 1961 and from 350 in 1941 to 383 in 1961 respectively. Corresponding decline in the number of married persons of both sexes is evident from the figures in the above statement. The decrease in the proportion of widowed persons of both the sexes is conspicuous in 1961 compared with the figures of 1941. The distribution of 1,000 married persons by age-groups in each sex, compared with the previous Censuses of 1951 and 1941, is furnished in the statement below :

| Age-group | Males | | | Females | | |
|---|---|---|---|---|---|---|
| | 1961 | 1951 | 1941 | 1961 | 1951 | 1941 |
| 0—14 | 28 | 58 | 40 | 59 | 127 | 105 |
| 15—34 | 443 | 444 | 447 | 594 | 535 | 592 |
| 35—54 | 386 | 366 | 397 | 298 | 284 | 268 |
| 55 and above | 142 | 125 | 116 | 49 | 50 | 35 |
| Age not stated | 1 | 7 | ... | N | 4 | ... |

N=Negligible

Although the proportion of married persons of both the sexes in the age-group, 0—14, is comparatively less than the previous decades, the existence of child marriages in the district is established with the above figures. Age-group, 15—34, which has the highest proportion of both the sexes in all the decades, shows negligible decline in the pro-

of females. While the proportion of males in the age-group, 35—54, decreased compared to 1941, the proportion of females has increased from decade to decade. In the age-group, 55 and above, the decennial rise in the proportion of males is conspicuous, while the proportion of females during 1951 and 1961 is more or less constant.

**Religion**

The distribution of population by religion is given in Table C-VII of the Cultural Tables. The distribution of 1,000 persons in all the principal religions of the district from 1941 to 1961 is shown below :

| | | 1961 | 1951 | 1941 |
|---|---|---|---|---|
| Hindus | ... | 988 | 990 | 985 |
| Muslims | ... | 3 | 3 | 3 |
| Christians | ... | 9 | 7 | 12 |

The decline in the proportion of Hindus below that of 1951 is negligible, while the proportion of Muslims has remained constant in all the decades. Hindus have either gained or lost numerically from decade to decade at the expense, or in favour of Christians only. However, small increase in the proportion of Christians is noticed in 1961 compared to 1951.

**Migration**

The movement of population within the district, from one district to another within the State and beyond the State or country are necessitated by economic reasons or social ties. 'Place of birth' indicates the extent of migration, as will be evident from the following figures of the district. The percentages (to the persons, males and females) are shown in brackets below the absolute figures :

| Birth Place | | Persons | Males | Females |
|---|---|---|---|---|
| Persons born at place of enumeration | ... | 1,339,007 (71·5%) | 791,481 (88·0%) | 547,526 (56·3%) |
| Persons born elsewhere in the district of enumeration | ... | 487,143 (26·0%) | 85,542 (9·5%) | 401,601 (41·3%) |
| Persons born in other districts of the State | ... | 18,425 (1·0%) | 8,994 (1·0%) | 9,431 (1·0%) |
| Born in other States of India | ... | 26,190 (1·4%) | 12,251 (1·4%) | 13,939 (1·4%) |
| Born in countries outside India | ... | 448 (N) | 236 (N) | 212 (N) |
| Unclassifiable | ... | 1,317 (0·1%) | 825 (0·1%) | 492 (N) |
| Total | ... | 1,872,530 | 899,329 | 973,201 |

N=Negligible

It would appear from the above statement that 71·5 per cent are born at the place of enumeration. 88·0 per cent of the males and 56·3 per cent of the females are enumerated at their birth places, which suggests that the female migrants constituting 43·7 per cent are much higher than their male counterparts, who constitute only 12·0 per cent. The above analysis discloses that 26·0 per cent of the migrants are born in the district, 1·0 per cent are born outside the district but within the State and 1·4 per cent outside the State. 41·3 per cent of the female-migrants are born inside the district, which establishes that their movement from one village to another or from one police station to another is necessitated by their marriage, while economic pursuits play less significant role. 9·5 per cent of the male migrants, who are born in the district, are inclusive of those born in the parental residence of their mothers. There is no variation in the percentage of the males and females coming from outside the district and from outside the State, which indicates that they have moved with their families in pursuit of economic activities.

Although migration has had considerable effect on the growth of population during the decade, none of the police stations in the district recorded high percentage of growth above 25 per cent. As all the police stations have moderate growth below 25 per cent, the influence of migration does not appear to be spectacular necessitating further probe.

Duration of residence usually determines the purpose of migration. The following statement shows the period of residence of all migrants in the district :

| Duration of residence | Born elsewhere in the district of enumeration | | Born outside the district but within the State of enumeration | | Born outside the State but within the country | | Born outside the country | |
|---|---|---|---|---|---|---|---|---|
| | Males | Females | Males | Females | Males | Females | Males | Females |
| Less than 1 year ... | 9,285 | 13,624 | 2,015 | 829 | 1,076 | 700 | 10 | 13 |
| 1— 5 years ... | 25,556 | 70,583 | 2,588 | 2,222 | 2,510 | 2,491 | 54 | 24 |
| 6—10 years ... | 12,808 | 60,602 | 1,135 | 1,452 | 2,418 | 1,842 | 26 | 60 |
| 11—15 years ... | 8,573 | 52,795 | 915 | 1,142 | 2,328 | 1,992 | 44 | 9 |
| 16 years and over ... | 26,478 | 198,241 | 2,234 | 3,629 | 3,727 | 6,388 | 95 | 102 |
| Period not stated ... | 2,842 | 5,756 | 107 | 157 | 192 | 526 | 7 | 4 |

The 'Unclassifiables' are omitted from the above statement due to their insignificant number. 44,394 males and 264,298 females have lived for more than a decade and may have to be regarded as semi-permanent or permanent migrants. 16,387 males and 63,956 females have stayed for periods varying between 6—10 years. While majority of the males are to be deemed as job migrants, majority of the females have moved consequent to their marriage, besides some economic activities. 30,708 males and 75,320 females have lived for periods between 1—5 years and 12,386 males and 15,166 females for less than a year. The males, with short periods of residence, include birth migrants (those born in the parental residence of their mothers), students for educational purposes, while a small number might be job migrants. Majority of the females with short periods of residence have the common reason of marriage, while a small number might be participating in economic activities. Although marriage is the chief motive of female migration, their participation in economic activities cannot be ignored as will be evident from the vocational classification of both sexes.

The industrial classification of the migrants is given below :

| | Industrial category | Born elsewhere in the district of enumeration | | Born in other districts of the State | | Born outside the State | |
|---|---|---|---|---|---|---|---|
| | | Males | Females | Males | Females | Males | Females |
| I | As Cultivator ... | 24,197 | 108,043 | 444 | 1,990 | 873 | 2,331 |
| II | As Agricultural Labourer ... | 6,616 | 60,828 | 122 | 462 | 341 | 1,469 |
| III | In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ... | 1,955 | 3,185 | 104 | 23 | 459 | 58 |
| IV | At Household Industry ... | 5,016 | 16,662 | 678 | 431 | 1,126 | 450 |
| V | In Manufacturing other than Household Industry ... | 996 | 1,389 | 234 | 85 | 228 | 56 |
| VI | In Construction ... | 327 | 14 | 138 | ... | 128 | ... |
| VII | In Trade and Commerce ... | 3,881 | 3,762 | 512 | 175 | 1,245 | 215 |
| VIII | In Transport, Storage and Communications ... | 620 | 37 | 75 | ... | 436 | 6 |
| IX | In Other Services ... | 15,116 | 36,331 | 3,137 | 1,178 | 4,605 | 2,105 |
| | NON-WORKERS ... | 26,818 | 171,350 | 3,550 | 5,087 | 2,810 | 7,249 |

Migrants outside the country are not included in the above statement as they constitute a small fraction. Although the non-working females are more than the males, the female participation in economic activities of all the industrial categories is commendable. The preponderance of the female migrants born in the district of enumeration in all the industrial categories, except VI, VII and VIII, establishes their participation in economic activities along with their male counterparts. The female migrants born outside the district predominate the industrial categories I and II only.

The following statement shows the extent of in-migration and out-migration from the selected States in order of their numerical importance :

| State | Immigration | | Emigration | |
|---|---|---|---|---|
| | Males | Females | Males | Females |
| Andhra Pradesh | 7,068 | 12,986 | 5,340 | 10,956 |
| Madras | 1,034 | 107 | Not available | |
| West Bengal | 896 | 446 | Not available | |
| Madhya Pradesh | 676 | 56 | Not available | |
| Bihar | 622 | 102 | 2,361 | 840 |
| Uttar Pradesh | 509 | 12 | Not available | |
| Maharashtra | 466 | 26 | Not available | |
| Kerala | 332 | ... | Not available | |
| Punjab | 255 | 7 | 89 | 16 |
| Assam | 207 | 154 | 7,649 | 5,493 |

The immigrants from the adjoining State of Andhra Pradesh constitute the largest number, in both sexes. The predominance of the females amongst them might be on account of marriage. The emigrants to Andhra Pradesh, in both the sexes, are equally large, which indicates that the borders are frequently crossed and re-crossed on account of social ties besides economic pursuits. The small number of immigrants from each of the remaining States might have been motivated by economic reasons, and some of them have moved with their families, which accounts for the low figures of the females. Employment in tea gardens is mainly responsible for the large number of emigrants, in both the sexes, to Assam, while the large scale industries in Bihar have also absorbed a good number of emigrants from the district. As the information regarding emigrants is not available in respect of many other States, it is not possible to arrive at the net migration.

**Scheduled Tribes**

A person is said to belong to a Scheduled Tribe, if he belongs to any one of the tribes specified in the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. There is no clear indication of the criterion for specifying Scheduled Tribes, but it appears that while so specifying the following aspects were taken into consideration, namely, (i) tribal origin, (ii) primitive way of life and habitation in remote and less accessible areas and (iii) general backwardness. 62 tribes are notified as Scheduled for the State, of whom 24 are found in the district. As the list of tribes changed from Census to Census, the variation of their population from decade to decade is not a pure index of the growth or otherwise of tribal population. In 1951 Census, there were only 42 tribes in the State. According to the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, one tribe, namely, Gorait was omitted from the 1951 list and 21 new tribes were added. These new tribes are Bhottada or Dhotada, Bhumia, Bhunjia, Bhumij, Desua-Bhumij, Dharua, Didayi, Gandia, Holva, Kandha Gauda, Kol, Kotia, Lodha, Madia, Matya, Omanatya, Parenga, Pentia, Rajuar, Shabar or Lodha and Sounti. The inclusion of these new tribes has contributed to the increase of the tribal population during 1951-61.

The tribal population of the district increased from 112,006 in 1951 to 188,001 in 1961. The sex composition and the percentage to total population of the district in both the Censuses are given below :

| | Tribal population of the district | Percentage to total population | Males | Females |
|---|---|---|---|---|
| 1951 | 112,006 | 6·9 | 52,890 | 59,116 |
| 1961 | 188,001 | 10·0 | 92,319 | 95,682 |

The percentage to total population has increased by 3·1 during the decade. The aforesaid phenomenal growth of the Scheduled Tribes can be attributed to the addition of new tribes. The sex-ratio declined from 1,118 females per 1,000 males in 1951 to 1,036 females in 1961.

Eight tribes which are numerically important in the district are given below :

| Names of Tribes | Persons | Males | Females |
|---|---|---|---|
| Kharia or Kharian ... | 252 | 135 | 117 |
| Khond, Kond or Kandha, including Nanguli Kandha and Sitha Kandha ... | 53,317 | 26,056 | 27,261 |
| Koya ... | 711 | 355 | 356 |
| Matya ... | 386 | 188 | 198 |
| Munda, Munda-Lohara or Munda-Mahalis ... | 723 | 328 | 395 |
| Saora, Savar, Saura or Sahara | 96,128 | 47,185 | 48,943 |
| Shabar or Lodha ... | 34,916 | 17,217 | 17,699 |
| Sounti ... | 350 | 158 | 192 |
| Total | 186,783 | 91,622 | 95,161 |

The above tribes together constitute 99·4 per cent of the total tribal population. Matya, Shabar or Lodha and Sounti are the new tribes added in 1961, which contributed to the spectacular increase of tribal population.

The industrial classification of the tribal population in the district is given below :

| | Industrial category | Males | Females |
|---|---|---|---|
| | *Workers* | | |
| I | As Cultivator ... | 45,957 | 35,982 |
| II | As Agricultural Labourer ... | 5,030 | 5,482 |
| III | In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ... | 1,553 | 1,406 |
| IV | At Household Industry ... | 1,469 | 2,185 |
| V | In Manufacturing other than Household Industry ... | 58 | 106 |
| VI | In Construction ... | 16 | ... |
| VII | In Trade and Commerce ... | 357 | 290 |
| VIII | In Transport, Storage and Communications ... | 74 | 1 |
| IX | In Other Services ... | 5,200 | 6,849 |
| | *Non-workers* ... | 32,605 | 43,381 |

Majority of tribal workers, in both the sexes, are engaged in agricultural occupations and other services. The industrial classification for each tribe is given in Table SCT-I Part B.

The non-workers constitute 35·3 per cent of the males and 45·3 per cent of the females. Their classification is given below :

| Classification | Males | Females |
|---|---|---|
| Total non-workers ... | 32,605 | 43,381 |
| Full-time students ... | 4,883 | 1,553 |
| Persons seeking employment for the first time ... | 28 | ... |
| Persons employed before but now out of employment and seeking work ... | 7 | ... |
| Others ... | 27,687 | 41,828 |

While the number of persons seeking employment are practically negligible, the number of full-time students is conspicuously low compared to the total non-workers. Majority of the males and females appear to have been engaged in household duties.

The marital status of the tribal population is indicated below :

| Marital status | Age-groups | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | 0—14 | | 15—44 | | 45+ | | Age not stated | |
| | Males | Females | Males | Females | Males | Females | Males | Females |
| Never married | 35,867 | 37,741 | 10,907 | 5,627 | 126 | 115 | 38 | 20 |
| Married | 302 | 766 | 29,919 | 35,050 | 10,817 | 5,543 | 11 | 18 |
| Widowed | 14 | 8 | 1,356 | 3,436 | 2,652 | 7,069 | 1 | 1 |
| Divorced/Separated | 3 | 1 | 179 | 176 | 79 | 60 | ... | 1 |
| Unspecified | 13 | 2 | 12 | 40 | 14 | 8 | 9 | ... |

Separate information for each tribe is given in Table SCT-II, Part B. The proportion of married persons, in both the sexes, is the highest in the age-group, 15—44, while the maximum number of widowed persons are found in the age-group, 45+. The small number of married persons in the age-group, 0—14, confirms the prevalence still of child marriages, in spite of social reforms aimed at eradicating it completely.

**Scheduled Castes**

A person is said to belong to a Scheduled Caste, if he belongs to any one of the castes specified in the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. 93 castes are notified as Scheduled for the State in the said Order, of whom 51 castes are found in the district. As in the case of Scheduled Tribes, no definite test appears to have been applied to the specification of Scheduled Castes. However, it seems that originally the prevailing notion of untouchability, though now abolished and forbidden under Article 17 of the Constitution, was the guiding factor in drawing up the list of untouchables or depressed classes, who are more or less equivalent to the present day Scheduled Castes. The castes having professions which involve physical handling of dirty and putrefying matter and other so-called unclean jobs, such as, skinning and tanning of hides, sweeping of streets, scavenging, etc., were grouped under this class of backward population. The objective was to confine the list to the section of population which, on account of its traditional position in the society, suffered from various religious and social disabilities, such as, prohibition from entry into temples, or drawing water from the village wells or admission of their children into village schools. It was recognized that the criterion of classification of such backward population should gradually change from religious or social considerations to those of the degree of backwardness in economic and educational spheres.

As the lists of Scheduled Castes changed from Census to Census, the growth of Scheduled Caste population cannot be strictly compared. There were 92 Scheduled Castes at the time of 1951 Census. By the time 1961 Census took place, the list had been revised by the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. Seven castes, namely, Bhumij, Desua Bhumij, Dharua, Gunju or Ganju, Kumbhar, Pradhan and Sukuli from the 1951 List were omitted; two castes, namely, Mochi or Muchi and Satnami were merged with Chamar; and ten castes, namely, Bhoi, Chakali, Chandhai Maru, Gorait or Korait, Kummari, Musahar, Namasudra, Sauntia (Santia), Tanla and Ujia were added to the list. The periodic alteration of the list has rendered difficult the calculation of the growth of the relevant population.

The Scheduled Caste population of the district has increased from 302,736 in 1951 to 308,298 in 1961. The sex-composition and percentage to total population of the district are shown below :

| | Scheduled Caste population of the district | Percentage to total population | Males | Females |
|---|---|---|---|---|
| 1951 | 302,736 | 18·6 | 146,872 | 155,864 |
| 1961 | 308,298 | 16·5 | 147,949 | 160,349 |

The percentage to total population has slightly declined compared to that of 1951. The meagre growth of 1·8 per cent during the decade may be due to the changes in the list of Scheduled Castes. The sex-ratio has increased from 1,061 females to 1,000 males in 1951 to 1,084 females in 1961, which indicates that the growth of females is more marked than that of males.

Eleven castes, which are numerically important in the district, are listed below, along with their sexwise distribution :

| Names of Castes | | Persons | Males | Females |
|---|---|---|---|---|
| Adi Andhra | ... | 5,142 | 2,737 | 2,405 |
| Bauri | ... | 62,308 | 29,698 | 32,610 |
| Dandasi | ... | 46,029 | 21,887 | 24,142 |
| Dewar | ... | 8,815 | 4,236 | 4,579 |
| Dhoba or Dhobi | ... | 53,353 | 25,562 | 27,791 |
| Dom, Dombo or Duria Dom | ... | 5,077 | 2,490 | 2,587 |
| Haddi, Hadi or Hari | ... | 19,236 | 9,389 | 9,847 |
| Kandra or Kandara | ... | 4,507 | 2,162 | 2,345 |
| Khadala | ... | 25,208 | 11,502 | 13,706 |
| Pan or Pano | ... | 40,174 | 19,607 | 20,567 |
| Sauntia (Santia) | ... | 14,453 | 7,189 | 7,264 |
| | Total | 284,302 | 136,459 | 147,843 |

The above castes constitute 92·2 per cent of the total Scheduled Caste population. As the caste-wise population for the previous Censuses are not available, it is not possible to indicate the increase or decrease of a particular caste during the decade.

The classification of the Scheduled Castes into nine industrial categories of workers and non-workers is given below :

| | Industrial category | | Males | Females |
|---|---|---|---|---|
| | *Workers* | | | |
| I | As Cultivator | ... | 28,567 | 18,574 |
| II | As Agricultural Labourer | ... | 20,131 | 22,710 |
| III | In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities | ... | 5,676 | 3,172 |
| IV | At Household Industry | ... | 5,824 | 7,823 |
| V | In Manufacturing other than Household Industry | ... | 783 | 563 |
| VI | In Construction | ... | 175 | 36 |
| VII | In Trade and Commerce | ... | 2,319 | 2,784 |
| VIII | In Transport, Storage and Communications | ... | 1,256 | 60 |
| IX | In Other Services | ... | 24,109 | 27,526 |
| | *Unwholesome Work* | | | |
| | Tanning and currying of hides and skins | ... | 497 | 104 |
| | Scavenging | ... | 382 | 1,287 |
| | *Non-workers* | ... | 59,109 | 77,101 |

Majority of the workers, in both the sexes, are engaged in agricultural occupations and other services. Good number of workers, in both the sexes, are also found in industrial categories III, IV and VII. The industrial classification of each caste is given in Table SCT-I, Part A separately for Rural and Urban areas. Number of persons engaged in unwholesome work is also shown above.

The non-workers constitute 39·9 per cent of the males and 48·1 per cent of the females. Their broad classification is given below :

| Classification | | Males | Females |
|---|---|---|---|
| Total non-workers | ... | 59,109 | 77,101 |
| Full-time students | ... | 10,520 | 3,032 |
| Persons seeking employment for the first time | ... | 153 | 9 |
| Persons employed before but now out of employment and seeking work | ... | 45 | ... |
| Others | ... | 48,391 | 74,060 |

Persons seeking employment are very few, while the number of full-time students is exceedingly

low. Majority of the non-workers, in both the sexes, appears to be devoted to household duties.

The marital status of the Scheduled Caste population, by their broad age-groups, is indicated below :

| Marital status | Age-groups | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | 0—14 | | 15—44 | | 45+ | | Age not stated | |
| | Males | Females | Males | Females | Males | Females | Males | Females |
| Never married | 59,255 | 57,704 | 13,643 | 4,710 | 169 | 160 | 131 | 3 |
| Married | 1,573 | 2,747 | 46,104 | 60,783 | 21,718 | 14,147 | 355 | 9 |
| Widowed | 170 | 21 | 1,261 | 5,590 | 2,592 | 13,570 | 82 | 1 |
| Divorced/Separated | 129 | 5 | 287 | 476 | 212 | 287 | 12 | ... |
| Unspecified | 140 | 8 | 37 | 97 | 78 | 31 | 1 | ... |

The number of married persons in the age-group, 15—44, is the highest, in both sexes, while large number of widowed persons are found in the age-group 45+. The small number of married persons in the age-group 0—14 indicates the existence of child marriage in spite of all efforts to root out this evil practice. Details for each individual caste are given in Table SCT-II Part A.

**Language**

Out of 58 languages returned as mother-tongue in the State, 23 languages are spoken in the district. The number of speakers of each language, sexwise, is given in Table C-V of the Cultural Tables. However, the distribution of 1,000 persons by mother-tongue, compared with that for the State, is given in the following statement, in respect of all the languages spoken in the district.

The people speaking Oriya as their mother-tongue form the largest group of all. Their number far exceeds the numbers in all other languages put together. This preponderance is exhibited in both rural and urban areas of the district, that in the former being more pronounced. However, the percentages of Oriya speakers in the district, in each of the total, rural and urban areas, are appreciably less than the State averages. This relative loss of preponderance of Oriya has been in favour of Telugu, which claims the next largest number of speakers of all, in the district. The district averages of the latter language are much less than those of the State. The phenomenon is explainable with long association of the district with the area now forming Andhra Pradesh, both having formed parts of Madras Presidency for long. The tribal languages, namely, Savara, Kui and Khond or Kondh have small proportions comparable with the State figures. The number of speakers of the remaining languages is negligible.

| Language | Ganjam | | | Orissa | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |

N=Negligible

# HOUSING

## Housing Census

For the first time in India, a housing census was conducted during 1960 to take stock of all existing structures, residential and non-residential houses. Various useful information, such as, roof and wall materials, tenure status, number of rooms per houeshold, number of persons per room, and in case of factories and workshops, some essential data like line of production, number of employees, and kind of fuel or power used, in addition, were collected during this count. The total number of houses recorded in this housing census in the district is 511,314, of which 47,385 were vacant at the time of house-listing. The following Table indicates the distribution of various types of houses :

| | Census houses | |
|---|---|---|
| | Number | Percentage to total number of Census houses |
| Total number of Census houses ... | 511,314 | 100·00 |
| Census houses vacant at the time of house-listing ... | 47,385 | 9·27 |

| Others ... | 52,782 | 10·32 |

By far, the majority of houses, as in other parts of the State, is the dwelling house. Workshop-cum-dwellings constitute the second largest group and the least number is that of restaurants, sweetmeat shops and eating places.

It is recorded that only 29·9 per cent of houses in urban areas are hired out on rent whereas as much as 70·1 per cent are occupied by their owners. The general ratio is followed in the rural areas, where the percentage of rented houses is still less being only 2·8 per cent, the balance being under occupation of the owners.

## Density of dwellings

Out of 367,668 dwellings in the district, 340,322 are in rural areas and 27,346 in towns. In every 100 square miles of area in the district, we thus come across 7,781 dwellings. The density of dwellings per 100 square miles, for rural and urban areas of the district, are 7,238 and 116,863 respectively.

## Materials of walls and roofs

Majority of houses have mud walls and thatched roofs. Walls of mud are found in 64·9 per cent of houses in the rural areas, whereas houses with brick walls form the highest number in the urban areas constituting 46·1 per cent of total houses. Only 14·7 per cent of total houses in the rural areas have brick walls.

Similarly, roofs made of corrugated iron, zinc or other metal sheets, asbestos sheets, bricks and lime and concrete are seen on about 3·4 per cent of houses in the rural areas, but they can be found on nearly 16·0 per cent of houses in the towns. Thatched roofs or those with grass, leaves, reeds, wood or bamboo cover nearly 93·1 per cent of houses in the rural areas. In urban areas also, the percentage of houses with such roofs is great, being 62·6 per cent of total houses. Among other varieties of roofings, tiles, slate and shingle are used in about 3·5 per cent of houses in rural areas. Percentage of such houses is, however, greater in towns, being 21·4.

**Number of rooms and persons residing per room**

One-roomed houses form the majority in the district and they constitute 39·7 per cent of total houses. About 35·6 per cent of the houses have two rooms. The remaining are houses with 3 rooms and more. The number of persons inhabiting a room works out to 2·30 in the rural areas and 2·08 in urban areas. In rural and urban areas, generally 2·30 and 2·08 persons reside per room against the district and State averages of 2·28 and 2·08 persons respectively.

## ADMINISTRATION

District Ganjam was transferred from Madras Presidency to Orissa, when the latter province was created in 1936. Khondmals subdivision, which was a part of Angul district till March 1936, was joined with Ganjam district from 1-4-1936. Later, when the feudatory states merged with Orissa on 1-1-48, necessitating reconstitution of districts, Khondmals was detached from Ganjam and added to the district styled Baudh-Khondmals. From 1-1-1948 to 1-4-1949, the district of Ganjam had the same shape as it had when transferred from Madras. But with effect from 1-4-1949, Baliguda subdivision was detached from the district of Ganjam and added to the district of Baudh-Khondmals for sake of administrative convenience. The present district of Ganjam consists of four subdivisions, namely, Chatrapur, Berhampur, Parlakhemundi and Ghumusur. The headquarters of the district is at Chatrapur. The subdivisions are in charge of Subdivisional Officers, who are more commonly known as Revenue Divisional Officers. They belong to O. A. S., class II, though at times Junior I. A. S. officers are posted to some of these stations. The headquarters of the subdivisions are at Chatrapur, Berhampur, Parlakhemundi and Bhanjanagar.

A District Magistrate and Collector who also functions as the Agent to the State Government for agency area, usually an officer belonging to the cadre of I. A. S., is in charge of the general administration of the district. He also looks after civil supplies management, treasury and developmental schemes within the district. An Additional District Magistrate belonging to Class I of Orissa Administrative Service assists him. At the district headquarters, officers from Orissa Administrative Service Class II and Subordinate Administrative Service are in immediate charge of various subjects. The sanctioned strength of such officers at the district headquarters is 6 and 4 respectively. The administrative officers are vested with the powers of a Magistrate in first, second or third class, according to their experience. Below the subdivisions are taluks. The police stations are the lowest administrative units. There are 10 taluks and 22 police stations in the district. Separation of judiciary from the executive having been given effect to, the judicial functions of the Magistrates in the matter of criminal cases, have been taken over by Judicial Magistrates, who are under the administrative control of the District and Sessions Judge, Ganjam-Baudh Judgeship. An Additional District Magistrate (Judicial) posted at Berhampur helps the District and Sessions Judge in this work. There are *11 Judicial Magistrates in the district and they are posted at Aska, Berhampur, Chatrapur, Bhanjanagar, Digapahandy, Kodala and Surada. The sanctioned **strength of Executive Magistrates in the four subdivisions of the district is as follows :

| Subdivisions | No. of Deputy Collectors and Deputy Magistrates (O. A. S.) | No. of Sub-Deputy Collectors and Sub-Deputy Magistrates (O. S. A. S.) |
|---|---|---|
| Chatrapur | 1 | 5 |
| Berhampur | 3 | 3 |
| Parlakhemundi | 2 | 2 |
| Ghumusur | 2 | 5 |

* Letter No. 8200 dated 24-12-63 from the High Court, Orissa

** Government of Orissa, Revenue and Excise Departments Resolution No. 29459-III ER-75/64 R dated 8-5-64

The Revenue Divisional Commissioner, Southern Division, who holds his office at Berhampur, has jurisdiction over Ganjam as also the districts of Koraput, Kalahandi and Baudh-Khondmals.

**Police**

The smallest unit of police administration is a Thana, i. e. a police station, and it is in charge of a Sub-Inspector of Police. There are in addition to the officer-in-charge, other Sub-Inspectors, Assistant Sub-Inspectors and Constables according to the necessity in each police station. The Thanas are grouped into circles, each of which is under an Inspector who supervises over the working of the police stations in his circle. Above him and at the head of the district police administration is a Superintendent of Police belonging to the Indian Police Service. During 1960, there were an Additional Superintendent of Police and 3 Deputy Superintendents to help him in the administration. There is an Armed Police Reserve at Chatrapur, the district headquarters town, under a Sergeant-Major. The total strength of the police-force under the control of the Superintendent of Police in 1960 was 1,092. This works out at one policeman to every 4·33 square miles, and one to every 1,715 of the population. The expenditure on police in the district during 1960 was Rs. 12,43,718 and the cost of police per capita of population works out to Rs. 0·66 Paise. The strength of district police-force during the years, 1951, 1956 and 1960 are given in a Table in Part III.

The Deputy Inspector General of Police, Southern Range, who has jurisdiction over Ganjam, Koraput, Baudh-Khondmals and Kalahandi districts has his headquarters at Berhampur in this district. The strength of executive staff under him is given in a Table in Part III of this Handbook.

***Crimes and criminal justice**

Criminal justice is administered by the Sessions Judge and Assistant Session Judge, all of whom are stationed at Berhampur, the chief town of the district. After separation of judiciary from executive, trial of criminal cases is now conducted by the Judicial Magistrates, who have powers of first second or third class magistrates under Criminal Procedure Code. The number of criminal cases reported during the past decade to different courts in the district, cases tried, persons acquitted, discharged or committed are given in a Table in Part III. Majority of the crimes committed was theft, the second highest number being burglary. Of such crimes as dacoity, robbery and murder, the highest number was that of murder. During the decade, 1951-60, the criminal offences reported to the courts number 96,966, which give an average of 9,696 cases per year.

****Judiciary**

For administration of civil justice, the district forms a part of Ganjam-Baudh Judgeship and is under the District and Sessions Judge, who is stationed at Berhampur. There are also 3 Subordinate Judges, and 3 Munsifs at Berhampur. Aska and Parlakhemundi, two other towns of the district, have one Munsif each. The District Judge and the Sub-Judges try civil suits of any pecuniary limit, whereas the powers of a Munsif is limited to Rs. 4,000/-.

**Parliamentary and Assembly constituencies**

The district has been delimited into 2 Parliamentary constituencies and 16 Assembly constituencies under the Delimitation of Parliamentary and Assembly Constituencies Order, 1961. One of the Parliamentary constituencies is reserved for a Scheduled Caste candidate. Out of the Assembly constituencies, one is reserved for Scheduled Tribes, and 3 for Scheduled Castes. The last general elections for the Parliament were held in the year 1962 and those for the State Assembly, in 1961.

---

* Notes on crimes based on Table 6.2 of Quarterly bulletin of statistics, June, 1961, issued by the Bureau of Economics and Statistics, Orissa

** Based on letter No. 8200/XXIX-1/63 dated 24th December, 1963 from the High Court, Orissa

***Treasury**

The District treasury is at Chatrapur and it is under a Treasury officer who belongs to Orissa Finance Service (Senior Branch). There are 7 sub-treasuries under it at Berhampur, Aska, Bhanjanagar, Kodala, Parlakhemundi, Surada and R. Udayagiri. All the subdivisional headquarters, accordingly, have sub-treasuries, except Chatrapur, which is served by the District Treasury. The banking business at the District Treasury and the sub-treasuries at Berhampur, Aska, Bhanjanagar and Parlakhemundi are transacted by the State Bank of India. There are currency chests at other sub-treasuries except R. Udayagiri..

**Jails**

The District Jail at Berhampur is also the central jail for the State. Its capacity in 1962 was 614 prisoners. It has seven sub-jails located at Bhanjanagar, Aska, Parlakhemundi, Kodala, Surada, Chatrapur and R. Udayagiri. The capacity of these jails, as in December 1962, were 112, 11, 39, 14, 12, 37 and 4 respectively. The District Jail had 2 Jailors, 4 Assistant Jailors, 2 Assistant Surgeons, and other staff as detailed in a Table in Part III.

****Commercial Taxes**

For purposes of assessment and collection of Sales Tax, the district is divided into 2 circles. One of the circles has jurisdiction over the 3 subdivisions of Chatrapur, Berhampur and Parlakhemundi, whereas the other is for Ghumusur subdivision and the whole of the adjoining district of Baudh-Khondmals. The two circles were created in 1947 and 1951 respectively and are each under a Commercial Tax Officer. The former cricle has 2 Additional Commercial Tax Officers and 7 Assistant Commercial Tax Officers, whereas in the latter, there are 1 Additional Commercial Tax Officer and 4 Assistant Commercial Tax Officers. The Commercial Tax Officer and Additional Commercial Tax Officers belong to Orissa Finance Service (Senior Branch) and the Assistant Commercial Tax Officers, to Orissa Finance Service (Junior Branch).

Next to land revenue, the highest income in the district has been on account of Sales Tax, in later years of the past decade. The income is steadily rising, and from Rs. 7,57,713 in 1950-51, the amount went up to Rs. 20,91,711 during 1960-61. Yearwise collections on account of Sales Tax are shown in a Table in Part III.

**Stamps, Documents registered and Properties transferred**

The sale-proceeds from stamps from year to year are given in a Table in Part III. The highest annual sale of stamps was Rs. 8,46,172 in the year, 1953-54 and the lowest was Rs. 3,66,624 in the year, 1959-60. The income went up to Rs. 6,37,173 in the subsequent year of 1960-61.

There are 14 sub-registration offices in the district, 13 out of which have full-time Sub-Registrars. Registration work in the other station is looked after by a part-time officer of the Revenue Department. The Additional District Magistrate, Ganjam functions as the District Registrar of the district.

During the period 1951-60, a total number of 4,56,034 documents were registered. The value of properties transferred amounted to Rs. 21,78,70,878 during 1952—60. The number of registration is on the increase. One of the Tables in Part III shows the number of documents registered and the value of properties transferred annually during 1951-60.

**Entertainment Tax**

Figures of collection of Entertainment Tax for only three years are available and these are given in a Table in Part III of this Handbook. The income is on the increase and in 1960-61, it stood at Rs. 1,49,614. There are 11 cinema halls in the district, distributed as 4 at Berhampur, 2 at Parlakhemundi and one each at Chatrapur, Aska, Gurandi, Bhanjanagar and Hinjli.

* Based on Government of Orissa, Finance Department, Notification No. Tr. A-80/62-21466-F, dated the 16th May, 1962

** Letter No. 13162 CT. dated 3-6-62 from the office of the Commissioner, Commercial Taxes, Orissa

**Excise Revenue**

The Excise administration of the district is in charge of a Superintendent of Excise, whose headquarters is at Chatrapur. He functions under the administrative control of the District Magistrate.

In the earlier years of the past decade, Excise revenue was the principal source of income to the district. The collections in some years even exceeded the land revenue. The revenue has, however, gone down during the last 10 years, year by year and there was a precipitant fall in the collections during 1956-57 after introduction of prohibition on manufacture, possession and sale of liquor with effect from 1-4-1956. It brought down the revenue, which stood at Rs. 30,93,135 in 1950-51 to Rs. 6,87,170 in 1956-57 and to Rs. 3,53,612 in the year, 1960-61. The annual collections on account of excise revenue are given in a Table in Part III.

**Municipalities and Notified Area Councils**

1961 Census records 10 towns in the district with a total population of 155,844. Of these towns, only two, namely, Berhampur and Parlakhemundi have Municipalities and five others have Notified Area Councils. These local bodies are constituted under Orissa Municipal Act, 1950 and Madras District Municipal Act. The date of start of the Municipalities and Notified Area Councils, population of the towns and number of councillors in each are as follows :

| Municipalities/ Notified Area Councils | Population 1961 | Year of start | No. of councillors | |
|---|---|---|---|---|
| | | | Reserved | Un-reserved |
| **Municipalities** | | | | |
| Berhampur | 76,931 | 1855 | 2 | 26 |
| Parlakhemundi | 22,708 | 1886 | 1 | 16 |
| **Notified Area Councils** | | | Official | Non-official |
| Chatrapur | 7,835 | 1955 | 6 | 5 |
| Aska | 9,024 | 1957 | 5 | 4 |
| Bhanjanagar | 9,952 | 1957 | 5 | 4 |
| Gopalpur | 3,536 | 1961 | 6 | 5 |
| Surada | 8,703 | 1962 | Not available | |

The towns, which are not under any Municipality or Notified Area Council are Hinjili, Khallikote and Bellaguntha. The population residing in the municipal and notified areas are 138,689, and they constitute 7·4 per cent of total population and 89 per cent of urban population of the district.

At the head of the Municipality or Notified Area Council is a Chairman. Executive Officers discharge the day to day functions and administration of the Municipalities and Notified Area Councils. Among the obligatory functions of the local bodies are public health, including vaccination, maintenance of public tanks and wells, roads, libraries, street lighting and scavenging. The income accrues from taxes on holdings, carriages, etc., lighting and latrine taxes, licence fees from pounds and municipal properties and Government grants, etc. Taxes and fees are levied at varying rates and on different items by each Municipality and Notified Area Council. By the time of writing this report, figures of income and expenditure of these local bodies for the year 1957-58 were available in the published annual report for that year issued by the Government of Orissa, Health (LSG) Department. The total income and expenditure of these institutions during 1957-58 were as follows :

| Institutions | Total income | Total receipts including opening balance and adhoc Government grants | Total disbursements |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| Berhampur Municipality | 9,28,503 | 15,72,836 | 10,24,884 |
| Parlakhemundi Municipality | 1,80,184 | 3,14,972 | 2,49,946 |
| Chatrapur Notified Area Council | 53,773 | 76,458 | 26,821 |
| Bhanjanagar Notified Area Council | 37,007 | 61,183 | 30,451 |
| Aska Notified Area Council | 34,067 | 41,250 | 28,003 |

**Land Revenue**

The Madras Estates Land Act, 1908 was the first enactment defining the substantive rights and liabilities of land-holders and ryots in Ganjam district. The area of the district, as it stood on its transfer to Orissa in 1936, can be divided into two tracts, namely, plains and hills. The greater part of the plains was covered by private permanently settled estates. The agency areas, mostly inhabited by tribals, contained Khond lands held by Khonds free of rent, and land held by non-hill people, which was assessed to rent. The permanently settled estates of the district vested in the State Government with effect from June, 1953. Though the majority of the Inam estates have been taken possession of by the Government, a few were to be taken over still. The Madras revenue system is still in vogue in the district and the tenures are the following :

(i) Jiraiti tenure
(ii) Inam tenure
(iii) Present Settlement Rayatis inams
(iv) Government land enfranchised inams
(v) Permanent occupancy rights in plains
(vi) Service inam tenure in agency

One of the Tables in Part III shows the annual collections of land revenue during the years 1950-51 to 1960-61. On the whole, the revenue is increasing, though in some years the collections have been greater than those in a few other years. The record collections during the period 1951-52 to 1959-60 were in the year 1958-59, being Rs. 38,35,592. The least income was Rs. 17,97,588 during 1951-52.

## NATURAL CALAMITIES

1865-66 — A serious type of famine resulted in heavy distress, affecting particularly the northern part of the district. Deaths from starvation were large in number.

1871 — There was economic distress due to considerable failure of crops.

1878 — A great distress was caused by high price of food grains as a result of export of rice to the famine-stricken parts of Southern India.

1888-89 — There was a severe famine, which, combined with an extensive epidemic of cholera, raised mortality to a high figure. Rainfall was deficient for many years previous to this, and so the stock of food grains had been depleted. Nearly 6 lakhs of rupees were spent on relief work.

1896-97 — The rainfall was nearly half the annual normal rainfall. Crops failed. The people in affected areas went long distances to earn livelihood by doing earth-work for annas two per day.

1907 — Failure of crops from inadequacy of rains, particularly in the agency tract.

1908-09 — Famine visited parts of Parlakhemundi Zamindary and Berhampur taluk. Distress spread to villages of Khonds and Savaras. Gratuitous relief and test work were started by Government.

1918 — The reserve stocks of food were badly depleted, due to successively bad harvests caused by excessive rainfall in 1914, 1915, 1917 and very poor rainfall in 1918. The devastating epidemic of influenza broke out in July, reaching its climax towards the end of the year. Mortality was high.

1919 — Distress continued due to famine severely affecting Ghumusur, Kodala and Chatrapur taluks. Large number of deaths caused by influenza, combined with famine, forced large scale emigration to Burma.

1930 — On account of anti-Indian riots in Rangoon, many of the earlier emigrants returned to home-land and added to the existing distress.

1933 — The district was hit hard by severe cyclone.

1937 — The villages round the Chilka Lake had developed sufficiently malarious and unhealthy characteristics. During the year, 73,000 cases of malaria were treated in 417 villages.

1938 — Heavy rainfall and severe cyclone affected crops, forcing remission of rent.

1940 — Heavy rain and high flood led to loss of crops.

1941 — Rainfall was deficient and the paddy crop was lost in Ghumusur, Aska, Berhampur and Chatrapur taluks. There was remission of rent in deserving cases.

1942 — A severe cyclone passed over the district in November damaging crops, houses and cattle.

1944 — Heavy rainfall led to submersion of crops necessitating remission of rent.

1945 — Death rate was high due to fever, while diarrhoea and dysentery were also responsible for raising the mortality rate.

1955 — High floods in Rushikulya and its tributary, Badanadi affected 187 villages, 54,056 persons and 13,972 acres of cultivated land. Damage to crops was estimated at Rs. 3,22,076.

## COMMUNICATION

The important towns in the district are easily reached by railway and through rail-*cum*-bus routes. The district headquarters is connected by railways, as also through bus services, with 3 of its 4 subdivisional headquarters. The 4th one, namely, Bhanjanagar, lies on bus routes.

### Roads

The district has a total of 1,744 miles and 7 furlongs of roads, composed of 54 miles and 4 furlongs National Highways, 110 miles State Highways, 460 miles and 7 furlongs Major District Roads, 159 miles other District Roads, 108 miles and 4 furlongs of roads maintained by the Municipalities and Notified Area Councils and 852 miles of important Revenue roads. For every 100 square miles of area in the district we thus get 37 miles of road on an average. This ratio compares more than favourably with the State's coverage of road mileage, which is at 36 miles to 100 square miles of area. The National and State Highways, Major and other District roads are maintained by the State P. W. D. and are under an Executive Engineer, who is stationed at Berhampur. The Revenue roads are under the control of the Revenue Department, and are looked after by the District Collector. Out of these roads, the total surfaced road mileage in the district, as on 31-3-1962, was 746 miles, 5 furlongs and 610 ft including 82 miles and 4 furlongs, which were under urban local bodies and 664 miles, 1 furlong and 610 ft under State P. W. D. Ganjam has the longest surfaced road mileage of all districts in the State.

Calcutta-Madras National Highway passes through the district and goes *via* Chatrapur, the district headquarters and Berhampur, the chief town. The road runs at many places parallel to the rail track (Howrah-Madras route of South-Eastern Railway) and it provides easy reach to places of tourist interest on Chilka Lake on account of its traversing a long distance close to the lake.

Out of the two State Highways, the longer is the one which starts from Berhampur and goes in the north-western direction to Baudh-Khondmals district *via* Bhanjanagar and on Kalinga Ghat. It is black-topped all throughout. On the borders of the district, in the southern region the other State Highway runs towards Parlakhemundi, the continuation of which leads to Koraput district. In the matter of road communication, the eastern part of the district is better served than the western part, which is mostly a hilly region.

**Transport Conveyances**

1109 motor vehicles of all kinds were registered in the district by the end of December 1961. The number included 487 cars and 183 buses. Bus services, rickshaws, *Jhatkas* and cycles are more commonly found in towns than in villages, where generally the bullock carts and cycles are made use of. *Jhatkas* are peculiar to the district. These are generally found in the southern part of the country and are one-horse-driven carriages with accommodation for 2 to 3 persons.

**Bus Services**

The railways run only on a portion of area in the eastern and western parts of the district. The roads have, thus, provided facilities of communication to the people in the interior of the district. The Orissa Road Transport Company Ltd., a Government of Orissa undertaking, formed with public participation, runs many buses on these roads. It has its headquarters at Berhampur, where it functioned from January 1951. During 1960-61, it operated on as many as 79 routes and covered 4409 route miles extending over Ganjam, Baudh-Khondmals, Puri and Cuttack districts. A number of buses run from Berhampur to various parts of the district, as also on some inter-district routes. Regular daily buses ply on the Calcutta-Madras National Highway up to Cuttack. The other inter-district routes connect important towns, namely, Baliguda, Baudh, Phulbani, G. Udayagiri in the district of Baudh-Khondmals and Khurda, Bhubaneswar and Puri towns in Puri district. Inside the district, ORT buses provide daily service from Berhampur to the subdivisional headquarters at Bhanjanagar and also to Chatrapur, the district headquarters, whereas Parlakhemundi (another subdivisional headquarters) is connected through private bus services. Most of the buses in this region have upper and lower classes of accommodation.

**Railways**

The Howrah-Madras broad gauge line of S. E. Railways passes through the eastern part of the district. The line runs close to *Chilka Lake for a few miles, which provides a good view of the latter. There are 12 stations on this route and they lie within Chatrapur and Berhampur subdivisions. The south-western part of the district is traversed by a narrow gauge branch line of S. E. Railways, which starts from Naupada, a station on Howrah-Madras route of S. E. Railways and terminates at Gunupur (Koraput district). There are 7 stations on this route, all of which lie in Parlakhemundi subdivision. Thus, Ghumusur subdivision, the one covering mostly the northern part of the district is without any rail track. Out of these railway stations, Berhampur handles the largest traffic. The number of passengers making use of this station during 1960-61 was 621,697. All the stations are provided with Waiting Halls. Tea stalls and Refreshment rooms are available only at Parlakhemundi, Kashinagar and Berhampur. The total railway mileage in the district is 124 Kms, which gives 1·01 Km of railways to every 100 sq. miles of area. Compared with the State average of 0·96 Km, the district can be said to be in enjoyment of better railway communication facilities. The Divisional Superintendent, S. E. Railways, Khurda Road controls the stations on the main Howrah Madras line, whereas those on Nuapada-Parlakhemundi light railways are under the charge of the Divisional Superintendent, S. E. Railways, Waltair.

* A description about the lake is given under 'Places of Interest'

***Posts and Telegraphs**

The Superintendent of Post Offices, Berhampur Division is in charge of the post offices located in the district of Ganjam. His jurisdiction also extends to Baudh-Khondmals district and Jeypore taluk of Koraput district. There were only 201 post offices and 13 telegraph offices, including combined posts and telegraph offices in April 1951. The numbers rose to 459 and 34 respectively in April, 1961. The expansion may be attributed to various developmental schemes executed by the Department during the past two Five Year Plan periods. Of the existing 459 post offices, 129 post offices provide Savings Bank facilities. There is now a post office at the headquarters of each Panchayat Samiti.

****Telephone Exchanges**

There are six Telephone Exchanges in the district at Berhampur, Aska, Bhanjanagar, Chatrapur and Parlakhemundi and Rambha. Of these, Berhampur exchange is the biggest, being operated by Central battery with a capacity of 600 lines. There are Public call offices with extension facilities at Gopalpur and Khallikote. The Post offices at Bellaguntha, Digapahandy and Boirani have facilities for public calls.

**Wireless Stations**

The State Police Department runs four Wireless Stations at Chatrapur, Berhampur, Bhanjanagar and Parlakhemundi for use ordinarily in connection with problems of law and order.

## EDUCATION AND LITERACY

**Literacy**

The total number of literates returned for the district in the Census of 1961 is 399,213, of whom 319,165 are males and 80,048, females. The percentage of literacy comes to 21·3, comprising 17·0 males and 4·3 females, as against the State average of 17·4 per cent and 4·3 per cent respectively. The percentage of literacy in the district went up from 16·2 in 1951 to 21·3 in 1961. Taking the male population as a whole, the percentage of literates is 35·5. Similarly, among the females the pecentage is 8·2. The corresponding figures of 1951 for males and females are 28·9 and 4·8. Of the total literates, 363,815 do not have any specific educational standard, 24,906 have read up to primary or junior basic standard and the rest are either matriculates or have higher qualification.

Taking into consideration the fact that persons of the age of 4 years or less have no chance of acquiring literacy, if such persons ( of the age-group, 0—4 years) are excluded from the total population, the percentage of literacy for the district comes slightly higher up. The following Table compares the percentage worked on this basis for the two Censuses of 1961 and 1951 :

| | Percentage of literacy | | |
|---|---|---|---|
| | Persons | Males | Females |
| 1961 | 25·1 | 20·1 | 5·0 |
| 1951 | 19·0 | 16·1 | 2·9 |

Thus, an improvement is noticeable in 1961 to the extent of 6·1 per cent in the total population above the age-group of 0—4 years. Since children in the age-group of 0—4 years do not generally attend any school, it may be more rational to assume the percentage of literacy for the district to be 25·1 comprising 20·1 males and 5·0 females.

Apart from facilities offered for imparting literacy and education in the usual channel, an intensive adult education programme was undertaken in recent years. The scheme ran under the aegis of the Education Department and Community Development Blocks. The Social Education Organizers in the Blocks look after adult literacy and allied programmes. The adult literacy centres are mainly run at nights by the primary school teachers or volunteers, who get as remuneration a sum of Rs. 5/- per adult made literate during a period of

* Based on Letter No. Est. Plg. Miscellaneous—1/Ch. II dated the 15th July, 1963 from the Director, Posts and Telegraphs, Orissa

** Telephone Directory of Orissa Circle, 1964

six months. There has been a progressive increase in the number of adult literacy centres from year to year and the total number of such centres existing in 1960-61 was 1,687 out of which 390 were run by Education Department and 1,297 by the Community Development Blocks.

The percentage of literacy in the district is above the State average. The Plains portion of the district is comparatively more developed, which accounts for the high percentage of literacy figures in the district. The western portion of the district, which used to be termed as Ganjam Agency, consists of hilly tracts, which is comparatively less developed. The percentage of literacy in this portion is therefore lower than that in the Plains area.

The table below gives the number of literates and the percentage of literacy in different subdivisions and police stations of the district :

| District/Subdivision/Police station | | Total number of literates | Percentage of literacy |
|---|---|---|---|
| Ganjam District | ... | 399,213 | 21·3 |
| Chatrapur Subdivision | ... | 110,517 | 20·0 |
| Berhampur Subdivision | ... | 126,650 | 25·1 |
| Ghumusur Subdivision | ... | 121,388 | 23·0 |
| Parlakhemundi Subdivision | ... | 40,658 | 14·1 |
| Chatrapur PS | ... | 19,031 | 21·2 |
| Rambha PS | ... | 18,872 | 21;3 |
| Purushottampur PS | ... | 35,205 | 19·2 |
| Hinjili PS | ... | 17,893 | 23·0 |
| Kodala PS | ... | 22,001 | 17·6 |
| Berhampur Town PS | ... | 34,327 | 44·6 |
| Berhampur Taluk PS | ... | 34,634 | 21·9 |
| Nuagam PS | ... | 25,167 | 23·2 |
| Jarada PS | ... | 12,332 | 18·6 |
| Pattapur PS | ... | 25,314 | 22·3 |
| Bhanjanagar PS | ... | 24,810 | 26·9 |
| Tarasingi PS | ... | 9,348 | 21·1 |
| Buguda PS | ... | 19,150 | 22·4 |
| Surada PS | ... | 7,945 | 19·5 |
| Bodogodo PS | ... | 7,068 | 15·1 |
| Aska PS | ... | 27,995 | 27·8 |
| Gangapur PS | ... | 16,948 | 20·8 |
| Parlakhemundi PS | ... | 24,322 | 20·1 |
| Serango PS | ... | 5,566 | 11·7 |
| R. Udayagiri PS | ... | 3,382 | 12·5 |
| Ramagiri PS | ... | 3,522 | 8·4 |
| Mohana PS | ... | 4,381 | 7·9 |

The rate of literacy is the lowest in Parlakhemundi subdivision and the highest in Berhampur subdivision. Among the police stations, the highest standard of literacy is recorded in Berhampur Town PS (44·6 per cent) and the lowest in Mohana PS (7·9 Per cent).

**Literacy among Scheduled Castes and Scheduled Tribes**

The population of Scheduled Castes and Scheduled Tribes covers 16·5 per cent and 10·0 per cent respectively of the total population of the district. The statement below shows the total number of literates found amongst them and the percentage of literacy :

| Caste/Tribe | Population | Total literates | Percentage of literacy |
|---|---|---|---|
| Scheduled Castes | 308,298 | 31,340 | 10·2 |
| Scheduled Tribes | 188,001 | 11,440 | 6·1 |

Between the Scheduled Castes and the Scheduled Tribes, the former have a higher rate of literacy. The standard of literacy among the Scheduled Tribes is far below the district average.

Special facilities have been provided to improve the educational standard of the tribal people by establishing Sevashrams and Ashram Schools. The number of such institutions stood at 83 in the year 1961. They provide free education including supply of reading and writing materials. For education outside their locality, stipends and lump grants are given to them in High schools, Middle English schools and Upper Primary schools. Materials necessary for reading and writing, such as, books, slates, pencils, etc., are also supplied free of cost at primary education stage. A list of Sevashrams and Ashram Schools is furnished in Part III.

**Educational institutions**

The district being under direct Government administration for a long time had greater benefit of education than many of the other districts and particularly those which formed parts of princely states before merger in 1948. There are now 5 colleges, including one Medical college, two

Notes on Education based on Government of Orissa, Education Department brochure "Education in Orissa, 1962"

Higher Secondary schools and as many as 48 High schools. The numbers of Primary and M. E. schools were 2,543 and 82 respectively during 1960-61. Among the professional and special schools there are 10 Elementary Training schools, 2 Industrial schools, 1 Industrial Training Institute, 1 Engineering school, 33 Sanskrit Tols, 2 Sanskrit colleges, 5 Nursing and Dai Training centres, 1 Grama sevak Talim Kendra, 1 Co-operative Training school, 8 Institutions of Music and Dance, 1 School of Arts and Crafts and 1 Basic Training school. 78 Sevashrams and 5 Ashram schools have also been set up in the various parts of the district for education of tribal students. It has also 35 Basic schools. The details of these educational institutions have been given in different Tables in Part III of this Handbook. The activities under different spheres are broadly indicated below.

**Primary Education**

In the year 1950-51, there were only 1,367 primary schools. Their number increased in the succeeding years, rising to 2,543 by 1960-61, which included 79 schools specially meant for girls' education. All these primary schools are recognized by the Government. This gives us one primary school in every 1·8 Sq. miles of its area and one to every 736 persons in the district. The State averages of such area and population being 2·9 square miles and 850 persons, the district can be said to have better facilities of education at the primary stage than most of the other parts of the State. This improvement is, no doubt, due to various measures taken during the past decade for spread of primary education. During First and Second Five Year Plan periods, effective steps were taken in this direction by launching enrolment drives to attract pupils in still greater numbers to the schools and providing special facilities, such as, supply of free mid-day meals, grant of various scholarships for merit, merit-*cum*-poverty, for proficiency in arithmetic (to those who secure more than 90 per cent of marks in arithmetic) and for maintenance of students in hostels. Additional facilities were allowed in order to encourage women's education and some of these were the appointment of school mothers to look after the girl students in schools, the introduction of attendance scholarships or free supply of dress for regular attendance in the school and the appointment of lady teachers through simpler selection methods.

In the rural areas, the Zilla Parishad and Panchayat Samitis are now responsible for management of primary education in their respective areas. In the Community Development Block areas, the Panchayat Samitis maintain primary schools, but those in other places are managed by the Zilla Parishad directly. In the towns, where there are Municipalities or Notified Area Councils, these institutions are managed by them. The Government grants for primary education are made over to the Zilla Parishad and the concerned Municipalities or Notified Area Councils.

The scales of pay of primary school teachers, both under the Government and under non-Government management, have also been revised during 1961. Depending upon their qualifications, primary school teachers now get pay in different grades in the scale, Rs. 65—85/- for upper primary, lower elementary trained or Middle English trained and in the scale Rs. 100—155/- for matric trained. In addition, they also get usual dearness allowance.

**Secondary Education**

In the field of secondary education also, rapid progress has been made in the district during the decade under report. Against only 27 High schools and 46 Middle schools existing during 1950-51, the district had by 1960-61 as many as 2 Higher Secondary schools, 48 High schools and 82 Middle schools. The two Higher Secondary schools are located at Berhampur and Chatrapur. They impart education up to Class XII, which is deemed equivalent to Pre-University standard. Commerce as an optional subject is taught in both these schools. The passing out examination is conducted by the Board of Secondary Education, Orissa. The two institutions are managed by Government.

Out of the 48 High schools, six admit only girls. Only six of these 48 High schools are Government managed, 28 are aided by the Government and the remaining 14 are run by private management. Out of these privately managed schools, the one at Berhampur is managed by the Municipal Council. Agriculture, as optional subject, is taught in ten and commerce, in one of these High schools. For every 98·4 square miles of area and 39,011 population in the district, we, thus, have only one High school against the State average of one High school to every 164·4 square miles and for 47,948 persons.

Up to the 1956 annual examination, Utkal University conducted the examinations at the High school stage. The Board of Secondary Education, Orissa took it over with effect from 1956 supplementary examination. During 1960, 39 out of these 48 High schools sent up students for the High School Certificate Examinations. The number of the students appearing in these examinations and those passing therefrom, between 1956 (supplementary) and 1960 (supplementary) along with the percentages of success, are given in a Table in Part III of this publication.

Out of the M. E. schools, 13 are exclusively meant for girls. All these 82 schools are recognized by the Government. The examination at the end of M. E. standard was, till 1964, conducted by the concerned District Inspector of schools. It has now been taken over by the Board of Secondary Education, Orissa.

To encourage secondary education, a number of merit and merit-*cum*-poverty scholarships at Middle and High school stages are now given, both for boys and for girls. There are also some special facilities for the girl students. They are not required to pay any school fee up to Class VII. At the High school stage, half fees are charged from those, whose guardians pay income tax or agricultural income tax, while others continue to enjoy free studentship. Award of attendance scholarship and maintenance stipends is also continued.

The scales of pay of Secondary school teachers underwent a revision in 1961. They now draw pay in six different scales, depending upon their qualifications. An untrained Matriculate gets pay in the scale, Rs. 80—135/- in Government schools and Rs. 80—125/- in non-Government schools, whereas a Trained Graduate teacher draws pay in scales, Rs. 185—325/- and Rs. 175—300/, respectively in Government and non-Government schools.

**College Education**

In the matter of college education, the district has also made rapid progress during the previous decade. There were only two colleges in 1951. The district has now five colleges, four of which are for general education including science. The other is a Medical college, which functions at Berhampur. This college is managed by Government and was started in the year 1962. Its admission capacity was 102 during 1963. Both boys and girls are admitted, and the course leading to M. B. B. S. degree of Utkal University covers five years after pre-professional or 1st Year Degree Science (Physics, Chemistry, Biology) stage. Of the remaining four colleges, two are under private management and two under Government. Two colleges are located at Berhampur and the other two, at Parlakhemundi and Bhanjanagar. The oldest of these colleges is the one at Parlakhemundi started in the year 1894. It was under the management of the Maharaja of Parlakhemundi till 1947, when Government took it over. It is a first grade college teaching both science and arts. The Khallikote college at Berhampur is now the most important college in the district, which has, from 1964, provision for post-graduate teaching. The other college at Berhampur is a women's college. Bhanjanagar has only a 2nd grade college. Details about these colleges are contained in a Table in Part III.

**Professional and Special schools**

A list of professional and special schools existing in the district is given in Table 26; a list of Sevashrams and Ashram schools, in Table 27; and a list of Basic schools in Table 28 in Part III.

Among the various categories of professional and special schools, important ones are the Engineering school at Berhampur; Grama Sevak Talim Kendra, Rangeilunda and School of Arts and Crafts, Khallikote. The Engineering school admits matriculates for four-year diploma course in civil, electrical and mechanical engineering, the last year of the course being utilized for practical training. This institution was started in the year 1955 and its admittance capacity in 1960 was 180. It is managed by Government. The Grama Sevak Talim Kendra, Rangeilunda, another Government managed institute was started in October, 1958 for giving training to Matriculates or those reading in Class XI for their eventual appointment as Grama Sevaks in the various Community Development Blocks in the State. It was at first a Basic Agricultural school started in 1954, where candidates used to get preliminary training in extension methods before their admission to an Extension Training centre, a pass from which institution used to provide them employment as Grama Sevaks in Blocks. The two phases of training having been merged into one, this school was converted into a Grama Sevak Talim Kendra from 1-10-1958. The present admission capacity of the centre is 100 trainees per batch, two such batches being turned out in a year. The course covers a period of 1½ years. The Government School of Arts and Crafts at Khallikote, started during 1957, admits Matric passed students to a four-year course leading to a Diploma. It had an admittance capacity of 120 in 1960. The district has the largest number of Sanskrit Tols.

**Newspapers and Journals**

As many as 19 journals are issued, most of which are from Berhampur. The majority of them are weekly editions though there are a few monthly, fortnightly and annual papers. Among them, Nabeen, an Oriya weekly has the largest circulation, and it was also the earliest paper to be published from the district (1930). A list of newspapers and journals is given in a Table in Part III.

**Libraries and Reading rooms**

A list of the more important libraries and reading rooms in the approved list of the Education Department has been given in Table 30 in Part III of this Handbook. These libraries receive grants from the Government.

## ECONOMIC ACTIVITIES

The economic concepts of 1951 Census have undergone substantial modification to facilitate collection of more comprehensive data in the Census of 1961. The concept of economic dependence and income adopted in 1951 was given up in favour of the new concept of 'work', which is the chief criterion of the 1961 Census. The broad division of the population into 'workers' and 'non-workers' is the essential feature of the 1961 economic classification scheme. By implication, 'worker' included all persons working as well as the working children irrespective of their earning incomes.

**Workers**

The working population, according to the above concept, is grouped into nine broad industrial categories, namely, (I) As cultivator; (II) As agricultural labourer; (III) In mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities; (IV) At household industry; (V) In manufacturing other than household industry; (VI) In construction; (VII) In trade and commerce; (VIII) In transport, storage and communications and (IX) In other services.

The working population constitutes 49·2 per cent of the total population of the district, comprising 528,373 males and 393,176 females. Their number in each industrial category and for each sex and broad age-group is given in Table B-I of the General Economic Tables. The proportionate distribution of 1,000 persons, males and females of rural and urban areas severally for each category in the district and the State, is given below for comparison :

| Category of workers | | Ganjam | | | Orissa | | |
|---|---|---|---|---|---|---|---|
| | | Total | Rural | Urban | Total | Rural | Urban |
| Total population | M | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
| | F | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
| Total workers | M | 588 | 596 | 498 | 608 | 610 | 572 |
| | F | 404 | 425 | 162 | 266 | 274 | 131 |
| I As Cultivator | M | 313 | 340 | 36 | 363 | 387 | 42 |
| | F | 180 | 194 | 13 | 133 | 140 | 9 |
| II As Agricultural Labourer | M | 78 | 84 | 8 | 92 | 98 | 12 |
| | F | 103 | 111 | 11 | 57 | 60 | 4 |
| III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities | M | 21 | 21 | 18 | 11 | 11 | 16 |
| | F | 7 | 7 | 4 | 4 | 4 | 5 |
| IV At Household Industry | M | 41 | 40 | 49 | 33 | 32 | 34 |
| | F | 33 | 33 | 40 | 28 | 29 | 19 |
| V In Manufacturing other than Household Industry | M | 7 | 3 | 43 | 8 | 2 | 88 |
| | F | 3 | 3 | 6 | 2 | 1 | 9 |
| VI In Construction | M | 2 | 2 | 13 | 3 | 2 | 25 |
| | F | N | N | N | N | N | 2 |
| VII In Trade and Commerce | M | 22 | 16 | 83 | 13 | 9 | 68 |
| | F | 8 | 7 | 19 | 4 | 4 | 11 |
| VIII In Transport, Storage and Communications | M | 5 | 2 | 37 | 6 | 2 | 50 |
| | F | N | N | 1 | N | N | 4 |
| IX In Other Services | M | 99 | 88 | 211 | 79 | 67 | 237 |
| | F | 70 | 70 | 68 | 38 | 36 | 68 |
| Non-workers | M | 412 | 404 | 502 | 392 | 390 | 428 |
| | F | 596 | 575 | 838 | 734 | 726 | 869 |

N=Negligible M=Males F=Females

The predominance of both sexes in categories I and II in rural areas and their correspondingly low figures in urban areas indicate the great dependence of the rural sector on agricultural occupations. The proportion of female workers in both these categories is above the State average. Also above the State average, are categories III, IV, VII and IX, which have absorbed workers of both sexes in large proportion. The rate of participation in categories IV and VII, above that of the State, indicates that the district has advanced in the field of household industries, trade and commerce. Proportion of male workers in categories I and II is below the State average, which signifies that compared to other backward districts, higher proportion of males here are engaged in economic pursuits other than in categories aforesaid.

**Primary, Secondary and Tertiary Sectors**

The nine industrial categories of workers are grouped into three sectors. Categories I and II representing the agricultural classes, together with category III excluding those working in mines and quarries, constitute the Primary Sector. As industrial development is next in importance, categories IV to VI together with those working in mines and quarries of category III and gas and electricity supply of category IX form the Secondary Sector. All the remaining categories, namely, VII, VIII and IX excluding the workers in gas and electricity supply, are grouped together as Tertiary Sector. The distribution of 1,000 persons in each of these sectors for rural and urban areas of the district and of the State are given below :

| | | Ganjam | | | Orissa | | |
|---|---|---|---|---|---|---|---|
| | | Total | Rural | Urban | Total | Rural | Urban |
| Total population | ... | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
| Primary sector | ... | 348 | 376 | 44 | 328 | 348 | 43 |
| Secondary sector | ... | 43 | 40 | 79 | 39 | 34 | 102 |
| Tertiary sector | ... | 101 | 91 | 211 | 70 | 59 | 230 |
| Non-workers | ... | 508 | 493 | 666 | 563 | 559 | 625 |

The concentration of large proportions of workers in the rural areas of Primary Sector and the urban areas of Tertiary Sector is indicative of the agricultural character of rural areas and diversified economic activities of urban areas. The low proportion of workers in the Secondary Sector signifies the stagnancy of industrial economy.

**Sex ratio of workers**

The sex ratio (No. of females per 1,000 males) among total workers and in each industrial category of workers is given below for the district and the State :

| | | Ganjam | | | Orissa | | |
|---|---|---|---|---|---|---|---|
| | | Total | Rural | Urban | Total | Rural | Urban |
| | Total workers ... | 744 | 779 | 309 | 438 | 456 | 185 |
| I | As Cultivator ... | 623 | 625 | 335 | 367 | 368 | 179 |
| II | As Agricultural Labourer ... | 1,438 | 1,440 | 1,185 | 619 | 622 | 296 |
| III | In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ... | 349 | 359 | 228 | 375 | 391 | 242 |
| IV | At Household Industry ... | 874 | 886 | 776 | 858 | 890 | 444 |
| V | In Manufacturing other than Household Industry ... | 515 | 1,006 | 138 | 181 | 469 | 79 |
| VI | In Construction ... | 24 | 31 | 14 | 60 | 61 | 59 |
| VII | In Trade and Commerce ... | 401 | 495 | 216 | 321 | 436 | 130 |
| VIII | In Transport, Storage and Communications ... | 22 | 2 | 33 | 53 | 27 | 69 |
| IX | In Other Services ... | 762 | 870 | 305 | 479 | 545 | 232 |

The sex ratio for total workers in all the categories excepting III, VI and VIII exceed the respective ratios for the State, which highlights the large scale female participation in economic activities of the district. The rural ratio in categories III, IV, VI and VIII and the urban ratio in categories III, VI and VIII are below the State averages. Other categories of rural and urban areas have recorded higher proportions than those for the State.

**Classification according to ISIC and NCO**

The Indian Census Economic Classification, adopted at the 1951 Census, was neither a purely industrial nor occupational classification, but was a combination of both. There were only 10 divisions and 88 subdivisions of industries and services. This scheme was given up in 1961 Census and separate tabulation of industries and occupations, based

on Indian Standard Industrial Classification and National Classification of Occupations, was attempted for the first time. As this is the first occasion when a work of great magnitude, such as, this classification is undertaken, marginal errors in classification, if any, may have to be ignored, as they do not impair the general trend presented by the Tables. This two-fold classification, though primarily intended to secure more detailed classification of the sectors of production and services and of personal talents and skills, will also serve well to maintain comparability of the present with the past.

**Indian Standard Industrial Classification**

The nine industrial categories of workers described previously more or less correspond to the nine broad divisions of the Indian Standard Industrial Classification. The divisions, major groups and minor groups of categories III to IX are given in Tables B-IV, Parts A, B and C of the General Economic Tables. Comparative figures of their distribution per 10,000 males and 10,000 females in each division for the district and the State are given below for total and urban areas :

| Division of ISIC | | Ganjam | | Orissa | |
|---|---|---|---|---|---|
| | | Males | Females | Males | Females |
| All Divisions | T | 10,000 | 10,000 | 10,000 | 10,000 |
| | U | 10,000 | 10,000 | 10,000 | 10,000 |
| 0 Agriculture, Livestock, Forestry, Fishing and Hunting | T | 1,317 | 612 | 1,005 | 657 |
| | U | 469 | 391 | 248 | 249 |
| 1 Mining and Quarrying | T | 14 | 22 | 128 | 151 |
| | U | 17 | 82 | 103 | 266 |
| 2 & 3 Manufacturing | T | 2,155 | 2,933 | 2,265 | 3,606 |
| | U | 1,924 | 3,167 | 2,316 | 2,227 |
| 4 Construction | T | 130 | 5 | 218 | 26 |
| | U | 286 | 14 | 473 | 153 |
| 5 Electricity, Gas, Water and Sanitary Services | T | 24 | 1 | 50 | 2 |
| | U | 98 | ... | 156 | 13 |
| 6 Trade and Commerce | T | 1,110 | 669 | 834 | 537 |
| | U | 1,829 | 1,356 | 1,313 | 930 |
| 7 Transport, Storage and Communications | T | 263 | 8 | 367 | 39 |
| | U | 811 | 93 | 969 | 366 |
| 8 Services | T | 4,958 | 5,750 | 5,106 | 4,970 |
| | U | 4,554 | 4,897 | 4,421 | 5,795 |
| 9 Activities not adequately described | T | 29 | ... | 27 | 12 |
| | U | 12 | ... | 1 | 1 |

T=Total U=Urban

The proportions of male workers in divisions 0, 6 and 9 and in division 8 only of the urban areas in the district are above the State averages. Female proportions in the urban areas of divisions 0, 2, 3 and 6 and in divisions 6 and 8 of the district are also above the corresponding State averages.

**National Classification of Occupations**

The classification of workers according to divisions, groups and families of the National Classification of Occupations is given in Table B-V of the General Economic Tables. Their proportionate distribution in each division for 10,000 males and 10,000 females is given below, together with the figures for the State :

| Division of NCO | | | Ganjam | | Orissa | |
|---|---|---|---|---|---|---|
| | | | Males | Females | Males | Females |
| | All Divisions | T | 10,000 | 10,000 | 10,000 | 10,000 |
| | | U | 10,000 | 10,000 | 10,000 | 10,000 |
| 0 | Professional, Technical and related workers | T | 872 | 65 | 717 | 106 |
| | | U | 1,178 | 393 | 770 | 461 |
| 1 | Administrative, Executive and Managerial workers | T | 149 | 10 | 210 | 13 |
| | | U | 222 | 50 | 353 | 62 |

| | | U | 67 | 59 | 193 | 53 |

T=Total U=Urban

Larger proportion of male workers, higher than the corresponding State averages, is found in divisions 0, 3 and 4. Highest proportion of both male and female workers is also concentrated in divisions 7-8, although the urban proportion is slightly below the State figure. Proportion of female workers in divisions 2 and 3 and in the urban areas of divisions 4 and X is higher than the State averages.

**Craftsmen and Production Process Workers**

As the divisions 7-8 have recorded the highest proportion of workers, it may be interesting to analyse the number of artisans engaged in various crafts. The number of workers in ten selected crafts is given below in order of their numerical importance. Their proportion to 10,000 persons of all divisions severally for total, males and females, is also worked out.

| Description | Number of artisans | | | Proportion per 10,000 | | |
|---|---|---|---|---|---|---|
| | Total | Males | Females | Total | Males | Females |
| Spinners, Weavers, Knitters, Dyers and related workers ... | 18,932 | 9,141 | 9,791 | 642 | 516 | 832 |
| Millers, Bakers, Brew masters and related food and beverage workers ... | 15,542 | 7,080 | 8,462 | 527 | 400 | 719 |
| Basketry weavers and related workers ... | 6,783 | 3,064 | 3,719 | 230 | 173 | 316 |
| Potters, Kilnmen, Glass and Clay Formers and related workers ... | 6,088 | 3,018 | 3,070 | 207 | 170 | 261 |
| Jewellers, Goldsmiths and Silversmiths ... | 3,650 | 3,203 | 447 | 124 | 181 | 38 |
| Carpenters, Joiners, Cabinet Makers, Coopers and related workers ... | 3,631 | 3,631 | ... | 123 | 205 | ... |
| Blacksmiths, Hammersmiths and Forgemen ... | 2,482 | 2,196 | 286 | 84 | 124 | 24 |
| Tailors, Cutters, Furriers and related workers ... | 2,157 | 1,303 | 854 | 73 | 74 | 73 |
| Tool-makers, Machinists, Plumbers, Welders, Platers and related workers ... | 1,618 | 1,532 | 86 | 55 | 86 | 7 |
| Tobacco preparers and Products makers ... | 1,234 | 805 | 429 | 42 | 45 | 36 |

**Non-workers**

All those, who do not come under the aforesaid nine industrial categories of workers, are treated as non-workers. There are 950,981 non-workers constituting 50·8 per cent of the total population of the district. The sex composition of non-workers shows 370,956 males and 580,025 females. Their activities were investigated into and they were classified into the following eight categories :

| Classification of non-workers | Persons | Males | Females |
|---|---|---|---|
| Total non-working population | 950,981 | 370,956 | 580,025 |
| Full-time students ... | 160,028 | 113,296 | 46,732 |
| Household duties ... | 242,916 | 5,050 | 237,866 |
| Dependents, infants and disabled | 538,481 | 246,663 | 291,818 |
| Retired, rentier or independent means ... | 3,496 | 1,666 | 1,830 |
| Beggars, vagrants, etc. ... | 3,352 | 1,663 | 1,689 |
| Inmates of penal, mental and charitable institutions ... | 524 | 484 | 40 |
| Persons seeking employment for the first time ... | 1,607 | 1,560 | 47 |
| Persons employed before but now out of employment and seeking work ... | 577 | 574 | 3 |

The dependents, infants and disabled persons constitute the highest number in both sexes. The females attending to household duties and the male full-time students come next in the respective sexes of non-workers. There are 5,050 male non-workers in the district, who attend to household duties, which may not be deemed as an abnormal feature, as there are cases of several households, where male members look after the up-keep of the house, tend the cattle and take care of children, while the women folk are busy in the market or in economic pursuits, such as, hawking of garden fruits and vegetables or eatables made at home, such as, *Chura*, *Murhi*, etc., or plucking of *Kendu* leaves from forest areas for sale to contractors. In such households, male members are not engaged in any job with the object of adding income to the family. In large families, the activities of some members are unremunerative. They are not interested in finding out jobs due to their preoccupation at home, which are mostly in the form of assisting elderly family members. Such members are classed as persons doing household duties.

The details of non-workers by their broad age-groups are given in Table B-IX.

**Industrial establishments**

A comprehensive housing Census was undertaken for the first time in 1960 to collect information about the types of houses and their use, together with various other details about their construction, accommodation, etc. The most valuable among these details pertains to the list of different kinds of industrial establishments, including factories and workshops in the State, beginning from a large factory to a small workshop carried on in a household in a very meagre scale. These industries are classified according to the power used, viz., factories and workshops run by (i) electricity, (ii) liquid fuel, (iii) coal, wood and bagasse, (iv) other power and (v) no power. Statistics were also collected to further classify them according to size of employment, viz., factories employing one person, 2—5 persons, 6—9 persons, 10—19 persons, 20—49 persons, 50—99 persons and 100 persons or more. The data so compiled may be found in Table E-III furnished in Part II.

A study of this Table discloses that there are 24,911 houses, which are used as workshops, factories or workshop-*cum*-dwellings, of which 2,858 are in the urban area and the rest, in the rural area. Classification of these workshops and factories according to power used and size of employment are indicated below :

| Factories classified by power used | | Number of Factories |
|---|---|---|
| Run by electricity | ... | 97 |
| Run by liquid fuel | ... | 167 |
| Run by coal, wood and bagasse | ... | 6,445 |
| Run by other power | ... | 1,128 |
| Run by no power | ... | 17,074 |
| **Factories classified by size of employment** | | |
| Employing one person | ... | 9,634 |
| Employing 2— 5 persons | ... | 14,695 |
| Employing 6— 9 persons | ... | 509 |
| Employing 10—19 persons | ... | 55 |
| Employing 20—49 persons | ... | 14 |
| Employing 50—99 persons | ... | 4 |
| Employing 100 persons and above | ... | Nil |

The industries grouped according to the list in the ISIC scheme, cover 97 different kinds in the district. Some of the major industries, which are extensively found in the district, are listed below :

| Industries | | Total No. of establishments |
|---|---|---|
| Manufacture of materials from cork, bamboo, cane, leaves and other allied products | ... | 5,350 |
| Cotton weaving in handlooms | ... | 3,972 |
| Manufacture of wooden industrial goods other than transport equipments, such as, bobbin and similar equipments and *fixtures* | ... | 2,750 |
| Manufacture of earthenware and earthen pottery | ... | 2,447 |
| Cotton spinning (other than in mills) | ... | 1,453 |
| Manufacture of jewellery, silverware and wares using gold and other precious metals | ... | 1,382 |
| Production of edible fats and oils (other than hydrogenated oil) | ... | 1,128 |
| Manufacture of sundry hardwares, such as, G. I. Pipe, wirenet, bolt, screw, bucket, cutlery | ... | 1,120 |

**Workers employed in household industries**

The Census of 1961 records the number of people employed in household industries at 69,240, composed of 36,942 males and 32,298 females. They constitute 3·7 per cent of total population and 7·5 per cent of total workers as against the State averages of 3·0 per cent and 6·9 per cent respectively. Of the total persons employed in household industries, 62,279 belong to the rural areas and the rest, to the urban areas.

Household industries like basket making, weaving, carpentry and pottery have absorbed majority of the workers.

**Small scale industries**

The survey of small scale industries conducted by the Director of Industries in 1961 discloses that there are 240 such industries in the district. 27 of them have a capital investment of Rs. 50,000 or

more each. The figures were not, of course, exhaustive and units recorded were mostly those that received financial assistance from Government or other institutional bodies. The break-up of industries, according to their line of production, is shown below :

| Line of production | Number |
|---|---|
| Iron and steel processing industries | 40 |
| Wood engineering industries | 36 |
| Chemical and Pharmaceutical industries | 30 |
| Printing and allied industries | 24 |
| Textile industries | 6 |
| Leather and footwear industries | 4 |
| Ceramic industries | 3 |
| Electro-chemical industry | 1 |
| Non-ferrous industries | 13 |
| Consumer industries | 66 |
| Servicing industries | 17 |

**Factories**

Section 2 (m) of the Factories Act, 1948 defines a factory as follows :

"Factory means any premises including the precincts thereof

(*i*) Whereon ten or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on, or

(*ii*) Whereon twenty or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on, but does not include a mine subject to operation of the Mines Act, 1952 (XXXV of 1952), or a railway running shed".

Section 85 of the said Act, however, authorises the State Government to declare by Notification any place, wherein a manufacturing process is carried on, to be a factory within the meaning of the Factories Act, although it does not fulfil the above requirements of law.

A list of such factories existing in the district in 1951 and in 1961 has been given separately. Of 26 registered factories existing in 1951, 2 units were subsequently closed down and 36 new units started functioning during the decade, bringing their total number to 60 in 1961. Most of these factories are either rice mills or saw mills.

**Supply of Electricity**

Electricity supplied to different areas of the district is generated from the Machkund Hydro-electric Project. All the ten towns of the district along with 13 villages have been electrified so far. 24 more villages are proposed to be electrified during the Third Plan period.

**Trade and Commerce**

27,533 persons of the district or 1·5 per cent of the total population are engaged in trade and commerce, of whom 19,656 are males and 7,877 females. Out of the total traders, 432 and 26,673 persons are respectively engaged in wholesale and retail trades, whereas 428 persons are engaged in miscellaneous trades. 426 of the wholesale traders and 7,313 of the retail traders belong to the urban area, and the balance are left to serve the rural population. Out of the total retail traders, 16,021 or 60·1 per cent of them deal in cereals and pulses.

The district has a total number of 9,534 shops, including shop-*cum*-dwellings, restaurants, etc., of which 6,940 are situated in rural and the remaining 2,594, in urban areas. The shops in the villages deal mostly with the daily requirements of rural folks, such as, gram, salt, sugar, oil, spices, etc., whereas in the urban areas, comparatively better equipped shops are found not only to meet the demand of the urban population but also to cater to the needs of the villagers.

**Fairs**

The main fairs and festivals of the district are Shivaratri, Dola Jatra, Thakurani Jatra, Meru Jatra, Ratha Jatra, Tara Tarini Jatra, etc. Details about these fairs are furnished in Part II. The gathering in some of these fairs sometimes reaches

1,00,000. The main attractions in these fairs are *danda dance, Ramlila, daskathia, pala*, etc. Ornaments made mostly of silver, brass and bell-metal utensils, agricultural implements and products of bamboo and other cottage industries are the important items of sale and purchase in these fairs.

## AGRICULTURE AND IRRIGATION

### Organization

For looking after the agricultural programmes, the district has a District Agricultural Officer, who is stationed at Berhampur. He is subordinate to the Director of Agriculture and Food Production Orissa, who holds his office at the State Capital at Bhubaneswar. For each Community Development Block, there is an Agricultural Extension Officer to look after the agricultural extension programmes.

### Land utilization

The topographical features of the district have been described already. The district can be broadly divided into two tracts, Plains and Agency areas. The Plains area of the district that contains some of the most fertile land in the State, readily lends itself to construction of reservoirs and irrigation embankments. Rains are plentiful for purposes of paddy cultivation. The Agency areas, inhabited mostly by Khonds and Saoras, consist of networks of hills and forests, and so the area under cultivation in these parts is comparatively small.

Different categories of uses of land in the district during the period, 1952-53 to 1959-60 are shown in one of the Tables in Part III. Ganjam, being one of the older districts of the State, which has been with it since formation of Orissa into a separate province in 1936, agricultural statistics for the district are available for all years from 1936 onwards, save a few years for which the records are not traceable. But the figures up to 1950 will not be properly comparable with those of the succeeding years due to the territorial changes as a result of reconstitution of districts after merger of princely states in 1949. Thus the scope of comparative study of these statistics is confined to the past decade only. The following Table compares the area and its percentages of different uses of land of the district with those of the State :

| | | Ganjam | | Orissa | |
|---|---|---|---|---|---|
| | | Area in acres | Percentage to total area | Area in acres | Percentage to total area |
| Total *geographical area | | 3,024,013 | 100 | 38,509,952 | 100 |
| (1) | Forests | 516,857 | 17·09 | 8,908,558 | 23·1 |
| (2) | Barren and unculturable land | 357,972 | 11·84 | 3,819,723 | 9·9 |
| (3) | Land put to non-agricultural uses | 165,840 | 5·48 | 3,382,753 | 8·8 |
| (4) | Culturable waste | 185,981 | 6·15 | 2,128,127 | 5·5 |
| (5) | Permanent pastures and grazing land | 69,132 | 2·29 | 1,556,709 | 4·0 |
| (6) | Miscellaneous tree crops and groves | 214,703 | 7·10 | 1,695,687 | 4·4 |
| (7) | Current fallow | 47,583 | 1·57 | 1,465,615 | 3·8 |
| (8) | Other fallow lands | 41,085 | 1·36 | 509,924 | 1·3 |
| (9) | Net area sown | 1,424,860 | 47·12 | 14,695,526 | 38·2 |
| (10) | Non-reporting area | ... | ... | 347,330 | 1·0 |

* According to Census records the area is 3,024,000 acres

Though the Forest Department claim 34·7 per cent of area of the district to be under forests, the agricultural statistics put such area at only 17·09 per cent. Apparently, both these two Departments do not follow the same standard for classification of forests. The percentage of area under barren and unculturable land, culturable waste, miscellaneous tree crops and groves and net area sown in the district is greater than the State averages.

*Crops*

The principal crops of the district are paddy, ragi, green gram, black gram and groundnut. The total area under cultivation in 1959-60 was 1,588,072 acres, out of which 163,212 acres of land were under double and multiple cropping. Out of the gross cropped area of 1,588,072 acres, 502,287 acres were given to cultivation of cereal crops during 1959-60, the chief crop being paddy, which was grown on 433,969 acres of land. Thus, land under cultivation of cereal crops comprised 31·63 per cent of the total cropped area of the district out of which paddy fields covered 27·33 per cent, the balance of 4·30 per cent of area being given to cultivation of other cereal crops. Pulses were grown only on 99,322 acres, constituting 6·25 per cent of the gross cropped area.

Area under cultivation of various crops in each year from 1952-53 to 1959-60 has been given in a Table in Part III of this Handbook. The following Table makes a comparison of acreage of the more important crops in the district with the State totals and their percentages, based on the statistics for the year, 1959-60:

| Crops | Ganjam | | Orissa | |
|---|---|---|---|---|
| | Area in acres | Percentage to gross cropped area | Area in acres | Percentage to gross cropped area |
| Rice | 433,969 | 27·3 | 9,907,301 | 62·6 |
| Ragi | 61,031 | 3·8 | 188,721 | 1·2 |
| Maize | 2,001 | 0·1 | 86,210 | 0·5 |
| Kulthi | 9,880 | 0·6 | 288,681 | 1·8 |
| Black gram | 29,230 | 1·8 | 125,138 | 0·8 |
| Green gram | 36,993 | 2·3 | 432,518 | 2·7 |
| Sugar-cane | 3,866 | 0·2 | 66,318 | 0·4 |
| Groundnut | 13,781 | 0·9 | 130,536 | 0·8 |
| Sesamum | 11,378 | 0·7 | 252,325 | 1·6 |

The percentages of area under cultivation of all the above crops except ragi, black gram and groundnut fall below the State averages. A Table is given below to compare the percentage of area sown more than once to gross cropped area :

| | 1959-60 | | |
|---|---|---|---|
| | Gross cropped area | Area sown more than once | Percentage of area sown more than once to gross cropped area |
| | acres | acres | |
| Orissa | 15,829,316 | 1,133,790 | 7·2 |
| Ganjam | 1,588,072 | 163,212 | 10·3 |
| Puri | 1,301,323 | 264,250 | 20·3 |
| Baudh-Khondmals | 827,287 | 21,921 | 2·7 |
| Koraput | 1,749,840 | 17,668 | 1·0 |

It is a happy indication that people have taken to double and multiple cropping in Ganjam in a more expensive scale than most of the districts in the State. The percentage of area under such cropping in Baudh-Khondmals and Koraput districts is bound to be lower on account of topographical features, which make laying of canals or other irrigation sources more difficult than in Ganjam and other coastal districts. Higher percentage of area, where more than one crop is grown, occurs in Puri, which is a more plain and fertile area, where double and multiple cropping are practised for a long time.

**Cropping season**

The three varieties of paddy, i.e., autumn, winter and summer are grown. The cultivating season for paddy and some other important crops of the district are as follows :

| Crops | Month of sowing | Month of harvesting |
|---|---|---|
| Paddy | | |
| (a) Autumn | May | August-October |
| (b) Winter | May-June | September-October |
| (c) Summer | December | March |
| Ragi | June | July-September |
| Mung—Rabi | December | January |
| Khariff | October | January |
| Groundnut | June | November |

**Workers on land**

The density of population, proportion of workers on land to total workers and gross area sown per worker on landi n the district is compared in the following Table with the State averages, as also with those in the adjoining districts of Koraput, Baudh-Khondmals and Puri :

| State/ District | Density of population per Sq. mile | Total workers | Workers on land (cultivator and agricultural labourer) | Percentage of workers working on land to total workers | Gross cropped area in acres | Gross cropped area per worker on land |
|---|---|---|---|---|---|---|
| Orissa | 292 | 7,661,529 | 5,656,523 | 73·8 | 15,829,316 | 2·8 |
| Ganjam | 396 | 921,549 | 626,757 | 68·0 | 1,588,072 | 2·5 |
| Koraput | 151 | 809,887 | 640,082 | 79·0 | 1,749,840 | 2·7 |
| Baudh-Khondmals | 120 | 290,151 | 224,995 | 77·5 | 827,287 | 3·7 |
| Puri | 461 | 649,026 | 444,057 | 68·4 | 1,301,323 | 2·9 |

Cultivators and agricultural labourers constitute 68·0 per cent of the total working population of the district. The percentage is lower than the State average as also that in the 3 adjoining districts of Koraput, Baudh-Khondmals and Puri. Gross cropped area available per worker is also less than the State average and that available in all the neighbouring districts.

**Irrigation**

One of the Tables in Part III gives area under different sources of irrigation from 1952-53 to 1959-60. As in 1959-60, tanks irrigated an area of 204,417 acres and 138,557 acres of land were under canal irrigation, the balance of 51,035 being under irrigation from wells and other sources. There are many minor irrigation projects out of which those with ayacut area of 100 acres or more number 266. A list of such projects has been given in a Table in Part III. The main canal system in the district is Rushikulya canal system. In the recent past, lift irrigation schemes, which provide irrigation through pumps, have been introduced at different places in the district.

The following Table makes a comparison of irrigated area to net area sown :

| | 1959—60 | | |
|---|---|---|---|
| | Net area sown | Area under irrigation | Percentage of irrigated area to net area sown |
| | acres | acres | |
| Orissa | 14,695,526 | 2,409,667 | 16·4 |
| Ganjam | 1,424,860 | 394,009 | 27·7 |
| Puri | 1,037,073 | 275,793 | 26·6 |
| Baudh-Khondmals | 805,366 | 1,598 | 0·2 |
| Koraput | 1,732,172 | 78,408 | 4·5 |

Ganjam has the highest percentage of irrigated area in net area sown. But the entire irrigated area is not covered by double or multiple cropping, as we find that out of the total irrigated area of 394,009 acres, area sown more than once is only 163,212 acres forming 41·4 per cent of the former. There is thus a good scope left for suitable agricultural extension.

**Agricultural implements and machineries**

A census of agricultural implements and machineries existing in the district was taken during each of the livestock censuses of 1945, 1957 and 1961. These were the only three such censuses taken after formation of Orissa into a separate province. As pointed out already, the district underwent territorial changes during the period since 1936, when the district was formed, till 1949. Therefore, the statistics of 1945 will lack comparability with those recorded in the years 1957 and 1961. However, the Table on the subject given in part III shows the number of agricultural implements and machineries in each of these three livestock census years.

Between 1957 and 1961, the numbers of wooden ploughs, carts, sugar-cane crushers, pumps for irrigation purposes, Persian wheels and ghanis have increased. There was no tractor in 1957, but its number was 2 in 1961.

**Agricultural farms**

Among the farms, the following may be noted. All of them are seed multiplication farms. But in some cases, horticulture is taken up in a few acres of land :

| Farms | Acreage |
|---|---|
| Golanthara | 40·66 |
| Parlakhemundi | 34·0 |
| R. Udayagiri | 50·00 |
| Bhanjanagar | 23·55 |
| Jagannathprasad | 25·56 |
| Babanpur | 57·28 |
| Keshpur | 25·00 |

## ANIMAL HUSBANDRY AND VETERINARY

The Animal Husbandry and Veterinary services of the district are in charge of a District Animal Husbandry and Veterinary Officer, whose headquarters is at Chatrapur. There were in 1963, 23 Veterinary Dispensaries and 59 Stockman centres in the district. Under the Poultry Development schemes, a Demonstration Farm with a strength of 100 birds has been set up at Bhanjanagar, and expanded nutrition programme for supply of eggs to feed expectant and nursing mothers is worked out in two of the Development Blocks. There is one Artificial Insemination Centre at Bhanjanagar with 3 sub-centres. 46 bulls are also maintained in Bull centres for natural breeding purposes in the district. There is a Dairy Farm at District Livestock Breeding Farm, Bhanjanagar with 233 cattle heads. This is a scheme for comparative study of Ghumusur cows with those of Hariana-graded cows. The average yield per day is 2·2 lbs in case of Ghumusur cows, whereas graded cows produce on an average of 3·12 lbs of milk per day. The common cattle diseases are Parasitic diarrhoea and Natal granulema. There were outbreaks of Rinderpest in the district during the past decade, but the same were immediately brought under control.

Between the two livestock censuses of 1957 and 1961, the total livestock recorded at 688,866 in 1957 increased to 1,128,495 in 1961. There was increase in number of all categories of livestock and among them an appreciable increase was noticed in the number of buffaloes, sheep and goat, whose number went up to 105,955, 67,767 and 129,903 in 1961 from 71,488, 33,286 and 69,494 respectively recorded in 1957. Among the districts it has the least number of poultry birds and also fewer numbers of cattle and sheep.

## PUBLIC HEALTH

**Organization**

The public health activities and medical services of the district are under the charge of a District Health Officer and a Civil Surgeon respectively. Both of them are stationed at Chatrapur. Their jurisdiction covers the entire district of Ganjam. The district had in April, 1961, 12 hospitals,

41 dispensaries and 11 primary health centres. 537 beds in all for in-door patients are available in these hospitals and primary health centres, which had 64 doctors and 15 kavirajs. Treatment at the Government institutions is given free. 12 family planning centres have been opened in the district, the earliest of them being the one at Berhampur town, started in 1956.

**Vital Statistics—Registration system**

Being one of the older districts of the State, it had the benefit of the registration system for collection of vital statistics from an earlier period. The Madras Registration of Births and Deaths Act, 1899 (Act III of 1899) is in force in the district on account of its being formerly a part of the Madras Presidency. Unlike the procedure followed in other districts of the State, information about vital occurrences in the district are collected by the village head-men in the rural areas. They report them monthly to the Taluk Officer, who forwards these returns monthly direct to the Director of Health Services, Orissa. For the urban areas, the events are collected by the health staff of the Municipalities and are sent by them directly to the Director of Health Services, Orissa. There are 10 towns in the district according to 1961 Census records. But of them, the Municipal towns of Berhampur and Parlakhemundi are treated as urban areas for collection of these statistics. The system of village head-men has since been abolished, and the collection of the vital statistics in rural areas is now a responsibility of the Grama Panchayats.

Out of the total area of 4,725 square miles and population of 1,872,530 in the district, registration system has covered only 3,974·00 square miles and 1,795,234 persons respectively. Thus nearly 4·13 per cent of the population are not yet covered by the registration system. It was not possible to spread registration system into these left over area mostly due to its backwardness, where a tolerably literate person to be in charge of the collection of vital events is not generally found.

**Births and deaths**

During the decade, 1951-60, death of 273,406 persons occurred, and 414,196 births took place in the registration areas in the district. Thus, only 140,790 persons added to the population of the district during this period, out of which 75,834 were males and 64,956 females. The increase of population between 1961 and 1951 Censuses for the registration area has, however, been 219,420. The difference between the increase in population indicated by vital statistics and the Census records cannot be explained to be due to only the migration gain. Incompleteness of vital statistics records also accounts for the discrepancy.

**Registration rates**

The decennial birth and death rates for 1951-60 of the district were 24·6 and 16·3 per mille respectively against 25·4 and 24·7 for the earlier decade of 1941-50. The annual rates for the 10 years during 1951-60 were as follows :

| Year | Birth rate per 1,000 population | | | Death rate per 1,000 population | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1951 | 29·5 | 29·4 | 31·1 | 26·0 | 26·6 | 16·6 |
| 1952 | 24·2 | 23·7 | 32·4 | 15·8 | 15·9 | 14·1 |
| 1953 | 26·5 | 26·1 | 32·9 | 20·3 | 20·6 | 13·8 |
| 1954 | 23·6 | 22·8 | 37·5 | 13·3 | 13·4 | 12·3 |
| 1955 | 25·0 | 24·0 | 43·3 | 13·4 | 13·4 | 13·2 |
| 1956 | 23·1 | 21·8 | 46·9 | 12·0 | 11·9 | 13·5 |
| 1957 | 24·1 | 23·3 | 38·0 | 15·5 | 15·4 | 18·2 |
| 1958 | 24·4 | 23·2 | 44·7 | 21·3 | 21·2 | 22·4 |
| 1959 | 25·2 | 23·9 | 47·7 | 15·2 | 14·8 | 21·5 |
| 1960 | 21·2 | 19·3 | 53·2 | 10·6 | 10·2 | 17·3 |
| 1951-60 (Decennium) | 24·6 | 23·7 | 41·0 | 16·3 | 16·2 | 16·4 |

Coming to a comparison of the decennial rates for 1941-50 and 1951-60, it will appear that the rates have fallen down in the latter decade and more so in case of deaths. The fall in birth rate (24·6 recorded for 1951-60 against 25·4 in 1941-50) is less than one point and may be justified. But it cannot be explained that on account of various public health facilities and medical attention now available after execution of development plans, death rate has gone down by about $\frac{1}{3}$rd of what it was during the decade 1941-50. The disparity in annual death rates is also great so much so that from 26·0 in 1951 it has gone down to 10·6 in 1960, a rate, which a more developed country aspires to achieve. Apparently, death registration has not worked well in this district and the rates recorded are fantastic.

Though the over-all position with regard to registration of births is better than registration of deaths, the system worked more efficiently in rural areas than in urban areas. The highest annual birth rate for urban areas during the decade is recorded at 53·2 in 1960 and lowest rate at 31·1 in 1951. On the other hand, the highest rate in rural area is 29·4 recorded during 1951 and the lowest at 19·3 in 1960. The foregoing Table also indicates that the rates in rural and urban areas do not follow the same trend. When one is on ascendancy, the other is descending.

**Causes of death statistics**

According to recorded causes of mortality, deaths from different diseases and their proportion to total deaths during the decade 1951-60 were as follows :

| | | Deaths | Percentage to total deaths |
|---|---|---|---|
| Cholera | ... | 5,079 | 1·86 |
| Smallpox | ... | 12,223 | 4·47 |
| Fever | ... | 128,090 | 46·85 |
| Dysentery and diarrhoea | ... | 15,247 | 5·58 |
| Respiratory diseases | ... | 8,374 | 3·06 |
| Wounds and accidents | ... | 3,047 | 1·11 |
| Other causes | ... | 101,346 | 37·07 |
| Total | ... | 273,406 | 100 |

As usual in the State, largest mortality in the district was due to fever and the next largest, due to the group of diseases classified under 'Other causes'. Dysentery and diarrhoea and smallpox rank serially thereafter as killers of human beings.

**Fever**

In common with other parts of the State, people in the district suffer greatly from fever. The mortality on account of fever constituted 46·85 per cent of total deaths during the past decade. But fever alone might not have accounted for this large mortality during the past decade. The primary collectors of vital statistics possess very little knowledge to diagnose the true causes of death other than some of the specific and well known diseases like smallpox and cholera. They often misclassify deaths from several other diseases under fever. But such misclassification may not be in too many cases so as to alter the trend of mortality very much in this district. Forests cover about 35 per cent of the total area of the district and these hilly tracts possess an unhealthy and malarial climate. Malaria, the principal of the fevers is endemic in the district. Deaths from fever are recorded all the year round, but mortality is generally greater in the rainy season and particularly in the months of August, September and October. A total number of 565,347 malaria cases were reported to have been treated at the hospitals and other medical institutions in the district during the past decade. The attendance of such patients at hospitals has, however, fallen down from 1958 onwards.

**Cholera**

Next to fever, the largest mortality has been on account of "Other causes". The group' 'Other causes" combines various diseases other than cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases and wounds and accidents. All these groups, except cholera and smallpox, are heterogeneous and combine diseases which some times differ from each other in their characteristics. During the decade 1951-60, both cholera and smallpox were prevalent in the district. Cholera was endemic for all the 10 years, but deaths during

1957 and 1960 were few being only 64 and 39 respectively. The greatest mortality from cholera was in the year 1951, when 1,978 persons lost their lives. During that year its incidence began to be felt from March. It assumed an epidemic form in April and kept its tempo up to the end of July. The deaths in the months of March and April were greater, being 349 and 635 respectively. Worst affected in this epidemic were the police station areas of Aska, Berhampur, Bhanjanagar, Kodala and Parlakhemundi.

**Smallpox**

The decade opened with a smallpox death of 1450 in the year, 1951, the highest mortality being 224 in the month of May that year. Smallpox was prevalent in all the years of the decade. The highest mortality was in the year, 1958 when as many as 7,924 persons died from this cause. Deaths began rising from December, 1957, and in January, 1958, the mortality went up suddenly to 665 against only 107 recorded in the previous month. The subsequent months also recorded equally high casualties, the highest being 859 in the month of August, 1958. The disease continued to take heavy tolls each month till the end of June, 1959, though there was a lull in the month of April. From July, the mortality diminished to a very great extent, and till the end of the decade, deaths from smallpox continued to be reported. In the epidemic year of 1958, as many as 228 persons died in Berhampur Municipality area alone. Among the police station areas, worst affected were Berhampur, Bhanjanagar and Kodala, the highest mortality being in Berhampur.

**Infant deaths**

The total infant mortality during the decade, 1951-60, was 69,775, and it constituted 25·52 per cent of total deaths. The highest number of infant deaths was recorded in 1951. 35·71 per cent of total deaths were of children of pre-school going age. The decennial infant death rate for the district is 168·5 per mille of live births. This rate is higher than the State average rate, which is 145·6. The highest annual mortality rate in the district was recorded at 252·4 in the year 1957 and the lowest rate, 74·2 in 1960. A fall by nearly 178 points in infant mortality rate during a period of 3 years i.e., from 1957 to 1960 may be anything but real. The decennial rates of infant mortality were 173·6 for rural areas and 91·0 for urban areas.

## COMMUNITY DEVELOPMENT AND PANCHAYATI RAJ

**Community Development**

The Community Development programme aims at all round development of rural areas and was inaugurated in the State in October, 1952. The original pattern was to have Community Projects and Community Development Blocks with total budgetary allotments of Rs. 65 lakhs and Rs. 15 lakhs respectively and period of operation for 3 years each. This pattern changed quickly, and from 1954, it was replaced by 3 stages of Development Blocks, namely, National Extension Service Blocks, Community Development Blocks and Post-Intensive Blocks, which were to run seriatim. The period of operation of a National Extension Service Block was ordinarily 3 years, and after the progress of development reached a certain standard and the Block had done a minimum of about 2-2½ years, it was to get converted into a Community Development Block. After completion of the Community Development term, the Block was to enter into Post-Intensive phase under which a provision of Rs. 30,000/- was available annually for expenditure on local works and social education for a period of 3 years. The National Extension Service and Community Development Blocks had budgetary allotments of Rs. 4 lakhs and Rs. 12 lakhs respectively. This pattern also did not last long and the 3 stages of development were concised into 2 stages, namely, Stage I and Stage II. Each of these phases lasts for 5 years with financial allotments of Rs. 12 lakhs and Rs. 5 lakhs

respectively for Stage I and Stage II. The Stage I period is preceded by a pre-extension period of one year with a provision of Rs. 18,800/- for activities exclusively in the field of agriculture, the expenditure thus incurred being ultimately adjusted against Stage I budget. This revised programme came into operation with effect from 1-4-1958 and is still in force. All the N. E. S. Blocks existing then were taken under Stage I and the Post-Intensive Blocks under Stage II. The Community Development Blocks were allowed to complete their full term and then revert to Stage II. With the revision in pattern, the original programme of covering the entire State with the Blocks by the end of the Second Plan period was staggerred, the number of Blocks increased and the full coverage by Blocks deferred till October, 1963.

The normal population coverage of a Block is 66,000 for plain areas and 25,000 to 30,000 for tribal areas, and on this basis, the district has been delimited into 29 Blocks. The district had one of the 3 Community Projects of 1952, the earliest allotments to the State under this programme. A Community Project was set up at Bhanjanagar on 2-10-1952, which completed its term on 30-9-1957. With effect from 1-10-1957, the Project was delimited into 4 Blocks, namely, Bhanjanagar I and II, Buguda and Jaganathprasad and they continue as such to date. At the end of the Second Plan period i. e., on 31-3-1961, there were 21 Blocks in all covering an area of 2,257 square miles. Out of these Blocks, 13 were in Stage I, 6 in Stage II and 2 in Pre-Extension phases.

With the Panchayati Raj scheme coming into action, Panchayat Samitis are now responsible for planning and execution of the Block programme according to the needs of the community. The Block funds are placed at the disposal of the Panchayat Samitis as grants-in-aid and loans for implementation of various development schemes. Although the emphasis is on agriculture and industry, priority is given in the Block programme for provision of supply of water for irrigation and drinking purposes, education, medical and communication facilities. A total expenditure of Rs. 1,63,92,383 was incurred on the Community Development programme in the district up to the end of 1960-61, the break-up of which under broad heads of development is as follows :

| | | Rs. |
|---|---|---|
| Staff, contingencies and block buildings | ... | 42,53,588 |
| Animal husbandry and agricultural extension | | 9,56,615 |
| *Irrigation* | ... | *43,59,419* |
| Health and rural sanitation | ... | 14,02,540 |
| Education | ... | 7,65,885 |
| Social education | ... | 9,19,250 |
| Communication | ... | 21,94,701 |
| Rural arts, crafts and industries | ... | 3,79,267 |
| Housing | ... | 11,61,118 |

Among the achievements under this programme up to the end of 1960-61, important are the undertaking or completion of 764 minor irrigation projects, functioning of 927 co-operative societies and opening of 8 primary health centres. Under social education programme, 189 Mahila Samitis were started and 43,169 adults were made literate. The achievements under communication programme are construction of 427 miles of roads and 406 bridges and culverts.

**Grama Panchayats**

In the beginning, Grama Panchayats in the State were responsible mostly for municipal functions in the rural areas. As years went by, their activities extended to execution of development schemes. Under the Community Development programme, which was initiated during the First Five Year Plan period, the Grama Panchayats were given a more active role in the execution of development activities in their areas. To begin with, they functioned as agencies of the Government for execution of the development programmes, but towards the later part of the Second Plan period, they began to plan and execute their own programmes of development. These changes of democratic decentralization of power subsequently brought in the present Panchayati Raj

system, which is a 3-tier system with the Grama Panchayat at the village level and the Zilla Parishad at the district level, the intermediate level being taken by the Panchayat Samiti.

A Grama Panchayat normally covers 5,000 persons, but this limit is relaxed in special cases. The constitution of Grama Panchayats is regulated by the Orissa Grama Panchayat Act, 1948. A Sarpanch is at the head of a Grama Panchayat and he is assisted by a Naib Sarpanch. The Grama Panchayat members are elected by the villagers on the basis of adult franchise, and from amongst them are elected a Sarpanch and Naib Sarpanch all of whom hold their office for a period of 3 years. A paid Secretary maintains the accounts and records of the Grama Panchayat. The Grama Panchayat fund is made up of grants and loans received from the Government, as also of taxes and other internal incomes arising out of various schemes, such as, pisciculture, co-operative societies, poultry development, markets, ferries, etc. The fund is usually lodged in a Savings Bank account at the nearest Post Office. Village sanitation, maintenance of public roads, lighting and public tanks, scavenging, public health, registration of births and deaths are some of the important functions of a Grama Panchayat.

There were 64 Grama Panchayats in the district during 1951-52 and their number increased to 291 in 1959-60. With the increase in number, the income and expenditure of the Grama Panchayats have also gone up. From the total income of only Rs. 2,33,111 and expenditure of Rs. 2,30,917 during 1953-54, the amounts went up to Rs. 7,36,015 and Rs. 8,80,198 respectively in the year 1959-60. Taxes alone yielded a total revenue of Rs. 1,10,504 during the year 1959-60, the highest collections being on account of Panchayat Tax, which amounted to Rs. 47,884. From other sources, i. e., lease of market sheds, fees from cattle pounds, irrigation, pisciculture, ferries and ghats, licence fees, etc., the Grama Panchayats got Rs. 1,67,059 during 1959-60. Government grants during the year amounted to Rs. 1,58,352. Loans to the tune of Rs. 3,00,100 including paddy loans for Rs. 1,95,000 and loans for pisciculture amounting to Rs. 65,000, were also received from the Government. The expenditure included pay and allowances of staff and contingencies and the costs of development and other works being Rs. 1,80,755 and Rs. 6,99,443 respectively.

The Grama Panchayats in the district maintain village police, the total number of which was 73 by the end of 1959-60.

Adalti Panchayats began functioning from 1952-53. In a period of 7 years from 1953-54 to 1959-60, these Adalti Panchayats handled as many as 3,712 cases, out of which disposal was 2,703. The highest number of cases brought for consideration and disposed of in any year were 834 in 1956-57 and 662 during 1955-56 respectively.

The yearwise details of number of Grama Panchayats, villages covered, number of Adalti Panchayats, cases handled by Adalti Panchayats, number of village police maintained by Grama Panchayats, income and expenditure of Grama Panchayats for the years 1951-52 to 1959-60 have been given separately in a Table in Part III.

**Panchayat Samitis**

In accordance with the provisions of the Orissa Panchayat Samitis and Zilla Parishad Act, 1959, Panchayat Samitis have been established in the State. The district has been delimited into 29 Panchayat Samitis and all of them functioned simultaneously with effect from 26th January, 1961. A Panchayat Samiti is coterminous with a Development Block. Of these Panchayat Samitis, 29 had Community Development Blocks already and the remaining 10 were Shadow Blocks or areas demarcated to have Community Development Blocks in due course.

Panchayat Samitis are largely elected bodies, and consist of both official and non-official members, the official members being the Block Development Officer and the representatives of various Departments of the State Government ordinarily stationed at the Block level. The non-official members are Sarpanchs of Grama Panchayats and an additional

representative elected from each Grama Panchayat area not being a member of the Grama Panchayat. Due representation of women and Scheduled Castes and Scheduled Tribes is secured in membership of the Samiti. Both official and non-official members take part in the discussions of the Panchayat Samiti meetings, but the official members are not entitled to vote. Non-official members of the Panchayat Samiti hold their office for a period of 4 years. At the head of the Panchayat Samiti is a Chairman who is assisted by a Vice-Chairman, and both of them are elected from among the non-official members. The Chairman generally presides over meetings of the Panchayat Samitis, and in his absence, the Vice-Chairman takes the chair. The Panchayat Samiti meets in the minimum once in every alternate month. The Chairman gets an honorarium of Rs. 100/- per mensem and is provided with rent-free accommodation or Rs. 50/- as house-rent allowance in lieu thereof.

A Samiti plans, executes and supervises over all development programmes in its area. It is also responsible for control and spread of primary education, management of trusts and endowments, which the Government may entrust, vaccination, registration of births and deaths and supervision over the work of Grama Panchayats within its jurisdiction. Keeping in view the felt needs of the people and broad outlines of the schemes indicated by the Government, the Panchayat Samiti prepares its annual budgets and proposals, and submits them to the Zilla Parishad for approval. The schemes are executed after Zilla Parishad has sanctioned them. There is a Panchayat Samiti Fund fed by grants and loans from the Government as also aids from all-India bodies and institutions, donations and contributions, etc., and it is lodged at the nearest Government treasury. The Block Development Officer, as the Executive Officer of the Panchayat Samiti, draws on this fund as and when necessary by issue of cheques. The main sources of income of the Panchayat Samiti are the loans and grants from the Government which are generally routed through the Zilla Parishad. The Community Development funds are, however, directly paid to the Samiti. The work and accounts of the Panchayat Samiti are open to audit and inspection by the Government officials.

**Zilla Parishad**

A Zilla Parishad is the highest institution immediately below the State level in the Panchayati Raj system. The Parishad has both official and non-official members. The official members are the Collector, the Subdivisional Officers and the District Heads of different Departments of the State Government. The Chairman of all the Panchayat Samitis in the district, M. Ps., M. L. As. and Members of Rajya Sabha elected from the district are the non-official members of the Zilla Parishad. One of the non-official members is required to be a female. The Parishad is headed by a Chairman who is assisted by a Vice-Chairman, and both of them are elected from amongst its non-official members. The tenure of office of all non-official members including the Chairman and the Vice-Chairman is 4 years. The Parishad is required to meet at least once in every 3 months and all such meetings are generally presided over by the Chairman and in his absence, by the Vice-Chairman. Official members take part in the discussions in the meetings of the Parishad, but have no right of voting. The Chairman of Zilla Parishad gets every month an honorarium of Rs. 200/- and house rent allowance of Rs. 50/-.

The Zilla Parishad mainly approves of the schemes and budgets of Panchayat Samitis, distributes funds among them and supervises over the execution of the various schemes. The day to day work of the Parishad is managed by an Executive Officer, who belongs to Orissa Administrative Service, Class I. The Zilla Parishad has also a fund to which the grants and loans from the Government, aids from all-India bodies and internal incomes are credited. The money is lodged in an account at the Government treasury. The Executive Officer of the Zilla Parishad functions as drawing and disbursing officer in respect of this fund.

The Zilla Parishad for Ganjam district functioned with effect from the 13th February, 1961 and its headquarters is at Chatrapur.

## CO-OPERATION

The co-operative movement plays an important part in providing credit on reasonable terms and conditions to the local people. The re-organization of credit co-operative societies at all levels and the strengthening of credit structure with State-participation in the share-capital was one of the most important features of the co-operative movement during the past decade. The weaker units were provided with share-capital contribution and were given subsidy for maintaining trained and efficient managerial staff. Several new schemes were put into operation and old societies were re-vitalized.

The agricultural co-operative societies advance loans, both in cash and in kind. Most of them give loans on short-term basis, whereas there are others to advance medium-term credits. There is provision for grant of long-term loans also. Short-term loans generally include cash, nucleus paddy seeds, green manure seeds, chemical fertilizers and other production pre-requisites including insecticides, agricultural implements, etc. Funds required for sinking or repair of wells, purchase of cattle and agricultural machineries and cost of minor improvements to land are some of the items classified under medium-term loan. The non-agricultural co-operative societies do not, however, advance any loan.

The co-operative movement in the district made steady progress during the past decade. The total number of primary co-operative societies existing during 1960-61 was 1,254 and there were two Central Banks. The membership and working capital in the primary co-operative societies were 212,877 and Rs. 3,86,05,002. These work out to one member of primary society in every 88 persons in the district and Rs. 181 for each member of primary society. Small-sized credit societies form the bulk of the societies and the next highest number is that of graingolla societies. These two categories of societies have the highest number of members too. In the matter of working capital, however, though the small-sized credit societies have the largest amount, the multipurpose societies own the next highest amount of capital. A table in Part III shows the number, membership and working capital in respect of various categories of societies in the district during 1960-61.

The two Central Banks at Aska and Berhampur provide finance to the primary societies in the district. The two banks together had a membership of 1,188 and working capital amounting to Rs. 1,53,57,648. Berhampur Co-operative Central Bank is considered to be the best Central Bank in the State.

## NATIONAL SAVINGS

The National Savings movement was at first started during the earlier years of the Second World War and was then called the Defence Savings Scheme. Its objectives were to collect money for defence purposes and to fight inflation. During the post-war period, the activities of this movement were directed towards inculcating the habit of thrift among the people so as to obtain savings for augmentation of the resources for financing the Five-Year Plans. In recent years, it is also helping in collecting funds to strengthen the defence in the National Emergency. The scheme was more or less on an experimental basis till 1948. In 1949 it was spread over to all the districts in the State including Ganjam.

The various National Savings securities now available are the 12-Year National Defence

Certificate, the 10-Year Defence Deposit Certificate, the 15-Year Annuity Certificate, the Premium Prize Bonds, the Cumulative Time Deposit Scheme and the Post Office Savings Bank Accounts. The securities are available in different denominations and carry varying rates of interest. The gross and net sale-proceeds from all the National Savings securities in the district during the past three years are given below :

| Years | Gross sale | Net sale |
|---|---|---|
| | (In thousands of rupees) | |
| 1960-61 | 55,36 | 10,67 |
| 1961-62 | 72,58 | 13,18 |
| 1962-63 | 67,70 | 9,12 |

## PLACES OF INTEREST

**Chatrapur**

It is the headquarters of the district. Most of the district offices are located here. A small town with a population of 7,835 in 1961 Census, it has a Notified Area Council. It became the headquarters of the district from the beginning of the 20th century. Being situated at a distance of about 3 miles from the sea coast, the town enjoys a temperate climate. It has electricity, a cinema, a higher secondary school and a 30 beded Government hospital in addition to a police hospital having 16 beds. The district Armed Police Reserve is located here. There is a small bazar. Calcutta-Madras National Highway passes through the town, and it is served by two railway stations, Chatrapur and Chatrapur Court Passenger Halt on Howrah-Madras line of South Eastern Railways. The town starts from the vicinity of the stations.

**Berhampur**

The chief town of the district, it is also the headquarters of Berhampur subdivision. Among the important Government offices located here, are Revenue Divisional Commissioner's Office, and offices of the Deputy Inspector General of Police, Southern Range, Assistant Commissioner of Commercial taxes and Deputy Director of Agriculture. The town has a population of 76,931 (1961) and has a Municipality. It is surrounded by extensive cultivated plain areas and is a town of commercial importance. There is a Medical College, an Engineering School, 2 Government Colleges, one of which, namely, Khalikote College has provision for post-graduate teaching. The district headquarters hospital with 168 beds is also located here. It is the headquarters of Orissa Road Transport Company, which runs buses, in addition to district, on inter-district service routes connecting important towns of Baudh-Khondmals, Puri and Cuttack districts. The town starts from the Railway Station bearing the same name (on Howrah-Madras route of South Eastern Railways) and the main bazars are about 1½ miles from the station. It also lies on Calcutta-Madras National Highway. The town has got electricity, cinemas, printing presses and a fairly big bazar including vegetable market, which meets the needs of most of the towns and villages of the district as also of Baudh-Khondmals. The tusser and silk weaving industry of this place is famous. The most important festival of the town is Thakurani Jatra, which is performed in alternate years and continues for a number of days.

**Bhanjanagar**

It is the headquarters of Ghumusur subdivision. The town was formerly known as Russelkonda, and has been re-named as Bhanjanagar after the name of the great Oriya poet Upendra Bhanja, who was born at Kulard, a village 5 miles away from the town. Bhanjanagar is a well planned town having electricity. It is the central mart for disposal of produce of hills, chiefly wheat, turmeric, wax, honey, hides, horns, which the Khonds exchange for salt, fish, iron, brass, etc. One of the earliest Community Projects of the State had its headquarters here in 1952. The reservoir, about 2 miles away from the town, provides a pleasing natural scenery. In addition to providing irrigation facilities, it also supplies drinking water to

far off Berhampur and Chatrapur towns. A small river Laharakhandi flows by the town. The town is 50 miles to the north of Berhampur connected by regular bus services. Its population in 1961 was 9,952, and there is a Notified Area Council.

**Parlakhemundi**

Formerly, the headquarters town of Parlakhemundi estate, it is now the headquarters of Parlakhemundi subdivision. Among the attractions in the vicinity of the town, is a small waterfall called Gandahati. The town has a first grade Government College, which provides teaching in both arts and science subjects. The horn works and bamboo basketry of this place are famous. The town has a small bazar with a population of 22,708 in 1961. There is a Municipality and the town is electrified. The place is reached by railway by travelling from Naupada, a junction station on Howrah-Madras route of South Eastern Railways, from which the narrow gauge railways run up to Gunupur in Koraput district. The most commonly used route is to travel up to Palasa, a station on the Howrah-Madras route of South Eastern Railways and then to take a bus to Parlakhemundi. One can also travel by road from Berhampur to Parlakhemundi, which is connected by regular bus services.

**Gopalpur**

A health resort of fame, its sea view is charming. Formerly, it was a port of call for the coastal trading ships of British India Steam Navigation Co., and many other vessels. It is now in a derelict condition. The town has a Notified Area Council and its population in 1961 was only 3,536. There are many good hotels, the principal among them being Palm Beach hotel. There is an Inspection Bungalow under the P. W. D., and also a Revenue Rest Shed. The town has electricity, a small bazar and is connected by regular bus services with Berhampur, which is 8 miles away from the place. The Air Strip at Rangeilunda is about 4 miles off.

**Mahendragiri**

A peak on the Eastern Ghats at a height of 4932 ft above sea level is of mythological importance. The bungalow near the summit commands a magnificent view. Two streams, called Mahendratanaya, rise from the peak, one of which flows southwards to Parlakhemundi and joins the river Vamshdhara and the other passes through Budasing and Manjusa before reaching sea. On the top of Mahendragiri, there are four temples built of enormous blocks of stone, which are of archaeological interest. The inscriptions prove the high antiquity of the place. The most important festival is Sivaratri. The place is about 30 miles from Parlakhemundi. One has to go on foot over the Ghats to reach the place. The ascent is tiresome.

**Jaugada**

It is a fort in ruins about 18 miles west of Chatrapur on the north bank of the river Rushikulya in Berhampur Taluk. In the centre of the fort, is a huge granite mass on which are inscribed 13 edicts of Ashoka. It was once a large walled city. Some of the copper coins found in the area are assigned to the 1st century A. D.

**Taptapani**

It is famous for the hot spring. It is about 32 miles from Berhampur situated on roadside on Berhampur-Mohana road near Luhagudi. The place is of much scenic beauty and provides scope for big games. There is a Dak Bungalow near the spring.

**Khallikote**

It is the erstwhile headquarters of Khallikote Zamindary. A battle is said to have been fought against the forces of the East India Company at this place, when the latter wanted to occupy the estate. There is a perennial spring called Nirmal Jhar, at the base of the temple at hill-toe at this place. Its Railway Station, Khallikote, is 3 miles from the town and is connected by bus services. It is now the headquarters of a Community Development Block. Its population in 1961 Census was 3,365.

**Aska**

Situated on the road from Berhampur to Phulbani, Aska is a small town with a population of 9,024 (1961). It has a Notified Area Council. It is also a place of commercial importance and the town has a busy market. In the heart of the town is a sugar factory run by a co-operative societiy. There is a Community Development Block here and it is also the headquarters of a police station.

**Borokuda**

A small island inside the Chilka Lake, about 3 miles from Rambha, a station on Howrah-Madras line of South Eastern Railways. It is a good picnic spot and the place abounds in deer and stags. One can reach this place only on boat over the lake.

**Bellaguntha**

In Bhanjanagar police station, it was the headquarters of one of the Blocks of Bhanjanagar Community Projects of 1952 series. There is an Industrial Training Institute here and the place is famous for bell-metal works. It is reached by road from Bhanjanagar. Its population in 1961 was 5,762.

**Buguda**

Headquarters of a police station, it lies on Cuttack-G. Udayagiri bus route. About three miles from Buguda at Budhakhol, there is a waterfall from a height of about 800 ft. Budhakhol is a place of historic importance, where a temple of Lord Buddha and a few caves in the midst of the hills are found. It is an ideal place for picnic surrounded by natural sceneries.

**Rambha**

It is a centre of export for fish caught from the Chilka Lake. The headquarters of a police station, it is served by a Railway Station on Howrah-Madras route of South Eastern Railways. Population of Rambha in 1961 was 4,720. The small town overlooks the great Chilka lake which provides facilities for rowing and shooting.

**Surada**

It is a small town with a population of 8,703 (1961) at the foot of a hill. Close to the town is a water reservior, that provides irrigation. The river Rushikulya flows past the town. It is noted as a commercial centre, the main commodities on sale being the produce of hills, chiefly, turmeric, timber, chillies, hide, horn, etc.

**Huma**

A small village in Rambha police station, it is situated close to Calcutta-Madras National Highway between Rambha and Chatrapur. It is a noted salt manufacturing centre, where manufacture is done in the process of evaporation of saline water. Large number of fields covered with saline water, in the process of drying, presents an interesting sight to the passers-by. A Superintendent of Central Excise (Salt) has his headquarters here. Its population in 1961 was 2,862.

***Ganjam***

It is a small village with a population of 3,811 (1961), nearly 5 miles to the north-east of Chatrapur. It was formerly the chief town and the headquarters of the district. Severity of fever compelled change of the headquarters to Chatrapur in the beginning of the 20th century. The town is on the bank of river Rushikulya and it was of commercial importance in old days. There is a picturesque fort nearby, and the cemetery adjoining contains interesting monuments.

***Chilka lake***

The Chilka lake is a shallow inland sea situated in the extreme south of Puri district and extends further into the district of Ganjam. It is separated from the Bay of Bengal by a group of islands formed by silt deposits and by a long strip of land, which, for miles, consists of nothing but a sandy ridge little more than two hundred yards wide. It communicates with the Bay of Bengal by a narrow inlet through the sandy bar thrown up by the sea, an inlet which in some years, has to be kept open by artificial means. On the south-west, it is walled

in by lofty hills, at some places, descending abruptly to the water's edge and at others, thrusting out arms and promontories of rock into the lake. To the north, it loses itself in endless shallows, sedgy banks, and islands just peeping above the surface, formed year by year from the silt, which the Daya and other rivers bring down. Thus, hemmed in between the mountains and the sea, the Chilka, spreads itself out into a pear-shaped expanse of water forty-four miles long, of which the northern half has a mean breadth of twenty miles, while the southern half tapers into an irregularly curved point, barely averaging five miles wide.

Its area fluctuates with the season with the intensity and duration of the annual floods and with the ebb and flow of the tide. Its area is 344 square miles in dry weather and about 450 square miles during the rainy season. The average depth is from five to six feet and scarcely anywhere exceeds twelve feet, except in the south-west. The bed of the lake is a few feet below the level of sea water. The neck, which joins it to the sea, is only two hundred to three hundred yards broad.

Among the seasons, winter is good for boating and shooting of birds. The railway stations commonly made use of to have trips inside the lake are Rambha and Khallikote, both of which lie on Howrah-Madras route of South Eastern Railways. It is also an important source for supply of fish, which are exported outside the State.

## CALENDAR OF IMPORTANT EVENTS

1851 — Mohuri Zamindari sold for arrears of revenue.

1853 — Saora mutiny

1854 — Road making commenced in the district of Ganjam.
Athagada Zamindari sold to Raja of Khallikote for arrears of revenue.

1855 — Disturbance in Ghumusur

1856 — Saora disturbance in Parlakhemundi. Establishment of Government Zilla school at Berhampur, which was subsequently raised to the status of a 2nd grade college by Government in 1879. The management of the institution was handed over to a private committee in 1888 and the college was named as Native College, Berhampur. In 1894, the Raja of Khallikote donated Rs. 1 lakh as an endowment fund for the college and since then the college is named as Khallikote College.

1857 — Opening of Onslow Institution at Chatrapur, the first institution to teach English.

The present S. K. C. Gajapati College, Parlakhemundi began as a primary school. In 1878, this primary school was raised to the standard of a first grade middle school, and in 1884, it was recognized as a first grade high school. In 1896, the school became a second grade college and its status was raised to first grade in 1936.

1861 — Block Survey in Parlakhemundi area started.

1862 — Meriah agency, which was created by the Government of India in 1845 to suppress Meriah sacrifice (human sacrifice prevalent among tribal population) was abolished. Construction of District Jail at Berhampur, which has since been converted into the Central Jail for Orissa.

| | | |
|---|---|---|
| 1865 | — | Ghumusur proper along with Surada taken out from the jurisdiction of agency. |
| | | Rising of Khonds |
| 1866 | — | Outbreak of a severe famine in Ganjam, called *Na-anka.* |
| 1867 | — | Block survey in Parlakhemundi area completed. |
| 1871 | — | Constitution of Ganjam District Board. |
| 1872 | — | Sanakhemundi agency taken away from the management of Sanakhemundi Zamindar. |
| 1875 | — | Berhampur Municipality formed. |
| 1876-78 | — | Outbreak of a severe famine |
| 1877-78 | — | Settlement commenced in the district. |
| 1879-80 | — | Settlement of the district completed. |
| 1884 | — | Establishment of Girls' High School, Berhampur |
| 1886 | — | Municipality established at Parlakhemundi. |
| 1888-89 | — | Outbreak of a severe famine |
| 1890 | — | Survey for laying of railway lines started. |
| 1892 | — | Opening of Mahanadi Canal |
| 1893 | — | Opening of Jubilee Hospital (Government hospital) at Berhampur |
| 1894 | — | Opening of Rushikulya canal |
| 1908 | — | Heavy cyclone in the district |
| 1909 | — | Outbreak of a severe famine |
| 1912 | — | Heavy cyclone in the district |
| 1934 | — | High floods in the river Rushikulya |
| 1939 | — | Heavy cyclone in the district. Aska Multipurpose Co-operative Society formed. |
| 1941 | — | Pana and Saora trouble started in Ganjam Agency. |
| 1942 | — | Heavy cyclone in the district. Gopalpur port closed. |
| 1951 | — | Formation of Orissa Road Transport Company. |
| 1952 | — | A Community Project, one of the earliest projects allotted to the State inaugurated at Bhanjanagar. |
| 1953 | — | All permanently settled estates in the district abolished. |
| 1956 | — | Parlakhemundi subdivision formed. |
| 1957 | — | Management of Anchal forests handed over to the State Government. |
| | | Government school of Arts and Crafts at Khallikote, the only one in the State, established. |
| 1958 | — | Intermediate Arts College for Women started at Berhampur. |
| 1960 | — | Opening of Bhanjanagar College |
| 1961 | — | Ganjam District Board abolished. Zilla Parishad for the district formed. |

# CENSUS TABLES

*Contains*

General Population Tables—A-I to A-IV with appendices, General Economic Tables—B-I and B-III to B-IX, Household Economic Tables—B-X to B-XVII, Social and Cultural Tables—C-I, C-II, C-III, C-V, C-VII and C-VIII, Housing and Establishment Tables—E-I to E-V, Tables on Scheduled Castes and Scheduled Tribes—SCT-I to SCT-V, SC-I, ST-I and ST-II, Villagewise List of Industries and List of Fairs and Festivals.

# TABLE-A SERIES

## GENERAL POPULATION TABLES

General Population Tables comprise four Tables A-I to A-IV which are briefly described below.

2. **Table A-I—Area, Houses and Population**—This Table supplies information regarding area, number of inhabited and uninhabited villages, number of towns and sexwise population for each police station and subdivisioni n the district.

3. The area shown n Col. 3 (a) is based on the figures received from the local revenue authorities who also maintain the area figures relating to smaller units, such as, police stations. The Surveyor General, India has not got area figures for units below the district and so the area of the district as received from him has not been adopted. The area in Sq. Kms shown in Col. 3 (b) has been calculated at the rate of 1 square mile = 2·590 square kilometres.

4. **Definitions**—The definitions of the terms village, town, house, occupied residential house, houseless persons and institutional population are given in the fly-leaf to Table A-I in the Census Report of 1961, Vol. XII (Orissa), Part II-A.

5. There are three appendices to this Table which are as follows :

(*i*) Appendix I shows the changes in the jurisdiction of the Police Stations and Subdivisions since 1951. The annexure to this Appendix gives the names of all villages which are transferred from the jurisdiction of one police station to another.

(*ii*) Appendix II gives the number of villages with population of 5,000 and over and towns with population of under 5,000.

(*iii*) Appendix III gives the houseless and institutional population in each police station and subdivision.

6. **Table A-II—Variation in population during sixty years**—This Table furnishes data on the variation of population for seven censuses from 1901 to 1961. Its importance lies in the fact that it gives the growth of population from decade to decade. In the absence of reliable vital statistics or any other source of information it forms the main source of estimation of population. The percentage variation from decade to decade is also shown in this Table.

7. **Table A-III—Villages classified by population**—This Table gives the number and population of groups of villages in the various population sizes, namely, less than 200, 200 to 499, 500 to 999, 1,000 to 1,999, 2,000 to 4,999, 5,000 to 9,999 and 10,000 and above.

8. The information is furnished for each subdivision and police station in the district.

9. **Table A-IV—Towns classified by population with variation since 1941**—This Table shows the growth of each town in this district since the Census of 1941. The area of the town at the 1961 Census, both in square miles and square kilometres is also given. The term 'Town' has already been defined in the fly-leaf to Table A-I published in Part II-A of the Census Report of Orissa.

*Foot Notes* :—(1) † The Square Kilometres and density figures of Urban areas of Police Station/Taluk/Subdivision/District are worked out using the area figures corrected up to two places of decimals obtained by adding the areas of the Towns in the respective units and not using the area figures given in the Table. In addition to this, the figures relating to Square Kilometres are further adjusted to make the Police Station/Taluk/Subdivision/District totals tally.

(2) Towns treated as such for the first time in 1961 are printed in italics.

The following abbreviations have been used :—

T for Total
R for Rural
U for Urban
PS for Police Station
M for Municipality
NAC for Notified Area Council

## APPENDIX I TO TABLE A-I

(2) The following abbreviations have been used :

M For Municipality
NAC For Notified Area Council

## TABLE A-IV—TOWNS CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941
## APPENDIX

New towns added in 1961 and towns in 1951 declassified in 1961

| Subdivision | Name of town | | New town added in 1961 | | | |
|---|---|---|---|---|---|---|
| | | | Area | | Population | |
| | | | Sq. miles | Sq. Kms | 1961 | 1951 |
| 1 | 2 | | 3 | 4 | 5 | 6 |
| Chatrapur | Hinjili | ... | 0·70 | 1·81 | 8,028 | 5,839 |
| Ghumusur | Bellaguntha | ... | 1·80 | 4·66 | 5,762 | 5,138 |
| Berhampur | Gopalpur | ... | 1·10 | 2·85 | 3,536 | 2,739 |
| Chatrapur | Khallikote | ... | 0·10 | 0·26 | 3,365 | 3,506 |

*N. B.* (1) No towns of 1951 are declassified as rural in 1961.
The Columns 7 to 11 are omitted as they are nil.

(2) All the 4 towns are treated as such for the first time in 1961.

# TABLE-B SERIES

## GENERAL ECONOMIC TABLES

The contents of the General Economic Tables which are presented in this volume are briefly explained below :

2. **Table B-I—Workers and Non-workers classified by sex and broad age-groups**— *This is a* summary table prepared from the Primary Census Abstract giving the total population, the nine industrial categories of workers and also the number of non-workers. Sex split-up is shown in each case. Each category is divided into four broad age-groups, viz., 0—14, 15—34, 35—59 and 60+. The classification of workers and non-workers by age-groups is a special feature of 1961 Census. These age-groups correspond to different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons. Classification of non-working population has not been provided in this Table to avoid unwieldiness, but is given in another Table.

3. **Table B-III—Industrial Classification of Workers and Non-workers by Educational Levels**— This Table is presented in two parts, Part A relates to Urban areas and Part B to Rural areas. The educational levels which are given in both the parts are shown below :

Part A

- Illiterate
- Literate (without educational level)
- Primary or Junior Basic
- Matriculation or Higher Secondary
- Technical diploma not equal to degree
- Non-technical diploma not equal to degree
- University degree or Post-graduate degree other than technical degree
- Technical degree or diploma equal to degree or Post-graduate degree in the following branches :
  - Medicine
  - Agriculture
  - Veterinary and Dairying
  - Technology
  - Teaching and others

Part B

- Illiterate
- Literate (without educational level)
- Primary or Junior Basic
- Matriculation and above

4. The nine industrial categories of workers and also the non-workers are cross-tabulated by literacy and educational standards mentioned above.

5. **Table B-IV Part A—Industrial Classification by sex and class of worker of Persons at work at Household Industry**—The distinction between household industry and non-household industry is drawn for the first time during the current Census. This part deals with workers engaged in household industry only. The data up to Divisions and Major Groups are shown separately for Total, Rural and Urban for this district.

6. **Table B-IV Part B—Industrial Classification by sex and class of workers of Persons at work in Non-household Industry, Trade, Business, Profession or Service**—This part deals with categories III, V, VI, VII, VIII and IX. All these categories are sorted into 'Divisions' and 'Major Groups' according to the nature of the industry. They are further cross-tabulated according to the class of worker, namely, employer, employee, single worker and family worker. The data up to Divisions and Major Groups are shown separately for Total and Urban for the district.

7. **Table B-IV Part C—Industrial Classification by Sex, Divisions, Major Groups and Minor Groups of Persons at work other than Cultivation**— As the Minor Groups are not shown in the Tables A and B, this Table combines both in order to give the Minor Groups in addition to the Divisions and Major Groups. Separate columns are provided for the workers at household industry and non-household industry.

8. Minor Groups having less than 1 per cent of workers of the respective Divisions (less than 0·5 per cent in case of Minor Groups of Division 2 & 3), have not been shown in this Table. Divisions thus affected are marked with an asterisk (*). They are given separately in the Appendix.

9. Complete Code description of Divisions, Major Groups and Minor Groups according to I. S. I. C. are given below for reference as they are used in many Tables :

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | **Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting** | |
| 00 | *Field Produce and Plantation Crops* | |
| | Production of cereal crops (including Bengal gram) such as, rice, wheat, jowar, bajra, maize .. | 000 |
| | Production of pulses, such as, arhar, moong, masur, urd, khesari, other gram .. | 001 |
| | Production of raw jute and kindred fibre crops .. | 002 |
| | Production of raw cotton and kindred fibre crops .. | 003 |
| | Production of oil-seeds, sugarcane and other cash crops .. | 004 |
| | Production of other crops (including vegetables) not covered above | 005 |
| | Production of fruits and nuts in plantations, vines and orchards .. | 006 |
| | Production of wood, bamboo, cane, reeds, thatching grass, etc. .. | 007 |
| | Production of juice by tapping palms .. | 008 |
| | Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above .. | 009 |
| 01 | *Plantation Crops* | |
| | Production of tea in plantation .. | 010 |
| | Production of coffee in plantation | 011 |
| | Production of rubber in plantation | 012 |
| | Production of tobacco in plantation | 013 |
| | Production of ganja, cinchona, opium .. | 014 |
| | Production of other plantation crops not covered above .. | 015 |
| 02 | *Forestry and Logging* | |
| | Planting, replanting and conservation of forests .. | 020 |
| | Felling and cutting of trees and transportation of logs .. | 021 |
| | Preparation of timber .. | 022 |
| | Production of fuel including charcoal by exploitation of forests .. | 023 |
| | Production of fodder by exploitation of forests .. | 024 |
| | Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests .. | 025 |
| | Production and gathering of other forest products not covered above | 026 |
| 03 | *Fishing* | |
| | Production of fish by fishing in sea | 030 |
| | Production of fish by fishing in inland waters including the operation of fish firms and fish hatcheries .. | 031 |
| | Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond .. | 032 |
| 04 | *Livestock and Hunting* | |
| | Production and rearing of livestock (large heads only) mainly for milk and animal power, such as, cow, buffalo, goat .. | 040 |
| | Rearing of sheep and production of wool .. | 041 |
| | Rearing and production of other animals (mainly for slaughter), such as, pig .. | 042 |
| | Production of ducks, hens and other small birds, eggs by rearing and poultry farming .. | 043 |
| | Rearing of bees for the production of honey, wax and collection of honey .. | 044 |
| | Rearing of silkworms and production of cocoons and raw silk | 045 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Rearing of other small animals and insects .. | 046 |
| | Trapping of animals or games propagation .. | 047 |
| | Production of other animal husbandry products, such as, skin, bone, ivory and teeth .. | 048 |
| **Division 1—Mining and Quarrying** | | |
| 10 | *Mining and Quarrying* | |
| | Mining of coal .. | 100 |
| | Mining of iron-ores .. | 101 |
| | Mining of gold and silver ores .. | 102 |
| | Mining of manganese .. | 103 |
| | Mining of mica .. | 104 |
| | Mining of other non-ferrous metallic ores .. | 105 |
| | Mining of crude petroleum and natural gas .. | 106 |
| | Quarrying of stone (including slate), clay, sand, gravel, lime-stone .. | 107 |
| | Mining of chemical earth, such as, soda ash .. | 108 |
| | Mining and quarrying of non-metallic products not classified above, such as, precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt .. | 109 |
| **Division 2 & 3—Manufacturing** | | |
| 20 | *Foodstuffs* | |
| | Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and food grains .. | 200 |
| | Production of sugar and syrup from sugarcane in mills .. | 201 |
| | Production of indigenous sugar, gur from sugarcane or palm juice and production of candy .. | 202 |
| | Production of fruit products, such as, jam, jelly, sauce and canning and preservation of fruits ... | 203 |
| | Slaughtering, preservation of meat and fish and canning of fish .. | 204 |
| | Production of bread, biscuits, cake and other bakery products .. | 205 |
| | Production of butter, ghee, cheese and other dairy products .. | 206 |
| | Production of edible fats and oil (other than hydrogenated oil) .. | 207 |
| | Production of hydrogenated oils (Vanaspati) .. | 208 |
| | Production of other food products, such as, sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge | 209 |
| 21 | *Beverages* | |
| | Production of distilled spirits, wines, liquor from alcoholic malts, fruits and malts in distillery and brewery .. | 210 |
| | Production of country liquor .. | 211 |
| | Production of indigenous liquor, such as, toddy, liquor from mahua, palm juice ... | 212 |
| | Production of other liquors not covered above ... | 213 |
| | Production of aerated and mineral water ... | 214 |
| | Production of ice ... | 215 |
| | Production of ice-cream .. | 216 |
| | Processing of tea in factories .. | 217 |
| | Processing of coffee in curing works | 218 |
| | Production of other beverages .. | 219 |
| 22 | *Tobacco Products* | |
| | Manufacture of bidi ... | 220 |
| | Manufacture of cigars and cheroots ... | 221 |
| | Manufacture of cigarette and cigarette tobacco .. | 222 |
| | Manufacture of hookah tobacco .. | 223 |
| | Manufacture of snuff ... | 224 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Manufacture of jerda and other chewing tobacco .. | 225 |
| | Manufacture of other tobacco products .. | 226 |
| 23 | *Textile—Cotton* | |
| | Cotton ginning, cleaning, pressing and baling .. | 230 |
| | Cotton spinning (other than in mills) | 231 |
| | Cotton spinning and weaving in mills .. | 232 |
| | Cotton dyeing, bleaching .. | 233 |
| | Cotton weaving in powerlooms .. | 234 |
| | Cotton weaving in hand-looms .. | 235 |
| | Manufacture of Khadi textile in hand-looms .. | 236 |
| | Printing of cotton textile .. | 237 |
| | Manufacturing of cotton nets .. | 238 |
| | Manufacturing of cotton cordage, rope and twine .. | 239 |
| 24 | *Textile—Jute* | |
| | Jute pressing and baling .. | 240 |
| | Jute spinning and weaving .. | 241 |
| | Dyeing and bleaching of jute .. | 242 |
| | Printing of jute textile .. | 243 |
| | Manufacture of other products like rope, cordage from jute and similar fibre, such as, hemp, mesta .. | 244 |
| 25 | *Textile—Wool* | |
| | Wool baling and pressing .. | 250 |
| | Wool cleaning and processing (scouring) .. | 251 |
| | Wool spinning and weaving in mill | 252 |
| | Wool spinning other than in mill .. | 253 |
| | Wool weaving in powerloom .. | 254 |
| | Wool weaving in hand-loom .. | 255 |
| | Embroidery and art work in woollen textile ... | 256 |
| 26 | *Textile—Silk* | |
| | Spinning and weaving of silk textile in mill .. | 260 |
| | Dyeing and bleaching of silk .. | 261 |
| | Spinning of silk other than in mills | 262 |
| | Weaving of silk textile by power-loom .. | 263 |
| | Weaving of silk textile by hand-loom | 264 |
| | Printing of silk textile .. | 265 |
| | Manufacture of silk cordage, rope and twine .. | 266 |
| 27 | *Textile—Miscellaneous* | |
| | Manufacture of carpet and all other similar type of textile products .. | 270 |
| | Manufacture of hosiery and other knitted fabrics and garments .. | 271 |
| | Embroidery and making of crepe, lace and fringes .. | 272 |
| | Making of textile garments including raincoats and headgear .. | 273 |
| | Manufacture of made up textile goods except wearing apparel, such as, curtains, pillow cases, bedding materials, mattress, textile bags .. | 274 |
| | Manufacture of waterproof textile products, such as, oil cloth, trapaulin .. | 275 |
| | Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling .. | 276 |
| | Manufacture of coir and coir products .. | 277 |
| | Manufacture of umbrellas .. | 278 |
| | Processing and manufacture of textile products not covered above ... | 279 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 28 | *Manufacture of Wood and Wooden Products* | |
| | Sawing and planing of wood .. | 280 |
| | Manufacture of wooden furniture and fixtures .. | 281 |
| | Manufacture of structural wooden goods (including treated timber), such as, beams, posts, doors and windows .. | 282 |
| | Manufacture of wooden industrial goods other than transport equipment, such as, bobbin and similar equipment and fixtures .. | 283 |
| | Manufacture of other wooden products, such as, utensils, toys and artwares .. | 284 |
| | Manufacture of veneer and ply-wood .. | 285 |
| | Manufacture of ply-wood products, such as, tea chest .. | 286 |
| | Manufacture of boxes and packing cases other than ply-wood .. | 287 |
| | Manufacture of materials from cork, bamboo, cane, leaves and other allied products .. | 288 |
| | Manufacture of other wood and allied products not covered above .. | 289 |
| 29 | *Paper and Paper Products* | |
| | Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill .. | 290 |
| | Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board hand-made .. | 291 |
| | Manufacture of products, such as, paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp .. | 292 |
| 30 | *Printing and Publishing* | |
| | Printing and publishing of newspapers and periodicals .. | 300 |
| | Printing and publishing of books .. | 301 |
| | All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry .. | 302 |
| | All types of binding, stitching, sizing and other allied work connected with binding industry | 303 |
| 31 | *Leather and Leather Products* | |
| | Currying, tanning and finishing of hides and skins and preparation of finished leather .. | 310 |
| | Manufacture of shoes and other leather footwear .. | 311 |
| | Manufacture of clothing and wearing apparel (except footwear) made of leather and fur .. | 312 |
| | Manufacture of leather products (except those covered by code Nos. 311, 312), such as, leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles .. | 313 |
| | Repair of shoes and other leather footwear .. | 314 |
| | Repair of all other leather products except footwear .. | 315 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 32 | *Rubber, Petroleum and Coal Products* | |
| | Manufacture of tyres and tubes .. | 320 |
| | Manufacture of rubber footwear .. | 321 |
| | Manufacture of rubber goods used for industrial purpose .. | 322 |
| | Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat .. | 323 |
| | Production of petroleum, kerosene and other petroleum products in petroleum refineries .. | 324 |
| | Production of coal-tar and coke in coke oven .. | 325 |
| | Manufacture of other coal and coal-tar products not covered elsewhere .. | 326 |
| 33 | *Chemicals and Chemical Products* | |
| | Manufacture of basic industrial chemicals, such as, acids, alkalis and their salts not elsewhere specified .. | 330 |
| | Manufacture of dyes, paints, colours and varnishes .. | 331 |
| | Manufacture of fertilizers .. | 332 |
| | Manufacture of amunition, explosives and fire-works .. | 333 |
| | Manufacture of matches .. | 334 |
| | Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap .. | 335 |
| | Manufacture of soap and other washing and cleaning compounds .. | 336 |
| | Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber) .. | 337 |
| | Manufacture of common salt .. | 338 |
| | Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats) .. | 339 |
| 34-35 | *Non-metallic Mineral Products other than Petroleum and Coal* | |
| | Manufacture of structural clay products, such as, bricks, tiles .. | 340 |
| | Manufacture of cement and cement products .. | 341 |
| | Manufacture of lime .. | 342 |
| | Manufacture of structural stone goods, stone dressing and stone crushing .. | 343 |
| | Manufacture of stonewares, other than images .. | 344 |
| | Manufacture of stone images .. | 345 |
| | Manufacture of plaster of paris and its products .. | 346 |
| | Manufacture of asbestos products | 347 |
| | Manufacture of mica products .. | 348 |
| | Manufacture of earthenware and earthen pottery .. | 350 |
| | Manufacture of chinaware and crockery .. | 351 |
| | Manufacture of porcelain and its products .. | 352 |
| | Manufacture of glass bangles and beads .. | 353 |
| | Manufacture of glass apparatus .. | 354 |
| | Manufacture of earthen images, busts and statues .. | 355 |
| | Manufacture of earthen toys and artwares except those covered by code No. 355 .. | 356 |
| | Manufacture of glass and glass products except optical and photographic lenses and glass products covered above .. | 357 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Manufacture of other non-metallic mineral products not elsewhere specified ... | 359 |
| 36 | *Basic Metals and their Products except Machinery and Transport Equipment* | |
| | Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms, such as, billets, blooms, tubes, rods .. | 360 |
| | Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms .. | 361 |
| | Manufacture of armaments .. | 362 |
| | Manufacture of structural steel products, such as, joist, rail, sheet, plate .. | 363 |
| | Manufacture of iron and steel furniture .. | 364 |
| | Manufacture of brass and bell-metal products .. | 365 |
| | Manufacture of aluminium products .. | 366 |
| | Manufacture of metal products (other than iron, brass, bell-metal and aluminium), such as, tin can .. | 367 |
| | Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products | 368 |
| | Manufacture of sundry hardwares, such as, G. I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39) .. | 369 |
| 37 | *Machinery (All kinds other than Transport) and Electrical Equipment* | |
| | Manufacture and assembling of machinery (other than electrical) except textile machinery .. | 370 |
| | Manufacture and assembling of prime mover and boilers other than electrical equipment, such as, diesel engines, road-rollers, tractors .. | 371 |
| | Manufacture of machine-tools .. | 372 |
| | Manufacture of textile machinery and accessories .. | 373 |
| | Manufacture of heavy electrical machinery and equipment, such as, motors, generators, transformers .. | 374 |
| | Manufacture of electric lamps and fans .. | 375 |
| | Manufacture of insulated wires and cables .. | 376 |
| | Manufacture of all kinds of battery .. | 377 |
| | Manufacture of electric equipment, such as, radio, microphone | 378 |
| | Manufacture of electronic machinery and apparatus, appliances not specified above .. | 379 |
| 38 | *Transport Equipment* | |
| | Manufacture, assembling and repairing of locomotives .. | 380 |
| | Manufacture of wagons, coaches, tramways and other railroad equipment other than that covered by code No. 363 .. | 381 |
| | Manufacture and assembling of motor vehicles of all types (excepting motor engines) .. | 382 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Manufacture of motor vehicles, engines parts and accessories .. | 383 |
| | Repairing and servicing of motor vehicles ... | 384 |
| | Manufacture of bicycles and tricycles and accessories, such as, saddle, seat-frame, gear .. | 385 |
| | Building and repairing of water transport equipment, such as, ships, boats and manufacture of marine engines .. | 386 |
| | Manufacture and repair of air transport equipment including aeroplanes, aeroengines .. | 387 |
| | Repairing of bicycles and tricycles | 388 |
| | Manufacture of other transport equipment not covered above, such as, animal-drawn and hand-drawn vehicles .. | 389 |
| 39 | *Miscellaneous Manufacturing Industries* | |
| | Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies ... | 390 |
| | Manufacture of scientific, medical and surgical instruments and equipment and supplies .. | 391 |
| | Assembling and repairing of watches and clocks .. | 392 |
| | Manufacture of jewellery, silverware and wares using gold and other precious metals .. | 393 |
| | Manufacture and tuning of musical instruments .. | 394 |
| | Manufacture of stationery articles not covered elsewhere, such as. pencil, penholder, fountain pen .. | 395 |
| | Manufacture of sports goods .. | 396 |
| | Manufacture and repair work of goods not assignable to any other group ... | 399 |
| **Division 4—Construction** | | |
| 40 | *Construction* | |
| | Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations .. | 400 |
| | Construction and maintenance of roads, railways, bridges, tunnels.. | 401 |
| | Construction and maintenance of telegraph and telephone lines .. | 402 |
| | Construction and maintenance of waterways and water-reservoirs, such as, bund, embankments, dam, canal, tank, tube-wells, wells .. | 403 |
| **Division 5—Electricity, Gas, Water and Sanitary Services** | | |
| 50 | *Electricity and Gas* | |
| | Generation and transmission of electric energy .. | 500 |
| | Distribution of electric energy .. | 501 |
| | Manufacture of gas in gas works and distribution to domestic and industrial consumers .. | 502 |
| 51 | *Water-Supply and Sanitary Services* | |
| | Collection, purification and distribution of water to domestic and industrial consumers .. | 510 |
| | Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation ... | 511 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| **Division 6—Trade and Commerce** | | |
| 60—63 | *Wholesale Trade* | |
| | Wholesale trading in cereals and pulses ... | 600 |
| | Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere) ... | 601 |
| | Wholesale trading in all kinds of fabrics and textile products, such as, garments, hessian, gunny bag, silk and wollen yarns, shirtings, suitings, hosiery products ... | 602 |
| | Wholesale trading in beverages, such as, tea (leaf), coffee (seed and powder), aerated water .. | 603 |
| | Wholesale trading in intoxicants, such as, wines, liquors .. | 604 |
| | Wholesale trading in other intoxicants, such as, opium, ganja, etc. ... | 605 |
| | Wholesale trading in tobacco, bidi, cigarettes and other tobacco products .. | 606 |

| **Division 9—Activities not adequately described** | | |
| 90 | *Activities unspecified and not adequately described (This includes new entrants to the labour market)* | |
| | Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified .. | 900 |
| | Fresh entrants to the Labour Market ... | 999 |

10. **Table B-V—Occupational Classification by sex of Persons at work other than Cultivation**—This Table gives the occupational classification of persons who are working in non-agricultural occupation, separately for Total and Urban. Divisions, Groups and Families, according to National Classification of Occupations, are shown in it. Information regarding persons working in household industry and non-household industry is also supplied.

11. Families having less than 1 per cent of the workers of the respective Divisions (less than 0·5 per cent in case of families of Division 7-8), have not been shown in this Table, but are given in the Appendix. Divisions thus affected are marked with an asterisk (*).

12. Code description of families not appearing in this Table are given below :

000 Architects
001 Civil Engineers (including Overseers)
002 Mechanical Engineers
003 Electrical Engineers
004 Chemical Engineers
005 Metallurgical Engineers
006 Mining Engineers
007 Surveyors
010 Chemists except Pharmaceutical Chemists
011 Pharmaceutical Chemists
012 Physicists
013 Meteorologists
014 Geologists and Geophysicists
015 Mathematicians
019 Chemists, Physicists, Geologists and other Physical Scientists, n. e. c.
020 Biologists and Animal Scientists
022 Silviculturists
023 Agronomists and Agricultural Scientists
029 Biologists, Veterinarians, Agronomists and Related Scientists, n. e. c.
030 Physicians and Surgeons, Allopathic
033 Physicians, other
034 Physiologists
035 Dentists
039 Physicians, Surgeons and Dentists, n. e. c.
041 Midwives and Health Visitors
044 Vaccinators
045 Physiotherapists, Masseurs and Related Technicians
047 Optometrists and Opticians
050 Teachers, University
053 Teachers, Nursery and Kindergarten Schools
060 Judges and Magistrates
061 Legal Practitioners and Advisers
062 Law Assistants
069 Jurists and Legal Technicians, n. e. c. (including Petition Writers)
070 Economists
071 Accountants and Auditors
072 Statisticians
073 Geographers
074 Psychologists and actuaries
075 Personnel Specialists
076 Labour and Social Welfare Workers, Social Workers who are not elected officials
077 Sociologists and Anthropologists
078 Historians, Archeologists, Political Scientists and Related Workers
079 Social Scientists and Related Workers, n. e. c.
080 Authors
081 Editors, Journalists and Related Workers
082 Translators, Interpreters and Language Specialists
083 Painters, Decorators and Commercial Artists
084 Sculptors and Modellers
085 Actors and Related Workers
087 Dancers and Related Workers
089 Artists, Writers and Related Workers, n. e. c.
090 Draughtsmen
091 Laboratory Assistants
099 Science and Engineering Technicians, n. e. c.
0X3 Librarians, Archivists and Related Workers
0X8 Political Workers (who are not elected officials)
0X9 Other Professional, Technical and Related Workers, n. e. c.

103 Administrators and Executive Officials, Quasi-Government
109 Administrators and Executive Officials, Government, n. e. c.
110 Directors and Managers, Wholesale Trade
120 Directors, Managers and Working Proprietors, Banks
121 Directors, Managers and Working Proprietors, Insurance
129 Directors, Managers and Working Proprietors, Financial Institutions, n. e. c.
132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary
133 Directors, Managers and Working Proprietors, Manufacturing
139 Directors, Managers and Working Proprietors, n. e. c.
201 Cashiers
202 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors (Excluding those on moving transport)
211 Typists
220 Computing Clerks and Calculating Machine Operators
221 Punch Card Machine Operators
229 Office Machine Operators, n. e. c.
310 Agents and Salesmen, Insurance
311 Agents, Brokers and Salesmen, Real Estate
312 Brokers and Agents, Securities and Shares
313 Auctioneers
314 Valuers and Appraisers
319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n. e. c.
320 Commercial Travellers
321 Manufacturers' Agents
329 Commercial Travellers and Manufacturers' Agents, n. e. c.
340 Money-Lenders (including Indigenous Bankers)
341 Pawn-Brokers
400 Cultivators (Owners)
401 Cultivators (Tenants)
403 Planters and Plantation Managers
409 Farmers and Farm Managers, n. e. c. (Vegetable and Fruit growers)
410 Farm Machinery Operators
413 Tappers (Palm, Rubber trees, etc.)
414 Agricultural labourers
415 Plantation labourers
419 Farm Workers, n. e. c.
420 Hunters
421 Trappers
429 Hunters and Related Workers, n. e. c.
439 Fishermen and Related Workers, n. e. c.
443 Charcoal Burners and Forest Product Processers, Kattha Makers
449 Loggers and other Forestry Workers, n. e. c.
502 Drillers, Mines and Quarries
509 Miners and Quarrymen, n. e. c.
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas
520 Mineral Treaters
600 Deck Officers and Pilots, Ship
601 Ship Engineers
611 Engine-Room Ratings, Firemen and Oilers, Ship
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators
640 Tramcar Drivers
649 Drivers, Road Transport, n. e. c. (including Palki and Doli Bearers)
650 Conductors
651 Guards
652 Brakesmen
660 Inspectors, Supervisors and Station Masters, Permanent Way Inspectors of Railways
661 Traffic Controllers
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n. e. c.

690 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors on moving transport and Ticket Examiners

694 Workers in Communication Occupations, n. e. c.

700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.

701 Blow-room Workers and Carders

703 Warpers and Sizers

705 Pattern Card Preparers

706 Bleachers, Dyers and Finishers (excluding Printers)

707 Knitters and Lace Makers

708 Carpet Makers and Finishers

711 Hat and Headgear Makers

712 Furriers

713 Upholsterers and Related Workers

714 Pattern Makers, Makers and Cutters, Textile Products, Leather Garments and Gloves

715 Sewers, Embroiderers and Darners, Textile and Fur Products

719 Tailors, Cutters, Furriers and Related Workers, n. e. c.

720 Shoe Makers and Shoe Repairers

721 Cutters, Lasters, Sewers, Footwear and Related Workers

722 Harness and Saddle Makers

729 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers, n. e. c.

730 Furnacemen, Metal

731 Annealers, Temperers and Related Heat Treaters

732 Rolling Mill Operators, Metal

734 Moulders and Core Makers

735 Metal Drawers and Extruders

739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers, n. e. c.

740 Precision instrument Makers, Watch and Clock Makers and Repairmen

742 Jewellery Engravers

750 Fitter-Machinists, Tool-makers and Machine Tool Setters

751 Machine Tool Operators, Knife Makers

752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)

753 Machanics-Repairmen (Except Electrical and Precision Instrument Repairmen)

755 Plumbers and Pipe Fitters

756 Welders and Flame Cutters

757 Metal Plate and Structural Metal Workers

758 Electro-Platers, Dip Platers and Related Workers

759 Tool-makers, Machinists, Plumbers, Welders, Platers and Related Workers, n. e. c. (including Metal-engravers other than printing)

760 Electricians, Electrical Repairmen and Related Electrical Workers

761 Electrical and Electronics Fitters

762 Mechanics-Repairmen, Radio and Television

763 Installers and Repairmen, Telephone and Telegraph

764 Linemen and Cable Jointers

769 Electricians and Related Electrical and Electronics Workers, n. e. c.

771 Shipwrights and Boat Builders (wood)

772 Sawyers and Wood Working Machinists

773 Coach and Body Builders

774 Cart Builders and Wheelwrights

775 Cabinet Makers

779 Carpenters, Joiners, Cabinet Makers, Cooper and Related Workers, n. e. c.

780 Painters and Paper Hangers

790 Stone Cutters, Stone Carvers and Stone Dressers

791 Bricklayers, Plasterers, Masons

792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers

794 Hut Builders and Thatchers

795 Well Diggers

799 Bricklayers, Plasterers and Construction Workers, n. e. c.

800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photolitho Operators, Photolithographers

806 Engravers, Etchers and Block Makers (Printing)

807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n. e. c.

810 Furnacemen, Kilnmen and Ovenmen
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers

815 Pulverisors and Mixers, Cement, Clay and Other Ceramics

819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n. e. c.

823 Khandsari, Sugar and Gur Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers

827 Butchers
828 Coffee and Tea Blenders and Related Workers

829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, Makers of Ice, n. e. c.

830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes

832 Crushers, Millers and Calendrers, Chemical and Related Processes

833 Paper Pulp Preparers
834 Paper Makers
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n. e. c.

851 Tyre Builders, Vulcanisers and Related Rubber Products Makers

852 Plastics Products Makers

853 Tanners, Fellmongers, Pelt Dressers and Related Workers

854 Photographic Dark Room Workers

855 Makers of Musical Instruments and Related Workers

856 Paper Products Makers

860 Checkers, Testers, Sorters, Weighers and Counters, Weighmen

861 Packers, Labellers and Related Workers

870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and other Construction Machinery, n. e. c.

875 Materials-handling Equipment Operators

876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment

879 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers, n. e. c.

890 Loaders and Unloaders
900 Fire Fighters and Related Workers
902 Customs Examiners, Patrollers and Related Workers

909 Fire Fighters, Policemen, Guards and Related Workers, n. e. c.

910 House Keepers, Matrons, Stewards (Domestic and Institutional)

913 Ayas, Nurse-maids

919 House Keepers, Cooks, Maids and Related Workers, n. e. c.

951 Dry-cleaners and Pressers

960 Athletes, Sportsmen and Related Workers

970 Movie Camera Operators

979 Other Photographers

990 Embalmers and Undertakers

999 Service, Sport and Recreation Workers, n. e. c.

X00 Workers without Occupations, Matriculates and above

X08 Workers without Occupations, Literates

X09 Workers without Occupations, Other

X90 Workers not reporting Occupation

13. **Table B-VI—Occupational Divisions of Persons at work other than at Cultivation, classified by sex, broad age-groups and educational levels in Urban areas only**—This Table gives the data up to Divisions of the National Classification of Occupations for all the Urban areas in the district. It deals with literate workers other than those who work as cultivators and as agricultural labourers. The population under each division is classified by four broad age-groups, 0—14, 15—34, 35—59, 60+ and Age not stated, which are further cross-tabulated according to the educational levels.

14. **Table B-VII Part A—Persons working principally (I) as Cultivators, (II) as Agricultural Labourers or (III) at Household Industry classified by sex and by secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural Labourer**—This Table is a cross-tabulation in the case of persons whose principal and secondary work are any two of (i) cultivation, (ii) agricultural labour or (iii) household industry. This is an important Table as it shows the extent to which cultivation is supplemented by household industry and vice versa. The type of household industries for the district are shown in Divisions and Major Groups of I. S. I. C. separately for Total, Rural and Urban. Major Groups having secondary workers less than 5 per cent of the Principal workers are omitted from this Table and shown in Appendix. The affected Divisions are marked with an asterisk (*).

15. **Table B-VII Part B—Industrial Classification by sex of persons working in Non-household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry**—This Table gives tha data on the basis of cross-tabulation in the case of persons who are principally engaged in non-household industry, etc. It shows the principal workers in each Division and Major Group followed by additional workers in each Division and Major Group. It is presented separately for Total, Rural and Urban.

16. **Table B-VIII Parts A and B—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels**—This Table which deals with the classification of unemployed persons by their educational standards and age-groups is presented in two parts : Part A for the Urban areas and Part B for the Rural areas in this district. Both these parts give separate data in respect of those who are seeking employment for the first time and for those persons who were employed before but are now out of employment and are seeking work. In the first case the broad age-groups are 15—19, 20—24, 25—29, 30—34, 35+ and in the latter case 15—19, 20—24, 25—34, 35—44, 45—59 and 60+. The educational levels as given in Table B-III Parts A and B are followed in these Tables respectively for finding out the educational qualifications of the unemployed persons in the respective age-groups.

17. **Table B-IX—Persons not at work classified by sex, broad age-groups and type of activity**—This Table deals with the categorization of non-workers according to their eight-fold activities. The data for the broad age-groups are given separately for Total, Rural and Urban in respect of the district; but for each subdivision and police station it is supplied for Rural only. The study of age-groups with reference to age-Tables will throw light on the children of school going age who are not attending school and persons in working age-groups who are not working.

Table B-I

## TABLE B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

Table B-I

| Total Rural Urban | Age-group | Total Population | | | Total Workers | | Workers I As Cultivator | | Workers II As Agricultural Labourer | | Workers III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities | |

## APPENDIX TO TABLE B-IV PART C

Minor groups having less than 1 per cent of the workers of the respective divisions (less than 0·5 per cent in the case of minor groups of Division 2 & 3) which have been omitted in the Table B-IV Part C are shown in this Appendix. The figures of these minor groups giving the number of minor group and the number of male and female workers separately for household industry and non-household industry are shown in run on lines.

2. The following abbreviations are used :—

H. I.—Household Industry

N.H.I.—Non-household Industry

T — Total

U — Urban

M — Males

F — Females

3. The three digit code number which represents the minor group is followed by household industry or non-household industry with the respective male and female workers within brackets.

## APPENDIX TO TABLE B-V

Families having less than 1 per cent of the workers of the respective Divisions (less than 0·5 per cent in case of families of Division 7-8), which are omitted in Table B-V have been shown in this Appendix.

2. Abbreviations—The following symbols and abbreviations are used :

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV—At Household Industry

V—In Manufacturing other than Household Industry

IV—In Construction

VII—In Trade and Commerce

VIII—In Transport, Storage and Communications

IX—In Other Services

M—Males

F—Females

3. The three digit code number which represents the occupational family is followed by the industrial category in roman figures with their respective number of male and female workers inside the brackets.

## APPENDIX TO TABLE B-VII PART A

This Appendix shows the Major Groups of Household Industry where persons having Secondary work are less than 5 per cent of the persons at the Principal work. The two digit code numbers stand for the Major Groups of I. S. I. C. The figures in brackets represent the male and female workers under the Major Groups shown before the brackets.

The following abbreviations have been used in this Appendix :—

T—Total R—Rural U—Urban
II—As Cultivator
III—As Agricultural Labourer
M—Male
F—Female

22 T-II (M-15, F-5), III (M-0, F-2), R-II (M-14, F-5), III (M-0, F-2), U-II (M-1, F-0).

27 T-II (M-45, F-14), III (M-1, F-13), R-II (M-38, F-13), III (M-1, F-12), U-II (M-7, F-1), III (M-0, F-1).

31 T-II (M-2, F-0), R-II (M-2, F-0).

33 T-II (M-6, F-0), III (M-1, F-0), R-II (M-6, F-0), U-III (M-1, F-0).

38 T-II (M-3, F-0), III (M-1, F-0), R-II (M-2, F-0), U-II (M-1, F-0), III (M-1, F-0).

# TABLE B-VII PART B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

# TABLE-B SERIES

## HOUSEHOLD ECONOMIC TABLES

Household Economic Tables are compiled for the first time in 1961 Census. The contents of each Table appearing in this volume are briefly explained below :

2. **Table B-X—Sample Households (i) engaged neither in Cultivation nor Household Industry, (ii) engaged in Cultivation or Household Industry, but not in both and (iii) engaged both in Cultivation and Household Industry for All areas**—This Table is prepared on a 20 per cent sample of households and for Total, Rural and Urban households. All the households are divided into four categories :

(*i*) Households engaged neither in Cultivation nor in Household Industry

(*ii*) Households engaged in Cultivation only

(*iii*) Households engaged in Household Industry only

(*iv*) Households engaged both in Cultivation and Household Industry

This Table is important as it divides all the households into three main sectors of economic activity. The information is supplied for the district and each police station in the district.

3. **Table B-XI—Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban areas separately**—This Table, which is prepared on a 20 per cent sample households for Rural and Urban areas separately, presents a more detailed examination of the Cultivating Households which have been separated in the previous Table. Households engaged in cultivation are classified according to the size of land cultivated. The holding sizes in acres are less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5 — 14·9, 15·0 — 29·9, 30·0—49·9 and 50+ acres. It is further cross-tabulated by interest in land, namely, (*i*) land owned or held from Government, (*ii*) held from private persons or institutions for payment in money, kind or share and (*iii*) partly held from Government and partly from private persons for payment in money, kind or share. This Table gives useful information on the size of the holdings in this district and also in each police station.

4. **Table B-XII—Sample Households engaged in Cultivation only classified by Size of Land Cultivated and number of Family Workers and Hired Workers in Rural and Urban areas separately**—This Table, which is compiled on a 20 per cent sample of households, has made further study of households engaged in cultivation. Each household having a particular size of holding mentioned in Table B-XI has been cross-tabulated with reference to number of persons working in cultivation. Cultivating households according to number of persons of either sex engaged in cultivation are classified into five groups, namely, 1 person, 2 persons, 3—5 persons,6—10 persons and more than 10 persons. The hired workers are separated from family workers whose sex-composition is also given. This is an important Table as the size and scale of agricultural enterprise in the Rural and Urban areas of this district and in the Rural areas of each police station can be deduced from it.

5. **Table B-XIII—Sample Households engaged both in Cultivation and Household Industry showing Size of Land Cultivated classified by Principal Household Industry in Rural and Urban areas separately**—This Table, which is prepared on a 20 pr cent sam-

ple of households for Rural and Urban areas, deals with *Households engaged both in Cultivation and* Household Industry. The nature of Household Industry in which cultivating households with a particular size of holding are engaged, is presented in this Table. The nature of the Household Industry is indicated by Divisions and Major Groups of I. S. I. C. This Table throws light on Household Industries which are carried on as ancillary to cultivation. It endeavours to establish correlation between size and scale of cultivation with that of Household Industry.

6. **Table B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in All areas**—PART A—**Households classified by Major Groups of Principal Household Industry and number of persons engaged,**

PART B—**Households classified by Minor Groups of Principal Household Industry—**

This Table which relates to Households engaged in Household Industry only is prepared on a 20 per cent sample of households. It is presented in two parts. Part A deals with Households classified by Major Groups of Principal Household Industry and number of persons engaged. The number of persons engaged in each Industry are grouped under 1, 2, 3—5, 6—10 and more than 10 persons. This information is supplied for Divisions and Major Groups of I. S. I. C., separately for Total, Rural and Urban. Part B deals with Households classified by Minor Groups of Household Industry. Number of Households engaged in Household Industry under each Minor Group are shown in it for all areas.

7. **Table B-XV—Sample Households engaged *both in Cultivation and Household Industry* classified by Size of Land in Rural and Urban areas separately**—This Table which is prepared on a 20 per cent sample of Households shows the households engaged both in Cultivation and Household Industry by size of holdings in Rural as well as in Urban areas. An analysis has been made of persons working in these households with reference to the size of the holdings. In cases where more than 1 person are employed, the number of family workers and hired workers are separated. This Table establishes correlationship between the scale of Household Industries and the scale of Cultivation.

8. **Table B-XVI—Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in All areas**—This Table, which is confined to Principal Household Industry only, is prepared separately for Total, Rural and Urban areas of this district on the basis of 20 per cent sample of Households. It gives data in respect of Households engaged both in Household Industry and Cultivation or in Household Industry without Cultivation. Household Industries dealt in this Table are shown by Divisions and Major Groups. As many of the Household Industries are seasonal, this Table indicates the number of Households engaged in industrial occupations for different periods in the year ranging from 1—3 months, 4—6 months, 7—9 months and 10 months to 1 year.

9. **Table B-XVII—Sample Households classified by (i) number of male and female members by size of Households and (ii) engaged (*a*) neither in Cultivation nor in Industry, (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated**—This Table which is compiled on a 20 per cent sample of Households gives data for Total, Rural and Urban areas of this district. It is intended to show family sizes distributed according to one member, 2—3 members, 4—6 members, 7—9 members and 10 members and over. This is

cross-tabulated by households of Rural areas engaged (*i*) neither in Cultivation nor in Household Industry, (*ii*) in Household Industry only and (*iii*) in Cultivation. Households of Rural areas engaged in Cultivation are further classified according to the sizes of the holding, i. e., less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9 and 50+ acres. This Table is important as it endeavours to correlate the size of the Household with the economic activity of the Household, particularly in the Rural areas.

10. The total number of Households and its sexwise population of this district are given below :

| Total Rural Urban | Total No. of House-holds | Total Household Population | | |
|---|---|---|---|---|
| | | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 |
| Total | 406,513 | 1,871,891 | 898,943 | 972,948 |
| Rural | 374,002 | 1,716,309 | 819,254 | 897,055 |
| Urban | 32,511 | 155,582 | 79,689 | 75,893 |

# TABLE B-X—HOUSEHOLDS (i) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (ii) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (iii) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY *FOR ALL AREAS*

(Based on 20 per cent sample)

## APPENDIX TO TABLE B-XIV PART A

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions, which are omitted from the main Table, are shown in this Appendix. The Major Groups having the number of Households and number of persons engaged in each Household Industry are shown within brackets and are presented in run of lines.

The following symbols are used in this Appendix:—

| | | | |
|---|---|---|---|
| 1 | Person | .. | A |
| 2 | Persons | .. | B |
| 3 — 5 | Persons | .. | C |
| 6—10 | Persons | .. | D |
| More than 10 | Persons | .. | E |
| | Unspecified | .. | F |

**Total—** 00 (A-16, B-6, C-3, D-1); 01 (A-15, B-16, C-3), 0[illegible] (A-1,E-1, C-2)21 :(A-3, C-1); 22 (A-22, B-15, C-8, D-1); 24 (A-6, B-10, C-8); 27 (A-96, B-28, C-10); 29 (A-3, B-1); 30 (A-2); 31 (A-[illegible], B-7, C-2); 33 (A-12, B-4, C-2); 34-35 (A-51, B-85, C-52, D-7); 36 (A-100, B-57, C-47, D-7, E-1); 38 (A-7, C-1); 39 (A-299 B-103, C-46, D-1, E-1)

**Rural—** 00 (A-16, B-6, C-3, D-1); 01 (A-15, B-16, C-3); 02 (A-1, B-1, C-2); 21 (A-3, C-1); 22 (A-9, B-7, C-4, D-1); 24 (A-6, B-9, C-8); 27 (A-77, B-21, C-8); 29 (A-2); 30 (A-1); 31 (A-10, B-5, C-1); 33 (A-7, B-2, C-2); 34-45 (A-50, B-81, C-46, D-5); 36 (A-83, B-53, C-44, D-5, E-1); 38 (A-5, C-1); 39 (A-184, B-77, C-33)

**Urban—** 22 (A-13, B-8, C-4); 24 (B-1); 27 (A-19, B-7, C-2); 29 (A-1, B-1); 30 (A-1); 31 (A-2, B-2, C-1); 33 (A-5, B-2); 34-35 (A-1, B-4, C-6, D-2); 36 (A-17, B-4, C-3, D-2); 38 (A-2); 39 (A-55, B-26, C-13, D-1, E-1)

## TABLE B-XIV—SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY *IN ALL AREAS*

( Based on 20 per cent sample )

PART B—HOUSEHOLDS CLASSIFIED BY MINOR GROUPS OF PRINCIPAL HOUSEHOLD INDUSTRY

| Code No. of I.S.I.C. | Household Industry Minor Groups (Description) | | Number of Households | | |
|---|---|---|---|---|---|
| | | | Total | Rural | Urban |
| 1 | 2 | | 3 | 4 | 5 |
| | **All Industries** | ... | **4,946** | **4,303** | **643** |
| 0051 | Production of vegetables | ... | 7 | 7 | ... |
| 0061 | Production of fruits and nuts in plantation, vines and orchards | ... | 3 | 3 | ... |
| 0062 | Production of copra (from coconuts) | ... | 15 | 15 | ... |
| 0081 | Production of juice (Neera) by tapping coconut trees | ... | 1 | 1 | ... |
| 0130 | Production of tobacco in plantation | ... | 6 | 6 | ... |
| 0151 | Pan cultivation | ... | 28 | 28 | ... |
| 0231 | Production of charcoal | ... | 3 | 3 | ... |
| 0251 | Production of Kattha | ... | 1 | 1 | ... |
| 0310 | Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries | ... | 150 | 150 | ... |
| 0401 | Rearing of goat for milk and animal power | ... | 2 | 2 | ... |
| 0402 | Rearing of buffalo for milk and animal power | ... | 1 | 1 | ... |
| 0403 | Rearing of cows for milk and animal power | ... | 47 | 44 | 3 |
| 0405 | Production and rearing of ivestock mainly for milk and animal power, n. e. c. | ... | 268 | 242 | 26 |
| 0411 | Sheep breeding and rearing | ... | 9 | 9 | ... |
| 0421 | Rearing and Production of pigs and goats (mainly for slaughter) | ... | 4 | 4 | ... |
| 0431 | Poultry keeping and production of eggs | ... | 5 | 5 | ... |
| 0441 | Bee-keeping for production of honey and wax | ... | 4 | 3 | 1 |
| 0481 | Collection of bones | ... | 1 | ... | 1 |
| 0484 | Production of other animal husbandry products, such as, skin, ivory, teeth and hair, etc. | ... | 6 | ... | 6 |
| 1071 | Extraction of chalk | ... | 4 | 4 | ... |
| 1072 | Quarrying of lime-stone | ... | 10 | 10 | ... |
| 1073 | Stone and slate quarrying | ... | 6 | 6 | ... |
| 1074 | Quarrying of sand, clay, gravel, etc., n. e. c. | ... | 14 | 14 | ... |
| 2001 | Production of flour by village chakkis or flour mill by grinding wheat, maize, gram, etc. | ... | 51 | 41 | 10 |
| 2002 | Hand pounding of rice by Dhekhi or Ukhal | ... | 65 | 54 | 11 |
| 2006 | Parching of grains | ... | 181 | 159 | 22 |
| 2021 | Gur and Khandsari making from sugarcane and palm | ... | 7 | 7 | ... |
| 2041 | Slaughtering, preservation of meat and fish and canning of fish | ... | 78 | 78 | ... |
| 2042 | Fish currying or curing and salting (currying applies more to skin and hide) | ... | 1 | 1 | ... |
| 2050 | Production of bread, biscuit, cake and other bakery products | ... | 2 | 1 | 1 |
| 2060 | Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products | ... | 18 | 17 | 1 |
| 2070 | Oil pressing ghani, kolhu or by small machines | ... | 65 | 58 | 7 |
| 2091 | Confectionery | ... | 1 | 1 | ... |
| 2092 | Making of sweetmeats, laddu, peda, barphi, batasa, etc. | ... | 321 | 288 | 33 |

## APPENDIX TO TABLE B-XVI

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions which are omitted from the main Table are shown in this Appendix. These Major Groups followed by number of households together with the period of working within brackets, are given in run on lines. It is prepared separately for Total, Rural and Urban areas.

The following symbols are used :—

**With Cultivation**

| | | |
|---|---|---|
| 1 to 3 months | .. | A |
| 4 to 6 months | .. | B |
| 7 to 9 months | ... | C |
| 10 to 12 months | ... | D |
| Months not stated | ... | X |

**Without Cultivation**

| | | |
|---|---|---|
| 1 to 3 months | ... | E |
| 4 to 6 months | .. | F |
| 7 to 9 months | ... | G |
| 10 to 12 months | .. | H |
| Months not stated | .. | Y |

**Total**— 00 (A-3, B-20, C-10, D-15, E-1, F-2, G-15, H-8); 02 (B-3, C-1, E-1, F-1, H-2); 21 (A-13, B-16, D-17, F-1, H-3); 22 (C-2, D-7, F-1, G-2, H-43); 24 (B-17, C-2, D-10, E-1, F-4, H-19); 27 (A-3, B-23, C-13, D-30, X-1, E-2, F-11, G-9, H-112); 29 (A-1, B-1, F-1, H-3); 30 (A-1, F-1, H-1); 31 (C-1, E-1, F-1, G-1, H-17, Y-1); 33 (B-10, C-1, D-3, F-6, G-6, H-6); 34-35 (A-14, B-76, C-63, D-310, X-4, E-2, F-15, G-12, H-162, Y-4); 36 (A-4, B-20, C-14, D-108, X-4, E-1, F-9, G-14, H-181, Y-7); 38 (B-1, C-2, D-11, H-8); 39 (A-4, B-33, C-33, D-75, X-1, F-28, G-25, H-326, Y-11).

**Rural**— 00 (A-3, B-20, C-10, D-15, E-1, F-2, G-15, H-8); 02 (B-3, C-1, E-1, F-1, H-2); 21 (A-13, B-16, D-17, F-1, H-3); 22 (C-2, D-7, F-1, G-1, H-19.); 24 (B-17, C-2, D-10, E-1, F-4, H-18); 27 (A-3, B-23, C-13, D-29, X-1, E-1, F-8, G-9, H-88); 29 (A-1, B-1, F-1, H-1); 30 (A-1, F-1); 31 (C-1, E-1, F-1, G-1, H-12, Y-1); 33 (B-10, C-1, D-3, F-5, G-6); 34-35 (A-14, B-75, C-63, D-305, X-4, E-2, F-14, G-12, H-150, Y-4); 36 (A-4, B-20, C-14, D-108, X-4, E-1, F-8, G-13, H-157, Y-7); 38 (B-1, C-2, D-10, H-6); 39 (A-4, B-33, C-33, D-71, X-1, F-27, G-22, H-234, Y-11).

**Urban**— 22 (G-1, H-24); 24 (H-1); 27 (D-1, E-1, F-3, H-24); 29 (H-2); 30 (H-1); 31 (H-5); 33 (F-1, H-6); 34-35 (B-1, D-5, F-1, H-12); 36 (F-1, G-1, H-24); 38 (D-1, H-2); 39 (D-4, F-1, G-3, H-92).

# TABLE-C SERIES

## SOCIAL AND CULTURAL TABLES

The contents of the Social and Cultural Tables appearing in this volume are briefly explained below :

2. **Table C-I—Composition of Sample Households by relationship to Head of Family classified by size of land cultivated (Based on 20 per cent sample)**—This Table shows the family composition of households engaged in different occupations, namely, (*i*) households engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry and (*iii*) households engaged in cultivation. The last category of households are further split up according to the size of the land cultivated by them.* It is presented separately for Total, Rural and Urban.

3. This Table gives the sex composition of the members in a household. Heads of households and their spouses, family members and unrelated persons are shown separately. Heads of households can be males or females. Married relations are separated from unmarried family members and among the former the married sons are shown distinct from other married relations. This Table may be of sociological interest indicating the strength of the joint family system.

4. The Heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the Head of household in the 'Population Record' where the conventional Head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

5. **Table C-II—Age and Marital Status**—This Table shows the marital status of all enumerated persons by their age-groups and sexwise, separately for Total, Rural and Urban. The age-groups conform to international requirements. This is an important demographic Table from which it can be ascertained whether proportions in various marital status conditions have increased or decreased since the last Census and whether any trend is observed in the age of marriage. The data on married females by age-groups can be utilized for forecasting the future births from age specific birth rates.

6. **Table C-III—Age, Sex and Education**—This Table is presented in three parts :

**Part A— Age, Sex and Education in All areas**

**Part B— Age, Sex and Education in Urban areas only**

**Part C— Age, Sex and Education in Rural areas only**

The information which is supplied for broad educational levels is given for five-yearly age-groups up to 34, one age-group 35—44, another for 45—59 and still another for 60+. The educational levels are different for Urban and Rural areas. They are the same as given in Table B-III Parts A and B. This Table is important as it measures the growth of literacy in the total population as well as in different age-groups since last Census.

7. **Table C-V—Mother-tongue (Alphabetical order)**—This Table shows the large number of languages and dialects spoken in the district.

8. **Table C-VII—Religion**—This Table shows the distribution of population according to Religion. It is prepared for Total and Rural areas only.

9. **Table C-VIII—Scheduled Castes and Scheduled Tribes :**

**Part A— Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes**

**Part B— Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes**

This Table which gives separate data for Total, Rural and Urban is presented in two parts. Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Both the parts show the distribution of population of Scheduled Castes and Scheduled Tribes respectively by literacy and classification of workers into nine industrial categories and the total number of non-workers. This is a general Table prepared for the first time.

# TABLE-E SERIES

## HOUSING AND ESTABLISHMENT TABLES

**Table E-I—Census Houses and the uses to which they are put**—This Table gives details of Census Houses according to their use. It is based on full count figures and furnishes data in respect of the district as a whole. Figures relating to smaller administrative units, viz., subdivisions and police stations with rural and urban break-up will be available in the Report on Housing and Establishments (Census of India, 1961, Vol. XII—Orissa Part IV-B).

2. Census Houses which did not contain any household during house-listing operation have been shown as vacant in this Table. Occupied Census Houses have been classified into various categories as furnished in the Table, such as, dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, etc.

3. To facilitate study of the Table, definitions of terms used are furnished below :

*Census House*—A Census House means a structure or a part of a structure inhabited or vacant or a dwelling, a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

*Shop and shop*-cum-*dwelling*—A shop is a place where articles are sold for cash or for credit.

When a part of the Census House is used as shop and the other part as dwelling it is termed as shop-*cum*-dwelling.

*Workshop, factory and workshop*-cum-*dwelling*—A Census House is considered to be a factory or a workshop if some kind of production, processing, repair or servicing is undertaken therein or if goods or articles are made and sold. The definition is broad enough to cover all kinds of work premises beginning from a big factory to a petty workshed where activities connected with production, processing, etc., are undertaken, however, meagre the scale might be.

When a part of the workshop is used as residence, the Census House is treated as workshop-*cum*-dwelling.

*Business Houses*—Business Houses are those that are meant for transactions in money or commercial commodities, e. g., bank, exchange, etc.

4. **Table E-II—Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling**—This Table furnishes details in respect of tenure status of households living in Census Houses used wholly or partly as dwelling. It has been prepared on the basis of 20 per cent sample. It gives figures for the district as a whole. Statistics in respect of smaller units, such as, subdivisions and police stations with rural and urban break-up are given in the Report on Housing and Establishments. The total, rural and urban break-up have been further sub-classified according to the tenure status of Census Households.

The term "Census Household" occurring in this Table means a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

"Shop-*cum*-dwelling" and "Workshop-*cum*-dwelling" have been explained in the fly-leaf to Table E-I.

5. **Table E-III—Census Houses used as Factories and Workshops classified by industry, power**

**and no power used and size of employment**—This Table gives the distribution of workshops and factories in the district with rural and urban break-up by different kinds of fuels used. Factories and workshops are divided into five categories according to the fuel used, viz., factories and workshops run by—

(*i*) Electricity

(*ii*) Liquid fuel

(*iii*) Coal, wood and bagasse

(*iv*) Other power and

(*v*) No power

Factories and workshops classified by different kinds of fuels as above, have further been sub-divided by size of employment, viz., factories employing—

1 Person

2— 5 Persons

6— 9 Persons

10—19 Persons

20—49 Persons

50—99 Persons and

100 Persons and above

6. Size of employment has been determined on the basis of average number of persons employed per day in a factory or workshop. The average number of persons working per day has been worked out from the total number of workers including apprentices, either paid or unpaid employed in the factory or workshop including the owner or proprietor and any of his family members (if working) who were employed during the week preceding the date of enumerator's visit.

7. Figures furnished in Col. 1 of this Table relate to broad group of industries coded under the Indian Standard Industrial Classification Scheme. Further break-up of these industries is available in the Report on Housing and Establishments. The system of notation adopted in the scheme of classification of industries has been explained elsewhere in this volume for convenience of reference.

8. **Table E-IV—Distribution of Sample Households living in Census Houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof**—Like Table E-II, this Table has also been prepared on 20 per cent sample. The number of sample households living in Census Houses used wholly or partly as dwelling has been furnished in this Table separately for each type of predominant materials of wall and of roof. The figures shown are for the district as a whole. Statistics in respect of smaller territorial *untis*, such as, subdivisions and police stations will be available in the Report on Housing and Establishments. This Table classifies various types of predominantly used wall materials into nine categories, viz.,

(1) Grass, leaves, reeds or bamboo

(2) Timber

(3) Mud

(4) Unburnt bricks

(5) Burnt bricks

(6) C. I. sheets or other metal sheets

(7) Stone

(8) Cement concrete

(9) Other materials

9. Likewise, the materials which predominantly compose the roof have been shown under seven different classes, viz.,

(1) Grass, leaves, reeds, thatch, wood or bamboo

(2) Tiles, slate or shingle

(3) Corrugated iron, zinc or other metal sheets

(4) Asbestos cement sheets

(5) Brick and lime

(6) Concrete and stone

(7) Other materials

'Roof' means the outer surface of the roof exposed to weather but not the ceiling. In case of multistoreyed building, the intermediate floors have been treated as the roofs of the corresponding lower floors.

10. **Table E-V—Sample Households classified by number of members and by number of rooms occupied**—This Table, which has been prepared on 20 per cent sample relates to households classified by number of members by males and females separately and by number of rooms occupied. It gives the break-up of the total sampled households into households either having no regular room or each having one room, two rooms, three rooms, four rooms and five rooms or more. The figures furnished in the Table are in respect of the district as a whole. Statistics in respect of smaller territorial units, such as, subdivisions and police stations have been furnished in the Report on Housing and Establishments.

11. A room is defined as a structure which usually has four walls with one door way at least and with roof overhead and is wide and long enough for a person to sleep in, i. e., it should be at least 6 ft long. Unenclosed verandah, kitchen, store, garage, cattleshed and latrine are not treated as rooms.

## TABLE E-I—CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

Table E-I

Table E-1

| Total Rural Urban | Total number of Census Houses | Census Houses vacant at the time of house-listing | *Occupied Census Houses used as :* Dwellings | Shop-*cum*-dwellings | Workshop-*cum*-dwellings | Hotels, Sarais, Dharam-shalas, Tourist homes and Inspection houses | Shops excluding eating houses | Business houses and offices | Factories, workshops and worksheds | Schools, and other educational institutions including training classes, coaching and shop classes | Restaurants, sweetmeat shops and eating places | Places of enter-tainment and community gathering (Panchayat Ghar) | Public health and medical institutions, hospitals, health centres, Doctor's clinics, dispen-saries, etc. | Others |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |

# TABLE-SCT SERIES

## TABLES ON SCHEDULED CASTES AND SCHEDULED TRIBES

Special Tables have been devised during the Census of 1961 to give the population figures for each Scheduled Caste and Scheduled Tribe by their religion, age, marital status, education, etc. The contents of each Table appearing in this volume are briefly described below.

2. **Table SCT-I—Industrial Classification of Persons at work and of Non-workers by sex**—This Table is presented in two parts :

**Part A— Industrial Classification of Persons at work and of Non-workers by sex for Scheduled Castes only**

**Part B— Industrial Classification of Persons at work and of Non-workers by sex for Scheduled Tribes only**

This Table gives the population of each Scheduled Caste and Scheduled Tribe separately for Rural and Urban. It also shows in which section of industry, members of each Scheduled Caste and Scheduled Tribe are working. Information regarding each caste and tribe which are often required for drawing up various welfare schemes are given in this Table.

3. The total population of the Scheduled Castes and Scheduled Tribes in the district, each subdivision and police station is given in the statement below :

| District/Subdivision/ Taluk/Police Station | | Scheduled Castes | | | Scheduled Tribes | | |
|---|---|---|---|---|---|---|---|
| | | Persons | Males | Females | Persons | Males | Females |
| 1 | | 2 | 3 | 4 | 5 | 6 | 7 |
| **GANJAM DISTRICT** | ... | **308,298** | **147,949** | **160,349** | **188,001** | **92,319** | **95,682** |
| **Chatrapur Subdivision** | ... | **97,401** | **47,056** | **50,345** | **5,989** | **2,950** | **3,039** |
| CHATRAPUR TALUK | ... | 48,384 | 23,577 | 24,807 | 427 | 205 | 222 |
| Chatrapur PS | ... | 19,458 | 9,586 | 9,872 | 419 | 199 | 220 |
| Rambha PS (Portion) | ... | 7,127 | 3,625 | 3,502 | 6 | 5 | 1 |

4. **Table SCT-II—Age and Marital Status**— This Table is presented in two parts :

**Part A— Age and Marital Status for Scheduled Castes**

**Part B— Age and Marital Status for Scheduled Tribes**

This Table which corresponds to Table C-II supplies information regarding the marital status of the individual Scheduled Caste and Scheduled

Tribe in the broad age-groups of 0—14, 15—44, 45+ and age not stated.

5. **Table SCT-III Part A—(i) Education in Urban areas only for Scheduled Castes, (ii) Education in Urban areas only for Scheduled Tribes; Part B—(i) Education in Rural areas only for Scheduled Castes, (ii) Education in Rural raeas only for Scheduled Tribes**—The literacy and educational levels for each Scheduled Caste and Scheduled Tribe are shown in this Table. The different educational levels for Urban areas and Rural areas are given below :

| Urban areas | Rural areas |
|---|---|
| Illiterate | Illiterate |
| Literate (without educational level) | Literate (without educational level) |
| Primary or Junior Basic | Primary or Junior Basic |
| Matriculation or Higher Secondary | Matriculation and above |
| Technical diploma not equal to degree | |
| University degree or Post-graduate degree other than technical degree | |
| Technical degree or diploma equal to degree or Post-graduate degree | |

6. **Table SCT-IV—Religion**—This Table is given in two parts : Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Scheduled Castes may belong to either Hindu or Sikh religion only. None of the members of Scheduled Castes in this State have returned themselves as Sikh. As all the Scheduled Castes are Hindus and as their population is already available in SCT-I Part A, the corresponding portions of this Table is omitted.

7. Part B shows the Scheduled Tribes who may belong to any religion. The religions returned in this State are Christian, Hindu and Sarna.

8. **Table SCT-V Part A—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Castes (Based on 20 per cent sample) and Part B—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Tribes (Based on 20 per cent sample)**—This Table which corresponds to Household Economic Table B-XI gives useful information regarding the size of holding of Scheduled Castes and Scheduled Tribes separately for Rural areas only. The interest in land is classified into three categories mentioned below :

I. Owned or held from Government
II. Held from private persons or institutions for payment in money, kind or share
III. Partly held from Government and partly from private persons for payment in money, kind or share

Each of the above categories is cross-tabulated according to the size of the land cultivated by each household.

9. **Table SC-I—Persons not at work classified by Sex, Type of Activity and Educational Levels for Scheduled Castes**—This is a special Table prepared for total Scheduled Castes and not for individual caste. Three categories of non-working population, namely, full-time students, persons seeking employment for the first time and persons employed before but now out of employment and seeking work are shown in this Table along with the total non-workers in this district. It gives useful information regarding students and unemployed persons among the Scheduled Castes. The above categories of non-workers are further classified according to their broad educational levels indicated below :

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Above Matriculation or Higher Secondary

10. **Table ST-I—Mother-tongue and Bilingualism for Scheduled Tribes**—This is one of the

Special Tables meant for Scheduled Tribes only. This Table displays the peculiar languages and dialects of the tribal population. The dialect of each of the tribes is given. Those members of the tribes who have moved out of their homes and speak some other language in addition to the mother-tongue as a result of their contact with local population are also shown in this Table. This Table is very useful for the linguistic study of tribal population. It also helps to find out as to how many of the tribes have forgotten their original language after coming in contact with the local language or the language of the majority. Secondary languages having speakers less than 0·1 per cent of the population are omitted.

**11. Table ST-II—Persons not at work classified by Sex, and Type of Activity for Scheduled Tribes**—This is the second Special Table for the Scheduled Tribes corresponding to SC-I for the Scheduled Castes. It differs from the latter Table in as much as it gives the data for each Scheduled Tribe but does not show the broad educational levels. Besides the total non-working population of each tribe, three categories of non-workers, namely, full-time students, persons seeking employment for the first time and persons employed before but now out of employment and seeking work are presented in it for this district.

## LIST OF INDUSTRIES IN THE DISTRICT OF GANJAM

The Table furnished hereafter gives a list of industries conducted in the Urban and Rural areas of district Ganjam. The list has been prepared in the following manner :

Various industries existing in a particular village were enlisted at first. The villages were then arranged in the order in which they appear in the Village Directory. In this manner the list of villages within one particular police station was completed. This was followed by similar lists of other police stations, one after the other.

Indication of the existence of a particular industry is given against the village concerned, not by mentioning the descriptive name of the industry but by recording the code number of the industry as prescribed under the Indian Standard Industrial Classification Scheme. This code number is followed by another figure enclosed in brackets which represents the total number of establishments relating to that particular industry existing within the village concerned.

In presenting the consolidated list of a police station, first of all the aggregate list of industries for the police station as a unit has been given. This aggregate list is then broken up into a consolidated list for Rural areas and a similar list for Urban areas, if the police station has got both Rural and Urban areas. Similar procedure has been adopted in presenting the consolidated list for the district. Lastly comes the individual village list, indicating all such villages as may have one or more industries. Names of villages which have no industry of any approved type, have been omitted from the list.

The industrial code numbers have been exhibited against a village (or police station or district as the case may be) in ascending order. For example, Division "0" of the I. S. I. C. Scheme appears first, followed by Division "2 & 3".

A list of code numbers showing against each, the name of the industry to which it relates is furnished in the note to Table-B series (General Economic Tables) for convenience of reference.

## TABLE ON FAIRS AND FESTIVALS IN THE DISTRICT OF GANJAM

This Table gives a list of villages where important fairs or festivals of the district are held. The names of the villages have been arranged police-stationwise according to their serial numbers in the Primary Census Abstract. The list includes only those fairs which attract a large number of people of the village or outside.

Column 1 of the Table gives the name of the village together with its serial number. The name of the fair or festival held in the village is furnished in column 2 while columns 3 and 4 respectively furnish the name of the month in which such fair is held and the approximate number of persons attending the fair.

The list is prepared on the basis of information furnished by the primary school teachers of the locality concerned to whom a list of questionnaire was circulated by post with request to furnish the replies. The number of people gathering at the fair is based on eye estimation and may, therefore, be treated as approximate. Name of the month in column 3 is in terms of English calendar month which does not exactly coincide with the Oriya month. The name of the English month when the festival usually falls, has, therefore, been furnished in this column.

Besides the above information, a few more details were collected through the agency of the primary school teachers. Such details will be available in another volume where the Fairs and Festivals of Orissa are proposed to be published in an elaborate manner.

## FAIRS AND FESTIVALS IN RURAL AREAS ONLY

| Name of village with its serial number | | Name of Fair or Festival | Time of occurrence | Approximate number of persons attending |

# PART III

# OFFICIAL STATISTICS

*Contains*

Statistics relating to Rainfall, Agriculture, Public Health, Vital Events, Administration, Police, Jails, Co-operative Societies, Revenues, Community Development, Grama Panchayat, Education, Animal Husbandry, Mines, etc.

## OFFICIAL STATISTICS

This part contains statistics relating to different Departments of the State Government, such as, agriculture, public health, administration including police and jails, co-operative societies, education, community development, grama panchayats, and mines, etc., which are embodied in 40 Tables. The statistics were collected from different offices mostly by deputing staff from this organization. Except only in a few cases where it was possible to take out the figures from published reports of the Departments concerned, most of these had to be gathered from the various official registers and manuscript reports. The names of the Departments, from which the statistics were obtained, are indicated below the concerned Tables. The Tables pertaining to different subjects given in this Part may be broadly classified as follows :

| | Subjects | | Table Nos. |
|---|---|---|---|
| 1 | Rainfall and temperature | ... | 1— 3 |
| 2 | Agriculture | ... | 4—10 |
| 3 | Public Health including vital statistics | ... | 11—15 |
| 4 | Administration | ... | 16—20 |
| 5 | Education | ... | 21—29 |
| 6 | Community Development | ... | 30—32 |
| 7 | Grama Panchayat and Panchayat Samitis | | 33—34 |
| 8 | Animal Husbandry | ... | 35 |
| 9 | Co-operative Societies | ... | 36 |
| 10 | Miscellaneous | ... | 37—40 |

The district of Ganjam is one of the old districts of the State. The records for some of the items are, therefore, available from 1936 onwards, the year in which the district was formed at first. But they are not in as much details in which they are now maintained. After merger of the neighbouring princely states, the boundaries of the districts were redrawn in 1949, and therefore, the earlier records will not be on properly comparable basis with those for the post-merger years. Hence the collection and production of various official statistics in this Part are limited to the previous decade only. The various Tables presented are briefly explained as follows :

**Tables 1—3 : Rainfall and Temperature**—Two Tables, viz., Tables 1 and 2 concerning rainfall are presented. Tables 1 (a), 1 (b), 1 (c), 1 (d) and 1 (e) give the monthly rainfall and number of rainy days for five selected rain recording stations in the district for different years of the decade 1951-60. The district has 15 rain recording stations out of which only these five stations, namely, Bhanjanagar, Aska, Parlakhemundi, Chatrapur and Surada were found having comparatively more complete records than others. Except Berhampur, all other subdivisions are thus represented. The records for Chatrapur may, however, be taken to represent the position for the adjacent Berhampur Subdivision. The figures reproduced in this Table (Table 1 series) have been taken from the rainfall statistics maintained by the Director of Agriculture and Food Production, Orissa, some of which were published in the Orissa Gazette.

Table 2 gives the normals of monthly rainfall and rainy days based on the records of the 13 rain-recording stations of the district during the period from 1901 to 1950. These have been taken from the Memoirs of the Indian Meteorological Department, Volume XXXI—Part III. This Table also shows the annual rainfall and number of rainy days for the district for each of the years during the past decade, based on the records maintained by the Director of Agriculture and Food Production, Orissa.

The rain recording stations work under the responsibility of local officials of various departments, who might be conveniently available at the

same station, namely, Thana Officers, Medical Officers, School Teachers, or subordinate Revenue Officers. They are expected to record daily rainfall, if any, and submit monthly reports direct to the Director of Agriculture and Food Production, Orissa. According to the approved arrangements, this report should reach the Directorate of Agriculture and Food Production, Orissa by the 21st of the following month, but in actual practice, many stations default or delay inordinately in despatching the report. Such default or delay results either due to the post of the Officer-in-charge of the station lying vacant for a considerable length of time, or due to the rain-recording instruments remaining unattended to or unreplaced after damage or loss in some way. For these reasons, the rainfall records of most of the stations in the district were not maintained regularly or properly. In 1960, 9 out of the 15 stations did not send their reports. Even those 6 stations, which sent the returns, did not report records for all the months of the year. The rainfall records of the district are, therefore, incomplete and defective.

Table 3 gives statistics about temperature. There is only one observatory in the district at Gopalpur. Records of this station for a large number of years are available. The description of the climatic condition given in Part I of this Handbook is based on these records. Since the observatory is located at the sea coast, temperature in inland hilly tracts may be higher in the hot months and lower in the winter by a few degrees from what is given in the description of climatic conditions. The monthly records of temperature for the year 1961 and normal monthly temperature of Gopalpur observatory have been given in this Table. The data was obtained from the Director, Regional Meteorological Centre, Calcutta, and Deputy Director General of Observatories (Climatology and Geophysics), Poona.

**Tables 4—10 : Agriculture**—In the undermentioned seven Tables, agricultural statistics relating to the district are given.

| Table No. | | Particulars |
|---|---|---|
| 4 | ... | Land utilization and area under crops |
| 5 | ... | Classification of area by sources of irrigation |
| 6 | ... | Minor irrigation projects with ayacut area of 100 acres or more each |
| 7 | ... | Estimated yield rates of principal crops per acre |
| 8 | ... | Average wholesale price quotations in respect of staple food grains and other important crops during years 1957—1960 |
| 9 | ... | Statistics of wages and working hours |
| 10 | ... | Agricultural implements and machineries during the livestock censuses of 1945, 1957 and 1961 |

The compilation of primary agricultural statistics of a district is done by the District Collector. He furnishes annual statements in prescribed proforma called the Season and Crop Reports to the Director of Agriculture and Food Production, Orissa, who is responsible for compilation and presentation of these statistics at the State level. It was noticed that submission of these annual returns during the past decade was delayed or neglected by the Collectors. Further, most of these returns lacked accuracy. An attempt was made to collect these statistics through a second source, i.e., the Community Development Blocks. By the end of 1959-60, only 57·8 per cent of area of the State was covered by the Blocks, and so complete data for any district through this source was not available.

Out of the above 7 Tables, Tables 4 and 5 contain statistics about land and areas taken from the Season and Crop Reports, which were further verified in the Directorate of Agriculture and Food Production. None of these reports except the one for 1952-53 has been published so far. The reports for 1950-51 and 1951-52 could not be traced, and hence the Tables 4 and 5 contain statistics for only 8 years from 1952-53 onwards.

Areas under the nine categories of land utilization, namely, forests, land put to non-agricultural uses, barren and unculturable land, culturable wastes, fallow other than current, pastures and grazing land, land under miscellaneous tree crops and groves not included in net

area sown and current fallow are given in Table 4. These nine categories are also lumped under four broad heads, namely, forests, area not available for cultivation, area cultivable and area cultivated. This Table also gives the areas under some of the important crops, including total areas under such heads as basic food crops, such as, cereals, pulses, fruits and vegetables, other food crops, non-food crops, etc. The heads of categorization under land utilization adopted in this Table may be described as follows :

(1) *Forests*—These include all actually forested areas on land, classed or administered as forests under any legal enactment dealing with forests, whether State-owned or Private.

(2) *Land put to non-agricultural uses*—These include all land occupied by buildings, roads and railways, those under water, e.g., rivers and canals and other lands put to uses other than agricultural.

(3) *Barren and unculturable land*—All barren and unculturable land like mountains, etc., are shown under this category. The land, which cannot be brought under cultivation except at an exorbitant cost, is also classed as unculturable, whether such land is in compact blocks or within cultivated holdings.

(4) *Culturable waste*—These include land available for cultivation, whether not taken up for cultivation or abandoned after a few years for one reason or the other. Such land may be either fallow or covered with scrubs and jungles, which are not put to any use. They may be assessed or unassessed to revenue, and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for 5 years in succession is also included under this category.

(5) *Fallow other than current*—All land, which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than 5 years, are included under this category. These land may have been kept fallow for one or more reasons, namely, poverty of the cultivator, inadequate supply of water, malarial climate, silting of canals and rivers and unremunerative nature of farming.

(6) *Pastures and grazing land*—These include all grazing land, whether they are permanent pastures and meadows or not. Village commons and grazing land within forest areas are also included under this category.

(7) *Area under miscellaneous tree crops and groves, not included in net area sown*—These include all cultivable land, which is not included in "net area sown", but is put to some agricultural use.

(8) *Net area sown*—This covers net area sown with crops and orchards, the area sown more than once during a year being counted once only.

(9) *Current fallow*—This covers normally cropped areas, which are but kept fallow during the current year. For example, if any seedling area is not cropped again in the same year, it may be treated as current fallow.

(10) *Total cropped area*—This represents the total of areas covered with crops, i.e., the sum total of areas covered by all the crops, areas sown with crops more than once during the year being counted as separate areas for each crop.

(11) *Area sown more than once*—This represents the area on which crops are cultivated more than once during the agricultural year. The acreage is generally obtained by deducting those under "net area sown" from those under "total cropped area".

Table 5 shows the area with facilities of irrigation from different sources, namely, canals, tanks, wells and other sources for the 8 years from 1952-53 to 1959-60.

Table 6 shows the list of minor irrigation projects together with their types and irrigation potentiality in shape of ayacut areas of 100 acres or more each. There are many more smaller projects in the district, but only the bigger ones are included in this list. The list was obtained from the Rural Engineering Organization, which is res-

ponsible for execution of various minor irrigation works all over the State. Besides executing their own projects, the Rural Engineering Organization is meant to help the Panchayati Raj institutions in the execution of minor irrigation projects costing not more than Rs. 10 lakhs or having an ayacut up to 4,000 acres.

Table 7 gives the rates of yield per acre of 16 principal crops in the district for each year from 1951-52 to 1959-60. The rates have been based on estimated area and production of different crops. The basic data were obtained from the Directorate of Agriculture and Food Production, Orissa from which the estimated yield rates were worked out. The estimated yield rates may, however, not be equal to the actual yield rates.

Table 8 relates to price quotations in respect of some of the important crops grown in the district. It has beeen compiled from the published reports of the Directorate of Marketing, Orissa. Rates per standard maund or 37·25 Kgs are given in this Table. The 3 marketing centres of the district, for which information is given, are Berhampur, Parlakhemundi and Bhanjanagar. They serve all but Chatrapur Subdivision but the data given for Berhampur may hold good for Chatrapur. Annual figures of price quotations for the period from 1957 to 1959 and both annual and monthly price quotations for the year 1960 have been reproduced in this Table. Figures for earlier years are not available, and those for the years subsequent to 1960 were not published by the time this Handbook went to the press.

Table 9 shows the average rates of wages and working hours for skilled and unskilled workers during the period from 1956 to 1960 excluding 1957. The terms "agricultural labourer" and "subsidiary agricultural labourer" used in this Table are explained at the bottom thereof.

Number of agricultural machineries and implements recorded in 1945, 1957 and 1961 livestock censuses are given in Table 10. These were collected from the Livestock Census Reports of the Director of Animal Husbandry and Veterinary Services, Orissa. After formation of the separate Province of Orissa in 1936, livestock censuses were conducted on three occasions during 1945, 1957 and 1961. Data obtained during all these three censuses have been given in this Table. As explained already, the statistics for 1945 may not be properly comparable with those for the subsequent two counts of 1957 and 1961.

**Tables 11—15 : Public health including vital statistics**—The following five Tables on this subject are given :

| Table No. | | Particulars |
|---|---|---|
| 11 | ... | Number of live births, still births and deaths in each year during 1951—60, according to sex, for rural and urban areas |
| 12 | ... | Deaths according to causes, for rural and urban areas in each year during 1951—60 |
| 13 | ... | Deaths by sex, according to age during 1951—60 |
| 14 (a) & 14 (b) | ... | Number of births and deaths in each month during 1951—60, for Ganjam plains and Ganjam agency areas |
| 15 | ... | List of hospitals, dispensaries and primary health centres as on 31-3-1961 |

The birth and death statistics given in Tables 11 to 14 were collected from the registers maintained in the statistical unit of the Health Directorate, Orissa by the staff deputed from this organization. The first three Tables, nos. 11, 12 and 13 present only annual figures, whereas the fourth Table, 14 (a) & (b) contains monthly records. Table 11 gives the number of live and still births and deaths by sex separately for Rural and Urban areas. Deaths under the seven broad heads under which they are recorded, namely, cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases, wounds and accidents and other causes are shown in Table 12 for Rural and Urban areas. Deaths of males and females in different age-groups are shown in Table 13. Live and still births and deaths due to the seven causes noted above in each month during 1951—60 are given separately for plains and agency areas of the district in two separate statements numbered as Tables 14 (a) & 14 (b).

The terms "live birth" and "still birth", used in these Tables may be defined as follows :

*Live birth :* Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as, beating of heart, etc.

*Still birth :* Birth of the already dead or very nearly dead child is considered still birth.

A list of hospitals, dispensaries and primary health centres as on 31-3-1961 showing their location, year of start and number of beds is given in Table 15. These details were supplied by the Health Directorate (statistical unit), Orissa.

**Tables 16—20 : Administration**—Five Tables have been given on this subject. They are as follows :

| Table No. | | Particulars |
|---|---|---|
| 16 | ... | Number of criminal cases reported to different courts, tried and disposed of during 1951—60 |
| 17 | ... | Strength of district police during the years 1951, 1956 and 1960 |
| 18 | ... | Statistics of jails |
| 19 | ... | Receipts relating to land revenue, excise revenue, sales tax, entertainment tax and stamps during 1951—61 |
| 20 | ... | Number of documents registered and value of property transferred during 1951—60 |

The statistics in Table 16 have been partly collected from the published annual reports on criminal justice of the High Court, Orissa and partly from the statement supplied by the latter in absence of any printed annual reports for the concerned years.

The Inspector General of Police, Orissa supplied information about the strength of police in various ranks in the district for each year during 1951—60. The Table 17, however, shows their number only for 3 years, *viz.*, 1951, 1956 and 1960. Cost of police *per capita* of population, area and population served per member of the police shown in this Table are based on the 1961 Census figures.

The statistics pertaining to jails, supplied by the Inspector General of Prisons, Orissa, are given in Table 18, which shows the number of jails and sub-jails, the capacity of district jail and its strength of staff.

Table 19 contains the figures of various revenues collected in each year in the district from 1950-51 to 1960-61 under some of the important heads of receipts, namely, land revenue, excise revenue, sales tax, entertainment tax and sale proceeds of stamps. These statistics in the Table were obtained from different Departments of the State Government and the names of the Departments and offices supplying the data are shown at the bottom thereof.

Table 20 shows the number of documents registered and value of property transferred between 1951 to 1960. These were collected from the office of the Board of Revenue, Orissa.

**Tables 21—29 : Education**— Nine Tables are given as follows :

| Table No. | | Particulars |
|---|---|---|
| 21 | ... | List of colleges, higher secondary and high schools |
| 22 | ... | Number of students appearing at and passing the high school certificate examinations during 1956—60 |
| 23 | ... | Number of primary schools existing during 1955-56 and 1960-61 |
| 24 | ... | Number of M. E. schools existing during 1955-56 and 1960-61 |
| 25 | ... | List of professional and special schools |
| 26 | ... | List of Sevashrams and Ashram schools |
| 27 | ... | List of Basic schools |
| 28 | ... | List of newspapers and journals |
| 29 | ... | List of important libraries and reading rooms |

The statistics given in these Tables were collected mostly from the office of the Board of Secondary Education, Orissa and the statistical unit in the office of the Director of Public Instruction, Orissa. Except a published list of high schools and Annual Report of Registrar of Newspapers for India, from which lists of higher secondary and high schools, newspapers and journals were taken,

the statistics for no other item was available from any published report. The required information had, therefore, to be collected from the concerned offices.

Table 21 gives a list of colleges, higher secondary and high schools in the district. The number of students appearing at the high school certificate examinations, together with the number of successful students and the percentage of success at various examinations conducted during 1956—60 are given in Table 22. Table 23 shows the number of primary schools existing in the district during 1955-56 and 1960-61, the final years of the past two Five Year Plans. Similar information concerning middle schools is given in Table 24. A list of professional and special schools, *viz.*, Elementary Training schools, Industrial schools, Basic Training schools, Engineering school, Sanskrit Tols, and Gramasevak Talim Kendra, etc., will be found in Table 25. Table 26 gives a list of Sevashrams and Ashram schools together with the names of the post offices under whose jurisdiction they lie. Table 27 contains a list of Basic schools.

Table 28 contains a complete list of newspapers and journals issuing from the district. Only the bigger libraries and reading rooms are shown in the Table 29. The location, dates of establishment, Government grant received and the number of books held by some of these libraries are given in the Table. Some of these information in respect of reading rooms could not be available.

**Tables 30—32 : Community Development**—The following 3 Tables present the achievements of the Community Development Blocks during the past decade :

| Table No. | | Particulars |
|---|---|---|
| 30 | ... | List of Blocks with their coverage of villages, Grama Panchayats and area |
| 31 | ... | Achievements in the C. D. Block programme to the end of 1960-61 |
| 32 | ... | Expenditure incurred under broad heads of development in the Community Development Blocks in each year during 1952-53 to 1960-61 |

The first allotment to the district of a Community Project was made in October, 1952. The statistics given in the above 3 Tables, therefore, relate to the period from 1952-53 onwards. The expenditure figures have been compiled from the registers maintained in the office of the Financial Adviser, Community Development and Panchayati Raj Department, and the statistics relating to physical achievements are taken from the reports of the Administrative Intelligence unit of the same Department. Table 30 gives a list of Community Development Blocks in existence on 31-3-1961, together with their dates of start, their headquarters, number of villages, grama panchayats and area covered by each. Table 31 shows the physical achievements under some of the important items of the block programme to the end of 1960-61. The achievements against a few of these items do not relate to all the Blocks, as complete information in respect of all of them was not available in the said Department. Such items have been distinguished from the rest.

Details of expenditure under broad heads of the programme, such as, block headquarters staff and contingencies, animal husbandry and agricultural extension, irrigation, health and rural sanitation, education, social education, communication, rural arts, crafts and industries and housing for all the blocks together for each year between 1952-53 and 1960-61 are given in Table 32. The Blocks submit their monthly expenditure returns to the Financial Adviser's section of the Community Development Branch where these are compiled and verified with the Accountant General's actuals before adoption for final figures. The statistics given in this Table have been taken from the expenditure registers thus maintained in the Financial Adviser's Office.

**Tables 33—34 : Grama Panchayats and Panchayat Samitis**—Table 33 giving a list of Panchayat Samitis and Grama Panchayats existing in December, 1960, and Table 34, which shows the number of Grama Panchayats with their income and expenditure and number of Adalti Panchayats during the past decade, are the only two Tables given on

this subject. The information given in Table 33 was collected from a published Notification of the Grama Panchayat Department and the statistics in Table 34 have been taken from the Annual reports of the said Department.

**Table 35 : Animal husbandry**—Table 35 gives the number of different categories of main livestock recorded in the three livestock censuses of 1945, 1957 and 1961. The numbers for 1961 counts show the livestock belonging to Government, semi-Government and other institutions actually found living on 15-4-61 at sunrise. The Census was conducted by the Director of Animal Husbandry and Veterinary Services, Orissa.

**Table 36 : Co-operation**—The number of co-operative societies in different categories, namely, Central Bank, small-sized, large-sized, multipurpose, grain-golla, marketing, non-agricultural credit, housing, weavers and other industrial and non-industrial co-operative societies, together with their membership and working capital during 1960-61, are given in Table 36. These statistics were supplied by the office of the Registrar of Co-operative Societies, Orissa.

**Tables 37—40 : Miscellaneous**—These Tables contain statistics on the following items :

| Table No. | Particulars |
|---|---|
| 37 | ... List of cinema houses and printing presses |
| 38 | ... List of railway stations |
| 39 | ... List of Industries with capital investment of Rs. 5 lakhs and above |
| 40 | ... List of registered factories in 1951 and 1961 |

The headings of Tables 37—39 are self-explanatory. Table 40 contains a list of the more important registered factories in the district. This has been compiled from the lists obtained from Chief Inspector of Factories, Orissa. The terms 'factory' and 'worker' used in this Table are defined as follows :

*Factory* means any premises including the precints thereof

(*i*) whereon ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) whereon twenty or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on, but does not include a mine subject to the operation of the Mines Act 1952 (XXXV of 1952), or a railway running shed.

Section 85 of the said Act, however, authorises the State Government to declare, by notification, any place wherein a manufacturing process is carried on, to be a factory within the meaning of the Factories Act, 1948, although it does not fulfil the above requirements of law, provided that the manufacturing process is not being carried on by the owner only with the aid of his family.

*Worker* is defined to mean a person employed directly or through any agency, whether for wages or not, in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or in any other kind of work incidental to or connected with the manufacturing process or the subject of the manufacturing process.

## Table 31—Achievements in the Community Development Blocks to the end of 1960-61

Number of Blocks in existence—21
Total area covered by Blocks—2,257 Sq. miles

| Activities | Unit | Achievements to the end of 1960-61 |
|---|---|---|
| 1 | 2 | 3 |
| **I. Agriculture including irrigation** | | |
| 1 Total cultivable area | ... acres ... | 618,579 |
| 2 Total area under paddy cultivation during 1960-61 | ... acres ... | 445,037 |
| 3 Area covered by Japanese method during 1960-61 | ... acres ... | 30,960 |
| 4 Total area fit for Rabi cultivation | ... acres ... | 555,194 |
| 5 Area brought under Rabi cultivation in 1960-61 | ... acres ... | 269,998 |
| 6 Area benefited by soil conservation measures | ... acres ... | 57 |
| 7 Minor Irrigation Projects taken up or completed | ... numbers ... | 764 |
| 8 Net Additional area brought under irrigation | ... acres * ... | 9,587 |
| 9 Improved paddy seeds distributed during 1960-61 | ... maunds ... | 5,964 |
| 10 Chemical fertilizers distributed during 1960-61 | ... maunds * ... | 150,781 |
| 11 Improved implements distributed | ... numbers * ... | 4,666 |
| **II. Animal Husbandry** | | |
| 1 Veterinary Dispensaries and Hospitals | ... numbers * ... | 14 |
| 2 Stockman Centres | ... numbers * ... | 41 |
| 3 Artificial Insemination Centres | | |
| (*a*) Main Centres | ... numbers * ... | 1 |
| (*b*) Sub-centres | ... numbers * ... | 5 |
| **III. Fisheries** | | |
| 1 Tanks brought under pisciculture by Panchayats | ... numbers ... | 577 |
| **IV. Co-operation** | | |
| 1 All types of Societies | ... numbers ... | 927 |
| 2 Membership in Co-operative Societies | ... numbers ... | 113,906 |
| **V. Health and Rural Sanitation** | | |
| 1 Rural latrines constructed | ... numbers ... | 6,946 |
| 2 Drains constructed | ... Yards * ... | 158,348 |
| 3 Soakage pits constructed | ... numbers * ... | 10,767 |
| 4 Primary Health Centres | ... numbers ... | 8 |
| 5 Rural Dispensaries | ... numbers ... | 38 |
| 6 Maternity and Child Welfare Centres | ... numbers * ... | 21 |
| 7 Family Planning Centres | ... numbers * ... | 6 |
| 8 Cases treated during 1960-61 | | |
| (*a*) In Primary Health Centres | ... numbers * ... | 138,967 |
| (*b*) In Rural Dispensaries | ... numbers * ... | 369,213 |
| (*c*) In Maternity and Child Welfare Centres | ... numbers * ... | 4,242 |
| (*d*) In Family Planning Centres | numbers * ... | 2,470 |
| 9 Drinking water wells constructed and renovated | ... numbers * ... | 2,463 |
| 10 Smokeless Chullas installed | ... numbers * ... | 173 |

**Table 31—Achievements in the Community Developments Blocks to the end of 1960-61—*concld.***

| Activities | | Unit | | Achievements to the end of 1960-61 |
|---|---|---|---|---|
| 1 | | 2 | | 3 |
| **VI. Education** | | | | |
| 1 Total number of Schools | ... | | ... | 2,137 |
| **VII. Social Education** | | | | |
| 1 Mahila Samitis | ... | numbers | ... | 189 |
| 2 Membership of Mahila Samitis | ... | numbers | ... | 5,699 |
| 3 Literacy adult centre started | ... | numbers | ... | 1,297 |
| 4 Adults made literate | ... | numbers | ... | 43,169 |
| 5 Village leaders trained | ... | numbers | ... | 22,069 |
| 6 Reading rooms and libraries functioning | ... | numbers * | ... | 413 |
| 7 Youth Clubs | ... | numbers * | ... | 587 |
| 8 Farmers' Unions | ... | numbers * | ... | 250 |
| **VIII. Communication** | | | | |
| 1 Mileage of roads executed | ... | miles | ... | 427 |
| 2 Bridges and culverts constructed | ... | numbers | ... | 406 |
