STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services	Divisions 5, 8 & 9

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used	
	Manufacture of all kinds of other for industrial purpose	322
	rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately descirbed:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX—II
NATIONAL CLASSIFICATION OF OCCUPATIONS
(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)
75 Occupational Groups (two-digit code numbers)
11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—
- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—
- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—
- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists
- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—
- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—
- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—
- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers
- 0X3 Librarians, Archivists and Related Workers:

1 *Administrative, Executive and Managerial Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

Service, Sports and Recreation Workers.

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

By
G. N. Tiwari
Deputy Superintendent of Census Operations, Madhya Pradesh

Lying between 21° 5′ and 22° 25′ N and 75° 57′ and 77° 13′ E, and occupying a strip of mixed hill and plain country at the western extremity of Narmada valley and of the Satpura plateau, East Nimar District is situated in the south-east corner of Indore Division in Madhya Pradesh. The district was known only as Nimar in the erstwhile Province of Central Provinces and Berar; the prefix east is a post-reorganisation addition to distinguish it from its western neighbour of the same name. It is bounded on the north by Dewas district, on the west by West Nimar district and a portion of Maharashtra State (East Khandesh District), on the South by Maharasthra (East Khandesh, Amraoti and Buldana districts); and on the East by Harda tahsil of Hoshangabad district and Bhainsdehi tahsil of Betul district. The name of the district is considered to be derived from 'nim' meaning 'half', as Nimar was supposed to be half-way down the course of Narmada.* Containing 2.1% of the State's, population the district ranks nineteenth in the State in population having improved its 1951 rank (22nd) by 3. Its population falls short of the average population (752, 847) of a district in the State by 67, 697; or 8.9% of the average population. Satna, Ujjain, Gwalior and Mandla districts have populations within ±5% of East Nimar's population. In area -ranking, East Nimar occupies the twelfth place, containing 2·4. % of the State's area, and being bigger than an average district in the State by 3.7%. Some idea of the relative populousness and size of the district can also be formed by comparing it with the biggest, the smallest, and the most and least populous districts in the State. Thus Bilaspur the most populous district in the State contains almost four times as many inhabitants as East Nimar; while Bastar, the biggest district in the State is about 3-1/2 times as big as East Nimar. In its turn, East Nimar is roughly 3-1/2 times as populous and more than five times as big as the smallest and the least populous district in the State—Datia.

Adiministrative Divisions :

For general administrative purposes, the district is divided into three tahsils; Khandwa tahsil in the north and west; Harsud tahsil in the north and east and Burhanpur tahsil in the south. Administration in the district follows the pattern obtaining elsewhere in the State viz. a Collector and District Magistrate in charge of general and revenue administration of the district with sub-divisional officers cum sub-divisional magistrates, tahsildars and naib-tahsildars under him. Each tahsil is a sub-division for purposes of land revenue administration and law and order and is in charge of a resident sub-divisional officer and sub-divisional magistrate. For land records, the tahsil is further sub-divided into revenue inspector's circles, and patwari circles, the last consisting of a group of villages. The police administration is carried on by a Superintendent of Police, the district being divided into a number of police stations for the purpose. The usual hierarchy- deputy superintendents, circle and sub-inspectors, constables, reserve inspectors is found in this district as in other parts of the State. For Judicial administration, the district is in charge of a District and Sessions Judge, assisted by the usual hierarchy of judicial officers, Additional District and Sessions Judges, and Civil Judges, Class I and II. Separation of judiciary from the executive has been effected in the district.

The district is now completely covered by nine community development blocks, the first of which, Burhanpur came on 2-10-53 while the last was Baldi created on 2-10-62

Physical Aspects† :

In a broad way, the district may be described as consisting of three distinct tracts, belonging respectively to the Narbada valley in the north, the Tapti valley in the south, and the Satpura ranges, running almost due west-east separating the two valleys. The Narbada forms the northern boundary of the district except for the Chandgarh tract in Harsud tahsil, and the jungly Selani tract near Mandhata in Khandwa tahsil, both of which lie to the north of the river. The bed of the Narbada, during the first part of its course in the district lying mostly in Harsud tahsil, and partly in Khandwa tahsil does not contain any open basin as is usually associated with the Narbada, as hills approach the river closely from both north and south. At Punasa, the Narbada passes over a fall of 40 feet in height, and twelve miles below this lies the island village of Mandhata, where the hills open out and an alluvial basin commences. The Kanpur Beria tract which now forms part of the Barwaha tahsil of West Nimar District [as a result of Provinces and States (Transfer of Enclaves) Order 1950] lies in this basin. At the western extremity of Khandwa tahsil, about 25 miles to the south of Narbada and a little to the north of Chhegaon starts a low range of foot-hills which traverse the Khandwa tahsil almost diagonally until it abuts on the Narbada in the extreme north-east of the tahsil. The part of the district lying between the Narbada and this range is covered over considerable areas with forest, and is broken and uneven. South of this range lies the most fertile area of the district, consisting of the valleys of the ABNA and the SUKTA rivers in Khandwa tahsil. This area of Khandwa tahsil is open, and does not contain any forest or hill of any size but the surface is undulating and small valleys with a central stream alternate with broad ridges, some comparatively fertile, others barren and stony. The district head-

* *Imperial Gazetteer of India, Volume XIX, page 106.*
† *Abstracted from Settlement Reports and District Gazetteer.*

quarters town of Khandwa stands in the centre of this plain.

The main range of the Satpuras in the district runs to the south of the plain of the Sukta and the Abna from west to east. The ranges occupy belts in the north of Burhanpur and south and south-east of Harsud tahsils. They are about 11 miles in width, with a generally low elevation, from which a few peaks rise conspicuously. On one such peak is situated the historical fort of Asirgarh. The Satpura ranges are covered by forests. In the extreme south of Burhanpur tahsil, there is another belt of hills, which form the southern face of Satpuras. This is known locally as the *Hatti* range, as it was formerly divided into four *hattis* or estates held by predatory Bhil chiefs. Between these two ranges of the Satpuras, the Tapti has forced a passage. The Tapti flows north-wards through a cleft in the hills, emerging north of the isolated Samardeo hill. This hill separates the two open basins of the Tapti. The upper of these is the Manjrod tract, which was described by Captain Forsyth as 'a rank and malarious wilderness inhabited only by bison and tiger and by a few almost as wild Korku aborigines'. The tract was however reclaimed in the decade 1901-11 by ryotwari settlement. The lower basin consists of a small plain about 16 miles by 12 miles of deep alluvial deposit surrounding the city of Burhanpur.

The Khandwa plain has an elevation of about 1,000 feet above the sea, and that of Burhanpur about 850.

Rivers :

The Satpura hills form the watershed between the Tapti and Narbada river systems; rivers and streams to the north of the Satpuras join the Narbada, while those in the south join the Tapti. The diagonal range which traverses Khandwa tahsil cuts off the streams rising in the Satpura hills from flowing directly north to join the Narbada, but they are diverted eastwards to join the Chhota Tawa. The NARBADA enters the district from north-east and flows through the Chandgarh tract in Harsud tahsil. After being joined by the Chhota Tawa, it flows for about forty miles through wild and broken country. On its north are high cliffs of basalt alternating with precipitous wooded hills. To the south, to the west of the junction of the river Chhota Tawa, there is a sandstone hill of about 500' height. Beyond this hill the river traverses a north-westerly course, till it takes a straight westerly course and forms the northern boundary of the district. Beyond the junction with Chhota Tawa, the Narbada is skirted by a network of ravines running down to it from the tablelands of Mundi and Punasa, which are about 200 feet above the river bed. Throughout this distance of about 40 miles in length, the river stream is much contracted and forms in summer a chain of pools alternating with rapid shallows. At Dhairi opposite Punasa the river falls about forty feet below and then flows through a gorge not more than 50 feet in width. Immediately above Mandhata, Narbada is joined by the small river Kaveri from the south. Below Mandhata the hills and rugged ground recede and the river emerges into an open alluvial basin lying mostly in West Nimar district.

The principal tributaries of Chhota Tawa which flow east to join it are the ABNA, the SUKTA and the WUNA. The PIPRAR and the BALDI rise in the centre of Khandwa tahsil and flow east to join the Chhota Tawa. Rivers Ajnal, Kaveri and Bakur rising north of the diagonal hill traversing Khandwa tahsil flow north to join the Narbada. On its right bank ,the Chhota Tawa is joined by Kala Machak, Ruprail, Ghora Pachhar and Agni, all in Harsud Tahsil. The TAPTI, which rises from the tank of Multai in Betul district, enters the district at its south-east extremity and forms the southern boundary of Harsud tahsil. In this course, the river flows through a cleft in the Satpura hills, forming on one side the Chikhalda block of Berar and on the other the Kalibhit range of Harsud tahsil. These run nearly parallel to each other at a little distance from the river and enclose a narrow strip of land which later widens out into an open basin. The Manjrod and the Piplod tracts of the district are parts of this basin. Lower down its course, the river is forced northward by the isolated hills of Samardeo. Below this hill, the Tapti again takes a south-westerly course through the plain basin which contains Burhanpur town. The whole of Burhanpur tahsil except the extreme north is within the watershed of Tapti, and its main tributaries are the Utaolis and the Mona, both of which rise in the southern branch of the Satpuras.

Flora and Fauna † :

About 43.5% of the district's total area is under forests, which according to the Gazetteer of the district are of four main types : (a)mixed teak forest, (b) mixed teak and *anjan* forest, (*c*) pure *anjan* forest and (*d*) *salai* forest. Teak (*Tectona grandis*) *is found mixed with saj* (*Terminalia tomentosa*), *dhaura* (*Anogeissus latifolia.*) *khair* (*Acacia catechu*), *lendia* (*Lagerstroemia parviflora*), *tendu* (*Diospyros tomentosa*). *tinsa* (*Ougeinia dalbergioides*), *aonla* (*Phyllanthus emblica*), *salai* (*Bosewellia serrata*), *rohan* (*Soymida febrifuga*) *mahua* (*Bassia latifolia*), *achar* (*Buchanania latifolia*), *mohin* (*Odina wadier*), *siharu* (*Nyctanthers arbortristis*). The proportion of teak in these mixed forests is said to vary from nothing to something like 75%. The forests are mostly in Harsud tahsil, and especially along the south bank of Narbada, where patches containing almost pure teak occur.

Mixed teak and *anjan* (*Hardwickia binata*) forests contain *anjan* besides the species mentioned above. *Anjan* is also confined chiefly to the Narbada valley in the district. The forests of Harsud and Khandwa tahsils bordering Narbada also have timber trees like *bija* (*Pterocarpus marsupium*), *shisham* (*Dalbergia latifolia*), and *tendu*. Pure *anjan* forests occur in isolated blocks in the extreme north west of the district.

Salai forests constitute nearly half the forest area of the district, growing on flat hill tops and upper slopes all

* *Page* 144, *Vol A—Descriptive* (1908)

† *Based on the note contained in the District Gazetteer.*

over the district, but particularly on the two southern branches of the Satpuras. *Salai* is associated with *galgal* (*Cochlospermum gossipium*) and *mohin* and a thin crop of grass.

Roadside and garden *flora* includes *nim* (*Melia indica*), *bakain* (*Melia azadirachta*) *siris* (*Albizzia lebbek*), mango (*Mangifera indica*). Among plants of village waste mention may be made of *palas* (*Butea frondosa*), *babul* (*Acacia arabica*) ; *biltari* (*Dichrostachys cinera*) ; *murmati* (*Acacia eburnea*), *ber* (*Zizyphus jujuba*) ; *makoi* (*Zizyphus genoplia*) ; *mahua* (*Bassia latifolia*) ; *achar* (*Buchanania latifolia*) ; *kavit* (*Feronia elephantum*) ; *imli* (*Tamarindus indica*) ; *pipal* (*Ficus religiosa*) ; *bar* (*Ficus bengalensis*) ; *pakar* (*Ficus infectoria*), *koha* (*Terminalia arjuna*) and *gurar* (*Albizzia procera*) growing on banks of streams and *jamun* (*Eugenia jambolana*).

The bamboo found wild in the district is (*Dendrocalamus stricuts*).

Fauna :

Wild *fauna* is similar to that of other districts in the State. According to the District Gazetteer, *bison* is rare in the district, met with in the forests of Tapti valley and those north of Narbada. Tiger is also met with; but panthers are more numerous. The larger variety is locally called *adana* or *chundaria* and the smaller one *chita* or *bimat*. Wolves are also rare; but wild dogs are rather common. Bears were found chiefly in the rocky hills to the south of the district. *Nilgai* is common. Black buck are comparatively rare. Other species of deer are however numerous. The red-faced *langur* monkey is commoner than the brown-faced variety.

Climate and Rainfall :

The district records rainfall at four stations viz. Khandwa, Burhanpur, Harsud and Mandhata. It receives rain from Arabian Sea monsoon which reaches the district sometime by the middle of June. The rainfall goes on gaining in intensity, so that the maximum downpour occurs in July and August. Thereafter the rainy days start getting less frequent, and rains completely stop by the month of October. For the ten years from 1951 to 1960, the average rainfall at Khandwa, Burhanpur, Harsud and Mandhata stations was 896 mm. (35″); 797 mm.(31″); 935 mm. (37″) and 830 mm. (33″) respectively. The average of these, which may be called the district avarage for the ten years comes to 864 mm. (35″). Thus Harsud, the easternmost tahsil gets the maximum rainfall, while Burhanpur gets the least. The rainfall though light is however well suited to the autumn crops of cotton and *juar* which are principally grown in the district.

Years 1959, 1958 and 1954 seem to have been years of heavy rainfall in the district, the averages for these years being 1,155 mm. (45.5″), 1,209 mm. (47.6″) and 1,122 mm. (44.1″) respectively. The maximum downpour of 1,648 mm.(65″)in the decade was registered at theHarsud recording station in 1959. The year 1952 was a year of very poor rainfall, the average for the district in that year being 570 mm. (22″). The minumum rainfall 302 mm. (12″) of the year was registered in that year at the Burhanpur recording station.

Temperature :

Temperatures are recorded at the observatories at Khandwa and Punasa. In the table below, averages of maximum, mean maximum, mean minimum and minimum temperature are presented separately for each month for the ten years 1951 to 1960 (for Khandwa observatory).

Average Maximum, mean maximum, minimum and mean minimum temparatures(in centi grade) (1951-60)

Average temperature in

	January	February	March	April	May	June	July	August	September	October	November	December
Mean Maximum	29·2	32·7	36·8	40·3	42·0	37·6	31·3	29·7	31·4	33·2	31·6	30·3
Maximum	32·6	37·0	40·7	43·7	44·8	42·3	35·7	33·5	35·1	35·9	34·1	32·9
Mean minimum	11·9	14·0	18·6	24·2	28·0	26·3	24·0	23·1	22·8	19·2	13·7	12·1
Minimum	6·6	7·6	12·8	18·5	23·9	21·7	21·1	20·9	21·0	12·9	9·4	7·1

The temperatures recorded at Khandwa observatory may be taken to represent the temperatures for the Khandwa and Harsud plains. Temperatures in the lower portions of the Narbada and Tapti valleys will be somewhat higher than those in Khandwa plain which is at a greater altitude.

The table shows that January is, on an average, the coldest month in the year, when the mean maximum, maximum, mean minimum and minimum temperatures are all lower than the corresponding temperatures for other months in the year. On an average, during the ten years 1951-60, in January the mean maximum, maximum, mean minimum and minimum temperatures were 29·2°C, 32·6°C, 11·9°C, and 6·6°C, respectively (at Khandwa). After January, the mean maximum, maximum, mean minimum and minimum temperatures go on rising steadily till they touch their peak values in May, which is the hottest month in the year. On an average over the ten years (at Khandwa observatory), the mean maximum, maximum, mean minimum and minimum temperatures for the month of May were respectively 42.0°C, 44.8°C, 28.0°C and 23.9°C.

After May, the mean temperatures go on declining till the month of August. September is however warmer than August. In August, the temperature is perhaps checked by the heavy downpour. July and September are more or less equally warm. October—the month which witnesses the transition from the rainy to the cold season—presents an interesting contrast of hot days and cool nights. The day temperature in October, both maximum and mean maximum is more than in the months of July, August and September; the night temperature in October however, is much lower than the night temperature in the preceding three months. From November again, mercury level starts declining consistently till it touches the minimum in the month of January. January and December are the coolest months in the year.

At Khandwa observatory, the lowest temperature of the decade was reached in January 1960, when the mercury dropped to 4.2°C while the highest temparature 45.6°C or 114°F was reached twice in the decade, *i.e.*, in May 1954 and May 1959. At Punasa observatory the mercury touched the lowest level (3.9°C) in December 1955, and the highest (48.1°C or 118·6° F) in May 1959.

History

The history of Nimar district is linked with the history of Malwa and Khandesh. The earliest historical record concerning the district is 'the Asirgadh seal' of Sarvavarman, a Maukhari king, whose father Ishanvarman is assigned the date 550 A.D.. No other records of the Maukharis have been found in the district or in the erstwhile Central Provinces and Berar, and therefore according to Dr. Hiralal, the mere finding of this seal in the Asirgarh fort does not connect the Maukhari kings with Asirgarh. It is believed that the district must have been a part of the kingdom of the Gupta dynasty, who are known to have united the whole of northern India under them; from them Malwa passed to Harshavardhan, who ruled from 608 to 648. After the extinction of Vardhan dynasty, the Malwa region including Nimar may have passed to the Vakataka kings, who ruled over considerable parts of erstwhile Central Provinces from the fifth to the eighth centuries.

From the ninth to the twelfth centuries the northern parts of the district were included in the Ponwar or Parmar kingdom of Dhar while Asirgarh and the country surrounding it were held by a family of Rajputs known as the Tak. Mention of these Tak rulers of Asirgarh is made by Chand Bardai, Court Poet of Prithviraj Chauhan and one of them is said to have fought against Shahabuddin Ghori with Prithviraj Chauhan. The dominance of northern parts of the district by Parmar kings of Dhar is attested by a mass of inscriptional evidence. After the death of Parmar king Bhoja, who is a proverbial name in Hindi tradition for a model ruler, the Parmars were reduced to the status of a local power. They, however, continued to have sway over Nimar till the beginning of the thirteenth century when they were superseded by chiefs of the Tomar line, and afterwards by Chauhans.

In 1191, Alauddin Khilji captured Asirgarh fort, on his return journey from his famous raid into Deccan. He is said to have put to sword most of the Chauhans who were in possession of the fort then. Some of the survivors who had escaped returned to the Asirgarh hills and founded the family of Ranas of Piplod whose descendents probably survive to this day. At about the same time, northern Nimar came into the possession of a ruler of the Bhilala tribe whose descendents probably still are found in Mandhata, Selani and Bhamgarh.

In 1387, Dilawar Khan Ghori, who was Governor of Malwa under the Delhi emperors of the Tughlak dynasty, assumed independence on the collapse of the reign of Muhammad Tughlak. It is beyond doubt that Nimar basin was in the kingdom of the Ghori kings, because in 1433 Sultan Hushang of Mandu (it was the capital of Malwa) captured the Gond fort of Kherla which lay beyond Nimar.

Southern portion of the district comprised in the Tapti valley was occupied in 1370 by Malik Raja Faruki, a soldier in the service of emperor Firoz Tughlak, and the latter invested him with the title of *sipahsalar*. In 1399 his son Nasirkhan Faruki assumed independence and established the Faruki dynasty of Khandesh. Nasirkhan captured Asirgarh and founded the cities of Burhanpur and Zainabad on opposite banks of the Tapti in honour of Sheikh Burhanuddin a famous Saint of Daulatabad and Zainuddin, his spiritual preceptor. The Faruki dynasty held Khandesh with their capital at Burhanpur for eleven generations until 1600, in which year both Nimar and Khandesh were annexed by emperor Akbar, who captured Asirgarh by blockade, from Bahadurshah, the last of the Farukis. Northern Nimar was attached to the *subah* of Malwa, and the southern portion to that of Khandesh. Prince Danyal was made the Governor of the Deccan with his capital at Burhanpur, where he drank himself to death in 1605. Akbar and his successors did much to improve the district, the city of Burhanpur attaining the height of its prosperity during the reign of Shahjahan.

In 1670 the Marathas first invaded Khandesh and ran over the country right upto the gates of the city of Burhanpur. The city itself was sacked by the Marathas some years later, when the unwieldy army of Aurangzeb departed from there for the conquest of Deccan. After the assumption of the Government of Deccan by Nizam Asaf Jah in 1720, Nimar was the scene of frequent conflicts between his troops and those of the Peshwa, until it was ceded to the Peshwa by different treaties between 1740 and 1760. Nimar was subsequently transferred, with the exception of the *parganas* of Kanapur and Beria (now in West Nimar district) to the Sindhia and Holkar. From 1800 until the close of the Maratha and Pindari wars in 1818, Nimar was subjected to frequent invasions and plunder by warring troops of Sindhia and Holkar, as well as by the Pindaris. The chief camps of the latter were located in the jungles of

2. *Page* 66, *Descriptive list of Inscription by Rai Bahadur Dr. Hiralal*

Handia (in Harda tahsil). In 1818 the Pindaris were dispersed by the British troops, their leader Chitu being killed by a tiger in his jungle refuge.

The *parganas* of Kanapur and Beria had been ceded by the Peshwa in 1817, and the north of the District came under British Management by the treaty of 1823 with the Sindhia. In 1860, these tracts as well as the Zainabad and Manjrod *parganas* with Burhanpur, were ceded by Sindhia in full sovereignty. In 1864, Nimar was attached to the Central Provinces; and the district headquarters which had previously been at Mandleshwar (in West Nimar District) were removed to Khandwa.

During the historical Indian mutiny of 1857, Asirgarh and Burhanpur were garrisoned by a detachment of the Gwalior contingent who revolted. In November 1858, Tantya Tope, the rebel Maratha leader had traversed the district with his followers. The revolt was suppressed successfully by the British forces. In 1868 the *parganas* of Kasarawad, Dhurgaon and Barwai were made over to Indore in exchange for some land held by the Holker in the Deccan. In 1904, 38 villages with an area of 51 square miles together with 293 square miles of Government forest were transferred from Hoshangabad district to Harsud tahsil. The enclaves comprising the Kanapur and Beria tract were transferred to West Nimar district in 1950, after the attainment of independence by the country.

Archaeology :

East Nimar district is rich in antiquarian remains. Asirgarh is one of the oldest forts in the State, and contains a mosque built on the pattern of the Jama Musjid at Burhanpur. Remains of forts also exist at Bhamagarh (a village nine miles to the east of Khandwa town), Burhanpur and Khandwa. A large gun, cast at Burhanpur in 1667, was shifted from Asirgarh fort to the Government House at Nagpur. More than 12 feet long and with a bore diameter of 8-1/2 inches, the gun is elaborately ornamented in relief with Persian inscriptions and scroll work. The island of Mandhata in the Narbada is a place of pilgrimage of the Hindus and and contains one of the most celebrated *Siva-lingas*. The deserted temple of Sidhanath on the hill in the island even to this day retains traces of its former beauty. Two mosques at Burhanpur, the Jama Masjid and the Bibi Masjid were built in the sixteenth century by the Faruki kings. They are specimens of Mohammadan architecture in the State. The ruins of the old system of waterworks, the enclosing wall and the tombs are other chief architectural remains of Burhanpur city. Khandwa town has the remains of several Jain temples. Inscriptions exist in several places.

Distribution of Area and Population :

Distribution of the district's area and population over the tahsils is presented in the table below :

Percentage Distribution of Area and Population, 1961

District/Tahsil	Area*	Rank	Population	Rank
1	2	3	4	5
East Nimar District	**100**	..	**100**	..
1 Khandwa Tahsil	35.0	1	45.4	1
2 Harsud Tahsil	34.4	2	19.9	3
3 Burhanpur Tahsil	30.6	3	34.7	2

The table shows that distribution of area over the tahsils is more or less even, the difference in proportion between the biggest Khandwa, and the smallest Burhanpur being of the order 4.4%. Harsud tahsil, which occupies second rank in area, differs from Khandwa tahsil in area by a very narrow margin. Whereas the distribution of area over tahsils is thus fairly even, that of population is clearly lop-sided. Much more than two fifths of the District's population is concentrated in Khandwa tahsil; while Harsud, which, as observed above, is about as big as Khandwa, contains less than a fifth of the district's population. The smallest, and southernmost Burhanpur tahsil, containing a little more than a third of the district's population, is second in population ranking. It may be observed that both Khandwa and Burhanpur tahsils contain populations which are more than proportionate to their area, while Harsud's population is very much less than proportionate to its area. Both Harsud and Burhanpur tahsils contain much forest land-in fact Harsud has about half its area under forests while Burhanpur has more than half under forests, the two together account for more than four-fifth of the total reserved forest area of the district. The high proportion of population in case of Burhanpur tahsil is to be attributed to its urban population which is 13.3% of the district's total population.

Figures in the above table give merely a broad indication of the relative populousness of each tahsil. For a clearer picture we must consider the population density index i.e., number of persons per square mile in each tahsil. This is done in the table below which also gives changes in population density since 1951. The density figures both for 1961 and 1951 are calculated from the revised area figures for the district and each tahsil released by the Director of Land Records, Madhya Pradesh, in 1962-63.

* *The area figures used in this table are the revised area figures released by D.L.R. in* 1962-63.

Density of Population, 1961

District/Tahsil	Population per square mile				% increase
	1961	Rank	1951	Rank	in population
1	2	3	4	5	6
EAST NIMAR DISTRICT	**166**	...	**127**	...	**30.7**
1 Khandawa Tahsil	215	1	169	1	27.2
2 Harsud Tahsil	96	3	72	3	33.3
3 Burhanpur Tahsil	189	2	140	2	35.0

The district as a whole has in 1961, 39 more persons living on every square mile than in 1951. The maximum proportionate increase in density of population has been recorded by Burhanpur tahsil, which has now 49 more persons to a square mile than there were in 1951. The proportionate increase in density since 1951 is least in the most densely populated Khandwa tahsil. All the tahsils retain their relative rankings in respect of density of population. Khandwa tahsil is the most densely populated tahsil in the district; while Harusd is the most sparsely populated. The smaller density of population in Harsud tahsil is attributable mainly to the fact of its being highly forested; and its not containing any concentration of population in urban areas. Burhanpur tahsil which is probably more forested than Harsud has a high density of population owing to its containing 13.3% of the district's urban population in Burhanpur and Chandni towns.

In the State context, East Nimar ranks 30th in respect of population density. Amongst its neighbours, Hoshangabad (160) and Dewas (172) districts have comparable densities. East Nimar's density is 12.6% less than the State average of 190.

Discrepancy in Area Figures :

Area fiugres for the district as a whole are furnished by the Surveyor General, India and by the Director of Land Records, of the State. Owing to the different methods of survey adopted by these two agencies, there are differences in area figure in almost every district of the State. In case of East Nimar the discrepancy in area-figures furnished by Surveyor General, India and Director of Land Records is of a small order-0.2%.

The Surveyor General, however, does not give tahsil-wise figures. The area figures given in Table A-I of the Handbook are given by the Director of Land Records and represent the area according to village papers of each tahsil. This area therefore excludes what is known as the reserved forest area, for which tahsil-wise break up was not available. Later on, when these Handbooks were in the Press, the Director of Land Records released revised area figures for the districts and tahsils; based on total area (i.e. including the reserved forest area for the tahsils also) . These area figures have been printed as an Appendix in the Handbook. In appreciating the density figure for tahsils and the district in Table A-I, it should therefore be noted that the density of the district is not comparable with the densities of the tahsils as the latter do not take note of the reserved forest area of the tahsil while the former does. *Interse* the tahsil densities given in Table A-I are comparable, as indices of pressure of population on land in the non-reserved forest or village area of each tahsil.

Territorial changes during 1951-61.

No territorial change took place in the district during the decade 1951-61.

Variation in population during sixty years

The following table gives percentage variation of the population during the last sixty years. Corresponding figures for the State as a whole are also given for the sake of comparison.

Percentage Variation of Population in 1901—61

Year	East Nimar District			Madhya Pradesh State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901—11	+19.4	+26.4	—16.0	+15.3	+17.9	—10.9
1911—21	+ 1.4	— 3.9	+41.3	— 1.4	— 2.3	+10.9
1921—31	+17.8	+16.4	+25.5	+11.4	+10.5	+23.0
1931—41	+ 9.9	+ 8.3	+17.5	+12.3	+10.5	+32.8
1941—51	+ 5.3	— 0.8	+31.9	+ 8.7	+ 6.0	+33.2
1951—61	+30.9	+32.2	+26.5	+24.2	+21.0	+47.7
1901—31	+42.6	+41.4	+48.9	+26.7	+27.1	—21.7
1931—61	+51.4	+4 .0	+96.2	+51.6	+41.7	+161.2
1901—61	+116.0	+100.8	+192.2	+92.0	+81.1	+217.4

Comparision of the district's growth pattern with that of the State brings out that with the exception of the decades *1931-41* and *1941-51* when it recorded a lower percentage rate of variation than the State, East Nimar district has always outstripped the State in its rate of population increase. All the decades of the first half of the period 1901-61 were more favourable to growth of popoulation in East Nimar district than in the state as a whole. The decade just gone by was also more favourable to the district than to the State, so that it made up the relatively smaller increase in population during the preceding two decades. The result is that during the thirty year period 1931-61 the district has registered almost the same rate of growth as the State.

Decade 1901-11 *:* Years 1901 to 1907 of this decade were good for the State as a whole. The year 1907-1908 witnessed a setback because of an abrupt cessation of monsoon in 1907. Parts of Nimar district suffered serious failure of crops *. The remaining years of the decade were again good. The relatively higher increase in the population of the district during the decade is ascribed by the 1911 Census Report (page 38) to immigration into the district as result of raiyatwari colonisation which attracted permanent settlers from Central India and the neighbouring districts. This is confirmed by the observations regarding the district made in the Ist chapter of the Famine Report of 1907-1908, to wit "in Nimar considerable areas of Government forest, which have been excised for ryotwari settlement, are being rapidly colonized."†

Decade 1911-21 *:* The agricultural and economic history of the decade was one of considerable complexity and had a considerable effect on the census figures. Regarding an increase--though small--recorded by the district as against a decrease of 1.4% registered by the state during this generally bad decade, the following remarks made by Roughton, in the Census Report of 1921 are interesting** "Nimar is the only district in the division which registers an increase in population during the decade and in this respect it resembles the neighbouring Maratha plain country. Although few *Chaitharas* are recorded as having migrated to Hoshangabad for the wheat harvest, the district Census Officer reports a decrease of 10,119 or 14 percent between the provisional and final figures of Harsud tahsil. This he ascribes to migration, and it is probable that it is due to an unusual exodus to Indore in search of work. The recorded deaths exceeded the births by nearly 10,000 owing to plague, from which the district suffered severely in the years 1911-1912,1916 and 1917 and to influenza in 1918 and 1919. In the face of these figures it is surprising to find that there was a recorded increase of 5,000 during the decade,and the district Census Officer is driven to the conclusion that the population of 1911 was not properly recorded owing to the prevalence of plague and the consequent evacuation of houses. In support of this he points to an increase of nearly 9,000 in the town of Burhanpur, where a recensus was taken at a later date in 1911. The fact that many deaths must have escaped registration at the time of the influenza epidemic is adduced in support of this contention. The writer, however, who was serving in the Nimar district at the census of 1911, can testify that every possible precaution was taken to ensure that the population was correctly enumerated in the places to which they had migrated and, although the urban population was smaller than usual, a very large portion of the inhabitants who left their houses encamped in temporary huts near the infected areas with the result that there was a corresponding rise in the rural population. The true explanation is probably to be found in the extra-ordinary immigration from Khandesh owing to the scarcity of water. One such immigrant on being questioned stated that there was no water within a radius of five miles of his village, the inhabitants of which had moved in a body into Nimar until the monsoon of 1921; this is borne out from the fact that the immigrants from Khandesh number 17,000 or 23 percent more than in

* *C.P. Berar Census Report*, 1911, *Page* 31.

† *Quoted from* 1911. *Census Report of C.P. & Berar, Page* 30.

** *pages* 15 & 16, 1921 *Census Report, C.P. & Berar*

1911". The quotation incidentally also explains the decrease in the urban population of the district recorded at the Census of 1911, and the more than expected increase in the rural population in that decade; as also the corresponding high increase in urban population and decrease in rural popultion in 1921.

Dacade **1921-31** :In this decade again, East Nimar district registered a distinctly higher percentage increase in its population than the State as a whole. The varying conditions of agriculture and economy of this decade have been gone into year by year in the 1931 Census Report of C. P. and Berar and need not be recapitulated here. The district had escaped the crop-failures of the last three years of the decade, which had seriously affected the eastern districts of the Narmada valley. Harsud, the most thinly populated tahsil of the district then and now had registered a greater increase in population (30.6%) than any other tahsils. This was, in part explained by the Census Superintendet of 1931* by ascribing it to immigration into the tahsil of cattle-breeding Ahirs whose number in 1931 sharply increased to 11,554 from the 1921 figure of 3,658. Partly, the increase was attributed to the supposed extraordinary fertility of Korkus, "whole villages of whom were almost wiped out in the Infulenza epidemic of 1918". In support of his contention that immigration is an important factor in the comparatively greater increase in the population of the district during the decade, the 1931 Census Report records that the number of immigrants enumerated in 1931 exceeded by nearly 20,000 the corresponding return for the previous census. There was according to that Report, comparatively little emigration from the district. There was nothing unusual in the relative growths experienced by the rural and urban areas during the decade.

The district registered a smaller percentage growth in 1941 than the State as a whole. Since, owing to war conditions detailed tabulation was not undertaken in 1941, it is not possible to pinpoint the causes of this relatively small growth.

Decade 1941-51:—This was generally a decade of low growth, although as observed in the 1951 Census Report of old Madhya Pradesh no unusual mortality took place during the deacde in the State. The rural areas of the district actually registered a decline, which might, as evidenced from the high increase registered by urban areas of the district, have been a result of migration from rural to urban areas.

The Last Decade :

The decade just gone by witnessed an unprecedented increase in the population of the State, and of the district. The latter increased roughly 1-1/4 times as fast as the State, and is in that respect exceeded by only Jhabua (34.4%) and Sehore (44.8%) districts. Its western neighbour West Nimar has registered more or less the same increase as the district.

Percentage increase in population for tahsils, 1951—61.

Tahsil	Total	Rural	Urban
Khandwa Tahsil	27.2	28.5	22.3
Burhanpur Tahsil	35.1	38.6	29.7
Harsud Tahsil	32.4	32.4	..

Marginally inset table shows that maximum increase in population during 1951-61 has been experienced by Burhanpur tahsil. Khandwa tahsil has registered the least proportionate increase in population during the decade, and is below the district average. Harsud, which is intermediate, is above the district average for increase in population. Another interesting feature brought out by these figures is the proportionately higher rate of growth in rural areas of the Khandwa and Burhanpur tahsils. In the last mentioned tahsil inspite of the springing up of the new town Nepanagar, the rural population has outstripped the urban population in growth by more than 8% . As is well-known urban areas are more fortunate than rural areas in respect of medical services and should normally and generally do, register greater proportionate increase than the rural areas. In fact this is the case in the State as a whole and thirty-two out of the forty-three districts in the State. Even of the eleven which have recorded lower urban than rural growths, eight are from the erstwhile Vindhya Pradesh State, where many 1951-towns were de-urbanised in 1960 in almost all the districts. The trend therefore is clear for urban population to increase faster than rural populations even in 1961 Census. The direction of migration also is generally from rural to urban, which should also lead to faster growth of urban populations. Hence the reverse trend exhibited so conspicuously by East Nimar district—inspite of the fact that it had one entirely new town added during the inter-censal decade—is suggestive of a radical improvement in public health-of rural areas, particularly of Burhanpur and Harsud tahsils where rural increase has been of a high order.

An examination of the annual reports published by the Health Department erstwhile Central Provinces and Berar from 1941 to 1952 brings out the important fact that East Nimar (then only Nimar) had high birth and high death rates. It was exceeded by only one or two districts in the matter of birth-rate, while in respect of death-rates it topped in the Provinces during all the decades of the period 1911-1950. The unusually high mortality in East Nimar district was principally due to malaria which was endemic and hyperendemic in many areas of the district particularly in the forested tracts of

* 1931 *Census Report of C.P. and Berar-page* 36 .

Harsud and Burhanpur tahsils. The annual reports of the health department of erstwhile C. P. and Berar also show that more than 60% of all deaths in the district were attributable to malaria. As early as 1940, quinine used to be distributed free in the district in its hyperendemic malaria areas. A preliminary survey conducted in about the year 1946 had shown that Harsud tahsil contained highly endemic and hyperendemic areas of malaria. Hence early in 1947, Government started an anti-malaria unit in Harsud tahsil covering 80 villages. In July, 1948 another anti-malaria unit was set up at Borgaon in Khandwa tahsil; in the same year a novel experimental scheme was started on a co-operative basis in the villages coming in Khaknar, Doiphodia and Manjrod gram panchayats. The operations against malaria continued to expand till in 1953, the entire district was covered by it.

Hence one important reason for the unusual population increase in the district, particularly in the rural areas is the reduction in malarial mortality. The district was already a high-birth rate area—infact the prolificity of the Korkus who are numerous in Harsud and Burhanpur tahsils was referred to by Schoobert, Census Superintendent of C. P. and Berar in 1931, in his Census Report—so that the effective arrest in mortality owing, among other important public health measures, to the early introduction of anti-malaria programme, showed itself in the high increase in population in the district.

Rural-Urban Classification

The rural urban breakup of the population of the district and of each tahsil is shown in the following table:

100 *persons in the district by rural/urban*

Name of District/Tahsil	Total	Rural	Urban
1	2	3	4
EAST NIMAR DISTRICT ..	100	77.5	22.5
1 Khandwa Tahsil ..	100	79.6	20.4
2 Harsud Tahsil ..	100	100.0	..
3 Burhanpur Tahsil ..	100	61.9	38.1

More than one-fifth of the district's population live in urban areas. The district has thus a greater proportion of population in urban areas than the State as a whole. Burhanpur tahsil, containing the biggest town Burhanpur in the district, and the industrial town Nepanagar, has nearly two-fifths of its population in urban areas. Khandwa tahsil, having a fifth of the population urban, has only one town—Khandwa, the district headquarters. The district contains 3.3% of the State's urban population. Harsud tahsil is entirely rural.

Villages :

East Nimar district contains 1.53% of all inhabited villages in the State, whereas on an average each district should contain 2.33% of the State's inhabited villages. The district however contains 1.9% of the State's rural population which indicates that considering averages its villages are comparatively more populous than those of the State as a whole. The district has a considerable proportion of uninhabited villages. These make up 10.2% of all villages in the district, the corresponding State average being 8.4%. 55.3% of all uninhabited villages in the district are in Khandwa tahsil, 16.3% in Harsud tahsil and 28.4% in Burhanpur tahsil. Of the district's inhabited villages 44.2% are in Khandwa tahsil, 32.1% in Harsud tahsil and 23.7% in Burhanpur tahsil. These tahsils respectively contain 46.6%; 25·6% and 27.8% of the district's rural population. We should therefore expect villages to be more populous on an average in Burhanpur tahsil, and less populous in Harsud tahsil. It is interesting to study the distribution of villages by population size, and of population living in these villages. This is done in the the following tables.

Percentage of villages in various size-classes of villages to all inhabited villages, 1961

District/Tahsil	Less than 200	200–499	500–999	1,000–1,999	2,000–4,999	5000 +
1	2	3	4	5	6	7
EAST NIMAR DISTRICT	**24.9**	**41.2**	**25.4**	**6.3**	**2.1**	**0.1**
Khandwa Tahsil	24.7	38.3	26.5	8.3	2.1	...
Harsud Tahsil	26.5	47.0	23.4	2.8	0.3	...
Burhanpur Tahsil	23.3	38.9	26.1	7.0	4.3	0.4
M. P. State	**37.2**	**38.1**	**18.2**	**5.4**	**1.1**	**Neg.**

For the sake of convenience, in the discussion that follows it is proposed to call villages with less than 200 population "very small villages", those with population varying between 200 and 499 "small villages", those with population between 500 and 999 'medium-sized villages', those with population between 1000 and 2000 'big villages" and those having more than 2000 population as 'very big villages'.

East Nimar is distinctly a district of 'small' villages (*i. e.* in class-range 200-499) having a little more than two-fifths of inhabited villages in that class. 'Very small' villages and 'medium sized villages', are more or less equally frequent, (infact the latter are slightly more frequent). Here the district pattern shows noticeable variation from the State pattern which has as many as 37.2% of 'very small villages' (as against 24.9% in case of East Nimar), and only 18.2% of 'medium-sized', villages (comparing with 26.1 in case of East Nimar). In the State therefore, 'very small villages' are about 1-1/2 times as numerous as in East Nimar district, while the reverse is the case in respect of 'medium-sized villages'. 'Big' and 'very big villages' are also more frequent in the district than in the State as a whole. Regrouping the villages leads to the following (*i*) roughly two-third of the villages are less than 500 in population (*ii*) about an equal proportion lies in population range 200-999 (*iii*) about one third of the villages have population more than 500.

Coming to the tahsils, the similarity of pattern between Khandwa and Burhanpur tahsils should be noticed. Harsud tahsil departs from the pattern in all the size groups. It has a greater proportion of villages in the 'very small' and 'small' categories and correspondinly low proportions in the more populous categories.

Distribution of population by village-size.

The following table presents a distribution of the district's rural population by size of villages.

Percentage of population living in villages of various population sizes to total rural population, 1961.

District/Tahsil	Less than 200	200-499	500-999	1,000-1,999	2,000-4,999	5,000+
1	2	3	4	5	6	7
EAST NIMAR DISTRICT	**5.3**	**28.3**	**36·2**	**17.3**	**11.6**	**1.3**
Khandwa Tahsil	4.9	24.8	36.2	22.1	12.0	...
Harsud Tahsil	7.9	40.5	39.9	9.7	2.0	...
Burhanpur Tahsil	3.5	23.0	32.8	16.1	19.8	4.8
M. P. State	**10.0**	**31.8**	**31.6**	**18.2**	**7.9**	**0.5**

Though "small" villages ranging in population from 200 to 499 account for the highest proportion of villages in the district, they recede to a second position in respect of populousness. In this respect, 'medium-sized' villages containing between a third and two-fifths of the district's population seem to be the most favourite. With 'small' villages, they contain roughly two-thirds of the district's population. A little more than two-thirds of the population also lives in villages with a population of 500 or more, which together account for roughly a third of the villages. 'Big' and 'very big' villages--8.5% of all villages in the district-contain 3 out of every 10 persons in the district. 'Very small' villages which are about a fourth of all the villages in the district's contain only 1 in 19 of the district's population. The evidence, therefore, shows the liking of a large number of persons to reside in a smaller number of bigger and medium sized villages. To summarise, of every ten persons in the rural population, 3 live in villages with less than 500 population, 3 in villages with more than a thousand population and four in medium-sized villages.

As regards tahsils, no similarity of pattern is discernible. Khandwa and Burhanpur tahsils have the largest proportion of their populations (36.2 and 32.8% respectively), in medium-sized villages, while in case of Harsud, the largest proportion lives in 'small' villages. In the case of the latter tahsil, villages with population between 200-499, and 500-999 are almost equally frequent and together contain four-fifths of the tahsil's rural population. The tahsil has comparatively more population in 'very small' villages, but the proportion is less than the corresponding State average. Burhanpur tahsil has two-fifths of its population in the bigger villages with more than 1,000 population, while Khandwa tahsil is second in people's preference for bigger villages; containing 34% of its rural population in them. Harsud has only 12% of its population in villages with more than 1,000 population.

Age and Sex :

Age structure of the population of East Nimar district is presented in the following table, which also shows the corresponding structure of the population of the State as a whole :

Distribution of 100 persons in the District and State by Age and sex

Age-group	East Nimar District			Madhya Pradesh		
	P	M	F	P	M	F
1	2	3	4	5	6	7

Age not stated	N	N	N	0.1	N	N

The age data presented in this table are based on ungraduated ages *i. e.*, ages that were actually returned at enumeration without being subjected to any smoothing process. The quinquennial (upto 70 years of age) age-groupings adopted above do suppress to some extent the distorting effects, on the shape of the age curve, of age-heapings at multiples of 5 and at ages ending in even rather than odd digits; still the effects of digit-preference are not entirely absent. Thus the table shows greater number of persons in ages 20-24, 25-29 and 30-34 than in 15-19; and in 60-64 than in 55-59. It is improbale that these proportions represent the correct state of affairs. In a normal age-distribution (*i. e.*, where migrationary and other violent effects like war and epidemic, do not change the shape of the age-curve materially) the age-distribution, starting with a peak at the lowest age-group, goes on dropping in more or less a smooth progression. In the case before us, the excesses in age-groups 20-24, 25-29, 30-34 and 60-64 appear to be result of preference for ages 20, 25, 30 and 60*. In considering the above data, therefore, it would be safer to restrict the scope of discussion to the broader age-groups 0-14, 15-34, 35-59 and 60+, in which it may reasonably be assumed that digital preferences mutually cancel out. It is convenient to speak of the broader age-groups 0-14, 15-34, 35-59 and 60+ as corresponding to children, young persons, middle-aged persons and old persons.

Maximum proportion--roughly 2 in 5--is found in the age group 0-14 (which is narrower in comparison to the other age-groups), a phenomenon bearing testimony to high birth and net survival rates prevailing in the State as a whole. In more concrete terms, if we pick up at random five persons in the district, two of them are likely to be children below 15 years of age. Young persons between 15 and 35 years of age are next in numerousness forming roughly a little less than one-third of the population, while middle-aged persons (age-group 35-59) form a little more than one-fifth of the total population. The proportion of old persons surviving to ages beyond 60 is the least, roughly one in twenty. It deserves to be noticed that the fall in proportions becomes steeper as we approach the higher segments of life. Thus from childhood to youth the proportion falls by 9.3%, from youth to middle-age by 11.2%, and from middle to old age by 15.8%.

The predominantly youthful character of the population follows from the fact that about three-fourths of

* For a fuller discussion of patterns of digital preference in the State, the reader is referred to the chapter on age and sex of the State Report.

it are below 35 years of age. In its age-distribution the district conforms to the pattern for the State as a whole.

Changes in age-distribution since 1951 :

Changes in age-distribution over time, if capable of reasonably accurate estimation, afford indications regarding the future behaviour of a population. In the table below, therefore the age-distribution of the district's population by broad age-groups for 1951 and 1961 is given. In appreciating the data for 1951 it may be noted that it is based on a 10% sample of the 1951 population, while the 1961 data is based on total population.

Changes in age-distribution 1951-61.

Age-group	Proportion of population in the age-group	
	1961	1951
All ages	100	100
0-14	41.6	37.7
15-34	32.2	35.3
35-59	21.0	22.2
60+	5.2	4.8
Age not stated	N	N

The table shows that the inter-censal period has witnessed a sizeable increase in the proportion of children below 15 years. This is probably due mostly to the arrest in death-rate in these lower ages in the post-independence period as a result of the numerous public health measures sponsored by the Government. The increase in the proportion of children has taken place at the cost of the youth and middle-age segments. The former has lost in proportion by 3% and the latter by 1% since 1951. These losses do not necessarily signify higher mortality in age-cohorts 5-24 and 25-49 of 1951; though the somewhat greater fall in age-group 15-34 does point to such a possibility. The decline is also a result of the more than proportionate increase in the number of children (0-9) in the population.

The proportion of persons surviving to 60 years and beyond has also improved since 1951, and indicates greater chances of survival in these ages since 1951.

Marital status and age :

Distribution of 1000 males and 1000 females in the district by marital status and age is presented in the table below :—

Marital Status by Age-groups

Age-group	Total population		Never married		Married		Widowed		Divorced	
	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11
All ages	1000	1000	523	441	442	471	31	85	4	3
0—9	1000	1000	1000	1000	...	...	...	...	...	...
10—14	1000	1000	917	807	83	193	N	N	N	N
15—19	1000	1000	678	172	318	820	2	3	2	5
20—24	1000	1000	246	22	739	964	7	8	8	6
25—29	1000	1000	79	4	897	975	14	16	10	5
30—34	1000	1000	34	3	933	947	23	44	10	6
35—39	1000	1000	22	2	935	914	34	79	9	5
40—44	1000	1000	19	1	914	816	58	176	9	7
45—49	1000	1000	15	2	900	762	76	230	9	6
50—54	1000	1000	16	2	860	569	117	419	7	10
55—59	1000	1000	18	1	828	560	150	428	4	11
60—64	1000	1000	13	2	783	323	200	670	4	5
65—69	1000	1000	13	2	724	284	258	713	5	1
70 +	1000	1000	11	2	598	137	389	859	2	2

52 out of every 100 males and 44 out of the same number of females in the district are never-married. The proportions do not point to the prevalence of child marriages on a large scale. The relatively larger proportion of never-married males is partly explained by their relative numerousness in absolute numbers and partly also by the prevalence of later marriages in them. 44% of the males and 47% of females are married, with their spouses living. In the population as a whole, the proportion of married females is 23.2% as against 23.0% married males.

(In absolute numbers the district has an excess of 3,554 married females over married males). This suggests either the prevalance—on a very of small scale of course - of bigamy, or selective migration of married males to other districts leaving their wives behind.

In respect of widowed state, males are outnumbered by the females by 3 to 1. This imbalance arises principally from the disparity between the ages of husband and wife, because in later years of life mortality increases sharply with advancing age. To some extent the imbalance is also due to greater power of survival of females in the old ages. Other salient features of the table may be summarised as below :

(1) *Child marriages* : Two out of every ten girls and one out of every ten boys are married between ten and fourteen years of age. Child marriages ? are thus twice as frequent in girls, as in boys; to be attributed mainly to the social phenomenon of disparity between the ages of husband and wife.

(ii) Roughly eight out of every ten girls between 15 and 19 years of age enter marital state, as against three boys. Thus most of the girls in this age-group are married while most of the boys remain unmarried. Marriages in ages below 20 years, particularly in case of boys may be described as early (very early in case of boys) so that the figures speak out eloquently to the prevalence of early marriages on a wide scale in case of girls.

(iii) Between 20 and 24 years, the proportion of unmarried girls assumes insignificance. In this age group, roughly three-fourths of the boys are married. Personally, I feel even these are cases of early marriages in case of boys, because if we are to solve our complicated population problem, boys should not be married before they attain 24 years of age. I would therefore say that early marriages are widely prevalent in case of boys also in the district.

(iv) In ages between 25–29 which is the proper age when boys should be married, only one out of every ten men is left unmarried.

(v) The proportion of never-married males does not sink to negligible dimensions even in the higher ages. Upto 59 years of age, roughly 2% males are never married. It is difficult to surmise the causes for this phenomenon, though the low sex-ratio may be an important cause.

(vi) The proportion of widowed persons is less than one in hundred till 24 years of age. Thereafter the proportion goes on steadily rising both in case of males and females, more sharply in case of the latter. The proportion of widows is 7.9% (roughly one in ten) between 35 and 39 years of age but rises abruptly to 17.6% (about one in five in the next age-group 40-44). This indicates on the one hand, higher male mortality in ages 45-49 (assuming the average disparity between the ages of husband and wife to range from 5 to 10 years), and on the other, lesser frequency of remarriages of widows after 40 years of age. Age-heaping at age 40 may also have contributed to this abrupt increase. Another point of abrupt increase in the proportion of widows is the age 60; the proportion in age-group 60-64 records a sudden jump of about 26% relative to the proportion in age-group 55-59. This appears to be due, among other causes, to concentration of ages at 60.

Sex-Ratio :

Sex ratio of the district by total rural, and urban is shown below for census years 1901 to 1961. Figures for State as a whole are also given for comparison.

Changes in the proportion of sexes, 1901-1961

Sex-Ratio

Year	East-Nimar			Madhya Pradesh		
	T	R	U	T	R	U
1	2	3	4	5	6	7
1901	948	950	939	990	995	937
1911	948	952	918	986	991	913
1921	930	939	883	974	982	878
1931	929	942	868	973	983	872
1941	946	955	906	970	980	882
1951	948	959	912	967	975	907
1961	939	949	906	953	970	856

Pattern of change in the proportion of sexes in East Nimar differs considerably from that of the State as a whole. In the case of the latter, starting with a deficit of 1 for 100 males in 1901, the proportion went on decreasing steadily till, in 1961 there is a feminine deficit of 5 for every 100 males. East Nimar, started in 1901 with a sex ratio almost as low as that for the State as a whole in 1961. It stayed constant in the 1911 census count (though in the rural population of the district it rose by 2 while in urban population it dropped by 21, probably a result of within the district movement of the male population from rural to urban areas). It dropped steeply in 1921 to 930, the drop being much more conspicuous in the urban population. In 1931, sex-ratio almost stayed constant - infact it dropped by 1—; (the small increase in the rural sex-ratio in 1931 and decrease in the urban ratio are attributable again to intra-district movement of male population from rural to urban areas). Surprisingly enough, the next decade again witnessed a recovery of the feminine population in the district, and in 1941, the sex-ratio was almost restored to its 1901 and 1911 level. This recovery was shared by both rural and urban

population of the district. In 1951 too, the ratio more or less stayed at the same level; but in the last census count, again the feminine proportion experienced a steep decline. This however was not as steep as in the decade 1911-1921 (the influenza decade), so that the sex-ratio in 1961 is greater than in 1921 and 1931.

The imbalance between the sexes is maximum in Khandwa tahsil (sex-ratio 928), whereas in the tribal Harsud tahsil (949) it is lowest. In Burhanpur tahsil (947) also, the sex-ratio is higher than in Khandwa tahsil and is almost the same as in Harsud tahsil. The higher sex-ratio in Harsud tahsil is due to the high ratio (991) of its tribal population (in fact the most numerous Korku tribe has an excess of females over males) which form more than a third of its total population.

Age group	Sex-ratio
All ages	939
0-14	933
15-34	991
35-59	857
60 +	1,014

Marginally inset table gives sex-ratio by broad age-groups. This will show that females are outnumbered by males in the earlier ages 0-14; among the youth (15-34), the proportion is very near a parity of the sexes. But, in the middle ages, the sex-ratio falls considerably, suggesting the probability of greater female deaths in the middle ages. In ages beyond 60, females preponderate over males in small numbers. The deficit per 1,000 males or females in age-group 0-14, is much too large to be explained by lesser number of females being born than males and suggests greater mortality in the fair sex.

Education and Literacy :

In respect of education the district is better than many others, having 24.5% of its population in the category of literate and educated persons, which is much higher than the State average of 17.1% and is even slightly higher than the national average of 24.0%. In the State picture, East Nimar is fourth in literacy ranking, the districts having higher percentage of literacy than it being Indore (literacy 38.3%), Jabalpur (literacy 28.6%) and Gwalior (27.9). It may be mentioned that all these districts have a higher proportion of urban population than East Nimar, thus pulling up their literacy percentages. East Nimar is fourth in the State in respect of rural literacy percentage for persons and males and ascends to the third position in the State in respect of female literacy. The higher proportion of literates in rural areas of the district is due, as in case of Balaghat and Narsimhapur districts, to its having a larger proportion of its rural population in big villages which invariably have schools and the population whereof is more alive to the value of education. It is instructive to study the progress of literacy in the district since 1921. This is shown in the marginally inset table separately for persons, males and females. It is seen that the district witnessed a steady improvement in the proportion of literate persons, from decade to decade, but the progress was very impressive in 1951-61 being 50% increase in case of persons and males and much more than that in case of females. The performance was even better in rural areas where the proportion of literates increased from 9.6 per cent in 1951 to 18.1% in 1961—almost a 100% increase. In rural areas of the district, the proportion among literate and educated of matriculates is 1.77% and of those who have passed primary or higher examination is 12.5%. In urban areas the proportion of matriculates and above to all literate and educated persons is roughly 8%, while persons with primary or higher educational qualification are 32% of all literate and educated persons.

Year	Literates per 100 of total population		
	Persons	Males	Females
1921	6.4	11.5	1.0
1931	8.0	14.2	1.3
1941	12.3	21.3	2.9
1951	16.0	24.6	6.9
1961	24.5	36.6	11.7

The impressive progress in the field of education in the district was in no small measure a result of the rapid expansion of educational institutions in the district. From information furnished by the District Education Officer, it appears that the number of primary or junior basic schools has more than doubled during the inter-censal decade. The same is the case with middle schools; while the number of higher secondary schools has more than trebled. Till 1960-61, the district is reported to have two private colleges. A Government Polytechnic has also been started at Khandwa in the year 1960-61.

Religion :

The distribution of population by religion is shown in the following table .

Distribution of population by religion, 1951-1961

Year	Total Rural Urban	Total Population	Hindu	Sikh	Jain	Muslim	Christian	Buddhist	Others
1	2	3	4	5	6	7	8	9	10
1951	T	100	85.8	0.5	0.5	12.7	0.5	N	N
	R	100	93.1	0.5	0.2	5.7	0.4	N	0.1
	U	100	61.8	0.4	1.2	35.6	0.9	N	0.1
1961	T	100	84.5	0.3	0.5	12.4	0.4	1.9	N
	R	100	91.3	0.1	0.3	6.2	0.2	1.8	N
	U	100	60.9	0.8	1.2	33.8	1.1	2.2	N

Hindus constitute 85% of the population, and are most numerous. In rural areas their proportion is as large as 91% of the rural population, while in urban areas it sinks to 61%. Mohammdans are the second largest religious group in the district making roughly 12% of its population. They are more numerous in urban areas where they account for about a third of the population. Buddhists, Jains, Christians and Sikhs, in this order are other religious groups in the district which are numerically significant.

The religious composition of the population has not changed materially since 1951. Still, the sizeable decrease registered by the Hindus deserves to be noticed. The gainers have been followers of Buddhism whose proportion in 1951 was negligible but who now form about 2% of the population. Jains, Christians and Sikhs together form 1.2% of the population.

Mother Tongues :

The pattern of mother tongues returned in the district bears the mark of its being a border district. It is different from the pattern obtaining in most other districts of the State where Hindi dominates other mother tongues. In East Nimar district Hindi does not enjoy the privilege of being the mother tongue of majority of the population. It has been returned as the mother tongue of only 30.5% of the population. Nimadi—a dialect of Rajasthani Hindi — is the second most numerous mother tongue in the district - returned mostly in the rural areas of Khandwa tahsil. It is significant that Hindi is the mother tongue of majority of the persons in the eastern Harsud tahsil which abuts on Hoshangabad district, the speakers of Nimadi in this tahsil are insignificantly small. On the other hand, Nimadi is the first mother tongue in Khandwa tahsil. Marathi—mother tongue of the people of the neighbouring districts of Maharashtra —claims about 16% speakers. It is the most widely spoken mother tongue in the rural areas of the southernmost Burhanpur tahsil which adjoins Maharashtra State. It has not many speakers in the rural areas of Harsud and Khandwa tahsils.

Next in numerousness after Marathi is the tribal language Korku—this is also the name of the tribe—which is the mother tongue of 10.5% of the population. Speakers of Korku are concentrated almost entirely in rural areas. 93% of the speakers of Korku as mother tongues are in the rural areas of Harsud and Burhanpur tahsils, in both of which Korku is the second most widely spoken mother tongue, in the rural areas. The population of Korku in Harsud tahsil (which is the only scheduled area in the district) is 42,377 against 35,185 persons who have returned Korku as their mother tongue. That is, number of speakers of Korku as mother-tongue in the tahsil is 83% of the Korku population of the tahsil.

Urdu, being the mother tongue of 9.6% of the population (comparing with a proportion of 12.4% Mohammadans) is also an important language in the district. Its speakers are concentrated in the urban areas to the extent of 75.5%. Considering urban areas alone, the number of persons with Urdu as mother tongue is 49,986 comparing with a Mohammadan population of 52,146; that is, speakers of Urdu as mother-tongue are 95.9% of the Mohammadan population in the urban areas. Other languages claiming more than 1% speakers, with proportion of their speakers are Banjari (2.2%),Bhili(2.2%),Gujarati(2.1%), Gondi (1.3%) and Sindhi (1.0%). Languages with less than 1% speakers but more than 1000 are Marwari (2,305) and Punjabi (1,825). In all 72 languages were returned as mother tongues in the district.

Scheduled Castes and Scheduled Tribes

Scheduled Castes

Scheduled Castes contribute 8·9% to the population of the district. The percentage is considerably less than the State percentage of 13·1. The low proportion of Scheduled Castes in the district is to be ascribed mainly to Burhanpur tahsil which has only 2% of its population in the Scheduled Castes. Khandwa tahsil, with 13·5% population belonging to Scheduled Castes very nearly approaches the State average. Harsud tahsil which has a high proportion of Scheduled Tribes population (40%) has 10·6% of its poulation in Scheduled Castes. Of the district's total Scheduled Castes population, Khandwa tahsil contains more than two-thirds (68·7%), Harsud about one-fourth (23·6%), and Burhanpur only 7·7%. The Scheduled Castes are concentrated in the rural areas of the district to the extent of 88·4%.

Scheduling with respect to castes extends to all the tahsils of the district. Of the twelve scheduled castes or synonymous castes-groups returned in the district in 1961, only eight are numerically significant. These are Balahi or Balai, Chamar etc., Mehtar, Kori, Mang etc., Katia or Patharia, Mahar and Basor. Together these eight castes account for all but 0·6% of the Scheduled Castes population in the district. Even of these, the most numerous are Balahi or Balai, constituting more than two-thirds (68·7%) of the Scheduled Caste population; concentrated mostly in rural areas of Khandwa and Harsud tahsils. Chamar and synonymous castes forming 17·6% of all Scheduled Castes are next in numerical strength. They do not, like Balahi, show any tahsilwise concentration but are dispersed in all tahsils.Balahi and Chamar between themselves constitute more than 86% of the district's population of Scheduled Castes. The less numerous Scheduled Castes are Khatik (48), Bahna or Bahana (3), Sansi (3), Dom or Dumar (10).

Sex-ratio in the Scheduled Castes in the district is 957, comparing with 939 for the general population. That means in the non-Scheduled Castes population, the proportion of women is even lower-actually it is

936. In respect of literacy, the district has the comparatively respectable (as compared to Scheduled castes in other districts) proportion of 10·5% literates in the Scheduled Castes population. This compares with a literacy rate of 24·53% for the district's general population. The State average of literacy in the Scheduled Castes population is 7·9%, so that East Nimar is better than the State as a whole in respect of education among its Scheduled Castes population. The literacy percentage for Schedulled Castes is infact pulled down by the low percentage (1·7) for females. Amongst the Scheduled Castes males, the proportion of literates is 18·8%. Of these, roughly 15% have passed primary or junior basic and and higher examinations, comparing with a corresponding proportion 58% for the general population of the district. One male belonging to the Chamar caste was counted amongst those having a university degree, while 56 males and one female have passed matriculation or Higher Seconary Examinations.

Economy

The economic classification of the Scheduled Caste population of the district is given in the table below.

Distribution of 100 workers in Scheduled Castes

Name of Scheduled Castes	All Workers	Categories I	II	III	IV	V	VI	VII	VIII	IX
All Scheduled Castes	100	42·7	37·8	0·7	7·9	1·1	1·0	0·2	1·1	7·5
Balahi or Balai	100	49·6	42·7	0·7	0·8	0·1	0·6	0·1	0·4	5·0
Chamar etc.	100	30·1	33·2	0·8	30·0	3·6	0·3	0·3	0·2	1·5
Mehtar or Bhangi	100	2·4	5·3	0·8	0·6	1·6	0·4	0·2	6·7	82·0

Participation rate in the Scheduled Castes population is 58·3%, which compares with 50·9% for the general population of the district and 52·3% for general population of the State as a whole. The rate for Scheduled Castes is pulled up by the higher participation (56·7%) of women in the working force, corresponding to a participation rate of 42·9% for women in the general population of the district. Higher participation of women in the working force is a characteristic common to Scheduled Castes and Scheduled Tribes all over the State and is an indication of their backward, mostly agricultural economy.

With a little more than four-fifths of the working force in the agricultural sector, the economy of Scheduled Castes in the district is mainly dependent on land. Here again as many as 37·8% are agricultural labourers, who can be presumed to be either having no land or very little land. 43% of the workers are cultivators-either on their own lands held directly from the State or on lands held on sub-lease from others. Table S.C.T.-V on page 150 of the Handbook shows that 82% of the cultivating households belonging to Scheduled Castes do so on owned lands. This is an encouraging feature of the economy so that schemes have to be evolved for rehabilitating the surplus working foce in the class of agricultural labourers only. 70% of the cultivating households who own their land possess holdings of more than 5 acres, while only 37% possess holdings of more than 10 acres. *Prima facie* about 30% of the households in Scheduled Castes do not possess economic holdings (taking holdings below 5 acres as uneconomic) while the position of about 33% who own holdings between 5 to 10 acres cannot be said to be sound.

Household industry, accounting for 7·9% of the working force, and 'other services' with 7·5% of the working force in it are two other important sectors of the economy, after agriculture. The other sectors together account only for 4·1% of the castes economy

Balahi or Balai (Sex-Ratio 974)

The 1931 Census Report (Central India Agency-Part I-Page 228) describes the Balais as "An impure caste of village watchmen found only in Malwa". In the same report the Balahis are described as having no tradition of migration, and are considered to be the subjugated aborigines of Malwa. In the old village constitution of Malwa region, the Balai was regarded as an important functionary and like the Baiga in the Maikal hills, he was considered an authority on village boundaries and every thing pertaining to the village. In East Nimar district Balais constitute bulk (68·8%) of the Scheduled Caste population and the caste next in numerical strength is one-fourth of the strength of Balais. 93% of their working force is in agriculture, and even here cultivators outnumber agricultural labourers. The proportion of working force in the latter category, nonetheless, remains considerable. 'Other services' presumably mostly village watchman afford employment to 5% of the workers. Employment in other sectors of economy is insignificant, together accounting for less than 3% of the workers.

Percentage of literacy in Balahi is 10·1 for persons; 19·2% for males and 0·7% for females. Literacy among females thus is poorer than the average (1·7%) for all Scheduled Castes in the district. Out of all literate and educated persons in the Balahi caste only 9% have passed the primary school level exami-

nation. Proportion of matriculates and others with higher educational qualifications in Balahis is less than even 1% of all literates and educated among them.

Chamars (Sex-Ratio 920)

Accounting for a little less than one-fifth of the district's Scheduled Caste population, the Chamars are next to Balais in numerical strength. Their economy also, with 63% of the working force in it, is dominated by agriculture, but unlike other Schedule Castes, household industry occupies an important place in it. Cultivation and agricultural labourers are more or less equal in numerical strength. The household industry of the Chamars is their traditional leather and shoe-making industry. The Chamars differ from other Scheduled Castes in yet another respect; that is, participation in category V (Manufacturing). They have about 4% of their working force in manufacturing which is comparable, actually a little more, than the population in category V of the general population. Employment of the Chamars in category IX-other services-is 1·5%, comparing with 6·4% for the general population. Percentage of literacy in the Chamars is 11%. The population of those who have passed primary school and higher examinations to all literate and educated persons in the caste is 18·5%.

Mehtar or Bhangi : (Sex-ratio 908).

The caste is concentrated to the extent of 65·1% in the urban areas, where its services of sweeping and scavenging are in great demand. The caste is advanced in literacy having a literacy percentage of 24·1% which is roughly $2\frac{1}{2}$ times the average for all Scheduled Castes in the district, and is comparable with the literacy percentage (24.5) of general population in the district.

Economy of the caste is mostly dependent on 'other services' almost entirely in scavenging and sweeping. Employement in agticulture is to the extent of 7.7% of the caste's working force; while category V-manufacturing-employs 1.6% of its workers. Transport, storage and communications also contain a sizeable proportion of the caste's workers.

Koris accounting for 2.6% of the Scheduled Castes population are mostly agriculturists. Mahar or Mehra and Mang and synomynous castes each account for 1.8% of the Scheduled Caste population of the district. The former are engaged principally in agriculture, while the latter are principally engaged in household industry. The nature of their household industry could not be ascertained though, presumably it appears to be basket-making from palm leaves.

Scheduled Tribes

Scheduling with respect to tribes extends only to Harsud tahsil. Scheduled Tribes form 7.9% of the district's population and 39.7% of the population of Harsud tahsil. Eight Scheduled Tribes were returned from the district. Of these Korku, Gond and Nihal making respectively 78.4, 16.6 and 4·1 percent of the district's Scheduled Tribe population include all but 0.9%. Bhil (pop. 359) ; Bhunjia (10), Oraon (pop. 3), Pardhan (pop. 35) and Pardhi (pop. 28) account for the remaining 0.9%. Sex ratio for the Scheduled Tribes is 991 as compared to 939 for the general population.

Educationally, the tribes are much behind the Scheduled Castes and the general population. Literacy percentage in them is 3.2%, which is less than one-third of the percentage for Scheduled Castes, and about one-eighth of literacy percentage of the general population. Literacy percentoge for Scheduled Tribes males alone is 6.1, and the percentage for persons is pulled down by the low rate of 0.3% for females.

Participation rate in the Scheduled Tribes is 62%, comparing with 51% for the general population of the district and 58.3% for the Scheduled Caste population. Economically, the tribes are overwhelmingly dependent on agriculture, having 97% of the workers in the first two working categories. Category III employing 2.2% of the workers is second from the point of view of participation. Categories IV (household industry), VI (construction) and IX (other services) together account for 0.9% of the workers. Employment in categories V, VII and VIII is negligible in proportion.

In Agriculture, 65% of the workers are cultivators while 32%, are agricultural labourers. Table SCT V, part B in the Handbook which is prepared from a 20% sample of the households shows that only 78% of all cultivating households in the tribes hold their land directly from Government. 11% of the cultivating households do so on lands partly owned and partly taken on lease from others, while an equal number cultivates lands taken on lease from others. The figures show that absentee landlordism is prevalent on a small scale. The general condition of the cultivating households as judged from the extent of lands held by them appears to be reasonably sound. 49% or roughly half of the cultivating households hold more than 15 acres of land ; while roughly one-fifth (20·6%) hold between 10 acres and 15 acres of land. Thus about 7 out of every ten cultivating households cultivate holdings of more than 10 acres. Only 4%, or one out of every 25 cultivating households hold very small holdings of less than 2.5 acres. About 5%, or one in twenty, of the cultivating households cultivate on small holdings measuring between 2.5 and 5 acres, while about 22% of the households cultivate on holdings between 5 to 10 acres in size.

Korku: (Sex ratio 1.002). This tribe accounts for 78% of all Scheduled Tribes in the district. Scheduling extends to only Harsud tahsil, but the tribe is almost as numerous in Burhanpur tahsil as in Harsud tahsil, and also has considerable population in Khandwa tahsil. In 1931, Harsud tahsil had 46%, Burhanpur 39% and Khandwa tahsil 15% of the districts' Korku population. In the absence of complete tahsilwise figures relating to the tribe in 1961, we may presume that the relative proportions of the tribe's population in the

three tahsils remain more or less the same. According to Gazetter of East Nimar District* Korkus in this district have taken to more settled habits than the dwellers in the interior of the Satpuras, and some of them grow wheat in the upper Tapti. According to the same authority the Korkus are divided into *Raj-Korkus* and Potharias, there being no intermarriage between the two.

Korku economy is almost entirely dependent on agriculture, with 98% of the tribe's workers being in categories I and II. 71% of the Korku workers are returned as cultivators, and 27% as agricultural labourers, which indicates that land hunger is not very acute in them. Category III-presumably forestry, includes 1.2% of the Korku workers ; while household industry and 'other services' together account for 0.7%. Participation of the tribe in categories V, VI, VII and VIII is negligible.

Progress of education in the tribe is very poor. Only 3% of the scheduled Korkus can claim to be literate and educated, and even of this pitiably small number, only 6% can claim to have crossed the primary education level. Literacy among females is of the order of 3 in 1,000.

Gond : (Sex ratio 951)

Second most numerous Scheduled Tribe in the district, the Gonds make 17% of the district's Scheduled Tribe population. They are also mainly dependent on agriculture, having 93% of their working force in agriculture. In their case, however, the proportion of agricultural labourers is as high as 40%. They have also greater proportion (6%) of workers in category III (presumably forestry) than the Korkus. Employment in other sectors of the economy is not numerically very important. Educationally, they are only slightly better than the Korkus, having 4.1% literate and educated in their population.

Nihal : (Sex ratio 959).

The Gazetteer* of Nimar District suggests that the tribe *Nahal* (which is obviously the same as Nihal) is a mixture of Korkus and Bhils. In the Mahakoshal districts Nihal or Nahal have been shown to be a synonymous group of the Korkus, while *Nihal* is also shown as an independent tribe. The following note occurs about 'Nahals' in 1891 Census Report : "The Nahals, 8,766, are returned principally from Hoshangabad 3,383, and Nimar 3,502. They are now for most part village-drudges and have almost ceased to exist as a separate tribe. They mix much with the Korkus, talking their language in the more hilly parts, but are considered inferior to the latter in the social scale."

In 1961, *Nihals* formed 4% of the district's Scheduled Tribe population. 93% of their workers depend on agriculture ; mostly (74% of the working force) agricultural labourers. Category III also attracts a sizeable proportion (5%) of their workers. Only 1.9% of the Nihals are literates.

Public health and vital statistics

Information pertaining to public health in the district is given in tables 6A.1 to 6B·2 of the Handbook, compiled from data supplied by the Civil Surgeon of the district. The district reportedly had seven primary health centres in 1960, presumably at the headquarters of the development blocks, and therefore serving the rural areas. In the same year, the district is reported to have two hospitals and sixteen dispensaries.

This information is probably not complete and may not be used for drawing valid inferences regarding the state of public health in the district. We have, however, returns relating to physicians, surgeons and dentists in B-V table of the Handbook. From this table, it appears that 247 persons had been returned from the district in occupational group '03' i. e. 'physicians, surgeons and dentists'. These include physicians in allopathy, ayurved, homeopathy and unspecified categories. As a total public health picture in the district, we have one physician (in allopathy, homeopathy or ayurved) for 2,774 population. Urban areas, with one physician for every 1,009 persons of the urban population seem to be better served by medical services than rural areas which have one physician for every 5,647 of their population.

Considering physicians and surgeons in allopathy only, who are generally technically qualified (whereas in case of the ayurvedic and homeopathic systems of treatment, even persons who do not possess certificate from any recognised institution also practise) and who seem to matter most in the public mind, table B-V informs us that the district had returned 87 such physicians and surgeons, 68 in the urban areas and 19 in rural areas. Thus there is one physician in allopathy for 7,875 persons in the total population. The uneven distribution of medical help over rural and urban areas of the district seems to follow from the fact that more than three-fourths of the doctors are concentrated in urban areas which account for only 22.5 percent of the population. In other words, as against one physician in allopathy for every 2,390 persons of the 22.5% urban population, there is one such physician for every 27,236 persons of rural population which accounts for 77% of the population. Even then, rural population of East Nimar seems to be better served by allopathic medical service than the rural population of the State as a whole, because in the latter case there is one physican for 41,580 rural population. In case of urban areas, the

* *Page 76—Central Provinces District Gazetteers Vol. A- -Nimar District (1908).*

* *page 77—ibid.*

State average of 1,822 persons per physician (allopathy) is better than that of East Nimar district.

Ayurvedic physicians also seem to be unevenly distributed over rural and urban areas. Out of the 89 physicians in ayurved returned in the district, 47 were in urban areas and 42 in rural areas. The district has one ayurved physician for every 7,698 persons of its total population. In urban areas, there is one ayurved physician for every 3,284 persons; while the rural areas have one such physician for roughly four times that number i. e. 12,637 persons. In the case of ayurvedic medical aid, the District seems to be slightly poorer than the rural population of the State as a whole, where there is one ayurved physician for every 11,473 rural population.

East Nimar district had 425 persons returned as "nurses, pharmacists and other medical and health technicians"; of which as many as 263 were concentrated in urban areas. Thus there is one such nurse, or pharmacist or medical and health technician for 1,612 persons of the total population, 587 persons of the urban population and 3,276 persons of the rural population. The District returned 71 nurses (54 in urban areas), 34 midwives and health visitors (21 in urban areas). 76 nursing attendents and related workers (39 in urban areas), 130 pharmacists and pharmaceutical technicians, (83 in urban areas) and 89 sanitation technicians (44 in urban areas.)

Vital Statistics:

Maintenance of vital statistics in the district is done according to chapter II of the Health Manual. The excess of births over deaths during the decade 1951-60 comes to 108,277 (assuming that the excess accruing from January to March 1951 is not sensibly different from the excess in corresponding months in 1961) as against an actual increase of 161,654 persons as shown by the census. The difference of 57,377 between these figures is much too large to be explained on the assumption of a favourable balance of migration, and points to incompleteness of registration. It is not possible to pinpoint areas of poor registration on the data available.

Land Utilisation Pattern in the District:

Table 2A-1 in the body of the Handbook gives the figures of land use in the district. According to classification used by the Land Records Department since 1953-54, land falls into nine categories; namely, forest, land put to non-agricultural uses, barren and uncultivable land, culturable waste, fallow land other than current fallows, permanent pastures and other grazing lands, land under miscellaneous tree crops and groves not included in the net area sown, net area sown, and current fallows. The geographical area of the district is 4,132 square miles (i. e. area according to Surveyor General of India), while the area according to village papers in respect of which land utilisation statistics are available is 4126 square miles. In 1960-61, forests cover 43.5% of the area of the district. All forests are government owned. In the State as a whole, proportion of forest area is 31.6% Tahsilwise figures of distribution of the forest area are not available; though generally it can be said that most of the forest area of the district lies in Burhanpur and Harsud tahsils. Breakup of the forest area according to classification into reserved and protected forests also was not available. A description of *flora* and *fauna* of the district has already been given.

Areas not available for cultivation constituted 5.6% of the area of the district, 4.4% of the total area of the district is being put to such non-agricultural use as residence, roads, etc; while 1.2% is barren and uncultivalbe.

Area which is cultivable but which is not available for cultivation amounts to 13.2% of the total land area of the district. A very large proportion of this—10.7% of the total area—consists of permanent pastures and other grazing lands. 0.7% of the total area of the district is covered by cultivated wastes; and 1.0% by fallow lands other than current fallows. Land under miscellaneous tree crops and groves not included in the net area sown also comes to a small proportion, 0.8% of the total area of the district.

Net area sown and current fallows together account for 37.7% of the geographical area of the district. Net area sown comes to 37.0%, which compares with a State average of 36.7%. The proportion of area under current fallows is only 0.7%, and is not at all high considering the State average of 1.8%.

It may be noticed from table 2A.1 that proportion of net area sown has been steadily increasing since 1953-54; the increase registered till 1960-61 is of the order of 5.0% of the net area sown of 1953-54. The increase appears to have been a result of bringing more and more of the area classified as 'culturable waste' under the plough. Area under 'culturable waste' steadily decreased since 1953-54, so that its magnitute in 1960-61 was only 25% of the 1953-54 figure.

Economy: Workers and non-workers

District/Tahsil	*Total Population*	*Workers*	*Non-workers*
East Nimar	100	51	49
Khandwa Tahsil	100	51	49
Harsud Tahsil	100	58	42
Burhanpur Tahsil	100	48	52
M. P. State	100	52	48

Above table shows the distribution of the population into workers and non-workers. Participation rate i. e. proportion of workers to total population is 51% which is less than the State participation rate by about 1.4%. Individually for males and

females also, the district participation rate is smaller than the State average for males and females. This small difference in the rate of participation is due to the higher proportion of urban population (22.5% as against 14.3% for the State) in the district. In fact, the participation rate in rural areas of the district (57%) is higher than the State average (55%). Generally in areas of low productivity, a higher participation rate, or what is the same thing, a lower dependency ratio, is more often than not, an index of economic backwardness rather than of a developed economy. This observation seems to follow from the observed lower participation rates or greater dependency ratios for urban areas whose economy, as is well known, is non-agricultural and has a firmer and more diversified base than that of rural areas. For East Nimar district this remark seems to be borne out from the fact that its urban areas have a participation rate of 31% (for females the rate is only 11%). Also Harsud, an entirely rural tahsil has the maximum participation rate (58%) in the district, while Burhanpur tahsil containing most of the urban population has the smallest participation rate.

Classification of the working force in to census wo king categories.

The following two tables give—(i) distribution of 100 workers in the district and in each tahsil into the nine-categorces of workers; and (ii) distribution of 100 persons in each working category in the district by the tahsil.

TABLE—I

District/Tahsil	Total Wokers	Workers in Categories								
		I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
EAST NIMAR DISTRICT	100	54.1	24.0	1.6	4.9	3.4	1.1	3.3	1.2	6.4
Khandwa Tahsil	100	56.6	23.3	1.3	3.9	1.6	0.9	3.7	1.9	6.8
Harsud Tahsil	100	65.3	24.7	2.4	2.6	0.3	0.7	1.0	0.3	2.7
Burhanpur Tahsil	100	42.9	24.4	1.6	7.7	8.2	1.5	4.3	1.0	8.4

TABLE—II

District/Tahsil	Total workers	Workers in Categories								
		I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
EAST NIMAR DISTRICT	100	100	100	100	100	100	100	100	100	100
Khandwa Tahsil	45.4	47.1	43.7	35.5	36.5	20.4	39.3	50.9	68.1	47.6
Harsud Tahsil	19.9	27.1	23.1	32.4	12.2	1.9	14.3	6.6	4.8	9.6
Burhanpur Tahsil	34.7	25.8	33.2	32.1	51.3	77.7	46.4	42.5	27.1	42.8

With 78% of the working force in categories I and II, the predominantly agricultural base of the economy is clear. The base is only slightly narrower than that for the State as a whole (79%). In agriculture, cultivators dominate agricultural labourers by two to one. Other services, giving principal work to 6.4% of the workers is next in importance in the district's economy, while household industry and manufacturing with 4.9% and 3.4% respectively of the workers are also important. Trade and commerce accounts for almost the same proportion of workers as manufacturing (Cat. V). Employment in category VIII (Transport, storage and communication), category III (Mining etc.) and VI (construction) is not numerically much significant.

As regards the tahsils, the concentration of working force to the extent of 90% in agriculture in the entirely rural Harsud tahsil may be noticed. The most urbanised Burhanpur tahsil contains the smallest proportion (67%) of the working force in agriculture. In Burhanpur tahsil, the economy exhibits greater diversification over the categories. In that tahsil, employment in 'other services' and manufacture', and to some extent 'household industry' is on the same level, and the three categories together account for one-fourth of the workers in the tahsil.

Household-Economy:

Tables B–X to B–XVII of the Handbook present the economy treating the housedold as the unit and not the individual. All these tables are prepared from a 20% sample of households, which is big enough and justifies the extension of the results deducible from it to the whole population of households.

Table B-X shows that 47% of the households (57% in rural and 8% in uban areas) are engaged in houseold cultivation *only*; 5.1% of the households (3.8% in rural and 10.1% in urban areas) in household industry *only*; while 2.4% (2.9% in rural areas and 1% in urban areas) are engaged both in household cultivation and industry. Thus, 49.4% of the households (60% in rural and 9% in urban areas) are engaged in household cultivation; and 7.5% (6.7% in rural areas and 11.1% in urban areas) in household industry. The somewhat higher proportion of urban households engaged in cultivation and household industry deserve

to be noticed. 45.4% of all households (36.0% rural and 80.9% urban) are engaged neither in cultivation nor in household industry.

Of the rural households engaged in cultivation, 83% cultivate on lands belonging to households, 10% on lands partly beloingng to them and partly held on lease from others while only 6.5% cultivate on lands belonging to others. Of the rural cultivating households, 1.1% cultivate holdings of less than one acre, 3.7% on holdings between 1 and 2.5 acre , and 9.2% on holdings between 2.5 and 5 acres. Thus 14% of rural households cultivate on holdings of less than 5 acres, which can easily be considered uneconomic holdings. 22.8% or between one-fifth and one-fourth of rural households cultivate on holdings measuring 5 to 10 acres which may or may not be economie depending on the quality of the soil and the size of the household.

About one-fifth of the households cultivate holdings between 10 and 15 acres. A large proportion 43% of the rural households in the district is of households cultivating on holdings of more than 15 acres. These may, judging from the size of their holdings, be said to be reasonably well off economically. 3·5% the of rural households have very big holdings of more than 50 acres.

Agriculture :

Agriculture is the mainstay of the district's economy, accounting for the principal economic activity of 78% of the working force. Cultivators on owned land, or land held from others, form 54% of the working force, whereas agricultural labourers, working in cultivations belonging to others make 24%. The proportion of agricultural labourers in the working force of the district is thus about $1\frac{1}{2}$ times as great as the State average in that category 16·6%. This is, perhaps, on account of the labour-intensive cotton cultivation which is very popular in the district. In the entirely rural Harsud tahsil, dependence on agriculture is to the extent of nine-tenths of the working-force, where as in the most urbanised Burhanpur, the proportion of dependence on agriculture comes down to roughly two-third. Khandwa tahsil, with four-fifth of its working force in agriculture, is intermediate in respect of dependence on agricultnre.

Cropping-Pattern :

Cropping pattern for the district and each tahsil for 1960-61 is shown in Table 1 below. The other table gives the distribution of area under each crop in the district by tahsils.

TABLE I

Percentage of area under different crops to total cropped area

		Area under														
District/Tahsil	Total croped area	Rice	Jowar	Wheat	Total cereals and millets	Gram	Tur	Other pulses	All food grains	All food crops	Til	Linseed	Ground-nut	Total oil-seeds	Cotton	Net area sown
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
EAST NIMAR DISTRICT	100	6·4	23·4	6·2	39·4	1·8	3·2	9·3	53·7	55·0	2·0	0·5	8·0	10·5	34·2	96·7

East Nimar is predominantly a kharif, crop area. Cotton and *jowar*, both kharif in that order are its staple crops. Cropping pattern of the district differs from that of other districts in the State in one important respect: it has comparatively smaller area under food-crops than the State as a whole and most other districts. In the district as a whole and in Khandwa tahsil food-crops occupied 55% of the total cropped area. In Burhanpur tahsil, proportion of area under food-crops was as low as 46% of total cropped area. Harsud tahsil is nearer the State pattern in that it has 62%of its cropped area under food-crops.

Cotton is the major crop grown in the district. In 1960–61, this crop accounted roughly for one-third (actually a little more) of the cropped area of the district. The southern-most Burhanpur tahsil adjoining the cotton-growing tracts of Maharashtra is leading in cotton cultivation in the district. It had half of its cropped area under cotton in 1960–61. Khandwa tahsil is next to Burhanpur in cotton cultivation, having 32% of its area under the fibre crop. Area under cotton is much smaller (23% of total cropped area) in the easternmost Harsud tahsil, but even there acreage devoted to cotton is greater than the acreage under any other crop. According to Gazetteer of Nimar District*, the variety of cotton most popular in the District is 'Dharwari' which is known in Berar and Nagpur tract as 'Jari'. Of late, people are taking to the improved method of sowing cotton introduced by the efforts of the administration, known as 'choufuli'. Of the district's total area under cotton in 1960-61, the biggest Khandwa tahsil contained 47%, smallest Burhanpur contained 35% and Harsud contained 17%.

The cereal '*jowar*' grown as '*kharif*' crop covering much more than half the area under all cereals and millets is the staple food crop of the district; particularly in Khandwa tahsil where it covered more than three-fourths of the area under all cereals and millets. *Jowar* is the principal food-crop in the cotton-rich tahsil Burhanpur. Harsud tahsil however departs from the pattern set by the other tahsils and has rice and wheat on areas comparable to area under *jowar*.

Wheat and rice are not very extensively sown in in the district, and each occupies roughly 6% of the total cropped area of the district. Even then, they come next to *jowar* in respect of size of acreage amongst the cereal crops. In Harsud tahsil the proportion of area under each of these crops is more than twice the proportion for the district as a whole (Rice 14% and wheat 13% of total cropped area in Harsud tahsil). In Burhanpur and Khandwa tahsils the area under wheat and rice shrinks to about 4%.

Pulses covered 9% of the cropped area of the district in 1960-61. The pulse 'gram,' quite a favourite in the neighbouring Hoshangabad district, here recedes into the background, covering about one-fifth of the area under pulses. Gram is an important pulse, covering a little more than half the area under all pulses in Harsud tahsil which abuts on the Hoshangabad district. The pulse *tur* or *rahar*, grown with cotton in lines, is the most important pulse in the district; it accounts for one-third of the area under all pulses. It occupies a smaller acreage than gram in Harsud tahsil, but in the cotton-rich Burhanpur tahsil, it swells in acreage to more than three-fifths of all area under pulses in that tahsil. In Khandwa tahsil *tur* occupies only fourth of the area under pulses in that tahsil.

Oilseeds covering between one-tenth and one-eleventh of the total cropped area of the district are about as important as pulses in the cropping pattern of the district. By far the most important oilseed in the district is groundnut which occupies four-fifths of the area under all oilseeds. But in Harsud tahsil *til* or seasamum is almost an equal favourite amongst oilseeds. This tahsil has greater area (14·5%) under oilseed than the district average. In Khandwa tahsil, almost all the area under oilseeds in 1960-61 was under groundnut.

There is not much of irrigation in the district, the total area under irrigation being roughly 3% of the net area sown. The principal source of irrigation is wells; and the chief crop irrigated is wheat in Khandwa and Burhanpur tahsils. Double-cropping is not generally practised, the area double-cropped being only about 2% of the gross-cropped area in 1960-61. Generally, wheat is taken as a second crop after paddy is harvested. Common crop rotations are reported to be cotton and *jowar* or cotton with groundnut.

Category III—Mining etc.

Accounting for less than 1% of the total workers in the district, this category is not of much significance in the district's economy except in the Harsud tahsil where it accounts for 1·4% of total workers of that tahsil. Employment in mining and quarrying is only to the extent of 4·5% of the working force in category III—and all these persons are employed in minor group 107 i.e. "quarrying of stone, clay, sand gravel etc." By far the most important minor group is 040—"production and rearing of livestock such as cow, buffalo, goat mainly for milk and animal power" which accounts for 47% of all workers in the category. Forestry and logging (Major Group 02) is next important activity in this category accounting for one-fourth of the workers in it.

Category IV—Household Industry

Workers principally engaged in household industry number roughly 1 in 20 in the district. The proportion is maximum (1 in 13) in the Burhanpur tahsil

**Central Provinces Disirict Gazetteers, Nimar District Volume A (1908) Page 97,*

which contains more than half of total workers in the category in the district; while it is lowest (roughly 1 in 40) in Harsud tahsil. Viewing from the size of participation, household industry ranks fourth in the district and Khandwa and Harsud tahsils but fifth in the Burhanpur tahsil. Livestock industries i e. major group 04; mainly the rearing of livestock such as cow, buffalo, goat etc. for milk and animal power, and rearing of sheep and production of wool, engaged 4·7% of the workers in household industry. Bulk of the workers (95·3%) are in division 2&3 manufacturing. Half of the workers in division 2&3 (manufacturing) are in the urban areas while half are in rural areas. 7·1% of the working force in household industry in the district is employed in the making of foodstuffs in minor-group 200 (production of rice, flour etc. by milling, dehusking and processing of crops and foodgrains), minor group 207 (production of edible oils and fats) and in minor group 209 (production of food products such as sweet-meat and condiments, *muri*, *murki*, *chura*, *khowa*, chocolate, toffee etc.).

A large proportion (27·6%) of the workers in household industry is engaged in activities under major group 23—textile-cotton (concentrated in urban areas of the district to the extent of 93·5%). Most of these are engaged in cotton-weaving on handlooms and powerlooms. Tailoring industry (minor group 273) covers 9·4% of the workers in household industry. Making of leather products (a household industry traditionally associated with Chamar caste), employing 10·7% of the workers in household industry; making of wood and wooden products (major group 28) with 14·1% of the household industry working force in it; manufacture of clay products (minor group 340) such as bricks and tiles and manufacture of earthenware (minor group 350) traditional household industry of the Kumhars employing 6·8%; and manufacture of jewellary, silverwares and wares using gold and other precious metals (minor group 393) are other important household industries in the district.

Category V—Manufacturing

This is fifth in the economy of the district viewed from the size of participation in the working force. Roughly four-fifths of the workers in this category are in Burhanpur tahsil and these too concentrated in the urban areas i.e. the towns of Burhanpur and Chandni to the extent of 80%. Much more than half (54·7%) of the working force in this category is engaged in cotton-textile industry, mostly (to the extent of 67% of the workers in cotton-textile industry) in the cotton-weaving and spining mills at Burhanpur. Paper and paper products industry entirely concentrated in the town of Nepanagar having the only newsprint factory in the State and in the country— employs 16·6% of the workers in category V. Making of *biri* also employs a sizeable proportion (17·0%) of the workers in category V and these again are almost entirely concentrated in urban areas. Foodstuffs industry mostly covered in minor groups 200 (production of rice, flour etc. by milling, dehusking and processing of crops and foodgrains), minor-group 204 (slaughtering, preservation of meat and fish etc.), 207 (manufacture of edible oils) and 209 (manufacture of sweet-meat, condiments etc.) and accounting for 8·3% of worker ; tailoring (minor-group 273) with 6·6% workers in it; wood and wooden products (major group 28) employing 5·6% of workers; etc. are other important branches of manufacturing in the district.

Category VII—Trade and Commerce

Participation in trade and commerce in the district is 3·3% of the working force, being maximum (4·3),in the most urbanised Burhanpur tahsil and least, 1% in the entirely rural Harsud tahsil. In fact, 68·5% of the workers in trade and commerce are returned from urban areas of the district. Wholesale trade (major groups 60-63) employs 8·6% (all males) of the workers in trade and commerce. Bulk of these are engaged in the trade of ceareals and pulses (minor group 600). Of the persons engaged in relail trade, more than two-fifths (44%) are in minor group 640 i.e. retail trading in cereals, pulses, vegetables, fruits, sugar, spices oil, fish, dairy products, eggs and poultry. Next in importance is minor group 650 i.e. retail trading in fibres, yarns, dhoti, sari, readymade garments, hosiery products etc. which accounts for 9·5% of the workers. Retail trading of food tuffs (minor-group 646), retail trading in tobacco products (minor group 646), retail trading in medicines and chemicals (minor group 652), retail trading in fuel etc. are some other important branches of the retail trade in the district viewed from the size of participation in working force.

Category VIII—Transport, Storage and Communications

Employment in transport, storage and communications is 1·2% of all workers in the district. The proportion is highest—1·9%—in Khandwa tahsil, and very low—0·3%—in the rural Harsud tahsil. Burhanpur tahsil has one out of every hundred workers in transport, storage and communications.

83% of the workers in category VIII are in transport out of which about two-fifths are in railways. Khandwa, the district headquarters town is the centre of railways in the district.It is on the Calcutta-Bombay main line, which is double through out the District. It was opened in the year 1870. A metre guage line connects Khandwa to Ajmer via Indore and recently another railway line connecting Khandwa to Hingoli and Purna via Akola in Maharashtra has been constructed.

About 39% of the workers in transport are in road transport by bus and motor vehicles. The district has a total, excluding village roads, of 410 miles of roads (including village roads it is 552 miles). Of these, 120 miles have been classified as State highway , 44 mile

as major district roads and 245 miles as other district roads. Length of village roads is reported to be 142 miles. The district thus has 99 miles of roads (excluding village-roads) per 1,000 square miles of its area, which compares with 129 miles for the State as a whole, and 247 miles for Jabalpur district which leads in respect of length of roads. Inclusion of village roads increase the figure to 134 miles per 1,000 sq. miles of area in case of East Nimar, 184 miles in case of the State and 352 miles in case of Jabalpur district. Details of road system in the district as furnished by Executive Engineer of the district can be seen in Table 7·1 in the Handbook.

Employment in storage services is 1·4% of the number of workers in category VIII. Communication services employing 9·8% of the workers in the category are mostly manned by persons of the post and telegraph services

Category IX —Other Services

'Other services' occupy, after agriculture, the most important place in the economy of the district, and accounts for 6·4% of all workers. The proportion is higher in the comparatively highly urbanised Burhanpur tahsil and the lowest in the entirely rural Harsud tahsil. As may be expected, workers in 'other services' show a concentration in urban areas, which account for 58% of all the workers in the category.

Approximately one-third (32·2%) of workers in 'other services' did not return adequate details regarding their industrial affiliation and have accordingly been put in the category of unclassified labourers. Of the 67·8% who have been classified, the following statement lists the first eight industrial activities.

Code No. of Industry	Description	% to workers in other services
Major group 88	Personal services	14·6%
Major group 81	Educational and scientific services.	14·2%
Minor group 809	Public service in administrative departments & offices of State government	9·2%
Minor group 511	Garbage and sewage disposal, operation of drainge system and all other work connected with public health & sanitation	6·1%
Minor group 803	Public service in Police.	4·6
Minor group 820	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatorium, nursing homes, maternity and child welfare clinics as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	3·9
Minor group 831	Religious and allied services rendered by pandit, priest, preceptor, fakir, or monk.	3·7
Minor 500&501 groups	Generation, transmission & distribution of electric energy.	2·9

It would be seen that personal services, including hairdressing, washing and laundering services etc. employ the biggest proportion of workers in the category. Public services in education (including scientific services) are almost equally frequent. These are mostly teachers in the primary schools. Public service in administrative departments of the State Government and in Police also employ a sizeable proportion–13·8 % of workers in this category.

Electrification :

All the three towns in the district are electrified. By 1960-61, 20 villages in the district were electrified giving a rate of 1·8 electrified villages per 100 inhabited villages. This compares with 0·5 electrified villages for State as a whole and 2·8 electrified villages per 100 villages for Jabalpur district which then led in case of rural electrification.

Summing up:

East Nimar, the twelfth biggest district in size in the State, consists of parts of Narbada and Tapti valleys separated by ranges of the Satpura system running from west to east. The district is however nineteenth in the State in population ranking, having more than doubled its 1901 population during the period 1901-61. Decades 1901-11, 1921-31 and 1951-61 have been particularly favourable to the growth of population in the district. In the last decade, East Nimar was surpassed in proportionate population increase only by Sehore and Jhabua districts.

The district is seventh in the State in respect of its urban population ratio. In 1951, the district had an urban component of 23·5% in its population, which is in 1961 reduced to 22·5% inspite of the addition of the new town Nepanagar during the decade. The reason for the slight fall in the urban-rural ratio is to be traced to the unusually high growth recorded by rural areas of the district in 1951-61. Sex-ratio during the decade has fallen from 948 in 1951 to 939 in 1961. Fall in the sex-ratio is however a feature common to the entire State ; and we cannot ascribe it easily to industrialisation or urbanisation as is generally done.

East Nimar is one of the low-density areas, and ranks 30th in the State in population density. Harsud, with only 72 persons to a square mile, is one of the most sparsely populated tahsils in the State.

The district is better than many other distircts in the State in the field of education, ranking fourth in literacy percentage. Its literacy percentage of 24 5, is much higher than the State average of 17·1%. In respect of female literacy (rural), East Nimar ascends to the third position in the State. During 1951-61 the percentage of literacy in the District improved by 50%. This remarkable progress has been possible by a liberal opening of primary schools whose number has more than doubled during the decade. Number of middle schools also has doubled, while the number of high schools has more than trebled during the decade. The number of scholars of either sex attending these institutions has also registered comparable increases.

Economically, the district is mainly dependent on agriculture, having 78% of its workers in the category of cultivators or agricultural labourers. The district is a predominantly *kharif* crop area. It has only 55% of it area under food-crops; thus it differs in cropping pattern from most other districts in the State, where food crops account for a very large proportion of the area under cultivation. Cotton is the non-food crop commonly cultivated in the district. Of the non-agricultural pursuits, important in the district are 'other services', household industry, manufacturing and trade and commerce, employing respectively 6·4, 4·9, 3·4 and 3·3 percent of total workers in the district

A--GENERAL POPULATION

TABLES

Note:—Under Columns 3 (a) and 3 (b), (a) represents the area of the district furnished by the Surveyor General of India; (b) represents the area furnished by the State Survey Department. The area figures of tahsil 'total' and 'rural' are based on the figures of the State Survey Department. The district 'total' and 'rural figures for area include the forest area of 1664·09 sq. miles, but as tahsilwise break-up of this area is not available, it is not included in tahsil areas given in the table.

2 The urban area figures are collected by the Census Organization.

3 Population per square mile has been calculated on area figures furnished by the State Survey Department.

4 (M) stands for Municipality.

5 Town treated as such for the first time in 1961 is printed in italics.

APPENDICES TO TOWN & VILLAGE DIRECTORY

CONTENTS

S. No.		*Pages*
Appendix	I—Industrial Establishments ...	235—242
Appendix	II—Towns and Villages served by metalled roads (All villages having roads in the village itself or within one mile of the village are included in the Appendix) ...	242—243
Appendix	III—Towns and Villages having railway stations within five miles ...	244—245
Appendix	IV—Towns and Villages having bus-stops ...	245
Appendix	V—Towns and Villages having public libraries ...	246
Appendix	VI—Towns and Villages having public reading rooms ...	246
Appendix	VII—Towns and Villages having pucca wells for supply of drinking water together with their number	247—250
Appendix	VIII—Towns and Villages having public latrines ...	250
Appendix	IX—Towns and Villages having drains ...	251
Appendix	X—Towns and Villages in which weekly or fortnightly markets are held together with the day on which it is held ...	251
Appendix	XI—Towns and Villages having co-operative societies together with the description of the society ...	252—253

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note :—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups; showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been persented first. Then follows the list of the villages in the order of their location code number with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following Examples will make the above note clear :—

East Nimar District Total 200 (427) signifies that there are 427 establishments in East Nimar District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains". Khandwa Tahsil Total 202 (2) signifies that there are 2 establishments in Khandwa Tahsil pertaining to Minor Group 202, which stands for "Productioh of indigenous sugar, gur from sugar cane or palm juice and production of candy". Village 2 Mortakka 207 (1) signifies that in Village Mortakka which has 2 as its Location code number there is 1 establishment pertaining to Minor Group 207, which stands for "Producation of edible fats and oils other than hydrogenated Oil." Khandwa Town, Ward No. 1 209 (1) signifies that there is 1 establishment located in Ward No. 1 of Khandwa Town pertaining to Minor Group 209 which stands for "Producation of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee lozenge."

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies [the agency or source is indicated below each Table or Statement] and from official publications. These are presented under the following heads :—

1 Rainfall and Temperature

2 Economic Statistics :—
- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics :—
- (a) Health and Medical
- (b) Vital Statistics

7 Communications

8 Miscellaneous

Note:—Figures for the the years 1911 to 1951 are the Census years averages arrived at by striking the averages of the census year and two years preceeding and following it. For example two averages for the census year 1911 are the averages of the years 1908–09, 1909–10, 1910–11, 1911–12 and 1912–13.
