FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is **inter alia** used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts, Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The resturcturing of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the equirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, Primary Health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II—towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statements V are also added **inter alia** with this view. A significant addition in class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

The format of the primary census abstract, for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tehsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/Police Station/C.D. Block, etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri J. Tayeng, I.A.S., the Director of Census Operations, Meghalaya on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
The 26th April, 1982.

P. PADMANABHA,
REGISTRAR GENERAL, INDIA.

PREFACE

Meghalaya is one of the youngest States of the Indian Union. At the time of taking the 1971 Census, it was an autonomous sub-state within the State of Assam with two districts, viz., Garo Hills and United Khasi and Jaintia Hills Districts. With the re-organisation of the North-Eastern States under the North-Eastern State (Re-organisation) Act, 1971 the erstwhile autonomous State of Meghalaya was upgraded to a full-fledged State. Therefore of all practical purposes, 1981 Census is the first census conducted in Meghalaya as a full-fledged State.

The new State went through far-reaching administrative changes in the subsequent years in order to meet the administrative demands for speedy economic development of the people. Immediately after inauguration of the State the then Jaintia Hills Subdivision of the United Khasi and Jaintia Hills District was upgraded into a full-fledged district in the early part of 1972. Thereafter in 1976 Khasi Hills District and Garo Hills District were bifurcated to form two districts each, viz., East Khasi Hills District with headquarters at Shillong, West Khasi Hills District with headquarters at Nongstoin, East Garo Hills District with headquarters at Williamnagar and West Garo Hills District with headquarters at Tura. Four new Subdivisions, viz., Amlarem in Jaintia Hills District, Ri-Bhoi in East Khasi Hills District, Mairang in West Khasi Hills District and Baghmara in West Garo Hills District were also constituted around the same time. In addition to these, six administrative units, viz., Khliehriat in Jaintia Hills District, Sohra in East Khasi Hills District, Mawkyrwat in West Khasi Hills District, Resubelpara in East Garo Hills District, Dadenggiri and Betasing Administrative units in West Garo Hills district were also brought into being. In the late 1979, the erstwhile 24 community developmnet blocks in the State were also re-organised to create six more additional community Development blocks bringing the total to 30. Of the new Community Development Blocks, Amlarem comprising the Amlarem Subdivision was carved out from erstwhile Thadlaskein C. D. Block, Mawkynrew in East Khasi Hills District was carved out from parts of Pynursla and Mawryngkneng C. D. Blocks, the northern portion of Bhoi Area C. D. Block was taken away and that portion of Mairang C. D. Block which falls in East Khasi Hills District was tagged to the northern portion of Bhoi Area C. D. Block to constitute a new Nongpoh C. D. Block with headquarters at Umling. In West Khasi Hills District, the biggest C. D. Block in the State, Nongstoin-Sonapahar was divided into two and the new C. D. Block comprising Sonapahar area was formed as Mawshynrut C. D. Block with headquarters at Riangdo. In East Garo Hills District, Songsak C. D. Block was almost equally divided to constitute a new C. D. Block of Samanda comprising of the southern portion of Songsak Block. In West Garo Hills District, the erstwhile Dambuk-Aga was divided along the river Simsang and a new C. D. Block named Rongara was constituted on the east, while on the west of Simsang river the original C. D. Block with the same name continued.

Though already created, at the time of actual census taking the new C. D. Blocks did not come into existence in the field, and therefore except for Amlarem and Mawshynrut, 4 new C. D. Blocks were not taken as separate units in 1981. Yet in order to enhance the utility of the data to the Planners, the data has been tabulated on the basis of the new C. D. Blocks.

The District Census Handbooks in 1971 were written for two districts which constituted the Autonomous State of Meghalaya at that time. As such for the first time, separate District Census Handbooks for all the five districts comprising present Meghalaya are being brought out in 1981 separately. 1981 Census had some distinctive features compared to earlier censuses. For the first time, the economic census was canvassed in the form of Enterprise List along with the houselisting operations in September and October, 1980. This has necessitated wholehearted co-operation and co-ordination of the training programme as well as actual field operations between the State Directorate of Census Operations and the Directorate of Economics and Statistics, Govern-

ment of Meghalaya, on behalf of the Central Statistical Organisation. Secondly, for the first time after Independence an effort was made to collect information on physically handicapped persons though in a very limited scale. Handicapped persons were categorised into totally blind, totally crippled and totally dumb. This it is hoped, will provide a firm data base on the three types of disabilities to the Planners and Social Welfare Organisations engaged in upliftment of the physically handicapped persons. Thirdly, it is unique in the country, that the Directorate of Census Operations in Meghalaya collected data on a number of households dependent on jhum cultivation in the State. Jhum cultivation is a phenomenon extensively prevalent in the entire north-eastern region and the efforts of the Government in trying to control the damage of Jhumming on the ecology by suitably rehabilitating the Jhumiyas, have been handicapped in the absence of firm data. Jhumming families were classified into three broad categories (i) those cultivating in owned land, (2) those cultivating on rented land and (3) those cultivating partly in 'owned' and partly in rented land. A separate volume is being brought out on Jhum.

The Census Organisation like any organisation has been always striving to improve upon its previous performances both in terms of quantity and quality of data. The collection of the above mentioned information will enhance the utility of 1981 Census data. 1981 Census was also an improvement on the 1971 Census from another angle. Within a month of the completion of the Census taking throughout the country the provisional results were published for the whole country as well as for every individual state and union territory. Considering the fact that Indian Census is one of the biggest administrative exercises in the world, and is based on door-to-door canvassing, it was really remarkable that the provisional population totals were announced within such a short time. This has earned wide acclamation from all over the world. Unlike in 1971, the District Census Handbook in 1981 will consist of two parts, viz., Part XIII-A and XIII B. Part A dealing with Village and Town Directory and Part B dealing with Village and Townwise Primary Census Abstract. Analytical reports and administrative statements along with District Census Tables each constituting Part X-C of 1971 was merged into the Introductory Chapter and analytical reports on various tables in the Part A and B itself. Another significant deviation from the 1971 Census is in the format of the towns and village Primary Census Abstract. The 1971 Census divided workers into 9 cotegories, whereas in 1981 they have been divided into cultivators, agricultural labourers, household industries and "Other Workers". The last category in 1981 covers category III, IV, Vb, VI, VII, VIII and IX of 1971. While in 1971, total number of workers were divided into 9 categories in 1981 it is divided into two major categories, viz., Main workers and marginal workers. The main workers are categorised into four as mentioned above but introduction of marginal workers is a new phenomenon. Though it does not form part of the Primary Census Abstract, in the District Census Handbook in 1981 Census information on persons seeking or available for work were also collected. This is also a new innovation.

In 1971, the unit below the district level for census taking was not uniform throughout the State. In Garo Hills District, Mouza forms the unit while in the United Khasi and Jaintia Hills District, the Police Station area was the unit below the district level. With the administrative re-organisation of the State these areas have also undergone large scale changes. Therefore, the comparability of data upto the Mouza and Police Station area for 1971 with that of C. D. Block area in 1981 is lost. But following the 1971 pattern, an alphabetical list of villages for every C. D. Block has been provided for easy identification of the village with their location code which does not contain any other information. In the village directory portion, detailed information about the amenities available in each village has been indicated. Similarly, in the Primary Census Abstract, population particulars of every village has been indicated. Though the data for every hamlet was collected in 1981 Census, it has been decided to present them only up to the village level and all requirements of hamlet-wise data would be met for individual requirements. The existence of several villages of the same name not only in different district but also in the same C. D. Block is often confusing. However, utmost care has been taken to ensure that neither there is ommission nor duplication of villages in each C. D. Block and as far as posible we have tried to maintain spelling of the villages which were adopted in 1971. Though it is the subject matter of the Administra-

The present District Census Handbook combines Part A and Part B. Part A of the volume containts information regarding the status of each town and its location, physical aspect, Municipal finance, Civic and other amenities, Industry, banking, etc. Village Directory contains the information on availability of basic amenities such as educational institutions, public health centres, village markets, drinking water, electricity, transport and communications. Part B of the Handbook contains details of Primary Census Abstract of each town and village. Compared to these towns of 1971 Census, there are 12 towns in 1981. Of these, Pynthor Uhkhrah and Madan-Rting which constituted rural components of Shillong Standard Urban Area of 1971, and now formed constituent towns of Shillong Urban Agglomeration. Cherrapunjee in East Khasi Hills District locally known as Sohra which is the Cenient town, Nongstoin the headquarters of West Khasi Hills District, Williamnagar, the headquarters of East Garo Hills District and Baghmara the headquarters of Baghmara Subdivision and the four new towns of 1981. Significantly, Tura town has also undergone tremendous change. The town area of Tura in 1971 comprises of the area which was constituted into a Town Committee area **vide** a notification in 1951. But while the Census was being taken the District Council by a notification enlarged the area of the town which was not taken into consideration in the 1971 publications as urban unit. In 1979, the Government of Meghalaya in the Municipal Department constituted the Municipality of Tura by adding 11 villages of Rongram C. D. Block. Thus the population of Tura from 14,489 rose to 35,257. The area of the town also increased from 9.09 Km2 to 18.32 Km2.

In the Column 3 of the Village Directory and also of Village Primary Census Abstract, the area of the village in hectares ought to have been given. However, in the absence of cadastral survey, the area furnished for every village is arrived at by approximate estimate and hence not reliable. The column has therefore been left blank. The area of each C. D. Block has been arrived at by the planimeter method and certified by the Joint Director of Survey, Government of Meghalaya. Similarly, the area of each town has also been arrived at in the same manner and certified by the same authority.

Considerable difficulties were encountered while preparing the C. D. Block and town maps. As has been mentioned in the Administration Report on Enumeration, notifications creating the C. D. Block, Administrative units, Subdivisions and Districts mentioned only the content and does not describe the boundary of the administrative units. As a result, for the district, subdivision and administrative unit boundaries we have relied upon the Survey Department, Government of Meghalaya. As regards, the Community Development Block boundaries, the maps submitted by the Block Development Officers were reduced to a standard size and scale and superimposed on the base map of Meghalaya and each district and aligment of the boundary corrected where necessary according to the approximate location of the villages. This has been certified by the Government in the Community Development Department and Survey Department, Government of Meghalaya. Inaccuracies are bound to creep-in in such a national map and it is hoped that taking these maps as a basis, Government would bring out correct maps drawn on scale after the necessary field surveys not only with a view to safeguard the records for the Census Organisation in 1991 but also to provide the authentic and acceptable map for every unit of administration in the State to those who need them.

As we follow a certain criterion for determining a place as a Census town like—(i) Every place having a municipality or a town committee, a Cantonment Board or an area notified committee (ii). places having a minimum population of 5000 and above, (iii) of which 75% of the male working population are engaged in non-agricultural pursuits, (iv) and the minimum density of population is 400 per Km2, Cherrapunjee, Madan-Rting, Nongstoin, Williamnagar, Baghmara have been treated as census towns. There was some misgivings particularly in Cherrapunjee where the people thought that declaring a place as a census town would automatically mean constitution of a town committee with an inevitable dose of taxation. It had to be clarified here that a census town does not necessarily lead to constitution of a place as a town by the Municipal Department or District Council, though it cannot also be gauranteed that such an eventuality will the town maps have also been drawn on eye estimation and then superimposed on the topo sheet not take place because of the prevailing urban mation and then superimposed on the topo sheet

with a view to confirming the outer boundary to an accepted scale. However, since all the additional six towns are fast developing and important administrative centres, the need for a master-plan for each of these towns with a view of ensuring planned growth can hardly be over-emphasized. The Town and Country Planning Organisation in the State which had already started work in surveying Cherrapunjee would complete the Town Surveys not only of the present Census towns but also all prospective towns like Mairang, Nongpoh, Khliehriat, Greater Mendipathar, Phulbari and Dalu so as to provide a firm and authentic map for the 1991 Census.

As will be evident from the data presented particularly in the Town and Village Directory, the Census Organisation had to obtain assistance from many other departments to get the required data. I would like to place on record our sincere thanks to all those Individuals, Organisations in Government Departments who have helped us with the required information and the Census Organisation looks forward to having their continued help and assistance.

I would like to record my gratitude to the people of Meghalaya who have given their utmost co-operation to the Census Organisation by faithfully answering all questions both pleasant and unpleasant. The 2397 enumerators and 491 supervisors, 62 Charge Officers, 3 Additional District Census Officers, Subdivisional Officers, Additional Deputy Commissioner-**cum**-District Census Officers and the Deputy Commissioners who functioned as Principal Census Officers have earned our deep gratitude by their sincerity, dedication to work, team spirit and the amount of organisational skill displayed and countless sacrifices of their personal comfort that they have made in making the 1981 Census a success. The 1981 Census Operations have proved beyond doubt that given the will, the administrative leadership and sound organisational backing we Indians are capable of doing anything on this earth.

I am also grateful to the Government of Meghalaya particularly to Shri U. P. Singh, then Governor of Meghalaya, Shri B. B. Lyngdoh, then Chief Minister of Meghalaya, Capt. W. A. Sangma, Chief Minister of Meghalaya, Shri Ramesh Chandra, I.A.S. Then Chief Secretary to the Government of Meghalaya, Shri J. C. Nampui, I.A.S., Chief Secretary to the Government of Meghalaya, Shri R. V. Lyngdoh, I.A.S., Additional Chief Secretary and Shri H. A. D. Sawian, I.A.S., Special Secretary to the Government of Meghalaya who have not only made the entire State machinery available to the Census Organisation but have also been constant sources of encouragement and guidance but for whose personal attention, the State machinery and thousands of census workers would not have been able to tackle the job without any hitch.

I am also extremely grateful to the Chief Executive Members of the District Councils who have wholeheartedly assisted the Census Organisation by sparing all available man-power at their disposal.

I am really fortunate to have a dedicated band of colleagues in the Directorate who have spared no pains and endured all the sufferings and discomforts to make the Census count right from its preparation to its final tabulation a success. The staff of the Directorate from the Chowkidar to the Office Superintendent who have undertaken even extra hours of work during the critical period ungrudgingly also deserve my sincere gratitude and appreciation. The dedicated band of temporary fixed pay staff who tabulated the voluminous data within a very short period without the slightest amount of neglect up to the last moments of their retrenchment knowing fullwell that from the next day they would no longer be in service, have also earned my deep gratitude. It is a pity that inspite of the best talents they have exhibited, we have not been able to absorb them due to other constraints. I am particularly indebted to Shri L. Kharpuria, Deputy Director of Census Operations, Shri M. T. Singh, Assistant Director of Census Operations, Shri K. S. Lyngdoh, Assistant Director of Census Operations, Shri L. R. Marak, Investigator, Shri H. A. Syiem, Investigator, Shri R. M. Kharmawphlang, Investigator, Shri S. Kharkongor, Cartographer, Shri K. C. Acharjee, Office Superintendent who have been a source of support and encouragement as Branch Officers during the trying moments of 1981 Census. Shri K. S. Lyngdoh, Assistant Director, Shri L. R. Marak, Invetsigator, Shri F. Kharkongor, Investigator, Shri L. R. Lyngdoh, Statistical Assistant,

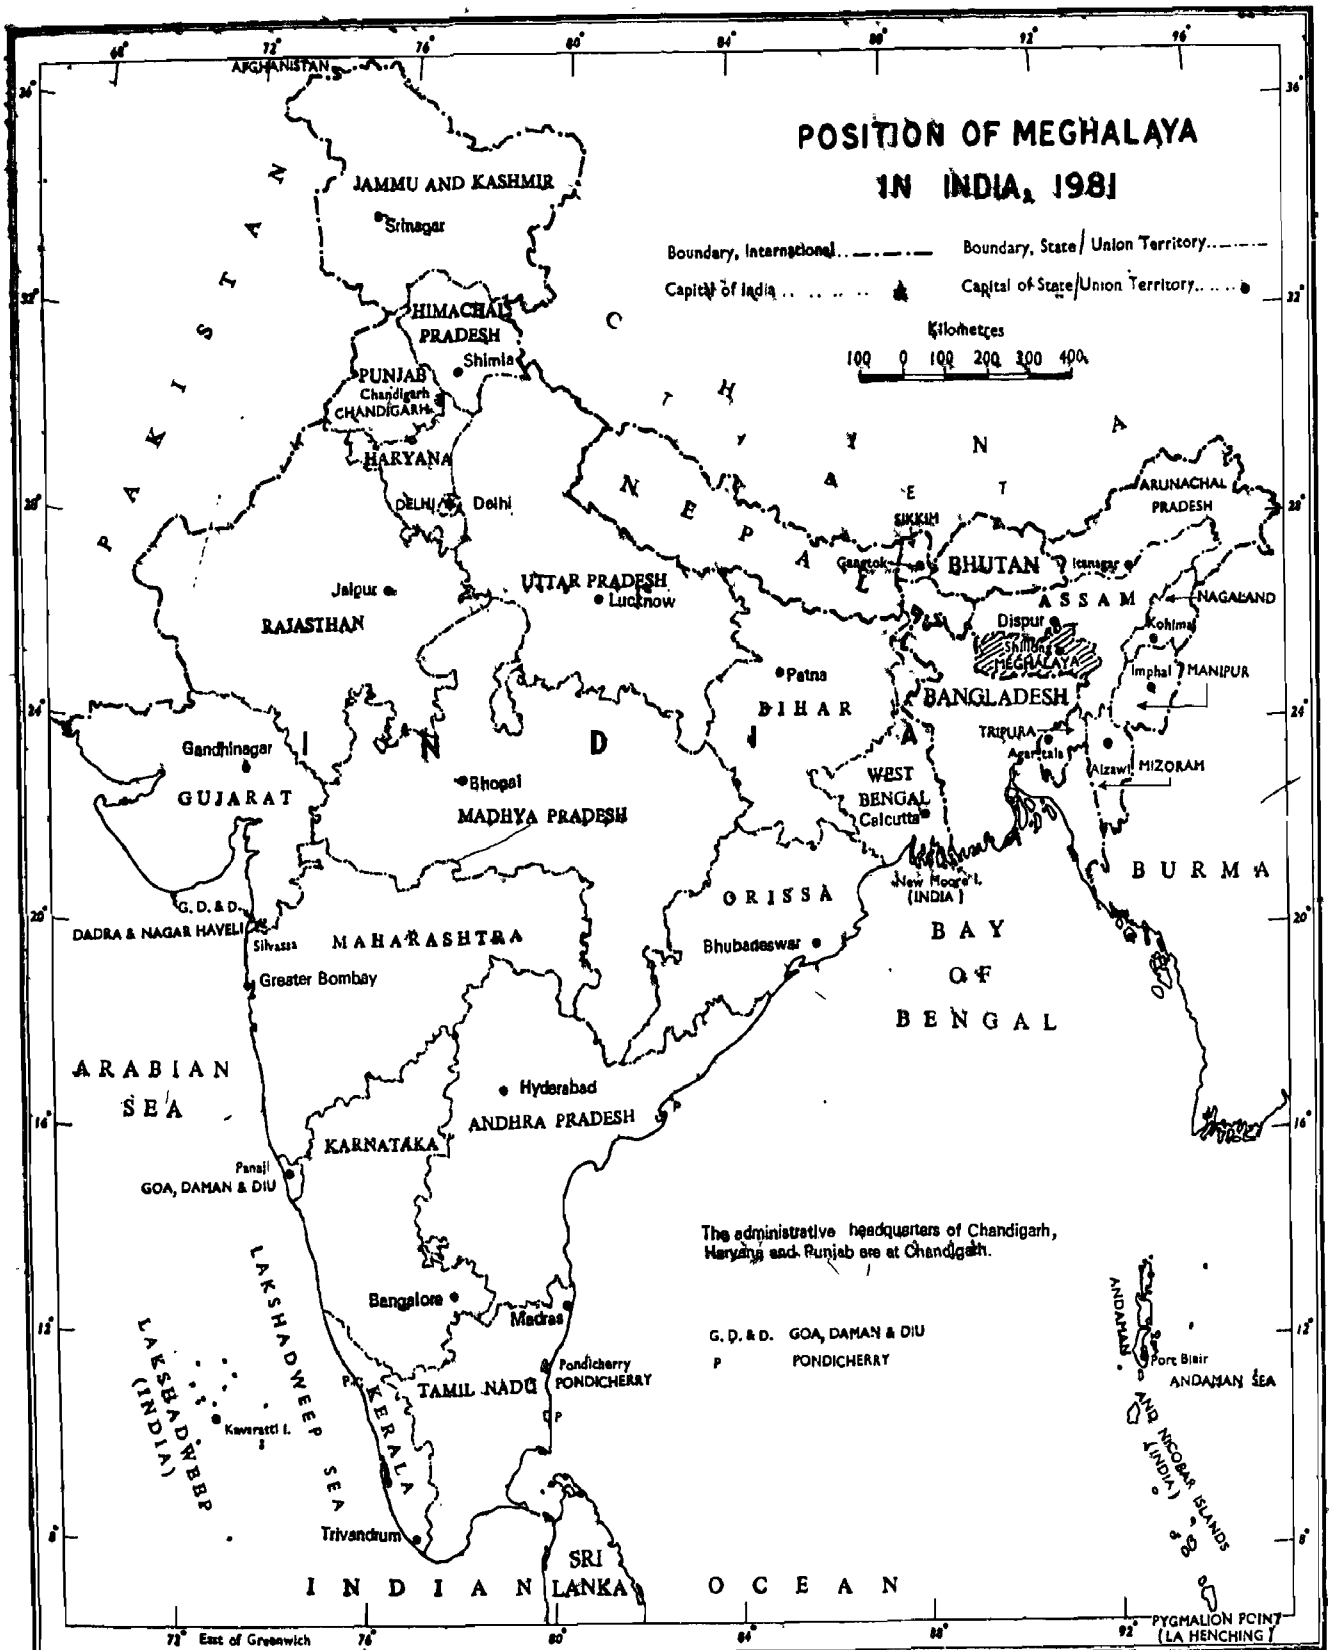

Shri Cleantone Sangma, Statistical Assistant also deserve my sincere appreciation of the unstinted grudging labour they put in to draft the District Census Handbooks. The staff of Map Section, Shri W. S. Roy, Artist, Shri A. K. Das, Artist, Shri Thangtlinga, Sr. Draughtsman, Sarvashri T. Bhattacharjee, P. Roy, R. Dutta under the able stewardship of Shri R. M. Kharmawphlang, who have carried out the difficult task of map drawing not only for the District Census Handbooks but also for other publications of 1981 Census have done a commendable job inspite of inherent difficulties. Particular mention must be made of Shri B. Marbaniang, Statistical Assistant, assited by Shri E. Momin, Helen Iawphiang, Joyce Kharpuri, Jenita Dkhar and Himani Sangma who have borne the burden of preparing the Town and Village Directories exclusively and have also assisted me in drafting the Jaintia Hills District Census Handbook. The mass of data for all the publications and the voluminous write-ups both in intelligible and unintelligible handwritings could not have been reduced into printed District Census Handbooks without the magic touch of the band of typists headed by Smti. L. Lyngdoh, Sr. Stenographer and Smti. N. Laloo, Jr. Stenographer. The quality of printing basically depends upon the accuracy of typing. In this they have done a tremendous job with utmost satisfaction. All of them deserve my deep appreciation.

The last but not least, I would like to record my deep gratitude to Shri P. Padmanabha, I.A.S., Registrar General, India who have been a friend, philosopher and guide to me personally and an unfailing source of inspiration and encouragement and a rare example of dynamic leadership to the vast census organisation in the country. The success of the Census for 1981 is a personal triumph to him. Whether it is morning or late at night, whether he was busy or relaxed, he has never lost his cool and has always been understanding, accommodating and appreciating. To this remarkable personality, I bow in gratitude. I am also deeply grateful to Shri V. P. Pandey, Deputy Registrar General, Shri K. K. Chakraborty, Deputy Registrar General (C&T), Shri N. Nag, Deputy Registrar General (Social Studies), Dr. B. K. Roy, Deputy Registrar General (Map Setcion), Dr. B. P. Mahapatra, Deputy Registrar General (Language) and to all the headquarter staff in the Registrar General's Office who have been a source of inspiration and guidance to me and to the census organisation in general.

Lastly, my thanks are due to the Government of Meghalaya and in particular to the Special Secretary, Printing and Stationery, the Director of Printing and Stationery and Superintendent of Government Press, Meghalaya, for undertaking printing of District Census Handbooks and bringing them out wtihin a reasonable time inspite of their heavy pre-occupations.

Dated, Shillong,
The 25th September, 1982.

J. TAYENG,
DIRECTOR OF CENSUS OPERATIONS,
MEGHALAYA.

CENSUS CONCEPTS

Rural and Urban Composition

The definitions of 'Urban area' which was adopted in 1971 was followed in 1981 also. Accordingly:—

(i) All places with a municipal corporation or a Municipality or a Town Committee or notified Town area Committee or a Cantonment Board.

(ii) All other places which has—

(a) A minimum population of 5000.

(b) At least 75% of male working population is non-agricultural.

(c) Density of population of at least 400 person per square Km. were treated as Urban areas.

Adopting the above definition of urban area the rural-urban composition of population in the State as of 1971 Census, there were six Towns namely (1) Shillong Municipality (2) Shillong Cantonment (3) Mawlai (4) Nongthymmai (5) Jowai (6) Tura.

In 1981, six more Towns were added to the 1971 list. They are (1) Madanrting (2) Pynthorumkhrah (3) Cherrapunjee (4) Nongstoin (5) Williamnagar and (6) Baghmara. It will be seen that, of the new Towns, Madanrting and Pynthorumkhrah (Pynthorbah and Nongkhardot) were rural components of standard urban Area of Shillong in 1971.

The rural-urban composition of population in the District is presented in Table I. The Rural-Urban dichotomy was recognised by Indian Census right from the beginning. There has been a change of concept of rural and urban since the Census of 1901, but it has not stood in the way of comparison from Census to Census, the eligibility test usually applied to identify a place as a town is governed by (1) Administration criteria and (2) Urban characteristics. The Administration criteria treats all places irrespective of population size served by local bodies such as (1) Municipal Corporation (2) Municipal Area (3) Town Area Committee (4) Notified Area and Cantonment Board as urban area, besides the above, the test of "Urban Characteristics" to be applied to any place is largely a matter of discretion vested with the District Census Officer.

Though Nongstoin and Williamnagar do not qualify to be treated as towns by strict application of the definition of urban area, they have been declared as towns because normally all district headquarters should be treated as towns. Baghmara has been treated as town because it is a notified town area and there is a statutory Town Committee.

CENSUS HOUSE AND HOUSEHOLD

Census House:—

A "Census House" according to the definition of 1981 Census followed that of the 1971 Census, is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, used or recognised as separate unit. It may be inhabited or vacant, it may be used for a residential or non-residential purpose or both.

If a building has a number of flats or blocks which are independent of one another having separate entrance of their own from the road or a common staircase or a common court-yard leading to a main gate, they will be considered as separate census houses. If within a large enclosed area there are separate buildings, then each such building will be one or more separate census houses. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate Census House.

Household:—

A "Household" in the Census definition is a group of person who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be one member household, two member households or multi-member households. For Census purposes each one of these type is regarded as a 'Household". Again, there may be a household of persons related by blood or household of unrelated persons; the latter are Boarding Houses, Hostels, Residential Hostels, Orphanages, Rescue Homes, Ashrams, etc. These are called "Institutional Households".

SCHEDULED TRIBES

They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible part of the Indian Union. Government of India has prepared a schedule of such tribes for the purpose of giving the facilities in education and employment so that they may come up to, the level of the other advanced people of India as soon as possible, Scheduled Tribes may belong to any religion.

The names of Tribes recognised as scheduled tribes in Meghalaya for the purpose of Census are given in the Scheduled Tribe list (Modification) order 1956 issued by the President of India. The dominant Tribe of this District are the khasis including War and Bhoi which are the sub-tribes of Khasi and Jaintia Scheduled Tribe.

SCHEDULED CASTES

They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to keep them rise to the level of other more advanced societies in India, the Government has made a schedule of such people, hence the name of Scheduled Castes. In percentage their number is negligible in this District.

LITERATES

A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but can not write is not a literate. However, persons falling within the age-group of 0-4 are excluded irrespective of the fact whether he or she is capable of reading, writing and understanding.

It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

WORKERS

Worker is defined as person who participate in any economically productive activity. Such participation may be physical or mental in nature.

Workers also include all those who have worked irrespective of their contribution to the economy. A worker is a person who is working as a cultivator, an agricultural labourer, at a household industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work. For the first time in 1981 Census workers have been differentiated into the main workers and marginal workers.

MAIN WORKERS

A main worker is a regular worker who had worked for 183 days or more, or in other words worked for six months or more. A person may have worked in different capacities during last year, *e. g.*, may have worked as a daily wage labourer for 4 months, as an agricultural labourer for 1 month and as a cultivator for 2 months. There could even be breaks in between the different types of works performed by him/her. Hence he has been classed as a main worker.

MARGINAL WORKERS

A Marginal worker is the person who had worked any time last year but felt short of 183 days or less than six months. A person who had participated in any economically productive work but whose main activity is a household duties, or a student or dependent or retired and pensioners, etc., is a marginal workers.

NON-WORKERS

A Non-worker is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a rentier who earn some income as their source of livelihood if they do not do any work are classified as non-workers. A man or woman who is engaged primarily in household duties such as cooking or a boy or girl who is primarily a student even if such person helps in the family's economic activity, if he or she is not a full time worker was treated as a non-worker for the purpose of the Census.

HISTORY OF THE DISTRICT AND THE DISTRICT CENSUS HANDBOOK

Prior to the re-organisation, the Census data of the Shillong subdivision down to the village level were first published in the form of Census Handbook of United Khasi and Jaintia Hills District of which the present East Khasi Hills was under Shillong subdivision. The first District Census Handbook of erstwhile United Khasi and Jaintia Hills District showing Shillong Subdivision and Jowai Subdivision respectively were published in 1951, combined with the Primary Census Abstract in relation to every village and Town with the additional information of a level of development of these Towns and villages.

East Khasi Hills district become a district only in 1976, with its Headquarters at Shillong. The district has 9 Community Development Blocks and 7 Towns. Therefore, in this handbook the data are presented Community Development Block-wise upto the village level and for towns upto block level. The villages are serially arranged in the Directory of each Community Development Block, an alphabetical list of villages with their location Code number is given at the beginning. At the end of the village Directory of all the Community Development Block an appendix- is given to show the sum total of different amenities available in the villages in each Community Development Block for the different amenities *e.g.*, Schools, Primary Health Centre, Post Office, Power Supply etc., available in the village and the number of villages having such amenities in each Community Development Block.

There are altogether 1180 inhabited villages and 7 Towns in East Khasi Hills district. Of the existing towns *viz.*, Shillong Municipality, Shillong Cantonment, Nongthymmai and Mawlai formed the Shillong Agglomeration in 1971. Two more new towns *viz.*, Madanrting and Pynthorumkhrah were added to form the Shillong Urban Agglomeration in 1981. Madanrting and Pynthorumkhrah as such were rural components of Shillong standard urban Area in 1971, Cherrapunjee was declared a town for the first time in 1981.

Most of the villages are small hamlets and tribal habitations which are known as such by their local names. It is very difficult to find out correct spellings of the villages. Moreover, the village names go on changing from time to time in some areas. As a result, there may be some differences in the spellings of villages as shown in the District Census Handbook of 1971 and 1981 Census. However, efforts have been made to adjust the same as far as possible at the time of compilation.

The District Census Handbook of 1951, 1961, 1971 and 1981 differed from each other by the types of Census Statistics inherent in the Primary Census Abstract and design and coverage of additional non-census information.

In 1951, the Census Statistics obtained in the Primary Census Abstract related to the names of each and every villages showing distribution of population by livelihood, classes, number of occupied houses and small Scale Industries in villages and wards, supplemented by other informations for the displaced persons, their age and literacy, economic activities, languages and the migration tables by district of origin in Pakistan and date of arrival in India.

The 1961 District Census Handbook, unlike the 1951 DCH was made to cover Village-wise and Town-wise information on the availability of different types of amenities such as educational facilities, supply of drinking water, supply of electricity, etc., which were shown by means of abbreviations placed against the names of each village in the PCA itself.

In 1971, the Census Statistic of the Primary Census Abstract and other non-census Statistics were combined together with an enlarged content. It was divided into three parts with a view to facilitate early publication. Part A of the District Census Handbook contained a village and Town Directory, Part B contained Primary Census data and Part C contained Analytical Report, Administrative Statistics and District Census Tables. The 1981 District Census Handbook also follows the pattern of 1971 District Census Handbook and is supplemented by informations for Scheduled Castes and Tribes. It was expected that this would serve as a convenient reference book to solve the emergence needs of the data users of different fields as the majority population in this State belongs to Scheduled Tribes. The main changes in the Village Directory Scheduled of 1971 and 1981 Census from that of 1961 are, inclusion of information about the availability of a few additional amenities like existence of Katcha/Pucca roads, distance from nearest Town, types of educational institutions and land use data.

Unlike the 1971 Census this time all those villages where the amenities are not available the informations are given by a dash (—) except power supply which is given by the distance in bread ranges **viz.**, –5 Kms; 5—10 Kms and 10+ Kms wherever the facility is available.

As in previous Censuses, in 1981 also economic questions were canvassed. People were classified as Workers and Non-Workers. Worker have been divided into four broad Categories in 1981 (i.e. C/AL/HHI/OW), whereas in 1971 Workers were divided into Nine categories. In 1981 all the Categories of workers of 1971 have been covered under 'Other workers' which are (a) Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities; (b) Mining and quarrying, (c) Manufacturing, Processing Servicing and Repairs carried out otherwise than as Household Industries; (d) Construction; (e) Trade and Commerce; (f) Transport, Storage and Communications and (g) Other Services.

In 1971, the Unit below the district level for Census taking was not a uniform one. In Garo Hills, the Mauzas were treated as the unit below the district level while in the United Khasi and Jaintia Hills district the Police Station areas were taken as the unit below the district level. When the administrative boundaries were re-organised in the State, the utility of the Census data generated in 1971 was greatly reduced because separate detailed Census data for each Police Station, Community Development Block and administrative unit, subdivision and districts could not be generated easily. In order to meet the demands for basic data for developmental planning it was decided in 1981 Census that the data should be collected on the basic of the Community Development Blocks, as it was felt that the Community Development Blocks were the smallest unit for area planning and development.

Jurisdictional Changes :—

In the 1971 Census Meghalaya was divided into two districts, *viz.*,the United Khasi and Jaintia Hills District and Garo Hills district and the data were presented for these two districts. In 1972 with the attainment of a full fledged statehood, the erstwhile Jowai subdivision of the United Khasi and Jaintia Hills district was upgraded to a district known as the Jaintia Hills district with its headquarter at Jowai. In 1976, the Government of Meghalaya vide Notification No.HPL/399/75-140, dated 9th October, 1976 divided two districts of Khasi Hills and Garo Hills into two districts each namely East Khasi Hills district with its headquarters at Shillong, West Khasi Hills district with its headquarters at Nongstoin, East Garo Hills district with its headquarters at Williamnagar and West Garo Hills district with its headquarters at Tura. This was followed by another notification No.HPL.49/76/171, dated 12th October, 1976 notifying the areas and boundaries of the new districts of East Khasi Hills and West Khasi Hills. The notification runs as follows:—"Whereas, for public convenience and better administration, the Governor of Meghalaya considers it necessary to form a new District with its headquarters at Nongstoin to be known as West Khasi Hills District" comprising of the area of the existing Nongstoin subdivision, Nongspung Syiemship, Sohiong Lyngdohship and Nongkhlaw Syiemship (other than the areas forming part of the present Ri-Bhoi Administrative unit and the villages of Laitkynsew and Sohrarim forming part of Sohra Administrative unit) by excluding the same from the present Khasi Hills District which District, with the exclusion of the area and villages aforesaid, shall, on the formation of the said West Khasi Hills District, form into a separate District to be known as "East Khasi Hills District" with its headquarters at Shillong.

Physical Feature :

East Khasi Hills District occupies a land surface of about 5,196 Sq. Km. It is bounded on the north and north east by the District of Kamrup and Nowgong and Karbi Anglong District of Assam, on the east by the District of Jaintia Hills, on the south by Bangladesh and on the west by the District of West Khasi Hills. Geographically, the District may be divided into three parts. They are (1). War Area which is in the southern part of the District. It is so called because the Hills and ranges in this part falls abruptly to the elevation of 150 metres or so to the plains of Bangladesh. Looking from the plains of Bangladesh the Hills and ranges look like a massive wall rising from the plains towards the north. The people living in this area are called War. (2) Middle or central part where the ranges of the district run parallel from east to west. This area occupies the highest part of the State and Shillong Peak with a height of 1965 metres or 6445 feet sits in this areas. (3). Ri-Bhoi Area which lies north of the District. It consists of a series of Hills running from the central or middle part of the District which slope down slowly and gently till they reach the plains of Kamrup and Nowgong (Assam).

The Shillong plateau named after the highest peak of the area *viz.*, Shillong peak is situated slightly on the eastern portion of the State, where the capital city of Shillong is situated. Towards the east the plateau extends across the gorges of the Umngot river to continue into the highland of Jaintia Hills District and nearing the eastern west border of the State whence coming down to the elevation of 900-600 metres ending in the gorges of Kupli river and forming the eastern most boundary of the State. Towards the north, the plateau gradually slopes towards Brahmaputra valley through to grassy downs of the elevation between 900 and 1300 metres to descend into the sub-mountain region elevation 300-600 metres with small patches of areas in the level valleys of the rivers Khri and Umtrew which form the valley of below 300 metre-elevation. Towards the south the plateau extends almost to the edge of the cliffs overlooking Bangladesh forming the elevation of 900 metres and suddenly dropping from that elevation to 150 metres below.

The Shillong plateau form the watershed of all the principal rivers of the district. The rivers drain their water either to the Brahmaputra river or Surma river in Bangladesh. The Umkhen river rising from the north of Shillong peak flows northward and from the boundary between the district and that of Karbi Anglong district (Assam). The Umiam river rises from the range west of Shillong peak. It flows pass through Ri-Bhoi and turns north-west through the deep gorge until it reaches and joints the Umsiang river. The water of this river dammed at a place about 20 Km. from Shillong called the Umiam Hydel Project. The former Shillong-Gauhati Road is submerged by the dam and new road run over the main dam of the Project. The Umiam reservoir forms a natural basin of the ranges of hills and the outlet of the river from the basin is shut off by the dam. With the backdrop of hill around it, the pine trees rising from the arm of the dam, the Umiam lake presents a scenery of natural beauty that is unrivalled. The water of the Umiam river are hereafter drained, away through a tunnel to fall into the streams forming the tributaries of the Umtrew river. The Umtrew river rises from the western face of the Sohpetbneng range near Lum Raitong and flows in the western direction till it meets the waters from the Umiam river further being diverted by the Umiam Hydle Project. It then turns north-west and emerges at Burnihat where the Shillong-Gauhati road crosses this river. The combined waters (rivers) of the Umiam and Umtrew are being used stage by stage to form a continuous power potential hydel schemes till it reaches the plains.

Another important river known as the Umiam-Mawphlang rises on the southern slopes of the Shillong peak near a village called Pamlakrai. It is crossed by the Shillong-Cherra road on an iron bridge at Umtyngngar. Thereafter it emerges into the ravines on the eastern side of the Mawphlang ridge. Near the plains the river passes near the village of Shella and falls into the Surma west of Chatak. Near Mawphlang the waters of this river is being dammed to be tapped for the greater Shillong water supply scheme. The Umngot river rises from the eastern part of the Shillong peak near a village called Smit, easterly direction, suddenly turns towards the south where it forms the boundary between East Khasi Hills district and Jaintia Hills district emerges through the gorge at Shnongpdeng, continues in its less turbulent form to flow by the fine gorge near Dawki and enters into the plains of Bangladesh. In Dawki this river is crossed by a motor way suspension bridge on the Shillong-Dawki road (erstwhile Shillong-Sylhet road).

Major Characteristics of the district in relation to the economic resources:—

The district is rich in vegetation which ranges from tropical to temperate. Dense jungles clothe the higher summits which abound in wild life. Many good jungles have been felled by the mercyless hand of man for the purpose of jhum or the slash and burn method of cultivation which is largely prevalent in the State. Besides the valuable timber tree, medicinal plants, hard and soft wood of various types are found. Sal and teak are the most important forest products. The Khasi pine (pinus insularis or pinus Khasiya) is well known and grown abundantly in this District. Pine grows well in the elevation of 3000 to 5000 feet and as a rule it does not grow below 2,400 feet or above 6000 feet. Chestnut trees, oaks, fir, etc., are also found. Grasslands with little undergrowth are found in places where jungle has been cut down.

Among the animals found close to human inhabitation, mentioned may be made of elephants, apes and monkeys, deers and sambar. The wild life in the jungle comprises the tigers, leopards, wild pigs, wild buffaloes, bears, etc., and varies to squirrels, bamboo rats, pangolins, antilopes and others. Birds break the silence of the jungle, Pheasants, jungle fowls, wood cocks, quails, spot bulls, peacock, partridges, pigeons, horn bills, mynas and parrots, etc.. dominate the jungles.

East Khasi Hills is rich in mineral deposits. The location of limestone near Cherrapunjee has set up a cement factory at Mawmluh. The limestone belt is simmering from Langrin-*via*-Theria ghat, Shella and Mawsyram, Coal deposits are located at Mawsynram, Shella, Mawlong, Cherra, Laitryngew and Pynursla. Copper has been discovered in the bed of the Sohryngkew river, below Mawsmai. Excavation copper was also undertaken at Laitiam near Cherrapunjee. Uranium has been suspected to exist at a place near Ranikor and exploration is in progress. Gold exists near Mawphlang but excavation is difficult and costly.

The rivers of the District provide a source of electricity and power. One such project known as the Umiam Hydel Project is situated about 20 Km. from Shillong on the river Umiam. Another project known as the Umtrew Hydel Project is formed by the combined water of the Umiam and Umtrew rivers. The Hydro-electric power which is located on the Bishop's falls in the suburb of Shillong caters to the needs of Shillong. It was previously owned by a private company and is now taken over by the Meghalaya State Electricity Board,

Agriculture is the main economy of the people of the District. Potato is the main crop and the slopes of the hills are decorated with potato plantation. Paddy is also an important product and is grown both dry and wet. The valleys offer a good place for wet paddy cultivation while the slopes of the hills are used for dry paddy cultivation. Besides these other cash crops like vegetables, maize, fruits, tapioca, pan (bettlenut) and pan leaf, turmeric, pepper, ginger etc., are also grown.

The people of the hills are closely attached to the land and the rearing of domestic animals as well. The agro-climatic conditions of the district is conducive to livestock rearing which can be increased manifold, through scientific approach. The Indo-Danish Project Cattle Breeding Farm at Upper Shillong and Regional cross breed cattle breeding farm at Kyrdem Kulai are experimental farms and need to be intensified. Regarding Poultry development, the Government Poultry breeding farms and the Central Hatching and Chicken rearing farms at Umsning, Kyrdem Kulai and Mawryngkneng are prospective.

In common with other eastern States, the District comprises a population having fish as a regular diet. With a view to improve the economic condition of the people a scheme has been drawn up to encourage the public to popularise piscicultural activities in the district level. The Research Centre at Mawpun and Umktieh have been set up to adopt new methods of improvement and the private piscicultists are provided with modern technical know-how of piscicultural, and seedlings are also provided at a subsidied rate.

At present there are only one major and one medium industries in the district, *e.g.*, the Cement Factory at Cherrapunjee and The Meter Factory at Shillong. Recently a HMT watch factory has been set up at Shillong. Increasing outlay has been proposed for the large and medium industries sector with a view to taking step for setting up a few new industrial units.

The development of communications is necessary from the point of view of creation of infrastructure for an effective public distribution system for trade and commerce. The total length of road upto March 1981 was 4647 K. m. including 1721 K. m. of surface road possible only in none monsoon period. The transportation by 'headloads' was primative and construction of Motorable roads has been found to be of immense help to the people to dispose of their product and their goods. In the absents of communications there is no one to lift the goods alternative markets in the rest of district. It is found that with the opening of a few vital roads alternative markets were found almost in the rural areas of the distrtct.

5 (V) Land Tenure System, East Khasi Hills.

In this District and the State as a whole the land largely belongs to the people and not to the State.

The land system as it was originally laid down by the fore-fathers who, in their foresight, had divided the land into (1) Ri Kur and (2) Ri Raid. 'Ri Kur' is the sole ownership of the land whereas Ri Raid belong to the "Community". The Presence of these two types of land Tenure System, ensure both private and collective rights over the land and to provide land for every citizen according to his needs. In course of time the Raid land by means of 'Ri Dakhol' and other similar means becomes the Ri Kynti land. This has lead to an innovation of issuing pattas and obtaining a sort of revenue by these land owners who

have acquired vast lands much more to their needs and reduced the portion of Raid land. "Ri Kynti lands are lands set apart from time of the founding of the elaka for certain class upon whom were bestowed the proprietor, heritable and transferable rights over such lands. They also include any part of the Raid lands which at late times were bestowed upon a person or a family or class for certain yeoman's service rendered to the elaka".

Ri-Dakhol

Is land over which a person has obtained Ri Kynti rights by (1) Right of occupation and making permanent improvement there on (2) by rights of purchase or winning a court case.

The amount of Rs. 12.00 lakhs have been provided for the cadastral survey during 1981-82 for undertaking traverse survey for the records of rights.

The figures for land use pattern were not collected during 1971 census. Efforts have been made their time. The figures collected are not satisfactory and will not serve the purpose. Therefore the idea has been left out.

Report of the Land reform commission Page 17 & 23.

Ri Kynti land is broadly divided into two categories (1) ancestral and (2) self-acquired. "The Durbar Kur" as (clan-durbar) has control over the farmer, the person acquiring the latter has full control over it. But the latter becomes ancestral when it passes to the children of one who acquires it.

"The suggestion that land revenue should not be demanded by the Ri Kynti owners when they dispose of their land by sale to a Khasi as it does not have the sanction of custom, though a patta might be issued to testify the right of the purchaser is self contradictory because a patta also is a new thing which came along to as an infringement of the rights of a Khasi once the land which is his own by virtue of purchase. So far as the patta is concerned the commission feel that a sale deed duly executed and registered and certified copies of relevant entries from the records of rights may be sufficient testimony to replace it (patta). Every change of ownership be it Raid land or Ri Kynti has to be registered under the law. The parties who fail to do so shall take their own risk".

The District and the State as a whole has not been cadastrally surveyed. This is due to the fact that any radical change in the custom any land tenure system may invoke advance public reaction.

However, during the manual plan—1982—83 the State Government created (1) a land tenure research cell a provision of Rs. 1.20 lakhs was provided for the scheme. (2) Land Reforms and Land Records to the District Council under the Scheme of cadastral survey and enforcement branch. The District council proposed to take up settlement survey, uclamoition of fishery area and low lying areas and also completion of non-cadastral survey area (3) Cadastral survey under the Director of land Record and Survey, Meghalaya.

MAJOR SOCIAL AND CULTURAL EVENTS OF EAST KHASI HILLS DISTRICT

Khasi society has greatly been transformed by many things which have taken place in recent times although it is more evolutionary. It started with the entry of the British and annexation of the Khasi Hills in 1833.

Adoptation to the western life was quickly made although the matrilineal laws of inhabitance and succession and the other culture traits were retained. Archery still ranks as a community game. Khasi music songs and Dances (Shad Suk Mynsiem/Shad Weiking) are still held. Substantial gains reaped from modernity, however are perceptible in the field of Literature, administration and government service.

Social change is more phenomenal among the Khasis than their neighbouring and farflung tribes. They were the first to come into regular contact with the British Government. The change has made its impact in various spheres of social and cultural life of the people. This is due to the exposure of the society to Contact from out side. While the change was innovative in certain respects, it had killed some of the ancient incentives and industries. For instance, with the coming of the British administration, Iron-melting on which thousands of families gained their livelihood received a death-blow, and with it were gone the skills and large out-turn in goods and implements of various kinds. The loss, however, has partially been compensated by the gains from the plantation of fruits, potato and vegetables. Weaving has diminished in many places. The other ancient enterprises such as gold washing, excavation of copper, silver and precious metals went to extinction. Similarly the value of local ceramics, wood and bamboo, arts and crafts, furniture has diminished with the coming in of cooking utensils, vessels, cups, mugs jugs, trays, as well as umbrella, carpets, dressing table, curtains and modern luxuries. The traditional pattern however survive. Elsewhere we find people using a Knup, a rain proof cover (made from cane and leaf) traditional head dress is no longer prevalent. For instance a majority of the people now prefer modern combs to indigencus ones of cane. Similarly the preference to modern textile goods and fabrics has resulted in the decrease of weaving works and use of indigenous patterns of dress.

In respect of dress, a skirt is used for women called (Jympien) which either a cotton or endi type over which an apron (Kyrshah) is suspended from the left shoulder and loops down to the legs. In outdoor use, however a (Jainsem) is applied suspended from over both the shoulders and looping down below the knee. A head cover is a (Tapmohkhlieh) the upper ends of which keeps the head enfolds and the two are fastened behind the neck aad from the neek it loops down to cover the upper part of the body. A mantle is draped from over the shoulders, its two ends being tightened at the chest. It covers the lower end of the (Tapmoh) and hangs down to the knee.

Among men's dress a sleeveless coat was worn until the close of the last century, a cotton cloth of thick texture having a fringe below. A waist girdle of cotton was worn beneath. Over the sleeveless coat (Jymphong) a wrapper (silker endi) was suspended. Later on a dhoti (silk or cotton) replaced the waist girdle. A triangular cap and a wollen head gear were worn.

But we find considerable change in respect of dress. Females still retain their traditional mode of dress but the use of the original materials has declined, Synthetic materials such as Silk, Cotton Nylon, etc., are used for their dress. Males in large numbers have abandoned their traditional dress and have adopted modern dress altogether. Only on festivals or dances we see dancers and priests put on their expensive costume and ornaments in their very originality.

Dances:—Dances are held at an open ground or premises of "iing sad" and public places. There are 2 (two) traditional dances of the Khasis:—*viz.*

(1) Shad Sukmynsiem or Weiking dance and

(2) Shad Nongkrem or Pomblang Nongkrem.

(1) The Shad Sukmynsiem is popularly known as Shad Weiking. It is so called after the name of the ground where the dance used to be held every year. There is no fixed date for this dance. It use to be held during the month of April of each year. This is the most popular dance among the Khasis. It is organised by the Seng Khasi (Khasi Religion). The dance last for 3 (Three) days. Only unmaried men and women are allowed to take part in this dance. Youngsters and dams from different parts of Khasi Hills participate in the dance. The Shad Sukmynsiem or Weiking welcomes the whole of the Khasi community to take part in the dance. There was no bar for a

one to take part in the dance since it is the traditional dance of the Khasis. Christians or Hindus as long as they belong to Khasi community could take part in the dance. The dancers dance rhythmatically making regular movements and keeping time with the beat of the drum and pipe (Tangmuri). Daniels (unmarried) dressed colourfully in their very originality and making tiny steps in the centre while men folks with swords and sometimes with shields in their hands encircling them.

Pomblang Nongkrem/Nongkrem dance

(2) Another folk dance of the Khasi is Shad Nongkrem. It is associated with Ka Pomblang Nongkrem. Like all other ceremonies of the Meghalayans it is performed to propitiate the all powerful **Goddess Ka Blei Synshar** for a rich bounteous harvest and prosperity of the people (subject). There is no fix date for this festival. It is generally celebrated in November of every year.

The Syiem of Khyrim accompanied by the high priest performs the Pomblang ceremony. He offers obletion to a Lei Shyllong (**Shyllong God**). The God of Shyllong Peak by sacrificing a Cock. Goats are killed during the ceremony.

The Nongkrem dance is associated with the Pomblang Nongkrem. When the ceremony has been performed by the Syiem and the high Priest the Nongkrem dance starts. At dawn-break on that day a maiden dance is held in which virgins from the Syiem house took part and the Syiem Sad shaded by an Umbrella dance with great solemnity.

This is called an opening dance or Royal dance which is generally done by the Syiem before the dance starts. When the Royal dance is finished, youngsters and damsels of the Khyrim Syiemship enters the field and the dance of U Khun U Raiot (Subjects) of the Hima Khyrim (Khyrim Syiemship) starts. The dance last for 3 (Three) days, the last day or the third day is the biggest of all. Unmarried males and females from the four Corners of the Khyrim Syiemship take part in the dance.

The original sports comprised of high jump, long jump, sword throw and archery. Archery is the only surviving game and a shooting match is always organised between parties. It is now being used as a lottery betting on the number of arrows which hit the target, This lottery on archery is now legalised by the State Government. Hunting and fishing are the seasonal sports which engage people as recreational activities. Fishing with reels and the line has become popular. At the Umiam Damsite, fishing competitions are held every year, Prizes are awarded to the best angler.

Brief Description of Places of Religious, Historicals or Archaeological Important

The district as a whole has few places of religious, histpricals or Archaeological interest.

(a) Religious Places

With the coming and spread of Christianity the original Khasi religion and places of religious rites have almost disappeared.

Among the religious places that still survived in the district is the Iing Sad at Smit, the state headquarters of the Khyrim Syiemship. It is one of the lively religious places which is associated with the religious ceremony of the people known as Pomblang Nongkrem or Nongkrem dance. The ceremony consists of goat sacrifices accompained by prayers, the beating of drums and dancing by both sexes of young and old with their attractive traditional dress. This ceremony is celebrated every year and thousands of visitors all over the State, and even from outside come annually to witness the ceremony.

Another important religious places is at Cherrapunjee (SOHRA) town about 56 kms. from Shillong the district headquarter. In the locality called Saitsohpen lays the cremation ground of the Raja of Sohra (Syiem of Cherrapunjee). It is associated with the cremative ceremony performed by the Syiem's successors as an obligatory duty to their deceased Syiem. The pyre is constructed and decorated by the selected skilful masonry men to burn the body of the deceased Syiem.

The ceremony was abondoned for the last three decades due to lack of fund for the huge expenditures to be incurred by the one who would ascend the throne of the deceased King or Syiem. Till now not one could be elected as the Syiem and the present one is the acting Syiem only.

The discovery of another place at Mawsynram about 60 Kms. from the district headquarter known as 'Mawjymbuin' at a cave enhanced the village as another important place of religious interest. This Mawjymbuin is much alike to a woman's breast. From the nipple water keep dropping like milk as feed another baby stone which stands perpendicular three feet from the ground. The Hindus from all over the State come to offer puja every time to pay homage to the creative structure, but to the visitors and tourists this stone is known as the stalacite which is a nature's creative genius.

Another place of religious interest is at Mylliem village where the bones of the death are kept. This place is known as 'Mawbuhshyieng' (where bones of the deads are kept). The place was built of stone menhirs or table stones which is called Memorial stone and the place is kept as sacred or a religious place of the next of kins of the clans. The biggest of the stones belongs to the seven clans of the Kharkongor.

PLACES OF TOURIST INTEREST

There are several places of tourist interest in the district.

Because of the striping similarity between the natural scenery of the upland of the district and those of the Scottish highlands of Scotland, Shillong and its neighbourhood has been called the 'Scotland of the East' and Queen of the hill Stations. To the new-comers Shillong presents a happy pictures of cliffs and ravines, brooks and rivulets, lakes and waterfalls, Parks and fields which mixed with the wild, pragranees of mountain pines and orchids, make one's visit to the district an altogether refreshing and diverting experience.

As the Capital of Meghalaya and an outstanding hill-station of the State, Shillong located at an altitude of 4908 feet above the sea level, is connected with Gauhati by a beautiful all weather motorable road 102 Km in distance. The three hours drive from Gauhati over the road which ascend in numerous bends and curves passing over the high cliffs and deep gorges and through pine forests makes one drives past one of the great Umiam Hydel Project which is 19 Kms from Shillong. It is the biggest artificial lake in the State which generates electricity all over the district and also to other districts of the State. The lake as a whole presents the picnic spot and the fishing ground of the people of Shillong and its neighbourhood in all seasons of the year.

In the further side of the lake stands the Diengiei hill. Khasi legend has it that a tree once grew on the summit of this hill which over-shadowed the whole world. The people tried to fell the tree in order to let the sun in, but during the night the branches always grew again in the place where it had been cut in the day. After a time the people discovered that every night a tiger came and licked the wounded part of the tree and that this caused the wood to grow again with marvellous rapidity. The people accordingly tied their daos and axes upwards round the place and by doing so it cut the tiger's tongue and hence the work was successfully completed and the sun kept shining again. On the further North of the lake stands the "Lum Sohpet Bneng". Through this hill heaven and earth were in those days very close together. Heaven was joined by an unblical level to the nature of the earth. When the tree was felled the cord broke and the two worlds drifted apart from each another.

In the centre of the town itself lies the most beautiful lake which is located behind the Shillong Club and infront of the Pine Wood Hotel. The lake was named after the name of Sir William Ward in the year 1893-94, the then the Chief Commissioner of Assam. To the local people it is known as 'Nan Polok' meaning Polck's Lake. It was so called because Mr. Pollock was the then executive engineer who executed this construction work to beautify the town. The lake itself is surrounded by beautiful flowers of different kinds of pine trees and the most rare yellow bamboo. The lake has many varieties of fishes big and small. There are also boating facilities for young and old. At a little distance there is the Lady Hydari Parks named after the name of the wife of Sir Akbar Hydari the first Governor of Assam. A Mini Zoo with a good collection of animals and birds is also placed in the park.

At the other end of the town is the race-course called Polo-ground, and the notable Golf-field and its 18 holes course. The Golf-links of Shillong are believed to be one of the best in the country. Within walking distance from the town there are several waterfalls, chief among which are the Bishops fall, Beadons fall, Spread eagle fall and Crinoline fall where there is, in addition an open air swimming pool. Shillong Peak with a height of 1965 metres of 6445 feet is the highest hill in the district as well as in the State. The peak is the watershed of the three major rivers *viz.*, the Umiam-Mawphlang river, Umngot river and Myngkhen river. From the peak itself one can have a panoramic view of the wide expanses of the Khasi table land and the faint snow-lines of the distant Himalaya.

There are several villages and town which is worth visiting in the neighbourhood of the district. The road to Cherrapunjee (Sohra) town with a pleasant drive of 56 Kms. which runs through charming scenery, grassy meadows and wood of oaks with deep ravines on both side of the road is an ideal place of famous waterfalls. The famous and beautiful waterfalls like 'Nohsngithiang, Kynrem falls, Dain Thlen and Noh-ka-li-kai' with a tale behind them invited tourists and visitors from all over the country and outside to see the gigantic falls of Cherrapunjee (Sohra). Numerous caves which is approachable by road are (a) Rawlem syiem or Mawsmai cave which is about 5 Kms. west of Mawsmai and Mawkhyrdop or Dam uni cave near Mawmluh at the place where Cherra-Mawmluh cement factory is located. Inside the caves one may find many beautiful stone formations including stalactite and stalagmite.

Driving back to Shillong on the submit of 'U Lum Shillong' there is another famous Marai cave with a legend behind of the famous deity of the Lei Shillong meaning (Shillong god). The origin of the Shillong Syiemship known as Khyrim and Mylliem Syiemships is said to be originated from this cave. In a remote past there was a girl in this cave. She was believed to be the daughter of the deity and many people tried to capture her but failed. At last there was a man named Iati Mylliemngap who captured her by enticing her with a beautiful flower and hence she was named as "Ka Pah Syntiew" (enticed by flower). She was so beautiful that Iati Mylliemngap fell in love with her and married her. Since that time the clan representatives of the Shillong state recognised her prageny as the legal heir of the royal (chief) family. The legend has it that she went back to the cave and she returned no more.

Ancient Monuments

The first object which strikes the eye of the tourists and visitors to the district is the large number of Monoliths, table stones and cromlechs that are seen in most of the villages. Generally, the stones were erected in memory of an important event or a person whose deeds deserved remembrance. There are also some villages which took the name of a stone or "Maw". For example, "Mawmluh" meaning salt stone (the eating of salt off the back of a sword being one of the Khasi forms of oath), 'Mawsmai' the oath-stone, 'Mawphlang' the grassy stone and many others.

To commemorate with a stone of an important event has been a custom amongst many people in many places, and the creation of grave-stones to mark the spot where the remains of the death are buried, is an almost universal practice of the Khasi. The Khasi stones are cenotaphs.

"Mawbynna" the great monoliths are to be found in many places of the district. These stones were erected in one line which always consists of an uneven number of stones. Three is the commonest number of menhirs, but five together are frequently to be found; but there are some instances of seven stones. At Laitkor nine stones are standing in which the tallest stone is usually in the middle. At Nongkrem there is a centre stone with a regularly carved top evidently intended to represent the head of a man. At Umstow some 4 Kms from Cherrapunjee, stood two rows of five monoliths each row of five in number standing on either side of the old bridle road. The centre stone or "Mawkni" was surmounted by a carved stone shaped like a hat, but having a rim with indented edges, the intention being evidently to represent a crown. This crown stone was riveted at the top of a large centre stone. All the stones including the 'Mawkynthei' or dolmen, have been very neatly hewn. In front of the line is a large flat table stone resting on stone supports, the top of the upper most plane being some 2 to 2½ feet from the ground. The largest table-stone is found at Laitlyngkot. The Laitlyngkot stone measures 28½ by 13½ feet. These memorial stones are usually situated alongside of the roads to attract the attention of passers by.

The Mawbuhshyieng (where bones of the deaths are kept) is another memorial stone. The Mawbuh-shyieng at Mylliem is situated in proximity to the Menhirs. These stone cromlechs contain the bones of the dead, where the clans depositing the bones of the deceased ancestors. This kind of Menhirs, or table stones can be found almost every where in the district.

'Kor' or the retiring stones which were erected by the Syiem or Raja are another memorial stones which are scattered here and there in the district. These Kor are meant for people to take rest who come walking from far away places to the market place. These 'Kor' are found abundantly in Cherrapunjee (Sohra) along the roadside.

ANALYSIS OF TABLES

TABLE - 1

In this table the district is distributed into its constituents Community Development Blocks and towns. There are 9 Community Development Blocks and 7 towns in the district. The number of villages and towns are shown against each Community Development Blocks. Bhoi area has the large number of villages followed by Nongpoh. There are 1180 inhabited villages in the district and the average population size of the villages is 28 persons.

Mylliem Community Development Block contains all the 6 towns of the Shillong urban Agglomeration. The population of Mylliem Community Development Block is divided into rural and urban. The rural area shows a population of 55,089 and the urban areas a population of 1,74,703. The rural area covers about 25 per cent of the population and the towns about 75 per cent. Shella Bhologanj Community Development Block has one town *viz.*, Cherrapunjee and the population is divided into rural and urban. The rural areas shows a population of 30,452 and the urban shows a population of 6,097.

TABLE 2

Decadal Change in Distribution of Population

Distribution of Villages by Population

This table shows the comparative position of small and bigger villages of each range of population. The statement shows that the number of villages below the ranges of 200 is 788 accounting for 60·22 per cent out of 1189 villages in the District. The diversification of population in the rural areas has been the breaking up of bigger villages in o smaller ones. The phenomenon is contributed by a number of factors and the major part is played by the system of shifting cultivation known as Jhumming. This requires a large area of operation and bring about of settlement of villages as population increases. In the ranges of 200-499 there are 335 villages accounting for 28.17 per cent. In villages where wet and permanent cultivation is possible the settlement is permanent. 10·43 percent is occupied by 124 villages in the ranges of 500-1999 and 1·18 per cent by 14 villages in the range 2000-4999. The process of concentration of villages into bigger one is bound to happen as more and more people realise the social and economic benefits that can be obtained in large village.

TABLE 3

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	716	60·22
200—499	335	28·17
500 —1999	124	10·43
2000—4999	14	1·18
5000	...	...

TABLE 4

This table shows the distribution of villages by density. The Table shows N. A. meaning data not available as the area of the villages are not cadastrally surveyed and hence the figure is not available. However, the density of the district has been shown in the important statistics (Annex—II).

TABLE 5

Proportion of Scheduled Castes Population to Total Population in the Villages

This table shows the distribution of the Scheduled Castes population of the district at the village level in each range. It is seen from the table that there are 1161 villages in the district having no Scheduled Castes population. This means that 97.65 p. c. of the total number of villages in the district has no Scheduled Caste population. In the percentage range of 5 or less Scheduled Castes population there are 25 villages or 2. 11 p. c. of the total number of villages. It will be seen that the percentage ranges from 6-10, 11-15 and 16-20 shows that the Scheduled Castes population is recorded in only one village each with 0. 08 p c. For better understanding and appreciation of the data the list of villages according to the proportion of Scheduled Castes to total population is shown in appendix IV-Village Directory of this table.

TABLE 5

TABLE 6

Proportion of Scheduled Tribes Population to Total Population in Villages

This table shows the number of villages according to the percentage range of Scheduled Tribes population. It is very interesting to note that in this State where the Scheduled Tribes population covers more than 80 p. c. of its total inhabitants, there are 22 villages having no Scheduled Tribes at all. This clearly shows that other communities mostly from outside the State immigrated and settled in well set up villages preserving there own ethnic identities.

There are 1080 villages in the district having the percentage range of Scheduled Tribes population of 51 and above accounting for 90.83 percent of the total number of villages. The rest of the villages are distributed evenly according to the percentage range of Scheduled Tribes population.

TABLE 7

Proportion of Scheduled Castes/Tribes Population in Towns

With the exception of Cherrapunjee all other towns shown in this table are the component units of Shillong urban agglomeration. It may also be noted that Madanrting, Pynthorumkhrah and Cherrapunjee are new towns in 1981 Census.

Cherrapunjee which has the heaviest rainfall in the world has 6097 population of which 5637 is the Scheduled Tribes population accounting for 92.49 p. c. of the population and 9 or 0.15 p.c. is the Scheduled Castes population.

Madanrting town which was declared as Census town for the first time in 1981 Census has a population of 6165 out of which the Scheduled Tribes constituted 59·94 p. c. and the Scheduled Castes 0.01 p. c.

Mawlai town with a population of 20,405 has 84·32 percent of Scheduled Tribes population and 0·03 percent of Scheduled Castes. Nongthymmai town which has a population of 21,558 has only 54·60 percent of Scheduled Tribes population and 0·54 percent of Scheduled Castes population.

Pynthorumkhrah which was declared town for the first time in 1981 has a population of 10,711 out of which the Scheduled Tribes constitute 28·99 percent and the Scheduled Castes 0·30 percent.

Shillong (M) has a Scheduled Tribes population of 45·54 percent as against 36·77 percent in 1971. The increase is due to the influx of Garos, Mizos and other tribes to this towns for educational and other facilities. The town has 0·81 percent of Scheduled Castes population. Shillong Cantonment has only 311 Scheduled Tribes or 4·70 percent and 21 Schedule Castes or 0·32 percent.

TABLE 7

Name of Towns (Alphabetical order)	Total Population	Total Scheduled Castes Population	Total Scheduled Trbes population	Percentage of Scheduled Castes Population to total Population	Percentage of Scheduled Tribes Population to total Population

TABLE 8

LITERACY RATES BY POPULATION RANGES BY VILLAGES.

This table shows the comparative position of villages with 6 different population sizes a literacy rates there in. It is seen that the villages with less than 200 population has the lowe literacy rate with only 23·17 per cent. This shows the disadvantages of small villages in the fie of facilities. It is also seen that higher literacy rate is found in bigger villages or in other word the bigger the villages the higher the literacy rate.

TAELE 8

Range of Population	No. of villages in Each Range	Literacy Rate
1	2	3
Less than 200	716	23·17
200—499	335	27·58
500—999	93	30·25
1000—1999	31	48·62
2000—4999	14	42·52
5000+	—	—

TABLE 9

The table presents the literacy rates of all the towns of the district. The Shillong urban agglomeration accounts for 65.65 percent of literacy rates. Taking into account of all the towns it is interesting to note that all the towns record 50 percent above of literacy rate. Shillong Municipality itself records he highest rate of 59 19 percent. The educational facilities are mostly concentrated in this town and also having the privilege of being the State Capital it has all the facilities of being a commercial and business centre.

Cherrapunjee which once had the reputation of being the capital of this part of the country during the British regime has at present a literacy rate of 53.75 percent. Besides having the The logical College and the Normal Training School set up since the British regime, it has also other educational facilities like colleges, high schools, M. E. and L. P. Schools. It also serves as are important commercial centre to the region where oranges and betelnuts and other fruits are produced.

TABLE 9

LITERACY RATES FOR TOWNS.

Name of Towns	Literacy Rates
Shillong Agglomeration	65·65
Shillong Municipality	59·19
Shillong Cantoonment	57·39
Mawlai	57·04
Nongthymmai	57·27
Pynthorumkhrah	54·50
Madan rting	54·16
Cherrapunjee (Sohra)	53·75

TABLE 10

In this table an attempt is made to present the distribution of the population and the percentage of Scheduled Castes/Tribes. Literacy, Main-workers, Marginal workers, Total workers and Non-workers and its break-up to Person, Male and Female.

Judging from the population of each Community Development Block, Bhoi Area contains the largest number of population of 60,378. Mawkynrew has the least number of persons with 20,415. Among the towns Shillong Municipality has the largest population with 109,244 persons. The Shillong urban Agglomeration has a population of 174,703. Cherrapunjee (Sohra) has the least population of oniy 6097.

Main worker is a worker who participate in any economically productive activity. Mawkynrew Community Development Block records the highest percentage of workers with 52·81 percent. In the remaining Community Development Blocks the percentages of workers range from 40 to 46 percent only. Marginal workers are those who work a few days in a year or few hours in a day during the major part of the year in any economically productive activity. Mawphlang and Mawkynrew Community Development Blocks accounts for 2·52 percent and 2·26 percent of marginal workers respectively. In the urban areas Shillong Cantonment records the highest rate of marginal workers with 3·16 percent.

Non-workers are those persons who are not doing any work and also those who receive an unearned income like a pensioner, a rentier, a beggar etc. Mylliem Community Development Block records the highest percentage of non-workers with 59 71 percent and Mawkynrew Community Development Block has the lowest percentage of only 44·93 per cent.

TABLE 11

This table gives the number of inhabited villages and the number of villages having one or more of the different amenities with percentage for each of the C. D. Blocks and total for the district. In the district the number of villages with educational facilities are only 70 per cent. The number of Primary Schools in the district is more than M. E. Schools.

Inadequate medical facilities is another problem faced by the people of the district. The Government and private hospitals are located at Shillong only which is the Capital of the State and the Headquarter of the district. The number of hospitals and beds have been shown in the Statement V of the Town Directory. 50 per cent of the patients admitted to the hospitals at Shillong are referred to from the rural Areas.

As regards drinking water facilities though almost all the villages have some source of drinking water facilities, very few of them enjoy the facilities of tap water. Wells and rivers constitute the major source of drinking water. Inadeqate safe water supply to the villages may be the cause of some diseases like Malaria, Tuberculosis and water borne disease.

Postal and telegraph communication in the district as a whole is very unsatisfactory. The nature of the terrain in the hill areas is a bottleneck for postal communication to be developed within the easy reach of the people.

Rural electrification is essential for executing the Development Programme in the Agricultural and Cottage Industries. It can be hoped that the supply of power to the rural and semi-urban areas would help in creating a balance and diversified economy. But the progress of rural electrification in the State is extremely low. Only 17 per cent of the villages has been covered over the two decades of planning. While in November, 1970 Haryana achieved cent per cent electrification of villages and till January 1971, Tamil Nadu has as high as 78 per cent. Meghalaya has achieved only 11. 9 per cent by 1979-80. Till 1978-79 only 474 villages out of 4583 villages were electrified of which 72 villages were added in 1979-80 making a total of 546 electrified villages.

As regard East Khasi Hills district the percentage of electrified villages is 19. 51 per cent Compared to all other district in the State, this district is fairly better in the rural electrification, Umiam Hydel Project is located only 19 kms away from Shillong and it is under the Bhoi Area C. D. Block. Another 2 × 30 MW Kyrdem Kulai Hydro Electric Project of this C. D Block is in the advanced stage of construction. Also, the Umiam-Umtrew stage IV with upper Khri division project having the installed capacity of 2 × 30 MW is also to be improved.

It can be seen from the table, that besides the urban area of Shillong town, Mylliem, Mawphlang and Mawryngkneng C. D. Blocks also enjoys more facilities than any other blocks which are very far from the town, Mawphlang and Mylliem have attained 41 per cent and 62 per cent respectively of electrified villages where as other C. D. Blocks have below 19 per cent.

TABLE 11

Distribution of Villages According to the Availability of Different Amenities

Sl. No	Name of Development Block	No. of inhabited villages	No (With percentages) of villages having one or more of the following amenities

TABLE 12

The total rural population of the District only is shown in this table. The villages of the district and of the State as a whole are small and scattered all around with poor communication Therefore, it is not practicable to take into account only the population to be served but also the areas, the density of population and the difficulty in transport and communication have to be taken into account. The table below shows only the rural population served by different amenities. The proportion served by education as can be seen from the table below is satisfactory where as other amenities are yet to be improved. The rural population served by the power supply to Mawphlang and Mylliem C. D. Blocks is almost cent per cent. Mawkynrew C. D. Block has only 2.32 per cent of the total population, served by power supply.

TABLE 12

TABLE 13

This table shows only the number of villages where the amenities are not available but available at the distance of 5 Kms., 5—10 Kms. and 10+Kms. As there are many small villages in the district many of them are without amenities but could have the amenities at a distance of less than 5 km where the amenities are available.

TABLE 13

Distribution of Villages not having certain amenities, arranged by distance ranges from places where these are available.

District : EAST KHASI HILLS

Villages not having the amenity of	Number of villages where the amenity is not available and available at distant of			
	5 Kms	5—10 Kms	10+Kms	Total (Cols 2—4)
1	2	3	4	5
Education	292	46	45	
Medical	290	235	620	1145
Drinking Water	...	...	...	...
P and T	443	254	398	1095
Market/Hat	344	293	479	1116
Communication	287	250	462	999

TABLE 14

The table highlights the number (with percentage in brackets) of villages having the amenities according to the distance range from the nearest towns (in kms.) Villages which are nearest to the town are very few. There are 3 villages which have no amenities at all 4 villages have the educational facilities and 3 are electrified. The two villages which are under the range distant of 0-5 km. and which have not been electrified are under the Shella-Bholaganj C. D. Block and two under Mylliem C. D. Block. 4 villages which are nearest to the town have not been electrified.

It could be seen from table 13 that many villages without amenities fall under the range distance of less than—5 kms. This table also shows those villages having the amenities in a range distant nearest to the town. There are many primary schools in those villages which are far away from the town, that is, between the ranges of 16—50 Kms and 51+. From this it can be inferred that a child having passed the primary school has to go to another village to attain the middle standard, as there is none in his village.

TABLE 14

Distribution of Villages According to the Distance from the Nearest town and availability of difference amenities.

TABLE 15

In this table the villages are distributed to population range of 499, 500 to 1,999, 2,000 to 4,999 5,000 and above for the district and for each Community Development Block.

As regards to the villages having the population of more than 2000, almost all of them are having their amenities. The educational amenity of the villages below 499 population accounts for only 65.30 per cent. Most of the villages, have their population below 100 and some of them having even below 50.

TABLE 19

The table gives the new towns added or declassified. In 1971 Census the towns of East Khasi Hills are Shillong Municapality, Shillong Cantonment, Mawlai and Nongthymmai. These are all falling under the Shillong Urban Agglomeration. In 1981 new towns are added under the Shillong Urban Agglomeration and these are (1) Pynthor Umkhrah, and (2) Madanrting. Cherrapunjee or Sohra under Shella-Bholaganj is also a new town added to the district but is excluded from the Agglomeration, Cherrapunjee (Sohra) is situated about 54 Km away from Shillong. No town is declassified in the district.

**Includes Expenditure on Public Safety.

TABLE 21

This table gives the numbers of Schools per ten thousand population in the town. The exact number of Schools have been shown in the Statement V of the town Directory. It can be seen from the table that the towns have only 3·52 of Matriculation Schools per ten thousand population, 2·82 of Middle Schools per 1,000 population and 5·25 Primary School. Hence it may be concluded that more Schools are still wanting to cater to the needs of the growing population of the urban areas.

TABLE 21

TABLE 22

The table gives the number of beds in medical institution per 1,000 population in the To wn.

It will be seen from the table that Shillong Municipality is the only town in the district and hence the State as a whole having the larges number of medical facilities. In 1971, the number of beds for Shillong Cantonment was 166 contributing 35 beds per 1,000 population. The only Hospital in Shillong Cantonment is strictly for Military personnel. This time no information is available for the number of beds in the hospital and therefore it has been recorded as N. A. Shillong Municipality has increased the number of beds from 8 to 10·29 per 1,000 population. Madanrting, Mawlai, Pynthorumkhrah and Nongthymmai have no hospital within their Jurisdiction.

TABLE 24

It gives the picture of trade, commerce and industry for the town, The most important feature in this table is the question of import and export. The three most important commodities which are imported into the town of Shillong Municipality are (i) India made foreign ligour, (2) Medicines and (3) Electrical goods. The three most important commodities exported from Cherrapunjee Town are Cement, Coal and lime. The commodities of export and import are determined with reference to their value in rupees and the information on these are collected from various sources. Statement VI in the Town Directory highlighted these items.

PART--A

VILLAGE AND TOWN DIRECTORY

SECTION--I

VILLAGE DIRECTORY

SECTION—I

VILLAGE DIRECTORY

Explanatory Notes

In the Village Directory, particulars of the District Census Handbook are presented C. D. Block-wise.

For convenience of reference an alphabetical list of villages in respect of each C. D. Block are furnished preceding the village directory of that administrative unit. Since the location codes of the villages in the village directory are given in ascending order, the names of the villages are not arranged alphabetically.

In case a village is treated as an 'Outgrowth' of an Urban Agglomeration, the code number and the name of the village appeared in the Village Directory but no data is presented with regard to amenities and land use particulars and are merely record against the name of the village that it is treated as an outgrowth of such and such Town/U. A.

The villages which have been wholly merged in the Town are retained in the Village Directory, against such villages in the Village Directory, no data are shown and are merely stated that the village is wholly merged in the specific Town. Such type of villages are also listed for cross-reference in the PCA (rural). This will ensure matching of villages figuring in the PCA (Rural) and in the village Directory.

East Khasi Hills District is having one Town urban agglomeration. New Towns added during this Census period are (1) Madanrting (2) Pynthorumkhrah and (3) Gherrapunjee. In case of un-inhabited villages and depopulated villages, the location Code, and name of the village are given universally in the PCA (rural and village Directory).

At the end of the entries for each C.D. Blocks the totals are given for Col. 3 to 5 and 15 to 19 only. In the Village Directory the various amenities and other data are indicated by different Codes

The Village Directory has four appendices:—

(i) C.D. Block-wise abstract of Educational, Medical and other Amenities.

(ii) Land utilisation data in respect of Non-municipal Town (Census Towns)

(iii) C.D. Block-wise list of villages where no amenities except drinking water are available.

(iv) C.D. Block-wise list of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by ranges.

The Appendix (iii) is only a list of villages where no amenities relating to Education, Medicals, Post and Telegraph, Communications, Power Supply and Markets/Hats available.

The detailed explanatory notes regarding each Column of the village Directory are as follows:—

Column—1: Location Code:

In this column the location Code of each village has been shown by 4 numbers seperated by oblique strokes. The first number signifies the code number of the State, Meghalaya which is 14. The second stands for the code number of the Hills District. The third stands for the code number of the C.D. Block and the last for the village.

Thus 14/1/1/6 means village code number 6 of the Thadlaskein C.D. Block of the Jaintia Hills District.

Column—2: Name of Village:

In this column only the main or proper village has been given. Unlike the 1971 Census, whre the name of the main village disappear and Hamlets only existed, this time in the Village Directory, the information includes only in the main village.

Column—3: Area of the Village:

As already stated, the Census villages have no defined or demarcated boundary and area, hence the total area of the village are not shown.

Column—4: Total Population and number of Household.

The population and number of households are shown against each villages as a ready reference. Number of Household are shown within brackets.

Column—5: Education:

The abbreviation used according to the type of institutions are indicated below:—

Institutions	Abbreviation used
1. Primary School (include Nursery School, Kinder garten School upto Class III)	P
2. Senior Secondary or Middle School (includes class IV to VI).	M
3. Matriculation or Secondary (includes class VII to X)	H
4. Higher Secondary/Intermediate/Pre-University/Senior College.	PUC
5. College	C
6. Industrial School	I
7. Training School	Tr.
8. Adult Literacy Class/Centre	AC
9. Other Educational	O

If there are more than one Institution of a type in the village, the number are indicated within brackets. A dash (—) is shown in the column. But next to it in brackets, the distance in broad ranges, viz.,—5 Kms. 5—10 Kms. and 10 +Kms. of the nearest place where the most modest educational facility is available is given.

If there are composite Schools like middle schools with Primary Classes, or Secondary School with Middle Classes, these are included in the number of Primary and Middle Schools respectively So also in case of Secondary Schools.

It may be noted here that the pattern of Educational level or standard adopted in the district and the State as whole is upto Class III for Primary; upto Class VI for Middle and upto Class X for Matriculation or Secondary.

Column—6: Medical (Amenities):

Institutions	Abbreviations used
1. Hospital	H
2. Maternity and Child Welfare Centre	MCW
3. Maternity Home	MH
4. Child Welfare Centre	CWC
5. Health Centre	HC
6. Primary Health Centre	PHC
7. Primary Health Sub-Centre	PHS
8. Dispensary	D
9. Family Planning Centre	FPC
10. T.B. Clinic	TB
11. Nursing Home	NH
12. Registered Private Practitioner	RP
13. Subsidiced Medical Practitioner	SMP
14. Community Health Worker	CHW
15. Others	O

If there are more than one institution of a type in the village, the number are indicated within brackets against the abbreviation, *e.g.* H(2), D(3), etc.

The term 'Community Health Worker' does not refer to workers in extension programmes like Malaria eradication, Agriculture, etc. It refers to only those Para-medical personnel who have been trained for dispensing medicines for minor ailments.

If no Medical facility is available within the village a dash (—) is shown in the column. But next to it in brackets, the distance in broad ranges, *viz.*, — 5kms. 5—10kms. and 10+kms. of the nearest place where the most modest Medical amenity like Dispensary/Community Health Worker is available is given.

Column—7: Drinking Water (Amenities):

Sources	Abbreviations used
1. Tap Water	T
2. Well Water	W
3. Tank Water	TK
4. Tubewell Water	TW
5. Handpump	HP
6. River Water	R
7. Fountain	F
8. Canal	C
9. Lake	L
10. Spring	S
11. Nallah	N
12. Other	O
13. Information not Available	NA

If there is more than one source of drinking water, these are mentioned.

If no facility available within the village a dash (—) is shown in the column. But next to it in brackets, the distance in broad ranges, *viz.*, —5 Kms. 5—10 Kms. and 10 + Kms. of the nearest place where the facility is available is given.

Column—8: Postal and Telegraph:

Means	Abbreviation used
. Post Office	PO
. Telegraph Office	TO
. Post and Telegraph Office	PTO
. Telephone connection	Phone

If no facility is available within the village, a dash (—) is shown in the column. But next to it in brackets, the distance in broad ranges, *viz.*, —5 kms. 5—10 kms. 10 + kms. of the nearest place where any of the facility is available is given.

Column—9:

In this column, the information about market, if any, held in the village is available. Whenever there is a hat/market, the actual day or days of week on which the market is held is recorded as weekly or bi-weekly.

If no facility is avialable within the village, a dash (—) is shown in the column. But next to it in brackets, the distance in broad ranges *viz.*, —5 kms. 5—10 kms. 10 + kms. of the nearest place where the facility is available is given. In case of the Block where no market/hat is available in any of the villages, it is given simply by a dash (—).

Column—10: Communications.

For purpose of this column only Public Transport like Bus, Rail and Water way is being considered. These are indicated by the following codes.

Means	Abbreviation used
1. Bus	BS
2. Railway Station	RS
3. Navigable Waterway	NW

If a bus stops or railway station is located within the territorial jorisdiction of a village, the village is consider to have been served by such facility even if it is little away from the actual settlement.

If no facility is available within the village, a dash (—) is shown in the column. But next to it in brackets, the disatnce in broad ranges *viz.*, —5 kms. 5—10 kms. and 10+kms. of the nearest place where the facility is available is given.

Column—11: Approach to village:

The approach to the village refers to the road leading to the village.

Means	Abbreviation used
1. Public Road	PR
2. Katcha Road	KR
3. Navigable River	NR
4. Foot Part	FP

If there is more than one such approach facility these are indicated separately by individual Codes.

Column—12: Nearest Town and distance:

In this column the approximate distance of the village from the nearest town is recorded in kilometres within the brackets. If the nearest town is located in another State the name of the town and the State is given.

Column—13: Power Supply:

In this column if the supply is far all purposes, details are not given.

Means	Abbreviation used
1. Electricity for domestic purpose	ED
2. Electricity for agriculture	EAC
3. Electricity for other purpose	EO
4. Electricity for all purpose listed above	EA

For this column, unlike the above amenities the village having no power supply is simply show by a dash (—) and no distance in broad ranges is indicated. The reason is clear, as the power suply of a village can not be enjoyed by another village.

Column—14: Staple food:

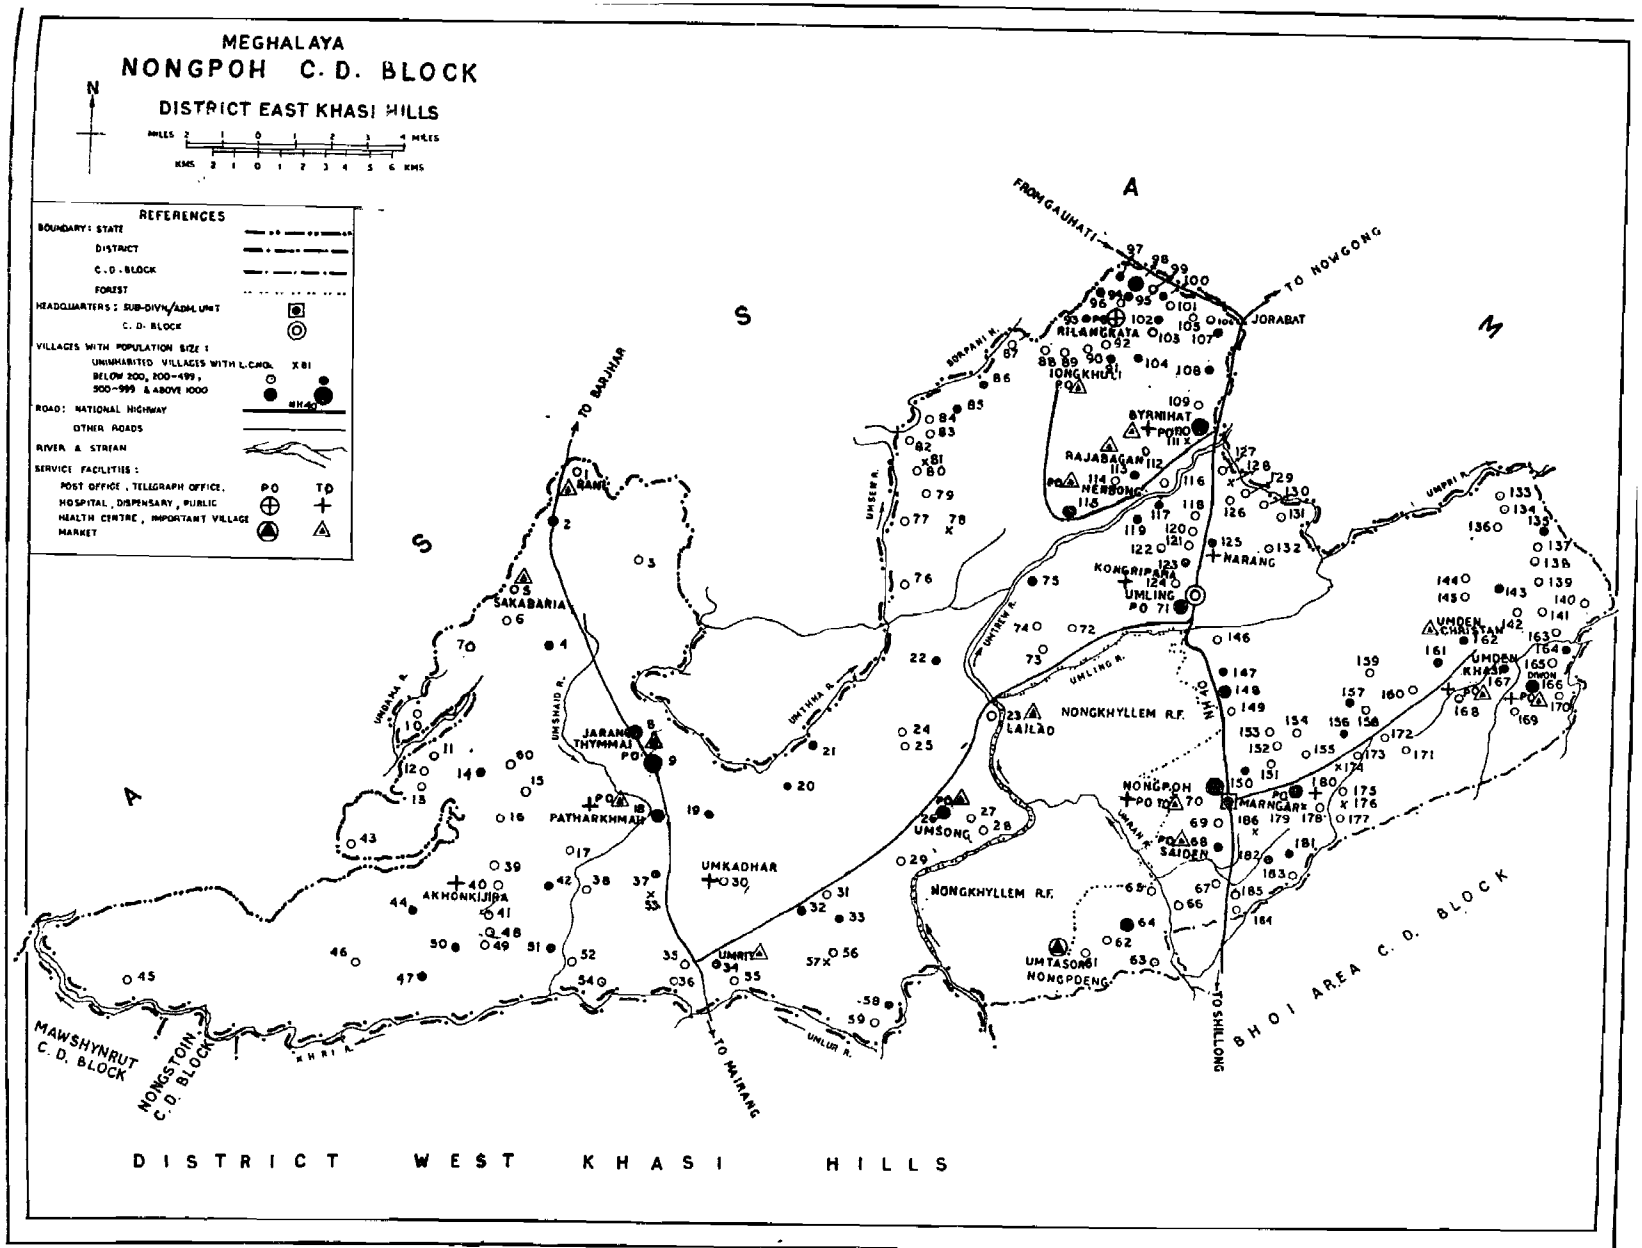

The staple food of the majority of the population of the village during the year is recorded. Ric is the Staple food of the people of this District.

Column—15:—19: Land use:

These columns relate to the information of the land use. In this State it is difficult to ascertain the pattern of land use. The data returned by the village level official, shows to columns 15—19 does not tally with the total area of the village as collected in column —3. The disparities are in almost all the villages. It is therefore obvious that any attempt to reconcile the same would be futile. Thus the Area figures and land use area of all these columns have been shown as "NA" (not available).

Column—20: Remarks:

The column is meant for remarks, moreover if there is any place of Religious Historical or Archaeological interest, the same is mentioned in this column. Generally temples, mosques etc., are shown in this column.

Based upon Survey of India map with the permission of the Surveyor General of India The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern area (Re-organisation) Act, 1971, but has yet to be verified.

The Indo-Bangladesh boundary shown on this map is the one existing prior to the Conclusion of the agreement on May 16, 1974, between India and Bangladesh

Based upon Survey of India map with the permission of the Surveyor General of India. The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern areas (Re-organisation) Act, 1971, but has yet to be verified.

The Indo-Bangladesh boundary shown on this map is the one existing prior to the Conclusion of the agreement on May 16, 1974, between India and Bangladesh

MEGHALAYA

PYNURSLA C. D. BLOCK

DISTRICT EAST KHASI HILLS

Based upon Survey of India map with the permission of the Surveor General of India.

The Indo-Bangladesh boundary shown on this map is the one existing prior to the conclusion of agreement on May 16,1974 between India & Bangladesh.

The boundary of Meghalaya shown on the map is as interpreted from the North-Eastern Areas (Reorganisation) Act,1974,but has yet to be verified.

© Government of India Copyright, 1985.

Cherrapunjee Census Town.

MEGHALAYA

MAWSYNRAM C. D. BLOCK

DISTRICT EAST KHASI HILLS

Based upon Survey of India map with the permission of the Surveyor General of India.
The Indo-Bangladesh boundary shown on this map is the one existing prior to the conclusion of agreement on May 16,1974 between India & Bangladesh.
The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern Areas (Reorganisation) Act,1971 but has yet to be verified.

SECTION—II

NOTES ON TOWN DIRECTORY

The Town Directory covers all the towns in the district statutorily notified area as well as non-municipal or census towns. It has Seven Statements *viz.*, Statements I—VI including IV—A. The towns are arranged in the alphabetical order for the district. The town directory does not cover strictly military areas. However basic statistics of the cantonment as a whole is provide. In this district there is only one cantonment area, which is also a town.

Shillong is a town with Six towns fall urban under Town Agglomeration. The names of the towns constituting the Agglomeration of towns within the district are also indicated in alphabetical arrangements.

A note explaining the Codes used in the town directory is given in the beginning of the directory with relevant explanations for each statements.

Statement—I: This statement gives the details relating to the status of town, in column—2, Area in Column—5, number of households in 1981 Census in Column—6 and the population with growth rate in Brackets since 1901 to 1981. Column—16 relate to the density of population in 1981 and Column—17. 18 and 19 relate to the Sex-ratio. These are keeping are ready reference to the readers for comparability sake.

The following abbreviation used to denote the civic status of town.

Civic Status	Abbreviation
1. Minicipality	M
2. Cantonment Board	CB
3. Town Committee/Town Area Committee	TC
4. Notified Area/Notified Area Committee	NAC
5, Census Town	CT

Location Code for the towns are given with a view to locate the Towns in the Map.

Statement—II: In this statement the physical aspects, and locational aspect of towns are shown. The physical aspects showing the annual rainfall, maximum and minimum temperature are to be obtained from the Metoerological Survey of India, Calcutta, which are not available. Hence figures shown in Col. 3, 4 and 5 are of 1971 Census. In respect of locational aspect the name of road distance from the State/District/C. D. Block/Headquarters are shown. The road distanc from the nearest city have been shown as Shillong. Though Shillong has not been declared as a city but qualified to be a city as its population is more than one lakhs as per Census Criteria The information about bus route and navigable river/canal (if within 10 kms.) is to be shown But since these Towns are far off from the Navigable River/Canal they are shown by a dash (—). In the state no railway line is available between the towns. Gauhati is the only link to this state and hence its distance has been shown as 150 Kms.

Statement—III: In this statement municipal finance of town during the year 1978-79 has been incorporated. The information for Cherrapunjee, Madanrting, Mawlai, Norgthymmai and Pynthorumkhrah all the columns have been shown by 'NA' as no information is available.

Statement –IV: Particulars of civic and other amenities provided in the town are the different type of characteristic of the urban area. Such particulars provided in the Statement are (i) Population, (ii) Scheduled Caste/Tribe, (iii) Pucca and Katcha Road length, (iv) Sewerage and drainage system in the town, (v) Different types of latrines available and their numbers (vi) Method of night soil disposal, (vii) Source and capacity of water supply, (viii) Availability of fire fighting service and (ix) availability of electrification for different purpose such as domestic industrial, street lighting and others.

The information in-corporated in different columns are collected from different departments of the State Government. In column—6, the road length of the Towns have been shown in Kilometres. The system of Sewerage/Drainage in column—7 is indicated by abbreviation DSD which stand as open surface drain. There is no proper sewerage system in the towns. The number of latrines are given in columns—8, 9 and 10.

The Urban Water Supply is being supplied through Taps. According to the Five Year Plan 1980-85 Government of Meghalaya gives.

The objective of the plan to cover all the towns in the State by the end of 1985 as stated below:—

In the earlier Plan period, few augmentation schemes like Umkhen phase I and II and water supply schemes like Tura phase I, etc., had been completed and the new Jowai, greater Shillong and Tura phase II etc., taken up.

The expenditure during the 5th Plan and upto 1979-80 for the Urban Water Supply Scheme in the state is as follows:—

(1)	Expenditure 5th Plan	Rs. 138·88 Lakhs.
(2)	Expenditure 1978-79	Rs. 99·25 Lakhs.
(3)	Expenditure 1979-80	Rs. 233·31 Lakhs.
		Rs. 461·44 Lakhs.

The new Jowai phase I has been completed during the current year. The Tura phase II and the greater Shillong Water Supply Scheme and Jowai phase II are proposed to be completed during the Plan period 1980-85.

Most of the houses enjoy the facilities of electric connections in these towns.

Statement—IV-A: The statement provides particulars on civic and other amenities in notified slums, 1979. The information for this statement is shown as 'NIL' as there is no slums areas in the town. Hence there is no scope for discussing the details of this statement.

Statement—V: The statement provides particulars on medical, educational, working women's hostels, recreational and cultural facilities in the town as in 1979. The abbreviations used in this statement are explained below :—

Under column—4 the following abbreviations are used :—

Hospital	H
Dispensary	D
Health Centre	H C
Family Planning Centre	F C
T. B. Clinic	T B
Nursing Home	N H
Others	O

The number of Institutions are provided within brackets. The number of beds are given in column—5.

For column—6 the educational facilities are given in abbreviation thus :—

Arts only	A
Science only	S
Arts and Science only	A S
Commerce only	C
Arts and Commerce only	A C
Combine for all categories	A S C
Law	L

Information regarding Medical Colleges, Engineering Colleges, Polytechnics are nil. Hence they are giving by the nearest place and its distance within brackets in these columns.

Column 12 to 19 need no explanation as total number only are indicated therein.

Column 20 indicate the public libraries and reading rooms with number in bracket.

Abbreviation used as follows :—

Public Library	P L
Reading Room	R R

Statement—VI: This statement relates to Trade, Commerce, Industry, Banking advance Credit Societies in the towns. The commodities of export and import are determined with reference to their value and the information on these are collected from the Commssioner of Taxes.

APPENDIX IV

Village Directory

List of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by ranges.

District— East Khasi Hills

A—Scheduled Castes

C. D. Block—NONGPOH

Range of Scheduled Castes population (percentage)	Location Code No.	Name of villages
1	2	3
0—5	14/2/1/14	Bakhlapara
	14/2/1/51	Warmawsaw
	14/2/1/70	Nongpoh
	14/2/1/115	Umtrew Colony
6—10	Nil	
11—15		
16—20		
21—30		
31+		

C. D. Block—BHOI Area

1	2	3
0—5	14/2/2/178	Hydel Umiam Project
	14/2/2/185	Barapani Sumer
	14/2/2/193	Umshorshor
6—10	Nil	
11—15		
16—20		
21—30		
31+		

C. D. Block—MAWRYNGKNENG

1	2	3
0—5	14/2/3/62	Sohryngkham
6—10 11—15 16—20 21—30 31+	Nil	

C. D. Block—MYLLIEM

1	2	3
0—5	14/2/4/23	Mawpat
	14/2/4/25	Nongmynsong
	14/2/4/30	Nongrah
	14/2/4/31	Rynjahlapalang
	14/2/4/32	Laitkor
	14/2/4/34	6th mile
	14/2/4/56	5th mile
	14/2/4/58	4th mile
	14/2/4/62	Nongkseh
	14/2/4/63	Lawsohtun
	14/2/4/64	Umpling
6—10 11—15 16—20 21—30 31+	Nil	

C. D. Block—MAWPHLANG

1	2	3
0—5 6—10 11—15 16—20 21—30 31+	Nil	

C. D. Block—PYNURSLA

1	2	3
0—5	14/2/6/65	Nohwet
6—10	Nil	
11—15		
16—20		
22—30		
31+		

C. D. Block—SHELLA BHOLAGANJ

DESCRIPTION OF ENUMERATION BLOCK BOUNDARY
SHILLONG MUNICIPALITY

Enumeration Block No.	Description
1	2
1	North—Bishop Falls Road. East—Footpath to the Grave Yard. South—Nulla infront of the Grave Yard. West—Umshyrpi Stream.
2	North—Footpath from Bishop Falls Road to Umshyrpi Stream. East—Bishop Falls Road. South—Road from Mawprem Road to Umshyrpi Stream. West—Umshyrpi Stream.
3	North—South Boundary of E. B. No. 2. East—Bishop Falls Road. South—Footpath. West—Lumsohphoh Road.
4	North—Drain infront of the Grave Yard. East—Barapathar. South—Lower Barapathar Road. West—Umshyrpi Stream.
5	North—Bishop Falls Road. East—Footpath to Barapathar. South—South Boundary of E. B. No, 4. West—Umshyrpi Stream.
6	North—Bishop Falls Road. East—Nalla. South—Nalla and a Footpath. West—East Boundary of E. B. No. 5.
7	North—Bishop Falls Road. East—From Bishop Falls Road the Boundary runs along the footpath towards Barapathar. South—Nalla. West—East Boundary of E. B. No. 6.
8	North—South Boundary of E. B. 6, 5 and part of E. B. No. 4. East—Drain. South—Footpath. West—Reid Chest Hospital.
9	North—South Boundary of E. B. No. 4. East—West Boundary of E. B. No. 8, South—Footpath and a Drain. West—Umshyrpi Stream.
10	North—South Boundary of E. B. No. 9. East—Footpath. South—Cantonment Area. Wets—Umshyrpi Stream.

Enumeration Block No.	Description
1	2
11	North—Barapathar Main Road. East—Sunapani Road. South—Cantonment Area. West—East Boundary of E. B. No. 10.
12	North—South Boundary of E. B. No. 8. East—Barapathar Road. South—North Boundary of E. B. No. 11. West—Road to Reid Chest Hospital.
13	North—Lane or Footpath. East—Upper Mawprem Road. South—Reid Chest Hospital Road. West—Barapathar Road.
14	North—Motorable Road. East—Upper Mawprem Road, South—North Boundary of E. B. No. 13. West—Nulla.
15	North—Motorable Road. East—West Boundary of E. B. No. 14. South—North Boundary of E. B. No. 13. West—East Boundary of E. B. No. 12.
16	North—Upper Mawprem Road. East—Nulla. South—North Boundary of E. B. No. 15. West—East Boundary of E. B. No. 8.
17	North—Footpath. East—Upper Mawprem Road. South—North Boundary of E. B. No. 14. West—East Boundary of E. B. No. 16.
18	North—Nulla or Drain. East—Upper Mawprem Road. South—North Boundary of E. B. No. 17. West—East Boundary of E. B. No. 16.
19	North—Lumsohphoh Road. East—Lower Mawprem Road. South—Bishop Falls Road. West—Drain.
20	North—Lumsohphoh Road. East—West Boundary of E. B. No. 19. South—Bishop Falls Road. West—Lum Kshaid Road.

Enumeration Block No.	Description
1	2
21	North—Lower Mawprem Road. East—Lower Mawrpem Road. South—North Boundary of E. B. No. 19. West Drain
22	North—Lower Mawprem Road. East—West Boundary of E. B. 21. South—Lumsohphoh Road. West—Lum Kshaid Road.
23	North—Wah Umkhrah River, East—Imaginary Line from Wah Umkhrah to Mawprem and then the Boundary runs to Lum Kshaid Road. South—Bishop Falls Road. West—Umshyrpi Stream.
24	North—Wah Umkhrah River. East—Wah Umkhrah River. South—Lower Mawprem Road. West—Imaginary Line as mentioned in the East Boundary of E. B. No. 23
25	North—Umkhrah River. East—Footpath from Mawprem Road to Wah Umkhrah. South—North Boundary of E. B. No. 21. West—Imaginary Line from Wah Umkhrah to Mawprem Road.
26	North—Wah Umkhrah. East—Wah Dasoi Stream. South—Footpath from Mawprem Road to Wah Dasoi. West—East Boundary of E. B. No. 25.
27	North—Wah Umkhrah. East—Drain by the side of G. S. Road. South—Lum kshaid. West—Mawprem Road.
28	North—Footpath from G. S. Road. East—Wah Dasoi Stream. South—Footpath. West—Footpath.
29	North—Wah Dasoi. East—G. S. Road. South—Road to Lama Villa. West—Umsaw Stream.
30	North—South Boundary of E. B. No. 29. East—Lama Villa Road, South—Umsaw Stream. West—Umsaw Stream.

Enumeration Block No.	Description
1	2
31	North—Lum Lyer East—Bedon Falls Road. South—Grave Yard. West—Nalla and Lumsohphoh.
32	North—Lama Villa Road. East—G.S Road. South—Mawprem Road. West—Nalla.
33	North—Lama Villa Road. East—G.S. Road. South—Mawprem Road. West—Footpath.
34	North—Road to Lower Mawprem. East—G.S· Road. South—Road to Upper Mawprem West—Footpath from Lower Road to Upper Mawprem Road.
35	North—Mawprem Road. East—Footpath. South—Footpath. West—Upper Mawprem Road.
36	North—Mawprem Road. East—G.S. Road. South—Thakurbai Road. West—Imaginary Line from Lower Mawprem to Thakurbai Road.
37	North—Common way. East—Footpath. South—Cantonment Area. West—Upper Mawprem Road.
38	North—Common way. East—Cantonment Area. South—Cantonment Area. West—East Boundary of E.B. No.37.
39	North—Common way. East—Luckier Road. South—Cantonment Area. West—East Boundary of E.B. No. 38.

Enumeration Block No.	Description
1	2
40	North—Foothpath. East—Nalla. South—G.S, Road. West—Chapel Road.
41	North—Chapel Road. East—Nalla. South—North Boundary of E.B.No. 40. West—Chapel Road.
42	North—Student Field. East—Mawkhar Grave Yard. South—Chapel Road. West—Lane.
43	North—Stndent Field. East—West Boundary of E.B. No. 42. South—Chapel Road. West—Garikhana.
44	North—Lane from Garikhana to Qualapaty. East—Chapel Road. South—G.S. Road. West—G.S. Road.
45	North—Drain in Student field. East—Drain in Student Field. South—Drain. West—G.S. Road and Swett Road.
46	North—Road to Sunny Hill. East—Footpath. South—Swett Road. West—G.S. Road.
47	North—Drain. East—Swett Road. South—Swett Road. West—Footpath to G.S. Road.
48	North—Municipal Drain. East—Garikhana. South—Footpath. West—G.S Road.
49	North—Nalla. East—West Boundary of E.B. No. 48. South—Footpath. West—G.S. Road.

Enumeration Block No.	Description
1	2
50	North—Training School Lane. East—Mission Lane South—Nalla. West—Wah Ramdiar Stream.
51	North—South Boundary of E.B.No.50. East—Road infront of Mawkhar Church. South—Mawkhar Main Road. West—Road to Student Field.
52	North—Ramdiar Road. East—Ceredic Road. South—Road to Wah Thapbru. West—Wah Ramdiar Stream.
53	North—South Boundary of E.B. No.52. East—Mawkhar Road near Mot France. South—G.S. Road. West—Nalla to Wah Thapbru.
54	North—Nalla. East—West Boundary of E.B. No. 53. South—G S. Road. West—Nalla.
55	North—Nalla to Wah Thapbru. East—West Boundary of E.B. No. 54. South—G.S. Road. West—East Boundary of E.B. No. 40.
56	North—G.S. Road. East—Taxi Stand. South—Cherra Bus Stand. Wast—Cantonment Area.

59	North—Sweeper Line Road. East—Area proposed for site of C.N.I. Church South—Cantonment Area. West—Cherra Road.
60	North—Road and Lane to G.S. Road. East—Mawlai Road in Jaiaw Langsning. South—Jaiaw Langsning Road. West—Wah Dasoi Stream.

Enumeration Block No.	Description
1	2
61	North—Wah Umkhrah River. East—G.S. Road and Steps to Jaiaw Langsning. South—North Boundary of E.B. No. 60. West—Wah Dasoi Stream.
62	North—G.S. Road and Lumsyntiew Road. East—Lumsyntiew Road. South—Jaiaw Main Road and Jaiaw Langsning Road. West—East Boundary of E.B. No. 60 and 61.
63	North—South Boundary of E.B. No. 62. East—Jaiaw Main Road. South—Jaiaw Langsning Road to G.S. Road. West—Footpath.
64	North—South Boundary of E.B. No. 63. East—Road to Mission. South—Wah Ramdiar Stream. West—Crossing point of Wah Ramdiar Stream and Jaiaw Langsning Road near G.S. Road.
65	North—Meeting point of Road coming from Mission and Jaiaw Main Road. East—Jaiaw Main Road. South—Mission Road and Lane. West—Training School Compound.
66	North—Jaiaw Main Road. East—Nalla behind Jaiaw Police Beat House. South—Riatsamthiah Road. West—Jaiaw Main Road.
67	North—Jaiaw Main Road. East—Jaiaw Lann Sona Lane. South—Riatsamthiah Road. West—East Boundary of E.B. No. 66.
68	North—Footpath from Lann Sona Lane to the Nalla. East—Nalla. South—Nalla. West—Lann Sona Lane.
69	North—Nalla. East—Jaiaw Shyiap Lane. South—Riatsamthiah Road. West—Lann Sona Lane.

Enumeration Block No.	Description
1	2
70	North—Jaiaw Shyiap Lane. East—Nalla. South—Nalla from Riatsamthiah Road. West—Meeting point of Jaiaw Shyiap Road and Riatsamthiah Road.
71	North—Jaiaw-Mawlai Road. East—Wah Umkhrah River. South—Nalla. West—Footpath.
72	North—Jaiaw-Mawlai Road. East—Jaiaw Shyiap Lane. South—Nalla. West—Footpath.
73	North—Jaiaw Main Road and Jaiaw-Mawlai Road. East—Footpath. South—Footpath from Lann Sona Lane. West—Lann Sona Lane.
74	North—Wah Umkhrah River. East—Weiking Road. South—Jaiaw Main Road. West—Hospital Compound.
75	North—Wah Umkhrah River. East—Jaiaw Laitdom Road. South—Siro Lane. West—Weiking Road.
76	North—South Boundary of E.B. No. 75. East—Jaiaw Laitdom Road. South—Mawbynna Point. West—Weiking Road.
77	North—Jaiaw Laitdom Road. East—Footpath. South—Jaiaw—Mawlai Road. West—Mawbynna Point.
78	North—Motorable Road and Footpath. East—Motorable Road and Footpath. South—Nalla. West—Footpath.
79	North—Wah Umkhrah River. East—Sengkhasi Cremation Ground. South—Nalla. West—Jaiaw Laitdom Road.

Enumeration Block No.	Description
1	2
80	North—Wah Rngum Lane. East—Ka Bestina Nongtariang Lane. South—Riatsamthiah Locality Road. West—Riatsamthiah Road.
81	North—Riatsamthiah Bridge in Wah Umkhrah River. East—Riatsamthiah Lane. South—Footpath. West—Nalla.
82	North—Wah Umkhrah River. East—Wah Umkhrah River. South—Footpath. West—Riatsamthiah Locality Road.
83	North—Riatsamthiah Road. East—Footpath. South—Nalla. West—Riatsamthiah Road.
84	North—Riatsamthiah Road. East—Riatsamthiah Road. South—Road from Mawkhar Main Road to Wahingdoh. West—Mawkhar Main Road.
85	North—Nulla. East—Wah Umkhrah River. South—Wahingdoh Road to Ganesh Das Hospital. West—Riatsamthiah Road.
86	North—Wah Umkhrah River. East—Wah Umkhrah River. South—Steps to Wahingdoh from Wahingdoh-Ganesh Das Hospital Road. West—Wahingdoh to Ganesh Das Hospital Road.
87	North—Road to Ganesh Das Hospital from Wahingdoh. East—Meeting point of two lanes near Wahingdoh. South—Wahingdoh Lane. West—Meeting point of Riatsamthiah Road, Wahingdoh Road and Wahingdoh Lane.
88	North—Drain and Wahingdoh Road. East—Wahingdoh Steps. South—Umsohsun Stream. West—Footpath and Nulla between Wahingdoh and Umsohsun.

Enumeration Block No.	Description
1	2
89	North—Mawkhar Main Road. East—Dorbar Syiem Road. South—Wahingdoh Road. West—Mawkhar Lane.
90	North—Raimohon Lane. East—Umsohsun Stream. South—Umsohsun Road from Umsohsun bridge to Children Park. West—Umsohsun Lane and Wahingdoh Road.
91	North—Mawkhar Main Road and East Mawkhar Road. East—Wahingdoh Road. South—Footpath. West—Footpath to Mot France from Umsohsun.
92	North—Umsohsun Road. East—Umsohsun Stream. South—G.S. Road. West—Mot France Point.
93	North—Mission Road and Lane. East—Mawkhar Main Road. South—Mawkhar Main Road. West—Meeting Point of Road coming from Mission and Mawkhar Main Road.
94	North—Mawkhar Main Road. East—Mawkhar Main Road. South—Small Lane to Mission. West—Mission Compound Lane.
95	North—South Boundary of E.B. No. 94. East—Mawkhar Main Road. South—Lane and Compound of Elibon. West—Lane or Footpath in Mission Compound.
96	North—Mawroh. East—Golf Link. South—Road to Ganesh Das Hospital West—Road to Mawlai.
97	North—Long Round Road. East—Road from Long Round Road which goes to Mawlai Ground. South—Mawlai Road to the Mawlai Ground. West—Long Round Road.

Enumeration Block No.	Description
1	2
98.	North—Golf Link East—Golf Link. South—Nullah West—Road to Mawlai
99.	North—F. C. I. Compound. East—Road to Metre Factory South—Footpath to Ganesh Das Hospital. West—Wah Umkhrah River
100.	North—F. C. I. area. East—Golf Link Area. South—Umkhrah River. West—Road to Ganesh Das Hospital and Meter Factory.
101.	North—Metre Factory Area. East—Road to Metre Factory. South—Wah Umkhrah River. West—Footpath to Wah Umkhrah River.
102.	North—Pasture Institute Area. East—Road to Pasture Institute. South—Umkhrah River. West—Footpath to Wahingdoh Bridge.
103.	North—Wah Umkhrah River. East—Footpath from Jail Road to Wah Umkhrah. South—Steps from the footpath toward the Jail and thence the Boundary runs along the Footpath toward Umsohsun Stream. West—Umsohsun Stream.
104.	North—Umkhrah River. East—Footpath and Nullah. South—Steps upto Jail Road near Jail Road High School. West—Steps from Jail Road High School towards Wah Umkhrah River.
105.	North—Wah Umkhrah River. East—Road to Golf Link. South—Polo Road to Ganesh Das Hospital and the Lower Jail Road upto the steps to Wahingdoh. West—Steps to Wahingdoh and Ruprekha School.

Enumeration Block No.	Description
1	2
106.	North—Wah Umkhrah River. East—Road to Lower Jail Road. South—P. W. D Road and Jail Road H. E. School. West—Lane to Police Reserve.
107.	North—South Boundary of E. B. No.106. East—Jail Road. South—Footpath behind Municipality Office. West—Road to Singhania Cinema.
108.	North—Nallah and Road. East—West Boundary of E. B. No. 107. South—Singhania Road. West—Road in Police Reserve.

DESCRIPTION OF ENUMERATION BLOCK BOUNDARY
MAWLAI TOWN

Enumeration Block No.	Description
E. B. No.1 ...	North—Road to M.S.E.B. Power House. East—Gauhati—Shillong Road. South—Nulla from Thangkhiew Petrol Pump to Umkhrah river. West—Wah Umkhrah river.
E. B. No.2 ...	North—Meeting point of Road from Nongkwar and G. S. Road. East—Gauhati Shillong Road. South—North Boundary of E. B. No. 1. West—Nongkwar Road.
E. B. No.3 ...	North—Umthlong Road in the Northern side. East—Umthlong Road in the Northern side. South—Umthlong Road in the Southern side. West—Imaginary line coming from the M.S.E.B. Tower line to Umthlong Road in the Southern side.
E. B. No.4 ...	North—Road in the Southern side of E.B. No.3. East—G. S. Road and Nongkwar Road. South—North Boundary of E. B. No. 1. West—Footpath starting from Basic School to Umthlong.
E. B. No.5 ...	North—Road in the Southern side of E. B. No.3 upto Wah Umkhrah river. East—West Boundary of E. B. No. 4. South—North Boundary of E.B. No.1 upto Umkhrah river. West—Umkhrah river.
E. B. No.6 ...	North—Footpath from G. S. Road to the Pond. East—Nalla. South—Longround Road. West—G. S. Road.

Enumeratian Block No.		Descriprion
E. B. No.7	...	North—Nalla from G. S. Road to Umshing Stream. East—Nalla in the East Boundary of E.B. No. 6. South—North Boundary of E. B. No.6. West—G. S. Road.
E. B. No.8	...	North—Nalla and Umjajew Hill, East—West Boundary of E.B. No.3, South—Umkhrah river. West—Umiam river.
E. B. No.9	...	North—Footpath to Grave Yard and Umjajew area. East—G. S. Road. South—Road to Umthlong from the Northern side, West—Road to Umthlong from the Northern side.
E. B. No.10	...	North—Reserve Forest. East—G. S. Road. South—North Boundary of E. B. No.8 and 9. West—Wah Umiam river.
E. B. No.11	...	North—Reserve Forest and M.L.P. Camp. East—Umshing Stream. South—North Boundary of E.B. No.7 and 10. West—Umiam river.
E. B. No.12	...	North—Umiam Lake, East—Umshing Stream. South—North Boundary of E. B. No. 11. West—Umiam river.
E. B. No.13	...	North—Footpath from Grave Yard in Syllai Kariah to the Nalla. East—Road from Long-round road to the Grave Yard. South—Long-round road. West—Nalla in the ast Boundary of E. B. N.6.

Enumeration Block No.	Description
E. B. No.14 ...	North—Long-round Road.
	East—Mawlai-Nonglum Road.
	South—Mawlai-Nonglum Road.
	West—Road to Long-round road from Mawlai Nonglum.
E. B. No.15 ...	North—Long-round Road.
	East—Footpath from Long-round road to Umkhrah river.
	South—Umkhrah river.
	West—G. S. Road.
E. B. No.16 ...	North—Long-round Road.
	East—West Boundary E. B. No.14.
	South—Mawlai-Nonglum Road.
	West—G. S. Road.
E. B. No.17 ...	North—Nalla in Syllai Kariah.
	East—Footpath toward Syllai Kariah.
	South—Long-round Road.
	West—East Boundary of E. B. No. 13.
E. B. No.18 ...	North—Nalla in Syllai Kariah.
	East—Syllai Kariah Road.
	South—Long-round Road.
	West—East Boundary of E. B. No.17.
E. B. No.19 ...	North—Meeting point of footpath to Wah Umkhrah and G. S. Road.
	East—Wah Umkhrah river.
	South—Wah Umkhrah river.
	West—Boundary rows behind the first row along the G. S. Road and the Western side.
E. B. No.20 ...	North—Presbyterian Church Compound.
	East—West Boundary of E. B. No. 19.
	South—Wah Umkhrah river.
	West—Road to Mawlai Iewrynghep.

Enumeration Block No.		Description
E. B. No.21	...	North—South Boundary of E. B. No. 1.
		East—G. S. Road.
		South—Road to Mawlai Iewrynghep.
		West—Footpath from Iewrynghep to Nongkwar.
E. B. No.22	...	North—South Boundary of E. B. No.1.
		East—West Boundary of E.B. No.21.
		South—Road to Iewrynghep.
		West—Wah Umkhrah river.
E. B. No.23	...	North—Long-round Road.
		East—Road.
		South—Footpath.
		West—Footpath.
E. B. No.24	...	North—Long-round Road.
		East—Road to Nongpdeng.
		South—Road to Nongpdeng.
		West—East Boundary of E.B. No.23.
E. B. No.25	..	North—South Boundary of E.B. No.23.
		East—Road to Nongpdeng.
		South—Wah Umkhrah river.
		West—East Boundary of E.B. No. 15.
E. B. No 26	...	North—Road to Nongpdeng.
		East—Road to Sacred Heart Boys' High School.
		South—Road to Polo Ground.
		West—Road to Nongpdeng.
E. B. No.27	...	North—South Boundary of E. B. No. 26.
		East—Imaginary Line from Road to Polo and to Wah Umkhrah river.
		South—Wah Umkhrah river.
		West—Wah Umkhrah Bridge in Weiking.

Enumeration Block No.		Description
E. B. No.28	...	North—Umshing Stream.
		East—Nulla between Syllai Kariah and Mot Syiar to Umshing.
		South—Motorable Road to Syllai Kariah,
		West—Motorable Road to Syllai Kariah.
E. B. No.29	...	North—South Boundary of E. B. No. 28.
		East—Motorable Road.
		South—North Boundary of E.B. No.13, 17 and 18.
		West—West Boundary of E. B. No.7.
E. B. No.30	...	North—Mot Syiar.
		East—Road or Footpath.
		South—Long round Road.
		West—East of E. B. No.18 and 29.
E. B. No.31	...	North—Umshing Stream.
		East—Nulla between Mot Syiar and Umjaiur.
		South—North Boundary of E.B. No.30.
		West—East Boundary of E.B. No.28.
E. B. No.32	...	North—Footpath from Phudmawrie Road to Nongpdeng.
		East—Phudmawrie Road.
		South—Road to Polo.
		West—East Boundary of E. B. No.26.
E. B. No.33	...	North—Footpath from Phudmawrie Road to the road coming from Jaiaw to Mawlai Mawdatbaki.
		East—Road to Mawlai Mawdatbaki from Jaiaw.
		South—Meeting point of Phudmawrie Road and Road to Mawdatbaki.
		West—Phudmawrie Road.
E. B. No.34	...	North—Long-round Road.
		East—Phudmawrie Road,
		South—North Boundary of E.B. No.32.
		West—East Boundary of E.B. No.24.

Enumeration Block No.	Description
E. B. No.35 ...	North—Long Round Road. East—Road to Mawdatbaki. South—North Boundary of E. B. No.33 West—East Boundary of E. B. No.34.
E. B. No.36 ...	North—Umshing Stream. East—Umjaiur Road upto Umshing Stream South—Long Round Road. West—East Boundary of E.B. No.30 and 31.
E. B. No.37 ...	North—Umshing Stream. East—Polytechnic Road upto Umshing Stream. South—Long Round Road. West—East Boundary of E. B. No.36.
E. B, No.38 ...	North—Umshing Stream. East—Footpath from Polytechnic Road to Umshing Stream. South—Polytechnic Road. West—East Boundary of E.B. No.37.
E. B. No.39 ...	North—South Boundary of E, B. No.38. East—Meeting point of Polytechnic Road and N.E.H.U. Road. South—N.E.H.U. Road. West—Polytechnic Road.
E. B. No.40 ...	North—N-E.H.U. Road. East—Footpath from Umjan Road to N.E.H.U. Road and Umjan Road. South—Long Round Road. West—Footpath from N.E.H.U. Road to Long Round Road.
E. B. No.41 ...	North—N.E.H.U. Road. East—West Boundary of E.B. No.40. South—Long Round Road. West—N.E.H.U. Road.

Enumeration Block No.		Description
E. B. No.42	...	North– Footpath from N.E.H.U. Road to the Spring East– Footpath to the Grave Yard in Mawroh from Long Round Road. South– Long Round Road. West—East Boundary of E.B. No.40.
E. B No.43	...	North– Umshing Stream. East– N.E.H.U. Road. South– East Boundary of E.B. No.38 West—Umshing Stream.
E. B. No.44	...	North– Umshing Stream. East—Paddy Field. South– North Boundary of E.B. No.42. West– East Boundary of E.B. No.43.
E. B. No.45	...	North– Umshing Stream. East– Road to Mawtawar. South– Long Round Road. West—East Boundary of E.B. No.42 and 44.
E. B. No.46	...	North– South Boundary of E.B. No.45. East– Stream in Golfl ink. South– Golfl ink Area. West– Long Round Road.
E. B. No.47	...	North– Reserve Forest. East– G. S. Road. South– Mawiong. West—Reserve Forest.

DESCRIPTION OF ENUMERATION BLOCK BOUNDARY NONGTHYMMAI TOWN

Enumeration Block No.	Description
1	2
1	North—Goraline Road East—Imaginary line connection P.W.D. Road and Goraline Road. South—P.W.D. Road in Nongrim Hills. West—Motorable Road connecting P.W.D. Road and Footpath upto Goraline Road.
2	North—Goraline Road. East—Goraline Road, P.W.D. Road and Wahmawsiang Stream. South—P.W.D. Road coming from Nongrim Hills, P.W.D. Road to Nongshiliang and a footpath proceeding towards a Graveyard in Nongrim Hills. West—Nongrim Hills P.W.D. Road.
3	North—Goraline Road. East—Footpath from Goraline Road connecting P.W.D. Road in Nongrim Hills. South—Footpath from Nongrim Hills P.W.D. Road running towards Wahthangsning stream. West—Wahthangsning stream.
4	North—South boundary of Block 3. East—Nongrim Hills P.W.D. Road. South—Nongrim Hills P.W.D. Road and Wahprut stream upto Wahthangsning stream. West—Wahthangsning.
5	North—Wahprut Stream upto Wahthangsning. East—Road coming from Nongrim Hills towards Jingkieng Nongthymmai. South—Small Road diverted from the road going towards Jingkieng Nongthymmai joining the Nongrim Hills P.W.D. Road upto Wahthangsning. West—Wahthangsning Stream.
6	North—South Boundary of E.B. No. 5 East—P.W.D. Road coming from Nongrim Hills to Jingkieng Nongthymmai. South—Shillong Municipality town boundary. West—Shillong Municipality town boundary.
7	North—Junction point of Nongrim Hills P.W.D Road and Road from Nongrim Hills to Jingkieng. East—Wahprut Stream. South—Road coming from Jingkieng Nongthymmai towards Nongshilliang near Christ National Church. West—Road coming from Nongrim Hills to Jingkieng Nongthymmai.

Enumeration Block No.	Description
	2
8	North—Nongrim P.W.D. Road East—Road Starting from Nongrim Hills P.W.D. Road upto Mizo Modern High School. Then along the footpath upto the Pohkseh Nongshilliang P.W.D. Road and a small road leading to Auxilium gate. South—Nongshilliang Road, Wahprut Stream. West—Wahprut Stream.
9	North—Road starting from Mizo Modern High School upto H. Elias Memorial School East—Nongshilliang Road. South—Small Road starting near the Auxilium gate meeting the Pohkseh-Nongshilliang Road. West—Footpath as mentioned in E.B. No.8.
10	North—Footpath leading to Graveyard as mentioned in South of E.B. 2 upto Wahmawsiang Stream. East—Wahmawsiang Stream. South—Pohktieh Road. West—North and East boundary of E.B. 9 then a road from Mizo Modern High School to Nongrim Hills
11	North—Umpling Stream. East—Road from Umpling Stream upto Goraline Road near Umpling Dispensary. South—Goraline Road, West—Goraline Road and a footpath from Goraline to Umpling.
12	North—Umpling Stream. East—Footpath. South—Road. West—Road upto Umpling Stream.
13	North—Umpling Stream. East—Umpling Road. South—Road West—East of E.B. 12.
14	North—Umpling Stream. East—Umpling Stream. South—Goraline Road and P&T Fencing upto Umpling Road. West—Umpling Road.
15	North—South boundary of E.B. 12 and 13. East—West boundary of E.B. 14. South—Goraline. West—East of E.B. 11.

Enumeration Block No.	Description
	2
16	North—Road starting from C.R.P. Camp connecting Goraline Road. East—Wahdemthring Stream. South—Wahdemthring Stream. West—Road to Quarry from C.R.P. Camp.
17	North—Goraline Road. East—North boundary of 16. South—North Boundary of 16. West—Nongthymmai-Umpling Road.
18	North—*Nongrim Hills* P.W.D. Road. East—Road connecting Goraline Road and Pohkseh Road. South—Pohkseh Road. West—North boundary of E.B.10 and East Boundary of E.B. 2.
19	North—South boundary of E.B. 11. East—Nongthymmai-Umpling Road. South—Pohkseh Road. West—East boundary of E.B. 18.
20	North—South boundary of E.B. 18. East—Road connecting Nongthymmai-Umpling Road and Pohkseh Road. South—Road coming from Pohktieh to Pohkseh. West—Wahmawsiang stream.
21	North—South boundary 19. East—West boundary of 16 and 17 and Wahdemthring Stream. South—Footpath from Nongthymmai-Umpling Road to Wahdemthring Stream. West—East Boundary of E.B. 20.
22	North—Fencing of Auxilium School. East—Footpath and a road upto Umpling Bus Stand. South—Nongthymmai-Umpling Road. West—Nalla behind Nongthymmai Police Beat House upto the Main Gate of Auxilium School.
23	North—Pohktieh Road. East—Nongthymmai-Umpling Road. South—Junction point of the road going to Wah Thio and Nongthymmai-Umpling Road West—Imaginary line starting from the junction point of south boundary meeting the footpath which proceeds to Pohktieh road.
24	North—Pohktieh Road. East—West boundary of E.B. 23. South—Nongthymmai Umpling road and motorable road in front of Unitarian Church West—Footpath starting from the road near Unitarian Church upto Pohktieh road.

Enumeration Block No.	Description
1	2
25	North—Footparth starting from Nongthymmai-Umpling Road near Pohkseh Bus Stand upto Demthring Stream. East—Demthring Stream. South—Road to Wah Thio from Nongthymmai-Umpling Road and Nalla which flows to Demthring Stream. West—East Boundary of E.B. 23.
26	North—Nongshilliang-Pohkseh Road. East—West boundary of E.B. 24. South—North boundary of E.B. 22. West—Wahprut Stream.
27	North—Nalla starting from Nongkhyriem Saw Mill which flows northward to Wah Demthring Stream. East—Wah Demthring Stream. South—Wah Demthring Bridge. West—Shillong-Jowai Road
28.	North—Nongthymmai-Umpling Road. East—Road to Wah Thio from Nongthymmai-Umpling Road. South—Nalla mentioned in North of E.B. 27. West—Shillong-Jowai Road.
29	North—Shillong-Jowai Road. East—Shillong-Jowai Road. South—Steps starting from Demthring Bridge going westward towards motorable road infront of R.C. Thomas Bungalow. West—Footparth starting from opposite Saw Mill at Nongkhyriem going towards R.C. Thomas Bungalow.
30	North—Shillong-Jowai Road. East—Footpath as mentioned in west boundary of E.B. 29. South—Footpath starting from the lane going to Thomas Bungalow going upto the Spring then meeting an imaginary line connecting N.E.H.U, Road near A.S. Dkhar's residence. West—Rosa-Villa Road.
31	North—South boundary of E.B 30. East—Footpath in West boundary of 29 South—Motorable road starting fro ..e main road behind Mayurbhanj proceeding toward quarry. West—NEHU Road.
32	North—South Boundary of E.B. 29. East—Wahdemthring Stream. South—Footpath starting from N.E.H.U. campus going upto cremation ground near Demthring Stream. West—Fencing of N.E.H.U. Campus.

Enumeration Block No.	Description
1	2
33	North—Lumbasuk Road. East—N.E.H.U. Road and road mentioned in South boundary of E.B. 31. South—N.E.H.U. campus fencing and a road starting from the road behind N.E.H.U campus which proceeds to graveyard West—Road passing through Graveyard.
34	North—Graveyard Road. East—Demthring River. South—Town boundary. West—Lawjynriew Stream.
35	North—Shillong-Jowai Road. East—Rosa-Villa Road. South—Imaginary line running from Rosa-Villa Road meeting the Nalla or strear behind Jylli's shop. West—Lane or footpath from Jylli's shop to the spring.
36	North—South boundary of E.B. 35. East—N.E.H.U. Road. South—North boundary of 33. West—Road coming from Jingkieng Nongthymmai to the Graveyard.
37	North—Nongshilliang-Pohkseh Road. East—West boundary of E.B. 26 and 22. South—Nongthymmai Bus Stand. West—Shillong-Jowai Road.
38	North—Pohkseh road starting from Jingkieng Nongthymmai upto Wahprut. East—Wahprut Nalla. South—North boundary of E.B. 37. West—Shillong-Jowai Road.
39	North—South boundary of E.B. 38 and 37. East—North boundary of 35 and 36. South—Meeting point of road from Jingkieng Nongthymmai to Graveyard and foot-path coming from Jylli's shop. West—Road from Jingkieng Nongthymmai to Graveyard.
40	North—Meeting point of Lawjynriew Stream and a footpath going to the graveyard at a bridge. East—Footpath going to Lawjynriew graveyard. South—Imaginary line separating the residential area and Lawjynriew gravegyard West—Lawjynriew Stream.

Enumeration Block No.	Description
1	2
41	North—Meeting point of Lawjynriew stream and the road which goes to the Lawjynriew graveyard near Nongthymmai Field. East—Road from Jingkieng Nongthymmai to Lawjynriew Graveyard. South—Road from Jingkieng Nongthymmai to Lawjynriew Graveyard. West—East boundary of E. B. 40.
42	North—Shillong-Jowai Road. East—Lawjynriew Stream. South—Footpath coming from bridge across Lawjynriew stream to the springside road then to the East boundary of E.B. 44. West—Nalla which run behind the Swer Enterprise.
43	North—South boundary of E.B. 44 and 42. East—West boundary of E.B. 40. South—Footpath coming from Motinagar Road meeting the Nalla flowing towards Lawjynriew Stream. West—Motinagar Road and Steps which leads to Lumsohphoh.
44	North—Shillong-Jowai Road. East—Nalla behind Swer Enterprise. South—Nalla behind Swer Enterprise. West—Footpath coming from Lumsohphoh towards Laitumkhrah Field.
45	North—Shillong-Jowai Road. East—West boundary of E.B. 43 and 44. South—Motinagar Road upto Police Beat House. West—Nalla behind Motinagar Beat House then the boundary cross to the Motinagar Road then along the short cut from Fire Brigade to Motinagar Road.
46	North—Nalla as mentioned in South boundary of E.B. 43. East—Lawjynriew Stream. South—Reserve Forest or Town boundary. West—Nalla meeting the Nalla mentioned in the south boundary of E.B. 43.
47	North—Footpath to Lumpyngngad in front of Motinagar Beat House. East—Nalla between Lumpyngngad and Motinagar Road. South—Road in Motinagar coming from the road to Tripura Castle. West—Motinagar Road.
48	North—South boundary of E.B. 43. East—West boundary of 46. South—Reserve Forest or Town Boundary. West—East boundary of 47 and a footpath to Laitkor.
49	North—Road going to Tripura Castle starting from the bridge across Wahdienglieng Stream. East—Risa Colony Road and imaginary line upto Reserve Forest or Town Boundary. South—Reserve Forest or Town Boundary. West—Tripura Castle Road.
50	North—Fishery Lake in fruit garden. East—Stream flowing to the fishery lake. South—Forest Reserve. West—East of E. B. 49.
51	North—Nalla which flows by the Mosque towards fishery lake. East—West boundary of 45, 47 and 48. South—Reserve Forest. West—East Boundary of E. B. 50.

BASED ON SURVEY OF INDIA MAP WITH THE PERMISSION OF THE SURVEYOR GENERAL OF INDIA.
SURVEY OF INDIA COPYRIGHT, 1985

DESCRIPTION OF ENUMERATION BLOCK BOUNDARY PYNTHORUMKHRAH TOWN

Enumeration Block No.	Description
1.	North—From the wooden bridge near the Bhuddist Temple the boundary runs along footpath towards the Plaza Building. East—Polo Hills Road. South—Road to Golflink. West—Nalla and a road which goes to Metre Factory.
2.	North—Long Round Road. East—Long Round Road. South—Imaginary line which comes from Long Round road by the side of Golf Club touching the road which comes from infront of Siva Temple and ended upto the Long Round Road on the other side to Pynthor Bah near the spring. West—Long round Road.
3.	North—Footpath from the road near the Siva Temple upto the Nalla coming from the Spring. East—Nalla from the Spring, South—Pynthor Bah Road. West—Footpath or Road behind the Siva Temple.
4.	North—Nalla or stream coming from infront the Children's Home. East—Footpath from Nalla upto the Mawpun Road. South—Mawpun Road. West—North boundary of E. B. No.1.
5.	North—Footpath coming from Siva Temple to Long Round Road in ynthor Bah. East—Long Round Road. South—Pynthor Bah Road. West—Nalla from the Spring
6.	North—South Boundary of E. B, No. 2. East—Nalla from the Spring. South—Footpath from Siva Temple to Pynthor Bah. West—Road infront of Siva Temple.
7.	North—Nalla. East—Nalla from the Spring. South—Wah Umkhrah River. West—Polo Ground and Nalla.
8.	North—South Boundary of E. B. No. 6. East—West Boundary of E. B. No. 3. South—Pynthor Bah Road. West—Road from Pynthor Bah road which runs toward the Siva Temple.

Enumeration Block No.	Description
9.	North—Footpath to Children's Home and Golf Club Compound. East—Polo Hill Road South—Boundary shooting from Golf Link Road upto the Footpath behind Bajaj Building. West—Footpath behind Bajaj Building upto the part where it meets another footpath which goes to the Children's Home.
10.	North—Pynthor Bah Road. East—Road which runs by the side of Polo Ground to Pynthor Bah Road. South—Footpath from Wireless upto the road by the side of Polo Ground. West—Footpath behind Wireless.
11.	North—Stream near Children's Home. East—Footpath to Children's Home. South—Boundary of E. B. No. 9. West—Footpath behind Bajaj Building upto the stream.
12.	North—Long Round Road. East—Long Round Road. South—North Boundary of E. B. No. 6 and 25. West—Golf Link Road.
13.	North—Mawpat Road. East—Phud Langkyrding Stream and Long Round Road. South—Footpath starting from M. E. School and runs up to the Church and again down toward the Saw Mill. West—Footpath which runs from the M. E. School towards the road which goes to Mawpat road and runs along the road which goes to Law Syiem.
14.	North—Pynthor Bah Road. East—South and West Boundary of E. B. No.10 and again the boundary runs South ward and meets the West Boundary of E. B. No.7. South—Footpath to Polo Bazar Road. West—South and East Boundary of E. B. No.1.
15.	North—Mawroh area. East—Long round Road and a Stream. South—Stream infront of Children's Home. West—Footpath from the Stream upto Mawroh.
16.	North—Kutcha road or footpath mentioned in South Boundary of E. B. No.12 and 13 East—Footpath from Long Round Road to M. E. School. South—Long Round Road. West—Long Round Road.

Enumeration Block No.	Description
17.	North—Forest Colony. East—West Boundary of E.B. No. 15. South—Nulla from Children's Home. West—Road to Metre Factory.
18.	North—South Boundary of E. B. No. 14 and 27. East—West Boundary of E. B. No. 7. South—Wah Umkhrah river. West—Stream and Golf Link Road.
19.	North—Footpath or Road from the Saw Mill to M. E. School. East—Long Round Road. South—Long Round Road West—Footpath or East Boundary of E. B. No.16.
20.	North—South Boundary of E. B. No.15. East—Polo Hill Road. South—Meeting point of Footpath and Polo Hill Road. West—Footpath from Polo Hill road to the Pond near Children's Home.
21.	North—Compound of Golf Club East—Golf Link Road. South—Imaginery line cutting from infront the footpath near Bajaj Building towards Golf link Road. West—Polo Hill Road.
22.	North—Crossing point of Stream and Long Round Road in the East Boundary of E. B. No. 15. East—Long Round Road and Golf Link Road South—North Boundary of E. B- No. 21. West—Stream and Polo Hill Road.
23.	North—Footpath infront of the Church in Pynthor Bah. East—Footpath toward the Saw Mill. South—North Boundary of E. B. No. 19. West—Footpath to the Church.

Enumeration Block No.	Description
24.	North—South Boundary of E. B. No. 8 and 3. East—Nulla from the Spring. South—Footpath to the Nulla coming from the Spring. West—East Boundary of E. B. No.10.
25.	North—South Boundary of E.B. No.2. East—West Boundary of E. B. No. 6 and 8 South—North Boundary of E. B. No. 10 and 14. West—Golf Link Road.
26.	North—Long Round Road. East—Wah Langkyrding Stream. South—A meeting point of Langkyrding Stream and Wah Umkhrah River. West—Kutcha Road and Long Round Road.
27.	North—South Boundary of E. B. No.24. East—Nulla from the Spring. South—Footpath from Polo Bazar road to the Nulla. West—East Boundary of E. B. No.10.
28.	North—Law Syiem. East—West Boundary of E. B. No.13. South—Long Round Road and North Boundary of E. B. No.12. West—Long Round Road.
