DISTRICT CENSUS HANDBOOK

EAST KAMENG DISTRICT

PART A—VILLAGE & TOWN DIRECTORY

AND

PART B—BLOCK/VILLAGEWISE PRIMARY CENSUS ABSTRACT

M. B. RAI
Of the Indian Administrative Service
Director of Census Operations
Arunachal Pradesh
Shillong

Arunachal Pradesh is a thinly populated hilly tract lying roughly between the latitudes 26° 28′ N and 29° 31′ N and the longitudes 90° 30′ E and 97° 30′ E on the north east extremity of India, comprising roughly of 83,743 kilometre squares of area, bordering the international boundaries of Bhutan, Tibet, China and Burma. The Pradesh is known to be rich in flora, fauna, power and mineral potential.

When the 1971 Census was taken in Arunachal Pradesh, the area was known as the North East Frontier Agency (NEFA in short) which was constitutionally a part of the State of Assam. At that time NEFA was directly administered by the President of India through the Governor of Assam as his agent, who was assisted by an Adviser. The Office of the Adviser to the Governor of Assam was situated at Shillong, the former Capital of the Assam State now the Capital of Meghalaya.

On 21st January 1972 NEFA was given the status of a Union Territory under the provision of the North-Eastern Areas (Reorganisation) Act, 1971, (8 of 1971) and placed under the charge of a Chief Commissioner with his headquarters at Shillong.

When NEFA became a Union Territory in January, 1972 and renamed as Arunachal Pradesh, Itanagar was selected as its Capital.

On 15th August, 1975 Arunachal Pradesh got its own elected Legislative Assembly and simultaneously the Chief Commissioner was replaced by Lt. Governor, assisted by a Cabinet of Ministers, to run the Government of this newly formed Union Territory.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by Planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a Village and Town Directory including PCA. The 1971 DCH series was planned in three parts, Part-A related to Village and Town Directory, Part-B village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables bases on PCA and amenity data in respect of villages. However, in some states it was confined to district tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of Village and Town Directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case as amenity is not available in the referred village the distance in board ranges from nearest place here the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and landuse pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only local area planning but regulating the provision of goods services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and numbers of households" has been introduced to examine the correction of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few items. A new statement on civic and other amenities in slums in class-I and class-II towns (statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the Town Directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the Primary Census Abstract for the village and town has been formulated in the light of changes in the economics and other questions canvassed through the Individual Slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains Village and Town Directory and Part-B, the PCA of villges and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tehsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/police station/CD Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri M.B. Rai, IAS, the Director of Census Operations, Arunachal Pradesh, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N.G. Nag, Deputy Registrar General (Social Studies) of my office Dr. B.K. Roy, Deputy Registrar

General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

The District Census Handbook contains important Census Statistics of the district. It has two parts—Part-A and Part-B. Part-A deals with Village and Town Directory, whereas Part-B contains Village and Town Primary Census Abstract (PCA) and also Scheduled Castes and Scheduled Tribes Primary Census Abstract.

the 26th April, 1982.

P. PADMANABHA
Registrar General, India

1—480 R. G. India/ND/84

PREFACE

The District Census Handbook contains inportant census statistics of the district. It has two parts--Part-A and Part-B, Part-A deals with village and Town Directory, whereas Part-B contains village and Town primary census Abstract (PCA) and also scheduled castes and scheduled Tribes primary census Abstract.

In the Village Directory attempt has been made to present exhaustive data on various kinds of amenities available in a village, and also on its land use pattern. A few new items have been introduced, such as adult literacy, primary health sub-centres and community health workers in a village. Similarly, in the Town Directory information on various civic amenities, adult literacy classes/centres etc. are incorporated. The primary Census Abstract of villages and towns, and also of Scheduled Castes and Scheduled Tribes, contain data on occupied residential houses, number of households, total population with sex-wise breakup, literate population, main workers, marginal workers and non-workers. Brief notes on the economic resources of the district namely, Forestry, Mineral and Mining, Electricity and Power, land and land use pattern, tenancy, agriculture, Animal Husbandry, Fishery, Industry, Trade and Commerce, Transport etc. are also incorporated. Besides, brief analytical notes on village and town directory are presented supported by a few in-set tables based on the Primary Census Abstract. In short, attempt has been made to present in the District Census Handbook important statistical data on villages and towns which should come handy and useful to the administrators as well as to the planners and research workers. Though a few new item, have been introduced in the village and town directory yet care has been taken to see that its comparability with 1971 Census data is fully maintained. In four districts viz East Kameng, Upper Subsansiri, Dibang Valley, and Tirap however, there is no town.

In 1951 Census District Census Handbook was published for the first time by the Governments of all States and Union Territories. Since then it has been published regularly during each census year. However, in the case of Arunachal Pradesh, or the erstwhile NEFA, no District Census Handbook was published in 1951 and 1961 censuses because then Arunachal Pradesh (NEFA) was neither fully covered nor all India Schedules were canvassed. It was only in 1971 Census the District Census Handbooks, for the then five existing districts, were published for the first time when all-India Schedules were canvassed covering the whole of Arunachal Pradesh.

The District Census Handbook is primarily a State Government publication for which the entire cost of printing etc. is borne by them. The Census Directorate, on behalf of the State Government, only prepares manuscripts for the districts from out of the data collected from field and through various other Government agencies.

For the preparation of manuscripts for nine districts that existed at the time of 1981 Census this Directorate received whole hearted cooperation from the Secretary, Supply and Transport, all Heads of Departments, all district Heads of Departments, Extra Assistant Commissioners, Circle Officers, CPWD and PWD of Arunachal Pradesh Government. I am grateful to them all for their valuable contribution. Also, I am grateful to the Geological Survey of India, Shillong for providing valuable information on the "Minerals and Mining" existing in all the districts of Arunachal Pradesh, to the Indian Council of Agricultural Research, Shillong for exhaustive notes on the Agricultural activities in Arunachal Pradesh; and to the All India Radio for giving us information on the programmes broadcast by them on various aspects of socio-economic and cultural activities in Arunachal Pradesh sponsored by both Arunachal Pradesh Government and Central Government.

In this Directorate, Statistical Assistants and Computors worked very hard in preparing various tables and write-ups of nine District Census Handbooks under the close supervision of Shri A.K. Paul, ADCO (T), I.N. Gohain and A. Roy Choudhury, Investigators. Shri D. B. Rai, Computor, A. C. Paul, Senior Steno, S. K. Lama, Junior Steno., B. Das Gupa, UDC and Taru Takar, LDC helped in typing out fair copies of all manuscripts for nine districts. In 1981 Census quite a large number of maps have been incorporated in the District Census Hand- books. The Ferro typer, Draftsman and Artist took pains to complete the arduous task of preparing the maps in time under the close supervision of Shri D.N. Ram, Cartographer. Shri A.K. Paul, ADCO(T) took the responsibility of the overall guidance in preparing the maps. I am grateful to them all.

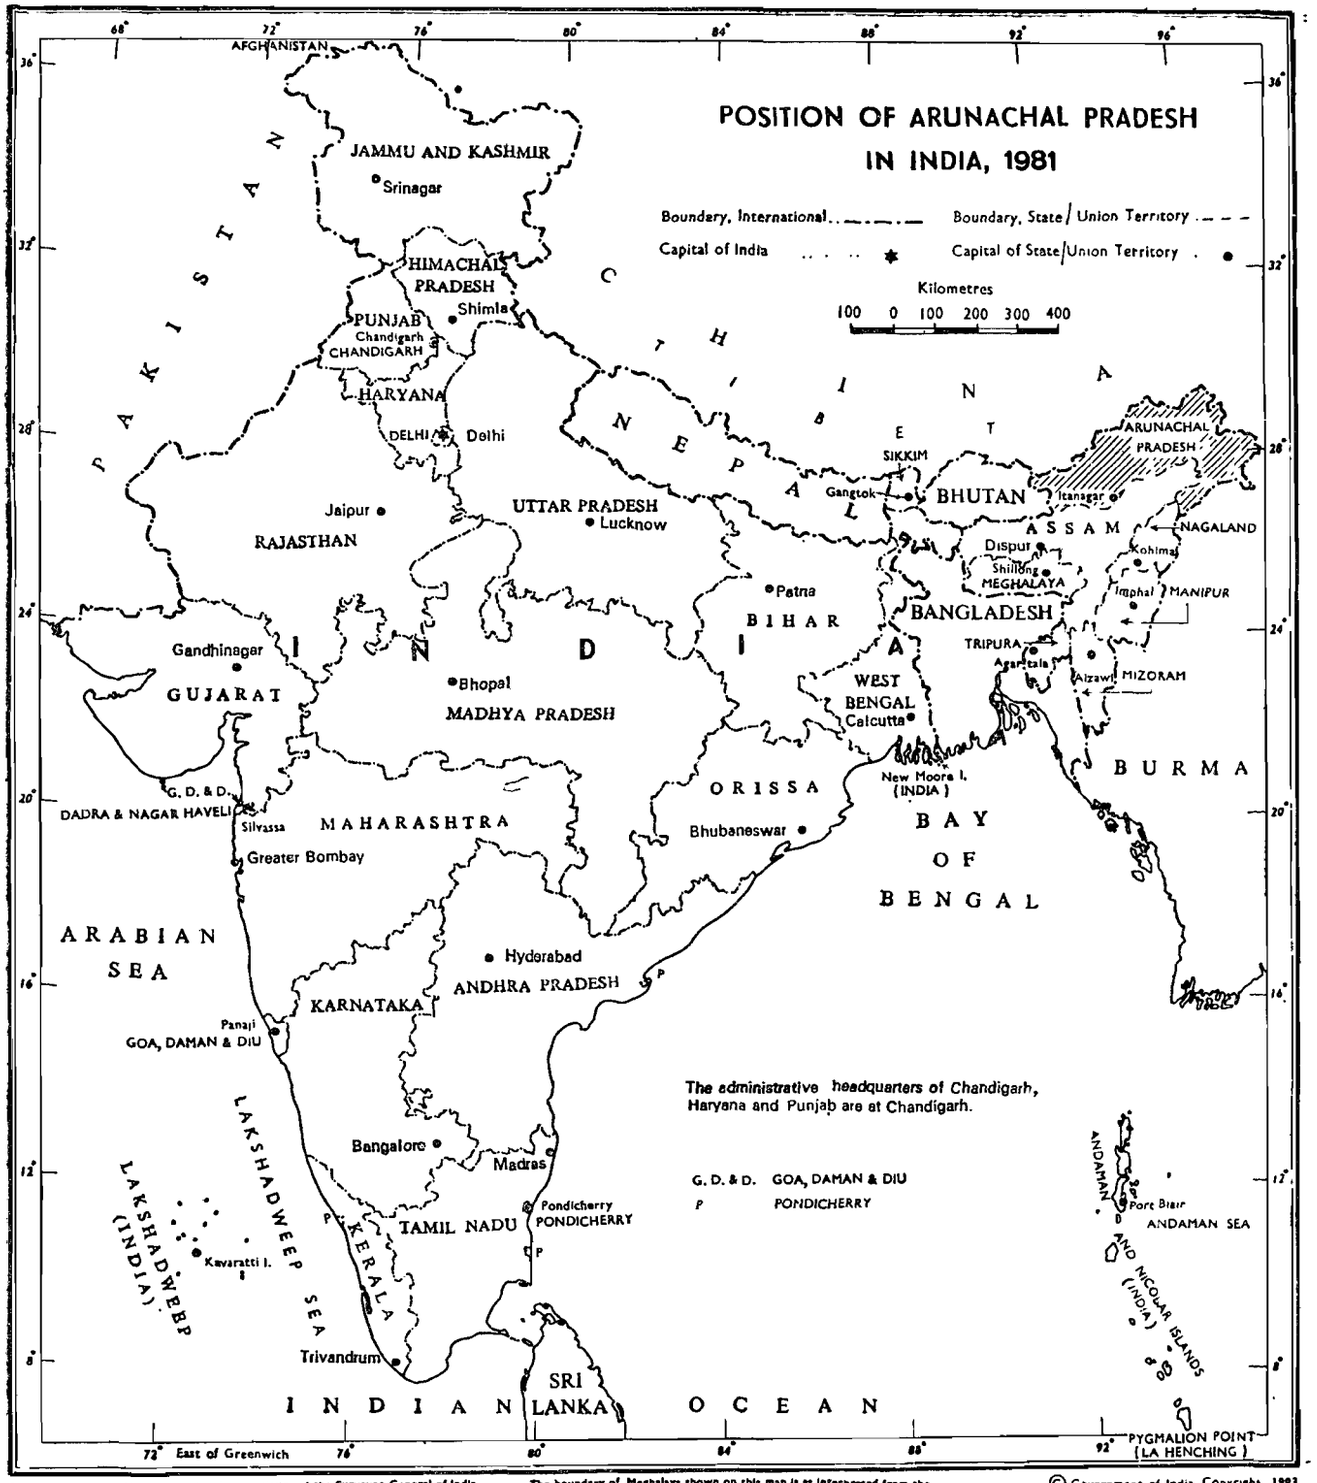

I am grateful to Dr. N. G. Nag, Deputy Registrar General (Social sudies), Dr. B. K. Roy, Deputy Registrar General (Map) and Shri S. C. Srivastava, Assistant Central Tabulation Officer and their colleagues for their valuable assistance in scrutinising the portions of the Handbook pertaining to their respective Divisions in the Office of the Registrar General, India.

I place on record with gratitude the great pains that Shri V. P. Pandey, Joint Registrar General, India had to take for making a concerted effort among different Divisions in the Office of the Registrar General, India in order to bring out the publication in time.

Lastly, I cannot but express my gratefulness to Shri P. Padmanabha, Registrar General and Census Commissioner of India for his valuable instructions and guidance in writing this District Census Hand-Book.

DATED SHILLONG
15*th March*, 1983

M. B. RAI
Director of Census Operations
Arunachal Pradesh,
Shillong.

ANALYTICAL NOTE

(i) CENSUS CONCEPTS

Rural and Urban Areas

In all the Censuses throughout the world the dichotomy of rural and urban areas is recognised and the data are generally presented for rural and urban areas separately. But a common definition for the concept of rural areas or urban areas cannot be applicable to all countries or, for that matter, even within the same country. Inspite of this fact it would be better to know the census concepts of rural and urban areas before coming to the analysis of actual data.

As in the previous Censuses, the 1981 Census data are presented by rural and urban area. The basic unit for rural area is the revenue village whi h has definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village is one unit for the presentation of data. In unsurveyed villages within forest areas, each habitation area with locally recognised boundaries within each forest range officer's beat is treated as one unit. Again a Census Village may also be basically defined as a 'tract of land' which is an administrative rather than a demographic entity.

The situation is, however, different in Arunachal Pradesh. In Arunachal Pradesh, cadastral survey has not been done so far and revenue system in the village has not been introduced as yet. As such each area with locally recognised boundaries is considered as a village. Thus a village in Arunachal Pradesh may comprise even one house/household only and, in fact, there are such villages. The identity of the existence of certain habitations as separate village or otherwise is determined generally on the basis of how the local administration has accepted the existence of those habitations. In the case of hamlets and the migrated part or parts of a village bearing the same name of original village, (i.e. both the old and new villages are found to be known by the same name) the identity of the place is determined by the decision of the local administration only. A hamlet recognised by local customs and traditions may be treated as a separate village if the local administration has decided to do so and in that case it is treated as a census village. So also the old and new village bearing the same name of the old village are treated as separate census villages if it is decided so by the local administration even if both the units are treated as same village by the local traditions and customs; but in such crses the local people keep the identity of these villages by using 'Old' and 'New' before and after the names of the villages as the case may be, e.g., old Shehung and New Shehung or Shehung 1 and Shehung 2.

In Arunachal Pradesh there may be some special cases of isolated and scattered habitations, in the notified forest areas, which may or may not be included in the custom and tradition bound villages. Such habitations in some cases form a well defined forest village. But those of such habitations which were not accepted as 'forest village', till census enumeration were treated as one unit and as one 'Census Village'.

As regards urban area it has very often been commonly vindicated that an urban area should be determined not only on the basis of defined demographic characteristics but also on the basis of the level of infrastructure facilities. The urban area may be defined in a more meaningful way in terms of the level of infrastructure development and the availability of amenities in a given area. But criteria based on such considerations have not been adopted in defining an urban area in India. The Census Organisation is, however, working on the feasibility of arriving at criteria based on such factors for indentifying urban areas through some scheme, but in 1981 Census the conventional definition has been adopted. For the purpose of maintenance of comparability and administrative convenience at large, the definition of an urban unit which was adopted in 1971 Census have been followed. This definition in fact, has been adopted since 1951. Broadly speaking the definition of an urban area as adopted in 1981 Census is as follows:—

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) All other places which satisfy the following criteria :

  (i) a minimum population of 5000;

  (ii) at least 75% of male working population engaged in non-agricultural pursuits; and

  (iii) a density of population of at least 400 persons per sq. km. (1000 persons per sq. mile).

The urban criterion of 1981 varies slightly from that of 1961 and 1971 Censuses in that the males working in activities, such as, fishing, logging, etc. were treated as engaged in non-agricultural activity, and therefore, these contributed to the 75% criterion in 1961 and 1971 Censuses, whereas in the 1981 Census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

In the marginal cases, such as, project colonies, areas of intensive industrial development, railway colonies, important tourist centres etc. the decision as to whether these places were to be classified as urban or rural was considered mostly depending on the local circumstances. The classification of such cases were made by the census directorates in consultation with the office of the Registrar General, India.

Two distinct types of urban units are conspicuous from the definition of the urabn area. The first type of urban unit includes those units which satisfy criterion (a) by virtue of statutory notification and for census purpose these areas are referred by the nomenclature as adopted in the relevant notification. Those units

which satisfy the criterion, (b) belong to the other type of urben units. These units are classified as urban units for census purpose only and are referred to as such in order to distinguish them from the statutory towns under criterion (a). These urban areas under criterion (b) may continue to be included in the list of revenue village where these are in existence. However, for the convenience of the readers relevant cross references are generally made in the census records for identification of such cases.

As in the case of rural areas, the situation in Arunachal Pradesh is different in the case of urban areas also. The local administrative, economic and social milieu pose a difficulty in following the above critria *in toto* for recognition of a place as urban area. During 1961 Census the whole of Arunachal Pradesh was treated as rural. For 1971 Census also, none of the places was found to be under municipality, town committee, etc. Same was the case in 1981 Census. As such there is no place in Arunachal Pradesh so far which satisfied the criterion (a). On the other hand, save and except two places (i.e. Old Itanagar and New Itanagar in Lower Subansiri District, the criterion (b) was also not satisfied till 1981 Census) by any of the villages even, though it was observed that many places, specially the district and subdivisional headquarters, had developed distinct urban characteristics where large majority of people pursued non-agricultural activities. It was, therefore, decided that in spite of the smallness of the population or less density of population, the district and subdivisional headquarters having a population of more than 2,500 (in 1961) should be declared as urban areas on an empirical basis for the purpose of 1971 Census. Accordingly four such places were declared as urban area in 1971, namely, Bomdila (Headquarters of Kameng District at present West Kameng District), Along (Headquarters of the Siang District at present West Siang District), Pasighat (Headquarters of the Pasighat Subdivision of the Siang District at present headquarters of the East Siang District) and Tezu (Headquarters of the Lohit District). These urban areas have been continued as urban areas. Over and above, two more units namely, Old Itanagar and New Itanagar which had satisfied all the conditions of criterion (b) have been declared as Census towns for the purpose of 1981 Census.

Before finalising the list of urban and rural areas the marginal cases for consideration of urban areas were examined by the Registrar General, India. The list of urban areas, which is generally referred to as the town list, was then prepared by this directorate and simultaneously a list of villages was also prepared. These lists in fact form the basic frame for the organisation of the Census Operations.

Urban units or towns are divided into the following six classes for the purposes of analysis :

Class	*Population*
I	100,000 and above
II	50,000 to 99,999
III	20,000 to 49,999
IV	10,000 to 19,999
V	5,000 to 9,999
VI	Less than 5,000

Class I town with a population of over 100,000 is also termed as a city. By convention, urban areas with a population of a million and above are often referred to as metropolitan areas. This terminology is adopted in all the census publications. The population size of the towns of Arunachal Pradesh being very small 5 of the 6 towns are in Class V and the remaining one in Class VI and that is Bomdila town of West Kameng District.

Census House

A Census House is a building or part of building having a separate main entrance from the road or common courtyard or staircase, etc. used or recognised as separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both. If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they are considered as separate Census Houses. If within large enclosed area. there are separate buildings owned by different persons, then each such building is also considered as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance is treated as separate Census House.

Household

A household is group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue home, jails, ashrams, etc. These are called 'Institutional Households'— There may be one member households, two member household or multi members household. For census purpose each one of these types is regarded as a 'household'.

Scheduled Castes

The castes which are Scheduled in Assam under the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956', (Part II of Schedule I) are treated as Scheduled Castes in Arunachal Pradesh. There are as many as sixteen different categories of Scheduled Castes in Assam which are also treated as Scheduled Castes in Arunachal Pradesh. Districtwise list of Scheduled Castes with their demographic and other aspects will be published in a separate publication.

Scheduled Tribes

In the Presidential Order of 1956, it is said that all the tribes of the Agency are to be treated as Scheduled Tribes. At paragraph 2 of Part II of Schedule III of the Order, an illustrative list of tribes of Arunachal Pradesh is provided. It has also been mentioned that the Presidential Order is illustrative and not exhaustive with respect to the tribes of Arunachal Pradesh. There were one hundred and ten different categories of Scheduled Tribes in Arunachal Pradesh in 1971 Census whereas in 1961 Census the number was eighty only. In 1981 Census the number of Scheduled Tribes has exceeded one hundered and ten.

Total number of tribes may vary from census to census because of the facts that the list of the tribes of the Presidential Order of 1956 is an open one, and according to the procedure of census enumeration the census enumerators are to record the name of the tribe as returned by the respondent without entering into any alteration or argument provided the persons for whom the information is recorded are the aborigines of Arunachal Pradesh. Another possible reason may be attributed to the growing consciousness for the identity of their individual groups or sects.

Literate

A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age 4 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Works and Non-workers

For the purpose of census basically the population have been divided into two broad groups, namely, workers and non-workers on the basis of the activities of the people.

Workers have been defined as those who have participated in any economically productive activity during the last one year preceding the date of enumeration. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

It has not always been possible to clearly define who is an economically productive worker and to what extent. The concept of worker, therefore, has varies from Census to Census. At each Census, on the advice of the data users and economic experts, the concept was sought to be improved upon to give what was expected to be a more correct picture of the economic activity of the people. In the 1951 Census, a significant change was made in the presentation of Census data. Prior to 1951 Census religion was adopted as the basis for broad classification of population. In 1951 Census, economic classification substituted the classification based on religion and it has been continued till 1981 Census; but then the Criteria such as duration of economically productive activties and some other relevant factors to determine the economically active population varied from Census to Census. The means of livelihood approach was adopted from 1901 upto 1951. From 1901 to 1921 the expressions used were "Workers" and "Departments". In 1931, the concept used were "earner", "working dependent and non-working dependent". In 1951 the categories were "Self Supporting Persons", "earning dependents", and "non-earning dependents". In 1961 and 1971, however, there was a shift to the labour force approach according to which a person was treated as "Worker" if his activity during the reference period was productive work. Thus from 1961 the concept of workers and non-workers and came into being. The difference in the concepts in 1961 and 1971 Censuses is summarised below :—

(a) 1961 Census :
"Workers"=main workers+marginal workers.
"Non-workers"= Non-workers.

(b) 1971 Census :
"Workers"='Main workers'.
"Non-workers" = Marginal workers+Non-workers.

The consequence of such conceptual changes is not far to seek. The number of persons classified as worker at the national level in 1971 was 175.0 million, which was less than the number of workers (182.5 million) on 1961 Census. This obviously led to a loss of some comparability of the data with those collected at different censuses. In order to obviate these draw-backs, at the 1981 Census it was considered desirable to obtain, as far as possible, a detailed profile of the working characteristics of the population without lossing possibility of some comparability, at least with the 1961 and 1971 results. The basic concept of workers and non-workers at the 1981 Census can precisely be explained as shown below :

Workers = Main workers + Marginal Workers
Non-workers = Non-workers.

Workers have been further classified into three categories viz. Main workers, Workers having secondary work and Marginal Workers.

Main Workers

A main worker is that a person who has worked 183 days or more or in other words for six months or more during last one year prior to the date of enumeration. The reference period of work is the one year preceding the date of enumeration. Certain types of work, such as, agriculture, household industry like gur making, etc. are carried on either throughout the year or only during certain seasons or at different parts of the year, depending on the local circumstances. In such cases the broad time span of the working period or seasons preceding the enumeration is only to be considered. Main workers are further grouped into 4 broad categories according to their main activities viz, cultivators, agricultural labourers, those engaged in household industry and other workers. These terms are explained below :

Cultivator

For the purpose of the Census a person was considered as cultivator if he or she was engaged in cultivation by himself/herself or by supervision or direction in his or her capacity as the owner or lessee of land held from private persons or institutions for payment in cash, in kind or share. Cultivation involves ploughing, sowing and harvesting and production of cereal and millet crops, such as, wheat, paddy, jowar, bajra, ragi etc., and pulses, raw jute and kindred fibres crop, cotton etc., and other crops such as sugarcane, ground-nuts, tapioca etc. Cultivation, however, does not includes fruit growing, vegetable growing or keeping orchards or groves or plantation of tea, coffee, rubber, and other medicinal plants and as such a person who grown these crops cannot be classified as cultivator.

Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation but he or she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land where he/she works.

If such a labourer is involved in growing such crops which are not included in cultivation, such as, fruit growing, vegetable growing or keeping orchards or groves or plantation of tea, coffee, rubber etc. and other medicinal plants, he/she is not treated as agricultural labourer.

Household Industry

Household Industry is defined as an industry conducted by the head of household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house if the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify for registration or has to be registered under the India Factories Act. It should involve production, processing, servicing or repair of articles (not on the scale of registered factory).

Other Workers

All workers, i.e., those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or not engaged in household industry, are "other workers". The type of workers that come under this category include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry, are "other workers" :

Workers Having Secondary Work

A main worker may have some secondary work in addition to main work. He is categorised as a worker having secondary work. He is, therefore, basically a main worker. In order to classify those workers who are having secondary work, the work of the main workers other than their main work is recorded. A person whose main work is shown as, say, a clerk in a Government Office or in another establishment also attends to cultivation by his direct supervision or undertakes some tuition work. this will be shown as his/her secondary work. A person's main work may be cultivation and his secondary work may be money lending. Again main activity may be agricultural labourer and secondary activity factory labourer and so on and so forth.

Marginal Workers

The concept of the marginal workers has been introduced for the first time in the 1981 Census. A marginal worker is that person who has worked any time in the year preceding the enumeration but has not worked for a major part of the year, i.e., for 183 days or more, or in other words 6 months or more during last one year prior to the date of enumeration.

Non-workers

Non-workers may be defined as those who have not participated or have been unable to participate in any economically productive activity during the last one year preceding the date of enumeration. The non-workers may again be categorised under seven broad heads. These are explained below :—

(i) **Household duties**—This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

(ii) **Student**—This will cover all full-time students and children attending school. In most houses; the daughters help in the household work though they are studying full time. In such cases we are more interested in finding out if they are students, and if they are, they have been recorded as student and not as "engaged in household duties".

(iii) **Dependents** This category includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age.

Dependents will include even able bodied persons who cannot be categorised in any other category of non-worker but are dependent on others. However, if such a person who is dependent on others for subsistance is seeking work, he or she will be categorised as other non-workers.

(iv) **Retired persons or rentiers.**—A persons who has retired from service and is doing no other work, i.e., not employed again in some economic activity for some part of the year, or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person having an independent means of earning as income for which he/she does not have to work, will come under this category.

Beggars etc -This covers beggars, vagrants or those persons without indication of source of income and also those with unspecified sources of subsistance who are not engaged in any economically productive work.

Inmates of Institutions—This covers convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work, such as, carpentry, carpet weaving, vegetable growing etc., in such institutions. But in the case of an under trial prisoner in a jail, for the work he/she was doing before he/she was apprehended is recorded for his/her work as economic activity. Similarly, a person temporarily in a hospital or similar institution is categorised according to the kind of work he/she was doing before he/she was admitted into the hospital or

institution. But for a long term under trial prisoner, or convict in a prison, or for a long term inmate of penal or charitable or mental institution, the person's previous work is not recorded but he/she is treated as non-workers under the category of 'Inmates of Institutions'. A person is considered "for long term" if he or she is in such a institution for 6 months or more.

Other Non-workers—This includes all non-workers who may not come under any of the above mentioned six categories but who are looking for work. A boy or girl who has completed education or has stopped studying and is looking for work comes under this category. A person who is merely spending his/her time at home as a dependent and is not doing any work and is not seeking any work, however, comes under dependent. A person irrespective of age and whether educated or not, if he or she reports that he or she is not engaged in any other activity but is seeking work comes under this category.

It may be noted that this category includes only those who do not fall into any of the other categories of non-workers discussed earlier.

The figures under different categories of non-workers are, however, not indicated in the tables presented in this publication, the total figures of non-workers are only reflected.

(ii) BRIEF HISTORY OF THE DISTRICT AND THE DISTRICT CENSUS HANDBOOKS

Formation of the district and district administration

East Kameng District was created only after House-listing Operation of 1981 Census. As per re-organisation of District Act, 1980, Kameng District was divided into two districts namely, East Kameng and West Kameng. The District headquarters of East Kameng District is Seppa which was the Subdivisional Head Quarters of erstwhile Kameng District. The newly constituted East Kameng District comprises of two Subdivisions namely, Seppa and Chayengtajo.

The name, Kameng is derived from the Kameng river, a tributary of the Brahmaputra. Till 1914, the District was a part of the Darrang District of Assam. By a Government of India, Notification of 1914, the area covered by this district became a part of the "Western Section" of the 'North East Frontier Tract'. In 1919, this tract was renamed as 'Balipara Frontier Tract' having its headquarters at Charduar in Assam. In 1946, the area covered by Balipara Frontier Tract was divided into 'Sela-Agency' and the Subansiri Area and its headquarters continued to beat Charduar. In 1954, Sela Sub-Agency was renamed as the Kameng Frontier Division and its headquarters was later shifted to Bomdila. In 1965 Kameng Frontier Division was renamed as Kameng District. In May, 1980 the District was bifurcated into two parts namely, East Kameng District (Erstwhile Seppa Subdivision) and West Kameng District (Erstwhile Bomdila Subdivision). The area of East Kameng District is 4,134 Sq. Kms. Details of the changes due to reorganisation of the district have been shown in Appendix I.

At the time of taking 1971 Census, the area covered by the district formed a part of the North East Frontier Agency which was then constitutionally a part of the State of Assam. The agency was directly administrated by the President of India through the Governor of Assam as his agent. In 1972 the Agency was made into a Union territory and renamed as Arunachal Pradesh. A Chief Commissioner, with his headquarters at Shillong, was made the Administrator of this new Union Territory. On the 15th day of August, 1975, Legislative Assembly was constituted in the Union Territory of Arunachal Pradesh with the Chief Minister and Cabinet of Four Ministers to assist the Lt. Governor appointed on the same day as the Chief Administrator of Union Territory. The Headquarters of the Union Territory was shifted to the capital sight at Itanagar in Lower Subansiri District in the year 1974.

The Panchayat Raj was introduced in the District with the North East Frontier Agency, Panchayat Raj regulation, 1967. Under this regulation (1) the Gram Sabhas exist at the village level, (2) the Anchal Samities cover the levels of Blocks, (3) the Zilla Parishad operates at the District level and (4) the Agency council (later on renamed as Pradesh Council in 1972 when the Council was renamed as Arunachal Pradesh) operates at the Agency level. The agency council/Pradesh Council, however, has lost its existence with the formation of Legislative Assembly in the Union Territory. The regulation provides for effective participation of the people in the administration of the Union Territory through the institutions set up under the Panchayat Raj Scheme. The Anchal Samities and the Zilla Parishad function as advisory bodies only. The Gram Sabhas or the village Councils have, however, some administrative powers within certain limitations.

The East Kameng District is divided into two subdivisions namely, Seppa and Chayengtajo Administrative responsibility of Seppa Subdivision directly lies with the Deputy Commissioner, East Kameng District The Chayengtajo Subdivision is under the charge of an Extra Assistant Commissioner General in a Subdivision is under the charge of an Addl. Deputy Commissioner). The Deputy Commissioner, however, is the head of the entire district administration. A Circle is treated as the lowest unit of administrative machinery which is looked after by a Circle Officer. At present there are 8 circles in the East Kameng district. A circle is defined as a group of villages and not as a territorial unit. Area figures below the level of the district are not available. The villages have their own customery administrative system in the form of traditional village councils. The Assam Frontier (Administration of Justice) Regulation, 1945 authorises the village councils to settle all civil cases and certain criminal cases falling within their jurisdictions. Besides, the Deputy Commissioner is invested with the powers of sessions judge and some Officers are given magisterial power Assam High Court has jurisdiction over the District Courts and hold appellate and revisional power. The Arunachal Police assists the district authorities to maintain law and order. But since the department is very new the number of police personnel is not sufficient to cover large area, this however, does not adversely affect the administration of justice.

Since 1975, the Union Territory recieved a full-fledged legislative Assembly and the members (MLA) are elected on the basis of universal adult Franchise systems of secret ballot, who are participating in the administration of the Territory/District, besides the Panchayat Raj members.

At the time when 1981 Census was taken, following was the administrative set up of the district.

DISTRICT HEADQUARTERS : Seppa

Sub-division :	*Circles*
1. Seppa . . .	1. Seppa 2. Pake-Keshang. 3. Pipu-Dipu. 4. Lada. 5. Seijosa.
2. Chayengtajo . .	1. Chayengtajo. 2. Bameng. 3. Khenewa (Wam).

As regards composition of the people and their history, it may be mentioned that the district is predominantly inhabited by the Scheduled Tribes of Arunachal Pradesh. The Scheduled Tribes population of the district accounts for 87.25% of the total population of the district. The Bangnis and Sulungs are the major tribes of the district. The history of all these tribes including their migration, material and socio-cultural and other allied aspects have been discussed in the District Census Handbooks of 1971 Census in respect of Kameng District. It is, therefore, felt not necessary to repeat the same in this Volume. A separate note on the change in their Socio-cultural and other aspects, however, needs a detailed and thorough study which is beyond the purview of this publication.

The District Census Handbooks

The District Census Handbook is an innovation of the 1951 Census. Prior to 1951 Census, Publications and report contained data upto Tehsil/Sub-Tehsil, Town and District level. Micro level data i.e. Statistical data for smaller Territorial Units-Villages in rural areas and enumerator's block/wards in urban areas were not published in any census report. With the rapid development and socio-economic changes in the society, necessity of data at micro level was felt considerably by the Government, economists, scholars and various data using agencies. With a view to making available these statistics at micro level, selected census data were given in the District Census Handbooks of 1951 Census and as such these Handbooks contained important Census data as well as general information relating to History, Physical aspects, geology, archaeology, climate, rainfall, administration, medical and public health, educational literacy, agricultural and co-operation, industries, local bodies, places of interest etc. relating to particular district.

The District Census Handbooks of 1961 Census underwent complete transformation and attempts were made them more comprehensive and informative.

In 1971 Census, efforts were made to make available both Census and non-Census data in a uniform manner with an enlarged perspective. The District Census Handbooks of 1971 Census had been split-up into three parts namely, Part A, Part B and Part C. Part A--was comprised of town and Village Directory while Part B –contained Urban Block/Village-wise Primary Census Abstract and Part C -included Administrative Statistical and Report.

District Census Handbooks of Arunachal Pradesh were brought out for the first time in the 1971 Census when the full fledged Census was also taken in Arunachal Pradesh for the first time. Arunachal Pradesh being a Union Territory having less Volume of data Part A and B of the District Census Handbooks were combined in one volume for convenience.

In the 1981 Census the District Census Handbook is divided into two parts only as follows:

Part A Comprising Town and Village Directory as it was in the 1971 Census.

Part B consisting of (i) District Primary Census Abstract, Circle level, (ii) Circlewise Primary Census Abstract (a) Village level and (b) Town level (within the town wardwise) and (c) Appendix to Primary Census Abstract showing Urban Blockwise total Scheduled castes and Scheduled Tribes Population and (iii) Primary Census Abstract for Scheduled Castes and Scheduled Tribes at circle level.

Part A and B of the District Census Handbook has been combined in one Volume as it was done in 1971 Census. There is no third part of the District Census Handbook in the 1981 Census. It has been experienced during 1971 Census that collection of administrative statistics pertaining to various departments take unusually long time and consequently this part of publication is inordinately delayed. It has, therefore, been decided not to go in for the administrative statistics in any case. The information would, however, be available to the data users in the publication of the concerned Statistical Bureaus/Departments.

This Volume

This particular volume will present Part A and Part B of the District Census Handbook pertaining to East Kameng District of Arunachal Pradesh. Since there is no town in East Kameng District, Town Directory in Part A and Town level data in Part B have not been included in this volume. Besides, Village Directories, Rural Primary Census Abstract and Primary Census Abstract for Scheduled Castes and Scheduled Tribes, attempt will be made to cover various aspects in this volume in order to present a representative overall picture of the district in a comprehensive manner. The highlights of the multifarious aspects intended to be dealt with in this volume are indicated below :

(a) Various Census Concepts.

(b) Brief History of the district and the District Census Handbook

(c) Scope of Village Directory and Primary Census Abstract (PCA).

(d) Physical Aspects—Highlights on the changes in the jurisdiction of district during the decade including its boundaries and any important event on geographic or geophysical aspect.

(e) Major characteristics of the district particularly in relation to the economic resources namely forestry, minerals and mining, electricity and power, land and land-use pattern, tenancy, agriculture, animal husbandry, fishery, industry, trade and commerce, transport, road communication etc.

(f) Major social and cultural events, natural and administrative developments and miscellaneous activities of note during the decade.

(iii) SCOPE OF VILLAGE DIRECTORY AND PRIMARY CENSUS ABSTRACT (PCA)

Village Directory

The village Directory is designed to give data on basic amenities available, landuse pattern, staple food, and also to give some more important information of a village. Village Directory data were collected on the basis of the position as existed during 1981 Census enumeration.

The format of the Village Directory is also on the pattern canvassed in 1971 Census except for a few additional columns. The column, the total population and number of households is added to facilitate analysis of Village Directory Data. The column on approach to Village is also added to know the number of inaccessible village in a district.

Main feature of the format for 1981 Census is its restructuring. Information in the columns for all the amenities except for power supply in the village, have been furnished in such a manner that in case an amenity is not available in the village, the name of the nearest circle if in the same district, or the name of the nearest district if in the same state, or name of other state where it is available and its distance from the referent village, is mentioned in order to gauge how far the amenity actually serve the purpose in the referent village.

While ascertaining number of schools in a village under column 5 of Village Directory format the following methods have been adopted.

If there are composite schools like middle schools with primary classes, or Secondary Schools with middle classes, and Primary classes, etc. these are included separately in the number of primary, middle and secondary schools respectively. For example, if in a village there are two primary schools and one middle school with primary classes, the humber of primary school in the village is given as three and that of middle schools as one even though there are only three educational institutions. The same method will follow in the case of other composite schools. Likewise in the case of medical amenities in column 6 of Village Directory format. If in a Hospital there is Maternity and Child Welfare Centre, Family Planning Centre and T.B Clinic Centre etc., all these have been counted separately. For example, hospital having Family Planning Centre and T.B. Clinic Centre, the number of medical institutions have been shown as Hospital (H), Family Planning Centre (FPC) and T.B. Clinic (T.B.).

Data for the columns—3 (total area of village), column—15 (area under forest), column—17 (area under dry rice cultivation) and column—19 (area under Jhum—Cultivation), supplied by the district authorities are purely based on eye estimation. As such, considering the fact that rough eye estimated data (no cadastral survey on land is done so far in Arunachal Pradesh) will not serve any useful purpose, it has been decided not to furnish these data, and 'NA' (for not available) has been recorded under these columns. Column—9 (Day or days of the market/hat) has been left blank (with dash only) in those cases where markets or hats are not held in the entire region.

Primary Census Abstract (PCA)

The Primary Census Abstract gives basic information on occupied residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes Population, Literates, Main Workers by broad categories of main activity (i.e., cultivators, agricultural labourers, workers in household industry and other workers), marginal workers and non-workers in respect of each village in case of rural areas and each block in case of urban areas for each Circle/Town separately. Similar information for all the Scheduled Castes and Scheduled Tribes as a whole are presented at the Circle level/Town level separately in the respective Primary Census Abstract for Scheduled Castes and Scheduled Tribes. These are also introduced for the first time in the District Census Handbook.

An Appendix is presented for urban Primary Census Abstract which contains basic population data block-wise in each urban area. This will be of use to the administrative and election authorities in the urban areas.

(iv) PHYSICAL ASPECTS OF THE DISTRICT AND HIGHLIGHTS ON THE CHANGES IN THE JURISDICTION OF THE DISTRICT

Physical description

East Kameng district is situated in the western part of Arunachal Pradesh which exactly lies to the east of West Kameng District, covering an area of (4,134) Sq. km. It is lying roughly between 92.36'E and 93.24'E longitudes and 26.56N to 27.59N latitudes. Its northern portion passes through the international boundary of China (Tibet) and some parts of the Lower Subansiri District of Arunachal Pradesh. In the east, lies Lower Subansiri District of Arunachal Pradesh and the southern boundary is bounded by Darrang District of Assam and western part is bounded by West Kameng District of Arunachal Pradesh.

Physiography

This district is an extention part of East-North-Eastward Bhutan Himalaya range. This Sub-Himalayan tract is made up of E-W to ENE-WSW Tartiary (Siwalik) ranges rising to an altitude of about 11,000 metres. There are longitudinal but ill defined 'Dun' type of valleys particularly to the East of Kameng river. The antecedent Kameng river cutting across this terrain receives the easterly flowing waters of the Tanga and Bichom rivers of West Kameng district and, Westward flowing Papu, Pachi and Para rivers etc. The northern part of the district is rugged and through numerous N—S ridges joins the ENE-WSW great Himalayan ranges.

Change in the Jurisdictions of the district

In 1971 Census, Arunachal Pradesh consisted of five districts, during 1981 Census, till houselisting operations, the same five districts which constituted during 1971 were in existence. But after the houselisting operations and before the actual census was conducted some changes took place due to the reorganisation of the district of Arunachal Pradesh under the Administration Act of 1980. According to the

re-organisation Act of 1980, four new districts were curved out from Kameng, Subansiri, Siang and Lohit districts, and altogether nine districts came into existence. The only district which was 'not affected' by the re-organisation is Tirap district. The name of the old and new districts are as shown below:

Sl. No.	Name of the old districts	Name of the present districts with the name of the old area from which new districts are created
1	2	3
1.	Kameng .	1. West Kameng (Bomdila Sub-division and Tawang Sub-division of Kameng district).
		2. East Kameng (Seppa Sub-division of Kameng district).
2.	Subansiri .	3. Lower Subansiri (Ziro and Koloriang Sub-division).
		4. Upper Subansiri (Daporijo Sub-division of Subansiri district).
3.	Siang . .	5. West Siang (Along, Mechuka and Tuting Sub-divisions of Siang district).
		6. East Siang (Pasighat Sub-division of Siang district).
4.	Lohit . .	7. Dibang Valley (Dibang Valley Sub-division of Lohit district).
		8. Lohit (Tezu and Hayuliang Sub-division of Lohit district).
5.	Tirap . .	9. Tirap (Tirap district).

The present district of East Kameng is constituted with Seppa (formerly Sepla) Sub-division with a few villages of Bomdila Sub-division of the erstwhile Kameng district. The following statements show the area of East Kameng district and its villages:—

District Sub-division	Territorial Unit of 1971	Area and No. of villages included to the present units of 1981	Net Area changed in Km² (+ or—)
1	2	3	4
East Kameng	Curved out from Kameng District	The entire Seppa Sub-division including villages of Pankar, Talom and Monggrang of Bomdila Sub-division of the former Kameng District.	NA
(i) Seppa Sub-division	Seppa Sepla Sub-division of former Kameng District	(1) Seppa Circle (71 villages)	NA
		(2) Pakke-Keshang Circle (32 villages)	
		(3) Pipu-Dipu Circle (35 villages)	
		(4) Lada Circle (17 villages)	
		(5) Seijosa Circle 17 villages)	
(ii) Chayengtajo Sub-division part of Seppa Sub-division		(1) Chayengtajo Circle (57 villages)	NA
		(2) Bemeng Circle (26 villages)	
		(3) Khenewa Circle (20 villages)	

NOTE.—NA means not available. Since there is no cadastral survey in the whole region, the area figures below the district could not be presented due to non-availability of the same.

(v) MAJOR CHARACTERISTICS OF THE DISTRICT

Forestry

According to the classification of Champion and Sethi, the following important forests types can be identified in this Union Territory:

(a) Assam Valley Tropical Wet-Evergreen Forests (IB/C1).

(b) Upper Assam Valley Tropical Evergreen Forests (1B/C2a).

(c) Upper Assam Valley Tropical Evergreen Forests (1B/C2b).

(d) Assam Valley Tropical Semi-Evergreen Forests (2B/C1a).

(e) Sub-Himalayan High alluvial Semi-Evergreen Forests (2B/C1/1S1).

(f) Secondary moist bamboo brakes (2/2S1).

(g) Eastern Hillock Forests (3/1S2a,b).

(h) Eastern Himalayan Wet Temperate Forests (11B/c1a,b,c).

(i) Larch Forests (13/C, 6/1).

(m) East Himalayan Sub-Alpine Birch Forests (14/C2).

(o) Moist Alpine Scrub Forests (15/C1).

The percentage of Reserved Forests to total Forest is around 13.67.

The life of the local tribal population in Arunachal Pradesh is closely linked with the forests. The people enjoy customary rights under the Assam Forest Regulations, over the collection of minor forest produce for their bonafide domestic requirements. For house construction purpose, each family is entitled to a 300 feet of round timber free of royalty etc. Besides all these facilities, the other benefit enjoyed by the people are:

(i) Permits for trees for trade purposes are issued only to the local people in order to improve their economy and inculcate business skills.

(ii) 7½ per cent concessions in the award of leases and contracts pertaining to forestry and other works.

(iii) Preferential treatment in the matter regarding issue of licenses for forest based industries.

(iv) Preference in employment in the Government establishments. Plantation is done under different scheme as follows:

(a) Afforestation upto 1981, for entire Union Territory is about, 1,869 hectares whereas for East Kameng district for the same period is around 4.0 hectares.

(b) Artificial plantation upto 1981 for the entire Union Territory is 19,722 hectares and for East Kameng District alone is 3,871.1 hectares.

(c) Aided Natural Regeneration upto 1981 for the region is around 11,208.9 hectares There is no specific report for the particular district.

Moreover, there are some other scheme of plantations implemented in the whole region such as cash crop, plantation, Social Forestry plantation scheme etc.

The forest has a great demand for the economic and commercial development of the region. It is a good source of revenue. In 1980, out of 674 lakhs of the Union Territory revenue, forest department alone gave 426.66 lakhs. Thus, Forest revenue as compared to the percentage of the Union Territory revenue is 63.22 per cent. The contribution of undivided Kameng district was about 43.75 lakhs.

During 1980-81, contribution of forest revenue was 383.22 lakhs of which East Kameng District share 0.60 lakhs.

Forest occupies 61.67 per cent of the total geographical area of the Union Territory. The whole forest area is 51,540 km^2 approximately and out of this, share of East Kameng is 5,231 km^2 (say 10.15 per cent) of the entire forest. The area of around 861.25 km^2 is under reserved forest in the district.

Basing on forest resources many saw mills and veneer mills, plywood mills have come up in the Union Territory, but East Kameng district has not yet started any of the mills till 1981.

Development of forest based industries is a promising feature in Arunachal Pradesh. Government has taken various steps to accelerate development on these types of industries through Industry Department.

Minerals and Mining

Arunachal Pradesh, the land of rising Sun lies in the North Eastern part of India forming a curved roof to the North-East. It embraces patrs of the Himalayas and is bounded to the South by the Plains of the Brahmaputra.

Geological Survey of India has been engaged in geological investigation in this remote part of India since the inception of this Department by organising expeditions. So far 16,000 sq. kms area of the Union Territory has been covered by geological mapping on all scales and vast area still remains terra-incognita. In course of geological investigations, the Geological Survey of India has located quite a few mineral occurrences in the area so far investigated.

East Kameng district is one of the districts of Arunachal Pradesh which has been already covered by Geological Survey Department. According to their report, the East Kameng district is composed of following mineral resources.

AGE	*Lithic unit*	*Correlation*
Pre-combrians with younger granites.	Se-la Group (developed in East Kameng district) Migmatites and high grade schists etc. Fine grade compact schists overlying. All intruded by tourmaline granites.	=Darjeeling-gneiss and other precombrians.
	Thrust	
Early palaeozoic to pre-combrians.	Bomdila group of schists and gneisses.	= Pero series of Bhutan.
	Tanga group of rocks consisting of schists gneisses and quartzites	=Dalings.
	Thrust	
Pre-permian carboniferous.	Carboniferous Devonian early palaeozoic	=Patty Buxa.
	Thrust	
Permion	Gondwana-hard sandstones and grey slaty shales (plant) fossils present.	=Ormudo.
	Thrust	
Upper Miocene-pleistocene	Tertiary sandstones and clays.	= (Siwalik = Tipan Namsang and Dihing)

The older (pre-cambrian 3000 million years old) age metamorphic and igneous rocks occupying the northern part of the district physically occur above the younger Gondwana (300-150 million years) and tertiary (70 millions years age) sedimentary rocks. This reversal in the order of disposition clearly suggests that the rocks alter their formation were subjected to strong deformation and movements, which brought the older rocks above the younger.

Mineral occurances.—So far as the geological report of the East Kameng district is concerned, the district does not have any important mineral resources except some limestone and calcareous bands.

Limestones. A massive and compact limestone band is exposed on the right bank of river Bichon, for a distance of 20 kms extending from East Kameng to West Kameng district. It is exposed in the road cutting, on Soppa road. Total thickness of the exposed calcareous zone is about 30 metres, of which limestone is nearly 50 per cent.

Calcareous bands are found in Bichom river down stream of Banabasti in East Kameng district.

Electricity and Power

Arunachal Pradesh has vast resources for the genetation of Hydro-electric power. This power potential is estimated at nearly 20,000 MW. If properly harnessed it can help to support not only the development programmes of the Union Territory but also it can feed the rest of the region. So far, the Union Territory has been able to generate about 8,000 KW of hydel power through micro-hydel schemes with the help of which 287 villages and district headquarters have been electrified. At present 22 Micro-Hydel Schemes are under investigation by the Public Works Department.

The East Kameng district is extremely poor in terms of electricity and power supply. Electricity is available only in Seppa the headquarters of the district, which has a major generator set of 12.5 KW capacity installed during 1965. Of the existing 9 (nine) districts, East Kameng has the least electrified villages

(*i.e.* only one) in the territory. During 1982-83 a number of villages are proposed to be electrified.

The Thermal Power Project is not yet installed in East Kameng district due to various technical reasons. However, there is plan and programme for the power supply in the rural areas as a prerequisite for various other developments.

Major utilisation of hydro power potential will be for agriculture pumping sets, small scale industries, rice mill, handloom industries, sericulture, mechanised small scale industires in rural and uraban areas as well as electrification of villages in Seppa areas.

This will obviously play an important role in accelerating the economic standard of the people of the area.

All efforts are made for full utilisation of hydro generation and improve skills, technologies, socio-economic and cultural condition. Once the people get used to the benefits of having the basic facility of tapping the electrical energy at their door steps, this will naturally receive the greater attention for industrial and agricultural growth.

Land Records

In the absence of any land legislation in Arunachal Pradesh proper survey and settlement operation scheme could not be taken up effectively. Only piece-meal land surveys have been taken up here and there in the territory. For want of adequate trained personnel to work in the difficult hilly terrain remarkable progress could not be achieved. It is therefore, proposed to take up a comprehensive statewise survey and settlement operation scheme during the sixth Five Year Plan; 1980-85, for which proper land legislation as necessary to suit the conditions prevailing in the Territory, has been drafted and is under consideration of Government for enactment.

To begin with the proper survey and settlement works, traverse survey and preparation of polygous etc. will be undertaken in the capital complex areas and other townships. Gradually the work will be undertaken in other areas.

After promulgation of the land settlement Act in Arunachal Pradesh the rights on lands will be recorded and pattas will be issued to individuals and, as a continuous process the maintenance of land records will also be taken up.

Agriculture

(a) **Importance and predominance of agriculture**—Agriculture is the backbone of our country. About 70 per cent of the total population are dependent on agriculture, and as regards East Kameng district, it is about 95 per cent.

(b) **Scope and potentiality for development**—Cultivation of various agriculture crops depends on the availability of arable lands. East Kameng district is situated on hilly tracts ranging from 150 metres to 1820 metres of elevation. It is blessed with vast valleys at the sub-tropical region, having immense potentialities for growing cereal crops. The following table will give the estimated data for the agriculture with approximate figures.

LAND STATISTICS (1981)

Geographical area	Total number of farm holdings	Total area under the holdings	Net area under cultivation		Area under holding which can be connected with Jhumpermanent cultivation
			Permanent	Jhum	
1	2	3	4	5	6
588700 hectares	6791	39428 hectares	1830 hectares	5420 hectares	1200 hectares

(c) **Place of shifting cultivation**—The cropping pattern in a region is concerned with the geography of the region, type of soil, infrastructure, technique of operations and the requirement of the people. The farmers of this region have been practising shifting cultivation from time immemorial. The low yield in such cultivation results in shortage of food production and misery of the people.

The average yield of paddy in jhum field is 11.3 quintals per hectares in this district, whereas in permanent cultivation it is 35 quintals.

(d) **Effort of administration and other agencies in the field of agricultural development.**—Ever since the commencement of the administration, efforts are being made to improve the socio-economic status of the people by developing agriculture.

The first step to rejuvenate agriculture was the changing method of cultivation from "Jhum" to "permanent cultivation". The administration's effort in this respect has given a good result. So far 1830 hectares (approximately) of land have been brought under permanent cultivation.

Second programme is to supply agricultural tools and implements to encourage the farmers for adopting improved method of cultivation. This has been a large impact generating a tendency to bring up food-production.

The major agricultural tools and implements supplied to the farmers on 50 per cent subsidised cost are Tata Hoe, Jumper, Shoved, Khurpi etc. All these replaced indigenously made "Dao" the only equipment known to the farmers during "Jhum Era".

The third programme undertaken by the department of agriculture is the supply of plough bullock on 50 per cent subsidised cost. This particularly revolutionised the agriculture activities in this district. Ploughing was totally unknown to the farmers of this region, in earlier days. Introduction of M.B. Plough has been a great boon to the cultivators.

Previously, in this district, there was only mono-crop in kharif season. Now the Rabi crop season is also practised with the introduction of H.Y.V. programme. This practically overcome the low-yield joit and enhanced food production.

To encourage the farmers to grow both short duration and long duration cash crop to earn hard cash, cultivation of commercial crops iike potato, mustard etc. have been introduced in the district.

To get the optimum yield of the crops in this district is the proper manuring the only alternative. Hence the department of agriculture has undertaken a programme on supply of manure and fertilizers on 75 per cent considered cost. Horticulture is one of the important programme for a step towards economic growth of the farmers. Hence cultivation of fruit plants in the hilly sloped areas are encouraging in the district on priority.

To save the loss of food grains, plant protection chemicals are as usual instrument. Strategy in this direction is to equip with more p.p. chemicals and equipments so that free and timely services can be rendered to the farmers of this district.

The table below depicts the approximate area under different types of crops and its production during 1981-82.

Sl. No.	Crops	Area in Hectares	Production in M/Tones.
1	2	3	4
(A)	*Cereals*		
	Paddy . . .	5,211	10,165
	Maize . . .	1,082	1,118
	Wheat . .	26	64
	Millet . .	719	447
(B)	*Pulses*		
	Black gram . .	2	1
	Soyabean . .	3	1 8
	Local pulse . .	90	37.8

	Papaya . .	10.00	20.0
	Jack fruit. . .	10.00	30.0

Animal Husbandry and Veterinary

East Kameng district having the total population of 42,736 persons is rearing about 50,000 Livestocks and 1,30,000 poultry birds. It is helping the people of the district to progress in the path of socio-economic development. At least 95 per cent households of the district are very keen in rearing livestocks and poultry birds. Originally, they reared indigenous or 'Deshi' breeds of livestocks but, after setting up of Animal Husbandry and Veterinary Departments, maximum people are more interested for rearing high or imported breeds. All efforts have been made by the Government to establish Dairy, Piggery and Poultry farms etc. in the district and in the whole Union Territory. The main factor which stands in between the local people and development of different farms is the necessity of well linked road communication which this district is lacking.

In spite of such difficulties, the Arunachal Govt. has set up the following veterinary institutions in the district upto the end of 1981-82.

Veterinary Dispensary . . .	5 Numbers
Cattle upgrading Centres . .	6 Numbers
Veterinary Aid Centres . . .	3 Numbers

The main aim and objects of these institutions are to extend all possible and necessary Veterinary aids *i.e.*, vaccination, treatment of castration and, to upgrade the indigenous and Deshi breed of animals and other medical facilities to animals. All staffs who are posted against every institutions mentioned above, take utmost care and guidance to the people for proper implementation of the Govt. schemes.

The Department of Veterinary and Animal Husbandry is taking all necessary steps and measures to introduce the new schemes and plans of the Govt. among the people. By now, maximum people have been benefited from the Government Schemes, although, there are, still some people who are not although, there are, still some people who are not operation and help of the departments. (subsidies etc.)

A district Dairy farm under Seppa area is under consideration of the Government in order to the meet the demands for milk in the district. This district and for that matter the entire Union Territory itself

is having a much better scope for development of rural economy with the help of the Animal Husbandry and Veterinary Department.

Fishery

Kameng river passes through the middle of the East Kameng district with its crystal clear water throughout the year, facilitating fish harbour fish schooling, fish breeding ground, fish feeding etc. The species available in the district are Mahseer Spp. Schezothorax Spp. Major carp. Spp. Minor carp Spp. cat fishes Spp. Chana Spp. Minnow etc. Kameng river and its tributaries like Pachi, Bicha, Papu, Para Kakoti Keyang, Pakke and other streams and chanels are possessing sound potential of natural water fishes. Besides, there are many natural lakes, Swamps, derelic water and ponds existing in the forest, where fish census is still due.

In addition to this natural resources, Inland intensive fish culture practice is also newly introduced in East Kameng District since 1971-72. At present modern scientific technique have been applied to develop more fisheries activities in the district to motivate rural people towards pisciculture programme in their village domestic fish ponds and in the paddy fields. This kind of fish culture programme can help the rural people to earn extra money from fish sale proceeds and raise their economic position better besides consuming fish as food.

Riverine Source

The cold water Indigenous fishes of different varieties *i.e.* Masheer Spp. Tor tor Spp Labeo family Minor carp, Schezothorax Spp. Loaches Spp. Cat fishes Spp. Channa Spp. Tor puttitora weighting upto 15 Kgs are abundant in the rivers of East Kameng District. The rivers are controlled by the villagers which passes through within their jurisdiction, but there is no effective control of the river system. The fishing technique practised by the villagers are below standard. They use hook and line, by casting nets, diverting the water current and preparing bamboo traps. Besides these, there are two destructive methods which villagers adopt sometimes, are (1) by blasting operations and (2) poisoning water by a kind of roots from bush tree, called "Tammu" (a local name). These two practices are very much harmful for all kinds of fishes small and big; it spoils the breeding ground for ever. Such kind of destructive fishing system is being discouraged by the Fishing Department and attempt to control the riverine source is also being made by the Department, step by step. A study is made to declare fish sanctuary, close season, fish schooling ground protection of fish breeding ground for introduction of standard method of fishing by adopting modern technology and gears.

There are sound scope of fish flesh from the riverine source, it can be used judiciously. For this matter, this natural source must be used for sports (angling) only, as river fishes are very good for game where one can gain health, and for economic point of view to uplift the rural economy of the people.

In this district there are good number of natural lakes which could be used for fishing industry. The Administration has already taken initiative in this regard. In two lakes namely, Yarte Pobe and Yabje, common carp seed have been released during the year 1979-80 which are breeding very fast and surviving also although netting is not possible in these two lakes due to presence of logs and non-reclamation.

Goverment Patronisation

Fishing from natural sources like river is very much limited and people do not get fish according to their demand and requirement. It is also difficult to fish under the strong current of river. In order to avoid these difficulties and shortage of fish in the area, Arunachal Government is encouraging local people for establishment of fish farms and ponds for which Government is providing 50 per cent subsidies. Although fish culture is a very old system, for the people of East Kameng District it is a very new and interesting programme for which there is a great demand in rural areas in the circle like Khenewa, Lada, Pipu-Dipu,Chayengtajo etc. Besides helping the people in establishing fish ponds and farms, the government is encouraging them in many ways by way of seasonal, or torrential water body culture, paddy-*cum*-fish culture, Piggery-*cum*-fish culture Gottery-*cum*-fish culture, Agriculture by product-*cum*-fish culture, swamps fish culture, Cage culture, Running water fish culture etc. But, till 1981 Census only two techniques have been introduced in the East Kameng District. These two techniques are (i) Fish culture in village Domestic fish ponds and (ii) Paddy-*cum*-fish culture. Of these two, culturing in Domestic fish ponds are very much encouraging. The people of this area are now aware of the importance of fishing for commercial purpose besides their domestic consumption.

In addition to the Government policies and implementation for fish culture at East Kameng district, many villages of Chayengtajo also started fish ponds through the integrated Rural Development Programme.

Commercial Viability

At present the Village Domestic Fish Ponds owners can produce fish for their family demands. Although, there are 59 villages fish ponds existing in the East Kameng District it cannot produce fish in a very large quantity so far for sales outsides on large scale commercial basis yet, a great improvement has been made towards fish farming among the villagers of East Kameng district.

As stated above, the district of East Kameng has a sound potential of cold water upland fishes. From Fishery Administration point of view, these precious Indigenous fish species should be conserved for years to come and care should be taken to use them judiciously. For conservation of these species, some measures have to be taken by introducing certain Fishery Acts, as follows : (1) Declaration of Fish Sanctuary, (2) Declaration of close Season, (3) Introduction of Fishing Licence, (4) Introduction of Mesh Size net, (5) Preservation of breeding ground, (6) Introduction of improved method of fishing gears and (7) Control of water pollution *i.e.* from pesticides, weedycide, insecticides and other natural poisons and chemical etc.

Papu Valley is a very suitable area for paddy-*cum*-fish culture. An Induced Breeding Farm has been started in this valley under Pakke-Keshang Circle to meet the Fish Seed demands of the district. Besides this, there are many natural lakes in the district where fish can be directly reared for commercial purposes.

Industry

The people of this district are mainly dependent on agriculture and as such the district is not so industrially based district. However, effort has been made by the district industries department for establishing new industries in different places. At Seppa and Chayengtajo craft centres have been opened by the industries department to popularise the indigenous craft in the market as well as outside Arunachal Pradesh in order to fetch the additional income so as to raise the standard of living of the people.

The administration is also encouraging the people to utilise their spare time in the field of Sericulture and Weaving. There is also weaving centre at Seppa and Chayengtajo where the local women can get training for weaving of varieties of garments. After the training for a stipulated period is completed successfully the women get employment in the Weaving Centres itself for production of garments. The Craft and Weaving Centres are basically established for giving employment to the local people as well as for production of different items of indigenous people for sale.

In Industries Department, apart from the identification and formulation of projects for large and medium industries, special emphasis on village and small industries will continue. Industries Department has various plans and programmes to be taken up through the Arunachal Pradesh Industrial Development and Financial Corporation either in the joint sector or in collaboration with private capital, as decided by the Government. Some of their future plans and programmes are given in the following paras :

A big push and impetus will be given to handlooms and handicrafts (with an added thrust to handlooms wool, wool and carpets, as selected craft). Production will be organised on a group basis and the entire responsibility for supply of raw materials and marketing of finished products will be taken up by the Corporation.

Besides, these traditional handicraft agro-based and timber based small industries will be encouraged specifically in the areas of fruit processing, manufacture of handtools, agricultural implements, milling of food grains and oil seeds and processing of certain specific commercial crops like ginger, turmeric and chillies. It is envisaged that the saw mill veneer and plywood industries will reach saturation point during the Sixth Five year Plan period. Therefore, the direction of progress will be towards diversified small industries like match splinters, toys and handicrafts as well as a small beginning in terms of growing cocoa, small cardamom, stone and nut fruits.

The organisation through which these activities will be undertaken would be departmental by providing services, training and accommodation to the entrepreneurs. The financial assistance would also be borne through the department. The commercial banks and the corporations would establish close links for rendering financial assistance to the employees of the corporation. The corporation would also maintain liaison with other production sectors so that identification of various projects and other small industries are in line with the general focus of development in the territory.

Trade and Commerce

The main centre of trade and commerce is Seppa, the district headquarter of East Kameng District. The people of the ensure district depend on Seppa for a lot of essential commodities and many of their daily necessities.

Till the middle of 1975, the entire district was wholly dependent on air lifting when the first Fair Price Shop was started in Seppa. Even now almost whole of the District, except Seppa, depends on air lifting. The volume and extent of airlifting in the District could be judged from the fact that many of the building in chayentajo were constructed with air-lifted corrugated iron sheets, cement and other iron materials. Approximately 1200 tonnes of food stuffs and other materials are annually airlifted for the district. Due to road communication difficulties, the development of trade and commerce in the district is lagging behind. This poor road communication also prohibits sizeable production for trading and export.

Transport and Communication

From the point of transport and communication the East Kameng district is the most backward of all the nine districts of the Union Territory. All the roads are kucha and unsurfaced except road upto Seppa and Seijosa from the main road connecting Assam and Bomdila, the District Headquarter of West Kameng District.

The main requirement for road communication is the construction of a good number of bridges over the rivers and streams. The bridging of river/streams takes long time due to non-availability of tools and plants, labourers etc. Also the ration commodities and medical facilities to the workers are not readily available. However, steps are being taken to provide such facilities to the workers by the Government of Arunachal Pradesh.

(vi) MAJOR SOCIAL AND CULTURAL EVENTS, NATURAL AND ADMINISTRATIVE DEVELOPMENTS DURING THE DECADE

Major Social and Cultural Events

The district is predominantly inhabited by the local Scheduled Tribes. People of other communities are outsiders who are temporarily staying there for their livelihood only. The local Scheduled Tribes, therefore, are only concerned with the major social and cultural events of the district. Social and Cultural Events are very much associated with their life. As such the social and religious life, the environments and other relevant aspects of the tribal people are also described in the following paragraphs alongwith the major social and cultural events for better understanding of their values and implications in the real social life of the people.

The tribes called the Bangnis and the Sulungs inhabit the area contiguous to the north eastern Kameng extending to the Lower Subansiri District. The Bangnis are known as Nishi, Nishang, Nissi or Dafla in Subansiri district.

Marriage of the Bangni people takes place through the process of formal negotiation between the parents of both the parties. After a stipulated bride price has been paid, the girl comes to live with the hubsand. There are no formal ceremonies which mark the consummation of marriage. The husband and the wife are both clad in clothes and wear a number of ornaments. Besides, the marriage by elopment and the marriage by service is also prevalent in their society but is practised in rare cases.

The tribe endogamy and clan exogamy is the normal rule. Though polyandry is not known to them, polygamy is very common. Bangni society is patrilocal, patriarchal and patrilineal.

The Sulungs are a scattered tribe. The Sulung society is not based on the unit of village community. They do not observe rituals and ceremonies on a community basis. They do not have any festival as such.

The Bangnis have a number of festivals of their own of which Mlokom Yulo is the major one. It is the only festival which is celebrated annually, in every village on a community basis in the Bangni months of Lakang & Leehar corresponding to the English months of March & April, amidst great joy and devotion and unbounded enthusiasm.

The festival is celebrated for five days but occasionally the period may extend to seven days depending on the result of divination, performed prior to the fixation of the date for celebration. The divination is done by a local priest (Nibu) by examining the liver of a fowl and the yolk of an egg respectively.

The site where the festival is performed is called Mlokom-Yulo-Nyageng. They do not have a permanent festival place. On the previous day of the festival the villagers keep themselves busy in collecting rice-beer (APO), rice for making rice powder (Atong), egg and endi silk cloth (Tungdo-Aje). Sacrificial animals and birds such as mithun, cow, pig, goat and fowl are usually purchased either from their common village fund or by collecting money or paddy from each household.

The festival is started with a worship in the name of the God—Doni-Yulo, where rice-beer, rice powder and white cock are offered. Another God called Kamio-Yulo is also worshiped in the same place by offering only rice-beer. When the prayers are over, the white cock is brought down to examine its liver with a view to knowing the Omen of the festival. Different worships are performed on different days in the name of different gods and goddesses by offering and sacrificing different animals in accordance with the result of divination.

At the end of the festival, the villagers observe tahoo for five days during which period they do not go out of the village. The observance of taboo is known as 'Mlokom-Arina'.

Administration participation

The people of all the areas both local and other including tribals and non-tribals irrespective of caste, clan and creed uniformly participate in the 'Mlokam Yulo' festival which is celebrated in the circle, subdivision or district headquarters. The Arunachal Pradesh Administration extend all possible help including financial aids, in the form of festival grants etc. to make this festival a success.

The publicity Department plays an important role to make this community festival a success by providing public address equipment and organising cultural programmes alongwith the traditional songs and dances of the Bangni people.

Trends towards change

Change is inevitable in all the societies i.e., rural, urban and tribal. But the notable thing is the rate and dimension and direction of change. Change among the culturally and socially homogenous groups of people also varies in terms of social status ranks, etc.

Among the Bangnis of East Kameng District social, cultural, economic and political changes have been noticed in different degrees. The society is gradually marching towards modernity in habits and practices, dress and ornaments, food habits, political and administrative outlook, ways of life, etc. and this change is seen not only in the administrative centres but also in the rural areas to some extent. The major factors affecting these changes are the introduction of transport and communication facilities, contact with the peoples from other parts of the country, introduction of modern educational system, introduction of new agricultural system like wet rice cultivation and terrace rice cutivation by the Government in place of traditionally practised jhuming, introduction of modern medical facilities, formation of Legislative Assembly, introduction of Panchayati Raj.

(vii) BRIEF ANALYSIS OF THE VILLAGE AND PRIMARY CENSUS ABSTRACT

There is no town in this district. Before coming to the brief analysis of the village Directory and primary Census Abstract, an attempt is made to give a comparative position of some demographic aspects of the district so as to have some over all idea of the district as a whole.

The population count of 1981 Census of East Kameng district reveals that there are 42,736 people which constitutes only 6.76% of the total population of Arunachal Pradesh. The East Kameng district has the smallest area among all the districts of Arunachal Pradesh. The population size, however, is not so small as compared to its area. The district with the largest population is Tirap district with 20.36% population of the Union Territory. The following statement will illustrate the position.

AREA POPULATION, SCHEDULED TRIBE POPULATION AND DENSITY POPULATION OF THE DISTRICT OF ARUNACHAL PRADESH

Sl. No.	Territory/District	Area (Km^2)	Population	Density (persons per Km^2)	Scheduled Tribe population
1	2	3	4	5	6
	Arunachal Pradesh	83,743	6,31,839	8	441,167
1.	West Kameng .	9,594	63,302	7	41,963
2.	East Kameng .	4,134	42,736	10	37,286
3.	Lower Subansiri .	13,010	112,650	9	87,605
4.	Upper Subansiri .	7,032	39,410	6	36,131
5.	West Siang . .	12,006	74,164	6	62,323
6.	East Siang . .	6,512	70,451	11	50,728
7.	Dibang Valley .	13,029	30,978	2	15,044
8.	Lohit . . .	11,402	69,498	6	30,130
9.	Tirap . . .	7,024	128,650	18	79,957

When all the districts are ranked it is observed that East Kameng district ranks second in sex ratio i.e., number of females per one thousand males, while the Upper Subansiri district ranks first in sex ratio amongst all the districts of Arunachal Pradesh.

Sl. No.	Territory/District	Population		Sex Ratio	Rank
		Males	Females		
1	2	3	4	5	6
	Arunachal Pradesh	339,322	292,517	862	..
1.	West Kameng .	34,087	29,224	858	6
2.	East Kameng .	21,999	20,737	943	2
3.	Lower Subansiri .	59,756	52,894	885	4
4.	Upper Subansiri .	19,424	19,424	972	1
5.	West Siang . .	38,797	35,367	912	3
6.	East Siang . .	38,097	32,354	849	7
7.	Dibang Valley .	18,646	12,332	661	9
8.	Lohit . . .	39,024	30,474	781	8
9.	Tirap . . .	68,939	59,711	866	5

The percentage of sheduled tribe population of East Kameng district to total population is 87.25 i.e, second in rank, whereas Upper Subansiri district ranks first amongst the districts of Arunachal Pradesh.

The comparative picture of Scheduled Tribe Population with total population of the districts of Arunachal Pradesh are shown below :—

Sl No.	Territory/District	Population			Scheduled Tribe Population			Percentage of S. T. Population to total population
		Total	Males	Females	Total	Males	Females	
1	2	3	4	5	6	7	8	9
	Arunachal Pradesh . . .	631,839	339,322	292,517	441,167	220,046	221,121	69.82
1	West Kameng . . .	63,302	34,078	29,224	41,963	20,900	21,063	66.29
2	East Kameng	42,736	21,999	20,737	37,286	18,410	18,876	87.25
3	Lower Subansiri	112,650	59,756	52,894	87,605	43,539	44,066	77.77
4	Upper Subansiri	39,410	19,986	19,424	36,131	19,642	18,489	91,68
5	West Siang	74,164	38,797	35,367	62,323	30,922	31,401	84.03
6	East Siang	70,451	38,097	32,354	50,728	25,515	25,213	72.00
7	Dibang Valley	30,978	18,646	12,332	15,044	7,376	7,668	48.56
8	Lohit	69,498	39,024	30,474	30,130	15,212	14,918	43.35
9	Tirap	128,650	68,939	59,711	79,957	40,530	39,427	62.15

The variation in the population of East Kameng District in between 1971 and 1981 Census has been found to be very low i.e. 19.57 as against 35.15% in Arunachal Pradesh. The highest growth rate is found in the district of Dibang Valley which is an abnormally high growth rate whereas the rest of the districts including the Union Territory itself are between +20.00% to +45.00%. The growth rate of East Kameng district is also below the Union Territory growth rate and it ranks ninth position compared to other districts of Arunachal Pradesh. The following statement giving the percentage of decadal variation in different districts of the territory reveals the position.

GROWTH RATE OF POPULATION IN ARUNACHAL PRADESH AND ITS DISTRICTS

Sl. No.	Territory/District	Growth Rate	Ranks
1	2	3	4
	Arunachal Pradesh . . .	+35.15	
1	West Kameng	+25.95	6
2	East Kameng	+19.57	9
3	Lower Subansiri	+39.22	4
4	Upper Subansiri	+23.10	8
5	West Siang	+25.19	7
6	East Siang	+43.76	3
7	Dibang Valley	+103.37	1
8	Lohit	+45.90	2
9	Tirap	+31.99	5

The analysis of the Village Directories and the Primary Census Abstracts is now given below on the basis of some inset tables having basic data compiled from the Village Directories and Primary Census Abstracts.

TABLE 1
POPULATION, NUMBER OF VILLAGES AND TOWNS, 1981

Sl. No.	Name of Sub-division/ Circle	POPULATION									No. of Villages		No. of Towns
		Total			Rural			Urban					
		Persons	Males	Females	Person	Males	Females	Persons	Males	Females	Total	Inhabited

District Total . . .		42,736	21,999	20,737	42,736	21,999	20,737	..	..	..	275	275	..

From the above table it may be seen that the total population of East Kameng district is 42,736 persons of which 21,999 are males and 20,737 are females. Of the circles population in the district, Seppa circle has the highest 15,290 persons, of which 7,992 are males and 7,298 are females. The least populated circle is Lada, it has 1,929 persons, males being 993 and female 936. Of the 8 (eight) circles of the East Kameng district the two circles namely Pipu-Dipu and Pakke-Keshang have female domination while rest of the 6 (six) circles are predominated by the males.

There are 275 inhabited villages in the East Kameng district. There is no uninhabited village in the district. In the distribution of villages among the circles, Seppa Circle has the highest number of 71 villages. The smallest number of villages of 17 each are found in the circles of Lada and Seijosa.

It is seen from the table 1 that the largest circle of East Kameng by size of population is Seppa which consists of 15,290 persons out of 42,736, the percentage being 35.78. The smallest circle is found to be Lada with a population of 1929 persons and it contains only 4.51 per cent of the district population.

The following table will indicate the position.

Sl. No.	District/Circle	Percentage of distribution of population
1	2	3
	EAST KAMENG	100.00
1	Seppa	35.78
2	Pakke-Keshang	6.87
3	Pipu-Dipu	10.98
4	Lada	4.51
5	Seijosa.	4.89
6	Chayengtajo	16.78
7	Bameng	11.11
8	Khenewa	9.08

The sex ratio of Pipu-Dipu circle is found to be highest where there are 1058 females per one thousand males. The second in rank is Pakke-Keshang with 1057 sex ratio which, however, has got negligible variation from that of the former circle. The lowest sex ratio with only 571 females per one thousand males is found in Seijosa circle. The table shows the fact.

Sl. No.	District/Circle	Sex Ratio
1	2	3
	EAST KAMENG	943
1	Seppa	913
2	Pakke-Keshang	1,057
3	Pipu-Dipu	1,058
4	Lada	943
5	Seijosa.	571
6	Chayengtajo	999
7	Bameng	981
8	Khenewa	947

The average size of the village in East Kameng district is 155 persons which indicates that the district is moderate. The highest average size of the village is found in Seppa circle with 215 persons. Khenewa circle comes next with 194 persons while Pakke-Keshang circle with on 92 persons is having the least average size of the villages.

The following statement will give the position.

Sl. No.	Name of the District/ Circle	Average size of persons of the Villages
1	2	3
	EAST KAMENG	155
1	Seppa Circle. . .	215
2	Pakke-Keshang Circle .	92
3	Pipu-Dipu Circle . .	134
4	Lada Circle . . .	113
5	Seijosa Circle . .	123
6	Chayengtajo Circle .	126
7	Bameng Circle . .	183
8	Khenewa Circle . .	194

The following table 2 shows the decadal change in distribution of population by circle for the district of East Kameng. From the table it may be seen that the population of East Kameng as recorded in 1971 is 35,742 and, it is increased to 42,736 in 1981. The rate of growth recorded during the decade is 19.57 per cent. The actual increase of population in the decade is 6,994 persons.

The growth rate of all the circles of the district are not uniform some are abnormally high like Seijosa whose growth rate is 88.88 per cent, and others are as low as 0.54 per cent which is recorded against Khenewa circle. Other low rate is found in Bameng circle, it is 1.87 per cent. The other circle have in between 17 to 27 per cent except Lada circle where it is recorded 9.79 per cent.

The abnormally high growth rate recorded against the circle of Seijosa may be due to the re-settlement of ex-service men and internal migration of local people as the area being the plain it is considerably suitable for cultivation.

TABLE 2

DECADAL CHANGE IN DISTRIBUTION OF POPULATION

No.	Name of Sub-division/Circle	Population 1971 Total	1971 Rural	1971 Urban	1981 Total	1981 Rural	1981 Urban	Percentage decadal Variation (1971-81) Total	Rural	Urban

The table 3 below shows the distribution of villages by population ranges. As already mentioned earlier, there are 275 inhabited villages in the district of East Kameng. Most of these villages are small in population size. It may be seen that out of 275 villages, 205 villages or 74.55 per cent are in the population range of less than 200. The next 65 villages or 23.64 per cent are within the range of 200-499 and four villages are within the range of 500-1,999. Only one village (i.e. Seppa the District Headquarter) is within the population range of 2000-4,999 and, it is village with maximum population.

TABLE 3

DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of Population	No. of village in each range	Percentage of villages in each range
1	2	3
Less than 200	205	74.55
200—499	65	23.64
500—1,999	4	1.45
2,000—4,999	1	0.36
5,000—9,999	..	..
10,000 +	..	..
District Total	275	100.00

The total number of Scheduled Castes populations in the district of East Kameng is very poor, there are 159 persons only as recorded in the 1981 Census. Out of 159 persons of the district, 138 persons are concentrated at Seppa Sub-division. The Scheduled Castes population are not indigenous, they are mostly service holders and few of them are engaged in trade and commerce. The proportion of Scheduled Castes population to total population in the village as recorded in the Union Territory itself is also very low, it is 0.46 per cent whereas East Kameng district has a lower proportion of 0.37 per cent only. The villages are arranged according to the proportion of Scheduled Castes population of the individual village in seven broad percentage range as reflected in the table below:

TABLE 4

PROPORTION OF SCHEDULED CASTES POPULATION TO POPULATION IN THE VILLAGE

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	258	93.82
0— 5	14	5.09
6—10	2	0.73
11—15	..	..
16—20	1	0.36
21—30	..	..
31— and above	..	..
Total of the District	275	100.00

The Scheduled Castes population are scattered in 17 villages in the district, which means 258 or 93.82 per cent villages are void of the Scheduled Castes population. From the table it may be seen that out of 17 villages, 14 villages or 5.09 per cent villages have less than 5 per cent 2 villages or 0.73 per cent have more than 6 per cent but less than 10 per cent. The last range is 16.20 per cent where only one village is recorded and it is the lowest percentage of Scheduled Castes population in the district.

As mentioned earlier 87.25 per cent of the district population is Scheduled Tribes, they spread over the whole district which can be seen from the following table according to the proportion of seven broad ranges:—

TABLE 5

PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Tribes population to total population	Number of villages in each range	Percentage of villages in each range
1	2	3
Nil	4	1.45
0— 5	2	0.73
6— 15	3	1.09
16—25	3	1.09
26—35	3	1.09
36—50	5	1.82
51 and above	255	92.73
Total of the district	275	100.00

Out of the 275 villages 271 villages have the Scheduled Tribes population, again from which 255 villages have more than 51 per cent of the total population of the villages. Only 4 (four) villages or 1.45 per cent of the villages do not have Scheduled Tribes population. These four villages are the settlement area of the ex-service man.

The next table is the literacy rates by population ranges of villages:—

TABLE 6

LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of population	No. of villages in each range	Literacy Rate
1	2	3
— 200	205	1.41
200 — 499	65	2.30
500 — 1,999	4	0.73
2,000 — 4,999	1	3.18
5,000 — 9,999	..	..
10,000	..	..

According to the 1981 Census 3,305 persons or, 7.73 per cent are literate in the district of East Kameng. From the table it may be seen that as the size of the population in the villages increases the rate of literacy also increases except for the villages lying the range of 500-1,999. In this range literacy rate is 0.73 per cent only.

TABLE 7

LITERATES, WORKERS, NON-WORKERS, SCHEDULED CASTE/TRIBE POPULATION IN THE DISTRICT

	Urban	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..

As mentioned earlier, the literacy rate recorded on the first March, 1981 of the district of East Kameng is 7.73 per cent or 3,305 persons, of which 12.31 per cent or 2,707 persons are males and 2.88 per cent or 598 persons are females.

Among the circles, the highest rate of literacy is found at Seijosa circle (17.66 per cent) and is followed by Seppa (12.78 per cent). The lowest literacy rates is recorded at Pipu-Dipu Circle (2.54 per cent). Even in the male female literacy rates Seijosa is the highest having 21.95 per cent males and 10.14 per cent females.

During 1981 Census, 23,657 persons have been identified as the main workers being engaged for the major parts of the year in one or the other economic activities. Among them 13,812 are males and 9,845 are females. The work participation rate by main workers is 55.36 per cent, of which male participation is 62.79 per cent and female 47.48 per cent.

When compared with all the circles of the East Kameng district, Lada is having the highest percentage of workers being 64.13 per cent followed by Chayengtajo and Khenewa (61.44 per cent and 61.05 per cent). As it may be seen from the above table even in the male female participation rate Lada circle is the highest (68.18 per cent males and 59.83 per cent females). The lowest work participation rate is recorded against Bameng circle (38.71 per cent). Even in the female participation of the main workers, Bameng is the lowest (13.87 per cent). Of the male participation Pakke-Keshang is the lowest, just 52.24 per cent only.

The total population of marginal workers in the district as recorded in 1981 Census is 1,119 persons or 2.62 per cent of total population of the district. Out of these, 223 persons or 1.01 per cent are males and 896 persons or 4.32 are females.

In circlewise distribution of marginal workers, the highest percentage is recorded at Pakke-Keshang circle, where it is 9.26 per cent. The circle of Lada and Bameng does not have any marginal workers.

Regarding male female participation, female percentage is more higher than the males. The highest percentage of female participation rate is found at Pakke-Keshang as 14.64 per cent.

The main workers and the marginal workers together give total workers of the district as 57.97 per cent of the total population. Among the circles. Pipu-Dipu has the highest, (65.07 per cent). The lowest percentage is recorded at Bameng circle (38.71 per cent).

A large number of people in the district have been recorded as non-workers. There are 17,960 persons (or 42.03 per cent) as non-workers. Among the circles, Bameng has the highest percentage of non-workers (61.29 per cent), followed by Seijosa, (52.56 per cent). Bameng has also the highest percentage of female non-workers (86.13 per cent) and, it is followed by Seijosa circle (82.21 per cent). Among the non-workers of the district females are more than the males. The percentage female and male non-workers 48.20 and 36.20 respectively.

Following table No. 8 indicates the distribution of villages according to the availability of different amenities in each circle. It may be seen from the table that out of 275 inhabited villages of East Kameng district, 74 villages or 26.91 per cent have been served with one or more educational facility. Seppa circle is a little more ahead of the rest of the circles in respect of educational amenities as well as other important amenities. In Seppa, 38.03 per cent villages have educational facility and, it is followed by Seijosa circle (35.29 per cent), Bameng (30.77 per cent) and Khenewa (30.00). The remaining four circles of the district have below 30 per cent of villages having this facility. Pipu-Dipu circle has the lowest percentage of villages having educational facility, just 11.43 per cent only. For more detailed information on the various level of educational facility, the circlewise abstract given at Appendix-1 of the Village Directory may be seen.

So far Medical facility is concerned, East Kameng district is very poor, hardly 7 villages or 2.55 per cent have been served by this facility. There is only one Hospital at Seppa and 5 (five) Primary Health Sub-Centres in the district. The circle of Lada and Khenewa does not have any Medical facilities.

Regarding drinking water facility, almost all villages of the district have this amenity within the village itself. Only 15 villages of the district do not have the facility within the village itself but, most of the villages are collecting drinking water from natural sources.

As regards postal facility, 8 villages (or 2.91 per cent) are having this facility. There is only one Post and Telegraph Office with Telephone facility at Seppa, and, one Sub-Post Office at Seijosa, the rest of the circles are having extra departmental post offices.

There is only one daily market centre at Seppa and one weekly market at Seijosa circle.

Communication and approach by pucca road in the district is also very poor, only Seppa and Seijosa circles have this facility covering the range of 1.82 per cent of the villages in the district. There is only one kind of transport facility available to the district and that is bus service.

Power Supply is available to the Seppa circle only, making the percentage of electrified villages 0.36 per cent.

The proportion of rural population served by different amenities has also been shown in the following table.

TABLE 8

DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES

Sl. No.	Name of Sub-division/Circle	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by pucca road	Power Supply

3.	Pipu Dipu Circle . .	4,692	10.10	3.18	100.00	3.18	..	..	..	..
4.	Lada Circle . . .	1,929	39.97	..	100.00	..	..	..	..	..
5.	Seijosa Circle . . .	2,089	56.92	19.72	100.00	19.72	19.72	48.06	48.06	..
	CHAYENGTAJO SUB-DIVN.	15,798	39.82	9.24	93.35	9.24	..	..	1.59	..
6.	Chayengtajo Circle . .	7,171	39.77	11.11	100.00	11.11	..	..	..	..
7.	Bameng Circle . . .	4,748	46.69	10.91	97.64	10.91	..	..	5.29	..
8.	Khenewa Circle . .	3,879	31.48	3.71	75.79	3.71	..	..	..	..
	Total : District East Kameng .	42,736	48.74	14.07	94.37	14.18	9.78	11.44	11.44	8.82

A glance at the table 9 above reveals that most of the rural population of the district is not well served by important amenities like education, medical, Post and Telegraph, Communication etc. except drinking water facility which is available to about 95 per cent of the district population. Educational facility comes next to the drinking water, it covers 48.74 per cent of the rural population. It means around 50 per cent of the people of East Kameng district have been provided with some kinds of educational facility. In the circle level the Seppa Circle has the highest percentage of educational facility covering 66.05 per cent of population. Pakke-Keshang circle is the lowest circle in which only 19.10 per cent population have been benefited by educational facility.

The other amenities like, Medical, Post & Telegraph, Market/Hat, Power Supply, Communication etc. the district have covered very very low percentage of population. Only about 10 per cent of the total population have been served by these facilities.

Some villages do not have certain amenities at all. The table 10 below shows the number of such villages in the distance ranges of the place where the particular amenity is available.

TABLE 10

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
	5 Kms.	5-10 Kms.	10+ Kms.	Total (Cols.2—4)
1	2	3	4	5
1. Education .	39	62	100	201
2. Medical . .	21	34	213	268
3. Drinking Water	15	..	..	15
4. P. & T. .	18	13	236	267
5. Market/Hat .	10	9	254	273
6. Communication	11	7	252	270

From the table above it may be seen that so far as the educational amenity is concerned, 74 villages are having this facility within the village itself and the remaining 201 villages do not have it within the village but, these are available at certain distance ranges. Regarding Medical amenity out of 275 villages 268 villages do not have this facility within the village. With regard to Post & Telegraph, Communication, Market/Hat, 267-273 villages are not getting these facilities within the village.

In order to see the scope of ascertaining the impact of the distance range of villages from the nearest town on the availability of different amenities the following table 11 is furnished.

TABLE 11

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES

Distance range from the nearest town (in Kms)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cation	Approached by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
0— 5*	..	..	..	..	..	..	..	..	..
6—15	..	..	..	..	..	..	..	..	..
16—50	5	1	..	5	..	..	..	..	..
		(20.00)		(100.00)					
51+	270	73	7	255	8	2	5	5	1
		(27.04)	(2.59)	(94.44)	(2.96)	(0.74)	(1.85)	(1.85)	(0.37)
Unspecified . . .	..	..	..	..	..	..	..	..	..
TOTAL . . .	275	74	7	260	8	2	5	5	1
		(26.91)	(2.55)	(94.55)	(2.91)	(0.73)	(1.82)	(1.82)	(0.36)

0—5*—Villages having amenity at 0 distance is excluded.

There is not a single town in the district of East Kameng, all towns indicated in the table are either in the State of Assam or West Kameng district of Arunachal Pradesh i.e. Bomdilla. Most of the villages are very far away from any direct influence of the towns except five villages which are within the distance range of 16.50 Kms.

The availability of different amenities in the villages also depends on the size of the population of the villages. The following table 12 indicates the distribution of the villages according to population size and amenities available. For the purpose, four population ranges have been used, viz, less than 499, 500-1999, 2000-4999 and 5000+, but for the district of East Kameng, the last range is not applicable as there is no village having population range of 4000 and above.

TABLE 12

DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE

Population range	No. of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
—499	270	70 (25.93)	4 (1.48)	255 (94.44)	5 (1.85)	1 (0.37)	4 (1.48)	4 (1.48)	..
500—1,999	4	3 (75.00)	2 (50.00)	4 (100.00)	1 (25.00)	..	..	..	..
2000—4,999	1	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)	1 (100.00)
5000 +	..	..	..	..	..	..	..	..	..
TOTAL	275	74 (26.91)	7 (2.55)	260 (94.55)	7 (2.55)	2 (0.73)	5 (1.82)	5 (1.82)	1 (0.36)

The above table shows that most of the villages (numbering 270) are lying in the population range of less than 499, four villages in the range of 500-1,999 and, only one village (i.e. Seppa) lies in the the range of 2,000-4,999. It is clear that larger the population size of the village greater is the extent of the availability of different amenities and facilities. Otherwise, the proportion of villages having different amenities are more as the population size of the villages are increased.

After having gone through different amenities of the villages and some important factors that play in the distribution of different amenities in the village it may be interesting to know the main staple food of the villages as shown in the column 14 of the Village Directory. The following table 13 shows the main staple food in the majority of villages each circle.

TABLE 13

MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH CIRCLE

Sl.No.	Name of Circle	Main staple food
1	2	3
1.	Seppa	Rice, Maize, Millet
2.	Pakke-Keshang	Rice, Maize, Millet
3.	Pipu-Dipu	Rice, Maize, Millet
4.	Lada	Rice, Maize, Millet
5.	Seijosa	Rice,
6.	Chayengtajo	Rice, Maize
7.	Bameng	Rice, Maize, Millet
8.	Khenewa	Rice, Maize, Millet

For the villages in East Kameng District rice is the main staple food, although many villages also use Maize and Millet as the main staple food but, these are generally supplement to rice.

APPENDIX

APPENDIX 1

Statement showing 1981 Territorial Units and Changes during 1971-81

District/Sub-division	1971 Territorial Unit	Area Added		Name of district/sub-division from which area is subtracted	Area subtracted		Name of district/sub-division to which area is added	Net area change in Km² (+ or —)
		Name	Area in Km²		Name	Area in Km²		
1	2	3	4	5	6	7	8	9
East Kameng	Carved out from Kameng District.	The entire Seppa Sub-division comprising of circles namely Pakke-keshang, Seppa (including Pankar, Talom and Mongrang villages) Pipu-Dipu, Chayengtajo, Waii and Bameng transferred from formerly known Kameng District.	NA	Formerly known as Kameng District.	..	..	..	NA
(i) Seppa Sub-division	Seppa Sub-division.	Seppa Sub-division with the following circles :— (1) Seppa (74 villages), (2) Pakke-Keshang (32 villages), (3) Pipu-Dipu (35 villages), (4) Lada (17 villages), (5) Seijosa (17 villages),	NA	Formerly known as Seppa Sub-division.	..	..	..	NA
(ii) Chayeng-Tajo Sub-Division.	Seppa Sub-division	Chayengtajo Sub-division with the following circles :— (1) Chayengtajo (57 villages), (2) Bameng (26 villages), (3) Khenewa (20 villages).	NA	Formerly known as Seppa Sub-division.	..	..	..	NA

NOTES :— 1. NA stands for not available.

2. Since there was no cadastral survey conducted so far in Arunachal Pradesh, the area figures below the district level are not available. Hence, the area figures in columns 4 and 9 are shown as NA.

3. Circlewise alphabetical list of villages are already available in the relevant pages of Village Directory Chapter. Here, only the number of villages are shown within brackets against each circle.

LIST OF 1981 CENSUS PUBLICATIONS

Part No. and subject covered	Sub-Part No. (if any) and the topics covered.
1	2
Part I—Administration Report (for official use only)	Part IA—Administration Report—Enumeration
	Part IB—Administration Report—Tabulation
Part II—General Population Tables.	Part IIA—General Population Tables Part IIB—Union Territory Primary Census Abstract and the Primary Census Abstract of Scheduled Caste/Scheduled Tribe at Circle/Town level.
Part III—General Economic Tables.	Part IIIA—B-Series Tables covering population by ecomomic activity, industrial category of main workers, marginal workers and their cross classification by age, literacy, educational level, sex, and non-workers, and marginal workers by type of activity, seeking/available for work and their cross classification by age, literacy, educational level and sex.
	Part IIIB—B-Series Tables covering industrial classification of main workers and marginal workers, occupational classification and class of worker of main workers and main activity and seeking/available for work of marginal workers and non-workers and their cross-classification by age, sex and educational level.
Part IV—Social and Cultural Tables	Part IVA—C-Series Tables covering age, sex and marital status composition of the population, single year age returns, educational level and school attendance.
	Part IV B—C-Series Tables covering, mother tongue, bilingualism and religion of population and hosusehold composition.
Part V—Migration Tables	Part VA—D-Series Tables of first priority covering distribution of population by place of birth, migrants by place of last residence, by duration of residence and reason for migration and economic activity of migrants reporting 'Employment' as reason and their cross classification by age and literacy.
	Part VB—D-Series Tables covering migration for 'Employment' to urban areas from rural and urban and within State and outside State origins, their composition by age, sex and educational level and seeking/available for work and duration of last residence.
Part VI—Fertility Tables	Part VIA—F-Series Tables. This part will cover the age at marriage pattern, current fertility and cumulated fertility for ever married and currently married women by present age and duration of marriage at State and District levels. As State level the further cross-classification by the socio-economic factors, religion, Scheduled Castes/Scheduled Tribes, educational level and occupation will be covered.
	Part VIB—F-Series Tables covering the surviving children of currently married women by present age and duration of marriage, religion etc and also current fertility by duration of marriage at District level.
Part VII—Tables on Houses and Disabled Population	H—Series Tables covering census houses and their uses and the disabled population by type of disability, with Analytical Notes.
Part VIII—Household Tables. (No Separate Publication for Arunachal Pradesh. These are included in the all India Volume brought out by the office of the Registrar General, India, New Delhi).	Part VIIIA—HH-Series Tables covering material of construction of houses occupied by households, housing Facilities available to households, household size and number of couples living in households and households by number of main workers, seeking/available for work and literate members, cultivating and non-cultivating households by tenure of land for general and Scheduled Caste and Scheduled Tribe households, literacy among Scheduled Castes and Scheduled Tribes and economic activity of members of Scheduled Caste and Scheduled Tribe households. These tables will also cover the household population by religion of head of household and language mainly spoken in the household.
	Part VIIIB—This part will contain tables HH-17, HH-17SC, & HH-17ST on tenancy.
	Part VIIIC—Report on Households. This will be an analytical report of the data presented in part VIIIA and VIIIB.
Part IX—Special Tables on Scheduled Castes and Scheduled Tribes.	The SC and ST Series of tables for Scheduled Castes and Scheduled Tribes respectively, covering industrial categories of main workers, and marginal workers, type of activity of marginal workers and non-workers, seeking/available for work among marginal workers and non-workers, age, sex, marital status composition of Scheduled Castes and Scheduled Tribes population and their educational level (for each Caste/Tribe Separately). These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part X—Town Directory Survey Report on Town and Villages.	Part XA—Town Directory (Not for Arunachal Predesh)
	Part XB—Survey Report on selected towns
	Part XC—Survey Report on selected villages
Part XI	Ethnographic notes and special studies—Scheduled Castes and Scheduled Tirbes.
Part XII—Census Atlas.	Union and State/Union Territory Census Atlases.
Part XIII—District Census Handbook.	Part XIIIA—Village and Town Directory
	Part XIIIB—Village and Townwise Primary Census Abstract and the Primary Census abstract of Scheduled Castes and Scheduled Tribes at Circle/Town level.
Paper 2 of 1985	Household population by religion of head of household upto Circle/town level.
