STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand Books, for each of the 20 Districts in Andhra Pradesh

PRINTED BY THE HYDERABAD BULLETIN PRESS, SECUNDERABAD FOR THE DIRECTOR OF PRINTING, HYDERABAD

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into four parts. The first part consists of a narrative description of the physical features and history of the District, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a gazetteer of places. The second part consists of administrative statistics of various departments. The third part is based mainly on the present Census returns and consists of statistical tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc. The fourth part consists of Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes and Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health, and transport facilities, etc., if available, have also been indicated. At the end of the fourth part a tabular statement of fairs and festivals, information about which had been collected through the Census enumerators will also be found. The pages of each part are numbered separately. The Handbook is enriched with two district maps, one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of above 5,000 population and the other showing the talukwise density of population. A map showing Godavari Delta system and its important Canals in East Godavari District is also given in Part I of this Book. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code numbers of each village and town marked will also be found. Thus the District Census Handbook is a self-contained and convenient book of reference about almost all matters pertaining to the district.

The Handbooks are no doubt coming rather late, a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census tables were time consuming; the adminstrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and the taluks, attempted this time, also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully was a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well being over the decades and also serve as a guide in planning for the future. The credit for the compilation of this Handbook goes chiefly to Shri K. M. Ahmad, I. A. S., Deputy Superintendent of Census Operations. He took great pains to tour the district, contact the various officers of the district and dig out information from various sources. A compilation of this type and magnitude could have taken a much longer time but for the diligent efforts of Shri Ahmad. The Handbook section of the Census Office under the Tabulation Officer, Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative tables. The Cartographic Section in my office in charge of Shri G. Pandurangam, the Head Draughtsman, did a magnificent work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR
Superintendent of Census Operations
Andhra Pradesh

CHAPTER I

GENERAL DESCRIPTION

General

The East Godavari district lies on the north-east coast of Andhra Pradesh. It occupies an area of 4,178 square miles and has a population of 2,608,375 persons and a density of 624 persons per square mile according to the 1961 Census. There are altogether 1,346 inhabited villages, 191 uninhabited villages and 14 towns in this district. It is bounded on the north by the Visakhapatnam district and the States of Orissa and Madhya Pradesh, on the east and the south by the Bay of Bengal and on the west by the Khammam and the West Godavari districts. It consists of 12 taluks of which 2 lie in the Agency area. The following statement gives the area particulars of various taluks in the district together with their population and density as at the 1961 Census.

STATEMENT—I-1

Name of the Taluk	Area in Sq. miles	Population	Density per Sq. mile
(1)	(2)	(3)	(4)
PLAINS			
Kakinada Taluk	384	403,099	1,051
Amalapuram Taluk	353	356,676	1,010
Razole Taluk	176	182,099	1,035
Kothapeta Ind. Sub-Taluk	115	165,794	1,142
Ramachandrapuram Taluk	289	378,137	1,308
Rajahmundry Taluk	378	382,401	1,012
Peddapuram Taluk	377	193,641	514
Prathipadu Ind. Sub-Taluk	225	137,252	610
Tuni Ind. Sub-Taluk	183	129,740	709
Pithapuram Ind. Sub-Taluk	138	167,337	1,213
AGENCY			
Rampachodavaram Ind' Sub-Taluk	710	48,697	69
Yellavaram Ind. Sub-Taluk	850	63,502	75

Bhadrachalam and Nugur taluks, which were originally in this district, comprising an area of 1,504 square miles were transferred to Khammam district in G. O. Ms. No. 2384, Revenue, dated 17th November, 1959 for convenience of the administration. The territories transferred to Khammam district are geographically contiguous to it. The River Godavari and the River Sabari separate these two taluks enblock from the East Godavari district and the people of this area would have to cross either of these two rivers to get to the old district headquarters. Though by long association Rajahmundry at the head of the Godavari delta in East Godavari district, still appears to attract the trade of the Nugur and Bhadrachalam areas, administratively the proximity and greater accessibility of Khammam, the new district headquarters, seems to be a positive advantage.

The general elevation of the district varies from a few feet near the sea to about 1,000 feet in the hills of the agency. The southern part of the district is flat being formed by the silt carried down by the Godavari and is extensively fertile, being irrigated by the several canals and channels from the river. This district can be broadly divided into three distinct zones, viz., the Agency or the hilly tracts, the delta and the upland. The Eastern Ghats rise by gradations from the level of the coast and they spread throughout the Agency taluks of Rampachodavaram and Yellavaram. The deltaic portion consists of the whole of the Konaseema and portions of Kakinada, Ramachandrapuram and Rajahmundry taluks. It presents a vast expanse of rice fields dotted with gardens, plantains, betel and cocoanut and with innumerable palmyras. The upland portion comprises of the taluks of Tuni, Pithapuram, Peddapuram, Prathipadu and portions of Rajahmundry, Kakinada and Ramachandrapuram taluks. It forms a gently undulating and fairly wooded plain. The hills in all parts of the district are covered with jungle, more or less dense. Nowhere can they be said to be inaccessible, but the numerous blocks of gneissic rock with which they are strewn make the construction of roads a very difficult task. Teak is found in this jungle and some of the higher hill ranges are covered with clusters of feathery bamboos. The chief jungle products are myroblans, soapnut, tamarind, bamboo-rice, honey and bee-wax.

As the name of the district itself would indicate, East Godavari district is closely associated with River Godavari, occupying a major portion of the river delta area.

Rivers

Among the great rivers of India the Godavari takes rank next only to the Ganga. It runs across the peninsula, with a 900-mile course. It receives the drainage of 115,000 square miles, an area greater than that of England and Scotland combined. Its maximum discharge is calculated to be one and a half million cubic feet

per second, more than two hundred times that of the Thames at Staines and about three times that of the Nile at Cairo. It rises at Triambak close to Nasik, at a distance of about 70 miles north-east of Bombay and only 50 miles from the Arabian Sea. The place traditionally regarded as the source of the river is a reservoir on a hill behind Triambak. This is approached by a flight of 690 steps and the water trickles into it drop by drop from the lips of a carven image, shrouded by a canopy of stones. From thence the river flows in a south-easterly direction until after it has completed a course of 650 miles, it receives from the north at Sironcha the waters of the Wardha, the Penganga and the Wainganga united in the single noble stream of the Pranhita. From this point the river has some 200 miles to run to the Bay of Bengal. It is soon joined by the Indravati, also from the north, and before long skirts the Bhadrachalam taluk of Khammam district. A few miles below the Bhadrachalam border is the Dummagudem anicut, almost the sole relic of the great scheme conceived by Sir Arthur Cotton for the navigation of the upper waters of the river. Next the beautiful Saveri (or Sabari) flows in from the north, skirting the edge of the forest-clad Rekapalle hills. From there the Eastern Ghats come into view, some 2,500 feet in average height, bounding the whole horizon and towering above the lesser and detached hills that flank the river.

The Godavari has by this time assumed imposing proportions, being generally a mile, and sometimes two and a half miles broad. After its junction with the Sabari, however, its bed is suddenly contracted by spurs of the ghats (Papi Hills) till at length it forces a passage between them, penetrating by an almost precipitous gorge to the very heart of the range. The scenery of this gorge is famous for its natural beauty and grandeur. The steep wooded slopes of the mountains which overhang it approach at one place to within 200 yards of each other; and they constantly recede and advance and form a succession of beautiful little lakes from which there is apparently no outlet. Here and there a faint line of smoke indicates the existence of a Koya or Reddi village, but the hills are very sparsely inhabited.

In flood time the water flows with terrific force. 'Through the gorge', writes Dr. King, 'the pent-up waters tear their way with, I have been told, a surface so strangely concave on the cross section that adventurous boatmen glide along the bottom of a trough whose sides rise up to a good height and hide away the immediate banks; and out of this gorge away towards the open country of the Godavari district the river has such a fall that the sensation produced on the mind of the traveller is said to be that of sliding down an inclined plane. Native boatmen are much afraid of navigating the river at such times; and none of them, of whatever creed, omit to break a number of cocoanuts at the mouth of the gorge to appease the dangerous demon "Biraiya" who will dash on a rock or drown in a whirlpool the navigator who omits this homage. So great is the action of the stream during floods that the rocky bed has been scoured out to depths popularly supposed to be unfathomable, but which really vary normally from 100 to nearly 200 feet. High floods rise quite 50 feet above the normal level, so that the gorge then encloses a torrent of water from 150 to 250 feet in depth."

After passing this point and entering the open country, the river widens out and flows by Polavaram and Gutala and the picturesque and sacred islands of Mahanandisvaram and Pattisam. At Rajahmundry it is nearly two miles wide, and some five miles further down, at Dowlaishwaram, at the head of the delta, it is crossed by the celebrated anicut which renders its waters at last available for irrigation. At this point the river is nearly four miles broad, though about a third of this width is taken up by three islands. At Dowlaishwaram the Godavari divides into two main streams — the eastern or Gautami Godavari flowing past Injaram and Nilapalli, and entering the sea near point Godavari, and the western or Vasishta Godavari flowing nearly due south and entering the sea at point Narasapur. A few miles above this latter mouth another large branch, the Vainateyam, breaks off to the east of the Vasishta Godavari (forming the island of Nagaram between itself and the latter river) and reaches the sea near Bendamurlanka. The three factories of the old East India Company at Injaram, Bendamurlanka and Madapollam were situated near these three principal mouths of the Godavari. Part of Madapollam village has been swept away by the river.

Seven traditional mouths of the Godavari are recognized as sacred by the Hindus. The holy waters of the Godavari are said to have been brought from the head of Siva by saint Gautama, and the seven branches by which it is traditionally supposed to have reached the sea are said to have been made by seven great *rishis*. The mouths of these are considered especially holy, and to bathe in the sea at any one of them is considered an act of great religious efficacy. It is customary for the pious (especially childless persons desirous of offspring) to make a pilgrimage to each in turn and bathe there, thus performing the *Saptasagara-Yatara* or 'pilgrimage

of the seven confluences'. The Vainateyam is not one of these traditional mouths, but is supposed to have been created afterwards by a *rishi* of that name who stole a part of the Vasishta for the purpose. The traditional seven are the Kasyapa or Tulya (the Tulya Bhaga drain), the Atri (the Coringa river), the Gautami, the Bharadvaja, the Visvamitra or Kausika, the Jamadagni, and the Vasishta. The Bharadvaja, Visvamitra and Jamadagni, no longer exist; but pilgrims bathe in the sea at the spots where they are supposed to have been. Several other sacred bathing places in the delta are noticed. The most important of them is Kotipalli in the Ramachandrapuram taluk. But a bath in the river anywhere along its course has great sanctifying virtue. Every thirteenth year this virtue is supposed to be much increased, and the *Pushkaram* festival which then takes place is performed all along the river in recognition of the fact.

Several islands of a permanent character stand in various parts of the Godavari; but the river constantly forms new temporary islands and modifies old ones. Islands liable to these changes are called *lankas*. They are rendered extraordinarily fertile by the silt deposited upon them by the river, and the rich tobacco grown on them is known as lanka tobacco. Other physical changes are produced by the force of the stream.

The greater portion of the area drained by the Godavari receives more rain in the south-west than in the north-east monsoon, and it is during the former, therefore, that the river brings down most water. It begins to rise at Dowlaishwaram some ten days after the south-west monsoon rains set in at Bombay — usually about the middle of June — and it is almost always high till October. The season for floods is then over; but during the next two months or so occasional freshes are caused by the north-east monsoon rains. When these have ceased the river gets lower and lower, till about the middle of May (its lowest stage) its discharge is at times as little as 1,500 cubic feet per second.

Two tributaries of the Godavari flow through this district. The Sabari rises in the hills in the Vizagapatam Agency, and afterwards runs in a south-westerly course, forming for some distance the boundary between that tract and the Bastar district. It receives several tributaries on the way, and, at the point where Bastar, Vizagapatam and Godavari meet, is joined by the Sileru River from the hills of Jaypore. The united waters of these two rivers are much used for floating timber from the Rekapalle hills, which are enclosed between the Sabari and the Godavari.

One or two insignificant streams run down from the north into the Godavari, and from the Tuni hills into the sea; but the only other noteworthy river in the district is the Yeleru. This is formed by the union of three streams which take their rise in the hills of Rampa, Golgonda Jaddangi respectively and unite a little to the north-east of Yellavaram. It flows through Peddapuram taluk to a point a little above Viravaram, where it again separates into several streams. The western most of these continues its course, still under the name of the parent stream, along the boundary of Pithapuram independent sub-taluk into Kakinada taluk; passes under the Samalkot canal, which crosses it by an aqueduct near that town, and finally drops into the Bikkavolu drain and the Kakinada tidal creek, and so into the Kakinada bay. Meanwhile two other branches have both flowed into the Pithapuram independent sub-taluk, where, united again under the name of the Gorikanadi, they distribute their waters to numerous works of irrigation, and finally reach the sea near Uppada, through a system of creeks known as the Jammeru.

Geology

The East Godavari district together with the adjoining West Godavari forms one of the most interesting regions, geologically, in Andhra Pradesh because of the variety of its geological formations which also include coal bearing rocks.

A considerable part of the district is covered by gneisses and schists which form the foundation of all the latter rocks. There are three general types of these present here. One type is a graphitic garnet-sillimanite-schist or gneiss, with or without felspar. Some sub-types of these contain a highly "cleaved" pink variety of orthoclase called murchisonite. Other rocks occurring here are granitoid, gneisses, and charnockites, which are known to be of extensive distribution in the hill tracts of Visakhapatnam. All these rocks are injected with veins of pegmatite.

The rocks of upper Gondwana group are found near Tallapudi on the right bank of the Godavari some distance above Rajahmundry. Some purple sandstones which are taken as belonging to the uppermost beds of this group appear in a series of small exposures near Jaggampeta, Kirlampudi, Paidikonda, Iyyapparazu-Kottapalli and Gunapudi. Some road metal pits

between Rajahmundry and Korukonda, as well as a small hill near Raghavadevapuram show these rocks. It is, therefore, inferred that the upper Gondwanas are present, in addition to the exposures mentioned in the alluvium and covered by it. Seams of argillaceous or highly ferruginous sand stones also occur. The sand stone exposure near Jaggampeta is considered to represent this stage.

Trap rocks which are evidently the south-easternmost extension of the Deccan traps, occur on both sides of the Godavari near Rajahmundry. The traps are greenish basalts containing amygdales with chalcedony and agage. The main interest lies in their showing a set of intercalated limestone beds. The limestone beds were known for their fossil content as early as 1835, but it was not until 1854 that they were described. Inter-trappeans occur near Kateru. There are in addition some limestones beneath the traps, but occurring only on the right banks of the Godavari. The traps are overlain unconformably by reddish sandstone and conglomerates which in other places rest directly on the gneisses and Gondwanas. A large area between Rajahmundry and Samalkot is covered by them. Lithologically they resemble the Cuddalore sandstones. They vary from shaly sandstones to conglomerates, the prevalent colours have reddish, purplish and yellowish-brown. Some of the beds are highly ferruginous and have been used as sources of iron ore when an indigenous smelting industry was in existence.

The coastal region of the district consists of recent alluvium contributed by the Godavari. All the deltaic region must have been not long ago under the sea. The village of Coringa was apparently upon a cape at the time of Pliny. Even within the memory of many living, noticeable changes have taken place in the position and configuration of the coast.

The whole of the hilly region from the ghats down to the coastal track is composed of all the prejurassic formation, while the jurassic and later rocks rest upon it evenly. Jurassic age is thus indicated for the new topography of the region.

Graphite is an essential but sparsely distributed, constituent of some of the members of the gneissic series. It is found in this district near Velagapalli and Yerramatla in the Chodavaram taluk.

The different sandstones of the area yield good building stones. The Rajahmundry sandstones of the Peddapuram-Samalkot area have been quarried, as well as the traps near Rajahmundry. The limestones associated with the traps are used for lime-making. A little cut stones is also obtained in the Chodavaram taluk.

Climate

The climate is comparatively equivable and although it is very warm in April, May, and June, it is never too oppressive during the rest of the year. Cyclonic storms sometimes occur during the latter part of the year, bringing with them a deluge of rain which goes to swell the averages. The first four months of the year are practically rainless. But in the month of May fair amount of rain occurs. More than half of the annual rainfall is brought by the south-west monsoon while a greater part of the rest occurs in October and November.

Agriculture

The agricultural practices adopted in the Agency taluks differ from those adopted in the other taluks of the district. In the upland taluks the practices followed are alike throughout and similar to those of the delta taluks. The Yeluru River irrigates nearly 1 lakh acres in the upland area in Peddapuram and Pithapuram taluks. In the deltaic taluks most of the arable land is wet. In the Agency taluks 'podu' or shifting cultivation is still in vogue. Rice is the main food crop of the people in this district. The other important crops grown in the district are jowar, bajra, ragi, korra, varagu, samalu, maize, groundnut, cotton, tobacco and sugarcane.

Forests

The Reserve Forests in Yellavaram, Rajahmundry and Rampachodavaram taluks contain timber and bamboos. The Reserve Forests in the Peddapuram taluk contain fuel and bamboo growth. The forest in Peddapuram and Yellavaram taluks are scrub jungles. The forest in Peddapuram taluk contains palmyra and cashew while the forests in Tuni taluk contain scrub jungles. The forests in Kakinada taluk are mangroves while the forests in Amalapuram taluk contain casuarina trees and mangroves.

Communications

This district is served by rail only from Rajahmundry to Tuni and Samalkot to Kakinada. Therefore, people living in the interior have to rely on motor transport. Most of the important places in the district are connected with well

laid out roads on which buses carry passengers. On account of the lack of bridges between the central delta and the other areas of the East Godavari district passengers must necessarily cross the river by boats or by steam launches. Those travelling in private cars have to be carried across by punts which are tugged by motor launches. In the central delta there is a network of roads besides a net-work of navigation canals. These roads are mostly along the canal banks. The road along the aqueduct at Gannavaram connects the Nagaram island to the rest of the central delta. Goods are mostly carried in this area by boats while buses and other means of road transport carry passengers from one place to the other. Lorry traffic is prohibited in the central delta on account of the location of the roads adjacent to the canals resulting in the soil under the roads being soft due to the percolation of water. However, tractors are permitted to carry certain amount of load in the trailers attached to them. The only recognised way to reach Bhadrachalam is by travelling on the river Godavari. A large part of this journey is within the East Godavari district. Several launches of various sizes carry passengers and goods from Rajahmundry to Bhadrachalam almost throughout the year. Most of these launch owners are residents of Rajahmundry. Even in other parts of the district apart from the central delta large quantities of goods traffic is still being carried on along the canals. This is said to be the cheapest and the most easily available mode of transport. It is quite common to see three or four persons laboriously tugging fully loaded boats with the help of a rope along the canal. The method is certainly very primitive but by all means the cheapest, and the most convenient especially for transport of stones from the quarries which are quite close to the canals.

The district has 79½ miles of Broad Gauge Railway. The North-East line of the Southern Railway traverses the district from south-west to the north-east. This line is laid in this district from Rajahmundry to Tuni passing through the taluks of Rajahmundry, Ramachandrapuram, Kakinada, Pithapuram and Tuni. A branch line from Samalkot junction connects Kakinada, the district headquarters, as well as the seaport, with the Madras-Calcutta Broad Gauge Line.

In the Agency area the important places which are very few are connected with well laid out roads. The Agency taluk headquarters have Post and Telegraph facilities. Rampachodavaram and Addathigala are also electrified.

There are 14 towns in this district of which 10 are Municipalities and the other 4 are Panchayats. The total urban area of the district is 77.8 square miles. The total urban population is 483,477 persons with a density of 6,218 persons per square mile according to the 1961 Census. All these towns are only in Plains area and towns do not exist in the Agency portion of this district. Of these, Kakinada a city with a population of over 100,000 is the headquarters of the district and Rajahmundry another city whose population also exceeds 100,000 is the headquarters of the District Judge and the Sub-Collector. These two are the most important towns both historically and commercially in this district.

CHAPTER II

POLITICAL HISTORY

From the stone inscriptions and copper-plate grants it would appear that what we now know as the East Godavari and Visakhapatnam districts and the coastal region extending from the Godavari to the Mahanadi (even to the Ganges) on the north, went by the name of Kalinga. This is not, however, free from doubt, for there is no reference in them to any place to the south of Mahendragiri as being included in the Kalinga country; and Raghuvamsa, the well-known Sanskrit poem, refers to the King's army as passing only through forests on its way from Mahendragiri on the Kalinga frontier to the region of the Cauvery. Kalinga was also called Tri-Kalinga by Sanskrit and Greek writers and was mentioned as such in a copper plate charter of Indravarma, the Eastern Ganga king of Kalinga who ruled over the country in the beginning of the sixth century A.D. From the Hathigumpha inscription of Kharavela, it is evident that two hundred years before the time of Asoka, Kalinga was conquered by Nanda I or Nandivardhana, the founder of the Nanda dynasty of Magadha and that it continued to be a part of the empire of Magadha from Nanda I to Asoka. Probably, on the accession of the last king, Kalinga asserted its independence, but the inscriptions of Asoka the Great, bear unquestioned testimony to the conquest of Kalinga by this emperor about 260 B.C. His capital was at Pataliputra, the modern Patna. In 261 B.C. he annexed the kingdom of Kalinga and perhaps the kingdom of the Andhras, a dynasty whose sway extended as far north as the Godavari river, was already under his imperial jurisdiction. It is worthy of note that the Buddhist remains at Amaravati on the Kistna river contain an inscription in the Mauryan character.

Though the kingdom of the Andhras may have been under the Mauryan empire, its administration was in the hands of its own Rajas. The decline of this empire and the rise of short-lived dynasties of the Sungas and Kanvas contributed indirectly to the increasing power of the Andhra dynasty. Pliny mentions them as a strong people with 30 fortified cities, 100,000 infantry, 2,000 cavalry and 1,000 elephants. Their conquests extended far to the north up to the Magadha as an imperial power in the beginning of the Christian era and to the western coast of the peninsula, for one of their earlier kings, Simuka, covered the walls of a large cave at Nanaghat (50 miles north-west of Poona) with inscriptions recording his sacrifices; and his successors have left evidence by their coins and in their inscriptions in the cave temples at Nasik, Karle and Kanheri that they extended their power to Malwa and the borders of Gujarat. Towards the south their dominions included parts of Mysore. Towards the east, they comprised the East Godavari district. The Andhra king, Raja Gautamiputra Sri Satakarni (A.D. 102-123) ruled over the whole country watered by the river Godavari. It is learnt from a recently published inscription that, in the second regnal year of the twenty-ninth Andhra king, Vasishthiputra Swami Sri Chandaswati, his minister Sasa established the charity of wells at Kodovolu (Kodavali), nine miles to the north-west of Pithapur (Pithapuram) in East Godavari district. This proves that Andhra rule lasted in the district till its close. The date of the inscription is said to correspond to 210 A.D. by some scholars and 220 A.D. by others. Their capital on the east coast was at first at Srikakulam on the Kistna, nineteen miles west of Masulipatam, but was afterwards removed to Dharanikota, near Amaravati. From coins, inscriptions, Puranas, and other materials have been ascertained the names and dates of kings of the line which ruled from about 230 B.C. to 220 A.D. After the fall of the Andhra empire in or about 220 A.D., Kalinga, the tail end of which comprised the modern East Godavari district, is said to have passed under the imperial rule of the Vakatakas who were subdued by the imperial Guptas in or about 340 A.D. The Puranas as well as the Allahabad inscription of Samudragupta would support this view. Saktivarma of Magadhakula ruled over Kalinga with Pishtapura as his capital and it is said that he was a feudatory of Samudragupta. Samudragupta invaded and conquered the east coast (Northern Circars) in 340 A.D., when Mahendra ruled over Pishtapura.

The Ikshvaku dynasty stepped into the shoes of Chandra Sati Satavahana about 220 A.D. on the east coast and three kings of this dynasty continued to reign until 260 A.D. when they disappeared from history. Their contemporaries on the west coast were the Chutru Satavahanas. The next power to appear on the scene were the Pallavas. It is certain, however, that the theory of foreign origin for them has no foundation in fact. According to the later researches the Pallavas were a branch of the imperial Vindhyakas,

i.e., Vindhyasakti and ruled the Andhradesa down to the time of Samudragupta (see Jayaswal, History of India, Pages 180-181). They extended their empire as far south as Conjeevaram and the borders of the Tanjore country, and as far to the north-east as the frontiers of the Godavari. Records of them are few and far between; but the absence of inscriptions of the Andhras after about the year 218 and the discovery at Mayidavolu and Kondamudi (in the Guntur district) of two Pallava records which on Palaeographical grounds may be assigned to the end of the third century, go to show that their conquest of the Andhras occurred about that period. About 500 A.D. a Vishnukundin chief named Madhava Varma who married the daughter of the Vakataka king Harishena succeeded, with the latter's help, in ruling over the Vengi country lying to the south of the river Godavari. Harishena claimed to have conquered the Andhra and Kalinga countries. Probably he placed them under the control of his son-in-law who had his capital at Dendalur close to Vengi by defeating the Salankayanas who ruled over the country at the time of Samudragupta's invasion in 340 A.D. and much earlier. It would further appear from two published copper-plate charters that the Vishnukundin power fell in 610 A.D. at the hands of the Eastern Chalukyans of Vengi. The village of Polamuru in the Ramachandrapuram taluk of East Godavari district was first granted by Madhava Varma to a Vedic scholar called Siva Sarma on the occasion of the lunar eclipse and at the time of crossing the river Godavari with the desire to conquer the eastern region, i.e., Kalinga then under the Eastern Ganga kings. This was about 600 A.D. In the troublesome period following the fall of Vishnukundins, the village was lost to the family and so the Eastern Chalukyan king Jayasimha had to regrant the same village in or about 640 A.D. to Rudra Sarma, son of Siva Sarma and a former owner. His residence was at Asanapura and the grant was made for his spreading Vedic learning evidently in a residential University there (Ghatika-asrama).*

About the beginning of the 7th century the Chalukyas seemed to have had their sway over this track of land. Pullakesin II (609-42), one of the monarchs of this dynasty, extended his conquests throughout the Godavari district and into Visakhapatnam, drove the Pallavas to the walls of Conjeevaram, and threatened the country of the Cholas of Tanjore. During his absence on this campaign, Pullakesin made his younger brother, Vishnuvardhana I his regent. By 632 A.D., Vishnuvardhana established himself as an independent sovereign of the kingdom of "Vengi", the capital of which was at Pedda Vengi, near Eluru and which included the Godavari district. He had thus formed the Eastern Chalukya dynasty, which lasted upto 1070 A.D. when it was absorbed into the Chola dynasty.

In the early part of the 8th century, Udayachandra, a general of the Pallava king, Nandivarman, claims that he subdued the eastern Chalukya king, Vishnuvardhana III (709-746).

At the end of the 10th century, the mighty Rajaraja I, who had laid the foundations of the Chola Empire with its capital at Tanjore, conquered the eastern Chalukya country. He is said to have appointed a prince of the fallen line (Sakthivarman 999-1011) as king in Vengi. This man's brother and successor, Vimaladitya (1011-22) married a Chola Princess and was succeeded by his son, Rajaraja (1022-62) who also married a princess of the Chola royal house. This king fixed his capital at Rajahmundry and it was during his reign that the Manabharata was translated into Telugu.

Rajendra II of the Eastern Chalukyas, though belonging on his father's side to the ancient line of Vengi, claimed to succeed to the Chola throne at Tanjore through his mother and grandmother and ultimately founded a new dynasty in the South. He magnanimously allowed his uncle, Vijayaditya VII to continue in-charge of Vengi and appears to have treated him with cordiality. When this man died in the year 1077, Kulottunga appointed his own second son, Rajaraja II as Viceroy of Vengi, the latter, however, gave up his throne in favour of his younger brother, Vira Choda. He was, however, ultimately succeeded by another and better known brother, Vikrama Chola who ruled Vengi country till about 1118. In that year he was called to the south to become co-regent with, and shortly afterwards, the successor of, Kulottunga who seemed to have died in that or the following year. On his departure, a certain Chola, the son of Gonka, was appointed as a Viceroy of Vengi and was even honoured with an adoption into the Kulottunga family. His descendants for a long time played a prominent part in the history of the district. Meanwhile another family, Haihiya family of 'Kona' country were in power in the delta of the Godavari. The delta Revenue Division of Amalapuram is still known as 'Konaseema', the name derived from this original Kona country. These people were apparently hereditary chieftains subordinated to the Vengi Viceroys. Their inscriptions in this district range from 1128-1206.

* Gazetteer of the East Godavari District Vol. II–1935 edition.

It is doubtful as to when the Kakatiyas first crossed the Godavari though the inscription at Draksharama mentions king Ganapati (1213-53). This inscription is fragmentary and undated. The first record in this district which can be unhesitatingly ascribed to the dynasty is one of Prataparudra, dated 1317 at Palivela in Amalapuram taluk. Ferishta, moreover, speaks of the king of Rajahmundry as an independent Prince in 1295. It, therefore, naturally arises that this district did not fall under the domain of the Kakatiyas until the end of the 13th century. The two brothers, Pedda Mallaraju and Chinna Mallaraju, who were the Viceroys of Prataparudra in this area are said to have held the court with great pomp and luxury at Bendapudi in the Tuni division. In 1322-23, Prataparudra himself had to interfere as the cultivators refused to follow their occupation and fed the country due to the excesses committed by the two brothers. He then laid down at length rules for the Revenue Administration of the area. The two Viceroys, however, eventually fell foul of the 'Raja of Cuttack' (the Ganga king of Kalinga). The Ganga king laid seige of Bendapudi, captured the two brothers and had them beheaded.

The Moghul Emperor at Delhi had long been jealous of the growing power of the Kakatiyas. In 1303 he had unsuccessfully attempted to crush their kingdom—; in 1310 his General, Malik-Kafur captured Warangal but Prataparudra soon recovered his independence. However, in 1323 the Delhi heir apparent, Mohammad Tuglak took the town again and carried off its king to Delhi. This last named Muslim king seems to have penetrated as far as Rajahmundry itself, because an inscription dated 1324 and a mosque there describes its erection by him in that year. After this the Muslim influence together with the Warangal domination in the Telugu country disappeared and henceforth Vengi was ruled mostly by the Reddy chiefs of the Korukonda, Kondaveedu and Rajahmundry.

The founder of the Korukonda Reddy line was Konareddy who built the fort at Korukonda and converted the place into a big town. His son Mummidireddy who succeeded him is said to have founded the Korukonda temple in 1353.

The Reddys of Kondaveedu were Sudra cultivators who may have been in the service of the kings of Warangal. They apparently ruled side by side with the Korukonda Reddys for the inscriptions of the two overlap. The founder of the dynasty was Vema, the son of Prola. He was a great patron of Telugu and Tamil literature. The original capital was at Addanki in Guntur district but it was subsequently moved to Kondaveedu. The grandson of Vema by name Kumaragiri placed his brother-in-law Kataya Vema in charge of the eastern portion of his dominions and made Rajahmundry the capital thereof. Kataya Vema's dates ranged from 1385-1422 and an inscription of his occurs in the Simhachalam temple in Visakhapatnam district.

On the death of Kataya Vema one Allada the son of Dodda Reddy obtained the throne of Rajahmundry and founded a new, though short-lived dynasty. His inscriptions appear as early as 1415-17 in the delta area and is represented therein as being the friend or servant of Kataya Vema. His sons Allaya Vema and Veerabhadra ruled jointly; and members of the family are mentioned in the Draksharama inscriptions as late as 1447.

In 1434 the Gajapati dynasty of Orissa was founded by Kapileswara, the last minister of Ganga king of the country. In 1454 he was recognised as suzerain as far south as Kondaveedu and a minister of his was ruling at Rajahmundry in 1458; so, though the details of the conquerors are unknown he had apparently seized the whole of this district. In 1470 his successor Purushottam applied to the Bahmani king of Gulbarga for help against his rival and he was therefore, forced to cede to that ruler as the price of his assistance the districts of Rajahmundry and Kondapalli in Krishna. Sometime after this the inhabitants of Kondapalli revolted, murdered the Muslim Governor and called for help from Purushottam who accordingly came and beseiged Rajahmundry. However, this place was relieved by a Muslim army and Muhammad, the king of Gulbarga forced Purushottam to purchase his withdrawal by present of variable elephants. The king of Gulbarga remained at Rajahmundry for three years, expelling or reducing refractory zamindars and establishing military posts. He appointed Malik-Ahmed as his Viceroy and at the end of 1480 left the district for furthering his conquests in the south. A few years afterwards when the Gulbarga kingdom got disintegrated this district once again came under the sway of the kings of Orissa.

It was not very long before the Muslims over again invaded this part of the country. This time it was the first king of the new dynasty of Golconda Qutbshah (1512-43) and the cause of the war was the assistance given by the house of Orissa to a rebellious feudatory of Golconda. Large forces of the Hindus were routed by the fanatical courage of the Musalmans, who took Kondapalli and won a battle in the neigh-

bourhood of Rajahmundry. The king of Orissa sued for peace and consented to surrender to Golconda the whole of the territory between the Krishna and Godavari rivers.

It was during the Golconda rule that the earliest English settlements on this coast were founded. Of the settlements in this district that at Injaram near Yanam was established in 1708 and that at Bendamurlanka in 1751. The Dutch had several important outposts in the neighbourhood, but the only one in this district was Jagannathapuram, now a part of Kakinada town. The French started a factory at Yanam about 1750. None of these outposts had at this time any influence worth mentioning in the history of the district, but it is sufficient for the present to chronicle the fact of their existence.

In 1687 Aurangazeb, the emperor of Delhi overthrew the kingdom of Golconda whereby this part of the country also came under his effective control. He appointed a Viceroy to rule his new territories known as the Subedar of the Deccan, residing first at Aurangabad and later at Hyderabad. This Subedari consisted of 22 provinces of which Rajahmundry was one. In 1724 the Subedar of Deccan declared his independence and appointed his own nominees as Nawabs of the provinces under him. Rustum Khan was appointed to Rajahmundry and is still known to local tradition as Haji Hussain.

In 1748 the Subedar of the Deccan died, and a great struggle followed for his place. In this struggle both the French and the English took different sides and that after many vicissitudes Salabat Jung became Subedar in 1751 through the aid and influence of the French. In his gratitude for their help Salabat Jung ceded the Kondaveedu country in 1752 and 4 of the northern circars (except Guntur) in 1753 to the French. However, Jafar Ali, the Governor of Srikakulam who was in no way disposed to surrender his position quietly to the French conspired with the Raja of Vijayanagaram, the most powerful of the Renter-chiefs who had come into existence during the Muslim rule, to oppose French domination. The French, however, seduced the Raja from the compact by offering to lease to him the Rajahmundry and the Srikakulam circars at a rate much below their value. On hearing of this defection Jafar Ali called in the aid of the Marathas of Nagpur, who crossed the Ghat with a large force, devastated both circars from end to end and returned to their own country by way of Eluru with immense booty. After their departure and in July, 1754 Bussy (French General) went in person to Masulipatam and Rajahmundry and restored order there. Soon afterwards, however, relations between Bussy and the Nizam became strained, at last an open breach occurred, and for 6 weeks in 1756 the former had to entrench himself near Hyderabad against the latter's troops. He was eventually relieved by reinforcements from Masulipatam and taken back into favour and at the end of 1756 he went to Rajahmundry with a strong force to re-establish his fallen authority in the circars. Aided by the Raja of Vizianagaram he soon reduced this part of the country to obedience; and a force from Rajahmundry took the three English factories at Madapalem, Bendamurlanka and Injaram. In 1758 Bussy returned to Hyderabad and in July he was summoned by Lally the new Governor of Pondicherry to proceed south with all the troops that could be spared to assist in the operations against Madras. His departure was a vital blow to the fortunes of the French, who within 10 months were driven out of the circars.

Almost as soon as he had gone, the new Raja of Vizianagaram seized Visakhapatnam, hoisted the English flag there and made overtures to the English in Calcutta and Madras offering to render them every assistance if they would send an expedition to invade the northern circars. Clive, who was then at Calcutta immediately arranged to send an expedition under the command of Colonel Forde. His forces reached Visakhapatnam in October, 1758 and in November affected a junction with the levies of the Raja of Vizianagaram and then proceeded southwards into this district.

The French had assembled their forces at Rajahmundry and moved thence to Gollaprolu a few miles north-east of Pithapuram. The French were under the command of the Marquis De Conflans, Bussy's successor. The opposing forces came in sight of each other at Gollaprolu on December, 3rd. Nearly a week elapsed before they joined battle; but at length on the 9th a most decisive action was fought near the little village of Changurti a few miles north of Gollaprolu. The result was a complete victory for the English, the French loosing all their baggage and ammunition and nearly all their artilery and had to retreat in confusion to Rajahmundry. Forde at once sent forward a force of 1,500 sepoys to occupy Rajahmundry; and the garrison there imagining that the whole of the English force was upon them; abandoned the fort on the 10th December and retired to the south. De Conflans retired to Masulipatam and at this earnest request the Subedar of the Deccan, Salabat Jung, marched to assist him down to the valley of the Krishna. On the 6th March, Forde appeared before Masulipatam and after a month's seige carried that fort by a brilliant assault. On the 14th May, 1759 he concluded a

treaty with Salabat Jung whereby the Subedar promised to renounce all friendship with the French and prohibit them from ever again settling in the circars. By this treaty the whole of the country north of the Godavari returned again to the dominions of the Subedar of the Deccan.

The district was not at once cleared of the French. A small force of about 250 Europeans and 2,000 sepoys had remained between Masulipatam and Rajahmundry to cut off the supplies of the English troops from that direction. This small detachment proceeded to Rajahmundry, where only a very small garrison had been left, and compelled the place to surrender. Soon afterwards, however, it left the district with the object of joining Salabat Jung. In December, 1759 a small French force of 50 Europeans and 100 sepoys landed at Kakinada with the object of entering into negotiations with Jagapati Razu, a cousin of the Raja of Vizianagaram. By this time the English army at Masulipatam under the command of Captain Fischer had commenced its return march. On his arrival at Rajahmundry Captain Fischer learnt of the presence of the French at Kakinada and thereupon he proceeded at once and found the enemy posted in a village two miles from the Dutch fort. They fled at once inside the fort and eventually surrendered and thenceforth no French force again set foot in the district.

The country north of the Godavari which was nominally subject to the Nizam was in a state of anarchy due to the lack of effective civil administration. Lord Clive on his return to India, entered into negotiations regarding its cession, and on August 12, 1765 received a grant of the circars from the emperor of Delhi. The Madras Government hesitated to avail themselves at once of this grant of the country which the Subedar of the Deccan considered to be his own property. In the following March, however, they published the emperor's Firman and sent General Calliud to take possession. The Nizam thereupon threatened to retaliate by invading the Carnatic; and Calliud was ordered to meet him at Hyderabad and negotiate a cession from him. The result was a treaty dated November 12, 1766 whereby the whole of the northern circars with the exception of Guntur (which was not ceded till 1788) was handed over to the English. The latter on their side agreed to pay the Subedar a tribute of 9 lakhs of rupees per annum, and to furnish him with military assistance whenever required. The treaty made no mention of the previous free grant of the country by the emperor.

Almost immediately afterwards the Subedar joined Hyder Ali of Mysore against the British; but the success of the latter in the south and an invasion of his country from Bangalore brought him to his senses; and, by a second treaty dated February 23, 1768 the tribute was reduced and the imperial grant was acknowledged. The tribute was continued to be paid until as late as 1823 when it was capitalised by the payment of a lump sum of Rs. 1,66,66,666.

The country was not at once administered directly by the English, but was leased out to native rentiers. The Godavari district continued to be under Hussain Ali Khan, a lessee since the time of the Nizam. His lease expired in 1769 and then the system of provincial chiefs and councils was introduced, this district being placed under the chief and council of Masulipatam.

The powerful Zamindars of Pithapuram, Polavaram and Peddapuram, occupied most of the centre and north of the district while beyond them ruled the untamed Mansabdars of Rampa, Totapalli and Jaddangi. At first the latter recognised no authority whatever; while the former maintained large bodies of troops and did much as they like. Constant attempts were made to reduce the power of both, but for a long time in vain. Considerable difficulty was constantly experienced in keeping the hill-men and the Zamindars from breaking the peace. Troops had to be used whenever disturbances and fighting occurred, for restoring order. These troubles were really in the nature of family quarrels and only incidentally involved the assistance to Government. In 1794 Collectors replaced the chiefs in council. After the permanent settlement things quietened down considerably. The pressure of that settlement and enforcement of decrees against defaulting Zamindars occasionally caused disturbances.

The Rampa country was a continual source of trouble. The disturbances were not generally in the nature of a revolt against supposed oppression since no revenue was collected in that country till towards the end of the century. They were either plundering raids or internal feuds. Government became involved in the latter by championing the Mansabdar against his Muttadars and it was his abuse of this support which ultimately led to the Rampa rebellion of 1879 and the removal of the Mansabdar.

Rampa is a little hill village just north of Chodavaram. This was once the chief place in the small Mutta by the same name and also the residence of the Muttadar. In the earliest records

which make a mention of the Zamindar, Mansabdar, or the Raja of Rampa describe him as an independent ruler. Mr. Grant in his "Political Survey of the Northern Circars" calls him 'an independent as the Raja of Bastar'; and the Committee of Circuit writing in 1780 stated that though the Zamindari of Rampa belonged to the circar of Rajahmundry yet neither the Company, nor the Nizam's Government received any tribute from it. At the time of the permanent settlement of 1802-03 the Rampa country was ignored. However, subsequently, the Government introduced several rules, regulations, etc. The unpopularity of the police who has assisted in introducing the new rules and also oppressed the people on their own account contributed to the general discontent in this area. The people said that they could not stand all the taxes that were being imposed; that the constables were extorting fowls; and that they could not live and that they might as well kill the constables and die. The operation of the civil law of the country was an additional grievance. Traders from the low-country had taken advantage of the simplicity of the hill-men, "who would much sooner walk into a tiger's den than put in an appearance in the Rajahmundry court", to make unfair contracts with them, and then if these were not fulfilled to file suits against them obtain 'exparte' decrees and destrain as much of their property as they could lay hands on. The hill people placed the blame for all this injustice on Government and Government rules and regulations, and thought that their only remedy lay in rising against the authorities.

On 9th March, 1879 the Police Inspector of Rampa reported that there was reason to apprehend disturbances. The Sub-Collector accompanied by the Superintendent of Police thereupon set out for the hills with a small body of police force. At Gokavaram they met one of the Muttadars who was suspected of disaffection, but he tried to allay their suspicion and accompanied them. Early on the 13th March a large party of hillmen came close to Chodavaram and stated their grievances to the Sub-Collector who went out unarmed to meet them. He attempted to reassure them and they expressed themselves satisfied; but a few minutes later they called out that they could not trust the Circars promises and began firing; no particular harm was done by this fire and no difficulty was felt in holding out at Chodavaram until reinforcements came up, and by the 17th the forces in the village amounted to 149 men. Some 400 officers and men of the 39 native infantry had also been landed at Kakinada on the 16th and were moving up the country, meanwhile, however, at Rampa two captured constables were solemnly sacrificed before the chief shrine by the insurgents, the leaders of the latter announced that rebellion was their only hope, and therefore the whole of the Rampa country was speedily ablazed.

The disturbances quickly spread to an area comprising over 5,000 square miles of wooded and hilly country. The operations of the troops were much hampered by the nature of the ground and the malcontents took advantage of their superior knowledge of the country to maintain a harassing guerilla warfare, avoiding all direct encounters with the troops, but attacking isolated police stations and burning or looting all villages of those who assisted the authorities. Troops were hastened up to the country, and by the end of 1879 the Government forces included besides several hundred policemen drafted from the neighbouring districts, as many as 6 regiments of Madras infantry, 2 companies of sappers and miners, and a squadron of cavalry. A wing of infantry from the Hyderabad contingent, was also brought on to the scene.

The leaders of the rebellion were Chandraiah, Sirdar Jangam Pulicanta Sambaiah, Tamman Dora and Ambul Reddy of Boduluru. The second of these was arrested on the 29th of April, 1879. Chandraiah had many victories to his credit and he succeeded in burning Addathigala Police Station.

The northern and the eastern frontiers of the Rampa country were occupied by strong detachment of sepoys and military posts and were established along the banks of the Godavari and Sabari. At the same time Mr. Sullivan, First Member of the Board of Revenue was appointed in July, 1879 to visit the district and to ascertain the real causes of the trouble and to suggest remedies. The steps he took which included the deposition of the Mansabdar and a promise that the Muttadars should thenceforth deal directly with the Government, did much to allay the excitement, and before the end of August, 1879 as many as 70 of Chandraiah's men had been captured and Rampa was comparatively quiet. The remaining revolutionaries were driven north to the hills of Golgonda and Jeypore. Ambul Reddy was captured in November, 1879 and Chandraiah was killed in February, 1880. Their removal broke the back of the rebellion.

The most deadly foe of the police and the troops engaged in suppressing the out-break was malaria which was manifest in this part of the country. At the end of March, 1880, out of 2,400 men employed, no less than 590 were on

the sick list. Several of them succumbed to this deadly disease and many others took a long long time before they finally recovered.

Most of the Muttadars were reappointed or replaced and their respective positions were defined. As early as September, 1879 Mr. Sullivan held the Durbar at which new sanads were distributed. In arranging the terms of tenure of each Mutta, the loyalty or disloyalty of its owners in the recent disturbances were considered and the quit-rent was raised or reduced in accordance therewith. The sanads contained two conditions, viz., (i) that a stipulated annual quit-rent, including the Abkari tax and the local fund cess should be paid annually to the Government, and (ii) that the Muttadar should conduct himself loyally and peacefully, and should give every assistance to the Government in maintaining law and order. A warning was added that if the Muttadar failed in his duties his Mutta was liable to be resumed.

In the early part of the year 1915 several dacoities were committed by a band of Koyas in the country around Addathigala and over the border of Visakhapatnam district. The dacoits were traced to the village of Lagari where two of them were arrested and tied up. The other members of the gang surprised the police at night and released the prisoners and stole two rifles, some cartridges and uniforms. Parties of police were called up from both the districts to trace and to arrest this gang. Fifty men were arrested but about a dozen of the more desperate men of the gang were at large and continued their depredations which included 25 dacoits, 3 attacks on the police and the murderers of the Izardar of Kondapalli and of the Muttadars of Dharakonda who were known to help the police. All efforts made by the local officers to affect their arrest proved ineffective.

A special party of police had therefore to be deputed to arrest the gang. The task was one of a particular difficulty and not unattended by danger. The scene of operations was a track largely covered by hills and thick jungles almost entirely lacking in communication facilities and also infested with malarial fevers. In spite of lack of co-operation from the Muttadars and other hillmen this out-break of lawlessness which might otherwise have easily assumed the aspects and dimensions of a *fituri* was suppressed in the middle of 1916.

The next and the most important and serious uprising occurred in 1920s in the Gudem hills of the Visakhapatnam Agency and was led by Alluri Sreerama Raju (who later came to be known as Alluri Seetarama Raju) a native of the West Godavari district, who had been living in these hills for a year or two and who had a reputation for sanctity and gathered a band of malcontents and raided three police stations, secured 26 carbines, and a large quantity of ammunition. He had at one time as many as 200 followers and several arms ranging from sporting guns to bows and arrows. He proclaimed himself king and declared war on the Government, and except for attacks on the police, his depredations were confined to commandeering food for his band, and because he was regarded as a saint, he received more assistance from the people than did the police. The latter were ambushed more than once and in one such ambush two young Assistant Superintendents of Police namely, Scott-Coward and Hayter and two constables were killed and six .303 rifles taken. The main cause of the *fituri* was Sreerama Raju's intense hatred of anything British. The ostensible causes alleged were the illtreatment of coolies and the obtaining of forced labour by the Deputy Tahsildar of Gudem and a few other personal grievances. The rebels moved from place to place, obtaining provisions and evading the forces operating against them and in their itinery was included Addathigala, Rajavomangi and several villages in Yellavaram and Rampachodavaram taluks respectively. The Malabar Special Police in considerable force had to be brought into this area and in the first week of December two detachments of this force succeeded in getting into touch with the gang and forcing two engagements in which 13 rebels were killed and 5 captured. Raju and his lieutenants escaped and the gang apparently got scattered or went into hiding until all traces of them was lost till the end of the year. This whole episode occurred in the year 1922.

Till about the end of March, 1923 nothing was again heard of this band and therefore, a part of the police force operating in this area was withdrawn. This had the affect of encouraging the rebels to greater activity. Their numbers probably increased and on April 17, Raju with a few followers visited Annavaram and made an unsuccessful search in the police station for arms and ammunition. Thereupon the police force was reinforced and a detachment of the Malabar police was recalled. The police forces had to be strengthened from time to time on account of the difficult nature of the terrain and also due to the sickness which added to the magnitude of the task. A punitive tax was imposed on certain areas for some months and a number of village officers and others who assisted the rebels were punished. In May, 1923 the

rebels captured a Sub-Inspector of Police on intelligence duty, a Deputy Tahsildar and several constables and peons. On the night of September 17, the police captured Mallayya Dora, Raju's chief lieutenant. However, on account of the disturbances continuing the Government at the end of the year decided to reinforce the police by a strong detachment of armed rifles with a view to bring the operations to a speedy conclusion. The Assam rifles were brought on the scene in January, 1924 and they were employed systematically in searching the country above the ghats, while the police forces continued to operate in the country below. The chief obstacle to the Government forces was again the active or peaceful sympathy shown to the rebels by the inhabitants of the area. Another detachment of Assam rifles were brought in and efforts were made to clear up the situation before the break of the monsoon. In the course of the thorough combing of the country by the troops and the police a band of rebels was brought into action and defeated on the 6th of May and on the next day Seetarama Raju himself was captured. He was brought before the commanding officer of the Assam rifles but was shot shortly after. The rebellion then came to an end and the force operating in the Agency was withdrawn.

After this the political history of East Godavari district like the history of the rest of the well administered part of the Madras Presidency remained uneventful till the national struggle for independence came to wake it up from its slumber. This district too, like the rest of the Nation, responded to this call and joined hands in the freedom movement.

This district had also its share of contribution to make in the Freedom struggle and Social Reformation. Bulusu Sambamurty and Kandukuri Veeresalingam Pantulu were two of the more important personalities of this district that played a great part in the Political and Social Reformation.

Bulusu Sambamurthy was born in 1886 in Dulla village of this district. He was one amongst those who strictly followed the preachings of Mahatma Gandhi. He was a strict disciplinarian and first stepped into the political field by joining the 'Home Rule Movement' in 1919, giving up his legal profession, when he was earning both money, name and fame in that profession. Then in 1920 he responded to the call of Mahatma Gandhi and played a prominent role in the 'Civil Disobedience Movement' and similar other movements which ultimately led to the dawn of Independence of the country. In those days it was a common feature for the political leaders to suffer imprisonment and he was not an exception to it. He propagated the Congress ideals to the nooks and corners of the country and more especially in 'Andhra Desa'. He held the post of Secretary of the then Andhra Congress Committee during the years 1935-37. He had the distinction of becoming the Speaker of the Madras Legislative Assembly constituted during the First Congress Government in 1936. He never lagged behind to lead any movement which was intended for the upliftment of the people. Besides being a politician he was also a social worker who worked hard for the cause of the down trodden women and Harijans.

He was noted for his simplicity, sincerity, sacrifice and bravery. He had a very broad vision and his efforts contributed in no small measure for the independence of the country and also to the formation of a separate Andhra State and later the Andhra Pradesh. He died in 1958 after realising his dream of Visalandhra.

Kandukuri Veeresalingam Pantulu, who was born at Rajahmundry in the year 1848, was a great Social Reformer. From his boyhood he exhibited a keen interest in literary pursuits and became a 'Pundit' in Telugu language besides passing the entrance examination in English. He retired as a Telugu Pundit of the Madras Presidency College. He worked hard for the cause of young widows. He started and maintained the 'Widows Home' and has left considerable property for its upkeep with the 'Hithakarini Samaj' at Rajahmundry. He has also started a monthly journal 'Vivekavardhini' which helped a lot in propagating his ideals. He had the capacity to argue, convince and win over persons to his side. He was also a prose writer of some repute. In recognition of his social services the Government in the year 1893 had conferred on him the title 'Rao Bahadur' from whence he was popularly called as such till he died in 1919.

Kurma Venkata Reddi Nayudu another noted personality hails from this district and was born at Rajahmundry in 1875. He was a highly educated man and an able administrator. He was made the Governor of Madras Province in 1936, when Mr. Erskine went on leave. After 1936 elections the Congress Party came into power and when it demitted office, he formed the interim Government of Composite Madras State and had run the administration for a period of three months. He was a good orator. Prominent amongst his lectures were those delivered at Calcutta Congress in 1911 on Minto Morley Reforms and on Indian Volunteers in Madras Congress in 1916. The last few years of his life till he died in 1940 were uneventful.

After independence the first General Elections were conducted in January, 1952 for both the Houses of the People and the Legislative Assembly. The tenure of office of both the Houses was 5 years. But due to the failure of the State Government, mid-term elections were conducted during February, 1955 for the State Legislative Assembly. The district was divided into 18 Assembly Constituencies, to elect 24 members of the Legislative Assembly which included 6 members of the Scheduled Castes and Scheduled Tribes in the plural constituencies. The names of the members of the Legislative Assembly, Legislative Council and Parliament from 1952 to 1962 are given below.

1952 ELECTIONS

LIST OF MEMBERS OF LEGISLATIVE ASSEMBLY

Name of the Constituency (1)	Name of the Member elected (2)	Party affiliated (3)
Bhadrachalam	Sri Y. V. Krishnarao	Praja Party
	Sri Karam Bapannadora (Reserve)	Praja Party
Tuni	Sri Raja Vatsavaya Venkatakrishnaraju Bahadur	Congress
Pithapuram	Sri R. V. Jaggarao	Communist
Peddapuram	Sri Thota Ramaswamy	Congress
Burugupudi	Sri N. V. Rama Rao	Krishikar
Rajahmundry	Sri Ch. Prabhakara-chowdary	Communist
Kakinada	Sri C. V. K. Rao	Communist
	Sri Saka Venkatarao (Reserve)	Communist
Ramachandrapuram	Sri Kakarlapudi Raja Gopalanarasaraju	Praja Party
Anaparti	Sri Padala Satyanarayana Reddi	Congress
Pamarru	Sri S.B.P. Pattabhirama-rao	Congress
Amalapuram	Sri Nadimpalli Rama Bhadra Raju	Praja Party
	Sri Bojja Appala swamy (Reserve)	Scheduled Castes Federation
Razole	Sri Alluri Venkata-ramaraju	Communist
	Sri Ganji Nageswara-rao (Reserve)	Communist

LIST OF MEMBERS OF LEGISLATIVE COUNCIL

Graduates Constituency	Dr. M. V. Krishna	Independent
Local Authorities Constituency	Sri K. Suryanarayana Amalapuram	Praja Party
Srikakulam, Vizag, East Godavari District	Sri R. Venkata Subba rao, Rayavaram	Independent
Teachers Constituency (Madras-North)	Sri D. Venkatarao Rajahmundry	Independent
Nominated	Sri N. Satyanarayana Alamuru	

LIST OF MEMBERS OF PARLIAMENT

Name of the Constituency (1)	Name of the Member elected (2)	Party affiliated (3)
Kakinada Constituency	Sri Ch. Rama Rao	Communist
	Sri Kaneti Mohanarao	Communist
Rajahmundry Constituency	Sri Nalla Reddi Naidu	—

1955 ELECTIONS

LIST OF MEMBERS OF LEGISLATIVE ASSEMBLY

Name of the Constituency (1)	Name of the Members elected (2)	Party affiliated (3)
Bhadrachalam	Sri Md. Tahseel	Congress
	Sri Syamala Seetha-ramayya	Congress (S.T.)
	Smt. Pithala Vani Ramanarao	Congress (S.T.)
Rajahmundry	Sri A B. Nageswara Rao	Praja Party
Burugupudi	Smt. N. Venkataratnam	Congress
	Sri Bathina Subba Rao	(S.C.) Congress
Jaggampeta	Sri Duriseti Gopalarao	Independent
Peddapuram	Sri Durgavasula Venkata Subbarao	Communist
Prathipadu	Sri Parvathani Gurraju	Congress
Tuni	Sri Raja Vatsavaya Venkata Krishna Raju Bahadur	Congress
Pithapuram	Sri Vadrevu Gopala Krishan (upto 11-1-1960) Sri Peketi Thammiraju	Praja Party
Samalkot	Sri Putsala Satya-narayana	Congress
Kakinada	Sri Mallipudi Pallamraju	Congress
Pallipalem	Sri Remella Tirupathi rao	Congress
	Sri Reddi Kamayya (S.C.)	Congress

CHAPTER III

HISTORY OF REVENUE ADMINISTRATION

The district though acquired by the East India Company in 1768 was not at once administered directly by the Company but was leased out to the native rentiers called the Zamindars. The Rajahmundry and Eluru circars were placed under the Chief and Council of Masulipatam, who for the next 25 years were in over all control of the entire political, civil and revenue administration. It was found that the land was of two classes, namely Havili, consisting of household estates around the main towns appropriated by the Muslims for the up-keep of their numerous garrisons and establishments and administered directly by them; and the land under the control of the Zamindars. The latter were also agents of the Muslims and were the main agencies for the collection of revenue. They were also charged with the duty of raising troops and due to this fact they had become very powerful and had usurped hereditary rights and regarded themselves as the owners of the soil under their control. They maintained the semblance of a State, residing in mud-forts in which their palaces were situated moving out only on elephants or in gorgeous palanquins, etc. They exacted as much revenue as they were able to, paid a certain fixed sum to the Government and appropriated the balance to themselves. The Chief and Council of Masulipatam treated these Zamindars as the owners of their respective estates, and received from them a customary sum assessed on no scientific basis. On account of this system and the recognition of it by their Masulipatam council, the lot of the ryot and the tenant was rather miserable.

The oppression and the maladministration resulting out of this system came to the notice of the Court of Directors who in 1775, anxious both to protect the ryots and to secure more adequate revenue from the Zamindars ordered that a Committee of Circuit, to be composed of 5 members of the Council of Fort St. George, should be appointed "to enquire into the state of the Northern Circars ascertaining with all possible exactness the produce of the country, the number of inhabitants, the gross amount of the revenues, the articles from which they rose, the mode by which they were collected and the charges of collection". Hardly, however, had this committee begun its labours than its work was interrupted by the intervention of the new Governor of Madras, Sir Thomas Rumbold, who in 1778 decided to summon the Zamindars to Madras and himself make a settlement with them there. This resulted in an increase of 12½% above the sum the Zamindars had hitherto been paying. Sir Thomas Rumbold ceased to be the Governor in 1780 and in 1783 the Committee of Circuit was re-appointed. Its reports on the Havili and Zamindari lands dated respectively December 18, 1786 and February 15, 1787 contain a full and a valuable description of the country. The immediate effect of its enquiry was that the increment of 12½% imposed by Sir Thomas Rumbold on the Zamindars was confirmed, and in 1786 his settlement was extended for a period of 3 years till 1789; so that it was actually in force for 11 years. In 1789 the Government on the advice of the Chief and Council and the Board of Revenue increased the assessment to 2/3rds of the gross revenue and a settlement was made on these terms with the Zamindars except in the case of the Zamindari of Pithapuram, the lease of which had not expired and which was then being administered by rentiers.

In 1794 the Chiefs and Councils in the northern circars were abolished and the country was divided into Collectorates. At first three Collectorates were constituted with headquarters at Kakinada, Rajahmundry and Mogalturru.

In 1794, land which fell under the immediate management of Government was leased out in appropriate farms on joint rents to the leading ryots, the rents being fixed in grain and commuted into money at the market price or the average price for a number of years. Even this plan had its drawbacks; the oppression of the poorer neighbours by the head ryots could not be prevented and further the famine of 1791 had denuded the country of cultivators leading to a lot of land going out of cultivation and yet the ryots had to pay for it just as if it had yielded crop.

Due to pressure from the Court of Directors and from the Government of India a permanent settlement on the lines adopted in Bengal in 1793 was introduced in the Rajahmundry district in 1802-03. The estates of the existing Zamindars were confirmed to them in perpetuity on a peshkush which was generally fixed at 2/3rds of the average gross collections of land revenue in preceding years, the period of cal-

culation varying from 8 to 13 years according as accounts were available. The Havili land was divided into proprietory estates of convenient sizes yielding from Rs. 3,500 to Rs. 13,500 and these were sold in public auction to the highest bidders on permanent tenure subject to the payment of a peshkush calculated on the best available data. In both cases the rights of the undertenants were protected by a legislative enactment (Regulation XXX of 1802) which enforced the grant of pattas and the observance of customary rights. The hilly and the thinly populated estates of Rampa, Totapalli, Zaddangi hose owners were called Mansabdars and whose revenues were trifling were not brought under the permanent settlement like the other parts of the district and their existence was in fact almost ignored.

The greater part of the district was included in the Peddapuram Estate which was assessed with a peshkash of nearly 7 lakhs of rupees. Large areas were also included in the Pithapuram, Polavaram and Kota Ramachandrapuram Zamindaris, which were assessed respectively at 2½ lakhs, 1 lakh and 1¼ lakhs of rupees. There were in all 14 ancient Zamindaris and 12 Proprietory Estates in what constituted the Godavari district at that time. The Pithapuram Zamindari continued to keep up its size and property while large portions of the Peddapuram Estate was bought in by the Government for arrears while the whole of the Kota Ramachandrapuram was bought in 1846 and Polavaram was also reduced on account of arrears. Other properties suffered similarly from sales and subdivisions.

This permanent settlement was a dismal failure for both the ancient Zamindaris and the newly created proprietory estates which became speedily involved in financial difficulties. The newly created propritors not only merely imitated the extravagance of the ancient Zamindars but had also to struggle against over-assessment. Their estates quickly began to be put up for sale in satisfaction of arrears and usually passed at first into the hands of speculators who eventually came to the same end. In 1813-14, the first of them was purchased on behalf of the Government at an auction by the Collector and thence forward an ever increasing area came by the same process under the direct administration of the Government. Though the proprietory estates were the first to fall, several of the ancient Zamindaris eventually shared their fate.

Sir Thomas Munro, who had become the Governor of Madras was emphatically of the opinion that the great hope for the future lay in the gradual extension of the area of the Government land. He felt that no Zamindari once forfeited for rebellion should ever be restored. All estates falling-in, should invariably be kept and annexed to the circar land.

The effect of permanent settlement was disastrous on the ryots. There was no system of management, the only object was to exhort from the ryots the utmost possible amount of revenue. In adverse seasons all that could be taken of the ryots' produce was claimed on behalf of the Zamindars and in ordinary years the demand greatly exceeded the means. The deficiencies of bad years were made up in good ones, and in both, the ryot was left only a bare subsistence. Natural calamities, further, accentuated the grief of the ryots. The unfavourable season in 1831-32, culminating in a destructive hurricane in May of the later year, was followed by the disastrous famine of the 1833; the three years 1835-38 were far from prosperous, the last of them almost amounting to famine; in 1839 a cyclone did great damage all along the coast and far inland; while the season of 1840-41 was also disastrous. Due to these factors, the revenue declined rapidly, and on account of this, Sir Henry Montgomery, a member of the Civil Service was sent to make enquiries. His report dated 18th March, 1844 dealt at length with the evils of the existing system. He attributed them chiefly to the inefficient administration of Zamindars and Proprietories. He also lamented the want of adequate means of irrigation — specially the neglect of the Godavari water — and the disrepair of all the existing works. His report led to the enquiries which ultimately resulted in the construction of the anicut across the river Godavari at Dowleswaram and the great benefits that this irrigation project brought to the district. Sir Henry Montgomery in his report was also of the opinion that the only satisfactory way of dealing with the Government land was by a survey and scientific settlement. Meanwhile, as a temporary measure he advocated a system of joint village rents, and this was introduced a year or two later and remained in force for some 20 years. The main modifications introduced were the abolition of the 'Asara' system; i.e., the system of sharing the crops, and the insistence on the joint responsibility of the village community as a whole for the default of any of its members.

Meanwhile, notable changes had been effected in the administration of the district. In 1849 a Special Commissioner with the powers of a Board of Revenue was appointed to be in charge of it, and the post was continued till 1855. In 1859 the Rajahmundry, Masulipatam and

Guntur Collectorates were formed into the two districts of Godavari (with Kakinada as headquarters) and Krishna the boundary between which followed the course of the Upputeru and Tamaleru rivers. The anicut across the Godavari was also completed in 1853.

Mr. R. E. Master, Deputy Director of Revenue Settlement in his two schemes, one in 1860 dealing with the western delta, and the other in 1861 relating to the rest of the district submitted proposals for the scientific settlement of the Godavari district. The two schemes with certain modifications were introduced in 1862-63 and 1866-67 respectively. It was not considered desirable to survey or settle the whole of the villages belonging to the Government. The scheme did not deal with 148 Government villages in the Agency and elsewhere in which patches of land were only cleared for temporary cultivation and abandoned after a year or two for fresh one. Waste land, even in surveyed villages was often left unclassified on the ground that it was not likely to be occupied soon. Many of the lankas in the Godavari were omitted from the scheme, because their limits were continuously fluctuating and were ordered to be leased out only by auction — a system which still obtains.

The remaining area was divided into the "upland" and the "delta" according as it lay outside or within the influence of the Godavari irrigation. In each of these tracts the villages were grouped into classes with reference to their general fertility and the quality of the irrigation sources. Even the delta land was classified as dry and a uniform water rate of Rs. 3 per acre was imposed on irrigated fields in addition to the dry assessment. The soils were grouped into 14 classes and the grain values of each of the "sorts" into which these classes were subdivided were ascertained from experiment. Commutation prices were calculated from the prices of the past years and from independent enquiries. Deductions were also made for cultivation expences, etc. In the end 18 rates for dry land and 14 rates for wet land were arrived at.

The result of this settlement was an increase in the revenue demand amounting on the whole to 4 lakhs of rupees or 23% over the figures of 1859-60. This settlement continued in force for 30 years and in 1896 proposals for its revision were made. The chief factors calling for consideration were the enormous increase in prices and the great improvement in means of communication, which had occurred since the previous settlement. The anomalies caused by the water rate system in the delta also required their removal. In the uplands no re-classification of soils was considered necessary; and the chief change was an all round enhancement of the existing rates by 1/3rd, so that Government might share in the profits resulting from the enormous increase in prices.

In the delta both wet and dry land soils were reclassified and a consolidated wet assessment was substituted for the existing dry assessment plus water rate. The standard crops taken for wet and dry land were white and black paddy respectively. Though the delta crops never failed and the ryots there obtaining very high prices for their crops in famine years, their assessment was not specifically enhanced on that account.

For purposes of dry assessment, the villages were divided into two groups with reference to their means of communication and their proximity to markets; while wet land was grouped in blocks (irrespective of village boundaries) into four "classes" with reference to the quality of the irrigation and drainage. When the rates of assessment were applied to particular fields, they were modified according to the groups and classes in which the fields were included. The general result of the settlement was that in the whole of the Godavari delta there was a gross increase in the assessment by 8%.

Besides reassessing the areas dealt with at the former settlement, this settlement assessed to revenue many villages which either did not then belong to Government or had been left out of account owing to their jungly nature. Some 41 proprietory villages had been resumed by Government since the original settlement and many jungly villages had so far advanced in civilization as to justify their assessment. The large areas of waste-land in the surveyed villages of the upland taluks, which at the original settlement had been left unassessed on the ground that they were not likely to be brought under cultivation within a reasonable period, were also brought into line with the fields adjoining them.

The term of 30 years prescribed for the resettlement introduced in the year 1899-1900 in the East Godavari district expired in 1928-29. The next resettlement came into force with effect from Fasli 1339. As regards the changes other than those relating to the rates of assessment, the revised rates of assessment were introduced in all the taluks in the year 1931-32, i.e., the fasli year commencing from 1st July, 1931. The resettlement was carried out on the basis of the proposals made by Mr. B. G. Holdsworth, I.C.S., the Special Settlement Officer. The main feature of the resettlement was the

enhancement of the previously existing rates of assessment on wet and dry lands by a percentage based on the increase in the prices of the standard grains of the district during the years that followed the settlement of 1899-1900. As at the previous resettlement white paddy was adopted as the standard crop for wet lands throughout the district, black paddy for dry lands in the delta track and black paddy, cholam, cumbu, ragi and horsegram for dry lands in the uplands; the computation rates were calculated in the usual manner from the average prices of these grains in the ryots' selling months during the 20 non-famine years ending 1922-23 after making a deduction of 15% on account of cartage and merchants' profits. Notwithstanding these large increases, the maximum enhancement sanctioned by Government in the rates of assessment was only 18.75%.

No general reclassification of the irrigation sources was made at the resettlement. The classification of the irrigation sources connected with the Godavari delta system, the classification of which was manifestly incorrect, and of those the classification of which had been fixed at the previous resettlement at a class lower than the first on account of some defects from the point of view of supply or drainage and in respect of which the defects have been remedied, was revised and a suitable classification fixed after inspection.

In the upland, fields registered as dry, but which had been regularly under wet cultivation for 5 years and which could be irrigated economically and without prejudice to other registered wet lands and those from which it was impossible to exclude Government water were transferred to wet. All lands in the Godavari — eastern and central deltas which had been irrigated with standing permission, and irrigated dry lands that had been cultivated with wet crops in each of the 5 faslis preceding the resettlement and were conveniently situated for economic irrigation, and such other lands as were situated that they could not exclude Government water and were either under, or fit for wet cultivation were transferred to wet. Fields which had been registered as wet and which owing to their situation of a high level or for any other reason, were found unfit for wet cultivation were transferred to dry provided the owners consented. In doing so, care was taken to see that wet lands deliberately rendered unfit for wet cultivation not because the supply of water was insufficient but because the growing of dry crops were more profitable were not transferred to dry.

All porambokes were inspected at this resettlement and their correct classification fixed. Only lands which were required for State purposes or for the common use of the villagers were retained as porambokes and those not so required and which were actually under cultivation or were fit to be cultivated were transferred to "assessed waste" or included in holdings.

Lands which had been registered as "assessed waste" but which were actually required for the common use of villagers or for State purposes were transferred to poramboke, while those unfit for cultivation and not required for the common use of villagers or for State purposes were transferred to the head "unassessed".

Small extents of "unassessed" lands found under cultivation along with the adjoining ryotwari lands were assigned to the adjoining ryotwari holder after collecting appropriate land and tree value.

Large blocks of cultivable waste lands in the uplands and in the tail-end of villages of the delta track which had been unclassified, and which it was considered, were likely to be assigned, were classified after inspection.

No land was registered as "consolidated double crop" at the resettlement. The wet lands under the Yeleru river in the Peddapuram taluk were by practice treated as 'consolidated' double crop land and charged a special rate of assessment which covered the charge for the cultivation of a second crop on them. Simultaneously with the resettlement a revision of scale of water rates in force in the delta and in the upland tracks of the district, was carried out and the revised rates of water cess were introduced with effect from the 1st July, 1932. The important change introduced by these rules was the adoption of the uniform water rate system in the delta tracks in supersession of the differential water rate system which was in force previously.

Ground rents in each of the towns of the district were also revised at this resettlement with effect from Fasli 1341.

As regards the Agency tracts of the district, Sri T. Balakrishnan, I.A.S., while working as the Collector of East Godavari district prepared an exhaustive note in 1961 giving the historical background, the administration of the Muttas, its impact on the life of the tribals and finally the need for the abolition of the system.

Extracts from this note have been reproduced in the following pages.

Introduction: The question of abolition of the archaic mutta system had been on the anvil for more than a decade. Every report on the economic and sociological survey of the tribal areas of Andhra has had a word to say on that and the unanimity of opinion has been that the system has long outlived its usefulness and *raison d'etre* and that it has to be abolished in the interests of promotion of the well-being of the tribals and as a prelude to the establishment of modern system of administration in those tribal areas, in consonance with the system prevailing elsewhere. Various officers have gone into this question before the reports had been called for by the Government on some of the points concerned with the abolition. A perusal of some of the earlier reports makes one reminded of the words of Mr. Eliot.

> "We shall not cease from exploration
> And the end of all our exploring
> Will be to arrive where we started
> And know the place for the first time."

I have had occasion to study this problem for quite sometime and I have also toured the agency tracts of the district of East Godavari with a view to having first-hand knowledge of the working of the system and its impact on the economic and social life of the tribals. With this knowledge and on a careful study of all the old reports and papers and Sanads granted to the Muttadars, I should like to submit the following proposals for the abolition of Mutta system and the conversion of mutta tenure into Ryotwari and for the provision of alternative Revenue administration in areas which are under the mutta system now.

Historical Background: I shall first sketch the historical background of the institution of the Muttadari system so that the status of a Muttadar and the nature of a mutta tenure can be appreciated fully.

The ancestors of the Mansubdar of the Rampa area held the Rampa hills as feudatories of the Zamindari of Peddapore. At the permanent settlement, Rampa was not noticed and in the early part of the 19th Century, the Mansubdar's father (who was later deposed in 1879) took forcible possession of some villages in the plains where from he was driven back, but, later they were restored to him as he offered to acknowledge for ever the sovereignty of the Company. He was confirmed in their enjoyment and in that of the hill country, free from all assessment, on condition that he faithfully performed all duties in his village, a tenure known in Madras as "Kaval". This Mansubdar, the first, died in 1835 and the Muttadars of the four and twenty petty tracts into which the hills were divided, refused to attorn to his son. He was driven out of the country with his retainers, and he was a pensioner of the Government upto 1848 when the Muttadars finally agreed to receive him back on certain terms. They included his undertaking that he would levy no more than the prescribed quit-rents and that he would prevent disturbances in the taluk failing which he agreed to the resumption of his whole estate by the Government. He, however, failed to adhere to these conditions. He gathered 8 muttas for his own enjoyment and in the rest he doubled the quit-rents and even levied unauthorised cesses. Smarting under the exactions of this Mansubdar, the people of the Rampa area raised in a rebellion. This was put down and finally the Rampa Mansubdari was resumed and a settlement was made of the muttas by Mr. H. E. Sullivan, the then First Member, Board of Revenue, and he issued Sanads to the Muttadars who were loyal to the Circar. Certain Sanads were granted on favourable terms and the recepients of these Sanads were termed Mokhasadars.[1]

The Muttadari system is thus an ancient institution in the Agency tracts of the Godavari and Vizagapatam districts. As far back as in the forties of the last Century the Muttadar is referred to as a "Chief" and even in official records the terms "Muttadar" and "Chief" were used synonymously.[2] The system is based upon service tenure. The essence of this system is that the Government realise Land Revenue from the ryots in a group of villages (Mutta) through the Muttadar who is allowed the enjoyment of a good part of the revenue he collects and also of some rent-free lands for the service of collection and for helping the Government in maintaining Law and Order in the inaccessible hilly tracts. What happened in 1879 was an examination of the entire system by the then First Member, Board of Revenue and the settlement of Muttas. He issued specific Sanads to such of those who were found loyal to the Government during the insurrection mentioned above. There are 24 muttas in Rampa Chodavaram taluk and 6 Muttas and 5 Sub-muttas in Yellavaram taluk in this district. There are also 3 Mokhasadars in Chodavaram taluk and two in Yellavaram. As already explained, a Mutta is in effect an estate held on service tenure of "watch and ward", and a Mokhasa is a grant of land by the Government on favourable terms for the service rendered. The essential conditions of the Muttadari system are:

1. G. O. No. 109, Judicial, dated 16-1-1880.
2. G. O. 1036, Judicial, dt./5-5-1889 and the note sent by the Govt. of Madras to the Constituent Assembly in 1947 in Govt. Memo. No.1885/47-2 Pol. Dept. Dt./4-6-47.

(a) a fixed kattubadi to be paid to the Government by the Muttadar; and

(b) the Mutta is resumable by the Government for default but the grant is otherwise hereditary and permanent.

The other conditions of the Sanad require the muttadars to conduct themselves loyally and peacefully to the Government, maintain law and order by giving timely intimation of any disturbance or offence against laws and to apprehend and deliver up robbers and rebels and other bad characters. To quote the citation in the Sanads:

> "Should you fail in any of these conditions your mutta is a liable to be resumed and you and your people dealt with in such manner as may seem good to the Circar, but if you faithfully observe them you and your heirs will live happily in the enjoyment of your mutta under the protection of the Circar".

Forests are excluded from this grant.[1] Before 1879, the Muttadars were realising considerable revenue from forests, but in 1890 the Government declared that the Rampa forests were State property and directed that the Muttadars should be prohibited from leasing out the rights of collecting "Kalepapannu" or of felling timber for sale. But, on the grounds of policy and equity, the Government allowed[2] them monetary compensation for the loss of Revenue the muttadars sustained, subject to the condition that the muttadars give proper assistance to the Government officials in carrying out any forest regulations. Finally, this allowance to be paid to the muttadars were settled[3] in 1894.

Each Muttadar's assessment being fixed as on a holding of service tenure of the Government — "should he fail to fulfil our engagement we submit ourselves for the orders of the Circar" — no tenant is transferable, the succession in being hereditary but regulated by the Government, who, in cases of misbehaviour have power either to grant the Inam to another or resume it altogether.[4] And also, the next heir need not succeed as a rule. Nomination is made by the Agent to the Government from amongst the nearest heirs who is best qualified for the post. Thus, if a muttadar has five sons, one is selected at his death as the successor and he must take the lands, the others being entitled to be maintained at his hands as in the case of succession to any of the ancient Zamindaries.[5]

The muttas in this district were originally under the rule of the Mansubdar of Rampa as mentioned earlier, but Dutcherti Mutta in Yellavaram taluk, however, appears to have formed part of the original Zamindari of Golugonda, which was brought in for arrears of revenue in 1837. Subsequently, the mutta appears to have been granted to Sri Venkanna Dora in 1878.

The Present Administration of the Muttas and the impact of the Mutta System on the life of the Tribals

As stated above briefly, the main object of the mutta system is to ensure maintenance of Law and Order in the remote and inaccessible areas of the hilly tracts peopled mainly by tribals through the agency of intermediaries who were loyal to the ruling power and who could be depended upon to exercise their authority over the people living in their charge villages, of course under the overall control of the Government. The Government were then assured of the *Kattubadi* paid by the Muttadar and also of the maintenance of order and tranquility through their help. The cost of administering the remote areas was also kept at a bare minimum by these means.

It is to be examined now as to how the muttas are being administered by the Sanad holders.

As the areas are unsurveyed and as there is not much demand for land for settled cultivation the tribals being accustomed to a system of shifting cultivation called "Podu" the muttadars are wont to collect revenue in the form of a tax on houses generally. This tax sometimes varies from Rs. 1-4-0 to Rs. 3-0-0 per year. In Gurtada, Kota, Pandrapolu and Mohanapuram muttas, the house tax ranges even upto Rs. 5. In the case of Dutcherti Mutta, Yellavaram taluk, dry and wet assessment is being collected on the extent of the lands cultivated. The assessment on dry land ranges from As. 2 to As. 12 per acre and that on wet lands from Rs. 2-8-0 to Rs. 3-8-0 per acre. In Nellipudi Mokhasa, a uniform rate of Rs. 4 per acre is being collected on wet lands. In some muttas, especially the small ones situated upon the hills, the Muttadars lease out the village for a fixed sum (called Izara system), the apportionment of this amount between the various inhabitants of the villages being left to the villagers themselves.

1 Para 6 G. O. 103 Rev. dated 3-2-1890.
2 G. O. 1280 Rev. dated 21-12-1892.
3 G. O. 1433 dated 20-6-1894.
4 Para 8 of G. O. 109 Judicial dated 16-1-1880.
5 Para 8 of G. O. 109 Of 1880.

The amount due to the muttadar is collected through mutta clerks and mutta munsiffs who are paid a nominal wage in cash by the muttadars. There is no uniformity in the scale of payments to these agents and the remuneration varies from mutta to mutta and sometimes from village to village in the same mutta, depending upon the accessibility of the area and the total land revenue collectable there.

Remuneration for the services of these agents consists also of the grant of a certain amount of land and some tamarind trees and mango and jack trees the enjoyment of which is rent-free.[1]

Each mutta has invariably a mutta clerk who manages the affairs of the entire mutta and maintains the mutta accounts. The muttadars being mostly illiterate, depend largely on the mutta clerks who are generally half-educated. Besides some small cash payment, each mutta clerk is also given a small allotment of grain each year by every householder in the mutta and is allowed to enjoy the usufruct of one tamarind tree in each village of the mutta. The allotment of grain per house to the mutta clerk is uniform within a mutta but the quantity differs from mutta to mutta.

Sometimes the mutta munsiffs are also assisted in the work of collections by *pettandars*, who are generally the "leading men" in the village. The system of appointment of *Pettandars* is in vogue only in a few muttas. In some cases, this office is held instead of that of the mutta Munsiff's. Many of the *pettandars* are not paid any remuneration by either the muttadars or by the villagers and the office is considered to be honorary. In a few villages where payments are made the payment ranges from Rs. 2 to Rs. 5 in a year and in a few other cases the payments made to the mutta munsiffs are to be shared by the *Pettandars*.

Normally each mutta village has a village servant called *Barika*, who is given remuneration in the shape of grain and of the usufruct of one or more tamarind trees. The amount of grain paid varies from 4 to 8 seers per year.

In Yellavaram taluk, the system that obtains is a little different. In that the muttadars do not incur any expenditure from out of their resources towards the payment of remuneration to mutta munsiffs and village servants. These officials are permitted to cultivate certain plots of land assigned to them by the muttadars and they are also allowed to enjoy the usufruct of certain number of tamarind trees granted to them by the muttadars. In Dutcherti mutta in Yellavaram taluk, there are 49 villages and each village has a munsiff and a village servant. These functionaries, apart from cultivating the lands granted to them by the muttadar, also make the tenant pay, in addition to the assessment due to the muttadar, 1/5th of that amount to them. Besides, the village servant also collects 4 seers of grain per year from each tenant for services rendered.

This, in general, is the set up established by the muttadars for their charge villages, the sole aim being to see that the amounts due to them are collected. Though they are charged with the responsibility of maintaining Law and Order, there has rarely been any occasion for the muttadars to effectively render the "Watch and Ward" services. Thus, their main work appears to be enjoyment of the lands granted to them and collection of the revenue from the people in the charge villages.

It is very difficult to say to what extent the villagers possess occupancy rights over the lands they cultivate. It is true that by custom they enjoy certain lands the occupation of which is not generally interfered with but complaints of illegal encroachments by muttadars are not unknown.

Now, I shall dwell briefly on the effects this anachronistic system on the social and economic life of the tribals in the areas where the muttadari system is in vogue. The observation[2] of the then Chief Secretary to the Government of Madras in his note submitted to the Constituent Assembly that the power and influence of the muttadars over the ryots in every day life is said to be unbounded, is hardly an exaggeration.

Due to the vestige of the fuedal authority exercised over generations, they command great influence and in many of the areas their word is law to the villagers. Generally all the best cultivable land is owned by the muttadars and even if they make as they do sometimes — illegal encroachments of lands held by the villagers, it is difficult for the latter to bring to the notice of the authorities. In some cases it is also reported that the muttadar has to be paid "katnam" ranging from Rs. 5 to Rs. 50 at the time of marriages according to the status of the parties. Dr. Aiyappan has pointed out in his report[3] that the muttadars "as a matter of right, are entitled to vetti (free labour) from the village folk in their jurisdiction at the rate of one

1 Para 3 of the Spl. Settlement officer's report in B. P. 22. Press dated 14-12-36.
2 Govt. Memo. 1885/47-2 Pol. Dept., dated 24-6-47.
3 Report on the economic condition of the aboriginal tribes in the province of Madras published in 1948.

person for each hut". In some areas, the muttadars are wont to extract work from the ryots for about a week or 10 days in a year in their fields. The muttadar, in return gives the labourers some food, but no wages. And Dr. Aiyappan remarks that this system of forced labour is "bound to continue until a change in the working of the present mutta system is brought about". Though, it is true that undue harrassment and by tyrranical slave-driving by the muttadars on the model of despotic oriental potentate has become considerably less as the villages are visited more and more by the officers of the Government, and the tribals are getting more social awareness, yet it is a fact that the office of the muttadar exerts a very unwholesome influence in the village in his charge.

In this connection, it may also be mentioned that some of the muttadars have leased out lands given to them under the Sanad to some people from the "Plains" for a period of 99 years. This is obviously to the disadvantage of the tribals especially considering the fact that the lease or alienation of the land to plainsmen is prohibited by law. This has been done in spite of the specific clause in the sanad namely — "you shall enjoy the same to its best advantage as service mokhasa, but shall not alienate, gift, mortgage or sale any portion or portions thereof". But it has been held that the lease in question cannot be considered to be a breach of condition of the Sanad even if it may not be in the best interest of the ryots in the charge villages, because lease has not been specifically prohibited in the condition in the Sanad which authorises him to make use of the lands to the best advantage, which has been taken to include even a lease of this kind. Thus, on the one hand, the muttadars are getting good income from out of the lands granted to them by the Government and also getting various prerequisites and titches to which they are entitled by convention without having to attend to any arduous 'watch and ward' duty for which alone such a favourable grant was made to them when the muttas were settled in the last century, and at the same time, the interests of the tribals badly suffer due to the legal and traditional sanctions attached to this institution of the intermediary, who has lost his *raison d'etre* even from the narrowest law and order point of view.

The State Government have already taken a decision to abolish the Muttadari system prevailing in this district as well as in Vizag district. A draft regulation to be issued under para 5(2) of the Fifth Schedule to the Constitution of India for the abolition and conversion of the system into a system of ryotwari tenure has already been prepared and is to be shortly submitted to the President of India for approval.

The Godavari District was increased by the addition of Bhadrachalam taluk in 1874 and two muttas of Golugonda Agency in 1881. The district thus constituted, increased enormously in wealth, population and importance when the irrigation from the Godavari anicut took full effect, and became a heavier charge than one Collector could efficiently administer. Accordingly in 1904 the portion of it which lay south and west of Godavari river (with the single exception of the then Polavaram Division) was transferred to the Krishna district which latter in its turn was lightened by the formation of the districts of Guntur and West Godavari.

During the decade 1951-61 a few territorial changes occurred in the composition of the district. Bhadrachalam and Nugur taluks comprising an area of 1,504 square miles were transferred to Khammam district in G.O.Ms. No. 2384, dated 17th November, 1959 for convenience of administration. The territories transferred to Khammam district are geographically contiguous to it. The river Godavari and the river Sabari separate these two taluks enbloc from the East Godavari district and the people of this area would have to cross either of these two rivers to get into the old district headquarters. Though by long association, Rajahmundry at the head of the Godavari delta in East Godavari district, still appears to attract the trade of the Nugur and Bhadrachalam areas, administratively, the proximity and greater accessibility of Khammam, the new district headquarters, seems to be a positive advantage.

Today the district consists of four Revenue Divisions comprising of twelve taluks of which two are in the Agency. The district headquarters is at Kakinada.

It was not until 1866 that the village establishments of the district were thoroughly reorganised on modern lines. At that time the village servants were paid partly from certain customary fees and partly from the profits of the cultivation of Inam lands granted to them free of assessment. The customary fees had been collected with, and included in, the old joint-rent settlements; and then deducted under the head of ordinary remissions and disbursed to the village servants entitled to them. At the settlement of 1862-67 these fees were not included

in the assessments fixed upon the land and the Government expressly reserved the power to levy a regular cess for the proper remuneration of the village officers. It was decided in 1866 that this cess should be levied under the Village Service Cess Act of 1864 at the rate of 8 pies in every rupee of the land revenue on Government lands and all water rates on Inams. It was ordered that the Inam lands which had upto then formed part of the remuneration of the village servants should be enfranchised at a quit-rent of 5/8ths of the land revenue assessment which would have been charged upon them had they not been Inams. The proceeds of the cess and the quit-rents on the Inams were set aside to constitute a fund (latter abolished) for the future payment of the village establishments.

The number of villages was considerably reduced by clubbing small ones with the larger adjoining ones, and the establishments were also modified, being in every case much reduced. A Munsiff, a Karnam and a Talaiyari and one or more Vettis were permitted for each village.

Village barbers and Chamars had also been formerly remunerated with land Inams. These lands were not enfranchised, but were left to their holders to be enjoyed as Service Inams on condition that the holders rendered to the villagers the services, as barbers and leather-workers, which had been customarily required of them. Specific services were usually specially paid for in grain by the villagers and these payments formed an addition to the income obtained from the Inams.

In 1855 a new scheme of village establishments was sanctioned. The essential alterations effected by this were the increase in the Munsiff's pay and the appointment of Monigars to help them; the appointment of assistant Karnams; a moderate increase in the number of Talaiyaris and Nirgantis and a decrease in that of the Vettis. The number of villages were once again altered by regrouping and by making provision for some resumed villages.

In 1908 the village establishments in Government villages were again revised. The Madras Act of 1894 was also extended to all the proprietory and whole Inam villages in the district. An Assistant Karnam and Monigar were allowed for each of the villages which had a *beriz* of not less than Rs. 8,000. For a village the *beriz* of which extended over Rs. 30,000 an Assistant Karnam was sanctioned. In 1920-22 the posts of Monigars were abolished, the posts of Assistant Karnams and village servants were reduced with reference to the *beriz* and population and some small villages were grouped or amalgamated. With the abolition of Zamindaris and introduction of Ryotwari tenure under the Madras Estates Abolition and Conversion into Ryotwari Act, 1948 the village establishment was further reorganised as to bring it on a uniform level with the Ryotwari areas.

CHAPTER IV

POPULATION AND HOUSING

In this chapter a brief review is made of demographic, economic and social characteristics of the population as revealed by the 1961 Census count. The detailed tables in the third part of this Hand Book will give the fuller statistical data.

Population

On the 1st March, 1961, the reference date of the Census of 1961, 2,608,375 persons were found in East Godavari district which means an increase of 13.32% over the 1951 population as against the average rate of increase of 15.65% for the State as a whole. There are 624 persons per square mile in the district as against 339 persons in the State as a whole. The density of population in the district was only 453 in the 1951 Census. The density of the urban population in the district is 6,218 per square mile as against the corresponding State average figure of 4,340. The urban density figures for the 1951 Census stood at 3,195 for the district and 4,074 for the whole State. Amongst the districts of the State, East Godavari district with an area of 4,178 square miles occupies only 14th rank in regard to area but second rank as regards population. Out of this area 1,560 square miles are under the Agency tract and the remaining 2,618 square miles under plains portion.

Distribution and density of population

The district comprises of 12 taluks out of which 6 are independent sub-taluks. Rampachodavaram and Yellavaram independent sub-taluks are completely under the Agency tract. Kakinada taluk has the largest number of people (403,099) living in it followed by Rajahmundry (382,401), Ramachandrapuram (378,137), Amalapuram (356,676), Peddapuram (193,641), Razole (182,099), Pithapuram I.S.T. (167,337), Kothapeta I.S.T. (165,794), Prathipadu I.S.T. (137,252) and Tuni I.S.T. (129,740). The two independent sub-taluks in the Agency tract, *viz.*, Yellavaram (63,502) and Rampachodavaram (48,697) record a population of less than a lakh — much lower when compared with the other taluks. Ramachandrapuram taluk is the most densely populated with 1,308 persons per square mile followed by the taluks of Pithapuram (1,213), Kothapeta I.S.T. (1,142), Kakinada (1,050), Razole (1,035), Rajahmundry (1,012), Amalapuram (1,010), Tuni (709), Prathipadu (610), Peddapuram (514), Yellavaram (75) and Rampachodavaram (69).

Growth of population

During the past six decades, i.e., from the dawn of the present century, East Godavari district has recorded 94.80% in the growth of population as against the State average of 88. 73%. In this regard this district stands next to Krishna, West Godavari and Guntur districts. In general there was a steady increase in the growth of population in all the decades except in the decade 1911 to 1921. The rate of increase of population in this district during the decade 1951-61 was lower than that recorded in the previous decade and more so in the urban areas; whereas the rate of increase of population in the rural areas is higher. This district would have exhibited still higher rate in the increase of population but for the transfer of two taluks of Nugur and Bhadrachalam from this district to Khammam district. Though there was very low general increase in the rate of growth in the population during the decade 1911-21, in the entire district, Rajahmundry taluk and Kothapeta, Prathipadu, Pithapuram and Rampachodavaram (Agency) independent sub-taluks have recorded decrease in the growth of population. This decrease in the growth was slightly more pronounced in Prathipadu and Pithapuram independent sub-taluks whereas the other three taluks have recorded almost equal rate of decrease.

The reason for the decrease in the growth of population in the above mentioned taluks and for the general low rate of growth of 1.70% in the entire district was of course the result of the great wave of influenza of 1918 that spread all over the country. This district recovered from this set back and had exhibited a sudden spurt in the rate of growth (14.31%) in population in the next decade ending 1931. Again during the decade 1941-51 this district had registered a higher rate (16.45%) in the growth of population than the previous and succeeding decades, the percentages being 12.52 and 13.32 respectively.

The statement below gives percentage of variation of population from 1901 to 1961 for the district as a whole as well as for each taluk.

Rural and Urban Population

There are two cities, 12 towns and 1,537 1,346 inhabited and 191 uninhabited) villages n the district. 81.46% of the total population ives in villages and only 18.54% lives in towns nd cities. Kakinada city, which is also the district headquarters and Rajahmundry which is he Sub-Collector's Headquarters account for).69% of the total population and 52.30% of he urban population. Kakinada city (122,865) hough headquarters of the district, occupies he second place in the district as regards popuation whereas Rajahmundry (130,002) occupies he first place. The Agency areas account for 1.30% of the total population and 5.28% of the otal rural population.

Sex Ratio

There are 999 females for every 1,000 males in the district. In the 1951 Census their number was slightly higher, i.e., 1,002 females for every 1,000 males in the district. In the urban areas of the district there are 994 females for every 1,000 males which is less than at the 1951 Census and in rural areas there are equal number of females for every 1,000 males and this figure is slightly higher than at the previous Census. It may, therefore, be seen that there is slight shortage of females in the urban areas. There may be several reasons contributing to this slight disparity of sexes such as the return of large number of males from Burma and other far eastern countries to which they had immi-

grated before and also due to some general immigration of male population to the industrialised centres of this district.

Age Structure

Able bodied persons of above 15 years and below 55 years constitute 53.82% of the total population, the remaining being accounted for by children and young persons of age below 15 years (38.23%) and old persons of 55 years and above (7.95%). The age distribution of the population is shown below:—

Age-group (1)	Persons (2)	Percentage (3)
0–4	347,607	13.33
5–9	353,118	13.54
10–14	296,293	11.36
15–24	441,971	16.94
25–34	417,202	15.99
35–44	312,144	11.97
45–54	232,690	8.92
55–64	135,467	5.19
65–69	22,936	0.88
70 and above	48,710	1.87
Age not stated	237	0.01
Total	2,608,375	100.00

From this table it is seen that not many survive to old age.

Marital status

As elsewhere in the country, marriage is universal. Out of the total number of 1,907,650 persons (males 956,736 and females 950,914) aged above 10 years, 1,445,122 have been found to be married (75.75%) and this number includes 221,989 widowed (Males 39,609 and females 182,380) and 17,938 divorced or separated persons (males 6,825 and females 11,113). The marital status of one person (female) is unspecified and 462,528 persons comprising 24.25% of the age-group (10+) were found to be unmarried. 62.34% of males and 64.01% of females comprise the married persons in this age-group. Out of the total number of 700,725 persons below 10 years of age no one either male or female was found to be married. In the age-group 10–14, out of a total number of 296,293 persons, 1,197 males and 20,269 females were found to be married. Amongst these married persons 8 males and 134 females were found to be widowed, 6 males and 165 females were found to be divorced or separated. A strange phenomenon is revealed from the study of tables on matrimonial status of the population of East Godavari district. As per the 1961 Census there is a shortage of 1,631 women as compared to the total number of men in the district. In spite of this shortage of women it is seen that the total number of women married (608,727) is more than the total number of married men (596,467). The percentage of unmarried men to the total male population of above 15 years is 19.89 and of above 10 years is 32.80. This imbalance may be either due to some men getting married to more than one woman or the females usually getting married in the early ages or men going to other places to seek their livelihood leaving their wives at home or women coming to their parents for confinement and temporary stay. This problem is, therefore, likely to be an interesting subject for sociological study.

Literacy and Education

The development of a country largely depends upon the education of its people and hence great stress has been laid on education in our Five Year Plans. Education is the systematic instruction, schooling or training given to young persons in preparation for the walk of life, while literacy is the ability of a person to read and write in order that he may communicate with the outside world. During the Census enumeration information regarding literacy and educational levels of each person was collected and the particulars so tabulated as to facilitate proper planning for the improvement of educational facilities with reference to the needs of the country in various fields.

At the present Census a person who can both read and write any language is taken as a literate. A person who can merely read but cannot write has not been treated as a literate. The test for reading is the ability to read any simple letter. Children aged 4 years and below have been automatically treated as illiterate. If a person has been successful in a recognised examination or examinations, the highest qualification so obtained has been taken as the level of education of that individual. Columns 18 and 19 of the Village and Town Directory given in Part IV of this book indicate the number of literates among males and females in each village and in each ward/locality of the town. The following statement gives at a glance the total number of literates as well as their percentage to the population in the district and in each of the taluks of the district sexwise for the Total, Rural and Urban population.

It may be seen from the above statement that 26.00% of the population of the district is literate against the corresponding figure of 21.19% for the State as a whole. Though the district percentage exceeds that of the State, the percentage of literacy in some of the backward taluks of the district such as Yellavaram and Rampachodavaram independent sub-taluks in the Agency areas appears to be very low. The incidence of illiteracy among females is very heavy. Only 18.59% of the female population are literates and the remaining 81.41% of females are illiterates. 33.40% of males, however, claim literacy.

The following table will illustrate the literacy percentages in the district according to the different age-groups.

STATEMENT IV-3

Age-group (1)	Persons Total (2)	Persons Rural (3)	Persons Urban (4)	Males Total (5)	Males Rural (6)	Males Urban (7)	Females Total (8)	Females Rural (9)	Females Urban (10)

The number of educational institutions and scholars reading therein in the year 1960-61 are given in a separate statement under Administrative statistics.

Working population

Persons engaged in productive work whether they derive income or not have been treated as 'Workers' in the 1961 Census. In respect of seasonal work like cultivation, livestock keeping, Household Industry, etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he has been recorded as a worker. Persons temporarily incapacitated, undertrial prisoners, if they had been working before, have also been treated as workers. Those that were treated as 'Non-workers' were wholetime students, housewives, dependants, persons permanently disabled from work, retired persons, people of independent means for which they need not work, beggars, convicts in jail, unemployed persons, etc.

From the above classification of 'Workers' and 'Non-workers', it may be seen that the definition of a worker has been liberally conceived. Any one who generally spends more than an hour per day on any particular productive occupation has been considered as a worker. 46.90% of the total population is found to be economically active.

There are 997,018 persons in the age-group 0–14 years, representing 38.22% of the total population. The recent trend has been to regard this age-group as representing the school going population. With the introduction of compulsory education this age-group will henceforth be automatically eliminated from the working population. In the 1961 Census, it was seen that 110,606 persons of this age-group belonged to the working population. That is 4.23% of the non-adults constituted the earning members of the population.

The figures of the district indicate that the working women are not in keeping with their numbers. 30.79% of females come under the inference of workers.

Persons engaged in Agriculture (cultivation and agricultural labourer) as their main work constitute 60.48% of the total working population. The following table based on a 20% sample of Household schedules gives the figures of sample households engaged in cultivation classified by interest in land and size of land cultivated in Total, Rural and Urban areas separately.

STATEMENT IV-5

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED

Non-agricultural occupations provide employment to 39.52% of the total working population. The following table illustrates the broad categories of workers other than in cultivation and agricultural labour and number of persons in each with their percentage to the total working population.

	Total persons	Percentage
Other services (Category IX)	152,958	12.50
Household Industry (Category IV)	135,269	11.06
Trade and Commerce (Categroy VII)	71,116	5.81
Mining and quarrying etc. (Category III)	52,280	4.27
Other than Household Industry (Category V)	37,809	3.09
Transport (Category-VIII)	23,481	1.92
Construction (Category-VI)	10,589	0.87

Medical facilities

Though there is a Government General Hospital at the district headquarters together with a Medical College attached, the medical facilities in the district are inadequate for the population of the district. As seen from the Census occupational returns, there are only 362 practitioners of modern medicine of whom only 36 are women. This means that there is one doctor for 7,205 people and one lady doctor for 36,205 women. Further, there are only 27 Dentists, 380 Nurses and 641 Midwives and Health Visitors.

The following table illustrates the average number of beds, doctors, dentists and nurses, midwives and health visitors per 100,000 of Total, Rural and Urban population.

	Number	Per 100,000 population
Beds	714	27
Doctors	362	14
Dentists	27	1
Nurses, Midwives & Health visitors	1,021	39

There are about 1,079 persons who practise the Ayurvedic and Homeopathic systems of medicine. There are about 731 persons who profess to be physicians and have been classified under 'Others'.

Other Professions

There are 706 Architects, Engineers and Surveyors in the district. Of these 390 are Civil Engineers, 45 Mechanical Engineers, 78 Electrical Engineers, 17 Chemical Engineers, 1 Mining Engineer, 120 Surveyors and 55 others who have not been elsewhere classified.

On the educational side there are 415 University Teachers, 1,953 Secondary School Teachers, 6,540 Middle and Primary School Teachers and 3 Nursery and Kindergarten School Teachers and 1,353 Teachers who have not been elsewhere classified.

On the juristic side there are 22 Judges and Magistrates, 372 Legal Practitioners and Advisors, 80 Law Assistants and 20 Jurists and Legal Technicians (including petition writers) who have not elsewhere been classified.

On the communications side there are 370 Railway Engine Drivers and Firemen. There are 1,850 Motor Vehicles and Motor Cycle Drivers, 3,649 Cycle Rickshaw Drivers and Rickshaw Pullers and 4,633 animal drawn vehicles drivers.

The fifth table in the 'B' series gives full details regarding the people of various occupations among the working population available in the district, classified by sex of persons. All these occupations have been classified according to the National Classification of Occupations. It provides an interesting field of study to the discriminating reader and will help to assess the requirements and the availability of resources and talent.

Scheduled Castes and Scheduled Tribes Population

The total Scheduled Castes population of this district is 459,656 persons representing 17.62% of the total population. The Scheduled Tribes population stands at 100,343 persons representing 3.85% of the total population. There is higher proportion of Scheduled Castes population in the district than the State average. The highest concentration of Scheduled Castes is found in Amalapuram taluk representing 29.14% of the general population of that taluk followed by Razole taluk (27.82%), Kothapeta independent sub-taluk (24.21%), Prathipadu independent sub-taluk (16.86%), Tuni independent sub-taluk (15.39%), Peddapuram taluk (14.55%), Pithapuram independent sub-taluk (14.16%), Kakinada taluk (13.71%), Ramachandrapuram taluk (13.38%) and Rajahmundry taluk (8.29%). Yellavaram independent sub-taluk records 7.97% of the general population of that taluk while Rampachodavaram independent sub-taluk records only 4.09%. The percentage of Scheduled Castes (17.62%) in the district is higher than the State average of 14.88%. As regards Scheduled Tribes the district average is 3.85% which is less than the State average of 4.27%.

Of the total population of Scheduled Castes, 231,422 are males and 228,234 are females and this shortage of females is not different from the characteristics of the general population of the district. There is a shortage of about 14 females for every thousand males in the district Scheduled Castes population. The extent of literacy among the Scheduled Castes population is low and more so among the females. Only 17,052 females (7.47%) and 43,533 males (18.81%) are literate.

294,607 persons are workers representing 64.09% of the total Scheduled Castes population. 159,894 men and 134,713 women come under this category. Their major occupation is working as Agricultural Labourers and as usual women outnumber the men in this field. Very few have taken to manufacture, construction, trade and commerce and transport and communications. This seems to be due to lack of appropriate training and orientation. There are very few persons, who have reached even the Matriculation or the Higher Secondary stage. The actual figure for this stage is 2,011 males and 206 females representing 0.87% and 0.09% of their respective numbers. These figures by themselves aptly illustrate the need for the upliftment of this community through more advanced education and technical training. It is also seen that though there are more number of workers than the district percentage among these communities, yet the sort of work that is being done is only of the lowest category.

The following table shows the population particulars of various Scheduled Castes enumerated in East Godavari district at the 1961 Census:

Name of the Scheduled Caste	Rural	Urban	Total
(1)	(2)	(3)	(4)
All Schdeuled Castes	413,521	46,135	459,656
Adi Andhra	221,935	16,054	237,989

Thoti	1	377	378
Scheduled Castes not specified	177	128	305

The Scheduled Tribes population of the district is 100,343 and 77.62% of these Scheduled Tribes population live in the two Agency taluks of Rampachodavaram and Yellavaram. Their economic and social conditions is no better than those of the Scheduled Castes. Their educational achievements are hardly worth mentioning. Their main occupation is Agriculture and Agricultural Labour and a few of them work in Household Industry, Mining quarrying, etc.

The following table illustrates the population particulars of the various Scheduled Tribes enumerated in East Godavari district in the 1961 Census:

Name of the Scheduled Tribe	Rural	Urban	Total
(1)	(2)	(3)	(4)

Scheduled Tribes not specified	2	1	3

Social and Religious Groups

Hindus form the bulk of the population constituting 96.22%. After this major religion, Christians (2.36%), Muslims (1.38%) and Jains (0.03%) come next in order. There are only 123 Buddhists, 28 Sikhs and 4 Others living in the district.

Migration

Migration of persons from one part of the country to another part is not uncommon and more so as between the districts in the State. Generally migration is prompted by the economic conditions prevailing in a particular place like famine conditions, employment opportunities, trade and commerce, etc., and the desire to lead a better life. East Godavari district bounded by the Bay of Bengal on the east and south, Visakhapatnam district and Madhya Pradesh State on the north, Khammam and West Godavari districts on the west is economically in a more favourable position. Amongst the three districts that surround this district, Visakhapatnam and Khammam are comparatively more backward and West Godavari district is equally fertile and also economically sound. West Godavari and Visakhapatnam districts contributed a large number of migrants to this district. A detailed study of the migration trends in this district reveals that 146,956 persons (65,124 males and 81,832 females) have immigrated into this district from other districts of the State and 8,725 persons (5,327 males and 3,398 females) from other States in this country and 2,082 persons from other countries. As already stated above, bulk of the immigrants are from the two adjoining districts, namely, West Godavari 58,449 persons (23,159 males and 35,290 females) and Visakhapatnam district 56,726 persons (23,946 males and 32,780 females). These two districts are followed by Guntur 9,723 persons (5,344 males and 4,379 females), Krishna 8,649 (4,383 males and 4,266 females), Srikakulam 5,049 (2,687 males and 2,362 females), Nellore 3,005 (1,902 males and 1,103 females), Kurnool 1,279 (846 males and 433 females), Chittoor 978 (757 males and 221 females), Anantapur 599 (478 males and 121 females) and Cuddapah 599 (426 males and 173 females).

The immigration of people from the Telangana districts is of little significance and in this regard Hyderabad district being the capital of the State occupies the first place from which 918 persons (497 males and 421 females) have migrated into this district. The other districts that follow this district are Khammam 285 persons (169 males and 116 females), Nalgonda 237 (157 males and 80 females), Warangal 146 (102 males and 44 females), Mahbubnagar 120 (118 males and 2 females), Karimnagar 81 (74 males and 7 females), Nizamabad 78 (48 males and 30 females), Adilabad 18 (17 males and 1 female) and lastly Medak 17 (14 males and 3 females). From this it is evident that only a negligible number of persons have immigrated from the Telangana districts into this district. It is also a notable feature that more number of women have immigrated into this district than men from West Godavari and Visakhapatnam districts presumably by ties of marriage. Among the immigrants from other districts men outnumber women. The majority of workers among the migrants have taken to Cultivation, Agricultural labour and Household Industry and the remaining migrants are engaged in other categories of work. More than half of the immigrants constitute 'Non-workers', most of whom are made up of housewives drawn into this district by ties of marriage.

Persons immigrated into this district from the other States in the country are 8,725 persons comprising of 5,327 males and 3,398 females. Amongst the immigrants more number of persons are from the neighbouring States of Madras, Orissa, Mysore and also from Kerala and Rajasthan though these two States are far off. The influx of population from the above States may be for business purposes.

As regards emigration of people it is observed that 185,301 (80,839 males and 104,462 females) have gone out of this district to the other parts of the State, mostly to the neighbouring districts of West Godavari 89,980 persons (35,991 males and 53,989 females) and Visakhapatnam 36,519 persons (14,633 males and 22,068 females). The other districts to which there are out migrants are Krishna 19,533 (9,651 males and 9,882 females), Guntur 6,972 (3,514 males and 3,458 females), Srikakulam 4,020 (1,933 males and 2,089 females), Nellore 1,483 (717 males and 766 females), Kurnool 1,298 (553 males and 745 females), Chittoor 928 (499 males and 429 females), Anantapur 569 (314 males and 255 females) and lastly Cuddapah 296 (166 males and 132 females). It is seen that amongst the emigrants also women outnumber men as the women have to perforce migrate to join their spouses in the neighbouring districts. Emigration of people to the Telangana districts is not of much significance. Hyderabad district attracted 8,420 (4,748 males and 3,672 females) who may mostly be Government employees and their families went to this district. Next to this district Nizamabad has drawn 2,260 (1,384 males and 876 females) followed by Nalgonda 1,949 (1,093 males and 856 females), Warangal 1,267 (599 males and 668 females), Adilabad 898 (494 males and 404 females), Karimnagar 332 (173 males and 159 females), Mahbubnagar 288 (136 males and 152 females) and lastly Medak 209 (98 males 111 females). These persons might have emigrated either for business purposes or to meet their relatives or to seek some sort of employment. Amongst the emigrants females outnumber males to the districts of Warangal, Mahbubnagar and Medak, whereas males have emigrated in greater number than females to the remaining districts in Telangana region.

In general it is observed that both immigrants and emigrants are from the rural areas of this district to the rural areas of the other districts which may be due to some persons going out to eke out their livelihood.

As regards the migration of persons to the two cities in the district, it is observed that Kakinada city has attracted less number of persons than Rajahmundry city. Kakinada city being the headquarters of the district and also the seat of Engineering and Medical Colleges has received 15,723 persons (7,377 males and 8,346 females) of whom only 4,973 persons are workers, and the remaining 10,750 persons are 'Non-Workers', presumably either dependents or students. The city of Rajahmundry has attracted 28,401 immigrants (13,551 males and 14,850 females) of whom only 10,837 persons are workers and remaining 17,564 are 'Non-Workers'. Amongst the immigrants to both the cities women outnumber men. It is also observed that Rajahmundry city attracted nearly double the number of immigrants as compared to Kakinada city. Nearly two-thirds of the immigrants consist of 'Non-Workers' who might have come to the cities for educational purposes as almost all the Colleges in the district are located in both the cities.

Housing

Though next to food and clothing man requires shelter as his necessity, it is a known fact that many people, specially in the Urban areas, are deprived of even this bearest minimum for human existence. It is a common sight in the urban areas to see many poor hunger stricken people live on pavements with no form of shelter whatever. The migration of the people

from the rural areas to the urban areas for their livelihood has further accentuated the accommodation position. The pressure on land in urban areas has become so great and the land so dear that it has gone beyond the reach of a common man and consequently slums and unhealthy localities have grown up resulting in sub-human living conditions.

With a view to improve the situation and for future planning of the housing programmes the Government of India suggested to the National Building Organisation working under the Ministry of Works, Housing and Supply to collect in collaboration with the Registrar General, India, New Delhi, during the 1961 Census Operations, the basic data on housing required by the Planning Commission. A common questionnaire was, therefore, evolved for the entire country and an attempt was made during the 1961 Census Operations to collect the required comprehensive data on housing to meet the needs of the National Building Organisation. This data on housing do not merely confine, itself to residential housing but brings under its fold places of business, workshops, schools, restaurants, places of entertainment, hospitals, etc. From the information so gathered it has now become possible to assess not only residential housing requirements but also the adequacy or otherwise of the requirements of Industry, Commerce, Education, Public Health Institutions, etc.

In East Godavari district, as anywhere else, houses used wholly or partly for dwelling purposes form the largest proportion of the Census Houses. 484,558 houses out of a total of 559,972 are used wholly as dwellings, 2,011 houses as shop-cum-dwellings and 1,670 houses as workshop-cum-dwellings. Some of the part dwellings like laundry-cum-dwellings, barber's saloon-cum-dwellings have been included under the category of 'others'. If these houses are also taken into account the proportion of the houses used wholly or partly as dwellings will be slightly higher.

It is seen that the proportion of dwellings to population in the Rural areas is more than in the Urban areas. Thus for a rural population of 2,124,898 persons there are 408,726 dwellings, while for an urban population of 483,477 there are 75,832 dwellings. This means in the urban areas there are 157 houses for every thousand population and in the rural areas 192 houses accommodate every thousand persons. It is obvious from these figures that there is over crowding in residential housing. Thus proportionate increase in residential accommodation has not kept pace with the growing needs of a fast developing population.

The proportion of Census Houses used as shop-cum-dwellings is very small and is only 7 per two thousand houses in the district. Workshop-cum-dwellings are less than the shop-cum-dwellings and their population among total Census Houses is very low being only, about 3 per thousand houses in the district. This seems to indicate that there are some separate workshop facilities in this area but due to lack of demand, there are not many such houses. Out of 1,670 workshop-cum-dwellings, 1,170 are located in the rural areas as against 500 in the urban areas in the district.

This illustrates that rural areas of the district are not so backward in the use of machines and other mechanical implements, when compared to Rayalaseema districts.

Hotels, Hostels, Dharmasalas, etc. account for nearly 0.13% of the total number of Census Houses in the district and this percentage is lower than the State percentage of 0.14 for this category. The proportion is higher in Urban areas than in the Rural areas and it may be due to large number of hotels.

Shops excluding eating houses are more than 13 per 1,000 in the district and this figure is equal to the State average of 1.3%. The urban proportion, as everywhere in the State, is considerably higher than the rural proportion. The number of shops in the district shows that it is not commercially backward when compared to the other districts in the State.

The proportion of business houses and offices to the total Census Houses is very small in the district, i.e., 1,439 out of a total number of 559,972 houses. The number of houses of this category in the Urban area is slightly more than in the Rural area.

There are 4,774 Census Houses in the district which are used as factories, workshops and worksheds — 2,573 in the Rural areas and 2,201 in the Urban areas. There are about 8 houses used as factories, workshops and worksheds out of every 1,000 houses in the district. The proportion is higher in the Urban areas of the district than in the Rural areas. The inference that can be drawn is that the district is not highly industrialised though it may be advanced when compared to Rayalaseema districts.

There are 2,294 Census Houses in the district, which are used as schools and other educational institutions. Of these, 1,843 are in the Rural areas and 451 in the Urban areas. For every 1,000 houses there are 4 houses under this category in the district. This district also has a high

proportion of such houses in the State as in the case of districts like the West Godavari, Anantapur and Kurnool. In the Urban areas the proportion is higher than the corresponding proportion in the Rural areas. There is one school for every 1,153 persons in Rural areas, while it is one for 1,072 in the Urban areas of the district.

There are 1,688 restaurants, sweetmeat shops and eating places out of a total number of 559,972 Census Houses. Out of this number 1,134 are in the Rural areas and the remaining 554 in the Urban areas. In the Rural areas there are 2 houses in this category for every 1,000 houses while in the Urban areas there are 6 houses for every 1,000 houses. Places of entertainment, recreation, etc., including temples, mosques and churches constitute 6 ,014 houses — 5,133 in Rural areas and 881 in Urban areas. The higher proportion in the Rural areas is naturally due to the larger number of places of worship as well as the existence of the village chavadis and pails in almost all the villages.

There are 560 Census Houses used as hospitals, public health institutions, dispensaries, clinics, etc., in the district. Of these 254 are in the Rural areas and 306 in the Urban areas. Their proportion to the population, therefor, in the Urban areas is much higher. It is a very well known fact that medical and public health facilities are grossly inadequate in our country, especially in the Rural areas, and hence no further comment is considered necessary on the existing state of affairs.

As explained earlier, the category of 'Others' includes houses put to miscellaneous uses like 'cattle-sheds', 'garages', etc. Consequently no distinct pattern is discernible in this category of houses in the Rural and Urban areas of the district. The proportion of houses in this category is higher in the Urban areas than in the Rural areas.

Wall and roof material of the houses in the district

There is a distinct change in the pattern of housing in this district from that observed in the neighbouring districts of Visakhapatnam and West Godavari. Thatched houses are more common in the Rural areas whereas thatched and tiled houses share bulk of the houses in the Urban areas of the district. Very few houses with brick and lime roofs are found in the district.

House constructions largely depend on the local building material available, the climatic conditions and traditions. These also generally reflect the economic condition of the people of the area. The great majority of the population who exist on marginal subsistance can hardly be expected to think of providing a substantial structure for his family. The villager has to depend on his own limited resources, i.e., the material he can get free or at a nominal cost and the efforts he and his family can muster in the form of labour, knowhow, etc. The wall material that he can readily procure is earth from his own field. The roof material may be of thatch made up of palmyra leaves which he can cut from the nearby trees or the dry stalks of the crop that he grows or the reeds and grass which he can collect from the jungle.

Wall material

Houses built with three types of walls are distinctly discernible in this district, the material of wall being mud, bricks and grass, leaves, reeds or bamboo. In the rural areas of the district mud is predominantly used for the construction of walls whereas bricks are extensively used as wall material in the urban areas. Houses put up with walls consisting of grass, leaves, reeds or bamboo are found in the rural areas in good numbers than in the urban areas. The proportion of houses for which mud is used as wall material accounts for about 37.4% as against the State urban average of 39.8%. It is surprising to note that more than 70% of the houses in the urban areas in Peddapuram taluk consist of walls made up of mud. A very meagre percentage of houses raised with walls made up of timber and stones are found in the rural and urban areas respectively.

Brick is used as wall material as much as mud in this district and more so in the urban areas. The rural areas in the district record the highest proportion in the State, the percentage being 36.1 as against the State average of 10%. The rural areas of all the taluks of this district except the Agency taluks of Rampachodavaram and Yellavaram record over 20% of the houses having brick walls. It is significant to note that Ramachandrapuram taluk occupies the unique place with 58.5% followed by Kothapeta (49.3%) and Pithapuram (41.3%). The rural proportion is more than the urban proportion, the disparity being very conspicuous in Peddapuram taluk. As already stated above the use of bricks as wall material is more common in the urban areas and the proportion of this type of walled houses account for 51.3% as against the State urban average of 38.3%. The urban areas in the taluks of Kakinada, Amalapuram, Razole, Ramachandrapuram, Rajahmundry and Pithapuram record 50 or even more percentage of the houses with brick walls.

The next important wall material is grass, leaves, reeds or bamboos and houses put up with walls of these materials account for 16.9% in the rural areas as against the State average of 7.8%. In the Agency taluks of Rampachodavaram and Yellavaram the proportion is to the extent of 69%. Apart from these two taluks the rural areas of Amalapuram and Kothapeta taluks account for more than 20% of the houses with walls comprising of grass, etc. One might expect to find a large number of houses with grass, bamboo, etc., in the Agency taluk of Yellavaram as it is adjoining the forests. But it may be noted here that in many cases in these areas the grass or bamboo walls might have been plastered with mud or dung giving the impression of mud walls. In the urban areas of Amalapuram taluk alone more than 20% of the houses are constructed with walls made up of grass and bamboo, etc.

Stone is not very significantly used as wall material in this district. The lowest proportion of houses with stone walls is only 0.4% which is recorded in the rural areas as against the State average of 17.2% of the sample houses. In the urban areas also the district records a very negligible percentage of houses with stone walls.

Houses with walls made up of timber, C.I. sheets or metal sheets are found in a very meagre proportion of 0.5% in this district as against the State average of 2 per thousand sample houses. Amalapuram is the only taluk which records 2% of the houses built with timber walls, C.I. sheets or metal sheets in the rural areas.

Roof material:

Two types of roofs are predominantly visible in this district. In the rural areas of the district, thatch, grass, leaves, wood or bamboo have been extensively used followed by tiles, slate and shingle, whereas in the urban areas tiles are largely used for roofing purposes. In addition to these materials a very meagre percentage of bricks and lime also are used in the rural areas. The rural parts of the district record 75.5% of the house tops covered with thatches and allied roofs as against the State average of 62.7%. The Agency taluks of Yellavaram and Rampachodavaram record the highest proportion of 97.4% and 97% respectively. Except in the taluk of Ramachandrapuram, where the proportion is only 57.5% in all the other taluks in the district the proportion is more than 70%. Even in the urban areas house tops covered with thatch and allied roofs are not uncommon as more than 40% of the houses in this district are covered with these materials as against the State average of 37.2%. The urban areas in the taluks of Amalapuram, Razole, Peddapuram, Tuni and Pithapuram account for 50% or more of the houses roofed with grass, thatch, etc.

Tiles, though not as common as thatch, are also used as roof material in the rural areas. It is interesting to note that this district records the higher percentage of houses with tiles than the State rural average. The rural areas in Ramachandrapuram taluk account for more than 40% of tiled houses. The usage of tiles as roofing material is more pronounced in the urban areas, the percentage being 45.4 as against the State urban average of 33.6%. In this respect this district heads all the other districts in Andhra region. Particularly Rajahmundry taluk reports 50% or more of the urban houses roofed with tiles.

Mud is not used for roofing purposes as in Rayalaseema districts as this district is subjected to heavy rainfall. Brick and lime and cement concrete, corrugated iron or other metal sheets, etc., are used for roofing the houses to a very meagre percentage in rural areas. It is observed that 0.1% of the houses are roofed with corrugated iron or other metal sheets, etc., in the rural areas.

CHAPTER V

IRRIGATION

"Egypt is the gift of Nile" wrote Herodotus centuries ago. It can be said in a like manner, that the hinterland of Andhra Pradesh, from Rajahmundry to Vijayawada is the gift of the Godavari and the Krishna, figuratively the white and the blue Niles of the Deccan. These two rivers have exercised, from times immemorial, a profound influence on the economic and the political life of the people of Bombay, the Deccan and the former Golconda Kingdom of Hyderabad and the two eastern Deltas.†

The chief source of irrigation in this district is the mighty river Godavari. This river has been tamed by yet another great gift of God to this parched land in the form of a human being by name Arthur Cotton! He was a great Engineer — the best Military Engineer who ever served in the Irrigation Department south of the Jamuna, and perhaps anywhere in India. He was the creator of the works which saved hundreds and thousands of lives and "scattered plenty over a smiling land".

The special greatness of Sir Arthur Cotton which won international fame is that he was able to construct an anicut on sandy land without foundation resting on rock or hard soil. This pioneering work enabled evolution of the theory of structures on permeable foundations based on which subsequent developments of irrigation works on sandy rivers in western countries were made possible.

Sir Charles Trevelyan, Governor of Madras, wrote in one of the Minutes of the Madras Government in 1858 as follows: "If we have done our duty at least to this part of India, and have founded a system which will be a source of strength and wealth and credit to us as a nation, it is due to one master mind, which with admirable industry and perseverance, in spite of every discouragement, has worked out this great result. Other able and devoted officers have caught Col. Cotton's spirit and have rendered invaluable aid under his advice and direction, but for this first creation of genius we are indebted to him alone.

Col. Cotton's name will be venerated by millions yet unborn, when many, who now occupy a much larger place in the public view, will be forgotten; but although it concerns not him, it would be, for our own sake, a matter of regret if Col. Cotton were not to receive due acknowledgement during his life time."

This river and this man were a challenge to each other. Each had met its match and finally the river, which was the provider, gave up the struggle gracefully and began to shower its blessing on mankind.

Before taking up the study of the History of the Godavari Delta system it is proposed here to give in some detail, the life, ambitions and works of Sir Arthur Cotton who had once said "He who can tell me how to grow two blades of grass where one grew before, is a public benefactor". The following lines from a poem called "Plant a tree" by Lucy Larcom, 1824-93, an American, will aptly apply to the life and work of this great soul whose name even to this day is held in great reverence, akin to worship, in this district.

"He who plants a tree, he plants love
Tents of coolness spreading out above
So man's life must climb
From the clods of time
Unto heaven's sublime
Heavens and Earth help him, who plants a tree
And its works its own reward shall be"

On the 15th of May, 1803, there was born in the family of Baron Sir Lynch Cotton of Cheshire, England, a boy his tenth grandson, who in course of time was destined to rise to the rank of a General in the field of Military Engineering, with this difference that his engineering campaigns aimed at conquering the hearts of the people in South India through gigantic irrigation schemes designed and built by him across some of the principal rivers such as the Cauvery, Krishna and the Godavari. This was Sir Arthur Cotton. He was one of eleven brothers, six of whom lived to a great age. General Sir Sydney Cotton, Admiral Francis Cotton, General Fredrick Cotton, and General Sir Arthur Cotton had distinguished careers in Government service. It is, however, regrettable that excepting Sir Arthur Cotton, none of his brothers left a record. It is through the biography of Sir Arthur Cotton published by his

† From the compiler's note on a "Century of Irrigation – Godavari – Krishna Deltas 1859–1954" Published by the Institute of Engineers (India), Hyderabad 1959

daughter, Lady Hope, that posterity has been able to appreciate the work and services of this great Engineer.

"These brothers" writes Lady Hope, "were a noble body of men, handsome, clever, brilliant in conversation; their callings were useful and without a blemish; not one of them had a personal enemy, so honourable had been their lives through all vicissitudes of their different careers. Some of them, however, because of the strength and honesty of their convictions, had very determined opponents, Arthur in particular."

Few men, during the previous century, have done more to benefit India than Sir Arthur Cotton. There are very few names which could be remembered by the people of Southern India with greater honour, and certainly none remembered with greater gratitude. He harnessed mighty rivers by his engineering genius and skill, and made the land through which they flowed permanently fertile and prosperous, and a granary for other places in times of scarcity and distress. The Cauvery, the Krishna, and the Godavari were thus yoked to make the land one of plenty, and to become a monument to Arthur Cotton. His life, pure, simple and godly, was a beautiful example to all those with whom he was associated in his official labours.

At the early age of fifteen Arthur Cotton received a cadetship in the service of the East India Company; and, in 1818, entered their Military Academy, at Addiscombe, where he had the distinction of getting into the corps of Engineers, an honour gained by the more diligent students. He left the Academy in December, 1819. After serving in the Ordnance Survey at Bangor in Wales, he went to the Military station at Chatham on the river Medway in Kent, where young Engineer officers usually went for further training. He left for Madras in May 1821, arriving there in the following September. In May, 1822 he was appointed Assistant Engineer in the Southern Division, and the very first work on which he was employed was connected with the department in which he became afterwards celebrated, and in which he did so much good to the country. His first work was the investigation of the Pambam channel with the object of making it navigable.

Lieutenant Cotton's next appointment was Assistant to the Chief Engineer at Madras, which he retained for about two years. He then joined the army in Burma War having broken out with that country. He was present at the capture of Rangoon on May 11, 1824, and was actively engaged in many of the actions during that campaign, in which he showed conspicuous courage while leading storming parties. Fortunately he was uninjured.

At the close of the campaign Lieutenant Cotton sailed back to Madras. As he was quietly sitting one evening on the deck of the vessel and admiring the beautiful star-lit night, the thought of the Creator of all that wonderful scene forcibly seized hold of his mind. "Who made these worlds?" he exclaimed. "Upon whose handiwork am I gazing now? It is the work of God, our great Creator." "If there is a great Creator, if He made the world, the sun, the moon, the stars, what do I know of Him? Has he ever spoken? If so, what are His words? The Bible is the word of God. I ought to read it. I should like to know what He says." Immediately, on the impulse of the moment, he rushed below, where his brother-officers and others were playing at cards. As he hurriedly entered he simply asked the question, "Is there a Bible on board the ship?" Such an unusual question astonished them, and they burst into laughter; but he was too much in earnest to mind, and persisted in urging his request. One of the party then said that he had a Bible, but that it was packed at the bottom of his trunk. To please him, a search was made for it at once, and it was placed in his hands. He forthwith began his perusal of the sacred volume, and studied it day after day. This was the beginning of a life long devotion to the "glorious Redeemer who had made all things, and in whom alone the heart of man can find true rest". He reached Madras in June, 1826 and, when he returned to England some four years later, his religious experience was deepened and quickened by intercourse with one of his brothers, who was a clergyman, and in whom he found a congenial friend.

On his return to India, he reverted to his former employment as a Civil Engineer of irrigation works, both in the Pambam channel and on the Cauvery. His health, however, had become very bad, and he was subject to frequent attacks of jungle fever. He went for a time to the Nilgiri Hills for a change and later, in 1830 returned to England to recoup his health. He was promoted to the rank of Captain in the previous year.

After a pleasant sojourn in his native land, Captain Cotton went back to India.

On reaching Tanjore, Captain Cotton resumed his former irrigation work on the Cauvery. His health continued to be indifferent and so

in 1838 he had to leave India again, this time for Tasmania. While there he married Elezabeth Learmouth on October 29, 1841, with whom he lived a truly happy life which lasted nearly sixty years.

Reverting to Captain Cotton's professional work, as far back as in 1828, he was sent to Tanjore for the purpose of examining into the state of the rivers in that part of the country, and the irrigation dependent on them. The result of his careful study was a marvellous scheme of irrigation, not only for that district, but for all India. It was indeed the work of genius. After his return, he was posted as Civil Engineer, Tanjore, his jurisdiction comprising of the districts of Tanjore and Trichinopoly, and two taluks of South Arcot. The irrigation of the two former districts depended entirely on a scanty supply of water from the rivers Coleroon and Cauvery, the greater part of the water flowing into the sea. Captain Cotton's project was to throw two anicuts across the Coleroon, and to send the arrested water in countless channels and canals to fertilize the land. Both these anicuts were built in the brief season during the cessation of the freshes in the river in 1835 and 1836. Captain Cotton's brother, Captain Hugh Calveley Cotton, who was acting for him as Civil Engineer, was in actual charge of the work; Arthur Cotton was also present during their construction, though nominally on leave.

"The success of the Cauvery scheme, and the benefits which it conferred on Tanjore, encouraged the Madras Government to extend irrigation to the Godavari Delta. In 1844 Arthur Cotton was sent there to prepare a project. Cotton recommended the construction of an anicut, channels, embankments and roads. In preparing the project he had to undergo great difficulties. He had to work single-handed owing to the severe shortage of staff, the few hands that he had were such that, to use his own words "I had to take on, or help in, every line of level that was made, not having got one single level from my surveyors that wasn't altogether false".

The Godavari project was sanctioned in 1846 and Cotton began operations in the following year. With labour mostly unskilled, and primitive equipment, Cotton made the best use of the available material in the shape of hydraulic lime, good stone, and excellent teak in the neighbourhood. He succeeded in completing this magnificent project in 1852. His success was immediate and striking.

A small but able band of assistants laboured with Cotton in the sweltering heat of the Godavari delta. Among them was Capt. C. A. Orr, who was in immediate charge of much of the construction. The Godavari project as a whole was completed in 1855. With the completion of this undertaking, Arthur Cotton may be said to have reached the pinnacle of his fame.

Cotton's conviction that the salvation of India lay in the extension of irrigation and navigation canals, was so deep that he deprecated the building of railways, against which he launched bitter criticism, which not unfrequently landed him in difficulties due to the hostility of those who believed in the efficacy of the railway system. After Orr had finished the Krishna project, Cotton looked about for new worlds to conquer. He pictured a vast system of canals radiating east and west from the Tungabhadra and Krishna, and had envisaged in his imagination a series of storage reservoirs across the Godavari, the Krishna and the Tungabhadra from which would emerge a network of canals for both irrigation and navigation. He had also conceived of the diversion of part of the Tungabhadra water into the Pennar, and excavations for five large canals extending from Poona in the west coast to Ahmadnagar and down to Mangalore. The cost of this project alone was placed optimistically at two millions sterling.

In 1858 Arthur Cotton came forward with still more ambitious proposals affecting almost the whole of India. He recommended the construction of a huge irrigation and navigation system, starting from Rajmahal on the Ganges, to the junction at Calcutta with a navigable canal. This line was to be connected with the Ganges Canal at Cawnpore by a channel 550 miles long, completing a line of 1,200 miles to Hardwar. A branch line, 200 miles in length, was to join the Ganges Canal to the Sutlej river, thus uniting the system of navigation in the Punjab with that of the Ganges. The Orissa Canals, then under consideration, would provide a navigable line along the east coast, which would be extended through the Godavari and Krishna deltas and joined through the Tungabhadra project, with Madras and the west coast. In other words he contemplated a navigable line, 4,000 miles in length, from Karachi, via Cawnpore to Calcutta and Cuttack to Bhatkal, Mangalore and Madras. "There is not a single obstacle to this", he wrote, "and the results would be far beyond calculation." Whatever might have been the results of such an undertaking, it is probable that the cost would have proved to be far beyond the estimated amount of thirty millions sterling.

Cotton always asserted that Indian railways could not possibly compare or compete with

irrigation and navigation canals as a protection against famine, and that in any case, a multiplicity of railways was a luxury which India could not afford.

Arthur Cotton was knighted in 1861, in which year he left India, though he returned as an Engineering Adviser in 1862 and 1863. His work in India was so much appreciated by the Government of the day that Her Majesty the Queen was pleased to confer upon him the honour of K.C.S.I. in 1866.

Arthur Cotton's mind was ever busy studying the problems of Indian rivers with a view to improve the lot of the Indian peasant. It was Cotton's dream that India should become a land overflowing with milk and honey. He was undoubtedly a man far ahead of the times in which he lived; through his numerous writings both official and otherwise, he has left for posterity valuable material to think about, and for the succeeding generation of engineers "foot prints on the sands of time".

A mind gifted with originality could at no time rest content with Pope's dictum, "Whatever is, is Right". Problems of research, design and construction had an unusual appeal to his mind. Marine survey, protection of the sea coast against erosion, improvement of sea ports for expanding Indian export trade, problems of flood prevention and use of wind power in India for purposes of lift irrigation, were among the numerous subjects which occupied his mind and engaged his pen. There are interesting records of his experiments on Avery's steam engine which he employed on the construction of the Coleroon Anicut. In 1837 he carried out a series of experiments in manufacturing magnesia cement for hydraulic constructions.

A colossus in the realm of engineering and greatly ahead of times, he had to think alone, write alone and execute alone. But he was throughout sustained by a profound belief in God and the teachings of Christ. The study of Bible was his sole recreation. Unlike his contemporaries he eschewed the card table, the dance hall, or the bar room; the spiritual solace strengthened and comforted him until the very end of his earthly mission, 24th July, 1899; at the age of 96, bearing out the truth as the poet has said —

"An honest man's the noblest work of God."

Arthur Cotton's unfulfilled dreams of universal irrigation and his opposition to railways, drew upon him several bitter attacks by Lord George Hamilton and others in the House of Commons in 1878, long after he had left India. To these he replied to the best of his ability and with considerable effect. He always stood for some ideal and it was impossible not to respect the motives by which he was actuated. He had an intellectual distinction of his own. The Empire was in his blood, both by heredity and environment, and yet his vision sought international horizons in which he made no distinction between the rights of the men of a dependent country, such as India and those of an Englishman. His advocacy of the cause of the Indian people marked him out as a thinker and writer in the company of men like John Bright, Henry Fawcett and Edmund Burke."*

The following extracts are reproduced from the Chapter entitled "Irrigation from the Godavari", compiled and published by the Institute of Engineers (India), Hyderabad, in 1959. These extracts will help to give the reader an insight into the character and views of Sir Arthur Cotton.

August 1844:

First Ray of Light —Irrigation from Godavari

While at Vizagapatnam, Arthur Cotton had been conducting explorations in regard to utilising the waters of the Godavari for the vast delta lands in the Rajahmundry district. The 'four pillars' of Engineering wisdom, enunciated by him, on which he proposed his colossal scheme to rest, set against the background of prevailing economic circumstances, possess a somewhat romantic flavour.

His first report on Irrigation from the Godavari starts with the following observations:

"The principal part of this district forms the Delta of the Godavery, and as respects soil, climate, and capabilities of irrigation, it can scarcely be surpassed by any part of the world. Such tracts as this, with their immense natural advantages, yet absolutely require the following four kinds of works, before their resources can be in any good degree developed. Even though favoured with a good supply of local rains in general, as is the case with this Delta, probably not one-fourth of the produce of which they are capable can be obtained by means of local improvement of villages on a small scale,

* Extracts taken from "General Sir Arthur Cotton" compiled by Mr. Dildar Hussain, B.E., MIE., Past President, Institute of Engineers (India) Hyderabad and published by the Institution of Engineers (India) 1959.

without the aid of the main works now enumerated.

(1) The embankment of the rivers, to secure the crops from destruction by the river floods.

(2) Dams, with channels of irrigation leading from the river, to bring its water from the level of its bed to that of the surface of the land.

(3) Surplus channels, to lead off the floods caused by the local rain, from the flat lands to the sea.

(4) Raised roads and bridges, to allow of the conveyances of produce to the markets, and to the coast through a country which is otherwise, from its nature, impassable during the rains.

It needs no argument to convince that, without these means of counter-acting the irregularity of the natural supplies of water, and of providing for the removal of produce from where it is grown, to the places where it is required for consumption, or exportation only a small portion of what the tract is capable of producing can be secured. One year a portion or the whole of the crop of large tracts is destroyed by the overflowing of the rivers, another year the same losses are sustained from the rivers not rising high enough, though even in the worst years it may contain water enough to irrigate ten times the extent of land forming the Delta; in a third year the lower or flatter tracts are so flooded by the local rains, that the labour of cultivation is all thrown away, in another, the crop is destroyed by a failure of the rains over three-fourths of the district, when not an acre of it need to be dependent at all upon them; and it may happen that the district is suffering from two or three of these visitations at the same time, for instance, one half of the district suffering from river floods; while the other half is equally distressed by a failure of the local rains and lastly, the most abundant produce is of little use; unless it can be conveyed at a moderate expense, and at the proper time, to the point where there is a market for it."

Commenting on the fall in the revenue and the decline of population, he pleaded that irrigation was the only and the surest means of restoring the economic balance. Said he,

"I have not yet received a statement of the revenue of Rajahmundry from the time it came under our Government, but in the last ten years I find it has fallen off by about five lakhs, while the population, if the returns are correct, has fallen from 740,000 in 1821 to 560,000 in 1842 or one-fourth in 21 years. This very rapid decline is no doubt mainly owing to the failure of the cloth trade, which in ten years has fallen from about seven lakhs of Rupees, to three lakhs, and which I am told was once much higher. Admission of export trade to the value of four lakhs would throw out of employment about one lakh of people and a large proportion of these no doubt would emigrate; but the amount of suffering in the district, which must have followed upon such a decrease of employment for its population, it is impossible to conceive. How far the loss of this trade would have been prevented or delayed had the irrigation of the district been attended to is a point deserving of most serious consideration."

Wonderful prevision

Arthur Cotton's insight into Revenue administration, particularly of the Rajahmundry district, and his appreciation that eventually for the supply of irrigation water to the people there should be a Telugu man associated with the administration, speak of deep psychological study of the people, and their reactions.

"As I have elsewhere said, unless this essential and fundamental point, the supply of water, is duly cared for, all the energy and talents that can be expended upon the district, will be comparatively little avail. In fact in this country a Collector or Sheristadar of the greatest energy and talents, if the district is not watered, is only in the situation of a skilful Artificer without any implements. Even in a district like Rajahmundry, with the richest soil, and finest river flowing through it, he can do nothing to save it from depopulation and ruin; while the produce of the lands is destroyed by droughts and floods alternately. A Native Superintendent should immediately be appointed, and as there is no one in the division at all equal to such a charge, he should be sought for in Tanjore. There are there several superior men, who have been brought up under Ramaswamy Naik, the late able Superintendent of that district, and who are thoroughly acquainted with the various kinds of irrigation works constructed there. If a Telugu man were selected from them, and sent to this division, he would be invaluable. There should also be an able head Goomastah in the Cutcherry, at the head of the Irrigation department under the Collector, on such a salary as should prevent his situation being looked upon merely as a stepping stone to something better."

April, 1845 :

A strong plea for Irrigation

On receipt of Arthur Cotton's first report, the Government called for a more detailed examination and a fuller report. His second report, which is a masterly production, makes an interesting and inspiring reading, considering the difficulties of Engineering investigations under conditions prevailing in India more than a century ago. Making an eloquent plea for providing irrigation for the Rajahmundry district, his second report starts with:—

"The first report on the irrigation of this tract pointed out the neglected state of the district, its destitution in respect of these artificial works which are absolutely necessary to develop the vast capabilities of these rich alluvial lands, and the consequences of such neglect in comparison with the results of a liberal system of improvement, as shown in the delta of the Cauvery. It required neither time nor attention to discover so for what was required for this unfortunate district. What it wanted was only what every delta requires, and without which such tracts, with all their prodigious natural advantages, are subject to more dreadful evils than many less fertile districts. If such countries are left to the mercy of the great rivers that flow through them, the water at one time many feet above the surface of the land, and at another twenty or thirty feet below them in one month, during a certain crop, deluged with rain and river floods combined, and before that crop is cut (if any of it escapes), exposed to a perfect drought, an impoverished people and empty treasury are the inevitable consequences."

Fortnight Candour and Self Confidence

In submitting his scheme for the irrigation from the Godavari, Arthur Cotton, then only a Major had the courage and confidence to ask the Government that if there were any objections in regard to any part of the project these should be openly discussed with him, and that no one be allowed to say or insinuate anything except on paper, and then fullest opportunity should be given to him to answer his critics.

"I think there can be no objection made to my earnestly requesting, in the conclusion of this report, that the objections that will be made to every part of the project may be openly discussed, and that not one will be allowed to be said or insinuated, but what shall be put on paper, and the fullest opportunity allowed to me of answering it. It seems to me that, injustice, the least that can be granted to any one who takes upon himself the great responsibility of proposing and urging extensive improvements of this sort, is that he should be allowed to defend his project against the objections of others."

February, 1847 :

Plea for improving departmental efficiency

The scheme was eventually sanctioned by "The Hon'ble the Court of Directors" and the work was started in 1847, under Major Arthur Cotton.

Remarking on the insufficient provision of staff for carrying out the executive duties. Arthur Cotton had some very forceful remarks to make in addressing the Secretary, Board of Revenue, concerning the efficiency of the department.

"With reference to the sanction for the Godavary Annicut, I have now the honour to request the Board's consideration of the circumstances of the Division, in respect of the additional assistance which I shall need, in order to enable me as far as possible to carry out this extensive system of works with the best effect. As we are now laying a foundation of so much importance, it is now necessary that ample means should be employed, so that the person who has the direction should not be overwhelmed by his attention being called continually to details; and it is the more necessary that this should be well considered, because it seems to me that this is the grand mistake that runs through our whole system in this country. For want of a due proportion of subordinates, the time and attention of almost all superiors is so much taken up with innumerable petty matters, that they have not the time to give due consideration to those main points which are their proper objects. Even in the ordinary duties of a division, I think that where there is one Civil Engineer there ought according to the principles which are universally acknowledged and acted upon in England, to be at least six Assistants. The efficiency of our department could in my opinion be in this way trebled by an increase in cost of one-half."

January, 1849 :

Boquets in absentia

Major Arthur Cotton remained in charge of the project until June, 1848 when he proceeded home on furlough due to a break-down in health from incessant strain. During his absence, Capt. C. A. Orr, Assistant Civil Engineer under Major Arthur Cotton, acted as the Civil Engineer until July, 1850, when Cotton, who by then

had become a Lieutenant Colonel, returned to duty. During Arthur Cotton's absence, the Government of Madras had appointed a Committee to examine and report on the work of the Annicut at Rajahmundry. The Committee comprising Capts. E. Buckle, J. H. Bell, C. A. Orr, and Mr. H. Forbess, Sub-Collector, made a thorough examination of the works and came to the conclusion, which bears an eloquent testimony to Cotton's hard work and abilities:

"The Committee, reviewing their inspections and investigations, are constrained to record their very high opinion of the science, practical ability, and indefatigable labours of Major Cotton, displayed in the great work under report. It is scarcely possible to place that officer's qualifications as an Engineer of hydraulic works higher than they stood before; but the Godavery Annicut is a new and splendid illustration of the powers of mind and self-devotion, from the exercise of which the country has already so largely benefited."

January, 1850:

Godavari tamed—Annicut completed

During Major Cotton's absence in England, his able Lieutenant, Capt. C. A. Orr (who was destined to fame latter on in connection with the construction of the Krishna Annicut at Bezwada), waged a relentless battle against the Godavari river in ensuring that the scheme devised by this Chief, blossomed into success. Work progressed from day to day, and month after month, despite the inclemencies of whether, difficulties of transport, shortage of machinery, complexities of labour problems and other innumerable hinderances, until the river came to be harnessed through the completion of the Annicut. Mr. H. Forbes, Sub-Collector, reporting in June, 1850, said:

"I am unwilling to close this report and all connection with the Godavary Annicut, without expressing the satisfaction I shall always feel at having been in any way instrumental in carrying out Colonel Cotton's magnificent scheme. I desire also to state my great obligations to Captain Orr, and all the Officers of this Department for their generous acceptance at all times of my endeavours to aid their operations, and for such a cordial co-operation, and so good an understanding, that during the whole time of our association, no single point of difference has ever been allowed to occur."

Loyalty and devotion of Indian Officers

One comes across some extraordinarily refreshing instances of the loyalty and devotion of subordinate officers and staff, and the efficiency of their performance being complimented by European officers to an unusual degree. The following extract appreciative of the services of Oppolore Subba Rao makes a highly interesting and sentimental reading: Nevertheless, the creation of such an atmosphere redounds to the credit of Arthur Cotton.

"I have finally great pleasure in bringing to your notice the exemplary conduct of Oopooloor Subba Rao detached from your Office to act as my Javabneviss. A most excellent man of business, and of good ability, he has devoted himself to my service in so zealous a manner that during four years one single day has never passed in which every report and every urzee connected with the Annicut has not been replied to on the day it was received; and yet as many as 60 urzees have been received, and as many orders have been issued in one day. The patronage of my office is so limited, that it was my intention at the close of the work to have asked you to bestow some of favour on Subba Rao; and my departure from the district renders me more anxious to do so. It is the sole request that I shall have occasion to make and it is made solely on public grounds."

The dream of Arthur Cotton to utilize the waters of the Godavari for irrigating the delta lands in Rajahmundry came to be realized not long after his return from leave. The following extract portrays the reactions of the people to the irrigation boon:

"The eagerness with which the water has been received in the villages newly watered, and the rapid increase of revenue from them, are conclusive proofs of the vast effect which the annicut may be expected to produce, when the distribution of the water is more advanced."

April, 1851:

A Good Christian—Abiding faith in God

Arthur Cotton was a highly religious man. His faith in 'the goodness of God' and his belief that it is 'He who puts power into the hands of men', is testified by the following extract from his report on irrigation from the Godavari, addressed to the Secretary of the Board of Revenue. It is inconceivable if any other officer in Arthur Cotton's position could have ventured to deliver such a homily. At the same time, he appeals to the conscience of the British administration that the success of the Godavari scheme should lead to the adoption of similar works for the improvement of the country and the promotion of the welfare of the people 'as will lead to an increasing appreciation of a Christian Government'.

"Can we see this large and important work, calculated so substantially to promote the real comfort of a million of people, thus brought to completion through so many difficulties and contingencies, without heartily acknowledging the goodness of God, in thus prospering us, and bringing the project so far to a successful issue, not withstanding the opposition it has experienced from quarters, from which I had every right and every reason to hope for and from which I did confidently expect, most cordial and energetic support in carrying out a work of such unequalled magnitude in India, (excepting that now on hand in the North-West) a work approved and ordered by the home authorities, and calculated to be in every way so vast a public benefit? May we not hope that its accomplishment, with the abundant effects which have already resulted from it to the district, will lead to the adoption of such extensive works for the improvement of the country, and the promotion of the welfare of the people entrusted to our care, as will lead to an increasing appreciation of a Christian Government? There is nothing that the natives more thoroughly appreciate, after peace, than public works, and especially those that furnish them with water. And I cannot but trust, that this is only the beginning of a series of works worthy of our nation, our knowledge, our religion, and the extraordinary power God has been pleased to put into our hands. I say our religion; because I am sure it ought to lead us to do our utmost in every way to care for those who are thus committed to us."

December, 1852:

"Gannaram Aqueduct—Flower of the Godavari"

By 1852, Lt. Col. Arthur Cotton had been promoted as Chief Engineer, Irrigation, Madras.

Commenting on the excess on the construction of the Aqueduct to serve the Nagaram island, the "Garden of the Godavari" as it is sometimes termed, he made such forthright observations on the causes of the prevailing poverty in India as would normally have led to a deep frown on the Government's brow. But Arthur Cotton was so confident of himself that he scarcely entertained any fear of the Government's displeasure, which would otherwise make many a heart quail.

"If it is asked whether after this increase of cost and risk has been incurred, I would still approve of the work having been carried on these principles, I answer I would assuredly recommend that such a plan should be adopted in similar circumstances. In the present state of things in India, in the almost entire want of these works upon which its prosperity depends, I am convinced that the true policy is to press on with the utmost effort and at all risks. The poverty of India is not caused by the failure of works or waste of money in executing them rapidly but in failing to execute them at all, or in doing that in two years which might be done in one. Till we have food and transit with less labour the country will continue to be paralyzed. And I have not the least doubt that both communications and irrigation will every where produce property to the value of much more than twenty times the outlay. The fact is, that India in its present unimproved state is a mine of wealth, far beyond that of any gold mine in the world. The richest mines in Australia only produce about 3½ times the value of the labour bestowed on them, a man whose labour was worth £35 a year, earning on an average £120 a year in mining."*

One of Sir Arthur Cotton's amusements in his later years was to make experiments in agriculture. He took the greatest interest in growing various crops and vegetables in the pretty, but limited, compound in his house, and succeeded in raising wheat and Indian corn of great size. He also wrote on the subject and lectured on it. He asserted that there was certainly produced in his garden every year not less than five times what it produced when he began. The grand secret of success in agriculture was, he maintained, simply giving more air to the soil, that is, the land should be ploughed so deep and so thoroughly that the air should reach the subsoil.

Another subject in which he took an interest was the method of learning foreign languages. He felt that the proper way was for the learner never to pronounce even a syllable at first, except after hearing it pronounced by one whose mother-tongue he is learning; that few words only should be learned at a time; and that every variety of combination of these few words should be made and learned by heart. After a right beginning has thus been made, safe and sure progress is likely to be effected. At first the ear is the great instrument to be used in acquiring a foreign language, and afterwards the tongue and the hand will be able to play their proper parts: in other words, great care should be taken to acquire a good pronunciation, and then, when this has been done, the learner can proceed to speak and to write. Sir Arthur Cotton wrote a little volume to recommend this system in learning Telugu.

* "Irrigation from the Godavari", compiled by Mr. Dildar Hussain, B.E., MIE., Past President, Institute of Engineers (India) Hyderabad and published by the Institution of Engineers (India) 1959.

In the year 1868 Sir Arthur settled at Dorking, about twenty miles south of London. It is a very beautiful spot. Nestling at the foot of the Surrey hills, which here rise to some considerable height, and are very picturesque, the little town is surrounded by numerous villas, of various shapes and sizes, each situated in its own grounds. His house, which is called after the place of his birth, Woodcot, has attached to it an acre and a half of land, consisting of garden, wood, and field, just large enough for him to make those experiments in agriculture in which he delighted. Dorking was near enough to London to permit of his going there by railway, from time to time, to transact business or to engage in the philanthropic occupations in which he took an interest.

It was said by one who seems to have known Sir Arthur Cotton well, that he was adored, and even worshipped by the people whom he had so much benefited. This person was one day standing on a hill overlooking the Godavari and observing a Hindu nearby, asked him if he knew anything of the man who had done so much to fertilize the soil, bringing prosperity and happiness to so many millions. "Oh yes, sir", he replied. "We Indians for hundreds of miles around believe that the annicut was made by an English god, called 'Cotton', and, although European gentleman say he was only an Engineer officer, few of us believe it. A holy Brahmin who came to see it years ago told us that, if it was not a god, who made it, he was a godly man, and one who would never die". Of course, it is well-known that Englishmen worship only one God, who, they believe, is the God of the whole earth, and that they serve no other gods. Sir Arthur Cotton was indeed an officer of Engineers, but he was more than this. He was truly a 'godly man', or, rather, a man of God, and his chief object in life was to serve and obey Him and to benefit his fellow-men. The word 'godly' accurately describes his character.

Very few in modern times attain so great an age as Sir Arthur Cotton. Although it cannot be said of him as it was of the eminent lawgiver of Israel, Moses, when he attained a still more advanced age, "his eye was not dim, nor his natural force abated" (Deuteronomy xxxiv. 7), yet this was not very far from the truth. The failure of his strength was very gradual. Though, on account of his deafness, he was unable to hear what was going on around him, he took the keenest interest in the various events of the day, and especially in those that related to the advancement of the kingdom of God. In the quiet retirement of his dwelling at Dorking he was tended with the most delicate care, and it seemed as if life were prolonged by the loving attention bestowed on him. His life gradually and gently faded away; but as his daughter relates, his Christian brightness shone out clearly to the last. "Sin", he remarked as he lay on his death-bed, "is an infinite evil, but God has provided an infinite remedy." His last words were, "Grant me forgiveness for Jesus Christ's sake". He fell asleep on July 24, 1899, in the ninety-seventh year of his age.

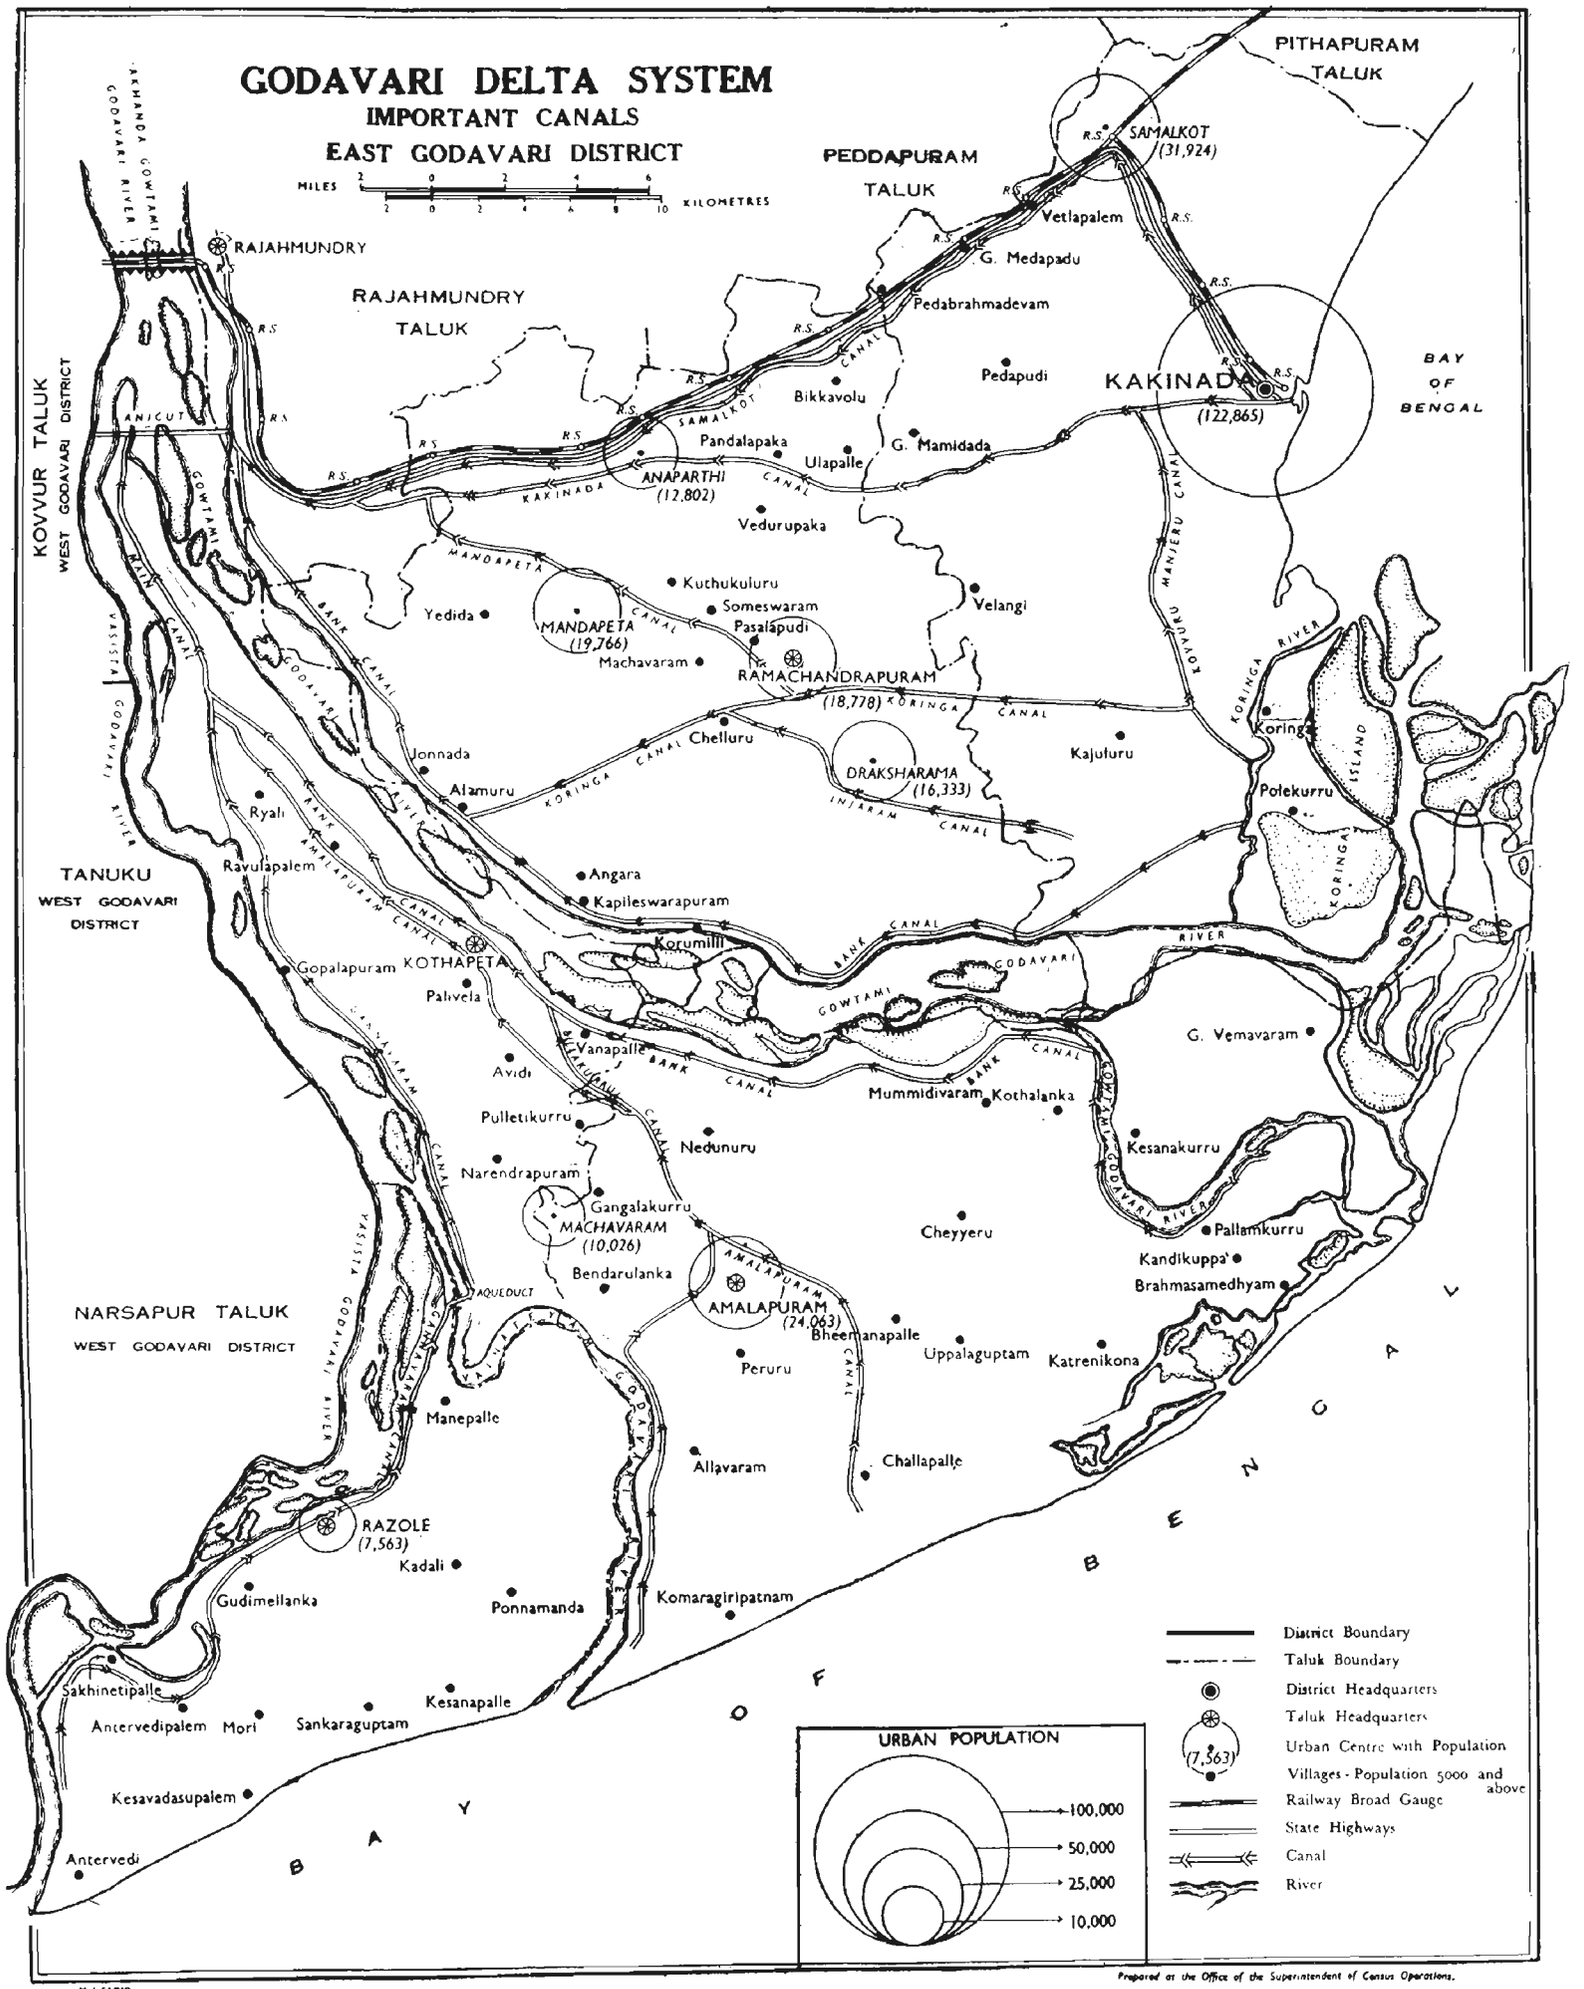

No one who saw Sir Arthur Cotton would be likely to forget him. Rather tall, spare, and even gaunt in figure, with a bright and intellectual face, with clear, wistful, penetrating eyes, his was a form which imprinted itself on the memory. But it was the mental and spiritual personality that left the most vivid impression. Most eager and enthusiastic regarding projects on which his mind was set, his genius overleaped all impediments and went direct to its objects; and he was as anxious to impress others with the capabilities and possibilities of his plans as he was himself.

There can be no doubt of the immense value of all the great irrigation works which were erected under his superintendence, nor can there be any doubt of his claim to be one of the most eminent benefactors of India. Even though we may not always agree in full with his statements, yet we cannot help admiring the perseverance and energy with which he advocated his cause. Every river bridled and every weir built must make "a way in the wilderness and rivers in the desert", and reduce the ravages of famine and drought. The exquisite beauty of his life, however, was his godliness.

There is a practice even now prevalent in East Godavari district to mention the name of Cotton as Maharshi along with other Maharshis, while chanting 'Sandhyavandanam' prayers.

The Godavari delta system

During the year 1832-33, the coastal districts of Andhra were gripped in a severe famine, the like of which the country had never seen before. Its sad condition caused the Government of Madras to send one of its best officers, Sir Henry Mount-Gomery to enquire into the causes of famine, to arrest its rapid advance and to suggest necessary measures against its reoccurrence. In March, 1844, after a detail survey he submitted his report. Among other causes of famine, he mentioned the neglect of the then existing irrigation works. He had been Collector of Tanjore and had seen the great improvements in the district due to the works on the

M. J. SADIQ
Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

Coleroon, and so he suggested to the Government that they should obtain a report on the whole subject from Captain Cotton who had done so much for the districts of Trichinopoly and Tanjore and should ascertain the possibility of putting the waters of the rivers of Krishna and Godavari to a more useful purpose.

Accordingly Arthur Cotton made a detailed study of this tract and reported on the subject of Irrigation in the Godavari district in August, 1844. In this report he opined that it was possible to thoroughly irrigate the district by an anicut across the river above the town of Rajahmundry and estimated the cost at Rs. 16 lakhs. In another report dated April 17, 1855. he entered more fully into the scheme and made further estimates. The entire project was intended not only for the construction of an anicut at Dowlaiswaram but was also for the construction of locks, irrigation and navigation canals. Major Cotton laid great stress on the necessity of navigation, in order that the produce may reach distant places and in time. The Marquis of Tweeddele who was then the Governor of Madras entered heartily into the scheme and strongly recommended it to the court of Directors of East India Company who in December, 1846, gave its approval.

The scheme and its execution:

Below is a brief description of the work which was undertaken. The part of the river wherein the anicut was built is situated just at the head of the Delta and is divided into several branches. It is a little less than four miles in width and is separated by three islands forming with four sections. The plan was to erect strong dams from the left bank of the river to the adjacent island, and from island to island to the right bank. Head sluices and locks for the purpose of regulating the discharge of water for irrigation and navigation were to be placed in the proper places so that the canals and channels might be fed from these. The total length of the dams was nearly two miles and a quarter. The distance between the left bank of the river at Dowlaiswaram to the 1st island is 1,624 yards while the distances between the other islands are 954, 516 and 862 yards respectively. There are also embankments across the islands. These distances are given to show the gigantic nature of the task. The work had to be carried out with totally unskilled labour and under primitive conditions. No such enterprise had been undertaken in India to that date. Major Cotton, however, felt satisfied that it could be done and no difficulty daunted him.

No sooner was the sanction received than the work was begun with energy and zeal. It was necessary in the first place that all preparations should be completed. Materials had to be collected, artisans and coolies had to be gathered. Supplies had to be stored. Sappers and miners were stationed at Dowlaiswaram to assist in the carrying out of this work. A short railway line was laid for carrying stones from the quarries to the place of work. The little village of Dowlaiswaram planted amid the low rocky hills from which the stone for the anicut was taken was converted into a bustling town. Major Cotton was ably assisted in this stupendous task by Lieutenants Haig, Orr and Rundall, among others. They had the same zeal and untiring energy as their leader and together they formed a very homogeneous team. The Special Sub-Collector for the work, Mr. Henry Forbes, gave hearty and valuable help in obtaining materials and supplies. He was the only civilian connected with the work and his zeal was adequately matched by Major Cotton and his Lieutenants. The work was begun in earnest at the commencement of the working season of 1847-48. It was impossible to finish it before the freshes came and this caused damage and delay. Major Cotton had hoped to complete the four divisions of solid masonary before this. But he was compelled by ill-health brought on by anxiety and hard labour to leave for England and to entrust to others the work which was so close to his heart. Captain Orr, who has been his zealous helper from the beginning, succeeded him and acted for him during his absence. Meanwhile, the expenditure on the work had far exceeded the estimates and, therefore, the Directors of the Company sent out a Commission from England to investigate into the causes, and to report on the necessity of continuing or suspending the work. The enquiry was conducted in the absence of Major Cotton.

The Committee was made up to experienced Engineers and the only civilian was Mr. Forbes, the Sub-Collector on the works. It was to the great credit of the Committee, that they recommended that the work must be pushed through in spite of the extra expenditure and further, recommended as much as four times the outlay as was originally sanctioned.

Arthur Cotton returned by the end of 1850 and found that the work has been carried on very well in spite of being hampered severely by high floods. He at once resumed his duties and took up his hard task without any reservations. On April 14, 1852, he was able to report the virtual completion of the anicut.

It is interesting to note that all the English Assistants of Colonel Cotton, namely, Capt. Orr, Lieutenant Haig and Lieutenant Rundall had

subsequently risen to the highest ranks of Royal Engineers and had retired as Generals. The Government had also taken care to reward the Chief Indian Overseer Sri Vinam Veeranna. He was promoted as Sub-Engineer with the title of Rao Bahadur. He was greatly respected and loved by Cotton and his assistants. Colonel Cotton wrote of him "I cannot say less than that, if we had not found an Indian of his remarkable qualification, I do not see how the work could have been executed, for no European could have supplied his place and no Indian like him has appeared". A gracious tribute indeed!

Colonel Cotton during his own life time could see the testimony and usefulness of his own creation. There is the greatest difficulty in ascertaining the exact extent to which the district had benefited but the following statistics gathered till his death will be of use in gauging the benefits.

Year	Revenue (In Rupees)
1823–24	21,84,747
1833–34	26,91,719
1843–44	17,25,841
1853–54	24,60,463
1863–64	42,42,295
1873–74	52,61,918
1883–84	61,71,688
1894–95	88,21,333

Subsequent repairs and alterations:

Large repairs and alterations to the dam have been carried out from time to time since its first construction. The constant additions to the rough-stone aprons have been a regular feature. Another important improvement has been the raising of the crest of the work. Even before it was finished in 1852, its height was found insufficient to secure an adequate supply of water to the canals at all seasons; and cast-iron grooved posts, fitted with horizontal planks to hold, when necessary, an additional two feet of water, were fixed along its crest. This was still insufficient; and between 1862 and 1867 the masonary itself was raised by two feet at a cost of nearly three lakhs, and the iron posts and planks were replaced on the top of the new work. In 1897-99 the crest was raised by an additional nine inches with cement concrete, and on this were fitted self-acting cast-iron shutters, two feet high, which fall automatically when the water rises to six inches above their top.

The only serious accident to the anicut itself occured in 1857. On the 14th November of that year, when the season for floods was over and the water was comparatively low, the eastern end of the Maddur branch suddenly subsided into a deep scour-hole below it, and a breach was formed through which the river poured with such depth and volume that it was impossible to stop it. The disaster was met by damming the river (with great difficulty) some way above the anicut and then rebuilding the fallen portion. This operation costed half a lakh of rupees.

The three sets of head locks and head-sluices had all been altered or replaced at various times; and of the original constructions only one head-sluice and the three sets of under-sluices now survive. The original Vijeswaram head-lock was destroyed in the floods of 1852. It was rebuilt next year, but was eventually converted into sluices; and the present head-lock was built in 1891. The original Vijesvaram head-sluices fell in 1853 and were rebuilt in 1854. The central delta head-sluices fell in 1878 in a high flood, and great difficulty was experienced in preventing damage to the canal below. The third lock was built in the year 1890-91. It was a double lock with chambers 150 ft. by 20 ft. each. Several cracks appeared in January, 1912 and the chamber walls were out of plumb so much that sanction for the building of a new lock was obtained in 1913 and for the 4th time the building of a lock was started in a suitable place commanding a good approach, and was completed in 1915. Of the eastern delta works, the head-lock toppled over in 1886, when there was 14½ feet of water over the crest of the anicut. It carried the lock gates with it and left a gap in the canal fifteen feet wide, through which the water poured. The river continued to rise, and in two days reached the then unprecedented height of 17 feet above the anicut, so that the breach was only stopped with great difficulty. A new lock in the more convenient position was built in the next year.

A gradually increasing shoal which has been forming on the left side of the Godavari river above the Dowlaishwaram branch of the anicut, has been for some time past a source of anxiety and of inconvenience to navigation. The old Dowlaishwaram under-sluices not being sufficiently powerful to arrest the progress of this shoal towards the head sluice, it was considered necessary to build more powerful substitutes for them. An estimate was sanctioned in 1903 and the work was completed in 1907. The completed under-sluices consist of ten vents of 20 feet wide and 10 feet high regulated by iron lift shutters and with their sill four feet below that of the head sluice. The shutters are in two tiers, the upper measuring 20 feet by 6 feet and the lower 20 feet by 4 feet and were

constructed with half inch plates stiffened with rolled steel beams 12 inches by 6 inches are worked by chain gearing arrangements.

Distributary works:

Simultaneously with the construction of the head-works, arrangements were made for carrying to the various parts of the delta the water they rendered available. Even before the building of the annicut, certain portions of the delta had been irrigated. Sir Henry Montgomery's report of 1846, already mentioned, deplored the neglect with which the then existing channels had been treated, and Sir Arthur Cotton described them as partial works of small extent not kept in an effective state. They were merely inundation channels, the heads of which were 12 or 15 feet above the deep bed of the river, and they received a supply only during floods, or for about 50 days in the year. Some of them lay on the western side of the river; the central delta contained none worth a mention; but on the eastern side of the river four considerable channels were in existence. One of these, called the Tulya Bhaga, led off from near the site of the anicut and ran in a fairly straight line to Kakinada terminating in the salt-creek there. In 1846 a branch was taken from it to Samalkot from near Dowlaishwaram. These two channels were connected with the head-works of the eastern delta.

At the end of 1849 a start was made with the new distributary works, sanction being obtained to the cutting of the main canals in the eastern and central deltas, the first of which leads along the river bank nearly as far as Yanam and the second runs past Ryali. In April, 1851 the western delta main canal was sanctioned, and in February, 1852 considerable extensions of the eastern main canal and large distributary works in the central delta, including the great Gannavaram aqueduct, were agreed to.

The Gannavaram aqueduct:

This aqueduct carries a large canal across a branch of the Godavari to the Nagaram island, which is surrounded by the sea and two arms of the river and to which water can only be taken in this way. The aqueduct may be roughly described as an arched bridge of brick thrown across the branch of the river, upon which, in the place where the roadway of an ordinary bridge is laid, runs a channel from 22 to 24 feet broad and some four feet deep. Its total length between abutments is 2,248 feet, and it consists of 49 arches with 40 feet waterway and 48 piers 6 feet thick. Ordinarily, the water of the branch of the river across which it is thrown flows through the arches of the aqueduct, but in times of high flood it completely submerges the whole work and pours over the top of it. It was impossible to make the aqueduct higher, because of the expense and danger involved in raising the embankments of the channels connected with it to a corresponding height above the level of the surrounding country. The work had, therefore, to be made of sufficient strength to resist floods sweeping over it.

The most noteworthy fact about the work is the wonderfully short period within which it was built. The estimate was submitted by Sir Arthur Cotton in August, 1851 but was not sanctioned till February 14th, 1852. It was considered of paramount importance to finish the work before the floods of that year came down, and, to effect this, extraordinary efforts were necessary. Between the first preparation of the materials for the work and the completion of all its 49 arches only four months elapsed, and in another four it was ready for its work. 'In any part of the world', says Mr. Walch in his book, 'this would have been a noteworthy achievement; in an out-of-the-way part of the Madras Presidency, where machinery was almost unobtainable and most of the skilled labour had to be trained as the work went on, it was an extraordinary feat'. The construction was under the charge of Lieutenant (afterwards General) G. T. Haig, R.E., and his energy and skill are commended in the highest terms by Sir Arthur Cotton: 'That a single officer with two or three overseers should have managed about 5,000 workmen, and with the help of only one or two efficient workmen, is one of the most surprising things I have met with. Every time I visited the work I was astonished at the energy and admirable arrangement of this young officer. I cannot say less than that I think him the most effective officer I have ever had attached to me. I have never yet seen such energy displayed by any other man', it is, in truth, difficult to realize, as one views this imposing work, that it was actually completed in one working season.

Completion of distributaries:

Money for further extensions of the distributary works was at first grudged by Government, who were sceptical of the prospects of the scheme and aghast at the enormous excess over the original estimates of expenditure which had been incurred. 'The records teem with remonstrances from Colonel Cotton and with 'minutes', 'notes' and letters by Governors, Members of Council, Boards and Secretaries, now wrathful and now penned more in sorrow than in anger, on the subject of the surprises which Colonel Cotton was springing on them in his demands for what they considered unexpected develop-

ments of the original scheme, or to cover expenditure incurred on work which had not been sanctioned or had been much altered or largely exceeded in execution..... On the one hand was the enthusiast whose genius and special knowledge enabled him to see clearly that what he proposed to do was in the best interests of Government — as well as of the people, and who was impatient of delay; on the other hand were the controlling powers who held the purse strings and whose duty it was to check too hurried an advance along a path the issue from which to them was obscure.' It was not till 1853 that the success of the project became so apparent that funds were granted readily for its development. From that time onwards the canals and channels were rapidly pushed forward."

On account of this aqueduct nearly 40,000 acres of land are being irrigated in the Razole taluk. During the heavy floods of 1944 the aqueduct pillars No. 35 and 37 sank on 25-8-1944 and arches numbers 35, 37 and 38 measuring 45 feet each had consequently collapsed. The toe path arches on down stream side over vents Nos. 4 to 13 had fallen. The arches were reconstructed in 1945 at a cost of Rs. 5.75 lakhs with 40 feet span with a pucca cement road along the aqueduct which is open to all forms of traffic. This is the only source by which irrigation facilities are provided to Razole taluk and this is the only artery, giving life to this entire taluk.

After the crest of the anicut was raised by 9 inches in 1897-99, the possibilities of an extension of irrigation were carefully investigated and sufficiency of water for an addition of 19,200 acres of new irrigation in the central delta was established. Of this extent about 17,500 acres were found in the island of Polavaram which lies between the main Goutami Godavari and a minor branch the Vridha Goutami which takes off from the main stream at about 30 miles below the head of the delta. The project which was sanctioned in 1925 (the estimated cost being Rs. 18.55 lakhs), consisted in taking canal water to the island by a channel branching off the bank canal about four furlongs above Annampalli lock which crosses the Vridha Goutami by an aqueduct of 26 arches of 30 feet span each with piers 5 feet 7½ inches wide and three abutment piers 10 feet 1½ inches wide. The abutments and piers have been founded on wells, 15 feet deep. The water way of the aqueduct is 20 feet by 4½ feet with parapets 3 feet 4½ inches wide on each side. The design is more or less similar to the Gannavaram aqueduct across the Vainateyam Godavari for taking water to the Nagaram island.

The prosperity of the delta depends on the supply in the river, the proper distribution of that supply among the various channels and the adequacy of the drainage system. The first factor cannot be under the control of Government, but much has been done to improve the situation in respect of the two latter. The old system of irrigation by tanks was unsatisfactory and has been replaced by free flow; and in the place of the palmyra spouts we have now pipes scientifically graded in accordance with the ayacut each has to supply. And among the numerous works carried out for the improvement of canal irrigation may be mentioned the approach channel to the Bobberlanka head works which has increased the supply to the central delta. The eastern delta has profited by the restoration of the Kovur-Manjeru canal at a cost of over a lakh of rupees.

The demand for water has increased considerably since the construction of the dam, as large tracts of lands have been brought under irrigation, so that numberless channels now ramify over the whole delta. This led to the crest of the anicut being raised by 0.75 foot in 1898. The eastern delta canals are generally closed for silt clearance and repairs in May and those of the central delta in the middle of April. There is a great rush for water on the re-opening of the canals in June, first for seed-beds and then for transplantation. The lands higher up the system receive it all and those lower down cannot be satisfied until after the lapse of some time. This difficulty is intensified in years of short rainfall for local rain is needed to enable the canal water to irrigate the ayacut in full. When there is heavy flood in the river, the lands in the lower regions of the delta get submerged by drainage and flood waters even before the crops are high enough to resist them. It is difficult to guard against such risks. Under the pipe system water is distributed equally to all the lands included in the system. The taluks most liable to submersion are Amalapuram and Razole. The drainage of the former taluk has been improved. The construction of the aqueduct across the Goutami Godavari at Muramalla and the extension of delta irrigation to the Polavaram island villages has greatly improved the conditions in this portion of the taluk.

The next major extension of the Godavari system was taken up in the early 50's of the 20th century. In 1952 work was started in the Koringa island in Kakinada taluk for excavating channels by taking the Godavari water from the Kakinada canal across the Koringa river by the help of a syphon. An estimate of Rs. 14.25 lakhs was sanctioned for this project and the

work was completed in the year 1954. Water was allowed for irrigation during the year 1955. The area irrigated in the first stage was 8,000 acres and ultimately 11,650 acres were irrigated.

A medium irrigation scheme across the Pampa river at Annavaram village in Tuni taluk was sanctioned in October, 1964 and it is designed to give assured supplies to about 9,567 acres of the existing wet ayacut besides providing irrigation facilities to 1,160 acres of dry land.

The other sources of irrigation in the district are the Yeleru, the Tandava and the Pampa river channels. Apart from these there are also a few spring channels, hill streams, tanks, filter-point wells, artesian wells and sub-artesian springs which also contribute to the irrigation sources of the district.

The Godavari anicut system irrigates Kothapeta, Razole, Amalapuram, Ramachandrapuram and Kakinada taluks and a portion of Rajahmundry taluk. Kothapeta taluk is also irrigated by the Peravaram Pumping Scheme, besides the Godavari canal system. At Peravaram water is pumped up from the Amalapuram main canal with the help of electric pumps and fed to the high level lands in the Kothapeta taluk. One other similar scheme to provide water from the river Godavari to the uplands of Rajahmundry taluk has been completed at the beginning of the year 1964. An Electric Pumping Station has been installed at Torrigadda. This pumping station takes water directly from the river Godavari and with the help of a canal system distributes water. Though the pumping station is ready, the construction of supply channels is still in progress.

The Yeluru river channels irrigate large portions of Peddapuram and Pithapuram taluks and lesser extents in Tuni and Prathipadu taluks. The Thandava and Pampa river channels irrigate portions in the Tuni taluk. Besides these river channels parts of Rajahmundry, Peddapuram, Pithapuram, Prathipadu and Tuni taluks are irrigated by rainfed tanks and tube wells. Very few tanks in Rajahmundry and Prathipadu taluks are fed by hill streams. The tanks in the remaining taluks are also mostly rainfed and are, therefore, very precarious sources of irrigation. Some portions of Yellavaram and Rampachodavaram taluks are irrigated by hill-streams.

A peculiarity of this district is its artesian wells. The existence of an artesian supply was accidentally discovered while digging an ordinary well in the railway station compound at Samalkot in 1892-93, the water being encountered at a depth of about 80 feet. Since then several other artesian wells have been sunk, namely, a second in the station compound, two in 1904 in the sugar refinery at the same place, and a fifth at the railway station yard at Kakinada Port, where the water was struck nearly 300 feet below ground level. However, these wells referred to above were not used for irrigation purposes.

A number of borings in the dry tracts in the district have been effected from time to time by the Government department of Industries, both for irrigation and drinking water purposes. About ten artesian springs have been tapped by this department and all of them with the exception of one which subsequently dried up are sources of irrigation. Of the successful borings prior to 1932-33, eight were in Kakinada taluk in Peddabrahmadevam village of which six have artesian springs yielding between 60 to 250 gallons per minute, one in Pithapuram, four in Rajahmundry taluk and six in Peddapuram taluk yielding between 10 to 50 gallons a minute. In 1932-33 twelve borings were put down for irrigation purposes all in the same taluk of which three had artesian springs, one of which yielding as much as 250 gallons a minute.

The following is the net area irrigated under different sources of irrigation:—

Sources 1	Net areas irrigated in acres 2	Percentage to the total area irrigated 3
Government canals	5,04,636	78.10
Private canals	2,098	0.38
Tanks	1,18,819	18.39
Tube wells	14,124	2.18
Other wells	1,972	0.30
Other sources	4,481	0.70
Total	6,46,130	100.00

CHAPTER VI

AGRICULTURE

In East Godavari, as in other districts of the State, agriculture is the mainstay of the rural population, and its practice varies with the nature of the soil; and the status and energy of the ryot in the uplands and in the delta differ considerably. Traditional methods of agriculture are still followed in some parts of the upland areas of the district; but owing to fairly favourable conditions, in both areas, a variety of crops is grown in different parts of the district. Freshes arrive in the Godavari as a rule in June and the river is in full flood during July-August after which it goes down slowly, through it retains a head of water at the Dowlaiswaram annicut throughout the year which enables the canals to be kept upon for eleven out of the twelve months closing about the middle of May and re-opening in mid-June. The immence irrigation from the Godavari annicut has naturally resulted in paddy being the most important crop in the district. This crop is raised mostly by transplantation but other commercial crops like sugarcane, chillies, tobacco, cocoanut, banana besides dry crops as groundnut, sajja, jonna, chola and pulses are grown in a large area. Some of the commercial crops are found to be more profitable than paddy.

For cultivation purposes the district can be roughly divided into three categories namely, the delta area, the upland area and the agency area. Agricultural practices differ in this district from area to area. The delta area is served by the Godavari canal system and, therefore, it has a regular and undiminished supply of water at the proper seasons. On account of this regular supply of water, wet crops stated above are grown in plenty and there is never what is known as scarcity conditions. The deltaic portion consists of the whole of Konaseema (Amalapuram, Razole and Kothapeta taluks) and Kakinada, Ramachandrapuram and Rajahmundry taluks. In Ramachandrapuram, Kothapeta, Kakinada, Peddapuram and Rajahmundry taluks, over 3,500 filter points and tube wells have been installed by tapping underground water supply. The filter points and tube wells are used for raising early seed beds and to supplement water for intensive cropping. The uplands as the name itself suggests are lands which are not within the reach of the Godavari canal system on account of their higher elevation. Most of the irrigation in this area is carried on by irrigation tanks which are rainfed and therefore precarious sources. This upland portion comprises of the taluks of Tuni, Pithapuram, Peddapuram and Prathipadu and portions of Rajahmundry, Kakinada and Ramachandrapuram taluks. The Yeleru river system to a certain extent also irrigates portions of Peddapuram and Pithapuram taluks. The Thandava and Pampa rivers also irrigate certain extents irrigated portions of Tuni taluk. Hence in this upland area but for these small rivers which may be called hill streams irrigation is generally precarious. Dry crops are, therefore, grown in most of the area. On account of this uncertainity of water supply this area is liable to famine and scarcity conditions once in a few years.

The common dry crops grown are gingelly, cholam, horsegram, ragi, greengram, sunhemp, castor, cumbu, chillies, groundnut, redgram and blackgram. Tobacco is also grown extensively in Rajahmundry taluk and Rampachodavaram taluk (Devipatnam area). There is an extent of over 50,000 acres under orchards with predominant cultivation of mango in over 30,000 acres. In the Konaseema over 60,000 acres are cultivated under cocoanut with inter crops of turmeric, banana, jack and vegetables.

Cultivation in the Agency areas is different from other areas for the simple reason that there is no settled mode of cultivation and the prevelant practice is what is known as the 'Podu' or the shifting method of cultivation. This in the Agency is carried on by burning — clearings in the forests. Even in 'Podu' cultivation two types are recognised. Firstly, the ordinary Podu and secondly the hill Podu. The former consists in cultivating certain recognised clearings for a year or two at a time, allow the forest to grow again for a few years, and then burning and cultivating; while under the latter the clearing is not returned to for a much longer period and sometimes deserted for ever. The latter is in fashion in the hilly and wilder parts of the Agency areas. In February and March the jungle trees and bushes are cut down and spread evenly over the portion to be cultivated; and when the hot weather comes on, they are burnt. The ashes act as a manure and the cultivators also believe that the mere heat of the burning makes the soil more productive.

The following statement shows the time-table of the agricultural operations in each taluk in the normal year. The figures shown against each crop or variety of it represent the percentage of the crop sown or harvested in the month to the total area of the crop sown or harvested in the taluk concerned:

The following statement illustrates the effect of any departure from normal monsoon conditions upon this time-table of agricultural operations:

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
January	The second dry month after the close of monsoon rains. Fine weather with bright days and cool nights with fairly heavy dew fall.	There is generally no rainfall in the month, and the dry weather facilitates the threshing of paddy crop. The seed beds for the second crop paddy are prepared and sown. Gingelly is sown by broadcast. The dew helps the growth of pulses and sunhemp crop. Planting of sugarcane and harvest of *ratoon* crop begin during the month. Desuckening and nipping of buds are the operations done to tobacco. Cotton crop will be in full flower and bolls.
February	The third dry month after the close of the monsoon. Generally heavy dew falls or occasional showers. The days are fairly warm but nights are cold.	Planting of second crop paddy. Harvest of sunhemp for fodder and threshing of first crop paddy and harvest and threshing of pulses are the main operations during the month. Cane planting and milling continue. The harvest of Kakinada cotton, jawar and tobacco will be in progress. If showers are received, the threshing of paddy and cane milling operations are delayed.
March	The days are warm but nights are comfortable. Occasional showers. Less dew falls.	Planting and milling of sugarcane threshing of first crop paddy, weeding of second crop paddy, irrigation to gingelly and picking of Kakinada cotton are the main operations. The cattle are penned in the fields and fresh bunds are put in place of old ones. Tobacco, jawar and coriander are harvested. Heavy showers interfere with the milling, threshing and harvesting operations.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
April	Fine weather with occasional showers. Days are very warm but the nights are cool and breezy.	Generally, ploughing operations begin. Hoeing, weeding and irrigation are given to sugarcane. Green manure crops are sown in the midst of the standing crop of dalwa first before harvest and in lines of sugarcane. Cotton picking continues. Last irrigation is given for gingelly crop. Chillies and bengalgram are harvested. Heavy showers facilitate the summer ploughings. Standing crop of sugarcane is much benefited.
May	Warmest month of the year. Nights are warm and dry, hot western winds commence. Usually heavy showers and thunder-storms. Irrigation canals are closed during the month.	Excessive rainfall interferes with the harvest of gingelly and second crop paddy, but is useful to standing crops of sugarcane and green-manure crops and facilitates the dry ploughing of paddy fields. During the second fortnight, early paddy seed beds are prepared and sown.
June	Setting in of south-west monsoon. The rainfall is light. Irrigation canals are opened during the month. The days are warm and high winds prevail.	Late paddy seed-beds are sown. Sugarcane crop is irrigated. Paddy land is prepared. Planting of early sown seedlings commences by the end of the month. The first trenching, hoeing, weeding and manuring of cane are also taken up. Plantain crop is planted. Dry crop is planted. Dry crops of budama mixed with redgram, cotton and gogu, ganti or sajja, gingelly and groundnut are the sowings for the month. Heavy rainfall is necessary for the sowing of the above crops. Failure of rains postpones the sowings.
July	South-west monsoon in full progress. Heavy rain with high winds. Days are warm and humid.	Paddy planting will be in full swing and completed in the delta. Sowing of dry crops will also be in progress. The trenching and manuring of sugarcane continue. Excessive and continuous rains interferes with the sowing of the dry crops.
August	South-west monsoon active, winds continue. Heavy rains.	Heavy and continuous rains do not permit the weeding of the dry crops. Scarcity and insufficient rains reduce the yield of dry crops. Weeding of paddy and sugarcane crops will be in progress. Planting of paddy under tanks in uplands will be continued.
September	South-west monsoon closes, north-east monsoon begins. Rainfall is light.	Heavy and excessive rains interfere with the harvest of the dry crops of sajja, gingelly, early paddy and groundnut. Scarcity of rainfall or failure of rains results in a poor crop of long duration paddy. Early sown budama, short duration varieties of paddy, gingelly, cumbu and other millets are the crops harvested. Tobacco seed beds are prepared and sown. Chillies are also planted. Sowings of Kakinada cotton commences. Groundnut is in pods.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
October	Month of heaviest rainfall.	Heavy and excessive rainfall interferes with the harvest of budama, gingelly, groundnut and early paddy varieties, garikasannam, basangi and rasangi. The sugarcane crop is lodged. The sowing of tobacco, chillies, cotton and coriander is delayed as the germination is affected.
November	The north-east monsoon slackens and closes with the month.	Heavy and excessive rains interfere with the harvest of paddy (Akkullu), Punasa and Konamani and groundnut. The sowings for the month are of sunhemp, pulses, coriander and plantains in seethakattu (cold weather). Tobacco planting continues.
December	This is the first dry month after the close of the monsoon, bright days and cold nights with scanty showers.	Rains during the month affect the paddy harvest but are useful to the standing crop of chillies, tobacco, jowar and coriander. Sowings of pulses and planting of tobacco will be completed.

In a favourable year of sufficient and seasonable rainfall, there will be a moderate fall in May and June, which will enable the peasant to plough and prepare his dry lands for cultivation and also enable the peasant in the delta taluks to raise seed beds of paddy. It also helps the peasant in the low lying lands of delta taluks to plant out Basangi paddy which comes for harvest in September and October. Rain is required in July and August as it helps the sowing of dry crops both in the uplands and in the Agency. It also helps the timely transplantation of wet paddy in the delta taluks because paddy transplanted in these months, yield appreciably. Rain is also required in the month of September as it helps the standing crop sown in the previous months and also the standing dry crops. Occasional showers are also required in the month of October to help the standing crops both dry and wet. After the harvest of dry and wet crops in the months of November and December, the ryots look forward with anxiety for occasional showers in the months of February and March, as they help the transplantation of second crop paddy which comes for harvest in the months of April and May. For successful crop growth there should be well distributed rainfall in the months of February, March, June, July, August, September and October.

Fruit orchards are confined to upland taluks while condiments and spices are grown in Kothapeta, Pithapuram, Rajahmundry and Peddapuram. The area under condiments and spices is quite significant in Kothapeta, Pithapuram, Rajahmundry and Peddapuram. The Agency taluks of Rampachodavaram and Yellavaram yield large quantities of oranges. The major extent under fruit trees and vegetables in the Amalapuram, Razole and Kothapeta taluks is covered by cocoanuts and plantains. The prosperity of the ryots in these taluks depend mostly upon the outturn of the cocoanuts and the prices they fetch.

Agricultural Research:

There are four research stations in the district located at Ambajipeta, Samalkot, Peddapuram and Rampachodavaram. A brief resume of the stations is furnished hereunder.

Regional Cocoanut Research Station, Ambajipeta:

On account of great commercial importance laid on cocoanut and its bye-products, a Regional Cocoanut Research Station has been established in Ambajipeta of Amalapuram taluk for improving the varieties as well as for aiding the cultivators. The functioning of the Regional Cocoanut Research Station at Ambajipeta is explained below.

The Indian Central Cocoanut Committee (Ministry of Agriculture, Government of India) appointed an expert sub-committee to review the research work on cocoanut in the various States of India, and formulate for the future, a programme of work for implementation. The Committee in their report (1946) *inter alia*, stressed the need for establishment of a chain of a dozen Regional Cocoanut Research Stations in the chief cocoanut growing States of India, and recommended that one of these Regional

Cocoanut Research Stations should be established in Amalapuram taluk of East Godavari district. Accordingly the Regional Cocoanut Research Station, Ambajipeta, was established at Ambajipeta in Amalapuram taluk. The scheme is partly financed by the Indian Central Cocoanut Committee. The primary objective of the station is to conduct co-ordinated research mainly on the agronomical problems (cultural and manurial) of cocoanut cultivation in the State. Other problems under investigation are introduction and acclimatisation of promising varieties.

The area of the farm is 60.26 acres which has been acquired for the establishment of the station.

During the first five years, only two buildings, the office and the Parasite Breeding Laboratory, have been constructed (besides the ancillary buildings of a cattle shed and manure-pit). Extensions and improvements to the office block, a chemical-cum-botanical laboratory, an air conditioned laboratory for Parasite Breeding and a few residential quarters for the staff are included in the building programme (which is nearing completion).

In accordance with the approved technique of experimentation with parennial crops, the cocoanut plantation was "Standardised" during the period, 1956-59. Salient features of the technical programme of work are given hereunder:—

Particulars	*Object*
1 Introduction and acclimatisation of promising "varieties"	To study whether any of the reputed "varieties" of othe ther cocoanut growing zones of the 'world' are superior to the local.
2 Hybridisation	To produce economic hybride superior to the local tall and "Ganga bondam" which are popular in the State.
3 (a) Agronomical experiments	To fix up the optimum manurial schedule for cocoanut in the region.
(b) Intercultivation-cum-manurial experiment	To work out the best inter-cultivation schedule and study the interaction of manuring and intercultivation.
4 Particulars : Ancillary trials	
(a) Green manure crops trial	To fix up the best green manure crop for raising in cocoanut gardens.
(b) Inter-cropping trial	Fixing up of the most renumerative among the inter-crops commonly grown in cocoanut gardens.
(c) Economics of growing cocoanut in paddy lands	To study the economics of three methods of raising cocoanut in paddy lands of the delta region. 1. Cocoanut only 2. Cocoanut-cum-paddy 3. Paddy alone
(d) Rejuvenation of poor palm	To evaluate the effect of manuring on poor palm for improving their general condition and yield.
5 Rhinoceros Beetle control trial	To work out the best control measure for the cocoanut beetle
6 Monthly Nursery Studies	To study the effect each month of harvest and the resting period and nursery charactors of the seed nuts
7 Other schemes in operation at the station	
(a) Scheme for the biological control of the cocoanut cater pillar (Nephantis Serinopa)	To improve the existing technique of biological control of the cocoanut leaf catering caterpillar and to rear and distribute parasites to control the rest
(b) Biological control of cocoanut mite scheme	This scheme was closed down on 31-3-1963 due to National emergency
(c) Cocoanut Development Scheme	One of the five nursery units of the scheme was located at Ambajipeta till 31-3-1962 and has since been shifted to Kalahasti (Chittoor district)
8 Present Staff, Income and Expenditure	

Staff (Technical)		Income	Expenditure (working expenses	Rupees
	18-5-55 to 31-3-56	577	18-5-55 to 31-3-56	5,666
One Assistant Cocoanut Research Officer (Class II Officer)	1956-57	3,378	1956-57	8,287
One Research Assistant (Graduate)	1957-58	8,663	1957-58	9,705
Two fieldmen	1958-59	7,421	1958-59	9,476
One maistry	1959-60	7,365	1959-60	11,624
	1960-61	17,906	1960-61	12,676
	1961-62	8,788	1961-62	18,582
	1962-63	9,383	1962-63	19,400

Important achievements:

All the preliminaries like "Standardisation" of trees for starting the experiments on statistical pattern have been completed and all the agronomical trials have been started as per schedule. Reputed cocoanut varieties from all over the world are being collected and planted on the station, for study of their performance and future hybridisation work. A comprehensive experiment with the three Macronutrients N. P. and K. each at three levels with and without green manure as a basal dressing has been initiated. An intercultivation-cum-manurial trial with eight manurial combinations as "Majors" and three cultural treatments as "Minors", has been started. As there is an inevitable time lag of nearly three years (due to the nature of the crop itself) between the adoption of any agronomical measure and its being reflected in yield, it is too early to draw any conclusion from the agronomical experiments. The following indications were observed in the results obtained so far.

1. Application of N as Ammonium sulphate gives a significant increase in the yield of nuts.

2. There is no significant difference between the yield (of nuts) of trees given 4 ploughings and 6 ploughings per annum though both these treatments were significantly better than "no cultivation".

3. Of the six reputed green manure crops studied, sunhemp was found to be the best for raising in cocoanut gardens as it had a good yield coupled with two other advantages of shortest duration, and succulent nature.

4. Of the five popular intercrops (Dry Paddy, Gingelly, Ginger, Banana and Turmeric) Banana was found to be most remunerative as it recorded the highest net return per acre.

5. Monthly nursery studies: Seednuts maturing in the months of January-June have been found to be as good (in germination and vigour) as those maturing in February-May the conventional seednut season.

Thus the station has started investigations on all important problems, short range as well as long range ones of cocoanut cultivation in the tract.

Extent of achievement of the objectives: The objectives have been achieved according to schedule in all the schemes except the scheme for biological control of the cocoanut mite. The scheme to control mites has since been closed on 1-4-1963.

Plans for expansion for work in new directions:

An expert sub-committee appointed by the Indian Central Cocoanut Committee visited the station in November, 1960 to review the work done so far and formulate future lines of work. The following are the new items of work proposed to be taken up in due course with the augmentation of the staff and facilities as recommended by the committee.

1 Floral biology studies

2 Intravarietal and intervarietal hybridisation

3 Chemical analysis for oil content and copra content studies in the agronomical trials

4 Establishing a meteorological unit for recording crop weather observations

5 Age of seedlings at planting and depth of planting trials

6 Irrigation experiments

Agricultural Research Station, Samalkot

The Station is situated ½ mile from Samalkot Railway Station on the southern bank of Kakinada canal. The Station was established in 1902. The area under the Station is 40.00 acres.

The Station was started with the object of evolving sugarcane varieties resistant to red-rot disease, which ravaged the crop seriously at that time. Later on work on rice and pulses was taken up. The work at present is concentrated in the improvement of rice crop grown in the central and east Godavari delta of East Godavari district. The work pertains to varietal, cultural and manurial treatments on paddy.

Varietal:

As a result of research work done on rice crop so far, 19 improved paddy strains were released from this Station of which five SLO. 2 (Punasa Konamani), SLO 13 (Gova Akkullu), SLO 15 (Pedda Konamani), SLO 16 (Kasi Pichodi) and SLO 19 (Tokasannam) have become very popular with the cultivators in the tract. Another high yielding culture 3,778 of Basangi duration with good quality rice has been isolated recently.

Hybridization has been taken up since 1953 between suitable strains MTU 3 × SLO 19, SLO 16×MTU. 20, SLO. 11×MTU 19, SLO 13× 3778, SLO. 2×SR. 26.B, Eswarakora × SLO 13 and a large number of hybrid progenies of varying durations are in the early and advanced generations. A total of 324 types of indigenous as well as exotic origin are maintained as genetic stock for further study.

A special scheme for the study of Indica-Japanica crosses for the evolution of thrifty and non-lodging types of rice is in progress.

Cultural

Experiments on cultural practices have revealed that the best rotation for rice is to include a cane or banana crop once in four years. It is also concluded that dry ploughing exercises a depressing effect on the yields of rice. Optimum seed rate is 3 lb. to one cent in 7 cents nursery to transplant an acre. Seedlings transplanted at 6 inches to 7 inches spacing recorded the highest yield in main crop season. The optimum age for transplanting rice seedlings was found to be 25 days in "Konamani" variety. The problem of growing a paddy crop in Godavari delta between October to January is under study for the past 10-15 years. Eswarakora of Nellore district alone could withstand the adversity of the season in this off season planting.

Manurial

No significant differences among night soil compost, cattle manure, green leaf, sheep penning as sources of nitrogen for paddy were observed. Superphosphate at the rate of 224 lb. per acre enhanced the yield by 23% and 9% in conjunction with green leaf and castor cake respectively. In second crop season 800 lb. of castor cakes along with 224 lb. super phosphate increased the yields.

Response to manures was observed to be most with short and medium duration varieties than long duration varieties.

Specific recommendations:—

(1) SLO. 2 for light soils of Yeluru Basin.

(2) SLO. 13 cosmopolitan strain which could be raised under varied conditions.

(3) SLO. 15 for rich alluvial soils.

(4) C. No. 3778 for raising an early crop.

(5) Use of banana or sugarcane in the rotation once in three to four years.

(6) Adoption of thin nursery.

(7) Application of green manure 3,000 to 4,000 lb. per acre to the main crop.

Millet Research Station, Peddapuram

This Station was started in the year 1954 for improvement of millets grown in East and West Godavari districts, viz., jonna, sajja, ragi and samai. The area of the farm is 22.00 acres. Cultures P.G. 74 in sajja, P.J. 59 in jonna, P.R. 3 and P.R. 35 in ragi have been isolated and given for district trials. In pulses as a result of breeding work R.G. 72, R.G. 434 and R.G. 476 were isolated and given for district trials. P. M. 4, a strain of samai, has also been released. Similarly, G.G. 525 in green gram, B.G. 369 in blackgram, and H.G. 76 in horsegram were built up and released for district trials.

Work is in progress to evolve suitable wilt resistant redgram for raising on rice bunds in high level deltaic tracts.

Fruit Research Station, Rampachodavaram

This station was started in 1955 in the Agency area. It is located about 34 miles from Rajahmundry. The area under the farm is 50.00 acres.

The objective of the station is to give an impetus to the backward agency areas regarding the improvement in the cultivation of mandarin, and other oranges and cocoa. Several strains of cocoa have been introduced from U.K. Investigations on tuber crops, ginger are also under progress.

A nursery has been initiated for the supply of pedigree plant and seed materials to the intending growers.

CHAPTER VII

INDUSTRIES

As in other districts agriculture and the tending of flocks and herds employ a very large section of the population. Though this is true of the people all over the district those living in the plains area are generally more enlightened and, therefore, several branches of industry have been established. The following large and medium scale industries are in existence in East Godavari district:

The Andhra Paper Mills, Rajahmundry :— This paper mill was purchased by the Government in the year 1948 and since then this is the only large scale unit under the public sector providing employment to nearly 662 persons. This mill was established in 1930 with an installed capacity of 2,000 tons per annum. Efforts are now being made in collaboration with a French firm to increase the productive capacity of the mill by the installation of the latest improved machinery. Most of the machinery has been received and the plans and the work of expansion is in progress. However, the State Government has since sold this mill to the private sector.

Sarvaraya Textiles (P) Ltd., Kakinada :— This is a public limited company on a large scale, established at Kakinada on the 10th of January, 1957 with a subscribed capital of Rs. 50,08,000. The authorised capital of this concern is Rs. 1,00,00,000. This mill is capable of producing yarn of 20s, 26s and 60s to an extent of 3,600 bales of 400 lbs. each per annum. About 535 persons are employed in this mill and the yarn produced is supplied throughout the country through local yarn brokers. The processing is done from raw cotton.

Sree Ramadas Motor Transport (P) Ltd., Kakinada:— This is a private limited concern producing king-pins, shackle pins, shackle bolts for use in all types of diesel engines. This company also owns a large fleet of transport vehicles. About 200 persons are employed and its yearly production is estimated at a value of Rs. 3 lakhs. Its transport fleet undertakes parcel service. The products manufactured here are distributed throughout the country, through the Automobile spare parts dealers.

Messrs. Deccan Sugar Abkari Ltd., Samalkot :— This is one of the three sugar factories located in East Godavari district. This mill was established in the year 1897. The unit is equipped with machinery capable of producing 10,000 tons of sugar per season (5 months). By-products like spirits are also obtained from this factory. It employs 622 persons and functions only 5 months in a year. This is a public limited concern with an investment of Rs. 50 lakhs.

Messrs. Kirlampudi Sugar Mills (P) Ltd., Pithapuram:— This is a private limited concern with an authorised capital of Rs. 25 lakhs. So far the subscribed capital is Rs. 18 lakhs. It was established in 1950. It employs 419 persons. Sulphur is also produced as a by-product. The unit is equipped with a productive capacity of 32,500 tons of sugar per season.

Sarvaraya Sugars (P) Ltd., Chelluru, Ramachandrapuram Taluk :— This is a private limited concern with an authorised capital of Rs. 2 crores and the paid-up share capital being Rs. 50 lakhs. This concern was established in 1959 at Chelluru in proximity to the delta area where the fertile irrigated lands grow abundance of sugarcane. This mill is equipped with machinery capable of producing 33,000 tons of sugar per season. The capital investment on the concern is Rs. 1,05,00,000 which also includes a long term loan of Rs. 45 lakhs from the Industrial Finance Corporation.

Small Scale Industries—Private Sector

Agro Industries :— This includes rice mills, oil mills, rice and flour mills, khandsari units, etc. There are 144 units of this type in the district. The total capital invested on these industries has been estimated to be Rs. 1,62,56,217. This industry provides employment to nearly 2,735 persons. Products worth Rs. 7,37,45,126 were produced from raw materials worth Rs. 4,77,89,514. 90% of these mills work on electricity. Since the inauguration of the Community Development Programmes most of these industries have been covered by the Amalapuram, Seethanagaram, Bendapudi, Korukonda, Sankhavaram, Nagaram, Allavaram, Rampachodavaram and Yellavaram Blocks.

Wood based Industries:— These comprise of saw mills, furniture units, carpentry and blacksmithy units and boat building industries. There are about 63 such units in this district mostly concentrated in the towns and in the Blocks of Tallarevu, Rajanagaram, Gollaprolu, Rayava-

ram, Peddapuram, Razole, Amalapuram and Allavaram. A sum of Rs. 11,03,099 has been invested in this industry which employs 827 persons. Goods worth Rs. 1,45,99,637 were produced from raw materials worth Rs. 1,00,39,919.

As wood has been found to be a very versatile raw material and which can be used for multifarious purposes it has become necessary to convert all types of woods which do not belong to the teak species into durable and economically more suitable types. Methods had, therefore, to be found to make these non-teak hard woods and other secondary species free from splitting and warbing on being dried and to assure longevity by making it immune to natural vicissitudes. This wood had, therefore, to be treated so that the low quality secondary timber species which are available in larger quantities and in bigger sizes and at cheaper rates could be made to last longer against rigors of climate, insects and fungi. It was, therefore, decided to establish an incorporated unit of Saw Mill - cum - Seasoning - cum - Treatment Plant and wood workshop at Rajahmundry. This mill will mainly depend upon the timbers obtained by the departmental working of coupes in the Godavari upper and the lower divisions. It will also cater to the demand of private timber merchants and the general public for sawing or seasoning or treatment of timber at the approved rates. The main objectives of the scheme are as follows:

1. To convert unsound and cheap qualities of teak and non-teak timbers into various standard sizes.

2. To provide kiln seasoning facilities for seasoning of teak and non-teak timbers in plank forms.

3. To provide pressure treatment facilities, with approved preservatives to both sawn and round timbers, particularly for use of electric and telegraph transmission poles, railway sleepers, etc.

4. To re-convert the offcuts and utilise the unsaleable small pieces and saw-dust obtained in the saw mill, into finished products like small furniture parts, flooring boards, roofing shingles, etc.

5. Manufacture of furniture to meet the requirements of the Government Departments and the general public utilising seasoned and treated timber.

6. To supply standard construction timbers like beams, joists, struts, rafters, scantlings and also fabricated timbers like doors, windows, ventilators of standard sizes.

7. To make packing cases, wooden reels, tool handles, Amber charkas, bullock cart wheels, etc., by utilising suitable seasoned or treated timbers.

A suitable site of about 40 acres between Dowlaiswaram and Rajahmundry adjoining the river Godavari with a highway road passing through the site has been selected. The construction of this mill is in progress. The scheme envisages a sawing capacity of 75 to 80 thousand cubic feet of sawn timber in a year. In order to reach this target at least a quantity of 2,40,000 c. ft. of timber in round form is required annually to keep the mill fully engaged throughout the year. It is also proposed to treat about 60,000 c. ft. of non-teak timbers mostly poles useful as transmission poles for the Electricity, in the Postal Department and as railway sleepers. The seasoning kiln attached to this mill is expected to season about 15,000 to 18,000 c. ft. sawn timber each year. This does not require any additional raw material as the mill itself will be in a position to feed the seasoning kiln. Upto the end of 1963 an expenditure of about Rs. 7.89 lakhs had been incurred towards the construction of this mill.

Chemical Industries :— These include soap, match and medicine industries. The Ayurvedic medicines that are manufactured are also being supplied to the other States in this country. Altogether there are 8 units employing 434 persons. The investment in this industry has been estimated at Rs. 6,72,500. Goods valued at Rs. 5,46,513 were produced from raw materials worth Rs. 3,71,250. The concentration of this industry is in Tallarevu, Kapileswarapuram and Kothapeta Blocks and in the towns of Rajahmundry, Kakinada and Tuni.

Ceramic Industry :— This industry covers the manufacture of ceramics, cement bricks, mangalore-tiles, and graphite crucibles and has a country-wide market. Apart from these there are also two departmental units in this district producing pottery-ware. A ceramic research centre has been established under the public sector and this unit is located at Rajahmundry.

The second important industry in this category is the graphite crucible industry. More than 90% of the graphite crucible units are located at Rajahmundry. A well-equipped Government centre is also located in Rajahmundry to guide the entrepreneurs in the trade. The advantages of the new improved machinery are demonstrated in this centre. The graphite crucibles manufactured in this district are exported to States like Orissa and Madhya Pradesh.

This industry employs 979 persons and the investment is estimated to be about Rs. 23,68,843.

Printing and Stationery Industry :— There are about 65 units in this district engaged in printing as job-works. Independent publishing works are also undertaken by the leading printing works like Kondapalli Printing Press, Kalahasti Tammarao and Addepalli & Company. In this trade about 567 persons are employed and the estimated investment is to a tune of Rs. 19,76,217. The job works and the publishing works in these units as a whole are said to be to the value of Rs. 6 lakhs a year. Most of these printing units are located in Rajahmundry, Kakinada, Samalkot, Pithapuram and Peddapuram.

Light Engineering Industry :— There are about 104 units in this district engaged in steel structural fabrication work, general engineering products, motor vehicle body building, cycles and cycle spare parts, fountainpens and sheet metal works, etc.

Most of the units are equipped with cupola furnaces and pit furnaces to take up independent casting works. The leading foundry works and steel structural fabrication works are attended at Dowlaiswaram, Rajahmundry and Kakinada. There is only one cycle manufacturing unit at Rajahmundry town known as Raja Cycle Industry manufacturing "Matchwell" cycles. Besides the general engineering and cycle industry the pen industry started in this district about three decades ago has a wide reputation throughout the State for the products with patent marks "Ratnam", "Brahmam", "Leader" and "Guider".

Non-Ferrous Metal Industry :— This district is famous for the manufacture of brass tumblers, tiffin carriers and aluminium articles, etc. These units are mainly concentrated in Rajahmundry, Kakinada and Mandapeta towns and in Pithapuram, Rajanagaram and Kapileswarapuram Blocks. This trade employs 896 persons and its investment is estimated at Rs. 15,66,200.

Leather Industry :— This industry includes tanning works and manufacture of rubber products and is concentrated mostly in Rajahmundry town.

Miscellaneous Industries :— Under this category most of the miscellaneous industries given in the statement below are located at Rajahmundry, Kakinada and Peddapuram towns:

Name of Industry	No. of units	Capital invested	Labour employed (in Rupees)	Value of the products manufactured (in Rupees)	Value of raw materials consumed (in Rupees)
(1)	(2)	(3)	(4)	(5)	(6)
Aerated Water Works	2	3,32,100	63	1,02,297	2,47,000
Coffee Grinding	2	95,980	12	2,82,540	2,64,200
Readymade Garments	1	26,000	11	64,700	47,000

Small Scale Industries—Public Sector

Crayons and Plaster Products :— In G. O. Ms. No. 1692, Industries Department, dated 17-8-1955, the Government sanctioned the establishment of a Crayons and Plaster Products unit at Rajahmundry and the sanction for its continuance is being extended from year to year. The object of this scheme is to impart training to the local artisans in the manufacture of crayons and plaster products and also to have a production centre attached to it. This unit which was started in November, 1956 provides training of six months to six persons each time. Each trainee receives a stipend of Rs. 20 per month. By the end of 1963, 72 persons had

received training in this centre. The following statement gives details of the production and sales in this centre from 1957 to 1964:

Year	Production	Sales
	Rs. nP.	Rs. nP.
1957-58	3,140.00	3,003.92
1958-59	6,380.00	6,209.66
1959-60	15,972.60	10,476.03
1960-61	13,140.00	12,745.00
1961-62	13,641.25	12,459.24
1962-63	16,152.06	15,248.00
1963-64	13,039.71	15,042.38 (upto 1/64)

Pottery Training Centre :— In G.O.Ms. No. 2389, Planning and Development Department, dated 8-11-1955, the Government sanctioned the establishment of a Pottery Training Centre at Rajahmundry. This sanction is being extended from year to year.

The object of this centre which started functioning from 20-11-1955 is to impart training to persons drawn from pottery community in the making of improved pottery and stoneware products. About 147 candidates have been trained by the end of 1963. Each have received a stipend of Rs. 25 per month during the period of the training. The following statement furnishes details of production and sales in this centre from 1957 to 1964.

Year	Production	Sales
	Rs. nP.	Rs. nP.
1957-58	7,120.57	324.01
1958-59	10,800.00	8,080.00
1959-60	18,628.38	18,171.26
1960-61	26,423.00	30,238.00
1961-62	19,883.13	27,130.80
1962-63	13,773.60	15,759.28
1963-64	19,228.24	14,264.82 (upto 1/64)

Brush Manufacturing Industry, Samalkot .— In G. O. Ms. No. 65, Industries, dated 18-1-1957, the Government sanctioned the establishment of a Brush Manufacturing Unit at Samalkot. The sanction is being extended from year to year. The object of the scheme is to impart training to the local artisans in the manufacture of palmyrah brushes. The scheme provides training to 6 persons at a time for a period of one year each on a monthly stipend of Rs. 30 per trainee. The following statement gives details of production and sales in this centre from 1957 to 1964:

Year	Production	Sales
	Rs. nP.	Rs. nP.
1957-58	883.00	...
1958-59	5,357.00	592.00
1959-60	5,526.00	1,756.00
1960-61	4,371.00	1,894.00
1961-62	3,173.00	1,711.00
1962-63	2,112.50	3,065.45
1963-64	2,552.75	2,490.37 (upto 1/64)

Bristle and Mattress Fibre Unit, Machavaram :— In G. O. Ms. No. 759, Industries, dated 5-6-1959, the Government sanctioned the establishment of a Bristle and Mattress Fibre Unit at Machavaram in Amalapuram taluk. The sanction for the continuance of this unit is being extended from year to year.

This industry is based on the process prevalent in Ceylon. The idea is to manufacture mattress fibre and bristle fibre from cocoanut husks. This unit started manufacturing from February, 1961. The following statement gives particulars of production and sales in this unit from 1960 to 1964:

Year	Production	Sales
	Rs. nP.	Rs. nP.
1960-61	580.35	64.96
1961-62	4,180.08	6,099.39
1962-63	12,153.61	20,825.84
1963-64	22,763.47	12,259.15 (upto 1/64)

Coir Production - cum-Training Centre, Tallarevu :- In G. O. Ms. No. 1174, dated 26-9-1957, the Government sanctioned the establishment of a Coir Production-cum-Training Centre at Tallarevu in Kakinada taluk. The sanction for the continuance of this unit is being extended from year to year.

This scheme is intended to impart training to the local artisans for the manufacture of coir yarn and coir products and in the better methods of utilisation of coir husks available in plenty in the local area. By 1963 about 48 candidates had been trained on a monthly stipend of Rs. 20 each. The following statement gives particulars of production and sales in this unit from 1958 to 1964:

Year	Production	Sales
	Rs. nP.	Rs. nP.
1958-59	902.04	...
1959-60	3,543.63	2,300.26
1960-61	6,922.66	6,736.65
1961-62	3,565.59	4,565.81
1962-63	869.30	1,290.65
1963-64	1,143.97	1,035.75 (upto 1/64)

Coir Production - cum - Training Centre, Komarigiripatnam :— In G. O. Ms. No. 761, Industries Department, dated 12-6-1958, the Government sanctioned the establishment of a Coir Production-cum-Training Centre in Komarigiripatnam in Amalapuram taluk. This sanction for the continuation of this unit is being extended from year to year. This scheme is intended for training the local artisans in the manufacture of coir yarn and other coir products by improved methods. By 1963, forty-six persons had received

training on a monthly stipend of Rs. 20 each. The following statement gives particulars of production and sales from 1958 to 1964 in this centre:

Year	Production	Sales
	Rs. nP.	Rs. nP.
1958-59	418-50	...
1959-60	4,552-02	...
1960-61	4,240-13	4,456-42
1961-62	2,801-42	5,897-24
1962-63	2,983-46	1,676-78
1963-64	2,289-52	1,290-29 (upto 1/64)

Village Industries

A. Community Development Programmes:— Under the Community Development Programmes during the Second Five Year Plan period, training centres were started for the village industries wherein the village artisans were imparted training in the manufacture of the various products by means of improved tools and techniques. After being trained the artisans were provided with the loans for the purchase of raw materials and tools on 50% subsidised cost. They were also encouraged to join industrial co-operatives as members to follow their respective trades. Common facility centres were started for the benefit of the village artisans wherein servicing facilities and technical help could be obtained. These facilities have been further extended during the third plan period.

In G. O. Ms. No. 1120, dated 24-11-1959, the Government sanctioned the establishment of the Regional Rural Artisans Training Centre at Samalkot. The continuance of this centre is being sanctioned from year to year since then. This scheme envisages providing training facilities in carpentry, blacksmithy and leather goods to the artisans with the help of more modern machinery. The centre is located in the Industrial Estate, Samalkot. The period of training is 11 months on a monthly stipend of Rs. 30 paid to each trainee by the respective Panchayat Samithis from where the trainees are deputed for training. By 1963 about 99 artisans have been trained in these three trades.

B. Agency Development schemes for the welfare of Scheduled Castes and Tribes:— The following schemes have been sanctioned for implementation in the Tribal Development Block area at Addathigala for the welfare of Scheduled Castes and Tribes:

1 Common facility centre in carpentry
2 Tape weaving demonstration unit
3 Tailoring unit
4 Bamboo and Rattan production unit
5 Demonstration-cum-training centre in book binding
6 Palm leaf products unit

Industrial Estates

The site selected is on the Kirlampudi road and it is one and a half miles from Samalkot Railway Station. An extent of 25.75 acres of land has been acquired and about 24 factory buildings with prospects of future expansion besides well staffed administrative building and a general engineering servicing workshop have been constructed. The following statement gives details regarding this industrial establishment:

Details of units	Area of Office portion in sq. ft.	Area of Factory portion in sq. ft.	Total area in sq. ft.	Estimated Cost of each unit	Economic rent for each unit	Subsidised rent for each unit at 8 nPs. per sq. ft. of plinth area
(1)	(2)	(3)	(4)	(5)	(6)	(7)
				Rs. nP.	Rs. nP.	Rs. nP.
4 Numbers E. Type	586	1,914	2,500	2,700-00	409-25	200-00
6 Numbers F. Type	352	1,182	1,534	20,100-00	243-45	120-00
14 Numbers G. Type	202	738	940	14,200-00	153-88	75-20 or 76-00

Assisted Private Industrial Estate, Rajahmundry:- A site measuring an extent of 34.31 acres in survey No. 333 and another site measuring 5.67 acres in survey No. 334 have been selected. The construction of watch and ward and administrative buildings have been completed. The pipe lines have also been laid and water supply arrangements have been completed. About eight

industrialists have taken possession of 10 plots. Out of this three have taken up the construction of the factory units.

Handicrafts

In G. O. Ms. No. 1373, Industries Department, dated 14-9-1960, the Government sanctioned the establishment of one Class II Procurement-cum-Sales Depot at Rajahmundry. The Emporium has been located in a two roomed industrial and commercial emporium at a monthly rent of Rs. 29. The emporium has started functioning from 5-12-1960. Its object is to procure handicrafts from the local artisans and Industrial Co-operative Societies and to promote sales of these handicrafts.

Industrial Co-operatives

The Industrial Co-operatives were originally under the Co-operative Department but in the year 1959 these were transferred to the administrative control of the Assistant Director of Industries and Commerce. The respective Panchayat Samithis through their Extension Officers (Industries) also have a supervisory function over these industrial co-operatives. Recently Government sanctioned an additional post of a Co-operative Sub-Registrar who also looks after the work of these co-operatives. 12 out of the 16 Blocks under the jurisdiction of the Assistant Director of Industries and Commerce, Rajahmundry, have already been brought under the fold of these industrial co-operatives during the two plan periods. Besides these there is a non-Block area in which are situated 12 industrial co-operatives. The following statement gives the name of the block and the number of Industrial Estates in each Block:

Name of the Block	No. of Industrial Societies in the Block
(1)	(2)
Kothapeta	7
Kotananduru	1
Sankharavam	1
Prathipadu	2
Tallarevu	5
Rangampeta	3
Korukonda	4
Rajanagaram	4
Sitanagaram	2
Pulletikurru	3
Mummidivaram	5
Nagaram	1
Non-Block	12
Total	50

There are still two Agency Blocks and two non-Agency Blocks which have yet to be covered with industrial co-operatives. The following statement gives the name of the industry, the number of societies under each, number of members and the paid-up share capital of each industry:

Name of the Industry	No. of Societies existing	Number of members	Paid up share capital (in Rupees)
(1)	(2)	(3)	(4)
Tanning and leather	9	515	8,775
Village Ghani Oil	6	180	10,000
Carpentry & Blacksmithy	3	99	9,423
Pottery and brick	4	80	1,870
Handpounding of paddy	9	279	9,766
Khadi and spinners	5	605	2,805
Palm fibre	4	436	7,597
Shell lime	3	106	5,400
Handicrafts	1	15	1,500
Small scale	2	675	22,240
Jute	1	51	501
Miscellaneous	3	581	1,030

Khadi and Village Industries

The Andhra Pradesh Khadi and Village Industries Board is the implementing authority for the Khadi and Village Industries programmes in Andhra Pradesh. In this district the following industries get official as well as technical help:

Ambar and Khadi Industry
Village Oil Industry
Handpounding of Paddy Industry
Village Leather Industry
Gur and Khandsari Industry
Palm Gur Industry
Non-edible Oils and Soap Industry
Village Pottery Industry
Handmade Paper Industry
Fibre Industry
Beekeeping Industry
Blacksmithy and Carpentry
Cottage Match
Lime Kiln Industry

The following statement gives particulars of the number of societies industry-wise for which the Khadi Board has sanctioned financial assistance:

Name of the Industry	No. of Societies	Khadi and Village Industries Board financial assistance		Financial assistance released
		Loan	Subsidy	
(1)	(2)	(3)	(4)	(5)
		Rs.	Rs.	Rs.
Leather Industry	4	35,480	25,750	2,350
Handpounding	7	41,000	2,810	27,410
Pottery and Brick	2	3,050	2,250	1,150
Fibre	2	12,500	6,500	14,500
Village Ghani	5	44,050	6,500	40,700
Jute	1	2,350	900	...

Conclusion

East Godavari district on account of its rich delta area has a fair sprinkling of Agro-based industries employing a considerable number of people. There are also other types of industries. Government is trying to help the local artisans

to make use of the abundant raw materials available by employing improved tools and techniques. The Government's efforts have met with a fair amount of success resulting in a slight improvement in the standard of living of most of these artisans. However, there is a lot more that can be done especially in regard to the coir industry. Apart from improving the techniques of production, Government should also help the local artisans in finding suitable markets for their finished products. Anyway a fair amount of progress has been made to the nucleus industry which has been existing in this district for a few decades, apart from laying the foundations of several new industrial enterprises.

CHAPTER VIII

CO-OPERATION

Co-operative Movement

The decennium ending 1950-51 witnessed a complete recovery from the general economic depression of the thirties. The Second World War, the consequent inflation and the scarcity of the essential articles, *viz.*, foodstuffs, textiles, iron and steel, etc., exerted a great deal of influence on the growth and development of the Co-operative Movement. The co-operatives readily responded to the call and played a vital role in the economy of the country. They were commissioned by the Government to undertake equitable distribution of essential articles. During this period emphasis was laid on the development of non-credit co-operative institutions like co-operative stores and Weavers' Co-operative Societies.

The rural credit societies also undertook multi-purpose activities like distribution of chemical fertilisers, iron and steel, agricultural implements, besides financing agriculture by the issue of short-term loans to the ryots for seasonal agricultural operations, purchase of agricultural implements, etc. The decennium recorded a rapid growth and development of the co-operative movement. There was a striking increase in the number of societies, membership, working capital, transactions, etc.

The following Table illustrates the progress made by the Co-operative Credit Societies in the district during the decennium 1941-51:

Year	No. of Societies	No. of Members	Amount of Loans disbursed during the year (Rs. in lakhs)	Loans for production purposes (Rs. in lakhs)
(1)	(2)	(3)	(4)	(5)
1941–42	518	53,200	19.8	17.1
1942–43	524	54,900	21.9	19.5
1943–44	445	55,200	23.5	20.6
1944–45	556	56,800	30.8	27.9
1945–46	573	56,800	32.4	29.0
1946–47	602	63,800	35.6	32.8
1947–48	612	68,400	44.8	42.3
1948–49	628	62,200	52.6	48.7
1949–50	759	88,200	76.03	70.01
1950–51	885	95,700	75.6	68.9

During the first plan period the Co-operative Movement aimed at the better organisation of the various types of co-operatives in order to enlarge their scope and utility. It envisaged the coverage of almost all the villages so as to bring most of the rural population under its fold. It attempted to provide the required credit facilities to the agriculturist through a net-work of credit societies at the village level secured by the District Co-operative Central Bank. In this district there are four such Central Banks. By the end of the second plan period, out of the total number of villages in the district 964 villages were covered by the village co-operatives bringing within their fold about 43.05% of the total population of the district. The total credit provided to the members of the Co-operative Societies through the societies at the end of this period was Rs. 6,15,04,182.

In accordance with the resolution of the National Development Council of November, 1958 a scheme for the revitalisation of the village credit societies was taken up with the objective of providing subsidies spread over a period of two to five years for the maintenance of a part time clerk each, in order that the societies may function effectively. Accordingly during the second plan period an amount of Rs. 42,056 was distributed to the societies selected under this scheme.

As per the suggestions of the All India Rural Credit Survey Committee managerial subsidy for the appointment of trained supervisors to work as Managers of societies was also provided by the Government. Societies selected under this scheme were provided assistance to an extent of Rs. 24,254 during this plan period. Besides the above subsidies, the Central Banks were also given subsidies for the appointment of senior supervisors and additional supervisors wherever found necessary. During the second plan period a sum of Rs. 14,228 was provided under this scheme.

Milk Supply Societies : These societies have been formed to supply unadulterated milk to consumers as also to get favourable price to the producers. By the end of 1951 there were 35 milk supply societies with a membership of 1,063 members on the roll. The following statement shows the progress made by these societies between 1941-51:

Year	No. of Societies	No. of Members	Value of milk sold (in Rs.)	Share capital (in Rs.)
(1)	(2)	(3)	(4)	(5)
1941-42	5	140	4,535	700
1942-43	5	146	5,436	738
1943-44	6	164	6,090	853
1944-45	8	216	9,860	1,095
1945-46	9	406	1,781	2,714
1946-47	10	438	14,860	4,008
1947-48	12	462	14,935	5,972
1948-49	16	535	10,130	10,134
1949-50	21	824	46,954	17,494
1950-51	35	1,063	1,30,963	19,426

There were also two milk supply unions in the district by the end of 1951. The following Table illustrates the progress of these unions:

Year	No. of Unions	No. of Members	Value of Milk purchased (in Rs.)	Value of Milk and Milk products sold (in Rs.)
(1)	(2)	(3)	(4)	(5)
1941-42	3	16	3,415	3,974
1942-43	3	16	2,970	3,102
1943-44	2	15	3,120	2,967
1944-45	2	23	19,670	14,680
1945-46	2	23	21,412	23,339
1946-47	2	25	58,905	63,701
1947-48	2	43	53,171	67,416
1948-49	2	86	34,883	42,324
1949-50	2	97	76,125	70,078
1950-51	2	134	94,702	1,06,323

By the end of the second plan period there were two milk supply unions and 37 milk supply societies. Loans to an extent of Rs. 22,802 were provided to the societies during the second plan period.

Weavers' Societies: The introduction of controls over the price and the distribution of yarn and the accute scarcity of cloth and the concession shown by the Government to the co-operatives contributed to the prosperity of the Weavers' Societies. Considerable progress has been achieved in the formation of Weavers' Societies and the enrolment of members in these societies. At the end of 1951 there were 93 such societies in the district with a total membership of 27,154 persons. The following Table illustrates the progress of these societies from 1941 to 1951:

Year	No. of Societies	No. of Members	Value of raw and finished goods purchased (Rs. in lakhs)	Working capital (Rs. in lakhs)
(1)	(2)	(3)	(4)	(5)
1941-42	11	776	0.41	0.9
1942-43	11	776	0.61	0.86
1943-44	19	1,465	0.96	0.82
1944-45	20	3,657	1.90	2 30
1945-46	30	3,798	2.10	2.60
1946-47	87	15,751	14.80	8 87
1947-48	89	14,653	95.76	20.64
1948-49	90	19,189	42.20	24.60
1949-50	93	24,893	56.20	17.90
1950-51	93	27,154	77.60	21.20

These societies dwindled to about 90 at the beginning of the first plan period. But, however, the shortfall was made good by the end of the first plan period. At the end of the second plan period there were 106 societies with the total number of looms in this fold being 25,532 and the number of weavers also standing at the same figure.

Housing Societies: Housing Societies were started to assist the middle class people to own small houses and thereby solve to a certain extent the pressing accommodation problem. By the end of 1951 there were 11 societies with 8,946 members on its roll. By the end of the second plan period this number increased to 24 House Building Societies in the district. Loans to an extent of Rs. 33,14,944 had been granted to the members.

Palm-Jaggery Societies: With the introduction of prohibition, Government was faced with the serious problem of providing alternative work to the ex-tappers who had been thrown out of employment. To overcome this problem, Palm-Jaggery Societies were started. These societies in the district manufacture jaggery from sweet toddy.

Co-operative Sugar Factories: One Co-operative Sugar Factory was started during the second plan period with headquarters at Tuni for serving the cane growers of that area.

Co-operative Education and Training: There is one Co-operative Training Institute at Rajahmundry known as the Ramadas Co-operative Training Institute. It has jurisdiction over all the seven coastal districts of Andhra Pradesh. This institute imparts training in co-operation to the candidates deputed by other co-operative institutions as well as to the outsiders. Each year about 200 candidates are trained in this institute. The staff comprises of the principal who is of the rank of a Deputy Registrar and eight lecturers who are of the rank of Sub-Registrars. The expenditure of this institute is borne by the State Government.

There is another institution known as Andhra Desa Co-operative Union located at Rajahmundry. Its function is to disseminate the principles of co-operation, etc., among the general public. Its staff consists of officials deputed by the Government as also non-officials. The members, Directors and also the Secretaries of the primary co-operative societies are provided reorientation in this institute. A monthly journal by name "Sahakaram" is being published by this institute. A printing press is also being maintained by this institution where all the forms and other necessary printed material required for the maintenance of accounts by the Co-operative Credit Societies are printed here. This press also takes up other job works.

CHAPTER IX

HEALTH

Public Health

In 1958, the two Health Ranges of Bhadrachalam and Nugur, each under a Health Inspector, were transferred to the Khammam district. At present the East Godavari district is constituted of the Health Ranges of Kakinada, Ramachandrapuram, Mandapeta, Amalapuram, Mummidivaram, Kothapeta, Razole, Rajahmundry, Peddapuram, Puthapuram, Prattipadu, Addathigala (Agency) and Rampachodavaram (Agency) each under the charge of a Health Inspector. Till 1959 about 45 Health Assistants functioned under the control of the range Health Inspectors. Since then these Health Assistants have been attached to the Primary Health Centres under the respective Panchayat Samithis. They attend to vaccination, vital statistical work, control of epidemics and other public health activities. They function under the supervision and guidance of the Health Inspectors. The following statement gives the list of Primary Health Centres and Sub-Centres in the district.

Primary Health Centre	*Sub-Centres*
SAMALKOT	Atchampeta
	Panduru
	G. Medapadu
KANDRAKOTA	Geddanapalle
	Kirlampudi
	Pulimeru
RAJANAGARAM	Vemagiri
	Thokada
	Jegurupadu
KOTIKESAVARAM	Mulakalanka
	Kunavaram
	Vangalapudi

Besides the above, maternity aid is being given in all the Government Hospitals, Dispensaries and Local Fund Dispensaries.

Food and nutrition

The Socio-Economic conditions of the people living in the delta area are generally good while the conditions of those living in uplands or in the Agency area are far from satisfactory. Rice is the stable diet of those who live in the delta area while rice together with ragi and cholam provide food to those in the uplands. On the coastal belt, especially in the delta, fish and prawns are in plenty and provide subsidiary diet to the non-vegetarians. Fish are also lured in the numerous tanks both Government and private. The District Health Officer, Kakinada, is of the view that the surveys on diet in this district reveal that though people consume sufficient number of calories, yet, their diet lacks in vitamins especially B1, B2 and C. In the Agency areas the tribals eat mostly root vegetables and meat, the latter being obtained by hunting animals.

Due to the lack of the proper sanitary and hygeinic conditions, the people are generally said to harbour intestinal parasites which sap most of the nutrition from their diet. Expanded nutrition programme was started in this district on 3-4-1961 in the Kothapeta Panchayat Samithi in ten selected villages. Under this programme fruits, vegetables, eggs and fish are supplied to children, pregnant women and lactating mothers. One Health Visitor attached to the Primary Health Centre was given training for serving in these selected villages.

Skimmed milk feeding programme was organised through Primary Health Centres and Maternity and Child Welfare Centres, under the Maternity and Child Health Programmes. Children were also provided with milk which render the School Feeding Programmes in all the Panchayat Samithis with the assistance of the UNICEF authorities. Diet and drug supplements were distributed to deserving cases through the Primary Health Centres, Sub-Centres, and Maternity and Child Health Centres with UNICEF assistance.

Communicable Diseases Control:

Yaws: During 1955-56 this disease became widespread amongst the hill tribes in the Agency areas. With the help of the UNICEF an Anti-Yaws Campaign was commenced in which necessary preventive as well as control measures were adopted. The disease was brought under control. It is still not quite uncommon in the Agency areas of the district.

Leprosy: The incidence of leprosy is quiet high in the taluks of Ramachandrapuram and Peddapuram. At Ramachandrapuram a Leprosy Sub-Centre under the National Leprosy Control and Treatment Programme is functioning with one medical officer. Three Leprosy Homes are being managed by voluntary organisations at Ramachandrapuram, Rajahmundry and Kathipudi. There is one Ayurvedic Treatment Clinic at Gopalapuram in Kothapeta taluk.

Filaria: This disease is highly endemic in Ramachandrapuram taluk. There is a Sub-Unit working with its headquarters at Ramachandra-

puram. All the necessary preventive control measures are being adopted. The incidence of filaria is found to be on the decrease year after year. With 1/3rd grant from the State Government the municipalities of Amalapuram, Mandapeta, Ramachandrapuram, and Tuni and the Panchayats of Pandalapaka, Razole, Pedapudi, Sivakodu and Kothapeta have adopted anti-filarial measures.

Guineaworm: The prevalence of this disease has been found in three villages of Rajahmundry taluk. Chlorination of water supplies in the infected villages was carried out. The Panchayat Samithi under whose jurisdiction lie these three villages, was advised to convert all the step-wells into draw-wells as a radical measure in the eradication of this disease.

Malaria: The two sub-taluks of Rampachodavaram and Yellavaram comprising the Agency area are endemic with malaria. The whole district has been covered by two National Malarial Eradication Programme units under the control of separate Health Officers. One round of D.D.T. spraying in the plains area and two rounds in the Agency area were carried out. Surveillance operations in the plains are in full swing for detecting positive malaria cases and treating them with 4 and 8 Amino Quinoline drugs for eradicating the parasite.

Cholera: The following statement gives particulars of the attacks and deaths in the plains and in the Agency areas together with the number of persons inoculated each year from 1951 to 1961:

Year	Plains Area			Agency Area		
	Attacks	Deaths	Inoculations done	Attacks	Deaths	Inoculations done
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1951	784	453	1,08,821	291	157	16,365
1952	67	35	6,961	N.A.	N.A.	5,540
1953	9,244	4,870	8,47,771	3,021	1,729	1,02,413
1954	160	91	50,161	2	2	7,934

1961	N.A.	N.A.	2,17,747	N.A.	N.A.	N.A.

Small-pox: The following statement gives particulars of the incidence of small-pox from 1951 to 1961 in the district:

Year	Plains Area				Agency Area			
	Attacks	Deaths	P. V.	R. V.	Attacks	Deaths	P. V.	R. V.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1951	2,071	422	54,766	+ 3,03,447	272	60	7,250	+ 23,444
1952	674	138	52,118	+ 1,96,585	74	14	7,021	+ 17,121
1953	357	84	55,325	+ 1,74,000	12	1	7,200	+ 10,716
1954	121	22	66,337	+ 1,60,061	7	2	7,378	+ 12,088
1955	551	120	60,013	+ 2,71,857	3	0	7,362	+ 13,083
1956	1,059	253	55,282	+ 2,84,865	215	48	9,035	+ 20,695
1957	220	51	68,747	+ 2,35,560	166	37	8,064	+ 26,037
1958	449	97	58,527	+ 2,03,557	41	2	7,623	+ 14,192
1959	915	231	61,808	+ 2,32,489	106	22	3,415	+ 8,541
1960	178	45	49,828	+ 1,79,979	46	10	3,401	+ 8,128
1961	44	8	48,931	+ 1,49,560	N.A.	N.A.	3,967	+ 6,533

Tuberculosis: There is one sanatorium at Rajahmundry. Mass B.C.G. vaccination campaign was organised in the entire district by the Public Health Department under the control of Special Health Education Officer and Health Officer. Under this scheme two rounds of B.C.G. have already been given.

Polio: There was incidence of this dreaded disease in the district during the year 1961. Fortunately due to timely preventive measures it was controlled.

Family Planning: A Family Planning Clinic is attached to each of the Primary Health Cen-

tres of Karapa, Samalkot, Duggudurru, Kandrakota, Virava, Rachapalle, Kotananduru, Ravikampadu, Rajanagaram, Kotikeswaram, Kunduru, Anaparthi, Mandapeta, Pamarru, Ubalanka, Vanapalle. One Health Visitor and one Ayah attend to the family planning propaganda work in the rural areas. They distribute contraceptives such as condoms, diaphragms, contab tablets, jelling, etc., to persons who are in need of them. Vasectomy and sterilizing operations are being carried on at the various Primary Health Centres by the respective medical officers.

Medical services:— The following statement gives the list of hospitals and dispensaries in this district together with their respective bed strengths:

The District Medical Officer resides at Rajahmundry and he is in charge of the administration of the medical services throughout the district. Most of the important places in the district have reasonably well-equipped hospitals and are adequately staffed. At Kakinada a big General Hospital has been constructed during the last decade and has a provision of 600 beds and has facilities for every type of specialised treatment in charge of specialists. There is also a Medical College attached to this hospital.

CHAPTER X

PANCHAYATI RAJ

Historical Retrospect

Local Boards were non-existent till the middle of the 19th century when Road Funds were created by an executive order for the upkeep of roads, other than trunk roads and important district roads. The Collector and the District Engineer were placed in charge of these works. This arrangement was put on a statutory basis by the District Road Cess Act, 1866, which authorized the levy of a cess of half an anna in the rupee on the rent value of occupied land for the construction and maintenance of local roads.

The origin of the District Boards may be traced to the Local Fund Act of 1871, which was the outcome of the desire on the part of the Government to provide sound elementary education to the masses. The Act made specific provisions for declaring a district or part of a district as a circle and for constituting a Local Fund Board for every such circle, consisting of three or more non-official members, nominated by the Government and an equal number of official members appointed by the Government. The term of office of members was for three years. The non-official members were chosen from among owners or occupiers of lands or persons carrying on business and residing in the circle. The Collector of the district was the Ex-Officio President of the Board situated within his jurisdiction. Some of the important functions of the Board were as follows:

(1) the maintenance of public roads or streets;

(2) management of hospitals, schools, choultries and markets; and

(3) the employment and training of health staff, the inspection of sanitation in towns and villages and the upkeep of other local works of public utility calculated to promote health and comfort of the people.

The Act authorized the levy and collection of land cess (at the rate not exceeding one anna in the rupee on the annual rental value of all occupied land), house tax (in villages or groups of villages or townships in which a school supported by Government grants-in-aid existed) and tolls on carriages, carts or animals making use of the roads within the circle.

Local Self-Government as a conscious process of administrative devolution and political education dates back from the final reforms of Lord Mayo's Government. By a resolution No. 3334, dated 14th December, 1871, the Government of India made over to the provincial Governments certain departments of which, education, medical services and roads, deserve particular mention, as they still constitute the principal activities of Local Bodies. The beginnings of a system of Local finances were to be found in the new scheme of provincial finances and many of the present day problems of Local finance vis-a-vis provincial finance are similar to those which provinces had to face in their dealings with the Government of India. Lord Ripon's Government desired that provincial Governments should apply to their financial relations with Local Bodies, the principle of financial decentralization which had worked so satisfactorily between the Government of India and the Provinces. The more important services that were entrusted to the rural bodies were communications, education and sanitation.

The Madras Local Boards Act, 1884, conferred additional responsibilities on the Local Boards which for the first time came to be known as the 'District Boards' instead of the 'Local Fund Boards'. Under this Act, three classes of Local Boards, came into existence, viz., District Boards, Taluk Boards and Unions. The Unions were of two classes — "Major" and "Minor". The administration of local affairs was vested in the District Boards constituted for each of the revenue districts consisting of and not less than 24 members who might all be appointed by the Government or might be partly so appointed and partly elected by the members of the newly created Taluk Boards from among their members or by the Union Boards and by the tax-payers of the rural parts of the district. The Collector continued to be the Ex-Officio President. The Act also provided for the election of the President of the District Boards, from among the members of the District Boards, if the Government so directed. The members were to hold office for three years. All the Revenue Divisional Officers were made Ex-Officio members. The Local Boards were empowered to levy with the approval of the Government any of the taxes authorized under the Act.

A Taluk Board consisting of a President and not less than 12 members was constituted for each taluk or group of taluks. The term of office of the members was for three years. The Revenue Divisional Officer was made an Ex-Officio member and President of the Board. The Taluk Board funds consisted of one-half of the proceeds of the tax levied by the District Board in the area and transferred to the Taluk Boards by the District Board and other fees such as licence for markets, etc., collected within the area of the Taluk Board. The revenues of the District Boards and the Taluk Boards were derived from land cess, from fees for the use of cart-stands, markets, slaughter-houses, etc., and from tolls in the case of the maintenance of roads, bridges and other means of communications. The chief functions of these institutions as has been stated earlier were the construction and maintenance of hospitals and dispensaries, the diffusion of education, the enforcement of measures relating to sanitation and public health and the establishment and maintenance of relief works in times of famine and scarcity conditions.

An Union Board was constituted for a single village or for a group of villages. They consisted of not less than five persons, the headmen of the villages, constituting the Union, being Ex-Officio members. The Board levied house-tax varying from 4 annas to 4 rupees according to the classification of the house. The duties and responsibilities of this Board were the lighting and cleaning of public roads, the maintenance of drains, wells and other public places, the establishment and maintenance of dispensaries and schools, etc.

In 1907 the entire subject of local self-Government was taken up for consideration by the Royal Commission on Decentralization. The Commission brought to light that the resources of the Local Bodies were not sufficient for the proper discharge of the duties assigned to them. In order, therefore, to make local self-Government really effective and responsible, the Montague-Chelmsford Report suggested that there should be as far as possible complete popular control in the affairs of the Local Bodies and the largest possible independence from outside control. In regard to rural boards the report stated that they should have full liberty to improve and alter taxation within the limits laid down by law. It further stated that whenever a board paid for a service, it should also control that service. If it was considered that control should be largely in the hands of the Government, then in such a case the service should be provincialised.

In the Government of India Resolution of the 16th May, 1918, the Government reviewed the question of local self-Government and expressed the view that in order to give effect to the new policy, Local Bodies should be as representative as possible of the people whose affairs they were called upon to administer, the authority in the matter entrusted to them should be real and not nominal and that they should not be subject to unnecessary control but should learn, if necessary, by making mistakes and profitting by them.

With the coming into force of the Government of India Act, 1919, local self-Government became a transferred subject and the implementation of the policy and the principles formulated in the resolution of May, 1918, thereupon devolved on the elected members.

Several amending Acts were passed by the State Legislature from time to time with a view to rectify defects which were brought to light in the working of the Madras Local Boards Act, 1884. In 1920, the State Government thought that it was necessary to have a comprehensive legislation to give effect to the new policy of the Government and to consolidate and amend the law relating to the District Boards and this resulted in the passing of the Madras Local Boards Act (Act XIV of 1920). The Act gave an independent status to each class of Local Boards and increased not only their strength but also the proportion of elected members, their resources and their powers. The taxation powers of all the three categories of Local Boards were enlarged. The Boards were authorized to levy the pilgrim tax and also the profession tax on companies and firms. They were given a free hand in framing their budgets. Provision was also made for the appointment of a District Board Engineer and a District Health Officer. The Local Boards thus became more or less autonomous and the Collector and the Government were empowered to interfere only in cases of emergency and maladministration. In the same year, the Madras Village Panchayat Act was also passed with the object of developing the system of self-Government in rural areas. This Panchayat Act was, however, repealed in 1930 with the passing of the Madras Act XI of 1930, which amended the Madras Local Boards Act, 1920, and was also comprehensive enough to include even the Panchayats constituted before the repeal of the Madras Village Panchayats Act, 1920. The Madras Local Boards Act, 1920, has been amended since then several times; the Taluk Boards having been abolished in 1934 and the Panchayats having been taken away from the ambit of the Act by the Madras Village Panchayats Act, 1950.

The following paragraphs illustrate in brief the trend in the amendments to the 1920 Act.

Provision was made for taking of oath by members of Local Boards. All roads and public markets were thrown open to all persons of whatever caste or creed. The main changes introduced by the amendment Act of 1930 were:

(i) inclusion of Village Panchayats within the scope of the Act, conversion of Union Boards into Panchayats and the repeal of the Madras Village Panchayats Act, 1920;

(ii) abolition of the system of nomination to Local Boards;

(iii) direct elections to District Boards;

(iv) general triennial elections to Local Boards;

(v) provision for a vote of no-confidence in Presidents and Vice-Presidents and for the removal of Presidents and Vice-Presidents by Government;

(vi) election of Presidents of District Boards;

(vii) empowering the Government to provincialize the services of officers and servants of Local Boards;

(viii) alteration in the provisions relating to taxes and tolls with special emphasis on the levy of any tax suitable to the village with the sanction of the Panchayat; and

(ix) more effective supervision over the adjudication of disputes between local authorities inter-se, including, in particular, the vesting of power in the local Government to constitute joint Committees of local authorities for the purpose.

The levy of tolls and tax on motor vehicles by Local Boards was abolished in 1931. Specific provision was made for the constitution of District Boards, for altering their jurisdiction and for their abolition. The majority required for the passing of motion of no-confidence in Presidents and Vice-Presidents was reduced from two-thirds to three-fifths. Provision was made for the reservation of seats for Muslims and Indian Christians besides members of the Scheduled Castes. The Government took power to appoint District Engineers, Health Officers and Panchayat Officers. The amendment Act of 1934 abolished the Taluk Boards, the Village Development Fund, and made a provision for the splitting up of District Boards. The jurisdiction of Courts to grant injunctions in election proceedings of Local Boards was taken away by the amending Act of 1936. The amalgamation of bifurcated District Boards was made possible by the amending Act of 1937. The Act of 1938 provided for the inclusion of the names of persons found in the electoral rolls of the Madras Legislative Assembly constituencies in the rolls prepared for Local Boards. Failure to pay arrears of any kind due to the Local Boards was made a disqualification for candidates standing for elections or for members continuing in office.

Certain safeguards were provided by the amending Act of 1942 in regard to the removal or the dismissal of Government servants employed by Local Boards. Act X of 1945 increased the rate of land cess leviable by Local Boards from 1½ annas to 2 annas in the rupee. In the same year, provision was made in the Act for the levy of duty on transfers of property in the form of surcharge on stamp duty in respect of immovable property situated in the area under the jurisdiction of Local Boards. The formation of the Highways Department in 1946 resulted in certain amendments to the Act in that year. In 1947 provision was made for the inclusion in the electoral rolls of Local Boards of persons who were qualified to be included but were omitted to be included in the Assembly electoral rolls. The levy of duty on transfers of property in respect of leases in perpetuity of immovable property and exchange of immovable property was made possible by the Madras Act VII of 1950. The Madras Village Panchayats Act, 1950 removed Village Panchayats from the ambit of the Madras Local Boards Act, 1920, after which the provisions of the latter Act which formerly related to Panchayats were restricted to non-Panchayat areas. The name of the Madras Local Boards Act was altered into the Madras District Boards Act, 1920. The provision for the reservation of seats for Muslims, Indian Christians and Europeans in the Act was omitted by the amending Act of 1951. The Act also limited the total number of reserved seats for the members of the Scheduled Castes, Anglo-Indians and women to one-fourth of the strength fixed for the District Board. By another Act of 1951, the adoption of Madras Legislative Assembly electoral rolls and the alteration thereto for purposes of elections to District Boards was provided for. Certain provisions of the Representation of the People Act, 1950, regarding the conduct of elections were embodied in the Madras District Boards Act by an Act of 1954.

The First Five Year Plan for the country was introduced in 1951. Planning led to an enormous increase in the activities of the Government. Large sums of money had to be

spent on various schemes in short periods. It was, therefore, found essential that those who were to be benefited by these schemes should also have a say in their formulation. They must learn to express their felt needs and get them translated into programmes that can be implemented. Thus, the idea of the "Panchayati Raj" slowly began to take shape.

Panchayati Raj in Andhra Pradesh can, however, be said to have had its roots nearly one and a half decades ago. It is based on the Gandhian principle of rural rejuvination to usher in a balanced development of the countryside. This idea was given effect to by late Sri T. Prakasam, the then Chief Minister of the Composite Madras State by his promulgation of the "Firka Development Scheme" in 1946. This was subsequently converted to "The Rural Welfare Scheme" in 1950. Besides the rural reconstruction work this scheme also covered Harijan Uplift Programmes as well as the Khadi Schemes. The three-pronged drive that this scheme gave to the economic and social reconstruction of rural life was in the direction of self-help, co-operative approach and State aid. As in all nascent institutions, the issues at the beginning were not so clearly defined and so well crystalised as in the case of the Panchayati Raj institutions, but however, they formed the forerunners of a movement which has now got itself fully entrenched in the institution of the Panchayati Raj.

Community Development Programmes:

The pattern of Community Development inaugurated on the 2nd of October, 1952 has been gradually modified to suit the needs of our rural communities. The central object of the Community Development Programme was to secure the fullest development of material and human resources of the local areas based on the fact that all aspects of rural life are inter-related and that no lasting results can be achieved if individual aspects of it are to be dealt in isolation. The approach was to step up the co-operative principle in its infinitely ranging forms for solving all problems of rural life. The experiment, therefore, in Community Development was started with the introduction of the Community projects in the wake of the Rural Development Schemes. These projects in a very short period achieved great popularity and people everywhere in other areas started to clamour for similar benefits in their respective villages. On account of these public demands and also considering the limited resources at the disposal of the Government the pattern of Community Projects had to be gradually changed over, to cover similar and lesser expensive Projects. These were known as the National Extension Service Blocks, each covering an area of about 150-170 square miles and involving an outlay of about Rs. 4.50 lakhs. The normal operational period of each of the N.E.S. Blocks was to be for three years. Any time within that period depending on the performance in the realm of people's participation, physical attainment and expenditure, the N.E.S. Block got converted into a Community Development Block with a bigger outlay of Rs. 15 lakhs which also included the expenditure incurred during its N.E.S. stage. In June, 1958 the National Development Council decided that the Block should be treated as an unit for the purpose of planning and development and it should be made the agency through which the resources of the Government should flow to the people.

The study team for Community Development and National Extension Service headed by Sri Balwant Rai G. Mehta recommended certain changes in the pattern of Community Development. The Ministry of Community Development accepted these proposals and accordingly removed the distinction between the different types of Blocks and introduced the two-stage system. Stage I was to be the intensive development phase with a provision of Rs. 12 lakhs and Stage II was to be the post intensive phase with a provision of Rs. 5 lakhs. Both stages were to be of a duration of 5 years each. Great emphasis was laid on agriculture, and therefore each Block had to pass through a Pre-extension stage of one year devoted exclusively to agricultural development. On completion of this Pre-Extension Stage of one year the Block automatically entered the Stage I period.

Decentralisation:

Decentralisation of authority and the participation of people in administration have always been considered by great thinkers from the time of Socrates, as the chief embodiments of any democracy. In order that these two essential requisites find place in the fabric of the Indian democracy, on the recommendations of Sri Balwant Rai G. Mehta Committee Team "Panchayat Samithis" were constituted for each Community Development Block wherein the people are provided opportunities for participating in the process of administration. All developmental works beneficial to the community and coming within the ambit of Community Development were entrusted to the people's own elected representatives.

The idea of democratic decentralisation was thus conceived and the nucleus for this revolutionary movement was the age old village pan-

chayat. The three tier system in which the Panchayati Raj institutions are linked one with the other consisting of the Gram Panchayat with its directly elected Sarpanch and members, the Panchayat Samithi at the Block level with the Sarpanchs of Gram Panchayats as its members, and the Zilla Parishad at the district level consisting of the Presidents of all the Panchayat Samithis within the district and the legislators of the State and the Centre, was evolved as the institutions in which the people's representatives will have their say in the formulation and execution of policies and programmes beneficial to the Community. The constitution of Gram Panchayats was, therefore, speeded up in order that the entire rural area came under one or the other of the Gram Panchayats.

The Andhra Pradesh Panchayat Samithis and Zilla Parishads Act was enacted in 1959 and except the Agency areas in the Andhra region and the areas within the jurisdiction of Municipalities in Andhra and City Municipalities and the Corporation in Telangana region, the rest of the area constituting Andhra Pradesh was brought under the ambit of this Act.

Panchayat Samithis:

The Presidents of all the Gram Panchayats in a Block constitute the members of the Panchayat Samithi. Two women members, one representative from the Scheduled Castes, one representative from the Scheduled Tribes where the population of the Tribes in the Block area is not less than 5% of the local population of the Block and if not, one more representative from the Scheduled Castes, 2 persons interested in rural development. Apart from these members, the members of the Legislative Assembly are also members of one Panchayat Samithi each situated within the constituencies which they represent. They may also take part in the proceedings of the remaining Panchayat Samithis in their constituencies without the right to vote at such meetings. The members of the Legislative Council become members of one of the Panchayat Samithis in such district in the Zilla Parishad of which they are members. Similarly, the Revenue Divisional Officer, District Collector and such other officers as the Government may, by order specify can take part in the proceedings of any meeting of a Panchayat Samithi or any standing committee thereof functioning within the local limits of their respective jurisdictions without any right of voting.

The Panchayat Samithi has been placed in complete charge of the implementation of the Community Development Programmes and in addition the Government have also entrusted to it the extension activities of the various development departments of the Government such as Agriculture, Animal Husbandry, Fisheries, Industries, Education, Co-operation, Social Welfare, Women's Welfare, etc.

Every Panchayat Samithi has seven standing committees each of which has been placed in charge of a few specified subjects. The Panchayat Samithi with the approval of the State Government is empowered to constitute more standing committees if it so desires for attending to any specific items of work. All the standing committees have independent powers of sanction within specified financial limits and may also execute works and schemes within those limits.

The Block Development Officer is the chief executive officer of the Panchayat Samithi and he is assisted by the extension staff. The President of the Panchayat Samithi exercises supervision and control over the work of the Block Development Officer and his staff in order that the resolutions of the Panchayat Samithi and its standing committees get due attention from them in their implementation.

Zilla Parishad:

At the district level there is the Zilla Parishad comprising the Presidents of all the Panchayat Samithis in the district, the District Collector, the Members of the Legislative Assembly of the State elected from the district, such members of the Legislative Council of the State as the Government may by order specify, the Members of the House of the People elected from the constituency which forms part of the district, and such Members of the Council of States as the Government may by order specify. Two women, one representative of the Scheduled Castes, and one representative of the Scheduled Tribes according to the population and if the population of the Scheduled Tribes is less than 5% another representative of the Scheduled Castes, two persons interested in rural development have to be elected by the above categories of members.

The Chairman and the Vice-Chairman are to be elected by the members from among the non-officials who are not Legislators. The President of any Panchayat Samithi, if elected as the Chairman of the Zilla Parishad, will automatically cease to be the President of that Panchayat Samithi but his right of membership on the Panchayat Samithi will not be affected. A Secretary, appointed by the Government functions as the executive head of this organisation.

He is entitled to attend the meetings of the Zilla Parishad or any of its standing committee meetings, and can take part in discussions, but is not entitled to vote. Like the Panchayat Samithis the Zilla Parishad also functions through its seven standing committees. In addition to these seven standing committees the Zilla Parishad may with the approval of the Government also constitute any other standing committee for specified purposes. The Chairman of the Zilla Parishad and the District Collector are ex-officio members of all the standing committees while the remaining members are to be elected by the members of the Zilla Parishad from among themselves. The District Collector is the Chairman of all the Standing Committees. The District Officers of various development departments, regional and State officers in charge of development activities who are specified by the Government by an order have the right to speak or to take part in the proceedings of any meeting of the Zilla Parishad or any Standing Committees thereof but they, however, have no right to vote.

The Zilla Parishad consolidates plans prepared in respect of all the Blocks in the district and also co-ordinates the activities of the various Panchayat Samithis. It also examines and approves the budgets of the Panchayat Samithis in the district.

The chief sources of finance for the Zilla Parishad are the Central and the State Government funds allotted to it; grants from All India Bodies and Institutions for the development of Cottage, Village and Small Scale Industries; such share of the land cess, taxes or fees as may be prescribed; proceeds from taxes or fees which the Zilla Parishad may under any law levy; income from Endowments for trusts administered by the Zilla Parishad; such income of the District Board as the Government may by order allot to it; donations and contributions from Panchayat Samithis or from the public in any form; and such contributions as the Zilla Parishad may levy from the Panchayat Samithis with the previous approval of the State Government.

Growth of Community Development Programme in the district

The central core of philosophy of Community Development Programme is to create a strong desire on the part of the people for a better way of living and to help to achieve their new goals largely on the principle of self-help and self-reliance. The movement under Community Development was started in October, 1952 and by the end of the First Five Year Plan there were 2 Blocks in this district comprising one Community Development Block and one National Extension Service Block besides the Community Development Project, covering an area of 990.46 sq. miles spread over 365 villages and a population of 984,418. The movement gained momentum during the Second Five Year Plan period and by the end of the Second Five Year Plan there were 21 Stage-I and Stage-II and Pre-Extension Blocks in the district covering a population of 15.12 lakhs spread over in 727 villages. During the Third Five Year Plan the movement gained further impetus in the district. The following statement gives details of the number and names of the Blocks in the district at present and also their dates of inception, number of villages covered, etc.

Name of Block	Date of inception	Present stage	No. of villages in the Block	Area (in square miles)
(1)	(2)		(3)	(4)
STAGE I & II Blocks				
Kothapeta	1-4-56	I	30	64.80
Pulletikurru	1-4-56	I	25	51.34
Tuni	2-10-56	I	26	31.56
Mummidivaram	2-10-56	I	26	79.94
Bendapudi	2-10-57	I	23	87.95
Tallarevu	1-4-58	I	31	69.59
Sankhavaram	1-4-59	I	81	104.46
Rangampet	2-10-59	I	40	128.39
Korukonda	4-4-54	II	32	112.74
Seethanagaram	1-4-59	II	24	76.52
Kapileswarapuram	1-10-56	II	42	91.86
Rayavaram	1-10-56	II	32	81.52
Ramachandrapuram	1-10-56	II	39	68.26
Pithapuram	1-10-56	II	30	48.47
Gollaprole	1-10-56	II	22	67.98
Karapa	1-10-56	II	42	86.55
Samalkot	1-10-56	II	29	87.82
Peddapuram	1-10-56	II	41	80.77
Rajanagaram	4-4-54	II	28	98.25
PRE-EXTENSION BLOCKS				
Nagaram	1-4-60	I	26	58.45
Prathipadu	2-10-60	I	57	110.01
Bheemanapalle	2-10-61	I	29	99.99
Rampachodavaram	1-4-61	I	150	578.00
Addathigala	1-4-61	I	382	560.00
Razole	1-4-62	I	26	75.84
Allavaram	2-10-62	I	24	61.11
Amalapuram	2-10-62	I	26	49.93
Rajavommangi	1-4-62	I	91	292.00
Devipatnam	2-10-62	I	87	132.00

During the recent re-delimitation of the Blocks the number was reduced to 20 in this district.

In order to make the people feel more responsible in their developmental programmes and constructive activities the Government introduced the three-tier system of Panchayati Raj, the Gram Panchayat at the village level, the Panchayat Samithis at the Block level and the Zilla Parishad at the district level. The Panchayat Samithis were constituted for the first time in this district on 1-11-1959 and the Zilla

Parishad was constituted on 1-12-1959 on a statutory basis. After the introduction of the democratic decentralized administration and the establishment of the democratic institutions at the District, Block and Village levels the responsibility and initiative in economic and social development in rural areas rested with these popular institutions — the Zilla Parishad, the Panchayat Samithi and the Gram Panchayat. As the Panchayats have to play an important role in the various developmental programmes the need not only to constitute the Panchayats for all the villages but also to strengthen their administration was keenly felt. For this purpose four Divisional Panchayat Officers with suitable ancillary staff were appointed and the two Agency taluks of Rampachodavaram and Yellavaram were also brought under panchayat fold during the first year of the Third Five Year Plan.

Achievements made under Five Year Plan and Second Five Year Plan

During the Second Five Year Plan period an amount of Rs. 771.925 lakhs was spent on the various development programmes in this district. The following statement shows the distribution of expenditure under the important major heads of development:

Major Head of Development	Expenditure during Second Plan (In lakhs of rupees)	Percentage of total expenditure
(1)	(2)	(3)
Agricultural Programmes	276.549	35.83
Co-operation	256.538	33.23
Irrigation and Power	13.492	1.75
Industries	20.527	2.65
Transport	39.229	5.09
Social Services	143.578	18.60
Micellaneous	22.012	2.85
Total	771.925	100.00

It may be seen from the above statement that the expenditure under Agricultural Programmes and Co-operation was very large. Numerous intensive and extensive measures such as opening of seed stores, seed farms, etc., were taken up during the Second Plan period to increase agricultural production. Out of 18.60% of the total expenditure under Social Services major portion was spent towards education, housing and welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes.

In the Third Five Year Plan the following outlay is provided under important major heads of developments:

Major Head of Development	Third Plan outlay (in lakhs of rupees)	Percentage to total outlay
(1)	(2)	(3)
Agricultural Programmes	373.77	20.62
Co-operation & Warehousing	22.28	1.23
Industries	471.31	26.01
Roads & Communications	219.10	12.09
Irrigation (Major & Medium)	88.30	4.87
Social Services	543.20	29.97
Miscellaneous	94.41	5.21
Total	1,812.37	100.00

Agricultural production is proposed to be increased to the optimum during the Third Five Year Plan period in order that self-sufficiency in food production in this district is attained. It is hoped that the targets will be achieved by the end of the Plan period as programmed.

CHAPTER XI

GAZETTEER

KAKINADA TALUK

Kakinada taluk comprising an area of 384 square miles consists of 105 villages grouped into the seven Revenue Firkas of Kakinada, Timmapuram, Samalkot, Karapa, Tallarevu, Kajuluru and Sampara. This taluk is bounded on the east by the Bay of Bengal, on the south by the Ramachandrapuram taluk, on the west by the Ramachandrapuram and Peddapuram taluks and on the north by the Pithapuram and Peddapuram taluks.

Except for the northern portion of this taluk the rest of it is irrigated by the Godavari river system.

Kakinada taluk has a population of 403,099 persons and a density of 1,050 persons per square mile according to the 1961 Census. There are altogether 65,357 occupied residential houses in the taluk. There are two municipal towns, viz., Kakinada and Samalkot.

The Southern Railway between Madras and Calcutta crosses the north of the taluk and a branch of this railway about 10 miles long runs through the heart of the taluk to its headquarters, the busy sea port of Kakinada.

Kakinada is both the taluk as well as the district headquarters. This and other places of interest in the taluk are described in brief below:

Kakinada—has a municipality with a population of 122,865 persons and a density of 12,974 persons per square mile according to the 1961 Census. There are altogether 15,849 occupied residential houses in this town. It occupies a total area of 9.47 square miles. It is one of the busiest sea ports in Andhra Pradesh. It is situated on the western side of the Koringa bay and it is connected by a branch with the north-east line of the Southern Railway. It is the headquarters of the Collector, the Superintendent of Police and has the usual complement of the other district officers.

Kakinada since a few years has risen in importance as an educational centre. At present there is an Engineering College, a Medical College, an Industrial Training Institute, Arts College for boys, Arts College for girls, Polytechnic College for boys, Polytechnic College for girls and a Deaf and Dumb School. There is also a very big General Hospital with almost all the modern facilities for surgery and research. There is a substantial dairy farm.

Branches of the several important European firms engaged in coastal and foreign trade are located here.

Jagannathapuram which lies south of the harbour is the only part of the town which possess any historical interest. It was the site of a Dutch factory with Bheemunipatnam in Visakhapatnam district and Palacole in West Godavari district which were represented to be under Firmans granted by the Nizam and confirmed by the Mughal Emperor of Delhi, bearing various dates from A.D. 1628 to A.D. 1713 and by a cowle granted by Haji Hassan in A.D. 1734 and A.D. 1752 by Jafar Aly Khan. The two last mentioned persons were the deputies of the Nizam in the circars. The Dutch are stated to have first occupied these factories about the year A.D. 1628.

In 1781 war broke out between the English and the Dutch and the settlements of the latter on the Coromandal coast were seized. The factory house and the public buildings in Jagannathapuram were said to have been demolished. However, in 1784 when peace was declared these buildings were handed over to the Dutch in the following year. During the wars of the French Revolution (1789-95) the settlements were again captured by the English but were once more handed over to the Dutch in 1818 by a convention of 1814. They were finally made over to the English Company in 1825 with the other Dutch possessions in India under the operation of a treaty of 1824 between Holland and England.

The first impetus to the town of Kakinada was given by the silting up of the Koringa bay and the consequent decline of Koringa as a port and dockyard. Kakinada gradually took its place. A second impetus was given during the American Civil War (1861) when it suddenly rose into great importance as a place of shipment for the cotton pressed at Guntur.

The port of Kakinada is situated in the south-west corner of Koringa bay, a large but shallow sheet of water 5 miles by 5 miles in extent, lying

in the northern-most angle of the delta. The bay is somewhat shaped like a horse-shoe and is open only from the north-east. The northern-most mouth of the Godavari flows into it where it is gradually silting up and the over lengthening arm of the Capa Godavari, which is estimated to be advancing seawards at the rate of a mile in 20 years, encloses it on the east. The rapid shallowing of the bay has rendered it necessary for large ships to anchor 5 miles from the shore to the north-east of Kakinada town, but the anchorage is well protected and quite safe.

Goods have to be landed in cargo boats, but the channel leading from the anchorage to the harbour itself is deep enough to allow boats of 100 tons burden, and drawing as much as 5 feet of water, to reach Kakinada at certain stages of the tide. The harbour consists of a tidal creek which receives the surplus of the Kakinada and Samalkot canals and the discharge of the Biccavole drain and the Yeleru river, which together enter the Samalkot branch of the creek just below the last lock of the Samalkot canal. The harbour shows a tendency to silt owing to the deposits brought from above, and its mouth is also with difficulty kept clear of the sand and mud which is swept into the Koringa bay from the Godavari on the south, from a drainage creek entering the bay just to the north of the harbour, and in stormy weather from the open sea on the north-east.

Koringa—is situated nearly 10 miles south of Kakinada and has a population of 5,914 persons according to the 1961 Census. It was once one of the biggest ports and ship building centres on this coast; but owing to the silting up of the channel which leads up to it, it has gradually lost its commercial importance.

An interesting account of the place as it was in its busiest days has been given by Mr. Topping, an astronomer, in the service of the Madras Government who visited it in 1789. He decried in particular, the want of police which he said were badly needed owing to the number of ships — English, French, Dutch and Portugese — that anchored resulting in the landing of many disorderly people. "Nothing is more common", he said "than night broils and frays among people under the influence of intoxication. Frequent thefts and even attempts to assassinate during my short stay which induced me to apply for a guard of Sepoys, to protect myself and the Company's property from violence and rapine". This seems to be a curious contrast to what is Koringa today.

It appears that the present Koringa village which is on the east of the river was built about 1759 by Mr. Westcot, a resident of Injaram. Today even this place is indeed a shadow of its former self.

Koringa is of some religious importance since the neighbouring village of Masakapalle is one of the places at which pilgrims bathe when performing the Sapta Sagara Yatra (Pilgrimage of the seven mouths). The river Koringa is said to have been brought to the sea by the sage Atri and the bathing place is, therefore, called the Atreya Sagara Sangam.

Tallarevu—two miles south of Koringa on the east bank of the river of that name is situated Tallarevu, a hamlet of the main village Polekurru. This village like so many on this river appears to have once been an important trading centre. It is now only interesting as the scene of a small indigenous boat building industry, though it is said to have been not very long ago, the seat of a large ship building industry. Until about 1860 A.D. it is said that about 100 ships were built here annually and 4 times that number repaired and that boats came for repair in the safety of its creeks from Nagapatnam in Madras State and Chittagong, now in East Pakistan. With the advent of steam and the silting up of the river the industry received a set back though as late as 1880, 10 or 15 boats were being built each year and some 50 repaired. In 1903, however, only 5 were built, in 1904 only 1, and in 1905 none at all while only two ships were repaired in 1903 and 1904. With the out-break of the First World War and the shortage of vessels there was a temporary revival. Now, however, this industry is chiefly confined to the building of boats and country-craft for carrying cargo to steamers that anchor at some distance from the port of Kakinada. Some of the bigger vessels built here were used for coastal trade and these visited ports such as Rangoon, Burma, Chittagong, Nagapatnam and Colombo. The wood used is mostly teak, owing to its heaviness and resistence to water. The required timber is obtained from Rajahmundry. Firms constructing boats do not exist but each boat owner builds or repairs his boats with the help of local carpenters and blacksmiths who are specially skilled in this work and are easily available.

A writer on 'the old country trade of the East Indies' says that wherever ship building could properly be carried on were found Indians 'ingenious in designing and skilful in execution'. In the 18th and 19th centuries ships were built by Indians at Surat, Bombay, Daman, Honowar, Beypur, Cochin and Alleppey on the west coast and Koringa, Calcutta and Chittagong on the east coast and in Burma. These were durable

and lasted for several years. Some boats made at Tallarevu were sea-worthy and plied between Kakinada and Rangoon or Colombo. The Tallarevu carpenter employs the minimum of tools but he is a very skilful worker.

Samalkot—is a municipal town having a population of 31,924 persons with a density of 9,121 persons according to the 1961 Census, in an area of about 3.50 square miles. There are 5,926 occupied residential houses. It is situated 7 miles north of Kakinada and is on the main Madras-Calcutta line of the Southern Railway. This place was included in the Pithapuram Estate and was the original residence of the family of Sirdars who founded that property, was apparently the first capital of the Zamindari. It was deserted in favour of Pithapuram for a time, but became the capital once more in the 18th century. This fort was the centre of some excitement in the great drama enacted by the English, French and the Muslims in 1759 and seems to have more than once changed hands. In the latter half of the 18th century the place was made a sanatorium for the British troops in the district. Barracks were built in 1786 and it was at that time "the principal garrison of the English in the circars of Rajahmundry". The fort was demolished in 1838 and the place was abandoned as a military station in 1868. Owing, however, to the Rampa disturbances of 1879 two companies under the British officers were afterwards stationed here and they were only withdrawn in 1893. Samalkot today has some commercial importance on account of the Industrial Estate, sugar and a confectionery factory and due to other commercial activities. It has a Government Agricultural Farm, a Community Development Centre and a Village Level Workers and Gram Sevaks Training Centre. It is easily accessible by canal, road and by rail and is connected by well laid roads to various parts of the district. Its railway station on the Madras-Calcutta line is quite imposing.

Sarpavaram—is situated at a distance of about 6 kilometres from Kakinada. This village is the seat of Lord Bhavanarayanaswamy. The temple is noted for its architectural beauty and historical importance. Its architecture depicts a perfect and harmonious blend of both Chalukya and Chola styles of temple architecture. The 'Vimana' over the 'Garbha Gruha' and the lofty tower on the east with seven stones is clearly of Chola origin. The idol is a master piece of craftsmanship and induces devotion. The village is also famous for mango cake, and it exports to other places. The population of the village according to 1961 Census is 2,870. The main occupation of the villagers is cultivation.

Karapa—which is now the headquarters of a Panchayat Samithi is at a distance of about 6 miles from Kakinada town. The geographical area of the village is Ac. 2,417.23. About 200 years ago this was a sea port and ships used to touch the place for transporting paddy and salt. The sea has receded from the village and it is now at a distance of about four miles. A branch of the river Godavari known as Tulyabhaga is flowing at a distance of two furlongs from the village. It has now lost its religious sanctity and is only serving as a drain. There is a temple of Lord Siva in this village. The special feature of this temple is that it is facing west. The Siva temple at Rameswaram also faces west and these are the only two temples of Lord Siva which face west in this country. There is a Primary Health Centre and a Zilla Parishad High School. There are also three co-operative societies. Under the Social Education programme, one Youth Club and one Mahila Mandali were opened and they are functioning. The total population of the village according to the Census of 1961 is 4,983. The main occupation of the villagers is cultivation.

AMALAPURAM TALUK

Amalapuram taluk lies on the east coast between 16° 30' and 18° 30' of the northern latitude and 80° 25' and 82° 35' of the eastern longitude. It is bounded on the north by the Gowtami Godavari river, on the south by the Vainateyam, on the east by the Bay of Bengal and on the west by the Kothapeta I. S. T. This taluk together with the Kothapeta I. S. T. and the smaller Nagaram island comprises the whole of the central delta of the Godavari river. It is thickly populated taluk standing next to Kakinada taluk in population in the district. It has a population of 356,676 persons with a density of 1,010 persons per square mile according to the 1961 Census. The total area of the taluk is 353 square miles and contains 105 inhabited and one uninhabited villages. Amalapuram and Machavaram are the two urban units of the taluk. The total number of occupied residential houses are 65,116.

Most of the wet land is irrigated by the central delta canal, but the area under wells, though not considerable is far greater than in any of the taluks in the district. Polavaram island gets its water by an aqueduct constructed across Moramallavaya at Annampalle, 3 miles from Mummidivaram. The average rainfall in this taluk is about 46.69 inches and the average number of rainy days in the year is approximately 53. The crops grown are wet paddy (Ac. 98,770-63), sugarcane (Ac. 478-00), cocoanut (Ac. 4,093-00), arecanut (Ac. 100-00), and miscellaneous (Ac. 15,883-00). An extent of

about 68.20 square miles is covered by reserve forests.

Being mostly an agricultural area the taluk possesses very few industries besides those connected with agriculture. Bendamurlanka, Bandarulanka and Ambajipeta were some time ago very famous for hand-woven cloth. This industry has greatly declined since the days when Bendamurlanka was a busy port and one of the outlets of the trade of East India Company in cotton piece-goods. The taluk contains numerous cocoanut plantations raised on canal bunds and on road avenues and on such other high level lands as cannot be reached by canal water, and together with the neighbouring taluks of Razole and Kothapeta produces cocoanuts in abundance. There is also a Cocoanut Research Farm at Ambajipeta where a considerable amount of research is being carried on on cocoanut plantations and from where various improved varieties of cocoanut plants are made available to the cultivators. Industries connected with cocoanuts such as coir and rope-making and oil-extraction have grown up in this area. Cocoanuts are also being exported in large quantities by canals to various places in this district and outside this district. Oil cakes form an important article of cattle food in the taluk and are also exported to other parts of the district chiefly for their manurial value. Rice milling is another industry. Though educational facilities seem to be quite adequate with one first grade college at Amalapuram and schools of various categories, medical facilities are sadly lacking. It is because of this reason that unqualified persons practising medicine have a very flourishing business. As there is considerable amount of waterlogging in this area both on account of intensive irrigation and also on account of heavy rain and bad drainage, epidemics like cholera and other waterborne diseases like filaria are both frequent and widespread. It is, therefore, highly essential that better medical facilities in easy reach of the common man should be provided.

Amalapuram is the headquarters of this taluk. This and other places of interest are described in brief below:

Amalapuram—is both the revenue divisional headquarters as well as the taluk headquarters. It has a population of 24,063 persons and a density of 3,640 persons per square mile according to the 1961 Census. There are 3,158 occupied residential houses. This town which has a municipality is situated on the main canal of the central delta 38 miles south-east of Rajahmundry. It is the third largest town in the district.

Popular legends say that Amalapuram was the capital of the king of Panchala, the father-in-law of the Pandava brothers; and the taluk was, therefore, known as the 'Panchala country'. Another name for it is the 'Konasima' or the end country.

The systematic flow of the Godavari water not only brought prosperity to this area but also lying with it brought in conflicts amongst the people resulting in widespread litigation. No wonder the District Munsif Court here was one of the earliest of such courts to be established and in consequence of the heavy litigation in this and in the adjoining taluks a Subordinate Judge's Court was opened in 1924. The Local Fund Hospital which was founded in 1818 was taken over by the Government in 1928 and today it is a well equipped and may be called a modern hospital in a very limited sense. A portion of the town to the east of the main road is called Moberlypeta in memory of a Sub-Collector who was responsible for its layer.

This town has a college, a few schools, post and telegraph facilities, electricity, etc., but unfortunately does not have protected water supply. The local residents take water either from the wells in their own house because of the high water-table or from the canal. It is needless to stress that the canal water is very dirty because not only human-beings but also cattle are washed and in spite of the fact that it is free flowing water, during certain seasons this water becomes the dreaded carrier of many water borne diseases. The municipality must, therefore, make provision for pumping this water into suitable cisterns, purify and then distribute it to the public through means which are protected from outside contact.

Ambajipeta—is included in Machavaram town at the 1961 Census and lies 5 miles west by north of Amalapuram. A Panchayat Board has been constituted consisting of 11 members. This place is famous for its cocoanut oil. Though large quantities of this oil is consumed in the district itself, yet considerable proportion of it is exported outside. The cake is used as cattle food. Coir products are also made here.

Ambajipeta is well known even beyond the district for its large cattle fair "Santa" held every Wednesday. The business turn over on this particular day is said to be approximately Rs. 50,000. Another fair exclusively for cocoanuts is held on every Saturday and the business turn over on this day is said to be of the value of approximately two lakhs of rupees.

There is a rural medical centre catering to the needs of the health of the local inhabitants.

There is one Zilla Parishad High School, one Police Station and one Veterinary Hospital. There is also a cinema theatre. This town is provided with electricity and wells are the sources of drinking water. The place still continues to be highly filarial and malarial.

On account of great commercial importance laid on cocoanut and its by-products, a Regional Cocoanut Research Station has been established in this place for improving the varieties as well as for aiding the cultivators. A brief note on the Regional Cocoanut Research Station functioning at Ambajipeta is given in Chapter VI under Agriculture.

Ainavilli—is situated 8 miles north of Amalapuram and has a population of 4,942 persons according to the 1961 Census. Its temple to God Siddhi Vinayaka is well known to the people of this and adjoining districts, and vows are frequently made at this place. This temple is said to have been constructed by Daksha, the father-in-law of Siva, before he performed his famous Yagnam at Draksharam. Ainavilli is also well known as the birth place of the two famous Sanskrit pandits, Bulusu Achayya and his son Papayya Sastry.

There are now two temples of Mukteswara, one on each side of the road leading to Amalapuram from the Kotipalle ferry. The origin of the new temple which was built in about 1900 is accounted for this way. The original Mukteswaram temple was in the village of Ainavilli while the new one is in the village of Tottaramudi which lies 6 furlongs away. The original temple had grants of lands for worship endowed by the Vastavaya chiefs of Peddapuram and by the Zamindar of Mogalturru in West Godavari. There were two sets of Utsava idols and puja was offered on behalf of each of the donors and processions were arranged for each set of idols in Ainavilli and Tottaramudi respectively during festivals. This led to frequent bickerings among the priests and the villagers and resulted in widespread litigation. Therefore, the villagers of Tottaramudi decided to have a temple of their own to Mukteswara and Kuppaguntula Ramasastry of that village (an old man of 85 years in 1933) planned and had a new temple built and one set of idols removed from the old temple and installed in the new one (which cost about Rs. 50,000) across the road. The endowments by the Mogalturru Zamindar were also transferred to the new temple.

The village Ainavilli has a hamlet called Mukteswaram. This place is important on account of the ferry connection between Kotipalle and this place. This is one of the recognised and largely used modes of transportation from Kakinada to the central delta via Kotipalle. Two country boats are tied together side by side and two big planks are placed across the boats. On these planks are loaded vehicles which require to cross the river Godavari for reaching the central delta. On windy days or during floods these crossings can be quite hazardous.

Bandarulanka—is situated 4 miles west by north of Amalapuram and has a population of 6,915 persons according to the 1961 Census. This village is known for the manufacturing of good variety of white cloth. There are several hundred looms in this village and yarns of finer counts and artificial silk are used by the weavers for sarees and for art silk goods. Unfortunately the industry is not very prosperous owing to the increasing competition with textile mills.

Bandamurlanka—is situated about 18 miles by road south-south-west of Amalapuram and has a population of 4,658 persons according to the 1961 Census. This village is situated at about 2 miles from the Vainateyam branch of the Godavari and had been selected in 1751 for an English factory, the river then flowing near the village. The factory was situated on a site (now called Pathakota) to the south-west of the village. It is said that boats came up the mouth of the river for about a mile and emptied their cargo and took in fresh cargo directly from the landing place near the factory buildings. When the river receded further southwards a deep water channel was dug to connect the old landing place. A further withdrawal of water appears to have lead to a selection of a site closer to the river where the factory was shifted. This factory was captured without resistence in 1757 by the French under Bussy and restored in 1759 after the battle of Condore, but it had been abandoned in 1786 when the Committee of Circuit sent in their report on the Haveli lands depending on Masulipatam and all the East India Company's mercantile establishments in the district were finally abolished in the year 1829, a circumstance which for some years afterwards had a most prejudicial effect on the prosperity of the district. On the abolition of the settlement a few houses of the Indian merchants tried to hold on there for a time and were later displaced by fisher-folk.

Mummidivaram—is situated 8 miles to the north-east of Amalapuram and has a population of 13,346 persons according to the 1961 Census. It is four miles from the aqueduct at Ainavilli which takes canal water to the Polavaram is-

land. There is an ancient temple to Vishnu here and on a pillar in one of its mantapams is an inscription in illegible characters.

Since a few years Mummidivaram has suddenly risen in importance on account of the existence of a hermit popularly known as Balayogi who is said to have been meditating since about 17 years without food or water. He hails from a poor Harijan family and is said to have been looking after cattle sheds, etc., for supplementing the family income. He entered a life of rigorous austerity and discipline at the age of 16 and has not given it up in spite of persuasion from his well-wishers.

It is stated that for about a month or two after he entered this state he lived merely on milk and water and after that he completely abstained from eating or drinking anything. A mandir was constructed into which he was shifted and there he continues to meditate. For a few years people could get his darshan at any time but since some years he has commenced the practice of giving darshan only twice a year. The first darshan is given about one month before Mahasivarathri. This darshan is of a very short duration ranging from one hour to about two hours. The second darshan which is of about one day's duration is given on a day after Mahasivarathri. People throng from far and near to have a glimpse of this saintly man. However, this Balayogi does not speak to any one, but occasionally expresses his opinion through signs.

RAZOLE TALUK

Razole taluk with an area of 176 square miles consists of the small island known as 'Nagaram Island', which lies in the south-west corner of the delta surrounded by the Vainateyam and Vashista branches of the Godavari and by the sea on the east. Till the 1st of October, 1904 Nagaram formed part of the Narsapur taluk which was included in this district. On a redistribution of district jurisdictions, that taluk was taken over to the then Krishna district and Nagaram island was formed into a separate taluk and retained in the present district. The Nagaram Island is also known as the 'Thatipaka Sima', after the village of that name. This taluk has 52 villages with a total population of 182,099 persons and a density of 1,035 persons per square mile according to the 1961 Census. The total number of occupied residential houses is 34,059 as per the same Census figures. This taluk is, therefore, even more densely populated than Amalapuram taluk.

The taluk is particularly fertile being irrigated by the Gannavaram canal which passes over the aqueduct in the village of that name built across the Vainateyam. An extent of 66,280 acres is under cultivation. Out of this extent, 39,373 acres are irrigated by the canal water. Apart from the canal, there are no other irrigation sources like Minor Irrigation tanks, wells, etc. The following statement gives the details of various crops grown and the extent in acres under each:

Crops	*Extent*
Paddy ...	38,700
Cocoanut ...	18,000
Sugar cane ...	425
Plantains ...	142
Casuarina ...	1,600
Miscellaneous ...	8,413

There are hardly any industries worth mentioning. The chief occupation of most of the people is agriculture.

Razole is the headquarters of the taluk. It has a population of 7,562 persons as per the 1961 Census. The next place of some significance is Nagaram. It was presumably once of importance, as far at least nearly two hundred years it has given its name to Nagaram Island which comprises the taluk. Previously even the taluk was known as Nagaram taluk though Razole was the headquarters. This place is about 5 miles north-east of Razole. It has quite a concentration of Shia sect of Muslims and during the Moharram festival the whole place becomes alive. Remnants of an old fort said to have been constructed by the Muslims can still be seen. There are two important places of pilgrimage in this taluk. The one is the 'Boudha Stupa' at Adurru and the other is the renowned temple of Sri Lakshmi Narasimhaswami Varu of Antervedi.

Boudha Stupa at Adurru

Some years ago, the Ryots of the Adurru village noticed the remnants of old structures during the course of their agricultural operations. It was thought that these old structures represented some sort of ancient historical monuments. Some efforts were also made towards excavation of the area by the villagers. Since the task was found to be beyond their capacity, the fact of existence of these monuments was brought to the notice of the Archaeological Department, Government of India, New Delhi. The department, after conducting a few preliminary surveys, decided to excavate, what they found to be a 'Stupa'. However, subsequently this party on instructions from Delhi moved over to the Nagarjunasagar Project area.

The upper portion of the 'Stupa' is in the shape of a wheel representing 'Ashoka Chakra'. Legend states that this village on account of this construction was named originally as 'Adipura' which later on came to be known as 'Aryavarru' and finally 'Adurru'. The Stupa is said to be one of the biggest constructions by King Ashoka and is situated on the right bank of Vainateya Godavari.

Government is taking action to acquire the site which is of an extent of 2 acres and 50 cents. The Archaeological Department proposes to recommence its work in this area after sometime.

Antervedi—with a population of 7,584 persons according to the 1961 Census, lies in the south-west corner of the taluk almost at the mouth of the Vashista Godavari. It is the last and the most important of the sacred bathing places comprising the "Sapta-Sagara-Yatra" and has other distinct claims to sanctity which are widely recognised. The deity of the place is Shri Lakshmi Narasimhaswamy, an incarnation of Lord Vishnu. The small stone image of the local Goddess by name 'Asvaiudamba' mounted on horse is also seen in the village. She is believed to be the sister of deity Lakshmi Narasimhaswamy.

A noted festival occurs in the village during February-March each year and during this festival, the marriage of the God is celebrated. The festival lasts for about a week and is the largest of its kind in the district. The temple cart is dragged on the second day and on the last, the God is taken down to the sea-shore where His bronze chakram is laid on each of the pilgrims' heads who afterwards bathe in the sea.

There is a Siva temple dedicated to Neelakanta at which pilgrims worship first, before moving on to the Vaishnavite temple. The actual site where the Vashista Godavari enters the sea is about a mile and a half south of Antervedi village. At the time of the festival pilgrims bathe at the mouth of the river and proceed to the village. During the festival period, the pilgrims are conveyed to this place from the left bank of the Godavari in several steam launches, country boats, and by buses and by various other means of transport from Razole side. At other seasons, the village is quite insignificant.

KOTHAPETA INDEPENDENT SUB-TALUK

Kothapeta independent sub-taluk which is a part of the Godavari central delta is bounded on the north by the Akhanda Gowtami river and the Rajahmundry taluk, on the east by the Gowtami branch of the Godavari and Rajahmundry and Ramachandrapuram taluks, on the west by the Vashista branch of the river Godavari and Kovvur, Narsapur and Tanuku taluks of the West Godavari and on the south by Razole and Amalapuram taluks. This taluk has an area of 115 square miles, a population of 165,794 persons and a density of 1,142 persons per square mile. On the whole there are 29,797 occupied residential houses in this taluk. 54 villages have been grouped into 4 firkas of Kothapeta, Atreyapuram, Narendrapuram and Gannavaram. This is a purely rural taluk without even a single urban centre recognised at the 1961 Census.

The principal source of irrigation of this independent sub-taluk is the Godavari irrigation system. A pumping scheme was installed at Peravaram in the year 1945 to serve the dry lands in the villages of Atreyapuram firka. The total area irrigated in the taluk during Fasli 1372 was 49,176 acres. Paddy is the chief food corp and, therefore, about 71% of the total irrigated area is under paddy. Cocoanut gardens are raised on high level lands which cannot be irrigated. Lands situated between the flood bank and the river are cultivated with commercial crops like tobacco and chillies. Since a few years filter points and wells have become popular and these are useful in supplementing the inadequate water resources during the second crop season and also for crops like sugarcane, plantains, etc. The extents cultivated under each crop are given below:

Crops		Extent in acres
Paddy	...	37,636
Cholam	...	3,180
Korra	...	438
Sami	...	579
Pulses	...	3,809
Condiments and spices	...	3,772
Sugarcane	...	1,621
Fruits and vegetables	...	4,660

The surplus agricultural products of this taluk are exported to places outside the district and also outside the State by means of boats plying on the canals upto Rajahmundry and from there by trains and other means of transport.

There is a Government hospital at Kothapeta and Rural Medical Dispensaries at Ryali, Gopalapuram, Atreyapuram, Peravaram, Narendrapuram and Gannavaram. There are two Primary Health Centres at Ubalanka and Vanapalle. The percentage of literacy among the male population is 34.14% while amongst the female population is 19.62%. High Schools are in existence at Kothapeta, Atreyapuram, Ryali, Gopalapuram, Pulletikurru, Narendrapuram and Ravulapalem. There is a Sanskrit College at Modekurru.

Telegraph facilities exist at Kothapeta, Gannavaram, Ryali and Gopalapuram. There are sub-post offices at Atreyapuram, Kothapeta, Ryali, Gopalapuram and Ubalanka. Apart from these sub-post offices there are 33 branch post offices at various places in this taluk. Telephone facilities are also available through Public Call Offices situated at Kothapeta, Gannavaram and Ryali.

There is a Zilla Parishad Travellers Bungalow at Kothapeta besides two P.W.D. Bungalows at Lolla Lock and Gannavaram. There is also another Travellers Bungalow at Gannavaram which is maintained by the Highways Department.

Kothapeta is the headquarters of the taluk. This and a few other places of interest are described below in brief:

Kothapeta—is the taluk headquarters of Kothapeta taluk which was a dependant sub-taluk in the Razole taluk till 1947 and has been given the status of an independent sub-taluk since 1947. The village is flanked by the Amalapuram canal on the west and by the bank canal on the north and east. It is situated on the main highway from Amalapuram to Bobberlanka. It is a Major Panchayat with a population of 9,851 persons according to the 1961 Census, and has an income of about Rs. 60,000. It is the headquarters of the Kothapeta Panchayat Samithi. Agriculture is the main occupation of the people living here and there are no industries worth mentioning. There is a Government Hospital and a Veterinary Dispensary. There is also a Zilla Parishad High School.

Though it is the headquarters of the taluk, it has more of a rural than an urban appearance. There is a Co-operative Rural Bank and a Land Mortgage Bank. There is also a furnished bungalow with two wings maintained by the Zilla Parishad.

Gannavaram—is situated on the left bank of the river Vashista, 9 miles west by north of Amalapuram. It has a population of 4,344 persons according to the 1961 Census. It gives its name to the fine aqueduct which crosses the Vainateyam Godavari there, regarding the construction of which details have been given in the Chapter under Irrigation. According to the local legend it was at Gannavaram that the sage Vainateya stole some of the water of the Vashista Godavari to make a river of his own which goes by his name.

During the heavy floods of 1944 the aqueduct pillars bearing Nos. 35 and 37 sank on the 25th of August resulting in arches Nos. 35, 37 and 38 each of 45 feet in length collapsing. Immediately temporary arrangements were made to keep the flow of water through the aqueduct uninterrupted and permanent repair works were also simultaneously taken up. The reconstruction of the arches was completed in 1945 and in addition to this, a pucca cement road along the aqueduct was also constructed and opened to traffic.

Gannavaram is a great centre for traffic and to the wharf. Here are brought for export to Rajahmundry and Palacole large quantities of cocoanuts, cocoanut oil and paddy. There is also an out-agency of the Southern Railway facilitating transport of goods and commodities.

Ryali—is situated 20 miles north-west of Amalapuram and has a population of 7,081 persons according to the 1961 Census. It contains a Travellers Bungalow. A section of the Dowlaiswaram anicut was originally called the Ryali anicut and the name occurs frequently in the early accounts of the work. The village was once the headquarters of a taluk. It is also said to have been one of the first halting places of the Konaseema Dravida Brahmins. The image of Vishnu in the local temple is a fine piece of sculpture. On one face is the figure of Vishnu as Narayana and on the other face is the same Vishnu as Mohini, the form which he took during the churning of the milky ocean to divert the attention of the Asuras from the pot of nectar that came forth. This shrine is the only one of its kind in India possessing this special and curious feature.

Sri V. Balasubramanyam, Ex-Editor, 'Indian States & Zamindaries', in an article describes the origin of the shrine as follows:

"According to an interesting legend associated with this shrine, Ryali, where the shrine of Jaganmohini-Keshavaswamy stands in all majestic grandeur and its surroundings were once dense forests haunted by wild animals and poisonous snakes. Rajah Vikrama Dev, who was the ruler of these parts was known not only for his remarkable bravery, but also for his enlightened administration and under his paternal care his subjects enjoyed peace and prosperity. As a devout Hindu, he considered it to be his first and foremost duty to offer worship to his favourite God Vishnu and only after the worship was over he looked into the affairs of his State.

As usual one day, the Rajah went to the forest for hunting. Fully exhausted after a fruitless run for the quarry his tired limbs and nerves refused to move and he lay down under a shady tree to enjoy some rest. Soon sleep overtook

him. In a dream he had, he saw a large concourse of religious-minded Hindus engaged in bhajans. Thus disturbed in his sleep, he remained wide-awake for sometime and again relapsed into sleep when he had the same dream. Again he woke up to find it nothing but a dream. Mystified and puzzled, he reached his palace.

That night, he had a dream in which God Vishnu appeared and said: "I've an ardent desire to remain in these parts. So you should construct a wooden chariot and drag it. While dragging the chariot, an iron nail from the wheel will fall down and on that very spot at the bottom you will find my image. Remove the image and construct a shrine in my honour."

With great joy, the ruler obeyed the commands of the God, on the spot where the nail fell, he found beneath, while digging, a block of stone carved on both sides. Immediately he ordered for the clearance of the forest and constructed a shrine in which he installed the image.

Exquisitely carved in black stone, the image of the God evokes from the worshippers a sort of veneration and adoration. Even to this day, it looks as fresh as from the chisel of the architect. The image stands to a height of five feet and the front portion besides the face of Keshava, contains sculptural representations of Dasa Avatar (ten incarnations of God Vishnu). At the feet of the image is the figure of the river-Goddess Ganga from which drops of water trickle at all times of the day — a rare phenomenon which puzzles even eminent scientists. The sacred water does not stagnate there and where it goes nobody knows. Though small, the shrine bears a grand appearance and is a marvel of perfection in art. The face of the image is so lovely and charming that one can stand in front of it for hours together without feeling tired or exhausted.

The back portion of the image is the female form of Jaganmohini especially assumed by God Vishnu for a great cause. While the Devas and the Asuras were churning the milky ocean using the mighty serpent-king, Vasuki as a rope, up rose ambrosia or divine nectar, which the demons snatched away by force from the Devas. The disappointed Devas appeared before Lord Vishnu and narrated to him all the facts. Vishnu was fully aware that the Asuras who were always in perpetual hostility with the Devas would prove dangerous if they were allowed to drink the nectar and thus become immortal and hastening to the spot, he asked the demons to give him the jar of ambrosia stating that he would evenly distribute the divine nectar among the Devas and the Asuras. Then he asked both the parties to sit in two opposite rows facing each other.

Suddenly the resourceful God assumed the form of an extremely enchanting woman on the back side (Mohini) retaining his male form as usual in front. Facing the Devas, he distributed the nectar among them, while the demons, enchanted and mesmerised by the wily smiles and glances of Mohini, forgot everything about the nectar. After the distribution was over the heavenly lady disappeared. Only then the Asuras realised their foolishness and found that Vishnu had played hoax on them.

Another striking feature in Ryali is the existence of the shrine of God Shiva exactly opposite to the shrine of Jaganmohini-Keshavaswamy at a distance of a furlong on the same road — the most unusual thing here. According to an interesting legend, Lord Shiva once, puffed with pride, boasted that he would never be influenced nor mesmerised by anyone. When God Vishnu heard this, he waited for a fitting opportunity to humble down the pride of Shiva.

When Shiva was deeply absorbed in rigorous penance, God Vishnu, assuming the figure of Keshavaswamy (male form in front) and Jaganmohini (female form on the back) appeared before Shiva and stood at a respectable distance in such a posture that Shiva could see in all vividness the female form. Slightly disturbed in his penance, Shiva saw to his great joy, a female form possessing graceful physical proportions and fell head over heels in love with her and expressed his ardent desire to marry her. The female form, without replying walked and walked only to be followed by Shiva.

Despite his strenuous attempts to overtake her, he could not do so. He thought within himself that though all-powerful, he could not follow her and catch her and on this score he felt ashamed. After proceeding a long distance, Shiva fully tired and exhausted, sat down. On seeing this the girl stopped walking and turning round, she saw Shiva. When Shiva saw, to his intense surprise, the male form he at once came to the conclusion that it was the maya of Lord Vishnu to put down his pride. Immediately Shiva transformed himself into a linga and on seeing this, God Vishnu, who took the form of Jaganmohini-Keshavaswamy transformed himself into a stone. Any amount of water poured on this linga does not stagnate.

Consecrated in a portion of this shrine are the images of Sree Veera Venkata Satya-

narayanaswamy of Annavaram and his consort, Sri Ananta Lakshmi Satyavati. This God and Goddess are held in deep veneration by the public of Andhra Pradesh, who in order to obtain their blessings and favours, perform every year a vrata known as Satyanarayanaswamy Vrata on a grand scale.

The image of Sri Devi and Bhoo Devi which occupy the two sides of the main entrance to the shrine, arrest the attention of the pilgrims.

On the two sides — West and East — are two canals and the Gowthami Godavari and the Vashista Godavari and it seems as though they are garlanding the deity, Jaganmohini-Keshavaswamy and thus paying their reverential homage to it.

For the comfortable stay of the pilgrims who come from other parts, there is a choultry constructed recently by the temple Devasthanam."

RAMACHANDRAPURAM TALUK

Ramachandrapuram taluk lies along the left bank of the Gowtami Godavari just below the head of the delta and as far as the village of Masakapalle abutting the Kakinada taluk. This taluk occupies an area of 289 square miles, with a density of 1,308 persons per square mile. There are altogether 109 inhabited villages and four towns totalling a population of 378,137 persons according to the 1961 Census. It is bounded on the north by the Rajahmundry and Peddapuram taluks, on the east by the Kakinada taluk, on the south by the Amalapuram taluk and on the west by the Razole taluk.

The climate is generally very warm from April to June and it continues to be quite uncomfortable almost till October. The months of December and January can be said to be somewhat pleasant.

Being recipient of water from the river Godavari for irrigation purposes, this taluk suffers largely from water-borne diseases like filaria and malaria. Leprosy has become endemic. On account of the widespread prevalence of filaria, Government have opened a research station in Mandapeta to tackle with this problem.

The average annual rainfall in the taluk is 45 inches. Destruction by flood to certain areas in the taluk is quite common when the river Godavari is in spate. During the past decade the floods occurring in 1953 and 1959 are said to have striken terror into the hearts of those who have been seriously affected. The soil is mainly black cotton and alluvial with a high percentage of fertility. Paddy and sugarcane are the important irrigated crops.

The most important source of irrigation in the taluk is the Godavari irrigation system. There are six important navigable canals which irrigate the entire tract constituting the taluk except portions of the upland villages in the north where irrigation is carried on by about 47 Minor Irrigation tanks. The irrigation facilities provided by the Godavari irrigation system as also the Minor Irrigation tanks referred to above are further supplemented by drain water, filter points, artisan and sub-artisan wells. Between 1952-57 the entire taluk was brought under a Pilot Project Programme by which steps were taken to utilise the waters of Tulyabhaga drain which traverses an important portion of the delta. At Rayavaram, hamlet of Vedurupaka village, a Co-operative Lift Irrigation Scheme was started to irrigate 1,019 acres during the second crop season by systematically pumping water from the drain which never gets dried even during the worst summer months of the year. Similarly a Lift Irrigation Society was also started at Biccavolu known as the Lingala Tank Lift Irrigation Scheme for irrigating about Ac. 500.00 of paddy during the second crop season each year. Further, on account of the high water table ranging from 15 to 30 feet, a number of filter points and tube wells have been sunk throughout the taluk.

The entire taluk is interlinked with a net work of canals used for both navigation and irrigation. Further, most of the places in the taluk are connected by major and minor roads and, therefore, communications are generally fair.

There is one Government hospital and a secondary health centre at the taluk headquarters which more or less meet the requirements of the local public. Further, there are three Primary Health Centres located at Kunduru, Pamarru and Anaparthi functioning under the Ramachandrapuram, Kapileswarapuram and Ramavaram Panchayat Samithis respectively. A filarial centre and a subsidiary centre for the prevention of leprosy are situated at Ramachandrapuram.

Local industries are few. There are two spinning mills, namely, Sri Suryanarayana Spinning Mill and Sri Ramachandra Spinning Mill at Pandalapaka which produces 20 count yarn. There is one sugar factory at Chelluru known as Sri Sarvaraya Sugar Mill. There are two tobacco curing factories in the taluk, one at Anaparthi and the other at Biccavolu. Kotipalle and Draksharama are the sacred places and the

temple in the latter contains many ancient inscriptions.

Ramachandrapuram is the headquarters of the taluk. This and other places of interest are described in some detail below:

Ramachandrapuram—is a municipal town occupying an area of 5.43 square miles and having a density of 3,458 persons per square mile. It has a total population of 18,778 persons with the total number of occupied residential houses standing at 3,672 according to the 1961 Census. It is the headquarters of the taluk and was once the chief village of a large ancient Zamindari eventually brought in by the Government. On account of the increasing prosperity due to better income from agriculture, Ramachandrapuram town has a very prosperous appearance. There are a couple of good cinema houses and very many neat residential buildings. A Zilla Parishad High School caters to the needs of the education of the local children. There is a factory in the neighbourhood of Ramachandrapuram which manufactures aerated drinks and these are quite popular in East Godavari and in the neighbouring districts.

There is a well furnished Travellers Bungalow with two suites of rooms. Visitors to Ramachandrapuram are advised to carry their mosquito nets and a pair of socks or stockings so that they may not be infected by the filarial mosquito which are said to become active during nights.

Alamuru—with a population of 5,423 persons according to the 1961 Census is situated on the Gowtami Godavari at the point where the Koringa canal takes off from the main left bank canal, and is the headquarters of a Deputy Tahsildar.

Alamuru has lately risen into importance on account of the road bridge that is being constructed there for connecting Ramachandrapuram taluk with the central delta. This road is the National Highway No. 5 which after traversing the central delta will again be bridged on the Godavari near Narsapur.

The Highways Department has constructed an Inspection Bungalow for the use of their officers but can also be reserved by other Government Departments on prior intimation.

Anaparthi—town occupying an area of 6.97 square miles has a density of 1,837 persons per square mile. Its total population is 12,802 persons with the total number of occupied residential houses of 2,506 according to the 1961 Census. It has a railway station and is an important centre of trade mostly dealing in tobacco. The India Leaf Tobacco Company has its processing plants and storage facilities here. The Calcutta-Madras broad gauge railway line passes *via.*, Anaparthi.

Biccavolu—situated 9 miles north of Ramachandrapuram has a population of 8,472 persons according to the 1961 Census. The principal temple of this village is known as Sri Golingeswara temple with a Subbarayudu temple also in the same premises. The inscription on the doorway refers to a grant of land to the temple by "Vishnu Vardhana Maharaj". On the 6th day of the first fortnight of the month of Margasira corresponding to the month of December, Subbarayudu Shasti is celebrated with great pomp. Large crowds gather from various parts of the taluk for this celebration. The village is believed to have arisen on the sight where once existed the capital of the Chalukyas, conquerors of Vangadesa.

Draksharama—a municipality four miles south by east of Ramachandrapuram, occupies an area of 9.12 square miles and has a density of 1,791 persons per square mile. It has a total population of 16,333 persons and the total number of occupied residential houses are 2,782 according to the 1961 Census. It is connected with Kotipalle, Kakinada and Ramachandrapuram by roads along which buses ply for hire.

The town is noted for its temple and for its sanctity. The name is supposed to mean that is the "Garden of Daksha". According to the well-known story Daksha was a Brahmin, the father-in-law of Siva. The real centre of religious interest is the temple of Bheemeswaraswamy. It contains a big lingam about 15 feet high. It is supposed to have been erected by the Sun and worshipped by the seven sages who made the seven mouths of the Godavari. These seven sages are supposed to have each brought water from the respective rivers underground to the tank at Draksharama which is called "Sapta Godavari". There is a sacred bathing ghat in this temple which confers in a condensed form all the sanctity which is to be obtained by separate baths in each of the seven rivers. The temple has been kept in good repair by the trustees. The temple to the Goddess Parvathi is in the lower varandah on the north. The Chalukya pillars and the idol of the bull are fine specimens of Indian architecture and art. The inscription on the walls range from 1055 to 1444 A.D. During February and March each year a festival is held which lasts for about 5 days beginning on the 11th day after the new moon.

Draksharama is also sacred to the Muslims. The mosque and tomb of a saint called Syed Shah Bhaji Aulia are greatly revered. This saint is said to have been a contemporary of the famous Mira Sahib of Nagoor near Nagapatnam in Madras State.

Kotipalle—village with a population of 4,785 persons according to the 1961 Census is situated nearly 10 miles south of Ramachandrapuram. It contains an ideally located Travellers Bungalow on the bank of a canal. This place is held very sacred by the Hindus. A bath in the Godavari here has virtue to expiate the most horrible of sins. There is a Someswara temple and during Mahasivaratri in the month of February each year a festival is celebrated. A ferry carries passengers and vehicles across the Godavari to Mukteswaram in Amalapuram taluk.

Mandapeta—is a municipality occupying an area of 8.36 square miles and having a density of 2,364 persons per square mile. It has a population of 19,766 persons with the total number of occupied residential houses standing at 3,911 according to the 1961 Census. It is the first town in the taluk in point of population and density and is a large trading centre. It is also well-known for its rice milling industry. The place is highly filarial.

RAJAHMUNDRY TALUK

Rajahmundry taluk lies along the left bank of the Godavari just above the head of the delta. It occupies an area of 378 square miles and contains a population of 382,401 persons with a density of 1,012 persons per square mile as per the 1961 Census. The total number of occupied residential houses in the taluk are 64,692. There are altogether 80 inhabited, three uninhabited villages and two towns in the taluk. The taluk is bounded on the north by the two Agency taluks of Chodavaram and Yellavaram, on the east by the Peddapuram taluk, on the south by the Ramachandrapuram taluk and on the west by the river Godavari.

The principal sources of irrigation in the taluk are the river channels and tanks. A few of the tanks in Rajahmundry taluk are also fed by hill streams, otherwise the irrigation tanks are mostly rainfed and are, therefore, very precarious sources of irrigation. Further, during heavy flood the low level lands get submerged. The Godavari Anicut System irrigates only a small portion of this taluk, while the rest of the irrigation is by tanks. A small extent (Ac. 534-00) is also being irrigated by spring channels. The following three special irrigation schemes are expected to bring a larger extent under irrigation.

(*1*) *Vemagiri Pumping Scheme*: In this scheme an extent of Ac. 3,585-32 is expected to be finally brought under cultivation.

(*2*) *Torrigadda Pumping Scheme*: In respect of about 20 villages abutting the Godavari flood bank in the northern portion of the taluk which did not have any irrigation sources and which could not utilise water from the Godavari irrigation system, a scheme was formulated by which water from the Godavari is pumped up and supplied by means of two canals to these villages. The Pump House was completed and also inaugurated during the beginning of 1964. However, the excavation of the canals is not yet completed.

(*3*) *Madhavarayudupalem Channel Scheme*: Under this scheme an extent of Ac. 750-00 is expected to be brought under cultivation.

Communication facilities in the taluk are quite adequate. Most of the important places are connected by road and a few places are also connected by canal. The broad guage railway line from Madras to Calcutta traverses through this taluk. There is also an Air Port at Rajahmundry.

The warmest months in the year are from April to June. The south-west monsoon sets in June and continues for about three months. In September and October the land and sea breeze alternate leading to a sultry and uncomfortable weather. This condition lasts till the arrival of the north-east monsoon in October. The average annual rainfall in the taluk is 41.32 inches and the average number of rainy days in the year are nearly 60.

Rajahmundry is both the headquarters of the taluk as well as of a revenue division. This and other places of interest are referred to in brief below:

Rajahmundry—is a municipal town occupying an area of 4.09 square miles and contains a population of 130,002 persons and a density of 31,785 persons per square mile according to the 1961 Census. There are altogether 16,179 occupied residential houses. This town is situated on the left bank of the Godavari at the head of a very long bridge which carries the Southern Railway across that river. This bridge over the Godavari is one of the finest in the country. It is built of steel girders laid on masonary piers which have been sunk from 48 to as much as 100 feet below the low water level and stand over 44 feet above that level. It has a total length of 9,000 feet or over 1½ miles between abutments and consists of 56 spans of 150 feet each. It was opened to traffic in 1900.

Neither Rajahmundry town nor its immediate neighbourhood possesses facilities for irrigation from the Godavari and its canals. There have, however, sprung up in and around the town a number of gardens in which are grown excellent varieties of mangoes, batavian oranges, custard apples, sapotas, etc., and these are largely exported during their respective seasons to places outside the district.

The earliest mention of Rajahmundry in any literature is in the introduction to the Telugu translation of the Mahabharata which was composed by Nannayabhatta in the region of the Eastern Chalukya king Raja Raja (1022-62) who is known to popular tradition as Raja Raja Narendra. In this the town is called Rajamahendrapatnam and is referred to as the capital of the Eastern Chalukyan Kingdom and the Central gem of the Vengi country.

The extension of the Eastern Chalukyan dominions into the Kingdom of Kalinga on the north must have rendered Rajahmundry an important strategical point. On the downfall of the Kakateeya dynasty of Warangal before the Muslim armies in 1323, the conquerors made their way as far as Rajahmundry and the "Jumma masjid" there contains an inscription dated 1323-24 which mentions Mohammad Tuglak of Delhi.

Rajahmundry next comes into prominence as the capital of one of the lines of Reddy kings. The first independent sovereign of that land has left inscriptions in it the dates of which range from 1385 to 1422. In 1470-71 the town was captured by the armies of the Muslim Sultan of Gulberga and after one or two reverses king Mohammad of Gulberga made this town his headquarters from 1478-80. Sometime afterwards on account of the dissensions among the Muslim powers in the Deccan, Rajahmundry was occupied by the King of Orissa. About 1515, however, the town was captured by Krishnadeva, the king of Vizianagaram in the course of his campaigns against the Orissa dynasty.

By 1543 Rajahmundry was the frontier town of the Orissa country and lay on the borders of the new Muslim conquests south and west of the Godavari river. It was ruled by a prince of the Gajapati house who on being ill-advised attacked his Muslim neighbours sometime between 1550 to 1564 and had to pay a heavy penalty. He was defeated in battle and was locked up in Rajahmundry. He got a short respite during the life and death struggle between the Muslim powers and the Vizianagaram Empire in which the latter was defeated. After the downfall of the Vizianagaram Empire the Muslim armies directed their attention once again towards Rajahmundry and re-conquered it. The defeated prince was, however, permitted to go unharmed.

On the disruption of Aurangazeb's Empire, Rajahmundry became the headquarters of a Nawabship of the province of the Golconda.

After the cession of the Northern Circars to the French in 1753, Rajahmundry on account of its central position was chosen by Bussy as his headquarters in preference to Masulipatam. It remained the French capital till the invasion of 1758. On the evening after the battle of Condore a force of 1,500 sepoys was sent by Col. Forte to occupy the town. On seeing the British force the French hurriedly evacuated the fort.

During the few years thereafter in which the district was again in the hands of Nizam, Rajahmundry was the headquarters of his local representative Hussain Ali Khan. He was being supported by a small English detachment under Lt. Cosby till the country was finally ceded to the English. Though Masulipatam then became the centre of the administration, troops appear to have been stationed at Rajahmundry for many years. When in 1794 the Chief and Council at Masulipatam were replaced by Collectors, one of the latter was stationed at Rajahmundry. When the Rajahmundry district was constituted the Collector did not live in the town which gave its charge this name though from the very first this town was the headquarters of the District Judge appointed in 1802, and it was not until 1867 that even the Sub-Collector was stationed here. The District Judge still continues to have his headquarters in Rajahmundry. The Sub-Collector and the Assistant Superintendent of Police also have their headquarters here. The place, moreover, contains the usual complement of a few other district officers.

The present city of Rajahmundry can show a few traces of the fine palaces, fort walls, etc., that once adorned the place. The lofty bastions of the ancient fortress overlooking the river can be seen from the railway bridge; but of the many ramparts that once fortified the citadel only three are now left. On one of them stands the bungalow of the Railway Engineer near which was the king's palace Trialokyavijaya, but the Madanagopal temple which lay near the palace on which is now the Godavari Station platform has entirely disappeared. The Veerabhadra temple must have stood on the site of the mission bungalow "Riverdale" lying to the west of the fort, and the low ground near the District Munsif's court is believed to have been the bed of the tank of this temple. Beneath the

bastion on which stands the engineer's bungalow is a huge archway of stone, through which, people say, a sub-terranean passage led to the Peddapuram or Korukonda fort but this cannot be believed.

The Police Maidan, the Godavari Railway Station, the Museum Gardens (Municipal Office) and other public buildings to the west, as far as the river, lie in what was the inner fort. However, parts of the outer wall were visible until a few years ago, but earth has been carted away for house building and now only a portion of it can be seen near the old Judge's Bungalow on the north of the Kambhamvari choultry on the south. The outer ditch has practically disappeared, but part of it was a stream called Tulyabhaga which marched off from the river to the north of the citadel and flowed round the town and discharged itself into the river to the south of the fort near the red hill close to the Kambhamvari choultry. The Narasimha temple near Kambhamvari choultry is what remains of the old temple of the Vedadri.

Rajahmundry is an important religious place from the point of view of the Hindus. It is held that the pilgrims going to Benaras should also visit Rajahmundry and bathe in the river there. The sanctifying effect of a bath in the Godavari at Rajahmundry is placed so high that people come from long distances only to have a bath here and then to return. The bathing place is known as the Kotilingam Ghat (one crore *lingams*). The name is explained by a story that the Brahmin sages at one time wanted to make this place as sacred as Benaras and, therefore, set themselves to mould one crore *lingams* in a single night. Unfortunately the day dawned before the last one was made. The Rajahmundry Ghat is one of the centres of *pushkarams* which takes place once in 12 years.

Rajahmundry has only one Travellers Bungalow maintained by the Municipality. This is quite inadequate considering the importance of the place.

Rajahmundry is a centre of education on account of the several educational institutions in it. Amongst these the Arts College of Rajahmundry and the Training College are perhaps two of the oldest institutions in the erstwhile Madras Presidency. The following account illustrates the origin and history of these two centres of education. The Government Arts College at Rajahmundry was originally established by the Government in 1853 as a Zilla School for imparting instruction to the children of the four districts of the northern circars upto the secondary standard. In 1868 it was raised to the rank of a Provincial School and five years later the Intermediate class then known as the F.A. class was started. The B.A. class was formed in 1877 and the Provincial School became a first grade College. The High School classes were discontinued in 1885. The College was affiliated to the Madras University in 1891 in mathematics, physical sciences and mental and moral philosophy, in July, 1901 in languages other than English, and in 1923 in history. With the creation of the Andhra University in 1926 the college became automatically affiliated to it. In 1930 instruction in the B.Sc. classes in mathematics, physics and chemistry as main and subsidiary subjects, was provided while the classes in mathematics and philosophy for the B.A. degree examination was discontinued. This institution in its early days was entirely supported from fees and provincial funds. It was managed by an European Principal who was usually a member of the Indian Educational Service and who was under the control of the Director of Public Instruction. A hostel for students coming from far away places was started in a rented building and was attached to the College. It was under the direct control of the Principal assisted by a Superintendent and two members of the College Committee and had a Manager who attended to the details of its working. In those days the boarding fees varied from Rs. 7 to Rs. 9 a month according to the market price of the rations. The building could accommodate about 50 boys. This college was originally located near the present Rajahmundry Railway Station. In early 1950's the State Government started and completed the construction of new building for the college at a site very close to the Central Jail, and adjacent to the Sub-Collector's bungalow. These new buildings are elaborately designed and are very convenient. Hostels for both boys and girls have also been constructed. Vast play grounds and other conveniences for extra-curricular activities have been adequately provided.

The Training College at Rajahmundry was originally established as an Elementary Normal School by the Godavari District Board in 1883. Its status was raised in 1890 to that of a second grade normal school. In 1892 it was taken over by the Government and in February, 1894 it was raised to collegiate rank with the union High School, transferred to Government by the Managing Committee, as its practising school. In May, 1904 it was affiliated to the University of Madras for the degree of Licenciate in teaching. Its aim was to supply educational institutions of the northern circars and ceded districts (Cuddapah excepted) with trained Telugu teachers the want of whom had long been a bar to education in those districts; and to work

(as a practising school) a large and efficient High School at Rajahmundry with classes as large as the needs of the town and the neighbourhood required. The L.T. and Secondary trained classes were held in the Arts College while the lower departments were held in a rented building at Innespet. This arrangement was continued till 1899 when on the completion of the present substantial buildings, the Training College with the middle school was removed to them.

The Vice-Principal, an officer of the Madras Educational Service, managed the work for a long time under the superintendence of the Principal of the Arts College.

The training became fairly popular and the L.T. students numbered 17 in 1910. Later, on account of the increase in the number of trainees and also on account of the raising of the status of this institution the College was placed under a separate Principal quite independent from the Principal of the Government Arts College. This College became permanently affiliated to the Andhra University in 1932. The University awards the degree of Bachelor of Education to those who pass through the Post-graduate classes of this college successfully. A hostel for Post-graduate students was opened in 1930.

Several renowned poets, artists, and writers were born in Rajahmundry and therefore it is also identified as the centre of Andhra culture. There are several High Schools both for boys and girls catering to the educational needs of young children.

Rajahmundry is noted for steel trunks, wooden furniture and ceramic-ware. A large paper factory is also situated here. Considerable expansion work on this paper factory is being carried on in collaboration with a French firm. On account of several educational institutions, a few reasonable good and well equipped presses have sprung up.

Underground drainage is conspicuous by its absence. It is a pity that a town of this size and population should lack this essential amenity. Drinking water is protected and is supplied through pipe lines. There is a reasonably big district headquarters hospital here under the charge of District Medical Officer. Apart from the hospital there are also a few Nursing Homes and Clinics run by private doctors. A Mission hospital is being managed by the Christian Mission.

There is a very big central jail in this place. It is one of the biggest in the State. The convicts are trained in carpentry and as a result the carpentry section of the jail produces some very fine pieces of furniture which are usually purchased by the various Government departments.

Rajahmundry is one of the biggest timber markets in India with an annual turnover of over 20 lakhs cubic feet of timber worth about one crore of rupees. Timber in the form of logs arrives here not only from the adjoining divisions of the lower and the upper Godavari but also arrives from the other divisions of Telangana area of Andhra Pradesh as also from the States of Orissa and Madhya Pradesh.

Timber from the Godavari Upper Forest Division is transported by Godavari and its tributaries to Rajahmundry and is stocked here in the Government Timber Depot situated on the Rajahmundry-Dowleshwaram road adjoining the river Godavari. The annual quantity of timber from these two divisions is approximately 2.5 lakhs of cubic feet consisting of about 75,000 c.ft. of teak and 125,000 to 150,000 c.ft. of non-teak timber. The normal practice of disposal of this timber in the Government Timber Depot is by public auction after making the necessary classification, etc.

Timber finds a ready market in any form at Rajahmundry. The major Government industries which consume this timber are the Ship Building Industry at Visakhapatnam, Railway Coach Building Industry at Perambur, Defence Department, Electricity Department, Post and Telegraph Department, Industries and Public Works Department, etc. Apart from the demand of timber by the public undertakings the pressure from the private sector is also very high for good quality timber.

Dowleshwaram—is situated 4½ miles south of Rajahmundry. It is a town with a population of 14,692 persons according to the 1961 Census. This place is very well-known because of the location of the Annicut across the river Godavari here. It is also the headquarters of three Executive Engineers of the Public Works Department and one Superintending Engineer. The Public Works Department workshop situated here is in charge of construction of motor launches and other boats and also looks after the maintenance and repairs of the various Government launches and other boats. This workshop is in charge of an Assistant Engineer.

This town was of some political significance during the early struggles for supremacy between Bahmani Kings and the Hindu Chief of Rajahmundry. Later it became the headquarters of General Ruffat Khan before he commenced his attack on the Tatipaka fort held by a powerful Zamindar named Narsinga Rao.

Dowleshwaram possesses considerable religious interest for the Hindus. There is a Vaishnavite temple of Janardhanaswamy on a nearby hill. An annual festival lasting about 6 days is held during the month of February or March each year. Dowleshwaram is also known to the pious as Ramapada Kshetram or the holy place of Rama's feet. The sanctity of the town is also enhanced by the fact that it is the last place at which the waters of the river Godavari flow down united and undiminished and a legend states that 108 Siva temples lie burried somewhere in the neighbourhood.

The Inspection Bungalow under the control of the Public Works Department is situated on the bank of the Kakinada canal. It is well furnished and has two suites of rooms. On the opposite bank of this canal and overlooking the river Godavari, a Guest House is proposed to be constructed. The foundation stone was laid by the then Public Works Department Minister late Sri Alluri Satyanarayana Raju in the end of 1960. But since then no progress has been made on the construction of this Guest House. After it is completed it is proposed to be named 'Cotton House' in memory of Sir Arthur Cotton, the builder of the Dowleshwaram Anicut.

Kadiam—with a population of 12,330 persons in 1961, with a railway station 4 miles east of Rajahmundry is noted for its extensive laterite quarries so conveniently situated near the Kakinada canal that it easily supplies at a reasonable cost all the metal required for roads in the delta. The place was famous some years ago for its fruit gardens of batavian oranges and other fruits. There is a first class nursery of young fruit and flower plants. This nursery is owned by very enterprising and an enlightened agriculturist.

There is a factory owned by Sri A. V. Reddy, manufacturing electrical cables. Previously various fruits and vegetables which grew in profusion in the neighbourhood used to be canned in this factory. But now due to difficulty experienced in obtaining the right type of fruits and vegetables the factory is concentrating entirely on the manufacture of electrical cables. A tobacco processing plant is also attached to this factory, though it is not in commission.

Korukonda — situated about 11 miles north-east of Rajahmundry has a population of 3,960 persons according to the 1961 Census. A pilgrimage to the temple of Narasimhaswamy at Korukonda is said to be of unrivalled efficacy in granting of offspring to childless women. A festival which lasts for about 15 days takes place at the temple in the months of January and February.

Korukonda and its neighbour Koti appear to have been of some importance. It is said that at Koti 101 Siva temples were founded by King Raja Raja of Eastern Chalukya who reigned from 1022-63. On the Pandava hill west of Korukonda are two rock cut caves. It is believed locally that the Pandavas lived in them during their exile.

RAMPACHODAVARAM INDEPENDENT SUB-TALUK

Rampachodavaram independent sub-taluk constitutes a portion of what was in former times known as the Rampa country. It occupies an area of 710 square miles with a density of only 69 persons per square mile. It has a total population of 48,697 persons according to the 1961 Census. There are no urban areas in this taluk. It is the most sparsely populated taluk in the district. There are two black topped roads in the taluk, one from Rajahmundry to Maredumilli *via.*, Rampachodavaram and the other from Rampachodavaram to Devipatnam. The construction of a bridge over the Seethapalli vagu on the road to Rampachodavaram has greatly facilitated traffic between the plains and the Agency and Rampachodavaram can now be reached by car in a little more than one hour from Rajahmundry.

This taluk is known as the "Agency" taluk. The chief characteristics of such a taluk are that the Collector of East Godavari is the Agent to the Governor and the Sub-Collector of Rajahmundry is the Special Assistant Agent to the Governor. Judiciary is not separated from the Executive in this area and, therefore, the Collector and the Sub-Collector still exercise original and civil jurisdiction here. The administration of this taluk is also somewhat different from the other areas. This has been dealt with in some detail in the chapter relating to the Revenue History and it may be referred to. The Political History of this taluk has also been sketched in some detail in the Chapter relating to the Political History of the district. Rampachodavaram is the headquarters of the taluk.

The people here are mostly tribals and, therefore, are in a backward state. They do not practise a settled mode of cultivation. They indulge in what is known as 'Podu cultivation', that is, they acquire a certain area of land, cultivate it for a year or two and then abandon it for fresh areas. This practice has led to a considerable amount of denudation of forests. State Government is doing its best to make these tribals settle down to some particular areas of land where they can cultivate permanently without having to move about from place to place.

Efforts are being made to set up colonies with cultivation and irrigation facilities. But, however, in spite of all these efforts and good intention the tribals still do not show any indication of wanting to settle down.

Communication facilities are hardly worth mentioning. It is very difficult to reach the interior villages. A few years ago horses used to be provided to the officers for the purposes of touring. But unfortunately due to the disappearance of these animals officers connected with the welfare of the tribals rarely go beyond the road point. It is only very rare that any one ventures to go a few miles interior.

Certain types of fruits like oranges and tamarind, etc., grow in wild profusion in the jungles. The tribals collect these fruits and other minor forest produce and trade in them with the merchants coming from the plains area. Government on discovering that this trade was grossly unjust to the tribals have now started a scheme called the Andhra Pradesh Tribes Finance Corporation with headquarters at Visakhapatnam. The General Manager of this Corporation is a member of the Indian Administrative Service. This scheme provides for the purchase of the minor forest produce from the tribes at a reasonable rate and then sells it in the open market. Godown facilities for storing this produce are also available with the corporation. The efficient functioning of this Corporation will no doubt help in eleminating unfair practices indulged in by the unscrupulous traders from the plains.

Rampachodavaram—is the taluk headquarters with a population of 1,336 persons according to the 1961 Census. An Independent Deputy Tahsildar, an Inspector of Police and an Assistant Engineer of Highways and other minor officials, reside here. A Community Development Block has been started recently and on account of it a Medical Officer and a Block Development Officer also stay at Rampachodavaram.

A local school provides educational facilities to the local children of whom several are tribals. A hostel for tribal children is being maintained by the Social Welfare Department.

Rampachodavaram is electrified and has a Public Call Office in the local Post and Telegraph Office. It has a well furnished and a neat Travellers Bungalow with two wings each having an independent bathroom.

Devipatnam—is about 16 miles from Rampachodavaram and is connected with a well laid out black topped road. It is situated on the east bank of the Godavari river and contains a very fine Travellers Bungalow. Unfortunately in recent years this Travellers Bungalow has acquired a reputation of being haunted. During 1961 the Sub-Collector of Rajahmundry and one of the District Forest Officers of Rajahmundry who happened to camp at Devipatnam at different times during the course of one week have each experienced strange happenings at night in this Bungalow. However, many others also have camped before and after this have nothing to relate. Situated on a top of a hillock overlooking the majestic Godavari this Travellers Bungalow can both be an excellent picnic spot as well as a quiet place for disposing of accumulated files. The Police Station is in the immediate neighbourhood of this Travellers Bungalow.

This is an important centre of trade in timber and bamboos. Steam launches plying on the river between Rajahmundry and Bhadrachalam halt at Devipatnam and, therefore, such of those who want to travel for the shortest period on river on their way to Bhadrachalam can get into the steam launch at Devipatnam.

Geddada—is situated 4 miles north-west of Rampachodavaram on the main road between Maredumilli and Rampachodavaram. The Highways Department have constructed a comfortable one room Travellers Bungalow complete with a bathroom and sanitary fittings. It gains importance each time a weary traveller fails to find accommodation in the Rampachodavaram Travellers Bungalow. Being only 4 miles from Rampachodavaram, Geddada provides an alternative and comfortable accommodation to anyone who chooses to work in greater solitude.

Kondamodalu—is situated about 27 miles west of Rampachodavaram on the river Godavari. To reach this place one has to get into a launch at Devipatnam and traverse the rest of the distance. As the name itself indicates this village is situated at the entrance to the gorge on the Godavari. There is a small elementary school in charge of a village school teacher catering to the educational needs of the small children. Blankets are distributed free of cost by the Government to the school children each year. A small rest house has been constructed recently at a cost of Rs. 4,000. The steam launches plying between Rajahmundry and Bhadrachalam touch this place and large quantities of hill products are exported from here.

Maredumilli—is about 16 miles from Rampachodavaram and is connected to it by a well laid out black topped road. This village may be

taken as almost the frontier of civilization. At the weekly shandies, tribals from long distances bring their forest produce for trading with the merchants from the plains. Employees of the Andhra Pradesh Tribal Finance Corporation also come to this place for making their purchases from the tribals.

A Highway Division was created for constructing a road *via.*, Maredumilli to Bhadrachalam. Work was commenced in right earnest and several cross drainage works and culverts were constructed and the road formation was also completed by the end of 1961. As a matter of fact during fair weather Jeeps could be driven on this road without much discomfort upto the river Sabari. During early 1962 this division was abolished and an Assistant Engineer was placed in charge. This road, had it been completed, would certainly have benefited the Agency areas to a great extent by facilitating easy transport of forest produce and timber to the godowns at Rajahmundry. There is a lull in the activities in this project now. It will be in the interest of everybody to revive it as early as possible.

YELLAVARAM INDEPENDENT SUB-TALUK

Yellavaram taluk of the Agency occupies the north-eastern most corner of the district. The whole of it is hilly, though considerable areas of level land lie among the hills. Most of this taluk is covered by forests, the soil is poor and in the summer months water is always scarce. The inhabitants are mostly Koyas and Hill Reddys, consequently it is very backward and sparsely populated. The taluk occupies an area of 850 square miles and has a population of 63,502 persons and a density of 75 persons per square mile according to the 1961 Census. There are altogether 313 inhabited and 162 uninhabited villages in this taluk. There are no towns. The total number of occupied residential houses in the whole taluk is only about 13,439. The Sileru river in the extreme northern border of the Gurtedu Muttah is the northern boundary of this taluk. The distance from Kakinada to Addathigala, the taluk headquarters, is 49 miles. Buses regularly ply to the taluk headquarters both from Kakinada and Rajahmundry, the latter being about 51 miles distance. There is a Muttah Munsif in each village appointed by the Muttahdar and paid for by him partly by endownments of land and partly by a nominal fixed payment. No cultivation accounts of any kind are maintained. The Muttahdars are generally responsible for the internal administration of their respective Muttah villages.

PEDDAPURAM TALUK

Peddapuram taluk lies between 16°-95′ and 17°-18′ of northern latitude and 81°-53′ and 82°-18′ of eastern latitude occupying an area of 377 square miles. The total population of the taluk is 193,641 persons with a density of 514 persons per square mile according to the 1961 Census. There are altogether 84 inhabited and 3 uninhabited villages and one town, that of Peddapuram which is a municipality. The total number of occupied residential houses according to the 1961 Census is 34,859. This taluk is bounded on the north by the Yellavaram taluk, on the west by the Rajahmundry taluk, on the south by the Ramachandrapuram and Kakinada taluks and on the east by the Pithapuram and Tuni taluks. As seen from the density and population figures furnished above, this taluk is comparatively sparsely populated. This feature is due to the fact that the irrigation facilities are quite inadequate and therefore there is not much scope for any conceivable concentration of population. This is, therefore, mainly a dry taluk excepting for about 23 villages which are irrigated by the Yeleru river system. As for the remaining 64 villages there are 406 irrigation tanks which are mostly rainfed and are therefore precarious sources. The Yeleru system irrigates 23,340.41 acres comprising about 59 per cent of the total irrigated area. The ayacut under the 406 irrigation tanks which include 9 Major Irrigation Tanks is 16,565.45 acres comprising about 41 per cent of the total irrigated area. The Yeleru system of irrigation and irrigation under the major tanks is under the control of the Public Works Department. Minor Irrigation Tanks are under the control of the respective Panchayat Samithis for purposes of maintenance and repairs. The Revenue Department still continues to be in charge of the regulation of water and the fixation of the ayacut.

The net area sown in this taluk during Fasli 1371 is 101,983.00 acres comprising 58 per cent of the total area of the taluk. The following statement illustrates the land utilisation pattern in this taluk:

Classification of land	*Area (in acres)*	*Percentage*
Permanent pastures and other grazing lands	23,659.00	14%
Land put to non-agricultural usage	17,092.00	10%
Cultivable waste	11,203.00	6%
Current fallows	9,118.00	5%
Other fallows	3,891.00	2%
Barren and uncultivable land	2,958.00	2%
Miscellaneous tree crops and groves not included in the net area	2,112.00	1%

The following statement gives particulars of the chief crops grown together with their respective extents:

Crops grown	*Extent (in acres)*
Paddy	52,225
Cholam	235
Cumbu	6,639
Ragi	2,389
Bengalgram	23
Redgram	2,123
Greengram	193
Blackgram	390
Horsegram	2,419
Chillies	654
Sugarcane	5,995
Ground nut	1,300
Gingelly	10,132
Cotton	159

The average rainfall of the taluk during the three Faslis shown below is 39.56 inches:

Fasli 1369	39.15"
Fasli 1370	38.17"
Fasli 1371	41.37"

More than half of the rainfall is caused by the south-west monsoon between June to September while the remaining rainfall occurs during the north-east monsoon in the months of October and November. During the years of inadequate rainfall this taluk is affected quite seriously. However, during these years rice is usually imported from the delta taluks. Failure of agricultural operations on account of unfavourable seasons leads to mass unemployment and lack of purchasing power in the hands of the people. During such periods the labour from the villages of this taluk generally migrate for employment to the adjoining delta taluks specially during the transplantation and harvest seasons. As there are no industries of any consequence people depend entirely on agriculture for eking out their livelihood.

There are 4 Khandasari sugar factories in this taluk located at Peddapuram, Pulimeru, Burugupudi and Katravulapalle. Sugarcane to feed these factories is grown within the taluk itself. Surplus sugarcane is exported to the sugar factories at Pithapuram and Samalkot. Peddapuram which was once famous for silk industry does not seem to be in a very flourishing state today.

As regards educational facilities in the taluk there are 6 High Schools, two at Peddapuram, one each at Jaggampeta, Rangampeta, Geddanapalle and Divili villages. There are 4 Middle Schools, one each at Peddapuram (for girls), Rayabhupalapatnam, Kattamuru and Veeravaram villages. In addition to these there are also about 155 elementary schools at various places in the taluk.

Communication facilities in the taluk are quite adequate. Most of the important places are connected by roads. The railway line of the Southern Railway does not traverse through this taluk.

Peddapuram is the headquarters of not only the taluk but also of a Revenue Division of that name. This place has been described in some detail below. There are no other important places in the taluk which require any special mention.

Peddapuram—is the only town in the taluk. It is a municipality occupying an area of 2.01 square miles and having a population of 24,302 persons according to the 1961 Census. The density of population is 12,091 persons per square mile and the total number of occupied residential houses is 4,298.

This place was for nearly 3 centuries the capital of a big Zamindari estate which seems at one time to have extended from north of Thotapalle to the Nagaram island. According to Grant's Political Survey of the Northern Circars, it comprised in about 1785 nearly 1½ of the whole circar of Rajahmundry both in extent and value and contained 585 villages.

Peddapuram town today is very unimpressive though it has the usual complement of Sub-Divisional Offices and a few minor offices. The look of prosperity is conspicuous by its absence. Till a few years ago this place was noted for its professional dancing girls. These persons have, somehow, retreated into oblivion and they are now-a-days spoken off only in subdued tones. A detailed survey as to what happened to this once flourishing profession will be of considerable interest to the sociologist and the social reformers.

Peddapuram is quite well known for its silk sarees. This industry not able to compete with the larger industrial magnates, today is only a shadow of its previous self.

PRATHIPADU INDEPENDENT SUB-TALUK

Prathipadu independent sub-taluk prior to 1-4-1959 was a dependent sub-taluk in the Peddapuram taluk. Since that date it has been declared independent and it contains 118 inhabited and 15 uninhabited villages comprising an area of 225 square miles. It has a population of

137,252 persons and a density of 610 persons per square mile according to the 1961 Census. There are altogether 25,304 occupied residential houses. The main sources of irrigation are the minor irrigation tanks which are mainly rain-fed while the Yeleru river system also feeds the ayacut to a certain extent. The total acreage under the Yeleru system and the irrigation tanks is 18,771.76 acres while land under dry cultivation is 57,354.05 acres. All the villages in this taluk are covered by Panchayat Samithis namely Sankhavaram and Prathipadu Panchayat Samithis.

The Grand Trunk Road from Madras to Calcutta passes through this taluk. The northern portion of this taluk is mostly hilly and, therefore, conveyance to these places is quite difficult. The people of these areas are also quite backward. A few villages are located on the hills.

The crops grown in this taluk are paddy, sugarcane, bananas, gingelly, etc. As most of the taluk is dry the area under dry crops is considerably higher.

Police Stations are located at Prathipadu and Annavaram. There is one out post at Yeleswaram. Post and Telegraph facilities also exist in these villages. Kirlampudi, Yeleswaram, Annavaram and Sankhavaram have a High School each.

Prathipadu is the headquarters of the taluk. It is approximately at a distance of about 23 miles from the district headquarters and about 17 miles from Peddapuram which is the Revenue Divisional Headquarters.

The only place of some importance in this taluk is Annavaram.

Annavaram—situated on the Madras-Calcutta Railway line this place is considered to be an important place of pilgrimage for the Hindus The presiding deity of the temple is Sri Veera Venkata Satyanarayanaswamyvaru. The temple being dedicated to Vishnu is largely visited by pilgrims on Ekadasi days (or 11th day of the dark and bright fortnights). An important festival is held in the month of May. People from great distances come to this temple and perform vratams every day. A number of marriages also take place in this temple. Every year the Kalyana Mahotsavam takes place on Vaisakha Suddha Ekadasi and the festival lasts for about 5 days. A large number of pilgrims visit this place during this festival.

TUNI INDEPENDENT SUB-TALUK

Tuni independent sub-taluk lies in the north-east corner of the district. The river Thandava separates Tuni independent sub-taluk from Visakhapatnam district. This taluk comprises an area of 183 square miles and has a population of 129,740 persons with a density of 709 persons per square mile according to the 1961 Census. There are altogether 46 inhabited and 2 uninhabited villages in this taluk. Tuni is the only town having a population of 22,452 persons. The taluk is divided into 3 firkas of Tuni, Kotananduru and Thondangi. A forest area comprising of 15 square miles known as the Kona forest is situated within this taluk.

This taluk is bounded on the north and north-east by Visakhapatnam district, on the south by Pithapuram independent sub-taluk, on the south-east by the Bay of Bengal and on the west by the Peddapuram taluk. The Thandava river which originates in the Chintapalle taluk of Visakhapatnam district and the Pampa river which takes its birth in the Prathipadu independent sub-taluk flow in the eastern and western regions respectively of the Tuni independent sub-taluk. A mountain range of the eastern ghats runs across this taluk from west to east. All the hilly tracts and some parts of the sea-shore are covered by minor forests which is useful mostly as fuel.

About 20% of the irrigation in this taluk is from the Pampa and the Thandava rivers which contain water for less than 6 months in a year. The rest of the irrigation is carried on mostly by tanks which are rainfed and, therefore, precarious sources of irrigation. Hence drought and famine conditions are not infrequent in this area.

The Southern Railway and the Grand Trunk Road from Madras to Calcutta pass through this taluk and touch Tuni town which is the headquarters of this taluk. Ravikampadu, Annavaram, Hamsavaram and Tuni are the 4 railway stations in the taluk. Tuni town is connected by bus from Kakinada, Rajahmundry, Gokavaram, Korukonda, Narsapatnam, K.D. Peta, Chintapalle and Madugulu. Busses to Anakepalle, Chodavaram and Visakhapatnam start from Payakaraopeta in Visakhapatnam district which is adjacent to this town on the opposite bank of the Thandava river.

Elementary Schools are situated in almost all the villages in this taluk. There are two High Schools, one for boys and the other for girls in Tuni town. High Schools are also

situated at Bheemavarapukota and Ravikampadu. Middle Schools are situated at Kotananduru, Thetagunta, Hamsavaram and Thondangi.

Tuni town is the headquarters of this taluk. This has been described in some detail below:

Tuni—is a municipality occupying an area of 4.72 square miles and has a population of 22,452 persons with a density of 4,757 persons per square mile according to the 1961 Census. The total number of occupied residential houses in this town is 4,146. It is the headquarters of the taluk, an important railway station and a trading centre in the extreme north-east corner of the district. Sunday is a Shandy day to which cattle from the Visakhapatnam district are brought for sale. The total business transaction is approximately over one lakh of rupees on this day. Jaggery, groundnut, gingelly, chillies and paddy are the main commodities exported from this centre. Dried fish is another commodity which is exported from here. There is also a match factory located in this town. There is one high school for boys and another high school for girls.

PITHAPURAM INDEPENDENT SUB-TALUK

Pithapuram independent sub-taluk lies along the coast, north of the Godavari Delta. It is bounded on the east by the Bay of Bengal, on the west by the Peddapuram taluk, on the north by the Tuni independent sub-taluk and a part of the Prathipadu independent sub-taluk and on the south by the Kakinada taluk. It covers a total area of 138 square miles and has a total population of 167,337 persons and a density of 1,213 persons per square mile according to the 1961 Census. 47 inhabited and 3 uninhabited villages and one town, that of Pithapuram constitute the whole taluk. There are altogether 30,894 occupied residential houses in the taluk.

Though it adjoins the delta where there is a reasonable amount of rainfall, the average figures for five years preceding to 1962 recorded only about 42.22 inches of rainfall in this taluk. About forty-one villages are irrigated by the Yeleru and the Gorrikhandi while about ten villages are irrigated by rainfed tanks.

The following are the cultivation figures for the whole taluk:

	Ayacut (in acres)		
	Dry	*Wet*	*Total*
Total cultivable area	33,934	41,092	75,026
Wet ayacut			
Under Yeleru		13,974	
Under Gorrikhandi		21,593	
Under Minor Irrigation Tanks		5,525	
	Total	41,092	
Double crop wet lands under Yeleru		8,450	
Double crop wet lands under Gorrikhandi		597	
	Total	9,047	

The main crops of the taluk are paddy (Ac. 41,592-00), sugarcane (Ac. 3,805-00) and chillies (Ac. 3,737-00). The major occupations of the people in the taluk are cultivation, weaving and fishing. The important industries relate to the manufacture of sugar and jaggery.

Pithapuram, which is the headquarters town is of historical as well as archaeological interest. Uppada is noted for weaving excellent varieties of cloth. Chandurti was the scene of battle of Candore. These places are described in some detail below:

Pithapuram—is a municipality occupying an area of 9.23 square miles and having a population of 27,910 persons and a density of 3,024 persons per square mile according to the 1961 Census. The total number of occupied residential houses in this town is 5,344. This place until the abolition of the Zamindari system was the headquarters of a big Zamindari by the same name. This place is also the taluk headquarters of Pithapuram independent sub-taluk.

The town of Pithapuram is a very unattractive place. The Raja's residence appears to be an imposing building of great size when compared to the poor dwellings and the narrow, winding, uneven and dusty roads in its vicinity but in a somewhat neglected state. The town has, however, some religious importance. The particular point of sanctity is the Padagaya pool in front of the Kukkuteswaraswamy temple. Secondly, three large images of Buddhist or Jain origin, sitting cross legged in the usual contemplative attitude located at the side of one of the main streets of the town add further sanctity to the town. They are known as 'Sanyasidevulu' and a festival is held in their honour in times of drought.

The palace of the Maharaja is surrounded by a mud wall and the whole enclosure is known as the fort. The palace itself is a very imposing building, several storeys high, and contains besides their usual apartments, a very fine library. In a corner of the fort is the shrine to the guardian deity of the fort known as Kota *Sakthi* to which puja is occasionally performed.

The present drab and inconsequential appearance of Pithapuram town should not in any way be allowed to throw a curtain on its antiquity and its glorious past. This place has been mentioned as a sovereign city in the earliest of

times. In the Allahabad pillar inscription of the Gupta King Samudra Gupta, the Chieftain Mahendra of "Pistapuram" is mentioned along with the kings of Cunjeevaram and Vengi and it is said that the place was captured by the western Chalukya king Satyasraya, elder brother of Kubja Vishnu Vardhana about A.D. 610. Again "the strong fortress of Pistapuram" is one of the places mentioned in the Aihole inscription of the Eastern Chalukyan Emperor, Pulakesin II as having been subdued by him when he conquered the Vengi country. From this period onwards there is a long gap in the history of the place.

In comparatively modern times Pithapuram appears as the headquarters of an important Zamindari. Mr. Grant in his "Political Survey of the Northern Circars" states that the ancestors of the Raja of this Estate were established as renters of part of it as early as 1571, but that the family was involved in the general proscription of Indian landholders under the rule of Rustum Khan until 1749, one of its members obtained a Sanad for the Zamindari from the Amiladar, Naimat Ali.

It is not known what happened to this estate while the French held the northern circars, but when the Vizianagaram Raja induced the English to invade the country in 1758-59, the Pithapuram Zamindar like the other chiefs of the district, suspected that he wished to extend his dominions at their expense, and accordingly opposed the invasion. He apparently took no part in the battle of Condore; but hearing that the British were advancing against Samalkot with the Vizianagaram Raja, he obtained the help of the Dutch of Kakinada to resist them. The Samalkot fort is said to have held out for three months and ultimately submitted. Shortly afterwards, however, the French landed some troops at Kakinada and these were received into the fort at Samalkot and were joined there by Jagapati Razu, a relative and enemy of the Vizianagaram Raja. This coalition fought an action at Undur with the Vizianagaram forces, but was defeated. Samalkot was retaken by the English and the French were driven to Kakinada. All these must have taken place in 1759. The Raja of Pithapuram took refuge in Raghavapuram, but on the death of the Vizianagaram Raja he returned to Pithapuram. Meanwhile the Nizam had again come in possession of the district, and about 1761 the Zamindar was re-established.

The Pithapuram estate at the time of its amalgamation with the rest of the Independent India was a remarkably fine one. In the early years of British administration it was no doubt over-shadowed by the more important Zamindari at Pithapuram, but while the latter had ceased to exist, Pithapuram had greatly extended. Not only did it comprise nearly the whole of Pithapuram and Kakinada taluks but it also owned several villages in the taluks of Amalapuram, Polavaram, Chodavaram, Tuni and Rajahmundry as well as others in North Arcot and other districts.

Chendurthi—seven miles north by east of Pithapuram and with a population of 2,229 persons according to the 1961 Census this place was a scene of one of the most decisive battles known as the battle of Condore on the 9th of December, 1758, which resulted in the wresting of the sovereignty of the Northern Circars from the French by the English.

When the English under Col. Forde came near about Pithapuram, they found the French under M. Conflans encamped at Gollaprolu, some four miles north-east of Pithapuram. This was on December 3.

The French did not move from Gollaprolu, and on the 6th the English occupied Chebrolu which was about three miles north of Gollaprolu. For the next three days, the two armies remained in their respective camps, but on the early morning of the 10th they both made a movement. Forde, desiring to draw the enemy from their camp to a general action, and to lead them to ground where their cavalry would not be of much assistance to them, marched off at 4-00 A.M., followed at some distance by the Vizianagaram forces, who were not ready to start at the proper time, and about 8-00 in the morning took possession of Chendurti which lay two miles north-west of Chebrolu. Finally the two armies came face to face about a mile south-south-west of Chendurti. The spot which tradition identifies as the scene of the battle which followed is locally known as "Angleyulapadu". This is a sort of a high ground, a few feet above the level of the wet lands.

The battle has been described in detail by Orme (Madras, 1861), and in somewhat different terms by Cambridge (the War in India; London, 1761) and by Malleson (Decesive Battles of India).

Uppada—is situated 7 miles east south-east of Pithapuram and has a population of 6,683 persons according to the 1961 Census. It is noted for handloom sarees. There is also a Handloom Weavers Co-operative Society and a stores and sales section attached to this Society at Uppada.

There is a very comfortable Travellers Bungalow with two suites of rooms about a furlong from the sea-shore. This is said to have been built after the previous Travellers Bungalow was swallowed up by the sea.

Old fisher-folk say that sailing out in their boats or catamarans for fishing, their nets or lines are often caught by the tops of buildings or trunks of trees about a mile from the shore, and that to their own knowledge the sea has been encroaching on the village.

Mallavaram—is situated 11 miles from Pithapuram and is connected with a regular bus service. This place has suddenly come into prominance on account of the appearance of a live cobra which the local devotees believe to be Lord Subrahmanya. A temple has been constructed and this enshrines the snake God. Hundreds of devotees visit this temple each day to have a "darshan". It is stated that in December, 1961, just before Subrahmanya Shasti a live cobra appeared in the fields of Alavelli-Mallavaram and inspired the villagers of Mallavaram to construct a temple there. Accordingly the devotees of the village laid the foundation of the temple. On the following day the snake God went round the place where the temple was to be constructed three times and died while all the devotees were witnessing this strange phenomenon. On the same night this cobra which had died appeared in the dream of one of the devotees and directed him to burry it at the spot where the foundation is laid and also stated that it would re-appear as soon as the the construction of the temple was completed.

Accordingly the construction of the temple was commenced and was completed before the end of December, 1962. While arrangements were in progress for Subrahmanya Shasti another live cobra appeared behind the temple. The devotees were over-joyed at the sight of this snake God.

The inauguration was done on the 4th and 5th of February, 1963 with nearly 10,000 devotees attending the function. Everyday the devotees perform the archana, abhishekam puja, etc., over the hood of this snake God.

Everyday the snake God takes a bath in the tank at the temple and returns into the temple and remains there for the rest of the day. A stone lingam has been constructed in the temple and this cobra usually lies down on this lingam.

PART II

TABLE 2.11—GOVERNMENT EXPERIMENTAL FARMS

Sl. No. (1)	Name of Farm (2)	Location and distance from Railway Station (3)	Year of establishment (4)	Whether Research, Multiplication or Demonstration farm (5)	Management *i. e.*, State, University or Private (6)	Annual Rainfall (7)	Type of soil (8)	Programme of Research (9)
				EAST GODAVARI DISTRICT				
1	Agricultural Research Station, Samalkot	Superintendent, Agricultural Research Station, Samalkot, 1 mile from Samalkot Railway Station	1902	Research	State	N.A.	Heavy alluvial clay	Improvement of rice is taken up on the following lines :— (1) *Selection work from local paddy bulks in cultivators' fields with a view to replace the present strains under distribution with better ones.* (2) *Hybridisation with the following objects* :— (i) To cover some of the defects found in the high yielding strains already under distribution *e.g.*, improvement of rice quality and the removal of the abdominal white character noticed in MTU–19 (ii) Increasing the vigour and yielding capacity in fine grain quality strains like SLO–16–16 and 19 by crossing them with MTU–3 and MTU–20 (iii) The local high yielding strains SLO–13, SLO–15 and SLO–16 are crossed with Japanic rices *viz.*, Rikku–132, Norin–18 Fukoku which may throw useful combinations for stiffness of straw with higher response to heavy manuring suitable under delta conditions. (3) *Maintenance of important genetic stock material.* (4) *Cultural and manurial experiments* :— (i) Study of the response of Japanica cultures with varying doses of N. P. K.

TABLE 2.11—GOVERNMENT EXPERIMENTAL FARMS—*Concld.*

Sl. No. (1)	Name of Farm (2)	Location and distance from Railway Station (3)	Year of establishment (4)	Whether Research, Multiplication or Demonstration farm (5)	Management *i. e.*, State, University or Private (6)	Annual Rainfall (7)	Type of soil (8)	Programme of Research (9)
								(ii) Study of the advantages of the Japanese method of rice cultivation (iii) Study of the relative merits of nitrogenous fertilisers available in the market (5) *Study of effects of the Meteorological factors on rice and sugarcane under the All India Co-ordinated Crop Weather Scheme*
2	Sugarcane Liaison Farm, Samalkot	Samalkot, 1 1/2 miles from Samalkot Railway Station	1949	Research-cum-Demonstration farm	State-cum-Private	49.09"	Black Clay	Research work is going on varietal, manurial and cultural aspects of sugarcane cultivation
3	Government Millet Farm, Peddapuram	Peddapuram, 3 miles from Samalkot Railway Station	1-4-1954	Research Farm	State	46.27"	Sandy Red Loamy	(1) Evolution of high yielding strains of millets *viz.*, Sajja, Ragi and Jonna suitable for upland areas of East & West Godavari Districts (2) Isolation of high yielding strains of cultures *Viz.*, Redgram, Greengram, Blackgram and Horsegram suitable for dry lands of Northern districts of Andhra Pradesh
4	Government Fruit Research Station, Rampachodavaram	Rampachodavaram, 34 miles from Rajahmundry Railway Station	1955	Research	State	53.00"	Acidic Red Sandy Loam	(1) Varietal trials on (i) Mango, Citrus, Guava, Sapota, other Fruits, Coffee & Cocoa, Spices, etc., vegetables, and other economic plants (2) Multiplication of pedigree plants in the nursery for distribution
5	Cocoanut Research Station, Ambajipet	Ambajipet, 38 miles from Rajahmundry Railway Station	1955	Research	Jointly financed by the Government of Andhra Pradesh and Indian Central Cocoanut Committee, Ernakulam	108.65 Cm.	Black Clay	Technical Programme of work in the scheme : (1) Introduction and acclimatisation of promising extra-state varieties (2) Plantation performance of selected progenies (3) Manurial experiments

								(4) Cultural-cum-manurial experiments (5) Khinoceros beetle control trial (6) Inter-cropping trial (7) Green manurial trial (8) Supply of selected cocoaunt seedlings (9) Multiplication of Ganga-bondam (10) Scheme for the Biological control of cocoanut Mite scheme
6	Parasite Breeding Station	Razole 16 miles from Narsapur Railway Station	1947	Research	State (financed by Government of India)	45.62''	Black alluvial	(1) Conducting systematic surveys of the cocoanut growing areas and arrange for the release of parasites in the Nephantis infested gardens (2) Try to evolve a satisfactory technique for rearing Stomatoceras and Apanteles which have so far avoided all attempts for rearing (3) Attempt to improve the rearing technique for greater production of parasites in the laboratory.

TABLE 5.13—LIST OF COLLECTORS THAT WORKED IN EAST GODAVARI DISTRICT FROM 1805

Name	Date of taking charge	Name	Date of taking charge
(1)	(2)	(1)	(2)
C. H. Churchil	13th May, 1803	E. B. Elwin	20th March, 1909
John Long	30th April, 1805	E. A. Davies	13th September, 1911
L. G. K. Murray	11th December, 1810	P. S. P. Rice	27th November, 1911
Henry Oakes	15th January, 1813	E. B. Elwin	17th June, 1912
E. Smalley	21st April, 1817	T. E. Moir	29th May, 1915
F. W. Robertson	3rd November, 1818	M. E. Couchman	17th November, 1915
J. Hanbury	6th April, 1824	C. B. Cotterell	12th May, 1916
R. Bayard	25th August, 1826	H. H. Burkitt	12th April, 1917
J. T. Anstey	30th January, 1827	P. S. P. Rice	5th November, 1917
A. Crawley	27th January, 1830	H. H. Burkitt	16th November, 1918
M. Lewin	12th May, 1835	L. D. Swamikannu Pillai	24th April, 1919
P. Grant	15th December, 1835	U. Rama Row	8th June, 1919
G. A. Smith	23rd January, 1838	G. T. H. Bracken	11th September, 1919
T. Prendergast	17th November, 1843	H. R. Uzielli	5th June, 1921
A. Purvis	30th May, 1854	G. T. H. Bracken	20 October, 1921
H. Morris	14th May, 1863	W. Scott Brown	8th July, 1923
J. Fraser	15th April, 1864	J. R. Huggins	24th October, 1923
H. E. Sullivan	15th September, 1871	H. S. Shield	13th November, 1924
W. S. Foster	17th May, 1872	U. Rama Row	15 December, 1925
J. Hope	5th January, 1876	G. T. H. Bracken	1st March, 1926
W. S. Foster	16th January, 1877	A. F. W. Dixon	19th March, 1927
W. D. Horsley	7th September, 1880	G. W. Priestley	31st March, 1927
W. S. Foster	11th January, 1881	G. T. H. Bracken	22nd October, 1927
W. A. Happell	12th April, 1882	M. K. Vellodi	18th May, 1928
W. S. Foster	27th April, 1884	G. T. H Bracken	5th June, 1928
H. M. Winterbotham	10th November, 1885	M. K. Vellodi	10th June, 1928
J. Thomson	25th November, 1885	J. B. Brown	29th June, 1928
W. A. Happel	25th September, 1886	C. A. Henderson	12th February, 1931
G. F. T. Power	31st December, 1887	M. Narasimham Pantulu	8th May, 1932
F. H. Hamnett	9th March, 1888	J. B. Brown	17th June, 1932
H. Moberly	24th July, 1889	E. Bennett	12th March, 1933
G. F. T. Power	2nd August, 1889	G. W. Priestley	5th November, 1934
H. Moberly	7th January, 1890	R. B. Mac Ewen	1936
W. A. Happell	15th January. 1890	V. N. Kudva	1937
L. Moore	8th December, 1890	M. V. Subramanian	1938
W. A. Happell	6th February, 1891	A. C. Woodhouse	1940
A. W. B. Higgens	30th January, 1892	W. R. S. Sathianadhan	1941
E. C. Rowson	23rd February, 1893	T. Bhaskara Rao	1942
S. H. Wynne	21st March, 1893	M. S. Sivaraman	1942
W. J. H. Le Fanu	13th February, 1894	M. A. Kuthalingam Pillai	1943
V. A. Brodie	26th March, 1895	N. Raghavendra Rao	1943
G. W. Elphinstone	11th September, 1896	S. Viruprakasha Chetti	1945
R. H. Shipley	26th November, 1896	R. C. Ratho	1946
V. A. Brodie	2nd February, 1897	S. Rajagopala Ayyangar	1947
J. A. Cumming	30th April, 1899	R. Koteswara Rao	1948
A. E. C. Stuart	24th November, 1899	D. Balsundaram	1949
J. H. Munro	2nd May, 1901	V. V. Subramanlam	1950
A. E. C. Stuart	13th June, 1901	N. S. Quireishi	1951
P. S. P. Rice	28th April, 1902	N. S. Mani	1st September, 1952
J. A. Cumming	5th May, 1902	N. Uddandaraman	20th January, 1953
W. Lys	3rd May, 1903	H. Sambamurty	18th October, 1953
J. A. Cumming	14th June, 1903	S. Chakravarthi	26th August, 1954
E. B. Elwin	5th April, 1904	K. C. Madappa	1st February, 1955
H. L. Braidwood	7th February, 1905	A. Krishnaswamy	28th February, 1956
J. A. Cumming	20th February, 1905	B. Pratap Reddy	20th December, 1959
J. J. Cotton	23rd February, 1908	T. Balakrishna	6th May, 1961
R. W. D'E Ashe	17th April, 1908	S. R. Ramamurty	10th July, 1961
J. A. Cumming	27th November, 1908	Ram K. Vepa	1st June, 1962

TABLE SERIES 6—PUBLIC HEALTH

TABLE 6. 1—LIST OF MEDICAL AND PUBLIC HEALTH INSTITUTIONS

Name of Hospital/ Dispensary	Name of Town/ Village where Located	No. of sanctioned beds
(1)	(2)	(3)
1 KAKINADA TALUK		
Government General Hospital	Kakinada	600
Engineering College Dispensary	Kakinada	
Municipal Dispensary	Kakinada	
Southern Railway Dispensary	Samalkot	
E. S. I. Dispensary	Kakinada	
Primary Health Centre	Samalkot	
do	Karapa	
Local Fund Dispensary	Tallarevu	
do	Velangi	
do	Vetlapalem	
do	Gollamamida	
Rural Dispensary	Injaram	
do	Pedapudi	
2 AMALAPURAM TALUK		
Government Hospital	Amalapuram	50
Local Fund Dispensary	Bendamurlanka	
do	Mummidivaram	
Rural Dispensary	Murumalla	
do	Kandikuppa	
do	Allavaram	
do	Cheyeru	
do	Kesanakurru	
3 RAZOLE TALUK		
Government Hospital	Razole	
Local Fund Dispensary	Ryali	
Rural Dispensary	Mulikipalle	
do	Manepalle	
do	Antervedipalem	
do	Appanapalle	
4 KOTHAPETA INDEPENDENT SUB-TALUK		
Government Dispensary	Kothapeta	
Primary Health Centre	Vanapalle	
do	Ubalanka	
Rural Dispensary	Pulletikurru	
do	Gopalapuram	
5 RAMACHANDRAPURAM TALUK		
Government Hospital	Ramachandrapuram	44
Leprosy Home and Hospital (Mission)	Ramachandrapuram	140
Government Dispensary	Kapileswarapuram	
Local Fund Dispensary	Biccavolu	
do	Dangeru	
do	Rayavaram	
do	Kothukuluru	
Primary Health Centre	Kesavaram	
do	Anaparthi	
do	Kunduru	
do	Pamarru	
do	Mandapeta	
Rural Dispensary	Alamuru	
do	Balabhadrapuram	
do	Draksharama	
do	Konkuduru	
do	Kuthukuluru	

Name of Hospital/ Dispensary	Name of Town/ Village where located	No. of sanctioned beds
(1)	(2)	(3)
6 RAJAHMUNDRY TALUK		
Government Headquarters Hospital	Rajahmundry	90
V.T.B. Sanitorium	Rajahmundry	176
U.L.C.M. Mission Hospital	Rajahmundry	170
Sri Venkata Satyanarayanaswami Devastanam Leprosy Home	Rajahmundry	50
Free Maternity Home	Rajahmundry	16
Municipal Dispensary	Rajahmundry	
Central Jail Dispensary	Rajahmundry	
Southern Railway Dispensary	Rajahmundry	
Kasturbai Gandhi Memorial Hospital	Seethanagaram	
Primary Health Centre	Rajanagaram	
Local Fund Dispensary	Dowleshwaram	
do	Gokavaram	
do	Palacherla	
Rural Dispensary	Seethanagaram	
do	Dulla	
7 RAMPACHODAVARAM INDEPENDENT SUB-TALUK		
Government Hospital	Rampachodavaram	8
Government Dispensary	Devipatnam	
8 YELLAVARAM INDEPENDENT SUB-TALUK		
Government Hospital	Addatheegala	8
Government Dispensary	Rajavommangi	
Government Itenerating Dispensary	Jeddangi	
9 PEDDAPURAM TALUK		
Government Hospital	Peddapuram	
Primary Health Centre	Kandrakota	
Rural Dispensary	Katravulapalle	
do	Jaggampeta	
do	Rayavaram	
do	Vadisileru	
10 PRATHIPADU INDEPENDENT SUB-TALUK		
Local Fund Dispensary	Prathipadu	
do	Yeleswaram	
Rural Dispensary	Sankavaram	
Local Fund Dispensary	A. Annavaram	
11 TUNI INDEPENDENT SUB-TALUK		
Government Hospital (Male)	Tuni	14
Government Hospital for Women a nd Children	Tuni	22
Southern Railway Dispensary	Tuni	
Primary Health Centre	Kotananduru	
do	Ravikampadu	
Local Fund Dispensary	Bhimavarapukota

EXPLANATORY NOTE

A. SERIES

GENERAL POPULATION TABLES

General Population Tables prepared at the 1961 Census are the basic demographic tables and give information about the total population as recorded at the present census in the district/taluk/town, the territorial changes that have occured during the last decade from 1951-61, variation of population during the past six decades, distribution of villages and towns by population, sizes and trends of urbanisation in the district. The data are presented under the following four tables.

A-I	Area, Houses and Population
A-II	Variation in Population during sixty years (1901-61)
A-III	Villages classified by population
A-IV	Towns (And Town-Groups) Classified by population in 1961 with variation since 1941

All the above Tables pertaining to East Godavari district are reproduced in this Hand Book.

TABLE A-I—AREA, HOUSES AND POPULATION

This Table, the basic population table, gives for each taluk as well as for the district and for each town in the taluk, area in sq. miles as well as in sq. kilometres, persons per sq. mile, number of villages inhabited and uninhabited, number of towns, number of occupied residential houses and population by persons, males and females. The figures have been given separately one below the other under Total, Rural and Urban. In this Table as in all other tables, the taluks have been arranged in the order of the Location Code Numbers adopted in the 1961 Census and not in an alphabetical order. The twelve taluks in the district have been numbered off continuously in a clock-wise order starting from the headquarters taluk where the district headquarters is situated, i.e., from Kakinada taluk as indicated below.

Name of Taluk	*Location Code Number*
Kakinada	1
Amalapuram	2
Razole	3
Kothapet (Independent Sub-Taluk)	4
Ramachandrapuram	5
Rajahmundry	6
Rampachodavaram (Independent Sub-Taluk)	7
Yellavaram (Independent Sub-Taluk)	8
Peddapuram	9
Prathipadu (Independent Sub-Taluk)	10
Tuni (Independent Sub-Taluk)	11
Pithapuram (Independent Sub-Taluk)	12

One of the main changes in the presentation of this Table since the last Census is that the particulars of each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages against each taluk.

Area figures furnished for the district and the taluk by the State Survey Department and the area of towns furnished by the local authorities concerned have been shown generally under column 3(a) against the respective units. The urban area of each taluk has been worked out by adding the areas of all the urban units in the taluk and the rural area of the taluk is obtained by deducting the urban area of the taluk from the total area of the taluk.

The area in sq. kilometres under column 3(b) is obtained by converting the area corrected upto two places of decimals. The area figures for district Total/Rural/Urban, taluk Total/Rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total the converted Total/Rural/Urban area figures of the taluks have been either added or chopped of, on prorata basis according to area ratios of the taluks. The area of each town both in sq. miles under column 3(a) and in sq. kilometres under column 3(b) have been given upto second decimal place while the Total/Rural/Urban area of the taluks as well as of district has been given only upto first decimal place.

The area of the district as furnished by the State Survey Department shown against (y)

under column 3(a) differs from the area of the district furnished by the Surveyor General of India, shown against (X) in the column, due to the difference in the methods of computation.

The density of persons per sq. mile for the district and for each of the taluks and towns has been worked out by using the area figures corrected upto two places of decimals and not using the area figures given under column 3(a) of the Table.

"Village" referred to in this Table and in all other Tables in this book is the Revenue administrative unit with definite boundaries. Village having one or more groups of habitations is treated as an inhabited village and village with no habitations is treated as an uninhabited village. The number of inhabited and uninhabited villages, in each taluk and in the district is shown under columns 5 and 6 of this Table. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit (town) or hamlets to a main Revenue village, are not taken into account. All the Revenue villages within the taluk are demarcated and numbered off continuously from North-West to South-East. The number so assigned to each village is the 1961 Census Location Code Number, distinct from the Revenue Survey Number and will be referred to hereafter as the Location Code Number.

"Town" is a place of usually not less than 5,000 inhabitants possessing distinct urban characteristics and should also satisfy certain criteria prescribed. For recognition of any place as a town at the present Census it should be either covered by a City Corporation, Municipality or Cantonment Board or it should generally satisfy the following criteria:

(i) It should have a minimum population of 5,000;

(ii) The density of population should not be less than 1,000 per sq. mile; and

(iii) At least 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each of the taluks and in the district is exhibited under column 7 of this Table.

"House" is defined, for the purpose of 1961 Census, as a structure or part of a structure, a dwelling, a shop, workshop, or a factory, place of business, a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard, leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such residential houses in the town/taluk/district have been given in column 8. Houses utilised wholly for purposes other than for residence have not been taken into account in this Table.

The total population, by persons, males and females for the district as well as for each taluk and town have been exhibited separately under columns 9, 10 and 11 in this Table.

Besides the main Table, there are also three Appendices to this Table.

Appendix I: In this Appendix the growth of the district and the taluks to the present area since the last Census is traced by giving the territorial changes that have taken place during the last decade together with the names and areas involved in the changes. The net area gained or lost by each unit is also given in the Appendix. The list of villages transferred from one taluk to another after 1951 Census together with their Location Code Numbers assigned at the 1951 Census, Revenue Number and area in sq. miles wherever available is given in the Annexure to this Appendix. Bhadrachalam taluk and Nugur independent sub-taluk were transferred from this district, to newly constituted Khammam district. Fifty villages were transferred from Razole taluk to newly constituted Kothapeta independent sub-taluk. Prathipadu independent sub-taluk was also constituted by transfer of 126 villages from Peddapuram taluk.

Appendix II: One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. However, several places with a population of 5,000 and over did not qualify to be treated as towns while a few places with less than 5,000 population might have been treated as towns for good reasons at the present Census. This Appendix will give the number of such places with their population. There are no new towns recognised at this Census with less than 5,000 population nor old towns under 5,000 population which have been declassified into rural at 1961 Census in this district.

Appendix III: This Appendix shows the taluk-wise figures for the Houseless Population and the Institutional Population separately. Houseless Population consists of those people who have no fixed place of residence and no regular home to live in. Institutional Population is a

group of unrelated persons living and messing together under the management of a head of the Household appointed either by rules governing the institution or by common consent of its members. For the purpose of studying different characteristics this population is also included along with the Household Population.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS (1901-1961)

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Censuses. The figures revealed at the previous Census have been adjusted for subsequent territorial changes in order to afford a correct basis for comparison.

As this Table gives the growth of population from decade to decade, this data forms the main source for the estimation of population in the absence of reliable Vital Statistics. One of the main changes in the presentation of this Table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

During the last decade Bhadrachalam taluk and Nugur independent sub-taluk with an area 1,504.0 sq. miles were transferred from this district to newly constituted Khammam district. There have been no other inter district territorial changes affecting this district during the decade 1951 to 1961. However, these were the following inter taluk transfers during the decade. Razole taluk has been bifurcated and constituted into Razole taluk and Kothapeta independent sub-taluk. Prathipadu independent sub-taluk was newly constituted by 126 villages transferred from Peddapuram taluk. For details of the villages involved in the transfers please refer to Appendix I to Table A-I.

Appendix : The Appendix to this Table shows the 1951 population according to their territorial jurisdiction in 1951, changes in area and the population involved in the changes that have taken place during the last decade. The details of transfers of areas in each case together with the names and areas in sq. miles and the number and the date of Notification of each transfer to the extent available are also given in the foot note.

TABLE A-III—VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in the district, arranged on population basis under the following groups:—

Less than 200 population
200 — 499
500 — 999
1,000 — 1,999
2,000 — 4,999
5,000 — 9,999
10,000 and above

The villages which are either uninhabited or wholly included in urban units are not taken into account in this Table. The following statement gives at a glance the break-up of all the inhabited villages of East Godavari district classified by population in four broad groups, viz.,

Class	*Number of inhabited villages*
Less than 499	597
500 — 1,999	349
2,000 — 4,999	311
5,000 and above	89
Total inhabited villages	1,346

For the definition of "village" and "inhabited village" see fly leaf to Table A-I.

TABLE A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in sq. miles and sq. kilometres, population with sex break-up, decade variation in total population and percentage of decade variation have been given for every town in the district.

For the definition of "Town" see fly leaf to Table A-I.

The towns have been classified into six classes according to their population in the

latest Census as detailtd below.

Class	*Limits of Population*
I	100,000 and above
II	50,000 — 99,999
III	20,000 — 49,999
IV	10,000 — 19,999
V	5,000 — 9,999
VI	Less than 5,000

Class I towns with a population 100,000 and above have been treated as cities. The total number of towns under each class in the district at 1961 Census are given below.

Class	*Number of Towns*
I	2
II	Nil
III	5
IV	6
V	1
VI	Nil
Total towns	14

Gollaprolu, Mummidivaram, Yelleswaram, Kothapeta, Biccavole and Kirlampudi towns of 1951 Census have been deleted in the present Census in this district. No new place has been treated as a town for the first time at the 1961 Census in this district.

Since the prime purpose of this Table is to show the growth of towns as towns and not how certain places have grown into towns from villages, the population of a place which at any particular Census year was not treated as a town is not given in this Table. The population of towns at each of the last seven Census years, *i.e.*, since 1901 is, however, given in Table A-IV in part II-A General Population Tables of Andhra Pradesh (State Volume). The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

The civic status of the towns, *i. e.*, whether the town is a Municipality, or a Panchayat *etc.* is indicated after the name of the town in the abbreviated letters M or P according to the status of the town.

One of the main changes in the presentation of this Table since the last Census is that the areas of towns and the percentage of decade variation of the total population of the towns have also been given.

The Appendix to this Table gives the names of towns treated as such at the present Census together with the names of villages either fully or partly included in them.

NOTE: 1. Towns treated as such for the first time in 1951 Census and which continue as towns in 1961 Census are printed with an asterisk (*) on the left side.

2. Under columns 3 (a) and 3 (b) (x) represents the area figures furnished by Surveyor-General of India and (y) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the Local Authorities. The rural area for a district/taluk is obtained by subtracting from the State Survey area, the urban area.

3. The Sq. Km. and density figures of urban areas of taluk/district are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the Table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the taluk/district totals tally.

4. The following abbreviations have been used for the status of a town :- M : Municipality, P : Panchayat

APPENDIX I TO TABLE A–I

Statement showing the 1951 Territorial Units constituting the present set-up of each taluk of East Godavari district and details of net area gain or loss in the changed Territories during the decade 1951–1961

(Only those names/areas which have undergone changes since 1951 have been shown in this Appendix)

District/Taluk	1951 Territorial Units	DETAILS OF GAIN IN TERRITORIES			DETAILS OF LOSS IN TERRITORIES			NET AREA (Gain '+' Loss '—')	
		Brief description	Area		Brief description	Area			
			Sq.miles	Sq.Km		Sq. miles	Sq.Km.	Sq. miles	Sq. Km.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
EAST GODAVARI DISTRICT	EAST GODAVARI DISTRICT	...	...	...	Bhadrachalam Taluk and Nugur Independent Sub-Taluk transferred to newly constituted Khammam District.	1,504.0	3,895.4	—1,504.0	—3,895.4
Razole Taluk	Razole Taluk	...	...	...	(1) 50 Villages transferred to newly constituted Kothapeta Independent Sub-Taluk.	106.6*	276.1	—106.6	—276.1
Kothapeta Independent Sub-Taluk		(2) Newly formed by 50 villages transferred from Razole Taluk.	106.6*	276.1	...	...	...	+106.6	+276.1
Peddapuram Taluk	Peddapuram Taluk	...	...	...	(3) 126 Villages transferred to newly constituted Prathipadu Independent Sub-Taluk.	211.2*	546.9	—211.2	—546.9
Prathipadu Independent Sub-Taluk		(4) Newly formed by 126 villages transferred from Peddapuram Taluk.	211.2*	546.9		...	...	+211.2	+546.9

NOTE:— *1. The reasons for marked defference between 1951 and 1961 area figures have not yet been fully assigned.

2. The area figures of rhe territories involved in the transfers are only approximate and may not tally with the total taluk areas given in Table A–I in the absence of the correct surveyed areas of the portions of the territories affected by the transfers.

3. The location code number, Revenue number, name and area of each village transferred from one taluk to another, or incorporated in a taluk by transfer from another and referred to by symbol numbers under columns 3 and 6 are given against t he concerned symbol number in the Annexure to this Appendix.

ANNEXURE TO APPENDIX I

Showing the particulars of villages involved in changes of territories included in Cols. 3 and 6 of Appendix I

Symbol No.		Name of Village	Location Code No. of 1951 Census	Revenue No.	Area (wherever available) in Sq. miles

EXPLANATORY NOTE

B-SERIES

ECONOMIC TABLES

The Economic Tables for the 1961 Census are based on the principal work of a person and the concept of dependency has been abandoned altogether for economic classification. The entire population has been divided into the following nine categories of workers, for broad economic classification based on the National Classification of Industries adopted by the Government and the Non-Workers being shown as a separate category.

I Working as Cultivator
II Working as Agricultural Labourer
III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV Working at Household Industry
V Working in Manufacturing other than Household Industry
VI Working in Construction
VII Working in Trade and Commerce
VIII Working in Transport, Storage and Communications
IX Working in Other Services
X Non-Workers

The following seventeen Economic Tables, nine of which relate to the General Population and the remaining eight relating to a 20% sample of Households, have been prepared at the present Census.

(i) *General Economic Tables*

B-I Workers and Non-Workers classified by sex and broad Age-groups

B-II Workers and Non-Workers in cities, town-groups and towns arranged territorially classified by sex and broad Age-groups

B-III ***Part A*** —Industrial Classification of Workers and Non-Workers by educational levels in ***Urban areas only***

Part B—Industrial Classification of Workers and Non-Workers by educational levels in ***Rural areas only***

B-IV ***Part A***—Industrial Classification by sex and class of Worker of persons at work at Household Industry

Part B —Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service

Part C—Industrial Classification by sex and Divisions, major groups and minor groups of persons at work other than Cultivation

B-V Occupational Classification by sex of persons at work other than Cultivation

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad Age-groups and educational levels in ***Urban areas only***

B-VII ***Part A***—Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural labourer

Part B—Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry

B-VIII ***Part A***—Persons unemployed aged 15 and above by sex, broad Age-groups and educational levels in ***Urban areas only***

Part B—Persons unemployed aged 15 and above by sex, and educational levels in *Rural areas only*

B-IX Persons not at work classified by sex, broad Age-groups and type of activity

(ii) *Household Economic Tables*

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry, (ii) engaged either in Cultivation or in Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry

B-XI Sample Households engaged in Cultivation classified by interest in land and size of land cultivated

B-XII Sample Households engaged in Cultivation only classified by size of land cultivated, and number of family workers and hired workers

B-XIII Sample Households engaged both in Cultivation and Household Industry, showing size of land cultivated classified by principal Household Industry

B-XIV *Part A*—Households classified by Major Groups of principal Household Industry and number of persons engaged

Part B—Households classified by Minor Groups of principal Household Industry

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land

B-XVI Sample principal Household-Industry classified by period of working and total number of workers engaged in Household Industry

B-XVII Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (a) neither in Cultivation nor in Household Industry, (b) in Household Industry only and (c) in Cultivation Sub-Classified by size of land Cultivated

Only Tables B-I, B-III, B-IV Part-C, B-V, B-VII, B-VIII and B-IX out of the above Tables pertaining to East Godavari district are reproduced in this Hand Book.

The Household Economic Tables are a special feature of this Census and are prepared on the basis of 20% sample of the returns in the Household Schedules filled up at the time of enumeration and are given in a separate volume entitled "Census of India, 1961, Volume II, Andhra Pradesh, Part III-Household Economic Tables" and may be referred to.

The working population in each of the nine categories of workers and the non-working population is divided by broad Age-groups, *viz.*, 0-14, 15-34, 35-59, 60+ and Age not stated in some of these Economic Tables.

TABLE B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for Total, Rural and Urban population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad Age-groups 0-14, 15-34, 35-59 and 60+ years. This is the basic Economic Table and the Age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle aged persons and elderly persons. The classification of non-working population is made in other succeeding Tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be self-supporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependency. The following explanation makes it clear as to who is treated as a Worker.

Workers

All persons who were engaged in some productive work during any of the 15 days preceding the day on which enumerated, irrespective of the fact whether they derive income or not, are treated as Workers. In respect of seasonal work like Cultivation, Livestock, Household Industry, etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he is recorded as a Worker. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as Worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not, however, treated as Workers. Persons under training as apprentices with or without wages are recorded as Workers, Family Workers, i.e., who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in household duties and in no other economically productive work, i.e., a housewife, is not, however, treated as a Worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or politi-

cal activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers

All persons who are not workers, i.e., those falling under the following categories are treated as Non-Workers:

(i) Fulltime students or children attending schools and who do no other work
(ii) Persons engaged in unpaid home duties such as housewife
(iii) Any dependant including an infant or child not attending school or a person permanently disabled from work because of illness or old age
(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work
(v) Beggars, vagrants or independent women without indication of source of income and others with unspecified source of existence
(vi) A convict in jail or an inmate of a penal, mental or charitable institution
(vii) Unemployed persons seeking employment for the first time
(viii) Persons employed before but now out of employment.

TABLE B-III—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This Table is divided into two parts. Part A relates to Urban areas and Part B relates to Rural areas. The distribution according to different educational levels of each of the nine categories of Workers and also the Non-Workers is given in this Table.

In Part A which relates to Urban areas only, the data are given for all the Urban areas of the district put together and also for Kakinada and Rajahmundry cities by the following educational levels.

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-Technical diploma not equal to degree
University degree or post-graduate degree other than Technical degree
Technical degree or diploma equal to degree or post-graduate degree
Engineering
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching
Others

In Part B the data which relate to Rural areas only are given for the district, followed by taluks by the following educational levels.

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation and above

"Literate" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can neither read nor write or can merely read and cannot write is considered as illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows Industrial classification by sex and class of worker of persons at work at Household Industry for Total, Rural and Urban population. The data are shown first for the Division followed by Major Groups in the order laid down in the Indian Standard Industrial Classification under that Division.

Part-B shows the Industrial Classification by sex and class of worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the Total and Urban popu-

lation. In this part also the data are presented first for the Division followed by the Major Groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than cultivation for Total and Urban population of the district. The data are presented first for the Divisions followed by Major Groups in the order laid down in the Indian Standard Industrial Classification. Under each Major Group the corresponding Minor Groups are shown.

Only Part C is reproduced in this Book upto district level. Minor Groups having less than 1% of workers of the respective Division (0.5% in the case of Division 2 & 3) are not shown in this Table but shown in the Appendix to this Table.

"*Household Industry*" is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in the Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An "*Employer*" is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An "*Employee*" is a person who usually works under some other persons for salary or wages in cash or kind. Persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers are not regarded as employers.

A "*Single Worker*" is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single worker also includes a person who works in joint partnership with one or several persons hiring no employees, and also a member of a Producers' Co-operative. Each one of the partners or members of such producers' Co-operatives is recorded as a "Single Worker".

A "*Family Worker*" is a member who works, without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an Industry, whether run at home or away from home in town or village and even away from village in the Rural area should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note :— In respect of Household Industry, by the very nature of the participation of the workers in a Household Industry all the four categories of workers are not recognised. Only the "employees" if any, in a Household Industry are categorised as such. The rest are clubbed together as "others".

TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the Total and Urban Population, the Occupational Classification of persons working in non-Agricultural occupations. The data are presented first for the Division followed by the Occupational Groups in the order of the National Classification of Occupations. Under each Group the detailed Occupational Families are shown. Occupational Families, accounting for less than 1% of the Workers of the respective Divisions (less than 0.5% in case of Families under Division 7-8) are not given in this Table. The particulars for the district are given down to the Occupational Family, while the taluk-wise particulars and particulars for Kakinada and Rajahmundry cities are given upto Division level only.

The Occupational Classification given in this Table is quite distinct from the Industrial Classification presented in Table B-IV part-C. Occupational Classification relates to the actual work a person does irrespective of the Industry in which he is engaged: e.g., a person who is a clerical worker for Occupational Classification may be connected with Industry, Trade or Service. Conversely in the same Industrial Category there may be persons following different

Occupations as technicians, managerial workers, clerical workers, watch and ward, etc. Therefore, in this Table under each Occupational Division, Group, and Family the broad Industrial Category of the worker is also given.

TABLE B-VII Part-A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Part-B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided into two parts:

Part-A shows the persons working principally as Cultivator or as Agricultural Labourer or at Household Industry and who have secondary work in the other two alternatives from among Household Industry or Cultivation or Agricultural Labour. The data for the district are given for Total, Rural and Urban population by Industrial Divisions and Major Groups. For the taluk, however, the particulars are given for Rural population and by Divisions only. Particulars for Kakinada and Rajahmundry cities are presented separately.

Part-B shows the persons working principally in Non-Household Industry, Trade Business, Profession or Service and also engaged at Household Industry as secondary work by Industrial Divisions and Major Groups. The data for the district are presented for the Total, Rural and Urban population by Divisions followed by the Major Groups of that Division. The taluk-wise data are presented for Rural population and Kakinada and Rajahmundry cities for their Urban population by Industrial Divisions only.

TABLE B-VIII—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the distribution of persons unemployed aged 15 and above by sex and educational levels for Urban and Rural areas separately in two parts.

In Part-A, which relates to the Urban areas, the unemployed have been sub-divided into two classes, viz., (i) Persons seeking employment for the first time, (ii) Persons employed before but now out of employment and seeking employment. The data are given by broad Age-groups and by educational levels. The first class of unemployed are divided into the Age-groups 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and the second class into Age-groups 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. Particulars for Kakinada and Rajahmundry cities also have been reproduced in this Table.

Part-B relates to Rural areas. The data in this part are given taluk-wise by educational levels. The data in this Table are not, however, given by Age-groups.

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the Total, Rural and Urban populations, the persons not at work classified by sex, broad Age-groups and type of activity. The Non-Workers are divided into eight categories according to their activities, viz., (i) Fulltime students; (ii) those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired persons, rentiers or persons of independent means; (v) Beggars, vagrants, etc.; (vi) Inmates of institutions; (vii) Persons seeking employment for the first time; and (viii) Persons employed before but now out of employment and seeking work. These eight categories are based on the recommendations of the United Nations. This Table provides information about those who have an income without working, about housewives, about school going children, besides other types of non-working population. The data for the district are presented for Total, Rural and Urban populations. The taluk-wise data are, however, presented for the Rural population only. Particulars for Kakinada and Rajahmundry cities are also presented separately.

A total number of 44 males and 9 females have been returned as fulltime students in the Age-group 35-59 in this district. These elderly persons might be pursuing advanced studies in religion such as Christian missionary trainees, or in Vedas, Music or other Fine Arts, etc., or teacher trainees and hence classified as fulltime students.

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note: Minor Groups having less than 1% of workers of the respective Division (Less than 0.5% in case of Minor Groups of Division 2&3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification (1)	Total		
	Persons (2)	Males (3)	Females (4)
			EAST GODAVARI
ALL DIVISIONS	483,502	346,716	136,786
* *DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING*	67,843	64,122	3,721
Major Group 00—Field Produce and Plantation crops	5,476	4,995	481
Minor Group 006—Production of fruits and nuts in plantation, vines and orchards	4,688	4,288	400
Major Group 01—Plantation Crops	953	815	138
Major Group 02—Forestry and Logging	860	557	303
Major Group 03—Fishing	20,915	19,821	1,094
Minor Group 030—Production of fish by fishing in sea	4,285	4,084	201
Minor Group 031—Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	16,570	15,678	892
Major Group 04—Livestock and Hunting	39,639	37,934	1,705
Minor Group 040—Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	36,485	35,812	673
Minor Group 041—Rearing of sheep and production of wool	1,094	854	240
Minor Group 042—Rearing and production of other animals (mainly for slaughter) such as pig	1,514	1,052	462
* *DIVISION 1—MINING AND QUARRYING*	5,004	2,894	2,110
Major Group 10—Mining and Quarrying	5,004	2,894	2,110
Minor Group 107—Quarrying of stone (including slate), clay, sand, gravel, limestone	4,991	2,882	2,109
* *DIVISION 2 & 3 MANUFACTURING*	152,511	90,672	61,839
Major Group 20—Foodstuffs	18,618	8,692	9,926
Minor Group 200—Production of rice, atta, flour, etc. by milling dehusking and processing of crops and foodgrains	3,635	3,105	530
Minor Group 201—Production of sugar and syrup from sugarcane in mills	1,722	1,704	18
Minor Group 206—Production of butter, ghee, cheese and other dairy products	8,642	513	8,129
Minor Group 207—Production of edible fats and oils (other than hydrogenated oil)	2,184	1,621	563
Minor Group 209—Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	1,536	968	568
Major Group 21—Beverages	1,884	1,807	77
Minor Group 214—Production of aerated and mineral water	1,095	1,075	20
Major Group 22—Tobacco products	5,853	3,008	2,845
Minor Group 221—Manufacture of cigars and cheroots	1,171	1,114	57
Minor Group 222—Manufacture of cigarette and cigarette tobacco	1,324	549	775
Minor Group 226—Manufacture of other tobacco products	3,294	1,284	2,010
Major Group 23—Textile-Cotton	38,283	21,002	17,281
Minor Group 231—Cotton spinning (other than in mills)	10,275	697	9,578
Minor Group 235—Cotton weaving in Handlooms	25,809	18,757	7,052
Major Group 24—Textile-Jute	7,477	2,021	5,456
Minor Group 244—Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	7,277	1,894	5,383
Major Group 25—Textile-Wool	11	3	8

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note: Minor Groups having less than 1% of workers of the respective Division (Less than 0.5% in case of Minor Groups of Division 2&3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification (1)	Total		Total
	Persons (2)	Males (3)	Females (4)
			EAST GODAVARI
Major Group 26—Textile-Silk	425	319	106
Major Group 27—Textile-Miscellaneous	26,723	10,446	16,277
Minor Group 272—Embroidery and making of crepe lace and fringes	5,529	6	5,523
Minor Group 273—Making of textile garments including raincoat and headgear	10,256	8,733	1,523
Minor Group 277—Manufacture of coir and coir products	6,120	284	5,836
Minor Group 279—Processing and manufacture of textile products not covered above	4,279	1,159	3,120
Major Group 28—Manufacture of wood and wooden products	22,586	15,974	6,612
Minor Group 281—Manufacture of wooden furniture and fixtures	2,067	2,061	6
Minor Group 288—Manufacture of materials from cork, bamboo, cane, leaves and other allied products	10,323	3,760	6,563
Minor Group 289—Manufacture of other wood and allied products not covered above	8,810	8,784	26
Major Group 29—Paper and paper products	782	655	127
Major Group 30—Printing and publishing	960	954	6
Major Group 31—Leather and leather products	4,449	4,268	181
Minor Group 311—Manufacture of shoes and other leather footwear	4,065	3,899	166
Major Group 32—Rubber, Petroleum and Coal products	92	91	1
Major Group 33—Chemicals and Chemical Products	909	681	228
Major Group 34-35—Non-metallic Mineral Products other than petroleum and coal	5,828	4,577	1,251
Minor Group 340—Manufacture of structural clay products such as bricks, tiles	1,240	928	312
Minor Group 350—Manufacture of earthenware and earthen pottery	3,293	2,622	671
Major Group 36—Basic Metals and their products except machinery and transport equipment	5,503	5,340	163
Minor Group 365—Manufacture of brass and bell metal products	1,134	1,104	30
Minor Group 366—Manufacture of aluminium products	1,166	1,101	65
Minor Group 369—Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36,37,38 and 39)	2,418	2,386	32
Major Group 37—Machinery (All kinds other than Transport) and electrical equipment	209	208	1
Major Group 38—Transport Equipment	3,078	3,074	4
Minor Group 388—Repairing of bicycles and tricycles	2,092	2,090	2
Major Group 39—Miscellaneous manufacturing industries	8,841	7,552	1,289
Minor Group 393—Manufacture of jewellery, silverware and wares using gold and other precious metals	5,688	5,612	76
Minor Group 399—Manufacture and repair work of goods not assignable to any other group	2,386	1,273	1,113
* *DIVISION 4—CONSTRUCTION*	10,589	9,511	1,078
Major Group 40—Construction	10,589	9,511	1,078
Minor Group 400—Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & Sanitary installations	6,642	6,167	475
Minor Group 401—Construction and maintenance of roads, railways, bridges, tunnels	2,094	1,726	368
Minor Group 403—Construction and maintenance of waterways and, water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	1,805	1,570	235
* *DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES*	1,887	1,831	56
Major Group 50—Electricity and Gas	1,395	1,390	5
Minor Group 500—Generation and transmission of electric energy	326	326	...
Minor Group 501—Distribution of electric energy	1,058	1,053	5
Major Group 51—Water Supply and Sanitary Services	492	441	51

TABLE

INDUSTRIAL CLASSIFICATION BY SEX AND OF PERSONS AT WORK

[Note: Minor Groups having less than 1% of workers of the respective Division (Less than 0.5% in case of Minor Groups of Division 2&3)

Branch of Industry Division, Major Group and Minor Group of Indian Standard Industrial Classification (1)	Total		
	Total		
	Persons (2)	Males (3)	Females (4)
			EAST GODAVARI
Minor Group 510—Collection, purification and distribution of water to domestic and industrial consumers	351	339	12
Minor Group 511—Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	141	102	39
* *DIVISION 6—TRADE AND COMMERCE*	71,116	53,445	17,671
Major Group 60-63—Wholesale Trade	3,015	2,950	65
Major Group 64-68—Retail Trade	65,339	47,836	17,503
Minor Group 640—Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	34,462	21,135	13,327
Minor Group 641—Retail trading in beverages such as tea (leaf), coffee (Seed and powder), aerated water	1,803	1,728	75
Minor Group 644—Retail trading in tobacco, bidi, cigarettes and other tobacco products	4,272	4,159	113
Minor Group 645—Retail trading in fuel such as coke, coal, firewood and kerosene	3,905	2,786	1,119
Minor Group 646—Retail trading in food stuffs like sweetmeat, condiments, cakes, biscuits, etc.	2,320	1,619	701
Minor Group 647—Retail trading in animals	1,363	1,353	10
Minor Group 650—Retail trading in fibres, yarns, dhoti, sarees, readymade garments of cotton, wool, silk, and other textiles and hosiery products (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	3,175	3,103	72
Minor Group 651—Retail trading in toilet goods, perfumes and cosmetics	985	896	89
Minor Group 689—Retail trading in goods unspecified	5,113	4,237	876
Major Group 69—Trade and Commerce Miscellaneous	2,762	2,659	103
Minor Group 694—Money lending (indigenous)	718	682	36
* *DIVISION —7 TRANSPORT, STORAGE AND COMMUNICATION*	23,481	22,982	499
Major Group 70-71—Transport	21,821	21,357	464
Minor Group 700—Transporting by railways	3,461	3,408	53
Minor Group 701—Transporting by tramway and bus service	1,522	1,517	5
Minor Group 702—Transporting by motor vehicles (Other than omnibus)	1,714	1,709	5
Minor Group 703—Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	4,455	4,452	3
Minor Group 705—Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	4,612	4,368	244
Minor Group 706—Transporting by boat, steamer, ferry, etc. by river, canal	5,396	5,242	154
Minor Group 707—Transporting by boat, steamer, ship, cargo boat by sea or ocean	544	544	...
Major Group 72—Storage and Ware Housing	8	8	...
Major Group 73—Communication	1,652	1,617	35
Minor Gronp 730—Postal, telegraphic, wireless and signal communications	1,565	1,543	22
* *DIVISION —8 SERVICES*	104,558	75,145	29,413
Major Group 80—Public Services (This does not include Government Quasi-Government or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education, and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups	17,781	16,833	948
Minor Group 803—Public service in Police	1,961	1,949	12
Minor Group 804—Public service in administrative departments and offices of Central Government	1,149	1,114	35
Minor Group 805—Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	4,660	3,895	765
Minor Group 809—Public services in administrative departments and offices of State Government	10,011	9,875	136

APPENDIX TO TABLE B-IV PART C

Statement showing particulars of workers under Minor Groups accounting for less than 1% of the workers in the concerned Divisions (less than 0.5% in the case of the Minor Groups under Division 2 & 3) who have not been included in the main Table.

Minor Group of Indian Standard Industrial Classification	Workers at Household Industry				Workers in Non-Household Industry etc.			
	Total		Urban		Total		Urban	
	Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
EAST GODAVARI DISTRICT								
005 Production of other crops (including vegetables) not covered above	...	...	...	...	431	54	105	30
007 Production of wood, bamboo, cane reeds, thatching grass etc.	...	...	...	...	3	10	2	1
008 Production of juice by tapping palms	6	...	6	...	24	...	24	...
009 Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	1	...	1	...	242	17	226	17
011 Production of coffee in plantation	...	...	...	...	9	...	1	...
013 Production of tobacco in Plantation	1	...	...	...	428	132	...	2
014 Production of ganja, cinchona, opium	...	...	...	...	331	2	...	...
015 Production of other plantation crops not covered above	...	...	...	...	46	4	46	4
020 Planting, replanting and conservation of forests	...	...	...	...	53	...	1	...
021 Felling and cutting of trees and transportation of logs	1	...	...	...	260	81	9	3
022 Preparation of timber	...	...	...	...	50	...	2	...
023 Production of fuel including charcoal by exploitation of forest	7	143	...	...	65	2	4	...
025 Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	1	...	1	...	83	3	...	...
026 Production and gathering of other forest products not covered above	1	5	...	2	36	69	3	...
032 Production of pearls, conch, shells, sponges by gathering or lifting from sea, river pond	...	...	...	...	59	1	1	...
043 Production of ducks, hens and other small birds, eggs by rearing and poultry farming	47	255	4	39	33	49	18	...
044 Rearing of bees for the production of honey, wax and collection of honey	28	8	2	4	14	6	1	...
045 Rearing of silk worms and production of cocoons and raw silk	1	...	...	...	2	...	...	...
046 Rearing of other small animals and insects	...	...	...	...	14	...	...	...
047 Trapping of animals or games propagation	...	...	...	...	47	5	4	...
048 Production of other animal husbandry products such as skin, bone, ivory and teeth	26	7	26	7	4	...	1	...
100 Mining of coal	...	...	...	...	2	...	...	...
103 Mining of manganese	...	...	...	...	1	...	...	...
105 Mining of other non-ferrous and metallic ores	...	...	...	...	1	...	...	...
108 Mining of chemical earth such as soda ash	...	...	...	...	...	1	...	...
109 Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	...	...	...	...	8	...	7	...
202 Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	53	20	7	1	318	5	5	1
203 Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	5	3	...	3	34	3	7	...
204 Slaughtering, preservation of meat and fish and canning of fish	3	9	1	...	34	...	26	...
205 Production of bread, biscuits, cake and other bakery products	215	75	117	24	118	3	104	2
208 Production of hydrogenated oils (vanaspati)	...	...	...	...	1	...	1	...
210 Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	2	...	2	...	3	...	2	...
211 Production of country liquor	3	...	...	...	3	...	2	...
212 Production of indigenous liquor such as toddy, liquor from mahua, palm juice	134	16	22	6	452	30	33	...
213 Production of other liquors not covered above	12	...	...	...	3	...	1	...
215 Production of ice	6	1	6	1	46	1	42	1
216 Production of ice-cream	7	...	1	...	29	1	21	1
217 Processing of tea in factories	...	...	...	...	5	...	5	...
218 Processing of coffee in curing works	5	...	2	...	19	...	15	...
219 Production of other beverages	1	...	1	...	2	8	...	...
220 Manufacture of bidi	1	...	1	...	53	1	16	1
223 Manufacture of hookah tobacco	3	..	3	...	1	1	1	1
224 Manufacture of snuff	...	1	...	1	2	...	1	...
225 Manufacture of jerda and other chewing tobacco	...	...	...	...	1	...	1	...
230 Cotton ginning, cleaning, pressing and baling	95	109	31	24	33	18	9	4
232 Cotton spinning and weaving in mills	...	...	...	...	573	109	319	58
233 Cotton dyeing, bleaching	289	63	69	24	101	4	48	...
234 Cotton weaving in power looms	5	...	1	...	31	9	27	2
236 Manufacturing of khadi textile in handlooms	8	1	1	1	130	4	125	4
237 Printing of cotton textile	105	10	22	9	40	1	38	1
238 Manufacturing of cotton nets	8	16	1	10	8	9	...	8
239 Manufacturing of cotton, cordage, rope and twine	82	294	27	118	40	4	31	1

EXPLANATORY NOTE

C-SERIES—SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to composition of Sample Households, Age, Sex, Marital Status, Education, Mother-Tongue, Bilingualism and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below:

C-I	Composition of Sample Households by relationship to head of family classified by size of land cultivated
C-II	Age and Marital Status
C-III	Age, Sex and Education
	Part A– All areas
	Part B– Urban areas
	Part C– Rural areas
C-IV	Single Year Age Returns
C-V	Mother-Tongue (in alphabetical order)
C-VI	Bilingualism
C-VII	Religion
C-VIII	Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers
	Part A– Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*
	Part B– Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

All the above Tables pertaining to East Godavari district except Tables C-IV Single Year Age Returns and C-VI Bilingualism are reproduced in this book.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households, separately for Total, Rural and Urban areas in the district. The Households in the Rural areas are further classified into 3 Economic Categories, viz., (i) Households engaged neither in cultivation nor in Household Industry, (ii) Households engaged in Household Industry only, (iii) Households engaged in Cultivation only. In respect of the 3rd category of Households the data are furnished separately for each of the eleven classes of Households according to the size of land cultivated, viz., (i) Less than one acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0-12.4 acres, (vii) 12.5-14.9 acres, (viii) 15.0-29.9 acres, (ix) 30.0-49.9 acres, (x) 50.0+ acres and (xi) Size of holding unspecified. The composition of the Households is given in terms of the heads of Households, spouses of heads of Households, married sons and other married relations, other relations and unrelated persons. This Table will thus indicate the strength of the joint family system and will therefore be of sociological interest.

TABLE C-II—AGE AND MARITAL STATUS

This Table prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for Total, Rural and Urban population in the district, and for the Rural population in each of the taluks and for Kakinada and Rajahmundry cities. This is a very important demographic Table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Status and also in different Age-groups. The Age-groups, viz., 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and Age not stated adopted in this Table conform to international requirements. Age-group 0-9 is automatically treated as 'never married' for the purpose of this Table. The proportion of increase or decrease in the various Marital Status since the last Census and the trends in the age of marriage can be studied from this Table. From the data on married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III—AGE, SEX AND EDUCATION

This Table gives the distribution of Total population by broad Educational levels, Sex and by broad Age-groups. The Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to Urban and Rural areas respectively. The educational levels given for all areas and Rural areas in Part A and Part C are the same while in respect of Urban areas in Part B more detailed educational levels have been adopted. These educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by educational levels. This Table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-V—MOTHER-TONGUE

This Table exhibits separately for the Total, Rural and Urban population of the district, and only for the Rural population of each taluk and Urban population of Kakinada and Rajahmundry cities, the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in this Table in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the persons' mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII—RELIGION

This Table gives separately the distribution of Total, Rural and Urban population of the district and Rural population only of taluks and of Kakinada and Rajahmundry cities according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion-wise down to the village level. Since the 1951 Census this practice has been discontinued.

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

Part A—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS *AMONG SCHEDULED CASTES*

Part B—CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS *AMONG SCHEDULED TRIBES*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately, the total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of workers, into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates amongst the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to East Godavari district have also been prepared and incorporated in this book under the series "SCT Tables."

TABLE C-I

COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY

EXPLANATORY NOTE

D-SERIES

MIGRATION TABLES

The Tables in this series show the migration trends analysed on the basis of the results of the 1961 Census. The data are presented in the following seven Tables, which are reproduced upto district level and for all Cities and Town-Groups in the publication "Census of India, 1961-Volume II-Andhra Pradesh-Part II-C Cultural and Migration Tables" and these may be referred to for details.

D-I	Non-Indian Nationals
D-II	Place of Birth
D-III	Migrants classified by place of birth and duration of residence in place of enumeration
D-IIIA	Migrants from other States and outside India (less than 5 years duration) classified by Age-groups
D-IV	Migrants to Cities classified by Sex, broad Age-groups, educational levels and in case of Workers also by occupational Divisions and Groups
D-V	Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities
D-VI	Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this Hand Book only Tables D-I and D-II showing the Non-Indian Nationals and other migrants in East Godavari district are reproduced.

TABLE D-I—NON-INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sex-wise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups, viz.

(i) Nationals of Countries in Asia beyond India (including U.S.S.R.)

(ii) Nationals of Countries in Europe (excluding U.S.S.R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of Countries in Oceania

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have been shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'born in India'.

TABLE D-II—PLACE OF BIRTH

This Table prepared as in all previous Censuses gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two-fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and vice-versa.

EXPLANATORY NOTE

E-SERIES

HOUSING TABLES

The Tables in this series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to each Census House were collected on a standardised All India Schedule called 'House List' which is reproduced below:

CENSUS OF INDIA 1961

HOUSE LIST

Name of District..... .. .. (Code No.....)

Name of Island/Taluk/Tehsil/Thana/Anchal/Town..... ..... (Code No.....)

Name of Village/Ward/Mohalla/Enumerator's Block..... (Code No.....)

Line No.	Building Number (Municipal or local authority or Census number, if any)	Building Number (Col.2) with sub-numbers for each Census House	Purpose for which Census House used, *e.g.*, dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc.	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product (s) repair or servicing undertaken	Average No. of persons employed daily last week (including proprietor, or Household Numbers, if working)	Kind of fuel or power if machinery is used
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Description of Census House		Sub-number of each Census Household with Census House Number (Column 3)	Name of head of Household	No. of rooms in Census Household	Does the Household live in own or rented house? (a) Own(O), (b) Rented (R)	No. of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)	(18)

The data have been collected uniformly for the first time at the present Census in the above form and are presented in the following five Tables:

E-I Census Houses and the uses to which they are put

E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwellings

E-III Census Houses used as factories and workshops classified by Industry, *Power* and *no Power* used and size of employment

E-IV Distribution of Sample Households living in Census Houses used wholly and partly as dwellings by predominant material of wall and predominant material of roof

E-V Sample Households classified by number of members and by number of rooms occupied

All the above Tables give information upto taluk level, except Table E-III which contains figures upto the district level only, and also in respect of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, 1961, Vol. II — Andhra Pradesh, Part IV-B—Housing and Establishment Tables" and it may be referred to for full details. In this Hand Book only "Table E-I Census Houses and the uses to which they are put" pertaining to the East Godavari district is reproduced.

TABLE E-I—CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

"Census House" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-cum-dwelling or a place of business, workshop, school, etc., with a separate entrance. If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase, or a common courtyard, leading to a main gate, they are considered as separate Census Houses. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

District/Taluk/ Town with population of 50,000 or more	Total Rural Urban	Total No. of Census Houses	Census Houses vacant at the time of House listing	Occupied Census Houses used as: Dwellings	Shop-cum-dwellings	Work shop-cum-dwellings	Hostels, sarais, dharmashalas, tourist homes and inspection houses	Shops excluding eating houses	Business houses and offices	Factories, workshops and work sheds	Schools and other Educational institutions including training classes, coaching and shop classes	Restaurants, sweetmeat shops and eating places	Places of entertainment and Community gathering (Panchayat Ghar)	Public Health and Medical institutions, Hospitals, Health Centres, Doctor's Clinics, Dispensaries etc.	Others

EXPLANATORY NOTE

SCT-SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of Special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables:

SCT-I	Industrial classification of persons at work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes
SCT-II	Age and Marital Status for Scheduled Castes and Scheduled Tribes
SCT-III	Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes
SCT-IV	Religion for Scheduled Castes and Scheduled Tribes
SCT-V	Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in *Rural areas only* for Scheduled Castes and Scheduled Tribes

All the above Tables except Table SCT-IV are reproduced upto district level in this book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I	Persons not at work classified by sex, type of activity and educational levels *for Scheduled Castes only*
ST-I	Mother-Tongue and Bilingualism *for Scheduled Tribes*
ST-II	Persons not at work classified by sex and type of activity *for Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures for all the taluks except Rampachodavaram, Yellavaram and Pithapuram independent sub-taluks are also given in this book in respect of Scheduled Castes and in the case of Scheduled Tribes figures are given for three taluks, viz., Rampachodavaram, Yellavaram and Pithapuram in which their proportion is higher than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these communities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The village-wise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Castes in Andhra Pradesh is given below:

Note : Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Buddhism cease to belong to these Castes

(1) Throughout the State :

1 Chalavadi
2 Chamar, Mochi or Muchi
3 Madiga
4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal Khammam, and Nalgonda districts :

1 Adi Andhra
2 Adi Dravida
3 Arundhatiya
4 Bariki
5 Bavuri
6 Chachati
7 Chandala
8 Dandasi
9 Dom, Dombara, Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali
15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala

21 Paki or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellamalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Malajangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below:

Note: Members of Scheduled Tribes may belong to any Religion

(1) Throughout the State:

1 Chenchu or Chenchwar

Koya or Goud with its sub-sects Rajah or Rasha Koyas, Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts:

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Kondareddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia–Bentho Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras–Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts:

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the taluks of the district.

An abstract of the total Scheduled Castes and Scheduled Tribes population in East Godavari district and its percentage to the total general population is given talukwise in the statement below:

Name of the District/Taluk	Total Rural Urban	General population	Scheduled Castes population together with percentage to general population	Scheduled Tribes population together with percentage to general population
(1)	(2)	(3)	(4)	(5)
EAST GODAVARI DISTRICT	T	2,608,375	459,656 (17.62)	100,343 (3.85)

TABLE SCT-I—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the Rural and Urban areas of the district, the population of each Scheduled Caste and Scheduled Tribe classified by Industrial Category of persons at work and Non-Workers by sex. The Table is divided into two parts. Part A relates to Scheduled Castes while Part B relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them and the sector of Industry in which the working population is engaged. The data are presented for the Rural and Urban areas separately.

TABLE SCT-II—AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital Status. This Table is divided into two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population, however, the Age-groups are restricted to 0-14, 15-44, 45+ and Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of the Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group. Such communitywise data by Age and Marital Status for Scheduled Castes and Sche-

duled Tribes are being given for the first time at the present Census. The Age distribution and Marital Status data will give an indication as to whether the population of a Caste/Tribe is growing or declining.

TABLE SCT-III—EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled Tribe separately for Rural and Urban areas. This Table is divided into Part A (i) and Part A (ii) relating to the Scheduled Castes and Scheduled Tribes respectively in Urban areas and Part B (i) and Part B (ii) relating to the Scheduled Castes and Scheduled Tribes respectively in Rural areas. In the case of Urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III Part A and in the case of Rural areas the data are given as in Table B-III Part B. This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-V—SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AREAS ONLY

This Table shows the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. The sizes of landholdings and types of interest in land cultivated adopted in this Table are the same as those adopted in Table B-XI.

TABLE SC-I—PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity, viz., fulltime students, persons seeking employment for the first time, unemployed but seeking work and others, by educational levels. The broad educational levels adopted are illiterate, literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual caste and the figures are exhibited for Total, Rural and Urban population. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

This Table has also been prepared for Rural areas of all the taluks except Ramachandrapuram, Rampachodavaram independent sub-taluk, Yellavaram independent sub-taluk and Pithapuram independent sub-taluk in the district as the percentage of Scheduled Castes population in the Rural areas of those taluks exceeds the State's average proportion of 14.88%.

TABLE ST-I—MOTHER-TONGUE AND BILINGUALISM FOR SCHEDULED TRIBES

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the Total, Rural and Urban areas in the district and for the Rural areas of Rampachodavaram independent sub-taluk, Yellavaram independent sub-taluk and Prathipadu independent sub-taluk as the percentage of the Scheduled Tribes population to total population in the Rural areas of those taluks exceeds the State's average of 4.27%. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary language is indicated in brackets after the subsidiary language under column 7 of the Table.

TABLE ST-II—PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY FOR SCHEDULED TRIBES

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I, viz., fulltime students, persons seeking employment for the first time, persons unemployed but seeking work and others.

In this Table the particulars are given according to the individual Tribe while in Table SC-I similar particulars in respect of Scheduled Castes are given for Total Scheduled Castes as a whole, by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

The data in this Table are presented for the Total, Rural and Urban areas of the district and also for the Rural areas of Rampachodavaram, Yellavaram and Prathipadu Independent Sub-Taluks as the percentage of Scheduled Tribe population to total population in the Rural population of these taluks exceeds the State's average of 4.27%.

TABLE SCT-I Part A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX *FOR SCHEDULED CASTES*

PART IV

VILLAGE AND TOWN DIRECTORY

EXPLANATORY NOTE

VILLAGE AND TOWN DIRECTORY

This Directory renders an account of each village, as also each Ward and each Enumerator's Block of a town. It gives the Location Code Number and name of each village/town, area of the village/town, and where inhabited, the number of Occupied Residential Houses, Census Households, Total Population, Population of Scheduled Castes and Scheduled Tribes, Literate population and Workers classified into the following nine Industrial Categories of Workers, and the Non-Workers:—

I Cultivator

II Agricultural Labourer

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Household Industry

V Manufacturing other than Household Industry

VI Construction

VII Trade and Commerce

VIII Transport, Storage and Communications

IX Other Services; and

X Non-Workers

The data are presented talukwise, first for the Rural portion in the "Village Directory" and next for the Urban portion in the "Town Directory". In the Village Directory the villages have been arranged in the ascending order of the Location Code Numbers assigned to the villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. The taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Numbers of each village and town and other particulars will help the easy location of the villages.

In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly fall outside the town limits the particulars for that portion included in the town limits i.e., "Urban Portion" are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits i.e., "Rural Portion" the data are given in the Village Directory along with other villages. The term "Rural" is indicated immediately after the name of such villages to make the position clear. In the presentation of data for the towns the particulars have been exhibited in ascending order of Municipal Wards or Blocks and also by Enumerator's Block and not according to the villages constituting the town. In order that each Enumerator's Block may be located, the jurisdiction of each Block, i.e., the houses covered by each Enumerator's Block in towns are indicated at the beginning of the Town Directory.

Under column 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and by the Municipal authorities concerned. In respect of certain villages for which the area particulars are not available the abbreviation "N.A." has been recorded in this column. As the area of a taluk comprises not only the area of the villages but also the area of Reserved Forests, etc., within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

Under columns 9 to 41 the Total population Scheduled Castes and Scheduled Tribes population, Literate population, total number of Workers under each of the nine categories and Non-Workers is given by sex for each village/town.

The taluk map found at the beginning of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines, the rivers, if any, in the taluk. In this map the Location Code Number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance, etc., if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages and villages of different sizes of population, i.e., below 2,000, 2,000-4,999, 5,000 and above are distinguished by distinct designs. An alphabetical list of villages with the Census Location Code Numbers indicated against them is given after the taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

The information relating to Educational facilities, Medical and Public Health facilities; Drinking water facilities, Communication and Transport facilities and Electrification is also given villagewise in this section for the first time besides the population data. These facilities are shown by symbols as explained below immediately after the names of the villages under columns 3 to 7.

(*i*) *Educational facilities are shown by the following symbols under column 3:-*

P : Primary School

M : Middle School

H : High School

C : Institutions of Higher Education including Colleges

T : Technical Institutions

(*ii*) *Medical and Public Health facilities are shown by the following symbols under column 4:-*

D : Dispensaries

Rhc : Rural Health Centres (Primary Health Centres)

Hos : Hospitals

Mcw : Maternity Child Welfare Centres

(*iii*) *Drinking Water facilities are shown by the following symbols under column 5:-*

S : Safe or Protected water supply including Tube wells, etc.

W : Well

Tk : Tank

Riv : River

C : Canal

(*iv*) *Communications and Transport facilities are shown by the following symbols under column 6 :-*

Po : Post Office

To : Telegraph Office and Public Call Office

Rh : Rest Houses and Choultries

R : Road

Rly : Railway

(*v*) *Electrification facilities are shown by the following symbols under column 7 :-*

E : Electricity

E (I) : Electricity in Industrial use

E (A): Electricity in Agricultural use

E (D): Electricity in Domestic use

Where figures like 5P, 2H, etc., occur they denote that the village or town has 5 Primary Schools, 2 High Schools, etc.

Besides presenting the information relating to the above facilities in the Village/Town Directory, certain other important particulars, viz., sources of irrigation, crops raised, value of lands, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainment (Cinemas), Industrial Establishments and Rural Handicrafts are also given talukwise in separate Sub-Tables immediately after the Town Directory. The Sub-Tables are numbered as follows:—

Sub-Table-1 :	Sources of Irrigation, crops raised and value of land
Sub-Table-2 :	Co-operative Societies
Sub-Table-3 :	Police Stations
Sub-Table-4 :	Veterinary Hospitals
Sub-Table-5 :	Reading Rooms
Sub-Table-6 :	Public Entertainment (Cinemas)
Sub-Table-7 :	Industrial Establishments
Sub-Tables-8, 9 & 10 :	Rural Handicrafts

In the Sub-Table relating to the sources of Irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land, the various important crops raised and the sources of irrigation are given village-wise. Only the Location Code Numbers have been given in the Sub-Table without giving the names of the villages. Villages having land of same value are grouped together. The following abbreviations are used in this Sub-Table:—

Cereals

J : Jonna or Cholam or Jowar

K : Korra

M: Maize

P : Paddy

R : Ragi

S : Sajja or Cumbu

Sa : Samai

V : Variga

W: Wheat

Pulses

Bg : Bengalgram

Blg : Blackgram

Gg : Greengram

Hg : Horsegram

Rg: Redgram

Other Crops

Bl : Betal vines

C : Cotton

Cor: Coriander

Other Crops—Contd.

Ch: Chillies
Cs: Castor Seeds
G : Groundnut
Gi: Gingelly
O : Onions
Su: Sugar Cane
T : Tobacco
Tu: Turmeric

Irrigation Sources

C : Canal
Riv: River
Tk: Tank or Kunta
Tw: Tube Well
W : Well

In the Sub-Table relating to Co-operative Societies, the various types of Co-operative Societies functioning in each village have been presented talukwise. The data for the district are given in the beginning followed by the particulars relating to taluk. The abbreviations used for the different types of Co-operative Societies are given below. If a village is served by a Co-operative Society of another village it has been indicated accordingly.

AICS	Agricultural Industrial Co-operative Society
BCS	Blacksmiths Co-operative Society
CS	Co-operative Society
CICS	Cottage Industrial Co-operative Society
ECS	Employers' Co-operative Society
FGCS	Fruit Growers' Co-operative Society
FICS	Fishermen Co-operative Society
FLCS	Field Labourers' Co-operative Society
HBCS	House Building Co-operative Society
HRCS	Handpounding Rice Co-operative Society
ICS	Irrigation Co-operative Society
LCCS	Labour Contract Co-operative Society
LSCS	Large Sized Co-operative Society
LUCS	Local Union Co-operative Society
LWCS	Lime Workers' Co-operative Society
LWICS	Lime Workers' Industrial Co-operative Society
MCS	Marketing Co-operative Society
MSCS	Milk Supply Co-operative Society
OWCS	Oil Workers' Co-operative Society
PCS	Potters' Co-operative Society
PJCS	Palm Jaggery Co-operative Society
RICS	Rice Industrial Co-operative Society
RPCS	Rickshaw Pullers' Co-operative Society
S&AWCS	Sugar & Abkari Workers' Co-operative Society
SGCS	Sugarcane Growers' Co-operative Society
SMW&SCS	Sugar Mills Workers' & Staff Co-operative Society
SSCS	Students' Stores Co-operative Society
TCCS	Training Centre Co-operative Society
TCS	Teachers' Co-operative Society
T&LWICS	Tanners & Leather Workers' Industrial Co-operative Society
WCS	Weavers' Co-operative Society

In the other Sub-Tables relating to Police Stations, Veterinary Hospitals, Reading Rooms and places of Public Entertainment (Cinemas) also, the data are presented in the same form as explained above, i.e., first for the district and then for each taluk. Only the names of places where such facilities exist are given.

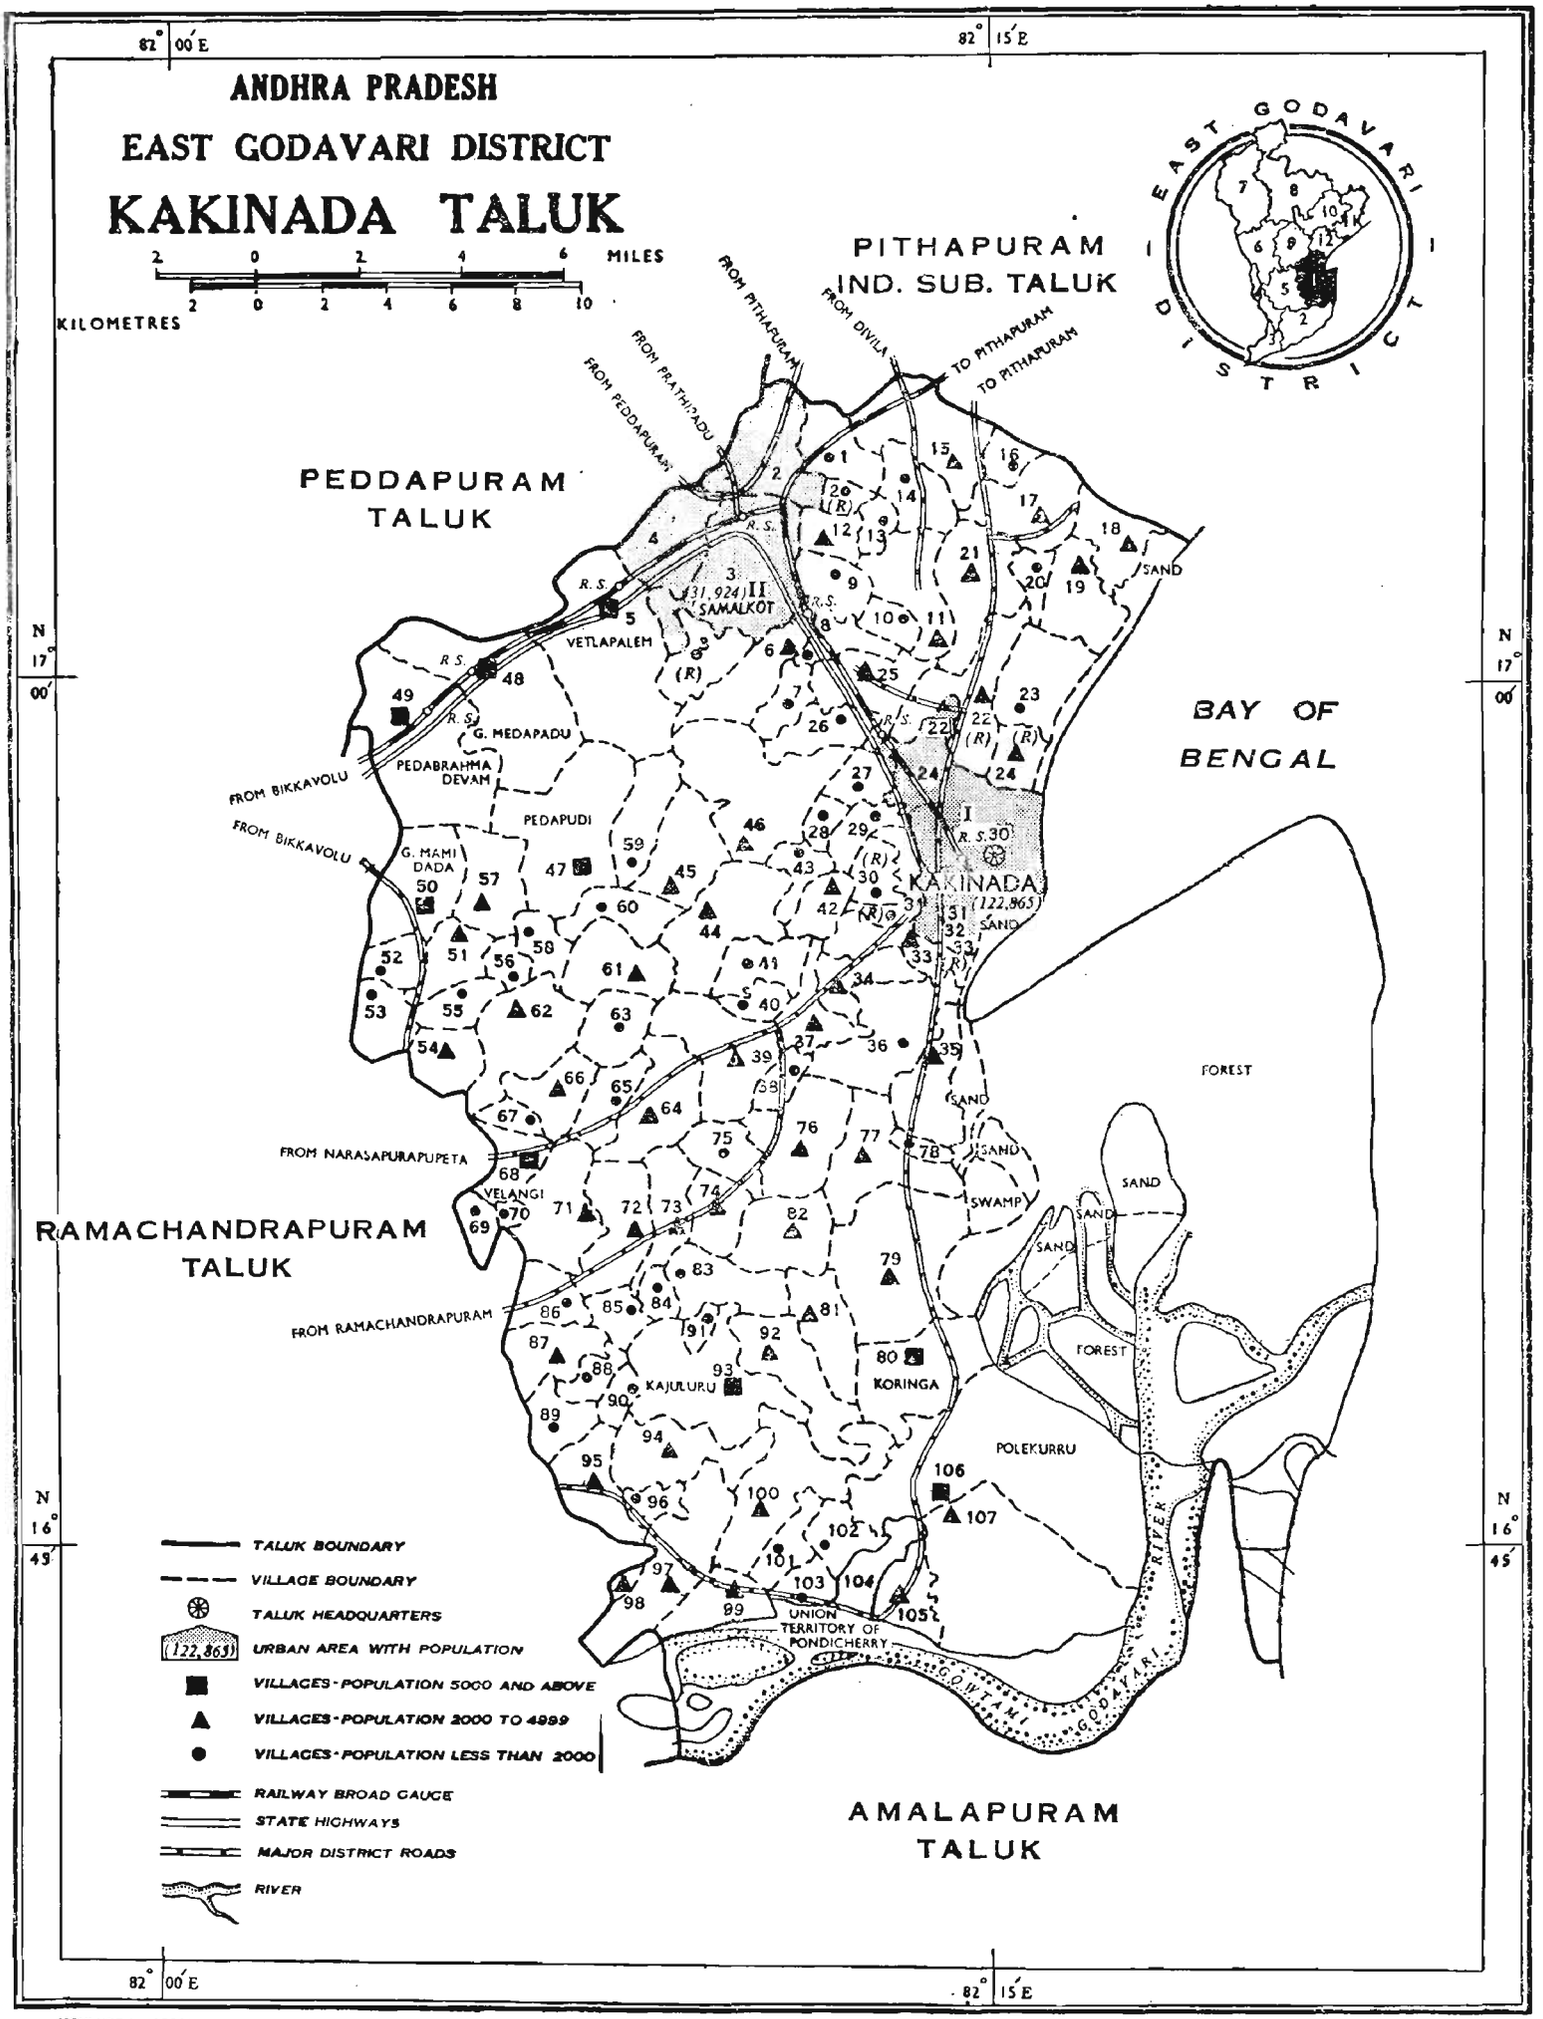

In the Sub-Table relating to Industrial Establishments, the number of units under various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of Industries and Crafts issued to the village school teachers in connection with the Rural Craft Survey. In this schedule the data were to be given by the numbers of families; and as such, the families which had members engaged in any of the industries had been taken as units for that industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data were taken from other sources as well such as the Village Directory furnished by the Tahsildars, and the survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are, however, likely to be very few. The particulars are given separately for the Rural and Urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups of the Indian Standard Industrial Classification, showing the total number of establishments within brackets next to each Minor Group Code Number, for Total, Rural and Urban areas separately. Then, the figures for the various taluks are presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each village/town are shown the Minor Group Code Numbers of the Industries or Crafts found in that village/town with the number of units engaged in that Minor Group in brackets against each of the Groups.

In the three Sub-Tables relating to Handicrafts information is given about the various Crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of highly skilled craftsmen of each community, and the distribution of articles of crafts by main material used, source of design, manufacture, marketing and earnings. These particulars were mainly collected through a schedule of Industries and Crafts issued to the village school teachers in rural areas and to the Municipal authorities in the Municipal areas. In respect of cities the information was collected through the staff of the Census Tabulation offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the Houselists prepared at the time of House-numbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India; 1961-Volume II-Andhra Pradesh-Part VII-A" and may be referred to.

In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, etc., are given for each village having such importance. A detailed report on the Fairs and Festivals is, however, given in "Census of India, 1961-Volume II-Andhra Pradesh-Part VII-B" and may be referred to.

All the information given in the various Sub-Tables in this section are based on the information furnished by the Heads of Departments, the District Officers, the Tahsildars and the Municipal authorities concerned.

KAKINADA TALUK

SYED UDDIN HASSAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

AMALAPURAM TALUK

MOHI UDDIN HASSAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

AMALAPURAM TALUK

1961 Location Code No. (1)	Name of Village (2)
99	Ainapuram
11	Ainavilli
60	Allavaram
57	Amalapuram
81	Anathavaram
25	Annampalle
43	A. Vemavaram
53	Bandarulanka
97	Bantumilli
64	Bendamurlanka
79	Bhatnavilli
85	Bheemanapalle
59	Bodasakurru
107	Brahmasamedhyam
83	Cheyyeru
95	Chinagadavilli
9	Chintanalanka
106	Chirrayanam
69	Devaguptam
103	Donthikurru
26	Gadilanka
48	Gangalakurru
102	Geddanapalle
61	Godi
62	Godilanka
87	Gollavilli
68	Gopavaram
74	Gudala
82	Gunnepalle
52	Gunnepalle Agraharam
33	Guttenadeevi
34	G. Vemavaram
56	Idarapalle
75	Immidivarappadu
55	Indupalle
30	I. Polavaram
3	Irusumanda
44	Janupalle
22	Kamini
104	Kandikuppa
105	Katrenikona
20	K. Chintalapudi
38	Kesanakurru
18	K. Jagannadhapuram
24	Komanapalle
29	Komaragiri
65	Komaragiripatnam
21	Kondukuduru
39	Kothalanka
16	Kotipalle Bhaga
19	Krapa
86	Kunavaram
100	Kundaleswaram
93	Lakshmivada
49	Machavaram
7	Madupalle
42	Magam
63	Mogallamuri
4	Mosalapalle
2	Mukkamala
40	Mummidivaram
91	Munipalle
27	Muramalla
101	Nadavapalle
46	Nadipudi
45	Nallamilli
50	Nandampudi
84	Nangavaram
5	Nedunuru
90	Nimmakayala Kothapalle
47	Palagummi
35	Pallamkurru
6	Pasupalle
28	Pasuvullanka
31	Patha Injaram
94	Pedagadavilli
98	Penumalle
58	Peruru
41	Pothukurru
71	Rellugadda
54	Sakurru
78	Samanasa
66	Samanthakurru
17	Sanapallelanka
92	Sannavilli
12	Sirasavilli Savaram
14	Siripalle
89	Surasaniyanam
76	Tandavapalle
67	T. Challapalle
73	Thadikonda
23	Thanelanka
37	Thillakuppa
51	Thondavaram
70	Thurpulanka
36	T. Kothapalle
15	Tottaramudi
88	Uppalaguptam
96	Uppudi
1	Vakkalanka
77	Vanne Chintalapudi
10	Veeravallipalem
8	Veluvalapalle
13	Vilasa
80	Vilasavilli
32	Yedurlanka
72	Yentrikona

PRATHIPADU
IND. SUB. TALUK

Note: No. 28 merged with No. 27
No. 78 merged with No. 77

MOHI UDDIN HASSAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

PRATHIPADU INDEPENDENT SUB-TALUK

1961 Location Code No.	Name of Village
(1)	(2)
96	A. Annavaram
36	Amirekhala
57	Anantharam
58	Ankampalem
38	Anumarthi
26A	Arelladhara
95	Arempudi
74B	Atchampeta
40	Avelti
52A	Balarampuram
88	Bapabhupalapatnam
31	Bapandhara
66	Bavurubaka
21	Bhadravaram
92	Billavaka
33	Buradakota
49	Chakirevulapalem
46	Chelluru
15	Chillangi
56	China Mallapuram
22	China Sankarlapudi
72	Chintaluru
42	Dabbadi
48	Dabbavari Pydipala
91	Dharajagannadhapuram
60	Dharamallapuram
29	Diguvadharapalle
51D	Diguvasivada
64A	*Doparthi*
7	East Lakshmipuram
50C	Eguvadharapalle
51C	Eguvasivada
20	Eluru
62	Erakapuram
69A	Gajjanapudi
50B	Gangavaram
65	Gavirampeta
87	Gidajam
41	Ginnelaram
26F	Girijanapuram
26	Gokavaram
74	Gondi
74A	G. Kottapalle
54	Gummaregula
2	J. (Jaddangi) Annavaram

The following abbreviations have been used in the above Sub-Table :—

N.A. : Not Available

Cereals

J : Jonna or Cholam or Jower
K : Korra
M : Maize
P : Paddy
R : Ragi
S : Sajja or cumbu
Sa : Samai
V : Variga
W : Wheat

Pulses

Bg : Bengalgram
Blg : Blackgram
Gg : Greengram
Hg : Horsegram
Rg : Redgram

Other Crops

Bl : Betal vines
C : Cotton
Cor : Coriander
Ch : Chillies
Cs : Castor Seeds
G : Groundnut
Gi : Gingelly
O : Onions
Su : Sugar Cane
T : Tobacco
Tu : Turmeric

Sources of Irrigation

C : Canal
Riv : River
Sc : Spring Channel
Tk : Tank or Kunta
Tw : Tube Well
W : Well

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY

INDUSTRIAL ESTABLISHMENTS

EAST GODAVARI DISTRICT

[*NOTE*: In the Sub-Table below relating to Industrial Establishments, the units of various industries existing in villages and towns are given. The particulars are given separately for the Rural and Urban areas. The industries are arranged, first for the district total in the ascending order of Minor Groups of Industries under the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group code number, for Total, Rural and Urban separately. The figures for the various taluks are also presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each Village/Town are shown the Minor Group code numbers of the Industries or Crafts found in that Village/Town with the number of units engaged in the Minor Group in brackets against each of the Groups.]

Detailed description of Industrial Code (Minor Group) Numbers under which the Industrial Establishments are arranged in the above Sub-Table

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
044	Rearing of bees for the production of honey, wax and collection of honey
048	Production of other Animal Husbandry products such as skin, bone, ivory and teeth
200	Production of rice, atta, flour etc. by milling, dehusking and processing of crops and food grains
201	Production of sugar and syrup from sugarcane in mills
202	Production of indigenous sugar, gur from sugar cane or Palm juice and production of candy
205	Production of bread, biscuits, cake and other bakery products
206	Production of butter, ghee, cheese and other dairy products
207	Production of edible fats and oils (other than hydrogenated oil)
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge
210	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
214	Production of aerated and mineral water
215	Production of ice

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY—*Contd.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
216	Production of ice cream
218	Processing of coffee in curing works
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
222	Manufacture of cigarette and cigarette tobacco
226	Manufacture of other tobacco products
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
232	Cotton spinning and weaving in mills
233	Cotton dyeing, bleaching
235	Cotton weaving in handlooms
237	Printing of cotton textile
238	Manufacturing of cotton nets
239	Manufacturing of cotton, cordage, rope and twine
240	Jute pressing and baling
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
260	Spinning and weaving of silk textile in mill
264	Weaving of silk textile by handloom
265	Printing of silk textile
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including rain coats and head gear
274	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags
277	Manufacture of coir and coir products
278	Manufacture of umbrellas
280	Sawing and planing of wood
281	Manufacture of wooden furniture and fixtures
283	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures
284	Manufacture of other wooden products such as utensils, toys, artwares
286	Manufacture of plywood products such as tea chest
287	Manufacture of boxes and packing cases other than plywood
288	Manufacture of materials from cork, bamboo, cane leaves and other allied products
289	Manufacture of other wood and allied products not covered above
290	Manufacture of pulp from wood, rags, waste paper, and other fibres and the conversion of such pulp into any kind of paper and paper board in mill
291	Manufacture of pulp from wood, rags, waste paper and other fibres and the conversion of such pulp into any kind of paper and paper board hand made
292	Manufacture of products such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp
302	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry
303	All types of binding, stitching, sizing and other allied work connected with binding industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other leather footwear
313	Manufacture of leather products (except those covered by code Nos. 311, 312,) such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles
320	Manufacture of tyres and tubes
331	Manufacture of dyes, paints, colours and varnishes
332	Manufacture of fertilizers
334	Manufacture of matches
335	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics, and other toilet preparations except soap
336	Manufacture of soap and other washing and cleaning compounds
337	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)
338	Manufacture of common salt

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY—*Concld.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
339	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)
340	Manufacture of structural clay products such as bricks, tiles
341	Manufacture of cement and cement products
342	Manufacture of lime
343	Manufacture of structural stone goods, stone dressing and stone crushing
344	Manufacture of stonewares, other than images
345	Manufacture of stone images
346	Manufacture of plaster of paris and its products
350	Manufacture of earthenware and earthen pottery
351	Manufacture of chinaware and crockery
352	Manufacture of porcelain and its products
354	Manufacture of glass apparatus
355	Manufacture of earthen images, busts and statues
356	Manufacture of earthen toys and artwares except those covered by code No. 355
357	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above
359	Manufacture of other non-metallic mineral products not elsewhere specified
364	Manufacture of iron and steel furniture
365	Manufacture of brass and bell metal products
366	Manufacture of aluminium products
367	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can
368	Enamelling, glavanising, plating (including electroplating) polishing and welding of metal products
369	Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39.)
370	Manufacture and assembling of machinery (other than electrical) except textile machinery
371	Manufacture and assembling of prime mover and boilers other than electrical equipment, such as diesel engines, road rollers, tractors
372	Manufacture of machine tools.
375	Manufacture of electric lamps and fans
377	Manufacture of all kinds of battery
378	Manufacture of electronic equipment such as radio, microphone
379	Manufacture of electric machinery and apparatus, appliances not specified above
382	Manufacture and assembling of motor vehicles of all types (excepting motor engines)
384	Repairing and servicing of Motor vehicles
386	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines
388	Repairing of bicycles and tricycles
389	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery silver ware and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
395	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen
396	Manufacture of sports goods
399	Manufacture and repair work of goods not assignable to any other group
