(c) Appendix showing total scheduled castes Population-Urban Block-wise .. 214—217

(ii) Special PCA on Scheduld Castes (Total Rural, Urban) 218–19

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH Series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, District Census Tables and certain Analytical Tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of Village and Town Directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory.

The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA up to Tehsil/Town levels. At the beginning of DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/Police Station/C. D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. H. Khan, IAS, Director of Census Operations, Jammu and Kashmir, Srinagar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the Headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,

Registrar General, India.

New Delhi,
the 26th April, 1982.

PREFACE

The compilation and publication of District Census Handbooks has been a traditional feature of the Indian Census since 1951. However, in Jammu and Kashmir State, where no Census was conducted is 1951 due to the unsettled conditions prevailing then, this work was taken up as a regular feature of Census since 1961 with certain improvements and additions in the data content of the publication at the 1971 Census, further enhancing its utility for the Data Users.

The 1981 Series of the District Census Handbook which we have begun with the district of Punch will contain two parts each. Part-A deals with Town and Village Directory and Part-B consists of Town and Village Primary Census Abstract. In 1971 Census there was also third part of the Handbook, published as a separate volume, comprising Administrative and Census Statistics. However, in view of the considerable delay experienced then in getting the relevant Administrative Statistics pertaining to various Departments, compilation of this Volume has been given up at the 1981 Census. It is expected that such statistics would be available to the data users in the usual publications of the State Directorate of Evaluation and Statistics.

The Town Directory of the Handbook consists of seven statements which are almost similar to those adopted for the 1971 Census except that a few new columns have been added to facilitate analysis of the data. A significant addition is of class of town in every statement which has been done on the consideration that the infrastructure of amenities and facilities found in Urban India can best be analysed with reference to this specific parameter. The addition of the column on Civic Administration Status in statements III and IV and population in statements IV and V also serves the same purpose vis-a-vis the respective statements. Due consideration has also been given to the Minimum Needs Programme of the Planning Commission. The columns on Scheduled Caste population in statement IV and adult literacy classes/centres in statement V are a sequal to this programme.

The Village Directory also follows the same pattern as in 1971 census except again for a few additional columns. The column on total population and number of households has been added to facilitate analysis of the other data in the Directory. The column on approach to village is to identify the number of inaccessible villages in the District. The column on number of households living in owned houses or possessing house sites in the village is again intended to cater to the Minimum Needs Programme of the Planning Commission.

It is hoped that with its present content the Handbook would, more than ever, serve as a useful reference publication, particularly for such Administrators and Data Users as have to deal with planning, implementation and evaluation of development programme, including the Minimum Needs Programme, at the grass roots level.

The compilation of the Handbook would not have been possible but for the co-operation extended by the Revenue, Education, Medical, Public Health and other Local Authorities of the District in making relevant data available, for which we owe them our grateful thanks.

It must be stated here that the task of finalising and printing the present volume has fallen on me, since Shri A. H. Khan, IAS, Director of Census Operations, Jammu and Kashmir, under whose able stewardship the Census Operations of 1981 were carried out, retired from Government service by the time the volume could be taken up for compilation.

We are grateful to Shri P. Padmanabha, IAS, Registrar General and Census Commissioner of India and Shri N. G. Nag, Deputy Registrar General (Social Studies) whose detailed instructions, guidance and advice were available all through.

The credit for compiling this Handbook, including analysis of data, belongs to Sh. Abdul Gani, Joint Director, besides S/Sh. H. L. Kalla, Deputy Director, Shamus ud-Din, Tabulation Officer, B. A. Shora, V. K. Chehra, Computors and Z. A. Kawoosa, Assistant Compiler who ably assisted the former in this task and deserve appreciation for their respective contributions.

The Handbook has been provided with six maps, one showing the administrative divisions of Jammu and Kashmir State as in 1981, one pertaining to Doda district and rest to its four constituent tehsils. These

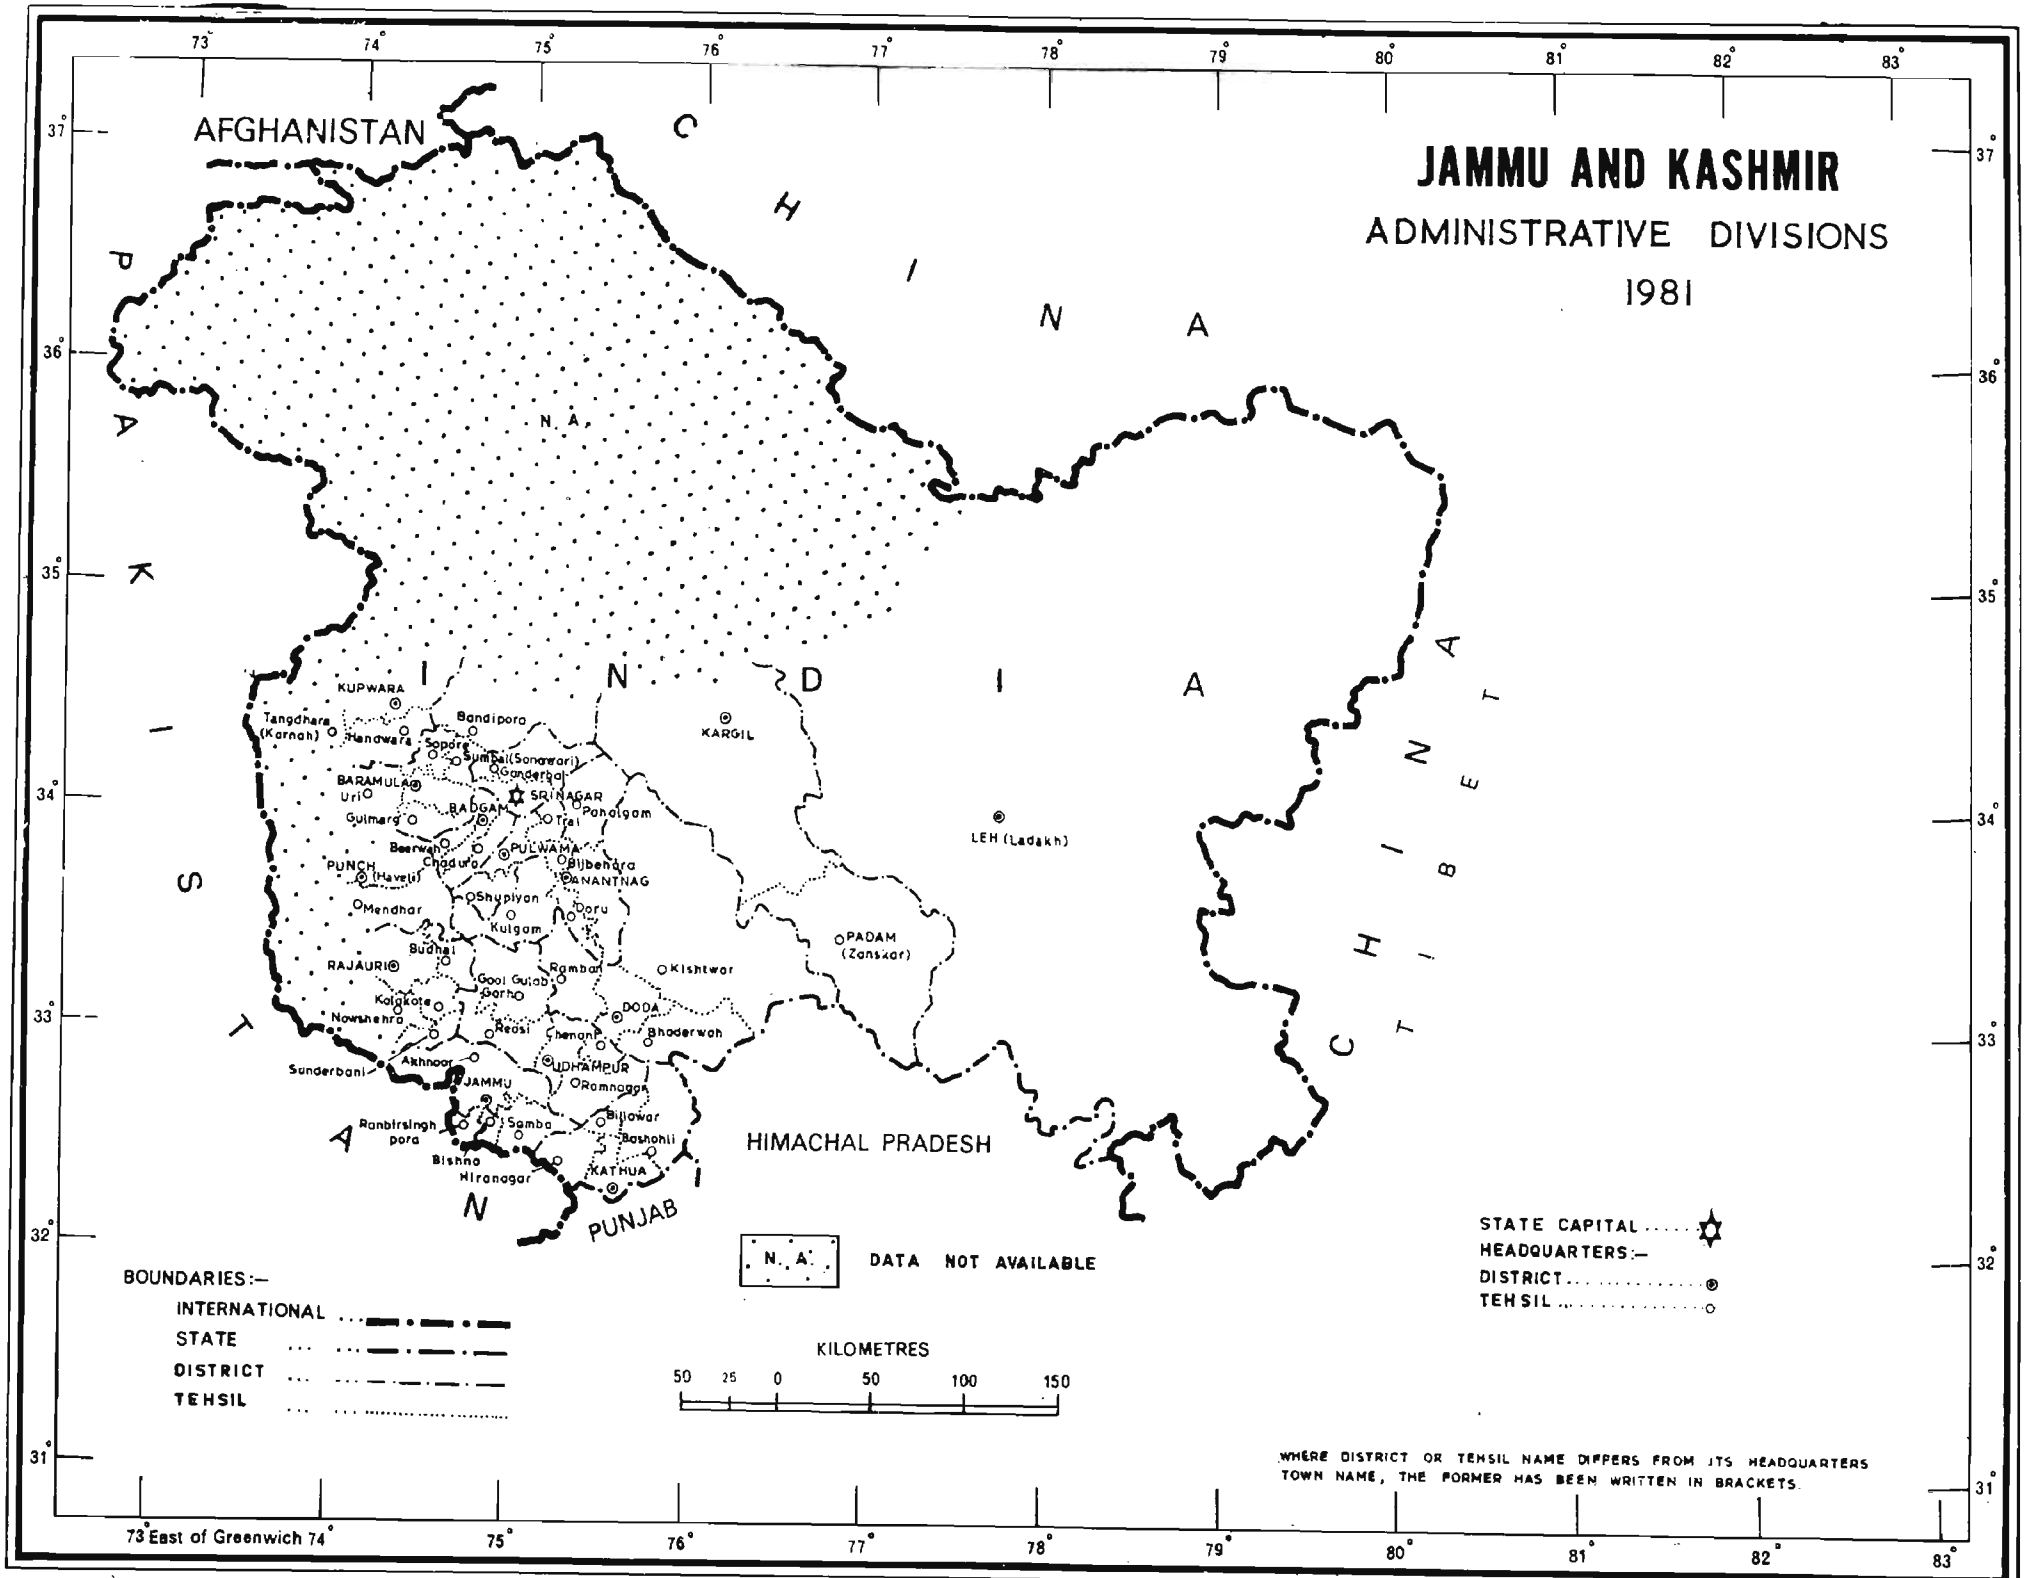

were prepared by the staff of our Cartographic Section under the close and valuable guidance of Dr. B. K. Roy, Deputy Registrar General (Map) of the Office of the Registrar General, India. Their names along with those of other officials who rendered valuable assistance in bringing out the volume are mentioned separately in this Handbook.

N. A. KAMILI, IAS,

Srinagar,

Director.

•• Includes 78114 Sq. Km. under illegal occupation of Pakistan and 5180 Sq. Km. illegally handed over by Pakistan to China and 37555 Sq. Km. under illegal occupation of China in Leh (Ladakh) District.

a Provisional

@ Excludes 3, 1 & 4 villages of Srinagar Chadura and Badgam tehsils forming out-growths of Srinagar Urban Agglomeration, 6 villages of Jammu tehsil forming out-growth of Jammu Urban Agglomeration respectively and 1 village of Udhampur tehsil treated as Census Town.

ANALYTICAL NOTE

ANALYTICAL NOTE

A description of the various concepts used at the 1981 Census and a broad appraisal of the administrative statistics vis-a-vis the history of the district, the social and cultural changes witnessed by the district during the last ten years particularly in relation to economic resources, social, cultural and developmental activities and a brief description of the places of historical and religious importance in the district is given in the following pages :—

Rural/Urban Classification

For the 1981 Census the classification of urban areas have been based on the following criteria :—

(a) All places with a Municipality, Corporation or Cantonment Board or Notified/Town Area Committee.

(b) All other places which satisfied the following tests :—

(i) A minimum population of 5,000.

(ii) At least 75 per cent of male working population engaged in non-agricultural (and allied) activity.

(iii) A density of population of at least 400 per Sq. Kms. (1000 per Sq. mile).

The places which satisfied the criterion (a) above were treated as statutory towns while those as were not statutory towns but satisfied the tests laid down in criterion (b) above were treated as census towns. All other places which did not satisfy either of the above two criteria were classified as rural. Areas which qualified to be treated as towns under criterion (a) and (b) above were further classified by population ranges in the following order :—

Population Range	Class
1,00,000 and above	... I
50,000—99,999	... II
20,000— 49,999	III
10,000—19,999	... IV
5,000—9,999	... V
Below 5,000	... VI

Census House

A Census House was defined as a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both.

Census Household

A household for purposes of the 1981 census has been defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both.

Scheduled Caste/Scheduled Tribe

In Jammu and Kashmir State there are no Scheduled Tribes. However, the following 13 castes stand notified as Scheduled Castes under the State Constitution.

1. Barwala.
2. Basith.
3. Chamar or Ramdasia.
4. Batwal.
5. Chura.
6. Dhyar.
7. Doom or Mahasha.
8. Gardi.

9. Jolaha.

10. Megh or Kabirpanthi.

11. Ratal.

12. Saryara.

13. Watal.

At the 1981 Census only those persons who returned themselves as belonging to any of the 13 Castes specified above was treated as Scheduled Caste.

Literacy

For purposes of Census a person was treated as literate if he/ she could read and write in any language with understanding power. A person who could merely read but was not able to write was classified as illiterate. For a person to be treated as literate it was not necessary that he/she should have received any formal education or should have passed any minimum educational standard.

Workers/Non-Workers

For the 1981 Census a person was treated mainly as a worker if he/she had participated in any kind of economically productive work during the major part of the reference year i. e., at least 6 months or 183 days or more prior to the date of enumeration. A person who claimed to have participated in any kind of economically productive work for less than six months prior to the date of enumeration was treated as marginal worker. However, persons who did not participate in any kind of economically productive work during the whole period of the reference year were treated as non-workers.

Brief History of District

According to the records of rights (Misli Haqaqit) maintained by the State Revenue Department, the district Doda, like other districts has derived its name from its district headquarters situated at Doda. The records reveal that one of the ancient Rajas of Kishtwar whose dominion extended beyond Doda persuaded one utensil maker namely Deeda a migrant from Multan (Pakistan) to settle permanently in his territory and set up a utensil factory there. Deeda is then said to have settled in a village which later on came to be known after him. With the advent of time, the name Deeda seems to have got distorted into Doda, by which name it continues to be known today. Very little information, if any, is available about the early history of the District and its rulers. The few chronicles available relate to the regimes of the rulers of Kishtwar and even these do not contain any valuable information except in respect of the rise and fall of different ruling dynasties. The settlement reports and other references indicate that the area falling within the jurisdiction of the District was ruled by Ranas, Rajas and petty independent chiefs, from time to time. It is reported that Jaral Ramas, Katoch Rajas, Bhaus Manhases and Chibs, Thakkars, Wanis and Gakkars have had their rule over this District.

Brief History of District Census Handbook

The District Census Handbooks were published for the first time in 1951 as a part of the census publication programme in almost all States of the India except Jammu and Kashmir State where due to the disturbed conditions prevailing in the wake of tribal invasion of 1947-48, no census could be undertaken and as such no data was collected for the decade 1941-51. The publication of District Census Handbook Series fulfilled a long felt need. These gave out not only the data contained in Primary Census Abstract accordiing to new classifications but included a sufficient account of the district and its people, and a vast magnitude of other data covering such topics as communication, education, public health etc. in respect of each town and village of the district. Consequently, these have been found to be of immense help to all the departments of the State Government for planning and development at the grass roots level, With the introduction of single line administration at the district level, the utility and importance of these publications for constant use and reference by District Development Commissioners has increased enormously. The present Handbook is proposed to contain even more comprehensive data than in the past so as to meet also the requirements of minimum needs programme set forth by the Planning Commission. The publication will besides the basic population data emanating from the 1981 Census, contain comprehensive information pertaining to amenities and land use pattern and other infrastructural statistics in respect of each village and town of the district so as to serve as a ready reference material for planners and administrators for assessment of past achievements and formulation of new programmes of development at the grass roots level.

Town Directory

The Town Directory covers information at town level and includes items such as status of administration, growth of population, growth pattern since 1901, physical aspects and location civic finances, civic and other amenities, medical, educational, recreational and cultural facilities, trade, industry and commerce, banking facilities etc.

In addition demographic data like sex ratio, number of households, density of population and position of civic and other amenities in notified or recognised slums of class I and II towns have also been introduced. Considering the increasing employment of women in urban areas and the consequent housing need of single working woman it has been felt necessary to indicate in the town directory also such information as the number of working women hostels with number of seats.

A broad appraisal of the data incorporated in the seven statements of the town directory is attempted in the following paragraphs:

Statement—I gives information on civic administration status as in 1980, growth history of towns from 1901 to 1981, sex ratio of towns from 1961 to 1981, density and area in Sq. Kms.

Statement—II gives the physical as well as locational aspects of towns of the district. Under the physical aspects data on annual rainfall (in Cms.) and maximum and minimum temperature (in centegrade) have been highlighted. The statement also gives information on distance of the town from the nearest city with a population of one lakh and above, distance from the State, District and Tehsil Headquarters, from the railway station and bus route. It also provides information on the existence of river/canal if any within 10 Kms.

Statement—III provides the budgetary statements pertaining to the financial year 1978-79. The statement has been apportioned into the receipt and expenditure heads. Under the receipt head information has been given on such items as "receipt through taxes, revenue derived from municipal properties and power apart from taxation. Government grants loans, advances and other sources". Expenditure head shows expenditure on general administration, public safety, public health and conveniences, public works, public institutions and others.

Statement—IV depicts civic and other amenities available in towns and gives information on such items as length of the road in the towns, system of sewerage, number and type of latrine, method and disposal of night soil, source and capacity of drinking water and fire fighting services. The statement also highlights the pattern of electricity consumed in the towns and indicates the number of connections under sub-head like domestic, industrial, commercial, road-lighting and others.

Statement—IV-A which is meant to depict civic and other amenities available in the notified slums of class I and II towns has no relevance for Doda district.

Statement—V gives medical, educational, recreational and cultural facilities as were available in towns in 1979. Under medical facilities are indicated the type of medical institutions and the number of medical beds available. Likewise, different types of educational institutions available have been covered under educational facilities. Information regarding the number of cinema houses, stadia, auditoria/drama halls and public libraries have also been incorporated in the statement to bring out the extent of availability of recreational and cultural facilities. In addition, information about number of working women hostels has also been given in the statement. If a medical or an educational facility was not available in the town, the name of the nearest place where it is available has also been given in the statement.

Statement—VI gives the facilities of trade, commerce, industry and banking available in the towns in 1979. Besides, the number of credit co-operative societies operating the details of three most important commodities imported, exported and manufactured in the towns have also been indicated.

Village Directory

The village directory portion of the Handbook depicts particulars of amenities available in each village of the district in the field of education, medical care, power supply, drinking water, post and telegraph, communication, besides information about land use and places of religious, historical and archaeological importance in the village. In case

where a particular amenity is not available within the village, distance at which such a facility is available even in the most modest form has been indicated in three broad ranges viz.—5 Kms., 5-10 Kms. and 10+ Kms. If there are composite schools, like middle schools with primary classes or secondary schools with middle classes, these have also been included in the number of primary and middle schools respectively. For example if in a village or a town there were two primary schools and one middle school with primary classes, in the village/town have been given as three and that of middle school as one even though there are only three educational institutions. So also in case of secondary schools.

The village directory also carries the following four appendices :—

Appendix—I	It gives the abstract of educational, medical and other amenities available in the tehsils of the district.
Appendix—II	It furnishes the land utilisation data in respect of census towns. This Appendix, however, is not relevant to Doda district.
Appendix—III	This is a list of villages where no amenities other than drinking water like education, medical post and telegraph, communication, power supply are available.
Appendix- IV	It provides a list of villages according to the proportion of scheduled caste population by ranges.

All these appendices appear after the main village directory.

Primary Census Abstract

The Primary Census Abstract part of the publication is exclusively based on the 1981 census data. It provides information in respect of each village and ward/mohalla of a town at tehsil level in respect of its area, number of residential houses, number of households, total population, scheduled caste population, literate and educated persons and working population by sex in 4 broad industrial categories viz; (i) cultivators, (ii) agricultural labourers, (iii) households industry, manufacturing, processing, servicing and repairs and (iv) other workers besides non-workers as a separate category.

Special PCA on Scheduled Castes

It is for the first time that a special Primary Census Abstract has been introduced in the DCHBs for the Scheduled Caste population. The special PCA provides information pertaining to Scheduled Castes in respect of number of residential houses and their population, literates, main workers classified by cultivators, agricultural labourers, workers in the household industry and other workers, marginal workers and non-workers classified by sex. This PCA is also presented for District, Tehsil and Town levels.

Physical Aspects

Doda district has been carved out from the erstwhile Udhampur district and lies amidst the outer Himalayan ranges of Jammu region. In terms of area it is the third biggest district after Leh (Ladakh) and Kargil in the State. On its north is Anantnag, while south west and south are bordered by Udhampur and Kathua and Chamba of Himachal Pradesh. On the east and south east it is contiguous with Leh (Ladakh) district and on its west lies district Udhampur. The total geographical area of the district is reported to be 11,691 Sq. Kms. It is made up of 655 villages distributed in 4 tehsils and 6 towns.

The average rainfall in the district has been recorded at 35.08 inches per year which is very low compared to the other districts of the State. The deficiency of rainfall is partially met by other natural resources like nallahs and khuls. The district is however declared as a drought prone area.

Of the four natural regions in which the State has been divided on the basis of its varying topographies, terrian and geographical conditions, the district of Doda falls in what is called outerhill region. The district includes a few plain and low level areas with a minimum height of 2,429 feet. But there is hardly any mountain peak dotting the district which is less than 18,500 feet in height. Some of the peaks like Marble Pass and Nun-Kun on the Suru Border rise to a height of 23,000 feet. Two other famous peaks are Brahama and Moon Sickle. These two peaks are favourite haunt of climbers from all over the world.

Major Characteristics

Most of the areas of Doda district are known for their chronic backwardness. However, with introduction of the system of single line administration the development activities in the district have speeded up the progress in all the socio-economic sectors. Construction of roads and buildings, water supply minor irrigation and power are receiving priority in the scheme of all round development of this district.

The main problem which hindered the pace of socio economic development in Doda district was the lack of communications. It was therefore, for this reason that the main thrust of the new development strategy for the district had been on communication. The total road strength which was 337 Kms. only has increased since 1975 to about 550 Kms. by the end of 1981-82. About a hundred roads and 50 bridges are presently coming up in different parts of this mountanous district. These include 5 state highways, 4 major district roads, 28 village roads. 24 roads under minimum needs programme and several improvement schemes of low grade road sections. With the completion of some of the major roads, the land locked district will be brought closer to the neighbouring Himachal Pradesh and Kashmir Valley. The major projects include Kishtwar-Chatroo Synpthan pass road, Kishtwar-Marwah-Margam top road, Bhaderwah-Basohli road and Bhaderwah-Chamba road.

Potable drinking water which is one of the basic necessities for human survival was available to only 30 villages covering about 20,000 of the population upto 1975-76. In the last five years increasing attention has been given to augmenting this basic amenity, which has made it possible to extend it to 127 villages. Notwithstanding the constraints of difficult topography efforts are being made to tap the available water resources to the extent possible so as to cover larger areas of the district. During the last five years tremendous efforts have also been made to bring more cultivated land under irrigation. The percentage of irrigated area to total cultivable area in the rural areas of the district is 7.30.

There is only one power house in the district at Bhaderwah which has an installed capacity of 8.56 M. Wtts. Power house at Bhaderwah and Chenani Project (Udhampur district) are the two sources of electricity in the district. Electrification of remote areas in the district is receiving increasing attention of the Government. About 209 villages have been covered under the rural electrification programme up to the year 1981.

With a view to promoting literacy in the district the State Government has in the last five years opened a number of schools with about 372 school buildings having been completed in 1981-82. While number of teachers deployed in the district stand 2,645, the strength of students enrolled is 48,000. The distribution of different levels of educational institutions in the rural part of the district is as follows :—

Primary Schools	...	857
Middle Schools	...	251
High Schools	...	47
Adult Literacy Centres	...	40

In order to increase the availability of medical facilities, the number of medical institutions has been increased after 1975 by one district hospital, 2 sub-district hospitals, 8 primary health centres, 54 allopathic dispensaries, 28 medical aid centres, 23 sub centres, 2 mobile units, 20 leprosy control units and one district T. B. clinic. The present position of medical institutions functioning in the rural part of the district is as under :—

Hospitals	...	12
Dispensaries	...	102
Maternity and child welfare centres	...	26
Primary health centres	...	9
Family planning centres	...	5
Community health workers	...	22

While about 80 per cent of the district population is dependent on agriculture. However owing to its mountanous topography, non-availability of sufficient irrigation facilities and limited rainfall the district has to suffer recurrence of droughts with a

telling effect on agricultural production. Nevertheless, efforts are being made to modernise agriculture. Rice, wheat and maize are the principal crops which account for 72% of the total sown area. An area of about 20,000 hectares was covered under soil survey besides imparting training to 1,530 farmers about the new agricultural techniques. Some of the schemes underway are soil survey, apiculture and potato development grass land and fodder development, development of saffron, zeeera and mushrooms.

The total area under horticulture in the district is 14,100 acres at present. Previously, the orchardists faced immense difficulties in obtaining saplings. This obstacle has been removed to larger extent with the establishment of 12 nurseries.

The social welfare department looks after the schemes of upliftment of the down trodden destitutes and other economically and socially backward population in the district. The department is providing financial assistance to deserving persons belonging to Scheduled Castes and Gujjar, Bakerwal communities. This include grant of prematric scholarships to students, reimbursement of examination fee, provision of text books, uniforms, housing subsidy, financial assistance to disabled and physically handicapped, artificial limbs to needy, sewing machines to widows and destitutes. At present 14 cutting, tailoring and embroidery training centres, 2 cottage industrial centres besides a Bal Ashram are engaged in promotion of various social welfare measures in the district.

The working of co-operative system has gained considerable progress in the district. The number of co-operative societies have reached 144 with the total membership of over 20 thousand as against 128 in 1975-76. These are :—

Primary Agriculture Societies	...	118
Marketing Societies	...	9
Sale and Service Societies	...	17

Besides, co-operative societies for vegetable growers, saffron growers, milk producers, forest labourers and contract labourers have also been formed.

Self employment schemes have been in operation since 1972 and about 252 small scale units have been opened providing employment opportunities to 642 persons.

The Government has taken special steps to promote the welfare of socially backward classes, especially the members of Gujjar and Bakerwal communities. Under this programme Hostel and Shop Line Complex is being constructed at district headquarters besides providing free educational facilities, scholarships, free uniform and books to the students of these communities. Housing subsidy is also provided to enable them to come out of the backwardness.

Major Social and Cultural Events

In view of multi-racial, multi-lingual and multi-religious character of the district it is found that out of about 200 dialects spoken in Jammu region, 150 are spoken in the district of Doda alone. Important among these, however, are Kashmiri, Dogri, Gojri, Pahari, Punjabi, Ladakhi, Balti, Bhaderwahi and Siraji. The district is inhabited by Muslims, Hindus, Buddhists, Christians and Sikhs.

The people of the district follow different customs depending upon the areas they inhabit. In Bhaderwah which holds the position of tehsil in the district is adorned with many temples and mosques. The temples are mostly of Nag Devta and Bhadra Kali. The Jamia Masjid is an impressive structure. The images in the temples have been most artistically carved. The superb execution of work speaks volumes of the art of sculpture in the district in by-gone days.

It is said that most illaqas of the district retain original Sanskrit names such as Dravya Shala, Hasti, Kanini, Virindavan and Tri-Sandhya. Several Vedic words have been preserved in the local Kishtwar Dialect. Bhaderwah is said to have the distinction of being the seat of compilation of the Nilmat Purana.

A bird expert of an international repute Dr. Salim Ali toured the district extensively and found that it is the abode of several rare birds.

Kishtwar which holds a tehsil position in the district has rare wild animals such as White Bear, Red Bear, Snow Leopard, Musk Bear and Stag. The district has, therefore, a strong claim for establish-

ment of a National Park to attract visitors from within and outside the country.

The world famous sapphire mines are located at Padder of Kishtwar tehsil in this very district. The Saffron grown in the district is of a fairly high grade.

The mighty Chenab River with its ice cold water flows right through the district. The district is also possessed of by a high power potential. Presently one Hydel Project is under construction at Dulhasti in Kishtwar with an installed capacity of 390 M. Watts. On the completion of this Project the district may gain a foothold on its progress in the economic front.

The district has also a good potential for development of horticulture with a scope for harvesting it more intensively.

Places of religious and historical importance

Patni Top

Batote is known for its rich luxury and varied scenery. The ascent begins after a Kilometre and lies through a pine forest. The summit of this ascent is known as Patni Top and is about 1,325 Kms. above the sea level. On the summit is broad motorable road, one end of which goes to Sanasar and the other to the Dak Bungalow. About 8 Kms. away from the Patni Top, is the Gorakh Nath Temple. To reach the temple one has to go through a vast forest interspersed with meadows and huts. There are a number of springs also on the way to the temple, one of which has to be crossed either by wading through it or by walking over a plank which serves as a bridge.

The descent to Batote is swift. Down a Km. is situated "Chashma Amrit" whose waters are believed to contain health giving minerals.

Chotta Kashmir

Bhaderwah enjoys the status of tehsil in the district and is an important town in the centre of a very populous and well cultivated valley in the upper Chenab region of Jammu Province. The valley by its grandeur scenery is also known as "Chotta Kashmir". Bhaderwah is also often compared with the highlands of Switzerland and the "Black Forests" of Germany. The valley is spread over an area of 11 Kms. beneath the mountainous chain of Kailash and Ashapati. The Gaddis and Thakers are among the old inhabitants of this valley.

Bhaderwah is a tourist paradise. There are rich forests and meadows which are no less in beauty than Gulmarg. There are snow covered peaks, lovely lakes and bubbling brooks as in Kashmir. Its handsome people with their artistic skill and their peculiar customs and mood of worship is also of great interest to the tourists. The Government is adopting measures to exploit its rich tourist potential.

Ziarat Farid-ul-Din Sahib

Hazrat Shah Farid-ul-Din, a great Musilm Saint is said to have come here from Bagdad during the reign of Raja Jai Singh. It is said that the Mughal Emperor Shah Jahan wanted him to settle permanently at Delhi but the Saint instead came to Kishtwar with a number of disciples. A large number of devotees came under his influence. The Ziarat constructed over his tomb is a popular place for piligrims from all over the district. According to another version the Saint is believed to have reached here when Mughal Empire in India was ruled by Aurangzeb. The annual Urs of Saint is celebrated at Kishtwar on June, 20 and thousands of devotees, irrespective of caste, colour and creed participating in the Urs.

Asrari-i-Sharief

Shah Asrar-ud-Din was the youngest son of Shah Farid-ud-Din and was also spiritually advanced like his father. He passed away at the early age of 18 but even during this short span of life he attained an eternal fame for himself by his piety and miracles. The Ziarat lies at the south—western end of the spacious Chugam. The Urs which is held on January 10, attracts a large number of people from all over the Province and even from Kashmir.

Bander Kot Cave

Sheikh Zain-ul-Abdin Wali is believed to have stayed for many years at Bander Kot Cave which is situated just above the bridge over the Chenab. The Sheikh who hailed from Palmar, Kishtwar later moved to Kashmir where there is a big shrine dedicated to

him at Aishmuqam, Anantnag. He was a principal disciple of Hazarat Sheikh Noor-ud-Din Wali, the patron Saint of Kashmir.

Ziarat Gander Shah

The shrine of Gander Shah is at Bhaderwah in the vicinity of Jamia Masjid. The Saint also known as Sikander Shah hailed from Poolja village in Dooru-Shahabad area of Anantnag district. His descendents had been talented people one of them having attempted to write history of Kishtwar.

Siddiqui Shah

Siddiqui Shah was a contemporary of Gander Shah. Both of them were in Bhaderwah in the thirties and fourties of the last century. Another well known Pir of Bhaderwah was known as Syed Sahib. He is believed to have been a disciple of Shah Asrar of Kishtwar.

Trisandhya

Trisandhya falls in the category of most prominent shrines of this area. It is situated in a place which takes three days to reach on foot from Kishtwar. The stream generally remains dry but on certain occasions water flows into it thrice a day, i. e., in the morning, afternoon and evening. A bath in the streams is considered to be auspicious. The peculiarity of this shrine is that the water flows down into the stream from a hillock nearby, but dries up mysteriously.

Basak Nag Pilgrimage

The Basak Nag Pilgrimage starts from Bhaderwah in the month of September conforming to the second day of the bright fortnight of Bhadoon. Devotees dressed in gay warm clothes assemble near the temple at Bhaderwah and march in a procession headed by the priests of the temple. In this temple the deity has a huge snake round its neck. It takes the piligrims two days to cover the difficult 23 Kms. of ascent to the Kailash Kund. A big fair is held on the shores of the lake. A bazar of tents springs up overnight, the pilgrims spent one night here and go round the lakes making their offerings to Basak Nag, whose statue lies at the northern corner of main lake.

Sarthal Devi

Sharika is Ashtadashbhuja, 'goddess with 18 arms' is located at Sarthal at a height of 7,000 feet above sea level. Ashtadashbhuja is commonly known as Sarthal Devi, which attracts devotees throughout the year. It is believed that the image of goddess, cut out a black stone, came to Sarthal from Srinagar in the form of a minor girl carried on a Shepherd's back. People in large number, specially the childless couple visit this shrine where goats and sheep are sacrificed to propitiate the deity.

Vasuki Nag

Vasuki Nag is regarded as the Kula-Devta. In Bhaderwah there are a number of shrines and temples known after him but the foremost among them is situated at Nagar and Gatha. The temple of Basudeva at Nagar Bhaderwah has life size deities made of local black Marble. The Bhaderwah people worship Vasuki as an incarnation of Vishnu.

Lingeshwar

At Bhaderwah there is another Shiv Temple in which the idol is not placed on pedestal but is on the ground itself. There is a local superstition that the Lingam is very gradually sinking into the ground on which it is placed and the legend has it that the world would come to an end when it, completely disappears. The temple is known as "Gaya Ka Shiv Mandir" or Lingeshwar.

Mela Pat

Autumn brings the season of dances and fairs in the Bhaderwah valley. In the villages people dance at the rythem of "drum and flutes" which leave behind an exhilirating effect on mind and ears.

The Pat fair of Bhaderwah is celebrated in the memory of Raja Nagpal. It is said, that he was to pass through a narrow gate leading to the court, where one has to bow his head but he passed his legs first. Akbar the Mughal Emperor in order to punish him, for his arrogance tried to manhandle and torture the Raja. But this was made impossible by Raja's patron deity Vasaknag. Whenever the soldiers tried to take

hold of the Raja, they were attacked by a snake having five heads. This legendary background of Mela Pat has contributed a lot towards the folklore and folk dances. Every year a pageant of 'Pat' is taken out and people dance around it on the tunes of the flutes and rythems of the drums.

Brief Analysis of P. C. A. Data

Part-B of this publication contains data collected during 1981 census and is based on the primary census abstract which depicts valuable information in respect of each village and ward/mohalla of a town in the district incorporating various demographic aspects viz; area, number of residential houses, number of households, total population with sex-wise break-up, scheduled caste population, literate and educated persons and sex-wise break-up of working population categorised into main workers, marginal workers and non-workers. The information collected from the PCA data has been summarised in the various inset tables giving an insight into the demographic structure of its tehsils. A brief analysis of the data indicated in these tables has been attempted hereafter for highlighting the various demographic changes that have taken place in the rural and urban areas of the district at tehsil level particularly during the decade 1971-81.

The sub-joined table No. 1 gives an account of the distribution of population at tehsil level :—

Table No. 1

Population, number of villages and towns, 1981

S. No.	Name of village	Population									No. of villages		No. of towns
		Total			Rural			Urban					
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Kishtwar	118661	62581	56080	111487	58795	52692	7174	3786	3388	157	156	1
2	Bhaderwah	102626	52748	49878	96551	49639	46912	6075	3109	2966	277	277	1
3	Doda	94717	49508	45209	89321	46549	42772	5396	2959	2437	127	127	1
4	Ramban	109258	58525	50733	102729	54721	48008	6529	3804	2725	94	92	3
	Total District	425262	223362	201900	400088	209704	190384	25174	13658	11516	655	652	6

The total population returned by the four tehsils of the district at the 1981 census is 425,262 made up of 223,362 males and 201,900 females. While Kishtwar tehsil tops all other tehsils in the size of population, the highest number of villages has been returned by tehsil Bhaderwah. Doda has the least number of villages and population amongst the four tehsils. As regards urban population, Kishtwar again comes on top with Ramban following closely.

Table No. 2 below depicts the decennial change in the distribution of tehsil-wise population in the districts :--

Table No. 2

Decadal change in distribution of population

S. No.	Name of tehsil	Population								
		1971			1981			Percentage decadal (1971-81) variation.		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
1	Kishtwar	97843	92567	5276	118661	111487	7174	+21.28	+20.44	+35.97
2	Bhaderwah	81455	76244	5211	102626	96551	6075	+25.99	+26.63	+16.58
3	Doda	74139	69744	4395	94717	89321	5396	+27.76	+28.07	+22.78
4	Ramban	88783	84129	4654	109258	102729	6529	+23.06	+22.11	+40.29
Total District		342220	322684	19536	425262	400088	25174	+24.27	+23.99	+28.86

The table reveals that in the decade 1971-81 the district has registered a growth rate of 24.27 per cent in its population which is lower than for the State as a whole which stands at 29.69 per cent. Down at the tehsil level, all other tehsils except Kishtwar and Ramban, have returned a higher growth rate than the district as a whole. So far as urban growth rate is concerned Ramban town tops the list having returned a growth rate of 40.29 per cent which is higher than for the district urban as a whole and for the State urban as well. The least growth has been claimed by Bhaderwah town at 16.58 per cent.

Table No. 3 below deals with the distribution of villages by population ranges :—

Table No. 3

Distribution of villages by population ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
— 200	186	28.53
200 — 499	217	33.28
500 — 1999	218	33.44
2000 — 4999	29	4.44
5000 — 9999	2	0.31
10000+	..	..
Total	652	100.00

From the above table, it is evident that out of 652 inhabited villages in the District as many as 218 villages or 33.44 per cent fall in the population range of 500—1999. Population range of 200—499 has almost equal number of villages (217) falling in it. Villages with population less than 200 constitute 28.53 per cent while those with population of 2000—4999 and 5000—9999 persons collectively form 4.75 per cent of the total inhabited villages of the district. No village has returned population of 10,000 and above.

Table No. 4 below deals with the distribution of villages by density ranges :—

Table No. 4

Distribution of villages by density

Range of Density (per sq. km.)	Total No. of Villages in each density range	Percentage of villages in each density range
1	2	3
— 10	5	0.78
11 — 20	16	2.45
21 — 50	60	9.20
51 — 100	101	15.49
101 — 200	172	26.38
201 — 300	137	21.01
301 — 500	119	18.25
501+	38	5.83
Not known	4	0.61
Total	652	100.00

172 villages which make more than 26 per cent of the total villages in the district fall in the density range of 101—200 persons per Sq. Km. followed by 137 villages or 21.01 per cent and 119 villages or 18.25 per cent in the range of 201—300 and 301—500 respectively. A small number of villages fall in the density range of less than 10, 11—20 and 501+. Four forest blocks which have been shown in the density range "Not known" have returned the least density of 0.61 per cent of villages. The four forest blocks shown in "Not known" range are not recognised as revenue villages as such but accorded separate identity during 1981 Census enumeration.

Table No. 5 below shows the proportion of scheduled castes population to total population in the villages :—

Table No. 5

Proportion of Scheduled Castes population to total population in the villages

Percentage range of scheduled castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	285	43.71
5 or less	70	10.74
6—10	56	8.59
11—15	46	7.06
16—20	37	5.67
21—30	51	7.82
31 and above	107	16.41
Total	652	100.00

It will be seen that of a total of 652 villages in the district there are 285 villages which have not reported any scheduled caste population at the 1981 census, while another 107 villages have reported scheduled caste population in the percentage range of 31 and above. However, 10.74 per cent villages are such where scheduled caste constitute less than 5 per cent of the population. The remaining villages are almost evenly distributed in the percentage range of Scheduled Castes in 6—10, 11—15 and 21—30.

Table 6 below gives the proportion of scheduled castes population to total population in the towns of the district :—

Table No. 6

Proportion of Scheduled Castes population in Towns

Name of the town	Total population	Total scheduled caste population	Percentage of scheduled caste population to total population
1	2	3	4
(1) Banihal	1656	..	..
(2) Batote	2684	190	7.08
(3) Bhaderwah	6075	78	1.28
(4) Doda	5396	211	3 91
(5) Kishtwar	7174	99	1.38
(6) Ramban	2189	78	3.56
All Towns	25174	656	2.61

As will be seen from the table, of the six towns in the district, Batote has returned the highest percentage (7.08) of scheduled caste population, which is even higher than that returned for the district as a whole standing at 2.61. Doda and Ramban have returned almost equal percentages of scheduled caste population. Banihal, however, has not returned any scheduled caste population at the 1981 census.

Table No. 7 below indicates the literacy rate by population ranges of the villages :—

Table No. 7

Literacy rates by population range of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
— 200	186	22.91
200 — 499	217	17.78
500 —1999	218	16.15
2000 —4999	29	13.80
5000 —9999	2	12.47
10,000+	--	--
Total	652	16.20

It will be observed from the above table that villages in the population range of less than 200 have returned the highest literacy rate (22.91) which is even higher than that returned for the district as a whole and State as well, standing at 16.20 per cent and 21.63% respectively. No other range has returned literacy percentage higher than the State average ; the least having been returned by group of villages falling in the population range of 5000—9999.

The sub-joined table 8 indicates the urban literacy rates in the district :—

Table No. 8

Literacy rate for towns

Name of town	Literacy rate
1	2
Banihal	50.72
Batote	57.94
Bhaderwah	55.26
Doda	53.98
Kishtwar	54.77
Ramban	58.15
All Towns	55.08

Considering the fact that the urban literacy level for the State as a whole is 45.56 per cent, it is interesting to note that all the six towns, constituting the urban area of the district, have returned higher proportion of literates than for the State urban. Among these towns the highest literacy level (58.15 per cent) has been returned by Ramban. Bhaderwah and Batote towns follow closely with a literacy rate of 55.26 per cent and 57.94 per cent respectively. In the remaining three towns, this percentage varies from 50.72 per cent in Banihal to 54.77 per cent in Kishtwar.

The sub-joined table 9 gives tehsil-wise distribution of literates, workers, non-workers and scheduled castes population in the district :—

Table No. 9

Literates, Workers, Non-workers, Scheduled Caste/Tribe Population in the District

Name of Tehsil	Total Rural Urban	Total Population			Percentage of		Percentage of literates to total population		
		P	M	F	S. C. Population to total population	S. T. Population to total population	P	M	F
1	2	3	4	5	6	7	8	9	10

29.03	48.74	5.65	2.87	1.30	4.73	31.90	50.04	10.38	68.10	49.96	89.62

We have already seen that in the matter of rural literacy the district does not favourably compare with the position obtaining for the State as a whole, while in urban literacy the district is placed ahead of the State. Down at the tehsil level the total literacy rate is, however, lower than that of the State in all the four tehsils of the district. As between the two sexes male literacy level outweighs the female literacy level in all the tehsils.

Percentage of main workers to total population as reproduced in columns 11—13 shows that in all the tehsils, barring Ramban, participation rate in urban areas trials behind that in rural areas in respect of both the sexes. Amongst the tehsils, Kishtwar is conspicuous for having returned the highest rural participation rate in respect of both the sexes standing at 53.48 per cent for males and 20.32 per cent for females ; the respective proportion for the district as a whole being 51.46 and 14.25.

Marginal workers as will be observed from columns 14—16 of the statement constitute only 9 88 per cent of the population of the district. At the tehsil level, this proportion varies from 6.03 in Kishtwar to 12.61 in Ramban. It is, however, significant to note that in all tehsils predominant proportion of marginal workers is claimed by female population of the rural component. It is a traditional feature of the rural economy that female folk though primarily engaged in household activities do contribute their bit by marginal participation in seasonal economic activities like agricultural operations and households industries. The proportion of rural marginal workers to total female population ranges from 9.97 per cent in Kishtwar tehsil to 21.29 per cent in Bhaderwah. In urban areas where marginal workers claim relatively much smaller proportion in both sexes, the proportion of females outweighs the male proportion in all the tehsils of the district. Proportion of total workers made up of main workers and marginal workers put

together is brought out in columns 17--19 of the table. It will be seen that in the case of male population the proportion of workers outstrips the proportion of non-workers in rural areas of all the tehsils. Whereas in urban areas, two tehsils viz. Kishtwar and Bhaderwah have returned a higher proportion of non-workers than that of workers. In case of female population, however, the rate of non-workers is far too higher than that of workers, the differential being much larger in urban parts of all the tehsils.

Analysis of Village Directory Data

The data collected from the revenue and other Government Agencies regarding availability of various amenities has been tabulated in the main Village Directory Statement. The salient features of this data in broad aggregates is brought out below in the form of inset tables :—

The position of availability of various amenities at District/Tehsil level is indicated in the following table :—

Table No. 10

Distribution of villages according to the availability of different amenities

S. No.	Name of tehsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking water	Post and telegraph	Market/ hat	Communi-cation	Approach by pacca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Kishtwar	156	122 (78.21)	35 (22.44)	156 (100.00)	18 (11.54)	(–)	17 (10.90)	(–)	21 (13.46)
2	Bhaderwah	277	165 (59.57)	29 (10.47)	277 (100.00)	21 (7.58)	(–)	27 (9.75)	27 (9.75)	92 (33.21)
3	Doda	127	103 (81.10)	47 (37.01)	127 (100.00)	26 (20.47)	(–)	13 (10.24)	15 (11.81)	59 (46.46)
4	Ramban	92	79 (85.87)	28 (30.43)	92 (100.00)	19 (20.65)	(–)	72 (78.26)	71 (77.17)	37 (40.22)
	Total District	652	469 (71.93)	139 (21.32)	652 (100.00)	84 (12.88)	(–)	129 (19.79)	113 (17.33)	209 (32.06)

The table reveals that of the total 652 inhabited villages in the district, 469 accounting for 71.93 per cent villages have one or the other type of educational institutions like primary, middle, high, higher secondary schools located within the villages and this amenity is almost evenly distributed in all the four tehsils. As regards medical facility, however only 139 villages have either a dispensary or primary health centre or a hospital which makes an insignificant proportion of 21.32 per cent of the total villages. The inter-tehsil comparison shows that the proportion of villages covered under this basic amenity ranges between 10.47 and 22.44 per cent in Bhaderwah and Kishtwar which is lower than even the corresponding proportion of 37.01 and 30.43 per cent in Doda and Ramban tehsils respectively. Drinking water facility is however, available to all the villages in the district from one source or the other. However protected drinking water supply is available to 127 villages only which form just 19% of the total number of villages which makes a poor position indeed. In the matter of post and telegraph facilities while the proportion of villages covered is 12.88 per cent at the district level, their distribution is very uneven at the tehsil level with the proportion of villages ranging from 7.58 per cent in Bhaderwah to 20.65 per cent in Ramban. In communications, the facility of bus stop etc. is available to 129 villages of the district claiming a percentage of 19.79 only. At tehsil level, this amenity is available to about 10 per cent villages of Kishtwar, Bhaderwah and Doda while 72 or 78.26 per cent villages in Ramban tehsil enjoy this facility.

The district being hilly and inter-spersed with mountains pucca road facility is sparingly available to its inhabitants living in far-flung areas. The table reveals that no such facility is available in the villages of Kishtwar tehsil. In Doda and Bhaderwah tehsils

the proportion of villages covered is hardly 11.81 and 9.75 per cent respectively. Ramban is the only tehsil in the district where such facility is available to 71 (77.17 per cent) villages.

The progress with regard to rural electrification in the district continues to be poor although the Government has been making concerted efforts to extend the coverage to larger number of villages under power facility. Only 209 villages out of total of 652 inhabited villages in the district are benefitted by electric power. Intertehsil position reflects that the proportion of villages covered under this basic amenity ranges between 13.46 per cent and 33.21 per cent in Kishtwar and Bhaderwah tehsils and 40.22 per cent to 46.46 per cent in tehsils of Ramban and Doda.

The table No. 11 below highlights the availability of various amenities in terms of proportion of population served by each :—

Table No. 11

Proporation of rural population served by different amenities

S. No.	Name of tehsil	Total population of inhabited villages in the tehsil	Proporation of rural population served by the amenity of							
			Education	Medical	Drinking water	Post and telegraph	Market/ hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Kishtwar	111487	87.18	39.41	100.00	20.08	..	20.06	..	26.54
2	Bhaderwah	96551	73.62	16.95	100.00	11.64	..	14.30	13.66	34.38
3	Doda	89321	93.81	55.85	100.00	33.60	..	9.66	10.57	32.64
4	Ramban	102729	95.93	47.78	100.00	30.58	..	68.93	66.18	53.84
	Total District	400088	87.63	39.81	100.00	23.76	..	28.89	22.65	36.80

It will be noticed that the position is relatively brighter in terms of the population served by various amenities even in the fields like medical care, post and telegraph offices and communication than what came out in the earlier table in terms of the proportion of villages both for the district as a whole as also at the tehsil level. In the field of education and drinking water the proportion of population benefitted is substantial whereas the extension of pucca roads and power supply is still very poor in the district. It is only the Ramban tehsil in the whole district where pucca road and power supply facilities are available to 66.18 and 53.84 per cent of the population respectively. On the whole, except for education and drinking water amenities, the position of all other amenities is still far from satisfactory in all the tehsils of the district.

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available are given in table No. 12 :—

Table No. 12

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of			
	—5 kms.	5—10 kms.	10+kms.	Total (cols2-4)
1	2	3	4	5
1 Education	180	..	3	183
2 Medical	416	78	19	513
3 Drinking water	..	..	..	..
4 Post & Telegraph	441	80	47	568
5 Market/Hat	..	..	..	..
6 Communication	231	145	147	523

From the above table it is observed that majority of villages where educational, medical, post and telegraph and other communication centres are not available, have these facilities available at a distance of less than 5 Kms. Even for the bulk of the remaining villages these facilities are available within a distance of 5—10 Kms. As regards education, all but 3 out of 183 villages where this amenity is not available also fall within a distance of less than 5 Kms. from where it is available. In a small number of villages where medical, post and telegraph and communication facilities are not available within the village and which respectively form a proportion of 3.70 per cent, 8.27 per cent and 28.10 per cent of the total inhabited villages in the district the inhabitants have to cover a distance of more than 10 Kms. to avail of the requisite facility.

Table No. 13 below gives the distribution of villages according to distance from the nearest town and availability of different amenities :—

Table No. 13

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	post and Telegraph	Market/ Hat	Communication	Apprcach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
0—5	83	64 (77.11)	15 (18.07)	83 (100.00)	16 (19.28)	..	49 (59.04)	44 (53.01)	61 (73.49)
6—15	185	131 (70.81)	46 (24.86)	185 (100.00)	22 (11.89)	..	51 (27.57)	47 (25.41)	100 (54.05)
16—50	296	208 (70.27)	61 (20.61)	296 (100.00)	41 (13.85)	..	29 (9.80)	22 (7.43)	45 (15.20)
51+	88	66 (75.00)	17 (19.32)	88 (100.00)	5 (5.68)	..	.. (—)	.. (—)	3 (3.41)
Unspecified	..	..	..	..	..	..	..	..	..
Total	652	469 (71.93)	139 (21.32)	652 (100.00)	84 (12.88)	..	129 (19.79)	113 (17.33)	209 (32.06)

From the data available in the above table it is observed that a good proportion of villages placed in the distance range of less than 5 Kms. from the nearest town have various civic amenities available to them within their jurisdictions. But for post and telegraph, communication, approach by pucca road and power supply amenities, other amenities have received relatively better attention even in the villages placed distantly in the range group 16—50 Kms. from the nearest towns.

The table below gives the distribution of villages according to population ranges and amenities available to them :—

Table No. 14

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
— 499	403	240 (59.55)	46 (11.41)	403 (100.00)	30 (7.44)	..	46 (11.41)	43 (10.67)	120 (29.78)
500—1999	218	200 (91.74)	71 (32.57)	218 (100.00)	42 (19.27)	..	70 (32.11)	62 (28.44)	73 (33.49)
2000—4999	29	28 (96.55)	21 (72.41)	29 (100.00)	11 (37.93)	..	13 (44.83)	8 (27.59)	16 (55.17)
5000+	2	1 (50.00)	1 (50.00)	2 (100 00)	1 (50.00)	..	..	..	..
Total	652	469 (71.93)	139 (21.32)	652 (100.00)	84 (12.88)	..	129 (19.79)	113 (17.33)	209 (32.06)

As will be readily observed the population size of the villages has a direct bearing on determining the position of various amenities with more populated villages expectedly attracting more attention than those of the less populated villages. The highest beneficiaries are obviously the villages with a population of 2,000 and more in the field of practically each basic amenity. A small proportion of villages are too placed better in the field of education, medical care and post and telegraph whereas these villages lack communication, pucca road and power supply facilities.

The table No. 15 below indicates that the staple food of the inhabitants of the majority of villages in the district is maize, rice and wheat :—

Table No. 15

Main staple food in the majority of villages in each tehsil

Sl. No.	Name of tehsil	Main staple food
1	2	3
1	Kishtwar	Maize, Wheat, Rice
2	Bhaderwah	Maize, Wheat, Rice
3	Doda	Maize, Wheat
4	Ramban	Maize, Wheat, Rice

Distribution of villages according to land use is given below in the table No. 16 : —

Table No. 16

Distribution of villages according to land use

Sl. No	Name of tehsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kishtwar	156	164364.36	17.02	10.83
2	Bhaderwah	277	32600.97	45.67	7.78
3	Doda	127	101863.73	25.64	5.68
4	Ramban	92	111928.95	21.64	4.70
	Total Disrict	652	410758.01	22.69	7.30

As is evident from the above table Bhaderwah tehsil is unique in the district with 45.67 per cent of its total area under cultivation while the corresponding proportion in other tehsils in this respect is 25.64 per cent in Doda, 21.64 per cent in Ramban and 17.02 per cent in Kishtwar. The highest percentage of irrigated area to total cultivable area in the district is observed in tehsil Kishtwar. On the other hand tehsil Bhaderwah has only 7.78 per cent of its total cultivable area as irrigated. The table indicates that the extension of irrigation facilities in the district as a whole calls for more concerted attention and effort.

Brief Analysis of Town Directory

Separate data in respect of urban population structure, civic finance, the availability of various amenities has been compiled in the main town directory. table I to VI. For facilitating a brief commentary and assessment of the progress made by urban population some of the important statistics have further been sub-divided in table Nos. 17 to 21.

The sub-joined table No. 17 indicates the figures relating to urban population, its percentage variation, density and sex-ratio :—

Table No. 17

Growth Density and Sex-ratio of Urban Population in the District in relation to the State

	District					
Census year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1,000 males
1	2	3	4	5	6	7
1961	262473	15490	5.90	..	442	806
1971	342220	19536	5.71	+26.12	558	854
1981	425262	25174	5.92	+28.86	710	843

	State				
Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex ratio (No. of females per 1000 males)
8	9	10	11	12	13
3560976	593315	16.66	..	N. A.	844
4616632	858221	18.59	+44.65	N. A.	860
*5987389	1260403	21.05	+46.86	2146	875

*The population figures exclude population of area under unlawful accupation of Pakistan and China where census could not be taken.

As can readily be seen from the table Doda district has only 5.92 per cent of its population inhabiting its urban areas as against the corresponding State average of 21.05 per cent. The increase in the proportion of urban population during the decade 1971-81 has been 2.74 per cent. The pace of urbanisation in the district thus continues to be abnormally low even as against the position obtaining for the State as a whole.

As regards density of population in the absence of area figures for the state urban 1961 and 1971 comparable picture is available only for 1981 indicating that urban density of population per Sq. Km. for the State is more than thrice of what it is for the district as a whole. In the matter of urban sex-ratio Doda district has shown slight decrease from 854 females per 1,000 males in 1971 to 843 in 1981 contrary to the tendency at state level which is one of some improvement in the sex-ratio.

Table No. 18 below indicates the per capita receipt, from various resources and expenditure on various amenities in respect of each town of the district :—

Table No. 18

Per capita receipt and expenditure in towns

Class, name & civic status of the town			Per Capita								
			Receipt			Expenditure					
			Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health & conveniences	Public works	Expenditure on public institution	Other aspects
1			2	3	4	5	6	7	8	9	10
VI	Banihal	N. A.	135.02	35.51	99.51	65.28	48.25	12.20	..	..	4.83
VI	Batote	N. A.	70.60	50.67	19.93	58.05	31.59	2.99	22.35	..	1.12
V	Bhaderwah	N. A.	55.49	29.45	26.04	43.64	14.60	..	25.40	..	3.64
V	Doda	N. A.	58.97	32.97	26.00	52.09	14.57	9.23	25.90	..	2.41
V	Kishtwar	N. A.	47.62	32.27	15.35	47.02	15.63	0.52	30.12	..	0.75
VI	Ramban	N. A.	65.42	37.74	27.68	97.53	29.56	..	63.18	..	4.81
	Total		61.70	34.39	27.31	54.06	20.21	3.25	28.14	..	2.46

It will be seen that in per capita receipt Banihal is far ahead of other towns in the district. The other towns which are relatively better placed than other are Batote and Ramban. Ramban town is far ahead in per capita expenditure than other towns. While bulk of the per capita receipts in Batote, Ramban, Bhaderwah, Doda and Kishtwar towns comes from local taxes, in the case of Banihal much of it comes from other sources. Similarly while bulk of the per capita expenditure in Ramban, Kishtwar, Doda and Bhaderwah town is spent on public works in Banihal and Batote towns larger part of it is claimed by the general administration. The per capita expenditure on public health and conveniences is nil or negligible in all the towns of the district except in case of Banihal, Batote and Doda.

The sub joined inset table No. 19 below gives the number of educational institutions per ten thousand population in each town of the district :—

Table No. 19

Schools per ten thousand population in towns

Class name and civic status of town			No. per ten thousand population			
			Higher Secondary/ Inter/ PUC/ Junior College	Secondary Matriculation	Junior Secondary/ Middle	Primary
1			2	3	4	5
VI	Banihal	N. A.	6 04	12.08	18.12	30.19
VI	Batote	N. A.	3.73	7.45	11.18	14.90
V	Bhaderwah	N. A.	1.65	4.94	8.23	19.75
V	Doda	N. A.	1.85	5.56	18.53	27.80
V	Kishtwar	N. A.	2.79	5.58	12.55	15.33
VI	Ramban	N. A.	9.14	9.14	22.84	22.84
	Total		3.18	6 36	13.90	20.66

The data from the above table indicate that towns with smaller population have been better provided for in terms of schools of various levels than those with larger population, the chief consideration probably having been to equip these towns with such facilities regardless of whether they deserve these at all in relation to their population size.

Inset table No. 20 below gives the number of medical institutions per one thousand population :—

Table No. 20

No. of beds in medical institutions in towns

Class, name and civic status of the town			No. of beds in medical institutions per 1000 population
1			2
VI	Banihal	N. A.	15.10
VI	Batote	N. A.	9.31
V	Bhaderwah	N. A.	4.94
V	Doda	N. A.	13.90
V	Kishtwar	N. A.	4.18
VI	Ramban	N. A.	4.57
	Total		7.75

It will be seen that Banihal town with a total population of 1656 and 25 hospital beds is placed better than any other town with 15.10 beds per 1,000 population. Doda and Batote towns are the two other towns which though below Banihal in terms of bed strength have 13.90 and 9.31 beds per 1,000 of total population respectively and have still an edge over the other three towns where the corresponding position is far lower.

The below mentioned inset table highlights the extent of most important commodity manufactured, imported and exported in the towns of Doda district :—

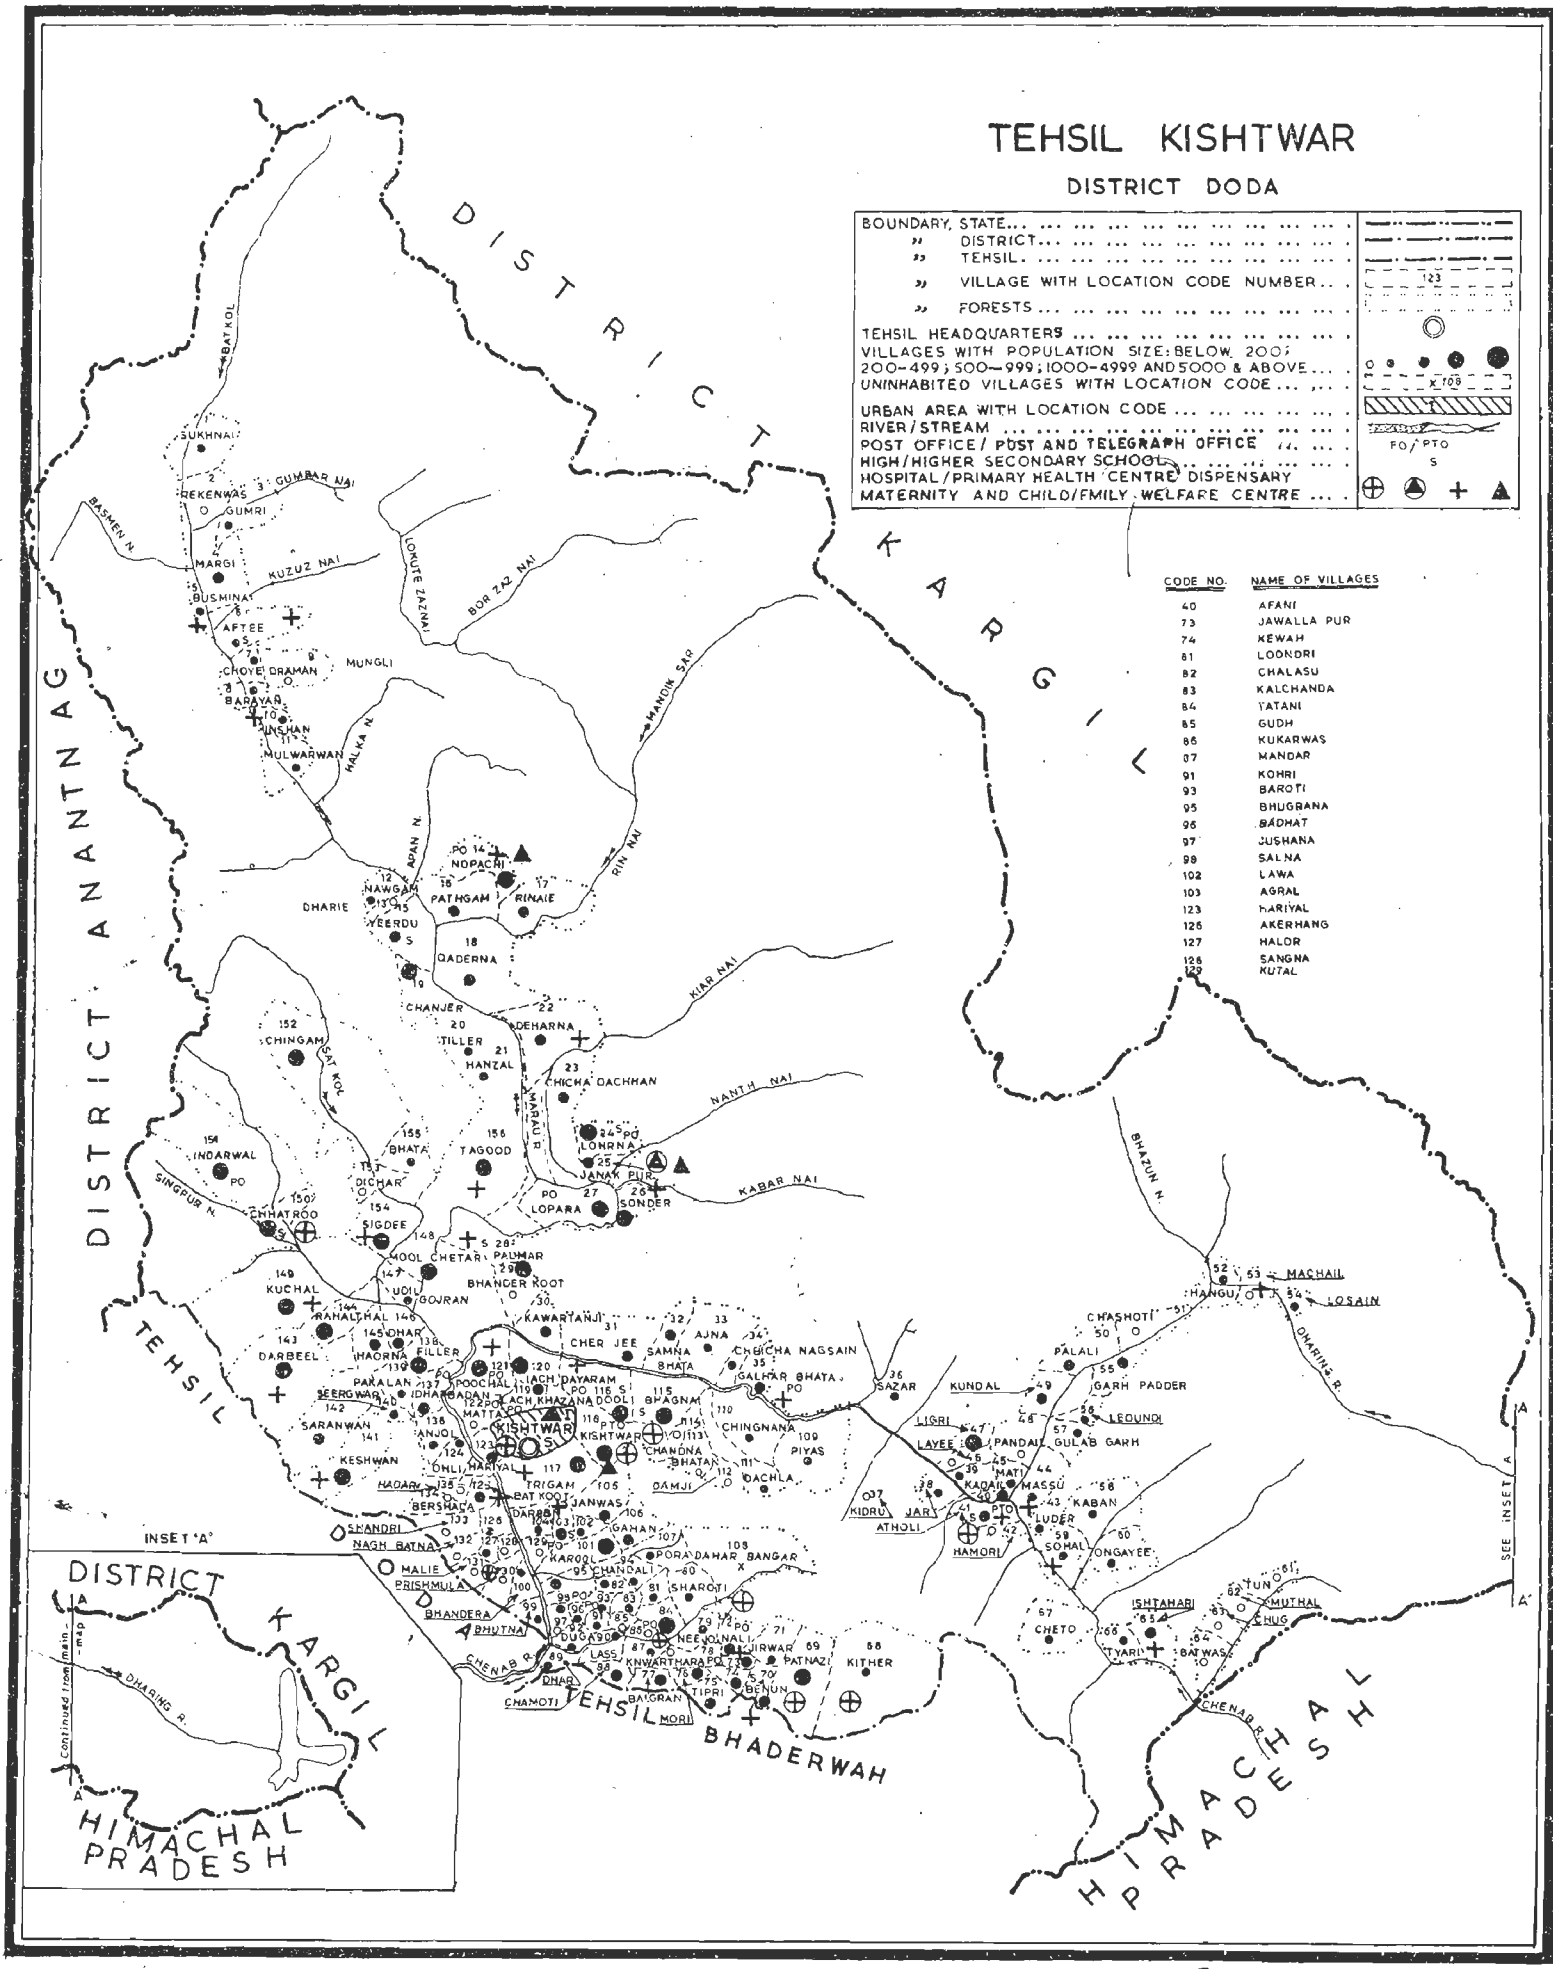

Table No. 21

Most important commodity manufactured imported and exported in the towns

Class, name and civic status of the town			Most important commodity		
			Manufactured	Exported	Imported
1			2	3	4
VI	Banihal	N. A.	..	Walnut	Tea
VI	Batote	N. A.	Silken cloth	Vegetable	Rice
V	Bhaderwah	N. A.	Blankets	Blankets	Medicines
V	Doda	N. A.	Woolen Blankets	Timber	Cloth
V	Kishtwar	N. A.	Blankets	Saffron	Cloth
VI	Ramban	N. A.	Furniture	Honey	Tea

While the table speaks for itself it will be noticed that the woollen blankets are the main items manufactured in three towns out of the six and one each specializes in the manufacture of furniture and silken cloth.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

A number of codes have been used in the Village Directory. These are emplified below :-

Column Number	Item	Code
1	2	3
5 (Educational* Amenities)	Primary or elementary school	P
	Junior secondary or middle school	M
	Matriculation or secondary	H
	Higher Secondary/Intermediate/Pre-University/Junior College	PUC
	College, any College (graduate level and above) like Arts, Science, Commerce, etc.	C
	Industrial school	I
	Training School	Tr
	Adult Literacy Class/Centre	Ac
	Other Educational Institutions. These includes Sanskrit Pathshalla, Senior basic school, makhtab etc	O
6 (Medical Amenities)£	Hospital	H
	Maternity & Child Welfare Centre	MCW
	Maternitry Home	MH
	Child Welfare Centre	CWC
	Health centre	HC
	Primary health centre	PHC
	Primary health sub-centre	PHS
	Dispensary	D
	Family Planning Centre	FPC
	T. B. clinic	T. B.
	Nursing home	NH
	Registered Private Practitioner	RP
	Subsidised Medical Practitioner	SMP
	Community Health Worker	CHW
	Others	O
7 (Drinking Water Amenities)	Tap water	T
	Well-water	W
	Tank water	TK
	Tube-well water	TW
	Handpump	Hp
	River water	R
	Fountain	F
	Canal	C
	Lake	L
	Spring	S
	Nallah	N
	Others	O
	Information not available	NA
8 (Post & Telegraph Amenities)	Post Office	PO
	Telegraph Office	TO
	Post & Telegraph Office	PTO
	Telephone Connection	Phone

Column Number		Item	Code
1		2	3
10	(Communications)	Bus	BS
		Railway Station	RS
		Navigable Water-way (including river, canal, backwaters, etc.)	NW
11	(Approach to village)	Pacca road	PR
		Kaccha road	KR
		Navigable river	NR
		Navigable canal	NC
		Navigable water-way (other than river or canal)	NW
		Foot path	FP
13	(Power Supply)	Electricity for domestic purpose	ED
		Electricity for agriculture	EAG
		Electricity for other purpose like industrial, commercial, etc.	EO
		Electricity for all purposes	EA
16	(Irrigated by source)	Government canal	GC
		Private canal	PC
		Well (without electricity)	W
		Well (with electricty)	WE
		Tube-well (without electricity)	TW
		Tube-well (with electricity)	TWE
		Tank	Tk
		River	R
		Lake	L
		Water fall	WF
		Others	O
		Total	T
20	(Remarks including any place of religious, historical or archaeological interest)	Copies of the newspapers coming in the village	N
		Motorcycles/scooters available in the village	M
		Cars/Jeeps available in the village	C
		Tractors available in the village	T

Note :—*Where there are more than one institutions of the same type in the village the same have been indicated in figures against the appropriate abbreviation e. g. P (3), M (2), H (2).

£Where there are more than one institutions of the same type in the village, the same have been indicated in figures against the appropriate abbreviation e. g. H (2), D (3), etc.

1981 CENSUS VILLAGE AMENITIES AND

TEHSIL KISHTWAR

Location Code No.	Name of village	Total area of the village (in hectares)	Total population and number of households	Amenities available (if not available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges viz, —5 kms. 5—10 kms and 10+kms of the nearest place where the facility is available is given)

Note: – @Represents provisional geographical area figures supplied by the Surveyor General. Figures for urban areas are those supplied by the Local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represent paper area and are derived from the figures supplied by the Revenue Department.

Conversion Table —1 Acre =0.40469 hectares and 100 hectares =1 Km2
