1979

PREFACE

The District Census Handbooks of the 1971 series are being published in three parts divided into two volumes. The first volume consisting of parts 'A' (Village and Town Directory) and 'B' (Primary Census Abstract) has already been brought out. The second volume is part 'C' which presents the census tables of 1971 and the administrative and developmental statistics. It has been divided into three sections. The first section gives a brief resume of the demographic changes that have taken place in the district during the past decades. The second section presents the census tables and also some data based on the Village and Town Directories obtained from the computer. The third section is a compilation of various administrative and developmental statistics.

The scheme of the present series of the District Census Handbooks followed broadly the pattern of its predecessors of 1961 and 1951. For various reasons, however, the original plan of 1971 could not be adhered to in full and some departures had to be made especially with regard to the first and third sections of this volume. It has not been possible to collect all the administrative statistics as originally planned inspite of our best efforts and we have to prune the list and publish whatever is available. We sincerely regret that the section is incomplete to this extent. In the first section also we had to confine ourselves to a brief review of the demographic changes only in the district, based almost solely on census data and left out developments in the economic, social and cultural spheres.

It is regretted that the volume could not be brought out earlier. For various reasons printing has been generally slow and halting and some other census publications of the 1971 series have also been held up. But for the sincere efforts made by the printers, M/s. Nelys Printing (Pvt.) Ltd. this volume also would have been delayed further. The present volume completes the District Census Handbook of West Dinajpur.

I am immensely grateful to Shri Bhaskar Ghose, Director of Census Operations, West Bengal, who had very ably conducted the 1971 Census in the state, for allowing me the opportunity of compiling the present series of the District Census Handbook. I gratefully recall the advice and guidance which I had from him all through.

I am indebted to Dr. B. K. Roy Barman, formerly Deputy Registrar General and Shri N. G. Nag, Assistant Registrar General in the Social Studies Division of the office of the Registrar General, India, for the help and co-operation extended to me in compiling the Handbooks. I also extend my respectful thanks to Shri R. B. Chari, formerly Registrar General, India and Shri P. Padmanabha, the present Registrar

General for the kind advice and encouragement all through the work. My thanks are also due to Shri K. K. Chakravarti, Assistant Registrar General (Census) for the help extended to me all along for completion of the Census tables presented in this volume. My colleague in the West Bengal Directorate, Shri Sukumar Sinha, Deputy Director helped me with valuable suggestions. I am thankful to him.

I owe much to Shri P. R. Halder, Tabulation Officer for helping me with a competent first draft of the 'demographic profile'. Shri M. N. Sarkar, Investigator and his devoted assistants in the Central Tabulation Unit completed with commendable speed the census tables and checked and rechecked the data presented in the volume. The Printing section and the District Census Handbook Unit of the Directorate, under the able guidance of Shri D. Sen, Investigator worked tirelessly to bring out the volume. Many other colleagues in the Directorate have worked hard for months on to see through the publication. I shall remain ever grateful to them all.

My thanks are also due to Shri T. K. Bose of M/s. Nelys Printing (Pvt.) Ltd. and his staff for the excellent printing of the volume.

March, 1979. M. C. Datta

WEST DINAJPUR AT A GLANCE

Area	5,206.0 Sq. Km.
Number of Subdivisions	3
Number of Police Stations	16
Number of Towns :	
Total	7
Municipal	2
Non-Municipal	5
Number of mauzas	3,365
Number of inhabited mauzas	3,173
Population :	
Total	1,859,887
Rural	1,686,197
Urban	173,690
Proportion of urban population to total population	9.34%
Sex Ratio	914
Density of population	434 Sq. Km.
Growth of population (1961-71)	40.5%
Literacy (excluding age-group 0-4) :	
Total	27.04%
Males	37.59%
Females	15.31%
Number of Workers	520,375
Percentage of Workers to Total Population	27.97%

Employment pattern of workers :

	Category of Workers (1)	Number of persons (2)	Percentage to total Workers (3)
(i)	Cultivators	296,871	57.05
(ii)	Agricultural Labourers	146,927	28.23
(iii)	Other Workers	76,577	14.72

SECTION-A

A DEMOGRAPHIC PROFILE
OF
WEST DINAJPUR

WEST DINAJPUR : A DEMOGRAPHIC PROFILE

Introduction

West Dinajpur lies between latitudes 25°10'55" and 26°35'15" north and longitudes 87°48'37" and 89°0'30" east. Sandwiched between Bangladesh on the east and Bihar on the west the district rests on the district of Malda and a part of Bangladesh on the south in the shape of a crescent moon. It stretches over a length of about 300 kilometres along the highways from the eastern end (Hilli police station) to the northern tip of the crescent (Chopra police station) which touches the borders of Darjeeling.

Area and administrative divisions

The area of the district is 5,206.0 Sq. Km. As the name itself indicates, West Dinajpur is a product of the partition of Bengal and was carved out of the undivided district of Dinajpur by the well-known Radcliffe award. In 1956 a small territory out of Purnea district of Bihar was transferred to West Bengal on the recommendation of the States Reorganisation Commission and under the Bihar and West Bengal (Transfer of Territories) Act, 1956. This was formed into the Islampur Subdivision of West Dinajpur. This strip of land constitutes the so called neck of the state and provides the vital link between the three northern districts of Darjeeling, Jalpaiguri and Cooch Behar and the main southern land mass of the state.

The district is now divided into three Subdivisions, namely, Balurghat, Raiganj and Islampur. It had 15 police stations in 1961. A new police station was created recently by splitting the police station of Goalpokhar (in Islampur Subdivision) into two, namely, Chakalia and Goalpokhar. So the number of police stations is now 16.

Physical features etc.

Traversed by a number of perennial rivers like the Atrai, Punarbhapa, Tangan and Mahananda the district is a flat land with a gentle slope from north to south and comprises mostly of alluvial deposits of recent formation. It has profuse and well-spread rains. The climate is hot and humid. The cold weather, which is quite agreeable and by far the best of the seasons in the district, lasts from November till February.

The economy—A general view

The alluvial soil of the district is ideally suited for cultivation of paddy. The undivided district of Dinajpur was considered as one of the granaries of Bengal. The part of the district which now forms West Dinajpur is relatively less fertile. The district is, nevertheless, one of the biggest producers of paddy in the state. Jute is an important cash crop. The district is predominantly agricultural. Except for the traditional cottage-borne or household types, industries are few and far between and

play a very minor role only in the economy. Agriculture also is almost prim tiv and dependent almost wholly on the rains. There are no natural resources other than land, there are no industries. Infrastructure facilities are too little to encourage entrepreneurs and foster industries. It is no wonder, therefore, that the district is one of the poorest in the state and is, like its neighbours of North Bengal, backward in many respects. It remains, till to-day, one of the most neglected areas of the state.

Population and its growth

According to the Census of 1971 the district had a population of 1,859,887 and ranked tenth among the districts in terms of population. The decadal growth for 1961 - 71 was 40.50% which is the highest for any district. The statement below reveals that West Dinajpur has recorded a steady and gently rising growth after 1921 till 1951. Only in 1961 and again in 1971 the rate of growth shot up steeply.

Statement I

Census year 1	Population 2	Decade variation 3	Percentage of decade variation 4
1901	741,284		
1911	791,512	+ 50,228	+ 6,78
1921	695,536	− 95,976	−12.13
1931	745,821	+ 50,285	+ 7.23
1941	834,726	+ 88,905	+11.92
1951	976,882	+142,156	+17.03
1961	1,323,797	+346,915	+35.51
1971	1,859,887	+536,090	+40.50

As in the state as a whole and in most of the districts, the influenza epidemic decimated the population of West Dinajpur during 1911 - 21. The district could regain the level of the 1901 population only in the year 1931 which was evidently the turning point for the district as also for the state as a whole from the demographic point of view. Population has been continuously on the increase ever since. Inspite of the vicissitudes of the forties—the great *famine* of 1943 and the epidemics of the year following—the decade 1941 - 51 witnessed a big increase in the population of the district and the growth rate reached the high figure of 17.03% in 1951. This was due mainly to the large net in-migration into the district during the last few years of the decade. According to the figures available in 1951, about 14,000 Muslims migrated to East Bengal (of whom a little more than 12,000 later returned) while the in-migrants from beyond the international borders numbered 115,000 which was the largest for any district except Calcutta, Twentyfour Parganas and Nadia. The steep increase in the population (35.51%) observed in the next census (1961) may be ascribed partly to the appreciable fall in the death rate in the district consequent on the control of malaria and other public health measures. But, again, continued in-migration was the more important factor behind the tremendous growth of the decade. The same process has been in action in the last decade also. On the one hand, the rate of natural increase has gone

up ; simultaneously, the other component of growth, namely, migration has also been very active. The stream of in-migrants from across the borders in the early sixties and, again, durin, the Bangladesh turmoil on the eve of 1971 Census, has swelled the population of the district enormously during the decade.

An important aspect of the growth of population of the district is that the newly created Subdivision of Islampur (which was transferred to West Bengal only in 1956) has witnessed a tremendous growth since the late fifties. In 1951 - 61 the rate of growth in the Subdivision was 47.9% as against 37.9% and 23.0% respectively in Raiganj and Balurghat Subdivisions. During 1961 - 71, too, the growth rate in Islampur was 50.8% while the two other Subdivisions taken together had a growth of 36.14% only. Islampur had been an area of low density with an unkind sandy soil when it was transferred to the district in 1956. The in-migrants have gradually settled in strength in the Subdivision and consequently the density of population has almost reached the same level as in the two other Subdivisions.

Growth of population in police stations

The percentage variation of population during the last three decades in the administrative divisions of the district upto the police station level is shown in the following statement.

Statement II

Percentage decade variation in police stations of West Dinajpur

Name of Unit (1)	1961-71 (2)	1951-61 (3)	1941-51 (4)
WEST DINAJPUR	**40.5**	**35.5**	**17.0**
Balurghat Subdivision	**37.9**	**23.0**	**30.6**

Raiganj Subdivision	**35.2**	**37.9**	**18.2**
Raiganj	38.1	47.3	55.4
Kaliaganj	30.3	39.4	9.7
Hemtabad	32.6	34.9	20.6
Itahar	36.5	29.3	10.5
Kushmundi	29.6	30.4	5.9
Bangshihari	39.8	41.2	2.5
Islampur Subdivision	**50.8**	**47.9**	**2.00**
Islampur	51.2	53.4	2.00
Karandighi	62.5	59.4	2.00
Chopra	47.5	30.3	2.00
Goalpokhar*	45.5	48.6	2.00

Note :

A new police station, Chakalia, was created in 1961 with 201 villages of Goalpokhar. Populations of Goalpokhar and Chakalia have been taken together to show the growth rate of Goalpokhar in 1961-71. Growth of Chakalia has not been shown separately.

The Subdivision of Islampur is evidently the new area of settlement of population. All the police stations of the Subdivision registered growth rates which were substantially higher than the district average. The growth has been the fastest in Karandighi (62.5%) during 1961-71. It was the highest (59.4%) in this particular police station during the preceding decade also. It is not that the existing population of the district is redistributing itself between the regions by way of internal migration. There is actually no report or evidence of such movement of the population within the district. The very rapid growth of population in the Subdivision during the two successive decades was due mainly to the settlement of the fresh in-migrants in the region which has been considered as a sort of virgin area by the new settlers.

The growth of population has been quite high (56.5%) in Balurghat police station too during 1961-71. The net addition to the population, in absolute terms, was 153,000 of which 40,000 or a little more than one-fourth was contributed by the head-quarters town of Balurghat alone. It is significant that the growth rate declined considerably in Balurghat police station in the preceding decade as it came down from 52.4% in 1941-51 to 19.1% in 1951-61. The long borders which the police station has with erstwhile East Pakistan and the fact that there was a likelihood of the district headquarters being shifted to Raiganj are said to be among the reasons why new settlers preferred not to settle in the police station during the fifties. The inhibitions appear to have been removed as the headquarters continued to be located at Balurghat and stability returned along the borders especially because of the Bangladesh developments. Even Hilli which recorded a negative growth in 1951-61 registered an upward movement of the population in 1971, the decadal growth rate being 17.2%.

The Subdivision of Raiganj, however, continues to be a region of steady growth. All the police stations there have grown at a uniform pace during the last decade. The rate of increase has, of course, been at a slightly lower level than in the preceding decade in all the police stations except Itahar.

Sex ratio and age composition

Out of the total population of 1.86 *million* in 1971 in West Dinajpur 0.97 *million* were males and 0.89 *million* were females. The sex ratio, therefore, comes to 921 which is appreciably higher than the ratio of 891 in the state. The sex ratio has moved in the district in an irregular manner over the decades since 1901. At the turn of the century it was substantially lower than in the state as a whole. The respective figures were 918 for West Dinajpur and 945 for West Bengal in 1901. The ratio moved upward in the district till 1921 when it attained the highest level of 929. It slided downward thereafter and reached the lowest ever (884) in 1951. The trend was reversed again during the fifties. The ratio climbed up to 906 in 1961 and further to 921 in 1971. The state, on the other hand, started with a reasonably comfortable ratio of 945 which came down steadily over the successive decades reaching the lowest of 852 in 1941. It was only after 1941 that the state ratio looked up again and the upward trend has been maintained

till the last census. The following statement compares the movement of the sex ratios in the state and West Dinajpur since 1901.

Statement III

Sex ratio in West Bengal & West Dinajpur 1901-1971

Census year	West Bengal	West Dinajpur
1	2	3
1901	945	918
1911	925	920
1921	905	929
1931	890	923
1941	852	910
1951	865	884
1961	878	906
1971	891	914

A substantial reduction in child and maternal mortality since the late forties is one of the factors making for the upward movement of the sex ratio as observed in the state. Predominance of males among the in-migrants to the Calcutta region from the neighbouring states used to depress the sex ratio in the state. The sex composition of the in-migrants from erstwhile East Pakistan has been quite different. Whole families, and not males only, having often migrated to the state from across the borders—and there were over 4 *million* such migrants—the effect on the sex ratio has obviously been favourable in the state as a whole and in districts like West Dinajpur which received huge numbers of the in-migrant families.

Age composition and growth of population

Along with a gently rising sex ratio the age composition of the population is also undergoing a slow change in the district as well as the state. The distribution of population by age-groups is shown below for West Bengal and West Dinajpur.

Statement IV

Distribution of population by age-groups, 1971 (%)

Name of Unit	0—14	15—29	30—39	40—49	50—59	60+
WEST BENGAL	42.89	24.39	12.59	9.05	5.57	5.30
West Dinajpur	46.35	22.54	12.38	8.62	5.38	4.72

West Dinajpur has a larger proportion of children and infants in the total population than the state. The proportion of the old people (age 60+) is, on the other hand, slightly higher in the state than in this district. The high proportion of the young is a natural corollary of the continuous steep rise in the population which the district has witnessed during the last three decades. The population in the working age 15-59, consequently, has to bear a heavier burden of dependency in the district as compared to the state which indicates a greater constraint on the economic development of the region.

The sex ratio by age-groups is also an important factor to reckon with. The following statement gives the sex ratio by age-groups in the state and in West Dinajpur.

Statement V

Sex Ratio by age-groups, 1971

Name of Unit	0—4	5—14	15—19	20—24	25—29	30—39	40—49	50—59	60+
WEST BENGAL	1,019	944	848	915	883	820	696	786	992
West Dinajpur	1,024	955	781	1,078	1,025	886	756	796	828

As in the whole of the state the sex ratio is highly favourable among infants in the district of West Dinajpur also. It is very close to unty for the young age-group 0—14 in the state as also in the district. In case of West Dinajpur the females of the important child-bearing age-groups 20—24 and 25—29 also exceed the males in the same age-groups.

It has been observed that the over-all sex ratio is already moving upward in the district. This, along with the high proportions of the young in the total population, is indicative of high fertility. With the favourable sex ratio among infants and the gradual improvement in maternal and child care the sex ratio is likely to improve further. All this will make for further growth of population in this, as in many other districts, in the coming decades.

Density

West Dinajpur is one of the relatively thinly populated areas of the state. The density of population in the district was 357 per km^2 in 1971 as against 504 to the square kilometre in the whole of West Bengal. Being a function of population, density is moving upward quite rapidly in the district with the steep rise in population from decade to decade. Islampur was a very thinly populated Subdivision in 1956 when it was ceded to West Bengal. The population in the region has more than doubled itself during the last twenty years as it went up from 256,000 in 1951 to 572,000 in 1971. The density in the Subdivision (326) has consequently come nearer to the district average (357). Balurghat Subdivision is relatively thickly populated with a density of 367. In Raiganj the density is a little lower at 353. The statement below shows the density of population in the police stations of the district.

Statement VI

Density of population in police stations of West Dinajpur, 1971

Name of Unit	Density	Name of Unit	Density
WEST BENGAL	504	8 Kaliaganj	393
West Dinajpur	357	9 Kushmudi	306
Islampur Subdivision	326	10 Itahar	334
1 Chopra	268	11 Bangshihari	291
2 Islampur	388	Balurghat Subdivision	367
3 Goalpokhar	313	12 Gangarampur	353
4 Chakalia	365	13 Kumarganj	301
5 Karandighi	314	14 Tapan	276
Raiganj Subdivision	353	15 Balurghat	508
6 Raiganj	431	16 Hilli	494
7 Hemtabad	324		

Density is still at a fairly uniform low level in the police stations except in those which have substantial urban population. Thus in Balurghat police station the density has reached 508 to the square kilometre due mainly to the heavy density in the town of Balurghat. Hilli comes second in terms of density (494). Because of the urban concentration of Raiganj town and the sub-urban spread around it Raiganj police station has a density of 431 per km^2. Kaliaganj has likewise come very close to the 400 mark.

Progress of urbanisation

West Dinajpur is overwhelemingly a rural district with over 90% of the population living in its villages. If urbanisation is an indicator of development then, with less than a tenth of its population in the urban areas, West Dinajpur may be regarded as a typical example of an underdeveloped area. Not only is the degree of urbanisation low in the district (9.34%), the progress of urbanisation is also very slow. Between 1961 and 1971 the proportion of urban to total population increased from 7.48% to 9.34 only. In contrast the state had 24.75 % of its population in the urban areas in 1971 as against 24.45% in 1961. The growth rate of the urban areas in the district was, however, pretty high during the last decade, the urban population having increased by about 75 per cent during the period.

Towns of the district and their development

The emergence and growth of the towns of the district make an interesting study.

The first town of the district, Hilli, emerged only in 1941. Two more names, Balurghat and Raiganj, were added to the list of urban areas in the next census. In 1961, again, Kaliaganj, Gangarampur and Islampur acquired the status of towns. One more place, namely, Dalkhola, was added to the list to complete the tally of 7 towns in 1971.

Balurghat, the headquarters of district administration, is by far the most populous town of West Dinajpur with a population of 67,088 in 1971. The town registered a tremendous growth of 148.48% during 1961 - 71. Raiganj which had the largest urban population in 1961 was relegated to the second position in 1971 as it recorded a none-too-high growth rate of 33.76% only during the decade. The population of the town stood at 43,191 in 1971. The decadal growth rates of the towns of the district are shown in the statement that follows.

Statement VII

Decadal growth of towns af West Dinajpur

Name of Town (1)	Year (2)	Population (3)	Percentage decade variation (4)
Islampur	1961	9,499	..
	1971	15,715	65.44
Dalkhola	1971	5,622	..
Rayganj	1951	15,473	..
	1961	32,290	108.69
	1971	43,191	33.76
Kaliaganj	1961	14,478	...
	1971	21,169	46.21
Gangarampur	1961	9,671	...
	1971	14,809	53.13
Balurghat	1951	18,121	..
	1961	26,999	48.99
	1971	67,088	148.48
Hili	1941	6,952	..
	1951	8,346	20.05
	1961	6,032	—27.73
	1971	6,096	1.06

In 1961 the total urban population of the district was a little less than a lakh, 98,969 to be precise.The last decade added 74,721 to it and the total come to 173,690 in 1971. This meant a growth of 75.5%—a high rate indeed by all standards. It has to be noted, however, that Balurghat town alone accounted for more than half of the addition to the total urban population of the decade. Gangarampur, a thana and Block headquarters and a flourishing trading centre in a rich agricultural area, also registered a high growth rate of 53.13% during the same period. Kaliaganj, which is another administrative headquarters and centre of trade and commerce, added 46.21% to its population during the decade. The growth of Rayganj, a subdivisional town, was relatively slow, being 33.76% only. The growth rate of Balurghat presents a contrast. In 1961 - 71 it had a phenomenal growth of 148.48 per cent as against a not-too-rapid rate of 48.99% during the preceding decade. The picture is the reverse in case of Rayganj. Between 1951 and 1961 this town developed at a very rapid pace and the population was more than doubled, the rate of growth being 108.69%. The tempo slowed down considerably during the last decade.

Dalkhola, which recorded a population of 5,622, is the only new entrant in the list of towns in the district in 1971. It was a small village in Bihar with a small population

of 796 only in 1951. Because of its location on the National Highways with a fairly rich agricultural hinterland it grew in importance since the transfer of the territories to West Bengal and developed as a flourishing trading centre. By 1961 Dalkhola acquired all the urban characteristics except that its numerical strength (3,488) just fell short of the minimum (*i. e.* 5,000) required of a "town". The population of non-agricutural workers to its total male workers in the year was about 88% and the density 1,645 to the square kilometre. The place has added more than 60% to its population during the last ten years.

Nature of urban growth

As already stated, the degree of urbanisation is still very low in West Dinajpur. But the rate of growth of its towns during the last intercensal decade (75.5%) has been one of the highest among the districts. A close look at the pattern of urbanisation in the district will reveal that it has been on the same lines as in the other districts of North Bengal and in most other areas of the state. Modern industries are conspicuous by their absence and have nothing to do with urbanisation in the district. Urban areas have developed centering on, mostly, the seats of administration. Balurghat, Rayganj and Islampur, the principal towns, are centres of district and subdivisional administration. They grew in size mainly as service towns because of their administrative importance; trade and commerce have flourished subsequently. The other urban areas have also come up mostly in the centres of administrative importance, namely, the thana and block headquarters, and developed mainly as trading towns. The in-migrants from beyond the international borders and their marked preference for settlement in and around the existing urban centres have played a crucial role in the emergence and development of towns like Balurghat and Rayganj. The phenomenal growth of Raiganj in the fifties, and of Balurghat during the last two decades, may be attributed mainly to the new settlers. The pattern of urban growth as discussed above is reflected in the occupational distribution of the workers in the towns of the district. As much as 67% of the urban workers were engaged in the tertiary sector, about 29% each being in Trade and Commerce and Services. The secondary sector employed about 14% only. In the absence of any planned effort for industrialisation it is difficult to guess how far the urban growth can sustain itself in the coming decades.

Literacy and education

West Dinajpur is one of the most backward of all districts from the point of view of literacy and education. As against the state average of 38.86%, which was itself far from satisfactory, the rate of literacy was 27.04% only in West Dinajpur. The progress of literacy has also been extremely slow in the district as may be seen from the statement that follows.

Statement VIII

Percentage of literates : West Bengal and West Dinajpur 1901-71
(excluding age-group 0-4)

Census year	West Bengal			West Dinajpur		
	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1901	9.83	17.86	1.21	6.25	11.44	0.31
1911	10.82	19.12	1.69	6.93	12.54	0.45
1921	12.28	20.99	2.48	9.01	16.06	0.98
1931	12.65	20.41	3.75	7.43	12.96	1.11
1941	19.72	29.33	8.29	11.39	18.92	2.81
1951	24.42	34.14	12.74	12.27	19.92	3.58
1961	34.46	46.57	20.27	20.66	31.04	8.90
1971	38.86	49.57	26.56	27.04	37.59	15.31

The statement shows that literacy has spread at a very slow pace in the district as well as in the state until 1941. In three decades between 1901 and 1931 the rate of literacy in the state moved up by a mere 3 per cent points from 9.83% in 1901 to 12.65% in 1931. In West Dinajpur the progress was even slower, the percentage of literates going up from 6.25 to 7.43 only during the period. The year 1941 saw the rate of literacy reaching the modest level of 19.72% in the state. West Dinajpur also followed suit. The proportion of literates crossed the 10% mark for the first time in the district that year, the exact figure being 11.39%. The rate of progress of literacy has, however, been somewhat quicker since independence both at the State and district levels. But West Dinajpur has remained behind the state average all along.

The statement, however, reveals a remarkable progress in the field of female education. In the state as a whole as also in the district of West Dinajpur the percentage of literates among the fair sex has remained considerably lower than among the males. But female literacy has moved much faster than literacy among men since 1941. In West Dinajpur the rate of female literacy in 1971 was 15.31% as against 2.81% in 1941 which meant a tremendous growth of about 450% in a span of thirty years. This appears to be a real break-through. But in the given state of poverty and backwardness and the near-stagnant state of the economy of the district there are reasons to doubt if the tempo will be maintained for any long period. The view gains support from the fact that women's education has been wide-spread in the urban areas only and is yet to take roots in the rural areas. As the statement below shows, only 11.03% of the rural women were literate while the literates among females in the urban areas were five times as much (55.34%).

Statement IX

Literacy among urban and rural population, 1971 (%)

Name of Unit	Rural			Urban		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
West Bengal	30.63	42.27	18.05	62.25	68.19	54.11
West Dinajpur	23.00	33.86	11.03	63.23	69.84	55.34

In fact, the statement reveals that the extension of education has been slow and halting even among the males in the rural areas of the district. On the other hand, literacy rates in the towns of the district are higher than in all urban areas of the state, both for males and females.

Literacy in the police stations

At the police station level also there is a wide variation in literacy from unit to unit. The police stations in the Islampur Subdivision are lagging behind most of those belonging to the two other Subdivisions. The following statement gives the rate of literacy in the police stations of the district.

Statement X

Percentage of literates in police stations of West Dinajpur, 1971 (including age-group 0—4)

Name of Unit	Percentage of literacy	Name of Unit	Percentage of literacy
WEST DINAJPUR		8 Kaliaganj	25.00
A. Islampur Subdivision :		9 Kushmundi	16.70
1 Chopra	15.76	10 Itahar	19.55
2 Islampur	14.83	11 Bangshihari	19.26
3 Chakalia	13.91	C. Balurghat Subdivision :	
4 Karandighi	13.17	12 Gangarampur	24.06
5 Goalpokhar	10.62	13 Kumarganj	26.64
B. Raiganj Subdivision :		14 Tapan	19.80
6 Raiganj	29.66	15 Balurghat	40.66
7 Hemtabad	20.24	16 Hilli	30.72

As the net or effective percentage of literacy (excluding age-group 0-4) is not available at the police station level the gross literacy only of the population (including age-group 0—4) has been presented in the statement. The proportions of population in the age-group 0—4 do not vary much between police stations. The statement may, therefore, give a fairly accurate picture of the state of literacy.

It is important to note that gross literacy exceeds 40% only in the police station of Balurghat. The reasons are obvious—the high rate of literacy in the large urban population concentrated in the town of Balurghat. All the other 15 police stations are below the state average of 33·20%. In four out of five police stations of Islampur Subdivision the rate of literacy was below 15%. Goalpokhar had the dubious distinction of being the police station with the lowest literacy rate (10·62%) in the state.

Religious composition

Hinduism and Muslim are the two main religions in the district as in all of the state or the country. The Hindus are the major community and account for 63·07% of the population. The Muslims constitute 35·89%. The Christians are the third largest community comprising 0·95% of the people. The remaining 1·04% of the population are distributed among the other religious groups. The percentage distribution of population in the district by religious persuasions is shown below :

Hindu	63·07	Muslim	35·89
Christian	0·95	Sikh	0·01
Buddhist	0·01	Jain	0·05
Others	0·02		

The proportion of the Hindus in the population was 59.87% in 1961. During the last ten years, therefore, it has gone up by 3 per cent points. The Muslims recorded a corresponding decline during the period from 39.41% in 1961 to 35.89% in 1971. The two communities had a decadal growth of 48.0% and 27.94% respectively between 1961 and 1971. The Muslims are more numerous in Islampur Subdivision than in other parts of the district.

Scheduled castes and scheduled tribes—their importance in the composition of the population

No account of the population will be complete without a discussion on the state of the scheduled castes and scheduled tribes of the area. This is especially so in districts like West Dinajpur where their proportions are substantial. The scheduled castes and tribes being almost synonymous with backwardness, the proportion of these communities to the total population are often an indicator of the backwardness of the area. In West Dinajpur the scheduled castes and tribes, taken together, numbered 650,895 which comes to 35.0% of the population according to the Census of 1971. In the preceding census also they accounted for about the same percentage, the exact figure being 34.49. Along with its northern neighbours, namely, Jalpaiguri, Cooch Behar and Darjeeling, the district forms a compact area of concentration of scheduled castes and tribes. It may be worthwhile to note here that the scheduled castes and tribes taken together constituted as much as 58.51, 47.78 and 26.46 per cent respectively of the population of the three districts.

Scheduled castes

In 1971 the scheduled castes in the district numbered 429,578 which came to 23.10% of the population as against 19·90% in the whole of West Bengal. The proportion was a little lower (21.64%) in the preceding census in the district.

The scheduled castes are not as numerous in Islampur as they are in the two other Subdivisions of the district. In Islampur their share in the total population was 8.60% only as against 35.22% and 22.04% in Raiganj and Balurghat Subdivisions respectively. This is mainly because some of the communities which were scheduled castes elsewhere were not scheduled in Islampur and also because the Muslims were overwhelming in number in the transferred territories. The statement below shows the distribution of scheduled castes in the police stations in terms of percentage of total population.

Statement XI

Name of Unit	Total	Rural	Urban
WEST DINAJPUR	23.10	24.76	6.95
A. Islampur Subdivision	8.60	8.69	6.31
(i) Chopra	10.76	10.76	..
(ii) Islampur	6.57	7.05	3.00
(iii) Goalpokhar	4.74	4.74	..
(iv) Chakalia	12.62	12.62	..
(v) Karandighi	9.52	9.22	15.56

Statement XI—*contd.*

Name of Unit	Total	Rural	Urban
B. Raiganj Subdivision	35.22	37.92	7.23
(vi) Raiganj	32.29	39.58	4.44
(vii) Hemtabad	38.50	38.50	..
(viii) Kaliaganj	51.50	59.56	12.92
(ix) Kushmundi	45.34	45·34	..
(x) Itahar	26.64	26.64	..
(xi) Bangshihari	22.14	22.14	..
C. Balurghat Subdivision	22.04	24.89	6.90
(xii) Gangarampur	21.62	22.84	13.32
(xiii) Kumarganj	24.41	24.41	..
(xiv) Tapan	28.06	28.06	..
(xv) Balurghat	17.89	25.09	4.78
(xvi) Hilli	19.75	20.59	14.59

The scheduled castes constitute more than one third of the population in Raiganj Subdivision and about one-fifth only in Balurghat. In Kaliaganj police station they are as much as 51·50% of the population. Dependent as they are primarily on agriculture, the scheduled castes are overwhelmingly based in the rural areas. In the urban areas their proportion comes to 6·95% only. In both the principal towns of the district, namely, Balurghat and Raiganj and also in Islampur the scheduled castes are less than 5% of the population. In the other towns, which are of the nature of magnified or oversize villages with recently acquired urban characteristics and functions, however, the proportions of scheduled castes exceed 10%. It is an interesting coincidence that the new town of Dalkhola has a higher percentage of scheduled castes (15·56) than in the rural areas of the Karandighi police station (9·22).

Important scheduled castes

The Rajbanshis (134,976) are the most populous scheduled caste in the district followed by the Paliyas (79,432) who are regarded by some as a sub-caste of the Rajbanshis but are "usually distinct in respect of inter-marriage and the eating of cooked food." The two communities together account for half the scheduled caste population of the district. They may in fact be treated as indigenous to the region, for they are almost entirely confined to the districts of North Bengal. The Rajbanshis reside mainly in Cooch Behar and Jalpaiguri. But as much as 80% of all Paliyas of the state are to be found in West Dinajpur. The other numerically important scheduled castes of the district, each with a population of 5,000 or more, are enumerated below.

Name of caste	Population
Bagdi	33,601
Bhuimali	7,759
Mochi	17,185
Dosadh	6,759
Gonrhi	5,028
Hari	12,907
Jalia Kaibartta	11,750
Musahar	5,106
Namasudra	31,600

A number of communities like Gonrhi, Musahar, Dosadh and Ghasi (4,075) also deserve special attention. The Gonrhis are a small community with a population of about 12,000 only. Nearly 40% of them are concentrated in West Dinajpur. The neighbouring district of Malda and Murshidabad, across the Ganga, are the two other areas of concentration of the community. In West Dinajpur, again, Kaliaganj happens to be their first abode. The Musahars are also a small community with almost the same numerical strength (12,426) as the Gonrhis in the state. They are also concentrated in two districts of West Dinajpur and Malda in almost equal strength, 5,106 and 4,911 respectively. About 25% of all the Ghasis of the state reside in West Dinajpur. The Dosadhs are found concentrated in the three contiguous districts of West Dinajpur, Malda and Jalpaiguri which account for a little more than half of the total number of the community (32,000) in West Bengal.

Between 1961 and 1971 the scheduled caste population of the district increased by 49·96% which was well above the growth rate of the total population. The scheduled tribes recorded a much smaller growth of 30·07% only during the period. The scheduled castes have increased tremendously in numbers in the district but there was hardly any appreciable change in their socio-economic conditions. Literacy among the scheduled castes has progressed at the same pace as among the total population during the last decade in the state as well as the district. This is no doubt a good achievement ; but there is still a considerable leeway to make good as will be evident from the following statement.

Statement XII

Percentage of literates among scheduled castes and total population, 1961 & 1971 (including age 0—4)

Name of Unit	Literacy of total population		Literacy of scheduled castes	
	1971	1961	1971	1961
(1)	(2)	(3)	(4)	(5)
WEST BENGAL	33.20	29.28	17.80	13.58
West Dinajpur	22.12	17.06	15.91	10.84

Literacy among the scheduled castes of the district is almost at the same level as the state average. But the literacy differential between total population and scheduled castes in the district is narrower than in the state.

The backwardness of the scheduled castes and the scheduled tribes is, however, more glaring in the economic sphere. We will refer to this in the section on the economic activities.

Scheduled tribes

There were 221,317 persons belonging to the scheduled tribes in West Dinajpur according to the Census of 1971. As many as 30 tribes were returned as scheduled tribes in the district in 1971. The tribals in West Bengal do not generally have

any specific areas of concentration as in states like Bihar, Orissa or Madhya Pradesh. The compact block comprising the 4 North Bengal districts from Darjeeling to Malda through West Dinajpur does, however, contain considerable numbers of the scheduled tribes who constitute a sizeable proportion of the total population of the area. In West Dinajpur the tribals are 11.90% of the population. In Jalpaiguri and Darjeeling they are 24·49% and 13·89% respectively.

Distribution of scheduled tribes in police stations

The tribals are more numerous in Balurghat than in other Subdivisions of the district. Raiganj also has a fairly good number. The distribution of the scheduled tribes in the police stations of the district is shown in the following statement.

Statement XIII

Distribution of scheduled tribes in West Dinajpur, 1971

Name of Unit	Population of scheduled tribes	Proportion of scheduled tribes to total population (%)		
		Total	Rural	Urban
1	2	3	4	5
WEST DINAJPUR	221,317	11.90	12.98	1.41
Islampur Subdivision	37,391	6.59	6.78	0.31
(i) Chopra	5,821	5.73	5.73	..
(ii) Islampur	3,717	2.77	3.09	0.41
(iii) Goalpokhar	6,825	5.85	5.85	..
(iv) Chakalia	7,173	7.38	7.38	..
(v) Karndighi	13,855	11.34	11.88	Negligible
Raiganj Subdivision	69,744	9.53	10.38	0.68
(vi) Raiganj	14,140	6.79	8.39	0.68
(vii) Hematabad	4,087	6.59	6.59	..
(viii) Kaliaganj	5,451	4.45	5.24	0.68
(ix) Kushmundi	8,927	9.38	9.38	..
(x) Itahar	14,265	9.99	9.99	..
(xi) Banshihari	22,874	22.60	22.60	..
Balurghat Subdivision	114,182	22.52	23.96	2.21
(xii) Gangarampur	20,158	17.40	19.16	5.38
(xiii) Kumarganj	18,203	21.11	21.11	..
(xiv) Tapan	31,308	25.75	25.75	..
(xv) Balurghat	35,758	18.91	28.44	1.56
(xvi) Hilli	8,755	20.10	23.11	1.59

A little more than half of the total scheduled tribe population are residents of Balurghat Subdivision. Balurghat police station has the largest numerical concentration of the scheduled tribes. In Tapan police station they constitute a fourth of the total population. Banshihari police station of Raiganj Subdivision which is contiguous to the Sadar Subdivision also has a large number and proportion of tribals. As elsewhere in the state, the tribals reside mostly in the rural areas, being mainly agriculturists and tied to the soil. Their numbers in the towns are negligible. The highest concentration of tribals in any town is to be found in Balurghat (1,047).

Numerical strength of the tribes

The Santals who are the main tribe of West Bengal are the most populous tribe in West Dinajpur also. With a strength of 130,473 they account for about 60% of the scheduled tribe population of the district. The Oraons (33,755), Mundas (19,864) and Malpahariyas (6,435) are the other major tribes. The Mahalis who are concentrated mostly in the North Bengal region are also an important tribal community in the district with a population of 4,870.

A few other communities of the district have to be mentioned here as of special significance. Asur is one such. All the 611 Asurs of the state are concentrated in this district. Birjia (16), Chero (175), Gond (46) and Kharwar (134) are four other small tribes who are found nowwhere else in the state. Because of the area restrictions in the Presidential order on scheduled castes and tribes the following tribes were counted in West Dinajpur and Purulia only.

Name of tribe	Population		
	West Bengal	West Dinajpur	Purulia
Karmali	43	41	2
Korwa	3,222	2,778	444
Lohara or Lohra	2,388	1,257	1,131
Parhaiya	108	106	2
Savar	4,986	501	4,485

Changes during the last inter-censal decade

During the last inter-censal decade the scheduled tribes in the district added substantially to their numbers. The growth rate in 1971 was 30·07% which was much lower than that of the general population (40·50%) but higher than the state average for all scheduled tribes (23·31%). The rate was at a lower level of 21% only in 1961.

The sex ratio among the scheduled tribes of the district was 956 as against the state average of 955. The ratio among the sheduled tribes is much more favourable than among the total population of the district (914). It is somewhat perplexing that the sex ratio among the scheduled tribes of the district which was above unity (1,002) in 1961 should have moved downward during the last decade. This is contrary to the upward trend of the ratio observed in the total as well as tribal population in the state and in the total population in the district. But it is not the demographic characteristics but the economic, social and cultural traits that differentiate the tribals from the general population. It has been mentioned already that the backwardness of the tribals is related mainly to their economic proverty which, again, has brought about and perpetuated many other evils.

Lack of education is one of the crippling disabilities of the tribal communities. The rate of literacy among the scheduled tribes of the state was 8.92% as against the total literacy of 33.20% in 1971. In West Dinajpur the scheduled tribes are relatively better off with a literacy rate of 11.30% against the poor general literacy of 22.12% only. The rate by itself is appallingly low. But the tribals of the district have no doubt achieved some good progress in the field of education during the last decade. The following statement will be illustrative.

Statement XIV

Literacy among scheduled tribes, 1961 & 1971 (%)

Name of Unit	1971						1961					
	Total Population			Scheduled Tribes			Total Population			Scheduled Tribes		
	P	M	F	P	M	F	P	M	F	P	M	F
West Bengal	33.20	42.81	22.42	8.92	14.49	3.09	29.28	40.08	16.98	6.55	11.20	1.76
West Dinajpur	22·12	31·09	12·37	11·30	17·79	4·51	17·06	25·96	7·24	5·27	9·65	0·98

While literacy among the scheduled tribes moved up only slowly from 6·55% in 1961 to 8·92% in 1971 at the state level the same for the district doubled itself from 5·27% to 11·30% during the same period. This is a significant movement indeed. Yet more spectacular has been the progress among the tribal women as the female literacy shot up to 4·5% in 1971 from below 1% a decade back. It has to be noted that female literacy has moved quite fast in the total population too—from 7·24% to 12·37% and the literacy differential between the general and scheduled tribe population is still quite marked and tends to continue. The data thrown up by the Village Survey Project of the Cultural Research Institute of the Govt. of West Bengal which covered 55 villages of tribal concentration from 9 districts including West Dinajpur confirm the trend. The Survey has shown that the attendance in schools is still much poorer among the scheduled tribes than among the non-tribals. Only 19·82°/₀ of the 1,448 tribal children of the age-group 6-11 attended primary schools as against 31·53°/₀ of 3,260 in case of other communities including the scheduled castes. In the secondary stage also 17·73°/₀ of the non-tribal children of age 11-17 attended school as against 10·64°/₀ only among the scheduled tribe children of the age-group.

Economic activities

West Dinajpur is one of the poorest districts of west Bengal and is in the company of economically backward districts like Malda and Purulia. With about 85% of its workers in the agricultural sector the economy of the district is almost entirely dependent on agriculture. Modern industries are almost non-existent and trade and commerce, dominated by petty traders, plays a somewhat important role as may be expected in an agrarian economy with a fast growing population. The nature of the economy is also reflected in the participation rate of labour in the district.

Participation rate : West Dinajpur and West Bengal

In a total population of 1.86 *million* 0.52 *million* were returned as workers in the district in 1971 which gives a participation rate of 27.97 per cent. The participation rate was a little lower (27.91°/₀) for all of West Bengal in the year. It was at an appreciably higher level ten years back both for the state and the district, the respective figures being 33. 16°/₀ and 32.72%. The fall in the rate of participation in 1971 was universal not only in the state but in the country as well. It is attributed largely to

P for Persons, M for Males, F for Females

the change in the concept of a "worker" as adopted in 1971. The change had, as we shall see presently, a more marked impact on the female participation. It is also well known that job opportunities, especially in the organised sector, have failed to keep pace with the growth of population, or, more appropriately, with the increasing number of new entrants in the labour market. This has depressed the rate of participation. At the same time the growing numbers and proportions of the infants and children of age-group 0-14 as also of the aged people of 60+ in the total population have also pulled down the participation rate.

It is significant that the rate of participation in the rural areas of West Dinajpur (28.43%) was higher than in the urban areas (23.59 %). The position is reversed in case of West Bengal. The rural participation rate at the state level (27·19 %) was far behind the urban rate (30·12%). The reasons are obvious. Concentration of the bulk of the urban population of the state in and around the Calcutta metropolitan area and the Asansol-Durgapur urban spread, coupled with the concentration of job opportunities, in industries trading and services in these areas, has brought about the high urban participation rate in the state. The employment potential of the towns of West Dinajpur (and of many others of like nature), on the other hand, hardly expanded during the decade except, to some extent, in the trading sector and, to a still lesser extent, in the service sector. But, fortuniously, the towns added tremendously (by about 75 %) to their population during the period. The low urban participation rate in the district was, therefore, inevitable.

Rate of participation among the sexes

The proportion of female workers to total female population in 1971 was 2.77% only in West Dinajpur as against the participation rate of 51·21% among the males. It is obvious that the low participation rate of females has pulled down the total rate for the district. For the state as a whole male participation was considerably lower, being 48·83% only. The females of the state, on the other hand, had a higher rate of 4·43%. It will be evident from the following statement that the participation rate among the females came down very sharply between 1961 and 1971 both in the state and the district.

Statement XV

Participation rates ; West Dinajpur and West Bengal 1961 & 1971

State/District	Total Male Female	Percentage of workers to total population					
		Total		Rural		Urban	
		1971	1961	1971	1961	1971	1961
1	2	3	4	5	6	7	8
West Bengal	Total	27.91	33·16	27·19	32·67	30·12	34·66
West Dinajpur		27.97	32·72	28·43	33·12	23·59	27.82
West Bengal	Males	48.83	53·98	48·48	53·47	49·80	55·38
West Dinajpur		51.21	56·51	52·25	57·25	41·44	47·69
West Bengal	Females	4.43	9·43	4·58	10·62	3·92	5·12
West Dinajpur		2.77	6·48	2·75	6·70	2·90	3.62

The rates of participation have come down in both the rural and urban areas and also among both the sexes. Further, the participation of women in economic activities has declined more steeply than male participation. The fall in female participation is, again, more precipitate in the rural areas than in the towns. The determination of the principal economic activity or main work with reference to time-disposition in 1971 disqualified many a female "part-time" and marginal worker, who were engaged in traditional cottage-borne or household industries, from being treated as "workers". The proportion of workers among women, which was already at a very low level in 1961 due to the social traditions and age-old inhibitions, therefore, came down further during the decade.

Sectoral distribution of workers

The economy of West Dinajpur is predominantly agricultural. As many as 89 in every 100 workers of the district were engaged in agriculture in 1971. Out of a total of 520,375 workers 296,871 or 57.05 per cent were cultivators and 146,927 or 28·23 °/₀ agricultural labourers. For the state as a whole the proportions of cultivators and agricultural labourers were much lower, being 31·97 °/₀ and 26·46 °/₀ respectively. The proportions of workers in the nine industrial categories are shown in the statement XVI at page No. 22 upto the police station level.

As the statement reveals, the primary sector employs as much as 85·89% of the workers in the district as against 62.29% in the state. The secondary sector accounts for a smallproportion of 3·32% and the tertiary sector, 10·79% of the workers in West Dinajpur. In the whole of the state the shares of the two sectors were 5·08% and 22·63% respectively. It has already been observed that the district is predominantly agricultural. The police stations are also all in the same state of backwardness economically and in many other respects and are dependent almost entirely on agriculture. It is only in the police stations of Balurghat and Raiganj that the proportions of workers in the non-agricultural sector exceed 20 %. In Balurghat cultivators and agricultural labourers together constituted 66·12% only of the workers while in Raiganj they accounted for 70·52%. Obviously, the two towns of Balurghat and Raiganj, with their sizeable populations, have made all the difference. It is significant that the industries of the manufacturing and household types claim 5 % or more of workers in only three of the sixteen police stations, namely, Raiganj, Balurghat and Hilli.

In the tertiary sector, category VII Trade & Commerce is of some importance in police stations like Balurghat, Raiganj, Kaliaganj, Gangarampur and Hilli, the percentage of workers engaged in the category varying between 9·11°/₀ (in Balurghat) and 5·32°/₀ (in Gangarampur). It has been pointed out already that the towns of the same names developed mainly as trading centres over the years. The nature of the urban development is reflected in the relative importance of trade and commerce in the economy of the police stations. Category IX Other Services engaged 14·91°/₀ of the workers in the police stations of Balurghat and Raiganj. It is again the same two towns which have evidently made for the high proportions of workers in this category.

Changes in sectoral distribution of workers

520,375 persons were recorded in the district as workers in 1971 as against 392,361. There was thus a net addition of 128,014 to the number of workers altho ugh the participation rate as already observed, came down quite sharply from 32.72% to 27.97% during the decade. The growth of the working population fell far short of the growth of total population. But what is more important is the shift in the distribution of the workers as between the different sectors of the economy. The following statement is illuminating.

Statement XVII

Distribution of workers in West Dinajpur, 1961 & 1971

Industrial category	1971		1961	
	Rural	Urban	Rural	Urban
I	61.13	9.27	65.58	5.95
II	29.91	8.64	22.27	3.93
III	0.57	.63	.49	.84
IV	.02	.15	..	..
V (a)	1.15	3.66	2.15	3.84
V (b)	1.08	9.13	.86	11.88
VI	.13	1.71	.28	3.38
VII	1.58	28.70	2.54	28.37
VIII	.42	9.65	.24	6.91
IX	4.01	28.46	5.59	34.90
Total	100.0	100.00	100.00	100.00

Agriculture has been the main occupation of the people of the district for decades. It has come to occupy a more dominant position during the last decade as the proportion of workers engaged in the sector increased from 82.89% in 1961 to 85.28% in 1971. The increase is observed in the urban areas too, where it is in fact, more pronounced than in the rural areas. Further, the composition of the agricultural sector itself has also undergone a significant change. In 1961 the proportions of cultivators and agricultural labourers in the district were 61.79% and 21.10% respectively. The proportion of cultivators has slided down to 57.05% in 1971 while that of the agricultural labourers climbed upward to 28.23%. In absolute terms the number of cultivators has increased from 267,636 to 296,871 only during the period that is, by 29,000 only. But the agricultural labourers added more than 55,000 to their numbers as they totalled 146,827 in 1971 as against 91,402 in 1961. The relative increase in the numbers and proportions of agricultural labourers is universal throughout West Bengal and in the country as well. In the state as a whole the increase in the proportion of agricultural labourers was sharper than in West Dinajpur. In 1961 the proportion of agricultural labourers in the state was 15.30%. It has reached 26.46% in 1971. The proportion of cultivators has correspondingly come down to 31.97% in 1971 as against 38.50% in 1961.

The increased proportions of workers in the agricultural sector as also the sharp variation in the proportions of cultivators and agricultural labourers have naturally drawn the attention of the scholars and planners everywhere. Alienation of land by the small and marginal farmers due to adversity and natural calamity etc. is said to be one of the reasons for the drop in the proportion of cultivators. It is also observed that the new entrants in the rural labour market have joined and swelled the ranks of the agricultural labourers because of lack of employment opportunities in the non-agricultural sector and an increase in the demand for agricultural labourers because of modernization of agricultural methods by way of improved seeds and multiple cropping etc. Another factor behind the important change in the rural scene was the agrarian movements of the sixties and the consequent conscious attempt on the part of a number of people to call themselves landless labourers. To these should be added another factor, namely, the change in the definition of a worker as adopted in the 1971 census and the categorisation of workers by labour-time disposition. In the absence of any field studies, however, it is difficult to guess which of the factors might have been in action in the district and what was their relative importance.

As the primary sector added to its importance during the decade the secondary and tertiary sectors suffered a corresponding set-back in the district. In absolute terms there was, however, a net addition of a little more than 2,000 workers in the non-agricultural sector during the period, the total employment in 1971 being 76,500 as against 74,100 in 1961. Some of the industrial categories declined appreciably in terms of numbers employed. Category V(b) Household industries—was the worst sufferer. It returned a total of 7,015 workers only in 1971 as against 9,797 in 1961. The decade had the misfortune of witnessing a general decline of household and cottage-borne industries in the state. The district seems to have followed the trend of the state as a whole. The sex-wise break-up of the district figures is, however, quite significant. Male workers in household industry are found to have totalled 5,706 only in 1971 as against 4,799 counted ten years back. But the female workers numbered 1,309 in the year as against 4,998 in 1961. Obviously, the housewives and others who worked only part-time in industries run on household scale or who added to the family income by odd jobs like knitting, or gur-making or dyeing yarn have been omitted from the count. Category V(a) Other industries—has, however, recorded a slight upward movement adding a little more than 2,000 to the total number of workers. It has to be pointed out, however, that West Dinajpur can hardly boast of any organised industry of any significance except for some rice mills and small engineering units. Employment in registered factories stood at 2,081 only in 1971 in the district. Even Category IX Other services—which is expected to prosper in Indian conditions registered a decline. The number employed in the category came down to 30,876 in 1971 from 32,290 in 1961. Category VII Transport, Storage and Communications—is the only category which witnessed some appreciable growth in the district during the decade. The employment in the industry in 1971 (5,950) was more than double the 1961 figure (2,889).

Prospects for the future

With a per capita income of Rs. 318/- only in 1969 at 1962-63 prices West Dinajpur is one of the most underdeveloped and backward districts in the state. It is dependent on agriculture and agriculture depends on the vagaries of nature. The soil is acidic in many areas and not very suitable for rice. The district nevertheless produces large quantities of paddy and of jute as well. Irrigation is one of the essential pre-requsites for increasing the productivity of agriculture. But there are little or no public irrigation facilities at present in the district. Electricity is also yet to reach the rural areas in any significant way to promote irrigation through tubewells. Consequently, agriculture has remained in a near-primitive state except for some marginal improvements like introduction of high-yielding seeds etc. since the late sixties. In the non-agricultural sector, industries of the modern organised type are almost unknown in the district. Infrastructural facilities like roads, organised markets, credit etc. are minimal and hardly conductive to industrial growth. The prospects for the future are accordingly anything but bright and the district seems to be destined for continued dependence on agriculture. In these conditions developmental activities of the future have to be concentrated in the agricultural and allied sectors and in the rather limited sphere of agro-industries.

From the demographic point of view the district appears poised for a further period of steady growth of population. Migration has played an important role in shaping the demographic situation in the district since independence. With the return of stability across the borders migration may not, however, disturb the situation as violently as it did till 1971. The district may, therefore, hope for a period of respite. But the existing sex ratio along with the age structure of the population is likely to bring about a high rate of natural growth in the seventies which would be a tremendous pressure on the near-stagnant economy of the district. The family planning measures of the sixties and onward may bear results only in the eighties. But they are also unlikely to have any considerable impact on the growth rate.

Notes :

1. Figures of unclassified marital status are included in "Total"
2. All durations include figures for "period not stated" and as such will not tally with the "Total" of figures under "less than one year", "1—9 years" and "10 years and above"
3. Figures for unclassifiable last place of residence are included in "Total" for rural and where as for Urban these figures are included in section B-"Out side India"
4. N. M. Stands for "Never Married"
   M. Stands for Married
   W. & D. Stands for Widowed and Divorced
   A. N. S. Stands for Age not Stated

SECTION–C

NON-CENSUS TABLES

LIST OF TABLES ON ADMINISTRATIVE, WELFARE AND DEVELOPMENTAL STATISTICS

WEST DINAJPUR DISTRICT

Sl. No.	Table reference number	Title
1	1.01	Minimum and maximum temperature by month during 1961-71 at various stations (for which data are available from the Director General of Meterological Survey of India/Director General of Observatories)
2	1.02	Rainfall statistics—district and taluk average in mm. by months and years
3	2.01	Major events of the decade (1961-70) N.A.
4	3.102	Length of roads (by nature of materials) as maintained by Public Authorities (a) P. W. D. and other Govt. Deptts. and (b) Local Bodies
5	3.103	Major roads, 1970
6	3.104	Village roads 1970 (for Hilly district and districts under developed from the point of view of transport and communication)
7	3.106	Polymetric table of distances (in km.) of towns, markets and other important places on the national highway. N.A.
8	3.107	Polymetric table of distances (in km.) of towns, markets and other important places on the district road N.A.
9	3.108	Bus routes, 1970
10	3.110	Circuit Houses/Inspection Bunglow/ Travellers Bunglow/Tourist Home/Youth Hostel maintained by P. W. D. Ministry of Tourism and Civil Aviation, Local Bodies etc.
11	3.111	Railway Stations in the District, amenities provided and distance from district and State headquarters (New Railway Stations opened during the decade may be shown by asterisk mark)
12	3.201	Sources of irrigation N.A.
13	3.202	Irrigation projects with particulars of capacity and water spread areas 1970. N.A.
14	3.203	Gross area (by crops) Irrigated (In acres) N.A.
15	3.206	Towns and Villages connected by electricity
16	3.401	Banks and their branches, 1970
17	3.501	Medical and Public Health Institutions N.A.
18	3.501(a)	Hospitals/Dispensaries & related statistics, 1970 N.A.
19	3.502	Medical and para-medical personnel N.A.
20	3.504	Public Health Activities (Vaccination, malaria control, B.C.G.)
21	3.506	Drinking Water N.A.
22	3.506(a)	Towns/Villages by sources of drinking water as in 1969-70 N.A.
23	3.506(b)	Details of Implementation of protected water supply schemes during the decade (1961-70) N.A.
24	3.601	Primary, Secondary, Higher Secondary and other non-Collegiate Educational Institutions together with the strength of pupils
25	3.601(a)	Primary, Secondary, Higher Secondary and other non-Collegiate Educational Institutions together with the strength of teachers
26	3.602	Collegiate and technical Institutions (including Arts, Science, Commerce, Industrial Schools, Fine Arts, Architecture, Agriculture, Music & Dance etc) together with strength of teachers and students N.A.
27	3.603	Students appeared and passed in High/ Higher School leaving/Matric Examination N.A.

LIST OF TABLES ON ADMINISTRATIVE, WELFARE AND DEVELOPMENTAL STATISTICS—*contd.*

WEST DINAJPUR DISTRICT

Sl. No.	Table reference number	Title	
28	3.604	Library and Reading Room facilities in the district.	N.A.
29	3.706	Newspapers, magazines and periodicals published in the district	N.A.
30	3.707	Printing presses	N.A.
31	4.101	Land use pattern as in 1969	N.A.
32	4.102	Single and Double cropped area	N.A.
33	4.103	Area and out-turn of principal crops	
34	4.104	Crop and irrigation	N.A.
35	4.108	Total Rural and Urban population per 100 acres of area under food-grains and net area sown during last five decades	N.A.
36	4.100	Density of cultivators and agricultural labourers per 100 acres of net area sown in 1951, 1961 and 1971	N.A.
37	4.110	Rainfall, area shown and irrigated, density in 1970	N.A.
38	4.114	Agricultural tools and implements (Give local names by the side of English equivolent in each case)	
39	4.201	Livestock and poultry	N.A.
40	4.202	Animal husbandary and poultry farms managed by Govt. Deptts., co-operatives, public institutions (e.g. aggricultural university)	N.A.
41	4.204	Veterinary institutions	
42	4.207	Livestock morbidity/mortality by diseases.	
43	4.302	Fishing centres, landing places and number of fishing boats according to size as on 31.3.1970	N.A.
44	4.401	Forest area by catogory of control	N.A.
45	4.404	General progress of afforestation (000 Sc. Km.)	N.A.
46	4.405	Forest Coupes	N.A.
47	4.490	Major and minor forest products	N.A.
48	4.501	Mines	N.A.
49	4.503	Plantation, Plant—Tea/Coffee/Rubber/ others (specify)	
50	4.702	Joint stock companies as on 31.3.70	
51	4.703	Ware-house and cold storage	
52	4.704	Hats and markets	N.A.
53	4.705	Number of shop-cum residence, business and commercial houses in 1970 (on basis of houselist)	N.A.
54	5.101	Land revenue/Rent Demand and collections	
55	5.102	Land tenure system and reform, 1950-70	N.A.
56	5.103	Cosolidation of holdings	N.A.
57	5.104	Survey and settlement operations during the decade (1961-70)	N.A.
58	5.105	Ceiling on holdings	N.A.
59	5.108	Distribution of holdings by size group as on (latest available figures)	N.A.
60	5.303	Number of co-operative societies, numbership, share capital, working capital, loans advanced and loans recovered by co-operative societies	N.A.
61	5.401	Family Planning Centres	
62	5.502	Convicts by nature of crime, age-group and education in 1970	
63	5.601	Civil Justice	
64	5.701	Machinary for maintenance of law and order—Police Stations/Out posts in the district	

LIST OF TABLES ON ADMINISTRATIVE, WELFARE AND DEVELOPMENTAL STATISTICS—*concld.*
