CENSUS OF INDIA 1961

Central Government Publications

Census Report, Volume X—Maharashtra, is published in the following Parts

I-A and B	..	General Report
I-C	..	Subsidiary Tables
II-A	..	General Population Tables
II-B (i)	..	General Economic Tables—Industrial Classification
II-B (ii)	..	General Economic Tables—Occupational Classification
II-C (i)	..	Social and Cultural Tables
II-C (ii)	..	Migration Tables
III	..	Household Economic Tables
IV	..	Report on Housing and Establishments
V-A	..	Scheduled Castes and Scheduled Tribes in Maharashtra—Tables
V-B	..	Scheduled Castes and Scheduled Tribes in Maharashtra—Ethnographic Notes
VI (1—35)	..	Village Surveys (35 monographs on 35 selected villages)
VII-A	..	Handicrafts in Maharashtra
VII-B	..	Fairs and Festivals in Maharashtra
VIII-A	..	Administration Report—Enumeration (For official use only)
VIII-B	..	Administration Report—Tabulation (For official use only)
IX	..	Census Atlas of Maharashtra
X (1—12)	..	Cities of Maharashtra (15 Volumes—Four volumes on Greater Bombay and One each on other eleven Cities)

State Government Publications

25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

J-856—i-b (Dhulia)

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;

(ii) The four-coloured map of the district ;

(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;

(iv) Supplementary information showing basic amenities available for each village ; and

(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande, Shri R. D. Tipnis and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their Departments but also read through the MSS and encouraged us through this venture.

BOMBAY :
The 30th January 1965.

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

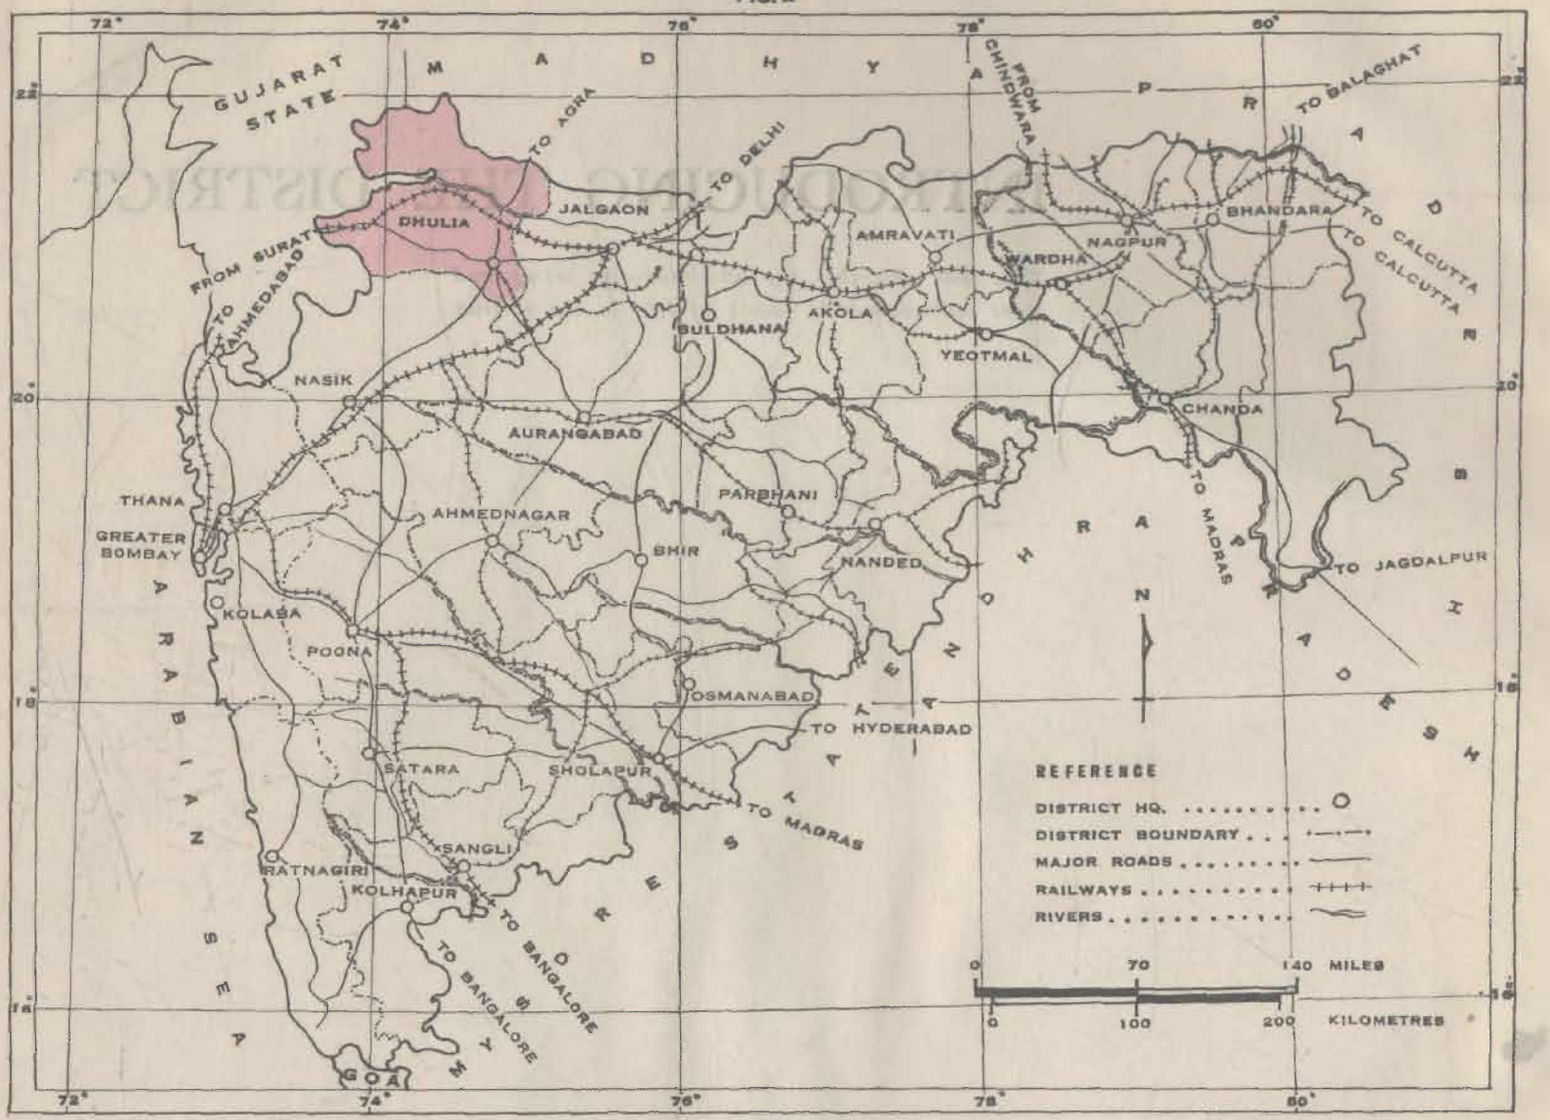

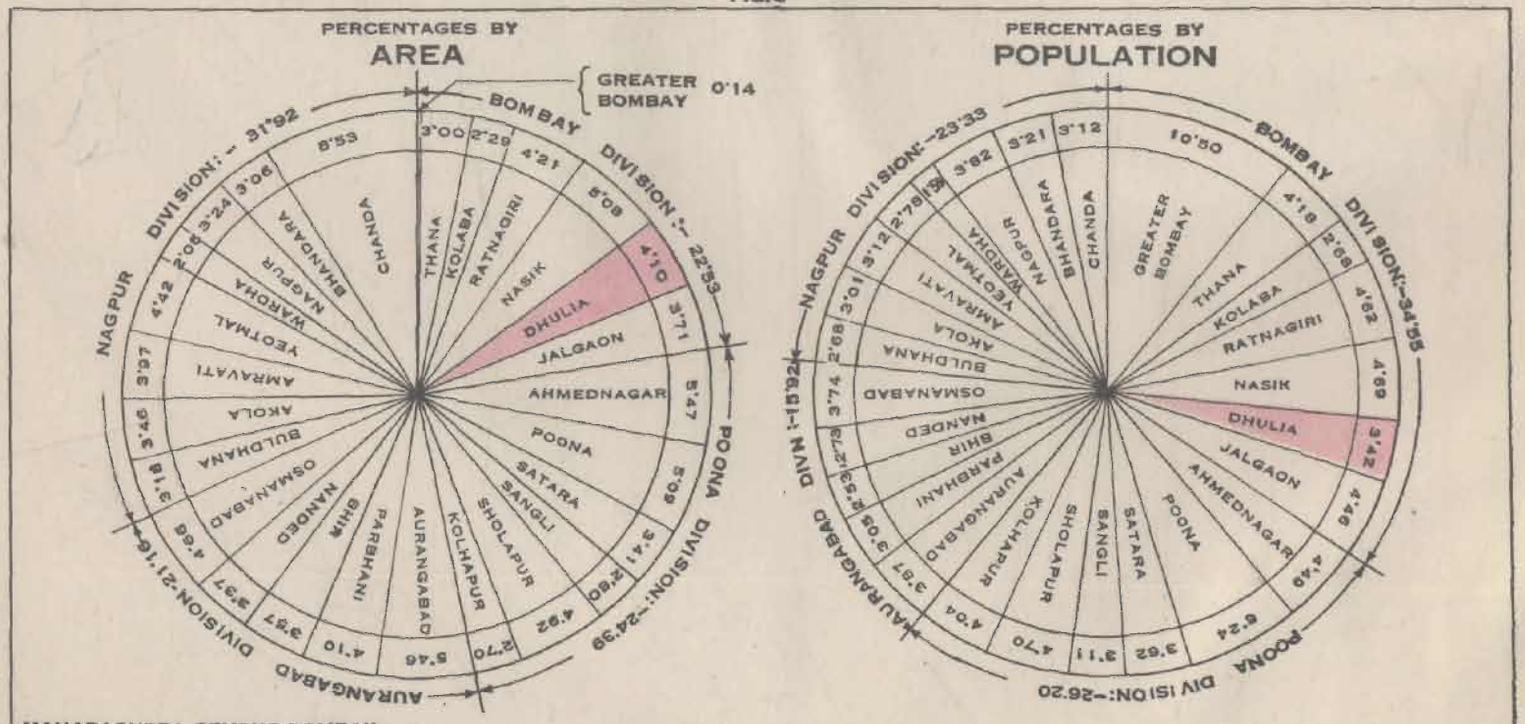

FIG. 3

MAHARASHTRA CENSUS BOMBAY

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

Dhulia and Jalgaon are together known as Khandesh. The district lies in the upper Tapi basin. Unlike the Deccan plateau, the orientation of Khandesh is towards the west coast. It is a distinct topographical unit, drained by the Tapi river and its tributaries and separated from Gujarat and Madhya Pradesh States by the Satpudas and from the Deccan by the Satmala hill range, an arm of the Sahyadri mountains, stretching out in easterly direction. The Tapi river passes through the centre of the district from east to west with a deep cut-up bed and black soil fertile plains along its banks.

The district lies between 20° 38′ and 22° 3′ N. latitude and 73° 47′ and 75° 11′ E. longitude. It is surrounded by Madhya Pradesh in the north, Gujarat in the west, Nasik district in the south and Jalgaon district towards the east.

The area of the district is 4,850·3 sq. miles and its population in 1961 is 1,351,236. In terms of area and population the district makes 4·10 per cent and 3·42 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

There are two main systems of hills. The Satpuda in the north and the Satmala which is an off-shoot of the Sahyadri, in the south and the Sahyadris in thes outh-west. The Satpuda which runs from east to west covers the northern talukas of the district. The hills in these ranges possess considerable height. The Satpudas are cut-up, at places, by the tributaries of Tapi like the Aner, Arunavati and Gomati, arising from the fractures in the mountain crust.

The Satmala breaks off sharply from the Sahyadris in the north-west of Nasik and covers the western and southern parts of the district with low hills and good vegetation. The main range of Sahyadri hills binds the south-west corner of the district. At the northern extremity, the range turns sharply to the east, leaving the broad Tapi plain between it and the Satpudas.

Important Rivers

The major river of the district is Tapi and its course in this district is of 54 miles. It forms the northern boundary of Sindkhed and Nandurbar talukas and the southern boundary of Shirpur and Shahada talukas. During its course through the district the Tapi receives many tributaries from both sides. It meets Aner, Baler, Arunavati and Gomati from the north and Bori, Panzara, Borai (बुराई), Amravati, Shiva, Rangawal (रंगवाल) and Nesu (नेसू) from the south. The rivers coming from the north arise in the southern slopes of the Satpuda hills. These rivers are small and of little use for irrigation. They have the peculiarity that near the hills and again for several miles before they fall into the Tapi, their streams flow throughout the year. While in the middle belt, the water passes underground during the fair season leaving the beds perfectly dry. The streams joining Tapi from the south drain much wider tracts and are of greater size and consequence. All these streams have their sources in the Sahyadri hills. Bori passes through Dhulia taluka only, Panzara and Kan pass through Sakri taluka and Panzara passes further through Dhulia taluka and joins Tapi near the point where it enters the district. Borai passes through Nandurbar and Sindkhed talukas and joins Tapi in the north. Aner forms the eastern boundary of Shirpur taluka and joins Tapi in the same taluka. Arunavati passes through Shirpur and joins the Tapi a few miles downstream from Shirpur town. Gomati runs through Shahada taluka and joins Tapi in the same taluka near Prakasha.

The great river Narmada passes on the northern boundary of the district for 35 miles and its numerous tributaries drain Akrani mahal and a portion of Akkalkuva taluka lying in the north of the first face of the Satpuda hills.

Climate

Monthly temperature records are available only for two stations, *viz.*, Nandurbar and Dhulia (Table 1 in Part III).

The rainy season is from the middle of June to the middle of October, the cold season from the middle of October to the middle of February, and the hot season from the middle of February to the middle of June. As the district is far removed from coastal tracts, there are large variations in day and night temperatures.

Within the district the seasons show local variations also. In the Satpudas, the heat is somewhat tempered by the forests, but below the Satpudas especially in the east, the Tapi valley is the hottest part of the district. To the south and west, the Tapi plain, though subject to hot winds which flow during summer, is a little cooler. In the west, the upland valleys of the Panzara and other streams, not less than 1,500 feet above the sea-level and several hundred feet above the level of the plain, have, even in the hottest season, cool and bracing nights and are hardly ever visited by hot winds.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years from 1951 to 1960.

Rainfall is not uniform in all parts of the district. The western and north-western parts of the district (which include Nawapur and Akkalkuva talukas) get 635 mm. (25″) to 1,016 mm. (40″) rainfall. The remaining talukas get lesser rainfall and are comparatively dry. Nawapur gets maximum annual rainfall of about 1,150 mm., while Sakri gets the minimum of 525 mm.

The rain starts about the middle of June and lasts till the middle of October. The wet months are July, August and September. There are local rains in May and scanty rains in November also.

Dependability of Rainfall and Scarcity Areas

Mean rainfall at Nandurbar is 644 mm. (25·36″). Standard deviation is 224 mm. (8·82″). The coefficient of variability is 34·76 per cent. The rainfall reliability at Nandurbar may, therefore, be said to be slightly low.

Though certain villages in this district have occasionally been affected by scarcity, there is no large tract which has been frequently affected. The Fact-Finding Committee appointed by the Government of Bombay in 1960 had concluded that the entire Dhulia district may be regarded as free from scarcity.

Soils

The soils of this district can broadly be classified into three zones, *viz.*, (i) light type soil, (ii) medium black soil and (iii) deep black soil. Forty-eight per cent of the cultivated area is of light type soil, 18 per cent is of medium black soil and the remaining 34 per cent is of deep black soil. The light type soils are largely found in Dhulia and Sakri talukas, western part of Nawapur taluka and southern part of Nandurbar taluka. These support crops like bajri, kharif jowar, groundnut and at times cotton. Medium black soils are largely found in Sindkhed taluka and Akrani mahal, and western part of Dhulia taluka. These soils are well suited for irrigation. Deep black soils are largely found on the banks of Tapi river particularly in Shirpur, Shahada and Taloda talukas, eastern part of Nawapur taluka and northern part of Nandurbar taluka. These soils cover a width of about 10 miles on each side of the Tapi river and are very fertile. The soils in Shirpur and Shahada talukas are supposed to be extremely rich.

Forests

The forests in the district cover an area of 1,564·72 sq. miles, of which 1,441·72 sq. miles are in charge of the Forest Department and 123·00 sq. miles in charge of the Revenue Department. The forest area makes 32·26 per cent of the total geographical area of the district. Akrani mahal, Dhulia, Shirpur and Sakri talukas have very large areas under forests.

More than 60 different types of trees are found in the forests. The most important trees from the point of forest economy are Teak, Sadada, Khair and Shisam. Schemes for matchwood plantation and extensive cultivation of lac are in progress.

Minerals

No mineral of any importance has so far been found in the district. Abundant building material such as stone, limestone and clay for brick-making is, however, available in the district except in the Tapi Valley.

Natural Zones

There are the following three well-marked natural zones in the district : (i) the high Satpudas in the north, (ii) the rich Tapi Valley in the middle and (iii) the bare ridges and well-watered valleys flanked by the Sahyadri ranges in the south.

The northern belt covers the hilly parts of Akkalkuwa, Taloda, Shahada and Shirpur talukas and the whole of Akrani mahal. There are large forests and tribal population in this zone especially in the Akrani mahal. The hilly parts of Taloda, Shahada and Shirpur talukas are equally backward.

The southern belt covers parts of Nandurbar, Sindkhed and Sakri talukas and the whole of Dhulia and Nawapur talukas. Of these, Nawapur taluka is situated mostly in the Sahyadri ranges and is also inhabited by the Scheduled Tribes. The hilly parts of Nandurbar and Sakri talukas which are adjacent to Nawapur taluka are similarly backward. There are large forests in this zone especially in Dhulia and Sakri talukas.

The Tapi Valley region which comprises major parts of Shirpur, Shahada, Nandurbar and Sindkhed talukas is agriculturally the most developed part of the district. Shahada taluka has one of the richest black soil plains. Nandurbar, Shahada and Sindkhed talukas grow rabi jowar and wheat while groundnut is grown on a wide scale in Nandurbar, Shahada and Shirpur talukas.

ADMINISTRATIVE SET-UP

Brief History

The entire area now making two districts of Dhulia and Jalgaon was previously administered as one district of Khandesh with headquarters at Dhulia. In 1869, the three talukas of Malegaon, Nandgaon and Baglan were transferred to the newly formed district of Nasik. In 1891, the Khandesh district consisted of the following sub-divisions :—

Jalgaon, Jamner, Bhusawal, Edalabad peta, Sindkheda, Taloda, Dhulia, Chopda, Shahada, Pachora, Bhadgaon peta, Savda, Raver peta, Yaval peta, Nandurbar, Nawapur peta, Chalisgaon, Erandol, Amalner, Parola peta, Shirpur and Pimpalner.

Savda taluka was abolished in 1896 and the two petas of Yaval and Raver made independent talukas.

In the year 1906 the district was broken into two districts known as West Khandesh and East Khandesh. The following thirteen talukas were transferred to East Khandesh district with headquarters at Jalgaon :—

Amalner, Parola peta, Bhusawal, Edalabad peta, Chalisgaon, Chopda, Erandol, Jalgaon, Jamner, Pachora, Bhadgaon peta, Raver and Yaval.

The remaining eight talukas, *viz.*, Dhulia, Nandurbar, Nawapur peta, Pimpalner, Shahada, Shirpur, Sindkheda and Taloda formed the new district of West Khandesh with headquarters at Dhulia.

Headquarters of Pimpalner taluka had been transferred to Sakri in 1887 but the name of the taluka was changed to Sakri taluka in 1908.

The new taluka of Akkalkuva was created in the year 1950.

In 1950, five villages—four from Nasik district and one from Broach district—were added to this district. Two villages from this district were transferred to Broach district.

With the Reorganisation of States in 1956, the district was included in Bombay State.

Thirty-eight villages from Nawapur taluka, 38 villages from Nandurbar taluka, 43 villages from Taloda taluka and 37 villages from Akkalkuva taluka were transferred to Gujarat State in 1960.

Since 1960, the district forms a part of Maharashtra.

The name of the district was changed from West Khandesh district to Dhulia district in the year 1961.

Present Set-up

For administrative purposes, the district is at present divided in nine talukas and one mahal. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
DHULIA DISTRICT	Dhulia	4,850·3	1,360	7	1,351,236	100·0	100·0
1 Akrani Mahal	Dhadgaon	232·0	150	..	34,967	4·8	2·6
2 Akkalkuva Taluka	Akkalkuva	320·0	164	..	57,357	6·6	4·2
3 Taloda Taluka	Taloda	143·8	86	1	63,720	3·0	4·7
4 Shahada Taluka	Shahada	446·6	180	1	155,472	9·2	11·5
5 Nandurbar Taluka	Nandurbar	424·7	125	1	152,927	8·8	11·3
6 Shirpur Taluka	Shirpur	756·0	115	1	123,780	15·5	9·2
7 Sindkhed Taluka	Sindkhed	494·3	142	1	172,333	10·2	12·8
8 Nawapur Taluka	Nawapur	355·1	88	1	105,728	7·3	7·8
9 Sakri Taluka	Sakri	926·2	155	..	185,417	19·1	13·7
10 Dhulia Taluka	Dhulia	751·6	155	1	299,535	15·5	22·2

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and two Deputy Collectors who hold charge of the two revenue divisions and have their headquarters at Nandurbar and Dhulia, respectively. Nine Mamlatdars are in charge of nine taluka offices and one Mahalkari in charge of one mahal office.

Land Revenue Settlements

The original Revenue Survey and Settlement of different talukas in the district was completed between 1853 and 1870, except in certain outlying tracts such as Akrani, Nawapur, Varsa, which were excluded. The First Revision Settlement was completed between 1892 and 1905 and the Second Revision Settlement between 1911 and 1925, except in Sakri taluka where it was completed in 1947-48, and guaranteed for a period of ten years only. In Akrani mahal, the original survey settlement was introduced in 1928-29. In Akkalkuva taluka which consists of Mehvas States including six petty States of Chikhali, Gawhali, Kathi, Singpur, Nal and Navalpur, survey settlement has not yet been introduced. The land revenue rates have not been revised though the guarantee period expired between 1942 and 1958.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the second revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlement untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small *bandharas* the land revenue is integrated and is inclusive of the charge for water supplied. For lands irrigated under Government canals, the land revenue at dry land rates is assessed and recovered by the Revenue Department while the water rates determined annually on the basis of actual crops raised are assessed by the Irrigation Department and recovered by the Revenue Department.

Table 24 in Part III shows demand and collection of land revenue during the years 1955 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, the villages belonging to the erstwhile Mehvas States are still unsurveyed and unsettled. Because of a few recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :—

Taluka	Original settlement or Revision settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Maximum rates per acre

Assembly and Parliamentary Constituencies

Since 1957 the district has 9 Assembly seats. In 1957, Sakri and Shahada constituencies were double-member constituencies with one of the two seats reserved for Scheduled Tribes. After abolition of the double-member constituencies in 1961, seats from Nawapur and Taloda are reserved for Scheduled Tribes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly Constituency	Number of voters on rolls
(1) Nandurbar	75,154
(2) Sakri	85,646
(3) Nawapur	45,982
(4) Taloda	51,781
(5) Shirpur	73,350
(6) Akrani	69,027
(7) Sindkhed	86,611
(8) Dhulia South	71,782
(9) Dhulia North	73,071
Total ..	632,404

In the 1962 General Elections, the Assembly constituencies Nandurbar, Sakri, Nawapur, Taloda, Shirpur and Akrani together made one Parliamentary constituency called Nandurbar constituency and the remaining Assembly constituencies Sindkhed, Dhulia South, Dhulia North, combined with Assembly constituencies Chopda, Amalner and Parola from Jalgaon district made another Parliamentary constituency called Dhulia constituency.

The total number of voters on rolls in the district in 1961 was 632,404. The total population 21 years and above according to 1961 Census is 611,762. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are vested with magisterial powers. But those powers are limited to Chapters VII to XII of the Criminal Procedure Code and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of judiciary from the executive was brought about in the year 1953.

The District and Sessions Judge is assisted by two Assistant Judges and Assistant Sessions Judges. They have jurisdiction over the entire district. They attend to appellate civil work and criminal cases excepting those in which sentence of death or of imprisonment for life or of imprisonment for a term exceeding 10 years is provided by law.

The Civil Judge (Senior Division) attends to ordinary civil suits in Dhulia taluka and to special Civil Hindu Marriage petitions, workmen's compensation cases and land acquisition references in the whole of the district. Also there are 16 Civil Judges (Junior Division) and First Class Judicial Magistrates, with headquarters at different taluka places. They deal with civil and criminal cases.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by two Deputy Superintendents and two Circle Police Inspectors. There are 17 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

		Police Station Headquarters	No. of villages
Akrani Mahal ..	1.	Dhadgaon	219
Akkalkuva ..	2.	Akkalkuva	84
Taloda	3.	Taloda	90
Shahada	4.	Shahada	123
	5.	Sarangkhede	75
Nandurbar ..	6.	Nandurbar Town	1
	7.	Nandurbar Taluka	136
Shirpur	8.	Shirpur	96
	9.	Thalner	31
Sindkhed ..	10.	Sindkhed	125
	11.	Dondaicha	35
Nawapur ..	12.	Nawapur	93
Sakri	13.	Sakri	79
	14.	Pimpalner	53
Dhulia	15.	Dhulia Town	1
	16.	Dhulia Taluka	115
	17.	Songir	34

Average number of villages and population per Police Station in the district is 80 and 79,484 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

Six out of seven towns in the district have Municipal Committees established under the Bombay Municipal Boroughs Act of 1925 and the Bombay District Municipal Act of 1901. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for women are shown on page (7) for each Municipality separately.

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 population	Total No. of Municipal Councillors	Seats reserved for		
							Scheduled Castes	Scheduled Tribes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1	Taloda	1867	1961	4	14,641	20	1	4	2
2	Shahada	1869	1961	4	13,338	21	1	1	3
3	Nandurbar Municipal Borough.	1867	1960	4	41,055	27	2	2	3
4	Shirpur	1870	1961	4	20,846	25	2	1	3
5	Dondaicha ..	1952	1960	4	15,578	17	1	1	2
6	Dhulia Municipal Borough.	1860	1962	4	98,893	45	3	2	5

The Dhulia Municipal Borough is the oldest municipality in the district. It was established a hundred years ago. The youngest municipality is the one at Dondaicha, which was established a decade ago.

The six municipalities together cover 94·67 per cent of the urban population or 15·1 per cent of the total 1961 population of the district. The only remaining town, *viz.*, Nawapur, does not have a municipality.

The taxation level of each of the municipalities is shown in the next column.

Per capita municipal tax appears to be high at Dhulia and Dondaicha. But both are trade centres and the incidence of the tax falls mostly on agriculturists who bring their produce to the market for sale.

Name of the Municipality	1961 population	Year 1961-62		
		Total Receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
		Rs.	Rs.	Rs. nP.
1 Taloda ..	14,641	2,28,606	95,336	6 51
2 Shahada ..	13,338	5,68,803	1,65,257	12 39
3 Nandurbar Municipal Borough.	41,055	11,92,476	5,88,944	14 35
4 Shirpur ..	20,846	7,13,429	2,23,706	10 73
5 Dondaicha ..	15,578	5,72,063	2,36,073	15 15
6 Dhulia Municipal Borough.	98,893	38,60,826	17,08,863	17 28

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 10 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries except in the case of municipal towns which are not covered by them. One town, *viz.*, Nawapur which does not have a Municipal Committee but which is treated as a town in the 1961 Census is, however, included under the jurisdiction of the Zilla Parishad and the Panchayat Samiti concerned. The Zilla Parishad covers 98·9 per cent of the area and 84·9 per cent of the total population of the district. The population covered includes total rural population and 5·33 per cent of the urban population of the district in 1961. The number of villages, number of non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

——	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of non-municipal towns	Population in 1961	Percentage by area	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Zilla Parishad, Dhulia	Dhulia ..	4,797·5	1,360	1	1,146,885	100·0	100·0
1 Akrani Panchayat Samiti ..	Dhadgaon ..	232·0	150	..	34,967	4·8	3·0
2 Akkalkuva Panchayat Samiti ..	Akkalkuva ..	320·0	164	..	57,357	6·7	5·0
3 Taloda Panchayat Samiti ..	Taloda ..	135·0	86	..	49,079	2·8	4·3
4 Shahada Panchayat Samiti ..	Shahada ..	441·6	180	..	142,134	9·2	12·4
5 Nandurbar Panchayat Samiti ..	Nandurbar ..	411·0	125	..	111,872	8·6	9·7
6 Shirpur Panchayat Samiti ..	Shirpur ..	750·3	115	..	102,934	15·6	9·0
7 Sindkhed Panchayat Samiti ..	Sindkhed ..	485·0	142	..	156,755	10·1	13·7
8 Nawapur Panchayat Samiti ..	Nawapur ..	355·1	88	1	105,728	7·4	9·2
9 Sakri Panchayat Samiti ..	Sakri ..	926·2	155	..	185,417	19·3	16·2
10 Dhulia Panchayat Samiti ..	Dhulia ..	741·3	155	..	200,642	15·5	17·5

Constitution

The Zilla Parishad has 51 directly elected councillors. Out of these 51 seats, two seats are reserved for Scheduled Castes and 22 for Scheduled Tribes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis are also *ex-officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase or sale of agricultural produce in the area of the Block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of village panchayats are also elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the Block.

Elections were held in 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as a Secretary to the Zilla Parishad.

Committees and Office-Bearers

The Zilla Parishad functions through a Standing Committee presided by the President, and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the subject committees is achieved through the Standing Committee which includes the Chairmen of all the subject committees as members.

The Panchayat Samitis do not have subject committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards the developmental and administrative functions of Government are now, with the creation of democratic bodies at the district and block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have devolved on the Zilla Parishad and Panchayat Samitis. All Class III and IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board, District School Board and District Panchayat Mandal. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will also be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government, transferred to the Parishad which are included in the District Technical Service (Class III) and District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan schemes. If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in Block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 156·12 lakhs. The major portion of the receipts is of receipts from Government. They are 92·7 per cent and the Zilla Parishad receipts are 7·3 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 159·96 lakhs. Following are the major items of expenditure :—

General Administration	..	3·0 per cent
Education	..	49·2 ,,
Community Development Project		12·3 ,,
Buildings and Communications	..	10·0 ,,
Miscellaneous	..	7·6 ,,
Other items	..	17·9 ,,

The Zilla Parishad has increased cess on land revenue by 10 nP. in a rupee under section 155 of the Zilla Parishad and Panchayat Samitis Act, 1961.

Per capita expenditure on different development heads of expenditure is as follows :—

		Rs.
General Administration	..	0·41
Education	..	6·87
Community Development Project	..	1·72
Buildings and Communications	..	1·40

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 5 Class I and 30 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV category is 5,577. Moreover, an establishment of 183 gram sevaks, 297 talatis, and 290 village panchayat secretaries has very recently been transferred from the Revenue Department to the Zilla Parishad.

The allocation of kotwals to the Zilla Parishad is cancelled by Government.

VILLAGE PANCHAYATS

The number of independent village panchayats, the number of group village panchayats and the number of villages covered by group village panchayats are shown below :—

	Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1	Akrani Mahal	150	1	20	138
2	Akkalkuva ..	164	5	33	157
3	Taloda ..	86	9	16	73
4	Shahada ..	180	72	33	86
5	Nandurbar ..	125	33	33	87
6	Shirpur ..	115	24	25	69
7	Sindkhed ..	142	57	33	83
8	Nawapur ..	88+1	14	24	67
9	Sakri ..	155	44	39	110
10	Dhulia ..	155	47	42	109
	Total ..	1,360+1	306	298	979

NOTE.—The figures in column (5) perhaps include hamlets. The totals of columns (3) and (5) do not therefore tally with column (2).

There are 22 revenue villages which are not yet covered by village panchayats.

There are also 61 forest villages, out of which two (one in Sakri taluka and one in Nawapur taluka) have been declared as villages leaving 59 forest villages as under :—

(1) Shahada Taluka ..	21
(2) Shirpur Taluka ..	20
(3) Taloda Taluka ..	3
(4) Akrani Mahal ..	15
Total ..	59

There are proposals to form village panchayats at these 59 forest villages also.

In the above table 604 village panchayats (306 independent and 298 group village panchayats) have been shown. Some of the group village panchayats have been split up with the result that 42 more village panchayats will be formed and the total number of village panchayats will then be 646.

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total income
	Rs.	
Grants	1,344	44·31
Taxes on houses and properties	294	9·69
Octroi	10	0·33
Other taxes	937	30·90
Total taxes	1,241	40·92
Income from other sources	448	14·77
Total Income	3,033	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village. In addition, the village panchayats also receive equalisation grant of Rs. 4,77,168 every year equal to the difference between the amount arrived at on the basis of Re. 1 *per capita* of the population of the village and the amount of 30 per cent land revenue paid to the panchayats. Moreover financial assistance of Rs. 61,750 is also being paid to 229 village panchayats in the backward and the Adiwasi areas of this district.

The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

Out of 604 village panchayats, 453 have imposed taxes on houses and properties. Seven village panchayats have started collecting octroi.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount in ('000)	Percentage of total expenditure
	Rs.	
Administration	723	23·84
Health and Sanitation	472	15·56
Public Lighting	279	9·20
Other Items	1,559	51·40
Total Expenditure	3,033	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of panchayat *ghars*, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

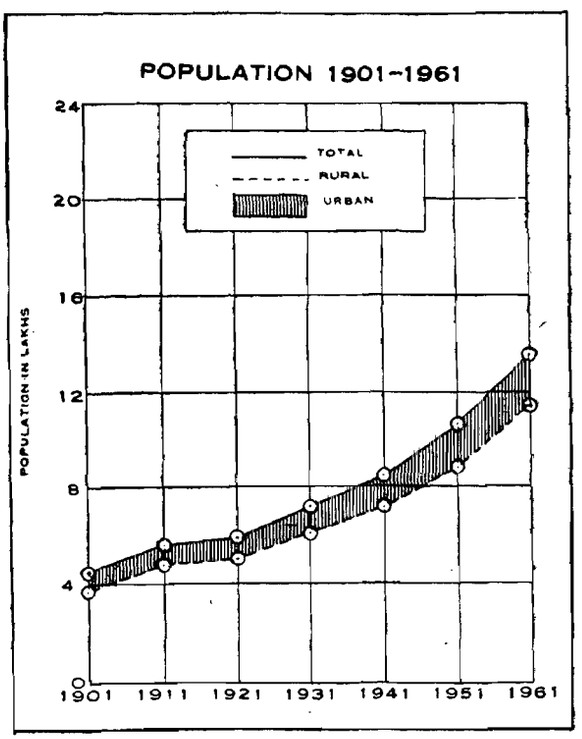

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—1961.

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Decade variation	Rate of variation
1901	448,432	..	..
1911	559,519	+111,087	+24·77
1921	594,191	+ 34,672	+ 6·20
1931	714,998	+120,807	+20·33
1941	845,766	+130,768	+18·29
1951	1,060,278	+214,512	+25·36
1961	1,351,236	+290,958	+27·44

Figure below shows the total, rural and urban population of the district for the last seven Censuses:

The population of the district increased by 24·77 per cent in the decade 1901—11. The influenza epidemic of the following decade affected the population and resulted in the low rate of 6·20 per cent during the decade 1911—21. Since then the population has been increasing at faster rates except for the decade 1931—41. The rate of growth in the last decade (27·44 per cent) is the highest since 1901.

The 1951—61 decade variation rates for the district and each of the taluka are as follows :—

		Percentage Variation 1951—61
DHULIA DISTRICT		+27·44
1	Akrani Mahal	+55·29
2	Akkalkuva Taluka	+33·46
3	Taloda Taluka	+13·78
4	Shahada Taluka	+15·55
5	Nandurbar Taluka	+29·65
6	Shirpur Taluka	+23·35
7	Sindkhed Taluka	+20·96
8	Nawapur Taluka	+29·99
9	Sakri Taluka	+40·99
10	Dhulia Taluka	+29·89

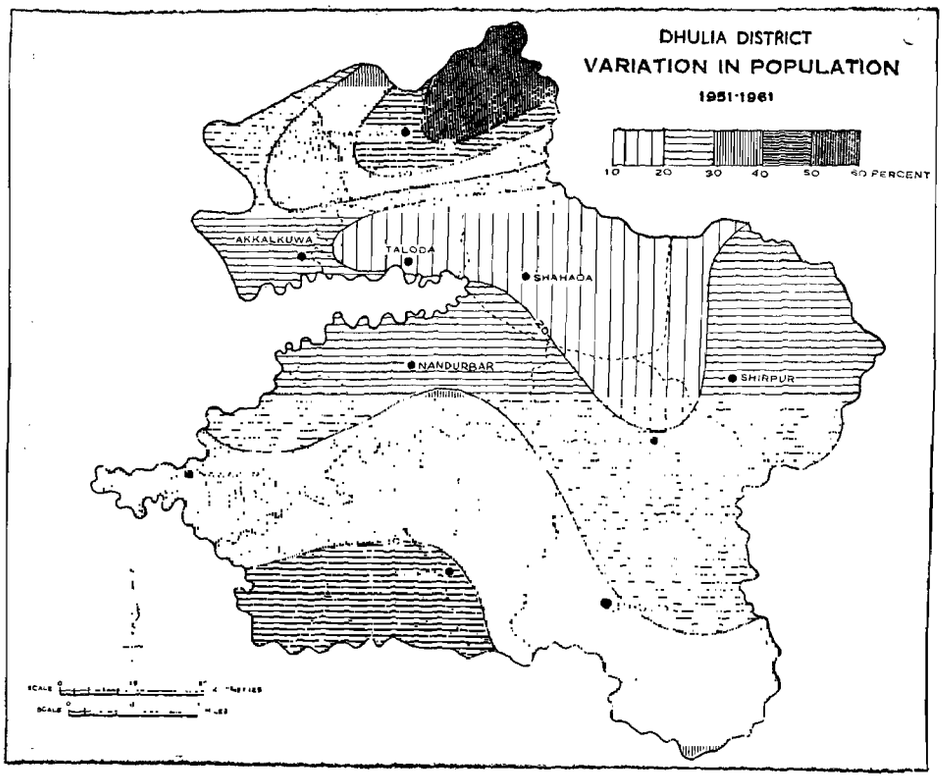

Figure on page (12) shows the areawise pattern of 1951—61 growth of population within the district.

There are wide variations in the rates of growth of different talukas. Akrani mahal has recorded the highest rate of 55·29 per cent, which is a little more than double of the district average, while Taloda taluka has had the lowest rate of growth, i.e., 13·78 per cent which is nearly half of the district average. The central talukas of Taloda, Shahada, Shirpur and Sindkhed which have the most fertile lands and the highest density of population in the district have shown lower rates of growth than the district average. Talukas having an abundance of hilly and forest lands have had very high rates of growth of population. This has happened in the northern talukas of Akrani and Akkalkuva and in the southern talukas of Nawapur, Sakri and Dhulia.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Dhulia District	Maharashtra
1901—1961	201·32	103·97
1921—1961	127·41	89·71
1951—1961	27·44	23·60

During the last sixty years the population of the district has trebled. The rates of variation of population of the district have been higher than the State average in all the periods 1901—61, 1921—61 and 1951—61. Among the districts of Maharashtra the net growth of 1961 population over that of 1901 is the second highest for Dhulia.

The only district which had a larger growth of population since 1901 is Greater Bombay with 347·42 per cent over that of 1901.

Density of Population

The densities of population for Maharashtra, Dhulia district and its talukas for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
DHULIA DISTRICT ..	219	279	100·00
1 Akrani Mahal	97	151	2·59
2 Akkalkuva Taluka ..	134	179	4·24
3 Taloda Taluka	389	443	4·72
4 Shahada Taluka ..	301	348	11·51
5 Nandurbar Taluka ..	278	360	11·32
6 Shirpur Taluka ..	133	164	9·16
7 Sindkhed Taluka ..	288	349	12·75
8 Nawapur Taluka ..	229	298	7·82
9 Sakri Taluka	142	200	13·72
10 Dhulia Taluka.. ..	307	399	22·17

Figure on page (13) shows the approximate contours of density of population in 1961 within the district.

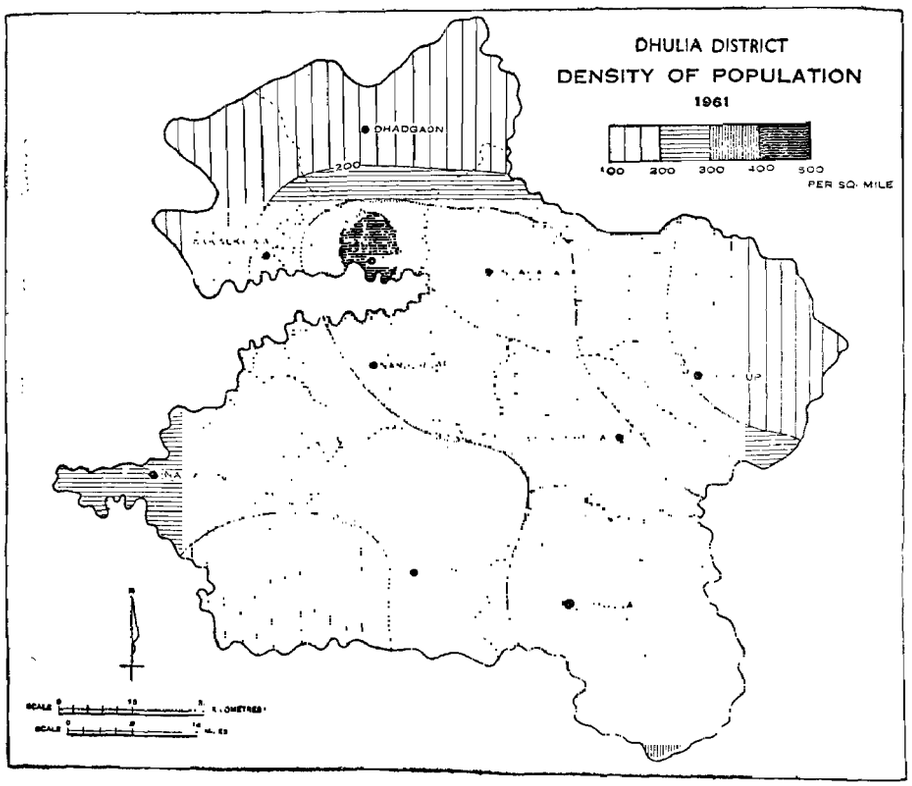

The number of persons per square mile in Dhulia district has increased from 219 in 1951 to 279 in 1961. Within the district Taloda taluka has the highest density of 443 persons per square mile and Akrani mahal has the least density of 151 persons per square mile. Akrani mahal, Akkalkuva, Shirpur and Sakri talukas have lower densities than that of the district. Lower densities in Akrani mahal and Akkalkuva and Sakri talukas are due (i) to their entire rural character and (ii) to the very high proportions of geographical areas under forest and barren or uncultivable lands. A glance at the spatial distribution of population will reveal that talukas with high densities of population have higher proportions of the district population. Taloda taluka which has the highest density of 443 in the district is an exception to this.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

Year	Dhulia District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901 ..	9	..	16·43	219	..	16·59
1911 ..	9	+7·54	14·16	232	+0·99	15·13
1921 ..	7	—7·63	12·32	238	+18·72	18·50
1931 ..	8	+36·02	13·93	258	+15·54	18·60
1941 ..	9	+34·10	15·79	266	+27·11	21·11
1951 ..	12	+46·40	18·44	383	+62·42	28·75
1961 ..	7	+10·43	15·97	266	+21·32	28·22

In Figure on page (11), the actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 192·94 per cent as against 246·96 per cent for the State.

The district is less urbanised than Maharashtra State. The proportion of urban population in the district decreased till 1921. Since then it increased gradually to an all-time high value of 18·44 per cent in 1951. During the last decade it showed a decrease as a consequence of the redefinition of urban areas in 1961. The rates of variation in urban population have never followed any trend. Urban population of the district increased by 7·54 per cent in the decade 1901—11. In the following decade it decreased by 7·63 per cent possibly because (i) Songir and Prakasha were not treated as towns and (ii) the influenza epidemic of 1918-19 affected the urban population more than the rural population. In the successive decades it continued to vary at moderately high rates till 1951. The highest rate of (46·40) growth of urban population was during the decade 1941—51. In the last decade the urban population increased by only 10·43 per cent. The lower rate is due to the redefinition of urban areas in 1961 as a result of which five towns in the district have been declassified as rural in 1961, *viz.*, (1) Thalner, (2) Sindkhed, (3) Pimpalner, (4) Ranala and (5) Betawad. No new town has been added in 1961. The population of the declassified towns in 1951 was 29,679. It is 35,473 in 1961. Had those towns been retained in 1961 the urban population would have increased by 28·58 per cent and it would have made 18·60 per cent of the district population.

Dhulia and Nandurbar are two big towns in the district. The population of Dhulia, which is fast approaching the one lakh mark has increased by 299·96 per cent since 1901 and 235·26 per cent since 1921. The population of Nandurbar has increased by 275·89 per cent since 1901 and 202·99 per cent since 1921. Except Nawapur all the towns in the district have municipalities.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Dhulia District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901 ..	..	83·57	..	83·41
1911 ..	+28·16	85·84	+12·68	84·87
1921 ..	+ 8·48	87·68	— 6·77	81·50
1931 ..	+18·13	86·07	+14·77	81·40
1941 ..	+15·73	84·21	+ 8·54	78·89
1951 ..	+21·42	81·56	+ 7·72	71·25
1961 ..	+31·29	84·03	+24·51	71·78

The net increase in rural population of the district has been 202·97 per cent over that of 1901 and 117·93 per cent over that of 1921. The corresponding figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The proportion of rural population increased from 83·57 per cent in 1901 to 87·68 per cent in 1921. It then gradually decreased to 81·56 per cent in 1951. In the last decade it has again increased to 84·03 per cent. This slight increase, again, is the effect of redefinition of urban areas in 1961. The rates of variation in rural population of the district have always been higher than the corresponding averages

for the State. The highest rate of growth has been in the last decade. A large part of this growth is however due to the redefinition of urban areas and the consequent inclusion of 35,473 persons from the five declassified towns in the rural population. The lowest rate of growth was recorded during the decade 1911—21, during which the rural population increased by only 8·48 per cent. Compared to the rural population of the State that was considerably higher as the State rural population had actually suffered a loss of 6·77 per cent population during that decade.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is shown below :—

Size Class	Dhulia District		Maharashtra	
	Percentage of the number of villages to total number of villages	Percentage of population to total rural population	Percentage of the number of villages to total number of villages	Percentage of population to total rural population
Less than 500 ..	46·62	13·52	47·72	15·02
500—999 ..	26·54	23·05	28·55	25·71
1,000—1,999 ..	18·90	30·97	16·62	28·55
2,000—4,999 ..	6·91	24·10	6·18	22·40
5,000 and over ..	1·03	8·36	0·93	8·32

Villages with less than 1,000 population are 73·16 per cent of the total number of villages and account for 36·57 per cent of the district rural population as against the average of 40·73 per cent of the rural population for the State. Population concentration is in the villages with population of 1,000 and more. 7·94 per cent villages with more than 2,000 population account for 32·46 per cent of the district rural population.

The area, number of inhabited villages, total rural population, average population per village, and the number of villages per 100 square miles of rural area are shown below for the State, district and each taluka separately.

Average population per inhabited village is 835 as against the average of 792 for Maharashtra. Within the district average population per village varies from 233 in Akrani mahal to 1,294 in Dhulia taluka. Sindkhed, Nawapur, Sakri and Dhulia talukas have larger villages. Number of inhabited villages per 100 square miles of rural area is 28 in the district as against 31 in Maharashtra. The number of villages per 100 square miles of rural area varies from 15 in Shirpur taluka to 65 in Akrani mahal. The hilly areas have smaller but closely located villages.

State/District/Taluka	Area in square miles (rural)	Number of inhabited villages	Rural population	Average population per inhabited village	Number of inhabited villages per 100 square miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
DHULIA DISTRICT	4,791·7	1,360	1,135,380	835	28
1 Akrani Mahal	232·0	150	34,967	233	65
2 Akkalkuva Taluka	320·0	164	57,357	350	51
3 Taloda Taluka	135·0	86	49,079	571	64
4 Shahada Taluka	441·6	180	142,134	790	41
5 Nandurbar Taluka	411·0	125	111,872	895	30
6 Shirpur Taluka	750·3	115	102,934	895	15
7 Sindkhed Taluka	485·0	142	156,755	1,104	29
8 Nawapur Taluka	349·3	88	94,223	1,071	25
9 Sakri Taluka	926·2	155	185,417	1,196	17
10 Dhulia Taluka	741·3	155	200,642	1,294	21

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 are shown in the next column separately for males and females compared with the corresponding proportions for 1951.

Age-groups	Percentages of population by age-groups			
	1951 District Total		1961 District Total	
	Males	Females	Males	Females
0—4	14·69	14·97	16·72	16·96
5—14	28·47	27·41	27·73	26·46
0—14	43·16	42·38	44·45	43·42
15—34	32·40	34·19	30·93	32·71
35—59	21·01	18·73	20·63	19·27
15—59	53·41	52·92	51·56	51·98
60 and more ..	3·43	4·70	3·99	4·60
Total ..	100·00	100·00	100·00	100·00

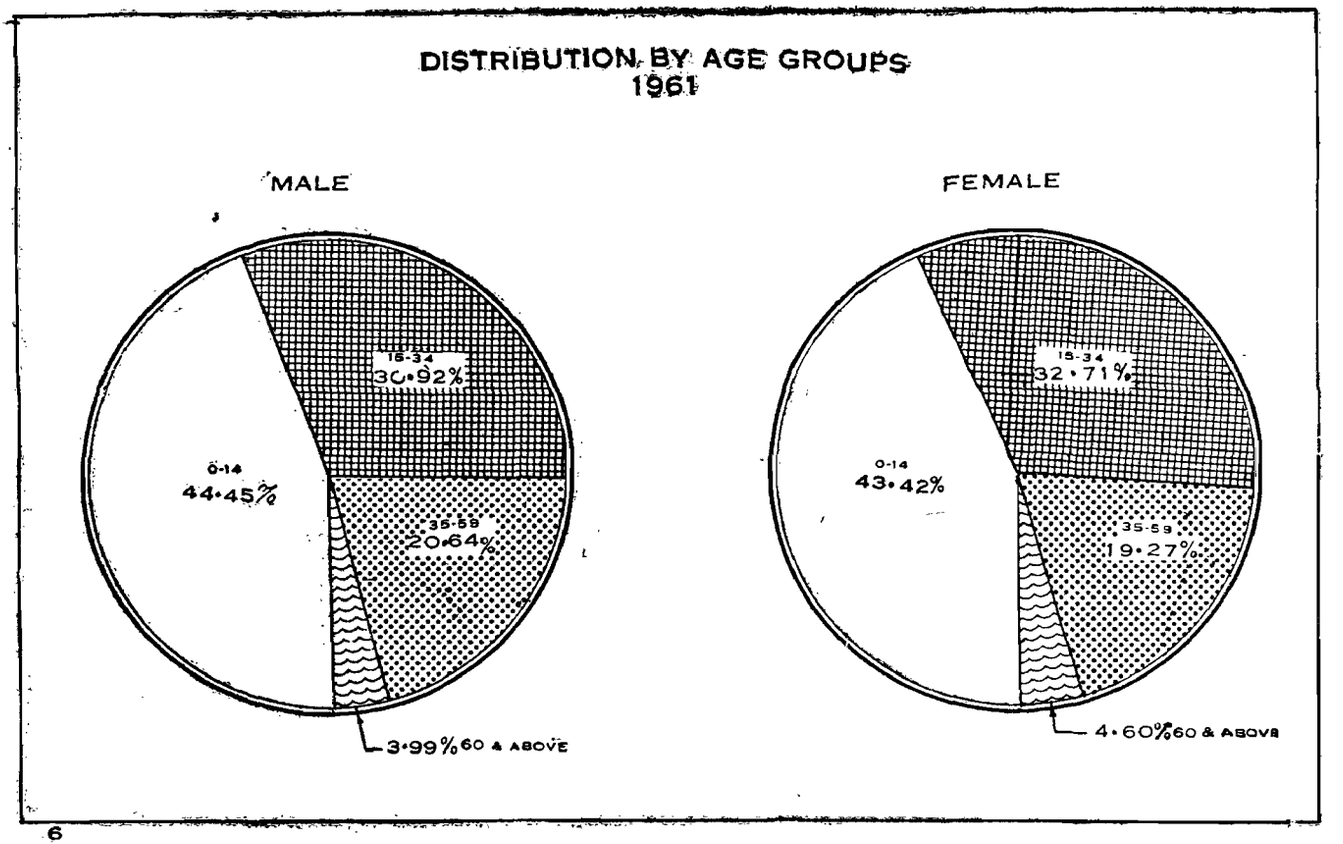

Figure above shows the distribution of the district population by broad age-groups for males and females separately.

The proportion of children aged 0—4 increased from 14·69 per cent in 1951 to 16·72 per cent in 1961 for males and from 14·97 per cent to 16·96 per cent for females. The same trend is seen for the age-group 0—14 for both the sexes. The proportion of persons in the age-group (60+) has slightly increased for males and has slightly gone down for females. As a result the proportion of persons in the age-group 15—59 is lower both for males and females in 1961. The proportion in the age-group (0—14) is higher for males than that for females. The proportions in the age-groups (15—34 and 60+) for males are slightly lower than those for females.

Dependency Ratio

The ratio between dependents (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

		Dhulia District			Maharashtra		
		Youth	Aged	Total	Youth	Aged	Total
1951	Total ..	80·5	7·6	88·1	69·9	9·3	79·2
1961	Total ..	84·9	8·3	93·2	75·2	9·7	84·9
	Rural ..	86·6	8·3	94·9	80·6	10·8	91·4
	Urban ..	76·5	8·2	84·7	53·1	7·3	70·4

The dependency ratios are higher in the district than those for Maharashtra. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. Both the components of youth and aged have increased. The increase in the dependency may be the result of high fertility and declining mortality.

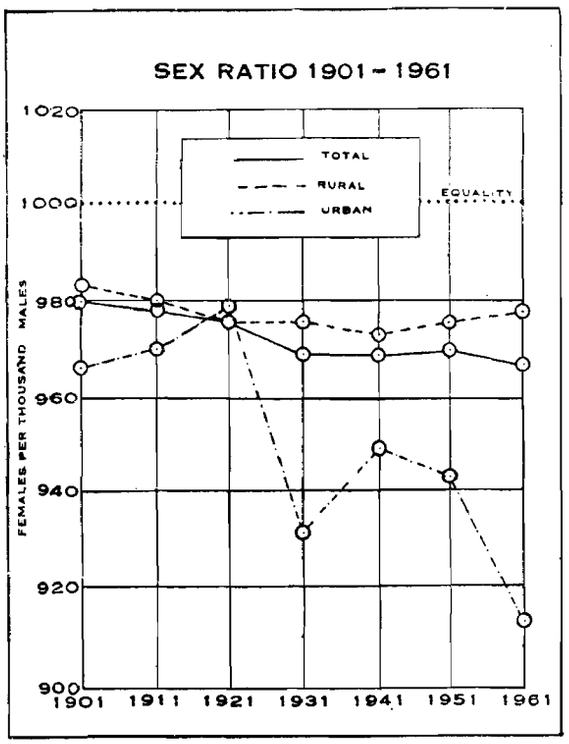

The dependency load is larger in rural areas than urban areas. It is the effect of the differences in age structure of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within and outside the district.

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

	Dhulia District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	980	983	966	978	1,002	866
1911 ..	978	980	970	966	1,000	796
1921 ..	976	976	979	950	994	776
1931 ..	969	976	930	947	987	790
1941 ..	969	973	949	949	990	810
1951 ..	970	976	943	941	1,000	807
1961 ..	967	978	913	936	995	801

Figure on page (16) shows the variation in sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901, the sex ratio of the population of the district varied between 967 and 980 while that of Maharashtra varied between 936 and 978. At each Census since 1901 Dhulia district has recorded a higher sex ratio than the State. It is seen that during the last sixty years the sex ratio of the district population has gradually decreased from 980 in 1901 to 967 in 1961. Rural urban differences in sex ratios of the district have significantly widened in 1961.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas separately :—

Age-groups	Total	Rural	Urban
0—14	945	947	931
15—34	1,023	1,050	901
35—59	903	914	851
60+	1,115	1,106	1,157
All ages	967	978	913

Except for the older age-group (60+) the sex ratio of the rural population is always higher than that of the urban population. Higher sex ratio in the age-group 15—34 indicates the out-migration of males of that age-group especially from rural areas of the district.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows :—

	Total	Rural	Urban
DHULIA DISTRICT	967	978	913
1 Akrani Mahal ..	946	946	..
2 Akkalkuva Taluka	960	960	..
3 Taloda Taluka ..	998	1,014	947
4 Shahada Taluka ..	985	992	909
5 Nandurbar Taluka	976	987	945
6 Shirpur Taluka ..	962	968	933
7 Sindkhed Taluka ..	974	978	931
8 Nawapur Taluka ..	967	973	919
9 Sakri Taluka ..	970	970	..
10 Dhulia Taluka ..	947	977	889

Akrani mahal has the least (946) while Taloda taluka has the highest (998) sex ratio. In no other taluka except Taloda the sex ratio appears to be so near to equality. Even in exclusively rural talukas there is some deficiency of females. In other talukas rural sex ratios are higher than the urban. Urban sex ratio is the least in Dhulia taluka probably due to the existence of a large urban population.

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 ..	100	98·37	91·56	1·62	8·33	0·01	0·03	..	0·08
	15—34 ..	100	25·62	12·35	72·88	83·56	1·32	3·70	0·18	0·39
	35—54 ..	100	1·56	0·42	92·13	72·31	6·10	27·16	0·21	0·11
	55+ ..	100	0·83	0·25	77·23	23·36	21·79	76·11	0·15	0·28
	All ages ..	100	51·09	43·11	45·99	45·87	2·81	10·82	0·11	0·20
1961	0—14 ..	100	99·34	95·57	0·65	4·39	0·01	0·02	..	0·02
	15—34 ..	100	30·92	7·18	67·42	89·13	0·93	2·35	0·73	1·34
	35—54 ..	100	1·24	0·38	93·43	76·30	4·67	22·22	0·66	1·10
	55+ ..	100	0·98	0·20	80·33	28·23	18·17	71·16	0·52	0·41
	All ages ..	100	54·03	43·93	43·30	46·07	2·29	9·34	0·38	0·66

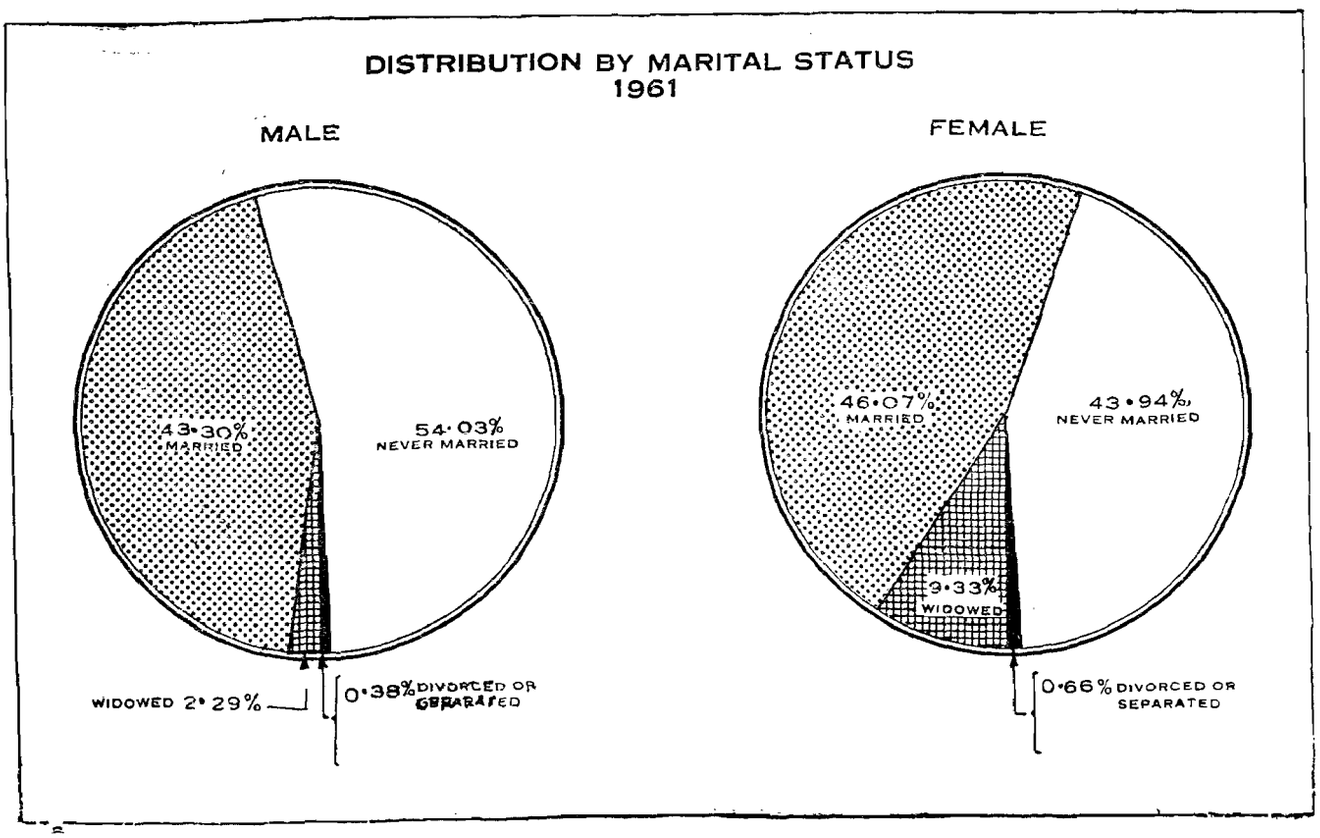

Figure above shows the distribution of the district population by marital status for males and females separately.

Proportion of never married increased from 51·09 per cent in 1951 to 54·03 per cent in 1961 for males and from 43·11 per cent to 43·93 per cent for females. Over a decade the proportion of widowed persons has decreased both for males and females. Proportion of divorced or separated has also increased but not very significantly. Consequently the proportion of married decreased for males while for females it has increased slightly.

An increase in age at marriage of the total population may be seen from the marital status distribution by age-groups. Over a decade the proportion of married in the age-group 0—14 has reduced considerably both for males and females. The proportion of never married decreased with increase in age whereas the proportion of widowed increased with increasing age. The proportion of divorced or separated persons is highest in the age-group 15—34 both for males and females.

Child Woman Ratio

Statement in the next column shows the child woman ratios for 1951 and 1961, i.e., the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows of 15—44 years age-group to 1,000 married women of 15—44 years age-group is also shown for comparison :—

	Number of children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of widows per 1,000 married women (Both in 15—44 years age-group)
1951 District Total ..	671	813	91
1961 District Total ..	797	905	57
Rural ..	812	914	54
Urban ..	718	855	72

Over a decade the child woman ratio (CWR) showed an increase even when it is standardised for marital status. In 1961 (CWR) was higher in rural areas even when considered in relation to married women. The number of widows per 1,000 married women of 15—44 age-group decreased from 91 in 1951 to 57 in 1961. There has been a significant decrease in the incidence of widowhood over a decade. The incidence of widowhood is much higher in urban areas. The matter needs further investigation.

Migration

The 1961 Census showed the proportions of population enumerated at place of birth and other places as shown below :—

Proportions of population by places of birth

(1)	Total population (2)	In place of enumeration (3)	Elsewhere in the district (4)	Outside the district but in Maharashtra (5)	Outside Maharashtra (6)
Persons	1,351,236	811,669	383,132	111,064	45,213
Males	686,942	485,016	138,224	42,326	21,283
Females	664,294	326,653	244,908	68,738	23,930
Percentage to total population—					
Persons	100·00	60·07	28·36	8·22	3·35
Males	100·00	70·62	20·12	6·16	3·10
Females	100·00	49·18	36·87	10·35	3·60

60·07 per cent of the persons were enumerated at their place of birth. 28·36 per cent persons had their place of birth elsewhere in the district. This determines the movement of the population within the district. Compared to this movement, the movement from other districts of the State and from outside the State seems to be less. Only 8·22 per cent persons migrated from other districts of Maharashtra and 3·35 per cent persons migrated from outside Maharashtra. Distribution of males and females by place of birth explains some of the probable causes of migration. The higher proportion of females among persons born elsewhere in the district indicates the marriage migration of females. This may be true to some extent for those born in other districts of Maharashtra. Even among the persons born outside Maharashtra females had a higher proportion. Dhulia being one of the border districts of the State, females from the adjoining States might have migrated in greater proportion.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are shown in the next column.

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	967	978	913
0—4	981	985	955
5—9	964	967	950
10—14	868	866	879
15—19	979	1,037	755
20—24	1,133	1,184	927
25—29	1,027	1,021	1,063
30—34	945	952	910
35—39	905	912	866
40—44	939	956	857
45—49	878	882	856
50—54	923	937	855
55—59	850	861	785
60+	1,115	1,106	1,157

The rural-urban differentials of sex ratios are less in younger and older age-groups. These differences are more significant in adult age-groups, among which the age-groups 15—19 and 20—24 are the most affected ones. The high sex ratios in the age-groups 15—19, 20—24 and 25—29 may be due to the movement of young adult males in search of jobs or for higher education outside the district. The sudden drop in the sex ratio for age-group 55—59 for total, rural and urban population may be due to misreporting of ages by women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and non-workers, is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52 :—

(1)	Categories of Workers I (2)	II (3)	III (4)	IV (5)	V (6)	VI (7)	VII (8)	VIII (9)	IX (10)	Non-Workers (11)
District Total	26·58	15·36	1·01	2·31	2·02	0·53	2·44	0·85	4·14	44·76
Born at place of enumeration	29·06	14·36	0·80	1·89	1·35	0·29	1·46	0·51	2·43	47·85
Elsewhere in the district	23·37	20·27	1·65	3·17	2·20	0·74	2·88	0·94	7·14	37·64
Outside the district	14·68	12·30	1·16	3·63	6·79	1·92	8·98	3·21	10·65	36·68

The proportion of non-workers is lower in the population born outside the district. Cultivators have a higher proportion among those born at the place of enumeration. Agricultural labourers have a higher percentage for those born elsewhere in the district. Male migrants from outside the district are engaged mostly in the tertiary sector.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member ..	4·66	4·22	6·94
2—3 members ..	19·51	18·93	22·45
4—6 members ..	44·09	44·67	41·10
7—9 members ..	22·76	23·09	21·08
10 members and more	8·98	9·09	8·43
All sizes ..	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (44·09 per cent) than others. The percentage distribution of rural and urban households by their size shows that single member and small sized households are more (29·39 per cent) in urban areas than in rural areas (23·15 per cent). The average size of the household is 5·7 in rural areas and 5·4 in urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown below.

32·78 per cent of the males are the heads of households as against 2·46 per cent females. Married sons are 8·32 per cent of the total males.

53·28 per cent males and 51·49 per cent females which incidentally form the largest group are never married, widowed or divorced relations. Proportion of unrelated persons is 0·86 per cent for males and 0·22 per cent for females. Daughters-in-law, daughters and sisters of the heads of households have contributed to the high percentage of females among other married relations. 30·24 per cent of the females are the spouses of the heads. The proportion of married sons is more in rural areas than in urban areas. The proportion of unrelated persons is more in urban areas both for males and females.

	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	32·78	2·46	32·74	2·22	32·95	3·72
(2) Spouses of heads of households	0·07	30·24	0·06	30·39	0·14	29·42
(3) Married sons	8·32	..	8·69	..	6·36	..
(4) Other married relations	4·69	15·59	4·76	16·00	4·36	13·38
(5) Never married, widowed or divorced relations	53·28	51·49	52·99	51·18	54·84	53·19
(6) Unrelated persons	0·86	0·22	0·76	0·21	1·35	0·29
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown in the next column.

	Total population (in '000)	Population in school-going ages 6 to 11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951 ..	1,060	*182	*584
Actual 1961 ..	1,351	233	699
Projected 1966 ..	1,569	252	804
Projected 1971 ..	1,791	291	925
Projected 1976 ..	2,038	318	1,069
Projected 1981 ..	2,312	340	1,233

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari ..	0·53	0·62	0·07	97·77	2·23
(2) Bhilli ..	27·72	32·18	4·26	97·55	2·45
(3) Dhanka ..	0·03	0·03	..	100·00	..
(4) Gujarati ..	4·36	3·74	7·67	71·92	28·08
(5) Hindi ..	2·17	1·19	7·31	46·09	53·91
(6) Marathi ..	59·30	59·38	58·84	84·15	15·85
(7) Sindhi ..	0·45	0·26	1·48	47·95	52·05
(8) Telugu ..	0·22	0·21	0·27	80·32	19·68
(9) Urdu ..	5·06	2·29	19·64	37·96	62·04
(10) Others ..	0·16	0·10	0·46	53·36	46·64
All Languages ..	100·00	100·00	100·00	84·03	15·97

Marathi, the principal language of the district, is the mother-tongue of 59·3 per cent of the population. Marathi speakers account for nearly 59·4 per cent of the population in rural areas and 58·8 per cent in urban areas. Bhilli has the second largest number of speakers in the district and its speakers account for 27·7 per cent of the total population. Bhilli is spoken by a large section of Bhils, particularly those residing in the Satpuda hills. The other languages with fairly large number of speakers are Urdu, Gujarati and Hindi. The speakers of these three languages taken together account for 7·22 per cent of the population in rural areas while in urban areas they account for as much as 34·62 per cent of the population. Dhanka is wholly spoken in rural areas. Most of the Banjari speakers are also residing in rural areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari ..	..	..	0·53
(2) Bhilli ..	11·90	28·47	27·72
(3) Dhanka ..	..	..	0·03
(4) Gujarati ..	5·39	4·69	4·36
(5) Hindi ..	7·20	1·80	2·17
(6) Marathi ..	69·97	59·22	59·30
(7) Sindhi ..	..	0·53	0·45
(8) Telugu ..	0·16	0·25	0·22
(9) Urdu ..	..	4·78	5·06
(10) Others ..	5·38	0·26	0·16
All Languages ..	100·00	100·00	100·00

The proportion of Marathi speakers has decreased from 69·97 per cent in 1901 to 59·30 per cent in 1961. The proportion of Gujarati speakers has also decreased slightly from 5·39 per cent in 1901 to 4·36 per cent in 1961 ; on the other hand Bhilli speakers have increased from 11·9 per cent to 27·7 per cent during the last sixty years. Obviously a large number of Bhils who might have returned Marathi or Gujarati as mother-tongues in 1901 have both in 1951 and 1961 returned Bhilli as their mother-tongue. In 1901 Hindi speakers accounted for 7·2 per cent of the population while in 1951 and 1961 they accounted for 1·8 per cent and 2·2 per cent, respectively. The high proportion of Hindi speakers in 1901 was due to the inclusion of Urdu speakers. Banjari and Dhanka languages have been returned for the first time in the 1961 Census. There has been a slight increase in the proportion of Urdu speakers in the last decade. Urdu was not shown separately in 1901 Census. It had been included in Hindi. The increased proportion may be due to some Muslims who had returned Marathi or Bhilli in 1951 returned Urdu as mother-tongue in 1961. Otherwise, as will be seen in the next section, there has been no corresponding increase in the proportion of Muslims.

5·38 per cent population in 1901 belonged to other languages. It was because 16,763 out of 20,068 persons in Nawapur peta had reported other languages.

RELIGIONS

Table C-VII in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is shown in the next column.

Ninety-one per cent of the population reported their religion as Hindu. Muslims accounted for 2·65 per cent in rural areas and 21·29 per cent in urban areas. Buddhists are only 2·29 per cent of the total population. Muslims are the most urbanised group and the Buddhists the least urbanised.

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	2·29	2·45	1·48	89·69	10·31
(2) Christians ..	0·26	0·21	0·48	70·00	30·00
(3) Hindus ..	91·02	94·20	74·30	86·96	13·04
(4) Jains	0·78	0·48	2·37	51·54	48·46
(5) Muslims ..	5·63	2·65	21·29	39·56	60·44
(6) Others ..	0·02	0·01	0·08	29·55	70·45
All Religions ..	100·00	100·00	100·00	84·03	15·97

The comparative position of the religions in 1901 and 1961 is as follows :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	2·29
(2) Christians	0·07	0·26
(3) Hindus	91·20	91·02
(4) Jains	0·68	0·78
(5) Muslims	5·67	5·63
(6) Others	2·38	0·02
All Religions	100·00	100·00

Buddhists, which in 1901 did not even represent a minor religion, accounted for nearly 2·3 per cent of the population in 1961. During the last sixty years the proportion of Christians increased from 0·07 per cent to 0·26 per cent. Hindus have lost 2·29 per cent to Buddhists but appear to have gained an equal number from other religions, particularly from the Animists in which some Adivasi population had been classified in earlier Censuses.

Sex ratio for each religion is as follows :—

Buddhists 1,006, Christians 895, Hindus 968, Jains 909, Muslims 955 and All religions 967.

Sex ratio is the least for Christians and the highest for Buddhists.

SCHEDULED CASTES

Table SCT-I-Part A in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste by sex for the district and each taluka separately. Actually, 24 castes are notified as Scheduled Castes in the district but only ten were reported in the district in 1961.

The distribution of the Scheduled Castes population by rural and urban areas of the district is as shown below.

The remaining 14 Scheduled Castes for which no one was returned in the district in 1961 are as follows :—

(1) Ager, (2) Baked, (3) Chalvadi, (4) Chenna Dasar, (5) Halleer, (6) Holaya, (7) Lingader, (8) Mahyavanshi, (9) Meghval, (10) Mukri, (11) Nadia, (12) Pasi, (13) Shenva and (14) Turi.

Out of the ten Scheduled Castes enumerated in the district, the largest number is of Mahars who are reported from the talukas of Dhulia, Sindkhed, Shirpur, Sakri, Shahada and Nawapur. The second largest group is of Chambhars who are reported from Dhulia, Sindkhed and Sakri talukas. Mangs and Bhangis are respectively third and the fourth by size of population. Mangs are mainly in Dhulia, Sindkhed and Sakri talukas while Bhangis are reported from Dhulia, Akkalkuva and Sindkhed talukas. The remaining Scheduled Castes together make less than 0·05 per cent of the total population. Bhangi and Dhor are concentrated in urban areas, which may be attributed to the scavenging, sweeping and tanning of hides and skins with which they are traditionally associated. Only two females from Tirgar caste are reported in the district.

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	24,230	23,824	3·56	75·81	24·19
(1) Bhangi	752	666	0·10	33·99	66·01
(2) Chambhar	6,854	6,750	1·01	64·89	35·11
(3) Dhor	41	40	0·01	12·35	87·65
(4) Garoda	3	2	N	100·00	..
(5) Halsar	3	7	N	100·00	..
(6) Holar	273	287	0·04	69·46	30·54
(7) Mahar	13,617	13,373	2·00	86·41	13·59
(8) Mang	2,687	2,697	0·40	62·82	37·18
(9) Mang-Garudi	(Included in Mang.)				
(10) Tirgar	..	2	N	100·00	..

*Inclusive of persons from the Scheduled Castes who have not reported their individual caste. N = Negligible.

The comparative position of the Scheduled Castes population in 1951 and 1961 in the district is as follows :—

	Percentage to total population in		
	Total Area	Rural Areas	Urban Areas
All Scheduled Castes—			
1951	5·76	5·64	6·33
1961	3·56	3·21	5·39

The reduction of the proportion from 5·76 to 3·56 is the result of a large number of persons from Mahar caste returning their religion in the 1961 Census as Buddhist. Because of the change of religion they are not enumerated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. But for the change of religion, the total population of the Scheduled Castes would have made about 6 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) in Part II show the literacy and educational levels for each Scheduled Caste. The percentages of literacy for the district total population, all Scheduled Castes and each Scheduled Caste are as shown below.

Both males and females of the Scheduled Castes appear to have almost come up in education to the levels of the general population. They seem to be taking full advantage of the educational facilities and concessions available to them and the gap between them and the district average is considerably reduced now. Chambhars and Mahars appear to be more advanced in literacy. In fact their literacy rates for males are higher than the corresponding average rates for the general population in rural areas.

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	21·46	33·33	9·31	44·56	58·30	29·51
All Scheduled Castes	19·71	33·73	5·59	29·54	43·55	14·89
(1) Bhangi	16·18	28·19	2·24	22·01	34·08	8·58
(2) Chambhar	23·43	38·45	8·37	34·59	47·47	21·19
(3) Dhor	10·00	No literates	16·67	29·58	43·24	14·71
(4) Garoda	No literates			..	..	..
(5) Halsar	No literates			..	..	..
(6) Holar	5·66	10·66	0·52	11·11	23·68	1·05
(7) Mahar	19·62	34·09	5·01	31·67	47·90	14·20
(8) Mang	12·95	22·58	3·36	18·68	31·90	5·49
(9) Mang-Garudi	(Included in Mang)					
(10) Tirgar	No literates			..	..	..

Economic Activity

The industrial classification of persons at work and non-workers for the district average, all Scheduled Castes and for each Scheduled Caste is as follows :—

Name of Scheduled Caste	Percentage of workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average..	21·77	17·24	8·27	52·72
All Scheduled Castes ..	10·30	21·20	16·10	52·40
(1) Bhangi ..	0·21	0·63	42·81	56·35
(2) Chambhar ..	8·66	15·10	18·33	57·91
(3) Dhor ..	..	6·17	25·93	67·90
(4) Garoda ..	..	..	..	100·00
(5) Halsar ..	30·00	..	..	70·00
(6) Holar ..	5·18	24·11	21·25	49·46
(7) Mahar ..	13·44	28·05	8·65	49·86
(8) Mang ..	2·02	7·63	40·14	50·21
(9) Mang-Garudi	(Included in Mang)			
(10) Tirgar ..	..	..	50·00	50·00

The proportion of workers for the Scheduled Castes is more or less the same as the average for the district. But the proportion in cultivation is lower and in agricultural labour higher than the district average. This is due to the association of some Scheduled Castes with certain services as well as to a fewer persons owning lands among them.

Size of Land Cultivated

Tables C-I-Part A and SCT-V-Part A in Part II show a broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes in rural areas respectively. The proportions are as follows :—

Size of land cultivated	District rural population		All Scheduled Castes	
	Number of sample households	Percentage	Number of sample households	Percentage
All Sizes ..	24,441	100·00	742	100·00
Less than 5 acres	4,754	19·45	261	35·17
5—9·9 acres ..	6,837	27·97	201	27·09
10—29·9 acres ..	10,452	42·77	257	34·64
30 acres and over	2,398	9·81	23	3·10

Out of a sample of 24,441 cultivating households, 742 or 3 per cent households are from the Scheduled Castes from the rural areas against 3·21 per cent population out of the rural population of the district. 35·17 per cent of the cultivating households of the Scheduled Castes are cultivating less than five acres of land as against the corresponding average of 19·45 per cent for the general population. The percentage of households cultivating land over five acres among Scheduled Castes is 64·83 per cent as against the corresponding average of 80·55 per cent for the district. The proportion of cultivating households is itself smaller for the Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Dhulia district has the largest proportion of Scheduled Tribes in the State. Out of the total population of 1,351,236, 513,344 persons or 37·99 per cent belong to the Scheduled Tribes. Nawapur and Akkalkuva talukas and Akrani mahal are predominantly tribal areas and have been notified as Scheduled Areas. Nandurbar, Taloda, Sakri, Shahada and Shirpur talukas also have large numbers of Scheduled Tribes. The predominant Scheduled Tribes are Bhils, Dhanka, Gamit, Kokna, Naikda and Pardhi. Their concentration is mostly in the Satpuda ranges in the north and the areas flanked by the ranges of Sahyadri in the south and south-west.

Many special schemes for welfare of the Scheduled Tribes are in progress. The important among them are the nine Tribal Development Blocks functioning at Mulgi, Akkalkuva, Chinchpada, Khandbara, Mandane, Dhanora, Pimpalner, Dahiwel and Taloda, each with a combined allocation of Rs. 15 lakhs for stages I and II. Similar Tribal Development Blocks are proposed to be opened at Mhasavad, Ashte and Nawapur.

Table SCT-I-Part B in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Nineteen Scheduled Tribes were notified as Scheduled Tribes in the district, but 18 are reported in the district in 1961 Census.

The distribution of their population by rural and urban areas is as shown below.

The only one declared Scheduled Tribe, for which no one was returned in the district in 1961, is Bavacha.

Bhil with 300,099 persons is the largest Scheduled Tribe. They are found all over the district. The second largest group is of Gamits with 101,607 persons and are reported mostly from Nawapur, Nandurbar, Akkalkuva, Sakri and Taloda talukas. Koknas are the third largest group with 51,209 persons and are found in the talukas of Sakri, Nawapur, Nandurbar and Shirpur. Dhankas who are 43,166 are reported from Akkalkuva, Nawapur, Nandurbar, Taloda and Shahada talukas.

Name of Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes	258,749	254,595	37·99	96·91	3·09
(1) Barda	217	212	0·03	100·00	..
(2) Bhil	151,591	148,508	22·21	96·65	3·35
(3) Chodhara	38	26	N	100.00	..
(4) Dhanka	21,570	21,596	3·19	98·73	1·27
(5) Dhodia	229	209	0·03	71·46	28·54
(6) Dubla	390	397	0·06	27·95	72·05
(7) Gamit	51,369	50,238	7·52	96·93	3·07
(8) *Gond*	89	54	*0·01*	*56·64*	*43·36*
(9) Kathodi	388	389	0·06	100·00	..
(10) Kokna	25,688	25,521	3·79	99·54	0·46
(11) Koli Dhor	314	312	0·05	38·66	61·34
(12) Naikda	4,496	4,757	0·68	95·04	4·96
(13) Pardhi	1,892	1,883	0·28	93·91	6·09
(14) Patelia	28	41	0·01	34·78	65·22
(15) Pomla	1	..	N	100·00	..
(16) Rathawa	55	36	0·01	80·22	19·78
(17) Varli	8	2	N	50.00	50.00
(18) Vitolia	385	414	0·06	100·00	..

* Inclusive of persons from the Scheduled Tribes who have not reported their individual tribes N=Negligible.

Naikdas and Pardhis are 9,253 and 3,775 respectively. The remaining 12 Scheduled Tribes have together 4,235 population which makes less than 0·5 per cent of the total population of the district. Varli and Pomla have respectively ten and one persons only. Four Scheduled Tribes, *viz.*, Gamit, Dhanka, Naikda and Barda actually deserve to be combined with Bhils as they are merely names of sub-tribes of Bhils.

The comparative position of the Scheduled Tribes population in 1951 and 1961 in the district is as follows :—

	Percentage to total population in		
	Total Area	Rural Areas	Urban Areas
All Scheduled Tribes—			
1951	37·30	44·10	7·25
1961	37·99	43·82	7·34

In the area that now formed the Dhulia district, there was 395,521 Scheduled Tribes population in 1951. It has increased to 513,344 in 1961 or by 29·79 per cent during the decade.

The percentage proportion of Scheduled Tribes population to total population has increased from 37·30 per cent in 1951 to 37·99 per cent in 1961 in spite of the transfer of some predominantly tribal areas to Gujarat State.

Literacy and Education

The percentages of literacy for the district population, for all Scheduled Tribes population and each Scheduled Tribe are as follows :—

Name of Scheduled Tribe	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	21·46	33·33	9·31	44·56	58·30	29·51
All Scheduled Tribes	8·15	14·27	1·93	15·01	24·61	4·77
(1) Barda	3·73	6·91	0·47	..	..	..
(2) Bhil	5·94	10·73	1·06	14·62	24·81	4·00
(3) Chodhara	7·81	13·16	No literates	..	..	..
(4) Dhanka	10·79	18·86	2·77	22·40	32·42	7·31
(5) Dhodia	21·41	37·42	5·70	20·80	29·73	7·84
(6) Dubla	11·82	20·95	3·48	9·35	18·25	0·35
(7) Gamit	11·14	19·00	3·12	12·91	19·20	6·04

(16) Rathawa	2·74	4·35	No literates	5·56	11·11	No literates
(17) Varli	No literates			40·00	No literates	100·00
(18) Vitolia	2·88	5·71	0·24	..	..	..

It would be seen from the table on page (24) that the Scheduled Tribes as a group are much behind in literacy compared to the general population and even to the Scheduled Castes. Among the numerically major Scheduled Tribes in the district "Kokna" appears to be more advanced educationally.

Economic Activity

The industrial classification of persons at work and non-workers for the district average, for all Scheduled Tribes and for each Scheduled Tribe is as follows :—

Name of Scheduled Tribe	Percentage of workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average ..	21·77	17·24	8·27	52·72
All Scheduled Tribes ..	28·26	25·45	3·27	43·02
(1) Barda ..	21·91	32·63	0·93	44·52
(2) Bhil	20·50	32·50	3·58	43·42
(3) Chodhara ..	46·88	..	7·81	45·31
(4) Dhanka ..	38·43	18·55	1·49	41·53
(5) Dhodia ..	1·14	3·20	42·92	52·74
(6) Dubla ..	1·53	3·43	43·58	51·46
(7) Gamit ..	39.01	17·22	2.44	41·33
(8) Gond ..	2·80	16·08	31·47	49·65
(9) Kathodi ..	2·45	50·19	8·11	39·25
(10) Kokna ..	47·38	6·33	1·63	44·66
(11) Koli Dhor ..	10·54	9·59	15·97	63·90
(12) Naikda ..	25·80	27·07	5·73	41·40
(13) Pardhi ..	11·28	31·44	9·01	48·27
(14) Patelia ..	4·35	14·49	5·80	75·36
(15) Pomla ..	..	..	100·00	..
(16) Rathawa ..	..	..	13·19	86·81
(17) Varli ..	..	..	..	100·00
(18) Vitolia ..	1·50	3·00	51·44	44·06

Nearly 95 per cent of the workers from the Scheduled Tribes work as cultivators and agricultural labourers. The proportions of workers in both cultivation and agricultural labour are higher than the district average. This is due to the association of the Scheduled Tribes, more with agricultural activities as well as more persons owning land amongst them. The proportions of workers among the Scheduled Tribes are also more compared to the total population of the district.

Size of Land Cultivated

Tables C-I-Part A and SCT-V-Part B in Part II show the broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Tribes in rural areas respectively. The proportions are as follows :—

Size of land cultivated	District rural population		All Scheduled Tribes	
	Number of sample households	Percentage	Number of sample households	Percentage
All sizes	24,441	100·00	9,805	100·00
Less than 5 acres	4,754	19·45	1,654	16·87
5—9·9 acres ..	6,837	27·97	3,160	32·23
10—29·9 acres ..	10,452	42·77	4,395	44·82
30 acres and over	2,398	9·81	596	6·08

Out of a sample of 24,441 cultivating households 9,805 or about 40 per cent households are from the Scheduled Tribes against their population which is 43·82 per cent of the rural population. 16·87 per cent of the cultivating households of the Scheduled Tribes are cultivating less than five acres of land against the corresponding average of 19·45 per cent for the district. The percentage of households cultivating land over five acres among the Scheduled Tribes is 83·13 per cent against the corresponding average 80·55 per cent for the district. This should, however, be viewed in the context of the tribal areas having hilly and inferior types of soils and the larger sizes of their land holdings are not comparable with the district averages because of the hilly terrain and low productivity of their lands.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of Standing Committee which is the most powerful committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the subject committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(1) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the

students from the Scheduled Castes, Scheduled Tribes, Nomadic and semi-Nomadic Tribes, Vimukta Jatis and the Backward Classes. The concession is awarded in the Primary Schools, High Schools or Technical Schools. 7,244 students benefited from and Rs. 2,35,667 were spent on these schemes during the year 1962-63.

An amount of Rs. 3,03,800 was spent on 34 Backward Class hostels in the district and in 1962-63, 1,623 students were admitted in these hostels.

(2) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions and Rs. 13,675 were spent on 76 beneficiaries. Assistance for purchase of milch cattle (15) to the Scheduled Castes and other backward classes was given to the extent of Rs. 4,163. Rs. 9,072 were also spent on 14 pairs of plough bullocks and to purchase agricultural implements, seeds, etc., on 34 beneficiaries.

(3) *Housing.*—A number of housing societies of backward classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loans and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes is also provided. Under this scheme Rs. 37,350 were spent for construction, repairs and maintenance of houses on 56 beneficiaries, and on 40 houses during 1962-63.

(4) *Drinking Water Wells.*—An amount of Rs. 12,000 was spent under this scheme. Rs. 1,500 were spent for repairs of 2 wells in or near Scheduled Castes localities while expenditure of Rs. 1,313 was incurred for one drinking water well for Scheduled Castes.

(5) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Scheduled Castes and Rs. 116·55 were spent during the year on four beneficiaries.

(6) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows and gatherings are addressed at fairs and other places. Kirtan programmes and Melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in Caste Hindu localities and subsidy is paid to Caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs. 14,789 were spent under the schemes during the year 1962-63.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes. The expenditure described above against each scheme is out of the committed schemes and also include expenditure on the Plan schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are, irrespective of their religion, caste or community, treated as belonging to the " Other Backward Classes ".

Concessions to Buddhists

From 1st May 1960, the Scheduled Castes convert to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

The literacy rates in the district are equal to the State averages for rural areas and a little lower than the corresponding State averages for urban areas. The progress in rural areas should be considered as really outstanding because the district has a very large population of Scheduled Tribes which makes the highest proportion (37·99 per cent) to total population among the districts of Maharashtra. Remarkable progress has been made in the literacy rates and both in primary and secondary education in the last 30 years.

Growth of Literacy

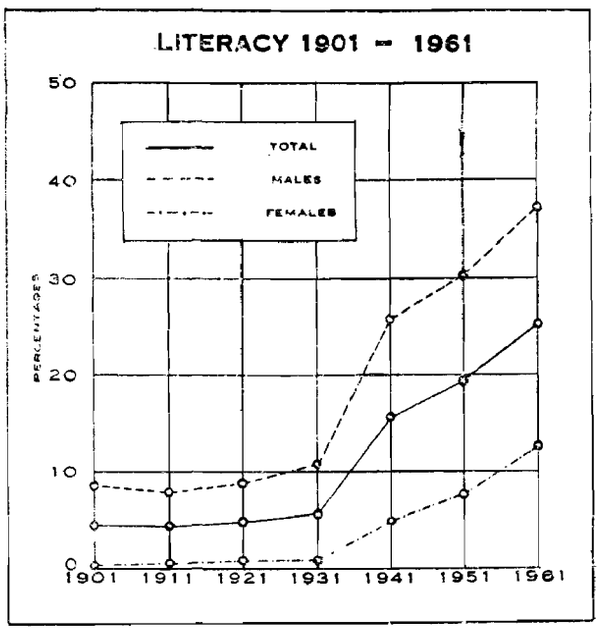

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

	Total	Males	Females
1901	4·43	8·51	0·26
1911	4·18	7·89	0·40
1921	4·83	8·84	0·72
1931	5·87	10·78	0·80
1941	15·48	25·68	4·96
1951	19·19	30·59	7·44
1961	25·15	37·43	12·45

Figure to the right shows the growth of literacy in the district for total population, males and females separately.

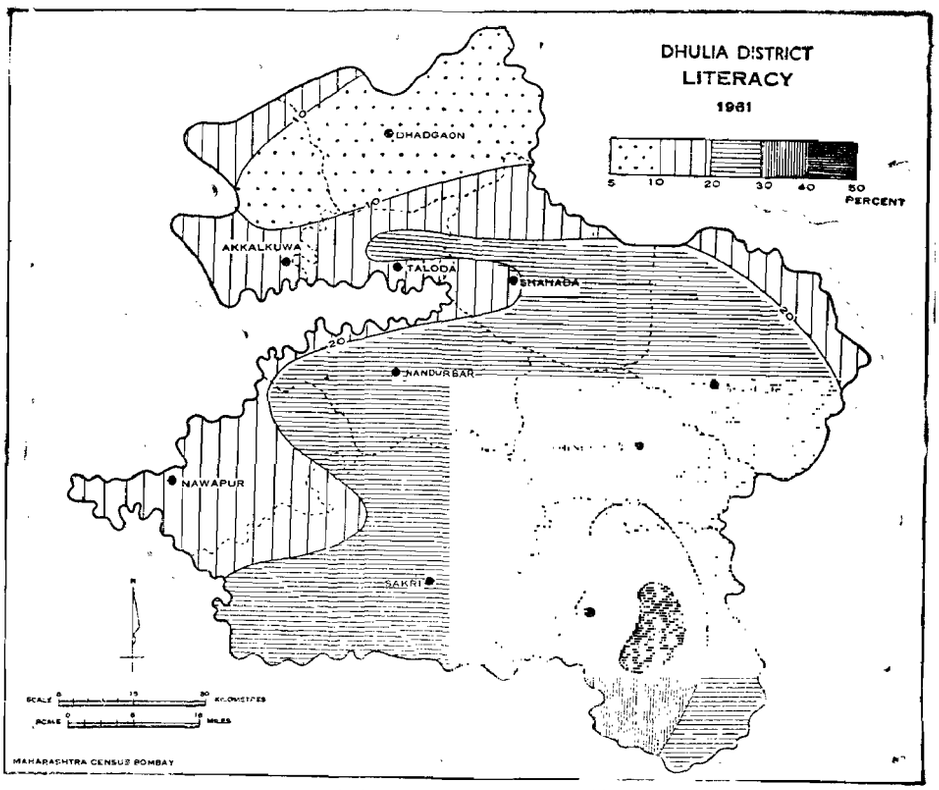

The literacy percentage has increased about 4½ times during the last thirty years. Increase in the level of literacy was significant especially during the decade 1931—41. This sudden increase might have been the result of mass literacy campaigns undertaken in the wake of the movement for independence. The introduction of compulsory primary education in 1947 in the district has also greatly helped to raise the literacy rates both for males and females.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately :—

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA ..	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
DHULIA DISTRICT ..	25·15	37·43	12·45	21·46	33·33	9·31	44·56	58·30	29·51
1 Akrani Mahal ..	4·34	6·90	1·64	4·34	6·90	1·64	..	..	..
2 Akkalkuva Taluka ..	8·56	14·22	2·66	8·56	14·22	2·66	..	..	..
3 Taloda Taluka ..	19·96	31·37	8·53	15·37	26·01	4·87	35·35	48·70	21·25
4 Shahada Taluka ..	24·93	38·47	11·20	23·21	36·60	9·72	43·30	57·47	27·71
5 Nandurbar Taluka ..	26·44	38·50	14·07	19·83	31·38	8·14	44·43	57·49	30·60
6 Shirpur Taluka ..	24·88	38·16	11·08	21·63	34·31	8·54	40·91	56·80	23·87
7 Sindkhed Taluka ..	27·82	42·65	12·59	27·06	41·87	11·92	35·46	50·32	19·50
8 Nawapur Taluka ..	16·51	25·69	7·02	13·73	22·70	4·52	39·29	49·53	28·14
9 Sakri Taluka ..	22·91	34·22	11·25	22·91	34·22	11·25	..	..	..
10 Dhulia Taluka ..	34·32	48·41	19·44	27·10	41·06	12·81	48·96	62·65	33·55

Figure to the right shows the spread of literacy in the district by isopleths. The most literate area of the district is located in Dhulia taluka. The literacy rate decreases as one moves towards the west, the north and the centre. The lowest rates are found in the extreme north, i.e., in the hilly areas of Satpuda. Dhulia taluka has the highest literacy rates for total, males and females. In rural areas also the same taluka has the highest literacy percentage for total and females. But Sindkhed taluka has the highest rate for males. In urban areas also Dhulia taluka has the highest rates for total, males and females.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as follows. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Higher percentages of literates among females are only in the age-groups 5—14 and 15—34. This is an indication of spread of literacy among females only in recent years and possibly because of the introduction of the scheme of compulsory primary education.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	25·15	37·43	12·45	21·46	33·33	9·31	44·56	58·30	29·51
0—4	..	..	..	..	..	..	..	..	..
5—14	31·23	39·76	22·00	27·74	36·77	17·97	50·33	56·04	44·11
15—34	35·76	54·92	17·03	30·42	49·36	12·38	61·62	79·86	41·38
35—59	23·39	39·91	5·10	19·21	34·40	2·59	45·22	67·77	18·73
60+	15·03	30·02	1·58	12·30	25·09	0·74	28·89	55·64	5·76

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as shown in the next column.

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total No. of Schools.	1,220	182	38	40	580	160	220
Central Government.	2	..	..	..	2	..	..
State Government.	1	1	..	..	..	..	..
Zilla Parishad	1,017	166	21	40	430	147	213
Municipal ..	30	12	15	..	..	1	2
Private ..	170	3	2	..	148	12	5

There has been a steady growth in the number of primary schools in the district during the last ten years. The number rose from 1,033 in 1951 to 1,197 in 1960-61. On 31st March 1962, it stood at 1,220. Out of the 1,220 primary schools 1,017 or nearly 83·36 per cent are managed by the Zilla Parishad, 13·93 per cent are managed by private institutions, 2·46 per cent by Municipalities and only 0·25 per cent by Government. The State Government's share (in 1961-62) was 88·3 per cent of the total expenditure. The expenditure on primary education is incurred by the State Government through grants-in-aid to Zilla Parishad and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes get free education at the cost of the Government and scholarships are given to them at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward classes and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made remarkable progress in this district. At the end of First Five-Year Plan there were 109 basic schools. This number rose to 223 by the end of Second Plan. On 31st March 1962, it stood at 260.

By 31st March 1962, 7 towns and 801 villages in the district had primary schools and 426 villages had schooling facilities, i.e., primary schools situated within a mile from the village. 133 villages did not have even schooling facilities. Total number of primary teachers was 4,188. Out of them 3,557 or 84·9 per cent were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(*As on 31st March 1962*)

	Dhulia District	Maharashtra
Average population served by a primary school	1,119	1,135
Average area served by a primary school (sq. miles)	4·2	3·4
Pupils per teacher	37	38
Pupils per school	129	127
Average annual salary per primary teacher .. .. (Rs.)	1,275	1,250
Average annual expenditure per primary school .. .. .. (Rs.)	4,725	4,903
Average number of teachers per school ..	3·4	3·3
Percentage of trained teachers	84·9	64·8

The scheme of compulsory primary education was first introduced in the district in the year 1947 in villages having population of over 1,000 according to 1941 Census. The scheme was further extended in 1954 to villages having a population of over 1,000 according to the 1951 Census and extended by stages to villages with a population above 500 and later to villages with a population of less than 500. As a result, the indices of the progress of primary education shown above compare favourably with those of the State in many respects. One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11. A provision of Rs. 23·77 lakhs has been made for primary education in the Third Plan in the district. During the Plan period 130 teachers would be appointed in primary schools. The number of students is expected to rise by 6,500. Similarly, 205 class-rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

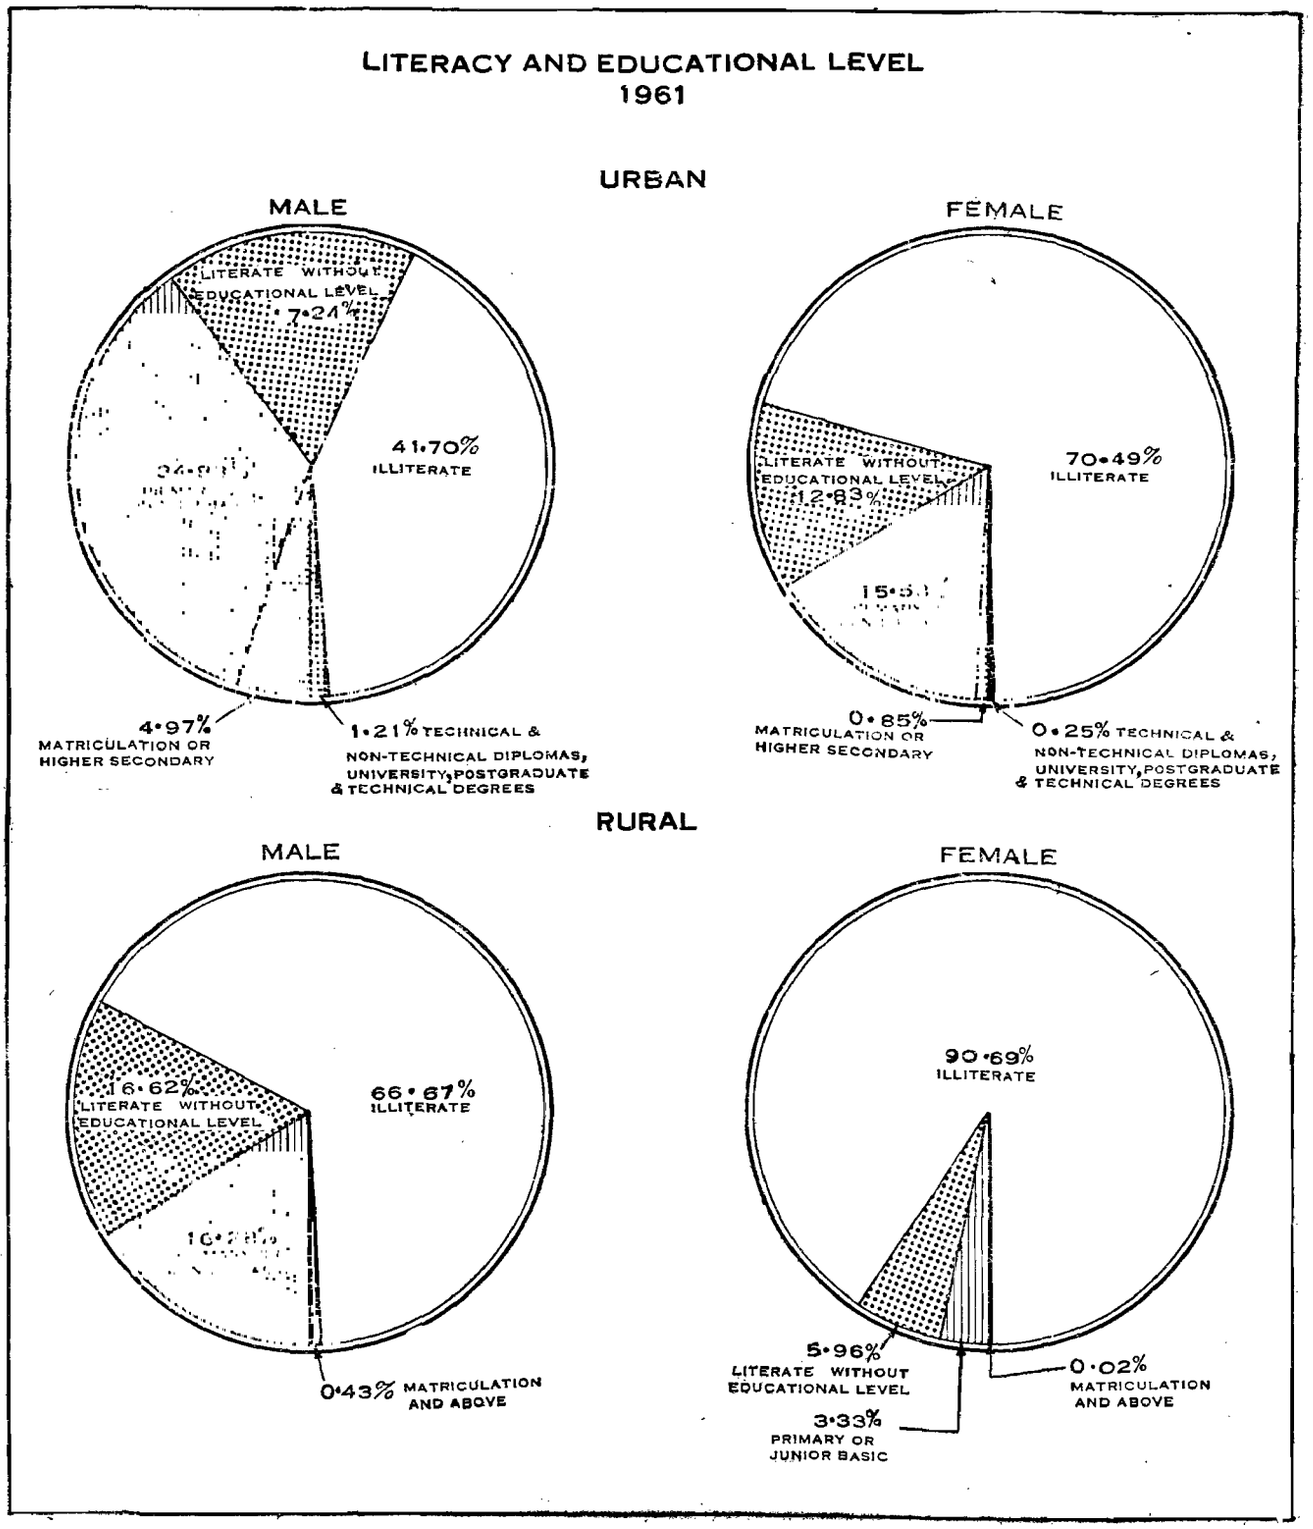

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multi-purpose	Ordinary
State ..	1	..	1	..
Municipal ..	3	..	..	3
Private ..	62	1	5	56

Total number of students on roll in the secondary schools as on 31st March 1962 was 18,453. Out of them 15,498 were boys and 2,955 girls. Total number of teachers was 745. Out of them 486 or 65·2 per cent were trained teachers. Other indices of secondary education compared to the State averages are as follows :—

	Dhulia District	Maharashtra
Population served by each high school ..	20,680	13,805
Area served by each school (sq. miles) ..	77·1	40·8
Pupil-teacher ratio	25	25
Pupils per secondary school	280	338
Average annual salary per teacher (Rs.)	1,684	1,870
Average annual expenditure (direct) per secondary school .. .. (Rs.)	30,722	39,543
Average number of teachers per secondary school	11·3	13·7

Figure on page (30) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education has been very rapid. The number of secondary schools increased from 24 in 1955-56 to 53 in 1960-61. This figure stood at 66 on 31st March 1962. The secondary schools are dispersed throughout the district except in Akkalkuva taluka and Akrani mahal where there are no secondary schools. Taloda taluka has only one secondary school. Dhulia taluka has as many as 23 secondary schools.

Private institutions alone manage 62 out of 66 secondary schools in the district. The Government share in the total expenditure on secondary education is however 67·0 per cent and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes and Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 25,000 by 1965-66 and to 35,000 by 1970-71.

S. S. C. Examination

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October, and Dhulia, Nandurbar, Shirpur and Dondaicha are the examination centres in the district. The number of candidates who appeared and passed from those centres during the year 1962 are as follows :—

Examination held in—	Appeared	Passed
March 1962	3,178	1,276
October 1962	1,691	639
Total ..	1,915	

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. There were no institutions of higher education in this district prior to 1950-51. The district had its first college of Arts and Science during the First Five-Year Plan period. In 1960-61 there were four colleges and 1,222 college students. The colleges provide education in Arts, Science, Commerce, Teaching and Agriculture. Out of the four colleges, two, *viz.*, the Graduates' Basic Training College and the Government Agricultural College are managed by Government. The other two colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government.

Technical Education

There is one King Edward Technical School at Dhulia which was taken over by the Government in 1947. In 1960-61, 798 students were undergoing training in this school. Since 1959, the school has started imparting vocational education. In June 1954, another technical high school was started at Dhulia where training is given in technical courses such as mechanical engineering, turning, fitting, carpentry, handloom weaving, etc. In 1960-61, 722 students received training in this school. The Kamladevi Girls' High School at Dhulia has also been converted into a multipurpose high school.

Libraries

There are 13 libraries in the district (as on 31st March 1964) which are recognised by the State Government, among which one is a district library, 8 are taluka libraries and 4 town libraries. The maximum grant paid to these libraries every year is Rs. 6,000 to district library and Rs. 1,000 to each taluka and town library.

Printing Presses, Journals and Newspapers

There are 36 printing presses in the district. The number of journals and newspapers is 15. Out of these 10 are weeklies and 5 journals.

Radio Licences

The number of radio licences in the district has increased from 1,381 in 1954-55 to 1,654 in 1955-56 and to 3,938 in 1960-61.

Cinema Theatres

There were 23 cinema theatres in this district on 21st December 1963. Out of these, sixteen are permanent, one quasi-permanent and six are touring talkies.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health Activities in the district.

Drinking Water Supply

Column (5) of the Village Directory in Part I shows the sources and adequacy of drinking water for each village in the district.

Two towns and three villages have piped water supply. Out of the remaining towns and villages, 208 villages draw drinking water from rivers, 58 villages from nallahs, one village from tanks, 570 villages and 2 towns from wells and 520 villages and 3 towns have more than one of these sources. The water supply is not adequate in summer in the case of 78 villages and one town.

Anti-T. B. Campaign

With a view to check the spread of T.B., B.C.G. campaign was launched in Dhulia in 1955 and the whole district was covered by 1958. By the end of 1960, 441,608 people were tested under this programme.

Malaria Eradication

Malaria Control Scheme was started in the district in 1950. Under that scheme all the houses and cattle-sheds in the district are sprayed with DDT between June and October every year. For the purpose of National Malaria Control Programme, the district is divided into five regions, *viz.*, Dhulia, Shahada, Dhadgaon, Nandurbar and Sakri.

Leprosy Control

One Survey Education and Treatment Unit was started in Sakri taluka in 1959-60 to fight leprosy. That unit surveyed a population of 3,096 during that year. It detected 36 cases of leprosy, treated 26 cases

and followed 12 cases. One more S. E. T. Unit was started in 1960-61 in Dhulia General Hospital. The two units surveyed a population of 5,283 in 1960-61. The number of cases detected was 129, the number treated was 74 and the number of cases followed was 32. A Propaganda Officer is appointed by Government in this district to detect leprosy patients and to transport them to dispensaries for treatment.

Family Planning Centres

The first family planning centre was started in the district in 1958-59. The number increased to six in 1960-61. The centres are located at Dhulia, Shahada, Dhadgaon, Pimpalner, Dahiwel and Nizampur. The centre at Dhulia is managed by the Dhulia Municipality. 240 vasectomy operations were performed during the year 1960-61 in the district.

Cholera Control

A campaign of cholera inoculation is undertaken in May every year in villages which are situated on the banks of rivers.

Control of Smallpox

There were 1,145 deaths due to smallpox in 1958. This number came down to 13 in 1960. The vaccinations (and re-vaccinations) against smallpox are performed every year from March to May. Seven additional vaccinators have been appointed since 1960.

Medical Facilities

Medical facilities available in the district are shown in Table 17 in Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private practitioners, hospitals and dispensaries are not shown there.

The number of doctors and nurses, number of beds available and the number of indoor and outdoor patients treated have all increased between 1950—60. The number of doctors increased from 16 in 1950 to 23 in 1960. Similarly, the number of nurses increased from 16 in 1950 to 31 in 1960. The number of beds rose from 112 in 1950 to 133 in 1960. The number of indoor patients increased from 3,719 in 1950 to 5,722 in 1960. The number of outdoor patients also increased from 97,962 in 1950 to 178,581 in 1960.

Hospitals.—There was one Government hospital in 1960. It was the Civil Hospital (now called the General Hospital) at Dhulia. It has a provision of 70 beds. The hospital has an X-Ray unit and an ambulance car for transporting patients in serious conditions from far-off places. The number of beds reserved for T.B. patients has been increased and a specialist has been appointed to attend to T.B. patients. There is a family planning centre and a blood-bank attached to this hospital.

There are two Government cottage hospitals at Shirpur and Dondaicha.

Dispensaries.—In 1960, there were 11 Government or Government aided dispensaries of which two were run by Government, five by the District Local Board (now Zilla Parishad) and four by Municipalities.

Primary Health Centres.—At the end of 1960, there were two Primary Health Centres in the district. In 1961-62, the number rose to eight of which two are in Shahada taluka, two in Sakri taluka and one each in Nawapur, Taloda and Akkalkuva talukas and Akrani mahal.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 930.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classification by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 39 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

Seventy-one per cent of the houses are used as dwellings, 15 per cent as cattle-sheds, etc., 7 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 35·2 in 1951 to 48·9 in 1961. The number of persons per residential house has, however, decreased from 6·2 in 1951 to 5·7 in 1961. This may be a sign of an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by "owned" and "rented", 78 per cent of the dwellings in the district are owned and 22 per cent are rented. The proportion of owned is higher (86 per cent) in the rural areas but lower (38 per cent) in the urban areas. Even this low proportion of 38 per cent for the urban areas in the district is somewhat higher than the average of 30 per cent for urban areas of Maharashtra.

Out of the various materials used for walls, mud appears to be predominant in the district with a proportion of 47 per cent of occupied houses. Mud walls are more common in rural areas as 53 per cent of the occupied dwellings are having such type of walls compared to 18 per cent in urban areas. Its proportions in the talukas of Taloda and Nawapur are a little lower and least in Akrani mahal. The difference is however made up by grass, leaves, reeds or bamboo in these talukas. Burnt bricks are not used as much in rural areas as in urban areas. Their proportion is only 7·7 per cent in the rural areas against 64·6 per cent in urban areas. Unburnt bricks appear to be used comparatively more in the rural areas with a proportion of 5·5 per cent dwellings against 2·8 per cent dwellings in urban areas.

Out of the materials of roof, tiles are predominant in the district with a proportion of 28·5 per cent of occupied dwellings. Tiled roofs are, however, a little less common in urban areas. Their proportion in urban areas is 22·7 per cent against 29·7 per cent in rural areas. In the rural areas tiled roofs have higher proportions specially in northern and western talukas, *viz.*, Akkalkuva, Taloda, Nandurbar and Nawapur and Akrani mahal. Towards the east they are gradually replaced by concrete or stone slabs. Flat roofs of earth on wooden beams and rafters are more common in Shahada and Sakri talukas. The distribution corresponds exactly to the pattern of annual rainfall in the district.

Corrugated iron or zinc sheets appear to be predominant in urban areas with 35·3 per cent. They are mostly noticed in the urban areas of Dhulia taluka. They are, however, less common in rural areas and make only 3 per cent. The proportions of roofs of tiles and grass, leaves, etc., in the rural areas, are almost equal.

Classified by the number of rooms occupied, 72·1 per cent of households are occupying one-room dwellings and 20·9 per cent are occupying two-room dwellings. Households occupying more rooms are more in urban areas than in rural areas. Average number of persons per room is 4·04 for total, 4·22 for rural and 3·28 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the predominant economic activity in the district. The proportion of persons working on agriculture to the total working population is 82·51 per cent as against the average of 69·91 per cent for Maharashtra.

The statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices, livestock and agricultural implements, etc., are presented for the district in Tables 3 to 10 in Part III.

Cultivating Seasons

There are two agricultural seasons, *viz.*, Kharif and Rabi. Much more area of the district is, however, cultivated in kharif season than in rabi season. The principal crops of the kharif season are bajri, groundnut, cotton, rice, kharif jowar and mung. Rabi jowar, wheat and gram are the main crops of rabi season. Jowar is grown in both the seasons but the district has comparatively more area under rabi jowar (popularly known as Dadar).

Monthwise agricultural operations in respect of principal crops in the district are shown below :—

Name of the crop	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Bajri	..	..	..	Light ploughing and harrowing.	Manuring and harrowing.	Harrowing
Paddy	..	..	Ploughing ..	Harrowing ..	Manuring and harrowing.	Sowing
Kharif Jowar	..	..	..	Ploughing and harrowing.	Harrowing and manuring.	Harrowing and sowing.

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on averages for three years from 1957-58 to 1959-60 :—

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and unculturable	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Gross cropped area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
MAHARASHTRA	100	17·54	6·08	2·29	2·80	4·75	0·62	3·77	4·46	57·69	60·55
DHULIA DISTRICT	100	35·92	10·60	1·21	1·96	3·82	0·02	1·09	0·89	44·49	50·54

Taloda Taluka	100	42·03	2·33	..	3·91	0·39	0·04	0·92	0·50	49·88	55·49
Shahada Taluka	100	24·33	3·99	0·03	4·48	3·16	..	1·42	0·80	61·79	74·55
Nandurbar Taluka	100	15·15	6·15	0·05	0·75	5·38	0·06	2·78	1·09	68·59	78·26
Shirpur Taluka	100	58·36	2·28	2·36	1·18	0·81	..	0·45	0·63	33·93	41·54
Sindkhed Taluka	100	4·74	5·14	2·57	0·34	9·43	0·03	1·06	1·40	75·29	86·63
Nawapur Taluka	100	28·32	2·71	0·27	1·80	5·59	0·01	0·13	1·86	59·31	62·27
Sakri Taluka	100	34·04	..	2·07	4·26	9·58	..	0·32	1·92	47·81	55·87
Dhulia Taluka	100	22·46	8·48	1·11	4·29	2.20	0·08	0·75	2·07	58·56	64·27

Figure on page (35) shows the land utilisation pattern for the district and each taluka separately for the year 1959-60.

The net area sown in the district is 44·49 per cent of the geographical area against the average of 57·69 per cent for the State. The low proportion of the area sown is due to the high proportions of forests and barren and culturable land. The proportions of area under forest in the district is 36 per cent and is the third highest in the State. The two districts having larger proportions are Chanda and Thana with 56 per cent and 39 per cent respectively.

Within the district the proportion of net area sown to the geographical area varies considerably from 7·97 per cent in Akrani mahal to 75·29 per cent in Sindkhed taluka. The proportions are high for Shahada (61·79 per cent), Nandurbar (68·59 per cent) and Sindkhed (75·29 per cent) talukas. The northern taluka of Akkalkuva and Akrani mahal have large areas of barren lands and forests, respectively. Net areas sown in these talukas are, therefore, considerably low, Akrani mahal having the lowest proportion (7·97 per cent) for it in the district.

Because of the changes in the classification of land utilisation effected in 1950-51 it is not possible to determine if there has been any shift in the pattern of land utilisation over the last 40 to 50 years.

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All the figures are averages for the three years 1957-58 to 1959-60:—

Details of cropped area	Percentage of gross cropped area in											
	Maharashtra	Dhulia District	Akrani Mahal	Akkalkuva Taluka	Taloda Taluka	Shahada Taluka	Nandurbar Taluka	Shirpur Taluka	Sindkhed Taluka	Nawapur Taluka	Sakri Taluka	Dhulia Taluka

Figure on page (37) shows the crop pattern for the district and each taluka separately.

Jowar occupies the first place among the crops of the district with 23·61 per cent of the gross cropped area. Bajri has 17·59 per cent, pulses 12·68 per cent, wheat 5·36 per cent, rice 4·10 per cent and other cereals 5·45 per cent. All the food crops together make 70·80 per cent against 69·88 per cent for Maharashtra. Compared with the average crop pattern of the State, the district has lower proportions for rice, jowar and other food crops and slightly higher proportions for wheat and pulses.

The district proportion for bajri is almost double the State average. Sugarcane is not an important crop in the district and covers an insignificant area. Chillies cover 1·46 per cent of the cropped area and is an important cash crop.

Groundnut is predominant among the non-food crops and covers 17·48 per cent of the cropped area. Cotton has a slightly lower proportion of cropped area (9·41 per cent) than the State average. But it is also an important crop of the district and its area is gradually increasing. The Virnar variety (197-3) of cotton has been very successful in the district. The Deviraj variety (170-CO-2) is also cultivated on irrigated land.

As comparable statistics are not available for the district for years prior to 1950-51 it is not possible to determine if there has been any significant changes in the cropping pattern during the last 40 to 50 years.

Generally speaking the crop pattern of the district is inferior to the average crop pattern of the State. The State's crop pattern itself is poor in the all-India setting because of the higher proportions of jowar, bajri and other low value crops. The district proportion of rice and sugarcane are lower and those of bajri and other cereals including small millets are considerably higher than the average for the State. The relieving features are (i) better yields for wheat, bajri, cotton, etc., (ii) larger areas under groundnut and (iii) the commercially important cash crop of chillies.

Within the district the cropping pattern varies according to rainfall and soil types. Wheat is grown to a large extent in the valley of Tapi river in Taloda (13·48 per cent), Shahada (11·64 per cent) and Nandurbar (8·90 per cent) talukas. Rice and small millets cover large areas in the heavy rainfall and hilly areas in Akrani mahal, Akkalkuva, Nawapur and Sakri talukas. Sizable proportions of jowar are in Akrani mahal and Taloda and Shahada talukas. Bajri is more predominant in southern talukas of Sindkhed, Sakri and Dhulia. The important cash crop of chillies is raised mainly in Nandurbar, Shahada, Sindkhed, Dhulia, Sakri and Taloda talukas. The first three talukas between them cover 70 per cent of the district area under chillies.

The proportion of non-food crops is lowest (3·25 per cent) in Akrani mahal and highest in Shirpur taluka (42·62 per cent). Shahada, Shirpur, Sindkhed and Dhulia talukas have more than 30 per cent of the gross cropped area under non-food crops mainly consisting of cotton and groundnut. The proportions of areas under groundnut in most of the talukas are more than double the State average. Akkalkuva, Shirpur and Nawapur talukas have higher proportions of cotton. The area under tobacco is almost negligible.

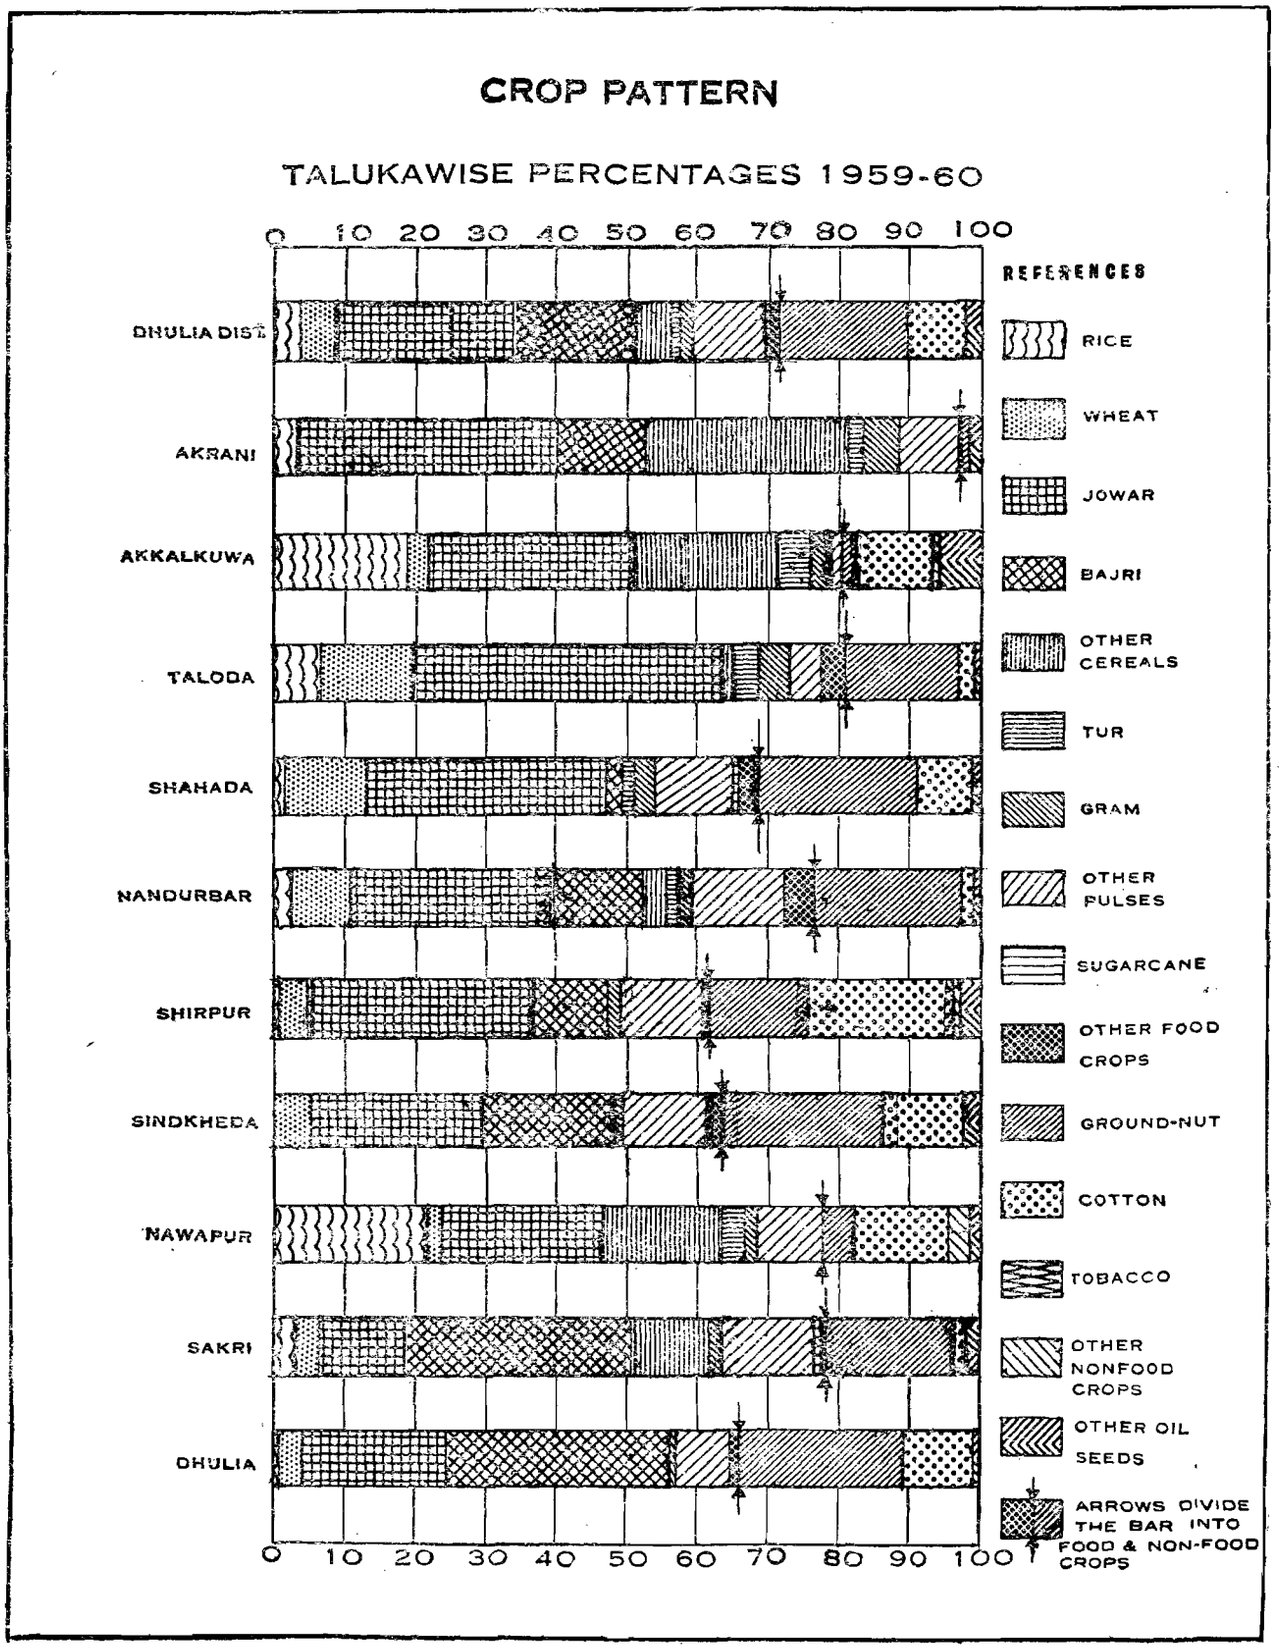

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown below compared with the corresponding figures for Maharashtra taken as 100 :—

Crop	Nine-year average yields per acre	1958-59 area	1958-59 outturns
MAHARASHTRA	100·00	100·00	100·00
Rice	37·07	2·66	1·02
Wheat	109·63	5·01	6·37
Jowar	91·92	3·16	3·56
Bajri	151·57	7·72	10·86
Ragi	87·80	3·48	3·34
Tur	67·47	1·72	2·00
Gram	90·72	2·79	3·09
Groundnut	96·47	12·23	15·52
Sesamum	120·10	5·28	7·19
Cotton	110·61	2·99	3·75

The district average yields are better than the State averages only for wheat, bajri, sesamum and cotton. The yield of bajri is more than one and half times the average for the State. The average yield of rice in the district is extremely poor in comparison with the State average. Nearly one-eighth of the area under groundnut in Maharashtra occurs in this district. The district also has more than 5 per cent of area of the State under wheat, bajri and sesamum. The contribution of the district in the outturn of bajri is more than 10 per cent of the State production. It is more than 15 per cent for groundnut. Wheat and sesamum make more than 5 per cent of the total outturn in Maharashtra.

The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 67 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers working on land to total workers, gross area sown per worker on land and the proportion of gross irrigated

Sakri Taluka ..	200	89·14	4·23	5·76
Dhulia Taluka ..	399	67·27	3·83	7·17

82·52 per cent of the total workers work on land. 46·06 per cent are cultivators and 36·46 per cent are agricultural labourers. The proportion of workers on land is higher than the State average (69·91 per cent). The proportion of workers working as agricultural labourers is also higher than the State average. The gross cropped area sown per worker on land is 3·63 acres against 3·50 acres for the State.

The percentage of workers working on land to the total workers is somewhat even for most of the talukas. It is however very high (95·81 per cent) for Akrani mahal. The proportion is lower than the State average and the lowest in the district for Dhulia taluka because of its large urban population. Gross area sown per worker on land ranges from 1·68 acres in Akkalkuva taluka to 4·80 acres in Sindkhed taluka. The gross area sown per worker on land is larger in Sindkhed, Shahada, Nandurbar, Shirpur, Sakri and Dhulia talukas which have larger proportions of double-cropped areas.

The proportion of net area sown under double crops to the total net area sown in 1959-60 (15·64 per cent) is considerably higher than the average for the State (5·05 per cent). In the year 1950-51 the proportion was only 3·59 per cent and in 1955-56 it was 9·52 per cent. The proportion has gradually increased every year.

The proportions of double-cropped areas to net areas sown are high in the rich soil talukas of Tapi valley, *viz.*, Shahada (31·09 per cent), Shirpur (28·24 per cent) and Nandurbar (20·77 per cent). Sizable proportions also occur in Sakri (16·83 per cent), Dhulia (11·37 per cent) and Sindkhed (11·52 per cent) talukas which have higher proportions of irrigated lands.

The following combinations of different crops are commonly used for double cropping :—

(1) Groundnut, sesamum, mung or udid in kharif season followed by rabi jowar in rabi season in dry lands.

(2) Groundnut, sesamum, mung or udid in kharif season followed by wheat in rabi season in irrigated lands.

Irrigation

The proportion of gross irrigated area to gross cropped area in the year 1959-60 is 4·89 per cent. It is lower than the State average (6·23 per cent).

The proportion of gross irrigated area to gross cropped area within the district varies from 0·20 per cent in Akkalkuva taluka to 7·55 per cent in Nandurbar taluka. The proportions are very low in the hilly tracts of Akkalkuva, Shirpur and Nawapur talukas. The proportions are higher than the State average in Nandurbar (7·55 per cent) and Dhulia (7·17 per cent) talukas only.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation separately for each taluka and the district. Wells are the chief source of irrigation irrigating 58·34 per cent of the net irrigated area in the district. Canals irrigate 38·58 per cent and tanks the remaining 3·08 per cent. Irrigation by Government canals is in Dhulia and Sakri talukas followed by Nandurbar and Shahada talukas. These four talukas together have more than 90 per cent of the area irrigated by canals in the district. Private canals are mainly found in Shahada taluka. Tanks as a source of irrigation are only in Dhulia and Nandurbar talukas. Wells as a source of irrigation are in all the nine talukas in the district. Only Akrani mahal has no area under irrigation. Akkalkuva, Taloda and Shirpur talukas have their lands irrigated entirely by wells.

The net irrigated area increased from 70,400 acres in 1951 to 84,500 acres in 1960 or by 20 per cent in course of nine years at a rate of about 1,550 acres per year. The increase is in areas irrigated by all the sources but the increase in area irrigated by tanks is remarkable.

Another remarkable improvement has been in the number of oil engines and electric pumps used for irrigation. The number of electric pumps increased from 13 in 1951 to 81 in 1961. The number of oil engines increased from 844 in 1951 to 3,826 in 1961.

Crop Pattern under Irrigation

Table 5 in Part III gives the crop pattern under irrigation. In the year 1959-60, 91·13 per cent of the gross irrigated area was occupied by food crops and 8·87 per cent by non-food crops. Among the food crops, wheat covered 36·01 per cent, rice 5·98 per cent, jowar 2·99 per cent, pulses 1·28 per cent, bajri 0·11 per cent, sugarcane 5·34 per cent, condiments and spices (chief of them being chillies) 28·52 per cent and miscellaneous food crops 10·90 per cent. Among the non-food crops, bulk of the area (7·80 per cent) was occupied by fodder crops. Cotton covered another 0·96 per cent and the remaining 0·11 per cent were under groundnuts. Area under irrigated cotton has been gradually increasing since 1957-58. Prior to that irrigation of cotton was almost negligible. This is mainly due to introduction of fast growing staple variety (170-CO-2) of Deviraj cotton.

Local variations in this pattern are seen from taluka to taluka. Area under irrigation is fairly well distributed among the different crops in Sakri taluka. More than half the irrigated area is under wheat in Dhulia taluka. It is also the taluka which has all the irrigated area under cotton in the district. Nandurbar taluka has the largest irrigated area under chillies. In Taloda, Shahada and Sindkhed talukas the irrigated areas are somewhat equally distributed between wheat and chillies. Irrigated areas under non-food crops are mainly observed in Shahada, Sakri and Dhulia talukas.

In the year 1959-60, nearly one-third area under wheat was irrigated.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains and oilseeds between 1951—56 and 1956—60 compares with 1950-51 as follows :—

Crop	Average production in hundred tons per year during		
	1950-51	1951-56	1956-60
Rice	57	95	142
Wheat	329	182	230
Jowar	720	600	1,021
Bajri	398	486	631
Ragi	62	16	41
Other cereals	60	107	105
Total cereals	1,626	1,486	2,170
Total pulses	164	165	230
Total foodgrains	1,790	1,651	2,400
Groundnut	668	401	898
Sesamum	16	25	27

In the First Plan period the production of total foodgrains was lower by 7·77 per cent than the production in 1950-51. During the Second Plan period however it increased by 34·08 per cent over the 1950-51 production. The production of rice increased during both the Plan periods but that of wheat has been reduced. All the cereals together showed an increase in production by 33·46 per cent during the Second Plan period. The production of oilseeds has also increased significantly during the same period.

This comparison with a single year as a base may however not be very reliable as the year itself may be a very good or bad agricultural season. The comparison however gives a rough idea of the improvements in agricultural production during the Plan periods.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the years 1951, 1956 and 1961 are separately shown in Section C of Table 9 in Part III.

The remarkable increase in the number of oil engines and electric pumps used for irrigation purposes has already been described earlier. Between 1951 and 1961, the total number of ploughs increased by 193 (or 0·17 per cent). Wooden ploughs reduced by 4,491 (or 4·27 per cent) but the number of iron ploughs increased by 4,684 (or 53·16 per cent). Iron ploughs appear to be more suitable to the district soil type. The number of sugarcane crushers worked by power was 126 in 1961 as against 122 in 1951. The number of sugarcane crushers worked by bullocks reduced from 156 to 90 from 1951 to 1961. There was a considerable increase in the number of both the types from 1951 to 1956 but due to reduction from 1956 to 1961 both the types decreased from 278 to 216 (or by 22·30 per cent). This may probably be due to setting up of sugar factories in the adjoining Nasik district. The number of tractors went down from 50 in 1951 to 33 in 1956 but improved to 40 in 1961.

By using standard average prices to the agricultural implements shown in Table 9 in Part III, the total outlay on them for the year 1961 may be estimated at Rs. 23·63 lakhs or Rs. 14·28 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 17 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as a Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officer. The latter works as a Secretary to the Taluka Samiti. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are two agricultural research centres carrying out experiments in this district.

The agricultural research station established in 1947 at Dhulia, has an area of 14·20 acres. Research is done here on jowar as principal crop and wheat, udid, kulthi, gram, tur, mung, sesamum and groundnut as subsidiary crops. The Agricultural College Farm at Dhulia has an area of 500 acres which is used for teaching students and also for research work. Experiments are conducted on cotton, jowar, groundnut and bajri as principal crops and irrigated cotton, sugarcane, chillies and vegetables as subsidiary crops.

Agricultural Improvements

(*i*) *Increasing the area under irrigation.*—The most important single item of increasing the agricultural production is enlarging the area under irrigation. Stress is therefore laid on irrigation projects in the five-year plan schemes. In the first five-year plan period, some 43 medium and minor irrigation schemes were undertaken. Of these (1) the Sayyad Nagar Bandhara, (2) Purmepada Bandhara and (3) Extension of Shahada Canal were medium projects. During the first plan period 34 small works irrigating about 7,000 acres were completed. The remaining schemes were carried over to the second plan period in addition to 18 new minor schemes. On completion of all these schemes irrigation facilities are likely to be extended to 5,500 acres.

During the second plan period a medium irrigation project known as Karwand Project was taken up. The project is likely to be completed some time during the third plan period and will raise irrigation potential by 11,200 acres. In the third plan period, the works of Irrigation Tank at Malanjan in Sakri taluka (I.P. 5,158 acres) and Panzara River Project (I.P. 14,000 acres) have been started. It is expected that during the third plan period irrigation potential of about 14,000 acres will be created through the schemes that are being implemented.

Construction of new wells and renovation to the old ones offer the cheapest and quickest means of increasing the irrigational potential. Between 1950-51 and the end of 2nd Plan period the number of irrigation wells has increased by about 2,400 through new constructions and repairs. The Third plan envisages construction of 4,400 new wells and installation of 2,000 pumping sets.

With the increasing facilities for irrigation the question of the full utilisation of created potential is likely to assume importance. The statistics of the *exact* created potential and its current utilisation are, however, not available separately for the district.

(*ii*) *Improved Seeds.*—Another item of improving food production is the recommendation of appropriate varieties or strains of crops suitable for the tract. The Agriculture Department has recommended the following improved varieties or strains of crops for the district :—

(1) Bajri	..	Niphad 28/15.
(2) Wheat (Dry)	..	N. 59, N. 125.
(3) Wheat (Irrigated)		N. P. 710, N. P. 718, N. 345. N. 146.
(4) R. Jowar	..	Maldandi 35-1.
(5) Cotton	..	197/3; 170/CO/2.
(6) Gram	..	Chafa.
(7) Groundnuts	..	Spanish Improved.
(8) Sugarcane	..	CO/419; CO/740.

Seed farms have been established at 9 places in the district to provide improved seed to farmers. The combined area of all the seed farms is 506 acres.

(*iii*) *Soil conservation or bunding.*—During the first and the second plan periods an area of about 24 thousand acres and 1·97 lakh acres respectively has been bunded. The third plan target is 2·60 lakhs acres involving an outlay of Rs. 141·50 lakhs.

Livestock

Table 9 in Part III shows the statistics on livestock for the district and each taluka separately for the years 1951, 1956 and 1961.

There are 948,100 livestock in the district in 1961. That makes 50 livestock per 100 acres of cultivated area in the district. The corresponding figure for Maharashtra is 139.

The total bovine population in the district is 68·27 per cent of the total livestock in the district. The number of male bovines over three years is 270,100. This gives 14·17 acres of cultivated area per pair of male bovines in the district as against 5·48 acres for Maharashtra.

Female bovines over three years in the district are 208,500. Thus there are 154 female bovines over three years per 1,000 population in the district against 159 for Maharashtra.

There was a large-scale reduction in the number of bovines and horses and ponies during the first Plan period which resulted in 6·77 per cent reduction in the total number of livestock. This loss has however been made good completely during 1956—61 with the result that total livestock increased by 2·75 per cent during the decade (1951—61). Considerable decrease is observed in the number of sheep, horses and ponies from 1956—61. The number of other livestock has, however, doubled during the same period. The number of poultry recorded an increase of 38·79 per cent in 1961 over the number in 1951.

Veterinary Facilities

Veterinary dispensaries and veterinary aid centres are located at the following places in the district :—

Veterinary dispensaries: (1) Shirpur, (2) Dhadgaon, (3) Taloda, (4) Nawapur, (5) Shahada, (6) Nandurbar, (7) Sindkhed, (8) Dhulia, (9) Sakri, (10) Akkalkuva, and (11) Padalde.

Veterinary aid centres: (1) Sarangkhed, (2) Vadali, (3) Mhasadi, (4) Mandane, (5) Pimpalner, (6) Nizampur, (7) Khuntamodi, (8) Dahiwel, (9) Hatti, (10) Mandvi, and (11) Khapar.

Treatment of animal diseases, control of epidemics, castration of bovines and control and destruction of animal parasites are the main services rendered at these dispensaries and aid centres.

The breed commonly found in the district is of non-descript type. But Khillar breed is recommended for most of the talukas in the district. Dangi breed is found much suitable in Akrani mahal and in the hilly region of heavy rainfall. There are three supplementary cattle breeding centres in the district to make wide propaganda of Khillar breed under cattle improvement scheme. 461 premium Khillar bulls and 31 Dangi bulls were maintained during the Second Plan period.

AGRARIAN STRUCTURE AND LAND REFORMS

The farming system introduced by the last of the Peshwas was abolished and the system of settling land revenue with individual cultivators was introduced by the British in 1818. This freed the cultivators from the various demands made by revenue officers.

The most predominant tenure prevailing in the district is the Ryotwari tenure of heritable and transferable occupancy rights. With the object of safeguarding the lands of backward classes falling into the hands of *sawkars*, lands granted by Government since 1901 were subjected to certain restrictions regarding transfer or sale and the new occupancy rights were called "new" or "restricted" tenure.

There used to be another tenure of Inam lands which were gifted or granted by the Government for meritorious services in the past or in lieu of or on condition of some continuing service useful to the Government or to the village community. Inam lands were held wholly or partially free of land revenue. There were six classes of Inams in the district:—

	Year of abolition
(i) Political or Saranjam Inams	1952
(ii) Personal Inams	1953
(iii) Hereditary Watan Inams	1951
(iv) Village servants useful to the—	
(*a*) Community	1954
(*b*) Government—Patels	1963
Mahars	1959
(v) Bhil Naik	1955
(vi) Deosthan Inams	..

All Inams, excepting the last category of Deosthan Inams held by religious institutions or for religious services, have now been abolished under various measures of land reform. The year in which each class of Inam was abolished is shown above. All hereditary Watan lands held for village services have also been abolished and occupancy rights of abolished Inam lands have been conferred on their holders or tenants, as the case may be, on conditions of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Record of Rights

A Record of Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up-to-date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the record of rights.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force since 1948. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "Land to the tiller" policy, the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957 which is known as the "Tillers' Day". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 30th September 1963, ownership rights have been conferred upon 9,594 tenants for 85,989 acres of land in the district. Out of these, 4,769 tenants had mutually agreed with the landholders of 32,506 acres on the price to be paid by them. In the remaining cases, the prices were fixed by the Revenue Officers.

Size of Landholdings

Census Table B-X (based on 20 per cent Sample) in Part II of this Volume shows that 53·05 per cent of the total number of households cultivate land and the remaining 46·95 per cent do not cultivate any land.

Census Table B-XI (based on 20 per cent Sample) in Part II shows the break-up of cultivating households by size of land cultivated and by interest in the land. 86·75 per cent of the cultivating households cultivate their owned lands only. 4·55 per cent of the households cultivate tenanted lands only and the remaining 8·70 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown below.

The distribution of households in Table B-XI and the same shown in percentages in column 2 below, is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of these ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre ..	0·60	2·82
1·0 to 4·9 acres ..	18·97	22·65
5·0 to 9·9 acres ..	27·84	24·86
10·0 to 14·9 acres ..	17·45	17·17
15·0 to 29·9 acres ..	25·19	21·97
30·0 to 49·9 acres ..	7·44	7·26
50+ acres ..	2·51	3·27
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 13 acres. Average size of the ownership holding in the district was 15 acres in 1952-53 against the average of 12 acres for the State.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Four local areas, *viz.*, Shahada, Dhulia, Nandurbar and Akrani have been notified in the district with different ceiling areas for dry crop land, *viz.*, 78, 84, 114 and 96 acres, respectively. In the case of irrigated lands, the ceiling area is the same in all the four local areas, *viz.*, 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons, and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1948 and work of consolidation of holdings was started in Dhulia taluka in 1948, in Sindkhed taluka in 1954, in Sakri taluka in 1960 and in Shahada taluka in 1962. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to end of March 1963, the number of villages and areas for which the work has been completed are as follows :—

	Number of villages	Area consolidated in acres	Holdings involved
Dhulia Taluka ..	128	304,815	50,644
Sindkhed Taluka ..	69	90,832	28,840
Sakri Taluka ..	28	46,009	12,764
Shahada Taluka ..	1	616	2,797
Total ..	226	442,272	95,045

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

(i) Dry crop land .. .. .. 1·0 acre.
(ii) Bagait land .. .. .. 0·5 acre.
(iii) Rice land .. .. .. 0·5 acre.

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative movement was initiated in the district before 1920. But it gained real momentum only during the First and Second Plan periods. Concentrated efforts during the last ten years have resulted in a very rapid progress of the co-operative movement which, in addition to a great expansion in the field of agricultural credit, now extends to farming, marketing, housing, fisheries, dairy farming, electric power supply, etc.

The following description is based on the Report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The number and membership of Agricultural Credit Societies have increased at a very rapid pace during the last decade especially during the Second Plan period.

The position of Agricultural Credit Societies in 1950-51 and 1960-61 is as under :—

	1950-51	1960-61
(1) Number of Agricultural Credit Societies	525	740
(2) Number of members	29,304	85,230
(3) Share capital .. (Rs. in lakhs)	12·61	79·92
(4) Reserve and other funds (Rs. in lakhs)	16·96	31·11
(5) Working capital .. (Rs. in lakhs)	71·23	312·91
(6) Number of members to whom loan was advanced		57,547
(7) Amount advanced .. (Rs. in lakhs)	65·49	260·06
(8) Amount recovered .. (Rs. in lakhs)	52·92	191·91
(9) Loans outstanding .. (Rs. in lakhs)	59·58	257·93
(10) Overdues .. .. (Rs. in lakhs)	3·62	34·84

Average membership per primary society in the district is 115 against the average of 96 members for Maharashtra. All the villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 111·03 lakhs and formed 35·48 per cent of their working capital against 26 per cent for Maharashtra.

The loans advanced by all Primary Agricultural Societies in the district amounted to Rs. 260·06 lakhs in 1960-61, or about four times the figure in 1950-51. The average amount of loan per borrowing member in the district worked out to Rs. 452 as against Rs. 329 for Maharashtra.

The increase of 40·95 per cent in the number of societies, 190·85 per cent in the membership, 275·48 per cent in the owned funds and 297·10 per cent in the amount of loans advanced indicate the magnitude of expansion of the Agricultural Co-operative Credit in the district during the last decade. The proportion of overdues to the outstanding loans has, however, gone up from 6·08 per cent in 1950-51 to 13·51 per cent in 1960-61 and points out the need for improving recoveries.

(*b*) *Central Co-operative Bank.*—The Central Co-operative Bank at the district headquarters was established in 1957 and has been working as a federal central financing agency catering for the requirements of all the Primary Credit Societies in the district. Since 1962, the Zilla Parishad also transacts its financial business through this Bank.

In the year 1960-61 the position of the Central Co-operative Bank was as follows :—

(1) Number of members—	
(*a*) Individuals	366
(*b*) Societies	851
(2) Paid up share capital .. .. (Rs. in lakhs)	33·21
(3) Reserve and other funds .. .. (Rs. in lakhs)	0·77
(4) Deposits—	
(*a*) Individuals .. .. (Rs. in lakhs)	99·84
(*b*) Societies and Banks .. (Rs. in lakhs)	51·59
(5) Borrowings—	
(*a*) State Co-operative Bank and the Reserve Bank of India .. .. (Rs. in lakhs)	156·61
(*b*) Government .. .. (Rs. in lakhs)	4·67
(*c*) Other sources .. .. (Rs. in lakhs)	7·09
(6) Working capital .. .. (Rs. in lakhs)	353·78
(7) Cash—	
(*a*) on hand .. .. (Rs. in lakhs)	9·01
(*b*) at bank .. .. (Rs. in lakhs)	18·64
(8) Investment—	
(*a*) Government and other Trustee securities (Rs. in lakhs)	14·26
(9) Percentage of cash in hand to deposits	5·95
(10) Percentage of investment to deposits	9·41
(11) Loans outstanding—	
(*a*) Individuals .. .. (Rs. in lakhs)	1·79
(*b*) Societies .. .. (Rs. in lakhs)	211·25
(12) Percentage of loans outstanding to deposits ..	140·69
(13) Percentage of loans outstanding to working capital	60·22
(14) Overdues .. .. (Rs. in lakhs)	237
(15) Percentage of overdues to loans outstanding ..	1·11
(16) Cost of management .. .. (Rs. in lakhs)	3·65
(17) Percentage of cost of management to working capital	1·03
(18) Profit .. .. .. (Rs. in lakhs)	2·36
(19) Number of branches and pay offices in the district	22

During the year 1960-61, the individual membership has almost doubled, the owned funds have increased by 44·47 per cent and the deposits by Rs. 25·89 lakhs. The individual deposits have increased by Rs. 14·99 lakhs, during the same year. The Bank has opened six new branches in 1960-61 and has made a profit of Rs. 2·36 lakhs as against its profit of Rs. 1·58 lakhs in the previous year. The proportion of overdues to the outstanding loans which was already low (1·86 per cent) has come down to 1·11 per cent in 1960-61.

(*c*) *Land Mortgage Bank.*—The Primary Land Mortgage Bank was established at Dhulia in the year 1939 with a view to provide long term finance to the cultivators. The number of members of the Land Mortgage Bank is 29,074, share capital is Rs. 4·51 lakhs and working capital is Rs. 77·12 lakhs. In 1960-61 the Bank advanced loan of Rs. 37·03 lakhs. The outstanding amount at the end of year was Rs. 78·12 lakhs.

(*d*) *Urban Banks and Credit Societies.*—There are 30 Urban Banks and Credit Societies. Seven are Urban Banks, 5 Urban Credit Societies, 17 Salary Earners' Societies and 1 Millhands' Society. These societies together advanced an amount of Rs. 70·64 lakhs during the year 1960-61 to 6,591 members. Twenty-four of these societies made a profit of Rs. 80,000, five suffered a loss of Rs. 6,000 and one showed neither loss nor profit.

Agricultural Processing Societies

The Co-operative Cotton Ginning and Pressing Society was established at Shirpur in October 1958. This co-operative society has a membership of 53 societies and a share capital of Rs. 1·5 lakhs. Government has also contributed Rs. 50,000 towards its share capital. The society has yet to start production. There are two Gur-Khandsari Co-operative Societies in the district. Their membership consists of 111 societies and 102 individuals and their share capital is of Rs. 4·21 lakhs, out of which Government contribution is Rs. 81,000. The societies have produced 8,864 Bengal maunds of Khandsari and Gur. They suffered a loss of Rs. 26,000 during the year.

The Shahada Taluka Purchase and Sales Co-operative Society also runs a cotton ginning and pressing factory. In 1959-60 the factory ginned 160 cwts. of cotton.

Industrial Societies

There are 27 Weavers' Co-operative Societies and 64 other industrial societies. Out of the 27 weavers' societies, 18 are handloom weavers' societies, 2 wool weavers, 4 khadi weavers and 3 powerloom weavers' societies. Their combined membership is 2,439, share capital Rs. 80,000 and working capital Rs. 4·24 lakhs. The societies produced goods worth Rs. 14·11 lakhs during the year. The handloom weavers' societies are given financial assistance by way of rebate on sale of handloom cloth, management grants to sale depots, etc.

The other types of industrial societies include 1 oil ghani, 3 cane and bamboo works, 4 tanning works, 3 leather works, 7 carpentry and smithy, 4 metal working, 3 pottery works, 4 electric power supply societies, etc. Out of the 5 co-operative electric power supply societies in the State, 4 have been organised in this district alone. They are at Dondaicha, Nardhana, Shahada and Taloda. The Co-operative Electric Supply Society at Dondaicha has already started distribution of electric power. The combined membership of these industrial societies is 3,400 members, share capital Rs. 3·84 lakhs and working capital Rs. 9·53 lakhs.

Forest Labourers' and Labour Contract Societies

There are 56 Forest Labourers' Co-operative Societies and 13 Labour Contract Co-operative Societies in the district with membership of 6,281 and 381, respectively. Their paid-up share capital is Rs. 2·09 lakhs and Rs. 19,000 and working capital is Rs. 5·11 lakhs and Rs. 77,000 respectively. The forest labourers' societies received Rs. 6,000 as loans and Rs. 23,000 as subsidy from the Government. The labour contract societies received a loan of Rs. 12,000 and subsidy of Rs. 4,000 and executed labour contracts worth Rs. 8,000 during the year.

Co-operative Farming Societies

There are 16 Collective Farming, 9 Joint Farming, 1 Tenant Farming, 1 Better Farming and 28 Gram Swarajya Co-operative Societies organised in the district. Two Collective Farming, 4 Joint Farming and 15 Gram Swarajya Societies have been organised in 1960-61. The other Gram Swarajya Societies have also been organised very recently and have yet to acquire land.

Members of 7 co-operative farming societies have brought 1,140 acres of their owned land under the command of societies.

The collective farming societies have 332 members, a share capital of Rs. 58,000 and a working capital of Rs. 1·29 lakhs. The societies have 4,098 acres of area under command of which 3,137 acres are cultivated during the year.

The joint farming societies have 121 members of which 104 are landholders. Their share capital is Rs. 1·03 lakhs and working capital is Rs. 2·53 lakhs. The societies cultivated 962 acres out of 1,451 acres under their command.

The Better Farming Society having membership of 39 landholders has brought about improvement in the 132 acres of cultivated area under its command.

The Government has contributed Rs. 2·61 lakhs as loans and subsidies to enable these societies to bring out all-round development in cultivation. One of these societies has been organised at Pankhede in Sakri taluka by members belonging to the Scheduled Tribes.

Crop Protection Societies

Fifty-four Crop Protection Co-operative Societies have been organised in the district. These societies are doing very good work of protecting the crops from damage by wild animals, livestock and from thefts. Some of these societies have been granted licences for maintaining firearms. These societies together cover more than 1·25 lakh acres.

Lift Irrigation Societies

There are 13 Co-operative Lift Irrigation Societies in the district. The society at Brahmanpuri has a flow irrigation scheme and has built a *bandhara* across the river and irrigated 400 acres of area. Four out of the 10 other schemes are on rivers, 1 on a nallah and others on wells.

The combined membership of the societies is 483, share capital Rs. 2·11 lakhs and working capital Rs. 8·22 lakhs. The societies together irrigated 1,994 acres during the year out of 5,815 acres of area commanded.

Dairy Societies

Two milk supply unions have been organised one each in Dhulia and Shahada talukas. Their combined membership is 29 societies and 46 individuals, share capital Rs. 6,000 and working capital Rs. 41,000. The unions sold milk worth Rs. 5,000 and milk products worth Rs. 3,000 during the year. One of the unions made a profit of Rs. 1,000 while the other suffered a loss of Rs. 4,000 during the year.

These unions have 29 feeder milk supply societies in the district. They have 908 members and Rs. 29,000 as working capital. The sales value of milk by the societies during the year was Rs. 8,000. 10 of these societies made a profit of Rs. 2,000, 14 suffered a loss of Rs. 2,000 and 5 others showed neither loss nor profit.

Fishery Societies

There are two Co-operative Fishery Societies in the district, one of which has yet to start functioning. Their total membership is 174 and working capital is Rs. 2,000. The society has been granted loan of Rs. 5,000 by Government. Fishing rights in three tanks in the district have been granted to them. Fish worth Rs. 5,000 was caught by the society. The society made a profit of Rs. 1,000 during the year.

Purchase and Sales Societies and Unions

The Central Agricultural Marketing Society for the district was organised at Dhulia in September 1959. The membership of the central society is 140 societies and share capital Rs. 77,000 of which Government's contribution is Rs. 25,000. The District Central Marketing Society is in charge of distribution of certain agricultural commodities in the district. During the year agricultural requirements worth Rs. 13·39 lakhs were distributed by the society. The society also earned Rs. 31,000 by way of commission and Rs. 13,000 as profit during the year.

There are 12 Primary Agricultural Marketing Societies at different places. These societies cover all the regulated *mandies* in the district. Their combined membership is 634 societies and 3,809 individuals and they have a share capital of Rs. 6·76 lakhs. Government has contributed Rs. 3·11 lakhs towards their share capital. The purchases of these societies amounted to Rs. 84·73 lakhs and sales to Rs. 233·91 lakhs. They earned Rs. 1·95 lakhs by way of commission and distributed agricultural requirements worth Rs. 39·25 lakhs during the year. Seven of the societies made a profit of Rs. 1·33 lakhs, two suffered a loss of Rs. 3,000 while the other three showed neither profit nor loss. The societies own 14 godowns and have hired 26 godowns at important market places. The Maharashtra State Warehousing Corporation has also built godowns at Dhulia, Dondaicha, Nandurbar and Shirpur.

Consumers' Movement

There are 14 Consumers' Stores having six branches. Their combined membership is 1,442, paid-up share capital Rs. 1·04 lakhs and working

capital Rs. 2·22 lakhs. During the year they purchased consumers' goods worth Rs. 11·59 lakhs. The sales during the same period amounted to Rs. 11·77 lakhs. Nine stores made a profit of Rs. 29,000, three suffered loss of Rs. 2,000 and two others neither showed loss nor any profit.

Housing Societies

There are 45 Primary Housing Co-operatives in the district out of which 27 are for Backward Classes. The combined membership of these societies is 2,322, share capital Rs. 3·66 lakhs and working capital Rs. 7·54 lakhs. The societies have built 54 independent houses and 120 tenements during the year. The societies also advanced Rs. 3,000 as loan to members during the year for construction.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

	No. of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Bank.	1	..	..	..	..	..	1
(2) Agricultural Credit Societies.	304	330	53	5	..	48	740
(3) Non-agricultural Credit Societies.	11	10	4	1	..	..	26
(4) Primary Land Mortgage Bank.	..	1	..	..	..	..	1

FORESTS

The forests in the district cover an area of 1,564·72 square miles, of which 1,441·72 square miles are in charge of the Forest Department and 123·00 square miles in charge of the Revenue Department. The forest area makes 32·26 per cent of the total geographical area as against 17·56 per cent for Maharashtra.

The entire forest in charge of the Forest Department is reserved forest and is one of the valuable forests in the State. For administrative purposes, the reserved forest is divided into two divisions : (i) the North Dhulia Division comprising of forests in Shirpur, Akkalkuva and Shahada talukas and the Akrani mahal, and (ii) the West Dhulia Division consisting of forests in Taloda, Nawapur, Nandurbar and Sakri talukas. The Divisional Forest Officers of both the divisions have headquarters at Dhulia and work under the Conservator of Forests, Nasik Circle. The divisions are further divided in 12 Ranges. The forests in charge of the Revenue Department are administered by the Collector of the district.

The forests are mainly situated on the sloping hills of Sahyadri and Satpuda ranges. They are also situated on the plateaus in Shahada, Shirpur, Akkalkuva, Nawapur, Nandurbar, Sakri and Taloda talukas and Akrani mahal. The forest in the district is classified as of "Mixed Deciduous" type.

The forests in the district are commercially very important. The most valuable species found is Teak. It is associated with Khair, Palas, Sadada, Shisam, Tiwas, Haldu, Kalam, Ain, Biya, Dhavada, Shaman, Sala, Bor, Hiver, Anjan, etc.

The other commercially important associates found in the forests are : (1) Tendu and Apta leaves useful in Bidi Industry, (2) Mohwa flowers and fruits, (3) Kadai for Gum, (4) Palas for propagation of Lac and (5) Khair for manufacture of Kath, etc. Bamboo is also found on a large scale. The forests have a number of Charoli trees, which produce valuable dry fruits. Besides timber and other products, fodder and thatching grasses are available in large quantities for grazing of cattle and are an important source of revenue. The Rosha grass which is found in large areas of Akrani mahal is used for producing scented oil and has a great demand from outside the country.

Most of the forests are now exploited through the agency of Forest Labourers' Co-operative Societies. The forest produce of West Dhulia Division is transported by bullock carts to Nawapur, Khandbara and Nandurbar and the produce of North Dhulia Division is carried to Dondaicha, Shahada, Taloda, Shirpur and Sangvi market places. From these places it is further carried to Bombay, Surat, Ahmedabad, Jalgaon, etc., by rail and trucks. The important centres for collecting forest produce are Nawapur, Khandbara, Nandurbar, Shahada, Sangvi, Taloda and Dhadgaon. Forest produce worth about Rs. 20·5 lakhs is exploited annually from the forests in the district.

According to the 1961 Census, 1,647 persons are working in forestry and logging. Their distribution for industry minor groups is shown in Table B-IV-C in Part II.

The exploitation of the forest is regulated by systematically chalked out schemes. In the North Dhulia Division, three different working plans are in operation : (1) Satpuda Working Plan, (2) Taloda Reserved Forests Working Plan and (3) Interim Working Scheme for Akrani mahal. Under these plans plantations are undertaken in clear-felled areas and also in arid and blank areas. In the South Dhulia Division, three working circles, *viz.*, Teak Timber, Teak Pole and Fuel Working Circles are formed in

the zone consisting of semi-deciduous species. In the Teak Timber Working Circle, selection system on a 20-year felling cycle is adopted. In the Teak Pole and Fuel Working Circles a felling cycle of 40 years is prescribed. In the other zone comprising of thorny shrub or open grassy lands interspersed with stunted Khair or Palas, the principle adopted is rotational grazing during monsoon months with limited cattle admitted to graze.

A number of schemes have been included in the Five-Year Plans for the development of the forests. During the first two Five-Year Plans, plantation of teak was raised in 1,279 acres, of matchwood in 1,167·5 acres, and of cashewnut trees in 170 acres. Afforestation of arid and blank areas was done in 2,450·60 acres. Agave plantation was raised over a length of 201 miles and that of bamboo over an area of 10 acres. During the two Plan periods 10 wet nurseries were raised.

The following schemes are in progress in the Third-Five-Year Plan :—

(1) *Plantation of Valuable Trees.*—Planting of Teak and Eucalyptus trees in 375 acres involving an outlay of Rs. 0·42 lakhs. Plantation of Teak trees has already been carried out in 125 acres during 1961-62.

(2) *Afforestation for Soil Conservation.*—4,100 acres are to be afforested at an outlay of Rs. 3 lakhs. During 1961-62, 1,100 acres are already afforested.

(3) *Development of Forest Pastures.*—Plantation to be carried out in 1,200 acres. Fencing to be made over three miles. Plantation of 1,553 acres for rotational grazing. The total outlay sanctioned is Rs. 1·73 lakhs. During 1961-62 plantation has been undertaken in 500 acres and an area of 1,303 acres is planted with seeds of various species of grass and fodder.

(4) *Bamboo and Agave Plantation.*—Physical and financial target is not available. During 1961-62 an area of 152 acres has been planted with Bamboo.

(5) *Establishment of Fodder Bank.*—During 1961-62 plantation in 2,000 acres is undertaken with valuable grass species, under the scheme, with the output of 265,765 kgs. The main intention of the scheme is to have a stock of grass which is used in scarcity period.

Besides the varied and valuable flora, the district forests are bestowed with reputed fauna. The important denizens found are : Tiger, Panther, Bear, Sambhar, Deer.

FISHERIES

Fishing activities in the district are naturally restricted to inland waters only, rivers, tanks and ponds being the chief sources. The total length of perennial rivers in the district is about 770 kms. There are 13 tanks which together provide about 2,000 acres of water-spread area, which is rather inadequate for any large-scale development of fishing industry.

The commercially important varieties of fish found in the district are Kirkit or Shinghala, Murrel, Shivda (Pahadi or Daku), Chamar or Chalat, Pal or Dandaonya, Khavlya, Khaval, Kolshi, Zinga, Boi, Kalunder, Kharbi and Muri.

These varieties are however of not fast-growing type. As such, under Five-Year Plan schemes, quick-growing "Bengal Carps" are stocked annually in the perennial water tanks. The varieties stocked are Catla-Catla, Rohu and Mrigal. During the first two years of the Third-Five Year Plan 0·59 lakhs of Carp Fry was stocked in the perennial tanks.

411 persons are, according to the 1961 Census, engaged in fishing as principal work. 352 of them are males and 59 females. Fishermen in the district belong to the community known as Bhoi. Some of the persons from Bhil and Adiwasi communities also take to fishing. Since fishing industry has a limited scope, some of the fishermen work in agriculture. Water-melon cultivation is one of the most important occupations of fishermen in this district. Fishing is generally done with the help of Gill nets known as Tangad, Cast nets called Sikadi, Drag nets or Pandhi, Bag nets (Tol) and Chela nets or Tangadi. The nets are mostly made of cotton twine but these days nylon is also effectively used. Under the fishery requisites scheme financial assistance in form of subsidy is given for purchase of nylon and cotton twine.

Two co-operative societies of fishermen are functioning in the district in 1960-61. The co-operative societies are given financial assistance in form of loans and subsidy. They are also helped to secure tanks and ponds for purposes of pisciculture.

MINING AND QUARRYING

Most of the district is covered by Deccan Trap, and a small portion by recent deposits of Pleistocene. Mineral deposits of any kind have not been reported anywhere in the district. Mining activities in the district are therefore restricted to quarrying of stones, clay, etc.

In 1961 Census, 561 persons are reported as working on quarrying of stones, etc. ; 347 of them are males and 214 are females.

INDUSTRIES

So far as large-scale organised industries are concerned the district has remained much behind due to inadequate electric power supply and transport facilities. The principal large-scale industry is the only one textile mill. There are in addition a number of small-scale units like ginning and pressing factories, oil mills, bidi-making factories, etc. However, the employment in non-agricultural sector leans heavily towards village and cottage industries, i.e., the village artisans working on traditional lines with locally available raw materials or for local demand. Further industrial development is possible in the near future when power is supplied from the Paras Thermal Station.

There are in all 38,106 workers engaged in industries, 22,568 or 59·22 per cent of them are in household industries and 15,538 or 40·78 per cent in non-household industries. The total number of workers in the registered factories in 1961 is 8,775 which makes 23 per cent of all workers engaged in industries or only six factory workers per thousand of total population against 20 per thousand of total population of Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from the houselists are also shown separately, for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

Of the main industries, the only large-scale registered unit is the cotton textile mill at Dhulia. This unit has 1,040 looms and 49,148 spindles, and employs about 2,000 workers.

Apart from this, there are a number of registered factories like cotton ginning and pressing, manufacture of edible oils, bidi-making, repairs to motor vehicles and leather works and bone mills which employ 50 or more workers daily on an average.

A new industry licensed in the district is the paper and strawboard factory at Nandurbar having a capacity of 185 tons per month.

Small-scale Registered Factories

In the year 1960 there were 27 oil mills in the district, 38 cotton ginning and pressing units, 62 units engaged in gur making, 10 units in bidi-making and 7 in dal making, etc. All these manufacturing industries employed about 7,000 workers.

The total number of registered factories has increased from 140 in 1951 to 178 in 1961. The number of workers in the registered factories has, however, very slightly increased from 8,451 in 1951 to 8,775 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 60·7 lakhs and working capital of Rs. 59·3 lakhs. The total value of annual production was Rs. 292·7 lakhs and the value added by manufacturing was Rs. 43·0 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacturing in the district in 1959 is only 0·21 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

In the cottage and small-scale industries sector, handloom, powerloom, dyeing and printing, blacksmithy, carpentry, cane and allied products, brick and tile manufacture and soap-making are some of the important industries. Some of these manufacturing industries are traditional crafts conducted on household and cottage industries scale.

Production and rearing of livestock engage the largest number of persons, *viz.*, 7,672 in the district. The number of persons engaged exclusively in the rearing of sheep and production of wool is 1,205.

4,481 persons are engaged in the manufacture of miscellaneous textiles. Out of them 4,293 are engaged in the making of textile garments. They are the tailors engaged in making garments for men and women.

4,094 workers are engaged in cotton weaving in handlooms. The main centres are Dhulia, Nandurbar and Shahada. At the end of May 1961, there were about 3,376 handlooms (cotton) in the district.

3,018 persons work in cotton spinning and weaving in mills.

There are 627 flour or rice mills engaging 1,144 workers.

6,424 workers are engaged in manufacture of wood and wooden products. 2,261 persons out of them are engaged in the manufacture of material from bamboo and cane and 2,255 persons are engaged in manufacture of wooden furnitures, fixtures, etc. These are mostly carpenters who manufacture, fix or repair doors and door-frames, wooden roof beams, furniture and agricultural implements.

Cart-making is also a prosperous industry in the district due to the availability of cheap and good wood and its centres are Dondaicha, Taloda, Nawapur and Dhulia. In all 417 persons are engaged in this industry. Taloda carpenters are known for their carts.

The proportion of different groups of artisans to one lakh of total population in the district are as follows :—

Blacksmiths 93, Carpenters 195, Shoe-makers 130, Potters 118, Tailors and Dress-makers 285, Spinners and Weavers 305, Basket Weavers 135.

The Industries Department has started three peripatetic basic training schools which impart training to artisans in wood turning and lacquer work, wool weaving, tailoring, carpentry, etc. In addition there are 3 schools run by each Development Block.

According to the "Master Plan" published by the Industries Department of the erstwhile Government of Bombay, there is a scope for the establishment of the following new industries in the district :—

(1) Solvent Extraction of Oil-cake at Dhulia and Nandurbar;
(2) Solvent Extraction of Cotton seed at Dhulia and Nandurbar;
(3) Cotton linters and Chemical pulp;
(4) Boards from sawdust and other wood work at Nandurbar;
(5) Khandsari sugar in Sakri and Shahada talukas;
(6) Carbonisation of wood at Nawapur;
(7) Wood seasoning at Nandurbar and Nawapur; and
(8) Engineering workshop and foundries at Dhulia.

It is also proposed to set up an industrial estate on co-operative lines in the Third Five-Year Plan at Dhulia.

POWER

The number of electrified towns and villages in the district is five. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 13·23 per cent of the total population of the district.

The district consumption of electricity on different items for seven years is shown in Table 30 in Part III.

The *per capita* consumption is naturally very much lower than the State average, as only five towns and villages in this district had been electrified.

The district gets its electricity through private agencies through diesel generating stations. Out of the five places electrified in the district four are towns and one is a village. The electricity is mostly utilised for domestic and industrial purposes. Four co-operative societies for the supply of electricity have been organised in the district in 1961. They are at Dondaicha, Shahada, Taloda and Nardhane. The society at Dondaicha is already generating 250 KWH of electricity and started its distribution. Power is also likely to be supplied from the Paras Thermal Station in the near future.

TRADE AND COMMERCE

The chief exports of the district are cotton, groundnut, chillies, oilseeds, "charoli" seed, myrobalans, "Mohwa" flowers, timber, grains, honey, wax, lac, cattle hides, skin, horns, ghee, etc. Groundnuts, cotton and chillies are the major crops which are largely exported to Bombay and Gujarat. "Charoli" the seed of "Char" used in making sweetmeats is largely exported from Akrani mahal to Bombay and Gujarat. The seeds are gathered by the Bhils of Satpuda range where these trees are in abundance. Salt, coconuts, groceries, oil, hardware, machinery, piece-goods are the principal articles of import. Most of the supply comes from Bombay by rail. Agriculturists themselves bring their produce for sale to the markets. Some of the articles are brought from villages, through commission agents or the agents themselves go to the villages and purchase the produce from the producers. The distribution of goods beyond the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of the week.

Shops

Almost every village has one or more shops except the smallest. These shops provide the inhabitants with their day-to-day requirements. They deal in all kinds of grains, salt, groceries, oils, gur, spices, coconuts, soap, tobacco, betelnuts, chillies and innumerable articles required by people for their daily use. There are in all 6,726 shops in the district. 3,662 are in rural areas and 3,064 in the urban areas. This does not include the shops temporarily set up in the weekly markets or fairs. The number of shops per 1,000 dwellings is 28·6 for the district as a whole, 17·7 for rural areas and 79·3 for urban areas. It will be seen that the urban areas have about four times more shops per 1,000 dwellings than rural areas. The ratio between shops and 1,000 dwellings for the district is less than the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets are popularly known as "bazars" and are distributing rather than collecting centres. They are the towns which are next to trading centres. At these towns on a fixed day in the week a market is held where, besides permanent staff of traders and shop-keepers, pedlars, hawkers and agents for some of the larger dealers set up booths and offer for sale all sorts of articles like foodgrains, pulses, oils, chillies, spices, tobacco, gur, cloth, fruits, vegetables, earthen pottery, etc. Separate bazars are also held for livestock, ponies, cattle and sheep. Agriculturists from nearby villages also bring their farm produce. The booths are generally set up at an early hour and the market is thronged by people from the villages around and after a slack hour or two in the heat of the day, it again fills towards the evening. When the day is over, the sellers pack what remains and move to the next convenient market centre. Buyers at these markets come from nearby villages within four to five miles.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and, if so, on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 243 shows the location of all these markets and also the day on which they are held.

There are altogether 65 weekly markets in the district. Out of these ten are also cattle markets. Seven weekly markets are held on Sunday, 11 on Monday, 10 on Tuesday, 7 on Wednesday, 8 on Thursday, 11 on Friday and 11 on Saturday.

The map facing page 243 will show that four or five markets cluster as satellites around a central village. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

So far as trade is concerned, fairs are complementary to weekly markets. These are generally well-known places where fairs are held at intervals. They are attended by unusually large numbers and considerable quantity of agricultural produce and other articles of daily use are brought for sale. A list of fairs held in the district showing their locations, duration and dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 244 shows the location of all the fairs in the district having 1,000 or more gatherings. A volume giving details regarding fairs and festivals in Maharashtra is also issued separately.

Trade Centres

Apart from the weekly markets and fairs, there are 8 principal markets and 15 sub-markets which are wholesale trade centres in the district, as far as collection and export of agricultural produce are concerned. All these markets are regulated under the Bombay Agricultural Produce Markets Act, 1939. A list of the principal market yards and their sub-markets is given below :—

Principal market yards	Sub-markets
(1) Dhulia ..	1. Shirud.
(2) Dondaicha ..	1. Sindkhed. 2. Nardhane. 3. Betawad.
(3) Nandurbar ..	1. Dhanora.
(4) Shirpur ..	..
(5) Shahada ..	1. Prakasha. 2. Mandane. 3. Sarangkhede.
(6) Taloda	1. Akkalkuva. 2. Sorapada. 3. Khapar.
(7) Nawapur ..	1. Khandbara. 2. Visarwadi. 3. Chinchpada. 4. Dhanrat.
(8) Sakri ..	..

The regulation of trade in cattle was first introduced in the country at Shahada in this district. During the year 1958-59 the total value of transactions in cattle amounted to Rs. 124·14 lakhs.

The figures of value of arrivals of certain important commodities in some of the principal market centres in the district for the year 1959-60 are given below :—

	Value of arrivals (in lakh Rs.) at					
	Dhulia	Dondai-cha	Shirpur	Shahada	Nandur-bar	Nawapur
Cotton	110·11	27·55	27·25	5·35	22·96	22·24
Groundnut	169·47	70·23	25·36	9·92	106·46	0·53
Mung	4·52	9·89	14·92	1·23	6·13	..
Sesamum	8·84	4·99	4·04	0·22	0·78	0·03
Gram	4·02	2·21	2·00	0·43	3·76	0·75
Wheat	20·60	13·10	3·58	3·36	22·13	0·25
Jowar	16·79	1·49	25·53	3·87	2·54	1·51
Bajri	10·56	1·31	0·54	0·14	0·61	..
Gur	22·26	4·46	..	..	8·91	..
Chillies	11·65	50·74	..	..	82·33	..
Tur	..	2·44	0·43	0·99	20·45	5·64
Others	9·33	14·95	2·46	1·80	38·56	4·82
Total ..	388·15	203·36	106·11	27·31	315·62	35·77

In order to provide facilities to the producers for storage of agricultural produce and to make available a cheap source of credit to them with a view to avoiding distress sales, warehouses have been established at Dhulia, Nandurbar and Dondaicha. In addition, warehousing facilities are offered by marketing committees at their respective market yards. The Market Committees of Dhulia, Dondaicha, Nandurbar, Shirpur and Shahada have their own market yards and buildings.

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district in 1961 is 19,936, out of which 8,252 or 41 per cent are in rural and 11,684 or 59 per cent in urban areas. The number of workers in trade and commerce makes 3·12 per cent of all the workers in the district. About 30 per cent of the district total is in Dhulia taluka only.

Only 9·31 per cent of the workers in trade and commerce are engaged in wholesale trade, 88·32 per cent in retail trade and 2·37 per cent in miscellaneous trade and commerce. Eighty-eight per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is 462. Mostly the wholesale trade of cereals and pulses appears to be combined with wholesale trade of gur, sugar, spices, groundnuts, oil, tobacco, etc., as the number for this combined group is 461 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown below :—

	Number of Banking Offices		
	Scheduled	Co-operative	Total
DISTRICT TOTAL ..	10	19	29
(1) Akrani Mahal ..	..	1	1
(2) Akkalkuva Taluka ..	..	1	1
(3) Taloda Taluka ..	..	1	1
(4) Shahada Taluka ..	1	1	2
(5) Nandurbar Taluka ..	3	1	4
(6) Shirpur Taluka ..	1	2	3
(7) Sindkhed Taluka ..	1	3	4
(8) Nawapur Taluka ..	..	2	2
(9) Sakri Taluka	..	2	2
(10) Dhulia Taluka ..	4	5	9

The district appears to be leading in co-operative banking, as about 66 per cent of the banks are running under co-operative fold. Dhulia taluka with nine banking offices is leading in banking activities in the district. Every taluka has at least one branch of the Central Co-operative Bank.

The State Bank of India works for the treasury in the district and has branches at Shahada, Nandurbar, Shirpur, Dondaicha and Dhulia.

COMMUNICATIONS AND TRANSPORT

The Bhusawal-Surat line of the Tapi Valley of the Western Railway passes through the central part of the district. It is a broad gauge line and has a mileage of about 95 miles and 15 stations in the district. This line is wholly to the south of the river Tapi and mainly serves the central part of the district, i.e., Nawapur, Nandurbar and Sindkhed talukas. Another small section of Chalisgaon-Dhulia broad gauge line of about 20 miles of Central Railway enters from the south-east and terminates at Dhulia. This line passes through Dhulia taluka and has three stations.

Existing railway mileage in the district is 2·36 miles per 100 square miles of area against the average of 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all those roads.

The district is well connected by roads with the adjoining districts of Nasik and Jalgaon, and the adjoining States of Gujarat and Madhya Pradesh. Akkalkuva taluka and Akrani mahal are completely mountainous with sparsely populated and scattered villages. There are no roads in this region. The adjoining Broach district of Gujarat State is, therefore, not accessible from that side of the district. Due to the existence of Satpuda ranges and Sahyadris, the roads are very few towards the north and the west. The district headquarters is, however, well connected by roads with all the taluka headquarters excepting Dhadgaon in Akrani mahal.

The Bombay-Agra National Highway passes through the district for 74 miles. Dhulia-Nagpur National Highway also passes through the district for 12 miles.

During the period 1951—1961, there was no change in the mileage of National Highways. The State Highways, however, increased by 35·74 miles, major district roads by 57·29 miles, other district roads by 181·42 miles and village roads by 324·02 miles. The total increase during the decade in all types of roads (excluding municipal roads) is 598·47 miles.

Under the Nagpur Plan the district should have 1,669 miles of roads. It was short of that target by 367 miles on 31st March 1961.

New Roads

Work of the following roads has been undertaken (as on 31st March 1962) :—

(1) Akkalkuva-Sagbara road ; (2) Burhanpur-Raver-Shirpur-Shahada-Taloda-Sagbara road ; (3) Dhadgaon-Kathi road ; (4) Shahada-Taloda road ; (5) Surat-Dhulia road ; (6) Diversion outside Dhulia town on Bombay-Agra road ; (7) Taloda-Raisingpur road (to Akkalkuva) ; (8) Burhanpur-Raver-Yawal-Shirpur-Shahada-Taloda-Raisingpur-Akkalkuva road (Shirpur-Chopda and Shirpur-Shahada road) ; (9) Akkalkuva-Kathi road.

Work on improvement of the following roads is in progress (as on 31st March 1962) :—

(1) Carpeting of Surat-Dhulia road ; (2) Black topping of Nandurbar-Sakri road ; (3) Black topping of Shahada-Taloda road ; (4) Black topping of Khandesh-Hyderabad border road ; (5) Black topping of Shirpur-Raver road ; (6) Black topping of Dondaicha-Shahada-Khetia road ; (7) Black topping of Dhulia-Nandurbar road (Dondaicha section) ; (8) Improvements to sharp curve on Bombay-Agra road.

Bridges under Construction

Work on the following bridges is in progress (as on 31st March 1962) :—

(1) Bridge across Raingan river on Surat-Dhulia road ; (2) Bridge at Pimpalner on Panzara river on Khandesh-Hyderabad border road ; (3) Submersible bridge on Gomi river on Dondaicha-Shahada-Khetia road ; (4) Bridge on Nandurbar-Sakri road (Raki river bridge) on Borai river (earth work of approaches) ; (5) Bridge on Surat-Dhulia road on Panzara river (approach) ; (6) Bridge on Surat-Dhulia road on Londhya Nallah ; (7) Bridge on Borai river on Nandurbar-Sakri road (concreting).

Posts, Telegraphs and Telephones

The district is included in the Nasik Postal Division. Head Post Office is situated at Dhulia and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62, there were 17 sub-post offices and 164 branch post offices in the district. Together their number has increased by 145 per cent over that of 1951-52.

There are Telegraph offices at the following 14 places :—

(1) Akkalkuva ; (2) Dhadgaon ; (3) Dhulia town; (4) Dondaicha ; (5) Nandurbar ; (6) Nardhane; (7) Nawapur ; (8) Sakri ; (9) Shahada ; (10) Shirpur ; (11) Sindkhed ; (12) Taloda ; (13) Pimpalner ; (14) Songir.

The following 13 places have Telephone connections :—

(1) Akkalkuva ; (2) Dhulia ; (3) Dondaicha ; (4) Nandurbar ; (5) Nardhane ; (6) Nawapur ; (7) Pimpalner ; (8) Sakri ; (9) Shahada ; (10) Sindkhed ; (11) Songir ; (12) Taloda ; (13) Shirpur.

Passenger Road Transport

During the Plan period a number of roads connecting the villages were constructed in the district and the buses of the State Road Transport Corporation are running regularly on these roads. This district is included in the jurisdiction of Khandesh S. T. Division. In addition to the Divisional Workshop at Dhulia, five depots are situated at (1) Dhulia, (2) Sakri, (3) Nandurbar, (4) Shahada, and (5) Shirpur. No separate figures for passenger transport are available for the district, as the S. T. Division also includes Jalgaon district. The five depots together run buses on 124 routes which make 550 single trips per day.

Nationalisation of passenger road transport in the district has been completed by 1st August 1952. The Third Five-Year Plan Schemes include expansion of the services to new places on public demand, construction of permanent bus stations and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available, as the Regional Transport Officer, working at Thana, keeps combined records for his region including Thana, Nasik, Dhulia and Jalgaon districts.

Workers in Transport and Communications

5,555 persons are engaged in transport and 429 in postal, telegraphic and telephone communications, etc., in the district. Out of the workers in transport, etc., 1,482 are in Railway transport, 1,879 in Motor transport and 2,194 in all other kinds of transport like bullock carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a railway or a road or has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 4,272. 3,643 are males and 629 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

6·44 per cent of the workers are engaged in the construction and maintenance of dams, waterways and canals, etc., 18·47 per cent in construction and maintenance of roads, bridges, etc., 1·78 per cent in construction and maintenance of telegraph and telephone lines and 73·31 per cent in construction and maintenance of buildings, etc.

All the workers engaged in construction together make hardly 0·67 per cent of the total workers in the district.

OTHER SERVICES

34,904 persons are engaged in the district in " Other Services ". 28,456 are males and 6,448 are females. The major categories out of them are (i) Public Services ; (ii) Educational Services ; and (iii) Personal Services. " Public Services " include administrative employees of Central, State and Local Governments. " Educational Services " include all classes of teachers and " Personal Services " include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of workers in other services by minor groups is shown in Table B-IV-C in Part II.

5·46 per cent of the total workers in the district are engaged in " Other Services " as against the average of 8·53 per cent in the State. 24·38 per cent of the total workers in " Other Services " in the district are engaged in " Public Services " and 16·12 per cent in " Educational Services ". Both these proportions are higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. The proportion of " Personal Services " in the district is lower, i.e., 20·34 per cent than the State average of 27·15 per cent. This may be so because the district does not have any large urban centres and there are hardly any comparable business services, labour associations or recreation services.

The number of domestic servants is 1,822 or one for 742 population. The number of barbers is 1,951. The number of persons in laundry services (including washermen) is 791. There are 176 legal practitioners and 984 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is 61 and that in other schools and colleges is 5,561.

The number of State Government employees including those now working under the Zilla Parishad is 5,657.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of workers to total population, males and females, for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
DHULIA DISTRICT ..	47·28	55·24	39·05
1 Akrani Mahal	54·58	56·65	52·38
2 Akkalkuva Taluka ..	56·80	60·18	53·27
3 Taloda Taluka	52·73	57·49	47·96
4 Shahada Taluka	49·28	56·27	42·17
5 Nandurbar Taluka ..	47·09	56·32	37·63
6 Shirpur Taluka	46·15	55·49	36·44
7 Sindkhed Taluka ..	42·42	55·85	28·64
8 Nawapur Taluka ..	55·78	58·35	53·12
9 Sakri Taluka	48·97	54·33	43·44
10 Dhulia Taluka	41·72	51·61	31·27

Labour participation rates for the district are lower for males and higher for females than the corresponding averages for the State. Within the district, Akkalkuva taluka has the highest participation rates both for males and females. Dhulia taluka has the lowest rate of participation for males and the second lowest for females. These low rates may be due to the large urban population which also has a larger component of student population. The lowest labour participation rate for females is, however, in Sindkhed taluka which has a high density of population and is known for its rich fertile soils.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution

of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72·25	12·34	15·41
	Rural	100	88·73	5·68	5·59
	Urban	100	11·97	36·69	51·34
Dhulia District ..	Total	100	84·31	6·16	9·53
	Rural	100	92·31	3·17	4·52
	Urban	100	22·28	29·40	48·32

The primary sector dominates the economy of the district with as much as 84·31 per cent of the total workers against the State average of 72·25 per cent. Rural areas of the district are worse off with insignificant proportions of workers in secondary and tertiary sectors. Urban areas are slightly behind the average urban areas of the State in the secondary and tertiary sectors. Tertiary sector is no doubt dominant in urban areas. This comprises of persons engaged in trade and commerce, transport, storage and communications and other services. Even among the 29·40 per cent urban workers engaged in the secondary sector, a large proportion is engaged in traditional crafts and processing or repairing services ancillary to agriculture. The workers in manufacturing industry (registered) make only 6 factory workers per thousand of total population against the average of 20 for the State.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			DHULIA DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46·11	40·69	54·79	46·06	48·11	43·04
II Agricultural Labour ..	23·80	18·12	32·90	36·46	27·80	49·12
III Mining, Quarrying, Live-stock, Forestry, Fishing, etc.	2·16	2·97	0·86	1·33	1·83	0·60
IV Household Industry ..	4·39	4·80	3·74	3·53	4·18	2·59
V Manufacturing other than Household Industry.	6·88	10·22	1·54	2·43	3·66	0·63
VI Construction	1·24	1·69	0·53	0·67	0·96	0·24
VII Trade and Commerce ..	4·52	6·61	1·17	3·12	4·42	1·22
VIII Transport and Communications.	2·36	3·65	0·29	0·94	1·54	0·07
IX Other Services	8·54	11·25	4·18	5·46	7·50	2·49
Total Workers ..	100·00	100·00	100·00	100·00	100·00	100·00

The proportion of cultivators in the district is almost the same as the average for the State but it is higher for males and very much lower for females. In contrast the proportion of agricultural labourers among female workers in the district is higher than that for the State. These disparities indicate that females from the landholding households do not participate in agriculture as much as the average for the State while the females from the households not owning lands participate in agriculture much more than the corresponding average for the State. On the whole (males and females together) the proportion of agricultural labourers is very high as compared with the State and the ratio between cultivators and agricultural labourers is 4 : 3 against 2 : 1 for the State and 7 : 1 in Satara district or 5 : 1 in Sangli district. The higher proportion of agricultural labourers may be due to the predominance of cotton and groundnut in the crop pattern both of which require larger inputs of agricultural labour.

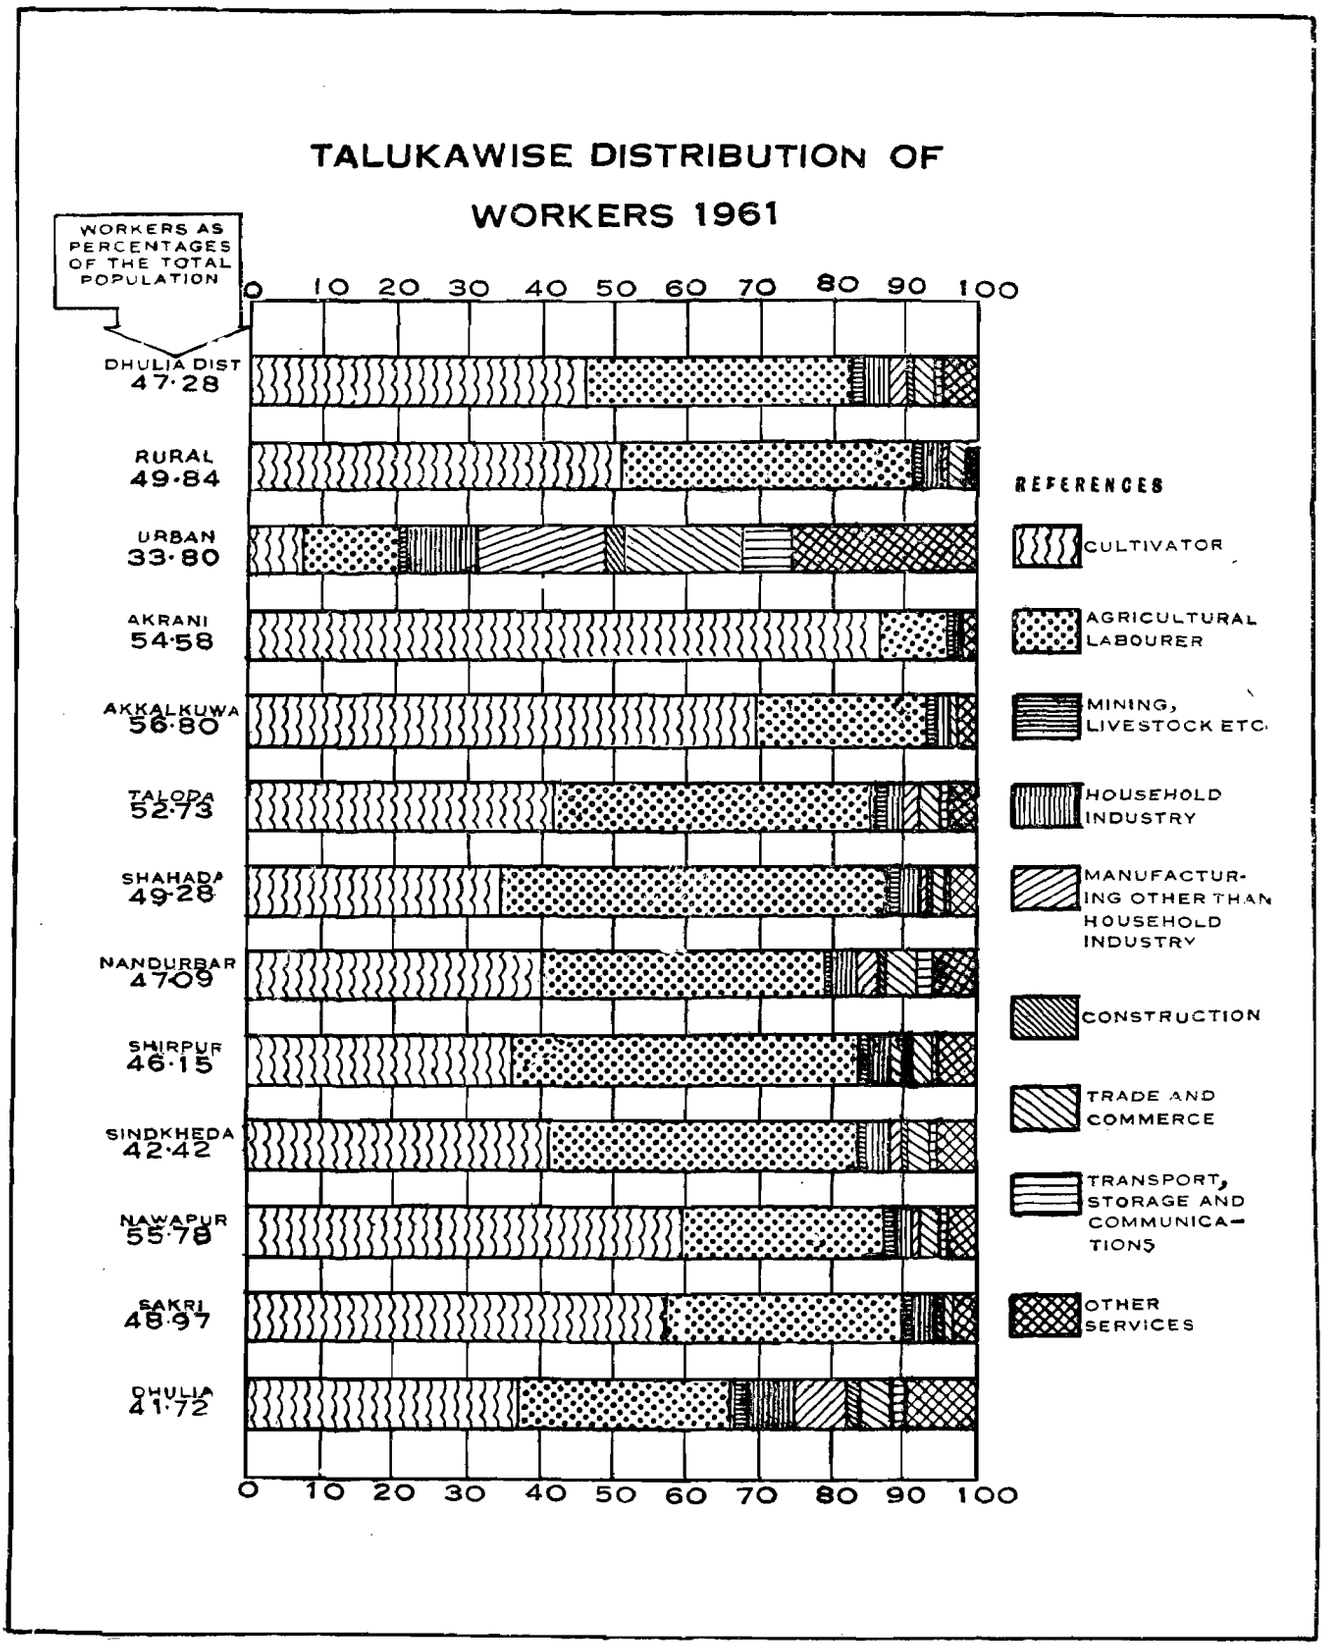

The 1961 concepts of workers and non-workers have been described in the Explanatory Note to Part II. In spite of the changes in the methods of economic classification, the 1961 pattern of agricultural employment may be broadly compared with the livelihood pattern of 1951.

In 1951, cultivators and agricultural labourers (including earning dependants) made 56·32 per cent and 24·24 per cent of the total workers respectively. In 1961, the corresponding proportions are 46·06 per cent and 36·46 per cent. The combined proportion of the two categories has increased from 80·56 per cent in 1951 to 82·52 per cent in 1961. The changes in the proportion of cultivators and agricultural labourers are however in opposite directions. This may however be due more to the 1961 changes in the definition of principal work as a result of which many more persons from those engaged both in cultivation and as agricultural labourers have returned their work in the latter category than those in 1951.

Talukawise distribution of workers in nine categories of economic activities is shown on page (56). Corresponding figures for the State and the district are also shown for comparison.

Within the district the proportion of cultivators varies from 86·34 per cent in Akrani mahal to 34·39 per cent in Shahada taluka. The same two talukas respectively have the lowest and the highest proportions of agricultural labourers. They should represent the two extreme points in the landholding and cropping pattern in the district. The proportion of category V " Manufacturing other than household industry " is highest in Dhulia taluka because of its large urban population and the existence of a textile mill and a few other smaller manufacturing establishments. Dhulia taluka also has the highest proportion in " Other Services " as it includes the administrative centre of the district.

Distribution of workers by nine categories of economic activity is also shown in the Figure on page (55) for the district and each taluka separately.

(10) Dhulia Taluka	37·50	29·77	1·49	6·56	7·51	1·22	4·77	1·76	9·42	100·00

Labour Participation by Age

The labour participation rates by age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Dhulia District			Maharashtra State		
	Total	Males	Females	Total	Males	Females
All ages	47·28	55·24	39·05	47·91	57·09	38·10
0—14	9·40	9·33	9·48	8·72	8·62	8·84
15—34	77·56	90·07	65·34	74·53	87·45	60·90
35—59	82·37	98·06	64·99	81·57	96·86	63·68
60+	47·74	75·73	22·63	49·13	72·82	26·28

The labour participation rates for males in the district are higher for all the age-groups than the corresponding average rates for the State. But in spite of them the participation rate for males of all ages is lower than the average for the State. This appears to be the result of a different age distribution pattern obtaining in the district than that of the State. This aspect has already been described at page (14-15). In case of females the labour participation rate is higher in the district than the State average for the total population and the first three age-groups 0—14, 15—34 and 35—59. It is lower than the State average only in the age-group 60+.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Dhulia District ..	71·96	11·45	15·44	1·15

The average literacy rate in the district is slightly lower than the average for the State. That is reflected in the higher proportion of illiterates and lower proportions at higher educational levels among the workers in the district than the corresponding averages for the State. Primary or junior basic level is an exception as its proportion among the workers in the district is higher than the State average. It should suggest that a smaller proportion of pupils is withdrawing from schools before attaining primary or junior basic level. The district has 7,363 workers with educational levels of matriculation and above. 4,597 of them are working in Other Services, 889 in Trade and Commerce, 549 in Transport, Storage and Communications and as many as 612 as Cultivators.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage of proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II :—

		Total workers	Class of workers			
			Employers	Employees	Single workers	Family workers
Maharashtra ..	Total	100	3·96	62·18	26·52	7·34
	Rural	100	1·57	46·47	38·58	13·38
	Urban	100	4·98	68·90	21·37	4·75
Dhulia District ..	Total	100	2·63	47·97	35·60	13·80
	Rural	100	1·63	42·62	39·54	16·21
	Urban	100	3·38	51·96	32·66	12·00

Family workers and single workers have larger proportions in the district both in rural and urban areas than the corresponding State averages. The difference is more marked in urban areas. This is an indication of traditional crafts and small trading units dominating the scene of non-agricultural employment. Even in urban areas as a consequence the proportion of employees and employers in the district are lower than the State averages.

Percentage Distribution in Household Industry by Employees and Others

The proportion of employees, i.e., hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

		Total workers	Employees	Others
Maharashtra ..	Total	100	8·18	91·82
	Rural	100	4·91	95·09
	Urban	100	16·35	83·65
Dhulia District ..	Total	100	8·82	91·18
	Rural	100	4·68	95·32
	Urban	100	17·97	82·03

The average structure of employment in household industries in the district closely resembles the average pattern for the State. The proportions of hired workers in the district are a little lower in rural areas and a little higher in urban areas than the corresponding State averages.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

	Categories of principal work		Percentage of total workers by categories of secondary work		
			I	II	IV
MAHARASHTRA	I Cultivation	Total		17·85	1·97
		Rural		18·03	1·98
		Urban		10·54	1·32
	II Agricultural Labour ..	Total ..	13·17	..	0·94
		Rural ..	13·46	..	0·97
		Urban ..	7·12	..	0·31
	IV Household Industry ..	Total ..	14·78	6·97	..
		Rural ..	19·61	9·38	..
		Urban ..	2·70	0·95	..
DHULIA DISTRICT.	I Cultivation	Total		22·50	1·27
		Rural		22·75	1·28
		Urban		9·59	0·62
	II Agricultural Labour ..	Total ..	7·71	..	0·43
		Rural ..	7·89	..	0·44
		Urban ..	3·42	..	0·06
	IV Household Industry ..	Total ..	10·53	6·75	..
		Rural ..	13·97	9·38	..
		Urban ..	2·92	0·92	..

It is significant that larger proportions of cultivators in the district are also working as agricultural labourers than the State average. This is in spite of the already larger proportions of agricultural labourers working in that capacity as principal work. In contrast, the proportions of agricultural labourers also working as cultivators as secondary work are smaller in the district than the State average. The proportions of workers engaged at household industry and also working as cultivators are also smaller in the district than the State averages.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maharashtra	Dhulia District
0	Professional, technical and related workers.	6·42	7·96
1	Administrative, Executive and Managerial workers.	3·89	2·74
2	Clerical and related workers	9·13	6·29
3	Sales Workers	12·23	16·50
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	9·96
5	Miners, quarrymen and related workers	0·75	0·48
6	Workers in Transport and Communication occupations.	3·57	2·68
7 & 8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	44·27
9	Service, sport and recreation workers ..	10·27	9·11
X	Workers not classifiable by occupation	0·11	0·01
	Total ..	100·00	100·00

The proportion for the first occupation division " 0 " (Professional, technical and related workers) is larger in the district mainly because of the comparatively larger number of teachers. Occupation division " 4 " (Farmers, fishermen, loggers, etc.) has higher proportions naturally because of the large extents of forests in the district. The proportion of sales workers (occupational division " 3 ") is larger because trade and commerce dominates the scene of non-agricultural employment and the proportions of workers in occupation division " 7 & 8 " (Craftsmen, production process workers, etc.) and " 9 " (service, sport, recreation, etc.) are smaller in the district.

Non-workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	31·67	10·67	28·90	9·14	43·39	16·52
(2) Household duties	0·15	31·70	0·11	28·44	0·28	44·09

Total ..	100·00	100·00	100·00	100·00	100·00	100·00

N=Negligible.

There is a marked difference in the distribution pattern for non-workers among males and females. 31·67 per cent out of male non-workers are full-time students while the corresponding proportion for females is 10·67 per cent. The reason is that 31·70 per cent females who are engaged in household duties are also included as non-workers. There are rural-urban differences in the proportion of dependents. Other categories together have less than one per cent of population. The rural-urban differences are similar both for males and females. In urban areas, the percentage of full-time students is higher and that for dependents lower. The percentage of females engaged in household duties is higher in urban areas than that in rural areas. The percentage of unemployed is 2·33 and 0·28 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower because the group of non-workers contains a large number of adult women engaged in household duties.

Seasonal Migration

The houselist population reported for the district on 1st October 1960 was 13·40 lakhs. With the decade average rate of growth it was estimated for 1st March 1961 at 13·56 lakhs. But the actual population enumerated on 1st March 1961 was 13·51 lakhs. The difference of about five thousands is partly due to seasonal migration both within the district and outside. Within the district the rural areas have shown a deficiency of nine thousands and the urban areas have shown a surplus of four thousands. Shahada, Taloda and Nawapur talukas and parts of Akkalkuva taluka appear to be attracting seasonal migration mainly from Sakri, Dhulia, Sindkhed, Nandurbar and Shirpur talukas.

The seasonal migration outside the district appears to be both of males and females and that within the district to be mainly of males as would be seen from the following sex ratios for the district and its talukas for the houselist population as on 1st October 1960 and Census population as on 1st March 1961: —

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with words "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

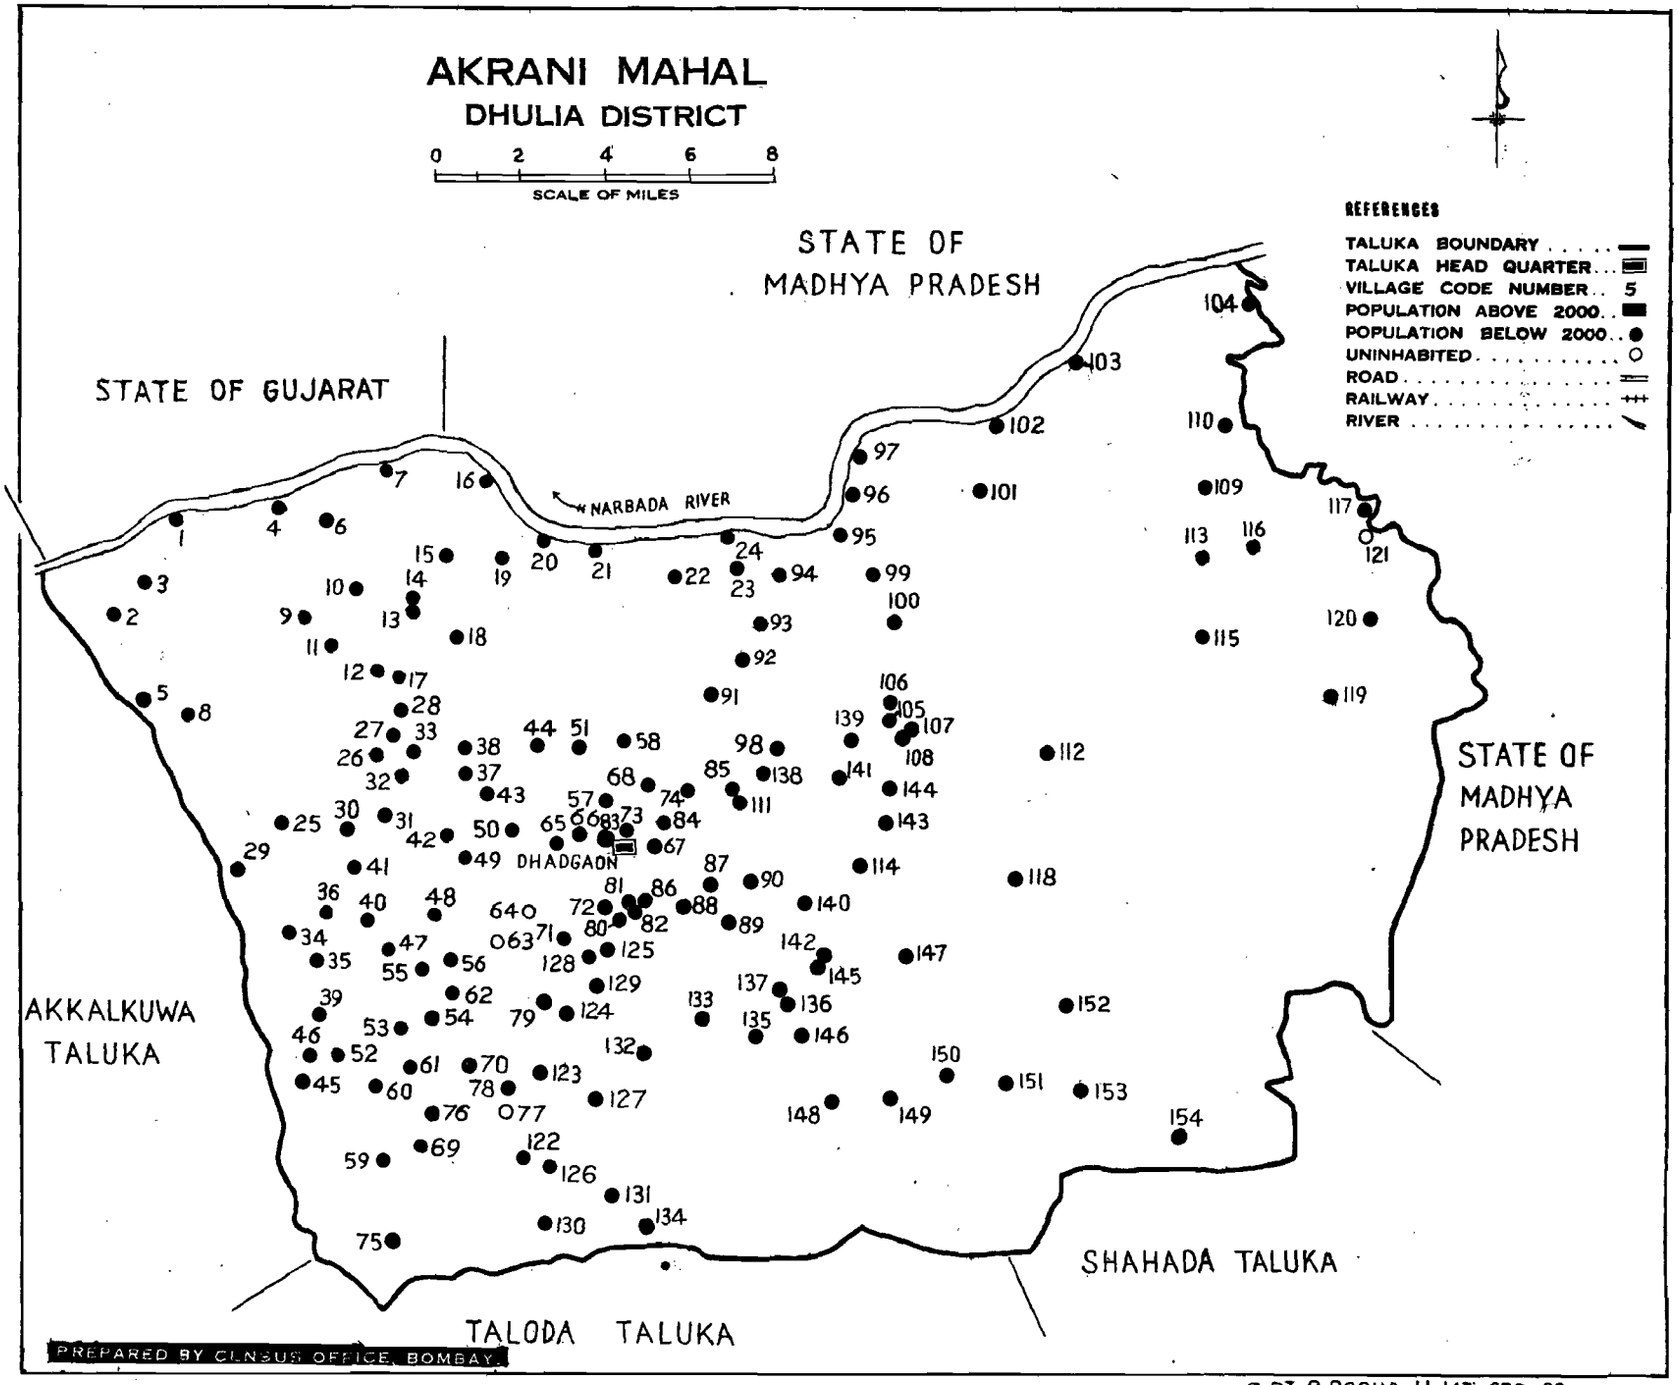

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

TOTAL		100,162	123,780

NA=Not Available.

NOTE—(*i*) The 1951 Taluka Total is less by 185 than that shown in Table A-II, Part II, because the population of two localities, *viz.*, Khorya and Kolshapani are not included here. Those localities did not exist in 1961.

(*ii*) Village Natwade (1951 Population—16) of 1951 Census is now merged in village Lauki (Code No. 43) in 1961 Census. The 1951 population of Lauki was 564.

(*iii*) Village Pimprale (1951 Population—10) of 1951 Census is now merged in village Hedakhed (Code No. 47) in 1961 Census. The 1951 population of Hedakhed was 324.

EXPLANATORY NOTE

THIS PART contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least $\frac{3}{4}$ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. This shows the territorial changes that have taken place during the decade. Units which had some change in area in the decade are only shown here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water-supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V	Manufacturing	Division 2 & 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes " employer ", " employee ", " single worker " and " family worker " :

An " employer " is a person who employs other persons in order to perform economic activity in which he is engaged.

An " employee " is a person who usually works under some other person for salary, or wages in cash or kind.

A " single worker " is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A " family worker " is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii) even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry;

(ii) engaged in cultivation only;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same, the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Tables C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top-ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group " Others ". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group " Others ".

90. " Mother-tongue " is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group " Others ". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-A of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to as those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from the household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order. The figures for rural areas only are also shown separately for talukas having more than 25 per cent Tribal population.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

The figures for rural areas only are also shown separately for talukas having more than 25 per cent Tribal population.

E SERIES
HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, courtyard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I
STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—
9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0 Agriculture, livestock, forestry, fishing and hunting
1 Mining and Quarrying
2 & 3 Manufacturing
4 Construction
5 Electricity, Gas, Water and Sanitary Services
6 Trade and Commerce
7 Transport, Storage and Communication
8 Services
9 Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00 Field produce and Plantation crops
01 Plantation crops
02 Forestry and Logging
03 Fishing
04 Livestock and Hunting

Division 1—Mining and Quarrying

10 Mining and Quarrying

Divisions 2 and 3—Manufacturing

20 Foodstuffs
21 Beverages
22 Tobacco Products
23 Textile—cotton
24 Textile—jute
25 Textile—wool
26 Textile—silk
27 Textile—miscellaneous
28 Manufacture of wood and wooden products
29 Paper and paper products
30 Printing and publishing
31 Leather and leather products
32 Rubber, Petroleum and coal products
33 Chemicals and chemical products
34-35 Non-Metallic Mineral Products other than petroleum and coal
36 Basic Metals and their products except machinery and transport equipment
37 Machinery (all kinds other than Transport) and Electrical equipment
38 Transport Equipment
39 Miscellaneous Manufacturing Industries

Division 4—Construction

40 Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50 Electricity and Gas
51 Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63 Wholesale Trade
64—68 Retail Trade
69 Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71 Transport
72 Storage and Warehousing
73 Communications

Division 8—Services

80 Public Services
81 Educational and Scientific Services
82 Medical and Health Services

Division 8—Services—*concld.*

83 Religious and Welfare Services
84 Legal Services
85 Business Services
86 Community Services and Trade and Labour Associations
87 Recreation Services
88 Personal Services
89 Services (not elsewhere classified)

Division 9—Activities not adequately described

90 Activities unspecified and not adequately described (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, musur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms.. ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, ponds.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld.*	
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms ..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of wood and wooden Products*—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products*—	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper,paper board and pulp.	292
30	*Printing and Publishing*—	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products*—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products*—	
	Manufacture of tyres and tubes..	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products*—	
	Manufacture of basic industrial chemicals such as acids alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*—	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products ..	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

J-856-II-13-B-(Dhulia).

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal-drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tunning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways, bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverware and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade*—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper..	661
	Retail trading in metal, procelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport*—	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing*—	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).—	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisation operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hair dressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individulas who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market.. ..	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c.=not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers, and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers, and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e. c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen.
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors, Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n. e. c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n. e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
X9 Workers not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note—n. e. c.=not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·1	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above.
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries.
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds, *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee-keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses.
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and food-grains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbat and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
	Major Group 22—Tobacco Products
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
	Major Group 23—Textile—Cotton
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
	Major Group 24—Textile—Jute
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date palm fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
	Major Group 25—Textile—Wool
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
	Major Group 26—Textile—Silk
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
	Major Group 27—Textile—Miscellaneous
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
	Major Group 27—Textile—Miscellaneous—*concld.*
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including raincoats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of waterproof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread), batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
	Major Group 28—Manufacture of Wood and Wooden Products
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of cartwheels
289·4	Manufacture of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags.
292·2	Papier-mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30—Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy.
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals)
311·2	Making of Peola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery suitcases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil clothes, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335·6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemical products n. e. c.
	Major Group 34-35—Non-metalic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
246·1	Making of images from soap stone
346·2	Manufactre of images, toys and other aritcles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils.
366·2	Making of other aluminium products n.e.c.
367·1	Making of tin utensils.
367·2	Making of articles from tin sheets.
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n.e.c.
368·1	Lacquerware (if on metal).
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products.
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n.e.c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets.
369·4	Making and repairing of locks and trunks.
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n.e.c.
	Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
	Major Group 38—Transport Equipment—*concld.*
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
	Major Group 39—Miscellaneous Manufacturing Industries
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlaywork with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacutre of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as hammonium, table, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n.e.c.

J-856—III—28-B (Dhulia)

EXPLANATORY NOTE

THE SCOPE of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India ".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste* : This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area and the gross irrigated area are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tabacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crop are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, *i.e.*, calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word " factories " here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
