MOTIF

The Bhils of Maharashtra are mainly concentrated in Dhule district. They have long history since ancient times. The earliest mention of their name occurs in the Ramayana and the Mahabharata. Bhils possibly belong to a proto-Mediterranean race who spread far and wide when a climatic crisis occurred in the grass steppes of the Sahara. And, even now they are mostly, dependent on agriculture and specially agriculture labour.

Modernisation of life style of such tribal groups. while preserving the good aspects of the age-old culture, is one of the object of the planning schemes.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and [wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory havealso been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,
the 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook Project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc. deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.

Dated 26th January 1984 (Republic Day).

S (Y) 645—2

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil in the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.

APPENDIX 1 TO SUMMARY TABLE 1

Tahsilwise number of villages with population of 5,000 or over and of towns with population under 5,000

(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with population of 5,000 or over			Towns with population under 5,000

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. It's publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other states in India) only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health subcentres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

The district of Dhule was previously known as the Khandesh district. In ancient times, it was known as Rasika. Later, under the Yadavas, it was called as Seunadesa after King Seunachandra who ruled over it. With the advent of Muslims, the name was changed to Khandesh to suit the title Khan given to the Faruqi Kings. The entire area of Khandesh included two districts viz. Dhule and Jalgaon and was administered as one district with headquarters at Dhule. However, in 1906 for administrative purposes, the Khandesh was divided into two districts known as West Khandesh and East Khandesh. Following tahsils were separated from Khandesh district to constitute West Khandesh with headquarters at Dhule :—

(i) Dhule (ii) Nandurbar (iii) Nawapur Peta (iv) Pimpalner (v) Shahade (vi) Shirpur (vii) Sindkhede (viii) Talode.

Headquarters of Pimpalner tahsil was transferred to Sakri earlier and in 1908, the name was also changed to Sakri tahsil. In the year 1950 a new tahsil of Akkalkuwa was created and in the same year four villages from Nashik district and one village from Broach district of Gujarat state were added to this district. However, two villages from this district were transferred to Broach district.

With the reorganisation of states in 1956, the district was included in Bombay state and subsequently *i. e.* in 1960 it became a part of Maharashtra state. While doing so 38 villages each from Nandurbar and Nawapur tahsils, 43 villages from Talode and 37 villages from Akkalkuwa tahsils were transferred to Gujarat state. In 1961 the name of the district was changed from West Khandesh to Dhulia and later on to Dhule district with Dhule as its headquarters. For 1971 census, Akrani Mahal was upgraded as Akrani tahsil.

Since 1961, the number of tahsils in the district remained at 10 only. However, with the upgrading of hamlets/wadis as separate villages, the number of inhabited villages has risen from 1,360 in 1961 to 1,516 in 1981, but the number of towns remained the same at 7.

Location, Relief and Drainage

The district of Dhule, formerly known as West Khandesh lies in the Upper Tapi basin in the North-West corner of Maharashtra state. It lies between 20°38′ and 22°3′ north latitude and 73°47′ and 75°11′ east longitude. The distinguishing feature of the topography of the district is that unlike Deccan plateau, the orientation of the district is towards west coast. The Tapi river passes through the centre of the district from east to west with a deep cut-up bed and black soil fertile plains along its banks.

It is bounded on the west by Gujarat state on the north by Madhya Pradesh, and on the east and south by Jalgoan and Nashik districts respectively. The district is separated from Gujarat and Madhya Pradesh States by the Satpudas and from the Deccan by the Satmala hill range and arm of the Sahyadri mountains stretching out in easterly direction.

Except for a small area in the extreme north-west which drains into the Narmada, the whole of the district is drained by the Tapi river and its tributaries. There are three well marked belts running east to west, (i) the rich Tapi valley in the centre, (ii) the high and wild Satpudas in the north, and (iii) bare ridges and well watered valleys separated by the Sahyadri ranges and innumerable dykes. All these belts run parallel to Tapi.

There are two main hill ranges in the district, the Satpuda in the north and the Sahyadris and their off-shoots in the west and south. The Satpudas a broad belt of mountain land stretching in a wall like manner and running from east to west cover the northern tahsils of the district. The hills in these ranges possess considerable height. Toranmal with 1,155 metres height rises in the north while Boksa Dongar with 1,208 metres height and Ashtamba Dongar with 1,325 metres height rise in the southern range. The Satpudas are cut-up at places by the tributaries of Tapi.

The Sahyadri hills bound the south-western corner of the district. In their northern extremities, they turn sharply towards the north-east leaving the broad Tapi plain between them and the Satpudas.

The Satmala which is an off-shoot of the Sahyadris, breaks-off sharply from it in the north-west of Nashik and covers the western and southern parts of the district with low hills and good vegetation.

The major river of the district is Tapi with a course of about 100 kilometres within the limits of the district. It forms the northern boundary of Sindkhede and Nandurbar tahsils and the southern boundary of Shirpur and Shahade tahsils. The banks of the river Tapi rise high and are bare. The tributaries Aner, Baler, Arunavati and Gomati from the north, and Bori, Panzara, Borai, Amravati, Shiva, Rangawal and Nesu from the south meet the Tapi during its course through the district. The rivers flowing from the north own their origin to the southern slopes of the Satpuda hills but they are small in length and of little use for irrigation. Their peculiarity is that near the hills and before they fall into the Tapi, their streams flow throughout the year, but in the middle belt, the water passes underground leaving the bed perfectly dry in the dry season. The streams flowing from the south have their sources in the Sahyadri hills draining much wider tracts and are of greater size and consequence. Except in the vicinity of the Tapi, these streams have been crossed by small dams and are widely used for irrigation.

The great river Narmada forms the boundary for about 70 kms. on the western part of the northern boundary of the district. Its numerous tributaries drain Akrani tahsil and a portion of Akkalkuwa tahsil lying in the north of the first face of the Satpuda hills.

Climate

The climate of the district is on the whole dry except during the south-west monsoon season. As the district is far away from the coastal tracts, there are large variations in the day and night temperatures. The year may be divided into four seasons. The cold season from December to February is followed by hot season from March to May. The south-west monsoon season lasts till September. October and November constitute the post-monsoon season. Within the district there are local variations also. Tapi valley in the east is the hottest part of the district. To the south and west, the Tapi plain is little cooler. The upland valleys of Panzara and other plains in the west have cool and bracing nights even in the hottest season. The forests to some extent temper the heat in the Satpudas.

May is the hottest part of the year with the mean daily maximum temperature at 40.7° C. and the mean daily minimum temperature at 25.8°C. On some days, the maximum temperature goes above 45°C. With the on set of the south-west monsoon, there is a drop in the temperature and the weather is pleasant. January is the coldest month with the mean daily maximum temperature at 30.3°C. and the mean daily minimum temperature at 16.2°C. Day and night temperatures drop rapidly till January.

The average annual rainfall in the district is 674.0 mm. It is heavier in the hilly regions of the Satpuda ranges. July is the rainiest month. Nawapur near the western border gets the maximum annual rainfall of about 1,097.1 mm. while Dhule gets the minimum rainfull of 608.8 mm. It shows that the rainfall is not uniform in all parts of the district.

During the south-west monsoon the skies are heavily clouded, otherwise they are clear for the rest of the year.

Soil

The soils of the district are derived from trap rock to the south of Tapi river. They can broadly be classified into three zones viz. (i) light type soil, (ii) medium black soil, and (iii) deep black soil. The light type soils are light loams to clay loams in texture and largely found in Dhule and Sakri tahsils, western part of Nawapur tahsil and southern part of Nandurbar tahsil. These are very useful for crop like bajra, kharif jowar, groundnut and to some extent cotton. Sindkhede, Akrani tahsils and western part of Dhule tahsil belong to medium black soils well suited for irrigation purposes. The soils are dark brown to dark reddish brown with fairly good drainage. Deep black soils are largely found on the banks of Tapi river in Shirpur, Shahade and Talode tahsils, eastern part of Nawapur tahsil and northern part of Nandurbar tahsil. These soils are clay loam to clayey in texture and are very fertile. The soils in Shahade and Shirpur tahsils are supposed to be extremely rich. Sandy soils are observed mostly in the valleys of Tapi and Panzara.

Census Houses and Households

The total number of occupied residential houses together with number of households as returned at the 1981 census are given in columns 4 and 5 of the primary census abstract. In Indian Census a 'Census House' is a building or a part thereof with a main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant, residential or non-residential or both. As regards the household, it is a group of persons living together and eating from a common kitchen until the exigencies of work prevent them from doing so. The members of the household may or may not be related by blood or else it can be a mix of both. There may be single member or more than one member household. However, the households of unrelated persons are known as 'Institutional Households'. They comprise boarding households, messes, hostles, residential hotels, rescue homes, jails, ashrams etc. There is yet another concept *i. e.* houseless population or houseless households. They comprise of persons who do not have a fixed place of residence. They move from

place to place, camp at night at their choosing or else live on streets, pavements, gardens or just in open places.

In the district there are 349,560 occupied residential houses and 356,833 households. This shows that some of the residential houses are shared by more than one household. Keeping in view the population of the district returned at 2,050,294 persons, the average size of the household works out to 5.75 persons which is higher than the state averge size of 5.37 persons per household However, number of households per km.^{2} is only 27.14 for Dhule district as compared to state average of 38.00 households per km^2.

Distribution of Population in Rural and Urban Areas

The 1981 census has returned the population of Dhule district at 2,050,294 persons comprising of 1,043,140 males and 1,007,154 females. This makes 3.27 per cent of state's population over 4.27 per cent of its area. The rural-urban differentials reveal that 1,650,113 (80.48%) persons live in the country side and only 400,181 (19.52 %) persons live in the urban areas of the district. The corresponding figures for the state are 64.97 per cent and 35.03 per cent respectively.

Among the 10 tahsils in the district, Dhule tahsil (483,701) is the most populous (Table 1).

TABLE 1

Population, number of villages and towns, 1981

Sr. No.	Name of tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F

7	Akrani ..	63,285	31,623	31,662	63,285	31,623	31,662	—	—	—	160	160	—
8	Shahade ..	234,413	118,906	115,507	209,458	106,007	103,451	24,955	12,899	12,056	183	180	1
9	Shirpur ..	212,553	108,091	104,552	178,540	90,454	88,086	34,013	17,547	16,466	139	139	1
10	Sindkhede ..	229,976	116,815	113,161	204,086	103,394	200,692	25,890	13,421	12,469	143	143	1
	District Total ..	2,050,294	1,043,140	1,007,154	1,650,113	834,193	815,920	400,181	208,947	191,234	1,532	1,516	7

Other tahsils in order of their size of population are Sakri (276,054), Shahade (234,413), Sindkhede (229,976), Shirpur (212,553), Nandurbar (209,566), Nawapur (154,677), Akkalkuwa (100,237), Talode (85,832) and Akrani (63,285). This shows that within the district the most populous tahsils has nearly eight times the population of the least populous tahsil. The district ranks 14th in population and 9th in area at state level.

The figures in Table 1 also show that Dhule tahsil is the only tahsil within the district which has almost half the tahsil population residing in urban areas. Sakri, Akkalkuwa and Akrani tahsils have no urban population at all.

The basic unit for rural area is a revenue village- A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other hand are specially defined for census purposes. The criteria adopted for 1981 census is :

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per Km.^{2}

As per 1981 census, there are 1,516 inhabited villages in the district which give shelter to 1,650,113 persons, whereas 7 towns absorb the remaining 400,181 persons. Thus, Dhule is one of the less urbanised districts in the state.

Size, Class and Status of Towns

For the purposes of comprehensive analysis of varied demographic characteristics, towns have been divided into the following six categories by population size :

Class I——100,000 and above
Class II—— 50,000-99,999
Class III—— 20,000-49,999
Class IV—— 10,000-19,999
Class V—— 5,000- 9,999
Class VI—— Below 5,000

For 1981 census, there was no addition or declassification of towns in the district (Table 2).

TABLE 2

New towns/towns declassified in 1981 census

Name of the towns		Population 1981 census
1		2
(a) Added	..	Nil
(b) Declassified	..	Nil

There are 7 towns in the district of which Dhule is class I, Nandurbar class II and Nawapur class IV. The remaining 4 towns viz; Talode, Shahade, Shirpur and Dondaicha are class III. There are no class V and class VI towns in the district.

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are :

(i) It should have a core town of a minimum population of 50,000 ;

(ii) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(iii) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Dhule and Nandurbar standard urban areas in Dhule district are as follows :—

Dhule SUA.—Urban Components : (1) Dhule City (M) Rural Components.—(1) Mahindale.

Nandurbar SUA.—Urban Components : (1) Nandurbar (M). Rural Components :—Nil.

Table 3 shows distribution of inhabited villages by population ranges and their percentages to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited Villages by population ranges

Range of population		No. of villages in each range	Percentage of villages in each range
1		2	3
- 200	..	151	9.96
200- 499	..	341	22.50
500-1,999	..	835	55.08
2,000-4,999	..	158	10.42
5,000-9,999	..	29	1.91
10,000+	..	2	0.13
All ranges	..	1,516	100.00

On an average an inhabited village has a population of 1,088 persons. This number is 1,037 persons for the State as a whole. The largest number of villages *i.e.* 835 (55.08%) have a population between 500 1,999. The second largest group constituting 341 (22.50%) villages falls in the population range 200-499. Other villages are 151 (9.96 %) in the population range below 200; 158 (10.42%) in the population range 2,000-4,999, 29 (1.91%) in the population range of 5,000-9,999 and the remaining 2 (0.13%) in the range 10,000+

For a broader generalisation, the villages have been further grouped as small sized (population below 500), medium sized (500-1,999), large sized (2,000-4,999) and exceptionally large sized (5,000+). Accordingly there are 492 (32.46%) small sized, 835 (55.08%) medium sized, 158 (10.42%) large sized and exceptionally large sized 31 (2.04%) villages.

Population Growth, Density and Sex Ratio

Dhule district registered the growth rate of 23.35 per cent during the decade 1971-81. The decade added 388,113 persons to the 1971 population in the district. However, the growth rate is lower than that of the state (24.54%). The decade 1911-21 registered the lowest growth rate of 6.20 per cent. This may be the result of extensive epidemic of influenza during the decade. The rate of variation kept up a faster pace after 1921 except for a slight decrease in 1941. The 1961 census recorded the highest growth rate of 27.44 per cent.

Within the district, Akrani tahsil experienced the highest growth rate (38.73%) closely followed by Shirpur tahsil (38.18%) during the decade 1971-81. Other tahsils which recorded the growth rate above the district average are Shahade (27.62 %), Akkalkuwa (27.35%) and Dhule (27.01%) (Table 4).

TABLE 4

Decadal change in distribution of population

Name of tahsil	Population						Percentage decadal (1971-81) variation		
	1971			1981

10. Sindkhede ..	201,730	181,545	20,185	229,976	204,086	25,890	+14.00	+12.42	+28.26
District total ..	1,662,181	1,374,445	287,736	2,050,294	1,650,113	400,181	+23.35	+20.06	+39.08

During 1961-71, urban growth rates in the district and the State were 33.30 per cent and 40.75 per cent respectively. At 1981 census, the district recorded an urban growth of 39.08 per cent against the rural growth of 20.06 per cent. Among the various towns in the district, Dhule city recorded the highest (53.69%) growth rate.

As seen from Table-5, the urban growth rate in 1951 was 46.40 per cent but it came down to 10.43 per cent in 1961.

TABLE 5

Growth, density and sex-ratio of urban population in the district in relation to the state

N. A.—Not Available.

This lower rate is due to the reclassification of urban areas in 1961, resulting in the declassification of five towns viz. (i) Thalner, (ii) Sindkheda, (iii) Pimpalner, (iv) Ranala and (v) Betawad.

The density of population of Dhule district works out to 156 persons per km². This is lower than the state density of 204 persons per km². Amongst the various tahsils of the district Dhule tahsil has the highest density of 248 persons per km² followed by Talode with 242 persons per km.² Other tahsils having density higher than the district are Shahade (211), Nandurbar (191), Sindkhede (180) and Nawapur (168). The least dense tahsil is Sakri with 92 persons per km². Akkalkuwa (118), Akrani (105) and Shirpur (106) tahsils have lower density than the district.

Table 6 shows distribution of villages according to density ranges.

TABLE 6

Distribution of villages by Density

Range of density (per Km ²	Total no. of villages in each density range	Percentage of villages in each density range
1	2	3
- 10 ..	12	0.79
11- 20 ..	22	1.45
21- 50 ..	127	8.38
51-100 ..	290	19.13
101-200 ..	530	34.96
201-300 ..	232	15.30
301-500 ..	157	10.36
501 + ..	132	8.71
Not known ..	14	0.92
All density ranges ..	1,516	100.00

For convenient understanding of patterns, villages have been grouped under eight different density ranges. Out of the total 1,516 inhabited villages, about one-third 530 (34.96%) villages recorded density within the range of 101-200. The second largest number of villages *i. e.* 290 (19.13%) fall in the density range of 51-100, followed by 232 (15.30%) in the range of 201-300. 12 (0.79%) villages have the density range of 10 or less than 10 persons per km.^{2}, 22 (1.45%) villages in the density range of 11-20, 127 (8.38%) villages in the density range of 21-50, 157 (10.36%) villages in the density range of 301-500, 132 (8.71%) villages in the density range of 500+ persons per km^2. The density in respect of 14 (0.92%) villages could not be worked out for want of area figures of the villages. In conformity with the state patterns' there has been consistent rise in the urban density of population in the district since the post independence period. It has increased from 1,422 persons per km.^{2} in 1961 to 3,137 persons per km.^{2} in 1971 and to 3,930 persons per km^2 in 1981. Among the various towns in the district, Shirpur recorded the highest density (17,532) closely followed by Shahade (12,233) and Dondaicha (10,970). Other towns with density in descending order are Talode (8,835), Dhule (4,536), Nandurbar (2,062) and Nawapur (1,270). (Statement I).

Sex composition is an important factor which influenced births, deaths, marriages and availability of man power. Sex ratio is defined as number ot females per 1,000 males. 1981 census recorded a sex ratio of 966 in the district. It is higher than that of the state which stands at 937. The following table shows the fluctuations in the sex ratio in the district since 1901.

TABLE 6 (i)

Sex Ratio 1901-1981

Year		District	State
1901	..	980	978
1911	..	978	966
1921	..	976	950
1931	..	969	947
1941	..	969	949
1951	..	970	941
1961	..	967	936
1971	..	956	930
1981	..	966	937

As can be seen from the above table, the district has all along returned a higher sex ratio than that of the state. In the district, the sex ratio varies between 956 and 980 while in the State, it varies between 930 and 978. In both the cases, a general decreasing trend of the sex ratio since 1901 to 1971 is visible, whereas, 1981 census records good improvement towards equality of both the sexes.

Within the district the sex ratio varies between 932 and 1,001 in the different tahsils Table 6 (ii). Akkalkuwa and Akrani tahsils have higher sex ratio of 1,001 followed by Nawapur (999) and Talode (985) tahsils. Other tahsils as per ranks are Shahade (971), Sakri (969), Sindkhede (969), Shirpur (968), Nandurbar (966) and Dhule (932).

TABLE 6 (ii)

Sex ratio by tahsils, 1981

District/Tahsil		Females per 1,000 males, 1981
Dhule District	...	**966**
Dhule tahsil	...	932
Sakri tahsil	...	969
Nawapur tahsil	...	999
Nandurbar tahsil	...	966
Talode tahsil	...	985
Akkalkuwa tahsil	...	1,001
Akrani tahsil	...	1,001
Shahade tahsil	...	971
Shirpur tahsil	...	968
Sindkhede tahsil	...	969

Since 1951, the sex ratio in urban population has been gradually showing a declining trend in the district from 943 in 1951 to 907 in 1971. 1981 census shows a slight increase to 915. At the state level, the sex ratio declined from 807 in 1951 to 801 in 1961, but after 1961, it showed an upward trend with 820 and 850 in 1971 and 1981 respectively.

Scheduled Castes and Scheduled Tribes

For evolving any suitable plan for socio-economic uplift of the scheduled castes and scheduled tribes, the government need to have the necessary data about them and for this, census is the main source. One of the highlights of 1981 census, as that of 1971 and 1961 censuses, was the collection of detailed information on the socio-economic characteristics of scheduled caste and scheduled tribe population.

There is no standard definition of scheduled castes or scheduled tribes. Scheduled caste include castes races of tribes as are declared to be scheduled castes, by the President of India by public notification under article 341 (i) of the Indian Constitution. Similarly, scheduled tribes mean all such tribes of tribal community or part of group. Within such tribe or

tribal community as are declared by the President of India, to be treated as scheduled tribes under article 342 (i) of the Indian Constitution. For Maharashtra State, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively. The list of scheduled castes and scheduled tribes in the state is given below. :—

Scheduled Castes and Scheduled Tribes in Maharashtra State

1. LIST OF SCHEDULED CASTES

1. Ager.
2. Aanmuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari,
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleçi,
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Nirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kior.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Manghvar
51. Mitha Ayyalvar.
52. Mukri.
53. Madia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedmam, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tataria, Valvi.
14. Dhanwar.

15. Dhodia.

16. Dubla, Talavia, Halpati.

17. Gamit, Gamta, Gavit, Mavchi, Padvi.

18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi, Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti, Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hil Maria, Kandra, Kalanga, Khetola Koitar, Koya, Khirwar Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.

19. Halba, Halbi.

20. Kamar.

21. Kathodi, Katkari, Dhor, Kathodi, Dhor, Kathkari, Son Kathodi, Son Katkari.

22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.

23. Khairwar.

24. Kharia.

25. Kokna, Kokni, Kukna.

26. Kol.

27. Kolam, Mannervarlu.

28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.

29. Koli Mahadev, Dongar Koli.

30. Koli Malhar.

31. Kohnd, Khond, Kandh.

32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya

33. Koya, Bhine Koya, Rajkoya.

34. Nagesia, Nagasia.

35. Naikda, Nayaka, Cholivala Nayaka, Kapadia, Nayaka Mota Nayaka, Nana Nayaka.

36. Oraon, Dhangad.

37. Pardhan, Pathari, Saroti.

38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.

39. Parja.

40. Patelia.

41. Pomla.

42. Rathawa.

43. Sawar, Sawara.

44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.

45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).

46. Varli.

47. Vitolia, Kotwalia, Barodia.

The scheduled caste population of the district as returned at 1981 census is 85,735 persons constituting 4.18 per cent of the total population of the district. Out of these, three-fourth of the persons (64,201) or 74.88 per cent live in the rural areas and the remaining 21,534 or one-fourth (25.12 %) of the scheduled caste population live in urban areas of the district. In 1961 the scheduled caste population in the district was 3.56 per cent. It increased to 3.70 per cent in 1971 and to 4.18 per cent in 1981. Percentage of scheduled caste population in the state stands at 7.14 per cent which is higher than the district average for 1981 census.

Out of the total 1,516 inhabited villages in the district, 694 (45.78 %) villages have no scheduled caste population at all. 553 (36.48 %) villages have 5 or less than 5 per cent scheduled caste population; 194 (12.80 %) villages between the percentage range of 6 to 10, 49 (3.23 %) villages between the percentage range of 11 to 15, 12 (0.79 %) villages between the percentage range of 16 to 20 and 7 (0.46 %) villages each in the percentage range of between 21 to 30 and 31 and above respectively (Table 7).

TABLE 7

Proportion of Scheduled Caste population to total population in the villages

Percentage range of scheduled caste population to total population	No. of the villages in each range	Percentage of villages in each range
1	2	3
No S. C. Population ..	694	45.78
-5 ..	553	36.48

21-30 ..	7	0.46
31+ ..	7	0.46
All ranges ..	1,516	100.00

The following table shows the proportion of scheduled caste and scheduled tribe population in various tahsils of the district for 1971 and 1981.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Dhule District ..	3.70	4.18	37.05	40.53
Dhule tahsil ..	4.58	5.29	9.66	11.41
Sakri tahsil ..	3.63	3.30	43.80	45.89
Nawapur tahsil ..	0.86	0.99	86.80	85.43
Nandurbar tahsil ..	3.99	4.01	36.53	38.04
Talode tahsil ..	2.33	2.25	63.48	65.98
Akkalkuwa tahsil ..	1.03	0.75	84.55	87.21
Akrani tahsil ..	1.30	1.70	94.33	95.23
Shahade tahsil ..	3.72	4.90	43.48	47.19
Shirpur tahsil ..	4.00	5.53	24.26	37.30
Sindkhede tahsil ..	5.52	6.15	12.17	18.75

Dhule accounts for the highest percentage of scheduled tribes in the state. Out of total district's population of 2,050,294, scheduled tribe population is 831,064 or 40.53 per cent. The tahsils of Nawapur, Akkalkuwa and Akrani are predominantly tribal areas with more than 85 per cent scheduled tribe population. Nandurbar, Talode, Sakri, Shahade and Shirpur tahsils also have considerably large population of scheduled tribes. The principal scheduled tribes in the district are Bhils, Dhanka, Gamit, Kokna, Naikda and Pardhi. They are mostly concentrated in the Satpuda ranges in the north and the areas flanked by the ranges of the Sahyadri in the south and south-west. 798,543 persons or 96.09 per cent of the scheduled tribe population reside in the villages mostly surrounded by the forests. They subsist on forest produce and allied work.

The population of scheduled tribes in the district has increased from 37.05 per cent in 1971 to 40.53 per cent in 1981. In almost all the districts (except few tahsils) of the state, there is an increase of scheduled caste and scheduled tribe population in 1981 as compared to 1971. This increase is mainly attributable to the amendment effected to the notified scheduled caste and scheduled tribe lists under the scheduled castes and scheduled tribes orders, (Amendment) Act, 1976 (108 of 1976). This act virtually removed all area restrictions with regard to residence in the specified districts or tahsils, which prevailed previously in the matter of recognising persons as belonging to scheduled castes and scheduled tribes. Most of the castes/tribe included in the lists are now recognised as scheduled castes or scheduled tribes as the case may be throughout the state of Maharashtra.

TABLE 8

Proportion of Scheduled Tribe population to total population in the villages

Percentage range of scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. T. Population	2	0.13
– 5 ..	24	1.58
6–15 ..	169	1.15
16–25 ..	187	12.34
26–35 ..	103	6.79
36–50 ..	101	6.66
51+ ..	930	61.35
All ranges ..	1,516	100.00

It is seen from Table 8, that out of the total 1,516 inhabited villages only 2 villages have no scheduled tribe population, while 930 village (61.35%) fall in the percentage range of 51 and above. Among the remaining 584 villages, the proportion of scheduled tribe population to total population is less than 5 per cent in 24 villages 6 to 15 per cent in 169 villages, 16 to 25 per cent in 187 villages, 26 to 35 per cent in 103 villages and 36 to 50 per cent in 101 villages of the district.

In the urban areas of the district, scheduled tribe population constitutes meagre 3.91 per cent of the total scheduled tribe population of the district 27.23 per cent and 26.14 per cent tribal population is recorded in Nawapur and Talode towns respectively. Detailed town-wise distribution of scheduled castes and scheduled tribes population shown in Table-9.

TABLE 9

Proportion of scheduled castes/scheduled tribes population in towns

Name and civic status of the town	Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population

Literacy

In the Indian Census a literate was defined as a person who can both read and write with understanding in any language. For a person to be classified as a literate, it was not necessary that he should have received formal education in any school or institution, or should have passed some minimum educational standard. All children below the age of five years were automatically treated as illiterate and were recorded as such. Thus, the figures of literates do not cover at all the population in the age group 0–4 years. The latest 1981 census revealed that only 37.51 per cent of the total population of the district is literate as against the state average literacy rate of 47.18 per cent. The district ranks 20th as compared with other districts of the state. The male and female literacy rates have been returned at 48.61 per cent and 26.01 per cent against the corresponding state rates of 58.79 per cent and 34.79 per cent. The district has gained 5.62 percentage points during 1971–81.

Table 10 shows literacy rates by population ranges of villages.

TABLE 10

Literacy rates by population ranges of villages

Range of population	No. of villages in each range.	Literacy rate
1	2	3
- 200 ..	151	8.03
200- 499 ..	341	16.29
500-1,999 ..	835	28.06
2,000-4,999 ..	158	38.81
5,000-9,999 ..	29	44.41
10,000+ ..	2	56.80
All ranges ..	1,516	32.38

It is observed that size of villages and literacy rates are co-related.

Within the district, the literacy rate is the highest in Dhule tahsil (50.07%) and the least in Akrani tahsil (6.96%) (Table 12).

Among the 7 towns in the district, Nandurbar shows the highest literacy rate of 62.01 per cent (60.69%). In the remaining towns it ranges between 50.19 per cent and 55.38 per cent (Table 11)

TABLE 11

Literacy rates for towns

Name and civi c status of the town 1		Literacy rate 2
Dhule City (M. Cl.)	..	60.69
Dondaicha (M. Cl.)	..	54.16
Nandurbar (M. Cl.)	..	62.01
Nawapur (C. T.)	..	52.00
Shahade (M. Cl.)	..	55.38
Shirpur (M. Cl.)	..	54.14
Talode (M. Cl.)	..	50.19
All towns	..	58.65

During the span of 80 years (1901–81) the literacy rate in the district increased from 4.43 per cent in 1901 to 37.51 per cent in 1981 [Table 11 (i)]

TABLE 11 (i)

Progress of literacy 1901–81

Year		Total	Males	Females
1901	..	4.43	8.51	0.26
1911	..	4.18	7.89	0.40
1921	..	4.83	8.84	0.72
1931	..	5.87	10.78	0.80
1941	..	15.48	25.68	4.96
1951	..	19.19	30.59	7.44
1961	..	25.15	37.43	12.45
1971	..	31.89	42.96	20.30
1981	..	37.51	48.61	26.01

Till the decade 1931, the progress of literacy was very slow when only 5.87 per cent of the district population was literate. Increase in the literacy rate was significant during the decade 1931–41. This sudden increase may be the result of mass literacy campaigns undertaken in the wake of the movement for independence. Compulsory primary education since 1947 in the district has also help to raise the literacy rates both for males and females. The male literacy has increased from 8.51 per cent in 1901 to 48.61 per cent in 1981 and the female literacy from 0.26 per cent in 1901 to 26.01 per cent in 1981.

Literacy rates of the two sexes differ sharply. During 1961, the ratio was 3:1 (37.43% males and 12.45% females) more than 2;1 in 1971 (42.96 % males and 20.30% females), and nearly 2:1 in 1981 (48.61% males and 26.01% females).

Considering the fact that the district has largest scheduled tribe population, the progress of literacy in the rural areas is quite substantial. It has increased by more than 5 per cent points in the decade 1971–81. As against 32.38 per cent literates in rural areas in 1981, there are 58.65 per cent literates in urban areas. Between the two sexes, the differential is larger for females (20.79% rural, 48.24% urban) than for the males (43.71 % rural 68.18% urban) (Table 12).

Working Population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental in nature. The work nvolves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the workers at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered. The main workers plus the marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Further, for 1981 census on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers *i. e.* cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers, major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties, students, dependents, retired persons, rentiers, beggars are some of the categories grouped as non-workers.

1981 census recorded 38.01 per cent of the district population as main workers, 5.62 per cent as marginal workers and the remaining 56.37 per cent as non-workers (Table 12).

TABLE

Literates, workers, non-workers, scheduled castes,

26.74	43.41	8.53	1.23	0.93	1.56	27.97	44.34	10.09	72.03	55.66	89.91

The corresponding figures for the state are 38.71 per cent, 3.85 per cent and 57.44 per cent. Compared to 1971, there has been little rise in the work participation rate both in the district (35.78% in 1971 and 38.01% in 1981) and the state (36.48% in 1971 and 38.71% in 1981). Within the district, the work participation rate in Nawapur tahsil was the highest (44.57%) and the lowest in Dhule tahsil (32.99%).

Among the main workers, male participation rate is 52.03 per cent while that of females is 23.49 per cent as per 1981 census. Marginal male and female workers account for 1.36 per cent and 10.03 per cent respectively of the total population of the district. The proportion of female marginal workers is higher than that of males, because the females besides attending their household duties also perform one or other economic activity to supplement the family income.

For 1981 census, the main workers have been sub-divided into four categories viz. cultivators, agrigultural labourers, those engaged in household industry and other workers. Cultivators in the district account for 36.74 per cent of the main workers which is slightly higher than the state average of 35.12 per cent. The proportion of agricultural labourers among the main workers in the district is 41.29 per cent that of household industry 2.22 per cent and other workers 19.75 per cent. Corresponding percentages for the state are 35.12 per cent, 26.63 per cent, 2.55 per cent and 35.70 per cent. Substantially high percentage of agricultural labourers and low proportion of other workers in the district as compared to the state averages are some of the indicators of agriculture oriented economy of the district. Male participation as cultivators in the district is significantly more (42.85%) than that of females (22.70%), while that of female participation as agricultural labourers is substantially higher (68.75%) than that of male agricultural labourers (29.32%). Male and female participation in the household industry is 2.47 per cent and 1.65 per cent, and that of other workers, 25.36 per cent and 6.90 per cent respectively.

Availability of Amenities—Education

Dhule district is one of the educationally backward district of the state. Educational facilities are available in 1,319 villages (87.01%) out of the total 1,516 inhabited villages. Within the district, the schooling facility is better in Sakri tahsil with 179 villages out of 182 villages (98.35%) covered by it. It is followed by Sindkhede tahsil, 140 villages out of 143 villages or 97.90 per cent with this facility. On the contrary, Akkalkuwa and Akrani tahsil with only 60.00 per cent and 59.38 per cent of the villages having educational facility and serving 79.07 per cent and 76.43 per cent of the population are at the bottom (Tables 13 and 14).

Table 17 indicates distribution of villages according to the distance from the nearest town and availability of different amenities.

TABLE 17

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amentity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Comm-unications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
—5 ..	98	91 (92.86)	13 (13.27)	98 (100.00)	29 (29.59)	7 (7.14)	64 (65.31)	44 (44.90)	76 (77.55)
6-15 ..	378	364 (96.30)	66 (17.46)	378 (100.00)	112 (29.63)	14 (3.70)	273 (72.22)	161 (42.59)	277 (73.28)
16-50 ..	804	710 (88.31)	116 (14.43)	804 (100.00)	194 (24.13)	52 (6.47)	443 (55.10)	260 (32.34)	400 (49.75)
51+ ..	236	154 (65.25)	17 (7.20)	236 (100.00)	36 (15.25)	8 (3.39)	78 (33.05)	18 (7.63)	47 (19.92)
Unspecified ..	—	—	—	—	—	—	—	—	—
All ranges ..	1,516	1,319 (87.01)	212 (13.98)	1,516 (100.00)	371 (24.47)	81 (5.34)	858 (56.60)	483 (31.86)	800 (52.77)

The ratio of schools to the urban population of the district is shown in Table 18.

TABLE 18

Schools per ten thousand population in towns

Class, name and civic status of town	No. per ten thousand population			
	Higher secon-dary/Inter/ PUC/ Junior college	Secondary/ Matriculation	Junior secondary/ Middle	Primary
1	2	3	4	5
I Dhule (M. Cl.) ..	1.04	0.81	0.76	2.51
III Dondaicha (M. Cl.) ..	1.16	1.16	1.16	3.48
II Nandurbar (M. Cl.) ..	0.61	1.38	1.68	4.59
IV Nawapur (C. T.) ..	2.09	2.09	1.05	5.75
III Shahade (M. Cl.) ..	0.80	1.60	2.00	2.81
III Shirpur (M. Cl.) ..	1.47	1.18	1.18	2.65
III Talode (M. Cl.) ..	1.00	1.00	1.00	3.99
All towns ..	1.05	1.07	1.07	3.17

The ratios of the ten thousand urban population to types of institutions are 10,000 : 1.05 Higher Secondary/Int./PUC/Junior Colleges ; 10,000 : 1.07 Secondary/Matriculation Schools 10,000 : 1.07 Junior Secondary/Middle Schools and 10,000 : 3.17 Primary Schools.

Medical

Medical facilities are available only in 212 villages (13.98%) and the population covered by these villages is 568,729 or 34.47 per cent. This of course is not a happy situation. The reason behind this could be the unwillingness on the part of medical personnel to work in the rural areas. However, the establishment of primary health centres, opening of rural dispensaries and cottage hospitals are bound to steadily change the complexion in the years to come.

Within the district, Dhule tahsil ranks at the top with 25.79 per cent of the villages having benefit of some kind of medical amenity and the population covered by these villages is 48.81 per cent. In Akrani tahsil, only 4 villages (2.50%) covering 10.43 per cent of its population enjoy the facility in the village itself (Table 13 and 14). Among the 212 villages having medical amenity, 88 villages are in the population range of 500-1,999 and 85 villages are in the population range of 2,000-4,999. The remaining 13 and 26 villages fall in the population ranges of less than 500 and 5,000+ respectively (Table 15).

Out of total 1,516 inhabited villages in the district, 1,304 villages do not have any medical facility but the same is available at a distance of less than 5 kms. for 61 villages, at a distance of 5-10 kms. in respect of 138 villages and beyond 10 kms. for the remaining 1,105 villages (Table-16).

The availability of beds in the towns of the district is shown in Table 19.

TABLE 19

No. of beds in medical institutions in towns

Class, name and civic status of town		No. of beds in medical institutions per 1,000 population
1		2
I Dhule (M. Cl.)	..	1.79
III Dondaicha (M. Cl.)	..	0.77
II Nandurbar (M. Cl.)	..	1.33
IV Nawapur (C. T.)	..	1.05
III Shahade (M. Cl.)	..	0.48
III Shirpur (M. Cl.)	..	2.26
III Talode (M. Cl.)	..	3.79
All towns	..	1.67

On an average there are 1.67 beds per thousand of population in the urban areas of the district. Within the district, Talode town has the highest proportion of beds (3.79 beds per thousand of population). The lowest proportion is in Shahade tahsil with only 0.48 beds per thousand of population.

Drinking water

Drinking water facility is available in all the 1,516 inhabited villages of the district.

Post and Telegraph

Only 371 villages (24.47%) of the total 1,516 inhabited villages of the district have the availability of the post and telegraph amenity. These villages cover 52.04 per cent of the rural population of the district. Sindkhede tahsil has the largest net work of post and telegraph amenity covering nearly half of the villages (48.95%) and 71.14 per cent of the rural population of the tahsil. The position of Akrani, Akkalkuwa and Talode tahsils are very poor in this respect. Only 9, 10 and 10 villages (5.63%, 5.41% and 10.99%), have some kind of post and telegraph facility. The population covered by these villages are 14.99 per cent, 20.79 per cent and 28.89 per cent respectively. Due to the forests and hilly areas in these tahsils, the progress on this line may be slow.

1,145 villages do not have any kind of post and telegraph amenity. But the same is available at a distance of less than 5 kms. for 49 villages, between 5-10 kms. for 111 villages and the inhabitants of the remaining 985 villages have to cover a distance of more than 10 kms. to avail of this amenity.

Of the 371 villages having post and telegraph amenity, 17 villages have less than 500 population ; 184 villages fall in the population range of 500-1,999 ; 140 villages fall in the population range of 2,000-4,999 and the remaining 30 villages have more than 5,000 population (Table 15).

Market/Hat

Market/hat is held only in 81 (5.34%) villages in the district and these villages account for 18.82 per cent of the rural population of the district. It is observed that in Akrani, Talode and Nawapur tahsils, market/hat is held hardly at 1 to 3 villages.

1,435 villages do not have the facility of market/hat. But the same is available at a distance of upto 5 kms. for 66 villages; 5-10 kms. for 156 villages and beyond 10 kms. in respect of the remaining 1,213 villages. Of the 81 villages where market/hat is held, 9 villages are in the population range of less than 500, 14 villages are in the population range of 500-1,999, 34 villages are in the population range of 2,000-4,999 and the remaining 24 villages are in the population range of 5,000+.

Communications

858 (56.60%) villages out of the total 1,516 inhabited villages of the district, have the availability of bus stop/railway station/water way within the villages and they serve more than three-fourth (76.74 %) of the rural population of the district. Within the district, Sakri tahsil has the highest communication facilities with 85.71 per cent villages covered by it, followed by Shahade (84.44 %) and Dhule tahsils (84.28 %). There are 658 villages in the district which do not have any kind of communication facility. The same is available within a distance of 5 kms. for 27 villages, at a distance of 5-10 kms. in respect of 33 villages and beyond 10 kms. for the remaining 598 villages.

From Table 15, it is seen that higher the population size of the villages, more are the communication facilities available. Among the 858 villages, 154 villages with this amenity are in the population range below 500, 524 villages are in the population range of 500-1,999, 49 villages are in the population range of 2,000-4,999 and the remaining 31 villages in the population range of 5,000+.

Approach by Pucca Road

483 villages or 31·86 per cent villages in the district are approachable by pucca road and they serve 48.75 per cent of the rural population of the district. Dhule tahsil has the highest percentage (74.84 %) of villages linked with pucca road, while Akrani tahsil has no approachable pucca road at all. This may be due to the hilly area of the tahsil. Among the 483 villages, 94 villages in the population range of less than 500, 263 villages in the population range of 500-1,999, 102 villages in the population range of 2,000-4,999 and the remaining 24 villages in the population range of 5,000+ respectively are linked with pucca road.

Power Supply

The rural electrification programme was assigned importance from the third five year plan and this has resulted in the supply of power to the district from the Paras Thermal Station. 800 villages (52.77 %) in the district have been electrified and nearly three-fourth (74.18 %) of the rural population is benefited by this. In Dhule tahsil, 88.05 per cent villages have been electrified while only 5 per cent villages in Akrani tahsil get the power supply. Among the 800 electrified villages, 124 villages are in the population range of less than 500, 502 villages are in the population range of 500-1,999, 144 villages in the population range of 2,000-4,999 and the remaining 30 villages in the population range of 5,000+.

Villages which do not have any amenity (except drinking water) are 153 in number (Appendix III). Tahsilwise break-up of these villages is Akkalkuwa (62), Akrani (59), Shirpur (12), Talode (8), Dhule (4), Nawapur (4), Sindkhede (2), Nandurbar (1) and Shahade (1). The non-availability of any kind of amenity (except drinking water) in 153 villages, 197 villages without any school, 1,304 villages devoid of medical facility, 1,145 villages not having postal facility, no market/hat in 1,435 villages, 658 villages without the facility of bus stop/railway station/water way, 1,033 villages not approachable through pucca road and 716 villages not having power supply, is certainly not a happy situation. A positive relationship between he size of village and amenity provided is observed.

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

About one-fifth of the total area of the district is under forest, which is a substantial proportion as compared to state average. The forest in the district is a reserved one and is one of the valuable forests in the state. The forests are mainly situated on the sloping hills of Sahyadri and Satpuda ranges. They are also situated on the plateaus in Shahade, Shirpur, Akkalkuwa, Nawapur, Nandurbar, Sakri, Talode and Akrani tahsils. They are of 'Mixed Deciduous' type and are commercially very important. The most valuable species found is 'Teak' associated with Khair, Palas, Sadada, Shisam, Tiwas, Haldu, Kalam, Ain, Biya, Dhavada, Shaman, Sala, Bor, Hiver, Anjan etc. The other commercially important species are (1) Tendu and Apta leaves used in bidi industry, (2) Mohwa flowers and fruits used in the manufacture of liquor, (3) Kadhai for gum, (4) Palas for propagation of lac and (5) Khair for house and field purposes. Bamboo is also found all over the Satpudas and it is chiefly used in the manufacture of paper. The forests have a number of Charoii trees which produce valuable dry fruits and are used in confectionery and other cookings. The Rosha grass which is found in large areas of Akrani tahsil is used for producing scented oil and has a great demand from outside the country.

Irrigated, Un-irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source), unirrigated area and culturable waste is given in columns 16, 17 and 18 of the Village Directory. The district has an area of inhabited villages are 1,154,024.92 hectares. The cultivable area constituted 67.39 per cent of the total area. The irrigated area in the district accounts for only 7.05 per cent of the total, cultivable area. Within the district, Akrani tahsil has merely 0.31 per cent area under irrigation. Shahade tahsil has the highest (13.56 %) area under irrigation. Sindkhede tahsil has 82.94 per cent cultivable area which is highest proportion within the district. The lowest cultivable area has been found in Akkalukuwa tahsil (40.03 %) (Table 20).

TABLE 20

Distribution of villages according to the land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Dhule ..	159	196,525.00	65.39	8.26
2	Sakri ..	182	258,288.61	54.82	7.31
3	Nawapur ..	128	115,035.26	66.34	1.32
4	Nandurbar ..	149	103,677.27	77.85	8.31
5	Talode ..	91	35,066.00	71.31	8.19
6	Akkalkuwa ..	185	86,740.67	40.03	1.46
7	Akrani ..	160	31,469.31	78.69	0.31
8	Shahade ..	180	103,605.00	81.88	13.56
9	Shirpur ..	139	90,293.15	78.29	5.46
10	Sindkhede ..	143	133,324.65	82.94	7.37
	Total of all tahsils ..	1,516	1,154,024.92	67.39	7.05

Staple Food

Table 21 shows main staple food in each tahsil of the district.

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of tahsil	Main staple food
1	2	3
1	Dhule ..	Wheat, Jowar
2	Sakri ..	Whear, Jowar
3	Nawapur ..	Rice, Jowat
4	Nandurbar ..	Rice, Wheat
5	Talode ..	Rice, Jowar
6	Akkalkuwa ..	Rice, Jowar
7	Akran i ..	Jowar, Maize
8	Shahade ..	Wheat, Jowar
9	Shirpur ..	Jowar, Bajra
10	Sindkhede ..	Jowar, Bajra

In almost all the tahsils Jowar is the main staple food of the people. Next in order of importance is wheat, rice and bajra. Western tahsils of the district namely, Nawapur, Nandurbar, Talode and Akkalkuwa are consuming rice with jowar, whereas eastern tahsils of Shirpur and Sindkhede consume jowar and bajra. Southern tahsils of Sakri and Dhule consume wheat along with jowar.

Municipal Finance

Table 22 gives per capita receipts and expenditures (in rupees) for every town in the district.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditune (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
I Dhule (M. Cl). ...	68.87	44.00	24.87	58.35	8.20	26.97	2.32	8.91	11.95
III Dondaicha (M. Cl.) ...	65.97	43.18	22.79	63.42	17.88	23.02	17.27	1.97	3.28
II Nandurbar (M.Cl.) ...	92.29	42.31	49.98	89.96	12.56	27.68	7.29	30.95	11.48
IV Nawapur (C.T.) ...	19.60	13.87	5.73	18.95	10.90	0.85	0.02	0.09	7.09
III Shahade (M. Cl.) ...	129.99	42.40	87.59	112.08	16.39	33.86	19.60	2.08	40.15
III Shirpur (M. Cl.) ...	64.56	36.05	28.51	70.91	11.70	19.67	20.52	2.56	16.46
III Talode (M. Cl) ...	37.40	20.45	16.95	40.44	9.62	12.27	0.75	5.04	12.76
Total ...	72.02	40.27	31.75	65.48	10.54	24.66	6.53	10.48	13.27

The average per capita receipts in various towns of the district stand at Rs. 72.02 out of which Rs. 40.27 are realised through taxes and Rs. 31.75 through other sources. The highest per capita receipts are in Shahade town (Rs. 129.99) and the lowest in Nawapur town (Rs. 19.60). The total expenditure incurred per head is Rs. 65.48. Out of this, Rs. 10.54 are incurred on general administration, Rs. 24.66 on public health and conveniences, Rs. 6.53 on public works, Rs. 10.48 on public institutions and Rs. 13.27 on other aspects. Even the expenditure incurred is highest in Shahade town (Rs. 112.08).

Minerals

Most of the district is covered by Deccan traps, which have plagioclase felspar labrodorite and pyroxene augite as the main minerals. The trap being dense, hard and durable is used as building stone, road metal etc. No minerals of economic importance are so far recorded in the district. Hence, the mining activities are therefore, restricted to quarrying of stones, clay etc.

Fisheries

Fishing activities in the district are restricted to inland waters only rivers, tanks and ponds being the chief sources. Though the total length of the perennial rivers in the district is about 770 kms. perennial and seasonal tanks providing water spread area is rather inadequate for development of fishing industry.

The commercially important varieties of fish found in the district are Kirkit or Shinghala, Murrel, Shivda (Pahadi or Daku), Chamar or Chalat, Pal or Dandaonya, Khavlya, Khaval, Kolshi, Zinga, Boi, Kalundar, Kharbi and Muri. Since these varieties are of not fast growing type, quick growing " Bengal Carps " are stocked annually in the perennial water tanks for propagation of pisciculture. The varieties stocked are Catla-Catla, Rohu and Mrigal.

Industries

The district has remained much behind as far as the large scale industries are concerned. Inadequate electric power supply and transport facilities could be one of the important reason. The cotton textile mill at Dhule is the large scale industry in the district. There are other registered factories like cotton ginning and pressing, munufacture of edible oils, bidi-making, repairs to motor vehicles, leather works and bone mills. The ginning and pressing industry has acquired a significant place in the set-up of the district because of a large scale production of cotton. The district is a leading groundnut producing area, hence there are number of oil mills. There are two co-operative sugar factories. Recently, under the Dairy Development Programme, dairy co-operatives have been established and milk is collected daily and the same is distributed to other districts of the state. The important cottage and small scale industries are handloom, powerloom, dyeing and printing, black-smithy, carpentry, cane and allied products, brick and tile manufacturing and soap making. These industries provide employment to a considerable number of persons in rural as well as urban areas.

Trade and Commerce

Cotton is the most important item of export from the district. Groundnut, chillies, oil-seeds, starch, milk, jowar and pulses are the other items of export along with cotton which are largely exported to Bombay and Gujarat. (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town		Most important commodities		
		Manufactured	Exported	Imported
1		2	3	4
I	Dhule (M. Cl.)	.. Metal products	Milk	Iron and Steel
III	Dondaicha (M. Cl.)	.. Starch	Starch	Foodgrains
II	Nandurbar (M. Cl.)	.. Edible oil	Chilli	Hardware
IV	Nawapur (C. T.)	.. Groundnut oil	Pulses	Tur
III	Shahade (M. Cl.)	.. Groundnut oil	Cotton bales	Cloth
III	Shirpur (M. Cl.)	.. Cotton ginning and pressing	Cotton bales	Pulses
III	Talode (M. Cl.)	.. Gur	Jowar	Sugarcane

Charoli the seed of 'Char' which is used in making sweetmeats is exported from Akrani tahsil to Surat and Bombay. The district is well-known for producing milk and milk products. Milk, ghee and butter are sent to Bombay practically daily by trucks and rail. Rosha grass oil which is highly in demand in western countries is exported to Bombay. The chief articles of import are food grains, hardware, iron and steel, salt, coconuts, machinery, cloth and sugarcane. Most of the articles are imported from Bombay by rail.

Dhule, Dondaicha, Shirpur, Nandurbar, Shahade, Nawapur, Talode and Sakri are trade centres for agricultural produce. Among these places Dhule, Nandurbar and Dondaicha are famous for wholesale trade.

Slum Population

Table 24 indicates proportion of slum population to total population of the towns in the district and their densities per km^2.

TABLE 24

Proportion of slums population in towns

Class, name and civic status of the town 1		Proportion of slum population to total population of the town 2	Density in slums (per km^2.) 3
I Dhule City (M. Cl.)	...	2.28	43,691
II Nandurbar (M. Cl.)	...	There are no notified slums area in the municipal limits, hence the information shows nil.	
Total	...	2.28	43,691

Places of Tourist's Importance

Toranmal occupying the highest range of the Satpudas covering. Akrani tahsil is a hill station and the only place of its kind attracting the tourists. It is nearly 144.84 kms. from Dhule the district headquarters. Toranmal enjoys a salubrious and cool climate even during the hot season. It is a long, narrow land with a height of 1,036.32 metres above sea level. Even at this height, there is a large natural lake known as Yeshvant lake adding beauty to the already pleasant spot. About one and half kms. away there is a valley called *Sitakhai* wherein a wall like formation could be seen standing erect. There is also the echo point. The government has already set-up fully furnished holiday camps and a restaurant for the visiting tourists. Though it is a good hill station, the tourists are not attracted much because of the difficult access to the hill station and the difficulty of transport. There are two temples dedicated to Gorakhanath and Nagarjun, where a fair is held on Mahashivaratri day. Toranmal also has historical importance in that which is supposed to be the ancient capital of the Mandu dynasty.

Sarangkheda in Shahade tahsil is known for a lovely shrine of single faced Dattatreya situated on a rising ground with its tall shikhar over looking the village, thus attracting the tourists. The idol of Datta is believed to have been brought from Mahur in Nanded district and is held in deep reverence. There is a fair held in honour of the deity on Margahsirsha Paurnima, when over a lakh of people are attracted to this place.

Prakashe, a village in Shahade tahsil situated on the bank of Tapi river has been known as a centre of pilgrimage since 17th century. Recent excavations by the Archaeological Survey of India at this place have disclosed details of the Chalcolithic period of the History of Maharashtra. The temples of Prakashe are well built and are considered sacred. The most important is the Kedareshwar temple which has double 'Gabhara', the first one holding a ling of Kedareshwar Mahadeo and the second one that of Kashi Vishweshwar. It is commonly believed that after making the pilgrimage of all the tirthkshetras of India, if this place is not visited, the pilgrimage remains incomplete. The next important temple known as Gautameshwar Mahadeo temple is built by Rani Ahilyabai Holkar situated on the banks of river Gomai. Other famous temple is Sangameshwar Mahadeo temple built in Muslim style and looks as if it were a converted mosque. To the west of the village is a temple of Goddess Mansapuri with a 13.71×5.49 metres mandap supported on 16 pillars all bearing some remarkable carvings. The Kashi Vishveshwar temple built by one Dwarkadas is the most neatly and cleanly maintained temple in Prakashe. Its door frame is beautifully decorated by lovely patterns and designs.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsil wise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and improrant infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown alongwith the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The " un-inhabitated " villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i. e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (i) Tahsilwise abstract of educational, medical and other amenities;

Appendix (ii) Land utilisation data for census towns;

Appendix (iii) Tahsilwise list of villages with no amenities available; and

Appendix (iv) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (iii) and (iv), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under:—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in Km^2.

Column 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (—) is shown in the column and next to it, brackets the distance from the village in broad ranges viz., upto 5 km, 5-10 km, and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i. e.* secondary, middle and and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :

Primary or Secondary School	..	P
Junior Secondary or Middle School	..	M
Matriculation or Secondary School	..	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).		PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.		C
Industrial School	..	I
Training School	..	Tr.
Adult Literacy Class/Centre	..	AC
Other Educational Institutions	..	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5-10 kms, and above 10 kms, of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows:—

Hospital	..	H
Maternity and Child Welfare Centre	..	MCW
Maternity Home	..	MH
Child Welfare Centre	..	CWC
Health Centre	..	HC
Primary Health Centre	..	PHC
Primary Health Sub-centre	..	PHS
Dispensary	..	D
Family Planning Centre	..	FPC
T. B. Clinic	..	TB
Nursing Home	..	NH
Registered Private Practitioner	..	RP
Subsidised Medical Practitioner	..	SMP
Community Health Worker	..	CHW
Others	..	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village:—

Tap water	..	T
Well water	..	W
Tank water	..	Tk
Tube-Well water	..	TW
Hand pump	..	Hp
River water	..	R
Fountain	..	F
Canal	..	C
Lake	..	L
Spring	..	S
Nallah	..	N
Others	..	O
Information Not Available	..	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are:—

Post Office	..	PO
Telegraph Office	..	TO
Post and Telegraph Office	..	PTO
Telephone Connection	..	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows:—

Bus Stop	..	BS
Railway Station	..	RS
Navigable Water-way (including river, canal and back-water etc.).		NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information:—

Pucca Road	..	PR
Kaccha Road	..	KR
Navigable River	..	NR
Navigable Canal	..	NC
Navigable Waterway (Other than river or canal).		NW
Foot Path	..	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes:—

Electricity for Domestic purpose	..	ED
Electricity for Agriculture	..	EAg
Electricity for Other purpose like Industrial, Commercial etc.		EO
Electricity for All purposes listed above		EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories:—

(1) Forests.

(2) Not available for cultivation.—

(a) lands put to non-agricultural uses,

(b) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.
  (a) permanent pastures and other grazing lands;
  (b) lands under miscellaneous tree crops and groves not included in the net area sown;
  (c) culturable wastes.
(4) Fallow lands;
  (a) fallow lands other than current fallows;
  (b) current fallows.
(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or un-cultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under:—

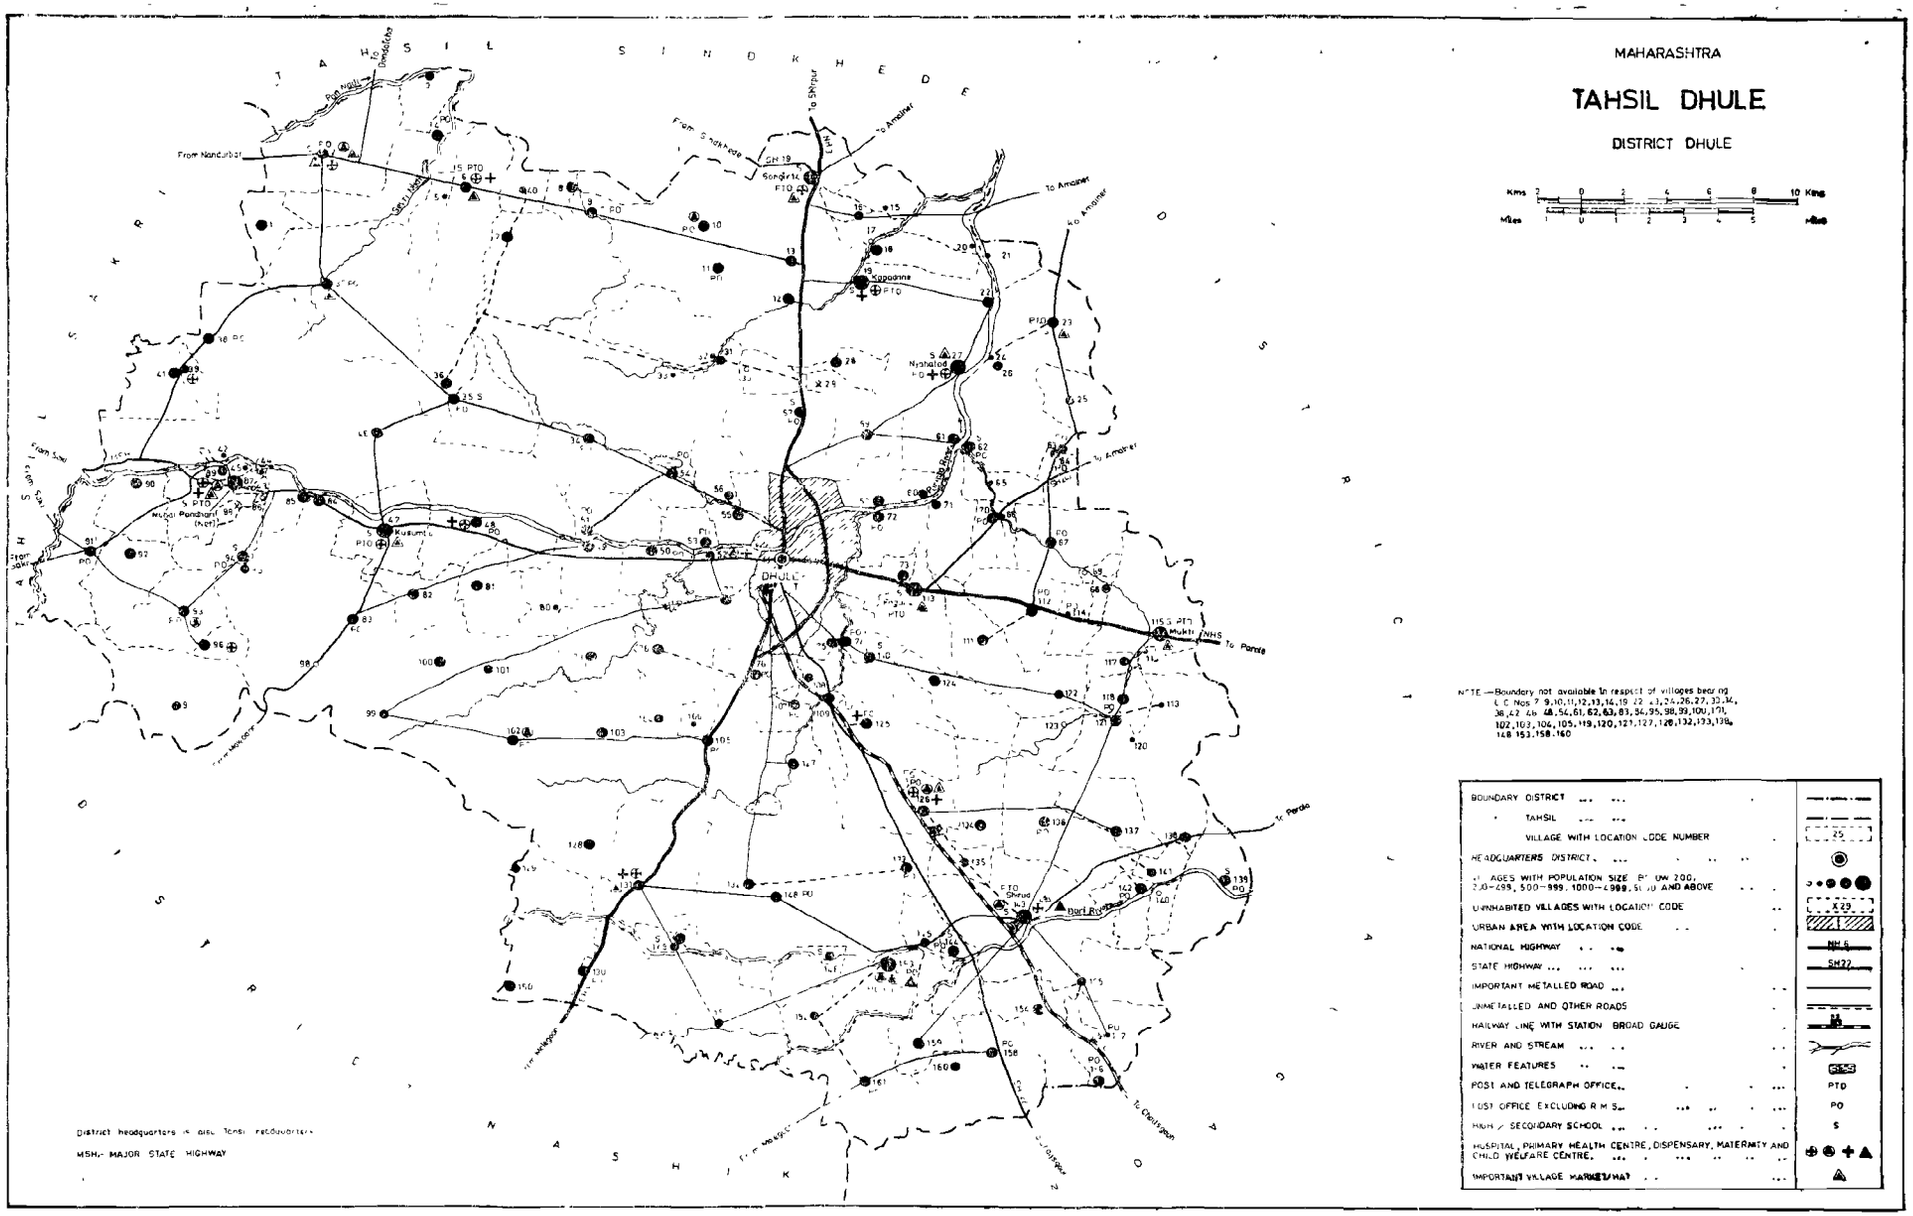

Government Canal	..	GC
Private Canal	..	PC
Well (without Electricity)	..	W
Well (with Electricity)	..	WE
Tube Well (without Electricity)	..	TW
Tube Well (with Electricity)	..	TWE
Tank	..	Tk
River	..	R
Lake	..	L
Water Fall	..	WF
Others	..	O
Total	..	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, wheather they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under building, roads, railways, rivers, canals etc. from part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very highcost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used:—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II

TOWN DIRECTORY

Note explaining The Abbreviations used in Town Directory

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns, in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town:—

Municipal Corporation/Corporation		M. Corp.
Municipality	..	M.
Municipal Council	..	M. Cl.
Non-Municipal	..	N. M.
Cantonment Board/Cantonment	..	C. B.
Notified Area/Notified Area Committee/Notified Committee		N. A. C.
Census Town	..	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km^2 number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil headquarters and the nearest city (Urban area with a population of 1,00,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	..	PR
Kuccha road	..	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are :—

Sewer/Sewerage	..	S
Open surface drains	..	OSD
Box surface drains	..	BSD
Sylk drains	..	SD
Cesspool method	..	CD
Pit system	..	Pt
Head Loads	..	HL
Baskets	..	B
Wheel Barrows	..	WB
Septic Tank Latrines	..	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used:—

Overhead Tank	..	OHT
Service Reservoir	..	SR
River Infiltration Gallery	..	IG
Borewell Pumping System	..	BWP
Pressure Tank	..	PT
Tubewell water/Hand pump	..	TW
Tap water	..	T
Well water	..	W
Tank water	..	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the

number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	..	H
Dispensary	..	D
Health Centre	..	HC
Family Planning Centre	..	FC
T. B. Clinic	..	TB
Nursing Home	..	NH
Ayurvedic	..	A
Unani	..	U
Homoeopathic	..	Hom
Others	..	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	..	A
Science only	..	S
Arts and Science only	..	AS
Commerce only	..	C
Arts and Commerce only	..	AC
Combined for all categories– Arts, Science and Commerce.		ASC
Law	..	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are:—

Shorthand	..	SH
Typewriting	..	Type
Shorthand and Typewriting	..	Sh. Type
Others	..	O

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.
