CENSUS OF INDIA, 1981

DISTRICT CENSUS HANDBOOK

PART A—VILLAGE AND TOWN DIRECTORY

DHENKANAL

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in views. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corelation of the amenities

with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and accordingly to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirement of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement-IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement-V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the column on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahasil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahasil/Police station/C. D.Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. R. Nanda, I. A. S., the Director of Census Operations, Orissa on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
The 26th April, 1982

PREFACE

It has been the tradition of Indian Census to present demographic data in as detailed a manner as possible so as to serve effectively the interests of the users of Census data. 1981 Census has been completed leaving behind a vast mass of data collected carefully and meticulously on a country-wide basis by an army of trained enumerators. It is needless to mention that modern Census is no more confined to mere counting of heads. It is a kind of stock-taking, as it were, of the nation's human wealth. It has collected information of every individual, besides a host of other activities, institutions, establishments, services and so on. Thus, it has become an indispensable instrument of policy for development planning-referred to by planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of man in socio-economic and cultural settings.

District Census Handbook was first introduced as an auxilliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form in subsequent censuses. Under the existing instruction, the Director of Census has the responsibility of providing the Census data as well as non-census socio-economic and administrative statistics for this publication which is the responsibility of the State Government. In 1951 and 1961, it was published in one volume. During 1971, this publication was proposed to be presented in three parts. Part-A incorporated the Town and Village Directories, Part-B incorporated the Primary Census Abstract and provided data upto village level for the rural area and upto enumeration block level for the urban area. Part-C incorporated other Census tables and administrative statistics.

According to the publication programme of 1981 Census, it has to be pubilshed in two parts. Part-A will comprise the Village and Town Directory whereas Part-B will contain Village and Town-wise Primary Census Abstract. The first Part— Part-A consists of important statistical information relating to each town besides an array of statistical data relating to land use and various other amenities available in each village. Part-B of the present publication contains the essential census data known as Primary Census Abstract which provides demographic details of each district, tahasil, police station and down to each village and town and within the town, each ward. The aforesaid statistical information is enriched by the administrative map of the administrative units viz., district, tahasil and police station, availabe in the publication. These maps have been prepared in the Directorate of Census on the basis of maps obtained from the competent local authorities. In the Police Station maps, villages have been presented by their location code number for want of space. For the names of villages, one would have to refer to the alphabetical list of village of each tahasil, which are available both in Part-A and Part-B for facility of the readers.

With the object of avoiding delay and also to make each volume nandy and not-too-bulky, it has been decided to bring out 1981 District Census Handbook in two parts.

In pursuance of the scheme for publication of the District Census Handbook, an analytical note has been provided explaining the census concepts adopted in the operation for easy appreciation of the subjects covered in the directory. An administrative map of the district is given at the beginning of the volume. Brief history of the district has

been provided for introducing the district to the reader. The scope of Village Directory, Town Directory, Statements and Primary Census Abstract has been explained with reference to the contents of statements available in the publication.

The geographical aspect of the district including decadal jurisdictional changes available in the publication is intended to make it more informative. Another venture of 1981 is presentation of major characteristics of the district particularly in relation to the economic resources as furnished by the district authorities in the various fields of administration. This is directed to provide an interesting profile of the district to the reader as well as appreciation of developmental activity in the district during the decade. Notes on different codes used in this directory have been provided for the convenience of the reader in understanding the data. Note on places of religious/historical interest has been provided to make the publication more interesting. The analysis of census results of the district at the end will be of some interest to the readers and data users.

Information on amenities in the Village Directory has been collected from the Tahasildars and Block Development Officers. A very few selected items were collected through the census enumerator during his door-to-door visit. The Executive Officers of Municipalities and Notified Area Councils provided such data on towns. The collection and compilation of such massive data of each village and town was a stupendous task. Despite all possible care taken through intensive check and re-check to remove discrepancies in facts and figures, possibility of errors still creeping in can not be altogether ruled out.

I must express my deep gratitude to Shri P. Padmanabha, I. A. S., Registrar General and Census Commissioner, India and Shri N. G. Nag, Deputy Registrar General (Socia Studies) for the timely guidance and advice through circulars.

I must place on record my deep appreciation and thanks to the Departments of Government of Orissa, heads of Departments, local bodies, District Officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for whose active co-operation and help the voluminous compilation has been possible.

For providing additional information on general characteristics of the district as economic activity, decadal changes (1971—81) of special note, I am grateful to Shri A. J. Alex, I. A. S., District Magistrate and Shri K. C. Mishra, O. A. S. (I), Shri P. C. Patnaik, O. A. S. (I), Additional District Magistrate-cum-District Census Officers, Dhenkanal who had taken keen interest in making this compilation more informative.

For timely scrutiny, compilation and tabulation of District Census Handbook data, the supervision and assistance rendered by Shri B. Sahu, O. A. S (I), N. C. Dutta, O. A. S. (I), J. Panda, O. A. S. (I), P. C. Roy, O. A. S. (I), and P. K. Mohapatra, O. A. S. (I), Deputy Directors-in-charge of Regional Tabulation Offices and their staff are worth mentioning. The job would have been difficult but for their diligent and tireless effort

In my office, I am specially thankful to Shri S. K. Swain, Deputy Director, Shri Madan Mohan Das, O. A. S., Deputy Director, Shri C. R. Mohanty, Asst. Director and the staff of District Census Handbook, Map and Printing branches of the Census Directorate for diligence and zeal shown in this important assignment. Its expeditious preparation has placed a heavy burden on all officers and staff of this office. To each of them I am deeply obliged. The Deputy Director of Survey & Map Publication, Orissa, Cuttack has ensured printing and to him I offer my thanks.

Bhubaneswar,
September, 1982.

A. R. NANDA

ANALYTICAL NOTE

Census Concepts

Some of the important concepts and definitions used in 1981 Census and frequently mentioned in this publication are briefly explained below.

Village

It has been the Census tradition to present statistics by rural-urban break-up. Villages and Towns are universally accepted as the basic units of human habitation. A "Village" refers to any tract of land recognised as a village by the local administration in the revenue record. The revenue village may have a definite surveyed boundary or not. The revenue village may comprise several hamlets which do not have definite boundary or areas distinctly marked. The revenue village is inclusive of the sites of residence of the inhabitants and the entire area including hills, nalas, cultivable land and village forest, but excluding reserve forest. An uninhabited village is one which does not have any residential population in the entire tract. A revenue village may comprise several hamlets with a boundary in case of a surveyed village or a notional boundary in case of unsurveyed village; but the entire village is one unit for presentation of census data.

There are some forest villages located inside reserve forests and recognised by the State Government, which have been taken as villages for the purpose of census. Similarly, inside the reserve forest, some clusters of habitation were located, which are sometimes unauthorised in the eye of law. Such cases were also recognised as villages by way of treating clusters inside the jurisdiction of a forester's beat as one village. In course of the decade, several areas in the State remaining unsurveyed upto the previous census, have been surveyed in the meanwhile and such villages were included in the frame of current census.

Town

No society can be strictly termed as fully urban or completely rural. The dividing line is a far from sharp, since condition varies from country to country and it has not been possible to formulate a uniform definition which can be applicable to all places.

For the purpose of 1981 Census in India, an urban area has been defined as :

(a) all places with a Municipality, Corporation or Cantonment Board or Notified Town Area, and

(b) all other places satisfying the following criteria :

(i) a minimum population of 5, 000,

(ii) atleast 75 per cent of the male working population engaged in non-agricultural (and allied) activity,

(iii) a population density of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile).

Similar criteria were also adopted during 1971 Census.

Thus the area statutorily notified by the State Government as "Municipalities" and "Notified Area Councils" have been brought under the urban frame of Census. Besides, there are some marginal cases having distinct urban characteristic which as such do not qualify to be town by the State Government. Such cases—13 in number throughout the State were finalised by the Director of Census in consultation with the District Magistrates, which have been presented under the nomenclature of non-statutory census town, satisfying the following conditions :

(a) a minimum population of 5, 000 as projected in 1981 ;

(b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits ;

(c) a density of population of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile)

Classification of Towns

It has been customary for the census to classify the towns according to the size of their population. For 1981 operation, the classification was as follows :

CLASS	POPULATION
I	1,00,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Urban Agglomeration

The concept of "Urban Agglomeration" introduced during 1971 Census has also been adopted during 1981 to take care of the continuous urban spread of a recognised urban area. Very often, large railway colonies, university campuses, port areas and military camps etc. come up around the statutory boundary limit of the city or town having distinct urban characteristics. Such areas may not by themselves qualify to be treated as towns, but form a continuous spread with the town as 'out-growths' of the town and deserve to be treated as urban. Such town(s) together with their out-growths have been treated as urban units and are called "Urban Agglomerations". Thus an Urban Agglomeration may comprise :

(a) a city with continuous urban out-growth, (the part of the out-growth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) or

(b) one town with similar out-growth or two or more adjoining towns with their out-growths as in (a) or

(c) a city and one or more adjoining towns with their out-growths all of which form a continuous spread.

Accordingly, eight Urban Agglomerations have been formed in the 1981 Census throughout the State.

Standard Urban Area

During the 1971 Census, a new concept of "Standard Urban Area" was introduced in the context of urban classification. The Standard Urban Area is defined as the projected growth area of a city or town having a population of 50, 000 or more during a period of two or three decades. While delineating Standard Urban Area it is not only necessary to take into account the towns and villages which will get merged into it, but also the intervening areas which are potentially urban. The Standard Urban Area is a long-term planning area having a growth potential in a longer time span. In the context of developmental planning for urban areas, it is desirable to fix the Standard Urban Area beyond the boundary of large town having growth potential over a period of 20 years or so.

The standard urban area includes all areas which have any or all of the following characteristics (b) to (e), while characteristic (a) should be the basic minimum :

(a) Core town having minimum population of 50,000;

(b) Predominent urban land use;

(c) Intensive interaction with urban centres as reflected in communication for the purposes of work and secondary educational facilities; extension of city bus service, sale of commodities like milk, dairy products, vegetables (other than those transported by rail or truck haul) and purchase of food grains, clothes, general provisions etc. by the consumers directly;

(d) Anticipated urban growth as a result of future location of industry, market, transport and communication, administrative and servicing facilities;

(e) Existence of big villages with large population of working force engaged in non-agricultural and industrial categories.

Taking these factors into account the following standard urban areas were formed during the 1971 Census; 1. Sambalpur

2. Raurkela, 3 Baleshwar, 4. Cuttack, 5. Jeypur, 6. Brahmapur, 7. Bhubaneswar and 8. Puri. The standard urban areas of these towns were finalised in consultation with the Town and Country Planning Organisation of Government of India and Town Planning Organisation of Government of Orissa and are continued in 1981 Census.

There is subtle difference between the standard urban area and urban agglomeration. For the urban agglomeration out-growths should be contiguous having distinct urban characterstics, whereas, standard urban areas would cover both urban and rural areas around a core town which are likely to be urbanised within a period of two to three decades.

Building

A "Building" is generally a single structure on the ground. Sometimes, it is made up of more than one component unit which are used or likely to be used as dwellings (residence) or establishments, such as shops, business houses, offices, factories, workshops, schools, places of entertainment, places of worship, godowns and stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. Usually, a structure will have 4 walls and a roof. However, there are some areas where the very nature of construction of house is such that there may not be any wall. A typical example of this may be found in the Nolia habitation at Puri, where the house does not have wall, but an entrance and the conical roof which almost touches the ground. Such structures are also treated as buildings.

Census House

A 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

An "occupied residential house" is a census house which is partly or wholly used for the purpose of residence at the time of Census enumeration.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of un-related persons or having a mix of both. Example of unrelated households are boarding houses, messes, hotels, residential hotels, rescue homes, jails and ashrams etc. These are called "institutional households". There may be one member households, two-member-households or multi-member-households. For Census purposes, each one of these types is regarded as a household. If a group of persons who are un-related to each other live in a census house, but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person is treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen.

Enterprise

An "Enterprise" is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. An enterprise may be owned and operated by one household or by several households jointly (on a partnership basis) or by an institutional body. The activities of an enterprise may be carried on in a single census house or in more than one census house or in the open i.e. without premises. The activity of the enterprise may also be carried on only for a part of the year but on a fairly regular basis. It may also be possible that more than one enterpreneurial activity can be carried out in one census house. However, the results of such economic census after tabulation are being brought out by the Central Statistical Organisation separately. This excercise was extended to provide data for the planners regarding categories of agricultural and non-agricultural enterprises. The voluminous data included location of enterprise, description of the activities of enterprise, nature of operation,

type of ownership, social group of owner, power/fuel used for the activity and the total number of hired persons usually working in the enterprise.

Literate

A person is considered to be literate if he is able to read and write in any language with understanding. A person who can merely read but can not write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less have been treated as illiterate, even if the child is going to school and may have picked up reading and writing a few odd words.

Scheduled Caste

The Scheduled Castes are specified in the Government of India (modification) order of 1956. 93 castes have been notified as Scheduled Castes in this State.

One caste, viz., 'Kuli' in Sambalpur district has been dropped from the Scheduled Caste list as per the Amendment Order, 1976.

Worker and Working Population

The population of a country can be divided into economically active and inactive. The economical active group is generally referred to as the working population. What proportion of our population are engaged in work or are economically active and what job they do for their living, these are the issues which the Census proposed to obtain through its massive operation in order to provide a broad dimensional picture of the labour-force. The Censuses conducted so far contain a wealth of economic data. There have been experimentations with the definitions from Census to Census and as a result, the definition of working force has rarely remained unchanged between two Censuses as would be evident from the paragraphs to follow.

"The means of livelihood" approach was adopted from 1901 upto 1951. From 1901 to 1921 the expressions used were "Workers" and "Dependents". In 1931, the concepts used were "earner", "working dependent" and "non-working dependent". In 1951, the categories were "self supporting persons", "earning dependents" and "non-earning dependents". In 1961 and 1971, however, there was a shift to the labour-force approach, according to which a person was treated as "worker" if his activity during the reference period was productive one. Thus, from 1961 the concept of worker and non-worker came into being. The difference in the concepts in 1961, 1971 and 1981 Censuses is summarised below :

(a) 1961 CENSUS

"Workers" = mian workers + marginal workers of 1981.
"Non-workers" = non-workers of 1981

(b) 1971 CENSUS

"Workers" = main workers of 1981.
"Non-workers" = marginal workers + non-workers of 1981.

The questions which were canvassed in the individual slips during 1981 Census to elicit information on the characteristics of the population were as follows :

I. Q. 14A Worked any time at all last year ?
Yes
No (H/ST/D/R/B/I/O)

II. Q. 14B If yes in 14A, did you work for major part of last year ?
Yes (1)/No. (2)

III. Q. 15A Main activity last year ?
Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

IV. Q. 15B 14B Yes—Any other work any time last year ? Yes (C/AL/HHI/OW)/No
14B No—Work done any time last year ? (C/AL/HHI/OW)

V. Q. 16 If no in 14A or 14B, seeking/available for work ? Yes (1)/No (2)

Basically, during 1981 Census the questions have been formulated so as to divide the population into those who have worked any time at

all during the last year and those who have not worked at all. Having classified the population into these two broad streams, the next attempt was to divide those who have worked any time into two sub-streams viz., those who have worked in some economic activity over a period of 6 months or more or in both the agricultural seasons and those whose work can be considered as marginal or secondary (i.e. less than 6 months). Finally an attempt has also been made to determine whether those who are non-workers or those who are marginal workers are either seeking or are available for work.

"Work" has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. In all these questions the reference period is one year preceding the date of enumeration. Some work viz., agriculture and household industry are carried on either throughout the year or during a particular season or part of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural season preceding the enumeration has been kept.

An attempt has been made in this publication to present data relating to "main workers", "marginal workers" and "non-workers" separately. In case of main workers the distribution of such workers among cultivators and agricultural labourers, those engaged in household industry and other workers have also been given. The main workers are those who have worked for a major part of the year preceding the enumeration.

"Marginal workers" are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of the year. The type of work in which marginal worker were engaged have been elicited through question 15B.

"Non-workers" are those who have not worked any time at all in the year preceding the enumeration.

If the number of main workers, marginal workers and non-workers are added up, one would arrive at the total population itself. In other words, these are exclusive categories.

Main activity of workers has been classified into the following four broad categories :

(i) Cultivator

A person is regarded as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops viz., wheat, paddy, jawar, bajra and other crops, such as sugarcane, groundnut etc. and pulses, raw jute and kindred fibre crops, cotton, etc. and does not include fruit, growing of vegetables or keeping orchard or groves or working of plantation like tea, coffee, rubber etc.

(ii) Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation, but merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

(iii) Household Industry

"Household Industry" is defined as an industry conducted by the head of household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. It should involve production, processing, servicing or repair of articles or goods, not on the scale of a registered factory. The larger proportion of workers in a household industry should consist of members of the household including the head.

The main characteristics of the "Household industries" are the following :

a) One or more members of the household must participate. Participation by hired labour must be minimum.

b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sell.

d) In an urban area the industry must be carried on in the precincts of the house in which the household lives. In the rural areas, the industry may be anywhere within the limits of the village.

e) The activity should not be on the scale of a registered factory.

f) Professions such as those practised by Pleader, Doctor, Barbar, Musician, Dancer, Dhobi, Astrologer etc. will not be Household Industry.

(iv) Other Workers

All workers i.e. those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or engaged in household industry are "Other Workers". This includes factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all Government servants, teachers, priests and artists etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry are other workers.

Other particulars, viz., name of the establishment, description of work, nature of industry, trade or service and class of worker were also obtained in respect of those who returned "household industry" or "Other work" as their activity.

Non-worker

In case of persons who are non-workers throughout, information relating to them has been obtained through categories, as mentioned below.

i) Household duties

ii) Students

iii) Dependents

iv) Retired persons or rentiers

v) Beggars etc.

vi) Inmates of institutions

vii) Other non-workers

(i) Household duties

This covers all persons who are engaged in un-paid home duties and who do no other work, or have not done any work at all during the last one year. If a person who normally attends to household duties is also engaged in some economic activity, then he or she is a worker. For example, a housewife may help in family cultivation or agriculture or make and sell cowdung-cakes etc. at odd times. She is treated as worker.

(ii) Students

This will cover all full-time students and children attending school. If a student participates in some economically productive work, like helping sometimes as an un-paid family worker in family cultivation etc. such students should be treated as a worker and not as student. Very often the daughter in the family helps in the household work though she is studying full time, in which case she is treated as student.

(iii) Dependent

This includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. Dependents include even able-bodied persons who can not be categorised in any other category of non-worker but are dependent on others.

(iv) Retired persons or rentiers

A person who has retired from service and is doing no other work and is not employed again in some full time work or engaged in some other work such as cultivation, business, trade etc. or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he/she does not have to work comes under this category. If a retired person is doing some work,in such case he/she is a worker.

(v) Beggar

This covers beggars, vagrants or persons without indication of source of income and those without specified source of subsistence, who are not engaged in economically productive work.

(vi) Inmates of institutions

This covers convicts in Jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc. in such institution. However, an under-trial prisoner enumerated in a jail is recorded for the work he/she was doing before he/she was apprehended. Similarly a person temporarily in a hospital or similar institution is recorded for the kind of work he/she was doing before being admitted into the hospital or institution. However, the previous work is not recorded in respect of long term under trial prisoner or convict or for long term inmates of penal, mental or charitable institutions. A person is considered as 'long term',if he or she is in such an institution for 6 months or more.

(vii) Other non-workers

This includes all non-workers who do not come under any of the above six categories, but are looking for work. A boy or girl who has completed education or has stopped studying and is looking for work comes under this category. Alternatively a person who is merely spending time at home as a dependent and is not doing any work and not seeking any work is not coming under this category. In case of students who may be seeking work and are quite prepared to give up studies, if they get a job they are to be recorded as 'Students'.

Area figure

In keeping with the census tradition, the Surveyor General of India provides the area figures for the State and district level. Hence the area figures of the district along with the spelling of the district name as adopted by the Surveyor General, India has been adopted in the publication, with a view to maintaining uniformity of data at the national level. The area figures of the units down below the district level, viz, tahasil, police station, towns have been given in sq. km. The Tahasildars had reported the area figures in acres in respect of the units in the rural area, whereas the Executive Officers of the urban bodies have reported the area figuers for the urban units. The area report in acres by such functionaries were converted into sq. km. Regarding the area of the villages, the same were also furnished by the Tahasildars. The total area of all tahasils of the district does not add upto the area of the district because the former represents the land-use area and is derived from the figures supplied by the local revenue authorities. Similarly the total of the village area may not tally with the rural areas of the tahasil. The difference may be due to the fact that the village area may not necessarily include the area under hills and rivers etc. which are included in the tahasil area. Besides, there are also varying methods on computation adopted at different levels. Area figures for the unsurveyed revenue villages have been left blank like the forest villages and are indicated as "Not available".

Though there has been no change in the boundary of the State between 1971-81, the revised computation in the area of some districts has resulted in marginal decrease of 135 sq. kms.

Density

The density (population per sq. km.) shown for the State/District/Tahasil/Police Station/Town have been worked out using the area figure corrected upto two places of decimals.

Spelling of administrative unit

As explained above, the spellings of district have been adopted from the Survey of India to maintain uniformity at all-India level However, the spellings of lower units, viz , tahasils, police stations, village, town are in confirmity with the spellings available in the State Government records.

Physically handicapped persons

It is customary for the Census to introduce new concepts in every Census Accordingly an attempt was made during the houselisting operation conducted in April-May, 1980 to find out the statistics regarding the physically handicapped

persons all over the country. Physically handicapped persons were broadly recorded under three categories, viz., totally blind, totally crippled and totally dumb.

The term "Totally crippled" refers to such persons who have not lost their arms or limbs. The loss of arms or legs or all the 4 limbs refers to loss of both the arms or loss of both the legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these i.e., both arms or both legs would be sufficient for classification as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus a paralytic who has lost use of both the legs or both the arms was taken as totally crippled, though the limbs are physically available. However, the loss of either one arm and/or leg did not classify a person as totally crippled. There are other situations where a person unfortunately suffers from more than one of the aforesaid disabilities. In such cases, the intention was to record the persons by greater disability. For example, a person may be both blind and dumb or blind and crippled. In such cases the intention was to find out the greater disability, whether blindness is considered as greater disability than either dumbness or being crippled. Similarly being crippled is greater disability than being dumb. In the extreme cases, where a person suffered from all the 3 disabilities, it was recorded under the category 'blind' which is certainly the most unfortunate disability. It was usual to find a person blind or crippled due to old age and such cases were also taken note of and categorised under appropriate classification since he suffered from disabilities.

Brief history of the District

The early history of the district of Dhenkanal remains obscure due to want of reliable materials. The political history related to a group of princely States except Anugul, an ex-feudatory State. It is one of the centrally located district of Orissa. The district came into being on 1.1.1948 when it was created consequent upon the merger of the princely states with the province of Orissa. It originally comprised the Ex-States of Dhenkanal, Hindol, Athmallik, Talcher, Pallahara and Rairakhol. Anugul was administered by the Superitendent of the tributary mahals earlier and subsequently in 1891 it became the district headquarters of Anugul district along with Kandhamal (now in Phulabani district) as a sub-division which continued upto 1936. For administrative convenience the Ex-State of Rairakhol was transferred to Sambalpur district with effect from 26.10.1949. Two villages viz., Kabatbandha and Goliamuhanpatna were transferred to Cuttack district in 1964. Thus, Dhenkanal and Anugul were two separate districts with its composite office located at Dhenkanal. The Collector of Dhenkanal was also the ex-officio Collector of Anugul. However, under the Anugul Laws Regulations (Repeal) Act, 1967, the status of Anugul as a district was changed to that of a a sub-division of Dhenkanal district and it became the seventh sub-division of the present district of Dhenkanal. No other district of the State has such a large number of sub-divisions except Sambalpur.

The district has been divided into 8 Tahasils, 23 Police Stations, 16 C. D. Blocks. The developmental administration is carried through the Block Development Officers and 229 Gram-Panchayats covering all the villages. So far as revenue administration is concerned it is supervised through the Sub-divisional Officers aided by 8 Tahasildars and supported by 86 Revenue Inspector Circles. There are 5 statutory towns and 4 non-statutory census towns in the district.

District Census Hand Books

Among the traditional documentation of the Census, the fairly comprehensive and uniform publication of District Census Handbook (D. C. H.) consisting of town and village directory and town and villagewise Primary Census Abstract (P.C.A.) has been found to be very useful and are constantly referred to by the planners and data users. The District Census Handbook is the only publication that incorporates the data down to a village level in rural area and upto ward level in the urban area. The data published in these volumes are of immense value to the planners, scholars and administrators for the purpose of village level, block level and district level planning and studies. It is a publication of the State Government. The cost thereof is borne by the State Government. However, the Director of Census of the State is responsible to the extent of providing necessary data which are obtained through Census.

This document was first published as an auxiliary to 1951 Census, consequent upon the request of the Government of India to State Government to publish District Census Handbooks containing statistical information relating to villages, towns and police stations etc. of the districts. The State Government agreed to this and decided to bring out District Census Handbook as a priced publication to be published in the State Government Press. This publication since then is continuing with unbroken chain. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a Police Station and District. It will not, however, be out of place to mention here that in many districts, complete list of villages is not maintained properly and the present list is the result of extensive enquiries and contacts with different agencies and can be regarded as exhaustive.

To make the data component more illustrative maps of the district, tahasil and police station are also published in the publication. The Police Station maps showing the villages as per the population size, having different amenities represented in approved legend will help the readers in easy appreciation.

According to the 1951 publication programme the District Census Handbook was published in one volume and did not contain information given in the village and town directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided in the District Census Handbook. The Primary Census Abstract was given under the heading "village statistics". However, the information on villagewise list of displaced persons, and information on small scale industries were presented in the 1951 District Census Handbook volume.

Similarly, 1961 Census publication was presented in one volume. This volume was divided into 3 parts. First part contained the introduction of the district, second part contained the census tables and the official statistics was given in the third part. The information given in the Village Directory and Town Directory for 1981 Census was not given in the 1961 District Census Handbook. The villagewise Primary Census Abstract was given in the second part under the heading of "Village Directory". The information on villagewise list of industries and tables on fairs and festivals were presented in 1961 District Census Handbook publication.

According to the 1971 Census publication programme, the District Census Handbooks were to be published in 3 volumes; Part-A containing the data on amenities, Part-B incorporating Primary Census Abstract (P. C. A.) and Part-C giving administrative statistics and census tables. District Census Handbooks, part-A and part-B for the 1971 Census could be published quickly. Both these volumes were in great demand by the data users, as they contained a vast mass of data on amenities available in the Village/Town alongwith demographic features. In regard to the District Census Handbook Part-C, we faced difficulties in collecting administrative statistics from various Offices and our progress in

publishing the report was considerably delayed. After obtaining necessary statistics, much difficulty had to be encountered in printing of the part-C, which was pending in the State Government Press at Cuttack for a pretty long time. Under compelling circumstances the manuscript could be printed in the Private Presses located at Cuttack and elsewhere. In view of the inordinate delay in collecting administrative statistics which would in any case be available to the data users in the publications of the respective Statistical bureaus/departments of the State Government there was re-thinking in the matter to drop the publication of part-C of the District Census Handbook for the 1981 Census.

However, it has been decided to publish the 1981 District Census Handbook in two parts. Part 'A' would be confined to village and town directory, whereas part 'B' would be confined to village and townwise Primary Census Abstract including Scheduled Castes and Scheduled Tribes Primary Census Abstract upto Police Station/ Town levels. Despite the fact that publication of both the parts in one volume would have enhanced the value, it could not be helped in respect of the bigger districts comprising large number of villages and towns. Therefore, the publication has been broken up into two volumes (Part 'A' and 'B').

By and large, the contents of the Village and Town Directory are almost similar to those adopted for 1971 Census, barring a few changes necessitated by the requirements of the planners and data users.

The new feature of 1981 format is having provision of the distance range of the particular amenities to a village where it is not present. A few items of information like adult literacy centres have been introduced in the village directory to meet some requirement of the Minimum Needs Programme.

Another introduction viz., "total population and number of households" for each village has been shown in the village directory to ascertain the co-relation of the amenities with population and number of household they serve. Since current day planning has been initiated from the Community Development Block level, villages coming under each Community Development Block has been furnished in the annexure of the village directory for the facility of the administrators and planners, which is a departure from the earlier Censuses.

Similarly in the Town Directory, information on Scheduled Castes and Scheduled Tribes population in statement-IV and availability of adult literacy centres in statement-V are innovations keeping in view the requirement of Minimum Needs Programme.

The significant change in the Town Directory is the provision of class of town in all statements for analysis of the infrastructure of amenities.

Both the Village and Town Directory and objectives of various columns thereunder alongwith the connotation of various abbreviations used therein have been explained in the relevant sections.

Scope of Village Directory

The data on village directory have been presented Tahasil/P.S.-wise and Village-wise. The village includes revenue village and the clusters of habitation located in any tract mentioned thereunder. The names of villages have not been arranged alphabetically since location code thereof have been provided in ascending order. However, for facility of the readers, an alphabetical list of villages under each Police Station with its location code numbers has been provided at the beginning of the village directory. In case of a village treated as an out-growth of an urban agglomeration, the code number and name have been provided minus data thereof which has been shown against such core town. In case of part-village forming a portion of an out-growth, the corresponding data has been shown in the village directory. In case of census towns, such villages have been listed in the village directory without any data on amenities, for which the town directory has to be referred to. However, the land utilisation data for such census town has been made available in Appendix—II

It has been the tradition of census to present maps of constituent administrative units beginning with the district, followed by Tahasils, and Police Stations thereunder. All the maps so presented in this volume have been authenticated by the concerned revenue authorities in so far as the boundary and spellings and locations are concerned. In case of the units adjacent to the coast land of the State, such maps have been cleared by the Survey of India through the office of the Registar General, India.

In addition to the district map, the administrative map of each Tahasil/Police Station has been given in the beginning of the village directory of that Tahasil/Police Station. The boundaries of Police Stations in the Tahasil, location of towns, large villages, rivers, roads, railways, hills, forests and important institutions such as High Schools, Colleges, Medical Institutions, Post & Telegraph Offices etc. have been shown in the Tahasil map. An administrative map of the Police Station has also been presented in the beginning of the village directory of that Police Station giving the boundaries of the villages in location codes and towns located within it and other details similar to the Tahasil map. Besides, villages have also been shown through symbolic representation by different population sizes. The uninhabited villages have been shown by cross marks (X). The shaded portion of the map represents the area of the towns.

The information on Village Directory has been provided in the statement containing 20 columns giving areas of the village in hectares, population and number of households, amenities viz., educational, medical, drinking water, power supply, post and telegraph and communication etc. available in the village. In case of non-availability of any of the amenities the distance range of its availability has been provided in the directory. Similarly, the land uses pattern of the village providing the extent of forest area, area under irrigation, un-irrigated area, culturable waste and area not available for cultivation have been indicated in the directory in hectares. Places of religious, historical/archaeological interest have been shown for reference of the readers.

COLUMN 14— *Staple Food* :— Staple food refers to grain and only relates to the majority population of the village using for major portion of the year. Combination of grain in staple food viz., rice, wheat and maize etc. have been indicated.

COLUMN 15 to 19—*Land Use* :— The land use pattern given in the village directory conforms to the pattern of classification of

land use as recommended by the Ministry of Agriculture, Government of India. The guidelines in this regard are as follows. :

1. Forests
2. Not available for cultivation :
   (a) Lands put to non-agricultural uses
   (b) Barren and un-culturable lands
3. Other un-cultivated lands excluding fallow lands :
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands :
   (a) Fallow lands other than corrent fallows
   (b) Current fallows
5. Net area sown.

In the village directory Column-15 (forest) represents, the category one above. Column-16 (Irrigated) and column-17 (un-irrigated) given break-up of agricultural land, which are a combination of categories 4 (a+b) and 5 above. Column-18 (culturable waste) corresponds to category-3 (a+b+c) above. Column-19 (area not available for cultivation) corresponds to category-2 (a+b). Area figures of the village have been shown in hectares. The total of figures under columns 15 to 19 will not necessarily tally always with the total area of the village as indicated in column-3 of the directory, as there are waterways and hills etc. which may not be included in the land use statistics of the village.

Forests may mean either state owned or private forest and whether wooded or maintained as potential forest land. There are situations where patches of land have been put to agricultural use within the statutory notified forest and have been considered as forest by the revenue administration. These areas have been treated as forest. In Orissa, forest is broadly known under two categories, viz., village forest, known in local parlance as khesra forest and reserved or protected forest. The village forest constitutes an integral part of the village area unlike the reserve or protected forest. This is because communal right in land is not exercisable in the areas known as reserve forest under the Orissa Forest Act.

Leaving aside this, 4 Appendices in the village directory have been presented in this publication, which is a distinct feature of the current census publication.

These are :

i) Tahasil/Police station-wise abstract of educational, medical and other amenities.

ii) Land-utilisation data in respect of non-municipal towns(Census Towns).

iii) Tahasil/Police Station-wise list of villages where no amenities are available and

iv) Tahasil/Police Station-wise list of villages indicating the proportion of Scheduled Caste/Scheduled Tribe population to the total population by ranges.

These appendices are new to the present census which provides Tahasil-wise abstract of villages on different priorities. The intention is that the abstract will be helpful for planning inputs in areas/villages where the basic infrastructure is lacking. Similarly the Appendix—IV will be helpful for planning of welfare programmes, for Scheduled Castes/ Scheduled Tribes at micro-level, as it provides data by ranges of Scheduled Caste/Scheduled Tribe population.

Scope of Town Directory

The town directory is intended to cover all the towns in the district statutorily notified as such as also the non-municipal census towns. The towns have been arranged in the town directory in the alphabetical order and do not cover strictly the military areas. The data on amenities and other aspects presented in codes has been explained in detail in separate chapters. Regarding the urban agglomeration the conventional creation of census the names of such agglomerations have been indicated which is similar to the name of the main town of the agglomeration. The particulars for such constituents of the agglomeration have been furnished separately. Such presentation was operationally found to be convenient to have an idea of the particulars of the city or town agglomeration in toto and also severally.

Regarding the out-growths which do not classify to be treated as town, the particulars are not separately available. The directory particulars relating to the out-growths have been merged with the different town and have not been shown separately.

To sum up the earlier format of 1971 D.C.H. Part-A has been restructured for 1981 census, keeping in view the objectives of the Planning Commission for the Minimum Needs Programme and the revised 6th Five Years Plan. More interest has been taken to know the over-all infrastructure in terms of amenities, however, modest or from whatever source it may have been provided.

Information on town directory has been furnished in 6 separate Statements. The scope and the content of the statement adopted for the towns is briefly explained below :

Statement I—This statement gives the status and growth history of the town. In columns 1 and 2, serial No. of the towns in alphabetical order and names of the town with class and civic administrative status have been furnished. in columns 3 and 4 location code of the town has been indicated giving the names of the tahasil under which it is located. Column 5 gives the area figures of the town in sq. kms. The number of households including the houseless household has been shown in column 6. In columns 7 to 15 the population alongwith the growth rate of town from 1901 to 1981 have been shown, for easy comparability. In column 16 density i.e. population per sq. km. has been furnished. In columns 17 to 19 the sex ratios (females for 1,000 males) as recorded from the 1961 census onwards have been furnished.

Statement II—It provides the physical aspects and location of the town. In columns 3 to 5 the average rainfall and temperature have been furnished. Distance of the town in kilometers from the State Headquarters, District Headquarters, Sub-divisional Headquarters/Tahasil Headquarters, the nearest city with population of one lakh or more, railway station, bus route, navigable rivers/canals within 10 kms. It have also been indicated in column 6 to 12 respectively.

Statement III—The statement reveals a picture of the municipal finance for the year 1978-79. The receipts of the urban local body from various sources have been provided under columns 4 to 10 whereas the expenditure under various items have been disclosed under coumns 11 to 17.

Statement IV—It gives information relating to civic and other amenities as it stood in 1979. Scheduled Castes and Scheduled Tribes have been given under columns 5(a) and 5(b) of the statement. The road length in kms. has been shown under column 6. The system of sewerage, number and type of latrines available in the town in addition to the method of disposal of night soil have been shown under columns 7 to 11. Columns 12 and 13 of the statement deals with the source of water supply and system of storage of the town.

Column 14 of the statement provides the availability of fire service if any in the town. In case, such service is not available in the town, the name of the nearest place where available has been shown alongwith the distance from town. Electrification with number of connections for different uses has been shown in columns 15 to 19 of the statement.

Statement-V—In this statement information relating to medical, educational, recreational and cultural facilities in the town has been shown. Medical facility available in the town has been shown in columns 4 and 5. Educational facilites, viz., number of different types of Colleges. Technical Schools, recognised commercial and vocational institutions, Higher Secondary Schools, Secondary Schools, M. E. Schools, Primary Schools and Adult Literacy Centres have been indicated in columns 6 to 15. Column 15 shows the Working Women's Hostel with the number of seats. Columns 17 to 20 of the statement discloses recreational and cultural facilities like Stadia and Cinema halls etc. available in town. In case of non-availability of medical and educational facilities in the town the name of the nearest place alongwith the distance where the ficility is available has been given.

Statement-VI—This represents the information on Trade, Commerce, Industry and Banking as it stood in 1979. In columns 3 to 5, important commodities as imported into the town have been mentioned as against the exported items out of the town shown under columns 6 to 8. The names of the three important commodities manufactured in the town have been shown in columns 9 to 11. Number of banks, number of agricultural credit socities and number of non-agricultural credit societies available in the town have been furnished in columns 12 to 14 respectively in the statement.

There is no notified slum area in any of the towns of the state. Hence, the prescribed statement IV-A has not been provided in the Town Directory.

The towns having out growths have been provided in an Appendix to the Town Directory showing their population separately.

Physical Aspects

The district lies between 20°-29' N and 21°-41' N latitudes and 84°-16' E and 86°-26' E longitudes and is a land locked district in the Central Orissa. It is bounded by Kendujhar district in the North, Phulabani, Puri and Cuttack districts in the South, Balangir and Sambalpur districts in the West and Cuttack district in the East. The area of the district is 10,827 Sq. Kms. according to the Surveyor General, India and ranks seventh in the State area wise.

The current census has registered a population of 15,82,787 which ranks seventh in the State population-wise. This population includes 2,50,554 Scheduled Caste and 1,94,060 Scheduled Tribe population. The percentage of Seheduled Caste and Scheduled Tribe population to the total population of the district accounts for 15·83 and 12·26 per cent respectively.

The area of the district is 10,827 Sq. Kms. according to the Surveyor General of India. Dhenkanal has three broad natural divisions. The first of these is the chain of hills ranging from 1,000 ft, to 3,500 ft. above the sea level and running along the north eastern boundary of the district from Palalahada in the north to Kamakshyanagar in the east. The second natural division is yet another chain of hills streaching from Athmallik in the south-west to Hindol in the south-east and running parallel to the river Mahanadi which flows along the southern boundary of the district. The third natural region is the valley of the river Brahmani lying between the two hill chains and forming the central part of the district.

The river Mahanadi marks the southern border of the district in Athmallik and Angul Sub-divisions whereas the river Brahmani divides the district into almost two halves. The river Mahanadi has a number of tributaries like Karandi jore, Ghoser jore, Sindor jore, Nalia jore and Sapua whereas Brahmani has tributaries like Mankara, Samakoi, Ramiala, Tikra, Singada and Naigra etc. Both these rivers provide drainage and facility for run-off water from the district.

The district is abundant in forests and mountains. The loftiest peak of the district is Malyagiri in Palalahada Sub-division which is 1,187 meters high. Besides, there are low range mountains available in plenty in Kamakshyanagar, Athmallik ,Dhenkanal and Hindol Sub-divisions.

The climate of the district is more or less of extreme type. The year may be divided into four seasons. The cold season continues from December to February followed by Summer from March to May. The south-west monsoon season continues from June to September.

The average annual rain-fall of the district is 1,421 mm. (56") and there are about 73 rainy days in a year. However, the annual rain-fall is more in Palalahada Sub-division which is 1,782·3 mm. Angul Sub-division having an average annual rain-fall of 1,295·5 mm. records the lowest rain-fall in the district. Presently the Block Development Officers are maintaining rain recording stations where daily rain-fall is recorded and transmitted to the Collector as well as to the Board of Revenue, Cuttack.

The hot season commences from the month of March and the month of May is usually the hottest month with a mean daily maximum temperature of 41°C and January is the coldest month of the year having a mean daily minimum temperature of 13·1°C. Occasionally due to cold spell the minimum temperature drops down to 7°C. The humidity is generally high. There is one metereological observatory located at Angul.

Jurisdictional Change—During the decade 1971-81, one new tahasil has been created with headquartets at Chhendipada in Angul Sub-division by way of carving out of the area from the erstwhile Angul tahasil in the same Sub-division.

Major Characteristics of the District

Mining—This district has good mineral potential. Systematic exploration and assessment and development of mineral resources and their exploitation have drawn the attention of the State Government in the recent past and survey and investigation work has been taken up extensively. The results indicate the availability of chromite mines at Maulbhanja and Kathpal, Mica at Shyamsundarpur, Khargaprasad, Dangpal, Durgapur and Kangula; Graphite at Athmallik; China clay at Kaluriapatna, Purunagarh, Banarpal and abundance of coal in the district. The Talcher coal field occupying the Brahmani valley discovered in 1837 is the earliest geological findings of the district. The coal mines there have been under explotation since 1930 and the National Coal Development Corporation is operating a sizeable portion of the coal mines. Principal consumers of the superior quality of coal available here are the railways, textile mills, paper mills, power station, cement works, fertiliser works and other miscellaneous consumers. The mines are operated by both mechanical and manual process. In the recent past, mineral-based industries have been taken up. The mining revenue realised by the State Government during the year 1980-81 was Rs. 63,51,582·75 paise and cess realised on royality alone during the same year was Rs. 5,12,957·23 paise. During 1980-81, 3 chromite mines, 6 coal mines, one fire clay mine and one quartz mine were in operation. Mining license has been granted in favour of 2 graphite mines and one kynite mine of the district.

Forest—Most part of the district is covered with dense forest. The ditsrict has extensive forest mostly of tropical dry deciduous type. The forest area of 4,954·74 sq. kms. comprise 2,822·28 sq. kms. of reserve forest, 390·99 sq. kms. of protected forest and 1,740·38 sq. kms. of undemarcated protected forest. Forest plays an important role in the economy of the district. It prevents soil erosion and greater run-off of water, besides regulating flow of rivers to some extent. The exploitation of forest material provides avocation to sizeable population. The principal forest produces are timber, fire-wood, bamboo and Kendu-leaf. The minor forest produces consist of lac, genduli gum, honey, wax, siali-leaf, myrobalans, sunaribark, mahua flower and seed, kochila and tussar, cocoons etc. The main consumer of timber is the railways and that of bamboo is the Titagarh Paper Mill. In the recent past the Orissa Forest Corporation a State Government under-taking has taken up the kendu leaf trade. Leaving aside this, the revenue realised from the forest produces are accounted for by the different forest territorial divisions, of the district, viz., Anugul (Rs. 122·79 lakhs), Athmallik (Rs. 73·35 lakhs), Dhenkanal (Rs. 60·47 lakhs) and Deogarh (part) (Rs. 170·69 lakhs). Due to denudation of forest growth consequential upon illicit felling and shif ing cultivation by the tribals, emphasis has been laid for afforestation in the recent past thrcugh various programmes.

Under "farm forestry" scheme various seedlings are being distributed tc the individuals for popularising forest growth. Simultaneously re-forestation of de-graded forests has been taken up alongwith other afforestation schemes.

Industries—The district was industrially backward till the recent past when a number of projects have been taken upto harness the potential available in the district. The District Industries Centre has been functioning at the district level from 1978 to co-ordinate the activities at various levels and with a view to establishing Small Scale units in the district.

During 1980-81, 110 Small Scale industrial Units have gone into production which provided employment to 899 persons. These industries are agro-based, chemical, electrical, ceramics, forests-based etc. Oriented to meet the needs of the locality and flourshing complex at Talcher which is a sub-divisional headquarters. Necessary financial assistance is being provided

by the Orissa State Financial Corporation and other Commercial Banks. Powei subsidy is also made available to these Small Scale Industrial Units.

Artisan-based industries and cottage industries are also being encouraged in pursuance of the State Policy. Such units relate to blacksmithy, carpentry, brass and bell metal, bamboo rope making, hand-loom,pottery, stone work, wood carving, tailoring, laundry and electrical shop etc. 630 artisans based units have gone into production generating employment to 1,083 persons including 220 Schedule Caste and Scheduled Tribe persons. Under entrepreneural development training programme, necessary training is being provided to the beneficiaries for running their industries. During 1980-81, 86 persons were trained. Besides, 736 artisans were also given training on various trades and avocation under TRYSEM, RURAL INDUSTRIES PROGRAMME, I.R.D. and HADY CRAFT SCHEMES. These artisans are provided with financial assistant from Commercial Banks and Khadi and Village Industries Board etc. Tools for the artisans are supplied free to provide them incentive. Under ERRP, 160 artisans were trained during 1980-81 and on completion they were provided with necessary tools and finance.

There are 43 Industrial Co-operative Societies in the district who are provided with managerial subsidy. This includes 14 handicraft societies.

The Orissa Industrial Infrastructure Development Corporation (IDCO, a State Government undertaking) has provided industrial sheds at different identified growth centres in the State. So far as Dhenkanal district is concerned, such industrial sheds are available at Anugul, Talcher, Dhenkanal and additional sheds are also under construction. These sheds are available to the entrepreneurs for location of their industries.

In the recent past, a few medium and large scale industries have been taken up under central sector, joint sector and in collaboration with the Industrial Development Corporation of Orissa (IDCOL) and Industrial Promotion and Investement Corporation, Orissa (IPICOL) both State Government undertakings. In the central sector, the fertiliser plant based on Talcher coal has been established under the management of the Fertiliser Corporation of India Ltd., which produces fertiliser grade urea.

The Heavy water project at Talcher which is also an important project under the central sector is to be commissioned shortly.

Recently the National alluminimum Company Ltd., (NALCO) have started construction of the alluminium smelter plant near Anagul.

Leaving aside this, another joint venture is ORICHEM LTD., at Talcher with a capital cost of Rs. 475 lakhs is likely to be produce sodium sulphate and sodium dichromate. Similarly one semi-coke plant with a capital cost of Rs. 1,400 lakhs is likely to be implemented shortly at Talcher for producing one lakh M. T. of Semi-coke per annum. These projects are being undertaken by IDCOL. Simultaneously with IPICOL assistance, "Utkal Asbestos Company Ltd.," with an investment of Rs.200 lakhs, set-up at Dhenkanal is producing A.C. Sheets, Prasantee Rs. 15·30 lakhs and IPIBEL refractories with an out-lay of paper mills with an outlay of Rs. 700 lakhs located at Dhenkanal have been producing paper and refractories respectively near Dhenkanal. Similarly Unique Builders at Talcher has been producing Steel Casting with IPICOL assistance leaving aside the aforesaid medium industries under produciton, many others like "Kraft Paper Industries", H. T. Fasteners' "Hydogenerated non-ediable and refind oil, Industrial Gas, "Polyster Fiber", "Lamp Sheel", "Oxygen & Acetylene", A C. Pressor Pipe, Mini Steel, "Solphuric Acid" Soda Ash, "Detergent" plants at Dhenkanal and Talcher are under implementation with the assistance of IPICOL and will come into production very shortly. It is expected that such phenomenal growth of large/medium industries in the potential growth centres of the district will provide sample scope for growth of small scale and ancillary industries and will ultimately provide adequte employment opportunity.

Needless to emphasise that there has already been a shift from traditional to non-traditional industries due to the abundance of minerials like chromite, buxite, fire-clay, limestone, coal, Iron-ore and manganese etc. However, the forest potential of the district in respect of timber and bamboo etc. are yet to be exploited fully.

Agriculture :— Different types of soil as indicated below are available in the district.

(I) Ailavial soil :— This type of soil is found in all river valleys. Sugarcane, tobacco, paddy, vegetables and fruits thrive well in this soil.

(II) Black Clay soil :— It is found mostly in Anugul sub-division and in patches throughout the district. This soil is very favourable for the growth of various rabi crops, oilseeds and pulses. It is quite suitable for growing orange and cotton.

(III) Red loam soil :— This type of soil is found in the high land and hilly slopes. This is very congenial for the growth of groundnuts, cotton, sweet potato, orange and lemon.

(IV) Sandy loam soil :— This type of soil is found in patches throughout the district. Rabi crops and vegetables are grown in rainy season.

(V) Gravelly soil :— It is found in hill slopes and favourable for mango and Jack-fruits.

(VI) Cleaving loam soil :— This is found through out the district and is favourable for growing paddy and mung.

This district is deficient in irrigationalth-ough some irrigation projects have been taken up in the recent past. The taila and high land only account for 2,19,000 hectares, medium land accounts for 1,34,000 hectars and low land accounts for 1,25,000 hectars in the district. During the year 1980-81, 3,75,608 hectars were brought under kharif crop. Out of this area 2,37,041 hectars were under paddy crop, which includes an area of 69,221 hectars under high yielding variety. The achievement under other crop viz., pulses in 42,078 hectars, oilseed in 38,188 hectars besides other crops in 24,224 hectars.

An area of 1,60,972 hectars was brought under rabi crop during the year 1980-81, which includes 89,988 hectars under pulses and 32,048 hectars under oilseeds.

Irrigation :—Irrigation facility in the district is poor. The rivers Mahanadi and Brahmani are the two main rivers of the district having a number of tributaries. The Rengali Dam Project in Brahmani is under construction and when completed will provide irrigation to a large chunk of teritory. Leaving aside this, the existing irrigation facility of 91,759 acres are due to the medium, minor and lift irrigation projects as stated below:—

(A) MEDIUM IRRIGATION PROJECTS	
(I) Derjang	15,022 acs
(II) Dadarghati	6,000 acs
(III) Ramiala	6,000 acs
	27,022 acs
(B) MINOR IRRIGATION PROJECTS	55,437 acs.
(C) LIFT IRRIGATION PROJECTS	9,300 acs
	91,759 acs

Additional 6,000 acres of land are the anticipated ayacut of Ramiala Project consequent upon the reclamation of work. In the recent past irrigation through dug-wells has provided additional acrase up to 1980-81, 28,115 dug-wells have been constructed which provide irrigation for 19,000 acres. The ground water survey of the district discloses the total potential of 47,680 under dug-well system of irrigation.

There is an assured rabi ayacut of 5,735 acres under minor irrigation and 6,300 acres under lift irrigation along. Besides, medium irrigation project Derjanga irrigates 9,000 acres in rabi.

Three ongoing schemes viz. Dadarghati and Ramiala in Kamakshyanagar sub-division and Auli in Angul sub-division will provide an additional ayacut of 18,500 acres under kharif and 11,700 acres under rabi.

Dug-well system has received wide publicity and the achievment in this district is encouraging. The average command area of ordinary dug-well ranges from 0·30 hectares to 0·75 hectares. There are 2 types of dug-wells viz., general and composite type takan up in the district. The composite dug-well is having either a diesel engine or electric pump set with bigger diameter and greater depth.

Soil Conservation—As indicated this district has considerable area of hills, gullies and ravines which is the major hurdle for rapid agricultural growth. The soil erosion is an acute problem in this district. To solve this problem soil conservation measures were initiated in this district by way of establishment of a demonstration centre in 1953 over an area of 55 acres near Anugul in the catchment of Nigra river. In course of time measures have also been initiated in the Brahmani catchment area, catchment of rivar Ramiala and other areas. The soil conservation measures initiated generally include water harvesting structure, nalla bunding projects, jholla land protection projects, contour-bunding and tree plantation etc. While the cultivated up-lands were contour-bunded the waste lands were planted with trees of sisoo, gambhar, cashew-nut, bamboo and gullies were reclaimed. In the recent past, extensive programme have been taken up under IRD and ERRP Schemes.

Pisciculture-The district depends upon in land fishery for supply of fish mostly from river Brahmani and Mahanadi. Salt water fish is, however, imported from the fishing base of Paradeep and Chandbali, The tanks, bandhas, nalas and river are the main sources for the fresh water fish. The Fishery Department has departmental tanks to push up spawn culture and supply of fry to the public. The fish seed centres along with a number of nursery tanks are used by the department for stocking of fry and fish. Riverine spawns are also collected from the river Brahmani and this district has been exporting span and fry to other district. During 1980-81, the achievement of spawn collection was 27·80 lakhs, whereas the supply of fry was 5·51 lakhs to the indivisual and grampanchayat tanks. This includes production of fry to the tune of 22·81 lakhs both from riverine and induced breeding sources.

The potential of the district includes 5,752 private tanks with an area of 5,868·26 acres, panchayat tanks numbering 3,485 in area of 7,935·76 acres and 67 reservoir (medium and minor) covering an area of 4,465·11 acres. The panchayat tanks are also leased out on long-term basis for encourging pisciculture. Necessary finance under IRD Programme and Fishery development agencies are also available to the individuals to consolidate their pisciculture so as to improve their economic condition. In the recent past the reservoir fishery in Darjang Project in Anugul sub-division has proved to be a stocking centre, in view of its existing potential of 2,317 acres and dead storage area of 334 acres.

Under IRD Programme, necessary training is being imparted for encouraging individuals on in land fishery. 23 fisherman's co-operative societies and one fish production-cum-marketing society at Anugul are functioning in the district.

Co-operation—There are altogether 207 co-operative societies in the district, out of which 190 are Primary Agricultural Co-operative Societies, 4 Regional Co-operative Matketing Societies and 4 wholesale consumers Co-operative Stores. There was only one Co-operative Bank in Angul established during the year 1921. In course of time its activities have expanded and it was renamed as Anugul United Central Co-operative Bank, the chief agency for distributing rural credit having jurisdiction over the entire district. It has 6 branches located at Dhenkanal, Athmallik, Kamakshyanagar, Talcher, Palalahada and Hindol. There are 2 cold storage in the district.

The Primary Agricultural Co-operative Societies have enrolled 1,78,176 families in the district. The other co-operative societies, viz., Industrial Dairy, Fishery and Weavers have also enrolled more members. The rate investment discloses that the borrowing members to the total membership accounts for 70% as on 30-6-81.

The Co-operative Bank provides short term and medium term loan to the agriculturists, who are members of the societies. The Bank also advances loan to other non-agricultural Societies. The land development banks also provide credit for long-term agricultural operations.

The medium term investment of the Co-operative institutions has played significant role in financing dug-well projects. During 1980-81, 3,381 dug-wells could be completed.

The Marketing Co-operative Society procure surplus agricultural produces from the members by giving them fair price and also distribute fertiliser in the rural area. In fact 60% of the fertiliser consumption by the farmers are channelised through these marketing societies. The societies are also handling essential commodities like rice, sugar, wheat and kerosene oil.

Animal Husbandry Programme—The live-stock population of the district as per the live-stock census of 1977 is as follows :—

Cattle	...	818,467
Buffalo	...	134,468
Sheep	...	69,556
Goat	...	207,205
Pig	...	1,389
Horse & Pony	...	340
Poultry	...	261,101
Ducks	...	2,931

The district has 32 key village units, 91 livestock centres, 17 artificial insemination centres, 50 natural breeding centres, 30 veterinary dispensaries, 3 veterinary hospitals and 4 dairy units. The programme broadly includes cattle feeding and fodder development etc. Under "Economic Rehabilitiation for Rural Poor Programme", 274 beneficiaries have been covered under goatery scheme and 253 beneficiaries under dairy scheme. Under "Integrated Rural Developement Programme", 579 is the reported achievement under goatery, alongwith 54 under dairy scheme during 1980-81. There has been fodder cultivation in an area of 555 acres to popularise the scheme. There is one departmental poultry research unit at Angul. 2 poultry co-operative societies have been organised for marketing of the poultry products. At the district headquarters, there is a district milk union which has a branch at Anugul with a chilling plant having capacity of 2,000 litters per day. At Dhenkanal the union collects 2,000 littersper day from 13 co-operatives. 29 milk co-operative societies are also functioning in the district for marketing of the dairy products and are affiliated to the Orissa Milk Federation.

Rural Water Supply—The district is confronted with scarcity of drinking water facilities as the water dries up during the month of April and scarcity of drinking water becomes acute in the villages and towns. According to the survey conducted in September, 1979. 2,091 viilages in the district have been identified as "problem" villages requiring special attention for drinking water. Therefore, more number of sanitary wells and tube-wells have been implemented the district. Upto the year 1980-81, 1,286 number of tube-wells have been sunk in the district. 1,330 sanitary wells have been completed and others are in progress.

Education—The district is educationally and economically backward due to the tribal and backward class composition of population. However, due to patronage of the ex princely state of Dhenkanal, a few notable authors and writers were available in the district who had significant contribution to the Oriya literature in the past. Compared with other princely states, this district had shown high literacy which is due to the British administration in Angul district as back as in 1848. After the merger of the princely states, the post independence era saw the opening of new schools and colleges through out the length and bredth of the district. At the time of merger, the district was going without a college. There were 4 High Schools, 16 Middle English Schools and 466 Primary Schools in the the whole district. During 1961, the district had 3 Colleges, 22 High Schools, 96 Middle English Schools and 1,386 Primary Schools, 72 Sevashramas, 5 Ashram Schools and 55 Basic Schools. However, by March 1981 the district had

139 High Schools with a student stregth of 30,709, 3 Secondary Training Schools with a student strength of 4,20,475, Middl e Englis Shchoola with a student strength of 47,523 besides 1,839 Lower Primary Schools with a student strength of 1,54,887. For villages having population of 200 and less Prathamika Chatasalis and Madhyamika Chatasalis were established to meet the education of the villagers.

The teacher-student ratio at High School level as reported to be 1 : 23, at Middle English level 1 : 22 and at Primary School level 1 : 35.

Opening of Adult Literacy Centre in rural area has also found favour with the population and this programme has received in wide response. During 1980-81, 300 such centres were opened and 6,432 persons were made literate under this programme.

Harijans and Tribal Welfare—Micro projects have been taken up for the most backward primitive tribe under which "Paudi Bhuyan Development Agency" at Palalahada has been taken up covering 27 villages in all. Agriculture, horticulture, soil conservation and animal husbandry are included in this Programme and the objective is to settle the tribals in agriculture. Apart from this measure for advancement of education, drinking water supply, provision of irrigation facilities have been taken up for the economic up-liftment of the tribals.

Out of the Central assistance available through ERRP and IRD Schemes 100 Scheduled Caste beneficiaries have been benefitted, by sinking 100 number of dug-wells for irrigation, and 66 beneficiaries have installed 66 number of Pump sets in their dug-well to irrigate their land. 50 Scheduled Caste Weavers have been provided with new looms and 111 Scheduled Caste fisherman have been provided with equipments. The Financial Corporation and the Co-operative Bank are also advancing loans for different sectoral programme for economic up-liftment of the community.

Under the tribal sub-plan in execution in Palalahada Block 923 families under Scheduled Castes and Scheduled Tribes scattered in 27 villages have been covered. 403 families have been covered under input assistance during 1980-81. Under horticulture programme, tribal youths are being trained for plantation Banana, K. Limes, guava, Mango plants etc. have been taken up under this programme. The plough and sickles are being supplied alongwith bullocks at the rate of one pair per family to encourage agriculture and divert their attention from shifting cultivation. Goatery scheme is also being encouraged among the tribals. Other infrastructural activities like provision of communication, drinking water supply, construction of school building etc. have been taken up. for advancement of education among the tribals various intentives in shape of pre-matric and post-matric scholarship, free distribution of nationalised text books, reading and writing materials, provision of residential educational institution are made available to the community.

Six residential schools including 2 High Schools, one Girls' School and 3 Ashram Schools and 77 Sevashram Schools are functioning in the district.

Distribution of Government waste land for agricultural purposes has covered 630 and 423 Scheduled Tribe and Scheduled Caste beneficiaries respectively during 1980-81. Similarly for home stead purpose, 408 and 334 Scheduled Tribe and Scheduled Caste beneficiaries have been covered during the said period. To ease out the housing problem, integrated housing scheme is under implementation from 1975-76. Under this scheme 503 Scheduled Tribe and 559 Scheduled Caste persons have been benefitted.

Communication—Lack of adequate communication has been the main obstacle in fostering rapid development of the district. The road from Cuttack to Dhenkanal was very undeveloped and perilous even in the latter part of the 19th century. However, the Public Works Department of the Ex-State of Dhenkanal constructed some good roads during the first quarter of 20th century which provided link between Cuttack and Sambalpur. The district headquarter is presently connected with all weather road communication to the State

Capital at Bhubaneswar and other district headquarters. The extent and types of road length available in the district are given below.

TYPE OF ROAD	LENGTH IN Kms.
National High Way No. 6, 23, and 42.	257·0
Major District Road	324·7
Other District Road	254.8
R. E. O. Road	368·0
Classified Village Road.	513·2
Panchayat Samit Road.	2,000·6
Grampanchayat Road.	5,460·0

The Tahasil and Sub-divisional headquarters except Palalahada are having all weather bus communication. Three block headquarters, i.e. Kaniha, Palalahada and Kankadahad are not having all weather bus routes. Public and private transports are available in the district.

Regarding communication by rail, the Talcher line of the South-eastern railway runs in the district for a distance of about 64 kms. It branches off from the main Howrah-Cuttack line at Nirgundi station and leads upto Talcher via the district headquarters. This railway line was constructed primarily on account of coal field. The present conteplation to connect Talcher with Sambalpur by rail will provide easy communication for both passenger and goods traffic and connect the Western Orissa with the State Capital.

Regarding water ways, the rivers Mahanadi and Brahmani are the main sources for transportation. The river Brahmani passes more than 160 kms. in the district and crosses Palalahada, Talcher, Kamakshyanagar and Dhenkanal Subdivisions and is navigable for three months from July to September. The river Mahanadi flows the distance of 76·8 Kms. in the district mostly in Athmallik and Anugul sub-divisions and is navigable for a period of Seven months from September to March. Goods like bamboo and timber etc. are transported through the rivers. There are also ferry services available in these rivers facilitating the passenger as well as the vehicular traffic in Palalahada and Kamakshyanagar sub-divisions. Consequent upon the construction of bridge over river Brahmani the district will be having all time communication to Palalahada sub-division and from there to Raurkela.

Power—The Generation and distribution of power is controlled at the State level by the Orissa State Electricity Board—a State Government undertaking. Electricity supply to the district is mainly from Hirakud hydro-electricity power station. However, a 250 M.W. thermal dower station was established at Chainpal near Talcher during 1968 and is hooked upto Hirakud power station. The Thermal Station at Talcher was constructed due to availability of coal field, where non-metallurgical coal is available in plenty.

All the towns of the district have been electrified. The biggest consumer of electricity is the coal field, medium and small industries which have come up in the recent past.

Under rural electrification scheme, 1,414 villages have been electrified till March, 1981. Similarly, 870 numbers of private lift irrigation points alongwith 77 number of lft irrigation corporation points were energised till 1981.

Land Tenure—The district comprises 7 subdivisions of which 6 were ex-princely states and the remaining one Angul was managed by Government directly prior to 1948. Each of these 6 ex-states before merger had their own system of land management and revenue administration. However, those systems in vogue agreed on basic points as it appears from the earlier settlement reports. In Dhenkanal the Settlement operation was taken up in 1846-47, 1883-84, 1901-02 and 1922-25. The last one was covered by cadastral survey. In Hindol the earlier settlements were taken in 1875-1884, 1901 and 1910-14 In Athmallik the earlier settlement have taken in 1896, 1911, 1927-31. In Pallahara the settlements were taken up in 1893-96, 1914-18 and 1932. In Talcher, the earlier settlements were taken in 1898, 1912 and 1928. In Angul summary settlement was made in 1848 followed by

regular settlements in 1849,1855, 1892, 1905-08 and 1925-28. The settlements taken up in the ex-state areas were primarily motivated to increase the revenue of the states.

After independence due to rationalisation of land structure and tennures, the survey and settlement operation was taken up reducing classification of land as well as rationalising the statuses existing under different names hither to. The settlement operation was started in Angul in 1951, Hindol in 1961, Talcher in 1963, Athmallik in 1961 and Dhenkanal in 1963. Upto the end of 1980-81 Settlement operation has been completed in 1,670 villages and record of rights finalised. Pending works relate to Talcher, Kamakshyanagar and Dhenkanal sub-divisions are in progress. The present settlement has recorded the following classification of land in the district.

CLASSIFICATION OF LAND

1. Sarad I
2. Sarad II
3. Sarad III
4. Sarad Dofosal I
5. Sarad Dofosal II
6. Sarad Dofosal III
7. Sarad Jala I

27. Jalasaya I
28. Jalasaya II
29. Misc.

(Adi, Nala, Mahara, Rasta, Patita, Patharabani)

Tenancy—Consequent upon abolition of estates, and agrarian reforms brought out by legislative measures in the recent past, almost a total change has been effected in the tenancy system. Their effect has been so fundamental and widespread that the entire texture of relationship between State and the land holder on the one hand and the tenant with his immediate land-lord on the other has undergone a metamorphosis. As a result, the status of land has changed its complexion and character in the same manner as the rights of the persons who hold them. The reality in statuses connoting the same rights in more than one way under different names had to be rationalised through comprehensive legislative measures. The result of such reform reduced the statuses as follows as it exist under different local names :

(a) Chandana
(b) Rayati
(c) Dakhalaswata bisista
(d) Dakhalaswata sunya
(e) Sikim

Trade and Commerce—The district was having poor communication facility right from the days of the princely State. In the early quarter of 20th century the Ex-State of Dhenkanal constructed the road from Athagad to Anugul which linked Cuttack ultimately and opened the way for direct communication with Sambalpur. In this absence of vehicles, the transportation was through elephant, horses and bullock cart. The Talcher rail link of South-eastern railway was opened in 1927 which was primarily constructed to transport coal from Talcher coal fields. However, the rivers Mahanadi and Brahmani passing through the district provided navigation facility for limited period in the year. River Mahanadi is available for navigation for 7 months in Athamallik and Anugul sub-division. The river Brahmani passing more than 160 kms.

through Palalahada, Talcher, Kamakshyanagar and Dhenkanal Sub-divisions also touched some commercial places situated in the bank of the river viz., Khadagaprasad, Bangurisingh, Bhuban, Chandipal and Talcher and is available for navigation from July to September only. Large flat bottomed boats made of wood ply in the navigable parts of rivers. Trade and Commerce in the earlier days were confined to agriculture, forest produces and coal only. Pulses, oil seeds, timber, bamboo and coal are the principal articles for export whereas chief imports are cloth, salt, Kerosene oil, Cement, sugar, wheat, fertillser, agricultural implements, machniery, petrol, electrical goods ect. Coal is the important exported items from the district followed by bamboo supplied to Titagarh paper mills and timber to meet the requirement of railway.

The State Civil Supplies Corporation as well as the District Civil Supplies Office control the essential commodities released through the State Government. During 1980-81 the district received the following commodities.

ITEM	QUANTITY
Cement	3,600 M.T.
Sugar	7,596 M.T.
Kerosene Oil	3,213 K.L.
Rice	7,000 M.T.

These commodities are distributed through the centres operated by various agencies approved by the Government for the convenient of the consumers. Such centres in 1980-81 were as follow :

Private fair price shops	...	1,350
Co-operative shops	...	127

The district has 68 unregulated recognised markets (hats) with 7 in Kaniha and 6 each in Anugul, Athmallik, Kishorenagar, Palalahada and Talcher. The other blocks have between 1 to 5 each. There are 3 regulated markets—1 each in Anugul, Athmallik and Chhendipada and two marketing Societies at Anugul and Kamakshyanagar.

As at the end of December 1979, it has been reported that the district has 35 branches of 6 commercial banks. The United Commercial Bank (UCO), the Lead Bank has the most extensive branch network with 16 Offices. The State Bank of India (SBI) closely follows with 13 branches including the Agricultural Development Branch (ADB). Canara Bank has 3 branches in the district, while Union Bank, United Bank of India (UBI) and Andhra Bank have one branch each. Out of the total of 35 branches in the district, 13 are semi-urban branches while 22 are rural.

Taking the district as a whole, there are nearly 37,000 persons per branch, which compares unfavourbly with the national average of 22,000 persons per branch (December, 1978). For the urban and industrial centres, this average stands at 19,288, which is indeed better than the national level.

Major Social and Administrative Developments in the Decade

Distribution of Government Waste Land and Home-stead land to the landless— This scheme is in execution from the year 1972 and implemented through the Tahasildars. An area of 2 acres is allotted to the landless for agricultural purposes and area of 4 decimals are allotted for Home-stead purposes. During 1980-81, 3,013 persons have been benefited by way of allotment of agricultural land as against 1,570 persons who were a allotted Home-stead Land as per the following details :

Category	Agril purpose		Home-stead purpose	
	No.	Area in Acres	No.	Area in Acres
Scheduled Tribe	602	783.66	382	61.2
Scheduled Caste	442	456.59	303	43.52
Others	1,969	2,016.58	885	169.59
Total	**3,013**	**3,256·83**	**1,570**	**274·31**

Modified Area Development Approach Scheme—This is a special scheme of Government of India introduced in the district from 1977-78 for economic benefit of the dispressed tribals in selected pockets in two C. D Blocks viz., Kankadahad and Palalahada in the district, where tribal concentration is more than fifty per cecnt. The tribal population of 7 panchayats of Kankadahad (14,238) and 6 panchayats of Palalahada Block (13,825) were selected for this programme. Community benefit schemes like construction of school buildings and renovation of tank etc. have been taken up.

Places of Historical and Tourist Interest

Being one of the centrally located districts of Orissa, Dhenkanal is covered with dense sal forests and is rich in colourful wild life. The wood lands of Dhenkanal are said to be the ancestral home of the elephants, tigers and other rare species of animals and birds. Crocodiles once freely trodded its river sands and were basking on the banks.

The river Mahanadi passes through this district forming a 22 Kms. long narrow gorge, one of the mightiest gorge in India, hedged by steep and thickly wooded hills, commanding a magnificent scenic beauty at Tikarapada. One of the world's most enchanting spot for boating and adventure, the gorge, known as 'Satakosia, is an ideal habitat for varieties of crocodiles. Presently a Gharial Sanctuary has been set up at Tikarpada to restock the gorge with Gharials.

The district is also rich in archaeological findings. The monuments of Kapilas, Joranda and the massive stone sculptures at Saranga and Bhimakund are among many architectural glories of the district.

In modern times the district has been the centre of an influential religious movement known as the "Mahima" cult. Its religious headquarters is being situated at Joranda.

The celebrated Kapilas hill with its time old monasteries and caves have attracted asceties through ages from every corner of India.

Kapilas—The loftiest peak of Kapilas range enshrines the temple of Lord Siva at a height of about 457 meters. The place is identified with "Kailas"—the legendary adode of Lord Siva Pilgrims cherish a great regard for the esteemed sanctity of the shrine. The temple of Lord Siva, Chandrasekhara, dominates the land scape for Kilometers around. In front of the main temple of 18·18 meters high stands the pillared constructions of the hall of audience and hall of offering with fine wood carving inside. A flieght of 1,300 steps and also a ghat road lead to the temple. Thousands of devout souls throng at Kapilas on the Sivaratri (the night consecrated to Lord Siva in the month of February-March). To the east of main Temple at a higher altitude stands the temple of Narayan and Viswanath. The construction of the main temple may be ascribed to Narasingha Dev III of Ganga dynsty who completed it during early part of rhe 14th century.

Dhenkanal railway station on S. E. Railway is 26 Kms. from Kapilas.

By road it is 26 Kms. from Dhenkanal and 120 Kms. from Bhubaneswar—the major tourist centre of the State. Regular bus services from Dhenkanal operate upto Deogaon which is on the foot of the Kapilas Hill.

Joranda—The place is famous as the religious headquarters of "Mahima Dharma". Here the samadhi af Mahima Gosain, the propounder of the Mohima cult is ensnrined in a temple, 29 meters high, a construction of the late twenties. Among the other sacred temples of Mahima Dharma are the Sunya Mandira, Dhuni Mandira and Gadi Mandira. Piligrims pour forth to Joranda fair held on the full moon day of Magha (February). There are Dharmasala for use of the piligrims.

The nearest railway station is Joranda road on the S. E. Railway.

By road it is 24 kms. from Dhenkanal and 118 Kms. from Bhubaneswar. Regular bus services operate between Dhenkanal and Joranda.

Tikarapada—It is a small village in Anugul sub-division and is strategically situated by the side of the deep Satakosia gorge.

The meandering Maharadi, flowing close by amidst bountiful hills, forms here the mightiest gorge of India, twentytwo kilometeres

long. It is acclaimed as one of the World's most enchanting spots. The place is ideal for boating, angling and adventure. The forest and hills around the village have a varieties of fauna to fascinate the visitors. Recently a Gharial (Crocodile) sanctuary has been set up at Tikarpada.

This is approachable from Meramundali railway station on S.E. Railway which is 26 kms. from Anugul and 84 kms. from Tikarpada.

By road it is 120 kms. from Dhenkanal, 84 kms. from Meramundali and 58 kms. from Anugul on the road which branches off the Cuttack-Sambalpur road at Tumuni, 11 kms. West of Anugul.

Dhenkanal—There are a few temples in the town dedicated to different deities. The earliest of them, known as the temple of Balabhadra, was built by Hari Singh by about 1700 A.D. The temple of Sambhugopal was built in the early part of 18th century and the temple of Raghunath was built in 1850 A.D. and the temple of Kunjakanta Krushan in 1917 A.D.

By road, it is 102 kms. from Bhubaneswar on National Highway No. 42. Regular bus services operate between Bhubaneswar and Dhenkanal.

Talcher—This small town has come to prominence with the establishment of varied industries in and around it. Previously it was the capital of the Ex-State of Talcher before merger in 1948. Close by is the Rani Park extending over an area of 64 sq. kms. which preserves varied flora and fauna. The park is surrounded by walls on all sides and the road laid inside the park to facilitate observations of wild life at close quarters.

Talcher is one of the fast growing industrial areas of Orissa. The establishment of Talcher Thermal Station has greatly enhanced the importance of the palace. The Fertiliser Plant of Talcher is said to be the largest Coal-based Fertiliser Plant in the world. The Talcher Collieries are situated at a distance from the town and area operated by the National Coal Development Corporation.

It is connected by Talcher Railway station on S.E. Railway.

By road it is 64 kms. from Dhenkanal, the district headquarters. It is connected by a road with National Highway No. 42 linking Cuttack and Sambalpur.

Analysis of Village and Town Directory Data

Introduction of inset tables in the District Census Handbooks is a novel feature of 1981 Census which is aimed at providing a brief analysis of its results for facilities of the planners, data users etc., 13 inset tables have been provided in this publication, the contents of which are explained below in brief.

Table 1 depicts the distribution of villages according to the availability of different amenities under each tahasil of Dhenkanal district.

TABLE—1

Distribution of villages according to the availability of different amenities.

Sl. No.	Name of Tahasil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Palalahada	281	169 (60 14)	15 (5·34)	281 (100·00)	29 (10·32)	6 (2·14)	21 (7·47)	27 (9·61)	40 (14·23)
2	Talcher	304	216 (71 05)	20 (6·58)	298 (98·03)	53 (17·43)	12 (3·95)	42 (13·82)	82 (26·97)	107 (35·20)
3	Chhendipada	142	102 (71·83)	9 (6·34)	142 (100·00)	23 (16.20)	6 (4·23)	15 (10·56)	26 (18·31)	54 (38·03)
4	Athmallik	538	304 (56·51)	21 (3·90)	532 (98·88)	40 (7·43)	20 (3 72)	21 (3 90)	70 (13·01)	88 (16·36)
5	Anugul	384	265 (69·01)	21 (5·47)	382 (99·48)	79 (20·57)	15 (3·91)	60 (15·63)	209 (54·43)	188 (48 96)
6	Hindol	177	128 (72·32)	64 (36·16)	177 (100·00)	30 (16·95)	2 (1·13)	20 (11·30)	27 (15·25)	76 (42·94)
7	Dhenkanal	442	321 (72·62)	37 (8.37)	441 (99·77)	103 (23·30)	25 (5 66)	75 (16·97)	148 (33·48)	282 (63 80)
8	Kamakshyanagar	423	341 (80·61)	36 (8 51)	419 (99·05)	98 (23·17)	22 (5.20)	60 (14 18)	125 (29 55)	136 (32.15)
	Total District	**2,691**	**1,846 (68.60)**	**223 (8 29)**	**2,672 (99·29)**	**455 (16·91)**	**108 (4·01)**	**314 (11·67)**	**714 (26·53)**	**971 (36·08)**

Out of 2,691 inhabited villages in the district educational facilities are available in 1,846 villages, medical facilities in 223 villages, drinking water facilities in 2,672 villages, post and telegraph offices in 455 villages, markets or hats in 108 villages, communication facilities like bus stop etc. are available in 314 villages. 714 villages are approached by pucca roads and 971 villages are having the power supply facilities. It clearly reveals how backward the district is.

Coming to the tahasils, it is seen that the highest percentage (80.61 per cent) of villages have been served with educational facilities in Kamakshyanagar Tahasil which is followed by

Dhenkanal Tahasil (72.62 per cent) But the lowest percentage of villages (56.51 per cent) of Athmallik Tahasil are availing the educational facilities. The medical facilities are available to the villages of 36.16 per cent of villages of Hindol Tahasil, which is the l l among the tahasils of the district whereas lowest percentage (3.90 per cent) of villages of Athmallik Tahasil are having the medical facilities. Drinking water facilities are available in almost all the villages of the district except 19 villages of which six villages belong to Talcher and Athmallik Tahasils each four villages to Kamakshyanagar Tahasil, two villages to Angul Tahasil and one village to Dhenkanal Tahasil. The highest percentage of villages (23.30 per-cent) of Dhenkanal Tahasil are enjoying post and telegraph facilities whereas only 7.43 per cent (the lowest pecentage vllages) of Athmallik Tahasil are availing this facility. The availability of market and hat facilities in the villages of all the tahasils of the district is very poor, ranging from 1.13 per cent in Hindol Tahasil to 5.66 per cent in Dhenkanal Tahasil. It is revealed from the table th t most of the villages in th district are deprived of commuication facilities. Similar is the case with the villages of the district so far the approach by pucca roads is concerned. The position of power supply is slightly better than other amenities as 36.08 per cent of the inhabited villages are availing the same facilities.

Proportions of Rural population served by different amenities in different tahasils of the district are shown in Table—2

TABLE—2

Proportion of Rural Population served by different amenities

Sl. No.	Name of Tahasil	Total Population of inhabited villages in the Tahasil	Proportion of Rural Population served by the amenities of—							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Palalahada	82,567	85·73	17·01	100·00	32·28	8 43	15·92	17·78	30·35
2	Talcher	166,3	94·02	17·39	99·57	46·28	11 02	31·35	40·57	59·54
3	Chhendipada	85,012	96·32	23·20	100·00	45·21	18 52	31·53	27·23	66·14
4	Athmallik	150,756	80·22	13 72	99·87	24·07	13 73	8·89	21·33	32·02
5	Anugul	238,610	91·59	17·36	99·99	51·92	12·11	32·63	66 03	75 96
6	Hindol	127,081	91·73	52·05	100·00	41·79	4·53	22 06	25 35	67·91
7	Dhenkanal	306,056	91·84	22·11	100·00	48·98	10·62	31 03	44 77	86·27
8	Kamakshya-nagar	302,592	95·58	22·02	99·72	51·93	10·27	21·77	35·90	54·29
	Total District	**1,459,073**	**91·53**	**22·29**	**99·88**	**45·40**	**10·96**	**25·51**	**39·27**	**63·36**

It is revealed from the table 2 that 91·53 per cent of the rural population (1,459,073) of the district are served by educational facilities, 22.29 per cent by medical facilities, 99·88 per cent by drinking water facilities, 45 40 per cent by post and telegraph facilities, 10·96 per cent by market/hat facilities, 25·51 per cent by communication facilities, 39·27 per cent by pucca road facilities and 63·36 per cent by power supply facilities. The position in respect of the availablity of amenities is much better in terms of population rather than interms of villages of the district as a whole as well as different tahasils of the district. Athmallik Tahasil is availing lesser facilities in comparison to other tahasils of the district.

Table—3 gives the distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

TABLE—3

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
	—5 Kms.	5-10 Kms.	10+Kms.	Total (Cols. 2 to 4)
1	2	3	4	5
1 Education	826	19	...	845
2 Medical	911	936	621	2,468
3 Drinking Water	17	...	2	19
4 Post & Telegraph	1,762	362	112	2,236
5 Market/Hat	938	1,107	538	2,583
6 Communication	928	836	613	2,377

Out of 2,691 inhabited villages of the district educational facility is not available in 845 villages, but the inhabitants of most of the villages (i. e. 826 villages) are enjoying this facility within a distance of 5 kms. Medical facility is not available in 2,468 villages. Out of these villages the villagers of all villages enjoy this facility within a distance of 5 kms. whereas the villagers of 936 villages cover a distance of 5-10 and the villagers of 621 villages travel a distance more than 10 kms. to avail medical facilities. The drinking water facility is not available only in 19 villages of the district. The villagers of 17 villages are obtaining drinking water facility within a distance of 5 kms. and in case of 2 other villages the villagers have to move more than 10 kms. to collect drinking water. The villagers of 1,762 villages are enjoying post and telegraph facilities within a distance of 5 kms. There are 2,236 villages of the district where this facility is not available. The viliagers of 362 villages avail this facility at a distance of 5-10 kms and for 112 villages this facility is available at a distance of more than 10 kms. Market and hat facilities are not available in 2,583 villages of the district. The villagers of 938 villages enjoy this facility within a distance of 5 kms. The villagers of 1,107 villages avail at a distance of 5 10 kms. and the villagers of 538 villages obtain this facility at a distance of more than 10 kms. There are 2,377 villages in the district where communication facility is not available. The villagers of 928 villages travel a distance less than 5 kms. to obtain this facility. But the villagers of 836 villages have to move 5-10 kms. and the villagers of 613 villages move more than 10 kms. to catch bus or train or navigable waterway.

Table—4 depicts the distribution of villages according to the distance from the nearest town and availability of different amenities in the district.

TABLE—4

Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance range from the nearest town (in Kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenities of—							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
0—5	139	90 (64·75)	9 (6·47)	139 (100·00)	26 (18·71)	2 (1·44)	25 (17·99)	63 (45·32)	67 (48·20)
6—15	632	454 (71·84)	47 (7·44)	626 (99·05)	137 (21·68)	24 (3·80)	84 (13·29)	238 (37·66)	300 (47·47)
16—50	1,460	1,023 (70·07)	145 (9·93)	1,450 (99·32)	250 (17·12)	67 (4·59)	164 (11·23)	332 (22·74)	520 (35·62)

Un Specified	...	...	...	...	...	...	...	...	...
Total	**2,691**	**1,846 (68·60)**	**223 (8·29)**	**2,672 99·29)**	**455 (16·91)**	**108 (4.01)**	**314 (11·67)**	**714 (26·53)**	**971 (36·08)**

More than half of the villages (1,460) of the district are located within a distance range of 16-50 kms. from the nearest town. Whereas 632 villages are under range of 6-15 kms., 460 villages are beyond 50 kms. and only 139 villages are within a range of 0-5 kms.

It is revealed from the table that the villages nearer to the town are enjoying more facilities than those which are away from the town.

Distribution of villages according to the population range and amenities available are shown in Table—5.

TABLE—5

Distribution of villages according to Population Range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenities of—							
		Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
—499	1,756	953 (54·27)	41 (2·33)	1,740 (99·09)	61 (3·47)	17 (0·97)	88 (5·01)	350 (19·93)	337 (19·19)
500-1,999	824	782 (94·90)	131 (15·90)	821 (99·64)	294 (35 68)	66 (8·01)	175 (21·24)	301 (36·53)	537 (65·17)
2,000-4,999	106	106 (100·00)	48 (45·28)	106 (100.00)	95 (89·62)	24 (22·64)	48 (45·28)	60 (56·60)	92 (86·79)
5,000+	5	5 (100·00)	3 (60·00)	5 (100·00)	5 (100·00)	1 (20 00)	3 (60·00)	3 (60·00)	5 (100·00)
Total	**2,691**	**1,846 (68.60)**	**223 (8.29)**	**2,672 (99·29)**	**455 (16·91)**	**108 (4·01)**	**314 (11 67)**	**714 (26·53)**	**971 (36·68)**

Most of the villages of the district are coming under the lowest population range of less than 500 population.

It is revealed from the table that the villages of higher population range are having better facilities than the villages under the lower population range, All the villages with a population of 5,000 or more are having educational, drinking water, post and telegraph and power supply facilities within the villages.

Main staple food in the majority of villages in each Tahasil of the district is shown in Table—6.

TABLE—6

Main Staple Food in the majority of villages in each Tahasil

Sl. No.	Name of Tahasil	Main Staple Food
1	2	3
1	Palalahada	Rice
2	Talcher	Rice
3	Chhendipada	Rice
4	Athmallik	Rice
5	Anugul	Rice
6	Hindol	Rice
7	Dhenkanal	Rice
8	Kamakshyangar	Rice

It is revealed from the table that the main staple food in all the tahasils of the district is rice.

Table—7 depicts the distribution of villages according to land use pattern of different tahasils of the district.

TABLE—7

Distribution of villages according to land use

Sl. No.	Name of Tahasil	No. of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Palalahada	281	81,408·44	38.20	3·40
2	Talcher	304	75,367·98	67·63	0·96
3	Chhendipada	142	49,967·40	83 26	4 69
4	Athmallik	538	120,063·13	64·24	1·92
5	Anugul	384	88,912·14	81·13	11·31
6	Hindol	177	58,828·04	77·73	4·83
7	Dhenkanal	442	122,717·59	66·02	5·57
8	Kamakshyanagar	423	167,941·17	54·00	6·00
	Total District	**2,691**	**765,205·89**	**64·08**	**5·16**

Note :—The area figures for uninhabited villages and villages for which the land use data are not available are excluded from the total.

It is revealed from the table that the percentage of irrigated area to total cultivable area of the district is only 5·16 per cent which implies that the district is backward in respect of irrigation facilities. The availability of irrigation facility is higher in Angul Tahasil. In the meantime State Government have taken up some steps for providing irrigation facilities under minor irrigation projeets and lift Irrigation projects. It is hoped that an appreciable extent of land in the district will avail irrigation facilities in near future. 64·08 per cent of the total area of the district is the cultivable area. The highest percentage (83.26 per cent) of cultivable area to total area is recorded in Chhendipada Tahasil.

Table—8 shows the growth, density and sex ratio of urban population in the district in relation to the State.

TABLE—8

Growth, Density and Sex Ratio of Urbah Population in the District in relation to the State

Census year	DHENKANAL						ORISSA					
	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km.)	Sex ratio (No. of females per 1,000 males)	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km.)	Sex ratio (No.of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	837,138	27,456	3·27	+ 26·79	1,178	923	146,45,946	594,070	4·06	+ 44 01	1,195	881
1961	10,26,553	47,088	4·58	+ 71.50	1,100	814	175,48,846	11,09,650	6.32	+ 86 79	1,078	807
1971	12,93,914	51,812	4·00	+ 10·03	1,212	797	219,44,615	18,45,395	8·41	+ 66 30	1,113	845
1981	15,82,787	1,23,714	7·82	+ 138·77	1,116	777	263,70,271	31,10,287	11·79	+ 68·54	1,359	859

The percentage of urban population to total population in the district is lower than that of the State average for all the decades from 1951. The decadal percentage variation in urban population of the district during the decade 1971-81 is more (in comparison to previous two decades) due to inclusion of four nonstatutory census towns and one notified area council in the district. The density of urban population (population per sq. kms.) in the district is 1,116 during 1981 census whereas for the state it is 1,359. The sex ratio (No. of females per 1,000 males) in the urban area of the district (777) is less than that of the state (859).

Table—9 gives the new towns added/ declassified in 1981 census.

TABLE—9

New towns added/declassified in 1981 Census

Name of the Town 1	Population 1981 Census 2
(a) Added.	
I Kamakhyanagar	10,154
II Talcher Thermal Power Station Township.	5,371
III Dera colliery township	4,452
IV Fertiliser Corporation of India Township	5,067
V Rengali Dam Project Township	13,213
(b) Declassified	Nil

One notified town viz. Kamakshyanagar and four non-statutory towns viz. Talcher Thermal Power Station Township, Dera Colliery Township, Fertiliser Corporation of India Township and Rengali Dam Project Township have been added to the Urban frame of the district during the decade 1971-81. In this decade no town has been declassified in the district.

Per capita receipt and expenditure in towns have been shown in Table—10

TABLE—10

Per Capita Receipt and Expenditure in Towns, 1978-79

Class, name & civic status of the town	Per Capita Receipt (in Rs.)			Per Capita Expenditure (in Rs.)					
	Total Receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General Administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects

IV Talcher (M) *	52·07	14·42	37 65	44·62	10 54	14·61	11·52	0·31	7 64
V Talcher Thermal Power Station Township (CT)			Non-Municipal Town						
Total	41 80	12.57	29·23	41.65	6·21	11·93	5.58	0·41	14·52

The Town having outgrowth.

The figures have not been presented in the table in respect of four non-statutory towns and one notified town. The non-statutory towns are still continuing in rural farme for the purpose of revenue administration. The notified town, for which the figures are not presented, came into existance in the month of December, 1979. So the required data were not available. Coming to the receipt side the per capita receipt has been assessed as Rs. 41.80 out of which Rs. 12.57 through taxes and Rs. 29.23 from other sources i.e. Government grant etc. As regards the expenditure side, per capita total expenditure in towns of the district is Rs. 41.65 out of which Rs. 6.21 is utilised under general administration, Rs. 11.93 under public health and conveniences, Rs. 8.58 under public works, Rs. 0.41 under public institutions and Rs. 14.52 for other aspects. It is revealed from the table that financial position of urban bodies in the district is not bad.

Table—11 depicts the number of schools per 10,000 population in towns.

TABLE—11

Schools per ten thousand Population in Towns

Class, name and civic status of towns	No. per ten thousand population			
	Higher Secondary/ Intermediate/ P.U.C./ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1	2	3	4	5
IV Anugul (N.A.C.)	...	1	3	6

V Fertiliser Corporation of India Township (C·T.)	Fertiliser	Fertiliser	Cereals
IV Kamakshyanagar (N.A·C.)	...	Wood	Wheat
IV Rengali Dam Project Township (C·T.)	Wooden Furniture	Wood	Rice
Talcher Urban Agglomeration	See Constituent Units		
IV Talcher (M)*	Caste-iron	Coal	Cloth
V Talcher Thermal Power Station Township (C·T.)	Readymade Garments	...	Cereals

* The Town having out-growth

The fertiliser is manufactured and exported from the Fertiliser Corporation of India, Township. Other consumer goods like food grains, grocery are being imported to the towns of the district. Caste-iron is manufactured at Talcher Town and coal is also exported from this place. Bellmetal utensils are also manufactured at Bhuban town of the district.

SECTION–I

VILLAGE DIRECTORY

Codes used in the Village Directory

In the Village Directory various amenities and other data have been indicated by codes for want of space. The codes used in different columns are explained below.

COL. 5—Educational Amenities :

This column is intended to provide availability of educational facility in the village under the following codes :

1.	Primary or Elementary School	... P
2.	Junior Secondary or Middle School	... M
3.	Matriculation or Secondary	... H
4.	Higher Secondry/Intermediate/ Pre-University/Junior College	...PUC
5.	College	... C
6.	Industrial Schools	... I
7.	Training School	... Tr.
8.	Adult literacy class/centre	... Ac
9.	Other educational institutions	... O

Schools upto Class-V have been treated as Primary School and have included Nursery School, Kinder Garten School, Pre-basic School, Pre-primary School, Junior Basic School, upto class-V. Schools upto class-VII have been treated as Junior Secondary or Middle English School. Schools upto class-XI (Matriculation) have been considered as Secondary or High School. This also includes High Madarsa upto class-X. Schools or Colleges upto class-XII are considered as Higher Secondary Schools. In case of composite Schools like M. E. with primary classes or Higher Secondary Schools with M.E. classes, those have been included in the number of Primary Schools and Middle Schools respectively. In a village having two Primary Schools and one M. E. with primary classes, the total number of Primary Schools in the village has been recorded as three and M. E. as one.

In this process, the number of institutions have been determined and presented under the approved code. In cases of availability of more number of institutions of a type, the number has been indicated within bracket after the code. In case the amenity is not available in the village the same has been shown by a dash (—) in the relevant column having a note of the distance range regarding its availability.

COL. 6—Medical Amenities :

Availability of such amenities has been presented under the following codes. In case of availability of more number of institutions of a type, such number has been indicated within bracket against the abbreviation. Where the amenities are not available, it has been indicated by a 'dash' (—) in the relevant column with a note thereunder including distance range of its availability.

Hospital	...	H
Maternity and Child Welfare Centre	...	MCW
Maternity Home	...	MH
Child Welfare Centre	...	CWC
Health Centre	...	HC
Primary Health Centre	...	PHC
Primary Health Sub centre	...	PHS
Dispensary	...	D
Family Planning Centre	...	FPC
T. B. Clinic	...	TB
Nursing Home	...	NH
Registered Private Practitioner	...	RP
Subsidised Medical Practitioner	...	SMP
Community Health Worker	...	CHW
Others	...	O

COL. 7—**Drinking water Amenities :**

The types of potable drinking water supply sources available within the village has been indicated by the following codes. If the amenities are not available in the village it has been presented by dash (—) in the relevant column and the distance range of its availability thereunder.

Tap Water	...	T
Well Water	...	W
Tank Water	...	Tk
Tubewell Water	...	TW
Hand Pump	...	HP
River Water	...	R
Fountain	...	F
Canal	...	C
Lake	...	L
Spring	...	S
Nallah	...	N
Others	...	O
Information not available	...	NA

COL. 8—**Post & Telegraph :**

Availability of amenities in the village has been presented under the following codes. In case of non-availability it has been presented by dash (—) in the relevant column also indicating the distance range thereunder.

Post Office	...	PO
Telegraph Office	...	TO
Post and Telegraph Office	...	PTO
Telephone connection	...	Phone

COL. 10—**Communication :**

Availability of public transport like bus, rail and water way to the village have been indicated by the following codes. In case of non-availability, it has been presented by a dash (—) in the said column with the distance range of its availability mentioned thereunder.

Bus Stop	...	BS
Railway Station	...	RS
Navigable Watar Way (including river, canal, back-watar etc.)	...	NW

COL. 11—**Approach to the Village :**

This is a new introduction in the 1981 Census not covered by the 1971 series. Approach to the village refers to the state of road etc. leading to the village. The intention is to see whether the village is approachable both in fair and foul weather and whether it is inaccessible sometime in the year. Such approach has been presented under the following codes.

Pucca Road	...	PR
Kutcha Road	...	KR
Navigable River	...	NR
Navigable Canal	...	NC
Navigable Water Way (other than river or canal)	...	NW
Footh Path	...	FP

COL. 13—**Power Supply :**

If the power is actually available in the village in any form, then the same has been presented in this column under the following codes.

Electricity for domestic purpose	...	ED
Electricity for Agriculture	...	EAg
Electricity for other purposes like industrial or commercial etc.	...	EO
Electricity for all purposes listed above	...	EA

COL. 20—Remarks including any place of religious, historical or archaeological interest.

This column is intended to record particulars of any place of importance as well as the information on number of copies of news papers coming to the village and motor cycle/scooters, cars/jeeps and tractors available in the village. The codes used in this column are as follows.

N—Copies of the news papers coming to the village.

M—Motorcycles/Scooters available in the village.

C—Cars/Jeeps available in the village

T—Tractors available in the village

The information presented under this column is illustrated below.

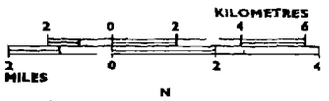

N-32, M-2

Here N-32 represents the copies of newspapers viz. 32 and M-2, the number of motorcycles/scooters viz. 2.

SECTION–II

TOWN DIRECTORY

Codes used in the Town Directory

STATEMENT-I

Status and growth history

Col. 2-Class, name and civic administration status.

Class has been introduced to facilitate analysis on town directory data at State and all India levels. It has been presented according to 1981 census population of the core town in *following ranges by the classification noted against each.*

Population		Class
1,00,000 and above	...	I
50,000—99,999	...	II
20,000—49,999	...	III
10,000—19,999	...	IV
5,000— 9,999	...	V
Below 5,000	...	VI

The name of the town has been shown in this column, with the correct spelling as adopted in the official record. Regarding the civic administration status, the town as it stood in 1980 has been indicated by the following abbreviations:-

Municipality	...	M
Notified Area Council	...	NAC
Census Town	...	CT

STATEMENT-II

Physical Aspects and Location of Towns

Col. 12—The name of the navigable river/ canal which are situated within a distance of 10 kms. has been shown under this column with distance from the referrent town. After the name of the river/canal 'R' for river and 'C' for canal has been given in brackets to denote whether it is a river or canal as illustrated below.

Mahanadi (R)-5

STATEMENT-IV

Civic & other Amenities, 1979

Col. 6—Road length (in Kms.)

Information under this column has been obtained from the officer in charge of the concerned urban local body. There are cases where the Municipalities / Notified Area Council maintain their roads accounts separately. Pucca roads and kutcha roads available in the town have been presented under the abbreviation "PR & KR" respectively.

Col. 7—System of sewerage

The sewerage system is implied the net work of main and branches of underground conduits for the conveyance of sewerage to the point of disposal in the town. For the towns which are not provided with such underground sewerage system, availability of open surface drain or box drain etc. have been mentioned. The various type of sewerage/drainage system have been indicated upto two places in the town under the following codes .

Sewer	...	S
Open Surface Drains	...	OSD
Box Surface Drains	...	BSD
Sylk Drains	...	SD
Cesspool Method	...	CD
Pit system	...	Pt

Col.11—Method of disposal of night soil

Information in this regard has been obtained from the local body and the prevalent method of disposal of night soil has been presented with the following codes upto two places in order of their importance in the town. The objective of providing such data is to collect information which could help Government to provide a programme of stopping the practice of

removal of night soil as head loads and also minimising the use of human labour in the process of disposal.

Head Loads	...	HL
Baskets	...	B
Wheel Barrows	...	WB
Septic tank latrines	...	ST
Sewerage	...	S

Col. 12 & 13—Protected water supply :

The information collected from the local offices has been incorporated in these columns, in some cases such data had to be obtained from the State Public Health Engineering Department. The information on sources of water supply has been indicated in Col. 12 as against the system of storage with capacity in litres (in brackets) which has been presented in Col. 13. The same has been presented under following codes :

Over head tank	...	OHT
Service reservoir	...	SR
River infiltration gallery	...	IG
Bore well pumping system	...	BWP
Pressure tank	...	PT
Tubewell water	...	TW
Tap water	...	T
Well water	...	W
Tank water	...	Tk

The first five codes started above relate to the system of storage whereas, the remaining four codes represent the different sources of water supply.

STATEMENT—V

Medical, Educational, Recreational and Cultural facilities, 1979.

Col. 4 & 5—Medical facilities— Hospitals/ Dispensaries and beds available :

Information in this regard has been collected from the local offices. However, the institutions run by private doctors have not been included in these data, which have been restricted to the institutions run/aided by Government/ Semi-Government/ Local bodies/ Charitable institutions/ Social service agencies. The various types of institutions have been presented under the following codes :

Hospital	...	H
Dispensary	...	D
Health Centre	...	HC
Family Planning Centre	...	FC
T. B. Clinic	...	TB
Nursing Home	...	NH
Others	...	O

For places where medical facilities are not available, the name of the nearest place in the same district or nearest district, if in the same State or other State and its distance from the town where the facility is available has been indicated. All types of hospitals/dispensaries etc. whether allopathic, ayurvedic or homoeopathic have been covered. These are further distinguished by providing additional codes :

A—Ayurvedic

U—Unani

Hom—Homoeopathic

In case of allopathic, no separate code has been given.

Col. 6 to 9—Educational facilities :

Information in this regard has been collected from the local officials and to the extent possible have been checked up with the informotion available in the office of the Director of Public Instructions of the State. For the place where more than one institutions of each type is available, the number thereof has been given against each in brackets. The codes used for different institutions are as follows :

Arts only	...	A
Science only	...	S
Arts and Science only	...	AS
Commerce only	...	C
Arts and Commerce only	...	AC
Combined of all categories Arts, Science and Commerce	...	ASC
Law	...	L

Col. 10—Recognised shorthand, typewriting and vocational training institutes.

Information has been collected from the local authorities. Here "recognised" means the institution recognised by statutory authority like Education Department, Commerce Department or Labour Department of the Government or semi-Government or autonomous bodies. The institution of each type has been presented under the following codes :

Shorthand	...	Sh
Typewriting	...	Type
Shorthand and Typewriting	...	Sh. Type
Others	...	O

Col. 11-14—Higher Secondary/ Intermediate/ PUC (Pre-University College)/ Junior College Level, Secondary/ Matriculation, Junior Secondary/ Middle Schools and Primary Schools.

Information in this regard has been collected from the local authority and presented under the following codes;

Primary School	...	P
Junior Secondary or Middle School	...	M
Matriculation or Secondary	...	H
Higher Secondary/ Intermediate/ Pre-University/ Junior College/ '10+2' system whether held in Schools or Colleges.	...	PUC

If educational facility is not available in the town, the name of the nearest place in the same district or name of the nearest district in the same State or other State with its distance from the town where the facility is available has been indicated.

Col. 17 to 20—Number of recreational and cultural facilities.

Information in this respect has been obtained from the local authority. Touring cinema has been eliminated from our purview and only permanent cinema/theaters have been included. Community halls/ auditorium have been added in these column as the same are becoming a common feature of the urban landscape. Information on Public libraries including reading rooms has been collected from the local authority and presented under the following codes.

Public Library	...	PL
Reading Room	...	RR
