VILLAGE & TOWN DIRECTORY
VILLAGE & TOWN-WISE
PRIMARY CENSUS ABSTRACT

B. K. DAS
of the Indian Administrative Service
Director of Census Operations, Karnataka

THE DHARWAD BUFFALO

The picture on the cover symbolises in general the importance of dairy farming activity in the economy of the district and, in particular, the rearing of buffaloes for which Dharwad proper is famous. The district lies in what is generally known as bailu sime and its western fringe which forms a continuum with the malnad and semi-malnad zone is particularly conducive for cattle-breeding. The cattle of the district mainly belong to the local breed, called the jawari breed. There are quite a good number of cattle belonging to the imported breeds known as Amrit Mahal and Krishna Valley also. In the case of buffaloes also though the animals belonging to the local breed, that is jawari breed, are preponderant, there are a considerable number of buffaloes of the Pandharapuri breed. She-buffaloes are looked after well and are provided with nutritious food with a view to secure a larger yield of milk. The Dharwad segment of Hubli-Dharwad City is noted all over the region for its buffaloes and the milk yield. The milk produced here is sold partly to the Government Dairy and partly to the local consumers including the sweetmeat manufacturers. Dharwad is famous all over the State for its Pheda for which the main ingredient is Khova obtained from milk. Though most households of the cultivators rear cattle and buffaloes for agricultural purposes and for milk, the Gollas and the Gavlis are the communities that are traditionally associated with the profession of cattle breeding. They were formerly habituated to a semi-nomadic life but are now accustomed to a settled life in villages and towns. According to the 1977 Livestock census the district has nearly 2.9 lakh heads of buffaloes and the buffaloes account for 19 per cent of the total livestock wealth of the district.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District Administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics, census tables and a Village and Town Directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to Village and Town Directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of Village and Town Directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the Village Directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the Village Directory and incorporating more exhaustive data on infrastructure aspect, particularly in relation to amenities and land-use pattern, is expected to further meet the need of microlevel planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the Village Directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of

the volume contains Village and Town Directory and Part-B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The District and Tahsil/Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri B. K. Das, the Director of Census Operations, Karnataka, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

NEW DELHI
26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

The Registrar General and Census Commissioner of India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Handbooks but has also explained at some length the scope and coverage envisaged for this country-wide project. As uniformity in approach and comprehensiveness of data are distinctive features of this series every attempt has been made to adhere to the concepts and definitions adopted in designing the formats. These volumes contain the salient results based on the data gathered at the actual census count and, in addition contain a wealth of other than Census information in respect of villages and towns of the district. It is hoped that these volumes would go a long way to meet the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook is divided into two portions: while Part A contains the Village and Town Directory, Part B confines itself to the Primary Census Abstract. Since combining of these two parts and presenting the same in a single volume enhances the utility of the volume and also because the districts of the State are not so large as to render such single volumes unwieldy in Karnataka, Part A and Part B of each district are being published together in a single volume. But, there is a major point of departure from the *All-India* pattern in so far as Karnataka is concerned. Owing to certain technical reasons all the particulars on Scheduled Castes and Scheduled Tribes proposed for publication in the DCHB as part of Primary Census Abstract and also the other derived statements have been pooled up separately and presented in the form of a Supplement. While such Supplements have been brought out as separate volumes in the case of Bidar and Mandya, in the case of the other districts this material also forms part of the single volume of the District Census Handbook and appears separately after Part B.

In the preparation of the District Census Handbooks the role played by the census organisation is that of data gatherer and the cost of publication is borne by the State Government. In accomplishing this task we have had the ready and whole-hearted co-operation of the staff at various levels of different departments of the State Government. For operational convenience the village directory was divided into two portions viz., that relating to area and land-use pattern, and that relating to the amenities. The relevant formats were mailed to the Tahsildars and Block Development Officers respectively requesting them to furnish information on land-use pattern and amenities. Much of the data so supplied by these field-level officers have been cross-checked with the data obtained from various departments and an attempt has been made to reconcile the discrepancies as well.

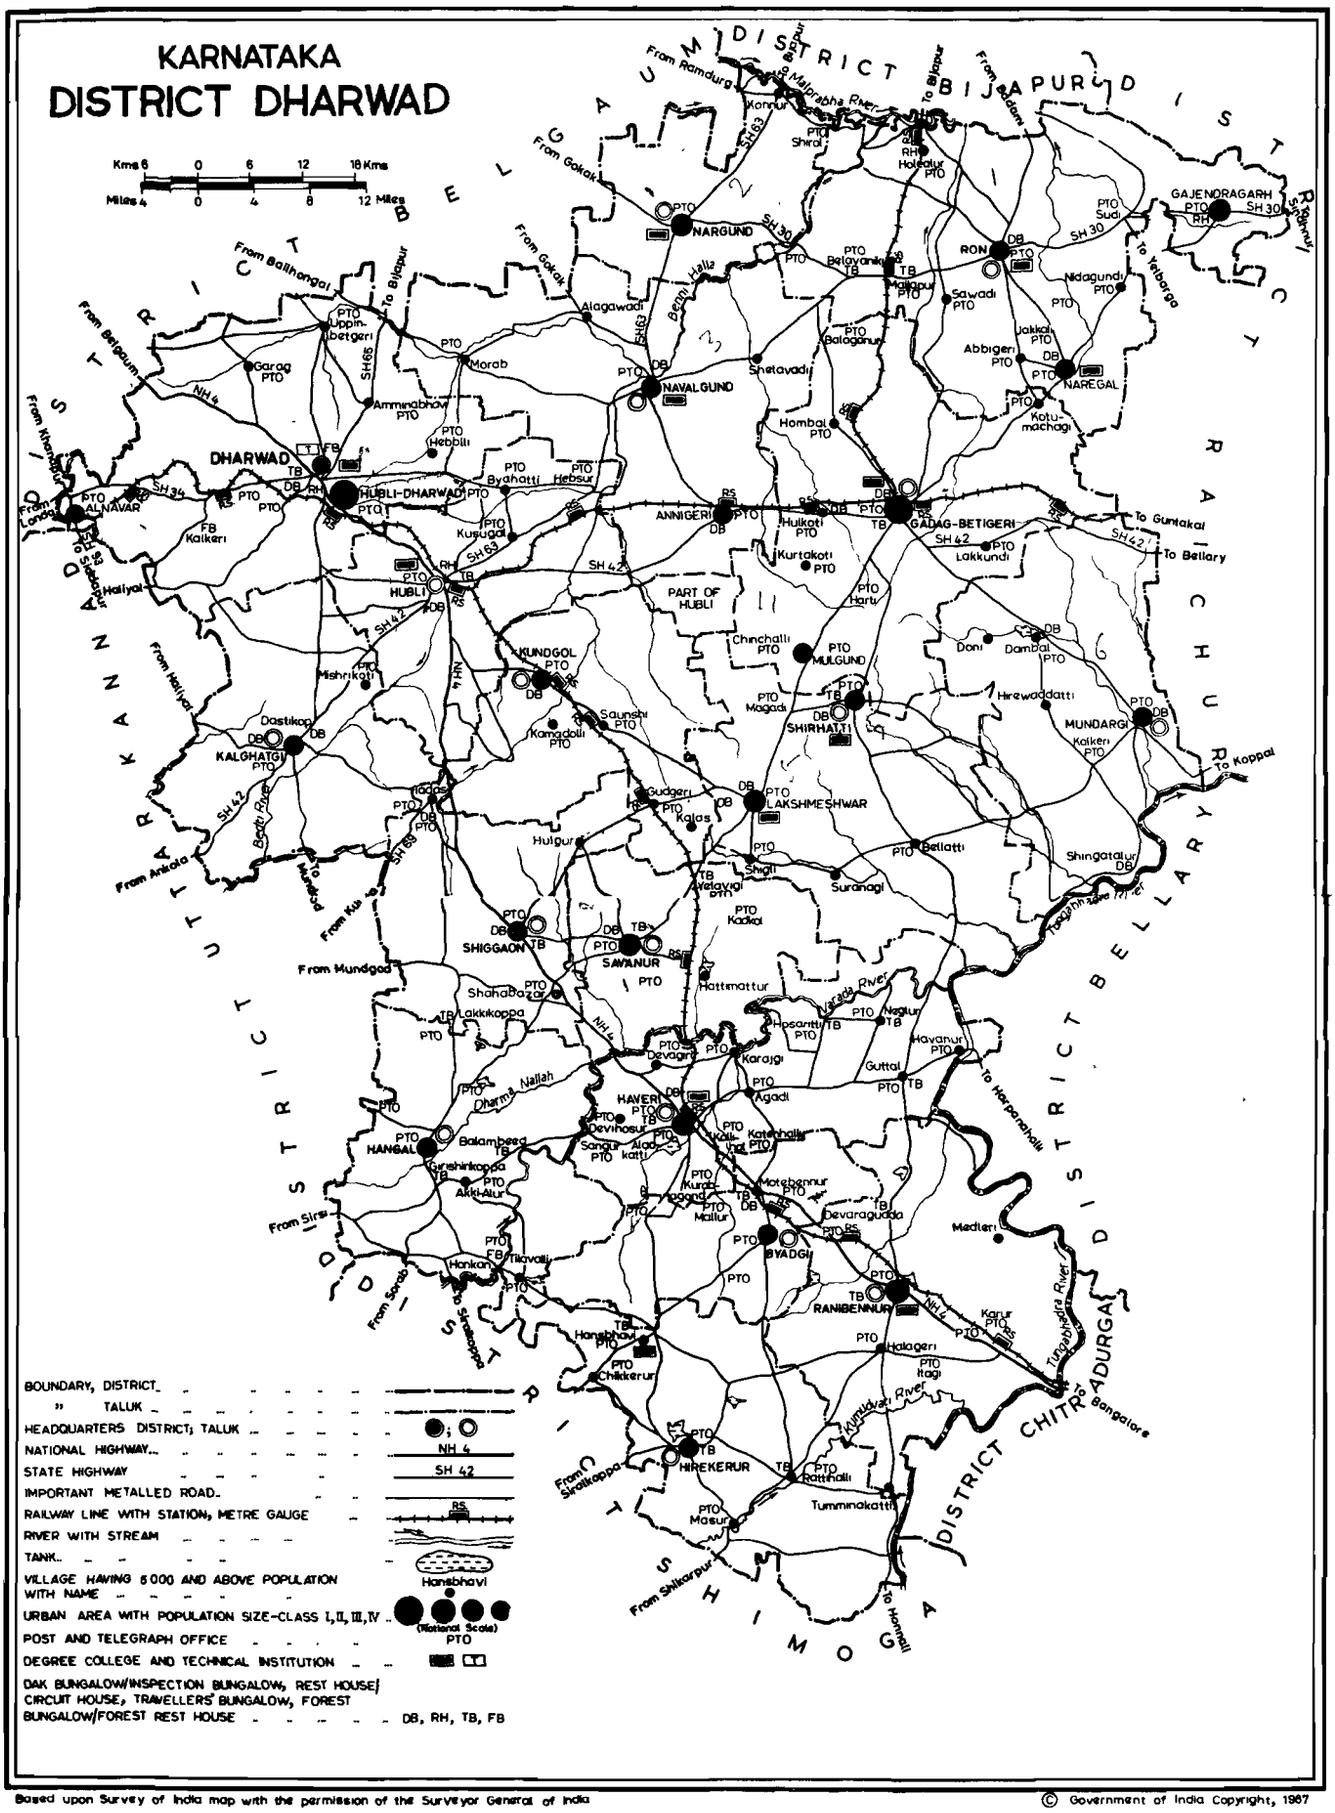

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation and preparation of this volume.

I am deeply grateful to Shri P. Padmanabha, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I also express my thanks to Dr. N. G. Nag, Deputy Registrar General (Social Studies), Dr. B. K. Roy, Deputy Registrar General (Map) and Shri M. M. Dua, Senior Research Officer.

Lastly, I am thankful to the Government of Karnataka for having agreed readily to bear the cost of publication of the District Census Handbook volumes. The Director, Printing, Stationery and Publications, Karnataka has evinced keen interest in bringing out these volumes.

ANALYTICAL NOTE

BRIEF HISTORY OF THE DISTRICT CENSUS HANDBOOK:

The District Census Handbook was first introduced at the 1951 Census to meet the ever increasing demand for micro-level data by administrators, planners, and other census data users. These series were primarily envisaged to replace the 'Part IV – Taluk Tables' and 'Part V – Village Tables' of the earlier censuses and to present the basic demographic and economic data at village level in the form of primary census abstract. In addition, these volumes were to contain a set of important census tables at taluk, town and district levels.

At the 1961 Census the scope of the volume was greatly enlarged by incorporating into it (i) a descriptive account of the district, (ii) a set of non-census tables dealing with administrative statistics of a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban block level primary census abstract. In a somewhat general way information on the availability of certain basic amenities like drinking water wells and schools was also furnished.

The 1971 Census witnessed an overall improvement in the matter of data compilation as well as in presentation of the results. A countrywide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. The District Census Handbook was split up into three parts: i) Part A consisting of land use data on villages and data on amenities and services available in villages and towns compiled in the form of village and town directory, ii) Part B consisting of district, taluk, town, village and urban block level primary census abstract, and iii) Part C consisting of an analytical note based on census as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in greater details, census tables at district, taluk and town levels besides a set of tables generated on the basis of villagewise census data and particulars on amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overall view of the results of a decade long developmental activities in the district. The publication programme too was phased out: Part A was planned to be released first to be followed by part B and then Part C which could be published only after the finalisation of various census tables that were to be included therein and analysed. In Karnataka, Part A and Part B were combined and published on time as a single volume for each district except in the case of Bangalore. Owing to reasons beyond control there has been an inordinate delay in the publication of Part C volumes.

The current volumes of District Census Handbook are thus the fourth in the series and at every succeeding census there has been an endeavour to enhance the utility of these volumes.

2. SCOPE OF 1981 DISTRICT CENSUS HAND BOOKS:

Regarding uniformity and comprehensiveness, the approach in 1981 is much the same as in 1971. The contents have been slightly enlarged and the formats too are restructured to some extent to meet the requirements of the data users. The District Census Handbook has been divided into two parts: i) Part A consisting of town directory and village directory and, ii) Part B consisting of District, taluk, town, village and ward level primary census abstracts besides the special PCA at taluk and town levels in respect of the Scheduled Castes and Scheduled Tribes. Compilation of administrative statistics has been abandoned altogether. Though divided into two parts, in Karnataka as a matter of fact both the parts are being presented in a single combined volume for each district. There is however a point of departure from the all India pattern: all particulars relating to Scheduled Castes and Scheduled Tribes are excluded from the main volume of the district census handbook and are presented districtwise in the form of a supplement.

i) *Town Directory :* In the town directory section there are 7 statements in all to furnish townwise information on aspects such as: growth history; physical aspects and location; municipal finance; civic and other amenities in towns; civic and other amenities in notified slums; medical, educational, recreational and cultural facilities and trade, commerce, industry and banking. As compared to the 1971 series the statement about religionwise population has been dropped and an additional statement has been introduced in respect of urban areas with a population of 50,000 and more to furnish some basic data on slums. This apart, there are a few more variations mainly by way of inclusion of a few additional columns in each statement to indicate the size class of the town, population and also civic administration status with a view to facilitating an easier grasp of the data. In statement I, provision has been made to indicate the decadal growth rates, area and density of population as in 1981 and the sex ratio observed at the three successive censuses. The introduction of additional columns has resulted in the elimination of 2 columns which in 1971 presented comparative information on functional classification of towns. Statements II and III are very much the same while in statement IV additional information on water storage system with capacity has now been provided. In addition, in case of non-availability of fire-fighting station in the town itself reference to the nearest place with that facility has been given. In statement V too in case of non-availability of medical and educational facilities in the town information on the nearest place with such a facility has been provided. An additional column in this statement presents information on working women's hostel. Statement VI has remained almost unchanged except in the explanation regarding the imports and exports concerning the goods which simply pass through the town.

The towns in the district are arranged serially on the basis of their names in an alphabetical order and assigned location code numbers starting from I. For presentation of data in the town directory statements the same order of the towns has been followed. The concept of urban agglomeration introduced in 1971, has been retained for use at the 1981 Census also. Where an agglomeration includes two or more independent towns, the names of the constituent towns are indicated in the correct sequence as per alphabetical arrangement of their names. But, the details to be furnished in the subsequent columns are skipped with a view to avoiding duplication. Instead, immediately after the name of the town, a cross reference is given by the legend "See.....Urban Agglomeration" printed within brackets. The name of the core town of the urban agglomeration too would appear at its correct sequence with the legend as above and immediately below that the same name with the additional title ".....Urban Agglomeration" appears again without bearing any serial number. Against this line the cumulative total for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core city and followed by the others arranged in the alphabetical order of their names. This procedure is the same as that followed in 1971 and enables one to have a fairly good assessment of the data in relation to the smaller civic administrative units that form part of the large unit and also of the larger statistical unit itself simultaneously. In case there are outgrowths which are not 'urban' in their own right the particulars relating to such areas are merged with those relating to the concerned town and presented in the statement. Such towns having outgrowths are marked out by an asterisk mark and for all purposes the town includes not only its statutory limits but also all the outgrowths and together constitutes an independent statistical unit. In an appendix, the names of these outgrowths and the population thereof are furnished townwise. These outgrowths appear in the Village Directory also. However, in all such cases merely a legend to the effect that it is an outgrowth of such and such a town is recorded along the line instead of furnishing land use data and information on amenities. In the case of villages certain parts of which are regarded as outgrowth while the other parts are considered as rural the data relating to the outgrowth is included in the town directory statements and the data relating to the rest of the portion appears in the village directory. It may incidentally be mentioned that there are no such cases in Karnataka.

In statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole the legend 'see constituent units' is printed along the line instead of allowing the entire line blank.

ii) *Village Directory :* In the village directory the columns regarding the land use pattern are very much the same while those relating to amenities have been slightly modified. Unlike in 1971, this time if a village is not having a particular amenity then the distance range within which that amenity is available and may be availed of has been indicated. This enquiry is however confined only to the basic level under each category of amenity. In other words, if a village is not having any educational institution at all then the distance that one has to cover to reach the nearest place having a primary school is indicated in ranges of less than 5 Km., 5-10 Km and 10 + Km. If a village is however having a primary school no attempt is made to provide similar information in relation to middle school, high school and college level in a progressive manner. Similar procedure has been followed regarding medical, postal and communication facilities. Regarding weekly markets too, if the village is not the venue of such a market the distance to the nearest weekly market is indicated in ranges.

In the village directory an additional column has been introduced to indicate the population of the village as well as the number of households therein. This juxtapositioning of population and amenities data would help one to assess at a glance the adequacy or otherwise of the amenities available within or in the immediate neighbourhood of the village. Another change with regard to the area and land use data this time is that these figures are furnished not in acres but in hectares upto two places of decimal. One more notable addition is the provision to indicate information about the proximity of the public transport facility such as bus stop and railway station in respect of each village. In 1971 though information on railway station (i.e., if available within one Kilometre from the village) was furnished in addition to the general condition of the road to the village under the column for communication, there was no reference at all to bus transport facility. This time, in column about approach road the condition of the road that leads to or passes through the village is indicated. In the remarks column general information about the number of copies of newspapers circulating in the village as also about the number of different types of automobile vehicles available in the village is furnished.

In the case of uninhabited villages i.e., villages which have returned nil population at the 1981 Census, only the details in respect of land use are furnished and in the columns pertaining to amenities the word uninhabited has been printed. If there are any village that are regarded as outgrowths of an urban agglomeration, then neither the land use data nor the data on amenities is furnished in this statement. After the location code number and name of the village a legend indicates the name of the urban agglomeration of which that village is a part. Practically this administrative unit has lost its independent existence having been merged in another unit for statistical purposes. But if only a portion of a village is so

affected by inclusion in an urban agglomeration then information as may be relevant to the portion that has still remained in the rural fold as a village has been furnished in the village directory.

In order to facilitate easy reference, an alphabetical list of villages showing population figures according to the censuses of 1971 and 1981 is given in respect of each taluk. At the end, the following appendixes have also been included to provide an over all view of the district: talukwise abstract of amenities; list of inhabited villages not having any amenities; and land utilisation data for non-municipal towns if any.

iii) *Primary Census Abstract:* As at the two previous censuses this time also the Primary Census Abstract is presented villagewise in the case of rural areas. But, in so far as the urban areas are concerned the practice of furnishing data upto urban census enumerator's block level has been given up and the particulars are presented upto ward or division level only. Within the district the taluks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each taluk after furnishing the taluk level data with the rural-urban break up the villagewise details are furnished and this is followed by the data relating to towns in the taluk.

In the Primary Census Abstract format itself there have been certain changes. Though fresh columns have been introduced to cover a new category of workers viz, marginal workers, the total number of columns is reduced in view of the elimination of details regarding workers engaged in activities other than cultivation and household industries. There are now hardly 22 columns in the statement i.e., excluding those related to Scheduled Castes and Scheduled Tribes which however appear separately in the Supplement. The workers are classified into main workers and marginal workers and the main workers are further classified into one of the four categories viz, cultivator, agricultural labourer, worker in household industry and 'other' worker depending on the nature of work done and the sphere of economic activity.

In the case of urban agglomerations the same procedure as has been adopted for presentation of data in town and village directories has been followed. That is to say, the urban agglomeration is regarded as a single statistical unit and the aggregate figures obtained by the addition of details in respect of each constituent town and outgrowth are noted against the name of the urban agglomeration which in itself does not bear a location code number. In the section dealing with the Urban Primary Census Abstract the core town with its location code appears first carrying the legend: 'See,....urban agglomeration'. Immediately below that line the full name of the urban agglomeration appears and the aggregate figures for the urban agglomeration are furnished. This line is then followed by the constituent towns arranged in alphabetical order of their names along with their Location Code number and full details under various columns. If the core town or any other town for that matter were to have any outgrowths then the first line for the town would in fact be a sub-total as it includes data not only of the town but also of the outgrowths. Thereafter, the name of the town and its constituent outgrowths are given along with the relevant data.

In the rural portion of the Primary Census Abstract if an entire village were to form part of any urban agglomeration then only the name of the village is indicated along with the legend that this village is included in such and such urban agglomeration. In the case of villages partly included in an urban agglomeration details relating to only such portion as has remained under the rural category are given.

3. BRIEF NOTE ON CENSUS CONCEPTS:-

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 1981 census is the sunrise of March 1, 1981 i.e., the census provides a snap shot of the population of the country as it existed at the sunrise of March 1, 1981. Actual enumeration was spread over a period of 20 days from 9.2.81 to 28.2.81 followed by a revisional round up to 5.3.81 for updating of the population figures with reference to the sunrise of March 1, 1981. The questionnaire canvassed by the enumerators viz., the household schedule and individual slip are perforce brief in their wordings and this naturally implies the use of abstractions and concepts. With a view to ensuring uniformity in approach in understanding the various concepts and in properly eliciting and recording of the information, the enumerators and supervisory officers were imparted both practical and theoretical training intensively.

As a preliminary to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit and thereafter geographical areas that could be conveniently covered by each census enumerator were carefully carved out to constitute the enumerator's blocks.

The second major step was the houselisting operation which was carried out in the State during May 1980. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator's blocks were carefully demarcated on the basis of the lay out sketches and notional maps prepared for the houselisting operations. The detailed information on households and population collected at the houselisting operations was also quite useful in this task of formation of census enumerators blocks. Definitions and explanations regarding the important census concepts are given in the following paragraphs.

i) *Urban areas:* The definition adopted in 1961 and adhered to in 1971 has by and large been retained for the 1981 census also. There is however a minor modification regarding the classification of fishing and forestry. These two activities have now been regarded as allied to agriculture unlike in the earlier censuses when these were treated as purely non-agricultural activities for working out the proportion of agricultural and other than agricultural workers. According to definition the urban areas include:

"1) All places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees etc.,

2) All other places which satisfy the following criteria :-

a) minimum population of 5,000

b) at least 75 per cent of male working population engaged in non-agricultural pursuits;

c) a density of population of at least 400 per sq. km. (1,000 per sq. mile)

d) all places which, though not satisfying the above criteria had pronounced urban characteristics"

Demarcation of urban areas was done at the preliminary stage itself. In the case of non-statutory towns the empirical test was applied on the basis of the population returns of the 1971 census and this was supplemented by consultation with the State Government authorities concerned. The changes such as declassification i.e., abolition of municipalities, constitution of new municipalities and such other civic bodies, coming up of large human settlements at construction sites and other centres, de-population of project areas and former labour camps etc., have all been considered while preparing the lists of urban areas. Urban areas with a population of 100,000 and more are called cities and the others are termed merely as towns.

ii) *Urban agglomeration:* This concept which in 1971 replaced the concept of town group has been retained for the 1981 census also. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But, if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called 'urban agglomeration . An urban agglomeration may consist of : a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages); b) One town with similar outgrowth or two or more adjoining towns with their outgrowth as in (a); or c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread. It may further be noted that geographical contiguity with the statutory limits of the core town has been the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the agglomeration. This is purely a statistical concept and for carrying out the actual census operations the administrative jurisdictions of the city or the towns concerned as well as the outgrowths situated in villages have been kept quite intact. The data have been pooled together only at the tabulation stage and presented in the combined form for the urban agglomeration as a whole and also severally for each one of the constituent units.

iii) *Rural areas i.e. Villages:* Areas which are not classified as urban according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages the boundaries as determined by the local usage have been adopted. The revenue village may consist of a single nucleated settlement or comprise of several hamlets i.e. human settlements or clusters of houses located at several places within the territorial limits of the village, or may be completely uninhabited. That is to say, the census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule. These are for example:

1) When the main settlement of the village with or without the surrounding lands is constituted into an urban area the remaining tracts of the revenue village are collectively treated as a separate unit for purposes of census enumeration, i.e. the truncated portion itself is considered as an independent village in itself.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by notification, such areas, whether populated or not, are excluded from the revenue village concerned and for purposes of census operations the village boundaries are re-defined.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged under reservoir projects but are still maintained in the jurisdictional lists of the survey and settlement authorities pending resurvey and such other procedures are taken note of as revenue villages but are omitted for census purposes. i.e. these are not treated as census villages The names of such villages if any in a taluk are given at the end without serial number but with due remarks.

4) If there are forest areas that do not form a part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit in vogue such as Forest Beat, has been reckoned as the census village. A forest range may consist of several such census villages.

5) For purposes of local administration such as collection of land revenue a single revenue village may sometimes be found to be sub-divided into two or more units. Instead of ignoring such divisions, occasionally each such unit gets reported as a separate independant

revenue village. In spite of efforts to eliminate such cases it is quite likely that a few may persist till the very late stage when necessary corrections cannot be carried out.

iv) *Census Enumerator's Block :* In urban as well as in rural areas the smallest unit adopted for enumeration is the Census Enumerator's Block. The town is generally divided into wards and divisions and wherever such units exists their distinctness has been retained. The geographical area comprised in each such ward or, the town in its entirety is constituted into several blocks in such a way that every bit of land stands included in one block or the other. If there were to be any islands then each island is treated as a separate unit and divided into one or more number of blocks as may be necessary. Generally in the urban areas each census enumerators block consists of about 130 households covering a population of about 650 persons. However, in view of the fact that each block should have clear cut boundaries recognisable on the field, smaller blocks have also been constituted. In constituting these blocks all the lands included in the statutory limits of the town are taken into consideration. In the case of non-municipal towns such as a Town Panchayat or a Group Village Panchayat the revenue limits of only that village which has been classified as a town on the basis of the empirical criteria have been considered as the boundaries of that census town. In other words, the panchayat jurisdiction and the census jurisdiction need not necessarily be identical in the case of non-municipal towns.

In the case of villages, irrespective of the population size every hamlet and every island has been constituted into a separate block. If the hamlet or the island is large the number of enumerator's blocks constituted therein may be two or even more. The work-load norm per block is 150 households with a population of about 750 persons and this generally applies to large nucleated settlements having more than this fixed limit and therefore require division into two or more blocks. In each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting blocks. That is to say the entire revenue jurisdiction of the village is divided into blocks in such a way that even the agricultural lands that may not contain any houses or households stand included in one block or the other. In other words, enough emphasis has been laid to ensure complete coverage of the territorial jurisdiction of each village.

v) *Location code number :* Every State in the country, every district in the State, every taluk or Town in the district, every village in the taluk and every ward or division in the city or town and every enumerator's block in the village or town is assigned a number for operational ease, in a particular order. When these numbers are written side by side in the same order starting from the state and separated by an oblique line the identity of any particular census enumeration block can be known quite easily. The numbers assigned are in international numerals except in the case of towns in which case Roman numerals have been adopted. The states, the districts, the towns and the taluks are arranged in an alphabetical order of their names for assigning these numbers. Taluk maps showing the boundaries of various villages therein are quite essential since these provide the basis for assigning location code numbers to villages. For purposes of revenue administration the villages of a taluk are usually organised into a few circles or Hoblis and each unit will have a headquarters town or village. The identity of such units is maintained to the extent possible. Starting from the circle of which the taluk headquarter town or village happens to be the circle headquarter as well as the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction i.e., in a concentric manner around the headquarter village or town, or in a serpentine manner starting from the north-west corner. After exhausting all the villages of the circle the next circle situated in the clock wise direction to the first one is taken up and commencing from the headquarter village all the villages within its jurisdiction are numbered. Thereafter, the next circle is taken up and in this manner it is ensured that all the villages of the taluk as well as any other analogous units such as islands, reserve forest tracts not included in any revenue village etc., if any, are assigned location code numbers. The numbering of villages runs continuously for the taluk through the different circles or *Hoblis*. Taluk maps showing the boundaries of various villages along with their corresponding location code numbers are also presented in these volumes for reference purposes.

vi) *Building :* A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

vii) *Census House :* A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

viii) *Household :* A Household is a group of persons who commonly live together and would take their meal from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Example of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams* etc.

These are called 'Institutional Households'. There may be one member households, two member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not at all have a house to live in and may temporarily dwell on the road-side, pavements, in humepipes, temples, mantaps, platforms etc, or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households are for purposes of reference termed as Houseless Households.

ix) *Criteria for enumeration of a person in a particular household:*

a) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1981 (both days inclusive).

b) Also those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 to 28, 1981) but are not present at the time of enumerator's visit;

c) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1981 and,

d) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration, such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

x) *Literate :* A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

xi) *Workers and Non-workers :* Depending upon the nature of his or her activity during the reference period every individual enumerated at the census is classified as either a worker or a non-worker. By definition, a worker is one who has worked, that is, 'participated in any economically productive activity'. Such participation may be physical or mental in nature. Further, work involves not only actual work but also effective supervision and direction of work. The reference period for determining whether a person is worker or a non-worker is the full year preceding the date of enumeration. The criterion is somewhat liberal and, even a person who has participated in the production of economic goods and services for a very brief period will be categorised as 'worker'.

Among workers however there are two categories:

a) *Main Workers:* Those who have worked for at least 183 days during the preceding year i.e., the entire reference period. (even though this may be in broken spells and in different occupations),

b) *Marginal Workers:* Those who have worked for less than 183 days during the entire reference period.

For both the categories of workers further details on the sector of economy in which they have worked, their occupation (that is, the actual nature of work done) and employment status (that is whether employer, employee, unpaid family worker or own account worker) have also been ascertained. The industrial classification of workers as adopted at the censuses of 1961 and 1971 has been retained at the 1981 census also. The industrial classification categories are: (I) Cultivators, (II) Agricultural labourers, (III) Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities, (IV) Workers in mining and quarrying, (V) Workers in manufacturing, processing, servicing and repairs which are (a) run as household industry, (b) not run as household industry, (VI) Workers in construction, (VII) Workers in trade and commerce, (VIII) Workers in transport, storage and communication, (IX) Workers in other services. For purposes of presentation in the Primary Census Abstract however the details in respect of the main workers alone are considered and the industrial classification categories of III, IV, V(b), VI, VII, VIII, IX are pooled together and shown under the heading 'Other Workers'. The broad classifications therefore are: I–Cultivators, II–Agricultural labourers, V(a)–Workers at house hold industries, manufacturing, processing, servicing and repairs and, III, IV, V(b) and VI to IX–Other Workers. Explanations regarding the broad categories are given below:–

a) *Cultivators:* For purposes of the census a person is working as *Cultivator* if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land will not be treated as cultivator. Similarly, a person working in another person's land for wages in cash or kind or a combination of both (agricultural labourer) will not be treated as cultivator.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc. It is important to note that for certain reasons the growing of certain crops is not considered as agriculture. If a person is engaged in the growing of such crops he or she will not be considered as cultivator or agricultural labourer.

The growing of the following crops is considered as cultivation:

1. *Cereal and millet crops:* Paddy, wheat, jowar, bajra, maize, ragi, barley,gram, etc.
2. *Pulses:* Arhar, moong, masur, urd, kesari etc.
3. *Fibre crops:* Raw cotton, jute, mesta, sunhemp and kendred fibre crops.
4. *Oil seeds:* Sesamum, ground-nut, rape, mustard, linseed, castor, etc.
5. *Cash crops:* Sugar-cane

The growing of the following crops will not be considered as cultivation:

1. *Plantation crops:* Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. *Edible nuts (Other than groundnut):* Walnut, almond, cashewnut, etc.
3. *Fruits:* Bananas, apples, grapes, mangoes oranges, etc.
4. Coconut
5. Ganja, Chinchona, opium, and medicinal plants.
6. Arecanuts.
7. Flowers.
8. Roots and tubers, chillies and spices (other than pepper and cardamom)
9. Vegetables.
10. Other crops not specifically included under cultivation.

b) *Agricultural Labourer:* A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on land on which he or she works.

c) *Household Industry:* Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

d) *Other Workers:* The type of workers that come under this category include factory workers; plantation workers; those engaged in trade, commerce, business, transport, mining, construction, political or social work; all government servants; municipal employees; teachers; priests; entertainment artists, etc. In effect, all those who work in any field of economic activity other than as cultivators and agricultural labourers or in household industry are categorised as 'Other Workers'.

xii) *Marginal Workers:* Though similar classification is possible in respect of the marginal workers also the Primary Census Abstract does not aim to present these details. The total number of marginal workers alone is indicated sexwise. In respect of such persons answers on how they have engaged themselves mostly during the reference period have also been elicited. That is to say, the concept of main activity as adopted in the 1971 census is kept in view and, as in the case of non-workers, relevant details about their activity have been ascertained.

xiii) *Categories of non-workers:* Depending upon the manner in which the non-workers have engaged themselves for most of the time during the reference period they are classified into one or the other of the six categories, mentioned below, at the time of the enumeration itself. However the Primary Census Abstract does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) *Household duties:* This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) *Students:* This will cover all full-time students including children attending school.

c) *Dependents:* This category includes all dependents such as infants, children not attending school, and persons permanently disabled from work because of illness or old age. Dependents will include even able-bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) *Retired persons or Rentiers:* A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other persons of independent means for securing which he or she does not have work, will come under this category.

e) *Beggars:* This will cover beggars, vagrants or cases such as persons without indication of source of income and those with unspecified source of subsistence who are not engaged in any economically productive work.

f) *Inmates of Institutions:* This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institution would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

4. BRIEF HISTORY OF THE DISTRICT :

In accordance with the usual practice Dharwad district too has been named after the district headquarter town. It may be incidentally mentioned here that though Dharwad has a history of more than eight centuries it is no longer an independent town. In 1962 the erstwhile towns of Dharwad and Hubli were amalgamated to constitute the Hubli-Dharwad Municipal Corporation. Thus, strictly speaking, the district takes its name from a portion of the pre-eminent town of the district. Formerly, that is prior to the publication of the notification No RDF 6 TNV 76 dated 31.1 1977, this district (as well as the former town) was known as Dharwar, the anglicised form of Dharwad or, more properly Dharawada.

The area comprised in the district has a few places of great antiquarian interest and has several sites of historical importance. The epics and the puranas refer to this part of the country as forming part of Kuntala Desha. Lakkundi of Gadag taluk is for instance identified with the place described in ancient records as Sri Dasarathi Vinirmita Mahagrama (great village founded by Shri Rama) and as Rama-rathi agrahara. Ron is known as Dronapura and is said to have been named after Dronacharya the famous guru of the Kauravas and Pandavas. Some peculiar structures found in the forests of Hire-Kerur taluk are locally known as Pandavara Kattegalu (platforms of the Pandavas) Hangal is identified with Viratakote and Viratanagari the place where the Pandavas spent a part of their period of exile. Puranas indicate that in ancient times Karnataka, including this part of the country as well, was ruled by the Matsyas, the Nagas, the Abhiras, Mahisikas, Ajas and the Vanaras for varying periods. Available evidence shows that this district too was inhabited by men from the early palaeolithic age. The relics of the palaeolithic period discovered in the district include the cairns at Agadi, the dolmens at Motebennur, the pigmy flints which are regarded as the memorials of the survivors of the palaeolithic man, and the cinder mound at Budiguntha. Among the artefacts of the neolithic period, a mention may be made of the painted pot sherds, terracotta fancy articles and the Ukhapatra (sacrificial pot) discovered at Itgi and a few other places.

During the early historical period the entire Deccan region, including this district also, formed part of the Mauryan empire. Reminiscences of the Mauryan rule have lingered on to the modern times in expressions such as Morerangadi and Moreramatti applied to the dolmens and cairns found in several parts of the district. References in ancient inscriptions to various centres of this district reveal that Dharwad area too formed part of the empire of the Satavahanas who came to power after the fall of the Mauryas in the Deccan and claimed themselves to be the Lords of the Dakshinapatha. With the downfall of this main dynasty, the Satavahana empire was partitioned among the Abhiras in the north-west, the Chutus in the south and the Ikshvakus in the Andhradesha. The Kuntala country, including Dharwad district as well, formed part of the kingdom of the Chutus during the early parts of the Christian era. Subsequently till the emergence of the Kadambas in about 345 A.D., the Gangas and the Pallavas reigned supreme for brief periods, in turns. The Kadambas (345 A D. to 565 A.D.) had their capital at Banavasi and their kingdom included among other areas, the Suddi-Kundur Vishaya (which later came to be known as Kundur-500, extending from Narendra near Dharwad upto Halsi in Belgaum) and the Panthipura Vishaya (which is the same as Panugal-500 covering Hangal taluk) major parts of which now stand included in Dharwad district. The central and the northern parts of the district too formed part of their territory as may be made out from the description of the boundaries of their kingdom contained in Birur plates

In the beginning of the sixth century, the Chalukyas of Badami established their supremacy and rendered the position of the Kadambas into that of their vassals with the title of Mahamandaleshvaras. The district has yielded numerous records registering grants made to various temples by the Chalukyan monarchs starting from Pulikeshin I (543-65 A.D.) to Kirtivarman II (744-55 A.D.). The Chalukyas were in turn overthrown by the Rashtrakuta Dantidurga in about 756 A.D. The supremacy of the Rashtrakutas lasted for a little more than two centuries and during this period too the Kadambas managed to retain their position as feudatory chiefs. In matters of prowess and extending patronage to art and literature almost all the Rashtrakuta monarchs have carved out an unique place for themselves. Govinda III (792-814 A.D.) for instance led his victorious armies upto the Himalayas in the north, and brought the Pallava Dantiga and the Eastern Chalukya king Vishnuvardhana under his subjugation. The name of Nripatunga Amoghavarsha I (814-80 A.D.) the author of the famous Kavirajamarga, stands foremost in the annals of Kannada history, literature and religion. However, Karka (972-73 A.D.) the last ruler of this dynasty was defeated and slain by his own subordinate, Taila II who founded the family of the Later Chalukyas or the Chalukyas of Kalyan. Under Taila II (973-97 A.D.) the Belvola and Purigere countries were under the administrative control of his feudatories named Konnappa and Sobhanarasa. The latter is said to have exercised control over Kundur, Kukkunur and Halsige tracts as well. An inscription dated in 1071 A.D. states that when the Cholas invaded Belvola, burnt many temples, and destroyed several Jaina shrines at Purigere (Lakshmeshvar) as well, Someshvara I (1042-68) repulsed the attack with the help of Chattadeva and Barmadeva. During the period of Someshvara II (1068-76), Lakshmanarasa was the governor of Belvola and Purigere while Udayaditya of the Ganga family, governing from the city of Bankapur, had the charge of Banavasi as well. In 1076 A.D. Vikramaditya VI rebelled against his brother Someshvara II and occupied the Chalukyan throne. Vikramaditya reigned supreme till 1126 A.D. and founded an era, called Chalukya Vikrama Varsa, in commemoration of his victory. A large mass of epigraphs bearing reference to the reign of Vikramaditya VI are found all over the district. Vikramaditya's long reign of 50 years has been hailed as the most glorious period of the Chalukyan rule when feudatory chiefs belonging to the Kadamba, Sinda, Gutta, Yadava, Kalachurya and Hoysala families ruled in their respective territories as Mahamandaleshvaras and paid homage to the imperial throne. His successor Someshvara III (1126-38 A.D.), known for his learning, is the author of Manasollasa or Abhilasha Chintamani which gives a great deal of information on a variety of subjects. He was succeeded by his son Jagadekamalla II (1139-55 A.D.) who, in addition to his capital at Kalyan, is said to have established a provincial centre at Kadalipura near Hangal. During the reign of his younger brother and successor Taila III (1150-63 A.D.) the power of the Chalukyas rapidly declined. Bijjala of the Kalachurya family who was then the commander-in-chief, enlisted the cooperation of some of the dissident powerful chiefs such as Vijayarka, and Prolaraja and kept his own master Taila under complete subjection. In 1157, Taila III fled to Annigeri in Dharwad district and made it the capital of his kingdom which was greatly reduced in extent. In 1162, Bijjala marched against Taila forcing the latter to retreat further west to Banavasi and declared himself an independent monarch. The supremacy of the Kalachuryas lasted hardly for two decades. During the brief reign of Bijjala, his prime minister Basaveshvara emerged as a great social and religious reformer and his egalitarian teachings acquired an overwhelming number of followers. The opponents of the reforms preached by Basaveshvara included the king also and the chain of events that took place in the capital culminated in the flight of Basaveshvara to Kudala Sangama and an insurrection in which the Bijjala himself was killed.

In 1182 A.D. Someshvara IV of the Chalukya family regained some of the provinces of his ancestral dominions from the Kalachuryas and re-established the Chalukyan empire in this region for a short period. He established himself at Banavasi and had his capital at Annigeri also. Shortly thereafter, the Yadavas of Devagiri (who in the meantime had captured large parts of the Chalukyan empire in the east and the north-east of Dharwad from the Kalachuryas) took over these territories also. Though the period of the Later Chalukyas is reckoned from 1184 to 1210 A.D. shortly after 1189 A.D. their empire was divided between the Hoysalas in the west and the south, and the Yadavas of Devagiri in the north and north-east. This division however ceased in 1210 A.D. when the whole of the dominions passed to the Yadavas of Devagiri. That there was a keen contest between the Hoysalas and the Yadavas for the occupation of the delta between the Tungabhadra and the Malaprabha is evident from the existence of records, both of Hoysala Ballala and Yadava Singhana, in the same region issued by each after their conquests of the place. Hoysala king Vishnuvardhana (1100-52 A.D.) is said to have extended his power upto Banavasi, Panugal, Halsige, Purigere and Masvadi near Dharwad. His conquests were short-lived and a somewhat more lasting conquest of Dharwad region was by Vira Ballala II (1173-1210 A.D.). A hero stone in Satenahalli near Hangal refers to the battle between Vira Ballala and Mahamandaleshvara Kamadeva and suggests that this region was occupied by the former after wresting it from Kamadeva. In 1192 A.D. Vira Ballala established himself at Lokkigundi (modern Lakkundi). Much before this, according to an inscription at Gadag, he had defeated Jaitugi of the Yadava family, gained control over the Kuntala country and had a capital at Annigeri also. An inscription on a hero stone at Hangal records that in 1196 A.D. Vira Ballala laid siege to the city and that his forces were routed by the dashing counter-attack by the brave Sohani and his son Padmanna the leaders of the Kadamba garrison and that in this battle Sohani lost his life. Later, in 1200 A.D., Ballala succeeded in taking Hangal. His son and successor, Narasimha II (1220-38 A.D.), however lost all that his father had captured north of the Tungabhadra and retired to Dwarasamudra.

The first mention of Yadavas in connection with Dharwad is in the reign of their third king Bhillama (1187-91 A.D.) whose son was defeated by Vira Ballala at Lakkundi. As this victory is said to have secured to Vira Ballala the country of Kuntala it is evident that Bhillama must have then held a fairly extensive kingdom including Dharwad. One of his inscriptions at Annigeri, dated in 1189 A.D. speaks of Annigeri as the capital from which his underlord, Mahamandaleshvara Bachiraja was governing Belvola. Gadag, Lakshmeshvar, Chaudadanapur and Rattihalli have yielded inscriptions belonging to Singhana II (1209-47 A.D.) the grandson of Bhillama. In 1247, his Mahapradhana and Senapati Bachiraja was the governor at Lakshmeshvar. A Haveri inscription belonging to the reign of Krishna (1247-59 A.D.) the grandson of Singhana, states that his minister Chavundaraya was administering these territories from his capital at Puligere i.e., Lakshmeshvar. Several epigraphs belonging to the reign of Ramachandra Deva (1271-1309 A.D.), the greatest of the Devagiri Yadava kings, have been found at Chaudadanapur, Lakshmeshvar, Naregal and Rattihalli. One of these inscriptions, dated in 1277 A.D., mentions that one of his Mahamandaleshvaras namely, Saluva Tikkama, led a victorious expedition upto Tungabhadra in the south. Tikkama has been hailed in it as the establisher of the Kadambas and the overthrower of the Hoysalas. According to another inscription in 1295 A.D., his Mahapradhana Mallideva was the governor at Lakshmeshvar. During the reign of his successor Shankara Deva (1309-12 A.D.) the Yadava kingdom was annexed by the Sultan of Delhi. The suzerainty of the Sultan was resisted by Kampila Raya who was a subordinate of Yadava Ramachandra and had declared independence during the period of the political chaos that ensued the invasions by Malik Kafur. This new kingdom with its strongholds at Kampili, Kummata and Hosadurga (Anegondi) included the present districts of Bellary, Raichur and Dharwad. However, in the 1327 campaign Kampila Raya was killed. But, by then, he had sown the seeds from which the great Vijayanagara empire emerged. An inscription found in Lakshmeshvar commemorates the death of Kampila Raya while another found at Sangur in Haveri taluk records that the image of Kumara Ramanatha (the valiant son of Kampila Raya) was set up at Chengapura (Sangur) by Madarasa in Saka 1329 during the reign of Devaraya. This image is even now regarded as an object of worship and in folk literature, Kumara Rama is hailed as a great saviour. As a result of the conquests undertaken by Harihara and Bukka soon after the formation of the Vijayanagara kingdom, Dharwad district too became one of its integral parts. While Vijayanagara was fast developing another powerful force, namely that of the Bahamanis, emerged with Gulbarga as its headquarters. As a result northern parts of Karnataka inclusive of Dharwad district became a ground of hot contest between these two powerful rivals. Consequently wars were fought more frequently and the people of this region were subjected to much sufferings. In spite of several reverses, by and large, the Vijayanagara kings retained control over a major portion of the district during this period. Navalgund and Bankapur however were among the notable possessions of the Bahamanis.

Yusuf Adil Khan proclaimed independence, seized Bijapur as also Bahamani possessions in Dharwad district and founded the Adil Shahi rule in 1498 A.D. The rivalry for the possession of Dharwad region became much more intense until Sri Krishnadeva Raya (1509-29 A.D.) defeated Ismail Adil Shah in decisive battles and ushered in a period of comparative peace and prosperity. Sri Krishnadeva Raya and his brother Achyuta Raya are credited with the introduction of the system of water works for which the district is famous and also with the introduction of Rai Rekha Mar survey which formed the basis of all later revenue settlements. During this period the Portuguese occupied Goa and they were on good terms with the Vijayanagara monarchs. The Dharwad region flourished as it was located on the main trade route between the capitals of Goa and Vijayanagara.

With the decline of the Vijayanagara power following the death of Rama Raya in the battle field and the utter defeat suffered by the Vijayanagara forces at the Rakkasa Tangadgi battle in 1565 A.D., Dharwad district came under the sway of the Bijapur kingdom. In 1569 A.D. Dharwad witnessed a major war for supremacy fought between the forces of the Sultan of Ahmednagar and those of Ali Adil Shah. The governors at Dharwad and Bankapur who had been appointed by the erstwhile Vijayanagara kings held out as independent rulers and fiercely resisted the imposition of Bijapur rule for a short while. It was in fact only in 1573 A.D. that Ali Adil Shah (1557-80 A.D.) could capture Dharwad (which was regarded as one of the strongest forts at that period) and follow it up in 1575 by the annexation of Bankapur. Thenceforth, for about a hundred years, this region formed part of the Adil Shahi kingdom of Bijapur, that is, until it was taken over by the Moghul emperor. Though this period of Bijapur rule cannot be hailed as a period of undisturbed peace and prosperity, it may be said that wars were much less frequent. In the latter half of the 17th century it has been recorded that this region was full of villages with weavers and that Hubli was a place of much wealth and trade.

Muhammed Adil Shah of Bijapur refused to accept the supremacy of the Moghul emperor. Consequently in 1633 A.D. emperor Shah Jehan invaded the Deccan and laid waste the country and also extirpated the Sultan of Ahmednagar. In 1637 A.D., Shahji Bhonsle who was till then in the service of Ahmednagar Sultan entered service in the court of Muhammed Adil Shah of Bijapur and soon earned for himself a place of honour in the Bijapur kingdom. About a decade later, in 1647 A.D., his son

Shivaji rebelled against the Bijapur Sultan as well as his own father and established himself as an independent ruler with his capital at Kalyan. Shivaji captured portions of Dharwad district also. In 1673 A.D., while ravaging Bijapur territory, the Maratha army plundered the rich mercantile town of Hubli. In 1674, Shivaji fortified Nargund and took Dharwad as well. At about this time, Abdul Karim Khan was appointed as the governor of Bankapur province and also as the chief captain against the Marathas. Aurangzeb's son, Sultan Muassim, marched in the name of the Delhi emperor to regain the lost territories and to establish the supremacy of the Moghul empire. He took Hubli and Dharwad from the Marathas and placed garrisons at both these places. But, as his army was greatly reduced due to famine conditions he was compelled to withdraw towards Ahmednagar. However in 1686 A.D., Aurangzeb captured Bijapur and annexed the entire kingdom to his empire. The Moghul rule which started thus was purely of a military nature and it lasted till 1720 A.D. only. Abdul Rahuf Khan, the son of Abdul Karim Khan the Bijapur governor of Bankapur, was inducted into the service of the Moghul emperor and was entrusted with the administration of Dharwad region and the surrounding areas. At first he had his capital at Bankapur but, shortly after assuming office, he preferred to move over to Savanur. The Moghul power began to weaken soon after the death of Aurangzeb in 1707 A.D. This led to the establishment of two Maratha principalities under two of Shivaji's grandsons: Satara under Sahu and Kolhapur under Sambhaji. In 1719 A.D., Sahu received three imperial grants : one for the Chowth (one-fourth-share), another for the Sardeshmukhi (one-tenth-share) of the revenues of the six Deccan provinces including Bijapur which covered Dharwad as well and the third grant was for the swaraj of sixteen districts including Gadag. Sahu appointed Fathe Singh Bhonsle, the Raja of Akalkot to collect the dues on his behalf. The local Subhedars were however too powerful to allow the Marathas to collect the tributes. As a result in 1726, Peshva Baji Rao himself marched into Karnataka with a large army and plundered places as far south as Shrirangapattana. But he did not make any attempt to establish his power on any durable basis. In consequence thereof the Nawab of Savanur gradually acquired a large territory and in 1746, he openly resisted the Marathas. This was resented by the Peshva and culminated in a Maratha invasion of his territories. The Nawab entered into a peace treaty by which he yielded large tracts of Dharwad district to the Peshva and retained only Hubli, Bankapur, Hangal and a few other places. Again in 1755, the Nawab, invited trouble by offering asylum to a deserter of the Maratha command. Bankapur was besieged by the Marathas and realising the futility of holding out, the Nawab bought peace by surrendering a few more tracts to the Peshva. The local desais were permitted by the Peshva to administer the ceded territories and he made them responsible for regular payment of the tributes due to the Marathas. A few years later, in 1764, Haidar Ali of Mysore subdued the Nawab of Savanur when the latter refused to break off his allegiance to the Marathas. His general Fazl Ulla Khan took Dharwad and overran the country as far north as the Krishna. Naturally, there was a counter-attack by Peshva Madhava Rao, and, even though the advance party led by Gopal Rao Patvardhan was defeated by Fazl Ulla Khan, the Peshva used his troops for driving out Haidar's garrisons from the towns and villages north of the Varada and he also took Dharwad. Thus the Maratha supremacy was again re-established in this region. After the death of Peshva Madhava Rao in 1773 there were dissensions in the Poona Court. At this juncture Haidar Ali entered into close relations with Raghunatha Rao, acknowledged him as the head of the Marathas and agreed to support him in the fight for succession. In 1776, in return for a gift of Rs.16 lakhs, Raghunatha Rao agreed that Haidar Ali should take hold of the country to the south of Krishna. Accordingly, Haidar Ali crossed the Tungabhadra, took Bankapur and Savanur. The opponents of Raghunath Rao enlisted the support of the Nizam and marched south to drive out Haidar's troops. The advance party was destroyed by Muhammed Ali, the Mysore general and Haidar Ali tactfully bought off the Nizam's forces. The Marathas recrossed the Krishna without risking any action. Then, Haidar Ali retook Dharwad and also established his suzerainty over the desais of Nargund, Navalgund, Dambal, Sirhatti and such other strong places. He strengthened his hold on the district further and formed a close alliance with the Nawab of Savanur by offering his daughter in marriage to the eldest son of the Nawab and by accepting the offer of Nawab's daughter for his own second son in turn. It was only in 1782 that the Marathas could turn their attention to the territories they had lost to Haidar Ali. Nana Phadnavis demanded that Haidar Ali should pay the tributes due to the Marathas and also to restore to him the territories north of the Tungabhadra. At this juncture, consequent on the death of Haidar Ali, his son Tipu Sultan took over the reigns of administration. When Nana Phadnavis renewed his demands, Tipu Sultan acknowledged the obligations but evaded payment. In the meantime, the Nawab of Savanur shifted his loyalty to the Marathas and thus incurred the wrath of Tipu Sultan. The Nawab was attacked and forced to seek refuge at the Poona court. In 1785, Tipu Sultan demanded a higher tribute from the chief of Nargund. But the chief refused to pay up and sought for the intervention of Nana Phadnavis. Tipu Sultan besieged Nargund and, inspite of the reinforcements despatched by Nana Phadnavis, captured Nargund. He took Kittur as well. The Marathas then formed an alliance with the Nizam and in 1786 started a major offensive by which they compelled Tipu Sultan to negotiate a treaty. Tipu Sultan, however, had no intention of honouring the agreement and, as soon as the Marathas had crossed the Krishna the Mysore troops recaptured Kittur and all other places. Annoyed at this utter faithlessness on the part of Tipu Sultan, the Marathas forged an alliance with the English as well to mount an attack to regain their territories. In 1790, the confederate forces launched a major offensive as a result of which all the territories north of the Tungabhadra (i.e. Bombay Karnataka region) came under the Maratha rule. By the treaty of Shrirangapattana (1792) the Marathas were confirmed in their possessions in what has come to be known as the Bombay Karnatak region. The Maratha rule lasted for nearly three decades and was marked by internal rivalries and considerable hardship to the common man. Most of Dharwad and Savanur region was made over by the Peshva to Parasuram-bhau in payment of the expenses incurred by the latter in the war which had just concluded. In respect of the other areas the Peshva appointed Dhondopant Gokhale as his representative. Around 1790, Dhondia Vagh who had risen to a high rank in the Mysore army left Tipu's service and, with a few followers, settled near Dharwad as a freebooter. In 1794, Dhondopant Gokhale defeated Dhondia Vagh and forced him to take refuge with Tipu Sultan. Thereafter Dhondopant Gokhale was appointed the Sar-Subhedar of the province. Owing to the policy of self-aggrandizement adopted by him and the absence of Parasuram-bhau from the district resulted in widespread disturbances for a considerable period of time. Thus, for about a decade from 1797, Bhimarao who had possessed himself of Dambal near Gadag, let loose a reign of terror and unceasing pillage, with the connivance of Dhondopant Gokhale, in the country south of the Malaprabha. In the south, contests were continually going on amongst the followers of Dhondopant Gokhale, Parasuram-bhau and the chief of Kolhapur. In the course of these struggles, while Dhondopant appropriated Navalgund and Gadag, the Kolhapur chief took over a major portion of Parasuram-bhau's possessions. In 1799 the fourth Mysore war culminated in the fall of Shrirangapattana and the death of Tipu Sultan. Parasuram-bhau was also killed in 1799. At this juncture, Dhondia Vagh who had been imprisoned and kept in irons by Tipu Sultan was set free by the British. He gathered a small army, rebelled against the British rule and began to plunder the country side. He was however forced to leave the Mysore territories by hot pursuit and on his entering Dharwad district, Dhondopant Gokhale too attacked him and forced him to

move further north to take up the service under the chief of Kolhapur. Subsequently, in early 1800, Dhondia Vagh re-entered Dharwad district, firmly established himself in the Savanur country and assumed the title of the king of the two worlds. Thereafter he captured almost all the forts north of Tungabhadra and reigned supreme for a brief period. The combined forces of the British and the Peshva mounted a major attack on Dhondia Vagh in which the later was finally killed. The destruction of Dhondia's power did not free the district from disturbances mainly because of the bitter feelings between Peshva Baji Rao and the Patvardhans. Struggle for power and plunder among the local estate holders continued almost unchecked. Towards the close of Baji Rao's Peshvaship most of the Southern Maratha chiefs maintained an attitude of semi-independence. In 1817, under the treaty of Poona, the Peshva ceded the territory of Dharwad and Kusugal to the British, which the latter occupied without much delay. A year later, in 1818 at the end of the Maratha war, the Peshva was formally deposed and his territory was formally annexed to the British dominions. Thus a major part of the Dharwad district too came under the British rule. In 1830, the Southern Maratha country was brought under Regulation VII and these territories were formed into one collectorate, called the Dharwar district or Zilla. This included, besides the present Dharwad district, parts of Belgaum, Bijapur and Solapur districts. In 1836 Belgaum was formed into a separate collectorate and in 1839 as a consequence of the annexation of the estate of the chief of Nipani 13 villages in Annigeri were added to the district. The year 1857-58, which has since been hailed as the year when the first war of Independence was fought, witnessed anti-British rebellion in Dharwad district too. Baba Saheb of Nargund, Bhimarao of Mundargi and Kenchangauda of Shirhatti were in the forefront of the struggle. As elsewhere here too the rebellion was crushed and Baba Saheb was publicly hanged along with scores of his followers. With this, the British rule took firm roots and lasted till the country attained independence in 1947. Thereafter, the princely States and estates were formally merged with the Union of India and the entire Dharwad district formed part of the then Bombay State. In November 1956, as a result of the re-organisation of the States on a linguistic basis the entire Bombay Karnataka region, including Dharwad district, was merged with Mysore State, which has since been renamed as Karnataka. Dharwad district enjoys the distinction of having the largest number of taluks, namely seventeen. The district lies within the jurisdiction of Belgaum Division, which is one of the four divisions into which the State is divided for purposes of administration.

5. LOCATION AND PHYSICAL ASPECTS :

Dharwad district is situated in the western sector of the northern half of Karnataka State. The district encompasses an area of 13783 square kilometres lying between the latitudinal parallels of 14°17'N and 15°50'N and the longitudinal parallels of 74°48'E and 76°E. In its shape the district may be regarded as roughly resembling an inverted triangle: broad at the northern end and very narrow at the southern end. Its greatest length from north to south is about 164 km and its greatest breadth from east to west is about 115 km. The eastern and the western borders gradually converge to a narrow strip as one moves from north to south. The district is bounded on the north by the districts of Belgaum and Bijapur; on the east by the districts of Raichur and Bellary; on the south by the districts of Chitradurga and Shimoga and on the west by the district of Uttar Kannad. All these districts which surround Dharwad belong to Karnataka State itself. In the south-eastern and the eastern sector, for a distance of about 130 km, the river Tungabhadra forms the natural boundary. In the north, for a distance of about 25 km, the Malaprabha separates the district from Bijapur.

The district may be divided into three natural regions, namely the malnad, semi-malnad and the maidan particularly the northern maidan. The western belt of about 20 to 30 km width, covering portions of the taluks of Kalghatgi, Hangal, Shiggaon, Hirekerur and Byadgi has a typical malnad climate and the Sahyadrian landscape which is dominated by low hills, meandering streams, moderate to heavy rainfall and dense vegetation. Immediately to the east of this Sahyadrian region lies the transition belt which too is about 20 to 35 km in width. The limits of this narrow zone are mainly climatic even though it may be noted that the Dharwar Rocks lend a distinctive support to its topography. The transition is gradual and the hills quietly merge into the undulating black soil plains and as one moves eastwards the rainfall gradually decreases. The Poona-Bangalore National Highway runs almost in the middle of this zone and has a string of important towns all along. The eastern portion consists of vast expanses of plain country. This region is well drained by a number of streams of which a specific mention may be made of Bennihalla, a tributary of the Malaprabha. The undulating topography of this northern maidan region of the State is characterised by dry beds of meandering streams and fissures due to intense soil erosion. The monatony of the landscape is broken by an occasional isolated hill and the eastern borders are marked by the scraps of the Manoli and Saundatti ranges. The maidan region is extensively cultivated and represents the best developed tract of the district. The soils of the district are mainly of two types, namely the black soil and the red soil. Both these soils show a variety both in texture and appearance, according to the nature of the underlying rocks, and also exhibit a great deal of variation in thickness, consistency and colour.

The district is drained by two major river systems, namely the Malaprabha in the north and the Tungabhadra in the south. The Tungabhadra river system covers about one-third of the total area of the district and consists of the Varada which flows through along the southern borders of the taluks of Hirekerur and Ranibennur. In the western margin a small tract of land is drained westwards, towards the Arabian sea by the Shalmala river. The Malaprabha is a perennial stream and Bennihalla, which is its main tributary, flows for a distance of about 190 km through the black soil plains in the central parts of the district. The Tungabhadra stretch is almost uniformly marked by a stony landscape derived from a granitic outcrop. Both these rivers show a seasonal regime varying from a lean sluggish flow during summer to a torrential muddy rush during the monsoons. Varada, Kumudvati and Dharma are the other important rivers of the district. The Varada reach extends to about a hundred kilometres in Dharwad district and with several tributaries it drains an area of about 3120 square kilometres. Its main tributary Dharma drains about 625 square kilometres and, after traversing about 56 km in the district, it meets the Varada to create the holy confluence Kudala Sangameshvara. The Kumudvati has a reach of about 32 km in this district and drains an area of about 780 square kilometres. In addition to the four rivers and the Bennihalla, the district has several important streams most of which are seasonal. A special mention may be made of Hire-halla, Alur-halla and Shirahatti-halla which drain the Gadag-Mundargi region, the Gadag-Ron tract and the south-western margins of the Kappatagudda range respectively. Dharwad district has numerous tanks as well. In the western belt, tanks have been formed by throwing bunds across the shallow valley basins whereas in the drier eastern sector the tanks are usually scooped out hollows such as stone quarries which serve as storage tanks for the rain water.

Geographically the district belongs to three well known formations : (1) the eastern black soil plain underlain by the basal archean complex, largely consisting

of ancient gneisses and schists; (ii) the central portion which is marked by an outcrop of two famous bands of Dharwar system; and (iii) the western extremities which are characterised by occasional outcrops of basal igneous complex. The Dharwars represent the oldest rock formations and comprise schists, phyllites, argillites, felsite, hematite-quartzites and limestones. Granite and gneiss commonly occupy plain or gently undulating country which is usually covered by a thick red or black soil capping. The rocks show a considerable variation in texture, are usually massive and are pink to grey in colour. Bands of conglomerates occur in the central region of the district and these pebbles and boulders comprise granite, felsite, apatite, quartzites and schists. Rocks belonging to the Kaladgi series which consist mostly of quartzites, conglomerates, breccias and sandstones are found to occur in the north-eastern sector of the district. Laterite too is found to occur in several parts, but chiefly in the west as cappings over granite, gneiss and quartzites. The mineral wealth of the district includes gold, copper, iron and manganese besides granite which is most useful as a construction material and is extensively quarried in all parts of the district.

Amongst the districts situated in the northern maidan of the State, Dharwad district, especially its western portion, is relatively rich in flora and fauna. The forests of the district are of three types : the monsoonal forests, the acacia or thorn forests and the scrub forests. The monsoonal forests cover the western fringe where the rainfall is relatively heavy. These forests exhibit regional variation from dense forests to the poorer types. The thorn forest is typical of the dry black-soil plains and the tree growth, consisting mainly of acacias and cassias, is relatively abundant along the banks of rivers and streams. The scrub jungles are met with in the northern and eastern-most parts and offer a dry landscape dotted with a sporadic growth of thorny shrubs and rough grasses. The wild animals found in the district include the panther, leopard cat, bear, wolf, hyena and the jackal besides the Indian fox and the deer.

Dharwad district has an agreeable and healthy climate. Within the district itself the western belt has a more pleasant weather. The year is usually divided into four seasons. Summer sets in during the second half of February and lasts till the end of May. This season is marked by harsh eastern winds, rising temperatures, whirlwinds and occasional thunderstorms accompanied by sharp showers. South-west monsoon season starts during early June and lasts till the end of September. This is a period of cool and damp climate. The months of October and November constitute the post-monsoon or the north-west monsoon season and this period witnesses a gradual rise in day temperatures and a substantial amount of rainfall as well. The winter season covers the period from December to mid-February. The district enjoys a moderate weather and is not subject to extremes either during summer or winter.

The average annual rainfall for the district as a whole is 680 mm. The area lying west of the Bankapur-Hubli axis receives a higher amount of rainfall. In the eastern belt near Mundargi for instance the average annual rainfall is about 450 mm. In contrast, in the western-most parts around Kalghatgi and Alnavar the rainfall averages to about 1000 mm per annum. The south-west monsoon is relatively more active in the western zone and accounts for nearly 70 per cent of the annual rainfall. The north-east monsoon is however more active in the eastern zone where it accounts for about 25 per cent of the rainfall. Towards the end of April and onwards most parts of the district receive pre-monsoon showers. By the middle of May, the west wind begins to freshen and lasts through the day. After the west breeze has set in sharp thunder storms with rain and hail are common. These early showers are very useful as these fill the ponds and soften the soil. Towards the end of May the west wind begins to blow stronger, banks of clouds gather in the south-west, and early in June the south-west monsoon sets in. There is a primary maximum in July and a secondary maximum in October in the western half of the district. In the eastern half, September and October are the months with heavy downpour.

The soils of the district are formed from the mixture of decomposed rocks of all types. The predominant soil that occupies the greatest part of the district is the Yeri bhumi, i.e., the black cotton soil. The other varieties of soils found in the district are Hulakeri bhumi (brown soil), Kenga bhumi (red soil), Malala bhumi (sandy soil), Bhattada bhumi (paddy soil) and Ondu bhumi (alluvial soil). The black cotton soils are admirably suited to the dry climate of the table-land. The moisture retentive capacity of this soil enables the crops to bear unharmed during seasons of drought which would prove fatal to the crops on the red soil. In the hot weather, as the black soil shrinks, it becomes fissured with cracks (two or three inches wide and about eighteen inches deep) which divide the surface into blocks of two or three feet square. The first heavy rainfall washes the surface soil into these cracks, and fills them by removing the surface soil and exposing a fresh under layer to the sun. This black soil is eminently suitable for raising cotton, wheat, gram, ragi, jowar and oilseeds - the crops for which the district is famous. The western zone, that is the malnad portion, is noted for its paddy soil which varies from red in the extreme west to a light coloured clayey mould in the east. These soils are also quite fertile and yield paddy.

Jurisdictional Changes :

During the decade the district has not witnessed any event of either geological or geographical importance. The external boundaries of the district have remained unaltered. So also at the taluk level there have not been any boundary changes. However at the village level two new villages have been constituted by splitting larger villages. According to the Directorate of Survey, Settlement and Land Records there are 1406 villages in Dharwad district. But as per the census reckoning there are 1362 villages and 23 towns. The 1971 census list contains 1358 villages and 18 towns. As already mentioned the district is organised into seventeen taluks which are grouped into four revenue Sub-divisions as follows : Dharwad Sub-division (Dharwad, Kalghatgi, Hubli and Navalgund taluks); Haveri Sub-division (Haveri, Ranibennur, Hirekerur and Byadgi taluks); Gadag Sub-division (Gadag, Ron, Mundargi and Nargund taluks) and Savanur Sub-division (Savanur, Shiggaon, Hangal, Shirhatti and Kundagol taluk). Each taluk is in turn organised into Revenue circles for administrative convenience. In the statement given below a talukwise distribution of the villages and towns of the district is furnished. The reasons for variation if any in the number of villages reported at the two censuses and the number reported by the Directorate of Survey, Settlement and Land Records are also indicated in brief.

Sl. No.	Taluk	Total number of villages according to the Survey Settlement and Land Records Dept.	Total number of villages according to the List finalised for Census 1981	Total number of villages according to the List finalised for Census 1971	Names of the Revenue Circles or Hoblies and no. of villages in each, shown in brackets (1981 Census)	No. of towns as per Census lists	Reasons for variation in the number of villages as shown in Colums 3 and 4	Reasons for variation in the number of villages as shown in Colums 4 and 5
1	2	3	4	5	6	7	8	9
1	Byadgi	63	63	63	Byadgi (28) Kaginelli (35)	1	-	-
2	Dharwad	133	111	110	Dharwad (22) Alnavar (29) Garag (36) Aminabhavi (24)	1	Revenue village Alnavar is fully incorporated in the limits of Alnavar town. The following 21 villages are fully incorporated in the limits of Hubli-Dharwad Municipal Corporation. Hence these are omitted in the census list : 1. Yattinagudda, 2. Mallapura, 3. Hosa Yellapura & Bag Talab, 4. Sattur, 5. Tadasinakoppa, 6. Hosakatti, 7. Athikola, 8. Saidapur, 9. Doddanagahonnakoppa, 10. Narayanapura, 11. Gulaganjikoppa, 12.Saptapur, 13. Shahar Dharwad, 14. Shahar Saidapur, 15. Shahar Saptapur, 16. Shahar Narayanpur, 17. Shahar Kamalapur, 18. Shahar Malapur, 19. Shahar Gulaganjikoppa, 20. Shahar Bag Talab, 21. Shahar Hosa-Yellapur.	In 1971, Kamalapur village was not listed as an independent village on the presumption that its entire area stood fully incorporated in the limits of Hubli-Dharwad Municipal Corporation. In fact Kamalapur lies outside the municipal limits. Hence it is added to the census list.
3	Gadag	57	55	57	Gadag (26) Betigeri (29)	2	Three revenue villages Mulgund, Basapur and Sitalahari are fully incorporated in the municipal limits of Mulgund town. These are omitted in the census lists. The newly formed revenue village Honganakatti is not accounted for by the Department of Survey, Settlement and Land Records pending finalisation of records.	Three villages found in the 1971 list namely, Mulgund, Basapura and Sitalahari are now deleted as these three villages are fully incorporated in the limits of the newly constituted Mulgund town. Revenue village Honganakatti, which was formerly a hamlet of Sortur village, is now constituted into an independent revenue village and hence added.
4	Hangal	146	145	143	Hangal (46) Bommanahalli (48) Akki-Alur (51)	1	Revenue village Halekote (Hangal) is fully incorporated in the municipal limits of Hangal town. Hence it is omitted in the census list.	In 1971, Thimmapur M.Nidasangi and Chandragiri villages were not separately listed as these were reported to be amalgamated with adjoining villages. But now as these villages are independent revenue villages with separate sets of records these have been added to the census list.
5	Haveri	88	88	88	Haveri (27) Karajgi (30) Guttal (31)	1		
6	Hirekerur	128	127	126	Hirekerur (44) Hansabhavi (36) Rattihalli (47)	1	Revenue village Hirekerur is fully incorporated in the municipal limits of Hirekerur town. Hence it is omitted in the census list.	Tirumalapur and Sunkapur which are independent revenue villages, but were reported as amalgamated in 1971, are now listed separately. In 1971, Hirekerur was a village. Now it is deleted from the census list as it is fully incorporated in the limits of the newly constituted Hirekerur town.

1	2	3	4	5	6		7	8	9
7	Hubli	66	58	57	Hubli Shirguppi	(14) (44)	1	The following eight villages are fully incorporated in the limits of Hubli-Dharwad Municipal Corporation. Hence these villages are omitted in the census list. 1. Madinaikana Aralikatti 2. Bidnal 3. Ayodya Ahobalapura 4. Krishnapura 5. Gamankatti 6. Suttagatti 7. Mariyane Thimmasagara Jangamanakoppa, and 8. Hubli	In 1971 Yellapur was presumed to be fully incorporated in the limits of Hubli-Dharwad Municipal Corporation. But it is found that certain portions of Yellapur are still lying outside the corporation limits Consequently Yellapur has been added to census list.
8	Kalghatgi	86	82	85	Kalghatgi Dhummawad Tabakad-honnahalli	(25) (31) (26)	1	Four villages, namely Kalghatgi, Huluginkatti, Machapur and Bendigeri are fully incorporated in the municipal limits of Kalghatgi town. Hence these are omitted in the census list.	Four villages of the 1971 list namely Kalghatgi, Huluginakatti, Machapur and Bendigeri have now been deleted as these are fully incorporated in the municipal limits of the newly constituted Kalghatgi town. A new revenue village, Gambyapur constituted after 1971 has now been added.
9	Kundgol	57	57	56	Kundgol Saunshi	(31) (26)	1	-	In 1971 Kundgol village was presumed to be fully inside the municipal limits of Kundgol town. But now it is found that there are portions which are still lying outside the municipal limits. Such portions have been constituted as Kundgol (Rural) and added to the list.
10	Mundargi	51	48	52	Mundargi Dambal	(23) (25)	1	Four revenue villages, namely, Mundargi, Byalawadgi, Shirol and Ramenahalli are fully incorporated in the limits of the newly constituted Mundargi town. Hence these are omitted in the census list.*	The difference is due to the constitution of Mundargi town which incorporates the entire revenue areas of Mundargi, Byalawadgi, Shirol and Ramenahalli villages of the 1971 list, which are omitted now.
11	Nargund	35	35	35	Nargund Konnur	(20) (15)	1	-	
12	Navalgund	59	58	58	Morab Annigeri	(27) (31)	2	Revenue village Annigeri is fully incorporated in the municipal limits of Annigeri town. Hence it is omitted in the census list.	
13	Ranibennur	106	106	103	Ranibennur Kuppelur Medleri	(33) (41) (32)	1	-	In 1971, 3 villages, namely, Channapura, Dombarahalli and Kanakapura were omitted under the impression that these, being uninhabited, had been amalgamated with one or the other adjacent village. But it is found that these villages are in fact independent revenue villages with separate sets of records. Hence these villages are now added to the census list.
14	Ron	95	91	93	Ron Naregal Hole Alur	(32) (32) (27)	3	Four villages namely, Ron, Krishnapura, Naregal and Unachgeri villages which are fully incorporated in the municipal limits are omitted in the oensus list.	Ron was a non-municipal town in 1971. Even though its jurisdiction covered the entire revenue areas of Ron and Krishnapura only Ron was regarded as urban and Krishnapura was treated as a village.

* Jantli and Halligudi which are two separate villages are treated as a composite village by the Asst. Director of land Records. As reported by the Tahsildar, Jantli and Halligudi which were amalgamated in 1964 were bifurcated in 1968 and the relevant records were built up by 1975.

1	2	3	4	5	6		7	8	9
14	Ron (Concld.)								But now Ron is a municipal town and covers the entire areas of Ron and Krishnapura villages. Hence Krishnapura is also omitted in the census list Likewise in 1971 Gajendragarh was a non-municipal town located inside the revenue limits of Unchageri village. Its jurisdiction was confined to Gajendragarh fort and the remaining portion of Unchageri was listed as a separate village. Now Gajendragarh stands re-classified as municipal town with its jurisdiction covering the entire revenue lands of Unchageri village. Hence it is omitted in the census list.
15	Savanur	62	62	62	Savanur Hattimattur	(33) (29)	1	-	
16	Shiggaon	91	93	92	Shiggaon Bankapur Dhundshi	(22) (38) (33)	1	Revenue village Shiggaon is fully incorporated in the municipal limits of Shiggaon town. Hence it is omitted in the census list. At the same time three fictitious units which have been reported as villages by revenue administration authorities are not so reported by the Directorate of Survey Settlement and Land Records. For purposes of census, the reports of the Revenue Officers have been adopted.	Basavanakoppa which has all along been an independent revenue village was not reported in 1971. It is now added to the list as a separate village. There are three fictitious villages from quite a long time in this taluk. In fact these three villages, namely, Shah Bazar, Ibrahimpur and Sadasivpet are not independent villages with basic land records like village maps RTC index, etc. Shah Bazar is a locality in the Ankad Khan while Ibrahimpur is a part of Narayanpur and Sadasivpet is a hamlet of Munavalli village. But, for certain inexplicable reasons, these three villages are being reported as separate villages having only non-agricultural areas of less than an hectare each by the Revenue authorities since several decades. In 1981 Census also the same position is represented.
17	Shirhatti	83	83	79	Shirhatti Lakshmeshwar	(44) (39)	2		In 1971 the rural portions of Hulgeri, Bastiban, Desaiban and Pethaban were combined together with Hireban i.e., Lakshmeshwar (Rural). But now the areas lying outside the municipal limits of Lakshmeshwar town are identified separately and these four villages are added to the census list.
	Total	1406	1362	1358			22		

6 IMPORTANT CHARACTERISTICS OF THE DISTRICT WITH REFERENCE TO ECONOMIC RESOURCES :

The basic economy of any particular region or district largely depends upon the variety and extent of the natural resources with which it is endowed The topographical and climatic features of the area included in Dharwad district are of a mediocre type and are, by and large, uniform all over the district except for a narrow belt in its western fringe. The mineral wealth with which the district is endowed is not quite impressive. Though the general usefulness of the rivers and streams which crisscross the district cannot be denied, it has to be conceded that these are not of any specific economic significance, for the district does not have, within its limits, any major irrigation project or any hydel-power generating station. In the matter of forest wealth too the district is deficient. Although Dharwad ranks amongst the industrially backward districts of the State, in view of its location in the main cotton belt, manufacturing industry, particularly agro-based industry, makes a significant contribution to the economy of the district. Dharwad is one of the few geographically larger districts of the State and a large proportion of the land has been brought under the plough. Agricultural land thus forms the most important resource which is sustaining the economy of the district.

The mineral wealth of Dharwad district consists of small deposits of manganese, iron, china-clay, quartz, moulding sand and yellow-clay besides granite which is very useful as a construction material. Gold is also known to occur in minute quantities in alluvial traces, particularly in the stream draining the Kappatgudda hills, and also in reefs located in the northern portion of the Gadag auriferous belt. However, extraction of gold has not been found to be a profitable proposition so far. Inspite of this, detailed investigations are being continued to critically examine the feasibility of re-opening the ancient mines. Iron ore, moulding sand and china-clay are the chief mineral items which are being exploited more or less on a continuous basis. The yields are however not quite impressive. As may be seen from the details furnished below, these are not sufficient enough to support any mineral-based large scale industry.

QUANTITY AND ESTIMATED VALUE OF MINERALS PRODUCED DURING THE YEARS 1975 TO 1979

Sl. No.	Name of Mineral	1975		1976		1977		1978		1979	
		A	B	A	B	A	B	A	B	A	B
1	China-clay	3647	18235	5982	101885	3461	67431	9944	189886	4473	89460
2	Moulding sand	17640	23480	11052	33156	8242	24846	26657	76671	13870	55480
3	Yellow-clay	376	5640	852	14626	841	9395	780	17160	-	-
4	Yellow Ochre	833	18326	182	9100	-	-	1402	28040	-	-
5	Clay	7016	126480	-	-	-	-	-	-	-	-
6	Iron ore	-	-	3850	53000	40385	565390	39382	630112	27740	443840
7	Manganese	-	-	-	-	-	-	-	-	190	7600

A . Production in tonnes,

B : Value in Rupees.

Dharwad district is deficient in forest wealth. The area classified as forest, which is at present about 1310 Sq.Km., forms about 8 per cent of the total geographical area of the district. This figure is far below the average prescribed under the National Forest Policy namely 33.38 per cent. Most of the forests of the district lie in a belt, the width of which varies between 15 km to 45 km, along the western borders of the district. In the interior maidan region also there are some forests. But these are of a comparatively poorer quality. The monsoonal forests of the western belt are somewhat dense and have timber trees such as teak, matti, honne etc., and also sandalwood which is of great economic value. In this zone there are vast extents of grass lands The thorn forest formation, consisting of acacias and cassias, which is a characteristic feature of the black soil plains is very much restricted. A large portion of the forests of the district belong to the scrub category. Talukwise distribution shows that Kalghatgi taluk alone accounts for about 17 per cent of the total forest area and this is followed by the taluks of Mundargi (15.6 per cent), Dharwad (12.6 per cent) and Shirhatti (11.3 per cent) The chief major forest produce are timber, firewood, charcoal and sandalwood. The important minor forest produce are tumri leaves, bark of kakke, tarwad and harda plants, gum, honey and bamboo. The following information on the out-turn of major forest produce over a period of 3 years provides an idea regarding the contribution of forests to the overall economy of the district.

Sl No.	Forest Produce	Value of forest produce during the year (in Rs)		
		1977-78	1978-79	1979-80
1	Sandalwood	238949	2935904	474705
2	Timber	915410	1298770	596710
3	Firewood	2553606	3470432	2841260
4	Miscellaneous	205361	304465	214096

With a view to developing the forest resources several programmes are being implemented in the district. These include schemes taken up under the Drought Prone Area Programme, soil conservation and afforestation measures, command area development programme, teak plantations and rehabilitation of degraded forests. About the forest-based industries a mention may be made of the saw mills located at Alnavar, Hubli-Dharwad and a few other prominent urban centres of the district.

Though the rivers Tungabhadra, Kumudvati, Varada, Dharma, Shalmala and Malaprabha flow through the district, the waters of these rivers have not been harnessed on a large scale within the district for purposes of

irrigation. The Dharma project is the only medium sized irrigation project of the district. This is an old irrigation system built about 400 years ago but kept in good repairs and improved upon in recent decades. The headworks of the canal are at Shringeri near Hangal. A solid masonry weir is thrown across the Dharma river which raises the water, and two canals are led off, one on each bank. The Malaprabha Project is a major irrigation project. But it is located in Parasgad taluk of Belgaum district. However, about 190 villages belonging to the northern taluks of Dharwad district such as Nargund, Navalgund, Ron, Hubli and Gadag will ultimately get the benefit of assured canal irrigation. The district has nearly three thousand tanks, ponds and reservoirs of different sizes and these are located at various places all over the district. The tanks known after the villages of Asundi, Madag, Medleri and Dambal and the Meundi Bandhara are very large in size and provide irrigation facilities to large extents of lands. The Meundi Bandhara, formed by a masonry dam of about 75 metres length, was constructed in the year 1945. The absence of any major irrigation project in the district highlights the vulnerability of the agricultural economy and emphasises the importance of dry land farming in its overall economy.

The total geographical area of Dharwad district is 13,738 square kilometres. The land utilisation details for the year 1978-79 reveal that, out of this total area, 8.1 per cent is accounted for by the forests; 4.3 per cent represents lands put to non-agricultural uses; 3.7 per cent covers other uncultivable land and 2.3 per cent belongs to the category of fallow lands. Thus, the net area sown constitutes as much as 81.6 per cent - a fairly high average which suggests that almost the entire cultivable land of the district has already been brought under the plough and that there is practically very little or no scope at all for extending cultivation any further. It may be incidentally noted that even during 1950-51, the cultivated area formed 81.8 per cent of the total area of the district and that this proportion, at the taluk level, varied between the highest average of 96.1 per cent in Navalgund and the lowest average of 46.2 per cent in Kalghatgi. Obviously, the agricultural conditions have stabilised long back and the annual variations, if any, are of only a marginal significance. The chief crops of the district are jowar, wheat, rice, pulses including horsegram, groundnut, cotton, spices and condiments. According to the prevailing cropping pattern, food crops account for about 62 per cent (cereals : 46 per cent, pulses : 8 per cent, others : 8 per cent) and the non-food crops account for the remaining 38 per cent [cotton : 21 per cent; oil seeds (mainly groundnut) : 14 per cent; all other crops : 3 per cent].

Paddy is the chief agricultural produce of the malnad zone covering the western tracts of the district and comprising the lands belonging to the taluks of Hangal, Kalghatgi and Dharwad. A fair proportion of the rice fields are generally suitable for growing sugarcane. It is a common practice to take a crop of sugarcane once in 3 or 4 years in such fields. In this malnad zone paddy is raised mainly as a rainfed crop. Of course, irrigation facilities provided by tanks, ponds and canals besides wells are made use of wherever available. Wheat is chiefly grown in the taluks of Nargund, Navalgund, Ron and Gadag. It is a cold weather crop which is sown in good soft black soils after the October rains are over. It is reaped during February and Safflower the main intercrop is harvested about a month later. The extent of lands sown with ragi is significant only in the south-western tracts of the district. Among the cereal crops, jowar occupies the pride of place and is grown all over the district over a very extensive area. Jowar is the staple food of the people of the district. Further, Jowar stalks constitute the chief fodder for the cattle. It is mainly a rainfed crop which comes up well in black soils as well as in red soils. It can be grown as a Kharif crop or as a rabi crop. Jowar is therefore looked upon as the basic crop of the district and its cultivation is associated with several ritualistic practices also. Among the oil seeds produced in the district, groundnut is the most important crop. It is cultivated extensively in almost all the taluks, particularly those located in the southern and the central belts. It is a Kharif crop and is grown on the medium type of soil and after its harvest, if the soil is medium black, a second crop of Bengal gram is also grown. Among the spices and condiments, a special mention may be made of chillies, garlic, ginger and turmeric. In fact, Dharwad is one of the largest chilly-growing districts of the State and from the point of view of yields in terms of cash, this crop ranks next to cotton and groundnut. The climate and the rich soils of Hirekerur taluk and parts of Ranibennur, Byadgi and Haveri are regarded as particularly suitable for this crop. Dharwad district has been famous for its cotton from the earliest times and even now it is one of the most important cotton-growing districts of the State and the country. In the western belt comprising the malnad zone, cultivation of cotton is somewhat less popular Cotton is chiefly grown in the areas known as yerinad and gadinad, i.e., the black soil tracts of the plains in the central and the eastern zones of the district. The four taluks of Navalgund, Gadag, Ron and Kundgol together account for more than fifty per cent of the area under this major cash crop of the district. Jayadhar and Lakshmi are the two varieties of cotton grown here. Hubli and Gadag are the two premier cotton marketing centres of the district. Cotton and groundnut are the two agricultural products which have provided a sound basis for the industrial development of the district.

The agricultural lands are held under the raiyatwari tenure, according to which the land revenue is fixed not upon an estate on a whole or on a village as a whole but on individual survey numbers or sub-divisions of those numbers. All kinds of inam tenures have now been abolished and a direct relationship has been established between the tiller of the soil and the government. An idea regarding the distribution of land-holdings may be had from the following details based on the agricultural census of 1976-77.

Size of holdings (in hectares)	No. of holdings and as percentage to total holdings		Extent of land held (Hectares) and as percentage to total land held	
Below 1.0	41900	15.30	25192	2.31
1.0 - 2.0	66218	24.13	98306	9.03
2.0 - 5.0	98684	35.95	314095	28.85
5.0 -10.0	47049	17.15	327207	30.06
10 and above	20468	7.47	323883	29.75
Total	274409	100.00	1088683	100.00

Though a significant proportion falls in the category of marginal holdings, medium and small holdings are seem to be preponderant. There is a sprinkling of large holdings also. The average size of a holding works out to 4 hectares and this cannot be regarded as large in an area noted for dry farming. The per capita availability of land however works out to 0.47 hectares and if the cultivable land alone is taken into consideration the per capita moves down to 0 40 hectares only. In the absence of assured irrigation facilities the yields from these lands depend on the vagaries of the monsoon.

About 7 to 8 per cent of the net area sown is put to intensive use by utilising the same land for growing an additional crop every year. It may be noted that these lands, measuring about 90 thousand hectares and odd, are enjoying irrigation facilities. The main sources of irrigation are the tanks, canals and wells : while tanks account for about 50 per cent of the total irrigated area, canals irrigate about 35 per cent and the rest of the lands are irrigated by wells and other sources. There are in all 263 major tanks and as many as 2256 minor tanks In so far as canal irrigation is concerned a mention may be made of (i) the Dharma project which provides irrigation facilities to about 7,250 hectares and (ii) the recently commissioned Malaprabha project, the headworks of which are however located near Saundatti-Yellamma of Belgaum district. The masonry weir across the Dharma is located in the western fringe of Hangal taluk and the canal network - consisting of the left bank canal called the Kamanhalli Canal with a length of about 6 km and the right bank canal which is the main Dharma canal covering a distance of about 45 km - irrigates the lands in the eastern and southern tracts of Hangal taluk. The Malaprabha project provides irrigation facilities to about 190 villages spread over the taluks of Nargund, Navalgund, Ron, Gadag and Hubli. Though, wheat, jowar, maize, groundnut, mulberry and sugarcane are also grown in irrigated fields, paddy is the chief crop grown under irrigation conditions. Extension of irrigation facilities to the central and northern tracts of the district, where the rainfall is quite low, has provided a boost to the agricultural economy of the region. The contribution of wells is also quite significant. Most of the irrigation wells have been energised and as in 1979-80 the total number of wells with electric pump-sets in the district stood at 13,146. There has been a notable increase in recent years in the area under irrigation. However, dry farming has continued to maintain its unique position in the agricultural economy of the district, which is sustained by jowar and paddy the chief food crops on the one hand and, cotton and groundnut the main cash crops on the other.

Animal husbandry is, by and large, regarded as an adjunct to agriculture. Every cultivator's household usually possesses at least a pair of bullocks. Quite a large proportion among them possess a few cows, one or two buffaloes, a few sheep and goats as well. Poultry keeping is also quite popular in the rural as well as the urban areas. An idea regarding the livestock wealth of the district may be had from the following details.

LIVESTOCK AND POULTRY POPULATION ACCORDING TO THE LIVESTOCK CENSUSES OF 1972 AND 1977

Category	Number of livestock heads according to the				Remarks
	1972 Census		1977 Census		
1 Cattle	663986	(45 2)	719118	(46.8)	Figures shown in brackets indicate percentage to total
2 Buffaloes	269887	(18 4)	287480	(18.7)

As in other parts of the State, in Dharwad district too, bullocks and he-buffaloes are kept for purposes of heavier agricultural work on the farm, and cows and she-buffaloes are kept mainly for breeding and milk production. The cows and bullocks belong to the imported breeds, the important among them being the Amrit Mahal and the Krishna Valley, besides some local non-descript breeds. Among buffaloes the Pandharapuri and the Jawari breeds are common. Pandharapuri buffaloes are much costlier than the local breeds. In Dharwad district, the towns depend for their milk supply more on cattle, especially buffaloes, kept within the town proper than those kept in the neighbouring villages. Dairy farming is thus an important economic activity in the urban areas of the district. The sheep and goats are mostly of local breeds. These animals are valuable assets as a source of mutton, skin and wool and are readily encashable Goats are also milked and the goats' milk is used with relish in the preparation of beverages like tea. The taluks of Ranibennur, Haveri and Ron are particularly noted for sheep breeding. Dharwad taluk is known for its wealth of buffaloes Goats and poultry birds are reared in all parts of the district.

Regarding the availability of veterinary services it may be mentioned that in this district there are 4 hospitals, 39 dispensaries, 48 rural dispensaries and 13 veterinary aid centres besides as many as 74 artificial insemination centres The Cattle Breeding Farm, Bankapur was established at Bankapur in Shiggaon taluk as early as in 1920 for breeding Amrit Mahal Cattle. In 1939, Gir Cattle Breeding section was also attached to this farm for testing the suitability of Gir cows as dairy cows. Subsequently, for breeding Dangi and Nimar Cattle and for testing suitability of those breeds for the Malnad tract and for coastal areas, a separate cattle breeding farm was established at Tegur in Dharwad taluk. A regional sheep-breeding station was established at Guttal of Haveri taluk in 1948. Besides the regional poultry farm at Haveri there are two more poultry farms at Tegur and Rayapur. All these institutions are functioning quite satisfactorily and are promoting the activities connected with the development of the livestock wealth of the district. As part of dairy development programme the Department of Animal Husbandry established a dairy at Rayapur (within the limits of Hubli-Dharwad Municipal Corporation) in about 1968 with a capacity to handle 10,000 litres of milk per day. At present this dairy handles about 16,000 litres of milk per day. There is a Chilling Plant at Gadag It is estimated that about ten thousand families are involved in production and supply of milk to the dairy. Within the milkshed area, 15 milk producers' cooperative societies have been organised. During 1979-80, 4,370,338 litres of milk were procured by the dairy. In sum, it may be stated that livestock rearing including poultry keeping and dairy farming makes a significant contribution to the overall economy of the district.

The rivers Tungabhadra, Varada, Dharma, Kumudvati and the Malaprabha besides several streams and nullahs and the numerous tanks of varying dimensions found scattered all over the district provide ample opportunities to those interested in fishing as a profession. There is considerable scope for the development of inland fisheries. Large scale fishing activity throughout the year is at present restricted to the villages on the banks of the major rivers. By and large fishing is a seasonal occupation, for most of the tanks and streams dry up during the summer. About the magnitude of the resources available it may be noted that the water spread area of the tanks adds up to a little over 13 thousand hectares. Amongst the taluks Hangal has the largest water spread area (3134 hectares) and this is followed by Kalghatgi (2782 hectares) and Haveri (1034 hectares). The number of fishermen engaged in fishing activities all over the district during 1979-80 was estimated at 2924 and the total fish catch was of the order of 225 metric tonnes valued at Rs.7.5 lakhs. There are 14 fishermen cooperative societies with a total membership of 718. Fishing is carried on mainly by three types of nets called tatabale, khaddelbale and bisubale, besides by rod and line, known locally as gana. The contribution of fisheries to the overall economy of the district is only marginal

Dharwad is one of the industrially backward districts of the State. As already mentioned, while there are

no mineral-based industries in the district, there are a few agro-based industrial units. Within the district, there is a heavy concentration of industries in the premier city of the district, namely Hubli-Dharwad Municipal Corporation. Cotton ginning and pressing has all along been one of the chief industries of the district. These factories do not usually purchase cotton on their own for ginning and pressing. Their earnings are from charges levied on the cotton brought to them by the growers or the middlemen for ginning and pressing. This is a seasonal industry and is in operation from March to August. As a result, some of the factories utilise their plant and labour capacity for decorticating and crushing groundnuts. Of the large scale cotton textile industry a mention may be made of the two composite mills located at Hubli and Gadag. Besides there are a few small units comprising of power looms engaged mainly in weaving of fabrics. There are however a large number of handlooms and the workers engaged therein are quite numerous. In the large-scale sector, the production of yarn and cloth during the year 1979-80 amounted to 3204 tonnes and 2337 thousand metres respectively. A recent addition in the field of textiles is the establishment of the Harihar Polyfibres on the northern banks of the river Tungabhadra in Ranibennur taluk to produce synthetic cloth and yarn The railway workshop which was established as early as in 1887 and has since been expanded and developed to keep pace with the modern times is also one of the important large scale industrial units of the district. There are several rice mills all over the district, especially in the taluks of Kalghatgi, Hangal and Haveri. Groundnut oil mills are far more numerous and are found all over the district. But for a couple of saw mills at Alnavar and Hubli there are practically no other forest based industries. There are several general engineering works which are engaged in the manufacture of iron and steel goods and in carrying out repair works. Automobile repair workshops are also found all over the district. Among the other important industries a mention may be made of the beedi factories and the units engaged in the manufacture of brass and copper utensils and those engaged in the production of agarbathis. The total number of large and medium scale industrial units registered under the Factories Act stood at 23 during 1978-79 and these provided employment to 1430 persons. As at the end of June 1980, there were in all 600 registered factories with a total employment of 29,301. Hubli-Dharwad city alone accounted for 50 per cent of the factories and 54 per cent of the industrial workers. And, Gadag ranked next with 12 per cent of the factories and 19 per cent of the industrial workers. The District Industries Centre, Dharwad was set up in 1978 with a view to promote the industrial development of the district. Industrial estates have recently been established at Hubli and Gadag and this has to some extent provided further impetus to the industrial growth of the district.

Dharwad district is well known for its cotton handloom industry. The weaving establishments are, in most of the cases, household enterprises. While actual weaving is done by men, ancillary jobs like warping, drawing in, denting, winding of yarn etc., are performed by the women and children of the household. However, when the household cannot cope with the work, outside labour is employed on piece-rate basis. Those not having their own looms and women as well as children with time to spare, work for others on piece-rate basis As a household industry, this is of a relatively greater significance in the towns and certain large villages located in the central and eastern sectors of the district. The prominent centres of this industry are Agadi, Hubli-Dharwad, Gajendragarh, Gadag-Betigeri, Halageri, Hebsur, Nargund, Navalgund, Ranibennur, Shigli and Shirol. At almost all these places, mostly fly shuttle looms are in use and these looms are manufactured locally. There are a large number of power looms also. Cotton yarn of different counts and artificial silk are the main raw materials. Though dhotis, shirtings and bed-sheets are also produced by the weavers of the district the chief products are the sarees and the khanas (blouse pieces). Gudars (cotton carpets) are produced at a few centres, mainly at Navalgund and its neighbourhood These products are sold locally and also through cooperative societies and the traditional network built up by the traders and the middlemen. In 1980, there were as many as 102 cotton handloom weavers' cooperative societies in the district It was estimated that in the district as a whole there were 6795 families of weavers with a population of 25,575, and that there were 9875 looms. The average production of handloom fabrics for the year 1979-80 was estimated 1 99 lakh metres valued at Rs.8 lakhs Cotton spinning is also prevalent in the district to some extent. So also, woollen spinning and weaving are prevalent in certain areas. There are 23 wool weavers' cooperative societies. Important centres of this traditional industry are Airani, Dambal, Guttal, Konnur, Kotbagi, Lakkundi, Medleri, Motebennur and Ranibennur. The main product turned out is Kambli (coarse blanket). The Wool Weaving Institute at Gadag has trained weavers in the use of improved appliances to produce superior goods like rugs, woollen carpets, chair-mats, felt-caps and superior kinds of blankets A small number of handloom weavers are engaged in the production of silk fabrics. In the district as a whole there are only three silk weavers' cooperative societies.

Certain parts of Dharwad district have been found to be climatically suitable for sericulture In recent years efforts are being made to popularise this industry and these efforts are bearing fruits as well. For example, the area under mulberry crop increased from 200 hectares in 1978-79 to about 390 hectares by 1979-80 and then mould up to 600 hectares by 1980-81. The Sericulture Department has evidently put in concerted efforts and expanded its activities in a good measure. Demonstration cum silk farms have been established at Ranibennur, Haveri, Hirekerur, Mundargi and Ron. This has been done with a view to propagating mulberry cultivation and silk-worm rearing. A government grainage has also been established at Haveri for production and supply of silk-worm eggs. Till recently the cocoons produced in the district had to transported for sale to distant centres such as Ramanagaram in Bangalore district for instance. With a view to overcoming this problem, a full-fledged cocoon-market has been recently established at Hubli-Dharwad. During 1980-81 the production of cocoons was of the order of 87,920 kilogrammes. A mini silk filature has also been set up at Hubli by the Government in order to ensure that the cocoons produced in this area are effectively made use of for reeling out yarn. The outlook for sericulture industry appears to be quite bright

Among the several other small scale and household industries of the district a particular mention may be made of leather tanning and production of leather footwear. A particular type of chappals known as 'Gadag Chappals' are famous for their design and durability throughout the State. Important centres of tanners are Dambal, Hubli-Dharwad, Gadag-Betigeri, Konnur, Lakkundi, Medleri, Ranibennur and Guttal. Similarly, the prominent centres of leather workers are Gadag-Betigeri, Hangal, Haveri, Kalghatgi, Mundargi, Navalgund and Ranibennur. Pottery and oil-pressing (using bullock-drawn ghanas) are the other household industries which are met with, in small numbers through out the district.

Trade and commerce rank next only to agriculture as important sources of livelihood for the people of Dharwad district Hubli segment of Hubli-Dharwad Municipal Corporation area is the hub of rail roads and highways. It has all along been functioning as an entrepot for the district in view of its locational advantages. It has direct links with Bombay, the main trading centre on the west as also with Davangere, Bellary and Bangalore. The other important centres of trade within the district are Gadag, Byadgi, Haveri and Ranibennur. Cotton is

the most important commodity exported from this district and the chief wholesale cotton markets are located at Hubli-Dharwad, Gadag, Ranibennur, Nargund and Annigeri. The other agricultural products exported from the district are groundnuts, cotton seeds, chillies, betelnuts, and cardamom. To a certain extent, timber is also exported especially from the railway stations at Alnavar and Dharwad. Among the manufactured goods that are exported, from the district a mention may be made of textiles including handloom fabrics, steel furniture and fixtures and beedies. The district imports a variety of articles which are sold through a large number of retail trading establishments found all over the district. As at the end of 1980-81, there were 38 regulated markets comprising 15 main markets and 23 sub-markets. The total value of the turn-over in these markets during the year 1980-81 was of the order of 103 crores of rupees. Branches of commercial banks are functioning since quite a long time in all the urban areas as well as in several rural centres. As on 30-9-1980, the total number of banks stood at 203. In addition, 148 banks were functioning under the co-operative fold This category of banks includes the urban cooperative banks, primary land development banks, central cooperative banks and the industrial cooperative banks. As at the end of March 1980, there were 1990 cooperative societies with a total membership of 5.8 lakhs and a paid up capital of 16.52 crores of rupees. In recent decades, the cooperative institutions and other governmental agencies have expanded their trading and commercial functions. However, trading and commercial activities are even now the preserve of the private operators and these are providing sustenance of a significant proportion of the population of the district.

Communication and transport play a significant role in the economy of any given district or region. Dharwad district is favourbly placed in this regard as it has a good network of roads and railway communication. National Highway 4, passes through the district and touches the important centres of Hubli-Dharwad, Haveri and Ranibennur. Gadag is also a prominent centre of road communication. As at the end of 1979-80, the district had a total road length of 5976 km comprising 160 km length of National highways, 370 km length of State highways and 1141 km length of major district roads besides 321 km length of other district roads. A major portion of the road length, namely 3984 km, however stands categorised as village roads. In this connection it may be mentioned that the length of village roads has considerably increased in recent years as a result of the implementation of the integrated comprehensive rural communication programme. Public road transport facilities are available in a good measure. Railway construction was begun in Dharwad district as early as in 1882 by the Southern Mahratta Railway Company and by the beginning of 1887 this company had built the entire system of railways running through this district, all of metre gauge. The total length of this railway network is about 315 km. The Poona-Miraj-Bangalore city route is of vital importance and this enters the district at Alnavar station, takes an easterly direction at first and then changes to a south-easterly course and covers a total distance of about 180 km before touching the district borders marked by the bridge across the Tungabhadra. Dharwad, Hubli, Kundgol, Savanur, Karjigi, Haveri, Byadgi, Devargudda and Ranibennur are the important stations located along this route. Hubli-Solapur railway line covers a distance of 107 km within this district. This route, which proceeds east from Hubli passes through Gadag. Annigeri town is situated enroute. At Gadag the line branches off towards north and passes through Hombal, Balaganur, Mallapur and Hole-Alur before entering the Bijapur territory. The track for the Hubli-Guntakal route is the same as that of Hubli-Solapur route upto Gadag. From Gadag, this line runs east with a slight swerve to the north and runs for a further distance of 25 km within the district. Altogether, there are 39 railway stations in the district.

The foregoing discussion discloses that Dharwad is a predominantly agricultural district. Large tracts of the district are endowed with rich black soils which are highly moisture retentive and are conducive for dry farming. Medium and small land-holdings are preponderant. In the western fringe the rainfall is moderate to heavy and it is also quite dependable. Canal irrigation and tank as well as well irrigation facilities are also available in this belt to a considerable extent. In a major portion of the district however agriculture is entirely dependent on timely and adequate rainfall. The central and eastern zones are well known for cotton and groundnut both of which have provided a solid base for the industrial growth of the district. The recently commissioned Malaprabha project has begun to extend canal irrigation facilities in a phased manner to certain villages in the eastern and central tracts of the district. The beneficial effects of this project have not fully materialised. As in the past even now, jowar and paddy on the one hand and cotton and groundnut on the other constitute the basic food and cash crops which are sustaining the economy of the district. Livestock rearing including dairying and poultry keeping is as of old an adjunct to agriculture. Industrially, Dharwad district is comparatively backward and does not have any large scale industrial units. Small scale industries and cotton handloom industry are, as in the past, lending the much needed support to the overall economy of the district. So also, trade and commerce as well as the transport and the service sectors are contributing in a large measure and have helped the district to acquire a high level of economic buoyancy.

7 MAJOR SOCIAL AND CULTURAL EVENTS, NATURAL AND ADMINISTRATIVE DEVELOPMENTS AND MISCELLANEOUS ACTIVITIES OF NOTE :

At the outset it may be mentioned that Dharwad district has not witnessed any major event of social or cultural importance during the decade. As in the past during this decade also in almost all the towns and villages periodical festivals and fairs were held with traditional pomp and gaiety. Though most of these festivals are primarily religious in nature these have a social as well as a cultural content. These occasions generate a healthy sense of societal unity at micro level and highlight the interdependence of different segments of the society. As in other parts of the State and the country in Dharwad district too various developmental programmes aimed at achieving the welfare of different sections of the society were initiated and duly implemented by various departments of the government during the decade. A specific mention may be made of the SFDA, MFAL, DPAP, CADA and the 20 point economic programme. The extension of canal irrigation facilities under the Malaprabha project initially gave rise to certain problems. The imposition of betterment levy was one such problem which caused some amount of discontent among the land holders in the taluks of Nargund, Navalgund etc. This discontent turned into resentment and in the middle of 1980 erupted in the form of a popular agitation, particularly in Nargund and its neighbourhood. With the passage of time tensions began to mount and the agitation which turned violent had to be brought under control with the use of force and negotiations. The district thus witnessed a brief spell of disturbed conditions towards the fag end of the decade. This apart, on a couple of occasions in the earlier part of the decade there were a few minor and sporadic incidents of group clashes, particularly in the Hubli segment of Hubli-Dharwad City. By and large, peaceful conditions prevailed all over the district during the decade and the social and cultural life of the people was quite placid. The district achieved all round progress and witnessed population growth at a level comparable with the average for the State.

8 BRIEF NOTE ON PLACES OF RELIGIOUS, HISTORICAL OR ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN TOWNS :

1 BYADGI TALUK

I L.C.No.8 : Motebennur : This village has 8 inscriptions. The inscription found on a slab in the Mallikarjuna temple and dated in 1051 A.D. is the earliest. Close to the village there is an unique megalithic structure, apparently the remains of an enormous dolmen of the ancient days. During the medieval period this village was an important centre of Jaina learning where several renowned teachers chose to reside.

II L.C.No.17 : Kadarmandalagi : This village has yielded six inscriptions. According to the local belief the main deity in the temple of Maruti Kantesh was installed by the great king Janamejaya mentioned in the puranas. The inscription found on the Garuda pillar in front of the Hanuman temple records that Kengappa Nayaka, the chief of Sante-bennur granted this village, then known as Kaduravundalige, for the service of the deity.

III L.C.No.29 : Kaginelli : The village is noted for its Adikeshava temple which is closely associated with Kanakadasa, the renowned 16th century saint and poet. He is said to have brought the idol of Adikeshava from Baad, his native village, got it installed here and spent his last days in this village as an ardent devotee of the deity and finally attained salvation at the feet of his patron deity. The Lakshmi Narasimha temple is situated adjacent to that of Adikeshava and the construction of both these temples is ascribed to Kondappa and Venkappa. The courtyard of this temple complex has a shrine dedicated to Bhandarakeri Svami. The other temples of interest in this village are those of Kalahasteshvara, Someshvara, Sangameshvara and Veerabhadra. There are about a dozen inscriptions in this village and while one of these belongs to the reign of Devagiri Yadava king Ramachandra, the rest relate to the rulers of the Later Chalukyan dynasty.

2 DHARWAD TALUK

I L.C.No.34 : Mugud : In ancient days this was the headquarters in respect of a set of 30 villages and was known as Mugunda. Among the four inscriptions found in this village the one dated in 1045 A.D. and belonging to the reign of Chalukya king Someshvara is the earliest. This inscription records the grants to a Jaina temple named Samyukta-Ratnakara and describes a line of Jaina preceptors of Yapanya school who were highly influential in those days.

II L.C.No.63 : Narendra : This is a place of some historical importance in that this was a seat of administration from where Mailaladevi the daughter of Vikramaditya VI (1076-1126 A.D.) and wife of Jayakeshi II of the Goa Kadamba family was governing this part of the country. Two inscriptions of Vikramaditya VI dated in 1125-26 A.D. are also found here. Later, under the Peshva rule, this village was a petty divisional headquarters, and on account of its proximity to Dharwad fort, has witnessed several battles fought on its soil. The village is noted for its Shankarlinga temple.

III L.C.No.87 : Amminabhavi : In ancient days this was an important centre of learning. It was an agrahara which was being administered by four-hundred mahajanas. Six inscriptions ranging in date from 1071 A.D. to 1567 A.D. and belonging to the reigns of Chalukya Vikramaditya VI, Kadamba king Shivachitta Permadi and Sadasiva Raya of Vijayanagara are found here. The village has an ancient Jaina temple which enshrines Neminatha and contains numerous pillars as well as a beautiful idol of Adinatha. The local Kalmeshvara temple is of some importance and here, on two wooden pillars about 3 metres apart, there is a record of the Vitthalapanthi land measure. The local Mallikarjuna temple also deserves notice.

IV L.C.No.89 : Kankur : This village was endowed in 1104 A.D. for burning incense in the temple of Somanatha in Saurashtra by the Kadamba Chief Jayakeshi II on the occasion of his marriage.

V L.C.No.92 : Hebballi : The objects of interest here include the ruins of a fort and the temple of Changalavva-devi which too is in a ruined condition. The village has two Yadava inscriptions dated in 1245 A.D. and 1248 A.D. The latter belongs to the reign of Kanhara and describes this place as a commercial centre. The local Shambulinga temple is in the Jain style of architecture.

3 GADAG TALUK

I L.C.No.3 : Nagavi : The village is noted for its temple associated with the great Buddhist teacher Nagarjuna. The nicely executed figure of Nagarjuna found here is a good specimen of the medieval sculptor's art. Of the six inscriptions found in this village the earliest one dated in 969 A.D., is that which refers to the reign of Rashtrakuta king Khottiga. The latest of these is of the times of Yadava king Kanhara, and is dated in 1255 A.D.

II L.C.No.8 : Sortur : During the medieval times this was an agrahara administered by 200 mahajanas. The importance of this place in ancient days is borne out by the fact that it contains thirteen inscriptions and the earliest of these is dated in 867 A.D. and belongs to the reign of Amoghavarsha I. Another epigraph, dated in 1071 A.D. make a reference to a Jaina temple. In yet another inscription of 1091 A.D., goddess Mahalakshmi of Kolhapur is stated to be the protecting goddess of this place as well. The village is noted for its Kalabhairava temple which enshrines an awe-inspiring figure (about 2 metres high) of Kalabhairava accompanied by the figure of a scorpion.

III L.C.No.12 : Nilgund : The village has two inscriptions of which one belongs to the reign of Vikramaditya VI and the other dated in 1524 A.D. registers a grant to God Siddeshvara by Vengalappa Nayaka. The temple of Narayana here is built of polished stone and has a large mantapa in front. The roof of the temple rests on twelve round beautifully carved pillars and its walls are adorned with mythological sculptures.

IV L.C.No.34 : Hombal : Known as Pombolal during the medieval times, this was a seat of learning and an agrahara administered by 120 Mahajanas. Preceptors of the pasupata school of Shaivism prospered here. The ancient Shankaralinga temple has the interesting sculptures of Bhikshatana Murti, Umamaheshvara, Anantashayana and the Saptramatrikas. In the Yoga-Narayana temple the idol of the main deity as also that of goddess Sarasvati is remarkable for its superb workmanship. The village has yielded of inscriptions ranging from the 11th to the 16th century.

V L.C.No.41 : Kotumachagi : The ruins of a fort and the temples of Someshvara and Kalameshvara are the chief objects of interest. An inscription in the Kalameshvara temple, dated in 1012 A.D. mentions that this village was at that time a great educational centre with free hostel and a college where instruction was being imparted in several sciences. This inscription provides details about the proper conduct of worship in the temples, the imparting of education and the feeding of the ascetics, the supply of water to the people, and the punishment to criminals. The Someshvara temple has three inscriptions. The local Jaina basti also has an inscription.

VI L.C.No.44 : Lakkundi : This place of great antiquarian importance, was known as Lokkigundi in ancient times and contains the ruins of a fort and as many as 50 temples and 30 inscriptions. This was a seat of learning, being an agrahara administered by one thousand mahajanas who were renowned for their erudition and virtues. In 1007 A.D. Dana-Chintamani Attimabbe the patron of Kannada Poet Ranna, erected the Brahma Jinalaya at this place. During

the medieval period Lokkigundi was a busy centre of minting activities and the gold coins minted here were known as Lokki Gadyanas. In 1192 A.D., Hoysala king Vira Ballala (1191-1211) was residing at this place and according to tradition, between 1187 and 1192 A.D. Lokkigundi was the scene of his bitter battle against Jaitugi, the son of Yadava king Bhillama in which the latter was worsted. The chief temples of interest here are those of Kashi-Visveshvara, Mallikarjuna, Halagund Basavanna, Virupaksha, Lakshmi Narayana, Manikeshvara, Virabhadra, Nanneshvara, Someshvara, Nilakantheshvara, Nadayadeva or Kumbhara-girishvara, Nagaradeva and Visvanatha It is said that in the construction of the Kashi-Visveshvara temple the Chalukyan builders reached their high watermark in decorative architecture Among the temples in Lakkundi, the Jaina basti which enshrines Mahavira is the largest and also the oldest building. The inner hall of this basti has a well-carved idol of Brahma. Lakkundi is noted for its wells with flights of steps built in the Jakana-charya style. These are locally known by names such as Chabir-bhanvi, Kannerbhanvi and Musukinabhanvi. The best amongst these is the Musukinabhanvi which is located near Manikeshvara temple

VII L.C.No.54 : Narasapur : The village has an ancient temple which is of considerable architectural interest. It has two windows adorned with figures carved in deep relief. The figures are much like the elaborate sculptures in the Kailas temple of Ellora and are fine examples of the manner in which the 13th century sculptors carved life in action in a conventional way but free from extravagance.

4 HANGAL TALUK

I L.C.No 5 : Arleshwar : The local Kadambeshvara temple, built in the medieval style of Chalukyan architecture has seven inscriptions belonging to the reigns of Kadamba Chief Santivarma (1088 A.D.), Tailapa (1128 A.D.), Mallikarjuna (1138 A.D.) and Yadava king Kanhara (1260 A.D).

II L.C.No.32 : Sringeri . Near this village there is an old waste-weir which has been built across the river Dharma using carved stones said to have been brought here for the purpose from the ruined temples of Hangal. This waste-weir forms the head-works of canal system that irrigates about 3000 hectares of land and feeds several tanks.

III L.C.No 47 : Bommanhalli : The village is noted for its temple dedicated to Ishwara which is of considerable religious importance in the neighbourhood.

IV L.C.No.54 : Belavatti . The village has a large black-stone temple of Gokuleshvara containing carved walls and several inscriptions. Most of the inscriptions found in this village belong to the times of the Later Chalukyas. However the earliest record is that of Rashtrakuta King Govinda and is dated in 929 A.D. Belavatti is said to be the site of an ancient city named Lilavati Pattana.

V L.C.No.57 : Kudal : The village is located near the confluence of the rivers Dharma and Varada and has the temple dedicated to Sangameshvara besides a hero stone belonging to the twelfth century.

VI L.C.No.65 : Naregal : Amongst the nine inscriptions found here the earliest one belongs to the reign of Rashtrakuta King Dhruva (780-92 A.D.). During the 11th and 12th centuries this was a flourishing agrahara managed by one thousand mahajanas. Besides an ancient temple of Sarveshvara containing 24 round polished stone pillars, the village has a small temple of Basappa and is a famous for its large tank.

VII L.C.No.69 : Jakkanaikankoppa : The village is known for its temple dedicated to Sarveshvaradeva.

VIII L.C.No.80 . Yelawatti : A temple dedicated to Rama-lingeshvara and a Jain basti are the main objects of interest here.

IX L.C.No.93 : Akki Alur : Akki Alur is known for its Channa Veeresha Matha - a religious institution of considerable importance.

X L.C.No.95 : Balambeed : The village has the ancient temples of Rameshvara and Kalameshvara both of which are of antiquarian interest. There are sixteen inscriptions comprising mostly hero stones and nisidi memorials. An epigraph dated in 1145 A.D. records the construction of a Parshvanatha temple here.

XI L.C.No.97 : Adur : This is an ancient village which contains seven inscriptions. The earliest inscription refers to a Jain temple and belongs to the reign of Kirtivarma II of the Badami Chalukya family (746-757 A.D.).

XII L.C.No.121 : Hirebasur : The village was formerly known as Vyasapura. Its name was later modified into Basavuru. This was the headquarters of a minor branch of the Silahara chiefs. On a rising ground near this village there is a cave which is believed to pass a great distance underground. Of the 6 inscriptions found here two belong to the reign of Kalachuri Bijjala and his son Ahavamalla and two other inscriptions belong to the reign of Yadava Singhana. The village has two old temples dedicated to Visveshvara and Hanuman respectively.

XIII L.C.No.129 : Tilavalli : Tilavalli is noted for its Santeshvara temple which has comparatively little figure sculpture about it, but is fully decorated with other ornaments. The outer side of the parapet wall is very effectively decorated with an endless repetition of miniature sikharas. The three porches of the hall have rather pretty ceilings. The village has 26 inscriptions, many of which are of the times of the Later Chalukya Kings. It was a prominent seat of learning being an agrahara administered by one thousand mahajanas. According to an inscription found here the Santeshvara temple was built in 1238 A.D. by Savanta Kalideva, a subordinate of Yadava Singhana, in memory of his father Savanta Thakkura and named Savanteshvara after him.

XIV L.C.No.135 : Hallibail : The village has a temple dedicated to Sri Siddharameshvara.

XV L.C.No.138 : Honkan : The Ramalingeshvara temple of this village is of considerable interest.

5 HAVERI TALUK

I L.C.No 17 : Sangur : Situated on the left bank of the Varada river, this village has a temple of Ishvara with a roof supported on two octagonal pillars, a Virabhadra temple and a ruined fort. It has eight inscriptions. An inscription dated in 1265 A.D. registers the gift of this village to God Kapilasiddha Mallikarjuna of Sonnalage the native place of the Veerashaiva saint Siddharama. A stone slab bearing the sculpture of a warrior on horseback bears an inscription dated in 1407 A.D. describing the setting up of the memorial in the name of Kumara Ramanatha the son of Kampilaraya.

II L.C.No.21 : Devihosur : Ten inscriptions spread over the times of the Rashtrakuta, the Chalukyas, the Yadavas and the Vijayanagar rulers have been found here. In ancient times this was a prominent seat of the goddess Malaja, the consort of Mallari Martanda. The village derives its name from this Devi (goddess) who is now represented by the deity in the local Banashankari temple.

III L.C.No.27 : Devagiri : This village has as many as 21 inscriptions some of which refer to the rule of the Rashtrakutas, the Chalukyas, the Kalachuri and the Yadavas. The Yellamma temple here is said to have been built by Jakanacharya. Other temples of interest here are those of Hanuman and Basavanna.

IV L.C No.28 : Karajagi : During the early period of the British administration this was the headquarters of a taluk of the same name till in 1905, the taluk was named after Haveri and the headquarters was also shifted to that place.

V L C No.56 : Ganajur : The village is noted for its Muthyadeva temple.

VI L.C.No 67 : Hosarittı : The Dheerendraswamy Matha and Shrı Guddy Swamy Matha of this place are of considerable religious importance in the neighbourhood

VII L.C No.84 : Galaganath : This village is situated on the left bank of the Tungabhadra It is famous for its Galageshvara temple which is located near the confluence of the rivers Tungabhadra and the Varada. This temple is built of black granite and its walls are covered with mythological figures. The most notable feature of this temple is its great pyramidal basement. The walls rise from the top of this basement. The local Hanuman temple has a monumental hero-stone. Of the five inscriptions found here, the earliest belongs to the 10th century A.D. Two records of Vikramaditya VI, dated in 1079 A.D. and 1080 A.D., mention his younger brother Jayasimha as the governor of this area.

VIII L.C.No.88 . Haralahallı : The temples of Someshvara and Kaleshvara which are now in a ruined condition are of considerable antiquarian interest. The village has five inscriptionsof the 11th and 12th centuries and these refer to the reign of Kalachurı Ahavamalla, Yadava Singhana and Gutta Vikramadıtya

6 HIREKERUR TALUK

I L.C.No 33 : Masur : The village has the ruins of a fort Close by, but lying within the limits of Shimoga district, there is a large tank popularly known as Madagada Kere According to Persian and Arabic inscription stone built into the sluice of this tank the fort at Masur was built in 1635 A.D. by Muhammad Khan, an officer of the Adil Shahi King Mahmud, (1626-1656 A.D.) The tank itself is believed to have been in existence from the times of the Vijayanagar kings. The legend associated with the construction of the mammoth upper sluice of this tank speaks of the young woman named Lakshmi who voluntarily sacrificed her life for ensuring the successful completion of the project and thus attained immortal fame. Another legend speaks of a virgin named Kenchavva, who entered a temple (now submerged under the tank) and devoted herself to god without paying heed to the entreaties of the people to move out when the entire area became inundated.

II L.C.No 38 : Warah : The ancient Virabrahmadeva temple of this place contains a Satı stone.

III L.C.No.44 : Balambid : The village is well known in the neighbourhood on account of its Vishaparihareshvara temple It is widely believed that the main deity in the form of a linga, when placated by proper prayers, can provide relief and cure to persons bitten by snakes and other poisonous animals. This temple is built in Hoysala style The local Basava temple is also a Hoysala structure. Of the five inscriptions found in the village three are dated in 1058 A.D., 1079 A.D. and 1088 A D respectively.

IV L.C.No.47 : Chinmulugund : The black granite temple of Chikeshvara here has walls carved with figures and its roof is supported on 40 pillars. On a hillock to the east of the village there is the shrine of Siddheshvara linga with an underground cave.

V L.C.No.52 : Abalur : This village of antiquarian interest has about 20 inscriptions of great historical importance This was a stronghold of the Jains during the 12th century. But Veerashaiva saint Ekantada Ramiah challenged the Jains in a religious dispute and won the wager, it is said, by cutting off his head which was restored by the grace of Siva. This miracle led to the ascendancy of the Veerashaivas Ramiah and his preceptor are consecrated in the form of Sivalingas in the local Someshvara temple The Brahmeshvara temple is notable for the inscriptions describing the exploits of Ramiah. Abalur is the birth place of Sarvajna the famous 17th century Kannada poet.

VI L C No 80 : Rattihallı : Rattihallı has a ruined fort and an ancient temple of Kadambeshvara built of sculptured slabs and with three domes supported on 36 pillars This was the chief town of a unit of one hundred villages during the medieval period and has yielded ten inscriptions belonging to the reign of the Later Chalukyas, Kalachurı, Yadava and Vijayanagara Kings.

VII L.C.No 94 . Hallur : This village is noted for its Ranganatha temple.

VIII L.C.No.100 Nagawad : This village is noted for its Nargarjuna temple.

7 HUBLI TALUK

I L C No 6 . Amargol The Shankaralinga temple here is in ruins and is believed to have been built by Jakanacharya. This temple is built by black and light coloured granite and has walls and pillars carved with figures of gods and godesses Close to this temple there is the shrine dedicated to Banashankarı

II L.C.No.8 : Unkal : Unkal is noted for its temples of Kalmeshvara, Virabhadra and Chandramauleshvara The Chandramauleshvara temple has 4 entrances and appears to have once been a Jaina shrine dedicated to Brahma. The village has the ruins of a fort and also two inscriptions of the 12th century

III L C No 14 . Shirguppı : The village has five inscriptions and of these, one refers to Sendraka King Vanasattı (7th century A D.) There is an interesting sculpture of Bhairava, carved in black granite, near the Hanuman temple

IV L C No 16 . Kolıwad : According to tradition this village is the birth place of great Kannada poet Kumara Vyasa who flourished during the 15th century. The visitors to the village are shown around a house which is identified as the house in which the poet was born. The village has several relics of the Jaina, Buddhist and Hindu religions For instance, the Kalmeshvara temple here has yielded a mutilated sculpture of Tara bearing on its pedestal a Buddhist record The Viranarayana temple has an inscription stone nearby which is dated in 1564 A D and refers to the deity as Madhava-Janardhana

V L.C.No 22 Kusugal The small hillock on which now stands the Kalmeshvara temple was the site of a bastion of an old fort However at present even the vestiges of this fort have vanished and the lands have been brought under cultivation This fort is attributed to Badr-ul-Zaman Khan, Tipu's general who held Dharwad for seven months against the combined forces of the Marathas and the English in 1791-92

VI L C No 24 Byanattı This village has yielded seven inscriptions and a copper plate grant. The latter is dated in 1183 A.D and refers to Kalachurı King Singhana. The temples of Virabhadra and Ramalinga, and two Veerashaiva religious institutions called Kambhahallı Matha and Charantı Matha of this place are the other interesting objects.

VII L C.No 28 Chebbı . According to tradition the name of this village is Shobhanapura In ancient days this was the capital of a Jain Prince and had as many as 7 Jaina temples of which only one is now extant A inscription stone dated in 971 A D. and found at the nearby Adaragunchi village bears a reference to this village under the name Sebbi or Chebbi Thirty. Inscriptions, numbering eleven in all, found in this village itself refer to the reign of the early Chalukyas, and Later Chalukyas, Vijayaditya, Tribhuvanamalla, Kadamba Kamadeva and Yadava Mahadeva An epigraph of 1060 A.D records the death of the Jain teacher Kankanadi by the Sallekhana rite In another record of the 11th century Svayambhu Dhavaleshvara of Kaladi is mentioned During the Vijayanagara period this place witnessed considerable improvement and for quite some time was the residence of Sri

Krishnadeva Raya (1509-29 A.D.). Later, this village formed part of the territory of Savanur Nawab and still later, the Peshwas had an arsenal here. The village has the ruins of a fort, the ancient temple of Mallikarjuna and a plain temple of Netagalla Basavanna.

VIII L.C.No.50 : Budarsingi : Formerly known as Vuchangi, this village was endowed to god Kapila-Siddha-mallikarjuna of Sonnalige Kshetra (Solapur of Maharashtra State) by the Kadamba Chief Chattayya of the Goa Kadamba family in 1257 A.D. The epigraph which records this grant quotes a vachana of Siddharama, a Veerashaiva saint.

IX L.C.No.52 : Adargunchi : Known as Adirgunte in former times, this village has three inscriptions of which one bears reference to a Jain temple at Ucchangi. The village has a solitary seated image of a Jina, rather larger than life-size, which the villagers point out as that of one Doddappa who was a headdoor keeper when Bankapur was a garrisoned fort.

8 KALGHATGI TALUK

I L.C.No.10 : Tambur : The village has a few inscriptions and is well known in the neighbourhood on account of its ancient Basava temple and the annual fair which comes off on the occasion of the Bharat-hunnime. The temple is carved with beautiful engravings and to its left there is a large tank as well.

II L.C.No.32 : Mishrikoti . The village is noted for its ruins of a large fort and a black stone temple of Rameshvara. One of the inscriptions found in this temple is dated in 1136 A D. and states that Mailaladevi the daughter of Vikramaditya VI and the queen of Kadamba Jayakeshi II was ruling the kingdom from her capital at Kunduru (Narendra near Dharwad). Another inscription found here is dated in 1159 A D. and belongs to the reign of Shivachitta Permadi.

III L.C.No.34 : Kamadhenu : The temple of Kalameshvara here is built of black granite and its outer walls are decorated with ornamental mythological carvings. Of the 3 inscriptions found here one is dated in 1130 A.D. and belongs to the period of Chalukya Someshvara III. Another inscription of 1172 A.D. belongs to the reign of Shivachitta Permadi About a kilometre to the south of the village there is a picnic spot, namely water-course called Kalhalla across which a waste weir was built more than a hundred years ago.

9 KUNDGOL TALUK

I L.C.No.4 : Kamadolli : The village is noted for its ancient Rameshvara temple the construction of which is attributed to the famous Jakanacharya.

II L.C.No.6 : Hireharkuni : The Basaveshvara temple here is noteworthy.

III L.C.No.31 : Saunshi : This village has 4 inscriptions of which 3 belong to the reigns of Chalukya Someshvara II, Vikramaditya VI and Jagadekamalla II. In ancient times this village was known as Tapasipura and it was an agrahara which was being administered by four hundred mahajanas. The village is noted for its temples enshrining Shankaralinga and Siddheshvara.

IV L.C.No.56 : Gudgeri : The village has a temple of Ishvara, a Kalmatha and an ancient Jain basti. Among the 8 inscriptions found here, the oldest is of the times of Rashtrakuta Amoghavarsha I. An epigraph of the reign of Chalukya Someshvara II, dated in 1072 A.D. mentions his queen Kanchaladevi as exercising authority over this region from her capital at Mulgund. Another epigraph dated in 1076 A.D. registers the renewal of an endowment to the Jain temple named Anesajjeya-basadi of Purigere. There is also a record of Yadava King Singhana bearing the date 1217 A.D.

10 MUNDARGI TALUK

I L.C.No.10 : Korlahalli : Situated on the left bank of the river Tungabhadra has an inscription dated in 1051 A.D. which mentions that at that time the Chalukyan Princess Akkadevi was governing the areas of Kisukad Torgal and Maseyavadi. The village has a large weir built on a natural barrier of rock in the river formed by a trap dyke in the granite. Its crest is about 7 metres above the low water level of the river and is about 7 metres wide at the top. However, the central part of the weir is breached now rendering the weir into an useless piece of architectural work of the ancient times. It is supposed to have been built by the Vijayanagara Kings, probably the first in the series of such weirs across the Tungabhadra.

II L.C.No.13 : Shingatalur : On the south hill of the Kappat range, about 70 metres above foot hills, there is the ancient Virabhadra temple under the auspices of which a largely attended fair is held every year during Chaitra masa (April-May).

III L.C.No.15 : Gumgol : An inscription found here is dated in 1529 and belongs to the reign of Sri Krishnadevaraya. The village has a temple of Goni Basavanna under the auspices of which a month long festival and a cattle fair are held during Chaitramasa (April-May)

IV L.C.No.23 : Mustikop : The village is noted for its temple dedicated to Venkatesha.

V L.C.No.24 : Dambal : The temples of Dodda Basavanna Kaleshvara and Someshvara are the chief objects of interest here. The Dodda Basavanna temple is built in an unique style and differs from the temples found at Gadag and Lakkundi. The base of the temple as well as its main hall are star-shaped. The interiors of the shrine and the hall are square. The temple enshrines a linga and the door-step in front of the shrine is beautifully carved in low relief with rosettes, festoons and small figures. Above the entrance, to the little ante-chamber there is a sculptured architrave spanning the two slender pillars on either side of the entrance. It is one block about 8 feet across and 3 to 4 feet deep. On each side, close above the pillars, is carved the conventional griffin-like monster, often called a makara, with an elaborate florid tail coiling over its back and great square jaws from which issues an ornamental wreath or arch. The dome of the hall is supported by four carefully finished pillars. Unlike most Chalukyan temples this has no cornice and the spire runs direct from the caves as a truncated cone. The doorway on the south is very richly carved though it is now covered up by plaster and paint. The Someshvara temple is a plain structure its marked feature being very deep flat straight-lined cornice which runs round over the caves of the hall. To the west of the village site there is the site of a fort with an ancient jain shrine which is in ruins and a Ganapati temple. On a stone tablet to the left of the Jain shrine is an inscription which is dated in 1095 A.D. At the top of this tablet there are several emblems and the inscription which begins with a salutation to Buddha and Tara refers to the grants made to the two Buddhist Viharas at Dambal. The inscription further mentions that Lakshmadevi, the chief queen as governing the district called the eighteen agraharas and the city of Dharmapura or Dharmavolal (apparently Dambal). The village has yielded 10 more inscriptions. Two of these, dated in 1098 A.D. and 1283 A.D. record further grants to the Buddhist establishments. The earliest inscription is of 1060 A.D. and this, as well as another dated in 1289 A.D. register gifts to the Nagara Jinalaya founded by the local mercantile community. Inscriptions recording grants to Saiva institutions and mentioning teachers of the Pashupata school of Saivism are also found here. Obviously during the medieval period Buddhism, Jainism as well as the Saiva faith flourished in this neighbourhood. The village has a very large tank (storage capacity of 96.70 million cft) which is said to be more than 400 years old.

11 NARGUND TALUK

I L.C.No.21 : Konnur : This village is located on the banks of the river Malaprabha and is noted for its temples dedicated to Parameshvara and Rameshvara of which the latter is a very large building. An inscription built into a wall of the Parameshvara temple refers to the transactions of the reign of Rashtrakuta Amoghavarsha I and is dated in 860 A.D. Of the other two inscriptions one is dated in 1547 A.D. and, belonging to the reign of Sadasiva Raya the Vijayanagara King, it records the remission of tax on barbers.

II L.C.No.24 : Kallapur : The village has a large temple of Advi Basavanna. The villagers of this neighbourhood believe that the animals suffering from diseases would be cured if taken round this shrine after offering prayers to the deity.

12 NAVALGUND TALUK

I L.C.No.26 : Yamanur : This is a place of considerable religious importance in this region and is known for the annual fair held during March-April in honour of Raja Baghsavar of Gulbarga. According to tradition in about 1690 A.D., shortly after the overthrow of the Adil-shahi dynasty there lived two saints, namely Khwaja Bande Nawaz at Bijapur and Shah Mira Abdul Rajak Kadri at Gulbarga. The latter, who worked several miracles and rode with a snake-whip on a scorpion-bridled tiger came to be known as Raja Baghsavar. On one occasion, it is said, this saint went on a visit to Bijapur to meet Bande Nawaz. As he drew near to the town, he was seen by Khwaja's grand son who unwilling to be outdone used his miraculous powers, jumped on a wall and rode up on it to meet Raja Baghsavar. Humiliated by a power which could make a wall move, Kadri returned to Gulbarga without meeting Khwaja Bande Nawaz. Later he died in grief. As a consequence, Khwaja cursed the boy who too died. Since then Baghsavar's fame has spread and tombs have been raised in his honour at several places. Betroji, a Maratha headman of Koregaon village of Satara district who was an ardent devotee of the saint, saw him in a dream. The saint asked Betroji if he had any wish for which Betroji prayed that the saint live near him and take care of his family. Thereupon the saint told Betroji that he would find impressions of the saint's hand or panjas and that he should take these to Yamanur, and offer worship after setting up these at an appropriate place. Accordingly on awakening, Betroji found two canes and the panjas riding on silver tiger. He took these articles to Yamanur and began to offer regular worship. In about 1720 the present tomb was built by a descendant of Betroji. The objects of worship include two hands or panjas kept on two small brass horses. The annual fair which comes off during Phalguna (March-April) is attended by a large number of Hindus and Muslims.

13 RANIBENNUR TALUK

I L.C.No.2 : Hulihalli : The village, which has about ten inscriptions, has the ruins of a fort and a temple of Rameshvara. Some of the inscriptions are of the early 9th century. Three belong to the reigns of Chalukya Jagadekamalla II, Kalachuri Ahavamalla and Gutta Joyideva.

II L.C.No.5 : Kajjari : The village is noted for its Kalmeshvara temple.

III L.C.No.9 : Gudda Guddapura : The village is on the top of a steep hill and is famous for its temple, enshrining Mailara or Malhari. It is built of black polished stone with a brick spire. The roof is supported on twenty pillars. The outer walls are adorned with carved figures. Near this temple there are several smaller shrines of which two are dedicated to goddesses Malasamba and Tuppada Mallavva. According to local legend, God Malhari incarnated here as Martand Bhairav, and with his 3 metre long bow killed the demon Malla who infested this neighbourhood. It is said that Malhari used to go hunting with a pack of hounds. When the god was enshrined in a temple the dogs incarnated as human beings to serve the god as ministrants who came to be known as Vaggayyas or Goravas. A two day fair is held here commencing on the Mahalaya Amavasya every year and this event attracts a very large number of devotees from far and near. On this occasion, the Vaggayyas put on black wollen jackets, wear necklaces of cowrie shells, tie bells and tiger or bear skins around their waists, hold large wooden bowls in hand and try to appear as ugly and as wild as possible. At the approach of the pilgrims the Vaggayyas bark most furiously at them and hold out their bowls into which the pilgrims pour a little milk and ghee, put a plantain and other eatables besides offering a small coin or two. The great bow of the god is brought out and set up on the fore-ground on the first day of the Dasara. A ministrant climbs to the top of the bow, moves into a trance and gets possessed by the god Malhari and then makes a forecast of the events which would come off during the following year or immediate future.

IV L.C.No.12 : Honnatti : The Honnattiamma temple of this village is of considerable religious importance in the neighbourhood.

V L.C.No.72 : Medleri : This village is situated on the banks of the river Tungabhadra and the main object of interest here is a large tank. The earthen dam forming this tank is 675 metres long has a top width of about 2 metres and a maximum height of about 12 metres.

VI L.C.No.79 : Chavadadanapur : There are about ten inscriptions in this village and the earliest of these belongs to the reign of Chalukya Vikramaditya VI. Among the other inscriptions, a few refer to the reigns of Yadava Kings Kanhara, Ramachandra and Mahadeva. Mukteshvara temple which is situated on the banks of the river Tungabhadra here is in Chalukyan style and is of some architectural importance. It is built of black stone, has two porches and its walls are decorated with bands of fine scroll work. The other temples of interest here are those of Ishvara and Gopadevasvami.

VII L.C.No.87 : Udagatti : The Kudli Sringeri matha of this village is a noted religious institution.

VIII L.C.No.93 : Airani : The main object of interest here is the ruins of an old fort. This fort was built irregularly on a small knoll and was of considerable strength in former times. It had an inner line of works surrounded by an outer line with a ditch on the west and the south-west fronts. All the gates as well as their flank defences are now in ruins. There is nothing inside the fort except for the four walls of ruined palace. Close to the fort there is a hill which commands it.

14 RON TALUK

I L.C.No.2 : Hirehal : This village is known for its Ramalingeshvara temple.

II L.C.No.20 : Sudi : In the records of the 15th century, this village is referred to as a rajadhani. The goldsmiths of this place were, in those days, licensed to mint coins and the foremost among them was the royal mint-master Uttavoja who struck coins for Vikramaditya VI (1076-1126 A.D.). According to an epigraph of 1010 A.D., the Chalukyan princess Akkadevi was governing this neighbourhood from her capital at Vikramapura.

III L.C.No.24 : Sawadi : The earliest of the three inscritpions found here is dated in 970 A.D. and belongs to the reign of Rashtrakuta King Khottiga. The second inscription dated in 1082 A.D. is of Vikramaditya VI and mentions the administration of his son Someshvara II over this region. The third inscription found on a pillar in the Brahmadeva temple refers to the renovation of the shrine of Traipurusha. The Brahmadeva temple

is said to have been built of stone brought from Badami of Bijapur district. The roof of this temple rests on numerous carved pillars and the outer walls of the temple are adorned with paintings. The village has a temple dedicated to Narayana.

IV L.C.No.33 : Maranabasari : Under the renowned Annadanaswamy matha of this village a largely attended annual fair is held during December.

15 SAVANUR TALUK

I L.C.No.24 : Mantrodi : The village is noted for its Siddheshvara matha a religious institution of considerable regional importance.

II L.C.No.26 : Karadgi : The Veerabhadra temple of this village attracts a large number of devotees from surrounding villages.

16 SHIGGAON TALUK

I L.C.No.1 : Ganjigatti : The village has a large-sized ceiling slab, nearly 2.5 metres square, which is carved with the images of the ashtadikpalakas. It lies against a platform in the open air at the village shrine and is said to have been brought here from the ruins of a temple at Karjagi. The whole slab, which is a single piece of stone, is divided into nine compartments by two cross ribs each way which are ornamented with bosses at their intersections, and scroll-work down the centres of each. The central panel shows Siva in his Bhairava form dancing upon a prostrate figure and holding up the elephant hide. The carvings have been executed with utmost care and the figures stand out in bold relief.

II L.C.No.6 : Hirebendigeri : Known as Pindangere in ancient times this village contains 7 inscriptions, two mathas (called Hirematha and Koradyamatha) and a temple dedicated to Kalappa. Most of the inscriptions are of the times of Chalukya Vikramaditya VI (1076-1126 A.D.) and Jagadekamalla II (1163-1182 A.D.) and Kalachuri Bijjala II (1156-67 A.D.).

III L.C.No.15 : Hulgur : Hulgur is a noted place of pilgrimage to the Muslims of this region. In a valley near the village site there are four tombs one of which is the tomb of a Muslim saint Hazarath Kederi while the others are of his relatives. This saint is said to have lived in Savanur in about 1800 under the Nawab Abdul Khairkhan. It is further said that once while he was away at Bankapur, the Nawab violated the daughter of one of his disciples whereupon the saint cursed the Nawab and retired to Hulgur where he died a few years later. In honour of this saint an annual fair is held. The village has a temple of Siddhalinga and in honour of this deity an annual fair is held immediately after the full-moon day during February-March. In addition the village contains as many as 15 inscriptions which belong to the reigns of Rashtrakutas, Later Chalukyas, Kalachuri and Yadava rulers. In ancient times this village was known by the name Pullungur. The earliest inscription at this place is dated in 970 A.D. during the reign of Nityavarsha Khottiga.

IV L.C.No.23 and 24 : Ankadkhan and Shahabazar : This area, along with Ibrahimpur and Kottigeri is collectively known as Bankapura and till 1951, was the headquarters of a taluk named after it. In 1951, the taluk was renamed and the headquarters was moved to Shiggaon. A ruined fort and the ancient temples of Rangaswami Nagareshvara and Siddhesvara are the chief objects of interest here. This is a place of great historical importance, which according to a Jain manuscript from Kolhapur, derives its name from Bankeyarasa, a feudatory of Rashtrakuta Amoghavarsha I (814-80 A.D.), who belonged to the Chellaketan family and was the governor of the Banavasi province. On account of its strategic location it continued to be the headquarters of the subsequent governors and kings of this region. Of the 16 inscriptions found here, the earliest is dated in 993 A.D. and six inscriptions belong to the reign of Someshvara I, Vikramaditya VI and Someshvara II. From 1052 A.D., the Kadamba feudatory Harikesari was ruling at Bankapura. In 1140 Hoysala King Vishnuvardhana captured Bankapura and made it the capital of his northern dominions. An epigraph of Harihara II of Vijayanagara is also found here. This was a famous resort of Jain teachers. At the same time, preceptors of the Pashupata school of Saivism also flourished here. In 1406 A.D. this place and its dependencies were ceded to the Bahamanis. *An attempt by Deva Raya to take over this place* in 1443 proved futile. After the decline of Vijayanagar supremacy Velapa Raya, a former feudatory with his capital at Bankapur had assumed independence. In 1573 A.D. Ali Adil Shah took Dharwad and marched on Bankapura. Velapa Raya defended himself with great vigour but was compelled to yield after holding out for one year and three months. On this occasion a superb temple within the fort was destroyed and the king himself laid the foundations of a mosque to be built on the site of the temple. In 1673 A.D. Abdul Karim Khan the ancestor of the Nawabs of Savanur was made the governor of the province of Bankapura on behalf of Bijapur. In 1755 A.D. when Savanur was besieged by the French general Bussy the Nawab had to pledge Bankapura fort to Holkar in order to buy off the withdrawal of the Maratha troops. In 1776 A.D. Haidar Ali took Bankapura as well as Savanur and in 1790 this place was the headquarters of a Sirkar of 16 paraganas. Before it was dismantled by Tipu's army, Bankapura fort was the chief fortification in the province of Savanur which lay about ten kilometres north-east and the two places were together known as Savanur-Bankapura. In 1802 in accordance with the terms of the treaty of Bassein Bankapur taluk was ceded to the British by the Peshwa. About a year later these areas were restored to the Peshwa *in exchange for territory in Bundel Khand.*

The Nagareshvara temple is situated on the western side of the ruined fort. It is a fine large building partly ruined and a good deal buried. The hall consisted of 52 pillars cut from selected blocks of dark grey stone. Nearly the whole of the shaft has been turned in a lathe and has been very highly finished. The polishing is so fine as to give out a series of sparkling lights. Several old inscriptions are found in this temple. The Siddheshvara temple is smaller and relatively modern. It is built of black stone, has three doors on the east and its roof is supported on eight pillars. Its walls are adorned with numerous and well-carved figures.

V L.C.No.70 : Neeralgi : An inscription found in the Siddharameshvara temple of this village relates to the reign of Vikramaditya VI (1076-1126 A.D.) and mentions that his feudatory, Tailapa of the Hanagal Kadamba family was administering this area. This temple resembles the Mukteshvara temple of Chandadanapura in its style of construction. This was originally a Vaishnava shrine and a figure of Lord Krishna is found carved above the entrance to the antechamber.

17 SHIRHATTI TALUK

I L.C.No.1 : Varvi : This village is the seat of Mouneshvara math, a religious institution of repute.

II L.C.No.38 : Bellatti : In the hills adjoining this village dolmens of a pre-historic age were found. The village is noted for its ancient temple dedicated to Ramalingeshvara.

III L.C.No.39 : Devihal : On a hill nearby there is the temple of Holalamma. This goddess, endowed with eight hands, represents Mahishasuramardini, a form of Durga. The idol is about 2 metres high and is beautifully carved. A 16th century inscription etched on a pillar here registers gifts to the deity. An annual fair is held in honour of this goddess on Magha paurnima (full moon day during February). Earthen pots with ashes and bones comprising the relics of prehistoric funerary practices were found on this hill.

IV L.C.No.56 : Adarakatti . The village is noted for its Basaveshvara temple.

V L.C.No.67 : Doddur : The main object of interest and of considerable religious importance is the well-built Maruti temple.

VI L.C.No.70 : Shigli : The Gurubasavanna matha of this place is an important religious institution.

VII L.C.No.73 : Gulganjikoppa : This village is known for its Dandi Basaveshvara temple.

VIII L.C.No.77 : Yalavatti : The objects of historical importance here include a small fort built by the first Khangauda Desai of Shirhatti during the 17th century The northern wall of this fort is built of stone and mortar to the height of about 1.2 metres the rest being of earth. The other three sides are built of stone and earth inside with strong dry pitching on the outside The fort has twelve bastions about 8 metres high and its wall is 6 metres high and 3 metres thick. In 1846 Yelavatti fort was granted as inam by the East India Company to Chintaman Rao of Sangli. The village has a temple of Gundeshvara which attracts a large number of devotees from far off places also. According to local tradition this village was founded by Sri Rama. Of the seven inscriptions found here the earliest is of the eighth century A.D. In one of the inscriptions it has been described as a mahagrama and an agrahara administered by 120 Mahajanas.

PLACES OF TOURIST AND OTHER INTEREST IN AND AROUND THE TOWNS :

1 Alnavar : This small town located on the western borders of the district has four inscription of which the earliest is dated in 1081 A.D. and belongs to the reign of Guvala-deva of the Goa-Kadamba family. This place has acquired importance as a railway line branches off from here and proceeds to Dandeli - a town of great industrial importance belonging to Uttar Kannad district.

2 Annigeri : The objects of historical importance found in this town include as many as 28 inscriptions of which the earliest relates to the Chalukyan emperor Pulikeshi II. Annigeri attained prominence as the chief town of the country known as Belvola-300 and is referred to as a rajadhani pattana in several inscriptions. One thousand Mahajanas, it is stated, looked after its internal administration. The town is famous for its Amriteshvara temple, the construction of which is ascribed to the great sculptor Jakanacharya. This large temple, built of black stone, has a roof which is supported on 76 pillars. The annual festival held in honour of this deity during Margasira (December-January) is a major event which attracts a large gathering. The temples of Banasankari, Basappa, Gachchina Basappa, Hire Hanuman, Mailara and Purada-Virappa as well as the Jaina basti and the mosques deserve notice. During the early period of the British rule, till 1839 this town formed part of the Jagir of the chief of Nipani (Belgaum district).

3 Byadgi : Among the four inscriptions found here the earliest is dated in 901 A.D. and belongs to the reign of Rashtrakuta King Krishna II. The temples of Siddheshvara and Kalameshvara are of some archaeological interest. Since early times Byadgi town is reputed for its trade in chillies, so much so a particular variety grown in this neighbourhood is known as 'Byadgi chillies'.

4 Gadag-Betigeri Gadag is a place of great antiquity and has been referred to as a Maha-agrahara founded by Janamejaya of the legendary times. In inscriptions the name of the place has been mentioned as Krutuka, Kratupura, Kardugu, Galadugu and Gadugu. In historical times it was a renowned seat of learning and was being administered by 72 Mahajanas There are 34 inscriptions here and most of these are found in the precincts of the temples dedicated to Trikuteshvara and Viranarayana. It is held that this Viranarayana temple is one of the five Narayana temples built in about 1117 A.D. by Hoysala King Vishnu-vardhana (1117-1137 A.D.) on his conversion to the Vaishnava faith. An inscription of the Vijayanagara king Achutaraya, dated in 1539 A.D. records his gift of Ananda-nidhi, adding that the god Viranarayana had conferred His blessings on the poet Kumara Vyasa, the famous author of Kannada Mahabharata. In Betigeri at a place called Mallarayanakatte there is a group of 15 memorial stones known as Virkals or Vira Sasanas. These are very large in size and depict different military standards in their sculpture.

Among the temples of Gadag, the small temple of Saraswati is noted for its delicacy and beauty of detail. The richness and grace of some of its columns are unsurpassed and the pillars are beautiful specimens of Chalukyan art. The life-sized idol of Saraswati is, however, mutilated, the four arms are lopped off at the elbows. The Trikuteshvara temple lies in the same enclosed courtyard in which the Saraswati temple is located. This was originally a double temple consisting of the principal shrine facing east with a small enclosed hall before it. This shrine has three lingas set up in a row on the single Salunka (i.e. pedestal). The interior of this temple is very plain. The Someshvara temple is a good specimen of a fully developed Chalukyan temple. There are frequent repetition of details of the carvings found here. The doorways are richly decorated. The Viranarayana temple has a big gopura in the style of the Vijayanagara temples. The walls of the gopura are carved with beautiful figures. It is believed that the renowned Kannada poet Kumara Vyasa composed the epic Mahabharata in this temple sitting in front of the beautiful idol of Viranarayana. This temple belongs to the 11th or the early 12th century A.D. There are two Jaina temples dedicated to Parshvanatha and Mahavira besides four churches and three mosques. The Tontadaswamy matha, founded during the 16th century is also a noted religious institution of this place.

5. Gajendragarh : The fort of Gajendragarh was built by Shivaji and the fort at Unchigeri nearby was built in 1685 A.D. by Daulatrav Ghorpade. The town has a ruined temple of Virupaksha with an unfinished hall. The other temples of interest here are those of Durga devi, Ramalinga, Rama and Panduranga. Near the fort, on the hillside there is a cavern which is a natural opening between two huge blocks of granite. The cavern has an idol of Lord Shiva and is reached by a flight of steps. The flat ledge rests above the blocks of granites, about 100 metres high and has precipitous sides. Near this cavern there are two tirthas fed by unfailing springs. The shrine of Kalkeshvara is a noted place of pilgrimage. To the left of the linga here, there is a basin containing water, called Patalagange, and a niche with a figure of Nandi. This Nandi, it is believed, is imperceptibly but continuously growing and is worshipped by barren women. In the temple of Kalkeshvara there are four inscriptions which record various grants to the deity.

6 Hangal . Known as Panthipura, Viratapura, Viratakote, Panungal and Hanungal, this place of antiquity has more than 30 inscriptions and several ancient temples. It was for some time the capital of a branch of the Kadamba family It was well fortified and is mentioned among the important strongholds captured by Hoysala Vishnu Vardhana in the course of his northern expedition. The fort is now in ruins. Among the temples here, the one dedicated to Tarakeshvara is the most interesting. It is a large structure of black granite and consists of four parts : a small anteroom with four pillars, an audience hall or Sabhamantapa with twenty pillars, twelve pilasters and eight small pillars, the porch of the shrine and the shrine itself which is irregularly round. A magnificent dome covers the central portion of the Sabha-mantapa. This dome is supported on 8 large pillars placed

at the corners of an octagon and 8 smaller pillars placed in pairs between these on each side of the octagon. The dome rises for about 9 feet from the octagon in five ascending tiers of circles of cusped mouldings, and, towards the centre, descends again in a splendidly cusped and star-shaped central pendant. In each of the 8 corners of the octagon, above each pillar, there is a slab bearing the figure of one of the astadikpalakas seated on his mount beneath a floral arch. This is one of the largest and the few that can be classed as the most interesting temples of Dharwad district. Near this temple there are three finely carved hero stones. Hangal has an important Veerashaiva matha called Kumaraswamy matha and in addition has a Sankara matha, a Vithal mandir, besides a mosque and a few dargahs.

7 Haveri : In ancient times this was an agrahara administered by four hundred mahajanas and was also known as Pavari and Havari. The town has yielded as many as 32 inscriptions and several of these belong to the rulers of the Yadava dynasty. Epigraphs found engraved on stones, pillars and beams in the Siddheshvara temple record the gifts to the deity Swayambhu Siddhanatha. Built into the wall of a step-well, in front of this temple, there is a stone slab bearing a good representation of the Saptamatrikas. This place was an important centre of the Kalamukha sect. In addition to the Siddheshvara temple, the town and its neighbourhood contain several hero-stones and ancient temples dedicated to Basavanna, Kalmeshvara, Virabhadra etc. The Hukeri matha belonging to the Veerashaivas is also of importance and under its auspices a large cattle fair is organised every year. The town has the dargah of Mahabub Subhani which is of considerable religious importance to the muslims. There are mosques, churches and Jaina shrines as well. The place shot into prominence during the freedom movement and in commemoration of the martyrdom of Mailara Mahadevappa a statue has also been installed here. Haveri is a renowned centre of cardamom trade.

8 Hirekerur : The objects of interest here include the nine inscriptions and the temples of Totada Viranna, Janardhana, Hanuman and Durga. One of the inscriptions is dated in 1060 A.D. and it describes the exploits of Gundamayya, a general of Someshvara I who took part in emperor's campaigns in the area north of the river Narmada. The temples of Viranna and Janardhana are badly damaged and are half buried in mud. However the beautifully carved figures of the Sun-god and Janardhana are noteworthy. The temples of Hanuman and Durga are located on the tank bund and the latter is noted for the beautiful idols of Durga and Traipurusha it enshrines.

9 Hubli-Dharwad : Hubli and Dharwad have a history of more than a hundred years as separate towns. In 1962, the two towns, about 20 km apart, were merged together when the Hubli-Dharwad Municipal Corporation was constituted. The portion known as Dharwad is mainly a centre of administration and higher education. Hubli is, on the other hand, mainly a centre of trade and commerce as well as industry and transport. Both the portions have objects of antiquarian interest such as inscriptions, shrines, ruins of fort walls etc. In ancient days Hubli was an agrahara which was being administered by 200 Mahajanas. Inscriptions found in the Bhavani Shankara temple, here date back to the period of Chalukya King Bhuvanaikamalla (1068-1075 A.D.). The importance of Hubli during the later period becomes clear when it is known that the Britishers established a factory here during the 17th century in order to lend support to their trading activities. It was plundered by the Marathas. Later Hubli became a part of the Moghul empire. In 1727 A.D. this area became a Jagir of Savanur and it was during this year that the New Hubli Fort was built. Now there are no traces of the forts either at Hubli or at Dharwad.

Among the numerous temples, mathas, mosques and churches found in Hubli portions, the Bhavani Shankara temple is the most ancient and the most outstanding. This belongs to the eleventh century A.D. and enshrines a linga, a Ganapati and a beautifully executed idol of Narayana. A mention may also be made of the Amba-bhavani temple of Dajibanpete, Banasankari temple of Old Hubli, Dattatreya temple of Durgadabailu and the Venkataraman temple of New Hubli. Among the mathas, the one known as Murusavira matha is the largest. It is held in high esteem, for in former days the pontiff of this matha exercised spiritual control over the Virashaiva chief priests of the entire Bombay-Karnatak region. A mention may be made of the Siddharudha matha also as a place of considerable religious importance. Among the churches in Hubli, the Church of Ascension, St. Joseph's Catholic Church, St. Andrew's Church and the St.John's Lutheran Church deserve notice. Likewise, the Jumma masjid of the Mulla Street and the Big Mosque in Ganeshpet are old centres of religious importance. The Mastan Sofa mosque, built recently, is noted for its delicate carvings and artistic beauty. The Anandanatha basti and the Parshvanatha basti are the ancient Jaina institutions of historical interest.

In the Dharwad portion, the temples of Durgadevi, Maruti, Mailara linga on the summit of Vidyagiri, Narasimha, Panduranga and Dattatreya are important. The Jumma masjid of Mangalwar pet was built by an Adil Shahi king in about 1686 A.D. Basel Mission Church and the All Saints' Church are also of considerable importance. The administrative offices and the university college of Karnatak University are located here.

10 Kalghatgi : The town has five inscriptions of which the earliest belongs to the reign of Chalukya Vikramaditya VI. Among the objects of interest a mention may be made of the tomb of Rustom Shahid, an 18th century Muslim religious worker in whose honour a five-day festival is held every year. The temples of Venkataramana, Hanuman and Basavanna as well as the Parshvanatha basti are of relatively recent origin.

11 Kundagol : Till 1948, Kundagol was a part of the Jamakhandi State. The town has eleven inscriptions of the medieval and later periods and the earliest of these is dated in 1044 A.D. The chief object of interest here is the Shambulinga temple with a large hall. The whole ceiling of this hall which is a single slab is divided into nine equal parts by two cross bars each way. The central compartment holds an image of Siva in a dancing posture which the surrounding eight contain the images of the asta-dikpalakas. The outer bays of the ceiling are decorated with lotus and Kirtimukha. The temple enshrines a linga and has the idols of Ganapati, Rama, Sita and Lakshman as also the images of several gods and goddesses of the Hindu pantheon. In addition the town has the modern temples of Brahmadeva, Sankaracharya, Yellamma etc., and mathas which are of particular interest to the Veerashaivas. These mathas are called the panchagriha matha, Hirematha, Siddhalinga Sivacharya matha and Shivananda matha. Noted Hindustani music exponent Savai Gandharva lived here for some time and in memory of his association with this place a musical mela is organised in the town every year. This event attracts a large gathering of musicians and music lovers from all over the district.

12 Lakshmeshvar : This is a place of great antiquarian interest which has yielded more than 50 inscriptions and contains several historical monuments mainly temples and sculptures. In ancient days this was known by the names such as Puligere, Huligere, Purigere or Pulikaranagara and, according to early Kannada authors, this was one of the places where chaste Kannada language was spoken. The epigraphs stretch over the period from the seventh to the sixteenth century and register various gifts to different religious institutions. These epigraph represent all the dynasties that ruled in Karnataka and the oldest inscription refers to Vinayaditya and is dated in 686 A.D. In many of these records this place has been called the rajadhani-pattana (capital city) and a part of it called Brahmeshvaragiri was being administered

by 120 Mahajanas. The Someshvara temple is chief object of interest here. In inscription the deity has been referred to as Swayambhu-Dakshina-Somanathadeva. An inscription dated in 1128 A.D. registers a gift by Kadamba Jayakeshi II for the educational institution attached to the temple. Sanka-basadi is also an early structure and among the Jaina shrines mentioned in inscriptions Anesajjeya basadi built by Kunkumadevi the younger sister of Vijayaditya (696-733 A.D.) appears to be the oldest. During the supremacy of the Adil Shahi Kings of Bijapur, Lakshmeshvara was being governed by Ankushkhan and to him is attributed the construction of the Jumma Masjid found in the town. In addition to the above antiquities the town has a number of ancient and modern temples dedicated to Baleshvara, Kodeyallamma, Dundi-Basavanna, Hanuman, Vithoba, Amba Bhavani, etc., and the monasteries known as Sankara matha, Raghvendraswamy matha and the Mahantina matha.

13 Mulgund : The inscriptions found here, numbering eighteen, are quite interesting in that these furnish details regarding the political as well as the religious activities of the followers of different faiths. Mulgund was a prominent centre of Shaiva as well as Jaina teachers. A distinguished line of Jaina scholars and monks flourished here. Reputed among them was Nayasena, the author of Kannada classical work Dharmamrita. The earliest epigraph here is of Chalukya Jayasimha II and is dated in 1028 A.D. The places of interest in the town include the temples of Kalabhairava, Kumbheshvara, Nagaresha, Pete Basappa and Siddheshvara as well as the Hire basadi, the Parshwanatha basadi, the Chandranatha basadi and the Annadanasvami's matha. A large annual fair held at a small hill nearby during the month of Kartika (November) attracts a large gathering.

14 Mundargi : The ruins of a fort on a rocky hill near the town is the main object of interest here. Bhimrao Nadgir of Mundargi rebelled against the British rule during 1857-58 and joined hands with the chief of Nargund who raised the standard of revolt in the south. On a hillock nearby there is the temple of Kanaka Narasimha under the auspices of which a largely attended annual fair is held during the month of Phalguna. The town has two Veerashaiva mathas known as Annadanaswami matha and Tontadarayaswami matha and, under the auspices of the former an annual fair is held during the month of Chaitra (March-April).

15 Naregal : The town is noted for its black-stone temples of Tripurantakeshvara, Someshvara, Kalmeshvara, Chandramouleshvara and Molle Brahmadeva. The Someshvara temple which is the chief temple has two halls, a shrine beyond them, and two shrines one on either side of the first hall which is open in the front. The town has ten inscriptions and the earliest of these is dated in 950 A.D.

16 Nargund : The chief attraction of the town is the Nargund hill, where there are the remains of an old fort, which was built in 1674 by Shivaji and was at one time was regarded as one of the strongest forts of the Bombay-Karnatak region. When Nargund State was confiscated by the British in 1858, the fortifications were dismantled and the fort was rendered useless by destroying some of the chief reservoirs. The town has a large temple dedicated to Shankaralinga and a smaller temple enshrining Mahabaleshvara and another small temple of Joda Hanumanta. On the summit, of fort-hill there is the temple of Venkatesha which was built in 1720 A.D. by Ramarao the founder of the Ramdurg Chiefship. In 1858 the temple was desecrated and the idol broken. Later the Ramdurg chief got the temple re-consecrated. The annual fair held under the auspices of this temple lasts for 12 days and on the last day, which corresponds to the full-moon of Ashvija, a car festival is also held. The event attracts a large gathering from far and near. There is also a Nagareshvara temple which is much more ancient and is attributed to Jakanacharya. The town has three inscriptions which belong to the three successive rulers of the Later Chalukya family, namely, Someshvara III, Jagadekamalla II and Taila II. In these the town is described as agrahara administered by 220 mahajanas. As has already been mentioned elsewhere, Bhaskar Rao Appa Saheb, commonly called Baba Saheb, the chief of Nargund rebelled against the British in 1857. He was finally captured, tried, convicted and hanged on the 12th June 1858.

17 Navalgund : The historical importance of this place lies in the fact that it was the headquarters of a small province during the Adil Shahi period and that one of its governors, namely Jalal Khan the brother-in-law of the King Alla-ud-din II (1435-57 A.D.), acting on false reports of the death of the king wanted to assume independence but failed in achieving his objective. Later on Navalgund was the headquarters of a revenue division managed by the hereditary chiefs called the Desais of Navalgund. The objects of interest here include the temples dedicated to Navileshvara, Ganapati, Venkatesha, Veerabhadra and Nagareshvara in addition to the ancient Adinatha basadi. The town has a relatively large number of mosques and dargahs. The Gavimatha, Panchagriha Hirematha and the Nagalingaswami-matha are the other religious institutions of considerable importance. The large tanks called Neelavvanakere and Chennammanakere are said to have been built by the local Desais a couple of centuries ago. Navalgund is famous for its carpets and wooden toys.

18 Ranibennur : The town has three inscriptions of which the earliest is dated in 859 A.D. and the latest which is of the time of the Vijayanagara king Sadasiva Raya is dated in 1550 A.D. Among the temples of the town, the one dedicated to Siddheshvara is the most ancient. The tomb of a Muslim saint, Hazrat Jamal Shah Walo is highly venerated and the annual prayer meeting attracts a large gathering. It is held that this saint came here from Ajmere in about 1785.

19 Ron : Tradition attributes the derivation of the name Ron or Rona to Drona of the Mahabharata times. The original temple of Dronacharya has been converted into a Basavanna temple and the idol of Dronacharya is kept outside. The town has about a dozen epigraphs and the earliest of these, dated in 874 A.D. belongs to the reign of Rashtrakuta Amoghavarsha I. A record of 1111 A.D. near the Dronacharya temple registers the gifts for lighting the assembly hall and study room, for dinner in honour of the goddess of learning on the occasion of the Indra festival and for teaching logic. Obviously Ron was an important centre of learning in those days. It was a maha-agrahara administered by 104 mahajanas. The ancient monuments of the place include the Parshvanatha basadi and the temples of Lokanatha, Anantasayana and Sangameshvara. The Veerabhadra temple is comparatively modern and deserves notice.

20 Savanur : In ancient times Savanur was an agrahara administered by 200 Mahajanas, who, according to an epigraph of 1087 A.D. selected Madhusudhana, a renowned warrior, as protector of the frontier town of Savanur. The town has about 20 inscriptions covering different periods. The modern town was founded by Abdul Raufkhan (one of the ancestors of the Savanur Nawabs) who received from Aurangzeb an assignment of the 22 mahals and at first had his headquarters at Bankapur. He took a fancy to a village then known as Janmaranhalli, founded the town and later moved his capital. The chief objects of interest here are the Nawab's palace, ruins of the fort and its gates, mosques and the Satyabodhasvami matha besides some old ponds and wells. Among the mosques, the two named Kamalbangdi and Khadarbag are of special interest in that these two contain the tombs of the Nawabs. Among the large wells and ponds, Vishnu Tirth is held in great veneration by the Hindus of the region. The annual fair held under the Satyabodhasvami matha attracts a large number of Vaishnava devotees from far and near.

21 Shiggaon : The town has about 16 inscriptions and the earliest of these, dated in 865 A.D. belongs to Amoghavarsha I and registers a gift to Suryanarayana, the Sun-god. The town is noted for its temples of Basavanna and the Kalmeshvara. At Edlabad, about 6 km west of town, there is a well called 'Gangibhavi'. This well is in a fine mango-grove and on its edge there is a small shrine of Rameshvara represented in the form of a linga that has sprouted of its own accord. To the north-west of the well there is a cave, said to have once been the hermitage of sage Jahnu who used to drink the well dry and then allow the water to flow out from his ears in the form of a trickle. It may be noted that a small brook rises from this well and flows down the valley. The pilgrims bathe at this well and worship Rameshvara on the auspicious occasion of Makara Sankranti when a fair is also organised here.

22 Shirhatti : The fort, Avlingavva Math and the Fakirsvami Math are the chief objects of interest here. The fort which is attributed to Ankush Khan the Jagirdar of Lakshmeshvar by some and to Khangauna Desai by others, had 15 bastions. The fortwalls built of earth and rubble are 6 metres high and about 5 metres thick. The main gate faces east and has two bastions, one on each side, measuring 12 metres in height and 9 metres in diameter The fort is surrounded by a moat. The Avlingavva Math, a 17th century stone building, was built by Avlingavva the founder of the Lakshmeshvar desgat. The building intended to be a tomb is quite large and is decorated with numerous sculptures displaying considerable artistic skill. The Fakirsvami Math was founded by Chennavira Svami, a contemporary of Avlingavva. The Math has six tombs enshring the mortal remains of six successive Svamis. These tombs are held in high veneration by the Veerashaivas of this region. On the full-moon day of Vaishaka (April-May) a fair is held in honour of the Fakirsvami.

9 BRIEF ANALYSIS OF DATA :

Population and growth trends :

According to the 1981 Census, the total population of Dharwad district is 2,945,487 comprising 1,511,688 males and 1,433,799 females. Since the population of the district stood at 2,342,213 in 1971, there has been addition of 603,274 persons during the intercensal period. This represents a decadal growth rate of 25.76 per cent. The magnitude of the addition may be visualised when it is stated that this figure is equivalent to the population of as many as six out of the 17 taluks of the district. This decadal growth rate is however slightly lower than the average for the State which is 26.75 per cent. As in other parts of the State, in Dharwad district too, there has been a continuous rise in population during the past few decades. The rate of growth however differs from decade to decade, and during certain decades the trends disclosed by the district do not fully measure up to the trends displayed at the State level. A comparative idea regarding the decadal growth rates for the State and the district may be had from the following details covering 8 decades.

Inter-Census decade	Percentage variation in the population of the					
	State			Dharwad District		
	Total	Rural	Urban	Total	Rural	Urban
1901-11	3.60	4.79	(-)4.64	(-)7.30	(-)6.42	(-)10.52
1911-21	(-)1.09	(-)3.55	17.71	0.52	(-)3.53	16.00
1921-31	9.38	7.43	21.65	6.59	3.59	16.12
1931-41	11.09	8.94	22.99	9.08	9.74	7.21
1941-51	19.36	10.72	61.71	16.66	7.79	42.43
1951-61	21.57	22.56	18.26	23.80	31.69	6.46
1961-71	24.22	21.05	35.23	20.01	12.42	40.67
1971-81	26.75	19.07	50.65	25.76	18.89	40.69
1901-1981	184.46	131.33	554.28	136.14	94.70	287.77

It may be noticed that the decadal growth rates for the district are significantly lower than that for the State except during 1911-21 and 1951-61. The district suffered a loss in its population during 1901-11 and, as may be seen, the rural as well as the urban segments were affected. This phenomenon may be attributed to natural calamities and outbreak of epidemics which might have caused either a largescale decimation of the population or a temporary outmigration of the people of the district to other areas or both. During the next decade, namely 1911-21, much of this loss was made good and the district registered a positive growth, though at a nominal rate 0.52 per cent. During this period the population of the State as a whole declined by 1.09 per cent and the loss was particularly noticeable in the rural areas. In Dharwad district too the rural areas suffered a decline, at a rate quite comparable with the State average. The negative growth trends during this decade are ascribable to the adverse effects of I World War and more so to the influenza epidemic which broke out in a most virulent form all over the State. After 1921, the district as well as the State are experiencing a steady addition of population. This accelerating growth trends may be attributed to improvements in public health and sanitation, gradual decline in the frequency of famines and outbreak of epidemics and also the all round development of the State. Between 1951-61, Dharwad district registered growth at a rate slightly higher than that for the State, namely 23.80 per cent as compared to 21.57 per cent. In the wake of reorganisation of the States in 1956 and merger of the district with Karnataka, there appears to have been a massive influx of people to Dharwad district in view of its growth potential, especially to Hubli its premier city, which vied the position of an alternative capital of the State. Further, the rural areas experienced a high growth rate of 31.69 per cent. This phenomenon was partly due to declassification of a large number of erstwhile towns (the number of towns moved down from 29 in 1951 to 17 in 1961) and also due to the land reform measures which caused some amount of migration of urban-resident absentee landlords to the villages, particularly during the first half of the decade. This trend does not seem to have continued during the next decade. Though there was an addition of only one town to the 1961 list the urban growth rate jumped to 40.67 per cent - a rate which exceeded the overall urban average of 35.23 per cent for the State. This phenomenon of a lower growth rate, especially in the rural areas of the district, was perhaps due to out-migration of people from villages to towns and cities of the district as well as outside. During the latest decade the gap between the growth rates for the State and the district has been considerably narrowed and it is so in the case of rural areas also. Dharwad district is thus seen to reflect, in a large measure, the general trends of growth perceived in the State. The long-term growth trends show that the district not kept pace with the over-all average growth rate of the State. The rural as well as the urban growth rates for the district fail to measure up to the corresponding averages for the State. The shortfalls noticeable in the earlier decades are now being made good and the district appears to be poised for achieving a further breakthrough in its population growth. In this connection one may mention the extension of assured irrigation facilities under the Malaprabha project and the industrial growth potential of Hubli-Dharwad and Gadag, the two prominent urban centres of the district.

As already mentioned, during the latest decade the population of the district has registered a growth rate of 25.76 per cent. This growth rate is quite close to the State average. When the districts of the State are arranged according to growth rates in a descending order Dharwad district holds the seventh rank. Within the district, amongst the taluks there are considerable differences. The decadal growth rate lies between a minimum of 13.30 per cent in Ron taluk and a maximum of 37.07 per cent in Hubli taluk. The growth rate exceeds 30 per cent in two more taluks viz. Ranibennur (31.82 per cent) and Savanur (32.62 per cent). At the other

extreme it is only in one more taluk namely Hirekerur that the growth rate is below 15 per cent. In 8 out of the 17 taluks the growth rate is above the district average and in five taluks the rate exceeds the State average as well. In the case of the other 9 taluks, it may be noticed that the growth rate lies between 21 to 24 per cent in 4 taluks, between 18 and 20 per cent in 3 taluks and slightly less than 14 per cent in 2 taluks. Largescale internal variations may to some extent be attributed to the fact that amongst all the districts of the State Dharwad has the largest number of taluks some of which are very small in respect of area as well as population.

In the State as a whole, and in Dharwad district also, the urban areas have registered a higher growth rate than their rural counterparts. The corresponding rates for the urban areas of the State and the district are 50.65 per cent and 40.69 per cent respectively. Within the district, the urban growth rate is higher than the average in only one taluk, namely Ranibennur, and this apart, in 3 taluks the urban component has emerged for the first time. The growth rate lies between 30 to 40 per cent in the case of 5 out of the remaining 13 taluks, and between 20 to 30 per cent in the case of the other 8 taluks. The lowest growth rate is noticeable in the case of Ron taluk (22.90 per cent). The urban growth rate has been affected to some extent by the classification of erstwhile villages as towns, natural growth and also migration. In the case of rural areas the growth rates for the district and the State are 18.89 per cent and 19.07 per cent respectively. Amongst the taluks, Savanur has registered the highest rate of 31.33 per cent and this is followed by Ranibennur with a tally of 28.31 per cent. In 11 out of the 17 taluks the growth rate is higher than the district average. In Mundargi taluk, on the other hand, the growth rate is very marginal being 0.96 per cent only. This is mainly due to the transfer of Mundargi from the rural to the urban category consequent on its incorporation as a municipal town after the 1971 Census. Out-migration, perhaps of a seasonal or temporary nature to the command area under the Malaprabha project in quest of work, also seems to have adversely affected the growth trends in this taluk. In the taluks of Hirekerur and Kalghatagi also the decadal growth rates are quite low, namely 6.51 per cent and 9.60 per cent respectively. In both these cases an erstwhile large village of the taluk, namely Hirekerur and Kalghatagi respectively, has acquired the urban status consequent on its incorporation as a municipal town.

In summing up it may be observed that the population growth trends in Dharwad district reflect the overall trends displayed by the State. In quantitative terms however the growth rates for the district are slightly lower than the State averages. During the last decade all parts of the district have registered a positive growth. The rates of growth are however quite uneven as between the rural and the urban areas and also amongst the different taluks. The factors which promote or retard the growth of population are quite numerous and deserve a critical study which is however beyond the scope of this note.

Distribution of Population, villages and towns :

The population of the district is distributed amongst its 17 taluks, which in all contain 1322 inhabited villages and 22 towns. The average population size of a taluk is 173,264. Hubli taluk has the highest population (6.24 lakhs) and accounts for 21.18 per cent of the total population of the district. Gadag taluk with its population of 2.54 lakhs ranks next to Hubli and this in turn, is followed by Ranibennur (2.19 lakhs). The shares of Gadag and Ranibennur in the total population come to 8.63 per cent and 7.43 per cent respectively. These three taluks, which are in relative terms, industrially well developed and are highly urbanised, account for 37.24 per cent of the population of the district. At the other extreme, Nargund happens to be the smallest taluk and its population of 0.68 lakhs forms hardly 2.33 per cent of the total. The taluks of Mundargi, Byadgi and Kalghatgi have a population of less than one lakh each and contribute 2.97 per cent, 3.17 per cent and 3.38 per cent respectively to the district total. The population ranges between 1-2 lakhs in the remaining ten taluks. Hubli taluk represents a special case in that the population of the Hubli-Dharwad Municipal Corporation stands wholly included in it even though a part of this city, which may be termed the Dharwad segments lies outside the jurisdiction of Hubli taluk.

Dharwad district has 1362 villages of which 40 are uninhabited. As these villages are organised into as many as 17 taluks, on an average there are 80 villages per taluk and, of these, 78 are inhabited. This taluk average for the district it may be incidentally noticed, is almost one-half of the overall average for the State. When the size of the taluk is examined with reference to the number of inhabited villages in its jurisdiction it is noticed that Hangal taluk which lies in the western fringe of the district and possesses malnad characteristics, tops the list with a tally of 142 whereas Nargund taluk (33) situated in the eastern sector happens to be the smallest taluk. Apart from Hangal there are only 3 other taluks with more than one hundred inhabited villages each. These are Ranibennur (103), Dharwad (105) and Hirekerur (124). The number of inhabited villages is lower than the district average of 78 in 9 out of the 17 taluks. In this connection it may be recalled that during the British period several tracts in the central and eastern parts of this district such as Nargund, Lakshmeshvar, Savanur etc., were in a way enclave territories under the administrative control of the princely States and estate holders who were directly subordinate to the British. After the merger of these territories with the Union of India in 1948 the organisational changes made with reference to these units vis-a-vis the other units which were formerly directly under the British have been minimal and this has led to a considerable amount of disparity. In other words, after the merger, a thorough reorganization of the district into a viable number of a administrative units each with a viable number of villages has not taken place. Thus, at one extreme there is Nargund taluk with just 33 villages and at the other there is Hangal with as many as 142 villages - the latter 4 times a large as the former.

When the distribution of the rural population by taluks is examined it is noticed that the figure exceeds 1.5 lakhs only in the case of three taluks [Ranibennur (1.61 lakhs), Hangal (1.53 lakhs) and Hirekerur (1.52 lakhs)]; lies between 1 to 1.5 lakhs in the case of 8 taluks; ranges between 0.5 to 1 lakh in the case of 5 taluks and happens to be less than fifty thousand (0.45 lakhs) in the case of Nargund taluk. This disparity is due to the difference in the number of villages in each taluk and to some extent it is also due to differences in the settlement pattern noticeable in the malnad, semimalnad and maidan parts of the district. The average population per inhabited village of the district is 1443 and this varies between 1079 in Kalghatgi taluk and 2266 in Gadag taluk. In Hangal taluk which is in the eastern most malnad belt of the district the average size is 1080. The taluks which lie in the transition zone like Byadgi, Hirekerur and Shiggaon also have relatively lower averages. Next to Gadag, Hubli has the highest average of 2058 and this is followed by Kundgol with an average of 2021. The smallest taluk of Nargund gives out an average of 1362.

The population of individual villages is subject to considerable variation. A size-group distribution highlights the preponderance of medium-sized and large-sized villages in the district. There is however a sprinkling of very small villages as also of very large villages. Villages with less than 200 inhabitants each constitute 4.54 per cent while those with 200-499 persons each account

for another 15.73 per cent. Thus, nearly one-fifths of the villages can be regarded as small villages. On the other hand, there are only two villages which have more than 10,000 inhabitants each and are therefore very large in population size. In terms of proportions these form hardly 0.15 per cent of the total number of inhabited villages. The share of the medium sized villages having 500 to 4999 persons comes to 75.87 per cent and that of large villages in the population range of 5000-9999 works out to only 3.71 per cent. In most of the villages of the district the entire population of the village is found concentrated in the main settlement. There are however a few villages, especially in the taluks on the eastern zone having one or two hamlets each.

The urban population of the district is also unequally shared by its 17 taluks. Unlike in 1971, now every taluk has an urban component. Talukwise data reveal that Hubli taluk alone accounts for a little more than 50 per cent of the district total. As already mentioned, although a portion of the Hubli-Dharwad Municipal Corporation lies in the limits of Dharwad taluk for purposes of census the entire area and population of the city are reckoned as belonging to Hubli taluk. This approach has in a way inflated the contribution of Hubli taluk and reduced that of Dharwad taluk. If Dharwad taluk were to have had only this urban area in its limits then its contribution to the district total would have been nil. Since Alnavar town lies within the limits of Dharwad taluk such a possibility has been averted. While the proportion of the population of Hubli taluk to the total works out to 50.77 per cent that of Dharwad taluk comes to 1.21 per cent only. The taluks which make a nominal contribution to the district total are Hirekerur (0.99 per cent), Kalghatgi (1.06 per cent), Dharwad (1.21 per cent), Mundargi (1.31 per cent), Kundgol (1.38 per cent), Shiggaon (1.44 per cent), Hangal (1.65 per cent) and Byadgi (1.72 per cent). Apart from Hubli the other taluks which contribute substantially are Gadag (10.27 per cent), Ranibennur (5.60 per cent) and Ron (4.89 per cent).

Thirteen out of the 17 taluks have a single town each, 3 have two towns each and the other taluk has three towns. The distinction of having the highest number of towns goes to Ron taluk. Except in the case of these 4 taluks in all the other cases the taluk urban population and its share in the district total corresponds to that of the only town located within its respective limits. Townwise population figures disclose that from this point of view also Hubli-Dharwad and Hirekerur are respectively the largest and the smallest towns of the district. The average population of a town works out to 47,194. It may be noticed that apart from Hubli-Dharwad, only Gadag-Betigeri and Ranibennur have a population figure which exceeds the above average. A size-group classification of the 22 towns shows that 2 towns, namely Hubli-Dharwad and Gadag-Betigeri belong to class I (100,000 and above); only one town (Ranibennur) belongs to class II (50,000-99,999); five towns belong to class III (20,000-49,999); and the remaining 14 towns constituting as much as 63.64 per cent of the total number of towns, belong to class IV (10,000-19,999). It may thus be seen that in Dharwad district there is a preponderance of medium towns and that small and very small towns are conspicious by their absence. The urban population of the district is distributed among the different classes of towns are as follows : class I (62.07 per cent); class II (5.60 per cent); class III (12.58 per cent); class IV (19.75 per cent).

Trends of urbanisation :

The proportion of urban population in the total population is an indicator of the degree of urbanisation. In Dharwad district the urban population forms 35.25 per cent of the total population. This figure is much higher than the State average of 28.89 per cent. In the matter of urbanisation Dharwad district holds the 2nd rank amongst the 19 districts of the State. During the past two decades, in Dharwad district there has been a steady increase in the proportion of urban population, that too at a rate comparatively higher than that for the State - The urban component in the State's population moved up from 22.33 per cent in 1961 to 24.31 per cent in 1971 and then to 28.89 per cent in 1981. The corresponding figures for Dharwad district are : 26.88 per cent in 1961; 31.51 per cent in 1971 and 35.25 per cent in 1981. Between 1951 and 1961 however the district suffered a setback in its progress towards higher urbanisation. This phenomenon was quite in consonance with the general trends observed in the State as also all over the country, and was the result of the adoption of an uniform and rational definition of an urban area and strict adherence thereto. In the State as a whole, the number of urban areas moved down to 231 from its 1951 tally of 289 and the proportion of urban population registered a marginal decline : from 22.95 per cent to 22.33 per cent. Dharwad district suffered to a greater extent, for in this case the decline in the number of towns was from 29 to 17 and that in the proportion of urban population was from 31.26 per cent to 26.88 per cent. Despite this massive setback it may be noticed, the urban population of the district registered a positive growth during the decade 1951-61. After 1961, the process of urbanisation gathered momentum in the district and there has been a gradual increase in the number of towns as well as in the proportion of urban population and the decadal growth rate. Between 1961 and 1971, only one town was newly added and the decadal urban growth rate was of the order of 36.59 per cent (higher than the State average of 35.23 per cent). As between 1971 and 1981, there has been an increase in the number of towns from 18 to 22. But the decadal urban growth rate is noticed to be 40.69 per cent which is much lower than the State average of 50.65 per cent. From the foregoing account it is obvious that this district is getting more and more urbanised in the recent years and that the forces which promote higher urbanisation are quite active.

Within the district, at the taluk level, there are considerable differences in the matter of urbanisation. The proportion of urban population in the taluk population is seen to vary between a minimum of 6.33 per cent in the case of Hirekerur and a maximum of 84.49 per cent in the case of Hubli. Apart from Hubli, Gadag is the only other taluk with a high urban component (51.87 per cent). A grouping of the taluks according to the size group of the urban component shows that the proportion is below 10 per cent in the taluks (Hirekerur and Dharwad); lies between 10.00 and 14.99 per cent in four taluks (Hangal, Kalghatgi, Kundgol and Shiggaon); lies between 15.00 and 19.99 per cent in 2 taluks (Byadgi and Mundargi); ranges from 20.00 per cent to 29.99 per cent in 6 taluks (Haveri, Navalgund, Ranibennur, Ron, Savanur and Shirhatti); lies between 30.00 to 39.99 per cent in the case of Nargund, the smallest taluk of the district and exceeds 50 per cent in the case of Gadag and Hubli. In 15 out of the 17 taluks, the respective urban components are lower than the district average. Prior to the classification of Hirekerur, Kalghatgi and Mundargi as towns, the three taluks named after these three towns did not have any urban component at all in the taluk population. In Gadag taluk which has the class I town of Gadag-Betigeri another place, namely Mulgund, has now been classified as a town. These four taluks have thus displayed the trends of urbanisation to a greater extent, especially when viewed with reference to incorporation of fresh areas in the urban category.

Density of population :

The density of population for Dharwad district works out to 214 persons per square kilometre. This figure is higher than the State average of 194 and, in the matter of density, Dharwad district holds the 7th rank amongst the 19 districts of the State. Talukwise

density figures show that amongst the 17 taluks Hubli is the most densely populated taluk (758 persons per square kilometre i.e., when the entire area and population of Hubli-Dharwad city are reckoned as part of Hubli taluk). The next highest density of 241 is noticeable in Ranibennur taluk which is in turn followed by Gadag with its tally of 232. The density figure is equal to or more than the district average in the case of 3 other taluks only (Byadgi, Hangal and Haveri). In other words, eleven out of the 17 taluks are relatively sparsely populated. The density figure given out by Mundargi taluk which is 99, happens to be the least. In Nargund which is the smallest taluk of the district there are 157 persons per square kilometre and this figure is higher than the averages given out by as many as 6 taluks.

In keeping with the general tendency, Dharwad district too displays a considerably high urban density. While there are only 147 persons per square kilometre of rural area there are as many as 1374 persons per square kilometre of urban area. This is quite natural because the bulk of the geographical area of the district stands classified as rural and for working out the density the gross area is taken into consideration. The urban component in the total geographical area of the district works out to 5.50 per cent and this area accounts for 33.56 per cent of the total population. At the taluk level there are considerable disparities as between the rural and urban densities in each taluk and also in the case of rural and urban densities separately amongst the 17 taluks. The gulf between the rural and the urban density figures is very narrow in the case of Ron taluk (128 persons and 293 persons respectively, per square kilometre of rural and urban areas) and it is very large in the case of Ranibennur taluk (rural density 178 and urban density 17,297 per square kilometre). When the rural density figures for the taluks are examined it is noticed that while Hangal taluk has the highest density of 205 persons Mundargi taluk has the least density of 88 persons per square kilometre. Hirekerur taluk too has a fairly high density (191) and ranks next to Shiggaon taluk (192) besides Hangal. Roughly speaking, the taluks in the western and southern belts are somewhat more densely populated than their counterparts in the eastern and north-eastern sectors. The urban density figures for taluks vary between 293 in Ron taluk and 17,297 in Ranibennur taluk. The density is below 500 in the taluks of Shiggaon (477), Kalghatgi (461), Mundargi (324) and Navalgund (301) besides Ron; lies between 500 and 999 in the taluks of Hangal (702), and Hirekerur (794); between 1000 and 2000 in the taluks of Dharwad (1538), Gadag (1399) and it is above 3000 in the case of all the other taluks. Next to Ranibennur taluk, Byadgi has the highest density which, however, is only 6383 persons and is quite low as compared to 17,297 of Ranibennur. Townwise particulars show that the density is the least in Nargund town (165) and the highest in Ranibennur town (17,297). Like Nargund, Annigeri town of Navalgund taluk also has a low density of only 167 persons per square kilometre. In Mulgund town of Gadag taluk too the density is quite low (188). The second highest density is noticed in the case of Gadag-Betigeri (6864). In Hubli-Dharwad, the pre-eminent urban area of the district, there are 2761 persons per square kilometre. Dharwad district is one of the largest districts of the State in the matter of area as well as population and presents a picture of considerable disparities within the district.

At the village level, there are a few which have at the most 10 persons per square kilometre and, at the same time, there are a few others with a density of more than 500. A grouping of the 1322 inhabited villages by density ranges shows that while the villages with a density of 10 persons or even less form 0.53 per cent of the total those with densities exceeding 500 account for 2.12 per cent. These cases perhaps represent exceptional situations. In broad terms it may be noticed that the villages with a density of 50 or less constitute 6.73 per cent, those with a density in the range of 51-100 account for 19.59 per cent, the villages with a density range of 101-300 constitute 64.37 per cent and those having a density of more than 300 form the remaining 9.31 per cent. In the matter of density, just as the towns, the villages also differ considerably among themselves.

Sex Ratio :

Since the total population of Dharwad district comprises of 1,511,688 males and 1,433,799 females the sex ratio works out to 948 females per thousand males. This figure is very much lower than the State average of 963 and, when the districts are arranged in a descending order of their sex ratio figures, Dharwad holds the 15th place. Generally, rural areas have a higher sex ratio than their urban counterparts. This is true in respect of the State and the Dharwad district as well. The sex ratio figures for the rural and the urban areas of the State are 978 and 926 whereas the corresponding figures for the district are 959 and 929 respectively.

Within the district, talukwise details reveal that the sex ratio is the least in Hubli (918) and the highest in Ron taluk (1018). The factors which affect the sex ratio of any unit are quite numerous and among them the level of urbanisation is quite important. The very low sex ratio noticed in Hubli taluk may be partly attributed to its extremely high level of urbanisation. Nine out of the 17 taluks display a sex ratio figure which is lower than the district average. This group includes the taluks of Hangal, Hirekerur, Kalghatgi, Shiggaon and Ranibennur which are in the western and the southern tracts of the district. Ron is the only taluk with a surplus of females. Nargund taluk which has a sex ratio of 998 ranks next only to Ron taluk and this is followed by Navalgund taluk (980). If the position in the rural areas of various taluks were to be examined, it is noticed that the sex ratio ranges between 928 in Hangal and 1035 in Ron. In Hubli taluk the sex ratio is as high as 955 - a figure which is quite close to the district rural average of 959. The sex ratio figures given out are lesser than the district rural average in the case of 9 out of the 17 taluks. Besides Ron, Nargund taluk also has a surplus of females (1011). When the situation in the urban areas is considered it will be noticed that the sex ratio varies between 908 in Hirekerur and 975 in Nargund taluk. Hubli taluk accounts for more than fifty per cent of the urban population of the district. In this case the sex ratio is 912 - a little higher than the average given out by Hirekerur taluk. Haveri is the only other taluk with a sex ratio which is lower than the district urban average. Among the 22 towns of the district Mulgund town of Gadag taluk is the only one which has a surplus of females, namely a sex ratio of 1002. The second and third places are held by Ron and Annigeri where there are 998 and 997 females respectively, per thousand males. At the other end, Hirekerur town has the lowest sex ratio of 908 and the places immediately above are held by Hubli-Dharwad (912), Navalgund (918), Naregal (921) and Haveri (926) and in the case of each of these towns the sex ratio is lower than the district average for the urban areas.

Literacy :

The general literacy rate for Dharwad district works out to 42.36 per cent. This rate is much higher than the State average of 38.76 per cent. When the districts of the State are arranged in a descending order according to their literacy rates, Dharwad district is seen to hold the seventh ranking. In 1971 too, with a literacy rate of 38.51 per cent (as compared to the State average of 31.52 per cent), Dharwad district was among the top five districts. In 1951 as also in 1961, Dharwad district enjoyed a better ranking and held the place immediately after Kodagu and Bangalore. Obviously during the recent decades a few other districts such as Dakshin Kannad, and Uttar Kannad have registered comparatively higher growth rates and have pushed Dharwad district to a relatively lower position.

Within the district, amongst the taluks, the general literacy rate varies between 30.53 per cent in Kalghatgi taluk and 55.20 per cent in Hubli taluk. The very high rate noticeable in Hubli taluk is due to its high level of urbanisation. Apart from hubli there are only two other taluks which have an above-average rate of literacy. These are Hirekerur (42.48 per cent) and Gadag (46.13 per cent). As in the matter of urbanisation in the case of literacy also Gadag taluk ranks next to Hubli taluk. At the other extreme the rates immediately higher than that noticed in Kalghatgi are given out by Dharwad (31.18 per cent) and Mundargi (33.17 per cent). The situation in Savanur taluk (33.27 per cent) is not much different from that prevailing in Mundargi taluk. In a general way it may be observed that the literacy rates are relatively higher in the taluks which have comparatively higher urban components in their total population.

The rural-urban break up shows that in the district as a whole and also in each and every taluk the urban literacy rate is higher than the corresponding rural literacy rate. The proportions of the literates in the rural and urban segments of the population of the district are 36.61 per cent and 52.91 per cent respectively. Talukwise details show that the rural-urban difference is highly pronounced in the case of Haveri taluk where the rural and urban literacy rates are seen to be 32 85 per cent and 55.51 per cent respectively. On the other hand in Savanur taluk the urban literacy rate (33.39 per cent) is only marginally higher than its rural counterpart (33.23 per cent). If the rural literacy rates for various taluks are compared it is seen that the top-most place is held by Hirekerur taluk (41.71 per cent) and that this is followed closely behind by Navalgund taluk (41.57 per cent). In ten out of the 17 taluks the literacy rate is higher than the district average of 36.61 per cent. Dharwad (29.70 per cent) and Kalghatgi (28.85 per cent) occupy the bottom-most places with very low literacy rates. In the case of the urban areas, the literacy rate varies between 33.39 per cent in Savanur and 57.99 per cent in Hubli. The range of variation is very wide. It is only in 5 out of the 17 taluks that the urban literacy rate is higher than the district average of 52.91 per cent. Though Gadag taluk has the second largest urban area in its jurisdiction the proportion of literates in its urban population (54.09 per cent) is lower than that returned by Haveri taluk (55.51 per cent) which contains only one medium-sized town. Likewise, though Ranibennur taluk is relatively more urbanised than either Byadgi or Hirekerur, it contains a somewhat lower proportion of literates in its population. 50.32 per cent as compared to 53.24 per cent and 53.97 per cent noticeable in the taluks of Byadgi and Hirekerur respectively. Obviously, level of urbanisation is not the only factor which leads to a higher rate of literacy. Though the urban areas, especially the larger ones, offer better educational facilities and provide greater opportunities other factors such as socio-economic composition of the population, functional category of the town, migration etc., do cast their influence on the level of literacy at any given point of time.

Sexwise particulars reveal that in conformity with the general pattern, in Dharwad district too the literacy rate for males is much higher than that for females and this is a common phenomenon noticeable in all the taluks and towns. In the district as a whole 54.24 per cent of the males and 29.83 per cent of the females are literate. A consideration of the male literacy rates for different taluks shows that the highest rate is 64.92 per cent (Hubli taluk) and the lowest rate is 41.60 per cent (Kalghatgi taluk). Besides Hubli there are only 4 taluks where the proportion of male literates is higher than the district average. These are Gadag (59.58 per cent), Ron (57.26 per cent), Navalgund (56.38 per cent) and Hirekerur (54.30 per cent). The literacy rate given out by Dharwad taluk (42.38 per cent) is higher only with reference to that noticed in Kalghatgi and the next higher rate of 43.30 per cent is returned by Savanur taluk. If the female literacy rate is examined talukwise it is seen that the rate lies between a minimum of 18.58 per cent in Mundargi taluk and a maximum of 44.61 per cent in Hubli taluk. In this matter too, as in the case of male literacy rate, Hubli taluk enjoys the top-most place and this phenomenon is due to the very high urban component in its population. Apart from Hubli the only other taluks which have returned an above-average female literacy rate are Gadag (32.16 per cent) and Hirekerur (29.88 per cent). The rates given out by Kalghatgi (18.78 per cent) and Dharwad (19.52 per cent) are slightly higher than that given out by Mundargi taluk. These rates too are very much lower than the district average.

Variations in the male literacy rates in rural and urban areas of various taluks may now be examined separately. In the case of rural areas the average is 49.56 per cent. Navalgund taluk which ranks third when the entire taluk is regarded as a unit now tops the list with a tally of 57.06 per cent and this is followed closely behind by Ron taluk (56.23 per cent). Hubli taluk takes the fifth place (53.50 per cent) since the conditions in the rural areas of Nargund (54.49 per cent) and Hirekerur (53.91 per cent) are seen to be slightly better than that prevailing in Hubli taluk. The taluks of Kalghatgi (40.32 per cent) and Dharwad (41.09 per cent) which hold the bottom-most places continue to retain the same positions. The rural male literacy rate is lower than the district average in the case of 7 out of the 17 taluks. When the conditions in the urban areas are examined it is seen that the district average is as high as 62.71 per cent and that the taluk average is equal to or in excess of this figure in the case of only three taluks, namely Byadgi (62.71 per cent), Gadag (65.57 per cent) and Hubli (66.97 per cent). The very high concentration of urban population of the district in Hubli-Dharwad city and the high literacy rate registered therein have in a way boosted up the district average. Talukwise figures show that the urban male literacy rate is as low as 38.96 per cent in Savanur taluk and that this figure is much lower than even the lowest rural rate returned by Kalghatgi taluk. Perhaps the general backwardness of the only small town of the taluk which was, in former times, the capital of a small principality accounts for this phenomenon. The next higher rate, noticeable in the case of Shiggaon taluk is 4 percentage points above this lowest rate. It may be incidentally noted that except in these two taluks (Savanur and Shiggaon) in all the other taluks the urban male literacy rate exceeds 52 per cent.

When the female literacy rates in the rural and urban areas of different taluks are examined the following interesting details are noticeable. The average female literacy rate for the rural areas is just 23.12 per cent, which means not even one among the four rural women encountered can be expected to be a literate. This proportion is as low as 16.61 per cent and 16.63 per cent in the taluks of Mundargi and Kalghatgi respectively. Hirekerur taluk has the highest average of 28.71 per cent and Hangal taluk (28.13 per cent) ranks next to it. In Hubli taluk which has the highest rate when considered as a whole, the rural female literady rate is 25.78 per cent. This figure is however above the district average and is also higher than that returned by 13 out of the 17 taluks of the district. The average urban female literacy rate for the district is 42.37 per cent. This rate is seen to vary between 25.64 per cent in Nargund taluk and 48.15 per cent in Hubli taluk. Hirekerur (47.45 per cent) and Haveri (46.47 per cent) have returned fairly high rates. These apart, there is only one more taluk with an above-average rate, namely Byadgi (43.26 per cent). The rates returned are very low in the case of Savanur (27.47 per cent), Ron (29.07 per cent), Mundargi (29.32 per cent), Kundgol (29.85 per cent) and Navalgund (29.95 per cent). Even in Gadag taluk which has within its limits the second largest

urban centre of the district, the female literacy rate is lower than the district average.

A consideration of the townwise general literacy rates shows that the larger towns have fairly high rates. Hubli-Dharwad tops the list with 57.99 per cent and this is followed by Gadag-Betigeri (56.08 per cent), Haveri (55.51 per cent), Hirekerur (53.97 per cent) and Byadgi (53.24 per cent). In the remaining 17 towns, it is noticed, the general literacy rate is lower than the district urban average. Though Ranibennur is the third largest town of the district the proportion of literates in its population comes to just 50.32 per cent. As already mentioned, Savanur town has returned the lowest rate of 33.39 per cent. The exceptionally high rate noticed in Hubli-Dharwad may be ascribed to the fact that since a long time it is a renowned administrative, industrial and commercial centre of the district and its Dharwad segment is the seat of the Karnatak University. The city enjoys a pre-eminent place in the district in all matters and it is no wonder that it tops in the matter of literacy rate as well.

When the villages are grouped into six population size classes and the literacy rates for the villages in each group are examined it is noticed that the rate ranges between 30.97 per cent in the case of very small villages with less than 200 inhabitants each and 39.45 per cent in the case of large villages falling in the population range of 5000-9999. There is no evidence of any direct relationship between literacy rate and population size in so far as the villages of Dharwad district are concerned. The literacy rate jumps up from 30.97 per cent to 36.95 per cent in the case of villages with less than 200 persons each and those in the size-group of 200-499 respectively. Thereafter, the literacy rate slides down to 35 35 per cent in respect of villages in the next population size group of 500-1999. This group infact contains the largest number of villages. After this reversal, the literacy rate moves up first to 37.33 per cent and then to 39.45 per cent in the case of villages belonging to the population size-groups of 2000-4999 and 5000-9999 respectively. Once again the upward trend suffers a setback, for in the case of the very large villages having 10,000 or more inhabitants each, the literacy rate is just 34.29 per cent. Generally larger villages enjoy better facilities and offer better opportunities for learning as a result of which the general literacy level tends to be higher in larger villages. Anyway, population size alone is not the sole factor that determines the literacy rate. Proximity to a town, ethnic composition, attitude of the villagers towards female education in particular etc., also exert considerable influence on the literacy rate. All these are to be examined in detail if a deeper analysis of the data on literacy is to be attempted.

Economic Activity :

At the 1981 census there has been a three fold classification of the population, namely main workers, marginal workers and non-workers. Nature of one's activity and the extent of participation in economically productive work are the decisive factors for such a classification. Levels of economic development of different regions within the district, availability of opportunities besides willingness to work, especially among women, social attitudes towards working women, initiative and entrepreneurship evinced by the menfolk in general etc., are the important factors that influence the distribution of population under these three categories. Dharwad is predominantly an agricultural district and is noted for the production of cotton and groundnut as well as paddy and jowar. Dry farming is the backbone of the agricultural economy. In the absence of any large scale mechanization of farming, agriculture is even now a labour intensive enterprise. Thus, Dharwad district has an above-average proportion of workers in its population and offers opportunities to seasonal workers also to made an effective contribution to the total economy of the district.

(a) Main Workers

In the State as a whole, the main workers constitute 36.76 per cent of the total population. In Dharwad district the proportion of main workers to the total population works out to 37.98 per cent - a figure which is significantly higher than the State average. There are considerable variations in this regard amongst the different taluks of the district, between rural and urban sectors and also between the male and female segments of the population. For instance, in Hubli taluk particularly in its urban areas, the main workers form hardly 27.88 per cent whereas in the rural areas of Gadag their counterparts account for as much as 46.21 per cent. Likewise, the proportion of main workers in the male segment of the population reaches a maximum of 59.43 per cent in the rural areas of Kalghatgi taluk and works out to just 45.83 per cent in the case of the urban areas of Hubli taluk. Similarly, the proportion of main workers in the female segment of the population ranges between a minimum of 7.72 per cent in the urban areas of Dharwad taluk and a maximum of 35.76 per cent in the rural areas of Gadag taluk. The reasons for such disparities are quite varied.

Taluk level particulars indicate that the proportion of main workers varies between 29.79 per cent in Hubli taluk and 44.81 per cent in Kundgol taluk. This vast disparity between the two taluks which are adjacent to each other may be attributed to the differences in the levels of urbanisation and industrialisation. Apart from Hubli there are only two other taluks which have returned a below-average proportion of main workers. These are Hirekerur (36.97 per cent) and Kalghatgi (37.64 per cent). These taluks are comparatively less urbanised and are located in the western belt of the district in what has been termed as the transition zone. Next to Kundgol, Mundargi has the highest work participation rate (44.09 per cent) and this is followed by Navalgund taluk (42.57 per cent). Though the taluks of Gadag and Ranibennur are urbanised to a relatively greater extent in view of the nature of their basic economy these have returned an above-average proportion of main workers. In the urban areas of these taluks the labour-intensive industries such as cotton cleaning and ginning as well as handloom weaving are of considerable importance. When the figures pertaining to the rural areas of the taluks are examined it is seen that the top-most place is held by Gadag taluk (46.21 per cent) and that the proportion exceeds the district average of 41.80 per cent in the case of 10 out of the 17 taluks. Kundgol, which ranks first when the taluk as such is considered as a unit, holds the second place with a tally of 45.11 per cent. On the other hand, Hubli taluk which occupies the bottom-most place as a taluk, moves up by 4 places as the proportion of main workers in its rural areas (40.22 per cent) exceeds the corresponding figures for Hirekerur (37.44 per cent), Kalghatgi (38.44 per cent), Hangal (38.70 per cent) and Shiggaon (38.89 per cent). A comparison of the situation in the urban areas of various taluks throws up a different picture. The proportion of main workers is the highest in Kundgol (42.50 per cent) and the least in Hubli (27.88 per cent). This proportion is below the district average of 30.96 per cent in the case of only four taluks including Hubli. The rates returned by Gadag and Ranibennur are slightly above the average but are far less than those returned by the less urbanised taluks like Mundargi (38.67 per cent), Shiggaon (37.10 per cent) and Byadgi (34.76 per cent). As already mentioned the differences in the proportions of workers arise out of several reasons which vary from place to place and also from time to time.

In the rural as well as in the urban areas the proportion of main workers in the male population tends to be considerably higher than that in the female population. Dharwad district too conforms to this general tendency. As against the State averages of 53.90 per cent and 18.95 per cent amongst the male and female segments of population, in Dharwad district the corresponding rates are 54.24 per cent and 20.84 per cent respectively. Roughly speaking, for every two female main workers there are five male main workers in the district. Except in Hubli, in all the other taluks more than 50 per cent of the male population consists of main workers. This proportion reaches the highest average of 58.82 per cent in Kalghatgi taluk and touches the lowest figure of 47.49 per cent in Hubli taluk while Gadag (52.65 per cent) ranks just above Hubli. When the situation in the rural areas alone is examined the proportion of main workers in the male segment of population is seen to vary between 55.83 per cent in Ron taluk and 59.43 per cent in Kalghatgi taluk. The range of variation is very narrow and the figure exceeds the district average of 57.42 per cent in the case of 9 out of the 17 taluks. In the urban areas, on the other hand the range of variation is some what wider. As compared to 56.42 per cent in Kundgol, in Hubli taluk the proportion of male main workers comes to 45.83 per cent only. In 5 out of the 17 taluks including Hubli, Gadag and Ranibennur, the proportion of the main workers to the male population works out to a figure which is less than 50 per cent. Next to Kundgol, Shiggaon (55.37 per cent) taluk has the highest proportion of main workers in its male population.

In the female segment of the population of different taluks the proportion of main workers is seen to vary between a minimum of 10.52 per cent in Hubli taluk and a maximum of 31.17 per cent in Mundargi taluk. The female work participation rate is lower than the district average of 20.84 per cent in 5 out of the 17 taluks and the place immediately above that of Hubli is held by Kalghatgi which has a tally of 15.15 per cent. This proportion is fairly high in the taluk of Kundgol (31.13 per cent) which ranks next to Mundargi. When the situation in the rural areas is examined it is seen that the highest rate of 35.76 per cent is given out by Gadag taluk and that this is followed closely behind by Mundargi (32.39 per cent) and then by Kalghatgi. In 7 out of the 17 taluks the work participation rate is lower than the district rural average of 25.51 per cent. This group includes Hubli taluk as well as Hangal, Hirekerur and Kalghatgi all of which are situated in the western and south-western portion of the district. In fact, the proportion returned by Kalghatgi taluk (16.06 per cent) happens to be the lowest amongst the 17 taluks. In the rural areas of all the taluks agriculture is the predominant economic activity. But then, there are differences in the cropping pattern and also in the extent and nature of participation of womenfolk in this activity. In the eastern and central belts of the district which are noted for cotton and groundnut a larger proportion among the womenfolk are returned as workers. In the case of the urban areas this proportion ranges between 7.72 per cent in Dharwad taluk and 27.97 per cent in Kundgol taluk. The district average is 12.12 per cent and in 7 taluks including Hubli, Hangal, Hirekerur and Kalghatgi the corresponding proportion is less than this average. Next to Kundgol, Mundargi taluk has returned the highest average of 24.53 per cent and this is followed by Navalgund with a tally of 23.52 per cent. The factors which determine the proportion of main workers among females are quite numerous and a detailed consideration of the subject is beyond the scope of this brief note.

(b) Marginal Workers :

In Dharwad district the marginal workers constitute 3.74 per cent of the total population. This figure is higher than the State average of 3.48 per cent. Sexwise particulars show that the female segment of the population contains a higher proportion of marginal workers than its male counterpart. For every two male marginal workers in the district there are 15 female marginal workers. Further it is also noticed that this ratio is comparatively less (about 1:4) in urban areas than in the rural areas (2:17). The bulk of the marginal workers - nearly 86 per cent - are found in rural areas and this phenomenon of concentration may be attributed to the primacy of agriculture in the rural areas. During the peak agricultural seasons such as sowing, weeding and harvesting there would be a great demand for additional farm hands when even the womenfolk and children who normally engage themselves in non-productive activity are in a way compelled to contribute their mite to the working force. Some of the industries, such as cotton ginning, sugarcane crushing etc., are also of a seasonal nature and in order to meet the excessive demand during the peak season the essentially non-workers also take up temporary jobs. In the rural areas of the district the marginal workers form 4.99 per cent of the population : 1.01 per cent and 9.15 per cent respectively among the male and female segments of the population. In the urban areas on the other hand the marginal workers account for just 1.45 per cent of the population : 0.59 per cent and 2.38 per cent respectively among the male and female segments of the population.

At the taluk level the proportion of marginal workers varies between 0.88 per cent in Hubli and 7.16 per cent in Nargund. It is fairly high in the taluks of Kalghatgi (6.95 per cent) and Ron (6.72 per cent) as also Navalgund (5.79 per cent), Haveri (5.30 per cent) and Hirekerur (5.21 per cent). The proportion returned in Byadgi taluk is just 1.88 per cent and this figure is high only with reference to that noticed in Hubli taluk. The incidence of marginal work does not seem to conform to any particular pattern. In the case of the rural areas of the different taluks this proportion is seen to be between 2.05 per cent in Byadgi taluk and 9.24 per cent in Nargund taluk. Hubli taluk (2.60 per cent) takes the place immediately above that of Byadgi Kalghatgi (7.54 per cent) ranks next to Nargund and this is in turn followed by Navalgund (7.25 per cent). When the situation in the urban areas is examined it becomes clear that this proportion is the lowest (0.56 per cent) in Hubli taluk which accounts for a fairly large proportion of the urban population of the district as such. Savanur (0.85 per cent) ranks immediately above Hubli and below Shirhatti (1.06 per cent) and Byadgi (1.16 per cent). In Ron taluk which contains 3 small towns, the proportion of marginal workers is indeed very high (7.96 per cent). Dharwad taluk ranks a poor second with its tally of 3.88 per cent and it is immediately followed by Hirekerur.

Among males, the marginal workers form 0.86 per cent in the district as a whole and are met with in the rural and urban areas of all the taluks in varying proportions. In Byadgi taluk, this proportion is as low as 0.28 per cent - much lower than that noticed in Hubli (0.50 per cent) and Mundargi (0.46 per cent). On the other hand, in Haveri taluk the marginal workers account for 1.81 per cent. In the rural areas this proportion varies between 0.21 per cent in Byadgi taluk and 2.13 per cent in Haveri taluk and the district average is 1.01 per cent. In 10 out of the 17 taluks this proportion is less than the district average. In the urban areas in general the marginal workers are fewer in number. Though the district average is 0.59 per cent in Kundgol taluk the marginal workers are so few that they constitute just 0.08 per cent in Shirhatti taluk they account for 0.17 per cent. In Dharwad taluk, on the other hand the marginal workers form 2.08 per cent. The next highest proportion of 1.84 per cent has been returned by Hirekerur taluk.

Among females, on the other hand, the marginal workers constitute 6.79 per cent in the district as a whole and 9.15 per cent and 2.38 per cent respectively in the rural and urban areas. Kalghatgi taluk tops the list with 13.61 per cent and is followed first by Nargund (13.06 per cent) and then by Ron (12.20 per cent). Hubli

taluk (1.30 per cent) appears at the bottom and Byadgi (3.57 per cent) takes the penultimate place. The proportion of female marginal workers in the rural segments of the female population of the taluks varies between 4.00 per cent in Byadgi taluk and 16.78 per cent Nargund taluk. While Kalghatgi taluk has the second highest average of 14.85 per cent, Hubli taluk (4.59 per cent) has reported a percentage which is slightly higher than that noticed in Byadgi taluk. In 9 out of the 17 taluks this proportion is less than the district average. In the rural areas of all the taluks, it may be noticed, a significant proportion of the females have reported themselves as marginal workers. In the urban areas this proportion varies between 0.67 per cent in Hubli and 14.65 per cent in Ron taluk. Both these taluks seem to represent exceptional situations : Hubli has the most populous urban centre of the district whereas Ron taluk has three small towns of which one town is particularly noted for weaving industry. If these two cases are ignored the average is seen to lie between 1.36 per cent in Savanur taluk and 6.04 per cent in Hirekerur taluk.

(c) Non-Workers :

All those who have not worked at all during the entire year under reference are classified as non-workers. In the total population of the district such persons constitute 52.28 per cent. As between the rural and the urban areas the latter contains a higher proportion of non-workers. Likewise, the female segment of the population consists of a larger proportion of non-workers. Sexwise details show that as against 44.90 per cent among males, among females 72.37 per cent are non-workers. Further, as compared to the rates of 41.57 per cent and 65.34 per cent respectively among the males and females living in rural areas, the urban areas have returned the rates of 50.94 per cent and 85.50 per cent. The categories of main workers, marginal workers and non-workers are complimentary to each other. Therefore in areas where the proportions of main workers and marginal workers are high that of non-workers would be naturally low. In Kundgol the non-workers form just 50.69 per cent of the total population : 41.28 per cent and 60.50 per cent respectively among the males and females. On the other hand 69.33 per cent of the population of Hubli taluk consists of non-workers and in the urban areas of this taluk the sexwise proportions reach the highest averages of 53.71 per cent and 91.14 per cent.

Availability of different types of facilities in villages and towns :

Information covering this aspect has been furnished in detail in the village and town directory statements and in a consolidated form in the appendix and also the tables appearing at the end of this note. Regarding drinking water supply facilities it may be mentioned that such facilities are available in all the inhabited villages and towns of the district. It may however be added that this question has not been examined in depth and details such as the sufficiency or otherwise, availability of water supply throughout the year, technical opinion about the potability of the available water itself have not been probed into. In most of the villages open draw wells with masonry work constitute the main source of drinking water and quite a large number have one or more additional types of sources such as tanks, ponds, streams or canals and taps besides handpumps. As may be seen from the appendix, 863 out of the 1322 inhabited villages of the district have more than one type of source of water supply and another 322 have only wells. Tanks are the main sources of water supply in the taluks of Navalgund, Nargund and Kundgol. Taps have been provided in twenty towns for supply of drinking water.

(a) Educational Facilities :

Educational facilities in the form of at least a primary school are available in 1261 out of the 1322 inhabited villages. In other words, 95.39 per cent of the villages of the district have one or more educational institutions within their respective limits. Talukwise particulars reveal that in 6 out of the 17 taluks, namely, Byadgi, Haveri, Hubli, Mundargi, Navalgund and Ron, each and every village has been provided with at least one school within its jurisdiction. The coverage is thus one hundred per cent in 35 per cent of the taluks of the district. Amongst the rest, Hirekerur taluk, where all but one of its villages have educational facilities (99.19 per cent), tops the list and this is followed by Kundgol (96.43 per cent) and Shirhatti (96.03 per cent). The percentage of coverage falls short of the district average in the case of the remaining 8 taluks and it is the least in Shiggaon taluk (84.95 per cent). The aggregate population of the villages with schools forms 98.74 per cent of the rural population of the district. The rural population served is 100 per cent in the case of the aforementioned six taluks and it is as high as 99.93 per cent in Hirekerur taluk. There are 4 more taluks where the proportion of population served exceeds 99 per cent. These are Ranibennur (99.77 per cent), Nargund (99.74 per cent), Savanur (99.58 per cent) and Kalghatgi (99.27 per cent). Shiggaon taluk which has returned the lowest proportion of villages with educational facilities has a coverage of 95.92 per cent and ranks above Dharwad taluk where the proportion of rural population served is 95.78 per cent. It may be observed in a general way that in all these taluks the villages not having any educational institution within their limits are usually very small in terms of population size.

From the appendix it is clear that several villages have more than one school of the same level and quite a few have schools of different levels as well. The number of primary schools in the 1261 villages with schools adds up to 1631, which means that the average number of primary schools per village with this minimum facility is 1.29. In so far as the middle school level (i.e. Standard V to VII) is concerned it is noticed that the average works out to 1.16. Further, only 668 out of the 1261 villages with primary schools have this facility. The number of villages with high schools adds up to 106 only and at this level one village - one school appears to be the norm. However, there are a few large-sized villages having more than one high school as a result of which the average number of high schools per village with a high school comes to 1.07. Seven villages have junior colleges which provide facilities for pre-university education. As the level of education increases the number of villages having the facility as also the number of institutions therein gets reduced. Thus, in this district, while 95.39 per cent of the inhabited villages have facilities for primary education, those which offer facilities for middle school level, high school (i.e. secondary) level and pre-university level constitute 50.53 per cent, 8.02 per cent and 0.53 per cent respectively. Further, there is not even one village with a degree college in the entire district. This feature more or less fits into the general pattern displayed by almost all the districts of the State.

Villages not having any educational facility perforce depend upon the institutions functioning in some other nearby village or a town. In the case of 60 out of the 61 such villages the distance to the nearest place with an educational institution is less than 5 km and in the other case this distance is less than 10 km. It is also noticed that 77 per cent of these villages have less than 500 inhabitants each and that the average population of a village without even a primary school works out to 394. Obviously, larger villages are more likely to have one or more educational institutions in order to serve the local people as also those residing in nearby smaller villages. If the villages are grouped by population size-class and the proportion of villages with educational facilities to the total in each group is examined it is noticed that the proportion moves up from 82.46 per cent in the case of small villages with less than 500 inhabitants each to 98.21 per cent in respect of the medium-sized villages belonging to the size-group of 500-1999 and reaches one hundred per cent in the case of all the villages with a minimum population of 2000.

When the villages are grouped according to distance from the nearest town and the proportions are worked out according to the availability of educational facilities it is observed that there is no direct relationship between these two factors. The proportion of villages with educational facilities is 90.63 per cent in the case of villages located within a radius of 5 km with reference to the nearest town. This proportion jumps to 97 05 per cent in respect of the villages which belong to the distance range of 6-15 km and then moves down to 94.95 per cent in the case of the villages that are farther off. All the towns of the district have adequate educational facilities and the relevant details have been discussed later.

(b) Medical Facilities :

Medical institutions of one type or the other have been reported from 358 villages, that is in 27.08 per cent of the inhabited villages of the district. Talukwise figures show that this proportion varies between 7 75 per cent in Hangal taluk and 72.92 per cent in Mundargi taluk. The range of variation is indeed very wide One of the reasons appears to be the disparity in the number of villages - Hangal taluk has the largest number of villages. In the taluks of Hirekerur, Dharwad and Ranibennur which are also having a relatively large number of villages the coverage is seen to be rather low : 10.46 per cent, 8.57 per cent and 12.62 per cent respectively. In Nargund taluk, which is the smallest in terms of the number of villages, 27.27 per cent of the villages have medical facilities. The proportion of villages with medical facilities is fairly high in Hubli (63 83 per cent) and Kalghatgi (62.20 per cent) as well as in Shirhatti (50.00 per cent). From the appendix it may be noticed that in the taluks of Mundargi, Hubli, Kalghatgi and Shirhatti quite a large number of villages have reported other types of institutions which mainly covers the clinics run by the registered private medical practitioners (RP). In all, there are 68 villages with a primary health unit each, 18 with a primary health centre each, 8 with a dispensary each, 5 with a hospital each and 3 have a maternity and child welfare centre each while 20 have a family planning centre each. It is needless to emphasise that these facilities in the above-mentioned villages have been provided by the government.

The aggregate population of the villages with medical facilities constitutes 48.95 per cent of the rural population of the district. Apparently, this is a good coverage At the taluk level, Mundargi tops the list (91.08 per cent), Kalgnatgi (84.88 per cent), Shirhatti (76.57 per cent) and Ron (73.86 per cent). The proportion of population served is indeed quite high in these five taluks On the other hand, the proportion of rural population served is as low as 11.78 per cent in Hirekerur taluk and 23.61 per cent in Hangal taluk. The position in Dharwad taluk (27.76 per cent) is also not very much different from that prevailing in Hangal taluk. Why there should be such glaring differences amongst taluks which are adjacent to each other and share several common characteristics defies an explanation.

The 964 villages without medical facilities depend upon such facilities available in nearby villages and towns. A grouping of these villages by the range of distance to be covered to reach the nearest place with medical facilities shows that it is in the case, of only 7 per cent that the distance is 10+ km. About 65 per cent of these villages are located in the 0-5 km range and the remaining 28 per cent fall in the 5-10 km range. When the availability of this facility is examined with reference to the proximity of a village to a town it is noticed that the proportions are 19.38 per cent, 29.18 per cent and 26.99 per cent respectively for villages located in the 3 distance ranges of 0-5 km, 6-15 km and 16-50 km. Villages which are neither too near nor too far away from an urban area seem to enjoy a better chance of having some medical facility. Amongst the 358 villages with medical facilities about 50 per cent are situated at a distance of 6-15 km and another 41 per cent fall in the distance range of 16-50 km while only 9 per cent are located somewhat close to a town. Population size is an important factor which helps a village to acquire medical facilities. Amongst the villages with medical facilities only 3 per cent have less than 500 inhabitants each. About 50 per cent have a population exceeding 2000. If the position in the case of villages belonging to the different population size-groups is examined it is seen that the proportion of villages with medical facility increases from 4.10 per cent in respect of villages with less than 500 persons each to 96.38 per cent in the case of those having 5000 persons or more through 21.20 per cent and 60.00 per cent for the intermediate size groups of 500-1999 and 2000-4999. The medical institutions in large villages and towns serve the local residents as also those residing in the nearby villages. Medical facilities are available in all the towns of the district.

(c) Postal Facilities :

Villages having postal facilities within their respective limits constitute 39.26 per cent of the inhabited villages of the district. Among the taluks, Gadag has returned the highest proportion of 61.11 per cent and Navalgund comes next with a tally of 53.45 per cent. In 8 out of the 17 taluks this proportion is higher than the district average. At the other extreme, Shiggaon taluk has the least proportion of 29.03 per cent only and Hangal taluk too has an equally poor average (29.58 per cent). Hirekerur, the second largest taluk of the district has a comparatively better showing (34.68 per cent). The proportion of rural population served by this facility exceeds 50 per cent in all the taluks, and, amongst the taluks, Gadag (83.74 per cent) tops the list. In the taluks of Mundargi (81.87 per cent) and Ron (77.19 per cent) also a fairly high proportion of the rural population is served by this facility. On the other hand, in Shiggaon taluk which has the least proportion of villages having postal facilities the proportion of population served is also the least (53.59 per cent). The coverage is lower than the district average of 67.45 per cent in the case of 8 taluks including Kalghatgi (55.23 per cent), Shirhatti (55.60 per cent) and Hangal (56.65 per cent).

Postal facilities are not locally available in a substantially large number of villages of the district. However, a vast majority of these villages (90 per cent) are located within a radius of 5 km from the nearest post office. The distance to the nearest place with postal facility is 10+ km in the case of only 7 villages (less than one per cent). Among the villages which are located within a radius of 5 km from the nearest town 35.63 per cent are having postal facilities. This proportion happens to be as high as 41.97 per cent in the case of the villages that lie in the distance range of 6-15 km. This group, it may be incidentally noted, accounts for the largest number of villages. In the case of the next distance range of 16-50 km, the villages with postal facilities form 37.32 per cent. Too close a proximity to a town seems to be a disadvantageous factor. So also a place which is far away from an urban area is unlikely to be provided with postal facilities unless of course it is a large sized village enjoying locational and other advantages. Population size is a vital factor and larger the population, greater are the chances that the village has the postal facilities. The proportion of villages having postal facilities is as low as 2.24 per cent in the case of small villages having less than 500 inhabitants each. This proportion jumps first to 32.82 per cent and then to 93 64 per cent in the case of the villages belonging to the size-groups of 500-1999 and 2000-4999 before reaching 98.04 per cent in respect

of the large villages with a population of 5000 or more. All the towns and 78 villages have postal, telegraph and telephone facilities while 98 villages have post office as well as telephone facilities and 343 have only post offices.

(d) Weekly Market Facilities :

All the towns and most of the large and medium-sized villages of the district have a compliment of permanent shops which cater to the daily needs of the local residents. The institution of weekly markets is also quite popular in the district and the availability of this facility has been reported in the case of 119, that is 9.00 per cent of the inhabited villages. Taluk-wise distribution of these villages shows that Kundgol alone accounts for 14 villages while Ron as well as Haveri contribute 13 and 12 villages respectively. On the other hand, Byadgi taluk contributes just 3 villages to the total and the share of Nargund, the smallest taluk is 4. Though on an average there are 6 villages per taluk, in 7 taluks the number of villages with weekly market facilities is 5 or less, in another 7 taluks this number lies between 6 and 10 and in 3 taluks it exceeds 10. When viewed in relation to the total number of villages in the taluk it is noticed that the proportion varies between 4.03 per cent (Hirekerur taluk) and 25.00 per cent. Kundgol taluk tops the list and is followed by Mundargi (16.67 per cent), Ron (14.29 per cent) and Haveri (13.95 per cent). The places immediately above Hirekerur taluk are held by Hangal (4.25 per cent), Byadgi (4.84 per cent) and Shiggaon (6.45 per cent). The proportion of the rural population served by this facility in the district comes to 29.24 per cent. Talukwise particulars reveal that Kundgol is the best served taluk (53.35 per cent) and the taluks of Mundargi (43.73 per cent) and Haveri (43.40 per cent) rank as the next best. The proportion of population served happens to be the least in the case of Byadgi taluk (16.74 per cent). Hirekerur taluk which has the lowest average in terms of the proportion of villages, has a rate which is above that of Byadgi when the proportion of population served is examined. The proportion of population served exceeds the 50 per cent mark in one taluk (Kundgol), lies between 25 and 50 per cent in 6 taluks and is below 25 per cent in the remaining 8 taluks.

As weekly markets do not gather in 1203 villages, the residents of these villages make use of the facilities available in the nearby towns and villages. The distance to the nearest place with market facility lies in the range of 0-5 km, 5-10 km and 10+ km in the case of 51 per cent, 34 per cent and 15 per cent of these villages respectively. When the availability of this facility with reference to the proximity of an urban area is examined it is noticed that the proportion of villages with the facility increases with every increase in the distance range From 3.75 per cent in the case of villages situated within a radius of 5 km, the proportion increases to 8.69 per cent and then to 10.87 per cent in respect of the villages belonging to the distance ranges of 6-15 km and 16-50 km. Villages which are farther away from urban areas seem to enjoy better chances. Amongst the 119 villages with weekly markets 60 are beyond the 15 km range and another 53 are in the distance range of 6-15 km. Further, weekly markets usually gather in relatively large sized villages All the 119 villages with this facility have more than 500 inhabitants each and among them only 10 per cent belong to the size-class 500-1999 while the rest belong to the 2000 plus category. When considered as a proportion to the total number of villages in each size group it is noticed that the proportion is a mere 1.53 per cent in the case of the 783 villages in the size-class 500-1999. The next two size-classes of 2000-4999 and 5000 plus contain a much larger proportion, namely 26.36 per cent and 96 08 per cent respectively. Obviously, larger villages enjoy better chances of being provided with the weekly market facility. Most of these places usually have several permanent shops as well and serve as commercial and service centres for several villages of the neighbourhood

(e) Communication Facilities

Villages enjoying communication facilities such as a bus stop and or a railway station constitute 54.69 per cent of the inhabited villages of the district At the taluk level, Hubli and Gadag have returned the highest rates of 85.11 per cent and 77.78 per cent respectively. These two taluks are highly urbanised and industrially advanced besides being centres of railway and road transport since a long period In Nargund taluk, on the other hand, only 27.27 per cent have this facility. The position in Hangal taluk which has the largest number of villages and is located in the western belt with *malnad* characteristics, is better (38.03 per cent) only in comparison to that prevailing in Nargund taluk. The proportion of rural population of the district served by communication facilities is 73.31 per cent. From this point of view also, Hubli and Gadag hold the top-most places with a coverage of 94.70 per cent and 88.87 per cent respectively. The coverage reported by Mundargi taluk (88.73 per cent) is also fairly high. The proportion of population served is the above district average in 11 out of the 17 taluks. On this count also Nargund taluk (42.71 per cent) holds the last place and Hangal taluk (51.32 per cent) too retains its penultimate place. The pattern of distribution of the taluks according to the proportion of rural population served more or less corresponds to that according to the proportion of villages enjoying the facility in each taluk.

The inhabitants of the 599 villages not having communication facilities make use of the facilities available in the nearby villages and towns according to their needs. A grouping of these villages with reference to the nearest place with communication facility shows that the distance is reasonably short (0-5 km) in the case of as much as 84 per cent of the villages. The distance is more than 10 km in the case of only 3 per cent, for it lies between 5-10 km in respect of the remaining 13 per cent. Villages which are located in the proximity of urban areas enjoy better chances of being provided with communication facilities. This becomes clear when the availability of this facility in villages is examined with reference to the nearest town. Amongst the villages located within a radius of 5 km from the nearest town, 56.25 per cent have communication facilities This proportion moves down to 53.11 per cent and then increases to 55.98 per cent in the case of villages belonging to the distance ranges of 6-15 km and 16-50 km respectively. Location of the village with reference to railway and road network is also an important factor in that a road side village has a greater chance of being provided with a bus stop facility than its interior counterpart. Further, a village with a larger population is more likely to have some communication facility. All the villages with a minimum population of 5000 and 86.36 per cent of the villages in the size-class 2000-4999 are enjoying communication facilities. This proportion works out to 51.09 per cent in the case of the medium sized villages with a population ranging between 500 and 1999 and happens to be as low as 30.59 per cent for the small villages with less than 500 inhabitants each.

(f) Approach by Pucca Road :

The facility of approach by pucca road is available in 54.31 per cent of the inhabited villages of the district Taluk level data reveals that the proportion of villages with pucca road facility is the highest (74.47 per cent) in Hubli taluk and the least (35.16 per cent) in Ron taluk The other taluks with a fairly high average are Kundgol (71.43 per cent) and Shiggaon (66.67 per cent) as well as Dharwad (65.71 per cent). Gadag has a comparatively poor average of 50.00 per cent even though in the mater of communication facility it holds the second rank This proportion is very low in the taluks of Savanur and Shirhatti also. The aggregate population of the villages with the pucca approach road facility forms 68.35 per cent of the rural population of the district. Hubli, which ranks first when the proportion of villages is taken as the basis for comparison, recedes

to the second place when the proportion of rural population served are taken up for consideration. With a coverage of 85.04 per cent of its population Shiggaon taluk tops the list and Hubli follows with a tally of 84.03 per cent. The other taluks with a fairly high proportion are Kundgol (82.63 per cent), Kalghatgi (80.63 per cent) and Dharwad (76.35 per cent). Ron taluk which appears at the bottom with reference to villages now moves up by 4 places as the proportion of population served, namely 58.81 per cent, is more than the corresponding figures for the taluks of Shirhatti (56.81 per cent), Savanur (44.94 per cent), Mundargi (48.69 per cent) and Nargund (43.59 per cent). This transposition of taluks is due to the differences in the population of the villages having this facility and belonging to different taluks. Population size is a vital factor and larger the population greater are the chances that the village is provided with a pucca approach road. Amongst the villages with a population of less than 500, only 39.55 per cent have this facility. As the population size increases the proportion of villages with the facility also increases. In the case of villages in the size-class of 500-1999 the coverage is 50.06 per cent. This proportion jumps to 77.73 per cent and then to 96.08 per cent in respect of the villages belonging to next higher population size classes of 2000-4999 and 5000 plus respectively. Proximity of a village to an urban area also appears to be a favourable factor, for the villages that are nearer to a town have greater chances of being provided with a pucca road. Among the villages which are located within the radius of 5 km with reference to the nearest town 66.88 per cent have this facility. This proportion moves down to 55.25 per cent in the case of villages belonging to the distance range of 6-15 km and reaches 49.64 per cent in respect of those which are located beyond the 15 km range. All the towns of the district have pucca roads and are well served by bus transport facilities. It is therefore natural that the villages which are located on the roadside and those that are nearer to the town are linked by pucca approach roads. Likewise a village with a relatively large population tends to have a cluster of facilities including the pucca approach road.

(g) Power Supply :

All the towns and 89.33 per cent of the inhabited villages of the district are enjoying the power supply facility. It is heartening to note that the coverage is cent per cent in 5 out of the 17 taluks and more than 95 per cent in 2 more taluks. These taluks are Byadgi, Gadag, Hirekerur, Mundargi, Ranibennur. Ron (97.80 per cent) and Savanur (96.77 per cent). In Hubli taluk the electrified villages form 87.23 per cent - a figure which is slightly lower than the district average. The proportion of villages with power supply faoility is less than 80 per cent in only two taluks : Kalghatgi (69.51 per cent) and Shiggaon (60.22 per cent). The aggregate population of the villages with power supply forms 95.04 per cent of the rural population of the district. The coverage is cent per cent in 5 taluks and it is as high as 99.61 per cent in Ron and 97.56 per cent in Hangal taluk. The coverage in Savanur (95.36 per cent) is slightly less than that reported by Hangal, Haveri (95.47 per cent) and Hubli (95.39 per cent) - the taluks which have a relatively lower coverage in terms of villages. The proportion of population served happens to be the least in Shiggaon taluk (83.67 per cent) which incidentally has the lowest proportion of electrified villages also. The position is more or less the same in the taluks of Kalghatgi and Shirhatti, where the coverage is around 85 per cent. This proportion is less than the district average in 7 out of the 17 taluks including Navalgund, Nargund and Kundgol.

Among the 160 villages which are located within a radius of 5 km with reference to the nearest town 90.00 per cent are electrified. In the case of the villages belonging to the next distance range of 6-15 km the proportion of villages with electricity is 87.70 per cent. This downward trend does not continue further, for it is seen that this proportion increases to 90.94 per cent in respect of villages belonging to 16-50 km range. Though proximity of a village to an urban area is a favourable factor which hastens the electrification of that village there are several other factors which are equally, if not more, important. Population size is undoubtedly one such factor and larger the population greater are the chances. All the villages with a minimum population of 5000 are enjoying power supply facility. On the other hand, among the 268 small villages with less than 500 inhabitants each, only 76.12 per cent are electrified. This proportion however moves up to 90.68 per cent in the case of the 783 medium sized villages belonging to the population size-class of 500-1999 and reaches 98.18 per cent in respect of the 220 villages with 2000-4999 inhabitants each. The foregoing analysis shows that by and large, the village with a relatively large population is more likely to be provided with each and every facility under consideration. Availability of amenities promotes a further growth of population and gradually the large village grows into a small town.

Brief Note on Towns

Dharwad district has 22 towns and all these are municipal towns, that is statutory urban areas. The details presented in statement I shows that 16 of these 22 are old towns with an urban history of 8 decades or even more and 5 are of a comparatively recent origin. Amongst the 16, two towns, namely Gajendragarh and Mulgund suffered declassification - the former in 1941 and the latter in 1941 as well as in 1961 and 1971. Shiggaon which acquired urban status for the first time in 1921 suffered declassification in 1961 and regained the urban status at the very next census. Likewise of the five towns which acquired urban status in 1951, four were declassified at the very next census and of these while Annigeri regained its urban status in 1971 itself Mundargi, Kalghatgi and Hirekerur, had to wait for one more decade. Naregal town has however registered a steady growth since 1951. Over the decades the towns of the district have experienced a varied history of growth and all the old towns with the exception of Hubli-Dharwad have, during one decade or the other, suffered a loss. For instance between 1901 and 1911, only Hubli-Dharwad (12.19 per cent) and Shirhatti (14.00 per cent) registered a positive growth. The population loss suffered by the other towns ranged between 2.45 per cent in Gadag-Betigeri and 69.73 per cent in Byadgi. In Ranibennur town too the population declined by 47.93 per cent. The other towns which experienced severe reduction in population during this period are Nargund, Lakshmeshwar and Kundgol. The next decade witnessed a different trend. The declining trend of the earlier decade continued unabated in Gajendragarh and Savanur and Shirhatti which had registered a positive growth between 1901 and 1911 suffered a decline by 13.80 per cent. In all the other towns there was an increase - the quantum of which however varied considerably and Shiggaon acquired the urban status for the first time. In Byadgi town, which had suffered the worst decline in the previous decade, the decadal growth rate was of the order of 173.46 per cent. Ranibennur too reported a high growth rate of 72.70 per cent. In spite of these spectacular growth trends, the population of these two towns could not reach the 1901 mark. Amongst the rest, Mulgund and Navalgund experienced a nominal growth rate of less than one per cent, while Hangal and Ron had a marginal addition. The growth rate exceeded 10 per cent in Hubli-Dharwad and Kundgol and was much higher

in all the other towns. The next decade of 1921-31 witnessed an addition of population in all the towns except Annigeri, Nargund and Navalgund. The decline in these towns was quite small, being 6.39 per cent, 11.75 per cent and 12.50 per cent respectively. Ron (1.04 per cent) and Lakshmeshwar (2.05 per cent) registered a nominal growth while Shiggaon (5.84 per cent) and Mulgund (8.45 per cent) fared slightly better. Hubli-Dharwad picked up further momentum and witnessed an addition to the extent of 23.18 per cent. During these early decades of the century most of the towns of the district witnessed a fluctuating trend in population growth. Natural calamities and frequent out-breaks of epidemics such as plague and cholera quite often resulted in temporary outmigration of large sections of the inhabitants of the town. The substantial loss noticed in one decade, as may be noticed, was made good by an equally substantial gain during the next or the subsequent decade. These conditions changed after 1941 since when all the towns have consistently been displaying the trends of a positive growth. Between 1931-41, only Lakshmeshwar suffered a marginal decline by 2.38 per cent. But this was more than made good during 1941-51 when the town registered a decadal growth rate of 28.64 per cent. During this decade Ranibennur returned the highest growth (48.77 per cent) and Haveri (44.49 per cent) ranked next. In Hubli-Dharwad town too the growth rate was fairly high (36.71 per cent). On the other hand, Shirhatti had a nominal addition (2.40 per cent) and Kundgol (5.80 per cent) and Nargund too gained only marginally. Mulgund and Gajendragarh which were declassified in 1941 regained their urban status and 5 new towns were added. The next decade, as already mentioned, witnessed a declassification of 6 towns including Sniggaon which had acquired the urban status in 1941 and Mulgund which, after a spell of declassification, had regained its urban status only in 1951. The growth rates of the towns during this decade ranged between 14.52 per cent in Savanur and 50.79 per cent in Annigeri. The decadal growth rate was below 20 per cent in 7 towns, ranged between 20 to 30 per cent in 7 towns including Hubli-Dharwad (26.66 per cent), reached 37.37 per cent in the case of Nargund and exceeded 50 per cent mark in Annigeri. The same trends of growth continued during the decade 1961-71. But some of the towns with a high growth rate in 1951-61 experienced growth at a comparatively lower rate. For example, Annigeri which had experienced the highest growth rate between 1951-61 registered a marginal growth rate of 9.11 per cent only, while Nargund retained a high profile with a growth rate of 31.85 per cent. In Savanur the growth rate was further reduced to 8.10 per cent. However in relation to other towns Savanur enjoyed a better placement as Gajendragarh and Byadgi reported the lower growth rates of 2.07 per cent and 6.65 per cent respectively. A grouping of the towns by decadal growth rates shows that in 5 towns the growth rate was below 20 per cent, in 7 towns it ranged between 20 to 30 per cent, stood slightly above 30 per cent in the 3 towns of Haveri, Nargund and Ranibennur and exceeded the 50 per cent mark in Hubli-Dharwad (52.59 per cent). The high growth rate noticed in Hubli-Dharwad may be partly attributed to the merger of the erstwhile municipal town of Dharwad with Hubli city and constitution of the Hubli-Dharwad Municipal Corporation by incorporating within its limits portions of several villages in order to achieve geographical contiguity. During the latest decade of 1971-81 too, all the towns have registered a positive growth. The decadal growth rate is the least (11.62 per cent) in Naregal town, lies between 20 to 30 per cent and 30 to 40 per cent in the case of 9 towns and 6 towns respectively and exceeds 40 per cent only in the towns of Shirhatti (43.43 per cent) and Ranibennur (42.62 per cent). Hubli-Dharwad, which registered the highest growth rate during the previous decade, returned a fairly rate of 39.02 per cent during 1971-81 also. The foregoing analysis of the townwise decadal growth rate data shows that very few towns experienced growth at sustained and progressively increasing rates. A decade of high growth rate is usually followed by a decade of moderate or low growth rate. The factors that promote the growth of population in towns are quite varied and manifest themselves with different intensities in different towns at different times. All the towns of the district are traditional towns in that at one time these were large villages with locational, historical and certain other advantages which enabled them to grow at a more rapid rate and acquire urban status. Most of the towns are multi-functional in character.

As already mentioned, 16 towns are old towns with a urban history of 80 years. In 1901, Hubli-Dharwad, Gadag-Betigeri and Ranibennur ranked as the first three most populous urban areas of the district. These three places have all along retained their relative positions quite intact. Though the population of each and every town has considerably increased during the past 8 decades the quantum of increase is not quite the same. If the 1901 population is taken as the basis for comparison it is noticed that Hubli-Dharwad has registered the highest growth, namely 6.5 fold increase and that this is followed by Haveri with 4.6 fold increase. On the other hand in the towns of Lakshmeshwar and Mulgund the population has not even doubled itself. The increase is just two fold or slightly more in the case of 9 towns and a little more than thrice in the case of the remaining three towns. By virtue of the influence it has been exerting over the nearby villages and towns, Hubli-Dharwad has emerged as the pre-eminent urban centre of the district and is poised for further growth as well in the coming decades.

As in the case of population, in the matter of geographical area also Hubli-Dharwad is the largest town of the district (190.94 sq.km) and Annigeri (111.54 sq.km) ranks next. These are the only towns with an area exceeding the hundred square kilometre mark. Amongst the rest, Ron, Nargund and Naregal are also comparatively large and the area of each of these towns exceeds 50 square kilometres. With an area of just 2.63 sq.km. Navalgund is the smallest town. A grouping of the 22 towns of different ranges of area shows that in 5 towns the area is less than 5 sq.km., in 4 towns it lies between 5 and 10 sq.km; in 6 towns it lies between 10 and 25 sq.km; in two towns it lies between 25-50 sq.km. and in the remaining 5 towns it exceeds the 50 sq.km. mark. Most of the towns are of a medium size. As a result of these wide variations in area and population the density of population also varies considerably. Among the 22 towns, Ranibennur is the most densely populated town (17,297 persons per sq.km.). The second and third most densely populated towns are Gadag-Betigeri (6864) and Byadgi (6383). In Hubli-Dharwad, which has the highest population and the largest area, the overall density is 2761. The population of this city is however most unevenly distributed and within the city there are highly congested and very densely populated localities. Annigeri is a small and very sparsely populated town with less than 20,000 inhabitants. The jurisdictional of this municipal town, (which was till recently a Town Panchayat) covers the entire revenue area of Annigeri and includes vast extents of agricultural lands, pastures barren fields and the like. In other words, at the time of constitution of the municipality instead of confining its boundaries to the built up and fringe areas, all the lands of village Annigeri as a revenue unit have been incorporated in the limits of the municipal town as well. This is not the only such case either in Dharwad district or in the State. There are several instances within the district where the entire geographical areas of 2 or more villages have been similarly brought under the urban fold. In 1971, Ron was a Town Panchayat having its administrative jurisdiction over Ron as well as Krishnapur. But since it was a non-municipal town, for census purposes the jurisdiction of Ron town was confined to the revenue limits of Ron only. But, subsequent to 1971, Ron has been constituted into a municipality the boundaries of which encompasses the entire revenue limits of Ron as well as Krishnapur. The geographical area of Ron is thus 68.65 square kilometres. The area of Mulgund town which is 77.20 square kilometres, covers the lands belonging to Mulgund, Basapura and Sitalahari. Likewise while Mundargi

town (42.05 sq.km) covers the lands belonging to Mundargi, Byalawadgi, Shirol and Ramenahalli, Kalghatgi town (23.92 sq.km) covers the revenue units of Kalghatgi, Hulugina-katti, Machapur and Bendigeri. Alnavar, Gajendragarh, Hangal, Hirekerur, Naregal and Shiggaon are the other municipal towns which were non-municipal towns in 1971 as the civic administration was being looked after by the Town Panchayats having jurisdiction over the corresponding revenue village. Conversion of these local bodies into municipalities did not involve any jurisdictional changes. All these towns have relatively large areas and, as a result, project themselves as relatively sparsely populated towns which in truth is fallacious. In conformity with the regional settlement pattern, these towns too have a core settlement area covering a compact block of about a hundred hectares at the most. Amongst the towns Naregal has returned the lowest density (165) - lower than 167 returned by Annigeri the second largest town. A grouping of the towns by density ranges shows that the density is below 500 in 7 towns, lies between 500-1000 in 2 towns, between 1000-2500 in 2 towns, between 2500-5000 in 7 towns between 5000-7500 in 3 towns and exceeds the 15,000 mark in one town. There is apparently no direct or inverse relationship between population size of a town and its density.

It is a generaly held view that a lower sex ratio is an indicator of a higher degree of urbanisation. Sex ratio data presented in statement I do not however fit into any particular pattern, either with reference to population size or with reference to growth or population in towns over a period of time. An examination of the sex ratio figures of 17 towns for the three successive censuses reveals that it is only in 4 towns that the sex ratio has steadily decreased. In 10 towns though the sex ratio registered a fall in 1971, this trend did not continue during the next decade. In other words sex ratio has displayed a fluctuating trend in 60 per cent of the towns. In the remaining 3 towns the sex ratio has increased from decade to decade. Data are available for two censuses only for the towns of Alnavar and Shiggaon. The sex ratio has moved up from 917 to 939 in Alnavar whereas in Shiggaon it has not changed from its 1971 standard of 936. The data relating to the 1981 census shows that the sex ratio varies between 908 in Hirekerur and 1002 in Mulgund. Both these are small towns belonging to class IV category of towns and have acquired the urban status recently. Hubli-Dharwad the most populous and prominent town which bears an intense urban character has a sex ratio of 912 - a figure which is slightly more than that returned by Hirekerur. In 1971 as well as in 1961 however, the sex ratio reported at Hubli-Dharwad happens to be the least. Gadag-Betigeri, another class I town has a sex ratio which is higher than that given out by six towns of a smaller size. The class III towns of Gajendragarh and Nargund have a fairly high sex ratio. A detailed analysis of the factors responsible for the observed variation in the sex-ratio pattern amongst the different classes of towns is beyond the scope of this brief note.

Among the 22 towns, 16 are administrative centres of considerable importance in that these are the headquarters of the taluks known after their respective names. Hubli-Dharwad presents an unique situation and the city happens to be the headquarters for the taluks of Hubli and Dharwad as also that of Dharwad Sub-division and Dharwad district. Haveri, Gadag and Savanur towns are the headquarters of the revenue Sub-divisions named after them. A persual of the data on location of towns furnished in statement II throws up some interesting details. The distance to the taluk headquarters by road is 32 km in the case of Alnavar, 27 in the case of Gajendragarh and is slightly less than 20 km in the case of the other 4 towns. The District Offices are located in the Dharwad segment of the Hubli-Dharwad Municipal Corporation and the distance to this place from the Central Bus Station in Hubli segment is about 20 km. The road distance to the district headquarters is the minimum (32 km) in the case of Alnavar town which belongs to Dharwad taluks and the maximum (140 km) in the case of the taluk-headquarter town of Hirekerur. The district headquarter town is situated in the north-western sector. A grouping of the 21 towns according to the range of road distance to the district headquarters shows that only 3 towns are at a distance of less than 50 km while, 4, 8 and 6 are located at distances ranging between 50 and 75, 75-100 and more than 100 km respectively.

While Dharwad district is situated in what is generally known as the Northern Karnatak region, Bangalore the State capital is located in the south-eastern sector of the State. As a result all towns of Dharwad district are comparatively far away from the State headquarters. The road distance to Bangalore from the towns of this District varies between 301 km in the case of Ranibennur and 481 km in the case of Gajendragarh. Apart from Ranibennur the only other towns which are at a distance of less than 350 km are Byadgi and Haveri. Amongst the rest, 6 towns belong to the distance range of 350-400 km, 8 towns belong to the distance range of 400-450 km and 5 towns are located at distances exceeding 450 km. With reference to the headquarters of the adjacents such as Bombay and Hyderabad also the towns of Dharwad district are quite far away. The prominent towns such as Hubli-Dharwad, Gadag-Betigeri, Haveri and Ranibennur are enjoying very good road as well as railway transport facilities.

Within the district there are two towns with more than 100,000 inhabitants each. Hubli-Dharwad city dominates not only the district but also the entire north Karnatak region. Gadag-Betigeri city falls under the direct influence of Hubli-Dharwad and the two cities are separated by a road distance of 56 km. This distance is much less if one were to compute the distance from the outer periphery of Hubli-Dharwad, particularly the eastern border of the Hubli segment. If the proximity of the towns to the nearest city is examined it is noticed that in the case of 11 towns Hubli-Dharwad happens to be the nearest city. The distance to this city ranges between 18 km (Kundgol) and 74 km (Hangal) and, in the case of 6 towns it is less than 50 km. Gadag-Betigeri is the nearest city for 7 towns and these are located at distances ranging from 18 km (Mulgund) to Hubli-Dharwad (56 km). This distance is less than 50 km in 5 out of the 7 cases. Haveri, Byadgi and Ranibennur which are situated on the national highway connecting Poona and Bangalore are somewhat nearer to Davangere city of Chitradurga district. These three towns are nevertheless more under the commercial and industrial influence of Hubli-Dharwad city than under that of Davangere for historical reasons. Davangere city happens to be the nearest city (80 km) in the case of Hirekerur town, too.

All the towns have bus route facilities and are well served by State transport buses. Eight out of the 22 towns are enjoying railway station facilities. Amongst these Hubli and Gadag as well as Alnavar are important railway junctions. The road distance to the nearest railway station from the 11 towns not having the facility locally, is 20 km or less, 20-30 km and 30-40 km respectively in the case of 5, 3 and 6 towns. The district does not have any navigable rivers or canals.

A rough idea regarding the volume as well as the general nature of the financial transactions of the civic bodies administering the towns of the district may be had from the details presented in town directory statement III. The particulars relate to only one year and are therefore not quite useful for any detailed analysis. Though all the 22 are municipal towns, Hubli-Dharwad enjoys a higher status as it is being administered by a municipal corporation. As may be expected, the volume of financial transactions of this civic body does not bear comparison with that of any other civic body of the district. The amounts reported under receipts and expenditure are seen to be as high as Rs.3.72 crores and Rs.3.90 crores respectively. In Gadag-Betigeri which is a class I town and is being administered by a city

municipal council the receipts add up to Rs.65 lakhs only. The other towns too differ considerably in terms of population size, area and resources. Amongst these 20 towns Ranibennur is the most populous town and here the volume of transaction is considerably heavy (receipts Rs.25.7 lakhs and expenditure Rs.22.6 lakhs). Generally larger towns have higher municipal receipts and incur relatively higher expenses also Ron has returned the lowest amount under receipts (Rs.1.27 lakhs). A grouping of the towns by broad ranges of municipal receipts throws out the following information : Rs.2 lakhs and less : 5, Rs. 2 to 4 lakhs : 5; Rs.4 to 6 lakhs : 2; Rs.6 to 8 lakhs : 3; Rs.8 to 10 lakhs : 2; Rs.10 to 25 lakhs : 2 and above Rs. 25 lakhs : 3 towns namely Ranibennur, Gadag-Betigeri and Hubli-Dharwad. In the matter of expenditure, as Hirekerur town (Rs.0.63 lakhs) takes the last place and the place immediately above that is held by Mulgund (Rs.0.99 lakhs), Ron (Rs.1.26 lakhs) moves up a little. A similar grouping of the towns by the range of expenditure yields the following information Rs.one lakh and less : 2; Rs.1 to 2 lakhs : 4; Rs.2 to 4 lakhs : 6; Rs.4 to 6 lakhs : 4; Rs.6 to 8 lakhs : nil; Rs.8 to 10 lakhs : 2; Rs.10 to 25 lakhs : 2 and above Rs.25 lakhs : 2 towns namely Gadag-Betigeri and Hubli-Dharwad. An important point to be noted is that in the Statement regarding municipal finances the actual receipts and expenditure alone are reported and, neither the opening balance nor the closing balance for the year has been taken into account. As a result in most of the towns the amounts reported under the two heads differ considerably.

Data on per capita receipts and expenditure for each town would provide a better basis for inter-town comparisons. However, one has to be quite cautious in such a comparative study as it may lead to fallacious conclusions, for population alone is not the sole criterion that determines the volume of transactions of any particular civic body. The particulars presented in Table 13 reveal that the per capita receipts varies between Rs.7.76 in Ron and Rs.88.37 in Alnavar. Both are small towns belonging to class IV category. Hubli-Dharwad the most populous city holds the second place with a tally of Rs.70.66 and this is followed by Kalghatgi (Rs.57.21) which again is a class IV town. Gadag-Betigeri (Rs.55.55) takes the fourth place. It is only in these 4 towns that the per capita receipts exceeds Rs.50 In 9 towns the per capita is less than Rs.20 and in 5 towns it ranges between Rs.20 and Rs.40 when the expenditure data are examined in a like manner it is noticed that the per capita varies between Rs.6.15 in Hirekerur and Rs.74.05 in Hubli-Dharwad. The relative positions of various towns get mixed up because of the vast differences noticeable in the actual receipts and the actual expenses incurred. Hubli-Dharwad thus tops the list and this is followed first by the class IV town of Alnavar (Rs.71.33) and then by Gadag-Betigeri (Rs.55.75). These are the only 3 towns where the per capita exceeds Rs.50. Amongst the rest, 11 towns have reported a per capita of less than Rs.20 while 3 towns have reported Rs.20 to Rs.30 and the remaining 5 towns have reported Rs.30 to Rs.40. It may be mentioned in passing that while some of the towns are enjoying municipal status since several decades quite a few represent the cases of very recent conversion of a Town Panchayat into a municipality. Alnavar, Annigeri, Hangal, Kalghatgi, Ron etc. belong to the latter category. These towns are as yet passing through a stage of transition and are yet to stabilise their finances.

In all the towns property tax happens to be the main as well as recurring source of income. The contribution from this source to the annual receipts depends upon the actual collections made in each town during the year This varies from town to town and also from year to year for the same town depending upon several local and extraneous factors. The share of receipts from this source exceeds 25 per cent of the total in the case 20 towns and the lowest share of 19.33 per cent is reported by Hirekerur. On the other hand, in three towns this figure exceeds 75 per cent [Hubli-Dharwad (75.12 per cent), Gajendragarh (76.87 per cent) and Byadgi (77.33 per cent)], and in 9 towns including Gadag-Betigeri and Ranibennur this figure lies in the range of 50-75 per cent. All the towns have derived revenue from municipal properties and powers apart from taxation. The extent of receipts under this head varies considerably and this forms a minor source of income in most of the towns. In Alnavar however, this head accounts for 20 per cent of the total receipts during the year under reference. In Ron and Lakshmeshwar too the proportion exceeded 20 per cent. On the other hand in 15 towns the contribution from this source was much less than 10 per cent. All the towns have received grants from the Government. The amount so received is also subject to wide variation from town to town and from year to year. The amount so received is the highest in the case of Hubli-Dharwad (Rs.29 lakhs) and the least in Hirekerur (Rs.0.04 lakhs). Gadag-Betigeri, Kundgol and Navalgund have also received substantial sums. The civic bodies quite often receive funds in the form of advances from various sources. This, however, is not a regular feature. Receipt of such advances has been reported from only 13 out of the 22 towns. In Nargund town advances account for 22.89 per cent of total receipts. This proportion is fairly high in the towns of Annigeri (19.52 per cent) and Gadag-Betigeri (18.93 per cent). On the other hand it is less than even one per cent in Naregal and less than 2 per cent in the 4 other towns. In addition, there are several miscellaneous items which fetch more or less a recurring income to each municipality and it is quite possible that some of the receipts which should have been shown under a specific head has been grouped under this residuary category.

General administration is one of the main items of expenditure in every town. This too is a recurring feature. In absolute terms the sums spent varies from a minimum of Rs.14,000 at Hirekerur to a maximum of Rs.61,22,000 at Hubli-Dharwad. When viewed as a proportion of the total expenditure incurred by the concerned civic body it works out to 22.15 per cent and 15.69 per cent respectively. The expenditure on this head, as a proportion to the total, is the highest (67.03 per cent) at Ron and the least (5.68 per cent) at Naregal. Apart from Naregal, Mundargi is the only town where the expenditure on general administration works out to less than 10 per cent. This proportion is less than 25 in the case of 8 towns including the three prominent urban centres of the district namely Hubli-Dharwad, Gadag-Betigeri and Ranibennur and exceeds 50 per cent in the towns of Ron, Kundgol and Shirhatti. The very low proportions noticed in Naregal and Mundargi are quite inexplicable. In Naregal, 'other items' category accounts for as much as 77 per cent of the total expenditure. In Mundargi however the expenditure on this count comes to 43.66 per cent. In a general way it may be observed that there is no direct relationship between class of towns or the age of the municipality and the proportion of expenditure on general administration. Public safety which usually covers road-lighting also is another important item of recurring expenditure in all the towns. The amount spent on this count forms only 3.20 per cent of the total expenditure in Gadag-Betigeri and in 4 more towns this proportion is 5 per cent or less. Amongst the rest 7 towns spend 5-10 per cent, 6 towns spend 10-15 per cent and the other 4 spend more than 15 per cent. This proportion reaches the highest figure of 23.79 per cent in Mundargi and 23.30 per cent in Ron. Every civic body spends considerable sums of money or providing public health and conveniences to the town dwellers. When viewed in relation to the total expenditure, this head accounts for an insignificant 0.65 per cent in Gajendragarh and a heavy 54.91 per cent in Hirekerur. Both these are class IV towns which were till recently being administered by Town Panchayats. As in Gajendragarh, in Navalgund (2.67 per cent) also the expenditure on this item is very low. However, 12 out of the 22 towns, spend more than 25 per cent. The public works which are undertaken in towns by the concerned municipalities are usually of a minor character Amongst the 22 towns, 4 towns have not reported any expenditure under this head for the reference year. On the other hand, at Hubli-Dharwad

the expenditure exceeds Rs. one crore and this amount forms 26.63 per cent of the total. In the towns of Ranibennur and Hangal also the proportion of expenditure on this item exceeds 20 per cent. On the other hand it ranges between 1 to 5 per cent in 4 towns and happens to be less than one per cent in Savanur. Apart from the few specific heads of account there are several others on which the civic bodies are bound to spend considerable sums of money every year. A thorough analysis requires data for a few successive years and also that an uniform basis is adopted for classification of expenditure under particular heads. Any error in classification by the reporting agency can lead to abnormal variations that require a rational explanation at the time of analysis. The finances of the municipalities are not quite elastic, especially after the recent abolition of octroi collections.

Data presented in statement IV on civic amenities show that in all the towns there are roads that are maintained by the concerned civic bodies as well as roads under the maintenance of the State Public Works Department. There are Pucca as well as Kachcha roads in all the towns. The townwise total road length varies considerably since it depends on various factors including the geographical area, population and location of the town concerned. Broad comparisons reveal that the road length is the highest (512 km) in Hubli-Dharwad and the least (7 km) in Alnavar as also Mulgund. The only other town where the road length is below 10 km is Gajendragarh. The total road length ranges between 10 and 20 km in 7 towns, lies between 20 and 30 km in 8 towns and is 30 km or more in the other 4 towns, namely Ranibennur (38 km), Hirekerur (37 km), Gadag-Betigeri (88 km) and Hubli-Dharwad. The range of variation is indeed very large. If the road length is examined in relation to geographical area as a ratio per square kilometre of urban space the following picture emerges. In Mulgund town this ratio is as low as 0.09. On the other hand Ranibennur gives out a ratio of 11.31, the highest for any of the towns of the district. The towns with a ratio exceeding 5 are : Gadag-Betigeri (5.15), Byadgi (7.12) and Navalgund (9.50). This ratio is less than 1 in 10 towns and lies between 1 and 5 in 8 towns. In Hubli-Dharwad which has the highest road length and, at the same time, the largest area as well this ratio works out to 2.68. When viewed in relation to population, the road length per 1000 inhabitants is seen to vary between 0.05 in Mulgund and 1.77 in Kalghatgi. In 11 out of the 22 towns this ratio is above 1.0 and in only in two towns it is below 0.5. In Hubli-Dharwad the road-length per thousand population is 0.97 km.

Drainage facilities, in the form of surface drains, are available in all the towns. Hubli-Dharwad is the only town which has been provided with sewerage facilities. All the towns have water-borne latrines. The number of such latrines does not bear any specific relation to either population size or the area of the town concerned. Largest number of such latrines has been reported from Hubli-Dharwad city which has the sewerage facilities for easy and efficient disposal of night-soil. In Ron there are only 6 such latrines. In all the towns including parts of sprawling Hubli-Dharwad city, the water-borne latrines are conneoted to septic tanks for disposal of the night soil. The availability of service latrines has been reported from only two towns, namely Byadgi and Gadag-Betigeri. In this type of latrines, the night-soil has to be cleared every day or on alternate days and the services of scavengers are essential. In these towns wheel barrows are in use for removal of the night-soil from the service latrines. In a large number of towns there are other types of latrines such as the pit-type latrine for example which do not require such frequent cleaning services. The age-old practice of resorting to nearby open fields for answering the calls of nature is still in vogue in most of the towns.

Drinking water is supplied to consumers through taps in all the towns except Naregal and Ron. The quantity of water supplied and also the duration of supply on each day are subject to considerable variations. Water is generally pumped from borewells or tanks or streams to overhead tanks or service reservoirs for storage and treatment prior to its supply to consumers. Six towns have service reservoirs of varying capacities and two of these towns namely Hubli-Dharwad and Nargund have overhead tanks as well. Overhead tanks have been reported from 13 towns in all and Savanur has a pressure tank in addition to a overhead tank. The total storage capacity varies between 135,000 litres in Annigeri and 276 5 million litres in Hubli Dharwad Storage capacity does not connote the quantity water supplied each day. Fire-fighting services are available in 4 out of the 22 towns of the district. These towns are Hubli-Dharwad, Gadag-Betigeri, Ranibennur and Haveri. In the case of the other towns the distance to the nearest place with fire-fighting facility ranges between 18 km and 59 km. All the towns of the district are having power supply facility and electricity is being used for domestic, commercial, industrial, road lighting and such other purposes in all the towns. The number of connections under each category varies considerably from town to town depending upon population size, area, functional characteristics of the town and several other factors. Hubli-Dharwad the prominent urban centre of the district has returned the largest number of connections under each one of these categories. The number of connections in this city does not stand comparison with any other town of the district on account of the vast differences in size as well as in the basic economy of the towns. Hubli-Dharwad is a class in itself. The number of connections reported from Gadag-Betigeri, Ranibennur and Haveri is also fairly large as these places are also important towns of the district. Small towns such as Shiggaon, Alnavar, Hirekerur and Kalghatgi have reported relatively small number of domestic as well as industrial and commercial connections.

Population growth has led to the emergence of slums, especially in the larger urban areas. In Dharwad district there are two class I towns and one class II town. All the three have been affected by this phenomenon The number of notified slums added upto 52 at Hubli-Dharwad and the slum-dwellers of this city formed 8.68 per cent of the total population. The number of slums reported from Gadag-Betigeri and Ranibennur being 9 and 2 respectively, in these two towns the slum-dwellers accounted for 5.04 per cent and 0.74 per cent. As may be noted from statement IV-A most of the slums occupy very small geographical areas. The extent of congestion may be visualised when it is mentioned that the density of slum population is 118,240 persons per square kilometre in Gadag-Betigeri, 71,585 per sq.km. in Hubli-Dharwad and 53,500 persons per sq.km. in Ranibennur. All the slums in Hubli-Dharwad except two have been provided with underground drainage, that is sewerage facility. Likewise in Gadag-Betigeri all the slums have open surface drains. But such facilities are not available in the slums of Ranibennur. Paved roads of a few hundred metres have been reported from several slums of Hubli-Dharwad. Slums of Hubli-Dharwad are having the facility of water-borne latrines also. The number of such latrines, however, appear to be quite inadequate. Several slums have community latrines as well. In Hubli-Dharwad the disposal of night-soil does not pose any problem at all, for the latrines built in the slums are also connected to main sewers. In Gadag-Betigeri the community latrines are provided with septic tanks and in Ranibennur town there are no latrines at all in the slums.All the 9 slums in Gadag and one of the 2 slums of Ranibennur as well as 14 out of the 52 slums of Hubli-Dharwad have been provided with public taps. Almost all the slums have also been provided with street lights. In most of the slums, the slum-dwellers have obtained power connections for domestic

use also. But, by and large, the living conditions of the slum-dwellers need urgent improvement.

Information on the extent of medical, educational and recreational facilities available in the towns is furnished in statement V. All the towns have medical institutions of one type or the other and facilities for treatment of the in-patients are available in all the towns except Annigeri, Gajendragarh and Naregal. The facilities available at Hubli-Dharwad are quite in keeping with its large population size as also the fact that it has one of the 4 Government medical colleges of the State. The city has ten hospitals, including one Ayurvedic hospital. The average number of beds per 1000 inhabitants of the town varies between 0.29 in the small town of Mundargi and 3.67 in Hubli-Dharwad, the largest and the most prominent urban centre of the district. Gadag-Betigeri, the second largest town ranks next to Hubli-Dharwad with a tally of 2.27 and this is followed by Haveri (2.20) which is an important commercial town. Ranibennur which ranks third in population size has however yielded a ratio of 0.41 - a figure much lower than that reported by some of the smaller towns like Byadgi (1.56), Hirekerur (1.56) and Savanur (0.96).

Regarding educational facilities it may be mentioned at the outset that Hubli-Dharwad city, particularly its Dharwad segment, is the seat of Karnatak university and that this city is a very prominent centre of education in the northern Karnataka region. The city has 3 medical colleges including the two which teach the Indian systems of medicine (i.e. Ayurvedic) and the homoeopathic systems of medicine. There is an engineering college as well as a polytechnic institute. Besides there are several degree colleges, law colleges and other educational institutions including an Agricultural College. The medical college and also the engineering college as well as the polytechnic institute located at Davangere happens to be the nearest such institution in the case of Byadgi (60 km), Haveri (70 km), Hirekerur (64 km) and Ranibennur (35 km). In the case of all the other 17 towns Hubli-Dharwad city is the nearest place with all these facilities. Degree colleges are available in 8 towns including Hubli-Dharwad. The residents of the remaining 14 towns depend upon the facilities for collegiate education that are available in nearby towns. However, the preference among many is to move over to Hubli for prosecuting higher studies. In 16 towns there are junior colleges which provide facilities for pre-university education. The residents of Alnavar, Kalghatgi, Kundgol, Mulgund, Ron and Shiggaon depend upon the Junior colleges functioning in the nearby towns. The distance to such a town is 45 km in the case of Shiggaon and 18 km in the case of Kundgol and Mulgund. Hubli-Dharwad city has as many as 17 junior colleges. But in view of its large population, the number of institutions per 10,000 inhabitants works out to 0.03 - the lowest average amongst the 16 towns. This ratio is as large as 0.97 in Hirekerur and is above 0.50 in 9 other towns. It is needless to mention that all the towns have adequate facilities for primary, middle and secondary education. The word middle level is now a misnomer, for the scheme of primary education now encompasses what was formerly classified as middle. However the primary level itself has been divided into lower primary (I-IV standard) and higher primary (V-VII standard) and the latter corresponds to the middle school level. On an average, in the urban areas of the district there are 3.03 primary schools, 2.47 middle schools and 1.01 high schools for every ten thousand population. At the town level there are considerable variations under each category. For instance this ratio for high schools is the highest (1.95) at Hirekerur and the least (0.10) at Hubli-Dharwad. The ratio regarding middle schools likewise varies between 4.12 at Haveri and 0.21 at Hubli-Dharwad. In 10 towns this ratio lies between 2 and 3 and, in 10 other towns it exceeds 3 whereas in Ranibennur it works out to 1.55 and at Hubli-Dharwad drops to 0.21. Even though Hubli-Dharwad city has the largest number of institutions the ratio per 10,000 population happens to be the least. In the case of primary schools too this ratio is as low as 0.26. In 6 towns the number of primary schools per ten thousand population lies between 2 and 3, in 11 towns it ranges between 3 and 4 and in the 3 towns of Gadag-Betigeri, Hangal and Shirhatti it ranges between 4 and 5. Navalgund has returned the highest ratio of 5.08. Most of the educational institutions located in towns serve not only those residing in the concerned towns but also cater to the needs of those residing in the nearby villages.

None of the towns of this district has reported the availability of hostels exclusively meant for working women. Regarding recreational facilities it may be noted that it is only Hubli-Dharwad that can boast of the availability of a well-built stadium. Permanent cinema theatres are available in 16 out of the 22 towns. As may be expected, Hubli-Dharwad has the largest number of cinemas (21) and this is followed way behind by Gadag-Betigeri with 5 cinemas, Ranibennur with 3 and the towns of Byadgi, Haveri and Lakshmeshwar with two cinemas each. The towns not having this facility are Hirekerur, Kundgol, Mulgund, Mundargi, Naregal and Shiggaon. All the towns excepting Hirekerur and Savanur have public library and reading room facilities.

All the towns of the district are commercial centres, though of varying importance. All the towns have banking facilities, while Hubli-Dharwad has as many as 77 banks, Gadag-Betigeri has 22 and Ranibennur as well as Haveri have 8 banks each the other have 2 to 7 banks each. Agricultural as well as non-agricultural credit cooperative societies are functioning in all the towns. Manufacturing activities of one type or the other have been reported from all towns except Hirekerur and Lakshmeshwar. Cotton and groundnut are the important cash crops of the district which have promoted the development of agrobased industries in the urban areas. Groundnut oil is reported by five towns as the first most important commodity manufactured. Cotton ginning and pressing has been reported by 4 towns. Beedi manufacture, that is rolling of beedies has been mentioned as the first most important manufacturing activity in the 3 towns of Byadgi, Savanur and Shiggaon. Weaving too is of considerable importance, especially in the towns of Gajendragarh, Ranibennur and Mundargi. Lathes, safety matches, wooden furniture, soji and cotton yarn are the other most important commodities produced in the towns of Hubli-Dharwad, Kalghatgi, Alnavar, Hangal and Nargund respectively. It is generally those commodities which are manufactured in the town that are exported. Lint has been reported as the most important commodity exported from 5 towns. The other commodities so reported are timber, cloth, cardamom, safety matches, chillies, beedies, cotton yarn etc. The items imported to towns generally include the essential commodities like food grains, provisions, cloth, etc., and commodites which could be used as raw materials for manufacturing activities like cotton, tobacco, groundnut and timber. Information furnished on these three aspects, it may be mentioned, is of a very general nature and is not amenable for any critical analysis.

PART A - VILLAGE AND TOWN DIRECTORY

(i) SECTION I - VILLAGE DIRECTORY
(ii) SECTION II - TOWN DIRECTORY

VILLAGE DIRECTORY - AMENITIES AND LAND USE

EXPLANATORY NOTE

As the title signifies the Village Directory aims to provide information on amenities and land use pattern in respect of each and every village with the reference period as the year 1979-80. In, all there are 20 columns in this tabular statement and, out of these as many as 9 are allotted to amenities and services while another 5 are earmarked for data on land use. The remaining columns are concerned about location code number and name of the village area and population, its proximity to an urban centre and, remarks. Since most of these column headings are concise and represent certain concepts, a column by column explanation is furnished herewith. This would enable the reader at the very outset to recognise the scope and appreciate the limitations of the data presented under various columns.

Column 1 : Location Code Number :-

The concept of location code numbers has already been explained in the Analytical Note. The location code number thus assigned to the village is entered in this column. This number, runs serially starting from 1 for every taluk and the data are presented for villages arranged in an ascending order of their location code numbers. If there are any villages in the taluk that are fully incorporated into the limits of any urban area or are completely submerged under the back waters of any reservoir but are continued to be borne on the jurisdictional-lists of the Survey and Settlement authorities such villages are mentioned at the end without any location code number and in all such cases it may incidentally be pointed out, no further data except the name and the area are furnished in the statement. Similarly in the case of villages which are classified as outgrowths of towns, their names and area particulars alone are given treating them at par with villages fully incorporated in urban areas.

Column 2 : Name of Village :-

The name of the village corresponding to the location code number is given in column 1 is spelt out in English in this column. By and large the spellings adopted at the previous i.e. 1971 Census, have been retained even now. However, errors arising out of misreporting and misprinting if any in the 1971 District Census Handbooks have been taken note of and the correct spellings are now used. So also changes in village names duly effected by the Government with the sanction of the concerned authorities have been taken into consideration while finalising the spellings of villages names for 1981 census purposes. Further, if the name of the village has now been spelt differently as compared to the spelling given in the 1971 District Census Hand book for whatever the reason the spelling as adopted in the 1971 District Census Handbook is also furnished within brackets below the present name of the village in the alphabetical list of villages for the convenience of the data user.

A little more explanation appears to be necessary about the places which appear in the list of towns as well as in the list of villages. This phenomenon occurs particularly in the case of Taluk and District headquarter towns which, as revenue entities are geographically large villages. The main village site areas including the peripheral developed areas would have for long been incorporated into the urban limits without any change whatsoever in Survey and Settlement records. In the Original Survey records and also at the Resurvey, the entire village inclusive of all the lands that are incorporated into the urban limits continues to be shown as a regular revenue village. In other words the portion constituted into a town is not taken out from the parent village and formed into a separate and independent unit in the jurisdictional lists. Every civic body, be it a municipal corporation or a town municipality or a notified area or a sanitary board defines its own jurisdiction confining itself mostly to the built up area and the fringe areas for enforcing municipal rules and regulations. With the administrative and legal sanction of the Government which issues a notification in this behalf the civic body secures statutory rights for administering the local area so defined. The incorporated areas may at times cut across village boundaries and may comprise of portions belonging to the revenue jurisdiction of two or more villages. In some instances entire revenue lands of a village or of several villages are incorporated into the limits of a town in which case for purposes of census operations these villages lose their independent identity and are omitted in the list of villages of the taluk. But it is only in case of villages of which only certain portions are included in the town, especially those that contribute their names to the towns concerned that this apparent duplication of names occurs. In such cases the jurisdiction of the town is very clear and it covers only a portion of village which is constituted into an independent entity as urban for census enumeration purposes. The remaining area too is constituted as an independent unit under the rural category i.e. as a village. In order to distinguish this unique situation, the name of the village bears the suffix Rural within brackets in the census village lists. Division of the village into urban and rural components and the suffixing of the names is a special procedure adopted for census purposes only. That is to say, if one were to ask the Officers of the Survey, Settlement and Land Records whether in their lists there are villages such as say Bellary (Rural), Belgaum (Rural), Bijapur (Rural), Chamarajnagar (Rural), Magadi(Rural) Manoya (Rural), Mysore (Rural), Raichur (Rural) etc., the answer would be a definite 'no' and then they would say that there are villages of the same name but without the suffix Rural. Similarly in the village maps and other records pertaining to the above named places, the lands that are incorporated into urban areas are also shown as part and parcel of the village concerned.

Column 3 : Total area of the village (in hectares)

The total geographical area of the village as per revenue records is furnished in hectares up to two decimal places. In Karnataka the basic records are still maintained in acres and guntas or acres and cents that is the units of measurements which were first adopted at the time of the cadastral survey. After the introduction of the decimal system however the equivalents of these figures are also indicated in addition to the already existing entries in registers such as Akarband and Records of Rights. The area of each Survey number or part thereof is converted into hectares and ares and square yards too in some cases. Thus if these converted figures for each such small unit are added together for the village the resultant total area would normally be either less or more than the corresponding figures that one would derive by the addition of figures in acres - guntas/

acres and cents and conversion of that into hectares and ares. For purposes of presentation in this statement the village level area and land use figures which were furnished in acres-guntas or acres-cents by the Revenue Officers have been converted into hectares and ares and these figures may not therefore be identical with the area as may be found entered in hectares and ares in the records of some of the villages. The marginal differences would be due to the factors explained above. Further, in the case of villages of which certain portions are incorporated into an urban area the extent thus categorised as urban has been deducted from the total geographical area of the revenue village and for this reason the particulars presented here would not be in full correspondence with the total area of that revenue administrative unit as mentioned in the village records. If area figures are not available for any village the abbreviation 'N.A.' is entered in this column and a note at the bottom of the page explains the reason thereof also.

Column 4 : Total Population and number of households :-

The total population of the village according to 1981 census and the number of households therein are indicated in this column. In the case of villages with no inhabitants i.e. nil population, the word un-inhabited is written across the line.

Columns 5 to 10 : Amenities available (if not available within the village, a dash may be shown in the column and next to it in brackets, the distance in broad ranges, viz.-5 Km, 5-10 Km and 10+ Km of the nearest place where the facility is available may be given):-

As the main heading for these columns suggest if the basic amenity covered under any of these columns were to be not available within the village then, instead of simply stating that fact, an attempt is made here to indicate the minimum distance (in ranges) that one has to cover to avail oneself of that specific facility located in a nearby village or a town. At the data collection stage the name of such nearest place having that amenity as also the distance thereto from the referent village have been ascertained to ensure a higher degree of reliability in reporting. The abbreviations made use of in these columns are explained below column by column.

Column 5 : Education :-

All types of educational institutions functioning in the village irrespective of the levels of education offered, the medium of education and the status of the managing body are considered under this column. The abbreviations used to denote institutions with different levels of education are :

i) P : Primary or Elementary School :

Schools providing education form I standard and upwards upto and inclusive of IV standard are classified as Primary Schools. This would also include junior basic schools if any.

For purposes of reporting, schools which provide education not merely from I to IV but also for higher standards, called composite schools for easy reference, are split up into different levels of education and counted as an independent unit under each such level.

ii) M : Middle or Junior Secondary School :-

Schools providing education from V standard and upwards upto and inclusive of VII standard and classified as middle schools. In Karnataka as a matter of fact the term middle school is no longer in vogue. Primary education itself consists of seven years of schooling and the first four year duration of this course is called Lower Primary and the next 3 year period is termed as Higher Primary. As mentioned above a Higher Primary School with I-VII standard is treated as two units i.e. one Primary School and one Middle School for accounting purposes.

iii) H : Matriculation or Secondary School :-

Schools providing education from VIII standard and upwards upto and inclusive of X standard are classified as High Schools. A composite school with I - X standard is treated as three separate units and counted separately under the category of Primary, Middle and High School.

iv) PUC : Higher Secondary/Intermediate/Pre-university/Junior College :-

Schools and colleges that provide education for the XI and XII standards or as is more common in Karnataka for the I and II year of the Pre-University Course, fall under this category. There are Higher Secondary Schools with VIII standard and upwards covering the XII standard and on the other hand there are also degree colleges which provide education for PUC I and PUC II year. These composite units are as explained earlier, split up into different levels for reporting purposes.

v) C : College :

This would cover all educational institutions that provide post PUC level education leading to University degree in any subject or combination of subjects, and also post-graduate levels of education.

vi) I : Industrial School :

Industrial Schools if any in the villages are indicated by the abbreviation 'I'.

vii) TR : Training School :

All types of Institutes that provide vocational and professional training are covered by this abbreviation.

viii) AC : Adult Literacy Class/Centre :

This abbreviation is recorded in this columr only if adult literacy classes were being conducted regularly in the village during the reference year.

ix) O : Others :

All other types of educational institutions such as Sanskrit Pathasala, Urdu Madarasa, Makhtab etc., are included in this residuary category.

It is important to note that in this column whenever the number of institutions of a particular level or class exceeds one, only then the actual number is also reported immediately after the relevant abbreviation within brackets. That is to say the mere presence of an abbreviation without any numerical attribute signifies the existence of the facility,

in at least one institution for which that abbreviation stands. The numerals indicate the number of institutions or units of that level or type.

As explained already if a village does not have any educational institution whatsoever then a dash (-) is entered and thereafter, within brackets, the minimum distance that one has to cover to avail oneself of the primary level of educational facility is indicated. The emphasis here is on the most basic need i.e., the minimum level. In other-words, if the village has primary school, but not middle school or high school then no further information is furnished in respect of the proximity of a middle school and upwards. Similarly for a village with primary and middle schools but no high school or a college no further information is furnished in respect of the proximity of high school and college level facilities.

It may again be recalled that the concept of village covers the entire revenue jurisdiction of that unit and includes all the hamlets i.e. human settlements located therein.

Column 6 : Medical :-

The abbreviations used to denote the existence of medical institutions of different types in the village are :

H : Hospital
MCW : Maternity and Child Welfare Centre
MH : Maternity Home
CWC : Child Welfare Centre
HC : Health Centre
PHC : Primary Health Centre
PHU : Primary Health-Unit
D : Dispensary
FPC : Family Planning Centre
TB : T.B.Clinic
NH : Nursing Home
RP : Registered Medical Practioner
SMP : Subsidised Medical Practitioner
CHW : Community Health Worker
O : Others

If the number of institutions of a particular type happens to be more than one then that number is also indicated immediately after the relevant abbreviation.

If the village does not have any medical facilities whatsoever then the minimum distance that one has to cover to secure the minimum level of medical facility is indicated here in distance ranges.

The abbreviation H which stands for hospitals implies the availability of facilities for the treatment of in-patients also. In several Primary Health Centres also such facilities do exist. Likewise Maternity Homes also entertain in-patients but then these are confined only to maternity cases. This apart in all other cases except private nursing homes arrangements exist for the treatment of out-patients only. In local parlance in certain areas however even a dispensary is referred to as a hospital and the clinic run by a private medical practitioner as a dispensary and a private nursing home as a hospital. This indiscriminate usage at times leads to confusion and in view of this every attempt has been made to eliminate such reporting errors.

All types of medical institutions, irrespective of the system of medicine practised therein are covered under this colum without any attempt to provide a further break up by systems of medicine.

About the Community Health Worker it may incidentally be mentioned that it does not refer to workers' in extension programmes like Malaria Surveillance Workers, Basic Health Worker, Auxiliary Nurse Midwife etc., but refers only to the paramedical personnel who have been specially trained for dispensing medicines for minor ailments at the doorsteps of the patients. This is an altogether new scheme and has not been introduced in Karnataka.

Column 7 : Drinking Water :-

Following are the abbreviations used to indicate the different sources of drinking water that are available in the village. These sources of drinking water supply may be public property or may even be owned by private persons and institutions. If there are two or more sources then all these sources are mentioned one after the other but separated by commas.

T : Tap
W : Well
TK : Tank
TW : Tube Well
HP : Hand Pump
R : River
F : Fountain
C : Canal
L : Lake
S : Spring
N : Nallah/Stream
O : Others
NA : Information not available

If the village does not have any source of drinking water supply at all then, after a dash in this column, the distance range that one has to traverse to reach the nearest place with drinking water facility is indicated.

Column 8 : Post and Telegraph :-

In this column information on the availability of postal, telegraph and telephone facilities in the village is furnished using the following abbreviations.

PO : Post Office
TO : Telegraph Office
PTO : Post and Telegraph Offices
Phone : Telephone connection

Telephone connection need not necessarily indicate the availability of a public call office in the village, for even private telephone connections to subscribers have been taken into considerations while filling up this column. If a village has postal as well as telephone facilities then both these amenities are mentioned. Likewise if there is a PTO and telephone connection then both the abbeviations are entered in this column. On the otherhand if the village is not having any of these facilities then a dash is noted and next to it the distance to the nearest place having the minimum facility of a post office is indicated in ranges.

Column 9: Day or Days of the Market/Hat :-

This column refers to the weekly, bi-weekly markets i.e., the weekly shandy, held in villages with a view to cater to the needs of that village

and more so to the needs of the inhabitants of several surrounding villages. In local terminology such a weekly market is called Santhe and is quite popular in Karnataka. In the case of villages which host such shandies the actual day on which the shandy takes place is mentioned and in all other cases a dash is entered and thereafter the distance to the nearest place with a weekly market is indicated in ranges as specified in the column heading. The place where such weekly market gathers may be located in the limits of an adjoining taluk or district. The important matter for consideration here is the geographical proximity. In some cases where the nearest town or a large-sized village with a permanent market would serve the needs of the villagers, the distance ranges refer to such places with permanent markets only. In such cases obviously the nearest place where a weekly market is held would be very far away and will not be a matter of much significance.

Column 10 : Communication :

For purposes of this column only the means of public transport namely bus, railway and water transport system if any are considered. If the village is served by any mode of such public transport the fact is indicated using the undermentioned abbreviations :

BS : Bus
RS : Railway Station
NW : Navigable Water way (including river, canal, backwaters)

If a bus stop or a railway station is located within the territorial jurisdiction of a village then that villagae is considered as being served by that facility even if that bus stop or railway station is somewhat solitary and is located at some distance from the village-site. If more than one type of communication facility is available then all the relevant abbreviations are mentioned in this column. If no such facility is available at all then a dash is entered and thereafter the distance to the nearest place with a communication facility is indicated in ranges.

Column 11 : Approach to village :-

By approach to village is meant the type of road that leads to the village and this would indicate whether the village is accessible throughout the year or only during the fair season. The abbreviations used in this column are :

PR : Pucca Road
KR : Kachcha Road
NR : Navigable River
NC : Navigable Canal
NW : Navigable Waterway other than river and canal if any
FP : Foot path/Bridle path

If a village has a foot path or bridle path and also both pucca road and kachcha road then, only PR is recorded in this column as it would denote a higher level of facility of the same type. While kachcha road refers only to the unsurfaced mud road the term pucca road covers tar roads, cement roads water bound mecadum roads and metalled roads. But if in addition to either PR or KR the village has a waterway then information on the availability of a water way is also indicated.

Column 12 : Nearest town and distance :

The name of the nearest town, that is any urban area as defined for purposes of the 1981 Census, and the distance thereto from the village are indicated in this column. The town mentioned here need not be located within that very taluk or the district or even the State for that matter. The main point for consideration here is the geographical proximity. The distance however is reckoned not as a 'crow flies' but by some land route or water way. Further, when there is a cross country foot-path or a cart-track and a little more circutious road from the village or its proximity to the town then the distance by road is reported here in preference to the distance by foot-path or cart track. Similarly, when there are natural hurdles like unbridged rivers or streams the distance is furnished by the more circuitious route that the villagers would usually prefer. The information on distance is based on local enquiry by the reporting agency. If the town mentioned in this column belongs to another state then the name of that state is also indicated along with the name of the town and distance thereto.

Column 13 : Power Supply :-

If the village is electrified, that is if power is actually available, whatever may be the form of its use, then the village is regarded as enjoying this amenity of power-supply. If the supply is expressly restricted for say agricultural or any other specific purpose then this point is clearly stated by using a specific abbreviation. On the other hand if electricity is being supplied for all purposes without any reservations then information on various purposes is not separately mentioned. The abbreviations used in this column are :

ED : Electricity for domestic purpose only
E.Ag : Electricity for agricultural purposes only
EO : Electricity for other purposes like industrial, commercial etc,
EA : Electricity for all purposes stated above.

Column 14 : Staple Food :-

Information on the staple food i.e. the cereals used by the majority population during the major portion of the year is furnished under this column. It may incidentally be mentioned here that no probing enquiries have been made to ascertain the exact situation in each and every village and that the details presented here are of a general nature. In several cases when it is not possible to determine, the particular staple cereal, a combination, of major staple foodgrains is given.

Columns 15 to 19 : Land use (i.e. area under different types of land use in hectares up to two places of decimal) :

The Ministry of Food and Agriculture, Government of India has recommended to the State Governments the following classifications of land use pattern for the maintenance of records and for

purposes of presentation here the same classification model has been adopted.

1. Forests,
2. Not available for cultivation,
   a) Lands put to non-agricultural uses,
   b) Barren and unculturable lands
3. Other uncultivated lands excluding fallow lands
   a) Permanent pastures and other grazing lands,
   b) Lands under miscellaneous tree-crops and groves not included in the net area sown,
   c) Culturable wastes
4. Fallow lands :
   a) Fallow lands other than current fallows,
   b) Current fallows
5. Net area sown.

Column 15 of the Village Directory corresponds to category 1 i.e., forest, while columns 16 and 17 put together represent the cultivated lands and correspond to the combination of categories 4 and 5 above. Similarly columns 18 and 19 respectively correspond to categories 3 and 2 of the above classification. The data furnished here are based on the village records and pertain generally to the year 1979. The total of the area figures reported under these columns tallies with the total geographical area of the village as noted in column 3.

Column 15 : Forest :-

This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests whether State - owned or private and whether wooded or simply maintained as potential forest land. Lands transferred to forest department for afforestation as also the class C and D lands transfered thus by the revenue department are also classified as forests. Within the forest area itself there may ocassionally be cultivated patches or else there may be grazing lands. But such areas too are shown under column 15 only as forests. If within an area classified as forest some specific extents of lands have been expressly assigned for regular cultivation and the records have not been set right pending formalisation of grants and related processes of survey and settlement then such cropped areas are shown under column 16 or 17 as the case may be and the remainder alone is shown as forest under column 15. The processes of regularisation of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information merely based on records is, in some cases at least, likely to be different when compared with that based on the actual field situation.

Columns 16 and 17 : Irrigated (by source) and Unirrigated :-

These two columns cover all the agricultural lands and when added together would correspond to the net area sown plus the current and other fallows. The latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. All lands that are lying uncultivated as fallow for more than 5 years in succession are regarded as permanent fallows i.e., culturable waste and are covered under column 18. Area sown more than once during the same year, if any in the village, is counted only once under these columns. In column 16, a sourcewise break up of the irrigated area is furnished using the following abbreviations :

GC : Government Canal	TK : Tank
PC : Private Canal	R : River
W : Well(without Electricity)	L : Lake
WE : Well (with Electricity)	Wf: Water fall
TW : Tubewell (without electricity)	O: Others
TWE : Tubewell(with electricity)	T: Total

The concept of irrigation implies the existence of a source of water supply within a reasonable distance and an arrangement to regulate the supply of water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas that are cultivated under purely rainfed conditions are treated as unirrigated. Though paddy is generally regarded as a wet crop, if it is raised purely as a rainfed crop as it very often is the case in heavy to very heavy rainfall regions, such areas are regarded as unirrigated for purposes of this column and shown under column 17. Similarly about garden crops, the area is considered for column 16 only if there is an element of irrigation. Sometimes it happens that the lands shown as dry and rainfed in the settlement records are in actual fact having irrigation facilities due to recent changes such as sinking of wells, introduction of lift irrigation or canal irrrigation on commissioning of a project etc. In such a case the actual situation is taken note of and despite its classification as rainfed in the records the area concerned is treated as irrigated Though rare, the opposite situation (where a plot of land originally shown as irrigated has ceased to enjoy that facility and is now yielding purely rainfed crops) is also met with and such a situation arises due to reasons such as breaching of tanks, drying up of irrigation wells and small tanks, defunct canal system and so on. The reporting agency has generally assessed the actual situation prevailing during the reference year 1979 while furnishing the data on irrigated lands. Regarding canal irrigation too it is the actual irrigated area and not the command area that has been reported here.

In column 17 the total extent of unirrigated lands, that is, dry lands cultivated as rainfed fields and the fallow lands put together is reported. As explained above, lands yielding rainfed paddy crop are considered as unirrigated.

Column 18 : Culturable Waste (including gauchar and groves):-

This category includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the past five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed or unassessed and may be in isolated blocks or within cultivated holdings. Lands under thatching grass, bamboo bushes and other groves which are not included under orchards or forests are also included under this category. Further, this includes all grazing lands irrespective

of whether they are permanent pastures and meadows or not. In several instances, lands that were at one time reserved for use as grazing fields and pastures and declared as assessed or unassessed wastes have over a period of time been brought under cultivation either fully or in parts as a result of gradual encroachments and also because of the Government policies regarding land grants. Thus, though in the records, the particular plot of land continues to be shown as a pasture the actual field situation would reveal that most of that land is actually under cultivation. In all such cases, to the extent possible, the actual field situation has been taken into consideration by the reporting agency.

Column 19 : Area not available for cultivation

In this column the total extent of land which is not available for cultivation in view of its being barren and unculturable as also that which is put to non-agricultural uses is reported. Mountains, deserts, rocky hills, quarries, ravines and the like as well as the lands that cannot be brought under cultivation except at a very high cost are included in the category of barren and uncultivable lands. The category of lands put to non-agricultural uses covers all lands occupied by buildings, roads, railways, parks and playgrounds, area under water viz., rivers, streams, canals, reservoirs, tanks, ponds etc., and land put to any other use which is apparently non-agricultural.

Column 20 : Remarks including any place of religious, historical or archaeological interest :-

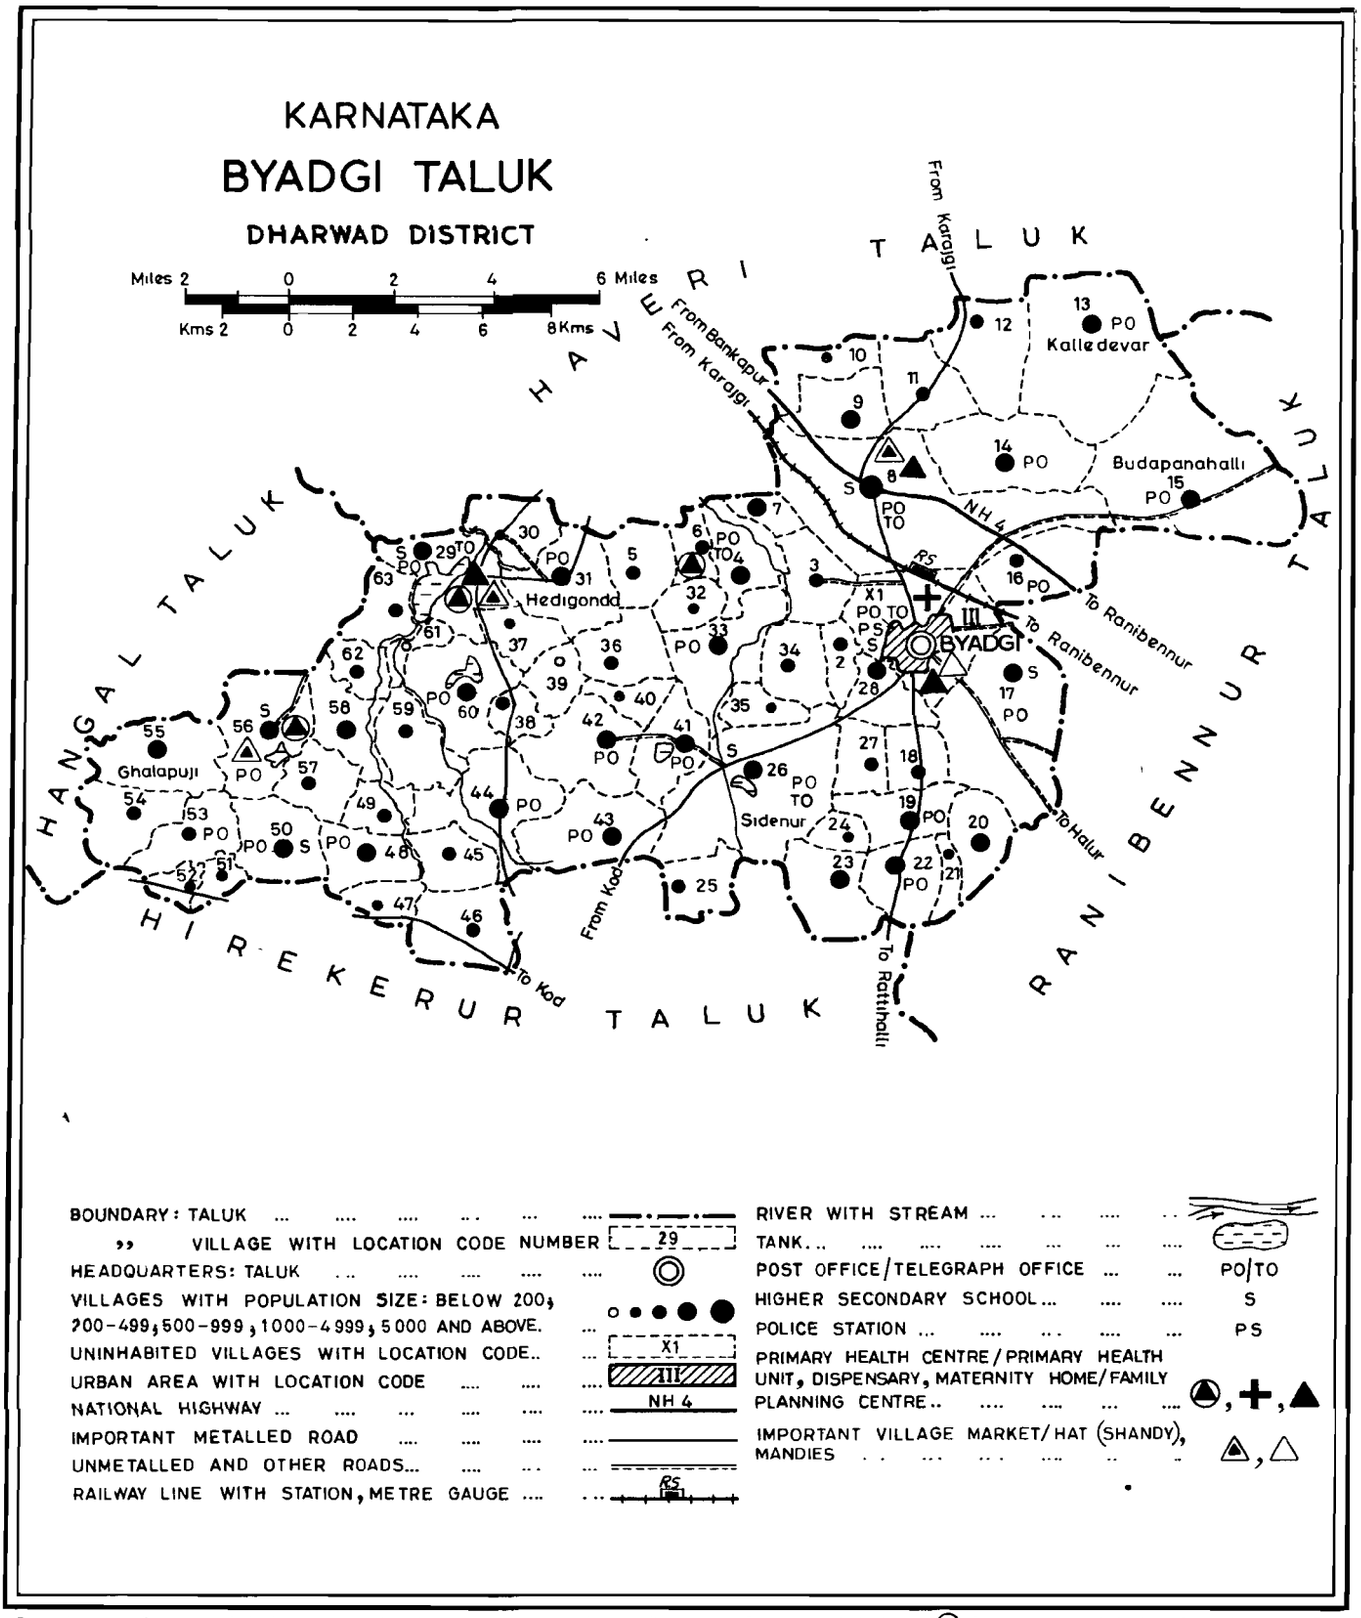

Though the heading does not reveal, in this column, information of general interest has been provided by reporting the number of news - paper copies circulated in the village, number of motor cycles and scooters, number of cars and jeeps as well as the number of tractors available in the village. The following abbreviations are used :-

N : Newspaper copies circulating in the village
M : Motor cycles/Scooters available in the village
C : Cars/Jeeps available in the village
T : Tractors available in village

Immediately after the abbreviations the number of units is indicated to provide a quantitative index to the data furnished. If in a village there is nothing to report on this topic i.e., on any one or more of these items, then the concerned abbreviations are not entered at all. In other words, the abbreviation if found mentioned in this column is always followed by a numerical attribute.

It is necessary to note at this juncture that the information is based on what may be regarded as superficial oral enquiries by the reporting agency and may therefore be considered as a rough estimate at a given point of time i.e. during the year 1979-80. In this column a numerical reference has also been given along with the abbreviation A in respect of the notes, provided elsewhere in the volume, about villages having matters of particular religious, historical or archaeological interest to report. Such notes have generally been prepared on the basis of published material.

revenue villages of Ankadkhan, Munavalli and Narayanpur. The boundaries are all merged though the names are in vogue. The houses in these 3 villages as also those in Ankadkhan and Kottigeri are almost contiguous and the entire complex bears the name **Bankapura** which is regarded as a town in the local parlance and was classified as a Census town also well from 1901 to 1951.

* Note This town spreads over two taluks of Dharwad and Hubli

SECTION II - TOWN DIRECTORY

TOWN DIRECTORY

EXPLANATORY NOTE

Town Directory comprises of six tabular statements as applicable to all the towns and an additional statement regarding the slums, only in respect of towns with a population of 50,000 and above. These are numbered serially from I to VI and the additional statement bears the number IV A in view of the fact that it deals with the same type of information which is covered in statement IV. These statements contain several columns each with brief headings and for presentation of the data, abbreviations have also been made use of for the sake of brevity. These statements are taken up for consideration one by one and an explanatory note is given in respect of each column, with the exception of column 1 which refers to Serial Number and is self-explanatory.

Statement I : Status and growth history

Column 2 : Class, Name and Civic Administration Status of town :-

The class to which a town belongs is determined on the basis of its population at the 1981 census count and it is indicated in this column in roman numerals. The classification criterion adopted now is the same as that adopted for analysis and explanations at the earlier censuses. The towns are divided into six classes :-

Class	Population Size	Class	Population Size
I	100,000 and above	IV	10,000 to 19,999
II	50,000 to 99,999	V	5,000 to 9,999
III	20,000 to 49,999	VI	Below 5,000

The concept of urban agglomeration has been adopted for presenting the demographic data at the 1981 census also. But, in Karnataka, unlike in 1971, at this census quite a large number of villages have been recognised as out-growths of the core town or of one of its contiguous constituent towns. In determining the class however, the population of the core town alone is taken into consideration in these cases also. That is to say, the population returned by the geographical entity recognised as a census town, on the basis of the definitions adopted, alone is considered for this classification.

The middle component of this column heading refers to name of the town which does not need elucidation. Name of the town, as adopted in the official records, is reported here.

The civic administration status of the town as on 1.1.1980 is indicated immediately after the name of the town, within brackets. The abbreviations used for this purpose are as follows :-

C : Municipal Corporation
M. : City Municipal Council
M : Town Municipal Council
CB : Cantonment Board
NAC : Notified Area Committee
SB : Sanitary Board
TP : Town Panchayat/Nagar Panchayat
P : Village Panchayat/Gram Panchayat
SA : Special Area

The Special Area in fact represents a case where there is no civic administrative body. These areas generally consist of townships or colonies purely under the administrative control of certain public sector factories or undertakings or under specific departments of the Government such as for example the State Public Works Department and the Power Corporation.

With a view to ensuring the fixity of boundaries of various administrative units, that is to ensure that the frame for census taking once finalised with reference to a cut-off date remains unchanged till the completion of the census count the State Government had been requested not to order any jurisdictional changes and not to give effect to any changes in the civic administration status either. However due to more compelling reasons it is quite possible that in some exceptional cases such a change in civic administration status has taken place during the period 1.1.80 to 1.3.81. Such cases if any are indicated by providing a note at the bottom of the concerned page.

Column 3 : Location Code Number :-

The significance as well as the importance of location code numbers has already been explained. Every town bears a distinct location code number consisting of 3 elements. The first element in this code structure indicates the State while the second and the third represent the numbers assigned to the district within the State and the town within the district. The numbers assigned to the towns in the district are all in roman numerals while those relating to the State and the district are in arabic numerals.

column 4 : Name of taluk :-

In Karnataka the term taluk is very much in vogue though the designation of the Revenue Administrative Officer has for long been changed from Amildar or Mamlatdar to Tahsildar. The name of the taluk within the jurisdiction of which the town is located is indicated in this column. There are a few instances wherein a particular town straddles portions belonging to two adjacent taluks. In such a case the town is considered to belong to the Taluk that contains a major portion of the town.

In the statement such cases are marked out by an index and a note at the bottom of the page explains the correct situation.

Column 5 : Area (Sq. Kms) :-

The geographical area of the town is furnished here in square kilometres upto two places of decimal. The area figures reported at first by the concerned civic bodies etc., were examined with reference to the respective town boundary notifications and the relevant village maps as well as the charge maps prepared for the 1981 census operations with a view to ensuring greater accuracy. The final area figures as adopted for the 1981 census are reported here.

Column 6 : Number of Households (1981) :-

The total number of households, including those consisting of institutional and houseless population, enumerated in the town at the 1981 census count is given here even though the same information appears again in the Primary Census Abstract. The purpose is to facilitate a better comprehension of the demographic situation, especially with reference to the population data presented in this statement.

Columns 7 to 15 : Population and growth rate of the town at different censuses from 1901 to 1981 :-

The population figures for the town as returned at the decennial census from 1901 through 1981 are furnished under these columns in order to provide an insight into the history of growth of the town. If in any particular census year the referent town did not enjoy the urban status that is if that place was reckoned as a village for that census its population is not reported under the column concerned and a dash mark is indicated instead. In other words, the population figures are given here for the town only if it happened to be an urban area at that particular census year.

Thus, a glance at these columns reveals whether the referent town having been first classified as 'urban' has maintained that status continuously through the suceeding censuses or whether there have been subsequent declassifications. From column 8 onwards, the decadal growth rates of the town are indicated within brackets below the population figures in order to permit an easier grasp of the decadal growth trends and to facilitate a comparative analysis. Population variations are quite often associated with changes in the jurisdiction of the urban area and sudden spurts are sometimes due to incorporation of fast developing fringe areas to the town or amalgamation of adjacent towns with the core town during the inter censal period. Such cases are marked out in the statement and explained by way of a note at the bottom of the concerned page.

Column 16 : Density (1981) :-

For every town the density of population per square kilometre is presented in this column. The density figures are determined with reference to the area of the town in Sq Km upto two decimal places and the population returned at the 1981 census.

Columns 17 to 19 : Sex Ratio 1961 to 1981 :-

Sex ratio is expressed as the number of females for every thousand males and is based on the sexwise distribution of the population returned at the census. For each town these figures are furnished for the 3 successive censuses. This information would provide an insight into the changing pattern of sex ratio in urban areas.

Statement II : Physical aspects and location of Towns 1979

Column 2 : Class and Name of Town :-

This column is the same as column 2 of Statement I and does not need any explanation. Unlike in statement I here the civic administration status of the town is omitted.

Columns 3 to 5 : Physical aspects :-

These columns deal with the rainfall and temperature data. It is common knowledge that meteorological observatories have not been established in each and every town, even though most of the towns do have rain-guages and due arrangements have been made to record the rainfall data all through the year. The Director General of Observatories has furnished data on rainfall, maximum and minimumitemperature in respect of towns having observatories. These figures are standard normals based on the data for 30 years from 1931 to 1960, and are distinguished in the statement by placing an asterisk mark at the top right hand side of the figure. Information of this type is available only for a few towns.

In so far as the data on rainfall is concerned, for most of the remaining towns the particulars have been supplied by the local officers and cross-checked for acceptability with the data furnished by the State Bureau of Economics and Statistics. The rainfall figures are in millimetres and represent the annual average based on the actual figures relating to the preceding ten years. In cases of non-availability of even this type of information, the particulars relating to the nearest town are reported under this column with the distinguishing notation N being placed at the top right hand side of the figure.

In columns 4 and 5 information on temperature is presented in degree centigrade. As stated above the asterisk mark here indicates that the information has been furnished by the Director General of Observatories. Such information is not available for most of the towns. Instead of putting a dash in these columns for such towns the data furnished by the Director General of Observatories as pertaining to a town situated at almost the same altitude and in the proximity of the referent town are reported with the substitute notation N to denote that the data does not actually relate the town and should therefore be regarded as very approximate.

Columns 6 to 12 : Name of and road distance from State H.Q; District H.Q; sub-division/Taluk H.Q; nearest city with a population of 100,000 and more; Railway Station; Bus route Navigable river or Canal (if within 10 Kms) :-

The column headings are self explanatory and are intended to indicate the location of various important centres with reference to the town concerned. If the referent town itself happens to be mentioned in these columns the distance is recorded as '0' (zero) and in all other cases the road distances are given in kilometres. In column 8 the name of the sub-division to which the taluk (in which the town is located) belongs as well as the name of the taluk to which the town belongs are mentioned along with road distances in the same order one below the other. In column 9 the name

of the nearest city with a population of 100,000 and more according to 1981 census and road distance thereto is mentioned in respect of each and every town even if the referent town itself has a population of 100,000 and more.

The proximity by road alone is taken into consideration for filling up this column and as such cities belonging to adjacent states also find an occasional mention in this column.

Column 10 refers to the nearest railway station and distance thereto by road. In a few cases though the name of the railway station is the same as that of the referent town the distance indicated is other than zero because of the fact that the station is actually located beyond the jurisdiction of the referent town.

In case the referent town is enjoying bus route facility (i.e.road transport) the name of the town is mentioned in column 11 and the distance is recorded as zero. Names of bus routes passing through or originating from the town are not indicated here. If there is a navigable river or a navigable canal at a distance of 10 kilometres or less from the referent town then the name of the river or the canal is indicated in column 12. To differentiate between a river and a canal the abbreviations (R) and (C) are made use of and the distance from the town to the navigable waterway is mentioned thereafter. It may incidentally be stated that in Karnataka there are very few navigable rivers and practically no navigable canals.

Statement III : Municipal Finance 1978-79

As the title denotes, this statement deals with the actual income and expenditure of the civic body administering the town. An attempt has been made to present comparable data in the case of non-municipal towns like Panchayats and areas under the administration of public sector undertakings and the like. The data relate to the financial year 1978-79 and have been furnished by the local authorities concerned based on relevant records. It may also be stated here that no probing enquiries have been made and the particulars as reported by the civic bodies have been accepted after ensuring arithmetical accuracy.

Colum 2 : Class and Name of Town :-

This is same as column 2 of Statement II and as such does not require any explanation.

Column 3 : Civic Administration Status (In 1980)

As explained under column 2 of Statement I, the civic administration status of the town as on 1.1.80 is indicated in this column using the same set of abbreviations.

Columns 4 to 10 : Receipt (In Rs. '00) :-

The actual receipt realised by the civic body under various heads of income as well as the total for the year 1978-79 are indicated in hundreds in these columns. The opening balance for the year is not taken into account under any of these columns.

Columns 11 to 17 : Expenditure (In Rs. '00) :-

The actual expenditure incurred during the year is furnished here in hundreds. The various heads of accounts are grouped into 6 broad categories for each of which a separate column is provided. Public safety covers the expenses incurred for road lighting, destruction of rabid and stray dogs, besides that on fire fighting services, Similarly 'public-institutions' covers not merely the contributions made by the civic body to educational, medical and cultural institutions in the town but also the expenditure incurred for the maintenance of educational and such other institutions if any functioning under its direct control.

As in the case of receipt in the case of expenditure also the closing balance at the end of the year is not considered and therefore in almost all the cases the total receipt and the total expenditure are not balanced in this statement.

Statement IV : Civic and other Amenities 1979

Column 2 : Class and Name of Town :-

This is same as column 2 of statements II and III and does not need further explanation.

Column 3 : Civic Administration Status :-

Explanation furnished earlier for column 2 of Statement I and column 3 Statement III holds good for this statement also.

Column 4 : Population :-

The total population of the town according to 1981 Census is mentioned here with a view to facilitate a comparative analysis of the data.

column 5 : Road length (In Kilometres) :-

Generally in a town it is the civic authority that is responsible for construction and maintenance of roads. The term road as used here includes streets also and while the unsurfaced mud and gravel roads are categorised as Kachcha roads, the surfaced roads are classified as Pucca roads. In most of the cities and towns the district roads and highways under the control of the Public Works Department also pass through. The roads situated within the jurisdiction of the town and under the control of the civic authority are shown in one line against the code M and those under the control of the Public Works Department and the like are shown against the code 'PWD' in another line. In both the cases the road length is shown under two categories viz., KR (Kachcha Road) and PR (Pucca Road) as defined above. In order to have an idea about the total length of all types of roads in the town, therefore all these figures are to be added together. In cases where it has not been possible to ascertain the full details by type of road and agency responsible for maintenance the combined road length alone is furnished. The road length is given in kilometres and fractions are rounded off to next integer.

Column 7 : System of Sewerage :-

Generally sewerage system implies the network of mains and branches of underground conduits for the conveyance of sewerage to the final point of disposal. Sewers that carry only household and industrial wastes are called separate sewers while those that carry storm water from roofs, streets and other surfaces are known as storm water drains and those carrying both sewage and storm water are called combined sewers. In towns provided with such systems of underground sewerage also there would in addition be a surface drainage system to

cover the areas not served by sewerage system and also to drain out excess rain water all over the town.

However in towns that are not provided with sewerage system and such towns are far more numerous in the State, there would generally be open drainage system. Where even this system is not prevalent the householders would have made their own arrangements such as soak pits and cesspools. In this column therefore information is presented not only on sewerage system, but also on the drainage system. Like sewerage system, the drainage system is also of different types depending upon the construction material and also the shape of the drains. The two most important types of sewerage/drainage system are reported under this column in the order of their importance in the towns using the following abbreviations.

S : Sewers
OSD : Open Surface drains
BSD : Box Surface Drains
SD : Sylk pattern Drains
PT : Pit System

The box surface drains are also open drains but are built of size stone masonry and are also called Pucca gutters. The sylk pattern drains too are open surface drains only. The open surface drains category thus covers the Kachcha drains involving mere earth-work and also the drains constructed from out of oblong granite slabs or, out of pre-fabricated cement concrete blocks which need only joining and cement pointing after being placed in position. These drains are of U shape, L shape or V shape and to the extent possible these details have also been provided under this column.

Columns 8, 9 and 10 : Number of Latrines :-

Information on total number of latrines of different types as furnished by the concerned civic authorities is reported under these 3 columns. Both private and public latrines are covered here and the particulars in these columns and in column 11 are closely interlinked. The water-borne latrines include all types of flush-out latrines while service latrines refer to only those that are being serviced by manual scavengers either everyday or twice or thrice a week.

Column 11 : Method of Disposal of Night-Soil :-

The phrase disposal of night-soil is generally presumed to refer to the manner in which the garbage is finally disposed of by the civic body i.e. sale by public auction, used as manure etc. However, the main purpose of this column is to provide information on the method by which the night-soil is removed from the latrines, that is, the primary disposal of the human waste. A little elaboration on this aspect therefore appears to benecessary.

There are three systems of disposal of human waste, namely, (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cisterns (or hand flushing).

Through this sewer the faceal matter is transported without the need for scavenging. This system generally exists in cities and large towns besides industrial townships built and controlled by public sector undertakings and large companies and the like. Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Where the liquid wastes from the water closet could be disposed of locally in a leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which render the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleared at periodic intervals by a suitable device. The dry type latrines are of service type from where the human excreta has to be removed by scavangers who move from house to house, in most cases carrying the night-soil as head loads on their head, or shoulders or in baskets with handles or in wheel barrows. This waste is then collected in bullock carts or trucks and transported to dumping grounds at the outskirts of the town.

It may be mentioned in passing that in Karnataka the practice of carrying night-soil by head loads has been discontinued with effect from 15.8.73, consequent on the issuance of a Government order in this behalf. However in a few cases the town dwellers have sought the intervention of the courts and have been able to secure the status quo-ante in respect of the scavenging services that were being provided by the civic body concerned till that date.

The abbreviations used in this column are the following, and if more than one system is prevailing the two most important types are indicated one after the other :

S : Sewerage
ST : Septic tanks
WB : Wheel Barrows
B : Baskets (with handles)
HL : Head Loads

In case the town has latrines of other types that are neither of the sanitary type nor the service type this column does not apply at all and therefore a dash is entered.

Columns 12 and 13 : Protected water supply source and capacity of storage system

The sources of water supply in the town are indicated by using the following four abbreviations :

T : Tap
W : Well
TK : Tank Water
TW : Tube Well/Hand Pump

Supply through the taps implies a primary

source such as a river, stream, bore wells, curb-wells, tank and reservoirs etc., which are of course not mentioned in this column. It may be incidentally stated that the term protected is used in a very liberal sense, and no attempt has been made to gather data on the methods of filteration and water purificatory treatment if any resorted to by the agency supplying water through pipes in the towns. The generally prevalent pratice in most of the towns is to pump raw water into the storage tank or reservoir, treat it with bleaching powder and then distribute that water for consumption through pipes.

If there are more than 2 sources of water supply in the town the first two which are regarded as most important are mentioned in that order separated by a comma. In column 13, the systems of storage of water are considered and the two that are most important in the referent town are indicated in that order and after each entry the storage capacity is also mentioned in litres within brackets. The abbreviations used in this column are :

OHT : Overhead Tank
SR : Service Reservoir
IG : River Infilteration Gallery
BWP : Borewell Pumping System
PT : Pressure Tank

The term capacity has its usual meaning, namely, the capacity to store or contain. It may further be clarified that the storage capacity does not necessarily indicate the quantity of water supplied daily to the inhabitants of the town. In some of the towns due to the inadequacy of water supply at the primary source for most part of the year the normal utilisation of the storage capacity would be of the order of 50 to 60 per cent only. On the contrary there are towns where water is pumped into the storage system and also distributed for consumption twice every day almost throughout the year and there are a few towns where the inlets and outlets of the storage systems would both be functioning simultaneously for most part of the day making it somewhat difficult to calculate the quantity of water supplied everyday under such a system.

column 14 : Fire Fighting Service :-

If fire fighting service is available in the town this fact is indicated by the word 'Yes' recorded in this column. In all other cases the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where such services are available is indicated along with the road distance in kilometres between the referent town and the place with fire-fighting service.

Columns 15 to 19 : Electrification (Number of connections)-Domestic, Industrial, Commercial, Road Lighting (Points) and others :-

In columns 15 to 19 information about the number of electrical connections (installation) for different categories of consumers in the town is furnished. The definitions of the terms used in the column headings are as follows :-

(i) Domestic : Connections to residential houses, bangalows, clubs, hostels and hospitals run on non-commercial lines, charitable, educational and religious institutions are all included in the domestic category, A.E.H. i.e., All Electric Home connections are also categorised as domestic.

(ii) Commercial : This category includes all connections for the supply of electricity to commercial establishments such as wholesale and retail shops, offices and business houses, hotels, resturants, tea stalls, photographic studios, X-ray installations, advertisements and exterior illumination, railway station, bus station, and the like.

(iii) Industrial : Power supply connections to industrial establishments are covered under this column. This would include small establishments such as power looms, flour mills, roasting, grinding, wet grinding, repair workshops using power operated tools and the like.

(iv) Road Lighting : The total number of street lights being maintained in the town is mentioned here.

(V) Others : Connections to all categories other than those cited above are covered under this heading. This would include temporary connections, connections to pumpsets, water works and such other installations.

Statement IV A : Civic and other Amenities in Notified Slums, 1979

This statement which may be regarded as an appendix to statement IV is confined to towns with a population of 50,000 and more i.e., Class I and Class II towns. Information on slums that are officially recognised as slums (even if those are not notified in some cases) is presented under 14 columns apart from column 1 which relates to serial number and column 2 which relates to name and class of town.

Column 3 : Name of slum :-

The names of slums, if any, in the town are given in separate lines in the alphabetical order of their names.

Column 4 : Area of slum :-

The geographical area of each slum is given in square kilometres up to two plaes of decimal.

Column 5 : Population of slum :-

The population figures for this column are furnished by the civic authorities concerned Slums as such have not been made independent units for census enumeration and as such 1981 Census data as applicable to the slums covered here are not available.

Columns 7 to 12 : System of Sewerage, Number of Latrines and Method of disposal of Night soil :-

These column headings are same as those appearing in the statement IV and have already been explained. The information is furnished here for each slum separately. The main heading latrines is subdivided into those that are privately owned and those that are for common use of the community i.e., public latrines.

Column 13 : Number of tap points/public hydrants installed for supply of protected water :-

The total number of public taps or hydrants if any in the slum is mentioned here.

columns 14 to 16 : Electrification (Number of connections):-

Total number of electrical connections in each slum provided for purposes of domestic use, road lighting and other than these two is reported seperately under these three columns. The meaning of the terms used in the column heading has already been explained.

Statement - V : Medical, Educational, Recreational and Cultural facilities - 1979

Column 2 : Class and Name of Town :-

This column is same as column 2 of statement IV and therefore calls for no further explanation.

Column 3 : Population :-

The total population of the town according to 1981 Census is noted in this column.

Columns 4 and 5 : Medical Facilities : Hospital/Dispensaries/T.B.Clinic/Health centres/Nursing Homes etc., and number of beds in Medical institutions noted in column 4 :-

The scope of these columns is confined to only such of the facilities that are offered by institutions run by or aided by government/semi-government or local bodies and charitable institutions or social service agencies like the missionaries. In other words data on the facilities provided in the town by private doctors i.e. registered medical practitioners either individually or in establishments where they work in groups,are excluded from the purview of these columns.

The abbreviations used in column 4 are :-

H : Hospital
D : Dispensary
PHC : Primary Health Centre
PHU : Primary Health Unit
FC : Family Planning Centre
TB : T.B.Clinic
NH : Nursing Home
O : Others

If there are two or more number of institutions of the same type then the number of institutions is also indicated within brackets immediately after the relevant abbreviation in the column.

Maternity homes, maternity and child welfare centres, leprosy clinics, chest clinics and veneral diseases clinic etc., if any are all included under the category of 'Others'. But even when a Family Planning Centre is attached to a Hospital or a Primary Health Centre it is treated as an independent unit and counted separately.

If the town has hospitals and dispensaries providing facilities under different systems of medicine such as allopathic, ayurvedic, unani and homoeopathic then this detail too has been included using abbreviations such as : A for Ayurvedic, U for Unani and Hom for the Homoeopathic system. The allopathic institutions do not have any additional abbreviation. Thus, a mere H or D would mean that the reference is to allopathic system; an entry "H (A-1,2)" would mean that 1 Ayurvedic hospital and 2 allopathic hospitals are functioning in the town and an entry like "D (Hom-2,1, U-1)" would imply the existence of 2 homoeopathic dispensaries, 1 allopathic dispensary and 1 Unani dispensary.

If medical facility is not available in the town then the name of the nearest place where it is available if in the same district, and name of the district if in the same State or other State is mentioned here along with the distance in Kilometres shown within brackets.

The number of beds with which the medical institutions noted in column 4 are equipped is indicated in column 5.

Columns 6 to 15 :-

These columns provide information regarding the educational facilities available in the town and are considered stage by stage.

Columns 6 to 9 : Arts/Science/Commerce Colleges (of Degree level and above); Medical Colleges; Engineering Colleges; Polytechnics :-

Particulars of colleges in the town providing general education facilities at degree level are indicated in column 6 using the following abbreviations.

A : Arts only
S : Science only
AS : Arts and Science only
C : Commerce only
AC : Arts and Commerce only
ASC : Combined for all three categories : Arts, Science and Commerce
L : Law

If the number of colleges of any particular category is more than one then that number is also given within brackets against the abbreviation concerned. It may incidentally be mentioned here that the educational institutions with a vocational and professional content such as pharmacy College, B.Ed., Agricultural College etc., are not covered under this but are shown included in the category of "Others" in column 10.

In columns 7, 8 and 9 the number of medical colleges, the number of engineering colleges and the number of polytechnic institutions are indicated.

In case the town does not have any of the colleges referred to in these 4 columns i.e., if the entry were to be a dash in any of these columns then the name of the nearest place with the facility along with the distance thereto is mentioned. If such a place is outside the district then the name and the distance to that place and if such a place is outside the State itself then the name of that State is mentioned in these columns. The same procedure is adopted regarding the other columns dealing with educational facilities.

Column 10 : Recognised Shorthand, Typewriting and other Vocational Training Institutions :

The term recognised would mean recognition by some statutory authority like the Educational Department, Commerce Department, Labour-Department etc., of the Government or semi-government or autonomous bodies or public sector projects. The Teachers Training Colleges, the Nursing College, the Pharmacy College, the College imparting education in Physical Education and the like are also shown under this column against the category of 'Others'.

SH : Shorthand
TYPE : Typewriting
Sh.Type : Shorthand and Typewriting
O : Others

If the number of institutions of any particular type is more than one that number is also indicated within brackets along with the abbreviation concerned.

Columns 11 to 14 : Higher Secondary/Intermediate/ PUC (Pre-University College)/ Junior College/Secondary, Matriculation, Junior Secondary and Middle Schools and Primary Schools :-

Information about the number of schools of different types functioning in the town is furnished under these columns. All schools irrrespective of the medium of education and the type of administering agency i.e., all those run by or aided by Government or local bodies, as well as the unaided institutions run by private management are considered here for reporting. If there are composite institutions such as a college providing education at degree level and also at Pre-University level then such institutions are split up into degree college and PUC (i.e.Junior College) and separately counted as if they are independent units. Likewise, a composite Junior College which has facilities for providing education say from I to XII standard (i.e., from Primary I standard upto PUC) would be regarded as representing one Junior College, one High School, one Middle School and one Primary School and each of these units would be counted and reported under the relevant column as if each unit was an independent institution in its own right. Similarly a school with I to X standard would get counted under Primary, Middle and High School categories and a composite School with I to VII standard would be considered under the Primary school as also the Middle School category.

In Karnataka the term middle school is no longer in vogue as the primary education consists of 7 years of schooling leading to secondary level. However the first four classes (I - IV standard) are called lower primary classes and the next three are regarded as higher primary classes. There are schools with only I to IV standards. called LPS and also those with V to VII only (formerly middle schools) known as HPS and there is no difficulty in counting such institutions as separate primary and middle schools. But there are composite schools called the Higher Primary Schools having I-VII standards and such schools have now been split up into one Primary and one Middle School for purposes of reporting under these columns of the Town Directory. This method of accounting is therefore different from a simple counting of schools in the town.

Column 15 : Adult literacy classes/centres and others (Specify) :-

If adult literacy classes are being run at regular centres in the town the number of such centres is indicated in this column by the side of the abbreviations AC. Curukula, Madarasa (Arabic school) and such other quasi religious cum educational institutions if any in the town are also reported in this column under the category of 'others'.

Column 16 : Number of Working Women's Hostels with number of seats :-

Though there are hostels meant for students in almost all the towns, very few have hostels meant for working women. In this column the number of only such hostels that are exclusively meant for working women only are repoted along with the information on the numoer of seats i.e., its strength.

Columns 17 to 19 : Recreational and Cultural Facilities - stadia, cinema, - auditoria/drama/community halls ;-

Column 17 relates to the number of stadia if any in the town. Ordinary play grounds which one usually comes across in towns and cities are excluded from the purview of this column. The term stadium is used in its strict sense to refer to those constructed at considerable costs and are under proper upkeep.

In column 18 the total number of permanent cinema theatres in the town is indicated. Touring talkies i.e., cinema tents of a purely temporary nature are not taken into account for this column. If there are any auditoria, drama halls and community halls in the town the total number of such units is reported in column 19.

The number of public libraries and reading rooms are separately furnished by the side of abbreviation PL for Public Library and RR for Reading Room. Such facilities offered by educational and private institutions including those that are commercialised (called circulating libraries in local parlance) are not covered for reporting under this column.

Statement - VI : Trade, Commerce, Industry and Banking 1979

Column 2 : Class and Name of Town :-

This column is the same as column 2 of the preceding statement and therefore calls for no further explanation.

Columns 3 to 8 : Names of three most important commodities imported and names of three most important commodities exported :-

For purposes of these columns, commodities for which the town serves only as a transit centre by importing for the specific purposes of exporing the commodities **without any processing** are not considered - either as imports or as exports. Agricultural and such other allied produce may be regularly brought into the town from the neighbouring villages and sold to commission agents and wholesalers at the regulated market for further export to areas outside the town. In such cases

the produce that is brought into the town is not considered as import. On the other hand if these items are mainly consumed within the town either as consumption goods or as raw materials by any manufacturing industry then the commodities would be regarded as imports. Thus the commodities imported are either locally consumed in the same form, or else processed further and thereafter either consumed locally or exported to other centres. This restriction apart there is no limitation concerning the nature and quantity of the commodities that may be considered for reporting under these columns. Importance in a town is restricted basically to the few or several commodities that qualify for consideration either as imports or as exports. By and large the commodidities reported under exports would coincide with the commodities reported as manufactured in the town because of the specific exclusion of transit goods. As a result, the image that some of the towns have built up over decades as traditional exporters of certain goods does not get reflected under these columns.

In these columns the importance of a commodity is reported in very general terms and decided upon in terms of the estimated volume of commodities transacted and is based on local enquiries by the civic authorities concerned.

Columns 9 to 11 : Name of three most important Commodities manufactured.

The order of importance is determined broadly by taking into consideration the volume of the total output of the commodities or the scale of operation and for these columns too it is the civic authority that has furnished the information after local enquiries. All types of manufacturing and processing irrespective of the sector to which they belong are considered and of these the three that are most important are reported.

Column 12 : Number of Banks :-

Information on this item has been supplied by the office of the Registrar General, India after ascertaining the details from the Reserve Bank of India. The data relates to the year 1979 and in conformity with the instructions issued in this regard, no attempt has been made to update the data. If a bank has two or more branches then each such branch is regarded as a separate Bank for computing the number of banks.

Column 13 : Number of Agricultural Credit Societies :-

The total number of agricultural co-operative credit societies functioning in the town, irrespective of the type to which they belong (i.e., primary, service, multipurpose, agricultural produce marketing etc) is reported under this column. In quite a large number of towns agriculture is an important means of livelihood for a number of persons and agriculturists of urban areas too have for long been influenced by the co-operative movement.

Column 14 : Number of Non-agricultural Credit Societies :-

Consumer co-operative societies which extend credit facilities to the members, and all other credit co-operative societies that cannot be classified as agricultural are considered for this column. Several groups of people belonging to specific categories might have formed co-operative societies to cultivate the habit of thrift and to make use of the benefit arising out of the encouragement given to the co-operative movement. All such co-operative societies are covered under this column.

Though Dharwad has been reported as the district headquarters, it is in fact a segment of the town named Hubli-Dharwad Municipal Corporation. Till its merger with Hubli in 1962, Dharwad was an independent municipal town and even now it has retained its socio-cultural identity. The district level office as well as that of the Asst. Commissioner, Dharwad sub-division are located in Dharwad segment. The Central Bus Station of Dharwad and Hubli are separated by a road distance of about 20 km.

PART B - PRIMARY CENSUS ABSTRACT

(i) DISTRICT PRIMARY CENSUS ABSTRACT
(ii) TALUKWISE PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

The Primary Census Abstract furnishes in a nutshell as it were, vital information on the basic demographic and economic composition of the population. This statement, referred to as PCA, comprising hardly 16 main columns,summarises the whole mass of data gathered at the Census. The smallest geographical unit with a defined boundary identifiable on the field that has been delineated for ensuring cent percent coverage of area under the jurisdiction of various administrative divisions, is the census Enumerator's block. The details gathered in the household schedules and the individual slips in respect of each and every person enumerated in each such block have been meticulously tabulated to prepare this Primary Census Abstract. The tabulation has been done entirely by manual processing of the data at the Regional Tabulation offices. The village PCA is derived from the Block PCA and in case of urban areas, the Block PCA has yielded the ward and Town PCA. In turn the Taluk (Rural) and Taluk (Urban) as well as Taluk (Total) PCA statements are built up on the basis of Village-wise and Town-wise data. This process goes on until it yields the data for higher and higher administrative divisions culminating at the apex in the form of a single line statement for the country. The entire edifice thus rests on the information contained in the individual slips filled up by the enumerator.

In the pages that follow, the District Primary Census Abstract with the taluk level data giving rural-urban breakup is presented first. Thereafter for each taluk starting with Location Code No.1 the village level PCA and within each taluk wardwise PCA for each town are furnished. As already stated particulars relating to Scheduled Castes and Scheduled Tribes are omitted here. Though there are altogether 24 columns in the urban and village PCA statement, as many as 12 out of these are merely sub-columns to provide sexwise data. In essence therefore there are 12 columns only. Most of these column headings represent the census concepts and these have been explained in the Analytical Note. However, a brief description of the column headings is given here.

Column 1 : Location Code Number :-

The location code number assigned to the village or the town as the case may be is entered in this column.

Column 2 : Name of Village/Town/Ward :-

The name of the village or the town as finally adopted for the 1981 census purposes is entered in this column. The towns and cities are quite often divided into smaller geographical segments called wards, mohallas or divisions for purposes of administration. Such units bear distinctive locality names or specific numbers. It is this name or the number of the ward or its equivalent unit that is mentioned here in the case of towns.

Irrespective of whether a town is divided into administrative wards or not every town is invariably constituted into territorial divisions for the conduct of civic elections. This delimitation of constituencies is done as an essential and preliminary process of civic elections scheduled to be held periodically. So, in some cases the name or number in this column refers to such territorial divisions and not to administrative divisions.

Column 3 : Area of the village in hectares and of town in square kilometres :-

These area particulars have already been furnished in village and town directory portions. For the villages the area is reported here in hectares upto two places of decimal and for the towns, as also the wards or divisions thereof, the area figures are furnished in square kilometres upto two places of decimal. If the area figures are not available for any reason the abbreviation NA is entered in this column.

Column 4 : Occupied Residential Houses :-

A 'Census House' could be wholly residential or else completely non-residential according to the use to which it is put. All census houses enumerated as either wholly or partly residential at the time of the census count are added together to get the data for the block and from thence to derive the data for higher units. Houses found vacant at the time of the census count are not reckoned as occupied residential houses. The information for this column has been compiled from the Abridged Houselists.

Column 5 : Number of Households :-

This information too is compiled from the Abridged Houselists. The actual total number of households including the normal, institutional and the houseless that were enumerated at the census count is mentioned in this column. Generally, the number of households in any unit would be equal or more than the occupied residential houses in that unit because of the houseless households that one may come across in that unit and also because of the occasional instances, of two or more households sharing a common census house.

Columns 6, 7 and 8 : Total population (including Institutional and Houseless population) :-

The total population as on the reference date is furnished in column 6 while in the next two columns the sexwise break-up is given. The institutional population refers to such of those who were enumerated in institutions like hostels, chummeries, hospitals, prisons etc., The houseless persons represent those enumerated on the night of 28th February at the places where they were found at that time, if they had not already been enumerated elsewhere.

Columns 9 and 10 : Literates :-

Sexwise break up of the total number of persons who are literate, irrespective of their levels of educational attainments and age, is given in these two columns. By definition a literate is a person who can both read and write with understanding in any language. It is important to note that by convention all children below 5 years of age are regarded as illiterate.

Columns 11 to 20 : Main Workers :-

These 5 pairs of columns deal with the main workers. Out of these, while the first pair provides only the total the other 4 pairs give out further break-up according to the sector of the economy in which these persons are working. The reference period for judging whether a person is a worker or not is the year preceding the day of enquiry. If a person had worked even for one day during this entire period he or she is entitled to be classified as a worker. If for any such

worker the period of work is 183 days or more then that person is a main worker. On the other hand, if such period is less than 183 days then that worker is a marginal worker. In columns 11 and 12 the total number of main workers is furnished sexwise.

Columns 13 and 14 : Cultivators (I) :-

These two columns give out the number of male and female workers who satisfy the conditions laid down in the definition of a cultivator. A cultivator may be an employer, a single worker or an unpaid family worker. Participation in work may be by way of physical labour or by way of supervision and direction. The lands cultivated may be owned by the household or taken on lease for payment of money or kind or share in the produce. Cultivation as already emphasised involves ploughing, sowing and harvesting and allied activities in the production of cereals and millet crops, pulses, raw jute and kindred fibres, sugarcane, tapioca and oil seeds.

Columns 15 and 16 : Agricultural labourer (II) :-

A person who works in another person's land for wages in money or kind or share and does not have any lease or contract on the land on which he or she works is an agricultural labourer. In this case too the crops grown on the lands are quite pertinent and the difference between a cultivator and an agricultural labourer lies in the fact that the former works on his own or leased in lands as an independent worker while the latter works for wages having no right whatsoever on the lands on which he works. The sex-wise break-up of such workers is given in these two columns.

Columns 17 and 18 : Household Industry (V (a)) :-

Household industry belongs to the broad category of 'manufacturing, processing, servicing and repairs' and represents a particular sector therein. Household industry is generally conducted by the head of household himself or herself and or mainly by the members of the household, at home or within the village in the case of those dwelling in rural areas and only within the residential premises occupied by the household in the case of those living in urban areas. A person may be a labourer or a petty employee in the household industry run by some other household. By and large the household industry is carried on by individuals on a small scale with assistance of family members all of whom work as unpaid family workers and the entire earnings are treated as family income.

Columns 19 and 20 : Other Workers (III, IV, V(b), VI to IX) :-

All the other workers who are main workers but are neither cultivators nor agricultural labourers nor engaged in house hold industry are covered under these two columns. This is a broad category, covering all those who are working in fishing, forestry, plantations, construction of roads buildings etc., non-household manufacturing industries, trade and commerce, transport and storage and other services.

Columns 21 and 22 : Marginal Workers :-

Males and females who are workers but have worked to a marginal extent only during the reference year are reported under these two columns. Such workers, irrespective of the economic sector in which they work, are considered together and reported here.

Columns 23 and 24 : Non-Workers :-

Irrespective of age and sex all those who are not economically active are non-workers and a sexwise break-up of such persons is given in these two columns. The aggregate of the main workers, marginal workers and non-workers would be equal to the total population of that unit.

* * * * * *

Note : £ Formerly Dharwar District

¥ Formerly Dharwar Taluk

* Hubli-Dharwad (C) spreads over two taluks, namely, Dharwad and Hubli. Hence this unit is shown separately and not under any of these two taluks. The area and other figures of Hubli-Dharwad (C) are included against 'Total' and 'Urban' of Dharwad district. However in the Talukwise PCA, this unit is shown as part of Hubli taluk as was done in 1971.

1 New taluks formed after 1971 Census and towns treated as such for the first time in 1981 are underlined.

2 'P', 'M' and 'F' stands for Persons, Males and Females respectively.

3 The abbreviation M is used for Municipality

4 Under Column No.3 the following abbreviation are used :
T : Total R : Rural U : Urban

Note : 5 The area figures for the district given under column No.4 against 'Total' represent "Geographical Area" and have been furnished by the Surveyor General, India. The figures for the urban areas are either those supplied by the concerned authorities of the towns or compiled in this Directorate on the basis of the records available pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the total urban area from the total area of the taluk/district. The total of the area figures of all the taluks in a district will not tally with the district figures (except for urban), because the former represent "Land Use" area derived from the figures supplied by the Director of Survey, Settlement and Land Records in Karnataka.

6 Urban area given under column No 4 for the taluks is the total of the area of the respective individual urban units included under them rounded off to one place of decimal.

INTRODUCTORY NOTE

This supplement to the District Census Handbook is devoted exclusively to the particulars relating to the Scheduled Castes and Scheduled Tribes. The District Census Handbook was first introduced at the 1951 Census to meet the ever increasing demand for micro-level data and since then this has remained the only Census publication which gives out data at the village level in the case of rural areas and at the enumeration block level in the case of urban areas. The scope of this publication was enlarged in 1961 and also in 1971 so as to render it more useful by presenting in it a wealth of information on infrastructural facilities in villages and towns. The current volumes of the District Census Handbook are thus the fourth in the series and are marked by a greater degree of comprehensiveness and uniformity in approach. As compared to the 1971 series the village and town directory formats have been slightly modified. So also the Primary Census Abstract too has undergone certain changes. The previous practice of presenting the administrative statistics and the various district and taluk-level tables has been given up. Apart from these general changes at the All-India level, in so far as Karnataka is concerned, because of certain technical reasons all the particulars relating to the Scheduled Castes and the Scheduled Tribes envisaged for presentation in the District Census Handbook, have been pooled together and brought out in the form of a separate supplement.

These details are presented in the following sequence:

Statement I : Total, Scheduled Castes and Scheduled Tribes population in the taluks and towns of the district. (These details form part of the General District Primary Census Abstract.)

Statement II : District Primary Census Abstract - Scheduled Castes.

Statement III : District Primary Census Abstract - Scheduled Tribes.

Statement IV : Scheduled Castes and Scheduled Tribes population - (A) Village-wise and (B) Town-wise (within town ward-wise). (These details form part of the Urban/Village Primary Census Abstract.)

Statement V : Total, Scheduled Castes and Scheduled Tribes population — Urban Block-wise. (This corresponds to the Appendix to Urban/Village Primary Census Abstract.)

Statement VI : Description of boundaries and details of areas included in Census enumeration blocks — in the case of urban areas of the district (corresponding to the annexure to the Appendix to the Urban/Village Primary Census Abstract.)

Statement VII : List of villages arranged according to the proportion of (a) Scheduled Castes and (b) Scheduled Tribes population to the total population of the village concerned by ranges. This would correspond to Appendix - IVA and B to the Village Directory.

Statement VIII : List of Scheduled Castes and Scheduled Tribes.

The concept of Scheduled Castes and Scheduled Tribes as evolved by the Government of India and embodied in the Government of India Act 1935 Section 309 for the first time and standardised later on for the purposes of the Constitution of the Indian Republic has all along been adopted for purposes of Census operations as well. 'Scheduled Castes' means such castes, races or tribes or parts or groups within such castes, races or tribes as are deemed under Article 341 (of the Constitution of India) to be the Scheduled Castes for purposes of the Constitution of India. No person who professes a religion different from the Hindu or the Sikh shall be deemed to be a member of a Scheduled Caste. Likewise, 'Scheduled Tribes' means such tribes or tribal communities or parts or groups within such tribes or tribal communities as are deemed under Article 342 (of the Constitution of India) to be the Scheduled Tribes for the purposes of the Constitution of India. Persons belonging to the Scheduled Tribes may profess any religion. State-wise statutory lists of Scheduled Castes and Scheduled Tribes were notified for the first time after independence under the 'Constitution (Scheduled Castes) order 1950' and the 'Constitution (Scheduled Tribes) order 1950'. These orders have close links particularly with Article 46 of the Constitution which lays down that "The State shall promote with special care the educational and economic interests of the weaker sections of the people, and in particular, of the Scheduled Castes and Scheduled Tribes and shall protect them from social injustice and all forms of exploitation"

These lists have subsequently been modified, supplemented or amended from time to time. As a result of the re-organisation of the States in 1956 involving

transfer of territories from one State to another, a major change became necessary in most of the States. Consequently the "Scheduled Castes and Scheduled Tribes (Modification) order 1956" was promulgated and the interests of these two sections of the society were adequately safeguarded. Twenty years later, in 1976, with the main objective of removing the area restrictions imposed within the States, the parliament enacted the "Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976" (Act No. 108 of 1976 dated the 18th September, 1976). The lists of Scheduled Castes and Scheduled Tribes notified thereunder as applicable to Karnataka State have been adopted for purposes of the 1981 Census operations. Copies of these lists, in English as well as in Kannada, were supplied to each and every census enumerator and supervisor. Necessary instructions for filling up answers to the questions relating to the members belonging to the Scheduled Castes and Scheduled Tribes were also issued. The following points were emphasized by way of clarifications:

"If the person belonging to a Scheduled Caste or a Scheduled Tribe returns his/her caste or tribe by a synonym or generic name of a caste or tribe, it should be reckoned as a Scheduled Caste or a Scheduled Tribe only if the name finds a place in the list furnished to you. Similarly, if the answer to this question is in general terms like Harijan/Girijan or Achut/Adivasi, you should not reckon the person enumerated as belonging to a Scheduled Caste or Scheduled Tribe as the case may be. In such a case you should ascertain the name of the caste/tribe fully and if that name finds a place in your list, you should reckon the person as belonging to Scheduled Caste or Scheduled Tribe as the case may be If a person is negligent and insists on calling himself/herself merely 'Harijan' or 'Achut' or 'Adivasi' or 'Girijan', as the case may be, or repeats the synonym or generic name of a caste or tribe, please tell him/her that his description is not adequate for Census purposes and persuade him/her to give the actual name of the Scheduled Caste or Scheduled Tribe. If the person merely claims to be a Scheduled Caste or Scheduled Tribe, but says that he/she does not belong to any of the notified communities applicable to the area, as reflected in the list supplied to you, he/she will not be reckoned as belonging to a Scheduled Caste or a Scheduled Tribe".

Analysis of Census Results: As compared to the earlier lists of Scheduled Castes and Scheduled Tribes which formed the basis for census enumeration at the Censuses of 1961 and 1971, there has been a substantial change in the lists adopted for the 1981 Census. The area restrictions that were prevalent regarding numerous castes and tribes included in the lists have now been removed. Therefore the 1981 Census results cannot be straight away used for any comparative analysis of growth trends and such other factors unless one delves deeper into the historical, social, economic and demographic aspects of life of these two categories of the population. Such an analysis is beyond the scope of this volume and has therefore not been attempted here. Salient data about the distribution of the Scheduled Castes and Scheduled Tribes in rural as well as urban areas of the district as also the pattern of distribution in administrative units of different levels within the district are included in this slender volume in the form of tabular statements.

NOTE : @ Formerly Dharwar

£ Formerly Hubli-Dharwar (C)

§ Hubli-Dharwad (C) spreads over two taluks namely, Dharwad and Hubli. Hence this unit is shown separately and not under any of these two taluks. The figures of Hubli-Dharwad (C) are included against 'Total' and 'Urban' of Dharwad District.

* Scheduled Tribe figures would appear to include high returns relating to certain communities with nomenclatures similar to those included in the list of Scheduled Tribes consequent on the removal of area restrictions.

1 The following abbreviations have been used within brackets against the names of the towns to indicate the civic status of the town C : Municipal Corportion M Municipality

2 Under column 3 the following abbreviations are used. T : Total R : Rural U Urban

NOTE : @ Formerly Dharwar

£ Formerly Hubli-Dharwar (C)

§ Hubli-Dharwad (C) spreads over two taluks namely, Dharwad and Hubli. Hence this unit is shown separately and not under any of these two taluks. The figures of Hubli-Dharwad (C) are included against 'Total' and 'Urban' of Dharwad District.

* Scheduled Tribe figures would appear to include high returns relating to certain communities with nomenclatures similar to those included in the list of Scheduled Tribes consequent on the removal of area restrictions

1 The following abbreviations have been used within brackets against the names of the towns to indicate the civic status of the town C : Municipal Corporation M : Municipality

2 Under column 3 the following abbreviations are used. T : Total R : Rural U : Urban

* * * * * *

Note : 1 Towns treated as such for the first time in 1981 Census are underlined.

2 The following abbreviations have been used within brackets against the names of the towns to indicate the civic status of the town

C : Corporation M : Municipality

* Scheduled Tribes figures would appear to include high returns relating to certain communities with nomenclatures similar to those included in the list of Scheduled Tribes consequent on the removal of area restricted.
