1981 CENSUS—PUBLICATION PLAN

(1981 Census Publications, Series 11 in All India Series will be published in the following parts)

GOVERNMENT OF INDIA PUBLICATIONS

Part I-A	Administration Report-Enumeration
Part I-B	Administration Report-Tabulation
Part II-A	General Population Tables
Part II-B	Primary Census Abstract
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on Houses and Disabled Population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes and Schedlued Tribes
Part X-A	Town Directory
Part X-B	Survey Reports on selected Towns
Part X-C	Survey Reports on selected Villages
Part XI	Ethnographic Notes and special studies on Scheduled Castes and Scheduled Tribes
Part XII	Census Atlas
Paper 1 of 1982	Primary Census Abstract for Scheduled Castes and Scheduled Tribes
Paper 1 of 1984	Household Population by Religion of Head of Household

STATE GOVERNMENT PUBLICATIONS

Part XIII-A&B District Census Handbook for each of the 45 districts in the State.
(Village and Town Directory and Primary Census Abstract)

प्राक्कथन

जनगणना संगठन द्वारा राज्य सरकारों की ओर से संकलित जिला जनगणना पुस्तिका जनगणना की एक बहुमूल्य उपलब्धि है। जिला जनगणना पुस्तिका की योजना निर्माताओं, प्रशासकों, विद्वानों और अनुसंधान कर्त्ताओं को बार-बार आवश्यकता होती है। अन्य बातों के साथ-साथ इस पुस्तिका का उपयोग निर्वाचन क्षेत्रों के परिसीमन, स्थानीय स्तरों के निर्धारण और क्षेत्रीय योजनायें बनाने में भी किया जाता है। यह पुस्तिका जिला प्रशासन चलाने में भी सहायक होती है। जिला जनगणना पुस्तिका ही एक मात्र ऐसा प्रकाशन है जिससे ग्रामीण क्षेत्रों के ग्राम स्तर तक के एवं प्रत्येक नगरीय क्षेत्र के वार्ड वार प्राथमिक जनगणना सार के आंकड़े उपलब्ध होते हैं। इसमें ग्रामों और नगरों आदि मे उपलब्ध आंतरिक सुविधाओं के बारे में भी जानकारी मिलती है।

जिला जनगणना पुस्तिका की शृंखलाओं का प्रारम्भ 1951 की जनगणना में किया गया था। इसमें जिले के प्रत्येक ग्राम और नगर का प्राथमिक जनगणना सार और जनगणना की महत्वपूर्ण सारणियां थीं। 1961 के दौरान जिला जनगणना पुस्तिका के विषय क्षेत्र का विस्तार किया गया। इसमें जिले का विस्तृत ब्यौरा, प्रशासनिक सांख्यिकी, जनगणना सारणियां और प्राथमिक जनगणना सार को मिलाकर ग्राम और नगर निर्देशिका भी शामिल की गई। 1971 की जिला जनगणना पुस्तिका की शृंखलाओं को तीन भागों में बांटा गया था। क–भाग में ग्राम और नगर निर्देशिका, ख–भाग में ग्राम और नगर का प्राथमिक जनगणना सार और ग–भाग में विश्लेषणात्मक रिपोर्ट, प्रशासनिक सांख्यिकी, जिला जनगणना सारणियां, प्राथमिक जनगणना सार पर आधारित कुछ विश्लेषणात्मक रिपोर्ट और ग्रामों के बारे में वहां उपलब्ध सुविधाओं के आंकड़े शामिल थे। तथापि, कुछ राज्यों में इसमें केवल जिला जनगणना सारणियां ही दी गई थी। कुछ ऐसे भी मामले थे जहां संकलन और मुद्रण में देरी होने से उक्त पुस्तिका प्रकाशित ही नहीं की गई।

1981 की जिला जनगणना पुस्तिका के फार्म तैयार करते समय ग्राम और नगर निर्देशिका के फार्मों में कुछ नए कालम जोड़कर उन्हें फिर से तैयार किया गया। उक्त फार्म बनाते समय 1971 के आंकड़ों की तुलनात्मकता को भी ध्यान में रखा गया है। ग्रामों में बिजली की आपूर्ति के अलावा बाकी उपलब्ध सभी सुविधाओं को ग्राम निर्देशिका में इस अनुदेश के साथ दिखाया गया है कि यदि कोई विशिष्ट सुविधा किसी ग्राम में उपलब्ध नही है तो जिस भी निकटतम ग्राम में उक्त सुविधा उपलब्ध है, तो उसकी दूरी भी बताएं। ग्राम निर्देशिका के फार्मों को पुनः तैयार करते समय ग्रामीण क्षेत्र में उपलब्ध समस्त आंतरिक सुविधाओं, विशेषकर सुविधाओं और भूमि उपयोग की किस्मों के बारे में और व्यापक आंकड़े समाविष्ट करने से यह आशा की जाती है कि इससे माइक्रोस्तरीय योजना की आवश्यकता और पूरी हो सकेगी। इससे न केवल स्थानीय क्षेत्रों में योजना तैयार करने में सहायता मिलेगी अपितु माल और सेवाओं को भी विनियमित करने और विकास प्रक्रिया में क्षेत्रीय असंतुलन को कम करने में भी सहायता मिलेगी। संशोधित न्यूनतम आवश्यकता कार्यक्रम की कुछ आवश्यकताओं की पूर्ति के लिये संबंधित जानकारी की कुछ नई मदें जोड़ी गई है। ये नई मदें है : प्रौढ़ शिक्षा केन्द्र, प्राथमिक स्वास्थ्य-उप केन्द्र ग्रामों में सामुदायिक स्वास्थ्य कार्यकर्त्ताओं संबंधित मदों को उक्त उद्देश्य को ध्यान में रखते हुए ग्राम निर्देशिका में जोड़ा गया है। किसी गांव में आने-जाने के साधनों के बारे में जो नया मद जोड़ा गया है उसका अभिप्राय जिले के उन ग्रामों की जानकारी एकत्रित करनी है जिसमें आना जाना बहुत कठिन है अर्थात जो अगम्य है। एक नया कालम "कुल जनसंख्या और परिवारों की सख्या" को यह ज्ञात करने के लिये जोड़ा गया है कि उनके गांव की जनसंख्या और परिवार संख्या कितनी है और उनके अनुसार कितनी सुविधाएं उपलब्ध हैं। दो नये परिशिष्ट और जोड़े गए है जिनमें से एक उन ग्रामों के बारे में है जहां कोई सुविधा उपलब्ध नहीं है तथा दूसरी, कुल जनसंख्या के अनुपात में अनुसूचित जाति और अनुसूचित जनजाति की जनसंख्या से संबंधित है।

नगर निर्देशिका के फार्मों में भी कुछ संशोधन किए गए हैं जिससे कि कुछ मदों के बारे में जानकारी मिल सके और न्यूनतम आवश्यकता कार्यक्रम की आवश्यकताओं की पूर्ति हो सके। इसी उद्देश्य को ध्यान में रखते हुए श्रेणी-I श्रेणी-II के कस्बों की गन्दी बस्तियों में नागरिक और अन्य सुविधाओं के बारे में एक नया विवरण (विवरण–IV क) जोड़ा गया है। आशा की जाती है कि इससे प्राप्त जानकारी आयोजकों को गन्दी बस्तियों के सुधार के लिये कार्यक्रम तैयार करने में सहयोग देगी। इसी बात को ध्यान में रखते हुए नागरिक और अन्य सुविधाओ के बारे में विवरण IV में अनुसूचित जातियों और अनुसूचित जनजातियों से संबंधित कालम और विवरण-V में शैक्षिक सुविधाओं के अंतर्गत प्रौढ़ शिक्षा कक्षाएं / केन्द्रों के बारे मे अन्य बातों के साथ-साथ

कालम जोड़े गए हैं । नगर निर्देशिका में एक महत्वपूर्ण परिवर्तन सभी सातों विवरणों में कस्बे की श्रेणी के बारे में है। देश के नगरीय क्षेत्रों, में उपलब्ध आंतरिक सुविधाओं की जानकारी का कस्बे की श्रेणी को ध्यान में रखते हुए सर्वोत्तम विश्लेषण किया जा सकता है । कुछ विवरणों में नागरिक प्रशासन की स्थिति और जनसंख्या के कालम जोड़ने से भी इस उद्देश्य की पूर्ति होती है ।

1981 की जनगणना में भरी गई व्यक्तिगत पर्चियों के आर्थिक और अन्य प्रश्नों में जो भी परिवर्तन किए गए, उन्हीं परिवर्तनों को ध्यान में रखते हुए ग्रामों और नगरों के प्राथमिक जनगणना सार के फार्म तैयार किए गए हैं ।

1981 की जिला जनगणना पुस्तिका के प्रकाशन में विलम्ब न हो, इस बात को ध्यान में रखते हुए उक्त खण्ड के भाग-क में ग्राम एवं नगर निर्देशिका तथा भाग-ख में ग्राम एवं नगर का प्राथमिक जनगणना सार और तहसील / कस्बा स्तरों तक जनगणना का प्राथमिक सारांश के साथ अनुसूचित जातियों और अनुसूचित जनजातियों के प्राथमिक जनगणना सार को भी सम्मिलित किया गया है । जिला जनगणना पुस्तिका के महत्व को संवर्धित करने के लिये उसके प्रारम्भ में एक विस्तृत विश्लेषणात्मक टिप्पणी दी गई है जिसमें विभिन्न इनसेट सारिणियां सम्मिलित हैं जो प्राथमिक जनगणना सार और अन्य सुविधाओं से संबंधित गैर जनगणना आंकड़ों पर आधारित है । प्रकाशन को पुनः और उपयोगी बनाने की दृष्टि से उपयुक्त स्थानों पर जिला और तहसील/पुलिस स्टेशन/सामुदायिक विकास खण्डों आदि के मानचित्रों को लगाया गया है । मानचित्रों में इनकी सीमाएं और अन्य महत्वपूर्ण विशेषताएं दिखाई गई हैं ।

यह प्रकाशन राज्य सरकार और जनगणना संगठन के संयुक्त प्रयास का फल है । राज्य में आंकड़ों का संकलन श्री के. सी. दुबे निदेशक, जनगणना परिचालन, मध्यप्रदेश के मार्गदर्शन पर राज्य सरकार की ओर से किया गया है । राज्य सरकार ने ही इसके मुद्रण का खर्च वहन किया है । इस प्रकाशन की योजना, रूपरेखा और इसके समन्वय का कार्य मेरे कार्यालय में सामाजिक अध्ययन प्रभाग में उप महारजिस्ट्रार श्री एन. जी. नाग द्वारा किया गया । डा. बी. के. रॉय, उप महारजिस्ट्रार (मानचित्र) ने मानचित्रों को तैयार करने में तकनीकी मार्गदर्शन किया । जनगणना निदेशालयों से प्राप्त आंकड़ों की संवीक्षा श्री एम. एम. दुग्रा, अनुसंधान अधिकारी के मार्गदर्शन में मुख्यालय के सामाजिक अध्ययन प्रभाग में की गई । इस परियोजना से संबंधित सभी कर्मचारियों को मैं धन्यवाद देता हूं ।

FOREWORD

The district census handbook (DCH), compiled by the census organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is inter alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables, village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objectives in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this

view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/police station/C D Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K. C. Dubey, the Director of Census Operations, Madhya Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of ShriM. M. Dua, Senior Research Officer. I am thankful to all who have contributed in the project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982.

PREFACE

One of the most important publications of the Census are the District Census Handbooks This publication was begun in this caption since 1951 Census. But prior to this, a similar publication was released in the Census earlier than 1951. That publication was on the title of Village Statistics and it contains only village names and total population thereof. The 1951 Census could, therefore, be said to represent a significant step in the process of making detailed Census statistics available down upto the village level.

In fact the District Census Handbook is the most important publication at the Census and is also perhaps the most widely used. Also perhaps this is the only publication used at the micro-level down upto the tahsil and development block.

The form of the District Census Handbook has gone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view of making the basic statistics available with the data users as early as possible the District Census Handbooks have been split into 2 parts, Part-A contains the Introductory Note on the district and Town/Village Directory. This volume will be found useful to get almost all the non-Census statistics available at one place. Part--B contains the Primary Census Abstract.

One of the innovation of the present Census has been in terms of allotment of Location Code numbers to the villages. In the earlier Censuses the location code system was such that the villages of a Patwari Circle were found at different serial numbers. Since the Patwari Circle still remains an important administrative unit the location code numbers have been so given in the present Census that it may be possible to locate all the villages of a particular Patwari Circle at one place one below the other.

When the planning for the present census was started in 1979 the tahsils were still revivable as an important unit of the administration, the whole planning was, therefore, done taking tahsil as the unit. It was during the course of the census that some requests were informally received for making blockwise data available. Since these requests were received very late and were also received only in an informal manner, it has not been possible to disturb the original planning of villages arranged according to the location code numbers taking tahsil as one unit. However, additional exercise has been done and in addition to the tahsil figures blockwise figures have also been indicated. It is hoped that the availability of these blockwise data will enhance the utility of this publication.

It is hoped that this handbook will provide the basic statistical support to executive and developmental administration. It is needless to state that the proper implementation of policy depends on the ability of the administration authorities concerned.

It may be remembered that the villagewise area figures given in the Primary Census Abstract and the Village Directory are those based on the village papers while the tahsil totals given in PCA are obtained from the Land Records deptt. which in many cases exclude forest area.

The statistics that are contained in the district census handbooks are the result of a massive and marathon exercise in the compilation and tabulation of voluminous statistics. The compilation of the statistics contained in this volume was carried out by 9 Regional Tabulation Offices each under a Regional Deputy Director of Census Operations. These Regional Offices were run with the help of purely temporary staff-roughly about 1,500 Tabulators, about 250 Checkers and about 80 Supervisors. I am grateful to my colleagues, the Regional Deputy Directors and those temporary staff for the speed and accuracy in the editing and basic compilation of more than nearly 522 lakh slips and nearly 1 lakh of household schedules. The compilation of village directory was taken up at the headquarters and I am equally grateful to the officers and staff who have worked whole heartedly on the job in a collective and co-operative venture. It is not possible nor fair to name in this. The maps contained in the handbook have been prepared in the Cartographic Section of my office. However, the analytical note has been prepared by Shri M. L. Sharma Deputy Director of Census Operations.

I am thankful to all who have contributed to bring this publication possible. The census organisation is also grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these handbooks and to the Controller, Printing and Stationery, Madhya Pradesh, Bhopal and his staff for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri P. Padmanabha to whom we are all deeply grateful. Our thanks are also due to Shri N. G. Nag, Deputy Registrar General (Social Studies) for all the help that we received from him and his section.

K. C. DUBEY
Director of Census Operations
Madhya Pradesh.

* Includes 77 inhabited villages which have been treated wholly as urban outgrowth of nearby City/Town.

** Includes 58 uninhabited villages of which Abadi Area have been merged in nearby City/Town.

\+ Include 1 inhabited village which have been treated wholly as urban outgrowth of near by City/Town.

विश्लेषणात्मक टिप्पणी

ANALYTICAL NOTE

NOTES AND EXPLANATIONS

This note gives the meanings and explanation of terms and concepts used in this handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building,house, household, workers etc., it is not possible to appreciate the data presented in the handbook. Thus one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a bit less of a building than the Indian versions of the sky scrapers in one of the metropolitan cities, or that a central jail household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent.

Concepts and Definitions

Rural/Urban :

It has been the tradition of the Indian Census to present the census data for rural and urban areas separately. In fact, in all the Censuses throughout the world this classification of census data into rural and urban units is generally recognized. However, distinction between rural and urban is not yet amenable to a single definition which would be applicable to all countries.

The definition of an urban unit at the 1971 Census was as follows —

(a) All places with a municipality, corporation cantonment board or notified town area ;

(b) All other places which satisfied the following criteria.

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per sq. km. (1,000 per sq. miles).

The same criteria is retained at the 1981 census so that comparability with the previous census could be ensured and which would provide basis for analysing of figures and urbanisation in the country. But it has to be remembered that the urban criterion of 1961 and 1971 censuses is that the males working in activities such as fishing, logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 censuses, whereas in the 1981 census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Applying the criteria described above, a list of 327 towns was finalised and it is these 327 towns which are treated as urban areas for the purpose of 1981 census. The additional Secretary to the Govt. of India in the Ministry of Home Affairs sent a letter to the Chief Secretaries of the State Governments as back as 10th May, 1979, requesting them to ensure that no changes are made in jurisdiction and boundaries of municipalities and revenue villages, tahsils, sub-divisions and districts during the period from 1-1-1980 to 30-6-1991. However, subsequent to our finalization of rural and urban frame the State Government in the Local Government Department notified many places as notified areas and municipalities. Such places have not been treated as towns for the purpose of census and the secretary to Government in the Local Government Department had agreed to this arrangements. Similarly, the State Government raised the status of 6 municipal committees to that of municipal corporations. These new municipal corporations are also treated as municipal committees.

While dealing with the subject of rural and urban break up mention may be made of the area under the Special Area Development Authority. The Special Area Development Authority have been constituted under the Madhya Pradesh Nagar Tatha Gram Nivesh Adhiniyam, 1973 and they enjoy the power to function as a municipality so far as the municipal management of that area is concerned. The limits of these Special Areas include large portions of rural areas comprising number of villages

situated around the core town or village of such Special area. For example, Orchha is a SADA area in Tikamgarh district but there is no town in this area. Similarly, Malanjkhand in Balaghat district, Bheraghat in Jabalpur district, Mandav in Dhar district and similar other cases are SADA areas but there is no urban area within that. The objective of the SADA areas perhaps is to control the future development of these areas in a planned manner and that is all. It was, therefore, not considered desirable to treat such SADA areas at par with other urban bodies like municipal corporations, municipal committees etc. and only that part of it is treated as urban which is really so. As such in the Korba SADA area only Korba town has been treated as urban and rest of the area remains in the rural frame.

Urban Agglomeration:

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 census. Very often large railway colonies, university campuses, port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a contiguous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglomeration may constitute :—

(a) A city with continuous outgrowth, (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ;

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area :

A new concept of Standard Urban Area introduced in 1971 census will also be followed for the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are—

(i) it should have a core town of a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 197 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data have been presented for the Standard Urban Areas in 1981 also. The idea is to present basic data for those areas for four to five decades so that the urbanisation process in these areas can be studied. However, there have been minimum changes in the constituent units of the Standard Urban Areas of 1981 Census as compared to those of 1971, but the list of SUA remained unchanged.

Size Class of Towns :

The urban areas are classified into 6 classes referred to as towns of Class I to VI. The classification is shown below—

Class I towns	100,000 and obove
Class II towns	50,000 to 99,999
Class III towns	20,000 to 49,999
Class IV towns	10,000 to 19,999
Class V towns	5,000 to 9,999
Class VI towns	Less than 5,000

It is customary to treat a town having a population of 1 lac and above as a city.

Census House :

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building had a number of flats or blocks which were independant of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they have been considered as separate census houses.

In some cases, however, it was difficult to apply the definition strictly. For example, in an urban area, a flat has five rooms, each having direct

entrance to the common staircase or courtyard which by definition had to be treated as five census houses. If all these five rooms were found occupied by single household entire flat was treated as one census house. In such cases singleness of use was taken into consideration to avoid undue proliferation of the number of census houses.

An occupied residential census house means a census house which is actually used for residential purposes, either wholly or partly by one or more households.

Household :

The term household in census is defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any one of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, "Ashrams" etc., These are called institutional households. There may be one member households two member households or multi - member households. For census purposes, each one of these types is regarded as a 'household'.

There are three types of households viz, normal, institutional and houseless households. A houseless household is that which is normally found to be residing on the road side, pavements, in hume pipes under staircases, or in open, temple, mandaps, platforms and the like. Institutional households have been explained above. Those households which do not fall in the category of institutional household and houseless household have been categorised as normal households, The enumerator was required to indicate in the Household Schedule whether the household belonged to 'Institutional household' or 'Houseless household'. For institutional 'I' was written against the question 'Type of household' and 'O' was indicated in the case of houseless household. For normal household, no entry was required to be made.

The enumeration of institutional households was done in the manner the normal households were enumerated during the enumeration period from 9th February to 28th February, 1981. The houseless households were enumerated on the night of 28th February, 1981.

Scheduled Castes and Scheduled Tribes

Scheduled Castes and Tribes Seheduled are those found in the Notification of Scheduled Castes/ Scheduled Tribes Order (Amendment) Act, 1976 (108 of 1976). By this amendment, area restrictions for most of the Scheduled Castes and Scheduled Tribes have been removed. However, the area restriction still remains in respect of Dhobi (in Bhopal, Raisen and Sehore districts) : Kotwal and Pardhi (in Bhind, Dhar Dewas, Guna, Gwalior, Indore, Jhabua, Khargone, Mandsaur, Morena, Raigarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha Districts) and Kumhar (in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi and Tikamgarh districts) Scheduled Castes. Likewise Keer and Pardhi Scheduled Tribes are still restricted only in Bhopal, Raisen and Sehore districts ; Mina in Sironj sub-division of Vidisha district ; Panika in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi, and Tikamgarh districts; Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phanse Pardhi, Shikari, Takankar, Takia in (1) Bastar, Chhindwaia, Mandla, Raigarh, Seoni and Surguja districts, (2) Baihar tahsil of Balaghat district, (3) Betul and Bhainsdehi tahsils of Betul district, (4) Bilaspur and Kotghora tahsils of Bilaspur district, (5) Durg and Balod tahsils of Durg district, (6) Chowki, Manpur and Mohala Revenue Inspector's Circles of Rajnandgaon district, (7) Murwara, Patan and Sihora tahsil of Jabalpur, district, (8) Hoshangabad and Sohagpur tahsils of Hoshangabad and Narsimhpur district, (9) Harsud tahsil of Khandwa district, (10) Bindra-Nawagarh, Dhamtari and Mahasamund tahsils of Raipur district.

Persons belonging to the castes/tribes mentioned above found in the districts other than those where Scheduled have not been treated as scheduled castes or scheduled tribes as the case may be. It may be mentioned here that scheduled castes can belong to the Hindu or the Sikh religion only, while the scheduled tribes belong to any religion. The list of Scheduled Castes and Scheduled Tribes relating to Madhya Pradesh relevant to 1981 census has been given immediately after this note as Annexure—I.

Literates and Educated Persons :

A person who can both read and write with understanding in any language is treated as literate.

A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

The test for literacy was necessary only when the enumerator had any doubt about any person returning as 'literate'. The test for literacy was ability to read any portion of the Enumerator's Instruction Booklet and to write a simple letter. Ability merely to sign one's name was not considered adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not familiar, the respondent's word was taken as correct.

All children of the age of 4 years or less were treated as illeterate even if they might be going to school and had picked up reading and writing a few words.

Classification of workers by Industrial Category :

At the 1981 Census, the question which were canvassed in the Individual slip to elicit information on economic characteristics of the population were as follows :—

(i) Q. 14A Worked any time at all last Year ?

Yes
(H/ST/D/R/B/I/O) No.

Q. 14B If yes in 14A, did you work for major part of last year ? Yes(1)/No (2)

ii Q. 15A Main activity last year ?

Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

15B Q. 15B Yes–Any other work any time last year ?
Q. 14B No—Work done any time last year ?

Yes (C/AL/HHI/OW)/No
C/AL/HHI/OW

iii Q. 16–If No in 14A or 14B, seeking/available for work ? Yes (1)/No (2).

The above questions were formulated after detailed discussion at the Data User's Conference and technical group. At the 1961 and 1971 Censuses, the economic questions were based on different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work, respectively. Current status approach was thought to be irrelevant in the context of our country where usual status of a worker is considered to be more appropriate.

The above questions are in three parts and have been designed in such a way that first of all it attempts to divide the population into two broad groups viz.,

(1) those who have worked any time at all during the last year, (2) those who have not worked at all.

The latter group consist of the non-workers. This information is obtained in Q. 14-A. Having classified the population into two groups, the next attempt has been to classify those who have worked any time into Main workers and Marginal workers, on the basis of time spent on work as well as secondary work, if any, of the Main workers. If a person had worked for six months or more (180 days or more) he was treated as Main worker and and if the period of work was less than six months he was regarded as a Marginal worker. In Q. 15B details of secondary work or marginal work are obtained. Finally an attempt has been made to determine whether those who are non-workers or marginal workers are seeking or are available for work.

It will thus be seen that these questions on economic aspects have been so designed as to identify all workers, full time workers or seasonal workers or marginal workers and non-workers with reference to the activities during the last one year period prior to the date of enumeration.

The various terms and definitions used in collecting the economic data have been explained briefly in the following paragraphs.

Definition of work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

For persons on regular employment or engaged in regular type of work, temporary absence during the reference period on account of illness, holiday, temporary closure, strike etc., was not a disqualification for treating them as workers.

Persons under training, such as apprentices, with or without stipends or wages were also treated as workers. In the case of a person who had been offered work but had not actually joined, he was not treated as a worker. Rent receivers, pensioners etc., were not treated as economically active unless they also engaged themselves in some economic activity.

In all these questions, the reference period is the one year ; preceeding the date of enumeration. Certain types of work such as agriculture, household industry like *gur* making etc., carried on either throughout the year or only during certain seasons or part of the year, depending on the local circumstance. In all such cases the reference period has been the broad time span of the agricultural seasons preceeding the enumeration.

Main Workers :

The main workers are those who have worked for a major part of the year preceeding the enumeration. Main activity was reckoned in terms of time disposition. For example, if a person had worked as daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months, he was treated as a Main worker on the basis of total time spent on work and his main activity have been reckoned as Daily Wage Labourer since he spent major part of his time on work in this activity than as cultivator or agricultural labourer.

Marginal Workers :

Marginal workers are those who have worked any time at all in the year preceeding the enumeration but have not worked for a major part of the year. For example, if a person who is mostly doing household duties, or is mainly a student, or a rentier or a beggar and the like who is basically a non-worker had done some work at some time during the reference period, he was treated as a marginal worker.

Non-Workers :

Non-workers constitute of householders, students dependents, retired persons or rentiers, beggars, inmates of institutions, unemployed persons etc. They are persons who have not worked any time at all in the year preceeding the enumeration.

Main activity of workers ;

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work in the PCA at the 1981 census. A significant departure has, therefore, been made while presenting the data on economic activity which relate to only four broad categories indicated above as against nine industrial categories of the 1961 and the 1971 censuses. The nine categories of the 1971 census were—(i) Cultivator, (ii) Agricultural labourer, (iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, (iv) Mining, (v) Manufacturing, Processing and servicing with sub-categories—(a) At Household Industry and (b) Other than Household Industry, (vi) Construction, (vii) Trade and Commerce, (viii) Transport, Storage and Communications, and (ix) Other services. The correspondence between the categories of 1981 and 1971 are as under—

1981 Category	1971 Category
I	I
II	II
III	V(a)
IV	III,IV,V(b),VI,VII,VIII & IX

Cultivator :

For purposes of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnuts tapioca, etc. and pulses, raw jute and kindered fibre crop, cotton etc., and 'does not' include fruit growing, vegetable growing or keeping orchards or groves or working of plantation like tea, coffee, rubber, cinchona, opium and other medicinal plantations.

Agricultural Labourer:

Persons working in another person's land for wages in money, kind or share have been treated as agricultural labourers. An agricultural labourer has no risk in the cultivation and he has no right of lease or contract on land on which he works.

Household Industry:

Household Industry is defined as an industry conducted by the head of the household himself/ herself and or by the members of the households at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify and has to be registered under the Indian Factories Act.

Household Industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithing, tailoring etc. It does not include professions such as a pleader or doctor or barber or 'dhobi' even if such professions are run at home by members of the household.

Other workers:

All workers, i.e. those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry are 'other workers'. The type of workers that come under this category include factory workers, plantation workers, trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc.

ANNEXURE I

MADHYA PRADESH

[The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976]

Dated the 18th September, 1976

Scheduled Castes :

1 Audhelia.

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The History of the District Census Handbook could be traced from the 'Village lists' brought out for every district in 1901 and 'village statistics' for every district in 1911. But this was discontinued in 1921 and 1931. In 1941, however 'village statistics' were brought out by then Central Provinces and Berar Government. It was for the first time in 1951 the practice of bringing out a single volume known as the District Census Handbook, giving villagewise statistics and other census tables for the district at the cost of the State Government was initiated and is continuing since then.

The District Census Handbook, compiled by the Census Organisation on behalf of the State Government is one of the most important publications of the census and is widely used by planners, administrators, academicians and researchers.

The scope of the District Census Handbook has gone considerable change since 1951. In 1951 the District Census Handbook contained only the Primary Census Abstract and the Census tables. In view of the usefulness of this publication, improvements were made in 1961 by including non-census data like climate, agriculture, co-operation industry, education, health etc., as also an 'Introductory Note' for each district. Unfortunately, the desire to make the district census handbook more comprehensive delayed its publication. Therefore, in 1971, it was decided to publish the district census handbook in three parts in order to release the maximum data as and when finalised. Part A contained the Village Directory which gives villagewise non-census statistics of land use, area and amenities available within the village. Part B contained the villagewise Primary Census Abstract and Part C contained various administrative statistics. Part A and B were, however, published in one volume since it was economical to do so as data for both the parts became available early. Parts A and B were published separately in Hindi and English versions. Collection of data for Part C was cumbursome and it took unduly long time in its finalisation, and ultimately this publication had to be abondoned in view of the enormous delay in its printing.

In 1981 census, with a view to avoid delay in bringing out of DCH series, the part containing the administrative statistics has been dropped. Thus the present series of District Census Handbook consists of two volumes viz, DCHB Part A and DCHB Part B. Part A contains the village/Town Directory and Part B contains the Town/Villagewise Primary Census Abstract of the concerned district.

Part A–Village Directory contains information about the name of village, total area of village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food. land use, places of religious, historical and archaeological interest etc.

In addition there are four appendices to the Village Directory as under—

(1) Tahsilwise abstract of educational, medical and other amenities.

(2) Land utilization data in respect of census towns.

(3) Tahsilwise list of villages where no amenities are available, and

(4) Tahsilwise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population by ranges.

The last two appendices have been included for the first time in 1981 census. Appendix III will be helpful for planning input in areas/villages where basic infrastructure is lacking and Appendix IV will be helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to area development orientation programmes.

Similarly the Town Directory contains seven statements as below—

Statement I—Status and growth history.

Statement II—Physical aspects and location of towns.

Statement III—Municipal Finance.

Statement IV—Civic and other amenities.

Statement IVA—Civic and other Amenities in Notified Slums.

Statement V—Medical, educational, recreational and cultural facilities.

Statement VI-Trade, Commerce & Industry and Banking.

An additional statement IV-A is meant only for Class-I and Class-II towns giving the civic and other amenities in notified slums. This statement has been introduced for the first time in 1981 census.

Part B—The town/villagewise Primary Cenus Abstract gives the basic data like area of the village, occupied residential houses, total number of households, population by sex, as also the sexwise population of Scheduled Castes and Scheduled Tribes, literacy and population by sex into four broad industrial categories viz., cultivators, agricultural labourers, household industry and other workers, marginal workers and non-workers.

The inclusion of Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level is another important feature of the DCHB series of 1981 census.

An appendix containing Development Block-wise—'Vikas Khandwar' totals of PCA figures has also been included.

ANALYTICAL NOTE

Datia is the smallest district both in terms of area and population among the 45 districts in the State. The geographical area of the district is 2,038 sq. km. according to the figures supplied by the Surveyor General of India, which is 0.46 per cent of the total area of the State. It is situated in the northern part of the State and lies between latitude 25°28'N and 26°20'N and longitude 78°10'E and 71°45'E. It is bounded by Bhind and Gwalior districts in the north, Shivpuri and Jhansi districts in the south, again Gwalior and Shivpuri in the west and Jhansi in the east.

The following table gives the population, number of villages and towns as per 1981 Census.

TABLE 1

Population, Number of Villages and towns, 1981

Sl. No.	Tahsil	POPULATION									No. of Villages		No. of Towns
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Seondha Tahsil	133,700	72,805	60,895	122,095	66,477	55,618	11,605	6,328	5,277	226	195	1
2	Datia Tahsil	178,193	95,500	82,693	128,807	69,309	59,498	49,386	26,191	23,195	227	205	3
Total		311,893	168,305	143,588	250,902	135,786	115,116	60,991	32,519	28,472	453	400	4

There are two tahsils viz., Seondha and Datia and two towns being the headquarters of the respective tahsils. As indicated earlier, Datia district is the smallest among the 45 districts with 0.50% of the total population of the State. There are a total of 453 villages in the district of which 400 are inhabited and 53 uninhabited as against a total of 76,603 villages (71,429 inhabited and 5,174 uninhabited) in the State. The average population of a village in the district is 627 as against the State average of 582. It follows that the villages in this district are relatively more populous. 80.44% of the population is found to be living in rural areas of the district whereas the corresponding proportion for the State is 79.71 per cent. The percentage of population living in rural areas of Seondha and Datia tahsils works out to 91.32 and 72.79 respectively.

There are only two towns in the district of which Datia continues to be a class II town right from 1901 with a population of 24,071 in 1901 and 49,386 in 1981. Datia had been a stagnating town from 1901 to 1961 and during the span of 60 years there has been an addition of 5,361 Persons. It is only after the formation of the new State of Madhya Pradesh on 1st Nov., 1956 there seems to have been some administrative shake-up in the district which probably brought momentum in the growth of urban population because of the fact that Datia being the headquarters town of Datia district. The other town in the district is Seondha being the tahsil headquarters of Seondha. Seondha was a town since 1901 and continued to be treated as such till 1951. In 1961 and 1971 it was declassified as rural as it did not qualify the eligibillty test for town. How-

over, in 1981, Seondha fulfilled the necessary criterion for being treated as a town and therefore it has been classified as such.

The following table gives the decadal change in distribution of population.

TABLE 2

Decadal change in the distribution of population

Tahsil	Population						Percentage decadal Variation 1971-81		
	1971			1981					
	T	R	U	T	R	U	T	R	U
1 Seondha	108,356	108,356	..	133,700	122,095	11,605	+23.39	+12.69	..
2 Datia	146,911	109,475	37,436	178,193	128.807	49,386	+21.29	+17.66	+31,92
Total	255,267	217,831	37,436	311,893	250,902	60,991	+22.18	+15 18	+62.92

Datia district has recorded a growth-rate of 22.18 per cent during the decade 1971-81 as against 25.27 per cent growth for the State as a whole The growth rate of population in the previous decade i.e. 1961-71 was 27.34 per cent which has come down to 22.18 per cent. This is a happy sign indeed which probably is due to the effective family welfare measures adopted by the people in this district. This effect has been relatively more in Datia tahsil as compared to that of Seondha tahsil. This is evident from the fact that the growth-rate of population in Datia tahsil during the decade 1971-81 has been 21.29, as against 26.21 per cent in the previous decade i. e. 1961-71 while in Seondha tahsil it is 23.39 per cent in 1971-81 as against 28.90 per cent during the previous decade.

If we look back to the growth-rate of population in earlier decades, it is observed that there has been a decline in population of the district during the decades 1901-11 and 1911-21 as shown in the inset below :—

TABLE 2.1

Census year	Population	Decadal variation	% Decade Variation
1901	161,064	..	..
1911	143,220	—17,844	—11.08
1921	137,714	— 5,506	— 3.84
1931	147,412	+ 9,698	+ 7.04
1941	163,336	+15,924	+10.80
1951	164,314	+ 978	+ 0.60
1961	200,467	+36,153	+22 00
1971	255,267	+54,800	+27.34
1981	311,893	+56,626	+22.18

This fall in population in these decades is due to the onslaught of calamities. In the earlier part of the 1901-11 decade, the district was in the grip of severe famine which took a heavy toll of population. This has been attributed to the poor land management which is corroborated by the statement* given by the then Ruler of the area i.e. Datia State–

"From all these facts it would be seen that the cultivating classes had no chance of thriving in the State, a reason which accounts for reduction of 25,000 souls in the population of the State when compared with the Census of 1901.."

The fatal influenza epidemic of 1917-18 which was widespread in the region had its scathing blow which resulted in a severe loss of population during the decade 1911-21. The loss of population was slowly made up by 1931.

The rural-urban differential in the growth of population in the district during 1971-81 is very wide, the rural growth-rate being 15.18 per cent whereas in urban areas, it is 62.92 per cent. Seondha tahsil has recorded a low growth-rate during the decade 1971-81 as compared to that of Datia tahsil which in fact is due to Seondha village having been treated as urban in 1981, its population has been excluded from the rural population of 1981 which forms the denominator in working out the growth-rate, while the numerator being the 1971 rural population, includes it. In Datia tahsil also, the rural / urban differential in growth-rate of population during 1971-81 is also very wide, the rural growth-rate being 17.66 per cent while in urban areas, it is 31.98 per cent.

The following table gives the distribution of villages by population ranges:—

TABLE 3

Distribution of villages by population ranges

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less then – 200	70	17.50
200 – 499	154	38.50
500 – 1,999	167	41.75
2,000 – 4,999	8	2.00
5,000 – 9,999	1	0.25
10,000 +	..	..
Total	400	100.00

Datia is also one of the districts in the State with predominantly small-sized villages. 56 per cent of the total villages in the district have a population less than 500 in each. The majority of the villages are in the population range 500-999. The number of villages with a population 2,000 and above is merely 1 which accounts for 2.25 per cent of the total number of villages in the district. The pattern of distribution of villages in the two tahsils of the district is more or less identical.

*Extract from the Report of Maharaja Lokendra Govind Singh Bahadur regarding Administrative Reforms in Datia from 1st Aug, 1914 to 31 July, 1916 on the occassion of the visit of Agent to the Governor General in Central India on 27 Sept. 1916.

The following table gives the distribution of villages by density.

TABLE 4

Distribution of villages by density

Range of density (Per sq. km.)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
Less than 10	8	2.00
11- 20	..	..
21- 50	25	6.25
51-100	91	22.75
101-200	207	51.75
201-300	56	12 50
301-500	14	3.50
501+	5	1.25
Total	400	100.00

The density of population per sq. km. in rural areas of the district works out to about 124 as against 95 for the rural areas of the State as a whole. Majority of the villages in the district lie in the density range of 101 to 200 persons per sq. km which account for 51.75 per cent of the total villages in the district. Next to follow are 91 villages which lie in the density range of 51 to 100 and another 50 are in the density range 201-300 persons per sq. km. It follows that 86.90 per cent of the villages in the district lie in the density range of 51 to 300. Only 5 of the remaining have a density of 501 and above. 90.77 per cent of the villages in Seondha tahsil lie in the density range of 51 to 300 persons per sq. km. as against 83.42 in Datia tahsil. Thus the villages in Seondha tahsil are found to be relatively more thickly populated as compared to that of Datia tahsil.

The following table gives the proportion of scheduled caste population to total population in the district and tahsils.

TABLE 5

Proportion of Scheduled Castes population to total population in the villages

Percentnge range of Scheduled castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	32	8.00
0–5	20	5 00
6–10	25	6.25
11–15	26	6.50
15–20	49	12.25
21–30	89	22.25
31 and above	159	39.75
Total	400	100.00

There are 32 out of a total of 400 villages in the district which do not have in them any scheduled castes population. It is, however, interesting to note that higher the percentage range of scheduled castes population to total population, larger the number of villages fall in them. This is a peculiar phenomenon which leads us to conclude that as the villages grow in size, the concentration of scheduled castes population also increases in a greater proportion. Majority of the villages in this district have in each about one-third of its population belonging to scheduled castes. Such villages account for 39.75 per cent of the total number of villages in the district. Both the tahsils of the district exhibit more or less a similar phenomenon.

The following table gives the proportion of scheduled tribe poplation to total population in the villages.

TEBLE 6

Proportion of Scheduled Tribes Population to Total Populaton in the Villages

Percentage range of Scheduled Tribes Population to total Population	No. of Villages in in each range	Percentage of Villages in each range
1	2	3
Nil	339	84.75
0–5	27	6.75
6–15	23	5.75
16–25	5	1.25
26–35	3	0.75
36–50	1	0.25
51 and above	2	0.50
Total	400	100.00

A reverse trend is visible in the case of scheduled tribe population to what was observed for scheduled castes. That is to say that there are fewer villages with greater concentration of scheduled tribes population. There are as many as 339 out of a total of 400 villages in the district which do not contain any scheduled tribes population. This accounts for 84.75 per cent of the total number of villages in the district. This is due to the fact that merely 1.37 per cent of the total population in the district consits of scheduled tribes as against 22.97 per cent in the State. The position is somewhat different in the two tahsils. Seondha tahsil has relatively very small population of scheduled tribes found in only 14 villages whereas in Datia tahsil scheduled tribes population is spread over in 47 out of a total of 205 villages but in a very small proportion. Only in 2 villages of Datia tahsil the concentration of scheduled tribes population is more than 50 per cent.

The following table gives the proportion of scheduled castes and scheduled tribes population in towns.

TABLE 7

Proportion of Scheduled Castes/Scheduled Tribes population in towns

Towns	Total population	Total Scheduled Castes Population	Tatal Scheduled Tribes Population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6
Datia	49,386	7,098	436	14.37	0.88
Seondha	11,605	1,956	21	16.85	0.18
Total	60,991	9,054	457	14.84	0.75

Both the towns have a sizeable population of scheduled castes with 14.37 per cent of the total population in Datia and 16.85 per cent in Seondha. The population in these towns are well served by the traditional working class like the Chamar, Kumhars, Basod and Bhangis which are the main scheduled castes in this area. The scheduled tribes are very few in number in both the towns as compared to their population size. They account for less than 1 per cent of the total population in each.

The following table gives the literacy rate by population ranges of villages.

TABLE 8

Literacy rate by Population ranges of villages

Range of Population	No. of villages in each range	Literacy rate
1	2	3
Less than 200	70	18.21
200 - 499	154	21.43
500 - 1,999	167	22.81
2,000 - 4,999	8	32.84
5,000 - 9,999	1	28.13
10,000+	..	..
Total	400	23.56

It may be noticed that higher the population range of villages, higher is the literacy rate. In other words as the villages grow in size, literacy rate is found to be increasing. This is obviously because of more educational facilities being available in bigger villages. The number of big villages in the district is, however, small. The literacy rate in rural areas of the district works out to 23.56 per cent as against the State average of 21.22. The rural areas of the district do not seem to be lagging behind in terms of literacy. Yet there is much to be desired. A similar situation obtains in both the tahsils of the district.

The following table gives th literacy rates for town,

TABLE 9

Literacy rates for towns

Name of Towns	Literacy rates
1	2
Datia	46.35
Seondha	37.72
All Towns	44.70

The literacy rate in urban areas of the district works out to 44.70 per cent which is far below the average of 54.02 per cent for urban areas of the State as a whole. The literacy rate in Datia town is relatively high being 46.35 per cent as compared to that of Seodha where it is 37.72. This is again because Datia is comparatively a bigger town than Seondha, the educational facilities available being more in the former than that in the latter.

Tables 10 gives the literates, workers, non-workers, scheduled caste/tribe population in the district and tahsils by total, rural and urban areas.

The total population of the district is 311,893 being the smallest with 0.60 per cent of the total population of 52,178,844 in the State. The district has registered a growth of 22.18 per cent in its population during 1971-81 which is little lower than the growth rate of 25.27 per cent for State.

Sex-ratio

The male population is 168,305 as against 143.588 famales which means that the sex-ratio i. e. the number of males per 1,000 females is 853. Datia is one of the few districts in the northern part of the State which is characterised with very low sex-ratio. There has been a declining trend in the sex-ratio ever since 1911 as will be evident from the following figures.

Census Year	Sex-ratio	Census Year	Sex-ratio
1901	923	1951	902
1911	928	1961	898
1921	925	1971	881
1931	906	1981	853
1941	909		

The sex-ratio in rural areas of the district works out to 848 whereas in urban areas it is 876. This is a peculiar featute of this district that the sex-ratio is found to be low in rural areas as compared to the majority of the districts where it is generally low in urban areas.

80.44 per cent of the population of the district still lives in villages as against the State average of of 79.71 per cent.

Scheduled Castes / Scheduled Tribes

About one-fourth of the population in the district belongs to scheduled castes and a mere 1.37 per cent of the population constitue of scheduled tribes. There are 76,725 scheduled castes in the district as against 45,856 in 1971 thus there has been an increase of 67.32 per cent during the decade 1971-81. The phenomenal growth in the scheduled castes population in this district seems to be due to the area restrictions having been removed in respect of a large number of scheduled castes. For example Barahar or Basod, Jatav (a sub-caste of Chamar). Khangar, Khatik, Koli or Kori etc. were not scheduled in this district as per Scheduled Castes and Scheduled Tribes lists Modification Order 1956 (Vide M. H. A. Notification SRO 2477-A dated the 29th Oct. , 1956 and subsequent amendments) which was followed at the 1971 census and therefore, these castes were not treated as seheduled castes then. The above mentioned castes have now been scheduled in the district as per Scheduled castes and Scheduled tribes (Amendment) Act, 1976 and are also found in good number. The inclusion of these castes in 1981 has therefore resulted in phenomenal growth of Scheduled castes population in the district. The list of scheduled castes and scheduled Tribes followed in 1981 has been given as annexure I.

As regards distribution of SC/ST population among the tahsils, it it found that Datia tahsil has relatively larger proportion of both.

Literacy

The percentage of literates to total population in the district has gone up from 21.34 per cent in 1971 to 27.70 per cent in 1981. There is a wide disparatity in the literacy rates among males and famales. Literacy rate among males is 40.87 whereas it is 12.26 among females in 1981 as against 33.00 per cent and 8.10 per cent among males and females respectively in 1971.

The literacy rate in rural areas of the district is 23.56 per cent and in urban areas it is 44.70 per cent. The wide disparity between rural and urban areas is obviously because of relatively more educational facilities being available in urban areas as compared to that in rural areas. Also it is partly becuase of the lack of awareness and reluctancy of the people in rural areas in sending their childern to schools for education. The disparity in the literacy rate among males and females in urban areas is not very alarming.

Workers and Non-Workers

The definition of workers, main workers, Marginal workers and non-workers has been given in the note relating to concepts and definitions preceding this analytical note.

The participation rate, i. e. the percentage of workers to total population in the district is 32.69 per cent (50.67 per cent for males and 11.62 per cent for females) whereas the State avarage is 42.22 per cent (4.48 per cent for males and 80.64 per cent for females) . The low participation rate in this district is a peculiarity of the northern region of the State. This may be partly due the fact that the district produces more of rabi crops than Kharif ones and rabi cultivation requires relatively lesser manpower, than kharif crops, like rice etc. The wide difference between the male and female participation rates is another feature of this region. This seems to be partly due to the social stigma for females to report themselves as working even though the womenfolk may be giving helping hand to the menfolk in cultivation, livestock rearing etc. The participation rate in rural areas of the district is relatively more than that in urban areas.

Main workers account for 30.43 per cent of the total population in the district as against the State average of 38.41. The percentage of marginal worker to total population is merely2.26 which is one of the lowest among the 45 districts in the State. The again corroborates the fact that females who are mainly

housewives feel reluctant to report as workers even though their participation in some economic activity is marginal.

The position regarding workers and main-workers in Seondha and Datia tahsils is more or less similar to that obtaining in the district except that the proportion of workers and marginal workers is relatively more in rural areas of Datia tahsil as compared to that in Seondha tahsil.

Non-workers constitute of housewives, students beggars, vagrant, rent-receivers, depenents etc. which form the bulk of the population in the district. They constitute 68.11 per cent of the total population as against 57.08 per cent for the State as a whole.

टिप्पणी :—

(1) जिले का कुल क्षेत्रफल भारत के सर्वेयर जनरल से प्राप्त अस्थाई भौगोलिक क्षेत्रफल है।

(2) नगरीय क्षेत्र के आंकड़े स्थानीय संस्थाओं से प्राप्त किये गये हैं।

(3) जिले का ग्रामीण क्षेत्रफल, जिले के कुल क्षेत्रफल में से स्थानीय संस्थाओं से प्राप्त नगरीय क्षेत्रफल को घटाकर निकाला गया है।

(4) प्रत्येक तहसील का कुल क्षेत्रफल पटवारी पत्रकों के अनुसार है। ये आँकड़े आयुक्त, भू-अभिलेख, मध्यप्रदेश से प्राप्त किये गये हैं।

(5) निम्न संक्षेप्तों का उपयोग नगरों की नगरीय स्थिति दर्शाने हेतु किया है।

न.पा. — नगर पालिका

अ.क्षे. — अधिसूचित क्षेत्र

Note :-

(1) The total area figures given for the district is provisional 'Geographical Area' as supplied by the Surveyor General of India.

(2) The urban area figures are those supplied by the local bodies.

(3) The rural area of the district has been derived by subtracting the urban area figures supplied by the local bodies from the total area figures of the district.

(4) Total area figures of tahsils are according to village papers as supplied by the Commissioner of Land Records, Madhya Pradesh.

(5) Following Abbreviations have been used to denote the civic status of towns

M = Municipality.

N.A. = Notified Area
