	(a) Alphabetical list of villages	100
	(b) Village Directory Statement	102
11.	**Siliguri Police Station**	
	(a) Alphabetical list of villages	116
	(b) Village Directory Statement	118
12.	**Phanshidewa Police Station**	
	(a) Alphabetical list of villages	130
	(b) Village Directory Statement	132
13.	**Kharbari Police Station**	
	(a) Alphabetical list of villages	146
	(b) Village Directory Statement	148
Appendix	**I** Police Stationwise Abstract of Amenities	160
Appendix	**II** Land utilistation data inrespect of Non-Municipal Town	162
Appendix	**III** Police Stationwise list of villages where no amenities are avaliable	163
Appendix	**IV** List of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by ranges	167

SECTION II—TOWN DIRECTORY

Statement	**I** Status and Growth History	188
Statement	**II** Physical Aspects and Location of Towns, 1979	190
Statement	**III** Municipal Finace, 1978-79	192
Statement	**IV** Civics and other amenities, 1979	194
Statement	**IVA** Civics and other amenities in Notified slums, 1979	194
Statement	**V** Medical, Educational, Recreational and Cultural facilities, 1979	196
Statement	**VI** Trade, Commerce, Industry and Banking, 1979	198
Appendix	Towns showing their outgrowth with population	. .

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contnined important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report., administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in board ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objetive in mind. The new item on approach to the village is to have an idea about the villages in thc district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total populatioa has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic ann other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town lavels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. This district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Goverement and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, IAS, the Director of Cenaus Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Direcrorates havc been scrutinised in the Social Studies Division at the head quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Village and Town Directory included in the publication relate to the district of Darjiling. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census Operations in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shti N. Rama Rao, Asstt. Registrar General for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Darjiling (Principal Census Officer) and his innumerable colleagues including the Charge Superintendent. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of the data have been done by the Central Tabulation Unit of this office under the supervision of Shri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operations (since retired) and later under Sri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have

been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Shri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Shri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among the officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Choudhury, WBCS., and Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to M/s. Mili Art Press, 36, Imdad Ali Lane, Calcutta-700 016 for the printing of this publication.

Calcutta

SUKUMAR SINHA
Joint Director of Census Operations,
West Bengal

Number of Towns			291	7

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows:

(a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

(b) All other places which satisfied the following criteria :

(i) A population of 5,000 as the minimum,

(ii) Density per square kilometre would be a minimum of 400, and

(iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.'

Apart from town/citp the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrawths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfils the last two criteria of being an urban unit, but it falls short on the population front, *i.e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

CENSUS HOUSE

We defined the Census house in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-resinential purposes or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use."

HOUSEHOLD

We defined household as follows : "The household in a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both".

SCHEDULED CASTES/SCHEDULED TRIBES

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled castes or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to

ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheuled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

LITERATES

In the census terminology, a persons who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the ehildren of the age of four years or less were treated at illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorted. This information is vital for manpower planning.

MAIN WORKERS

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive or each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, *viz.* main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly . . . . . There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary

work of those persons. . . . . .participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census any one who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as ie 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been eategorised in four distinct parts *viz.* (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workes in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workes were divided in nine categories.

MARGINAL WORKERS

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

NON-WORKERS

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired Persons, (iv) Beggers etc., (v) Inmates of Institution, (vi) Dependents and (vii) Others.

BRIEF HISTORY OF THE DISTRICT CENSUS HANDBOOK

The District Census Handbook was started printing from 1951 Census. The Government and the Development agencies felt necessity of the data at micro-level for the social and economic development, all over the country during the post independence era. Until then, the compilation of data was limited to district, police station and town levels only. In 1951, it was extended up to the mouza level.

The publication programme of District Census Handbook of 1951 continued undisturbed in 1961 also and it was enlarged with the introduction of official statistics.

The major changes in the District Census Handbook publication were introduced in 1971. The District Census Handbook 1971 was divided into three parts *viz.* Part XA, Part XB and Part XC. The first part dealt with Village and Town Directories. In Village Directory the villagewise data on amenities available was given and the information in respect of each town was given the Town Directory. The Part XB consists of Villege and Townwise, (Wardwise for Municipalities, Town Committees and all Statutory Towns) Primary Census Abstract of the concerned district.

The third part *i.e.* Part XC dealt with the non-census data and social, economic and cultural tables. All the three parts were printed either in two volumes *i.e.* Part XA & XB and Part XC or in three volumes Part XA, Part XB and Part XC separately according to the size of districts.

The scope of District Census Handbook 1981 has been enlarged considerably specially in relation to the amenities available in the villages and towns and landuse pattern in villages and non-municipal towns. The collecton of data on recognised slums of Class I and Class II towns of the state is a new addition of 1981 in

the Town Directory Portion of the District Census Handbook. The format of the primary census abstract have been restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips is an important addition. Workers have been categorised in four sectors instead of nine in 1971.

SCOPE OF VILLAGE DIRECTORY

A twenty column format was canvassed during 1981 Census period for collection of data from each and every mouza within each police station. This is called village directory. The mouzas within a police station have been represented in order of their location codes. This twenty column format has been divided in four parts. The column nos. 1—4 represent general information, columns no. 5—14 represent amenities available, columns nos. 15 to 19 are meant for landuse pattern and the column 20 contains special information in respect of historical, archaeological and religious interest about the mouza. At the end of each police station, the totalling has been done for col. nos. 3 to 6 and 15—19. If any amenity is not available in the village a dash '—' has been marked in the relevant column and next to it the distance of the nearest place where the facility is available has been given in the broad ranges.

The following systems were followed for indicating educational institutions, if ans, located within the villages. The abbreviations used for the educotional institutions are also given below :

1. Primary of Elementary School (P)

   All nursery, kindergarten, pre-basic, pre-primary, Junior Basic School upto Class V and Primary School upto Class IV have been inclueed in this group.

2. Junior Secondary or Middle School (M)

   All schools from Class V to Class VIII including Junior Madrasa upto Class VIII have been noted in this group.

3. Secondary School (H)

   All schools upto Class X including the schools providing Senior Cambridge Course and High Madrasa upto Class X have been treated as high school.

4. Higher Secondary School (PUC)

   All educational institutions where the education is imparted for Class XI and XII have been marked for this group.

While collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any competent authority and the specific classes of a school upto which recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools, with primary classes, the relevant groups of classes have been treated separately, *e.g.*, a composite school having classes upto XII (Twelve) has been divided as follows :

Classes from I to IV	..	(P)
,, ,, V to VIII	..	(M)
,, ,, IX to X	..	(H)
,, ,, XI to XII	..	(PUC)

It is to be noted that by dint of the above kind of division, we are not going by how many educational institutions physically exist within a village, but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institution they belong to. For example, the grouping marked at PUC *i.e.* Class XI and Class XII may physically belong to a college, but for the purpose of the Village Dircetory, these two classes taken together has constituted one unit of PUC., the rest of the classes has been treated as a college.

5. College (C)

   Any college with the disciplines of Arts, Science and Commerce have been grouped here.

6. Industrial School (I)

7. Training School (Tr)

8. Adult Literacy Class/Centre (AC)

9. Other Educational Institution (O)

   (Sanskrittole, Senior Basic School, Makhtab etc. have been noted as others).

It is needless to mention once again that in sl. no. 5 to 9 the institutions having recognition from any competent authority have been taken into account.

In case of more than one institution of a type in the village, the number of institutions have been indicated in brackets. If any of the educational institutions as stated above is located in a village the existence of other types of educational institutions located in nearest village(s) have not been collected. Suppose, a primary school is functioning in the village, but there is no middle or high school in the village under feference, in this case we have not indicated the distance of the nearest place where a middle school or a high school exists. Similarly, if there is a high school only a particular village, no efforts are given for collecting distance of a nearest place where a primary or middle school exists. The distance by ranges of a nearest place where educational facility is available have been collected from villages having no facility of any of the above mentioned nine categories of educational institutions.

In the medical fields there are a variety of amenities. These are indicated with abbreviations whether within the village exists any of the following medical institutions :

Hospital	H
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
TB Clinic	TB
Registered Private Practitioner	RP
Community Health Worker	CHW
Others	O

The information have been collected in respect of those institutions only which are organised and/or aided by Government/Semi-Government/Public bodies/locol bodies/social service agencies like the missioneries. The institutions run by private individuals have not been covered. But the information on Registered Private Practitioners of any branch have been noted. If there are more than one facility in the village, the same have been indicated in appropriate abbreviations. In case of more institutions of a type in the village, the number of institutions have been indicated against the abbreviations in bracket where no amenity is available within the village, a dash (—) has been shown in relevant column and any of the facilities as given above available in a nearest place have been noted showing the distance in broad ranges.

The sources of drinking water available within the village have been indicated by codes as follows :

Tap	—	T	Fountain	—	F
Well	—	W	Canal	—	C
Tank	—	TK	Lake	—	L
Tubewell	—	TW	Spring	—	S
Hand Pump	—	HP	Nallah	—	N
River Water	—	R	Others	—	O

If there are more than one source of drinking water in the village, the same have been indicated in appropriate abbreviations in the relevant column. In absence of any source of drinking water in the village, a dash '—' has been given in the relevant column and next to it the distance in broad ranges of the nearest place where any of the aforesaid facilities is available has been given.

The Post & Telegaraph amenities available within the village have been collected by codes as given below. The Post office includes Branch and Sub Post Offices also. The villages having no facilities in respect of Post & Telegraph, have been marked by dash (—) in the relevant column and next to it the distance in broad ranges of the nearest place where any of the facilities as given below is available has been noted.

Post Office	—	PO
Telegraph Office	—	TO
Post & Telegraph Office	—	PTO
Telephone connection	—	Phone

The information on hat, market have been collected for each vallage. The day(s) of the week on which market/hat is held have been taken into account. Where the market/hat is held daily in a village, it has been recorded as "daily". In absence of hat/market in the village, the distance in broad ranges of the nearest place have been shown where it is held.

It has been looked whether the village is served by any mode of public transport like bus, rail and waterways and the abbreviations adopted for this purpose are given below :

Bus	BS
Railway Station	RS
Navigable Waterways (including river, canal etc).	NW

If there is more than one facility in the village, these haven been indicated separately by individual codes as given above. If no facility is available within the village, a dash (—) is shown in the column and next to it in brackets, the distance in broad ranges of the nearest place where the facility is available is given.

Approach to the village refers to the state of roads leading to the village from the communication centre. The approach to village has been indicated by following abbreviations :

Pucca Road	PR
Kuccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal)	NW

If there is more than one approach to a village, the same has been given by appropriate codes in the relevant column.

The name of the nearest town and its distance in kilometers from the village has been collected. Tho nearest town so indicated may not be located within the state of West Bengal, this may be located in the neighbouring state also. The operational conveniences have only been taken into consideration while collecting this information. Only those towns have been considered, which have been declared urban according to 1981 Census.

The facilities of power supply have been collected from the village where it is available in the following codes :

Electricity for Domestic Consumption	ED
Electrieity for Agricultural Consumption	E. Ag.
Electricity for other purposes like industrial, commercial etc.	EO
Electricity for all purposes listed above	EA

Where the power is consumed for more than one purpose, this has been indicated accordingly.

The staple food, only in terms of grains, consumed by the majority population of the village during the major portion of the year have been recorded. The grains may be rice, wheat, jawar, maize etc. Sometimes a combination of these grains have been consumed by the villagers as the staple food. In that case, it has been indicated as reported.

The land use patters of the village has been presented in five broad categories. These are as follows :

1. **Forest** . . This include all lands classed as forests under any legal enactment dealing with forests. This may be owned by the state or by any private individual. Land maintained as potential forest land have also been treated as forests. Any area used for any other purpose but situated within the forest so defined, is treated as 'forest'.

2. **Irrigated land** . . It relates to the land which has actually been irrigated under different types of irrigation for the purpose of cultivation. The sourcewise break-up of area in hectares under different systems of irrigarion has been given. The codes in respect of sources have been noted as under :

Government Canal	GC
Private Canal	PC

Well (without electricity)	W
Well (with electricity)	WE
Tube well (without electricity)	TW
Tube well (with electricity)	TWE
Tank	TK
Lake	L
River	R
Waterfall	WF
Others	O

3. Unirrigated land .. All areas under rainfall crops or under dry rice cultivation have been classified as unirrigated areas.

4. Culturable waste .. It is defined as the lands within cultivated holdings have not been cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles. Land under thatching grasses, bamboo bushes and other groves for fuels etc., which are not included under orchards or forests and land grazing, meadows have also been included in this category.

5. Area not available for cultivation .. This stands for barren, uncultivable land and land put to non-agricultural use. Barren and unculturable lands cover land within cultivable holdings which cannot be brought under cultivation without incurring a high cost. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, *e.g.* rivers and canals etc.

Any important place of religious, historical and archaeological interest within the village have also been mentioned in the village directory. Information on the number of copies of newspapers coming in the village, and motor cycles/scooters/cars/Jeep and tractors available in the village have been mentioned accordingly and denoted the following codes :

Newspapers	N
Motor cyeles/scooters	M
Cars/Jeep	C
Tractor	T

In addition to the information that have been collected through Block Development Office, the following four appendices to the Village Directory have also been compiled.

I. Police Stationwise abstract of educational, medical and other amenities.

II. Land utilisation data in respect of non-municipal (non-statutory) Ceosus Towns.

III. Police Stationwise list of villages where no amenities are available.

IV. Police Stationwise list of villages according to the proportion of scheduled castes/scheduled Tribes population by ranges.

The first two appendices have been provided for obtaining actual position regarding various amenities available in the police station and as well in the district and the land utilisation pattern in the non-municipal census towns which nave been treated urban by virtue of the criteria prescribed for urban units. Appenidix-III has been devised for planning input in areas where basis infra-structure is lacking. Appendix-IV has been prepared for the purpose of planning of welfare programmes for scheduled castes and scheduled tribes at micro-level, particularly in relation to the area development oriented programmes.

SCOPE OF TOWN DIRECTORY

The Town Direetory has been prepared for all the staturory towns like Municipal Corporations (MC), Municipalities (M), Notified Areas (NA), Town Committees (TC) and Contonment areas as well as the non-statutory census towns (NM) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or organised slums having a population of 50,000 or more. The towns having outgrowths have been identified with the asterisk (*) and the information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column.

The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1.	Population one lakh and above	.. Class I
2.	Population from 50,000 to 99,999	.. ,, II
3.	Population from 20,000 to 49,999	.. ,, III
4.	Population from 10,000 to 19,999	.. ,, IV
5.	Population from 5,000 to 9,999	.. ,, V
6.	Population less than 5,000	.. ,, VI

A brief discussion on seven statements is given below :

Statement I

This statement provides some basic data based on the primary census abstract. It deals with the status and growth history of the town. The column nos. 1 to 5 gives information on class, civic status, name of the town and its location code with the police station the town belongs to. The area of the town in square kilometre has also been given. The column nos. 6 to 19 give demographic information of the town. Where the town did not have any urban status for the reference year (s), a 'dash' (—) has been given under these columns (s). The decadal growth in percentage has been shown below the population figures from column nos. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

Statement II

The statement deals with the physical aspects and Location of the town as on April 1980. This statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns. In that case the information noted from the nearest place where it is available. This alternative however,

could not be followed uniformly due to the fact that the data are not available for the nearest place even. In such cases the information not available (NA) has been stated. In the second part *i.e.* in column nos. 6 to 12 the locational particulars have been stated for the referrent town.

Statement III

Data on municipal finance for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have been shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (NA)

Statement IV

This statement contains 19 columns. The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referrent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referrent town gets services has been given. In absence of any of the public amenities as referred to in cols. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

Statement IVA

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in Class I and Class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum.

Statement V

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, Semi-Government, Local Bodies, Charitable Institutions and Social Service Agencies like Missionaries etc. have been counted. Where these facilities were not available, the distance of the nearest place where these facilities are available has been noted. The Family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The maternity and Child Welfare Centres, Veneral Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and indicated in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as a Village Directory has been followed in respect of the school and college education. The column 6 includes educational institution like Teachers' Training College, Basic Training College etc. The information on short-hand, type-writing and other vocational training institutions have been given in column 10. In this case only the recognised institutions have been considered. The "recognised" means recognised by any statutory authority—like the Education Department, Commerce Department, Labour Department etc., of the Government or Semi Government or autonomous bodies, public sector projects like municipality, corporation etc.

The vocational institutions like Music/Dancing school, Art College, Painting/Clay modelling institutions etc. have been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been taken in col. nos. 15 under "Others". The columns 17-20 deal with the recreational and cultural facilities of the town.

Statement VI

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and Non-agricultural Credit Societies.

The details of abbreviations used in different statements of Town Directory are given below :

BRIEF HISTORY OF THE DISTRICT

The district has been so named after its Chief town Darjiling, a picturesque-hill-resort of which there are few equals in the whole world. The name Darjiling is thought to be a derivation of 'Dorjeling', meaning the place of the Dorje, the majestic thunderbolt of the Lamaist Religion. In fact the famous Buddist Monastery standing at the top of the observatory hill was known by this name. The district was part of the dominions of the Raja of Sikkim upto the beginning of the 18th century The present Kalimpong Sub-division of the district was taken from the Raja of Sikkim by the Bhutanese in 1706. The Gorkhas seized power in Nepal and invaded Sikkim in 1780 and overran Sikkim next thirty years. The present district of Darjiling is a creation of the nineteenth century by the British Indian Government in the affairs of neighbouring Himalayan States. In 1817, the East India Company struggled with a Himalayan State on behalf of the Raja of Sikkim. The Raja of Sikkim restored the country between the Mechi and the Tista rivers. This was the result of the reats of Titaliya of 1817. Ten years after the treaty, disputes on the Sikkim-Nepal frontiers arose and the hen Governer General sent two officers, viz. Captain Lloyd and Mr. Grant. Captain Lloyd spent six days in ebruary, 1829 in "the Old Goonkha station of Dorjeling". He was attracted by its advantages as a site r a sanatorium. Mr. Grant reported accordingly to the Governor General, Lord William Bentink stating numerous advantages for a sanatorium. The Governor General then deputed Captain Herbert, the

Dy. Surveyor General to examine the country. The court of Directors approved the project. General Lloyd was directed to start negotiations with Raja of Sikkim and he succeeded in obtaining the execution of a deed grant by the Raja of Sikkim on 18th February, 1835.

The district was in the Rajshahi Sub-division till October, 1905 and as a sequence of the Bengal partition in 1905, the district was retransferred to the Rajshahi Division in March, 1912.

The district was formerly a Non-Regulation district, that is, Acts and Regulations did not come into force in the district in line with the rest of the country unless they were extended to it. Darjiling had no representation in the legislative council. It was excluded and declared a backward tract. In 1935, the district was made partially excluded area by act.

The freedom movement in the district was much tempered to the incident of attempt on the life of Sir John Anderson, the Governer of Bengal at the lebong race course on May 8, 1934 by Bengali terrorists.

PHYSICAL ASPECTS

The district Darjiling lies between 26°31′ and 27°13′ north latitude and between 87°59′ and 88°53′ east longitude. In shape, the district is an irregular triangle. The northern boundary commences on the West at the peak of Phalut nearly 3657.6 metres high, the trijunction of the boundaries of Nepal, Sikkim and India. This boundary runs east from Phalut along a ridge descending to tne Rammon river. From there, the boundary follows the course of that river until it joins the Ranjit and then follows the great Ranjit until it reaches the Tista. Proceeding east of that junction the boundary follows the Tista upstream until its junction with the Rangpochu, thence it proceeds first up the Rangpochu and then up the Rushattchu, thence the Rushettchu and Sikkin and Bhutan boundary as marked by pillars to the Nechu, then the Nechu to its junction with the Dochu or Jaldhaka ; thence it that river southward until the Jalpaiguri district is reached in the Khumani forest.

On the West the district is bounded by Nepal. From Phalut the western boundary follows the southward ridge until it joins the Mechi river which continues as the boundary right upto the plains, thence by the boundary of Nepal upto the south western corner of the district. On the south lies the district of Purnea and West Dinajpur intercepted by the Mahananda river and on the east the district is bounded by Bangaladesh and the Jalpaiguri district. The area of the district is 3149.0 square kilometres. The natural features consists of a portion of the out-lying hills of lower Himalayas and a stretch of territory lying along the base of the hills known as the Terai. The terai is only 91 metres high above sea level but there are parts of the district in the hills which are nearly 3657.6 metres high.

The hill portion of the district is like of labyrinth of ridges and narrow valleys. There are no open valleys or plains or lakes. Most of the ridges are forest clad and in the lower slopes, tea plantations and the crop cultivation are done.

The rivers of the district drain ultimately to the south, through the west to ridge across it causes a series of Tista tributaries rising on its northern face to flow northwards and others flow east or west before joining the main river. The rivers of the district are, Tista which rises in glacier in north Sikkim 21,000 feet above sea-level, great Ranjit, Jaldhaka, Mahanadi, Balasan and Mechi.

MAJOR CHARACTERISTICS OF THE DISTRICT

The forest of the district occupied an area of 1283 square kilometres which constitutes 40.74 percent of the total area of the district in 1972-73. There was 1163 sq. kms under Reserved Forests, 16 sq. kms under

protected Forest, 33 sq. kms. ware covered by unclassed State Forest and Lands and the Forest owned by corporated bodies and private individuals together worked out to 71 sq. kms.

Regarding the minerals and mining of the district, the coal seams extend for a distance of about 64 kilometres from the Balasan river on the west to the Bhutan border on the east. The coal is found mostly in a powdery form due to the enormous strain of the mountains' building pressure as the entire coal belt is caught up in the folding movement during the upheavol of the Himalayas. The extraction of coal was made from several exposers above 7 kilometres north of Bagrakot railway station during 1896-1900. Only 7231 tonnes of coal was raised and the attempt was abandoned. In 1943, another attempt was undertaken in the same neighbourhood, where seams of same thickness were found exposed and quantities of coal were extracted and sold locally.

The coal is raised from the collieries in the district by opencast quarries on out crops of large and small lenticular seams occuring on the hill slopes or river valleys. The entire production is consumed by local brick manufacturers. Another interesting feature of the coal fields of the district is the occurance of natural coke. It is formed due to the heat effect of igneous intrusian (dolorite) on the coal seams. The consumes of this natural coke say that it is difficult to ignite it, but once lighted, it burns smoothly and produce considerable heat.

The district derives its power from the West Bengal State Electricity Board. The West Bengal State Electricity Board has set up a medium sized hydro electric generating station at paren in Bhutan, a little away from Darjiling border. This project is known as the Jaldhaka Hydel Power Project. To meet the growing demand of the district the little Ranjit scheme has been implemented to generate additional power. There are seven towns in the district, all of them have electricity. Regarading the rural electrification, only 131 villages constituting 19.88 percent of the total inhabited villages have the privilage of having electricity.

The agricultural conditions of the district are extremely diverse as the physical configuration of the district are not in favour of cultivation in all the parts of the district uniformly. The district may be broadly divided into two parts i. e. the mountaineous region to the north which cover three subdivisions viz. Kalimpong, Kurseong and Darjiling Sadar forming its greater part and the aluvial plain to the south known as the Terai which cover Siliguri Subdivision of the district. Altitudes vary from 91 metres above sea-level in the plains to about 366 metres in the hills. Although Terai is admirably suited for cultivation due to the alluvial soil but there are also poor savely tract in Terai which can not be brought under the plaugh. Crops cannot be grown above 2896 metres above sea—level owing to the cold. The upper limits for cultivation of rice, maize and millet are much lower. There is comperatively little cultivation in areas with 305 to 610 metres and most of the areas is under forest.

As per date of 1976-77, the total area under production of food grains was 84.3 thousand hectares in the district. Rice was cultivated in 44.9 thousand hectares, maize in 23.2 thousand hectares and ragi in 9.9 thousand hectares in the referrent year. The total food grains produced during the year under reference were 103.4 thousand tonnes of which cereals being 102.5 thousand tonnes. Of the cereals, again, rice being 50.7 thousand tonnes, maize 34.4 thousand tonnes and ragi 8.6 thousand tonnes.

The irrigation facilities in the district are very meagre. By the end of 1976-77 the district had one deep tubewell only and 11 installations for river lift irrigation. It may be noted here that only 10.82 peroent of the total cultivable land in the district are irrigated as per villagewise land use data of 1981 Census.

There are no large scale industries in the district. But the small scale industries have been flourished all over the district. There were 160 registered working factories in the district. 116 of them were meant for the tea processing. The number of small scale industrial units registered with the Directorate of Cottage and Small

Scale Industries in West Bengal were 2266 as on 31.3.77. According to the house census held in August-September 1980, the factories, workshops and workshed occupied 2045 census houses exclusively in the district, while the workshops cum-residence including household industry occupies 1585 census houses.

The main items of district's imports are rice, wheat, pulses, sugar, potato, mustard oil, salt, chillies, spices and molasses.

There are some important trade centres dealing with the chief items of agricultural produce of the district. The Tista, Rambi and Panighata deal mainly with oranges. The oranges are assembled here and afterwards these are exported to Calcutta mainly and then other places in the country. The seed potatoes are sold from Bijanbari market on whole sale terms while the retail sell takes place in the markets of Darjiling and Ghum. The cardamom are brought to the Sukhiapokri market first and then exported to the different places of the country through Sonada and Kalimpong retail market.

There is a whole sale market at Siliguri from where the large quantity of pineaples are exported. The jute are exported from Siliguri, Naxalbari and Khribari market.

The district produces quality tea which are exported to the foreign countries even. The district is rich in forest products and these are exported to the different parts of the country.

In addition the district is the sole producer of quinine salts, cinchona febrifuge powder, cinchona febrifuge tablets and tota quina tablets which are exported.

Of the four subdivisions of the district, three are connected by rail. Siliguri, the subdivisional headquarters, is connected by North East Frontier Railway. The subdivisional headquaters and a large portion of it and the district headquarters Darjiling are connected by former Darjiling Himalayan Railway, presently known as Siliguri-Darjiling Section of N. F. Railway.

Darjiling, because of its strategic lecation, has a very good net work of roads. The Tista Valley Road a distance of 75 kilometres - was built in 1850. This road connects Siliguri with Rangpo. The old military road or Pankhabari Road was constructed earlier in 1842, and was the first modern, long distance road in the district under British rule. The Hill cart road - one of the best mountain roads in India - was built in 1869. Another Road, some 17.70 kilometres long, from Darjiling to the Cane bridge over the great Ranjit river, about 1829 metres below Darjiling town, is an excellent hill road in the district.

The Tista Bridge served as an important junction where the roads to Darjiling and Kalimpong met with the Tista valley road. There is a 32 kilometres long road connecting Kalimpong with Tista Bridge by bridging the Tista. This road is known as the Rishi road. The district covers 66 kilometres National Highways and 171 kilometres State Highways. The most important thorough fare in the district is the Ganges - Darjiling road, now known as National Highway 31. The National Highway 37 in Assam, National Highway 31A from Sikkim, National Highways 30, 33 and 2 in Bihar and the National Highway 34 from southern West Bengal have met in Siliguri and as a result Siliguri has become a most important commercial node of North Bengal. The Public Works and Public Works (Roads) Departments in West Bengal maintained 843 kilometres Extra Municipal roads in 1977. Of these, 730 kilometres are surfaced. The Extra municipal roads maintained by the Zilla Parishad were 441.16 kilometres in the same year. A total road length of the municipalities of the district were 267.92 kilometres in the year under reference.

PLACES OF RELIGIOUS, HISTORICAL OR ARCHAEOLIGICAL AND TOURIST INTEREST

Of the important places in the district, we may mention the name of Darjiling town as a first place. It is situated on the long spur, projecting northward from the Senchal - Singalila range. The spur rises abruptly from Ghum to the top of Katapahar (2404 metres) and then gradually descends to chaurasta (2134 metres). It rises again at observatory Hill (2183 metres) just north of the chaurasta and then divides into two, the Lebong spur and the Birch Hill Spur. Both the spurs descends steeply into the valley of the Ranjit river flowing at a height of less than 914 metres above sea level. The town is located in such a position that from most points in it, views of mountains may be obtained. One can not only view a magnificent distant landscape from the town, but will find, within its limits parks, gardens and museum. The notable places in the town are Lloyd Botanic Gardens, Natural History Museum. Himalayan Mountaineering Institute and a Zoological Park.

The town contains a number of places of workship for the various communities living in it. The most notewortly Hindu temple in the town is the Dhirdham temple built in 1938 by His Highness Sir Joodha Shamshere Tung Bahadur Rana, the Ex Prime Minister of Nepal. It is the only shrine of its kind in India and is unique for the beauty of its architecture in the Nepali style.

The Christian places of workship are numerous. There are three Anglican churches in the town. They are St. Andrew's church, St. Luke's church and the church of Immaculate Conception.

The mosques maintained by the local Anjuman Islamia are in the town. The Brahma community in the district has a temple of their own in the town.

The next interesting spot of the district is Kalimpong town. While the market area of the town is 1199 metres above sea level, it is flanked on either side by higher grounds, on the south by Durbindara hill, 1372 metres above sea level and on the north east by the Deolo mountain with an elevation of 1696 metres. The town is well provided with the places of worships. There are a Buddhist monastery, a Hindu temple and a mosque in the town.

Kurseong town is situated on a spur taking off from the long ridge running south from Senchal. The peaks of Kanchanjunga are viewed through the gap between Ghum and senchal. The magnificent view of the plains to the south is very pleasant. The town is situated at an elevation of 1481 metres.

Beni is a place in Rangli-Rangliot Police Station situated at the confluence of the Tista and the great Ranjit. It is situated at a distance of 72 kilometres from Darjiling town. It is famous for the annual fair in connection with the pous samkranti day.

Badamtam, a fine picnic spot in Darjiling Police Station, with a picturesque mountain scenery. The place offers scope for fishing and hunting.

Damsong in Katimpong Police Station contains old fort of Bhutanese origin.

Mangpu, a village in the Kurseong Police Station, has a quiet charm of its own. The place attracted Rabindra Nath Tagore to come and live here for brief spells on more than one occassion. The house in which he lived now serves as a museum preserving his personal effects.

Mirik situated at on elevation of 1524 metres from sea level is an attractive tourist spot. It has a lake with charming forests.

Pedong is a village in Kalimpong Polce Station. It is located 1451 metres above sea level. The place has a Buddhist monastery and a chruch of the Roman Catholic Mission.

Phalut is situated at the extreme north west corner of the district near the tri-junction of India, Sikkim and Nepal. It lies on one of the leftiest eminences of the Singalila range at an elevation of 3596 metres above sea-level. The place offers the magnificent views of the snowy peaks and glaciers.

Situated at an elevation of 3630 metres above sea-level, sandakphu commands the finest view of the Himalayas. In the foreground is a great basin set in the midst of the hills, the slopes of which are covered by masses of rhododendrons and fragrant fine forest. In the back ground is a continuous barrier of snowy mountains the most prominent of which is Kanchanjunga.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District Census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951 and 1961. A large number of inset tables has been prepared in Town Directory and Village Directory to make the analysis more scientific and acceptable.

TABLES

The table—1 gives distribution of villages according to availability of different amenities. Among the inhabited villages, educational facility and the facility of drinking water is available in 59.48% and 96.81% of villages respectively. It is noteworthy that all the villages of 8 police stations viz. Sukhiapokri, Pulbazar, Rangli-Rangliot, Kalimpong, Garubathan, Mirik, Siliguri and Kharibari have the facility of drinking water. 95.24% of the villages of Pulbazar police stations have been provided with the facility of education—which is highest. On the other hand, the lowest-proportion of such facility is available in the villages of Siliguri police station i.e. 40.00%. Regarding the availabiliry of medical facility in the villages, it will be seen from the table that Mirik police station tops the list followed by Sukhiapokri while lowest proportion of 4.11% of the villages of Kharibari police station have this facility. 19.88 percent of villages of the district has been electrified. The highest proportion of villages has been electrified in Jore Bangalow police station (82.14) followed by Sukhiapokri (70.59).

The table 2 shows proportion of rural population served by different amenities. The amenities like drinking water and education are available to 97.75% and 74.63% of the total rural population of the district. The medical facility is provided to 33.61% of the rural population. The population served by power supply is 33.58%. A considerable proportion of population i.e. 54.53% have the facility of pucca Road.

The distribution of villages, not having certain amenities arranged according to distance ranges from the places from where these are available is given in table 3. Of the 659 inhabited villages of the district, 532 have no facility of medical treatment within the jurisdiction of the village itself. Similarly, 267 of the total inhabited villages have no educational opportunity within the village. There is no drinking water facility in 21 villages only.

TABLE 3—DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

	Village not having the amenity of	Number of villages where the amenity is not available and available at distance of			
		— 5 Kms	5 — 10 Kms	10 + Kms	Total
	1	2	3	4	5

5	Market/Hat	398	151	51	600
6	Communication	333	166	59	558

Table 4 indicates the distribution of villages according to the distance from the nearest town and availability of different amenities. It is seen from the table that the villages located at a far off from the town have been provided with the principal amenities like education, medical and drinking water to a greater extent than the villages situated nearer to the town. In this context an example may be cited that while the percentages of villages at a distance of upto 5 Kms. from the town having amenities of education, medical and drinking water to the tune of 64.10%, 17.95% and 100% respectively, then the villages located at a distance of 51 Kms plus have been provided with such amenities to 86.36%, 45.43% and 100% respectively.

Table 6 presents data on main staple food of the majority inhabitants living in the different police stations of the district. In 6 police stations of the district, the rice, wheat and maize are the main items of staple food. The main staple food for 4 police stations is rice and wheat. Rice alone is used as the main staple food for 3 police stations only.

TABLE 6—MAIN STAPLE FOOD IN THE MAJORITY OF VILLAGES IN EACH POLICE STATION

Sl. No.	Name of Police Station	Main Staple Food

Table 7 gives the distribution of inhabited villages according to land use. The total area of the 659 inhabited villages is 284,738.22 hectares of which the percentage of the cultivable area to the total area works out to 63.87 percent. Again, the percentage of the irrigated area to the total cultivable area works out to 10.82. Among the police stations, Darjiling police station possesses the maximum cultivable area to total area in the district viz. 82.03% while Pulbazar police station has recorded the lowest percentage of the cultivable area in the district viz., 43.50. On the other hand, Naxalbari police station has got the highest percentage of irrigated area to total cultivable area (30.57) and Kharibari records the lowest percentage of irrigated area to total cultivable area in the district (.01).

TABLE 7—DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE

Table 8 gives the details of growth, density and sex-ratio of urban population in Darjiling district in relation to the state for the decades 1951-1981. The percentage of urban population to total population in this district has gone up from 20.56 in 1951 to 27.55 in 1981. During this period the corresponding percentage of state urban population has also increased from 23.88 in 1951 to 26.47 in 1981. The density of population per Sq. Km. in the urban areas of the district which was 2850 in 1951 has increased to 4687 in 1981 against the density of the state urban of 5180 and 5462 in 1951 and 1981 respectively.

(b) Declassified	Nil

Table 10 indicates per capita receipt and expenditure in case of each town of the district. Of the 7 towns in the districts, 6 towns have furnished their per capita receipt and expenditure. The per capita receipt is found highest in Darjiling town (Rs. 107.58) followed Kurseong (Rs. 70.80). Cart Road town has the lowest per capita receipt i.e. 1.00 among the towns of district. About the expenditure, Darjiling town has the highest per capita expenditure (90.47) while Cart Road town is the lowest (1.00).

The table 11 gives the number of schools per ten thousand population in towns of the district of Darjiling. Of the 4 towns where higher secondary educational facilities are available, 2 towns viz. Kalimpong and Kurseong have higher ratio of higher secondary schools per ten thousand population than the district ratio. Jaldhaka Hydel Power Project Town has highest proportion of secondary schools (2.83) and Uttar Bagdogra town has highest proportion of junior secondary/middle schools (3.45) per ten thousand urban population. But in case of primary schools higher proportion of 15.40 schools per ten thousand urban population is found in Cart Road town.
