### STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

# PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking fea ures. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

G. JAGATHPATHI

# NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

*Census*.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

*Population*.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

*Rural-Urban Classification*:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

**A—General Population Tables:**

There are four main tables and three appendices in this series.

*Table A-1.*—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

*Occupied Residential House.*—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

*Town Group.*—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

*Houseless & Institutional Population*:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

*Class of Towns.*—Towns are classified into six classes as below according to their population sizes:—

| *Class* | *Population range* |
|---|---|
| I | 100,000 and above |
| II | 50,000—99,999 |
| III | 20,000—49,999 |
| IV | 10,000—19,999 |
| V | 5,000—9,999 |
| VI | Below 5,000 |

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

*The Working Categories*:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

| | CENSUS WORKING CATEGORY | CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC |
|---|---|---|
| I | Workers in cultivation | Minor Groups 000, 001, 002, 003, 004, |
| II | Agricultural Labourers ... | The same as in I above |
| III | Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities | Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry) |
| IV | Workers in household industry ... | Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale |
| V | Workers in manufacturing other than household industry ... | Divisions 2 & 3 |
| VI | Workers in construction ... | Division 4 |
| VII | Workers in Trade and Commerce ... | Division 6 |
| VIII | Workers in Transport Storage and Communications ... | Division 7 |
| IX | Workers in other services .. | Divisions 5, 8 & 9 |

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined *simply to buying and selling*. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

*Class of Worker*:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

*Non-workers*:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

*Education Levels*:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

*B—(ii) Household Economic Tables*:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

**C.—Social and Cultural Tables:**

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

*Marital Status*:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

*Age*.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

*Mother Tongue*:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

*Religion*:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

*Scheduled Castes and Scheduled Tribes*:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

*Religion of Scheduled Castes and Tribes*:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

*E—Housing Tables*:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

*Census House and Census Households*:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

*"Factory" and "Workshop"*:—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

*Village Directory*:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

# STANDARD INDUSTRIAL CLASSIFICATION

**This classification groups the industries into**

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | *Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.* | |
| 00 | Field Produce and Plantation Crops:— | |
| | Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize | 000 |
| | Production of pulses such as arhar, moong, masur, urd, khesari, other gram | 001 |
| | Production of raw jute and kindred fibre crops | 002 |
| | Production of raw cotton and kindred fibre crops | 003 |
| | Production of oilseeds, sugarcane and other cash crops | 004 |
| | Production of other crops (including vegetables) not covered above | 005 |
| | Production of fruits and nuts in plantation, vines & orchards | 006 |
| | Production of wood, bamboo, cane reeds, thatching grass etc. | 007 |
| | Production of juice by tapping palms | 008 |
| | Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above | 009 |
| 01 | Plantation Crops:— | |
| | Production of tea in plantation | 010 |
| | Production of coffee in plantation | 011 |
| | Production of rubber in plantation | 012 |
| | Production of tobacco in plantation | 013 |
| | Production of ganja, cinchona, opium | 014 |
| | Production of other plantation crops not covered above | 015 |
| 02 | Forestry and Logging:— | |
| | Planting, replanting and conservation of forests | 020 |
| | Felling and cutting of trees and transportation of logs | 021 |
| | Preparation of timber | 022 |
| | Production of fuel including charcoal by exploitation of forest | 023 |
| | Production of fodder by exploitation of forests | 024 |
| | Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests | 025 |
| | Production and gathering of other forest products not covered above | 026 |
| 03 | Fishing:— | |
| | Production of fish by fishing in sea | 030 |
| | Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries | 031 |
| | Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond | 032 |
| 04 | Livestock and Hunting:— | |
| | Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat | 040 |
| | Rearing of sheep and production of wool | 041 |
| | Rearing and production of other animals (mainly for slaughter) such as pig | 042 |
| | Production of ducks, hens and other small birds, eggs by rearing and poultry farming | 043 |
| | Rearing of bees for the production of honey, wax, and collection of honey | 044 |
| | Rearing of silk worms and production of cocoons and raw silk | 045 |
| | Rearing of other small animals and insects | 046 |
| | Trapping of animals or games propagation | 047 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Production of other animal husbandry products such as skin, bone, ivory & teeth | 048 |
| | *Division 1—Mining and Quarrying*:— | |
| 10 | Mining and Quarrying:— | |
| | Mining of coal | 100 |
| | Mining of iron ores | 101 |
| | Mining of gold and silver ores | 102 |
| | Mining of manganese | 103 |
| | Mining of mica | 104 |
| | Mining of other non-ferrous metallic ores | 105 |
| | Mining of crude petroleum and natural gas | 106 |
| | Quarrying of stone (including slate), clay, sand, gravel, limestone | 107 |
| | Mining of chemical earth such as soda ash | 108 |
| | Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt | 109 |
| | *Division 2 & 3—Manufacturing*:— | |
| 20 | Foodstuffs:— | |
| | Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains | 200 |
| | Production of sugar and syrup from sugarcane in mills | 201 |
| | Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy | 202 |
| | Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits | 203 |
| | Slaughtering, preservation of meat and fish and canning of fish | 204 |
| | Production of bread, biscuits, cake and other bakery products | 205 |
| | Production of butter, ghee, cheese and other dairy products | 206 |
| | Production of edible fats and oils (other than hydrogenated oil) | 207 |
| | Production of hydrogenated oils (Vanaspati) | 208 |
| | Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge | 209 |
| 21 | Beverages:— | |
| | Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery | 210 |
| | Production of country liquor | 211 |
| | Production of indigenous liquor such as toddy, liquor from mahua, palm juice | 212 |
| | Production of other liquors not covered above | 213 |
| | Production of aerated and mineral water | 214 |
| | Production of ice | 215 |
| | Production of ice-cream | 216 |
| | Processing of tea in factories | 217 |
| | Processing of coffee in curing works | 218 |
| | Production of other beverages | 219 |
| 22 | Tobacco Products:— | |
| | Manufacture of bidi | 220 |
| | Manufacture of cigars and cheroots | 221 |
| | Manufacture of cigarette and cigarette tobacco | 222 |
| | Manufacture of hookah tobacco | 223 |
| | Manufacture of snuff | 224 |
| | Manufacture of jerda and other chewing tobacoo | 225 |
| | Manufacture of other tobacco products | 226 |
| 23 | Textile—Cotton:— | |
| | Cotton ginning, cleaning, pressing and baling | 230 |
| | Cotton spinning (other than in mills) | 231 |
| | Cotton spinning and weaving in mills | 232 |
| | Cotton dyeing, bleaching | 233 |
| | Cotton weaving in power looms | 234 |
| | Cotton weaving in handlooms | 235 |
| | Manufacturing of khadi textile in handlooms | 236 |
| | Printing of cotton textile | 237 |
| | Manufacturing of cotton nets | 238 |
| | Manufacturing of cotton, cordage, rope and twine | 239 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 24 | Textile—Jute:— | |
| | Jute pressing and baling | 240 |
| | Jute spinning and weaving | 241 |
| | Dyeing and bleaching of jute | 242 |
| | Printing of jute textile | 243 |
| | Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta | 244 |
| 25 | Textile—Wool:— | |
| | Wool baling and pressing | 250 |
| | Wool cleaning and processing (scouring) | 251 |
| | Wool spinning and weaving in mill | 252 |
| | Wool spinning other than in mills | 253 |
| | Wool weaving in powerloom | 254 |
| | Wool weaving in handloom | 255 |
| | Embroidery and art work in woollen textile | 256 |
| 26 | Textile—Silk:— | |
| | Spinning and weaving of silk textile in mill | 260 |
| | Dyeing and bleaching of silk | 261 |
| | Spinning of silk other than in mills | 262 |
| | Weaving of silk textile by power loom | 263 |
| | Weaving of silk textile by handloom | 264 |
| | Printing of silk textile | 265 |
| | Manufacture of silk cordage, rope and twine | 266 |
| 27 | Textile—Miscellaneous:— | |
| | Manufacture of carpet and all other similar type of textile products | 270 |
| | Manufacture of hosiery and other knitted fabrics and garments | 271 |
| | Embroidery and making of crepe lace and fringes | 272 |
| | Making of textile garments including raincoats and headgear | 273 |
| | Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags | 274 |
| | Manufacture of water-proof textile products such as oil cloth, tarpaulin | 275 |
| | Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling | 276 |
| | Manufacture of coir and coir products | 277 |
| | Manufacture of umbrellas | 278 |
| | Processing and manufacture of textile products not covered above | 279 |
| 28 | Manufacture of Wood and Wooden Products:— | |
| | Sawing and planing of wood | 280 |
| | Manufacture of wooden furniture & fixtures | 281 |
| | Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows. | 282 |
| | Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures | 283 |
| | Manufacture of other wooden products such as utensils, toys, artwares | 284 |
| | Manufacture of veneer and plywood | 285 |
| | Manufacture of plywood products such as tea chest | 286 |
| | Manufacture of boxes and packing cases other than plywood | 287 |
| | Manufacture of materials from cork, bamboo, cane, leaves and other allied products | 288 |
| | Manufacture of other wood and allied products not covered above | 289 |
| 29 | Paper and paper Products:— | |
| | Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill | 290 |
| | Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade | 291 |
| | Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp | 292 |
| 30 | Printing and Publishing:— | |
| | Printing and publishing of newspapers and periodicals | 300 |
| | Printing and publishing of books | 301 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry | 302 |
| | All types of binding, stiching, sizing and other allied work connected with binding industry | 303 |
| 31 | Leather and Leather Products:— | |
| | Currying, tanning and finishing of hides and skins and preparation of finished leather | 310 |
| | Manufacture of shoes and other leather footwear | 311 |
| | Manufacture of clothing and wearing apparel (except footwear) made of leather and fur | 312 |
| | Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles | 313 |
| | Repair of shoes and other leather foot-wear | 314 |
| | Repair of all other leather products except footwear | 315 |
| 32 | Rubber, Petroleum and Coal Products:— | |
| | Manufacture of tyres and tubes | 320 |
| | Manufacture of rubber footwear | 321 |
| | Manufacture of rubber goods used for industrial purpose | 322 |
| | Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat | 323 |
| | Production of petroleum, kerosene and other petroleum products in petroleum refineries | 324 |
| | Production of coaltar and coke in coke oven | 325 |
| | Manufacture of other coal and coaltar products not covered elsewhere | 326 |
| 33 | Chemicals and Chemical Products:— | |
| | Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified | 330 |
| | Manufacture of dyes, paints, colours and varnishes | 331 |
| | Manufacture of fertilizers | 332 |
| | Manufacture of ammunition, explosives and fire works | 333 |
| | Manufacture of matches | 334 |
| | Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap | 335 |
| | Manufacture of soap and other washing and cleaning compounds | 336 |
| | Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber) | 337 |
| | Manufacture of common salt | 338 |
| | Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats) | 339 |
| 34 | Non-metallic Mineral Products other than Petroleum and Coal:— | |
| | Manufacture of structural clay products such as bricks, tiles | 340 |
| | Manufacture of cement and cement products | 341 |
| | Manufacture of lime | 342 |
| | Manufacture of structural stone goods, stone dressing and stone crushing | 343 |
| | Manufacture of stonewares, other than images | 344 |
| | Manufacture of stone images | 345 |
| | Manufacture of plaster of paris and its products | 346 |
| | Manufacture of asbestos products | 347 |
| | Manufacture of mica products | 348 |
| 35 | Manufacture of earthenware and earthen pottery:— | 350 |
| | Manufacture of chinaware and crockery | 351 |
| | Manufacture of porcelain and its products | 352 |
| | Manufacture of glass bangles and beads | 353 |
| | Manufacture of glass apparatus | 354 |
| | Manufacture of earthen image, busts and statues | 355 |
| | Manufacture of earthen toys and artwares except those covered by code No. 355 | 356 |
| | Manufacture of glass and glass products except optical and photographic lenses and glass products covered above | 357 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 35 | Manufacture of other non-metallic mineral products not elsewhere specified | 359 |
| 36 | Basic Metals and their products except Machinery and Transport Equipment:— | |
| | Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods | 360 |
| | Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms | 361 |
| | Manufacture of armaments | 362 |
| | Manufacture of structural steel products such as joist, rail, sheet, plate | 363 |
| | Manufacture of iron and steel furniture | 364 |
| | Manufacture of brass and bell metal products | 365 |
| | Manufacture of aluminium products | 366 |
| | Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can | 367 |
| | Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products | 368 |
| | Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39). | 369 |
| 37 | Machinery (All kinds other than transport) and Electrical Equipment:— | |
| | Manufacture and assembling of machinery (other than electrical) except textile machinery | 370 |
| | Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors | 371 |
| | Manufacture of machine tools | 372 |
| | Manufacture of textile machinery and accessories | 373 |
| | Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers | 374 |
| | Manufacture of electric lamps and fans | 375 |
| | Manufacture of insulated wires and cables | 376 |
| | Manufacture of all kinds of battery | 377 |
| | Manufacture of electronic equipment such as radio, microphone | 378 |
| | Manufacture of electric machinery and apparatus, appliances not specified above | 379 |
| 38 | Transport Equipment:— | |
| | Manufacture, assembly and repairing of locomotives | 380 |
| | Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363 | 381 |
| | Manufacture and assembling of motor vehicles of all types (excepting motor engines) | 382 |
| | Manufacture of motor vehicles engines parts and accessories | 383 |
| | Repairing and servicing of motor vehicles | 384 |
| | Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear | 385 |
| | Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines | 386 |
| | Manufacture & repair of air transport equipment including aeroplanes, aeroengines | 387 |
| | Repairing of bicycles and tricycles | 388 |
| | Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles | 389 |
| 39 | Miscellaneous manufacturing Industries: | |
| | Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies | 390 |
| | Manufacture of scientific, medical and surgical instruments and equipment and supplies | 391 |
| | Assembling and repairing of watches and clocks | 392 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Manufacture of jewellery, silverware and wares using gold and other precious metals | 393 |
| | Manufacture and tuning of Musical Instruments | 394 |
| | Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen | 395 |
| | Manufacture of sports goods | 396 |
| | Manufacture and repair work of goods not assignable to any other group | 399 |
| | *Division 4—Construction* | |
| 40 | Construction:— | |
| | Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations | 400 |
| | Construction and maintenance of roads, railways, bridges, tunnels | 401 |
| | Construction and maintenance of telegraph and telephone lines | 402 |
| | Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells | 403 |
| | *Division 5—Electricity, Gas, Water and Sanitary Services* | |
| 50 | Electricity and Gas:— | |
| | Generation and transmission of electric energy | 500 |
| | Distribution of electric energy | 501 |
| | Manufacture of Gas in gas works and distribution to domestic and industrial consumers | 502 |
| 51 | Water Supply and Sanitary Services:— | |
| | Collection, purification and distribution of water to domestic and industrial consumers | 510 |
| | Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation | 511 |
| | *Division 6—Trade and Commerce* | |
| 60 | Wholesale Trade:— | |
| | Wholesale trading in cereals and Pulses | 600 |
| | Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where) | 601 |
| | Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products | 602 |
| | Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water | 603 |
| | Wholesale trading in intoxicants such as wines, liquors | 604 |
| | Wholesale trading in other intoxicants such as opium, ganja etc. | 605 |
| | Wholesale trading in tobacco, bidi, cigarettes and other tobacco products | 606 |
| | Wholesale trading in animals | 607 |
| | Wholesale trading in straw and fodder | 608 |
| 61 | Wholesale trading in medicines and chemicals | 610 |
| | Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle | 611 |
| | Wholesale trading in toilets, perfumery and cosmetics | 612 |
| | Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware | 613 |
| | Wholesale trading in wooden, steel and other metallic furniture and fittings | 614 |
| | Wholesale trading in footwear | 615 |
| | Wholesale trading in tyres, tubes and allied rubber products | 616 |
| | Wholesale trading in petrol, mobil oil and allied products | 617 |
| | Wholesale trading in other household equipment not covered above | 618 |
| 62 | Wholesale trading in bricks, tiles and other building materials | 620 |
| | Wholesale trading in wood, bamboo, cane, thatches and similar products | 621 |
| 63 | Wholesale trading in paper and other stationery goods | 630 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| | Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical | 631 |
| | Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb | 632 |
| | Wholesale trading in all kinds of transport and storage equipment | 633 |
| | Wholesale trading in skins, leather and fur | 634 |
| | Wholesale trading in clocks, eye glasses, frames | 635 |
| | Wholesale trading in hardware and sanitary equipment | 636 |
| | Wholesale trading in scientific, medical and surgical instruments | 637 |
| | Wholesale trading in precious metals and stones, gold and silverwares and jewellery | 638 |
| | Wholesale trading in all goods not covered above | 639 |
| 64 | Retail Trade:— | |
| | Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry | 640 |
| | Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water | 641 |
| | Retail trading in intoxicants such as wines, liquors | 642 |
| | Retail trading in other intoxicants such as opium, ganja, etc. | 643 |
| | Retail trading in tobacco, bidi, cigarettes and other tobacco products | 644 |
| | Retail trading in fuel such as coke, coal, firewood and kerosene | 645 |
| | Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc. | 646 |
| | Retail trading in animals | 647 |
| | Retail trading in straw and fodder | 648 |
| 65 | Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles) | 650 |
| | Retail trading in toilet goods, perfumes and cosmetics | 651 |
| | Retail trading in medicines and chemicals | 652 |
| | Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals | 653 |
| | Retail trading in tyres, tubes and allied rubber products | 654 |
| | Retail trading in petrol, mobiloil and allied products | 655 |
| 66 | Retail trading in wooden, steel and other metallic furniture and fittings | 660 |
| | Retail trading in stationery goods and papers | 661 |
| | Retail trading in metal, porcelain and glass utensils | 662 |
| | Retail trading in earthenware and earthen toys | 663 |
| | Retail trading in other household equipment not covered above | 664 |
| 67 | Retail trading in bricks, tiles and other building materials | 670 |
| | Retail trading in hardware and sanitary equipment | 671 |
| | Retail trading in wood, bamboo cane, bark and thatches | 672 |
| | Retail trading in other building materials | 673 |
| 68 | Retail trading in agricultural and industrial machinery equipment, tools and appliances | 680 |
| | Retail trading in transport and storage equipments | 681 |
| | Retail trading in electrical goods like electric fan, bulb, etc. | 682 |
| | Retail trading in skins, leather and furs and their products excluding footwear and headgear | 683 |
| | Retail trading in clock and watch, eye glass, frame | 684 |
| | Retail trading in scientific, medical and surgical instruments | 685 |
| | Retail trading in precious stones and jewellery | 686 |
| | Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing | 687 |
| | Book-selling | 688 |
| | Retail trading in goods unspecified | 689 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 69 | Trade and Commerce Miscellaneous:— | |
| | Importing and exporting of goods and commodities | 690 |
| | Real estate and properties | 691 |
| | Stocks, shares and futures | 692 |
| | Providents and insurances | 693 |
| | Money lending (indigenous) | 694 |
| | Banking and similar type of financial operation | 695 |
| | Auctioneering | 696 |
| | Distribution of motion pictures | 697 |
| | All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc. | 699 |
| *Division 7.—Transport, Storage and Communication:* | | |
| 70 | Transport:— | |
| | Transporting by railways | 700 |
| | Transporting by tramway and bus service | 701 |
| | Transporting by motor vehicles (other than omnibus) | 702 |
| | Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka | 703 |
| | Animal transporting by animals such as horses, elephant, mule, camel | 704 |
| | Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving | 705 |
| | Transporting by boat, steamer, ferry, etc. by river, canal | 706 |
| | Transporting by boat, steamer, ship, cargo boat by sea or ocean | 707 |
| | Transporting by air | 708 |
| | Transporting by other means not covered above | 709 |
| 71 | Services incidental to transport such as packing, carting travel agency | 710 |
| 72 | Storage and Ware Housing:— | |
| | Operation of storage such as warehouses | 720 |
| | Operation of storage such as cold-storage | 721 |
| | Operation of storage of other type | 722 |
| 73 | Communication:— | |
| | Postal, telegraphic, wireless and signal communications | 730 |
| | Telephone communication | 731 |
| | Information and broadcasting | 732 |
| *Division 8.—Services:* | | |
| 80 | Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):— | |
| | Public Services in Union and State army including territorial corps and volunteer corps | 800 |
| | Public Service in Navy | 801 |
| | Public Service in Air Force | 802 |
| | Public Service in Police | 803 |
| | Public service in administrative departments and offices of Central Government | 804 |
| | Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc. | 805 |
| | Public service in administrative departments and offices of State Governments | 809 |
| 81 | Educational and Scientific Services:— | |
| | Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions | 810 |
| | Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type | 811 |
| | Scientific services and research institutions not capable of classification under any individual group | 812 |
| 82 | Medical and Health Services:— | |
| | Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars | 820 |
| | Veterinary services rendered by organisations and individuals | 821 |

| Major Group (Code) | Description | Minor Group (Code) |
|---|---|---|
| 83 | Religious and Welfare Services:— | |
| | Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations | 830 |
| | Religious and allied services rendered by pandit, priest, preceptor, fakir, monk | 831 |
| | Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity | 832 |
| 84 | Legal Services:— | |
| | Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi | 840 |
| | Matrimonial services rendered by organizations and individuals | 841 |
| 85 | Business Services:— | |
| | Engineering services rendered by professional organisations or individuals | 850 |
| | Business services rendered by organisations of accountants, auditors, book-keepers or like individuals | 851 |
| | Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies | 852 |
| | Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors | 853 |
| 86 | Community Services and Trade and Labour Associations:— | |
| | Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations | 860 |
| | Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library | 861 |
| | Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc. | 862 |
| 87 | Recreation Services:— | |
| | Production of motion picture and allied services such as processing editing etc. | 870 |
| | Recreation services rendered by cinema houses by exhibition of motion pictures | 871 |
| | Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals | 872 |
| | Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing. | 873 |
| 88 | Personal Services:— | |
| | Services rendered to households such as those by domestic servants, cooks | 880 |
| | Services rendered to households such as those by governess, tutor, private secretary | 881 |
| | Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities | 882 |
| | Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services) | 883 |
| | Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops | 884 |
| | Services rendered by portrait and commericial photographic studios | 885 |
| 89 | Services (not elsewhere classified):— | |
| | Services rendered by organisations or individuals not elsewhere classified | 890 |
| | *Division 9—Activities not adequately described:* | |
| 90 | Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified | 900 |
| | Fresh entrants to the Labour Market | 999 |

APPENDIX—II

# NATIONAL CLASSIFICATION OF OCCUPATIONS

**(Code Structure)**

Which classifies occupations into

331 Occupational Families (three-digit code numbers)
75 Occupational Groups (two-digit code numbers)
11 Occupational Divisions (one-digit code numbers)

*Note I.*—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

*Note II.*—n. e. c.—not elsewhere classified.

---

*DIVISIONS, GROUPS AND FAMILIES*

0 *Professional, Technical and Related Workers:*

00 Architects, Engineers and Surveyors:—
- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—
- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—
- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists
- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—
- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—
- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—
- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers

1 *Administrative, Executive and Managerial* Workers
- 0X3 Librarians, Archivists and Related

*Workers:*

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers:*

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers, Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

# INTRODUCING THE DISTRICT

*By*
**G. N. Tiwari**
*Deputy Superintendent of Census Operations, Madhya Pradesh.*

Lying between 23°9′ and 24°26′ north latitudes and 79°3′ and 79°51′ east longitudes, Damoh district is situated in the north of the Jabalpur division. It is the easternmost district of the great Vindhyan plateau, consisting of the valley of river Sonar in the centre running from south-west to north-east, and hilly uplands on either side. It is bounded on the west and east by Sagar and Jabalpur districts, on the south by Narsimhapur district, on the north by Chhatarpur district and on the north-west by Panna district. Before 1-11-1956, the day on which reorganisation of States took place, Damoh with its western neighbour Sagar, formed the composite Sagar district. It may, however, be remarked that before December 1930, Damoh had the same territorial constitution which it has today. In its outline the district resembles an elongated oval running north and south, and strikingly resembles that of Ireland. The district takes its name from the headquarters town Damoh, which in its turn, is said to take it from Damayanti of Hindu mythology.*

Within its territory of 2,815 square miles, Damoh district comprises 1.65% of the State's area, and ranks 29th among the districts in size. Damoh is 28.9% below the average size (3957 square miles) of a district in the State. By way of a few useful comparisons, it may be observed that Bastar, the biggest district in the State, is more than five times (5.4 times) as large as Damoh district, while in its turn Damoh is more than six times (6.6 times) as big as Datia, the smallest district in the State.

In respect of populousness, Damoh recedes to 39th position in the State, having interchanged its 1951 rank of 38 with Dewas district. It contains 1.35% of the population of the State, which is less than the proportion its area bears to that of the State. Damoh district is therefore very much (41.8%) below the average population per district in the State. In populousness, we can compare Damoh to Dewas district, with which it has interchanged its 1951 rank. We may also mention that Bilaspur the most populous district in the State contains more than 4½ times as many inhabitants as Damoh, while, in its turn Damoh is more than 2½ times as populous as Datia, the least populous district in the State.

Administratively, Damoh is divided into two tahsils, Hatta in the north and Damoh, the headquarters tahsil in the south. Both the tahsils take their name from their headquarters towns. The administrative pattern of Damoh district is similar to that of other districts, with the usual district level officers, and the hierarchy of subordinate officers and officials, all more or less working under the general control of the district Collector and the district magistrate. For the administration of justice, Damoh falls in the Sagar sessions division, where the sessions judge resides. There is an additional sessions judge, however, stationed locally at Damoh. Separation of judiciary from executive has now been completely effected in the district.

## PHYSICAL FEATURES:+

The district forms the easternmost spur of the great Vindhyan table-land. Physiographically, the district may be divided into three parts i. e. the valley of the Sunar, the hilly country to the north of the Sonar valley and the hilly country to its south. The valley of the Sunar river, also called the *haveli* is the richest and most densely inhabited part of the district. It contains as many as 654 villages, in a band of open, gently undulating country owing to the numerous nullahs that thread it. It runs diagonally right through the district from south-west to north-east with an average breadth of about 20 miles. The soil is generally dark, friable and easy to work, growing good wheat crops without fallowing. It is however somewhat inferior to the Patan or Narsimhapur *havelis* on account of the *tagars* or undulations referred to above. The western portion of Batiagarh group, and the level stretches of

* Damoh District Gazetteer, (1906), Page 191.

+Based on account given in District Gazetteer, (1906)

land on either side of the railway line between Damoh and Aslana stations represent the most fertile parts of the valley. The portion of *haveli* in Hatta tahsil between the Sonar and Bearma rivers is generally of lower quality than the southern portions of the valley lying in Damoh tahsil.

The hilly tract to the north-west of the Sonar valley consists of a line of flat-topped barren hills. These rise like a wall from the valley, and drop abruptly into the territory of Panna district. The hills and the plateau enclosed by them are of sandstone.

South of Sonar valley covering an extensive territory extends a mass of broken country terminating in the red, sandstone cliffs of the Bhander range, from the foot of which spreads the fertile plains of the Patan tahsil of Jabalpur. The sandstone plateau in the south-east of the district lies on the cliffs of the Bhander and embraces the groups of villages around Mala, Sailwara, and Taradehi. The surface of this plateau is level, but is fit for nothing but the inferior millets. The other type of hill villages are more numerous and include those on the upper reaches of Bearma river, and in the valleys of many of its tributaries, such as the Goraiya, the Bhaddar and the Sun. In respect of quality of soil and fertility, these villages occupy positions intermediate to the villages of the Bearma valley and those on the high plateaus. A large part of the hilly tract is covered with forests. The headquarters town Damoh lies on the border of the plain adjoining the southern hills. Such fringes between the valley and the foot of the hills are known as *karka* and consist of poorer soil.

Within the southern hills lies the narrow valley of the Bearma river, which is a closely cultivated tract. The surface of this valley, though broken by small sandstone ridges is much more level than that of the *haveli*. The soil is lighter in colour but free from gravel and of stiffer quality. Hence the fields are small and embanked. About 140 villages lie in the valley of the Bearma.

**Hills:**

The hills in the district belong to the Vindhyan system. The southern scarp of the Vindhyas overlooking The Patan *haveli* in Jabalpur District is called Bhander. The Bhander hills, running from south-west to north-east make the boundary between Jabalpur and Damoh districts. The Bhander range ends abruptly at Katangi in Patan tahsil, from where it turns inward and encloses the landlocked valleys of Singrampur and Jabera. From the point near Katangi where the Bhander range curves inward beyond the river Phalku, the Kaimur hills start making the southern boundary of the district with Jabalpur district. A picturesque opening known as Katao between the Kaimur and Bhander ranges has been taken advantage of for the construction of the Jabalpur-Damoh road. With the exception of the Bhander and the Kaimur, the hill system in the south of the district is very confused and the small ranges are not usually distinguished.

The hills near Hindoria are, however, known as Bhondla, and those running from Mangarh to the Bearma as the Mangarh range.

The hills in the north and south of the district are from 1,500 to 1,700 feet high. The highest (2,467′) peak is that of Kalumar near the southern border. A hill near Sailwara is 1,939 feet high. The height of the plain country is about 1,100 to 1,200. Damoh town has an elevation of 1,202′, and Hatta of 1,117′.

**Rivers**

The general slope of the country is towards the north, inclined towards the east, the direction in which Sonar, and its affluent Bearma flow. These, through Jamuna, drain the district into the Bay of Bengal, the only exception being the Phalku which flows towards the south and meets the Narbada. Sonar, the most important river of the district, rises in the low hills in the south-west of Sagar, and flows in a north-easterly direction through Sagar and Damoh districts, passing through Sitanagar, Narsingharh, Hatta and Aslana. Its valley is the principal wheat-growing tract of the district. It leaves Damoh district in the north-east and joins the Ken river in Panna district. Its course through the district is 64 miles. Bearma, an important river of the hilly country to the south, rises in the hills of Rehli tahsil, flows through the district from southwest to north-east joining the Sonar just at the point it leaves Damoh district. Before joining Sonar, Bearma makes the boundary of Damoh and Panna districts for some miles. Bearma flows through the most rugged and

broken part of the district. It is confined between rocky cliffs during greater part of its course, and whereever it opens out, its valleys are not extensive. Its important tributaries are the Guraiya, the Sun and the Pathri. The Guraiya, rising near village Tendukhera joins Bearma near village Nohta. The Sun rises in Jabalpur district, enters the district from the east, and after passing Mala joins Bearma near Ghatera.

Kopra is also an important tributary of Sunar; meeting it from the south. It also rises in the Sagar district, enters the district from the west and joins the Sunar near Sitanagar after flowing 42 miles through the district. Bewas is another tributary of Sonar meeting it from the north.

**Flora and Fauna:**

**Flora :** The district is covered extensively by forests. According to the Gazetteer, the forests are generally poor and stunted and there is little valuable timber. Principal timber tree is teak (*Tectona grandis*), which is quite common in Mariadoh tract. Next in importance to teak is *saj* (*Terminalia tomentosa*). Other flora represented in the forests of the district includes the *dhaura* (*Anogeissus latifolia*), *koha* (*Terminalia arjuna*), *tendu* (*Diospyros tomentosa*), *saleh* (*Boswellia serrata*), *gunja* (*Garuga pinnata*), *kullu* (*Sterculia urens*), *lendia or sejo* (*Lagerstroemia parviflora*), *ghont* (*Zizyphus xylopyra*), *haldu* (*Adina cardifolia*), *chheola* or *palas* (*Butea frondosa*), *khair* (*Acacia catechu*), *aonla* (*Phyllanthus emblica*), *kumhi* (*Cochlospermum-grossypium*), *achar* (*Buchanania latifolia*). Of these, *tendu, achar, aonla,* are fruit-bearing trees, which are eaten by the villagers. Besides *tendu* leaves, when dried, are used for rolling *biri*, which is a household industry of considerable size in the district. *Dhavai* (*Woodfordia floribunda*)and *karonda*(*Carissa carandus*) are important shrubs growing in the forests.

Among trees of the open country mention may be made of *babul* (*Acacia arabica*, growing usually on field boundaries and roadside), *mahua* (*Bassia latifolia*)—the tree whose fruit is fermented to yield the common liquor, *nim* (*Melia indica*), *banyan* (*Ficus bengalensis*), *pipal* (*Ficus religiosa*), *bel* (*Aegle marmelos*), *munga* (*Moringa pterygosperma*). The *khajur* (*Phoenix sylvestris*)and tamarind (*Tamarindus indica*) are found but not commonly.

**Fauna:** The forests are well stocked with wild fauna like tiger (*Felis tigris*), *tendua* or panther (*Felis pardus*), leopard or *cheeta* (*Felis bengalensis*), the *jungli billi* (*Felis chaus*), the small Indian civet (*Viyerricuia malaccensts*) ,striped hyaena (*Hyaena striata*), wild dog (*Cyon dukhunensis*), sloth or Indian bear (*Ursus labiatus*), the common otter (*Lutra vulgairs*), Wild buffalo or bison are not found. Wolf is rare but jackals and foxes are quite common. The deer except the *barasingha* or swamp deer are plentiful. *Sambhar*(*Cervus unicolor*)are quite common, but *cheetal* is met with occasionally. *Nilgai* is found in all parts of the district. *Blackbuck* are common in open country and cause damage to crops. The four-horned antelope is fairly common, as also the *chinkara* or Indian gazelle. Barking deer (*Cervulus muntjac*) is rare.

**Rainfall:**

Rainfall is registered at Damoh, Hatta and Jabera recording stations. The average rainfall at Damoh based on the records of the nine years 1952 to 1960, is 1,501 m.m. (59″), the average number of rainy days being 62. The returns of Hatta and Jabera are much less. The nine yearly average for Hatta is 1,161 m. m. (46″), while the average rainfall for Jabera for the eight years 1952 to 1955 and 1957 to 1960 (record of 1956 being overlooked because of no returns for the rainy month of July ) is 1,189 m. m. (47″). The average of these three, which may be called the district average. comes to 1,288 m. m. (50.6″). The heaviest rainfall was recorded at Damoh in 1956. It was 2,155 m. m. (85″). Year 1953 appears to have been a year of generally poor rainfall. The greater rainfall at Damoh is perhaps owing to its situation at the foot of the hills while Hatta lies in the open valley of Sonar. The rains start falling sometime towards the end of June by the precipitation of the Arabian sea monsoon, the downpour progressively gaining in intensity. July and August are the months of the heaviest rainfall. The rainy days go on getting fewer in September and by the end of September the rains almost cease.

There is no observatory at Damoh for keeping a record of temperatures. The climate of Damoh is, however, similar to its neighbours—Sagar and Jabalpur districts.

**HISTORY:**

The early history of Damoh district, except for deductions from a few inscriptional or architectural remains, remains veiled in obscurity. It seems reasonable to think that the district must have been included in the dominions of the great Maurya king Ashok. That Damoh country was included in the territories of the Gupta king Samudragupta is rendered plausible from the Allahabad pillar inscription left by Samudragupta, wherein among other exploits of the emperor, the Kharparika tribe is said to have paid tribute and obeisance to him.[1] It appears from an inscription found at and relating to Batiagarh in Damoh district that one Jallala Khoja, a local Mohammadan governor at Batihadim (the present Batiagarh) was the representative of Hisamuddin, son of Julachi, who was appointed commander of the Kharpara armies[2] and Governor of Chedi country by Sultan Mahmud of Yoginipura or Delhi. The Kharpara armies mentioned in this inscription are believed to be identical with Kharparika tribe mentioned in Allahabad pillar inscription. The Batiagarh inscription is dated Vikram year 1385 corresponding to 1328 AD and it appears that for many centuries from Samudragupta's days, the Damoh country must have been virtually ruled by the tribe described as Kharpara, though nominally perhaps they were under the subordination of Chedi rulers of Tripuri, whose dominions included the region of Baghelkhand beyond Damoh district. The Chedis of Tripuri were in power till the 13th century. Another inscription of about the same time as the Batihagarh inscription is the Singhorgarh Kirtistambha inscription, of Parihar king Gaja Singh, which shows that parts of the district were under the Parihar kings also and the Chandels after them, again perhaps under the Chedis of Tripuri. According to the Gazetteer of Damoh district "local tradition retains the memory of the district having been governed from Bilahri, which in its turn remembers a Parihar king Lachhman Sen, who built the still existing tank there called the Lachhman Sagar"[3]. The Jabalpur District Gazetteer, while dealing with Bilahri village, says that the Chedi rulers of Bilahri had lost it to Chandels and not to Parmars.

Parts of Damoh seem to have been held by the Chandel Rajputs of Mahoba who defeated the Kalchuri or Chedi rulers of Tewar and captured the fort of Kalinjar. Bilahri in Jabalpur district was also captured by the Chandels. The village of Sakhor near Hatta is traditionally held to have been the residence of the great Chandel hero Alha[4]. Nohata is held to have been the seat of Government during Chandel supremacy.

After the Chandels, as shown by the Batiagarh inscription, the country of Damoh was ruled by the Muhammadan king of Delhi. There is evidence of Mohammadan rule in the Persian inscription on one of the gates of Damoh Fort, which bore the date 1383 A. D. This shows that Damoh was included in the kingdom of Tughlak dynasty of Delhi[5]. The headquarters of Mohammadans were at Damoh, Narsingarh and Lakhroni. How long did this last is not known. A local tradition points to the supremacy for some time of the long extinct principality of Khatola in Bundelkhand, from which the Khatolha Gonds derive their name[6]. Towards the close of the 15th century the south of the district was conquered by the great Gond king Sangramshah, but it was left to his son Dalpat Shah to shift the capital of the Raj Gond dynasty to the fort of Singorgarh (near Singrampur), which he enlarged and strengthened. Dalpatshah died, leaving his widow, the famous Durgawati, to look after his extensive territories. She ruled for fourteen years with great skill. In 1564, the Moghal Governor of Kara Manikpur, Asafkhan attacked the territories of Durgawati, apparently without any provocation. The two armies met at Singrampur (on Jabalpur-Damoh road) four miles from Singorgarh, in which the queen suffered a defeat. She retired to a pass on the Jabalpur-Mandla road, where she was again attacked by the Moghal armies. After a valiant fight, she lost before the superior Moghal might and ended her life by plunging a dagger into her breast. After this, Damoh was annexed to the Mughal empire, under the *subah* of Malwa. The Mughal rule lasted for about 90 years, whereafter, taking advantage of the withdrawl of bulk of the Mughal armies to oppose the rising power of Marathas, Chhatrasal, the Bundela

[6]Ibid. page 19.

king of Panna drove out the Mughal garrisons and added Damoh to his kingdom. The Bundela supremacy over the district lasted for about sixty years, though it did not extend to the south of the district, where petty Lodhi and Gond chieftains continued to enjoy practical independence in their estates. After Chhatrasal's death, a third of his territories went to Bajirao Peshwa whom he had adopted as his son, in consideration of the help rendered by Bajirao Peshwa to him against the Mughal Subahdar of Malwa. The other two shares of Chhatrasal's kingdom went to his two sons Hirdeshah and Jagatrai. By this arrangement which was called 'tehra,' parts of Damoh went to Bajirao Peshwa, Hirdeshah and Jagatrai. The Marathas gradually extended their rule to other parts of the district either ejecting or reducing to submission the small semi-independent Gond and Lodhi chieftains. The Maratha Governors under whom Damoh came ruled from Sagar. Damoh continued under the Maratha rule till 1817, when, on deposition of the Peshwa by Lord Hastings, Damoh with Sagar passed under British rule. The headquarters of the district were first fixed at Hatta, and after being transferred more than once were fixed at Damoh in 1838. Till 1854, Damoh district was administratively subordinate to Sagar. During this period of the British rule, the district was hit by famine thrice, in 1819, in 1834 and in 1854.

Damoh district was the worst affected by the first armed uprising against the British, called the mutiny of 1857. At that time, two companies of the 2nd Native Infantry were garrisoned at Damoh, the remaining being at Sagar. The latter joined the rebellion earlier on 14th June. The Sagar mutineers of the 52nd infantry arrived at Damoh on 4th July, but returned when they found that their counterparts at Damoh were resolute in defending the jail where the British treasury had been shifted. Rajas of Banpur and Shahgarh were the leaders of rebellion in Damoh district. After the return of the Sagar rebels, these sent emissaries to all chiefs of the district to join the mutiny and we have it on the authority of the Gazetteer that nearly every Lodhi chief became disaffected except the petty chief of Hatri. By the end of July the district was full of rebels. The British still held on to the Damoh jail, which was defended by captain Pinkney with two companies of infantry and two guns. The British attacked Hindoria, the seat of the rebel Lodhi leader Kishore Singh, who had threatened Damoh several times but they were not able to capture the village. By the middle of August, the entire interior of Damoh and Sagar districts was in revolt, the British only retaining the two headquarter stations. On 24th August, after arrival of help from Jabalpur, the British took Balakoti, and also captured the fortified house of Kishore Singh at Hindoria. The fort of Narsingarh was taken from the rebels on 17th September. In the meanwhile, news was received that the 52nd native infantry at Jabalpur had rebelled, and the two native companies at Damoh could therefore, not be trusted. They were therefore disarmed as a precautionery measure.

Seeing that left to their own resources they could not hold both Damoh and Jabalpur, the Britishers decided to entrust Damoh to their ally, the ruler of Panna. In August, Kunwar Shyamleju, brother-in-law of Panna ruler had cleared the Semaria tract of the troops of the rebel Rani of Jaitpur and occupied the town and tahsil of Hatta. Later on, in response to British request, he occupied Damoh also, thus relieving the British force there for defending Jabalpur. The Britishers, however, met the mutineers of 52nd infantry of Jabalpur near Katangi and drove them off after a little fighting, who later on joined Kishore Singh and other rebels of the district. The rebels marched to Damoh and succeeded in defeating the Panna troops stationed there. After a stay of some days at Damoh the rebels marched off towards Garhakota. In the meanwhile reinforcements arrived from Panna and the Panna troops recaptured Damoh. They held Damoh till March 1858 on behalf of the British when Shyamleju held over charge to the British. The remainder of the district also remained in a disaffected state until a strong column under General Whitlock marched through it in March 1858 and order was rapidly restored. Thereafter, the district continued to be under British rule till 1947 when the Britishers handed over power to the Indians.

**Distribution of Area and Population:**

Damoh district has a population of 438 thousand on a land area of 2,808.7 square miles or on 1,798 thousand acres. This gives us roughly 4.1 acres of land area *per capita*, comparing with 3.3 acres *per capita*, in case of the State as a whole. The table given below gives a distribution of the area and population of the district among its tahsils.

*Distribution of Area and Population*, 1961

| District/Tahsil | Area+ 1961 | Rank in area | popula- tion | Rank in popula- tion |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Damoh district | 100 | .. | 100 | .. |
| Hatta tahsil | 36.3 | 2 | 33.6 | 2 |
| Damoh tahsil | 63.7 | 1 | 66.4 | 1 |

The table at once brings out the lopsided distribution of area and population among the tahsils. Damoh is the bigger and the more populous tahsil, containing between three-fifth and two-third of the district's area and two-third of its population. Hatta tahsil is thus only half as populous as Damoh tahsil. It may also be noticed that Damoh tahsil contains a greater proportion of district's population than its area; the reverse, naturally is the case with Hatta tahsil. Damoh thus seems to be more densely populated than Hatta tahsil. For a clearer focus on relative denseness of population, we must turn to the population density index, i. e. number of persons per square mile of area. This is done in the table below which also gives the corresponding figures for 1951.

**Density of Population*, 1961 *and* 1951

| District/Tahsil | Population per square mile | | | |
|---|---|---|---|---|
| | 1961 | Rank | 1951 | Rank |
| 1 | 2 | 3 | 4 | 5 |
| Damoh district | 156 | .. | 127 | .. |
| Hatta tahsil | 144 | 2 | 120 | 2 |
| Damoh tahsil | 162 | 1 | 131 | 1 |

Damoh is one of the sparsely populated districts of the State, its density of 156 persons per square mile being about 19% below the State average of 190. In the State context, Damoh ranks 32nd in descending order of population density. Three districts in the State have population densities within ± 5% of the population density of Damoh district. These with their respective population densities are : Shahdol (155), Hoshangabad (161), and Seoni (156).

As regards relative denseness of the two tahsils, the table confirms the broad observation made earlier in this section. In 1961, Damoh tahsil has 18 more persons on an average, per square mile than Hatta tahsil. This slightly higher population density is explained, among other things, by its being better off in communications, but mainly by the concentration of population in Damoh town. Density in rural areas varies principally with the relative culturability of the soil. The density of population is thus very high in the villages both of Damoh and Hatta tahsils lying along the valley of the Sonar, which contains fine black soil only slightly inferior to that of the Narbada valley. Both the tahsils include sparsely inhabited tracts of hill, jungle or poor soil, particularly in the hilly country in the northern part of Hatta tahsil and southern part of Damoh tahsil. The latter however contains pockets of rich black soil supporting clusters of thickly inhabited villages.

During the decade 1951-61, the district has gained 29 more persons per square mile, 24 persons more per square mile in Hatta tahsil and 31 persons more per square mile in Damoh tahsil.

**Discrepancy in Area Figures:**

Area figures for the district as given in Table A-1 by the Surveyor General, India and the State Director of Land Records do not agree. This disagreement arises from the different methods employed by the two agencies in surveying and calculating the area. The discrepancy has, in case of some districts, sizeable dimensions. In case of Damoh district, the difference is of the order of 0.6% of the area given by the Director of Land Records, the latter being smaller.

**Rural-Urban Classification:**

The rural-urban breakup of the population of Damoh district and each of its tahsils for 1961 and 1951 is given in the following table:

+Area figures released by Director of Land Records in 1962-63 have been used for this table.

*Density both for 1961 and 1951 has been calculated on the basis of revised area figures released by D. L. R. in 1962-63.

100 *Persons in the district and in each tahsil classified by residence in rural/urban areas,* 1951 *and* 1961.

| Name of District/ Tahsil | Population | | | | | |
|---|---|---|---|---|---|---|
| | 1961 | | | 1951 | | |
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Damoh district | 100 | 87.3 | 12.7 | 100 | 87.8 | 12.2 |
| Hatta tahsil | 100 | 93.8 | 6.2 | 100 | 94.6 | 5.4 |
| Damoh tahsil | 100 | 84.0 | 16.0 | 100 | 84.2 | 15.8 |

Having an urban component of 12.7% in its population, the district is slightly less urbanised than the State as a whole whose population includes an urban component of 14.3%, and much less urbanised than Jabalpur division, which has an urban component of 16.9% in its population. The district has two towns, one each in each tahsil. Damoh, the bigger one and five times as populous as the smaller-Hatta, is the headquarters of the district, and has had continuous existence as a municipal town since 1901. It has multiplied about 3.5 times in population since 1901., Hatta the other town is the headquarters of the tahsil of the selfsame name. It stepped into the category of towns only from 1951. It is also a municipality. Damoh tahsil is much more urban than Hatta tahsil.

Since 1951, the district has slightly improved upon its urban proportion. The increase in the proportion of urban population is higher in Hatta tahsil, in which the town of Hatta has registered an increase of 37.7% during 1951. The increase during the same period in the population of Damoh town has been only of the order of 26.2%.

**Rural Population :**

87.3% of the population of Damoh district resides in 1,144 inhabited villages of which 441 or 38.5% are in Hatta tahsil and the remaining 703 or 61.5 of all inhabited villages, in Damoh tahsil. The district contains 1.6% of all inhabited villages of the State, but only 1.4% of its rural population, *prima facie* suggesting that a village is, on an average, less populous in Damoh district than in the States as a whole. On an average, a district should contain 2.33 per cent of the State's inhabited villages and the same proportion of its rural population.

18.1% of all villages in the district are uninhabited, which compares with a much smaller proportion of 8.4% in the State as a whole. Hatta tahsil has as many as one-fifth (20.6%) of all its villages uninhabited, but the proportion is smaller—about one-sixth (16.5%)--in the Damoh tahsil. In the following paragraphs, inhabited villages in the district are studied from the standpoint of their populousness, first as regards the numerousness of each group of villages with specified populousness, and secondly the proportion of population living in each such group.

*Villages Classified by Population* 1961

| District/Tahsil | Villages with population | | | | | | |
|---|---|---|---|---|---|---|---|
| | All inhabited villages | below 200 | 200-499 | 500-999 | 1,000-1,999 | 2,000 4,999 | 5000+ |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Damoh district | 100 | 46.9 | 34.4 | 13.8 | 3.8 | 0.9 | 0.2 |
| Hatta tahsil | 100 | 51.5 | 30.8 | 12.9 | 3.9 | 0.9 | .. |
| Damoh tahsil | 100 | 44.1 | 36.7 | 14.2 | 3.8 | 0.9 | 0.3 |
| Madhya Pradesh | 100 | 37.2 | 38.1 | 18.2 | 5.4 | 1.1 | N |

For the sake of convenience, villages with population below 200 will be referred to as 'very small' villages, those with population between 200 and 499 as 'small' villages, those with population between and including 500 and 999 as medium-sized villages, those with population between and including 1,000 and 1,999 as 'big' villages, and those with population 2,000 and over as 'very big' villages.

The table given above shows that Damoh is distinctly a district of 'very small' and 'small' villages, the two classes together accounting for a little more than four-fifth of all the villages. These villages are somewhat less frequent in the State as a whole than in Damoh district. Most common in the district are 'very small' villages which constitute very nearly half (47%) of all villages in the district. In the northern Hatta tahsil, their proportion is slightly more than half, but is smaller than half in the Damoh tahsil. 'Small' villages come next in respect of numerousness, making a little more than one-third of all villages in the district. They are slightly more numerous than that in the Damoh tahsil but less numerous in Hatta tahsil.

Medium-sized villages are roughly one-seventh (14%) of all inhabited villages in the district, there being only small variation in tahsilwise proportions of these villages. In the State as a whole, these villages are more frequent than in the district.

'Big' and 'very big' villages i.e. villages bigger than 1,000 in population are the least frequent in the district, numbering roughly 1 in 20 among the inhabited villages.

The following table gives the proportion of rural population living in villages of each population class to total rural population for the district and for each tahsil. Corresponding figures for the State as a whole are also given for the sake of comparison.

100 *Persons in rural areas of the district and each tahsil classified by residence in villages in the various population ranges*, 1961.

| District/Tahsil | Total rural population | Rural population living in villages with population | | | | | |
|---|---|---|---|---|---|---|---|
| | | Below 200 | 200-499 | 500-999 | 1,000-1,999 | 2,000-4,999 | 5,000 + |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Damoh district | 100 | 13.9 | 33.3 | 28.2 | 15.2 | 6.6 | 2.8 |
| Hatta tahsil | 100 | 15.9 | 31.4 | 28.1 | 16.4 | 8.2 | .. |
| Damoh tahsil | 100 | 12.8 | 34.3 | 28.2 | 14.5 | 5.7 | 4.5 |
| Madhya Pradesh | 100 | 10.0 | 31.8 | 31.6 | 18.2 | 8.4 | |

Most populous in the district as well as in each tahsil are 'small' villages with population ranging between 200 and 500 each. One-third of the rural population of the district resides in these villages, which as seen earlier, make a little more than one-third of all inhabited villages in the district. The proportions for the two tahsils show but minor variation. Closely following as regards populousness are 'medium-sized' villages, which roughly make one-seventh of all inhabited villages in the district, but accommodate about three-tenth of its rural population. The proportions for the two tahsils show surprisingly close values as regards these villages.

Next largest section of the population prefers to live in 'big' and 'very big' villages. Together these villages with population of more than a 1,000 each number 1 in 20 among the inhabited villages of the district, but one-fourth of the rural population resides in them. In case of these villages also proportions for the two tahsils show surprisingly close agreement. Least preferred from the point of view of residence are 'very small' villages even though they are most frequent among the various classes of villages. These account for nearly one-seventh of the rural population of the district. In Hatta tahsil where they make more than half of all inhabited villages, a slightly higher—roughly one-sixth—proportion of population resides in them; but in Damoh tahsil where they are slightly less frequent, only one-eighth of the rural population uses them for residence.

Smaller villages below 500 in population which account for more than four-fifth of all inhabited

villages in the district contain 47%—i.e. not even half of its population. Thus, more than half of the rural population of the district live in bigger villages with population of more than 500 each.

The pattern of preference for different size-ranges of villages shows a striking similarity between the district and its tahsils on the one hand and the State on the other. The similarity in rural residence pattern between the two tahsils arises because of the topographical similarity between them. Thus both include a part of the fertile Sonar valley, flanked by sandstone hills and plateaus.

**Average Population Per Village:**

The table below gives the average population per village in the district and in each tahsil for the various population ranges of villages. Comparative figures for the State and Jabalpur division are also given:

| District/Tahsil | Average population per village in villages with population. | | | | | |
|---|---|---|---|---|---|---|
| | All villages | Below 200 | 200-499 | 500-999 | 1,000-1,999 | 2,000 + |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Damoh district | 334 | 99 | 323 | 687 | 1,319 | 3,006 |
| Hatta tahsil | 313 | 97 | 320 | 682 | 1,334 | 2,818 |
| Damoh tahsil | 348 | 101 | 325 | 690 | 1,310 | 3,100 |
| Jabalpur division | 363 | 110 | 320 | 683 | 1,331 | 2,945 |
| Madhya Pradesh | 394 | 106 | 329 | 685 | 1,323 | 2,886 |

The table shows that a village in the district is, on an average, much less populous than a village in the State, or even Jabalpur division. Among the tahsils, villages in Hatta seem to be less populous on an average, than villages in Damoh tahsil.

**Villages and Hamlets:**

A village, for census purposes is the same as the revenue village or *mouza*. This is a well-recognised unit and is determined by definitely surveyed boundaries. In case of small villages, the population resides usually in a single collection of houses, situated on a higher level than the surrounding fields, with a veiw to secure natural drainage. In the case of bigger villages, the extension of cultivated area or the crowding of the old village site sometime necessitates the distribution of surplus population in hamlets, known as *majras* or *tolas* in local parlance, situated usually at short distances from the central village. Sometimes, caste distinctions also give rise to satellite settlements around the central village. These hamlets are administratively, as well as in the social life and sentiments of the people, treated as parts of the village to which they belong. The names of hamlets of a village are given below the name of the concerned village in the alphabetical list of villages to the Village Directory in the Handbook. Forest villages, do not have clearly surveyed boundaries, but there is no practical difficulty in recognising them because each such village consists of a definite collection of houses having a separate name and individuality.

**Viliage Names:**

Study of village names is an interesting pastime. If the enquiry is made in a systematic and scientific manner the apparently bewildering complexity of village names can be classified into a few classes. A detailed study into village names, however, requires thorough acquaintance with the local dialect, local history and local tradition. Such a study, rewarding in itself though it may be, is beyond the competence and compass of the present note and may be taken up by some one interested in the subject. A cursory examination of some of the more common names, with an indication on their probable origin or etymology, is all that is attempted in the present following paragraphs.

Like almost all the districts of the region in which Damoh is situated many village names are based on the names of trees. Important among such names are those based on (i) *am* or mango like Amgaon; Amkhera; Amoda; Amtara, Amkheria, Amdar; Amghat; Amwahi; Amjhir; Amoni Kala, etc. (ii) on *pipar* as Piparia with its numerous suffiixes based on caste

or neighbouring villages, Peeparkhiria Piprodha, or Pipra, (iii) on *hardu* (*Adina cordifolia*) such as the numerous Harduas, Harduwani, (iv) on *harra* like Harrai (v) on *bar* (*Ficus religiosa*) like Barkhera, Baroda, Barkuair, (vi) on *bamur* (*Accacia arabica*) like Bamuri, Bamoora, Bamhori, Bamuria, (vii) on *ber* (*Zyzyphus jujuba*) as Berkheri, Berdhana, Bertalai etc. (viii) *Bil or ber* (*Aegle marmelos*) like Belwada, Bilai, Biltara, Bilkharwa, Bilguwan (ix) on *chheola* (*Butea frondosa*) as Chheola (x) on *Jamun* (*Jambolana indica*) such as the numerous Jamunias, Jamun Hatri, Jamunjhiri, Jamunkheda etc. (xi) on *nim* (*Melia indica*) such as the numerous Neemkheras, Nimi, Nimbora, Nimar etc., (xii) *Reonjha* (*Acacia Leucopholea*) such as Reonjha Kala, Reonjha Madho, Reonjha ghat (xiii) on *sagon* (*Tectona grandis*) such as Sagoni with various suffixes indicating generally neighbouring villages (xiv) on *semra* (*Bombax Malabaricum*) such as the many Semra's with different suffixes, like Semra Lodhi, Semra Chhakka, Semar Patti, Semra madia, etc, Simaria, Semarkhedi, Semar Patti; (xv) *umar* (Ficus) such as the various Umaria's, Umraho, Umri hinnai, Umarghat, etc. (xvi) on *mahua* (*Bassia latifolia*) such as Mahuakheda, Mahuajhala, Mahuaghat etc. (xvii) on *Imli* (*Tamarindus indica*) such as the numerous Imlai's or Imalia's, Imali dol, Imali job etc. Besides these, the village names Karondi, Katangi, Khamharia, Salaiya, Saj, Sajpani, Tilguwan, Bajkain, Kachnar, Khaira, Khairi, Khakra, are also derived from names of trees or shrubs that are prolific in the neighbourhood of the villages.

Names based on animal kingdom are not as common as those based on trees. Yet, animals like *richh* (bear), *bagh* or *singh* (tiger), *bichhu* (Scorpion) *hathi* or elephant, *chil*, (kite), have given their names to villages such as Richhai or Richhkudi, Baghpura, Bagha, Bagsari, Singhpur; Bichhua or Bichhia, Hathidol, Hathani, Hathi bhar; and Chilghat.

Castes or names of persons of importance in the village have also left their mark on village names in the district as will appear from the following names; Bhanpura or Bamhni, Beohari, Barkhera Kalar, Kumhari, Padri Kumhari, Bamnoda, Dumar Jamunia, Sagoni Upadhayaya, Sheikhpura, Simri Shukla, Khojakheri, Luharra, Gugri Tiwari asli, Imalia Rawat, Kumharwar, Kumhari, Pateria Khamaria etc. Religious or mythological personages have also influenced village names in the district such as is found in the names Deori, Devpura, Dharampura, Ghanshyampura, Kabirpur, Narayanpura, Rampura, Ramgarh, Narsingarh, Ramadehi, Ram Salaiya, Bhimpura, Ganeshpura, Gopalpura, Hanumatkhera, Sitanagar etc.

Some village names are historical like Singorgarh, Singrampur, Batiadoh, Tejgarh, etc. Quite a few are based on former Gond kings like Madankhera, Dalpatpura, Shahpura, Hirdepura, Rajakheri, Rajnagar etc.

Common suffixes in village names are *pur* or its diminutive *pura*, *khera* or *kheri*, *dob*, *gawan* or *guwan* or *gaon*, *ghat*, *dehi*, *garh*. Quite often caste names are suffixed to the name proper of the village to distinguish it from other villages of the same name. The endings *kalan* (big), *khurd* (small), *bujurg* (old), *asl* (real), *dakhali* (entered as such in records) etc. are also commonly used as suffixes to village names. But most numerous as suffixes are names of other villages in the neighbourhood of the village proper which are appended to its name to identify it from its namesakes.

Gondi as mother tongue has almost become extinct in the district. There is, however, evidence of many of the village names being based on Gondi words. It may be mentioned that the Gonds, unlike their non-Gond brethren, did not usually add suffixes to village names. Hence most of the monosyllabic names like Ghughra, Ghughri, Sagda, Sarra, Hinoti or Hinota, Chheola, Koomhi, Saj, etc. appear to have Gondi origin.

**Houses and Households:**

At the time of houselisting (which preceded the enumeration by a few months), the district had 133,503 census houses. Of these 7,188 or 5.4% were found vacant. As is natural, majority of the houses—63.5% or roughly two-thirds were used only for dwelling. Next numerous were dwelling houses, in which the dwelling household also carried on household industry. Recorded as workshop-cum-dwellings, these houses constituted 9% of all census houses. About 0.8% of the census houses were used as shop-cum-dwellings, and a slightly higher proportion i.e. 0.9% were used as only shops. The remaining houses were put to various other uses like schools, factories and workshops, hotels and restaurants, places of enter-

tainment and community gathering, etc. Together such census houses added upto about one-fifth of all census-houses.

On the Census reference date i.e. 1.3.1961, 97,993 households were living in Damoh district in 94,332 census houses. One census household thus accommodated 1.04 census households in the district. It appears from table E-II that 88% of the households lived in census houses which belonged to them and only 12% in rented dwellings. In urban areas about 45% of the households had no houses of their own but had to live in rented dwellings, thus showing that immigrants constitute more than two-fifth of the urban population.

Table E-IV of the Handbook, based on a 20% random sample of all households as existed at the time of houselisting, gives us interesting information regarding the building materials used in the construction of the walls and roofs of the houses. It is found that roughly half (48.2%) of the households lived in census-houses with walls made predominantly of stone. This is an example of geography influencing the choice of materials for construction of houses, because the hills in the northern and southern parts of the district abound in Vindhyan sandstone which furnishes very good building slabs. Mud is the next preferred—because, of course, of its easy availability—material for constructing walls, as many as one-fourth of the households exercising their choice in favour of houses with mud walls. About one-seventh (14.1%) of all households live in dwellings with walls made predominantly of unburnt bricks. Pacca dwellings built with walls of burnt bricks come next in frequency, and these serve as the residence of about 8% of the households. Houses with walls made of any other material viz. timber, grass, leaves etc. are rare.

The pattern is somewhat different in urban areas. Semi-pacca houses, with walls predominantly made of unburnt bricks, are the most frequent there, accommodating roughly one-third (34.4%) of the urban households. These are closely followed by dwellings with mud-walls, which serve as the residences of 28% of the households. Pacca houses with walls of burnt bricks are more frequent in urban than in all areas of the district, with 15.7% of the households living in them. Houses with stone-walls, which were most numerous in all areas, are only slightly more frequent than pacca brick houses in urban areas, 19% of the households live in these houses.

As regards roofing material, tiled roofs seem to be the rule in rural as well as urban areas. In rural areas, grass or thatch roofs also are occasionally met with.

Table E-V, again based on a 20% sample of households as existed at the time of houselisting, gives us valuable information regarding congestion in dwelling houses. It tells us that a household in the district consisted, on an average, of 4.4 members who together lived in 1.4 rooms on an average. Thus, a room in the district contained 3.1 persons on an average. Here it is as well to point out that the census requirements of a room were very modest, and a walled enclosure in a house with an exit door and space enough for one man to sleep in was all that was required to designate a room. Hence, the figures do not give us reasonably accurate idea of congestion in terms of floor area per person. But it should not be difficult to see that rooms in most village houses are comparatively small, not usually exceeding 100 to 125 square feet in area.

The acute living congestion in the district can be inferred from the fact that roughly three-fourths (73.7%) of the households lived in dwellings having only one room each, with 4.2 persons, on an average, in it. The urban areas were slightly better because only half of the urban households had to live in single-room dwellings. Again another 18% of the households lived in houses with two rooms each with 2.5 persons per room. These may be said to be fortunate only in relative terms, that is, as compared with the households managing only with one room. This leaves us about 8% of the households that were really better of with three or more rooms each. The census data thus tells us that most of the households in the district live in conditions of extreme congestion.

**Population Variation During 1901-61**

The following table gives percentage variation in the population of the district during the six decades preceding the last census. Corresponding State figures are also given for purposes of comparison.

*Population Variation (Percentage), 1901-61*

| Year | Variation in population | | | | | |
|---|---|---|---|---|---|---|
| | Damoh district | | | Madhya Pradesh | | |
| | T | R | U | T | R | U |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901-11 | +16.7 | +16.2 | +27.6 | +15.3 | +17.8 | —10.9 |
| 1911-21 | —13.8 | —14.0 | —10.3 | — 1.4 | — 2.3 | +10.9 |
| 1921-31 | + 6.4 | + 4.8 | +35.5 | +11.4 | +10.5 | +23.0 |
| 1931-41 | +12.0 | +10.7 | +29.3 | +12.3 | +10.5 | +32.9 |
| 1941-51 | + 4.2 | — 0.8 | +62.8 | + 8.7 | + 6.0 | +33.2 |
| 1951-61 | +22.6 | +21.9 | +27.8 | +24.2 | +21.0 | +47.7 |
| 1901-31 | + 7.1 | N.A. | N.A. | +26.7 | N.A. | N.A. |
| 1931-61 | +30.1 | N.A. | N.A. | +51.6 | N.A. | N.A. |
| 1901-61 | +53.1 | +40.2 | +317.6 | +92.0 | +80.1 | +217.4 |

Salient features of this table are described in the following paragraphs.

**Decade 1901-11**

This decade could conveniently be divided into three periods consisting of (i) the years 1901 to 1907 (ii) the scarcity year 1907-08 and (iii) the remaining years 1908-1910. The famine of 1900 was followed by two fair seasons and though the year 1902-03 witnessed failure of crops in the rice producing districts, it was good as far as the wheat producing Damoh district, and other districts of Narbada valley were concerned. The outturn in Damoh district* in that year was 30% higher than normal. Year 1903-04 was again reported to be a very good year for most of the districts, but the following year saw an extensive damage to *rabi* crops in the district by frost. In the following year i.e. 1905-06, Damoh and other northern districts of the then Central Provinces and Berar again did well. The year 1906-07 was generally good. The first seven years of the decade were thus generally good as far as Damoh district is concerned. In 1907-08, however, owing first to heavy and untimely rains, and then its abrupt cessation in the third week of September, the crops failed, the failure being most serious in Damoh and many other districts of the Satpura plateau and the Narbada valley. There was, however, no unusual mortality, and the remaining three years of the decade saw a quick recovery of the population from the depression of 1907-08. Damoh had suffered less in the famine of 1899-1900. The slightly higher increase of the district than that of the State as a whole is explained by the expansion of Damoh town whose population increased by 27%, as against a decrease of 11% in the urban population of the State as a whole. Hatta tahsil which had lost over 21% of its population in the lean years of the earlier decade increased by 20 per cent, and the Damoh tahsil which had suffered much less by 15%.

**Decade 1911-21**

This seems to have been a memorable decade in the census history of the last sixty years, particularly in case of Damoh district which lost in population at a rate ten times greater than that of the State as a whole. The decrease was common to both rural and urban areas, though in case of the former it was slightly more pronounced. The history of the agricultural and economic condition of the people during the decade 1911-21 has been described in census literature as one of considerable complexity, and as having left a marked effect on census statistics. The year 1918-19 was affected by scarcity and famine conditions in many parts of the State owing to abrupt cessation of rains in September. Damoh district, however, escaped distress because of favourable winter rains. However the district reacted disastrously to the fatal influenza epidemic which began in September 1918 but extended well into the next year. The following passage taken from Census Report of 1921 indicates the severity of the diaster.ψ

"A fulminating epidemic such as this one is altogether without parallel in the records of the Province. It appeared in two waves, the first of which occurred

*Census of India, 1911, C.P. & Berar, Part I, Report-Page 29.

ψCensus of India, 1921, C. P. and Berar, Part I —Report, page 5.

in July and was so mild that it does not appear to have penetrated into some of the districts at all.... The second wave, however, which started late in September struck the Province with lightning suddenness and violence, spreading rapidly, and leaving behind it a melancholy wake of decimated villages and destitute orphans." The closing year of the decade, however, was again marked by famine and scarcity conditions owing to failure of monsoon. The districts of Jabalpur division, in which Damoh was situated, suffered most. Explaining the large decrease of population in Damoh district during the 1911-21 decade, the 1921 Census Report observes "The history of vital statistics is somewhat similar (i.e. to that of Sagar district) but there was an actual excess of deaths in 1916, and in the influenza year there was a recorded death rate of 159 per mile as against 133 in Saugor, while the low birth rate persisted for the two subsequent years instead of one. The population therefore fell by 45,921 or 13.8 per cent, which is one of the largest decrease recorded in the British territory."

**1921-31:**

This again was a decade of comparatively lower growth rate for the district. Noticing the low growth rate of Damoh and the neighbouring Sagar district, the Superintendent of Census Operations of Central Provinces and Berar, 1931 devoted considerable space to a discussion of the probable cause of this low growth. The following extracts are taken from his Report which adequately explain the observed low growth.

"During the last decade there was a slight increase of population in each tahsil, the lowest, in Saugor tahsil, being 1.40 only inspite of a heavy rise in the town population. Banda tahsil's increase was the heaviest—7.23 per cent and Damoh tahsil came second with 6.85 per cent. The population of Damoh town rose by 35.51 per cent, but this was partly due to the tendency of the population to concentrate round towns in times of scarcity."

"The crop-failures in these two districts in the years 1928, 1929 and 1930 followed a succession of seven comparatively good years..... The chief cause of disaster in 1928 was the capricious nature of the rainfall during 1927-28 resulting finally in excessive moisture in the soil which produced an epidemic of rust in wheat and linseed and a plague of caterpillars in gram. It was only in isolated fields on high ground or where the soil was light, and in places where wise cultivators had sown rust-proof seed that the crops escaped to any extent. To make things worse in the following cold weather rain damaged the *juar* and *til* on the threshing floor in many villages."

"Unequal distribution of rainfall during the monsoon of 1929, and its abrupt cessation on September 7th was responsible for the third consecutive failure of the crops of 1929-30 which affected both the *kharif* and the *rabi* crop harvests"..... It is to be noted that the failure of 1927-28 and 1928-29 caused the diversion to *kharif* of a large area normally under *rabi* crops. *Juar* especially was sown and it suffered very badly from the unfavourable monsoon of 1929."

"The effect upon vital statistics of a continuous scarcity of the magnitude indicated was bound to be considerable. The Commissioner of the Jabalpur division remarked that from the year 1923 when the effects of the famine of 1920-21 ceased to operate, upto and including the year 1928, the figures of births and deaths resulted in a steady increase in the deduced population. This increase was checked in 1929 in Saugor and Damoh where the population either lost slightly or remained stationery. The chief feature of the statistics was however the drop in the birth-rate in that year. In Saugor it fell from 41.57 per thousand in 1928 to 32.10 per thousand in 1929, and in Damoh from 40.05 per thousand in 1928 to 36.78 per thousand in 1929. In 1929 in fact the number of deaths exceeded the number of births in Saugor while the figures were practically equal in Damoh. In 1930 there was a slight rise in both districts to 35.73 and 39.82 respectively. The death-rate on the other hand was comparatively little affected."

**1931-41 and 1941-51 :**

In the decade 1931-41 the population in the district grew almost at the same rate as that of the State as a whole. The following decade i.e. 1941-51, however, again witnessed a low rate of increase in Damoh district. The decade was not noted for any unusual mortality in the population, though the entire period was surcharged with anxiety, owing in the beginning, to the 2nd World War, the rise in prices that followed the World War, freedom struggle, communal bloodshed etc. The 1951 Census Superintendent had ex-

plained the low growth of the State as a whole during 1941-51 by ascribing it to the depletion of women in the main fertility period25-35by the influenza epidemic of 1918-19 (because on the one hand, the effect of the epidemic was more on persons at the two extremes of life, and on the other, it mauled the weaker sex more than the stronger sex). As may be recalled, Damoh district had lost heavily in the epidemic, and consequently the effects of the depletion will be more pronounced in its case than in case of the State as a whole. Another fact which seems to have affected the growth of population in the district is emigration to the neighbouring district Jabalpur where an entirely new township of Khamaria had emerged during the decade. The apparent decrease in the rural population of the district during the decade is because of Hatta, entering the urban category. This also explains the unusually high increase in the urban population during the decade.

**1951-61:**

The last decade saw an all time high accretion of 23% percent to the district's population. The high increase was a phenomenon common to the State as a whole, and therefore the causes leading to it should also be common. Apart from the fact that the causes that led to low birth-rates during the first four years of 1941-51 (owing to depletion of reproductive age-groups by influenza epidemic of 1918-19), were not operative during 1951-61, the main cause of the unusually high rate of increase seems to be an effective arrest in mortality during the decade. Epidemics like plague and cholera are now effectively controlled (the former has almost become a thing of the past); influenza is now a simple affair of fever for a few days, and malaria has been more or less controlled. General improvement in the health of the population has also occurred owing to relatively greater prosperity, and to the extension of medical help to more and more areas and people.

**Growth during 1901-61 :**

It may be noticed that during the 60 year period 1901-61, the district has increased by more than half of its 1901 population. The State as a whole has however gained nearly nine-tenths over its 1901- population. During the first half of the sixty year period, the State grew about four times as fast as the district. During the latter half also, the State grew more than 1⅓ times as fast as the district. Thus, the entire period of sixty years from 1901 to 1961 seems to have favoured the district less than the State as regards population growth.

**Increase during 1951-61 further analysed**

The table inset below gives a break up of the increase attained by the district during 1951-61 by tahsils, separately for total, rural and urban areas.

*Percentage increase in population by tahsils*, 1951-61.

| Name of District/ Tahsil | Percentage increase in population | | |
|---|---|---|---|
| | T | R | U |
| 1 | 2 | 3 | 4 |
| Damoh district | +22.6 | +21.9 | +27.8 |
| Hatta tahsil | +19.7 | +18.8 | +36.8 |
| Damoh tahsil | +24.1 | +23.8 | +26.2 |

The table shows that Damoh tahsil has increased faster than Hatta tahsil during the inter-censal decade. This may possibly be due to some within the district migration from Hatta to Damoh tahsil of harvesting labourers at the time of census count.

In the district as a whole, and in both tahsils, the urban population has grown faster than the rural. Among the tahsils, urban growth has been considerably faster in Hatta than in Damoh tahsil. This points to the possibility of some rural to urban migration at least in case of Hatta town, which is not likely to attract persons from the other tahsil or from outside Damoh district.

## AGE AND SEX

Age and sex structure of the population of Damoh district is shown in the following table; it also shows the corresponding structure of the population of the State as a whole.

**Distribution of 100 persons in the district and the State by age and sex.**

| Age group | Damoh District | | | Madhya Pradesh. | | |
|---|---|---|---|---|---|---|
| | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| All ages | 100 | 50.9 | 49.1 | 100 | 51.2 | 48.8 |
| 0-4 | 17.7 | 9.0 | 8.7 | 16.4 | 8.2 | 8.2 |
| 5-9 | 13.5 | 7.0 | 6.5 | 14.3 | 7.3 | 7.0 |

Table continued from pre-page

| Age group | Damoh District | | | Madhya Pradesh | | |
|---|---|---|---|---|---|---|
| | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 10-14 | 9.9 | 5.4 | 4.5 | 10.1 | 5.5 | 4.6 |
| **0-14** | **41.1** | **21.4** | **19.7** | **40.8** | **21.0** | **19.8** |
| 15-19 | 8.2 | 4.3 | 3.9 | 7.9 | 4.1 | 3.8 |

| A.N.S. | N | N | N | 0.1 | N | N |

The data presented in this table are based on ungraduated ages that were actually returned at enumeration, without being subjected to any smoothing for common errors of age-reporting. The quin-quennial (upto 70 years of age) age-groupings adopted above do suppress to some extent the distorting effects, on the shape of the age-curve, of age-heapings at multiples of five and at even rather than odd digits. Still, it does not require an expert eye to be able to say that such effects are not entirely absent. In a normal age-distribution in a closed population (where migrationery and other violent effects like war and epidemics do not materially alter the shape of the age-curve) the age-distribution starts with a peak value at the lowest age-group or ages and goes on dropping in more or less a smooth progression. In the age-distribution of Damoh district there is departure from this normal position as follows: there are greater number of persons in age-group 20-24 than in 15-19, in 40-44 than in 35-39, in 50-54 than in 45-49, and in 60-64 than in 55-59. Obviously, these proportions do not represent the correct state of affairs, and the excesses in age-groups 20-24, 40-44, 50-54 and 60-64 are results of *preference for the round ages 20, 40, 50 and 60. In considering the above data, therefore, it would be safer to restrict the consideration, as far as possible, to the broader age-groups 0-14, 15-34, 35-59 and 60+ in which it may reasonably be assumed that digital preferences mutually cancel out to a considerable extent. It is convenient to speak of these broader age-groups 0-14, 15-34, 35-59 and 60+ as corresponding roughly to childhood and juvenility, youth, middle age and old age.

*For a fuller discussion of patterns of digital preference in the State, the reader is referred to the Chapter on age and sex of the State Report.

Though broadly similar to the State pattern for the wider age-groups, the district shows some significant departures from it as regards details. This departure is slightly more pronounced in the youngest age-group 0-14, the district proportion for it being bigger than the corresponding State proportion by 0.3 point. The district proportion is also greater than the State proportion in case of middle age. On the other hand, in respect of youth and old age the State age proportions are correspondingly greater than the district proportions.

As in case of the State as a whole, infants, children and juveniles (0-14) constitute slightly more than two-fifth of the population of the district. Seen in the light of a rule-of-the-thumb measure given by Sundburg, this indicates a growing population, not a very encouraging prospect in the context of the population explosion of the last decade.

Young persons in the ages 15-34 constitute the next most numerous age interval, the proportion being almost one-third of the population. Middle age claims slightly more than one-fifth of the population, but the proportion drops to less than one-twentieth in the residuary age interval 60+, consisting of persons of 60 years and more of ages. The population of the district as of the State as a whole, is thus youth-ful with three-fourth of it being less than 35 years of age, and more than fourth-fifth below 45 years. In a nutshell, to put in more concrete terms, if one picked up randomly five persons in the district, two of them would be children below 15 years, one a middle-aged person and the remaining two being either young persons or old persons. Between themselves, young persons are almost seven times as numerous as old persons.

**Changes in age-pattern since 1951:**

The following table presents changes in age-composition (by broad age-groups) of the district

at the 1951 and 1961 censuses. The figures for 1951 are based on a 10%, randomly chosen sample of that census, while the 1961 proportions are based on total population. Hence in making this comparison we are tacitly assuming that the 1951 sample was representative of the total population of that census, an assumption, justified when the sample is large and random. Also, in appreciating this sample, we must also keep in mind the discussion regarding age-heapings at certain preferred digits.

**Change in age distribution 1951-61**

| Age-group | Damoh District | | Madhya Pradesh | |
|---|---|---|---|---|
| | 1961 | 1951 | 1961 | 1951 |
| 1 | 2 | 3 | 4 | 5 |
| 0-14 | 41.10 | 38.33 | 40.8 | 38.3 |
| 15-34 | 32.39 | 32.16 | 32.8 | 33.4 |
| 35-59 | 21.83 | 24.78 | 21.3 | 23.1 |
| 60+ | 4.66 | 4.67 | 5.2 | 5.1 |
| A.N.S. | 0.02 | 0.06 | N | 0.1 |

The table clearly brings out the significant increase of 2.77 points in the proportion of children and juveniles. This arises mainly from the addition of children born (age-group 0-9) and surviving during the decade and the evidence thus reasonably attests to the higher fertility levels prevailing in the district during the decade, as also, to the lower mortality levels among the infants and children. The proportion of young persons has also registered an increase, which though less conspicuous, is still significant in view of the decrease shown by the State as a whole. This increase is significant of reduction in mortality among the youth-ful population, the chances of immigration being ruled out because of absence of other evidence. As against the increases in the first two age-groups the two older age-groups have registered decreases, the decrease being significantly high in the period of middle age. Part of this high decrease of about 3 points can no doubt be ascribed to the general broadening of the population base (owing to much more than proportionate addition of children below 10), and to effects of age-misreporting, but it also shows convincingly that death-rate in the higher ages continued unaltered, if it did not actually increase. This is not a startling discovery, however; as is well known middle age is a period of heavy stresses and strains both in case of males and females, owing to the burden of bread-winning in one case and improvident maternity on the other. The proportion of older persons beyond 60 years of age has almost stayed constant in the intercensal decennium which, in view of the more than proportionate broadening of the general population base, indicates that chances of survival have also improved in case of older persons.

**SEX RATIO:**

Sex ratio, or the number of females for a given number (1000 as regards the census) of males is an important demographic variable of a population. Common people generally believe—a belief, perhaps, based on their expectation—that males and females exist (or, should exist) in equal numbers in the population. Quite contrary to this belief, however, the number of females relative to males varies not only from one geographical region to another or from one ethnic group to another but even from one point of time to another or from rural to urban areas. As an example of regional or geographical variation of sex-ratio, it may be stated that in Madhya Pradesh sex-ratio varies from a lowest value of 839 in Morena district in the northernmost corner of the State to a highest value of 1,037 in Raipur district in the east of the State. It is possible to map belts of high, medium and low sex ratio in the State. There may be a number of other factors—social, cultural and demographic—reacting on the sex-ratio of the population at a given point of time and place.

Damoh district has a sex-ratio of 965, which compares with a lower value 953 for the State as a whole. The ratio has the higher value 971 in the northern, proportionately less urban, Hatta tahsil; its value in the southern, more urbanised Damoh tahsil being 962. In urban areas of the district, mainly as a result of sex-selective migration, the ratio is as low as 906, comparing however with a much smaller value of 856 for the State as a whole. The pull of urban population on the sex ratio of total populations of the tahsils is brought out forcefully from the near equality of rural sex ratios in the two tahsils, being 976 in Hatta and 973 in Damoh tahsils. Sex ratio in rural areas of the district as a whole is 974. Separately for the tahsils, urban sex ratio is 903 in Hatta and 907 in Damoh tahsil. The comparatively higher value of the ratio even in urban areas goes to show that the district is slow in attracting migrants.

**Sex Ratio Variation Over Time :**

The following table studies sex-ratio variation in the district over time, separately for its total, rural and urban areas, at the past six census counts. Corresponding comparative data for the State as a whole is also juxtaposed for bringing out differences, if any.

**Changes in Sex-ratio, 1901-61**

| Year | Sex Ratio | | | | | |
|---|---|---|---|---|---|---|
| | Damoh District | | | Madhya Pradesh | | |
| | T | R | U | T | R | U |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 988 | 989 | 980 | 990 | 995 | 937 |
| 1911 | 982 | 983 | 952 | 986 | 991 | 913 |
| 1921 | 954 | 957 | 914 | 974 | 982 | 878 |
| 1931 | 974 | 977 | 933 | 973 | 983 | 872 |
| 1941 | 981 | 984 | 948 | 970 | 980 | 882 |
| 1951 | 980 | 984 | 950 | 967 | 975 | 907 |
| 1961 | 965 | 974 | 906 | 953 | 970 | 856 |

The table at once focusses attention on the fact that but for the decades 1921-31 and 1931-41 the trend of sex-ratio variation in the district is one of continuously increasing masculinity. The State as a whole however exhibits a trend of steadily increasing masculinity. At the beginning of this century, the district had almost the same sex ratio as the State as a whole. The decade 1901-11 did not bring about any significant change in sex ratio both in the State and the district, with each registering a slightly smaller sex ratio at the 1911 census. The decade 1911-21, which, as seen earlier, has gone down in census history as a decade of unusually high mortality mainly owing to the fatal influenza epidemic of 1918-19, witnessed a steep decline in the sex ratio, much steeper in comparative terms in Damoh district than in the State as a whole. This observation seems to corroborate the oft stated view that in epidemics like the one of 1918-19, females rather than males (and the persons at the two extremes of life) succumb in much greater numbers. On this view, the relatively higher decline in feminity in Damoh district is explained by the very high proportion of mortality in that district as brought out by the high rate of decrease of its population during the decade. The next decade saw an equally speedy recovery of the population of the district as regards sex ratio, a fact which suggests that apart from high epidemic mortality, a part of the high decrease of population in the earlier decade was also due to emigration (whose return in 1921-31 explains the recovery). It may also be stated that in the State as a whole, sex-ratio stayed almost unaltered during 1921-31. Also, at the 1931 census, the sex-ratio in the district exceeded the ratio in the State as a whole for the first time, a trait which continued in the succeeding censuses.

In 1931-41, whereas the sex-ratio in the State as a whole registered a very small fall, that in the district increased by a significant amount. This increase in feminity suggests some amount of emigration from the district, perhaps to the neighbouring Jabalpur district where an entirely new factory township Khamaria had sprung up in the closing years of the decade. During 1941-51, relative proportions of the sexes almost stayed unchanged in the district as well as in the State. During the last decade (1951-61), both the district and the State have lost in sex-ratio sizeably. The following inset gives tahsilwise details of this variation.

SEX RATIO 1961

| District/Tahsil | 1961 | | | 1951 | | |
|---|---|---|---|---|---|---|
| | T | R | U | T | R | U |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Damoh District | 965 | 974 | 906 | 980 | 984 | 950 |
| Hatta tahsil | 971 | 976 | 903 | 986 | 987 | 974 |
| Damoh tahsil | 962 | 973 | 907 | 976 | 982 | 945 |

**Sex ratio by age:**

A study of sex-ratio pattern both in its static and dynamic aspects remains grossly incomplete without considering how sex ratio varies with age. Chief causes of variation in sex ratio by age are sex selective births and sex-selective age specific mortalities. The following table gives sex ratio (i) by single year ages for the first 5 ages, (ii) by quinquennium for ages upto 14 years and (iii) by broad age groups. The rationale for this presentation is the better rememberance by the respondents of the first few ages and their consequent greater dependability. For ages higher than 14 years, for reasons given earlier, it was thought that even quin-quennium grouping will not be able to suppress the distortion on the sexwise proportions.

**Age-wise sex ratio variation, 1961**

| Age | Sex ratio |
|---|---|
| All ages | 965 |
| 0 | 972 |
| 1 | 987 |
| 2 | 967 |
| 3 | 968 |
| 4 | 975 |
| 0-4 | 975 |
| 5-9 | 930 |
| 10-14 | 821 |
| **0-14** | **921** |
| **15-34** | **974** |
| **35-59** | **987** |
| **60+** | **1,235** |

At the youngest age '0' the sex ratio is 975. This however does not represent sex-ratio at birth, because it does not take note of children born and dying during the year just preceding the census count. In fact, it is almost an established fact that nature is somewhat partial to the male sex at birth, there being greater male than female births. This also seems to follow, in case of Damoh district from table 6B.1 in part II of the Handbook which shows more male than female births in 1957, 1958, 1959 and 1960 *years for which vital statistics were available. The initial lead gained by the male at birth is soon lost in the first few months of its existence because of hands of death falling more heavily on it than on its female counterpart. This phenomenon also is true for the country as a whole and a biological basis is given to it by saying that girls have organic superiority over boys. If this explanation as to the biological superiority of the females is tenable, then the reduction in the ranks of the females in later childhood years can only be ascribed to a widespread social attitude of neglect of the female child and of bestowing greater care and attention on the male child.

As regards the broader age-groups, the trend is for sex ratio to increase in the higher age-groups. In the oldest age-group (i.e. beyond 60 years), there is considerable preponderance of females over males, a trait exhibited by populations of the State as a whole and almost all other districts. The explanation for this is two-fold. First, the male has to bear, almost single-handed, the heavy burden of maintaining the family with its accompanying worries and strains. These start telling adversely on the health of the male in later middle age, and thus sapped of much of his energy and strength he succumbs easily in early old age. On the other hand, except in child-bearing, the female does not have to incur any risks to her life, nor is she weighed down (even though she may be assisting the male in household economic activity) by the multifarious worries and anxieties of her male counterpart in breadwinning for the family. Naturally therefore, after the weaker of her sex are purged in early middle age, she is in a better condition to survive.

**Marital Status:**

In a region with a high rate of population increase, as Damoh undoubtedly is—judged from its performance in the last decade—marital status data assumes unusual demographic significance. This is so because all women in the child-bearing ages 15-44 are potential mothers. If all these enter matrimony and no artificial means are employed to prevent conception, the birth-rate is bound to shoot to its biological limits. Conversely if a large number of women—particularly in the ages 15-24 which are known to be most fertile—are kept from participating in reproductive activity either by late marriage or by widowhood or legal separation, birth rate is bound to follow a downward trend. There is yet another direction in which marital status data by age acquires social and demographic significance. This relates to child marriages because marriages of children of immature ages is likely to impair the health of the community and is to that extent contributory to a fall in the quality of population. The marital status data also indicates the extent of incidence of widowhood in the two sexes by age-groups.

The following table gives marital status data for the population of Damoh district by quinquennial and broad age- roups. In appreciating the quinquennial age-groups, remarks made earlier regarding age-misreporting should be borne in mind.

*It should be noted that registration of vital statistics is grossly incomplete in the district. However, since the incompleteness is random, the figures may be taken to indicate the general trend.

## MARITAL STATUS, DAMOH DISTRICT 1961

| Age Group | Total Population | | Never Married | | Married | | Widowed | | Divorced or Separated | | Unspecified | |

Salient features of this table with comments, wherever necessary, are given below:

(i) Universality of marriage in the population, particularly in case of females, is brought out from the very low never-married proportion in case of males, and its near absence in case of females, of over 20 years of age. It may however be noticed with some interest that proportion of never-married males is seldom less than 2%,being more than 2%even in the residuary, broad age-group 60+. These proportions cannot, perhaps, be attributed to inaccuracies in age-returns because they have negligible values in case of females and it is inconceivable that this type of age-inaccuracy should show any sex-selectivity. Perhaps these confirmed bachelors in all age-groups suffer from some sort of physical disability rendering them unfit or ineligible for marriage. If this premise is correct, it follows that the incidence of physical disability is conspicuously less—is even negligible—among women. In any case the data do point to the need of some systematic demographic investigation on these aspects, particularly to find out the selective incidence of celibacy in the population.

(ii) Infant or very early marriages are seemingly not in vogue in the district as would appear from complete absence of married persons in the ages below 10. This, however, does not represent the correct state of affairs because martital status tabulation was done only for ages beyond and including ten years. The sizeable proportions of married—particularly among females—in the ages 10-14 show the prevalence of child marriages in the district.

(iii) Pre-puberty child marriages are prevalent on a small scale. More than one-fourteenth males and three-tenth females in ages 10-14 in the district have been returned as married, which shows that incidence of pre-puberty marriages is much higher in case of girls. Almost all these cases (all in case of boys) are a ainst the law of the land which prohibits marriages of girls below 14 and of boys below 18 years of age.

(iv) In the quin-quennium 15-19, denoting early youth, the proportion of married is almost half of the total male population in the age-group, and more than nine-tenth in case of girls. It may be remarked that most of the marriages of boys in the age-group are in contravention of law. In the next higher quin-quennium, more than four-fifth of the males and almost all the females are either married or widowed or are leading a divorced or separated life. Thus, as many as one-fifth of the boys in age-group 20-24 manage to remain never-married. The proportion of never-married boys is still high—more than one-fourteenth of the male population of the age interval—in 25-29 age-group but sinks to very low dimensions in the ages 30-34.

(v) The foregoing analysis shows that girls start getting married with some frequency in the ages 10-14. Most of them are married between 15-19, and hardly any remains never-married beyond 20 years of age. In case of boys, however, marriages below 14 years are rare. Boys start getting married in the ages 15-19, but most of them are married in the ages 20-24. Not many find themselves never-married beyond 30 years in case of boys.

(vi) Incidence of widowhood is very small upto 30 years of age. Starting from the age-group 30-34, proportions of widowed persons start increasing steadily both in case of males and females, more steeply in case of females. In the middle age (35-59), almost three-tenth (31%) of the females and one-twelfth of the males have lost their spouses. The proportion is as high as half in case of females in the closing quinquennium of middle age. In old age more than four-fifth females and almost three-tenth of the males are leading widowed existence.

(vii) Higher frequency of widows than widowers in all ages is primarly due to initial disparity in ages of husbands and wives and to increasing age-specific death-rates. Partly, the very high proportion of widows in the older ages also testifies to the better survival power of the female of the species, for reasons already adumbrated earlier in this note.

**Literacy and education:**

Educational levels in a population indicate the intrinsic quality of the population. In census, we have first the literacy rate which is a crude ratio of all persons who have been returned as literate or educated to the total population. The persons entering in this ratio range from mere literates, whose ability was confined to mere reading and writing of a simple letter to the educationally highest qualified. In order to further find out the true state of education in the population, therefore, we will find out separate proportions for those who are merely literates, and those who possess the recognised levels of education.

Damoh district has a literacy percentage of 18.5 which compares with a slightly lower percentage 17.1

in the State as a whole, but a higher one—20.6% in Jabalpur division. The district is of course, much below the national literacy average of 24%. Ranking 13th in descending order of literacy percentage, Damoh district stands fairly well among districts of the State. It is however much below the first three or four educationally most advanced districts in the State. These districts, with their corresponding percentages of literacy are Indore (38.2%), Jabalpur (28.6%), Gwalior (27.9%) and East Nimar (24.5%). At the other extreme stand districts like Jhabua, Bastar and Sidhi which have the shockingly low literacy percentages of 6.1, 6.9 and 7.8 respectively.

The proportion of literate and educated among the rural population is 14.7%, whereas among the urban population it is as high as 44.3%. Separately in rural and urban areas also, percentage of literacy in Damoh district is better than that in the State as a whole, which has 12.7 and 43.5 per cent literate and educated among its rural and urban population respectively. The higher proportion of literate and educated in the urban population is in accordance with expectation, because in urban areas there is greater awareness of the need for education and also greater availability of schools and other facilities.

Another feature of literacy distribution in the population is its greater concentration among males than among females, mainly owing to the traditional social inhibitions--that still persist in the rural areas, but have crumbled down in the urban areas considerably--on female education. In Damoh district 28.9% of the male population (24.6% in rural and 57.9% in urban areas)is literate and educated comparing with a State average percentage of 27.0% (21.8% in rural and 56.5% in urban areas). As regards women, the district has a literacy percentage of 7.6% (5.5% in rural and 37.5% in urban areas), against a smaller percentage of 6.7% (3.4% in rural and 28.4% in urban) in the State as a whole. Damoh district is thus higher than the State average as regards sexwise literacy percentages separately for total, rural and urban areas.

### Geographical Distribution Of Literacy

The following table gives percentages of literacy for the two tahsils separately for total, rural and urban areas, and for persons, males and females.

| Name of Tahsil | Percentage of literate and educated | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Total | | | Rural | | | Urban | | |
| | P | M | F | P | M | F | P | M | F |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Hatta Tahsil | 16.0 | 25.9 | 5.8 | 14.3 | 23.9 | 4.5 | 41.3 | 55.6 | 25.4 |
| Damoh Tahsll | 19.7 | 30.5 | 8.5 | 14.9 | 24.9 | 4.5 | 44.9 | 58.4 | 30.4 |

One noticeable feature of literacy distribution in the district is its slightly greater concentration in the headquarters tahsil Damoh which is decidedly better served by road and rail communication also. It may also be noticed that this is owing mainly to its containing a much bigger urban component of population than Hatta tahsil, because rural literacy does not show sizeable variation in the two tahsils.

### Levels of Education:

Literacy percentage is but a crude test of judging the educational quality of a population. It is necessary to have quantitative idea of the various levels of education possessed by those returning themselves as literate and educated. In Damoh distirct, roughly three-fifths (59.3%) of all literate and educated are mere literates without any educational levels. In the State as a whole, mere literates without any educational levels constitute more than seven-tenths (71.9%) of all literate and educated. The returns of mere literates without educational levels range from such persons who merely possess the minimum ability to read and write a simple letter to such persons who joined a school but left it without passing the primary school examination. The large proportion of literate without educational levels

indicates that a very large number of persons, though they join a school, do not remain in it long enough to pass the primary examination.

Between one-third and two-fifth (37.1%) of all literate and educated persons in the district possess the primary education level. These include not only persons who have passed the primary level examination but also all those who had studied in higher classes, but left before passing the matriculation examination. In the State as a whole, the proportion of those who have passed the primary level examination is much lower: 21.9%.

Roughly one in every twenty-eight (3.6%) among the literate and educated has matriculation or higher educational qualification. The proportion is higher (6.2%) in the State as a whole. To sum up, the district is easily better than the State as a whole in respect of the educational levels possessed by its population,

**Growth of Literacy Since 1951 :**

The following table gives the percentages of literacy for total, rural and urban areas of the district and each tahsil for 1951 and 1961 separately for persons, males and females.

Percentage of literacy, 1951 and 1961.

| District/Tahsil | Year | Total | | | Rural | | | Urban | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | P | M | F | P | M | F | P | M | F |
| 1 | | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Damoh district | 1951 | 11.9 | 19.0 | 4.6 | 8.7 | 14.7 | 2.5 | 35.1 | 46.7 | 20.6 |
| | 1961 | 18.5 | 28.9 | 7.6 | 14.7 | 24.6 | 5.5 | 44.3 | 57.9 | 37.5 |
| Hatta tahsil | 1951 | 8.9 | 14.9 | 2.8 | 7.4 | 12.8 | 1.9 | 35.9 | 51.8 | 19.7 |
| | 1961 | 16.0 | 25.9 | 5.8 | 14.3 | 23.9 | 4.5 | 41.3 | 55.6 | 25.4 |
| Damoh tahsil | 1951 | 13.4 | 21.1 | 5.6 | 9.4 | 15.9 | 2.8 | 34.9 | 48.3 | 20.8 |
| | 1961 | 19.7 | 30.5 | 8.5 | 14.9 | 24.9 | 4.5 | 44.9 | 58.4 | 30.4 |

This table at once speaks to the considerable progress made by the district in the field of education. In the district as a whole, percentage of literacy has risen by 56% above its 1951 level, the increase being as high as 70% in rural areas, but only 26% in urban areas. The reason for this is not difficult to see. The rural areas were much behind the urban areas in education and so responded more to the programmes of educational expansion. On the other hand, the towns were already quite advanced educationally in 1951, and had therefore been somewhat slow to improve their literacy proportion. Precisely for the same reason, Hatta which was much lagging behind educationally in 1951 has almost doubled its literacy percentage since 1951, while Damoh tahsil which had even in 1951 a comparatively high percentage of literacy has increased its literacy proportion only by about 50%.

**Growth of Educational Institutions:**

The impressive performance of the district in the field of education during the last decade has been possible because of a rapid increase in the number of educational institutions. Unfortunately, figures relating to number of schools are not available prior to the year 1957, but even then the information available shows that the number of primary schools has steadily increased from 1957 to 1961. During this short period, the number of higher secondary or senior basic schools has multiplied almost four times. No doubt the number of middle schools has shown a small decrease, but that is perhaps owing to upgrading of some of the middle to the status of higher secondary schools.

Even with the rapid expansion of primary schools, the district had in 1960, two schools between every seven of its inhabited villages; each school serving an area, on an average, of 8.6 square miles and a population of about 1,350. In December 1960, there were 26,804* scholars(19,724 boys and 7,080 girls), which constituted 47.0% (66.8% in case of boys, 25.7% in case of girls) of all children in the primary school

*Source--District Educational Officer, Damoh.

going age-group 6-10. Universal primary education being the object of our national policy, these proportions indicate the extent of the ground that has still to be covered in that direction. It appears that considerable attention is required to improve the attendance of girls in the schools.

For higher education, the district has a degree college in arts and science since 1959. For still higher and for technical education, the district depends on the neighbouring districts Sagar and Jabalpur, which provide for almost all type of collegiate education.

**Religion**

94.4% of the district's population consists of Hindus. Muslims, forming the next largest religious group, count 3.2% and the Jains 2.1%. The remaining 0.3% of the population consist of mainly Christians and Sikhs, and a few Budhists and Zoroastrians. No other religion has been returned in the district. This is the position in all areas. In urban areas, the religious composition is somewhat different. Hindus, who still retain their numerical predominance, reduce their proportion to 81.8% in the urban areas, while the Muslims and Jains improve it to 11.8 and 4.5% respectively. The remaining 1.9% of the urban population consists of Christians, Sikhs and a few Buddhists and Zoroastrians.

**The People—Scheduled Castes and Scheduled Tribes**

People of the district are divided into several endogamous castes, important among which are Brahmins (who themselves are sub-divided into endogamous sub-castes like Kanojia, Jijhotiya, Sarwaria, Khedawal and Maharashtra), Rajputs, Bania, Ahirs, Lodhis, Kurmis, Kachhis, Chamars, Telis,C hadars, etc. Besides these, there are the Gonds, Saonrs and Bharia-Bhumias who represent the primitive tribes.

**Scheduled Castes:**

Scheduling of castes in the district is in accordance with 'The Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956' made by the President of India. This order does not schedule any tribe in the district, though the tribes Gond, Saonr and Bharia-Bhumia are fairly numerous, having ocnstituted nearly 12% of the district's population in the first decade of this century. As regards castes, the Order schedules thirteen of them, some castes including names of synonymous sub-castes of the main caste. An important omission in the Modification Order as compared with the order of 1950 is that of the Chadar or Chidar caste, a kindred of the Dahait caste which is scheduled even in the Modification Order. The Chidar or Chadar caste is fairly well represented among the district's population and their omission has resulted in an apparently small increase of 4.9% of the rural scheduled castes population of the district (figures for total and urban areas for scheduled castes are not available for 1951 census) since 1951 as against a much higher increase of 22.6% in the general population during the same period.

Of the thirteen castes (or synonymous caste-groups) now scheduled in the district, only eleven have been returned at the 1961 census. Castes which are scheduled in, but which have not been returned from the district are (i) Balahi or Balai and (ii) Ganda or Gandi. The eleven scheduled castes that have been returned in the district together constitute 18.3% of the district's population, 18.4% of the rural population and 17.7% of the urban population. There is thus no evidence of any concentration of the castes in the rural areas, a feature generally distinguishing the scheduled tribes from the rest of population. Scheduled castes are slightly more numerous in the Hatta tahsil where they form one-fifth (20.3%) of the population. In Damoh tahsil, they constitute only 17.1% of the population.

Of the eleven scheduled castes enumerated in the district, the most numerous Chamar alone constitutes more than three-fourth (76.5%) of the total scheduled castes population. Basor, though only one-sixth as strong numerically as the Chamar, is the second most numerous caste in the district. They make one-eighth (12.6%) of the district's scheduled caste population. The two castes together thus constitute almost nine-tenth (89.1%) of the scheduled castes population of the district. Other fairly numerous castes in the district, in the decreasing order of their numerical strength (proportion of each given in brackets) are : Kori (3.9%), Mehtar or Bhangi (3.0%), Mahar (2.0%) and Dahayat, Dahait or Dahat (1.1%). These six castes account for 99% of all scheduled castes population in the district, the remaining five together making the other 1%. These five castes, in the order of their numerousness are : Khatik, Chikwa or

Chikvi, Bahna or Bahana, Mang and synonymous castes, Dom or Dumar and Sansi. The last three together however number only 27 and may be ignored.

As regards educational progress, the scheduled castes compare ingloriosly with the general population, among whom the incidence of literacy is about three times as great as among the scheduled castes. Only 6.5%, or roughly 1 in every 15 of the scheduled caste population is literate and educated (11.8% males and 1.2% females), which compares with 18.5% in case of the general population. Obviously the scheduled caste proportion of literate and educated is brought down by the very low proportion (1.2%) of literate females among them, the corresponding proportion in females of the general population being more than seven times as great.

About seven-tenths (72.6%) of the literate and educated among scheduled castes are mere literates without any educational levels, comparing with a much smaller proportion of 59.3% of such persons in general population. Those possessing primary educational level constitute about one-fourth (26.5%) corresponding to a higher proportion 37.1% in the general population. 0.9% of the literate and educated among scheduled castes possess matriculation (including two graduates, one from Chamar and one from Mahar or Mehra caste in the urban areas) qualifications; the proportion of persons with the same qualification in the general population being about four times as great. The figures thus convincingly show that not only do the scheduled castes lag behind the general population in absolute literacy but they are also considerably backward as regards levels of education.

**Economy of Scheduled Castes :**

Participation rate among scheduled castes is 54%, which is much higher than the general participation rate of 47.2%. Separately for males and females the participation rates among scheduled castes are 60.7% and 47.4% respectively which compare with the corresponding rates 58.8 and 35.5% in the general population. It thus appears that whereas proportion of economically active among males is more or less equal in the scheduled castes and the general population, the former have a much higher proportion of economically active females. It is this higher female participation rate which pushes up the general participation rate in the scheduled castes.

As in case of general population, the economy of the scheduled castes also greatly depends on agriculture, with nearly three-fifth (57.6%) of its workers being in the first two agricultural categories. However, it may be remarked that the degree of dependence on agriculture is distinctly less in the scheduled castes as compared with population at large. Cultivators and agricultural labourers are almost equally frequent in the scheduled castes, and this suggests greater land hunger in them than in the general population where agricultural labourers are outnumbered by cultivators by nearly 2 to 7. Of the rural cultivating households of scheduled castes, roughly one-fourth (24.1%) are sub-tenants, either of whole or part of their holdings. About 4.8% do not own any part of the lands cultivated by them, while 19.3% own only part of their holding, having taken the remaining portion from others on sub-lease. Table SCT-V shows the extent of fragmentation of holdings in the sense of 'smallness' of individual holdings. It shows that roughly one-tenth (9.3%) of the rural cultivating households hold next to nothing in the name of land, the size of holding of each household being less than one acre. Another three-tenth (27.8%) of the rural cultivating households, hold only a pittance in the name of land, each having a holding between 1 and 2.5 acres. Scarcely better seem to be about one-fourth (23.9%) of the cultivating households that cultivate holdings of 2.5 to 5 acres each. Thus, three-fifth of the rural cultivating households among scheduled castes, having holdings of less than 5 acres each, do not perhaps own enough land to ensure even a bare subsistence return and must needs look to other avenues of supplementing their income from land. 14.9% of the households own above 10 acres of land, and generally only these may be regarded as agriculturally in a fair or even better way.

Scheduled caste economy (as judged from size of participation alone) deviates from the general economy in having distinctly greater participation in household industry than the general population. This is not surprising either because bulk of the scheduled caste population is made up of two functional castes, the Chamar and the Basor, who traditionally pursue the cottage industries of leather works, and making

of bamboo articles. Workers in household industry add to about one-fourth (24.4%) of the scheduled castes working force.

Participation in 'other services' also is distinctly greater in scheduled castes than in the general population. 'Other services' give principal work to 13.6% of the scheduled caste workers. With the exception of category III, which claims 1.5% workers, the remaining working categories have each less than 1% participation in the working force and thus have little appeal for the scheduled caste workers.

The scheduled castes belong to the Hindu religion and speak the dialect of Hindi commonly spoken in the district.

**Chamar:**

In the tables on scheduled castes given in the Handbook, eight synonymous names appear bracketed with Chamar caste. In Damoh district the caste is known by the name Chamar only, and the eight other appellations do not have any application to this district. Chamars are the most numerous among the scheduled castes of the district. They are more or less evenly dispersed in both the tahsils. Educationally, the Chamars remain very backward with only 5.3% of their population returned literate and educated, the proportion having a little more respectable dimension (9.8%) among males, but sinking to less than 1% among females. Only 0.8% of those who are literate and educated have passed matriculation and these include one graduate from urban areas. Economically, the Chamars depend on agriculture to a considerable extent. 63.5% of their workers are in the first two working categories, with cultivators and agricultural labourers being equally frequent. Household industry, which in their case is the traditional shoe making industry, gives principal work to about one-fifth (21.1%) of the workers. 'Other services' also have sizeable share in Chamar economy, claiming 11.7% of their workers. Other working categories however do not have much appeal to the Chamar worker, and together claim only 3.7% of the working force.

**Basor:**

This is another, rather numerous scheduled caste in the district. The Basors are also almost evenly distributed among the two tahsils. In educational backwardness they outdo even the Chamars, having only 3.8% of their population literate and educated, the proportion being as small as 0.4% in case of females. No matriculate or more highly educated person was returned from the caste. Economy of the caste differs from the general economy in having considerably less dependence on agriculture. The first two agricultural categories account for only two-fifth (40.4%) of the caste's workers, agricultural labourers being much more frequent than cultivators. This latter fact indicates the prevailing land hunger in the caste. Household industry plays an important role in the caste's economy, absorbing almost two-fifth (38.5%) of the workers. The participation in household industry is thus comparable with that in the two agricultural working categories together. The household industry pursued by the Basor is their traditional industry of making artifacts out of split-bamboo. Next to agriculture and household industry come 'other services', absorbing 15.9% of the Basor workers. Participation by Basor workers in other sectors of the economy is of a small order.

**Kori:**

An important feature of this, the third most numerous scheduled caste in district, is its concentration in the urban areas to the extent of 46.3%. In the rural areas, the caste shows a slight concentration in Hatta tahsil. Traditionally they are weavers of coarse cloth, and this seems to be reinforced from the fact that more than seven-tenths (71.2%) of their working force is in household industry. However, it appears that weaving of cloth represents a fraction of those returned in category IV from the caste, because table B-IV part C of the Handbook shows very small number of workers in weaving of cloth. Perhaps, most of the Koris returned in category IV pursue the industry of biri-rolling. Educationally the Koris seem to be better of than even the general population having a literacy percentage of 23.1%. Of the literate and educated, as many as 35% possess primary or junior basic level, while about 1% are matriculates. The higher incidence of literacy in the caste is of course to be ascribed mainly to the concentration of the caste in urban areas.

**Mother Tongues:**

Table C-V shows that the population of Damoh speaks as many as twenty-seven speeches as mother-tongue. This would create an impression that the district is a veritable babel of tongues. Even a cursory

glance at table C-V will however show that nothing could be farther from the truth than this. One mother-tongue, Hindi, alone is spoken by 98% of the population of the district. Urdu which is the next most widely spoken mother-tongue claims 0.9% of the population as its speakers, followed by Sindhi which is the mother-tongue of 0.3% of the population. Thus, these three languages are spoken by more than 99% of the population as mother-tongue. Gujarati, Marathi, Marwari and Punjabi which claim between 400 and 900 speakers each, together account for 0.6% of the population. Thus, these seven languages together account for all but 0.2% of the population, which fraction indicates the extent of speakers of the remaining twenty languages. None of these twenty languages however has more than 100 speakers each. It may be noticed that speakers of Urdu, Gujarati, Marwari, Marathi, Sindhi and Punjabi are concentrated mostly in the urban areas of the district. This concentration increases the proportion of Hindi speakers in the rural areas of the district to 99.5%.

The Hindi spoken by the vast majority of the population in the district is however not to be confused with the sophisticated form of that language spoken in the towns. It is akin to its Bundeli dialect.

**Land-use Pattern:**

Table 2 A. 1 of the Handbook gives the pattern of land utilisation in the district from the year 1953-54 to 1960-61. These figures are given under nine different types of land-use, namely (i) land under forests (ii) land put to non-agricultural uses (iii) barren and unculturable land (iv) culturable waste (v) fallow lands other than current fallows (vi) permanent pastures and other grazing lands (vii) land under miscellaneous tree crops and groves not covered in the net area sown (viii) net area sown and (ix) current fallows. The data presented in the table shows that forests cover more than one-third of the district's area, there being very little change in it from year to year. In 1960-61, 37.7% of the geographical area of the district was under forests. Part of this area is under what are known as 'village forests,' by which is meant the area shown as forest in the village papers and is usually scrub jungle or waste land; but part of it is under the direct management of the forest department as reserved or protected forests.

Land put to non-agricultural uses e. g. house-sites, roads, market places, etc. covered 3.9% of the district's area in 1960-61. The area has naturally not shown much variation since 1953-54. On the other hand land classed as barren and unculturable has shown considerable variation, having steadily decreased from a value of 66,951 acres in 1953-54 to 39,597 acres in 1960-61. In the last year, it was 2.2% of the districts' total area. The reason for change in this type of land is not apparent on the face of the table, though a possible reason is improvement in the classification. The gainer seem to be lands classed as "permanent pastures and other grazing lands", which have increased by more than 50,000 acres since 1953-54. This type of land accounted for about one-tenth of the net sown area of the district in 1960-61.

Of particular interest is the land classed as culturable waste and as old fallows, because these two types of lands indicate the future potential of extension of cultivation in the district . Culturable wastes have shrunk in acreage almost steadily from 1953-54, in which year they amounted to about one-ninth (11.1%) of the district's area. The area under culturable waste in 1960-61 was only 8.6% of the district's total area. Obviously, the area has shrunk because of its utilisation for agricultural purposes because there is a comparable increase in the area under cultivation since 1953-54. The area under old fallows has however not shown much variation since 1953-54, in which year it stood at 2.3% of the district's area.

Area under permanent pastures and other grazing lands has also registered a steady increase since 1953-54, when it stood at 134,936 acres till 1960-61, when it was 186,631. In the latter year these lands covered 10.4% of the district's area. Land classed as under miscellaneous tree crops and groves has also decreased in area since 1953-54, its area in 1960-61 being a little less than 1% of the district's geographical area.

Most important from the point of view of demographic study is the area shown as 'net sown area'. It is this area which produces the food for the increasing millions of our country and one is naturally likely to enquire whether the increase in population is accompanied by a corresponding increase in area under cultivation. The net area under cultivation has grown more or less steadily from year to year. This increase, as would appear from table 2-A.2 is about 78,000 acres during the ten years 1951-52 to 1960-61, that is an increase of 15.3%. The population has increased faster than this during the decade. The gross sown area (i. e. net area sown+ area sown more than once) has however increased by 18.3%, which is nearer the population rate of

increase. We may look at this from the point of view of demographic pressure on cultivated area. In 1951, there was 1.50 acres of cultivated land *per capita* in the district, whereas in 1961, the *per capita* cultivated land in the district is 1.45 acres. There is thus an indication of a small increase in the pressure on cultivated land, and unless this shortfall in cultivated land *per capita* is made good by increasing productivity per acre, the result is likely to be a food deficit.

It will be seen from table 2-A.2 that area sown more than once has also grown steadily, till in 1960-61 it had almost double its 1951-52 value.

**SOILS:**

Ten types of agricultural soils were distinguished at the settlement. These were *kabar* I and II, *mund* I and II, *rathia*, *patarua* I and II, *bhatua*, *sihar* and *kachhar*. As observed in the Settlement Report (1908-13), these names are, to a great extent, adjectives used locally to denote various types of soils.*

Thus *kabar* means clayey, *mund* crumbly, *rathia* stiff, *patarua* light, *bhatua* is often applied to all waste land, *sihar* means sandy and *kachhar* covers a wide variety of riverian soils. *Mund* is the prevailing soil in the *haveli* and grows steadily poorer as the junction of Sonar and Bearma is reached. *Kabar* is plentiful only in Batiagarh group, where finest *rabi* in the district are grown. *Rathia* soils abound in the valley of the Bearma in the south, and *patarua* in the villages of the hilly tract. Typical *sihar* is seen around Rajnagar near Damoh town. The following table gives a distribution of agricultural soils in the district as per the last Settlement.

*Soils in Damoh district as per last Settlement* †

| Soil | Type of Area under the soil (in acres) | | |
|---|---|---|---|
| | Hatta tahsil | Damoh tahsil | District |
| 1 | 2 | 3 | 4 |
| *Kabar* I | .. | 171 | 171 |
| *Kabar* II | 4,876 | 3,135 | 8,011 |
| *Mund* I | 36,776 | 20,633 | 57,409 |
| *Mund* II | 95,637 | 133,395 | 229,032 |
| *Rathia* | 14,458 | 43,004 | 57,462 |
| *Patarua* I | 42,040 | 76,592 | 118,632 |
| *Patarua* II | 29,493 | 59,518 | 89,011 |
| *Bhatua* | 3,369 | 13,737 | 17,106 |
| *Sihar* | 1,957 | 4,115 | 6,072 |
| *Kachhar* | 724 | 576 | 1,300 |

*Opp. cit. page 7.

† Information kindly furnished by Collector, Damoh.

*Mund* II is the most common soil in the district and in both tahsils, covering 39% of the agricultural area at the last settlement, followed by *patarua* I and *patarua* II which covered 21 and 16 percent of the area respectively. *Rathia* soil covers 10% of the area, followed by *mund* I which covers 9%. *Bhatua*, *sihar* and *kabar* are rather uncommon covering respectively 3, 1 and 1% of the cultivated area at last settlement.

Besides the above classification which depends on the nature of the soil, the soils were also classed according to their position. Level land was classed as 'ordinary' in case of wheat lands and *'saman'* in case of rice lands. The area damaged by water courses was classed as *bharkila*. Sloping rice land was called *'tikra'*, and land favoured by a specially low-lying positon *jhilan*. Undulating wheat land, a very large area, was called *'tagar'* and wheat lands protected by embankments were classed *'bandhwas'*. Land exposed to damage from wild animals was called *'ujaraha'*, and the valuable area manured by the drainage from village site was called *'geonra'*.

A third classification of the soils under citivation was according to their cropping capacity. Under this four classes, namely wheatland, minor crops land, rice land and garden produce land were distinguished. Wheat land was 52% of the cultivated area of the district at the last settlement, which lay to the extent of 85% in the *mund* and *kabar* soils. Again of the total wheat area at settlement 28% was *tagar* land and 10% *bandhwas*.

The area classed as rice land was 9.3% of the total cultivated area of last settlement. About one-third (34%) of this consisted of inferior *tikra* lands, and 6% of *jhilan*. The remaining was *'saman.'* The area classed as fit for minor crops covered 38% of the total area under cultivation at the last settlement. The rest—about 1%—was garden land mostly in the bari or backgardens of the cultivators' houses.

**Cropping Pattern 1960-61 :**

The following table gives percentage of area sown under some important crops to net area sown in the district and in both the tahsils for the year 1960-61.

| District/Tahsil | Net area sown | Area under food crops | | | | |
|---|---|---|---|---|---|---|
| | | Rice | Wheat | Jowar | Other cereals and millets | Total cereals and millets |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Damoh district | 100 | 17.1 | 47.6 | 7.7 | 4.0 | 77.3 |
| Hatta tahsil | 100 | 5.9 | 48.9 | 9.3 | 5.0 | 69.7 |
| Damoh tahsil | 100 | 24.3 | 46.8 | 6.6 | 3.4 | 82.1 |

| | Pulses | | | | | Oil seeds | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Gram | Tur | All pulses | Total food grains | Total food crops | Til | Total oil seeds | Total non-food crops | Area sown more than once |
| | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 |
| Damoh district | 10.4 | 1.4 | 17.2 | 94.5 | 95.2 | 2.9 | 6.1 | 12.2 | 7.4 |
| Hatta tahsil | 11.9 | 1.7 | 19.7 | 89.4 | 90.1 | 2.0 | 6.4 | 13.2 | 3.3 |
| Damoh tahsil | 9.4 | 1.2 | 15.6 | 97.7 | 98.4 | 3.4 | 5.8 | 11.5 | 9.9 |

Damoh district is more a *rabi* than *kharif* area. As appears from the above table, food crops occupy bulk i.e.19/20th part of the net sown area. The proportion in 1960-61 was as great as 98.4% in the Damoh tahsil though it was only nine-tenth in the Hatta tahsil. The area under food crops is almost entirely under food-grain crops. Non-grain food crops like sugar cane, vegetables, etc. occupy a small proportion 0.7% of the net area sown.

Among food-grains, cereals and millets are the most widely grown. In 1960-61, roughly three-fourth of the net area sown in the district was under cereals and millets. In the southern Damoh tahsil, the area under cereals and millets was as large as four-fifth of the net area sown. Wheat, the staple crop of the district, is the most extensively grown cereal in the district. Almost half of the district's net sown area is under the crop. The proportion has thus not changed much since the Settlement of 1908-13, when it was 42%. The varieties of wheat grown in the district are *bansi,* pissi, kathia,* and wheat No. 65. The Gazetteer mentions *jalalia* also as a variety of wheat sown in the district. The *pissi* is of two varieties, *shikarhai* or bearded and *mundi* or plain. The former is a commoner variety, while *mundi* is grown on embanked fields as it requires more moisture. Extensive damage to wheat may be caused either by inadequate autumn and winter rains, in which case much of the *tagar* land remains unsown or gives a very poor outturn or by excessive winter rain which causes *gerua* or rust, and by frost. Wheat is sown in the month of October or early winter after winter has set in, and the harvest takes place in March-April. In the unembanked wheat fields common in the *haveli* or Sonar valley, wheat is sown mixed with gram in the proportion 3 : 1, the mixture being called '*birra.*' The admixture of gram, a leguminous plant, keeps up the fertility of the soil by assimilating nitrogen. In the embanked *rathia* fields of the Bearma valley, wheat is sown pure.

*Source; Collector, Damoh.

It will be seen from table 2-A. 2 in Part II of the Handbook that the acreage under wheat has been more or less steadily increasing during the last decade. It covered 40% of the net area sown in 1951-52, which increased to 47% in 1960-61. The area under wheat had the highest acreage in 1956-57, which shrank suddenly in 1957-58 to its 1954-55 level.

**RICE:**

Rice is the second most widely grown cereal in the district. It is grown best on the lighter *patarua*

soils of the southern tahsil, and on the sandy *sihar* soil, which is rare in the district. Rice covered roughly one-sixth (17.1%) of the net sown area in the district in 1960-61. In the southern tahsil, it was grown on almost one-fourth of the tahsil's net sown area but has a relatively small acreage under it in Hatta tahsil. Common varieties of rice grown in the district are : *gurmatia, antarved, bagmuch* and *dilbaksa*. The Gazetteer described *antarved* as the best variety of rice, being soft and having a special flavour. The crop is sown broadcast, though on a negligibly small area in Damoh tahsil; sowing by transplantation has also been introduced.

Area under rice also has been increasing from year to year since 1951-52. The increase was slow upto 1956-57, but thereafter has been somewhat faster. Gross increase in rice acreage has been 15,151 since 1951-52, i. e. by 17% of the 1951-52 acreage.

**Juar:**

Grown on about 8% of the net sown area in 1960-61, *juar* is also an important crop of the district. It is grown mainly in the Sonar valley on the poorer soils and on the *geunra* lands in the hilly areas. Area under the crop has shown considerable fluctuation during the last decade. Starting from 37,869 acres in 1951-52, acreage under *juar* increased to 64,278 in 1954-55, but in 1956-57 it suddenly dropped to 28,672 acres. Then it again increased in the next two years, reaching the highest acreage of the decade 66,605 acres in 1958-59. It dropped again in 1960-61, but even this is 7,500 acres more than the 1951-52 acreage under the crop. The minor millets *kodon* and *kutki* were important crops in the past. In 1960-61, however, acreage under them was just more than 4% of the net sown area. The millet is sown on the poorer *patarua* and *bhatua* soils and is the staple food of the poorer aboriginal population in the south of the district.

Pulses covered about one-sixth of the net sown area in 1960-61. During the decade, the area under pulses has fluctuated between 74,688 acres in 1956-57 to 101,816 in the year 1960-61. The trend has been however an increasing one. Gram, grown on about one-tenth of the net sown area in 1960-61, is the most important pulse, sown generally mixed with wheat on good soils in *haveli*, but unmixed on poor *patarua* soils, and also as a second crop after rice. Other important pulses in the district are *tur, masur* or lentil, *urad* and *tiura*.

Non-food crops were grown on about one-eighth of the net sown area in 1960-61. This is almost entirely under oilseeds, the area under fibre crops being but a very small fraction.

**Irrigation:**

In 1960-61, irrigated area constituted 4.2% of the net sown area. About half of this was under rice, and another two-fifth under wheat. The remaining was almost equally divided between pulses and sugarcane. Except for the three years 1955-56 to 1957-58 when it showed a decreasing trend, area under irrigation has steadily increased from year to year. The gross increase between 1951-52 and 1960-61 is about 9,500 acres. The increase has been mostly utilised in irrigating additional wheat area as will appear from the fact that irrigated area under wheat has swelled more than 2½ times during the decade.

As table 2-1.4 in part II of the Handbook will show about four-fifth of the area was irrigated from Government canals, about one-twelfth from wells and the remaining from tanks.

Manuring of crops is prevalent in both the tahsils, the most popular manure being cowdung. This is applied before the crop is sown. Chemical fertilizers are not yet popular with the cultivators because of want of irrigation facilities. In Damoh tahsil, chemical fertilizers are used to a greater extent in areas where irrigation is done by canals.

**Crop-Mixtures***

Save in exceptionally rich soils, it is customary to sow crops in mixtures in both the tahsils. The common crops sown in mixture, and the rough proportions of each constituent of the mixture are given below:

| | Mixture | Proportion of each constituent |
|---|---|---|
| 1 | Wheat--gram (*birra*) | 3 : 1 |
| 2 | Gram--*alsi* | 5 : 1 |
| 3 | *Juar--tuar* | 6 : 1 |
| 4 | *Juar--urad--mung* | 8 : 1 : 1 |
| 5 | *Tilli--tuar* | 4 : 1 |
| 6 | Cotton--*tuar* | 6 : 1 |
| 7 | *Kodon--rahar* | 4 : 1 |

*Source : Collector, Damoh.

**Medical and Public Health:**

The quality of a population is also judged from the health of its individual members. It is a fact too well known that the progress of a nation depends on the health of its citizens. Healthy citizens are the best assets of a country and it is they alone who can bring about prosperity and wealth to the country. It is therefore useful to examine the public health picture that emerges from the census data and the data that we have collected from the district health authorities. As per information furnished by Civil Surgeon, Damoh, the district had five primary health centres in 1960, with a bed capacity of 17. The first primary health centre appeared in 1954. Thereafter their number went on increasing till we had 5 of them in 1960. The district has had one hospital since 1951, with a capacity of 40 beds. Besides the district had five dispensaries. Table 6-A.1 further shows that in 1960 the district had 3 registered nurses, 9 registered midwives, 8 vaccinators and 2 family planning clinics. The table does not contain any information regarding ayurvedic dispensaries run by the Janapada Sabhas. The figures given by Civil Surgeon obviously seem to be incomplete and certainly do not give us any idea of the private hospitals run by missionaries or other institutions and of private medical practitioners. Fortunately we are not utterly helpless in this respect. In table B-V of the Handbook we have a reasonably complete and accurate picture of the availability of persons in the medical profession, and occupations connected with treatment of diseases.

Occupational group '03' of table B-V gives the number of all persons in the district who have returned themselves as 'Physicians, surgeons and dentists'. We may, however, presume that excepting for a very small number of persons who may be surgeons or dentists all others so returned are physicians. It appears that in 1961, there were in the district 322 'physicians, surgeons and dentists'. These of course include not only physicians in allopathy, but in ayurved, in homeopathy and in certain other systems of treatment. As a total public health picture regarding availability of medical help of the various systems of treatment, we may thus say that in 1961 the district had one physician (in allopathy, ayurved, homeopathy or in any other system of treatment) for 1,361 of the population; one for 1,518 persons in the rural areas and one for 797 persons in urban areas. Urban areas of the district thus seem to be better served by medical help rendered by all description of physicians and surgeons. Damoh is better as regards this total picture than the State as a whole which has one physician for every 3,416 population, one for 6,633 persons in rural and one for 874 in urban areas.

It is desirable to consider the availability in the district of physicians in allopathy alone because these are generally technically qualified (whereas in ayurvedic, homeopathic and other systems of treatment, self-taught persons who do not hold certificates from any recognised institutions also practise) and for that reason seem to matter most in the public mind. Thirty-five such physicians (including surgeons) in allopathy have been returned from the district. Of these only six are in rural areas and the remaining 29 are in urban areas. We have thus one physician in allopathy for 12,524 persons in the district, showing that the district is poorer in this respect than the State as a whole which has one physician in allopathy for every 10,110 population. The condition of the rural population of the district *vis-a-vis* availability of allopathic medical help is far from satisfactory. They have one physician in allopathy for 63,762 persons. The uneven, or even lopsided distribution of allopathic medical help over rural and urban areas further stands out clearly from the fact that urban areas which contribute only 12.7% to the population have more than four-fifth of the allopathic doctors, giving us on an average a population-doctor ratio of 1,923 persons. In other words, a population served by one allopathic physician in the rural areas will have about 33 such doctors at its command in the urban areas.

There were 250 physicians in ayurved in the district on the census day. This large number suggests the existence of considerable number of untrained and ill-qualified physicians. In respect of ayurvedic physicians, the rural population is in a happier position having 222 of the 250 physicians in ayurved. The district thus has one physician for 1,753 persons of its total population; one for 1,723 of the rural and one for 1,992 of the urban population. The picture as regards ayurvedic medical help in the total, rural and urban areas of the district is better than the State picture where we have one physician for 8,210; 11,460; and 3,040 persons respectively of the total, rural and urban population.

The district also has seven physicians in homeopathy, of whom five are in urban areas. Of the 30

physicians of the unspecified type, only 8 are in the urban areas.

We may also consider medical services other than those rendered by physicians or surgeons; i. e. those rendered by nurses, compounders etc. Data in table B-V of the Handbook tells us that there were 339 'nurses, pharmacists, and other medical and health technicians' in the district, 89 in the urban areas and the remaining in rural areas. There were 19 nurses (5 in urban areas), 190 midwives and health visitors (9 in urban areas, the rural figures obviously include village women practising primitive midwifery), 29 nursing attendants and related workers ( 13 in urban areas); 27 pharmacists and pharmaceutical technicians (24 in urban areas); thirty vaccinators (21 in urban areas), 35 sanitation technicians (10 in urban areas) and 3 optometrists and opticians (all in urban areas).

**Vital Statistics:**

Vital statistics are maintained in accordance with the instructions contained in chapter-II of the Health Manual. According to these, in rural areas the responsibility for recording of a vital event, that is, a death or birth is that of the village kotwar, while in towns it rests on the local body in charge of municipal administration of the town. In forest villages, the forest kotwars report the vital occurences to the Range Officer and the latter sends monthly statistics to the Civil Surgeon. Again in rural areas, there is no legal obligation on the head of a household to report the occurrence of a vital event in his household to the village kotwar, and the latter has himself to be vigilant in that respect. The kotwar maintains certain prescribed records, which are to be checked by touring officials of the revenue and public health departments. Now the snag arises because most of the kotwars are simply innocent of reading and writing and have to get that function done by some literate person, the patwari or the school teacher. The primary compiling agency is the police station where all kotwars have to report the records of vital events made by them at least once in a week. At the police station the compilation is done village by village, and each birth or death reported has to be entered. The police station officer is required to intimate the totals of births and deaths to the Civil Surgeon every week. The Civil Surgeon compiles the figures for the district and sends them monthly to the Director of Health Services and Collector. These are the instructions. To what extent are they being carried out is not known but the quality of vital statistics data suggests that the instructions—particularly as regards checking of the statistics at the village and the police station level—are not carried out. Most of the officers whose duty is to check and report on the vital statistics do not know what exactly they are to do, and only technically comply, if at all they do so, with the instructions in a very uninformed manner.

Vital statistics of the district are not available prior to the year 1957 because then the district was part of the composite Sagar district. It is therefore not possible to check the accuracy of these figures directly by comparing the natural increase during the decade with the increase disclosed by census figures. We can nervertheless form some idea of the correctness of the statistics by comparing the registered birth-rate with the crude birth-rate estimated from children aged zero of the census data.

The registered birth-rate for the year 1960 as given by table 6-B. 1 is 37.4. The crude birth-rate for the year 1960-61 (March to March) as estimated from the children below 'O' years is at least 43.2. The actual rate will be somewhat more than this, because in estimating it no account could be taken of children born but who died before they could be enumerated and secondly, we have used as our base the population as at the end of the year rather than at the middle of it. We can further improve our estimate by including the infant deaths for the year 1960 as given by table 6.B.1 (assuming for want of any better estimate that births that took place from January to December 1960, were the same as those—taking place from lst March 1960 to 28th February 1961) in the figure for persons aged 'O' on 1.3.1961. This gives us a lower limit of 48.4% for the birth rate; the actual rate could not be much different from this. Thus the estimated (which is nearer the true birth rate ) and the registered birthrates differ by 11--i. e. by 34% of the registered birth rate and this may be taken as an indication of the extent of under registration either at source, or at the compilation stages. It is however interesting to note that the survival rate (i. e. difference between the birth and death rates) is 2.35 which compares with the rate 2.26 given by the census. The census rate is smaller because it indicates the average position for the ten-year period, whereas the registered rate shows

the position in the closing year of the decade. Thus, the extent of under registration seems to have equal incidence on births and deaths.

**Child-Woman Ratio:**

In areas where vital statistics either do not exist, or are of a very poor quality, a rough idea of the levels of fertility can be formed by the child-woman ratio i. e. number of children below 5 years to all women in the child-bearing age-group 15-44. The ratio is subject to error on account of age-heaping but, since these exhibit the same pattern in our State, inter-district comparison is not likely to present a vitiated relative picture merely on this account. The child-woman ratio for Damoh district comes to 201, which compares with 162 in Madhya Pradesh and 139 in India.

**Community Development Coverage:**

Community development programme was launched in the district in October 1953 with the inauguration of the Patharia National Extension Service block in Damoh tahsil. The Batiagarh development block in Hatta tahsil came the following year as a National Extension service block. It was converted into a community development block on 1-4-56, and reverted to stage II on 1-4-60.Years 1955 and 1956 did not see the addition of any new blocks in the district. The next three years however witnessed the establishment of Jabera, Tendukheda and Hatta blocks in that order. Year 1960 again did not see the addition of any block. The Damoh block came in 1961. Last to come however was the Patera block in Hatta tahsil, with whose inauguration on 2-10-62 the district was completely covered by the community development programme.

**Economy:**

**Workers and non-workers:**

The following table gives the participation rate i. e. proportion of workers to total population for the district and each tahsil separately for total, rural and urban areas. Corresponding figures for the State as a whole and for Jabalpur division and Sagar district are also given for highlighting differences, if any.

| District/Tahsil | | Percentage of workers to total population | | |
|---|---|---|---|---|
| | | Persons | Males | Females |
| 1 | | 2 | 3 | 4 |
| Damoh | T | 47.2 | 58.5 | 35.5 |
| | R | 49.1 | 60.6 | 37.9 |
| | U | 33.9 | 48.2 | 18.2 |
| Hatta tahsil | T | 48.5 | 60.0 | 36.6 |
| | R | 49.4 | 60.9 | 37.5 |
| | U | 35.1 | 47.1 | 21.8 |
| Damoh tahsil | T | 46.5 | 57.7 | 34.9 |
| | R | 49.0 | 59.5 | 38.1 |
| | U | 33.7 | 48.4 | 17.0 |
| STATE | T | 52.3 | 60.2 | 44.0 |
| | R | 55.2 | 61.6 | 48.6 |
| | U | 34.9 | 52.4 | 14.5 |
| Jabalpur division | T | 51.8 | 59.1 | 44.3 |
| | R | 55.2 | 60.8 | 49.6 |
| | U | 35.2 | 51.6 | 16.2 |
| Sagar district | T | 47.3 | 57.7 | 35.9 |
| | R | 50.3 | 60.0 | 39.9 |
| | U | 36.9 | 50.1 | 21.8 |

The table shows that a little less than half of the population of the district is economically active. The rate of participation is higher in rural than in urban areas, and in males than in females. The participation rate is lower in urban areas because of the higher age of entry into employment market in the towns, a necessary consequence, among other things, of the universality of education in these areas. The lower rate of participation among women is explained by (i) their employment in household chores and consequently not being available for economic work and (ii) social taboo on working of women, particularly in the more cultured section of the society. This latter is, however, fast disappearing with the ushering in of the industrial age, under pressure of dire necessity.

The participation rate is considerably higher in the State as a whole and in Jabalpur division than in the district. The foregoing table shows that this difference is mainly owing to the very low female participation rate in the district than in the State as a whole or in Jabalpur division. The male participation rates have comparatively smaller gap. On the other hand, it may be obseved that Damoh and its western neighbour Sagar exhibit a more or less similar pattern of econo mic participation, bringing out the social affinity-

between the two districts, because the lower female participation rate in both these districts is perhaps a result either of greater taboo on the working of women or their not being required for work in these predominantly 'rabi' tracts. This similarity of working pattern is also exhibited by Hoshangabad, Narsimhapur, Raisen, Sehore and Vidisha districts; which form a compact belt with Sagar and Damoh districts.

Among tahsils, it may be observed that the northern and less urbanised Hatta tahsil has slightly higher rate of participation than Damoh. It may, however, be remarked that participation rate alone is not a reliable index of the state of economy as may generally be assumed. On the other hand, a higher participation rate is, more often than not, an index of economic backwardness. This follows from the observed lower rate of participation in urban areas where participation is diversified over the various sectors of economy which is consequently more developed. On the other hand, rural areas exhibit a higher rate of participation owing to concentration of economic effort in agriculture only. The reason why we may not take participation rate as an index of economic development is that it lacks two other necessary dimensions: the time of participation and the rate of productivity per participant. As is well known productivity is a function of the skill and training that the worker has received, and a skilled and trained worker is easily the equivalent of two or more unskilled, untrained or illtrained workers. Nevertheless, a higher rate of participation denotes the willingness of the population to take part in economic effort, which by itself is not insignificant.

**Economic Classification:**

The table inset below presents a breakup of 100 workers in Damoh district and its tahsils by the nine categories of workers. Corresponding figures for the State as a whole are also given.

100 *Workers in the district and each tahsil classified by category of worker*

| District/Tahsil | Percentage of workers in category | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | I | II | III | IV | V | VI | VII | VIII | IX |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Damoh district | 52.0 | 15.4 | 3.3 | 13.7 | 0.9 | 0.6 | 2.5 | 1.0 | 10.6 |
| Hatta tahsil | 49.5 | 21.0 | 4.1 | 12.3 | 0.4 | 0.6 | 2.0 | 0.2 | 9.9 |
| Damoh tahsil | 53.3 | 12.5 | 2.8 | 14.5 | 1.2 | 0.6 | 2.8 | 1.4 | 10.9 |
| Madhya Pradesh | 62.6 | 16.6 | 2.9 | 5.0 | 2.0 | 1.0 | 2.4 | 0.9 | 6.5 |

The table clearly brings out the greater diversification of economic effort in the district, as may be seen from the smaller participation in agriculture and greater participation in categories III, IV, VII VIII and IX. This feature of the economy of the district is a healthy one and partly explains the lower participation rate in the district.

**Agriculture :**

This includes workers returned in the first two working categories. The preceding table shows that about two-thirds (67.4%) of the workers in the district are principally employed in agriculture. The proportion is higher than the district average in the less urbanised Hatta tahsil, but even there, it is conspicuously smaller than the State proportion of participation in agriculture. About half of the workers (52.6%) have been returned as cultivators which term includes persons who cultivate on their own account, whether on owned (including unpaid work on family holdings) or unowned holdings, as against agricultural labourers who work on land for others for wages. The proportion of cultivators is higher in Damoh than in Hatta tahsil, while the latter tahsil shows a sizeable excess in the proportion of agricultural labourers. The greater proportion of agricultural labourers in Hatta suggests greater intensity of pressure on land in Hatta than in Damoh tahsil, as also possible intertahsil migration of labour to Damoh tahsil during the harvesting season. Even then, it may be noticed that agricultural labourers are somewhat less frequent in the district than in the State as a whole.

**Household Cultivation :**

For some purposes, economy can be studied better in some of its aspects by treating the household itself as a unit rather than the individual. Household agriculture and household industry are two such aspects of the economy, in which, particularly in the rural areas, the entire household is engaged as a unit and individual members, if any, of the household

working outside do so more with a view to augment the income accruing to the household from the household activity. Tables B-X to B-XVII of the Handbook deal with households engaged in household cultivation or industry, treating the household itself as a unit. These tables are prepared from a randomly selected, 20% sample of all households that were enumerated at the census and in respect of each of which a separate schedule was filled. Since the sample was random, and may undoubtedly be regarded as a large sample, the results derived from it may, without any sensible error, be projected to the entire universe of households in the district.

Table B-X gives a basic distribution of the households by the two principal household economic activities, namely household cultivation and household industry and their combinations. It shows that more than one-fourth, but less than three-tenth of all households were engaged neither in household cultivation, nor in household industry. 47.3% of the households are engaged only in household cultivation (the word *only* connotes the exclusion of household industry, though not, by individual members of the household, of any other economic activity), while about one-ninth (11.2%) do only household industry. Roughly one-seventh (14.7%) of the households, however, belong to the overlapping class of households that are engaged both in cultivation and in household industry. Dependence on agriculture, with or without household industry, is thus 62% i. e. these are the households that are engaged in household cultivation. About one-fourth (25.9%) of the households are engaged in household industry, without or with household cultivation.

Table B-XI of the Handbook gives us valuable data on two important aspects of cultivation viz. prevalence of sub-tenures or absentee-landlordism and fragmentation of holdings in the sense of smallness of the total area of land cultivated by each household. As regards the first aspect the statistical evidence before us shows that more than four-fifth (82.4%) of the cultivating households own, or directly hold from Government, their entire holdings. At the opposite extreme are a small number of households together adding up to 3.7% of all households, who do not own the holdings cultivated by them, but have taken them on sub-lease from others. Between these two types, stand roughly one-seventh (13.9%) of the cultivating households, who cultivate lands which only partly belong to them. These two latter categories of households indicate the extent of persistence of subtenures inspite of land reform measures taken by the State.

Fragmentation of holdings in the sense both of smallness of holdings or 'dwarf' holdings, and the geographical discontinuity of the plots cultivated by the same household is another curse of our cultivation and is a great drag on our human, livestock and other resources. This is so, because existence of sub-marginal holdings, possibly not in one continuous stretch but scattered apart in separate tiny plots leads to the wastage of human and cattle power, and impedes production. This aspect of cultivation in the sense indicated earlier is studied in the table inset below, which gives (i) distribution of rural (because cultivation as a household activity is not important in urban areas) households by size of holdings cultivated by them and (ii) cumulative proportion of households that cultivate holdings smaller than certain specified sizes:

| Size of holding | Percentage of households cultivating holding of size given in column 1 to all cultivating households | Percentage of households cultivating holdings smaller than the area indicated by the upper limit in columan 1 |
|---|---|---|
| 1 | 2 | 3 |
| Below 1 acre | 4.1 | 4.1 |
| 1—2.5 | 17.2 | 21.3 |
| 2.5—5.0 | 20.5 | 41.8 |
| 5.0—7.5 | 16.2 | 58.0 |
| 7.5—10.0 | 9.3 | 67.3 |
| 10.0—12.5 | 10.2 | 77.5 |
| 12.5—15.0 | 3.6 | 81.1 |
| 15.0—30.0 | 12.7 | 93.8 |
| 30.0—50.0 | 4.4 | 98.2 |
| 50+ | 1.8 | 100.0 |

The table shows that 4.1% or about one in twenty five of the cultivating households own 'next to nothing' in the name of land, the size of holdings cultivated by them being less than one acre each. A little more than one-sixth (17.2%) of the cultivating households holding more than 1 but less than 2.5 acres of land each are also illustrations of the heavy pressure on agricultural lands in the district. Amalgamating these two bottom size-classes, we are face to face with the distressing fact that more than one-fifth of the cultivating households in the district cultivate holdings of less than 2.5 acres each which cannot yield even bare subsistance income to them.

About one-fifth of the cultivating households are in the size-group 2.5—5.0 i.e. cultivate holdings of, and more than 2.5 but below 5 acres. This is the maximum frequency of households in any particular size-group of holdings. Even these are sub-marginal holdings. Thus, we find that roughly two-fifth (41.8%) of the cultivating households in the district hold lands less than 5 acres each, and these are clearly cases of sub-marginal holdings. In fact, except in the fertile tracts of *haveli*, even a holding of 7.5 acres cannot be said to be an economic holding, particularly with the present archaic methods of cultivation and without any irrigation. Hence, it would appear from the table above that about three-fifth (58.%) of the households in the district cultivate more or less uneconomic holdings.

Another one-fifth (19.5%) of the cultivating households hold lands between 7.5 to 12.5 acres, and may be regarded as representing the cases of marginal households who may or may not be economically out of the tight corner, depending on the quality of soil in the holding, irrigation facilities available, size of the cultivating household etc. About one-sixth (16.3%) of the cultivating households hold lands between 12.5 to 30 acres. These are of course not substantial cultivators, but definitely represent the class of cultivators who have the potentiality of getting handsome results from their holdings. The small minority (6.2%) —one-sixteenth of all cultivating households--of cultivating households who hold holdings of more than thirty acres in size may definitely be called cultivators of substance, in whose hands much of the land wealth of the district is concentrated. The average size of holding per cultivating household in 1960-61, comes to 9.9 acres which when seen in conjunction with the fact that about three-fifths (58%) of them own only below 7.5 acres of land and two-thirds below 10 acres, indicates that the extent of such concentration of land wealth in the hands of some households must be considerable.

**Category III-Mining, quarrying, etc.**

Economic activities included in this category cover the entire range of activities involving extraction of wealth provided by nature, without subjecting it to any basical change. Thus forestry, fishing, hunting, livestock, mining and quarrying, gardening etc. are the activities covered in category III. The district had 3.3% of its working force in category III, comparing with a smaller proportion of 2.9% in the case of the State as a whole. The proportion is as large as 4.1% in the Hatta tahsil. Roughly half (48.5%) of the workers in category III have been returned in major group 'oo' of the industrial classification i. e. "field produce and plantation crops." These are perhaps engaged in the production of 'pan' or 'betel leaf', which is grown fairly extensively in Damoh, Hindoria and Raneh; of *singhara* or water-nut grown to a considerable extent in the tanks of Damoh, Patharia, Bunsa and Akhera and in the production of vegetables.

About one-third (31.8%) of the workers in category III are engaged in the single pursuit of "production and rearing of livestock mainly for milk and animal power such as cow, buffalo, goat" (minor group 040).

Activities connected with forestry (major group '02') account for 11.3% of the workers in category III. These are employed mainly in conservation of forests (officials of the forest department) and in felling and cutting of trees.

Plantation crops (major group 01) employ 5.3% of the workers in category III. These, perhaps, are workers engaged in the production of *al*[1] or Indian madder (*Morinda citrijolia*). There is no mining in the district.

**Category IV:- Household Industry**

Household industry plays an important role in the economy of the district, and is next to agriculture as regards size of participation. The district has more than 2 times as large a proportion of workers in the category as the State as a whole. Participation in the category is more or less comparable in the two tahsils. By far, the most important household industry, absorbing very nearly two-third of the workers in the category is that of biri-making. It is in fact this industry that swells the rate of participation of the category in the district as compared with the State as a whole. Besides, the biri industry provides secondary work to a large number of workers engaged in cultivation. Other household industries, though they are foreshadowed considerably by the monolithic role of the biri-making industry, are of the traditional type based on functions associated with castes like Basor, Chamar, Barhai, Luhar, Kumhar, Teli, Sunar etc. The following table gives the more important household industries, judged from the standpoint of participation size; all industries having more than 1% of all workers in category IV have been shown.

1. District Gazetteers, page 94.

**TABLE**

*Proportion of workers in each major group and minor group of household industry (only those minor groups having more than 1% of workers in category IV are shown) to total workers at household industry.*

| S. No. | Major and minor group of industry | Description | Proportion to total workers in category IV | Rank | Remark as to caste association |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | 02 | Forestry and logging | 0.7 | | |
| 2 | 04 | Livestock and hunting | 0.3 | | |
| 3 | 20 | Food stuffs | 4.2 | | |
| | 206 | Production of butter, ghi, cheese and other dairy products | 1.9 | 9 | Ahir caste |
| 4 | 207 | Production of edible oils and fats (other than hydrogenated oil) | 1.3 | 11 | Teli ,, |
| 5 | 22 | Tobacco products | 65.3 | .. | |
| 6 | 220 | Manufacture of biri | 65.3 | 1 | |
| 7 | 23 | Textile-cotton | 1.8 | .. | |
| 8 | 27 | Textile-miscellaneous | 3.3 | .. | |
| 9 | 273 | Making of textile garments including rain coats and headgear | 3.0 | .3 | Tailor or darji |
| 10 | 28 | Manufacture of wood and wooden products | 10.9 | .. | |
| 11 | 282 | Manufacture of structural wooden goods such as beams, posts, doors, windows | 2.0 | 8 | Barhai |
| 12 | 288 | Manufacture of materials from cork, bamboo, cane, leaves and other allied products | 8.0 | 2 | Basor |
| 13 | 31 | Leather and leather products | 3.6 | .. | .. |
| 14 | 311 | Manufacture of shoes and other leather footwear | 2.9 | 4 | Chamar |
| 15 | 34 & 35 | Non-metallic mineral products other than petroleum and coal | 4.5 | .. | .. |
| 16 | 340 | Manufacture of structural clay products such as bricks, tiles etc. | 1.7 | 10 | Kumhar |
| 17 | 350 | Manufacture of earthenware and earthen pottery | 2.8 | 5 | Kumhar |
| 18 | 36 | Basic metals and their products except machinery and transport equipment | 3.0 | .. | .. |
| | 369 | Manufacture of sundry hardware such as G. I. pipe, wire, nut, bolt, screw, buckets | 2.6 | 6 | Luhar |
| 19 | 39 | Miscellaneous manufacturing industries | 2.3 | .. | .. |
| 20 | 393 | Manufacture of jewellary, silver wares and wares using gold and other precious metals | 2.2 | 7 | Sunar |

Besides the above household industries there are a few others of importance which could not come in the above table because they give principal employment to less than 1% of the workers each. Cotton-printing (minor group 233) is a household industry associated with Chhipa caste. Principal dyeing centre is village Bansa, and its printed cloth are well known locally.[1] Damoh, Hindoria, Hatta, Aslana had also a number of dyers. Workers in brass, copper and bell-metal (minor group 365) are found in Damoh, Hatta, Hindoria, Patharia and Patera. All kinds of eating and drinking vessels were made in Hatta, where the workmen had considerable skill and imported a peculiar polish to the metal.[2] The pottery of Damoh has some reputation, the clay around it being malleable.

It is significant that leather-working industry which was quite important at the time of compilation of the District Gazetteer (1906) supporting about 9,000 persons, has now dwindled in importance. Cotton weaving industry was scantily represented even at the time of the Gazetteer and it continues to be so.

**Category V:**

**Manufacturing other than household industry**

Damoh is very backward in respect of manufacturing industries of the registered factory scale. This would follow from the fact that the 1961 Census returned only 0.9% of workers from the district in

1. District Gazetteer page 126.
2. ibid. page 127.

category V, comparing with a much bigger proportion of 2% in the case of the State as a whole. Most of the workers (i.e. 79.5%) in the category are concentrated in urban areas, and this is quite natural because of the concentration of non-agricultural, non-household industries in the urban areas. Hatta tahsil with a smaller urban component has a much smaller proportion of workers in category V.

About one-third of the workers in category V are in 'manufacture of biri', mainly in the six* registered factories in Damoh, Hatta and Hindoria but also quite a few outside these, working in unregistered, perhaps smaller, establishments.

Industries connected with manufacture of foodstuffs, mostly in urban areas, absorb 15.3% of the workers. These are mostly engaged in the flour mills, and the oil mills (Damoh town had three registered oil mills in December 1960, though no rice or dall mill was reported to be registered). Next in respect of size of employment are the group of industries concerned with manufacture of wood and wooden products. Together these give principal work to 9.5% of the workers in the category distributed over (i) sawing and planing of wood i.e. saw mills (ii) making of structural wooden goods like panes, doors etc. (iii) making of materials from bamboo or cork etc. Tailoring, which has sneaked into category V because technically it did not comply with the definition of household industry, employs about 8% of the category's working force. Goldsmithy and silversmithy; making of metal products, repairs to cycles and rickshaws, making of clay products and making of leather articles are other industries employing the remaining workers in category V. It is clear that the district has no largescale industry of any size, barring the few registered biri factories and oil mills.

**Category VI--Construction:**

Only 3 out of every 500 workers in the district are in 'construction', comparing with 5 in every 500 in case of the State as a whole. This rather small participation in 'construction' indicates the low level of constructional activities in the district. The proportion of workers in construction has the same value in each tahsil as it has in the district as a whole. Roughly half (47.6%) of the workers in 'construction' have been returned as engaged in the construction and maintenance of Government buildings, about one-third (35%) in the construction and maintenance of roads, and the remaining about one-sixth (17.4%) in the construction and maintenance of "waterways, water reservoirs, tanks etc."

**Category VII--Trade and Commerce:**

2.5% (5 in 200) workers in the district have been returned in category VII or 'trade and commerce,' which compares with an almost equal proportion--2.4%--in the case of the State as a whole. Participation in trade and commerce is somewhat smaller (2%) in Hatta tahsil but greater (2.8%) in Damoh tahsil. Most of the workers (i. e. more than half) in trade and commerce have been returned from the two towns; and of the remaining, quite a few are perhaps concentrated in the bigger villages.

Roughly 8% (7.9%) of the workers in 'trade and commerce' are returned from wholesale trade. More than three-fourth (75.3%) of these are in wholesale trade in cereals and pulses. The remaining workers in wholesale trade are in the trade of other eatables like oil or ghee; textile garments; fuel and lightning products such as coal etc.

About nine-tenth (89.3%) of the workers in trade and commerce are in retail trade. More than half of these are engaged in retail trading in "cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, (minor group 640). The remaining retail traders are mainly employed in (i) retail trading in fibres, yarns, dhoti, saree, readymade garments etc. (minor group 650), (ii) retail trade in tobacco, bidi, cigarettes and other tobacco-products (minor group 644); (iii) retail trading in foodstuffs like sweetmeats, condiments, cakes, biscuits etc. (minor group 646); retail trading in animals (minor group 647); retail trading in jewellery (686), etc. This pattern of distribution of retail trade workers is however common to almost all other districts, and naturally so because trade has to respond to the needs of the population, and the basic needs of the population do not vary from place to place.

A small proportion i. e. 2.8% of workers in trade and commerce has been returned in 'trade and commerce miscellaneous'; these are engaged mainly in banking and other similar type of financial organisations.

It may be remarked that most of the retail trading activity of the rural areas takes place through a network of markets spread all over the district. A list of such markets, together with the days of market,

*List of Industrial Establishments in Madhya Pradesh, 1960 (corrected upto 31st December 1960)

is given in part II of the Handbook as appendix X.

**Category VIII-Transport, Storage and Communications:**

Damoh district, which was land-locked till 1895, was opened to railway traffic in 1898, with the extension of the proposed Bina-Katni railway line upto Damoh from Sagar. The Damoh to Katni part was completed in 1899. This, however, remains the only railway line in the district so far, and it runs through the heart of the district for 43 miles.

Damoh, however, is fairly well served with roads, which connect it to Sagar, Jabalpur via Katangi, Jabalpur via Tendukhera, Chhatarpur via Baxwaha, Hatta, Hindoria etc. The district has a total, all weather linear mileage of 350 miles, which breaks into 87 miles of State highway, 115 miles of major district roads and 143 miles of other district roads. This gives us 123 linear mileage of all weather government roads per 1000 square miles of area, comparing with 129 miles in case of the State as a whole.

The Census returned 2,116 workers in category VIII, who add upto 1% of the district's working force. The corresponding proportion for the State as a whole is 0.9%. Among tahsils, employment in category VIII is only 0.2% of the working force in the northern Hatta tahsil, while it has the higher value of 1.4% in the Damoh tahsil. This is so because Damoh tahsil has all the railway mileage of the district and is also better served than Hatta as regards road transport.

Transport accounts for 93% of the workers in category VIII. Roughly two-thirds of these are employed in transport by rail, and the remaining mostly in transport by road through omnibuses and through motor vehicles other than buses.

Communications, mainly postal and telegraphic, employ 6% of the workers in category VIII. Storage has yet to develop in the city, the proportion of workers in it being less than 1% of the workers in category VIII.

**Category IX: Other Services—**

This group of economic activities is third in importance in the district from the standpoint of participation size. Between one-tenth and one-eleventh of the working force of the district has been returned in 'other services.' In the State, the proportion is smaller, lying between one-fifteenth and one-sixteenth of the working force. There is no marked difference in the tahsil proportions of workers in 'other services.'

The following table gives the proportions of workers in each major-group of industry to total workers in 'other services.'

100 *workers in other services distributed over major-groups of industry*

| S.No. | Code No. | Description | Proportion of workers to all workers in category IX. | Remarks. |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1 | 50 | Electricity and gas | 0.2 | |
| 2 | 51 | Water supply and sanitary services | 6.1 | Almost entirely in '511' |
| 3 | 80 | Public services | 10.9 | 51.7% in minor group '803'; 30% in '803'; 12.2% in '805' and 6.1% in '804' |
| 4 | 81 | Educational and scientific services | 5.9 | Almost entirely in '811' |
| 5 | 82 | Medical and health services | 3.4 | More than 90% in '820'; rest in '821' |
| 6 | 83 | Religious and welfare services | 2.5 | Mainly in minor group '831'; partly in '832' and '830'. |
| 7 | 84 | Legal services | 0.2 | All in minor group '840' |
| 8 | 85 | Business services | 0.1 | All in minor group '851' |
| 9 | 86 | Community services and trade and labour associations | 0.5 | Distributed in minor groups '860' '861' and '862' |
| 10 | 87 | Recreation services | 0.7 | Distributed between minor groups '872' and '873' and '871'. |
| 11 | 88 | Personal services | 10.8 | 43.7% in minor group '880'; 32.8% in minor group '883'; 14.5% in '884' and 8% in '882'. |
| 12 | 89 | Services not elsewhere classified | 2.3 | All in '890'. |
| 13 | 90 | Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified. | 56.4 | All in '900'. |

It appears from the foregoing table that more than half of the workers classified in 'Other services' did not furnish adequate information about their industrial affiliation to enable them to be classified under specific major and minor groups. Among those who did so, most numerous are workers in 'public services.' These form about one-ninth of the working force in category IX. Of these again, more than half are in 'public service' in the administrative departments and offices of the State Government', about three-tenths are in 'police service', about one-eighth in 'administrative departments and offices of semi government and local body institutions' and the remaining one-seventeenth in 'public service in administrative departments and offices of the central Government."

Almost equally numerous with workers in 'public service' are workers in 'personal services', contributing between one-tenth and one-ninth to the working force in category IX. Within the major group 'personal services', most frequent (more than two-fifth) are workers serving households in the capacity of domestic servants, followed by those working as launderers and washermen who number one-third, barbers and hair-dressers who add upto about one-seventh, and those working in hotels etc. who make 8% of all workers in the major group.

About 6% workers in category IX are working in 'educational and scientific services.' These are mostly teachers in primary and higher secondary schools and colleges. About an equal proportion works in connection with the 'disposal of garbage and sewage, operation of drainage system and all other types of workers connected with public health and sanitation. Workers in other groups of category IX are not very numerous.

**Sex Ratio Among Working Categories:**

The table below gives sex ratio among total population, total workers and each category of workers and non-workers for the district separately for total, rural and urban areas. Corresponding figures for Jabalpur division and State are also given:

| State/ Division/ District | T R U | Total Population | Total workers | Sex Ratio Among Categories I | II | III | IV | V | VI | VII | VIII | IX | Non-workers X |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 6 | 8 | 9 | 10 | 11 | 12 | 13 | 14 |
| Damoh | T | 965 | 586 | 555 | 811 | 425 | 624 | 82 | 211 | 215 | 8 | 774 | 1,500 |
| District | R | 974 | 615 | 558 | 813 | 453 | 362 | 164 | 307 | 337 | .. | 940 | 1,513 |
| | U | 906 | 342 | 325 | 338 | 252 | 895 | 62 | 95 | 123 | 10 | 300 | 1,430 |
| Madhya | T | 953 | 696 | 789 | 1,015 | 283 | 591 | 113 | 213 | 153 | 28 | 390 | 1,341 |
| Pradesh | R | 970 | 765 | 792 | 1,014 | 286 | 574 | 316 | 263 | 251 | 37 | 484 | 1,298 |
| | U | 856 | 237 | 558 | 1,056 | 263 | 665 | 83 | 172 | 97 | 25 | 275 | 1,539 |
| Jabalpur | T | 965 | 723 | 832 | 1,104 | 239 | 701 | 102 | 221 | 172 | 16 | 420 | 1,315 |

Among working population and among each working category sex-ratio is very much below 1,000; correspondingly it is much higher than 1,000 in non-workers. This is obviously due to a much greater proportion of dependents among women and also because many of them are housewives who are treated as non-workers. Of particular notice is the higher sex-ratio among agricultural labourers, and at household industry. Higher sex-ratio among agricultural labourers is a characteristic belonging to almost all the districts of the State. In fact, Damoh district with a few others where female participation in economic effort is conspicuously low, has comparatively a much lower sex-ratio in agricultural labourers than the State as a whole or the Jabalpur division. In these two, the sex ratio of category II has a value greater than 1,000.

Higher sex-ratio in category IX again distinguishes the district from the State as a whole and Jabalpur division where it is very low. In Damoh district, this is owing to greater female than male workers in major group '90'—who seem to be 'general labourers.' Female participation is negligibly small in category VIII, and is small in category V.

## IMPORTANT PLACES

ABHANA : (pop. 2,208). This is a large village, 11 miles to the south-east of Damoh on Jabalpur

road. It has one of the largest tanks in the district abounding in fish, and a ruined fort. The village has a middle school. Cultivation, household industry (biri-rolling, making of earthen pots, weaving of cloth on handloom, carpentry, blacksmithy, gold and silversmithy), trade and commerce and 'other services' are the principal economic activities giving employment to the workers. A weekly market is held in the village on Saturdays. The tutelary goddess of the Mahdele Lodhis is located in the ruined fort in the village.

BANDAKPUR (Pop. 1,484): A big village in Damoh tahsil, 9 miles to the east of Damoh town, this is a railway station on Damoh-Katni line. The village has a famous temple to Jageshwar or Shiv, constructed by Balaji Diwan, the Maratha Governor of Damoh in 1771. A large fair is held in the village on Basant Panchami day. There is a middle school and an ayurvedic dispensary in the village.

BANSAKALAN (Pop. 2,492) : A village in Damoh tahsil, 17 miles to the west of Damoh town and two miles from Patharia railway station, this is a large village, reputed to have a first-rate black soil known to be very fertile. Workers are principally engaged in cultivation and household industry (mostly biri-making, and the others in shoe-making, blacksmithy, carpentry, oil-pressing, tailoring etc.). The village has a high school.

BATIAGARH : (Pop. 1,751) : This is a large village in Hatta tahsil, 21 miles north-west of Damoh town on the Damoh-Chhatarpur road via Baxwaha. On the bank of Baink or Jhuri, this large village was the seat of government under the Muhammadans. It has a ruined fort and a large well containing an inscription in Persian. A number of other inscriptions and Sati pillars have been collected from the village. The village has a rural health centre, a middle school and a police station. It is headquartes of a development block.

DAMOH : (Pop. 46,656) : This is the district headquarters town, situated 66 miles to the north of Jabalpur town and 48 miles to the east of Sagar town. It is also a railway station on Katni-Sagar railway line. Damoh is the fifteenth town in the State in size. Elevation of the town is 1,236 feet.

According to Gazetteer, the name is traditionally derived from Damyanti, the wife of king Nal of Hindu mythology. It is however an old town, believed to have been of some importance in the 14th century when it was occupied by the Muhammadans and also was the seat of the Maratha Governors. Several inscriptions have been collected from the town. There are eight tanks in the town, the largest being Phutera tank in the north of the town. Most of the persons work in household industries,the important ones being biri-rolling, gold and silver smithy, brass and bell-metal industry, making articles of split-bamboo, shoe-making, earthen-pottery etc. A number of pan-vines are situated in the neighbourhood of the town and *singhara* is grown in the tanks. The district has a college, and high schools.

FATEHPUR (Pop. 1,730) : A large village in Hatta tahsil, 27 miles north of Damoh town and 9 miles from Hatta, the village is named after one Fatch Singh, an officer of the Raja of Shahgarh, who built a fort in 1,643 A.D. at Jatashnkar about four miles north of the village. The village has a middle school.

GAISABAD : (Pop. 1,130) : A big village in Hatta tahsil, 16 miles from Hatta on the gravelled road to Nagod, the village is said to have been of considerable importance under the Bundelas. An annual fair is held in the village in February.

HATTA : (Pop. 9,117) : This tahsil headquarters town is situated on the bank of river Sonar, 24 miles north of Damoh. The name is traditionally derived from that of a Gond Raja Hattay who is supposed to have founded the village as early as the 11th century. An old fort, in ruins, stands near the river, which was built by the Bundelas in 17th century and subsequently improved by the Marathas. The town is known for its brass and bell-metal industry.

HINDORIA : (Pop. 5,826) : This is a very big village in Damoh tahsil, 10 miles to the north- east of Damoh connected by it with a metalled road and 3 miles from Bandakpur railway station. The village played an important part in the mutiny of 1857. It was the headquarters of rebel leader Kishor Singh Lodhi, whose ancestor Budh Singh is supposed to have founded the village and constructed the small fort (1600 A.D.) on the top of a hill to the south of the village. The village is known for its pan gardens. It has a high school, an ayurvedic dispensary and a police station.

JABERA : (Pop. 2,885) : A large village, 28 miles to the south of Damoh on Jabalpur-Damoh road. This is the headquarters of a development block.

KUNDALPUR : (Pop. 387) : This is a small village in the south-east of Hatta tahsil, 20 miles from Damoh town on the road from Hindoria to Phutera. The village is a sacred place of Jains and contains a number of temples situated at the northern end of a range of low hills on the left bank of Bearma river. There are some 20 temples on the hill and 30 more at the foot of it near a tank. The principal temple contains a huge image of Mahavira, 12 feet tall, standing on a 4 feet high pedestal. The image has an inscription dated 1700 A.D. There are also two old Hindu temples near the tank which may probably be attributed to the 7th century. A Jain fair is also held in the village.

MARIADOH : (Pop. 2,576) : Situated on the bank of a stream called Jogidabar, 12 miles to the north of Hatta, this large village contains a ruined fort built by the Bundelas or the Marathas. The village belonged to the Raja of Charkhari State till 1860, when it was exchanged for some territory in Hamirpur district in Uttar Pradesh.

NOHTA : (Pop. 1,365) : This large village 13 miles to the south-east of Damoh on Jabalpur road, is situated on the junction of river Bearma with a small stream called Guraiya. Many old temple-sites are scattered round the village, which testify to its having been an important place in the past. The only temple now standing intact is one mile to the south of the village, on the Jabalpur road. The village is believed to have been the seat of the Chandel Kings when they ruled the district in about the 12th century.

PATERA : (Pop. 3,034) : A very big village of Hatta tahsil, 19 miles to the north-east of Damoh with which it is connected by road. The village has a dispensary and a middle school. The village has a large number of persons working in household industries, mostly in biri-rolling, and brass and bell metal industry. It is the headquarters of a development block.

PATHARIA KALAN : (Pop. 5,089) : A railway station, 17 miles to the north-west of Damoh in Damoh tahsil, this very big village is the headquarters of a development block. It has a high school, primary health centre and a police station house.

PHUTERA KALAN : (Pop. 2,807) : 15 miles to the north-west of Damoh town near the Damoh-Batiagarh road, this large village in Hatta tahsil contains several temples and a tank. It has a middle school and an ayurvedic dispensary.

RANEH : (Pop. 2,848) : This is a large village 8 miles east of Hatta in Hatta tahsil. It contains a very old well, and a *marha* (i.e. small building) containing an illegible inscription. The village has 16 tanks in which *singhara* is grown, as well as pan vines. There is also a high school.

SINGORGARH : This is a hill fort situated in the south of Damoh tahsil, 4 miles from village Singrampur on Jabalpur-Damoh road. The fort commands the Jabera pass giving access to the road between the Kaimur and Bhander ranges. There is an inscription in the fort ascribing its construction to one Gaj Singh Pratihar. The Gond king Dalpat Shah had shifted his capital to this fort and it was in Singrampur that Rani Durgawati had fought the Mughal armies commanded by Asaf Khan.

SITA NAGAR : (Pop. 1,636) : This large village is situated 15 miles north of Damoh at the junction of the Sonar with Kopra. There is a temple at the confluence of the rivers, said to have been built by a lady after whom the village is named. There are also two old temples, one of Ram, and the other of Behari. There is a middle-school, and an ayurvedic dispensary in the village.

TENDUKHERA : (Pop. 1,696) : This village is situated 35 miles to the south-east of Damoh on Damoh-Patan road. It has a high school, an allopathic dispensary and a police station house. It is the headquarters of a development block.

TEJGARH : (Pop. 978) : This medium-sized village, 20 miles south of Damoh, contains a ruined fort, said to have been built by one Tej Singh Lodhi, after whom the village takes its name. The village has a police station house, a middle school and an ayurvedic dispensary.

**Summing up**

Forming the easternmost spur of the great Vindhyan plateau with the Sonar valley extending between the northern and southern scarps of the Vindhyas, Damoh district lies in north-east of the Jabalpur division. It is the 15th smallest district in size in the State comprising only 1.65% of the latter's area. It sinks further by ten places in rank as regards populousness, its 1961 population of 438,343 accounting for only 1.35% of the State's total population.

The district consists of two tahsils, Hatta in the north and Damoh in the south. Distribution of area

and population among the tahsils is extremely uneven, the southern Damoh alone containing about two-third (66.4%) of the district's population and about the same proportion (63.7%) of its area. Hatta tahsil is thus only half as populous and big as Damoh tahsil.

With a population density of 156 persons per square mile, Damoh is certainly among the most sparsely populated districts in the State. Its population density compares with a population density of 190 in the State and 195 in Jabalpur division and it is the 12th most sparsely populated district in the State. An important cause of low population density in the district is its hilly terrain and the large proportion of forest areas. Within the district, the valley of Sonar which falls in both the tahsils is the most thickly populated.

12.7% of the district's population (14% in case of the State) resides in the two towns, Damoh and Hatta of the district. The former is about five times as populous as the latter, having had continuous existence as a municipal town since 1901. Hatta, the other town stepped into urban category only in the census of 1951. It is also a municipal town.

87.3% of the population of the district lives in 1,144 inhabited villages of which 441 or 38.5% are in Hatta tahsil and the remaining 703 or 61.5% in Damoh tahsil. With more than four-fifth of the inhabited villages having below 500 population, Damoh is certainly a district of small villages. A little less than half of the villages (more than half in Hatta tahsil) have even less than 200 inhabitants each. Only one-twentieth of all inhabited villages in the district have population of more than 1,000 each, while one-seventh belong to the intermediate category, having between 500 and 1,000 population. A village in Damoh district is on an average much less populous than in Madhya Pradesh as a whole or Jabalpur division. In the district, average population per village is 334 (313 in Hatta and 348 in Damoh tahsil) comparing with 394 and 369 respectively in the State as a whole and in Jabalpur division.

During the sixty year period 1901-61, population of the district has increased by 53%, comparing with a much bigger increase of 92% in Madhya Pradesh as a whole. First half of this period was much less favourable to the growth of population in the district, the increase during 1901-31 being a paltry 7% in the district against an almost four-times bigger (27%) increase registered by the State as a whole. Chief cause of this extremely low growth during the first three decades was the heavy loss in population suffered by the district during 1911-21 mainly owing to the influenza epidemic, and near famine conditions in the closing year of the decade. The second half of the decade, though better than the first half, still failed to catch up with the State as a whole. The district, however, witnessed an unprecedentedly high rate of increase of 23% during the last decade; 19.7% in Hatta and 24.1% in Damoh tahsil. The causes for this high growth in the district as elsewhere in the State are the near elimination of epidemics (like plague, influenza and cholera) and famines, and the general improvement in health owing among other things to increasing availability of medical help. The data before us, however, is inadequate to suggest causes for the variability in the tahsilwise rates of growth.

Damoh, with a literacy percentage of 18.5 is slightly above the State average of 17.1%. It is however much below the national literacy percentage of 24 or the divisional percentage of 20.6. It compares fairly, however, with the educationally backward districts of the State and ranks 13th in descending order. Rural literacy percentage in the district is 14.7 (12.7% in the State), whereas in urban areas it is 44.3% (43.5% in the State). By sexes, the distribution of literacy is yet very uneven being 28.9% among males and 7.6% among females. With a literacy percentage of 19.7% Damoh tahsil is somewhat better than Hatta tahsil which has a literacy rate of 16.0%. The higher incidence of literacy in Damoh tahsil is to be traced mainly to the bigger urban component in its population, as will appear from the fact that rural literacy is more or less the same (14.3% in Hatta and 14.9% in Damoh) in both the tahsils. The district is also better than the State as a whole as regards levels of education. 41% of its literate and educated population possess primary or junior basic and higher educational levels as against 28% of such persons in the State as a whole.

More than 94% of the population follow Hindu religion. Muslims and Jains, numbering respectively 3.2 and 2.1 per cent of the population are other numerous religious groups. Followers of all other religions constitute less than 0.3% of the population.

Thirteen castes have been scheduled in the district by 'The Scheduled Castes and Scheduled Tribes

Lists (Modification) Order, 1956'; but of these only eleven, together accounting for 18.3% of the population, have been returned. Chamar, the most numerous scheduled caste accounts for more than three-fourth (76.5%) of the total scheduled castes population. Basor, Kori, Mehtar or Bhangi, Mahar and Dahayat respectively contributing 12.6, 3.9, 3.0, 2.0 and 1.1 per cent to the total scheduled caste population are among the other more numerous scheduled castes in the district. Educationally and economically, the scheduled castes stand poor comparison with the general population. Proportion of literate and educated among them is 6.5% (11.8% males and 1.2% females) and of these about seven-tenths (72.6%) are mere literates without any educational levels. Economy of the scheduled castes is more diversified over the working categories than that of the general population. Degree of dependence on agriculture in them is 57.6% of the working force as against 67% for the general population. Household industry, accounting for nearly a quarter of their working force is important in the economy of the castes. Presumably the household industries are those traditionally associated with the more numerous Chamar and Basor castes.

The district does not have any scheduled tribes though its population includes a sizeable proportion of the tribes Gond and Bharia.

Cropping pattern in the district is more *rabi* than *kharif*. Wheat, the stable crop, is most extensively grown, accounting for almost half of the net sown area in 1960-61. Rice, gram and *jowar* are other important food crops of the district. 4.2% of the net sown area was irrigated in 1960-61 mostly from Government canals emanating from the irrigation tanks.

47.2% (58.5% males and 35.5% females) of the district's population is economically active, comparing with higher proportions of 52.3 and 51.8 per cent respectively in the State as a whole and in Jabalpur division. The dependence on agriculture in the district is to the extent of 67% of the workers, which is much less than such dependence (79%) in the State as a whole. A notable feature of the economy is the higher (13.7% of the working force) participation in household industry than in the State as a whole (5.0%). These deviations from State pattern arise from the *biri* industry which is very popular in the district. 'Other services' also account for a sizeable (10.6%) proportion of workers.

Of the cultivating households, about four-fifth (82.4%) are owners of their holdings, 3.7% cultivate holdings belonging to others and 13.9% are masters only of parts of their holdings. As regards size of holdings, more than one-fifth of the cultivating households own fragmentary holdings of less than 2.5 acres, while as many as two-fifth 42% have holdings of less than 5 acres. These can clearly be regarded as uneconomic holdings. The evidence thus shows that a very large proportion of cultivating households subsist on very small holdings.

The district is yet very poor in power resources. Till 1960-61, not one village in the district was electrified, though electricity had reached both the towns. The future of the district in the coming years seems to be linked with agricultural development of the rich Sunar valley, and of some of the agriculture and forest-based industries.

| Appendix VIII | —Towns and villages having public latrines .. | 219 |
| Appendix IX | —Towns and villages having drains .. | 219 |
| Appendix X | —Towns and villages in which weekly or fortnightly markets are held together with the days on which held .. | 220 |
| Appendix XI | —Towns and villages having co-operative societies together with the description of the society .. | 221 |

# APPENDIX I

## INDUSTRIAL ESTABLISHMENTS

*Note*:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the Tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc, as in the case of villages.

*The following examples will make the above note clear* :—

Damoh District Total 200 (166) signifies that there are 166 establishments in Damoh District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains." Hatta Tahsil Total 207 (95) signifies that there are 95 establishments in Hatta Tahsil pertaining to Minor Group 207, which stands for "Production of edible fats and oils (other than hydrogenated oils)." Village 1 Chauriya 288 (6) signifies that in Village Chauriya which has 1 as its Location Code number there are 6 establishments pertaining to Minor Group 288, which stands for "Manufacture of material from cork, bamboo, cane leaves and other allied products". Hatta Town Ward No. 1 220 (2) signifies that there, are 2 establishments located in Ward No. 1 of Hatta Town pertaining to Minor Group 220, which stands for "Manufacture of Bidi".

### DAMOH DISTRICT

**Total**—200 (166), 202 (1), 205 (1), 206 (12), 207 (216), 209 (172), 214 (1), 220 (6762), 230 (10), 231 (5), 233 (22), 235 (85), 244 (1), 255 (33), 270 (3), 272 (5), 273 (351), 274 (5), 278 (4), 280 (10), 281 (12), 283 (664), 284 (32), 288 (1188), 289 (4), 302 (3), 310 (10), 311 (1345), 313 (1), 314 (29), 333 (12), 335 (1), 336 (3), 338 (2), 340 (4), 344 (1), 350 (733), 356 (4), 362 (3), 365 (90), 367 (3), 368 (1), 369 (644), 372 (2), 373 (1), 378 (1), 380 (1), 382 (1), 384 (2), 388 (50), 392 (5), 393 (342), 394 (1), 399 (21).

**Rural**—200 (118), 206 (12), 207 (204), 209 (102), 220 (6254), 230 (10), 231 (4), 233 (21), 235 (82), 244 (1), 255 (33), 270 (1), 272 (5), 273 (280), 274 (5), 281 (1), 281 (2), 283 (652), 284 (26), 288 (1107), 289 (2), 310 (9), 311 (1303), 314 (28), 333 (9), 335 (1), 339 (1), 340 (3), 344 (1), 350 (698), 365 (69), 369 (596), 372 (1), 388 (18), 393 (185), 399 (19).

**Urban**—200 (48), 202 (1), 205 (1), 207 (12), 209 (70), 214 (1), 220 (508), 231 (1), 233 (1), 235 (3), 270 (2), 273 (71), 278 (4), 280 (9), 281 (10), 283 (12), 284 (6), 288 (81), 289 (2), 302 (3), 310 (1), 311 (42), 313 (1), 314 (1), 333 (3), 336 (3), 339 (1), 340 (1), 350 (35), 356 (4), 362 (3), 365 (21), 367 (3), 368 (1), 369 (48), 372 (1), 373 (1), 378 (1), 380 (1), 382 (1), 384 (2), 388 (32), 392 (5), 393 (157), 394 (1), 399 (2).

### 1 HATTA TAHSIL

**Total**—200 (64), 207 (95), 209 (58), 220 (1302), 230 (2), 231 (2), 233 (4), 235 (4), 244 (1), 255 (14), 270 (1), 272 (4), 273 (147), 274 (1), 281 (1), 283 (279), 284 (23), 288 (481), 300 (9), 311 (548), 313 (1), 333 (5), 335 (1), 344 (1), 350 (252), 365 (37), 367 (1), 369 (242), 388 (11). 393 (113), 399 (6).

### HATTA TAHSIL—*Contd.*

**Rural**—200 (55), 207 (91), 209 (41), 220 (1216), 230 (2), 231 (2), 233 (4), 235 (48), 244 (1), 255 (14), 270 (1), 272 (4), 273 (133), 274 (1), 283 (279), 284 (22), 288 (460), 310 (9), 311 (544), 333 (4), 335 (1), 344 (1), 350 (240), 365 (27), 369 (238), 388 (4), 393 (63), 399 (4).

**Urban**—200 (9), 207 (4), 209 (17), 220 (86), 235 (1), 273 (14), 281 (1), 284 (1), 288 (21), 311 (4), 313 (1), 333 (1), 350 (12), 365 (10), 367 (1), 369 (4), 388 (7), 393 (50), 399 (2).

*Location code number and name of Village*:

1 **Chauraiya** 288 (6), 311 (11).
4 **Silapari** 288 (2).
10 **Rajpura** 288 (1), 369 (1), 393 (1).

# PART II

## OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies ( the agency or source is indicated below each Table or Statement ) and from official publications. These are presented under the following heads:—

1 Rainfall

2 Economic Statistics:—
- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics:—
- (a) Health and Medical
- (b) Vital Statistics

7 Miscellaneous
