FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual-slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station//Town lavels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, IAS, the Director of Census Operations, West Bengal on behalf of State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy., Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Direcrorates have been scrutinised in the Social studies Division at the head quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Primary Census Abstract included in the publication relate to the district of Jalpaiguri. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census Operations in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Jalpaiguri (Principal Census Officer) and his innumerable colleagues including the Charge Superintendent, Census Supervisors, Census Enumerators. The data were processed under the Deputy Director-in-Charge of the Regional Tabulation office by a host of Coders, Checkers, Tabulators, Supervisors etc. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of the data have been done by the Central Tabulation Unit of this office under the supervision of Shri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operations (since retired) and later under Sri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The credit for preparation of the maps goes to the Map unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal, who was ably assisted by Shri Chourajit Singh, Senior Geographer, Sri T. S. Khadatkar, Geographer and their colleagues.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director, without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among the officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Choudhury, WBCS., and Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

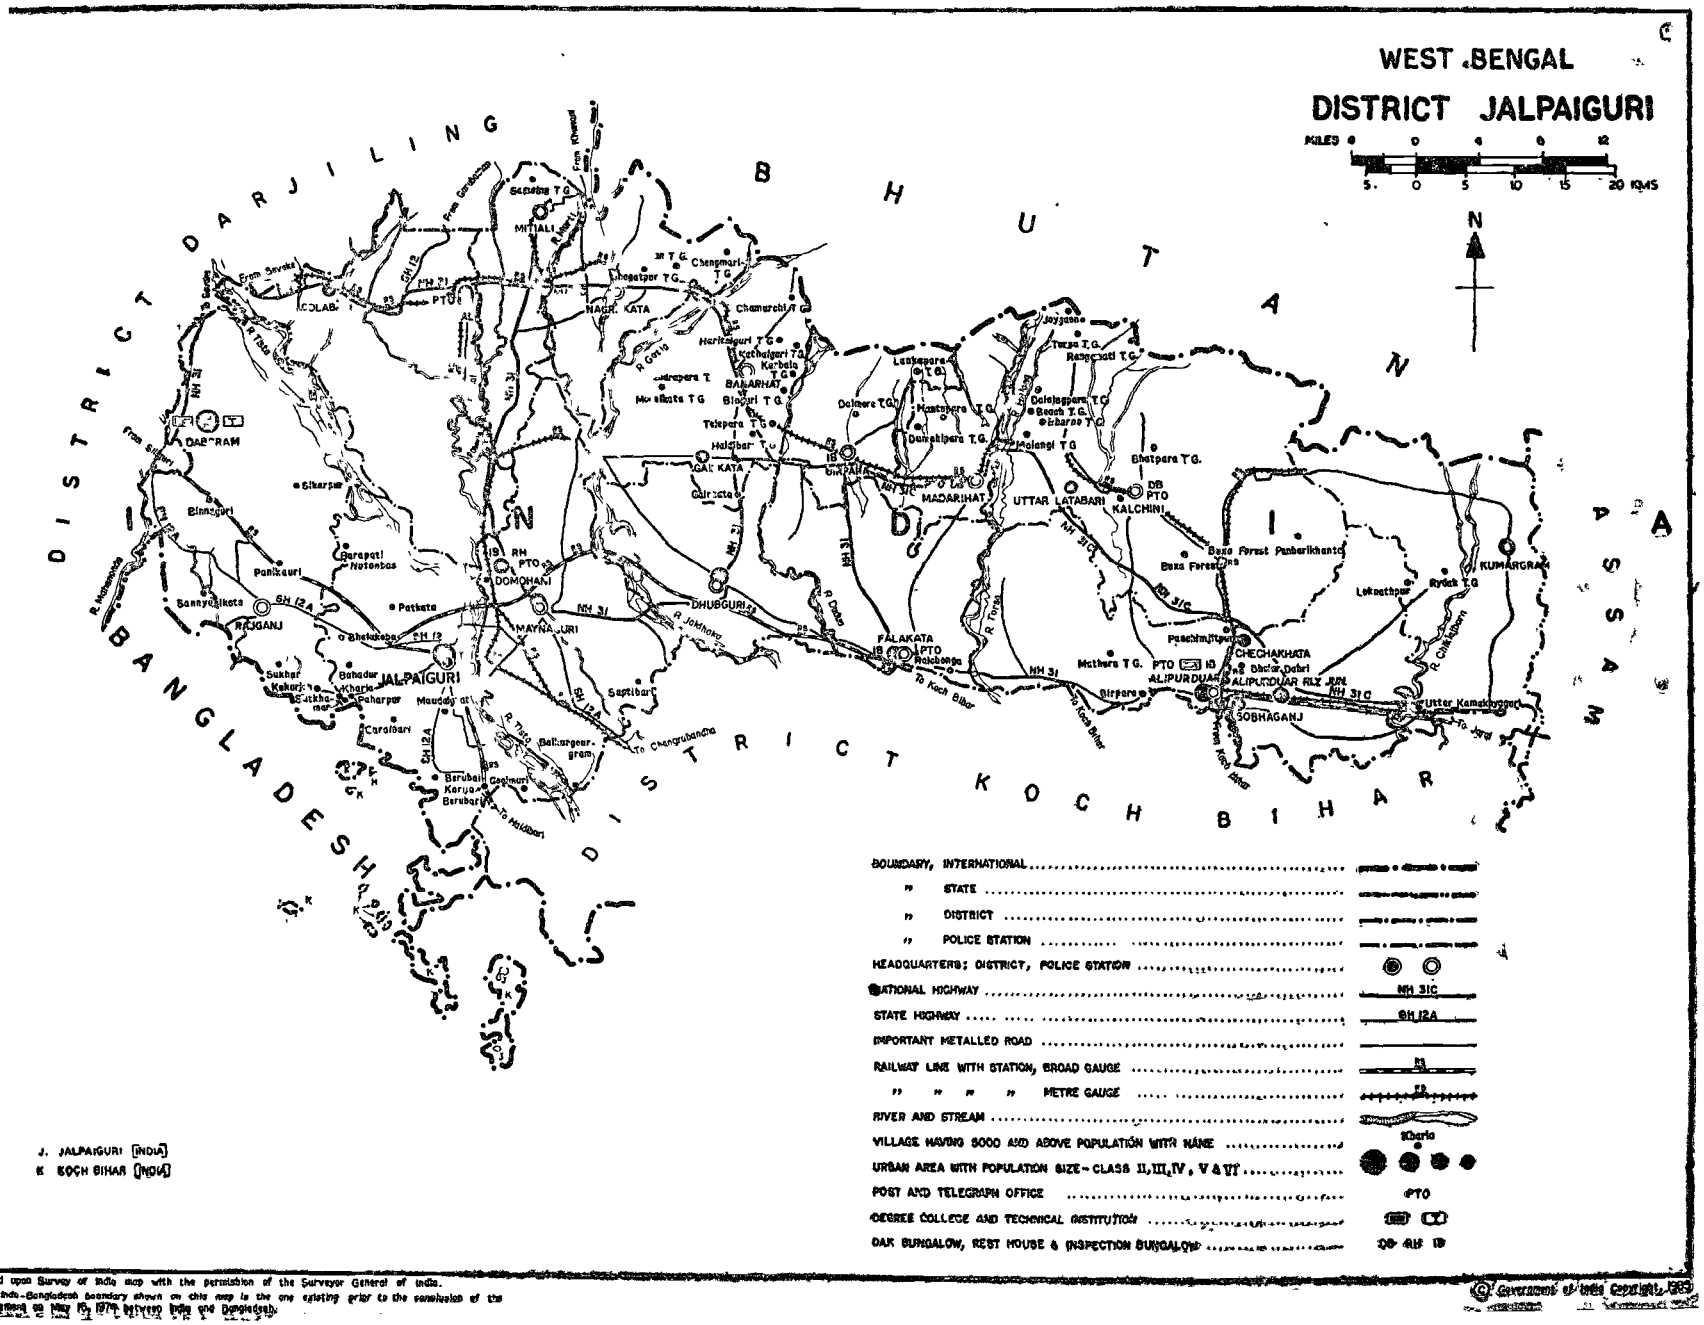

Lastly, we must express our appreciation to M/s. Mili Art Press, 36, Imdad Ali Lane, Calcutta-700 016 for the printing of this publication.

SUKUMAR SINHA
Joint Director of Census Operations,
West Bengal

Number of Towns :			291	12

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows:

(a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

(b) All other places which satisfied the following criteria :

(i) A population of 5,000 as the minimum,

(ii) Density per square kilometre would be a minimum of 400, and

(iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i.e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

CENSUS HOUSE

We defined the census houses in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use".

HOUSEHOLD

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both".

SCHEDULED CASTES/SCHEDULED TRIBES

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to

ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

LITERATES

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any mininum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

MAIN WORKER

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971, the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz. main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, services, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly..... There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration."

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industay, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons.....

participation of work that goes to augment the income of the household will only be treated as economic activity."

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main worker, are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

MARGINAL WORKER

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

NON-WORKERS

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

SCOPE OF PRIMARY CENSUS ABSTRACT

The primary Census Abstract is the basic table prepared from the total count of census. It has been presented at three levels, viz. (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations. The District Primary Census Abstract presented here corresponds the 1971 pattern and contains the following items :—Area of the police stations/towns in sq. km, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled tribes population and its division into males and females, the sex division of the literate, total male main worker and total female main worker, total male cultivators and total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers. All these information have been covered in 39 columns.

The urban/village PCA contains 28 cols. which depicted viz. occupied residential houses, number of households, population, scheduled castes population, scheduled tribes population, literates, main workers showing its four broad divisions, marginal workars and non-workers. All these data have been shown with breakdown by sex. The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and for the rest mouzawise.

The primary census abstracts of scheduled castes and scheduled tribes represent separately information such as scheduled castes and scheduled tribes population, literates, main-workers with broad categories, marginal workers and non-workers by sex breakdown of males and females covered in 31 columns.

The 1981 Census classified workers into four major categories. The first and second categories i.e. cultivators and agricultural labourers correspond the categories as follows in 1971. The third category however represents workers corresponding to category V(a) of 1971. Whereas all other remaining workers have been grouped together in category IV of 1981. This category includes the workers as categories III, IV, V(b),VI, VII, VIII and IX in 1971.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951, 1961. A large number of inset tables has been prepared on Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

TABLE 1

TABLE–1 POPULATION, NUMBER OF

Sl. No.	Name of Police Station	Population		
		Total		
		Persons	Males	Females
1	2	3	4	5
1	Rajganj	197,090	104,524	92,566
2	Jalpaiguri	266,925	139,426	127,499
3	Mal	205,644	109,074	96,570
4	Mitiali	74,649	38,738	35,911

	TOTAL	**2,214,871**	**1,159,843**	**1,055,028**

The population of the district of Jalpaiguri is spread over in 14 police stations with rural-urban break down as well as the number of villages and towns in each police station of the district are shown in *Table 1*. According to 1981 Census, the district is inhabited by 2,214,871 persons of which 311,221 live in urban areas i.e. 14.05% of the total population. The district has altogether 756 rural mouzas of which 736 (i.e. 97.35%) are inhabited. The district has 12 towns. Except the district headquarters town of Jalpaiguri and the subdivisional headquarters town of Alipurduar which are administered by the Board of Municipal Commissioners, all the other towns of the district are non-municipal urban areas.

14	Kumargram	97,211	97,211	..	119,657	119,657	..	23.09	23.09	..
	TOTAL	**1,750,159**	**1,582,079**	**168,080**	**2,214,871**	**1,903,650**	**311,221**	**26.55**	**20.33**	**85.16**

A decade ago (1971) the district was inhabited by 1,750,159 persons. Over the decade, the population of the district has increased by 464,712, i.e. 26.55 percent. The decadal increase of population in rural and urban areas of the district are 20.33 and 85.16 percent respectively. The steep increase in population in the urban sector of the district can be explained by the fact that as many as 4 new towns have since emerged during this decade. The towns are Dabgram (NM), Gairkata (NM). Odlabari (NM) and Uttar Latabari (NM). There has been a net addition of 97,911 persons in the urban areas during the decade.

In the state of West Bengal as a whole the population increased by 23.17 percent during the decade 1971-81. The rural population has shown a.steady growth of 20.36 percent in the state while the urban population have shown an increase of 31.73 percent during the period 1971-81. Among the police stations of the district, the intercensal growth of population is found highest in Rajganj police station with 53.09 percent followed chiefly by Dhubguri police station with 43.31 percent. In the rural sector of the district, Kalchini has recorded a significantly low growth rate compared to other areas of the district. The reason of such a low rate in Kalchini rural is attributable with fact that the village Uttar Latabari of 1971 has become a town in 1981 with a population of 8,667. The urban growth of Mal police station to the extent of 99.78 percent is quite significant. This rise in population of the urban sector of Mal police station is due to the reason that a Odlabari with a population of 6,887 has been declared a non-municipal town in 1981.

TABLE 3—DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Ranges of Population	No. of Villages in each range	Percentage of villages in each range
1	2	3
— 200	24	3.26
200 — 499	39	5.30
500 — 1,999	315	42.80
2,000 — 4,999	296	40.22
5,000 — 9,999	45	6.11
10,000 +	17	2.31
TOTAL	**736**	**100.00**

The variation in number of villages according to the range of population is evident from the table 3. Out of 736 inhabited villages in the district, the highest number of villages numbering 315 was 42.80 percent belong to the population range of 500-1999. It is interesting to note that there are as many as 17 villages in the district of Jalpaiguri having 10,000 or plus.

TABLE 4—DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (per sq. km)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
— 10	7	0.95
11 — 20	6	0.82
21 — 50	13	1.77
51 — 100	23	3.12
101 — 200	32	4.35
201 — 300	70	9.51
301 — 500	374	50.82
501 +	210	28.53
Not Known	1	0.13
TOTAL	**736**	**100.00**

Table 4 presents variations in density in the villages of the district. The district as a whole is a very thinly populated area. In 1981 Census the density of population per sq. km. in the rural area of the district works out to 313 per sq. km. only. The table 4 reveals that the majority of the villages (i.e. 374 in number or 50.82 percent) belong to the density range of 301-500 per sq. km. There are seven villages in the district which have a density range upto 10 only.

TABLE 5—PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Castes Population to Total Population	No. of villages in each range	Percentage of villages in each range
1	2	3
0 — 5	108	16.39
6 — 10	74	11.23
11 — 15	57	8.65
16 — 20	27	4.10
21 — 30	47	7.13
31 and above	346	52.50
TOTAL	**659**	**100.00**

Table 5 gives the proportion of scheduled caste to total population at villages of the district of Jalpaiguri. Out of 736 inhabited villages of the district, the scheduled caste population have been found as many as in 659 villages. Among those villages 346 villages have scheduled caste population to the extent of 31 percent and above whereas the scheduled caste population to the extent of 5 percent are found in 108 villages of the district.

TABLE 6—PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Tribe Population to Total Population	No. of villages in each range	Percentage of villages in each range
1	2	3
0 — 5	152	24.63
6 — 15	110	17.83
16 — 25	66	10.70
26 — 35	47	7.62
36 — 50	73	11.83
51 and above	169	27.39
Total	**617**	**100.00**

An account of the scheduled tribe population in the villages of Jalpaiguri district is available in table 6. The scheduled tribe population are found in six hundred seventeen villages of the district. In majority of the villages (i.e. 169 or 27.39 percent), the scheduled tribe population accounts for 51 percent and above. The second largest number of villages (i.e. 152 or 24.63%) have scheduled tribe population in the percentage range upto 5 only. Rest of the villages have scheduled tribe population between 6-50%.

TABLE 7—PROPORTION OF SCHEDULED CASTES/SCHEDULED TRIBES POPULATION IN TOWNS

Sl. No.	Name of the Town	Total Population	Total Scheduled Castes Population	Total Scheduled Tribes Population	Percentage of Scheduled Castes Population to Total Population	Percentage of Scheduled Tribes Population to Total Population
1	2	3	4	5	6	7
1	Alipurduar	48,605	5,369	157	11.05	0.32
2	Alipurduar Rly. Junc.	22,968	3,006	560	13.09	2.44
3	Dabgram	76,402	18,710	979	24.49	1.28
4	Dhupguri	23,098	6,560	20	28.40	0.09
5	Domohani	10,339	6,113	98	59.13	0.95
6	Falakata	11,998	1,802	79	15.02	0.66
7	Gairkata	5,955	1,366	777	22.94	13.05
8	Jalpaiguri	61,743	8,440	567	13.67	0.92
9	Maynaguri	19,568	6,145	67	31.40	0.34
10	Mal	14,991	635	583	4.24	3.89
11	Odlabari	6,887	777	661	11.28	9.60
12	Uttar Latabari	8,667	856	1,004	9.88	11.58
	All Towns	**311,221**	**59,779**	**5,552**	**19.21**	**1.78**

Table 7 deals with the proportion of scheduled caste and scheduled tribe population in towns.

The scheduled caste and scheduled tribe population inhabiting the 12 towns of the district of Jalpaiguri comprise 19.21 percent and 1.78 percent respectively. These percentages are much above the state average in these regards. In the state of West Bengal for instance, 10.31 percent of the total urban population is scheduled caste and 0.80 percent the scheduled tribe. Amongst the towns of the district of Jalpaiguri, highest concentration of scheduled castes i.e. 59.13% is found in Domohani town whereas Goirkata town has the highest concentration of scheduled tribe population in the district. The scheduled tribe population comprises 13.05 percent of the total population of the town.

TABLE 8—LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of Population	No. of villages in each range	Literacy rate
1	2	3
— 200	24	24.07
200 — 499	39	18.77
500 —1,999	315	22.25
2,000 —4,999	296	23.67
5,000 —9,999	45	24.98
10,000 +	17	28.53
Total	**736**	**24.28**

Table 8 shows the rate of literacy by population ranges of villages in the district. In the rural area of the district 24.28 percent of the population are literates. This is much below the state rural average of 33.12 percent. The highest rate of literacy is observed in the villages having population more than 10,000 plus. The small villages with a population less 200 are not far behind the district rural average with regard to the rate of literacy. 24.07 percent of the population of the villages with less than 200 inhabitants are literates in the district. The lowest rate (18.77%) in connection with literacy has been recorded among the population living in the villages 200-499.

TABLE 9—LITERACY RATES FOR TOWN

Sl. No.	Name of the Town	Literacy Rate
1	2	3
1	Alipurduar	67.26
2	Alipurduar Railway Junction	73.18
3	Dabgram	50.48
4	Dhupguri	52.55
5	Domohani	35.40
6	Falakata	57.29
7	Gairkata	51.17
8	Jalpaiguri	67.94
9	Maynaguri	58.76
10	Mal	64.23
11	Odlabari	47.05
12	Uttar Latabari	52.53
	All Towns	**59.17**

The literacy rate in respect of each town of the district can be seen from table 9. The literates form 59.17 percent in the urban sector of the district. In the state as a whole, the urban rates of literacy is 62.66 percent.

Amongst the towns, Alipurduar Railway Junction has recorded a highest literacy figure in the district where 73.18 percent are literates. Jalpaiguri, the headquarters town of the district has the literate population to the extent of 67.94 percent. Every where else in the district except for towns viz. Alipurduar, Alipurduar Railway Junction, Jalpaiguri and Mal, literacy rate is below the district average.
