MOTIF

Banana the fruit for all (rich or poor) is grown on almost half the fruit-growing area of Jalgaon district. This area is almost three-fourth of the total area under banana plantation in Maharashtra. In terms of money, more than one-fourth income of the agricultural products of the district, is from banana. Large quantities of Jalgaon banana are exported not only to various states but also outside India, earning thereby valuable foreign exchange to the country. This achievement, in the adverse climatic conditions unsuitable for banana, is highly creditable to the hard-working people of the district.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/ centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head-quarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi:
Dated the 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay:
Dated 26th January 1984 (Republic Day)

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add up to the corresponding figures shown against the district.

APPENDIX 1 TO SUMMARY TABLE 1

Tahsilwise number of Villages with populations of 5,000 or over and of Towns with populations under 5,000

(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with populations of 5,000 or over			Towns with populations under 5,000

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts, Part A related to the village and town directory, Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other States in India), only Part A and Part B of the district census handbook were published, Part C altogether had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health sub-centres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

Obscurity shrouds the early history of the region now known as Jalgaon. In fact it is the eastern part of erstwhile Khandesh. Khandesh by itself was known as Raika. In 10–12th century A.D. it constituted a part of Saunadesa under the Yadavas and later with the advent of Muslims it came to be known as Khandesh—the country of Khans.

Khandesh district as of 1905, with its headquarters at Dhule, included the present area of Jalgaon district. However, the district was divided into East Khandesh and West Khandesh in 1906 for administrative purposes. Following tahsils were separated from Khandesh district to constitute East Khandesh with headquarters at Jalgaon:—

(*i*) Amalner
(*ii*) Parola Peta
(*iii*) Bhusawal
(*iv*) Edlabad Peta
(*v*) Chalisgaon
(*vi*) Chopda
(*vii*) Erandol
(*viii*) Jalgaon
(*ix*) Jamner
(*x*) Pachora
(*xi*) Bhadgaon Peta
(*xii*) Raver
(*xiii*) Yawal

In 1917, Parola Peta was upgraded as tahsil. Subsequently Edlabad Peta and Bhadgaon Peta were also elevated to tahsil status. In 1950, thirteen villages of Chalisgaon tahsil were transferred to Aurangabad district. The 1956 re-organisation of States resulted in the inclusion of the district in Bombay State and subsequently in 1960 it became a part of Maharashtra State. Soon after in 1961, the name of the district was changed into ' Jalgaon District '. (Similarly, West Khandesh was renamed as Dhulia—presently known as ' Dhule District ').

Though the number of tahsils in the Jalgaon district remains at 13 as in 1961, the number of inhabited villages has risen from 1,435 to 1,475 in 1981. In fact no jurisdictional changes have occurred in the district boundary since 1961, but at the same time during this period hamlets which so far were annexed to main villages have been separated and granted independent entity; resulting in the increase of villages by 40. There are 27 uninhabited villages in the district. About 16 towns of 1951 census were declassified in 1961, bringing down the total number of towns to 14. With the declaration of Varangaon as a census town in 1971, the number of towns in the district has risen to 15. There is no further increase in number of towns for 1981 census.

Location, Relief and Drainage

Jalgaon lies between 20° and 21° north latitude and 74° 55′ and 76° 28′ east longitude. On its location in the upper Tapi basin, it forms a distinct topographical unit separated from neighbouring Madhya Pradesh State by Satpudas and from the south by Satmala hill range. An arc of Sahyadris stretches in the easterly direction. From east to west river Tapi passes through the district with a deep cut-up bed and black soil fertile plains along its banks.

The district is bordered in the north by the boundaries of Madhya Pradesh and in the south it is contiguous with the periphery of Aurangabad district. Limits of Madhya Pradesh again together with Buldana district fall in its east and Nashik and Dhule districts constitute its western borders.

The hill ranges in the district comprise of Satpudas in the north, Satmala—an off shoot of Sahyadris in the south and the west, and Hatti in the south-east. Satpudas running from east to west cover the northern tahsils of the district. Hills of considerable heights are found in this range and some are about 2,000 feet high. Pancha Pandu and Mondhimal with above 3,000 feet height rise in the east. For about 30 kms through the south-east corner of Jalgaon, the Hatti hills bound the Purna valley on the east and run in the direction of north-west and south-east. Satmala sharply breaking off the Sahyadris in the north-west of Nashik covers the southern part of the district over a distance of about 120 kms. It almost works as a wall boundary between Jalgaon and South. Each of the main hillranges (Satpudas and Satmala) has some vertical spurs at many places. They are of great height and length with bare rounded sides and flat tops.

The major river of the district is Tapi with a course of about 125 kms passing through the district. The valley of the Tapi is flat and after every kilometre or so, a village is found on its banks. Bhokar, Suki, Mora, Harki, Manki and Guli from the north and Purna, Bhogavati, Vaghur, Girna and Bori from the south reinforce Tapi during its course through the district. The rivers flowing from the north owe their origin to Satpudas. They are small and of little use for irrigation purposes. They, however, have a peculiarity in as much as before joining Tapi, their streams are of perennial character. The streams flowing from the south emanate from Sahyadris save Purna and Vaghur. They drain much wider tracts. Before reaching near Jalgaon town Girna flows north-east and then takes a turn towards north and later north-west and gets lost in Tapi near Nanded. The waters of this river are used for irrigation purposes, in large quantities. River Bori negotiates a course of about 50 kms through the district and joins Tapi about 30 kms below Girna. Its waters too are used for irrigation purposes.

Climate

Being far away from the coastal tracts there are large variations in the day and night temperatures in the district. The climate is generally dry except in monsoon. Summer is the driest part of the year. The year may be divided into four seasons. The cold season from December to February is followed by the hot one from March to May. Monsoon season lasts from June to September. October and November form the post-monsoon season. Within the district there are variations. The forests, to some extent, temper the heat in the Satpudas. But below the Satpudas, the Tapi valley is the hottest part of the district. To the south of Tapi plains the summer is a little cooler.

December is the coldest month with the mean daily minimum temperature at 11.9° C, and the mean daily maximum temperature at 29.8° C. Sometimes the cold waves of northern India affect the district resulting in the fall of minimum temperature to within two degrees of the freezing point of the water and slight frost may also occur. Temperatures begin to rise gradually from the beginning of March and by May, the hottest month of the year, the mean daily maximum temperature touches 42.5° C. Temperatures drop appreciably with the onset of monsoon after the first week of June. The monsoon period is generally pleasant. Withdrawal of monsoon by the end of September results in steady rise in day temperature. Day and night temperatures drop rapidly by November.

The avearage annual rainfall in the district is 740.7 mm. About 87 per cent of the annual rainfall is received during the monsoon months from June to September. July is the month with the highest rainfall. The central parts of the district comprising the tahsils of Jalgaon, Bhusawal, Jamner and Pachora get a little more rain than the rest of the district. Jamner receives the highest rainfall of 862 mm. Against this Amalner receives the least of 675 mm.

Soil

Deep black, medium black, forest, loam and sandy are the soils found in the district. The deep black soil is observed in the northern parts of Amalner, Erandol, Jalgaon, Bhusawal and Edlabad tahsils. Medium black soil is found in the southern parts of Yawal, Raver and Chopda tahsils. The soils of Erandol, Chalisgaon, Amalner, Bhusawal, Jalgaon and Bhadgaon tahsils also, to a large extent, belong to this type. Forest soils cover more than half of northern portion of Raver, Yawal and Chopda tahsils. Loam soils are found in the southern parts of Amalner, Erandol, Jalgaon, Bhusawal and Edlabad tahsils. Sandy soil is observed on the slopes of Satpuda and near southern hillocks in Chalisgaon, Pachora, Jamner, Bhusawal, Parola, Erandol and Bhadgaon tahsils.

Census Houses and Households

The total number of occupied residential houses together with number of households as returned at the 1981 census are given in columns 4 and 5 of the primary census abstract. In Indian census a ' census house ' is a building or a part thereof with a main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant, residential or non-residential or both. As regards the household; it is a group of persons living together and eating from a common kitchen, unless the exigencies of work prevent them from doing so. The members of the household may or may not be related by blood or else it can be a mix of both. There may be single member or more than one member household(s). However, the households or unrelated persons are known as " Institutional Households ". They comprise boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams

etc. There is yet another concept i.e. houseless population or houseless households. They comprise of persons who do not have a fixed place of residence. They move from place to place, camp at night at their own choosing or else live on streets, pavements, gardens or just in open places.

In the district there are 472389 occupied residential houses and 478,415 households. This shows that some of the residential houses are shared by more than one household also. Keeping in view the population of the district returned at 2,618,274 persons, the average size of the household works out to 5.5 persons which is slightly higher than the State average size of 5.4 persons per household.

Distribution of Population in Rural and Urban Areas

The 1981 census has returned the population of the Jalgaon district at 2,618,274 persons comprising of 1,342,963 males and 1,275,311 females. Compared with the State population of 62,784,171 persons, the district population constitutes 4.17 per cent of the same. The rural-urban differentials reveal that 1,960,017 (74.86%) persons live in the country side and another 658,257 (25.14%) persons live in the urban areas of the district. The corresponding differentials for the State have been recorded at 64.97 per cent and 35.03 per respectively. This shows that proportionately the district is less urban than the State as a whole. Further, the district has an area of 11,765 km^2 and constitutes 3. 82 per cent of the area of the State.

From amongst the 13 tahsils of the district, Jalgaon is the most populous one with 302,384 population and Edlabad the least with 93,257 persons (Table1).

TABLE 1

Population, number of villages and towns, 1981

Serial No.	Name of tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	In-habited	
		P	M	F	P	M	F	P	M	F			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)

13	Amalner ..	225,408	115,108	110,300	157,892	80,138	77,754	67,516	34,970	32,546	154	154	1
	District Total ..	2,618,274	1,342,963	1,275,311	1,960,017	1,001,694	958,323	658,257	341,269	316,988	1,502	1,475	15

The remaining tahsils in order of their population are: Bhusawal (294,174); Chalisgaon (251,044); Erandol (228,905); Amalner (225,408); Raver (209,091); Jamner (200,976); Yawal (197,152); Chopda (195,586); Pachora (182,855); Parola (125,102) and Bhadgaon (112,340).

The figures in Table 1 also reveal that Bhusawal tahsil has the largest urban population (158,695) in the district. Moreove, its urban population outnumbers its rural population (135,479). Second largest urban population is observed in Jalgaon tahsil (145,335). There are, however, three tahsils viz. Edlabad, Jamner and Bhadgaon as have no urban population at all.

In the rural areas of the country the basic administrative unit is a ' revenue village '. It is a unit with statutory recognised and defined boundaries and independent land records. It can be both inhabited and uninhabited. Against this, the urban areas are specifically defined for purposes of census. The criteria laid down for an urban area at 1981 census is:—

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria:—

(*i*) A minimum population of 5,000;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities;

(*iii*) A population of at least 400 persons per km^2.

Out of 1,502 villages in the district, the inhabited ones number 1,475 with a population of 1,960,017 persons. Thus the rural population constitutes 74.86 per cent of the total population of the district. Against this, in the 15 urban centres, the population has been

returned at 658,257 persons working out to 25·14 per cent of the population of the district—lower than the State average of 35.03 per cent.

Size Class and Status of Towns

To make a comprehensive analysis of varied demographic characteristics, towns have been divided into the following six categories by virtue of their population:—

Class I	..	100,000 and above
Class II	..	50,000 to 99,999
Class III	..	20,000 to 49,999
Class IV	..	10,000 to 19,999
Class V	..	5,000 to 9,999
Class VI	..	Below 5,000

In the light of the above classification, of the 15 towns in the district, there are 2 each that qualify as Class I and Class II towns. The Class I towns are Jalgaon and Bhusawal and the Class II are Chalisgaon and Amalner. Largest number of towns i.e. 8 qualify as Class III towns. They are Chopda, Yawal, Raver, Varangaon, Pachora, Parola, Dharangaon and Erandol. There are however 2 towns viz. Savda and Faizpur as are Class IV towns and one town namely Kandari is a Class V town. There is no Class VI town in the district. It may be added that during 1971-81 no village has qualified to be declared as a town nor has any town been declassified (Table 2).

TABLE 2

New Towns/Towns declassified in 1981 Census

Name of the towns (1)	Population 1981 census (2)
(*a*) Added—Nil	Nil
(*b*) Declassified—Nil	Nil

Urban Agglomeration

As in 1971 the concept of urban agglomeration has been adopted for 1981 census too. An urban agglomeration may constitute;

(*a*) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of adjoining village or villages);

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (*a*), or

(*c*) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In Jalgaon district, there is only one urban agglomeration i.e., Bhusawal urban agglomeration and its constituent units are:

(*a*) Bhusawal City (M),

(*b*) Kandari.

Standard Urban Area

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are:

(*i*) It should have a core town of a minimum population of 50,000;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constitutent units of Amalner, Bhusawal and Jalgaon standard urban areas in Jalgaon district are as follows:—

Amalner SUA ..	Urban Components: 1. Amalner (M). Rural Components: 1. Devgaon, 2. Devali, 3. Amalner (R), 4. Hedave, 5. Mangarul, 6. Hingone Kh. Pr. Amalner.
Bhusawal SUA..	Urban Components: 1. Bhusawal City (M), 2. Kandari. Rural Components: Nil.
Jalgaon SUA ..	Urban Components: 1. Jalgaon City (M). Rural Components: 1. Pimprale, 2. Mehrun.

TABLE 3

Distribution of inhabited villages by population ranges

Range of population (1)	No. of villages in each range (2)	Percentages of villages in each range (3)
—200 ..	91	6.17
200—499 ..	314	21.29
500—1,999 ..	824	55.86
2,000—4,999 ..	193	13.09
5,000—9,999 ..	41	2.78
10,000+ ..	12	0.81
All ranges ..	1,475	100.00

As would be seen from Table 3 from amongst 1,475 inhabited villages in the district the largest number i.e. 824 (55.86%) have a population between 500—1,999, 314 villages the second largest group constituting 21.29 per cent of the total villages fall in the population range of 200—499. Numerically the third rank is occupied by 193 villages (13.09%) in the population range of 2 000—4,999. There are, however, 91 villages as have less than 200 population against 12 having more than 10,000 population. The remaining 41 villages fall in the range of 5,000—9,999.

For purposes of further elucidation villages may be grouped as : small (less than 500), medium (500–1,999), large (2,000–4,999) and exceptionally large (5,000+). Accordingly, there are 405 small size, 824 medium size, 193 large size and 53 exceptionally large size villages in the district.

Population Growth, Density and Sex Ratio

The population of the district as recorded at 1981 census stands at 2,618,274 persons against 2,123,121 persons returned at 1971. Over the years the population has registered a net increase of 495,153 persons. Thus a decadal increase of 23.32 per cent is discernible. This rate of increase though higher than that recorded in earlier decades, is lower than the State growth rate of 24. 54 per cent during the same period. During 1911–21, the district registered the lowest growth rate of 4.04 per cent. The lowest growth may be due to the influenza epidemic that broke out in the district in 1918-19 and took a heavy toll of life. During 1921–31, the growth rate increased to 12.02 per cent. It declined during 1931–51 to some extent. But again during 1951–61, growth rate registered a record increase from 11.46 per cent to 19.96 per cent say an increase by 8.5 points. Between 1961–71 and 1971–81 increase in the rate of growth has been marginal (from 19.96% to 20.29%) in the former case but somewhat substantial (from 20.29% to 23.32%) in the latter.

Within the district, Bhadgaon tahsil gives out the highest growth rate (34.83%) followed by Jalgaon tahsil (28.99%). Other tahsils revealing higher growth rate than the district are : Erandol (27.46%), Chopda (26.80%), Chalisgaon (24.78%) and Parola (23.36%). The remaining tahsils have, however, registered a growth rate lower than the district (Table 4).

TABLE 4

Decadal change in distribution of population

Name of tahsil	Population						Percentage Decadal (1971-81) Variation		
	1971			1981

N.A. = Not Available.

As would be seen from Table 5, the urban population constituted 31.77 per cent of the district population in 1951. The same came down to 22.50 per cent in 1961. This fall in proportion of urban population to total population of the district is due to the declassification of following towns in 1961 : (*i*) Adawad, (*ii*) Chahardi, (*iii*) Bhalod, (*iv*) Nhavi, (*v*) Kasoda, (*vi*) Asoda, (*vii*) Nashirabad, (*viii*) Bodwad, (*ix*) Varangaon, (*x*) Bhadgaon, (*xi*) Lohare, (*xii*) Nagardevale, (*xiii*) Pimpalgaon Bk., (*xiv*) Jamner, (*xv*) Pahur and (*xvi*) Shendurni. During the succeeding decades of 1961-71 and 1971-81, the proportions of urban population to total population

of the district have been found at 23.65 per cent and 25.14 per cent respectively. At the State level the proportion of urban population to total population during 1951-61 has also given out a fall though not of much significance. The same has declined from 28.75 per cent of 1951 to 28.22 per cent in 1961. This fall in proportions can safely be attributed to declassification of number of towns in 1961. During the subsequent decades of 1961-71 and 1971-81 the proportions have been found at 31.17 per cent and 35.03 per cent respectively.

2,618,274 persons, returned as the population of the district at 1981 census, are spread over an area of 11,765 km². The density of population thus works out to 223 persons per km². This is obviously higher than the State density of 204 persons per km². From amongst the various tahsils of the district Jalgaon tahsil has the highest density of 366 persons per km² followed by Bhusawal with 354 per km². Other tahsils having higher than the district density are Amalner (257), Erandol (235) and Bhadgaon (231). There are, however, two tahsils viz. Raver and Pachora as have the same density as found for the district. The least dense tahsil is Edlabad with 144 persons per km². Other tahsils with lower than the district density are : Chopda (205), Chalisgaon (206), Yawal (207), Parola (158) and Jamner (148).

Down at the village level we see in Table 6, 470 villages (31.87%) in the district which have the density of 101–200 persons per km². The second largest number of villages i.e. 307 (20.81%) fall in the density range of 201–300 persons per km². 12(0.81%) villages are such which have the density of 10 or less than 10 persons per km². The remaining group of villages viz. 14,80,246,198 and 110 fall respectively in the density ranges of 11–20, 21–50, 51–100, 301–500 and more than 501 persons per km². The density in respect of 38 unaccounted villages could not be worked out for want of area figures of the villages.

TABLE 6

Distribution of villages by density

Range of Density (per km²) 1	Total no. of villages in each density range 2	Percentage of villages in each density range 3
—10	12	0.81
11—20	14	0.95
21—50	80	5.42
51—100	246	16.68
101—200	470	31.87
201—300	307	20.81
301—500	198	13.42
501 + ...	110	7.46
Not known ..	38	2.58
All density ranges ..	1,475	100.00

As regards the urban areas of the district, it is consistently increasing over the decades. During 1981, census the highest density of the order of 11,683 persons per km² has been found in Jalgaon town, Pachora town ranks second with 11,478 persons per km². There is yet another town namely Raver with more than 10,000 persons per km². The remaining towns have less than 10,000 persons per km² and the least dense town is Yawal with 628 persons per km² (Statement I).

Sex-ratio defined as number of females per 1,000 males stands at 950 in respect of the district as returned in 1981. The ratio is higher than the State ratio of 937. This could be due to male selective migration to neighbouring industrial district of Nashik and even to Greater Bombay. The following table shows the fluctuations in the sex-ratio in the district since 1901 :—

TABLE 6 (*i*)

Sex-Ratio, 1901–1981

Year 1	District 2	State 3
1901 ..	975	978
1911 ..	983	966
1921 ..	971	950
1931 ..	968	947
1941 ..	970	949
1951 ..	971	941
1961 ..	957	936
1971 ..	948	930
1981 ..	950	937

As would be seen from the above table, except for 1901, the district has all along returned a higher sex-ratio than that of the State. Looking at the fluctuations from census to census, it is seen that the sex-ratio, has shown variations from 983 to 948. In case of the State, the variation is between 978 and 930.

Down at the tahsil level we see from the following table that every where males outnumber the females. Jalgaon tahsil has the lowest proportion of 921 females to 1,000 males; followed by Bhusawal where there are 926 females per 1,000 males :—

TABLE 6 (*ii*)

Sex-Ratio by Tahsils, 1981

District/Tahsil	Females per 1,000 males,
Jalgaon District	950
Jalgaon tahsil	921
Chopda tahsil	972
Yawal tahsil	958
Raver tahsil	953
Edlabad tahsil	967
Bhusawal tahsil	926
Jamner tahsil	953
Pachora tahsil	954
Chalisgaon tahsil	941
Bhadgaon tahsil	960
Parola tahsil	964
Erandol tahsil	965
Amalner tahsil	958

As regards the rural-urban differentials in sex ratio, males at all the levels outnumber the females. Over the years since 1951 the sex ratio in urban population has gradually been showing a declining trend. From 944 females per 1,000 males in 1951 the same had decreased to 917 in 1971. However, 1981 has revealed an upward trend with 929 females to 1,000 males. At the State level it has declined from 807 of 1951 to 801 in 1961. After 1961 it has shown an upward trend with 820 and 850 females per 1,000 males in 1971 and 1981 censuses respectively.

Scheduled Castes and Scheduled Tribes

Scheduled castes and scheduled tribes are two such sections of Indian society as are socially, culturally and economically backward since antiquity. One of the paramount tasks that the popular government took up immediately after getting rid of the British yoke was the uplift of these two sections; so much so the guarantee of their development was enshrined even in the Constitution. Ever since 1961, census organisation at each census has been collecting the data with regard to socio-economic, cultural and demographic characteristics of the members of these communities so that the agencies detailed to effect the development have the information available to plan the same systematically. In fact, there is no standard definition for a scheduled caste or a scheduled tribe. Scheduled castes comprise of such of the castes as are declared so by the President of India by a public notification under article 341(*i*) of the Indian Constitution. Likewise scheduled tribes include the tribes as are declared so by the President of India under article 342(*i*) of the Constitution. The number and names of scheduled castes and scheduled tribes vary from State to State. In Maharashtra State, there are 59 castes and 47 tribes which have respectively been declared as scheduled castes and scheduled tribes. The list of scheduled castes and scheduled tribes in the state is given below:—

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellaminalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holar, Holcya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldane, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi,
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.

18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna.
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

The scheduled caste population of the district as returned at 1981 census stands at 154,227 persons constituting 5.89 per cent of the total population of the district. A major chunk i.e. 117,700 (three-fourth of total scheduled castes) persons live in the countryside and the remaining 36,527 (one-fourth) live in the urban areas of the district. Since 1961, the scheduled caste population in the district has been increasing steadily. It increased from 3.47 per cent in 1961 to 4.13 per cent in 1971 and subsequently to 5.89 per cent in 1981.

Out of 1,475 inhabited villages in the district, there are 241 (16.34%) with no scheduled caste population at all. 669 (45.35%) villages have 5 or less than 5 per cent scheduled caste population. 319 (21.63%) villages have such population between 6—10 per cent. Group of villages viz. 160, 45, 29 and 12 villages have such population between 11—15, 16—20, 21—30 and above 31 per cent respectively (Table 7).

TABLE 7

Proportion of scheduled caste population to total population in the villages

Percentage range of scheduled caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S.C. Population ..	241	16.34
—5 ..	669	45.35
6—10 ..	319	21.63
11—15 ..	160	10.85
16—20 ..	45	3.05
21—30 ..	29	1.97
31+ ..	12	0.81
All ranges ..	1,475	100.00

The following table shows the proportion of scheduled caste and scheduled tribe population in various tahsils of the district for 1971 and 1981:—

TABLE 7 (*i*)

Scheduled caste and scheduled tribe population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Jalgaon district ..	**4.13**	**5.89**	**5.89**	**8.25**
Jalgaon tahsil ..	3.75	5.01	2.96	4.65
Chopda tahsil ..	3.39	5.69	9.47	16.08
Yawal tahsil ..	3.49	5.27	8.08	11.88
Raver tahsil ..	4.28	8.20	7.55	9.72
Edlabad tahsil ..	4.35	6.09	2.30	5.81
Bhusawal tahsil ..	4.23	5.39	2.77	3.13
Jamner tahsil ..	3.58	3.95	4.40	7.24
Pachora tahsil ..	4.08	5.12	4.75	6.71
Chalisgaon tahsil ..	5.80	7.57	6.76	8.32
Bhadgaon tahsil ..	4.56	7.57	8.05	10.35
Parola tahsil ..	3.55	5.23	8.25	9.57
Erandol tahsil ..	3.43	5.20	6.80	8.76
Amalner tahsil ..	4.97	6.93	6.81	9.19

The scheduled tribe population in the district is more than the scheduled caste population. While the former number 154,227 persons constituting 5.89 per cent of the total population, the population of the latter has been returned at 216,009 persons working out to 8.25 per cent of the total population of the district. 90.70 per cent of the scheduled tribe population has been found in the rural areas and 9.30 per cent in the urban areas. Against this 76.32 per cent of the scheduled caste population has been found in the countryside and the remaining 23.68 per cent in the urban sector. This leads to the conclusion that scheduled tribe people prefer rural environment to the urban one. Their crude and conservative traits are commensurate with the rural atmosphere. The population of this community has increasedfrom 5.89 per cent in 1971 to 8.25 per cent in 1981 mainly due to the removal of area restrictions

for recognising the tribal population as scheduled tribe in the state. The highest concentration of the order of 16.08 per cent has been found in Chopda tahsil which is hilly area on the Madhya Pradesh border. The second largest proportion to the level of 11.88 per cent has been observed in Yawal tahsil, again a partly hilly tahsil touching Madhya Pradesh borders in the north. The proportions in the remaining tahsils vary between 10.35 per cent and 3.13 per cent.

TABLE 8

Proportion of scheduled tribe population to total population in the villages

Percentage range of scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S.T. Population ..	144	9.76
—5 ..	396	26.85
6—15 ..	509	34.51
16—25 ..	187	12.68
26—35 ..	76	5.15
36—50 ..	58	3.93
51 + ..	105	7.12
All ranges ..	1,475	100.00

As would be seen from Table 8 there are 144 (9.76% villages in the district which have no scheduled tribe population at all. Majority of the villages i.e. 509 (34.51% have between 6—15 per cent whereas 396 (26.85% villages have 5 or less than 5 per cent of such population. The remaining 187, 76, 58 and 105 villages fall in the percentage ranges of 16—25, 26—35, 36—50 and more than 51 per cent respectively.

As regards the dispersal of scheduled caste and scheduled tribe population in the urban areas of the district, the highest proportion of scheduled caste population of the order of 7.13 per cent has been found in Kandari town. Against this the highest proportion of scheduled tribe population to the tune of 5.49 per cent has been observed in Faizpur town. Savda town has the lowest scheduled caste population (3.41%) and the least scheduled tribe population (2.09%) has been returned by Yawal town. Detailed townwise distribution of scheduled caste and scheduled tribe population can be had from Table 9.

TABLE 9

Proportion of scheduled castes/scheduled tribes population in towns

All towns ..	658,257	36,527	20,088	5.55	3.05

Literacy

In census a literate person has been defined as one who can read and write with understanding in any language. It is not necessary that one should have received formal education. 48.14 per cent is the literacy rate returned for the district at 1981 census. Though higher than the State average of 47.18 per cent yet the district ranks 8th when compared with other districts of the State. The male and female literacy rates have been returned at 61.19 per cent and 34.39 per cent respectively against the corresponding State rates of 58.79 per cent and 34.79 per cent.

From amongst the various tahsils of the district, Bhusawal leads in the field of literacy. It has the highest literacy rate of 59.36 per cent followed by Jalgaon with 56.49 per cent. With respect to other tahsils the same ranges between 40.10 per cent and 51.62 per cent.

TABLE 10

Literacy rates by population ranges of villages

Range of population 1		No. of villages in each range 2	Literacy rate 3
—200	..	91	24.89
200—499	..	314	34.86
500—1,999	..	824	41.14
2,000—4,999	..	193	46.42
5,000—9,999	..	41	51.12
10,000+	..	12	51.21
All ranges	..	1,475	44.37

As is clear from Table 10, there are 824 villages in the district with a population between 500—1,999. These villages have returned the rate of literacy at 41.14 per cent. Another 193 villages in the population range of 2,000—4,999 have a literacy rate of 46.42 per cent. 91 villages with less than 200 population each have the literacy rate of only 24.89 per cent. The remaining 314, 41 and 12 villages in the population ranges of 200—499, 5,000—9,999 and 10,000+ have the literacy rate of 34.86 per cent, 51.12 per cent and 51.21 per cent respectively. This shows that size of the village and literacy are positively correlated.

There are 15 towns in the district and Bhusawal town has returned the highest literacy rate of 65.82 per cent. Jalgaon ranks second with 64.26 per cent. Literacy rate for Raver town is the lowest i.e. 48.80 per cent. In the case of remaining towns it ranges between 49.38 per cent and 62.38 per cent (Table 11).

TABLE 11

The progress of literacy since 1901 has been appreciable. The following table reveals the progress in literacy during the last 80 years :—

TABLE 11 (*i*)

Progress of Literacy, 1901–81

Year 1		Total 2	Males 3	Females 4
1901	..	5.01	9.70	0.20
1911	..	4.86	9.32	0.32
1921	..	6.91	12.93	0.72
1931	..	9.16	17.01	1.05
1941	..	20.11	33.97	5.88
1951	..	28.15	43.82	11.83
1961	..	34.01	49.32	18.02
1971	..	45.24	58.44	31.32
1981	..	48.14	61.19	34.39

As would be seen from the above table, the literacy in the district has achieved more than nine-fold increase. The male literacy has increased from 9.70 per cent to 61.19 per cent during the last eighty years. The female literacy has also appreciably increased i.e. from 0.20 per cent to 34.39 per cent during 1901 to 1981. A major leap in case of both male and female literacy is discernible at 1941 census, i.e. during the decade of 1931–41 the overall literacy improved by two-folds, the male literacy also by two-folds while the female literacy improved by five times. Again during 1961–71, the literacy on the whole has increased by more than 11 points, the male literacy has gone up by more than 9 points and the female literacy by over 13 points. The increase between 1971–81 has been almost steady. The leaps in literacy since 1941 may be due to the implementation of the scheme of compulsory primary education and the extension of educational facilities during the development plans.

Like male-female differentials, there exists disparity in the literacy rates of rural and urban areas. As against 44.37 per cent of literates in rural areas as per 1981 census, there are 59.37 per cent literates in urban areas of the district. Between the two sexes, the differential is larger for females (29.86 per cent rural, 48.10 per cent urban) than for the males (58.25 per cent rural and 69.83 per cent urban) (Table–12).

Working Population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental it nature. In involves not only the actual work but also effective supervision and direction. At 1981 census the population has been divided into three categories viz., main workers, marginal workers and non-workers against workers and non-workers only as in 1961 and 1971. With a view to make the data comparable with previous censuses, the main workers together with marginal workers of 1981 are almost comparable with the 'workers *plus* non-workers with secondary work' of 1971 and 'workers' of 1961. Again,

on the recommendations of the Planning Commission and Central Statistical Organisation only four categories of main workers viz., cultivators, agricultural labourers, workers engaged in household industry and other workers have been adopted against the nine industrial categories of workers in 1961 and 1971.

For main workers major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked just for sometime during the preceding year but not for the major part, have been treated as marginal workers. Against this, all those who have not worked at all during the last year, were recorded as non-workers e.g., persons engaged in household chores, students, dependents, retired persons, rentiers, beggars, etc.

As returned at 1981 census and reproduced in Table 12, 42.28 per cent population of the district comprises of total workers and the remaining 57.72 per cent of non-workers. The corresponding proportion of workers in the State stands at 42.56 per cent and that of non-workers at 57.44 per cent. From amongst the workers, the main workers account for 39.57 per cent and marginal workers for the 2.71 per cent. The corresponding proportions of main and marginal workers for the State stands at 38.71 per cent and 3.85 per cent respectively. Thus, the proportion of main workers is higher and that of marginal workers lower than the State average. The district average with regard to non-workers standing at 57.72 per cent is, however, slightly higher than the corresponding State average of 57.44 per cent (Table 12).

TABLE

Sex differentials among the workers reveal that male and female total workers account for 52.12 per cent and 31.92 per cent respectively. Again, male and female main workers constitute 51.14 per cent and 27.38 per cent while the marginal male and female workers account for 0.98 per cent and 4.54 per cent respectively of the total population of the district. As a matter of fact the higher proportion of male main workers is not an unexpected phenomenon. On the other hand the higher proportion of female marginal workers is appreciable. This shows that females besides attending to hazardous household chores also perform one or the other economic activity to supplement the family income.

Within the district the highest proportion of total workers of the order of 48.46 per cent has been returned from Jamner tahsil followed by Edlabad with 48.34 per cent. Proportions with regard to other tahsils vary between 35.43 per cent and 46.91 per cent. Edlabad tahsil ranks at the top with the proportion of main workers returned at 46.04 per cent. The second place with 44.63 per cent has been occupied by Jamner tahsil. The differentials with respect to other tahsils vary between 34.25 per cent and 44.54 per cent. In case of marginal workers, Pachora has revealed the highest proportion of such workers i.e. 4.47 per cent and Jamner tahsil has followed closely with 3.83 per cent of such workers. Proportions with respect to other tahsils vary from 1.13 per cent to 3.65 per cent.

The main workers have been sub-divided into four categories viz., cultivators,.agricultural labourers, those engaged in household industry and other workers. Cultivators in the district account for 33.96 per cent of the main workers. The proportion is lower than the State average of 35.12 per cent while the proportion of male cultivators (35.25%) is higher than the corresponding State proportion (33.69%), the proportion of female cultivators (31.43%) is lower than the State average (38.48%). In aggregate as also at male and female levels, the proportion of agricultural labourers is higher than that returned at the State level. 41.86 per cent of the main workers have given out their economic activity as agricultural labourers against the corresponding State proportion of 26.63 per cent. Male and female agricultural labourers stand respectively at 31.54 per cent and 62.14 per cent against the corresponding State proportions of 18.51 per cent and 45.61 per cent.

In the field of household industry the district trails behind the State average. 2.08 per cent of the main workers have been recorded as engaged in household industry against the corresponding State average of 2.55 per cent. Males and females engaged in this activity account for 2.43 per cent and 1.39 per cent respectively and the corresponding proportions for the State stand at 2.61 per cent and 2.49 per cent.

Under the category " other workers " 22.10 per cent of the main workers have been returned. The corresponding proportion of " other workers " for the State stands at 35.70 per cent. Again, the male and female other workers constitute 30.78 per cent and 5.04 per cent respectively of the main workers against the corresponding State proportions of 45.19 per cent and 13.51 per cent.

A comparison of economically active population as returned at 1981 census with that returned at 1971 shows that the proportion of main workers in the district has increased from 36.10 per cent to 39.57 per cent an increase of more than 3 points. During the same period the proportion of cultivators has increased from 31.12 per cent to 33.96 per cent. A decline in the proportion of agricultual labourers from 46.30 per cent to 41.86 per cent has on the other hand, been observed during 1971-81. A similar declining trend is seen in the proportion of workers engaged in household industry. A decline from 2.84 per cent to 2.08 per cent has been marked. However, under the category " Other workers " an upward participation trend has been found. From 19.74 per cent returned at 1971, the proportion of main workers under this category has increased to 22.10 per cent.

Availability of Amenities : Education

1,419 (96.2Q%) of 1,475 inhabited villages of the district encompassing 99.15 per cent of the rural population have the amenity of education available (Tables 13 and 14).

TABLE 13

Distribution of villages according to the availability of different amenities

Serial No.	Name of tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities

In other words 19 out of 20 villages have the schooling facilities available for the children. Within the district all the villages in Edlabad tahsil have this facility On the other hand Yawal tahsil stands at the bottom with this amenity available to 88.64 per cent villages only. With regard to coverage of population Parola tahsil has this facility available to 97.29 per cent of its rural population. In case of other tahsils the proportions are higher.

As regards the population of the villages benefitting from the educational facility, there are 359 (88.64%) out of 405 having less than 500 population. In the second population range of 500—1,999, out of 824 villages, the amenity is available to 815 (98.91 %) villages. There are 193 villages in the next population range of 2,000—4,999 and all of them have this amenity available on their threshholds. The remaining 53 villages fall in the population range of 5,000 + and out of these 52 (98.11 %) have this amenity (Table 15).

TABLE 15

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply

There are, however, 56 villages in the district which do not have the amenity of education. Inhabitants of 46 such villages have to tread a distance of about 5 kms to neighbouring villages/towns to have this amenity. Similarly, villagers of 2 other such villages have to negotiate a distance of 5—10 kms to get educational facility. There are yet another 8 villages whose inhabitants have this facility available at a distance of more than 10 kms (Table 16).

TABLE 16

With regard to urban areas of the district Table 18 reveals the ratio of schools to the urban population of the district. The ratios of the 10,000 urban population to types of institutions are : 10,000 : 0.91 Higher Secondary/Inter/PUC/Junior College; 10,000 : 1.03 Secondary/Matriculation; 10,000 : 0.96 Junior Secondary/ Middle and 10,000 : 3.05 Primary Schools. To make it more elucidative it can be said that there is a higher Secondary/Inter/PUC/Junior College for every 10,971; a Secondary/Matriculation School for every 9,680; a Junior Secondary/Middle School for every 10,449 and a Primary School for every 3,275 urbanites in the district.

Medical

Medical amenities in the countryside are available only in 271 (18.37%) villages and 907,044 (46.28%) rural people benefit from the same. The situation, as it is, is not an encouraging one. The remorseful situation warrants that incentives together with amenities need to be provided to the personnel associated with medical profession so that they volunteer themselves to serve in the countryside.

Within the district, Yawal tahsil ranks at the top with almost every third village having the benefit of medical amenity. Against this, situation is pathetic in Parola tahsil where the amenity is available in one after every twenty villages. From the point of view of coverage of

population, Yawal again stands out with 63.03 per cent of its rural population benefitting from the medical amenity. On the other hand, Parola stands at the lowest ebb with medical facility available to just 17.58 per cent of its rural population (Tables 13 and 14).

From amongst the 271 villages having one or the other medical amenity available 11 have less than 500 population. Against this 50 have more than 5,000 population. The remaining 84 and 126 fall in the population range of 500—1,999 and 2,000—4,999 respectively. Positive correlation between size of the village and number of medical facilities is noticeable from the Table 15.

There are 1,204 villages in the district which do not have any of the medical amenities available. Out of these the inhabitants of 555 villages have to cover a distance of less than 5 kms to get this amenity. Inhabitants of another 396 villages have to tread a distance of 5—10 kms to avail this amenity. There are yet another 253 villages whose inhabitants have to negotiate a distance of more than 10 kms to reach the centre where the medical amenity would be available (Table 16).

As regards the availability of beds in the towns of the district; there are 2.26 beds per 1,000 population in the district or else it can be said that one bed is available after every 442 urbanites. Within the district the highest proportion of beds has been found in Jalgaon town. Being the district headquarters it provides a bed after every 223 urban people. The lowest proportion of bed availability has been found in Raver town where there is a bed available after every 5,087 urban people. Disheartening is the position in Kandari town where there is not even a single bed available to its urban population (Table 19).

Drinking Water

It is gratifying to note that all the villages in the district have the availability of drinking water.

Post and Telegraph

Of the 1,475 inhabited villages of the district, there are 496 villages which have the availability of the post and telegraph amenity. It can safely be said that every third village in the district has this facility available. So far as the coverage of population is concerned 64.09 per cent of the rural population of the district benefits from this amenity. In other words 6 out of 10 persons in the countryside have this facility available. The largest network of post and telegraph amenity covering 43.33 per cent villages and encompassing 80.27 per cent of the rural population has been found in Jalgaon tahsil. Edlabad tahsil of the district looks poorly catered in this regard. The amenity is available to 21.52 per cent villages only. From the point of view of coverage of population, Parola ranks at the bottom with 49.18 per cent of the rural population having this facility available (Tables 13 and 14).

Out of the 496 villages with the post and telegraph amenity, 30 have less than 500 population. Against this there are 52 villages with more than 5,000 population. The remaining 247 and 167 fall in the population ranges 500—1,999 and 2,000—4,999 respectively. There are, however, 979 villages which do not have the benefit of post and telegraph amenity. To the inhabitants of 735, such amenity is available at a distance of less than 5 kms. Those inhabiting another 180 villages have to tread a distance of 5—10 kms to reach this amenity. The villagers of yet another 64 villages have to negotiate a distance of more than 10 kms to avail of the amenity (Tables 15 and 16).

Market/Hat

In 153 villages (10.37%), market/hat is held in the district and 29.95 per cent of the rural population is covered by such periodic markets/hats. 12 villages holding the market/hat have less than 500 and 38 have above 5,000 population. The remaining 34 and 69 fall in the population range of 500—1,999 and 2,000—4,999 respectively. Since markets/hats are not held in 1,322 villages the people of 578 such villages have such centres available at a distance of less than 5 kms. People of 468 villages, however, have to travel between 5—10 kms to reach such centres and the inhabitants of yet another 276 have to tread more than 10 kms to reach such centres (Table 16).

Communications

Communication facilities e.g. road transport, railways and navigation are available in 73.15 per cent villages and about 9 out of 10 villages of the district benefit from one or the other such facility. In Erandol ta lhsil the 147 villages have the benefit of communication facilities. From the Table 15, it can be seen that higher the

population size of the villages, more the communication facilities available. There are, however, 396 villages in the district which do not have any communication facility. 271 villages have the communication facility within 5 kms. Inhabitants of 97 villages have this amenity available at 5—10 kms while those of 28 villages have it available at a distance of beyond 10 kms (Table 16).

Approach by Pucca Road

43.59 per cent villages accounting for 60.64 per cent of the district's rural population are connected by pucca roads. Proportionately the largest network of the order of 81.08 per cent of pucca roads has been found in Parola tahsil. With regard to coverage of rural population Jalgaon tahsil stands out with 88.07 per cent of its rural population being served by pucca roads. From amongst the 643 villages with an approach by a pucca road, 109 have less than 500 population; whereas 47 have more than 5,000, 353 and 134 fall in the population range of 500—1,999 and 2,000—4,999 respectively (Tables 13, 14 and 15).

Power Supply

97.22 per cent villages in the district have been electrified and 98.97 per cent of rural population is benefitting from the same. In Bhadgaon, Erandol and Amalner tahsils all the villages have the facility of electricity. From amongst the 1,434 electrified villages 379 have less than 500, whereas 53 have more than 5,000 population. 809 and 193 villages have population between 500–1,999 and 2,000–4,999 respectively.

There are, however, 5 villages in the district one each from Raver, Bhusawal, Chalisgaon and two from Pachora tahsils which have no amenity available except for drinking water.

Land Utilisation

Columns 15 to 19 of the village directory give land-use pattern of each village in the district. Classification of land-use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

In the district forests are found on hill slopes of Satpuda in Chopda, Raver, Yawal and Edlabad tahsils. Those found in Jalgaon, Bhusawal, Jamner, Pachora., Chalisgaon, Amalner and Erandol tahsils are not dense. The main species found in the forests are : Teak, Tiwas, Salai, Haldu, Seasam, Bibla, Anjan and Sissu.

Irrigated, Unirrigated and Culturable Waste Areas

Information relating to irrigated, unirrigated and culturable waste areas is given in columns 16 to 18 of village directory. The district has an area of 1,016,150.59 hectares. The cultivable area constitutes 82.80 per cent of the total area. Though the district is traversed by a number of rivers, hardly a few are worth harnessing for irrigation purposes. The result is that irrigated area accounts for just 9.15 per cent of the total cultivable area. Within the district Amalner tahsil has 96.75 per cent cultivable area obviously higher than district average of 82.80 per cent. Bhadgaon tahsil ranks at the top with 35.41 per cent of the cultivable area under irrigation. The lowest cultivable area has been found in Edlabad tahsil (67.84%) and the lowest irrigated area in Jalgaon tahsil (2.78%) (Table 20).

TABLE 20

Distribution of villages according to the land-use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Jalgaon	90	80,728.27	77.42	2.78
2	Chopda	108	77,666.06	90.35	6.60
3	Yawal	88	28,696.44	81.59	12.71
4	Raver	111	59,005.77	89.67	20.82
5	Edlabad	79	60,365.59	67.84	6.96
6	Bhusawal	102	71,225.00	83.26	3.86
7	Jamner	157	139,356.47	81.92	3.55
8	Pachora	128	79,544.00	81.63	5.32

11	Parola	111	79,526.49	77.87	6.31
12	Erandol	147	89,689.21	85.40	19.14
13	Amalner	154	84,358.00	96.75	9.47
	Total of all tahsils ..	1,475	1,016,150.59	82.80	9.15

Staple Food

In almost all the tahsils of the district, Wheat and Jowar are the main staple food of the people. However, Raver and Erandol tahsils only Jowar is the staple diet in whereas in Chalisgaon tahsil Jowar and Bajra are the staple food of the people (Table 21).

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of tahsil	Main staple food	Serial No.	Name of tahsil	Main staple food
1	2	3	1	2	3
1	Jalgaon ..	.. Wheat, Jowar	8	Pachora ..	.. Wheat, Jowar
2	Chopda ..	.. Wheat, Jowar	9	Chalisgaon ..	.. Jowar, Bajra

4	Raver ..	.. Jowar	11	Parola ..	.. Wheat, Jowar
5	Edlabad ..	.. Wheat, Jowar	12	Erandol ..	.. Jowar
6	Bhusawal ..	.. Wheat, Jowar	13	Amalner ..	.. Wheat, Jowar
7	Jamner ..	.. Wheat, Jowar			

Municipal Finance

As would be seen from Table 22 the average per capita receipts in various towns of the district stand at Rs. 105.22. Rs. 43.76 are realised through taxes and Rs. 61.46 through other sources. The highest per capita receipts have been found in Jalgaon town (Rs. 183.88) and the lowest in Varangaon (Rs. 9.94). As regard to the per capita expenditure the same averages to Rs. 101.17 for the district. Per capita expenditure on general administration stands at Rs. 11.00, on public health and conveniences Rs. 34.07, on public works Rs. 12.47, on public institutions Rs. 18.17 and on other aspects Rs. 25.46.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects

Minerals

The district does not possess any mineral of importance. However, trap used for building purposes is found every where in the district, particularly found in the bed of Waghur river near Bhusawal. Hot water springs are also found at Unapdeo, Sunapdeo and Najhardeo in Chopda tahsil.

Fisheries

Fishing activity in the district is confined to inland waters of rivers, tanks and ponds. The total perennial river length in the district is 730 kms. Perennial and seasonal tanks provide water spread areas which is rather inadequate for the development of fishing industry. The commercially important varieties of fish

found in the district are: Kirkit or Shingala, Murrel, Shivda, Pahadi or Daku, Chamar or Chalat, Pal or Dondaonya, Khavlya, Khaval, Kolshi, Zinga, Boi, Kalundar, Kharebi and Muri.

Industries

Due to the availability of raw cotton, cheap labour and means of transport, cotton ginning, pressing and spinning has grown to some extent in the district. No appreciable progress is seen in other types of industries. However, edible oil industry formerly organised on cottage basis has expanded along with cotton ginning and pressing. The non-agricultural employment leans heavily on village and cottage industries i.e. the village craft working on traditional lines with the locally available raw material or for local demands. Recently, factories manufacturing toffees, art silk and a factory reeling silk sewing thread have been established at Jalgaon. A factory producing fireworks has been shifted to Jalgaon from Punjab. Besides, there are three factories including an ordnance factory and a workshop of the Central Railway, engaged in engineering works. There are Gur and Ink manufacturing industries also in the district in addition to printing presses. Cottage industries in the district include bidi making, blacksmithy, bamboo working, bangle making, brass and copper working, brick making, lime burning, carpentry, handloom, khadi weaving, handmade paper making, leather working, oil seed pressing, pottery, tanning and wool weaving.

Trade and Commerce

The main items of manufacture are cloth, ayurvedic medicines, leather, cotton yarn, bullock carts, powerloom cloth, ginned cotton, cotton bales, vanaspati, sarees and sweet oil (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
II Amalner (M. Cl.)	Cloth	Cloth	Foodgrains

IV Savda (M. Cl.)	....	Bananas	Wheat
III Varangaon (C. T.)	....	N.A.	....
III Yawal (M. Cl.)	Sweet oil	Bananas	Fertilizers

N. A.—Information Not Available

They are mostly exported to Bombay, Ahmadnagar, Kanpur, Madras, Nagpur, Sholapur, Broach and Aurangabad. Bananas produced in the district are of delicious quality and are exported to Delhi and Bombay. They are exported to some foreign countries. The district is also known for producing milk and milk products in large quantites. Butter and Ghee are chiefly sent to Bombay. Groundnut oil produced in the district is mostly exported to Bombay and Dhalmianagar. The chief items of import the district depends upon include foodgrains, cloth, kerosene, diesel, fertilizers, tea, rice, and wheat.

Table 24 indicates the proportion of slum population to total population in towns and density of slum per km_2.

Total	3.61	174,700

Places of tourists' importance

Shri Rama Mandir.—It is an ancient temple belonging to Peswa period. Excepting the shrine of the temple, the other parts of the temple including the auditorium and the seating room were built about 70–80 years back by one Appa Maharaj, a devotee of Rama with the financial help of his disciples. In veneration of the deities in the temple a fair is held at Jalgaon, 420 kms east of Bombay. The annual festival begins on Kartika Sud. 1 on the day the imgaes of Rama, Laxman, and Sita are carried in a palanquin to river Girna for a bath. After the bath the images are decorated with ornaments and garlands. The persons visiting the temple on the festival days are mostly from Jalgaon and nearby villages. Nearly 25,000 people visit the temple during the days of the fair.

Navaratra Mahalaxmi temple.—The temple is in the heart of the Bhavani Peth in Jalgaon town. It is a storeyed stone building with a 'Kalas' at the top. On all the four sides brass bars have been fitted instead of walls to allow sufficient light to enter the temple.

The back of the deity's throne is plated with silver sheets $4^1 \times 4^1$ in size bearing fine engraving. At the back of the Goddess there is a Pindi of Lord Shiva and an image of Ganapati and in the rear is installed an idol of God Hanuman $3\frac{1}{2}'$ high facing the west.

A fair is held at the temple for 10 days from Ashvina Sud. 1 to Ashvina Sud. 10 People from Jalgaon town and round about villages mostly attend the fair.

Changdeo.—It is the place where the well-known sage Markandeya is believed to have practised penance. The place is also deemed holy because of the confluence of Purna and Tapi and so pilgrims visit once a year to have a holy bath. The place is at a distance of about 6 kms in the north-west of Edlabad. A fair is held at this place from Magha Vad. 13 to Magha Vad. 30. The total number of pilgrims is about 80,000. They mostly comprise of workers and peasants and majority of them is from Vidarbha region of the state.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note explaining the abbreviations used in the Village Directory

The ' Village Directory ' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

' Village ' is a statutory recognised unit having a definite boundary and separate land records. In case a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The " uninhabitated " villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included:—

Appendix (*i*)—Tahsilwise abstract of educational, medical and other amenities;

Appendix (*ii*)—Land utilisation data for census towns;

Appendix (*iii*)—Tahsilwise list of villages with no amenities available; and

Appendix (*iv*)—Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under:—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns, however, the area figures are in km^2.

Column 4, which gives population and the number of households in each village has been introduced for 1981 census to examine the correlation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 kms, 5–10 kms, and 10+ kms to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, highers secondary/intermediate/pre-university/ junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village secondary school has middle and primary classes also the same has been counted as three schools i.e. secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number indicated within brackets against

the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities:—

Primary or Secondary School	P
Junior Secondary or Middle School	M
Matriculation or Secondary School	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6, provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5–10 kms and above 10 kms of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows:—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Communicy Health Worker	CHW
Others	O

Column 7 gives information regarding availab'lity of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village:—

Tap water	T
Well water	W
Tank water	Tk
Tube-well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are:—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relates to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail, and water-way and the same has been indicated as follows:—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and black-water etc.).	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information;—

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Water-way (Other than river or canal).	NW
Foot path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another State the name of the State has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes:—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories:—

(1) Forests.

(2) Not available for cultivation—
   (*a*) lands put to non-agricultural uses.
   (*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.—
   (*a*) permanent pastures and other grazing lands.
   (*b*) lands under miscellaneous tree crops and groves not included in the net area sown.
   (*c*) culturable wastes.

(4) Fallow lands.—
   (*a*) fallow lands other than current fallows.
   (*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent or irrigated lands under various types of irrigation e.g. canal, tank, wells, tube-wells etc. and codes adopted for indicating various sources of irrigation are as under:—

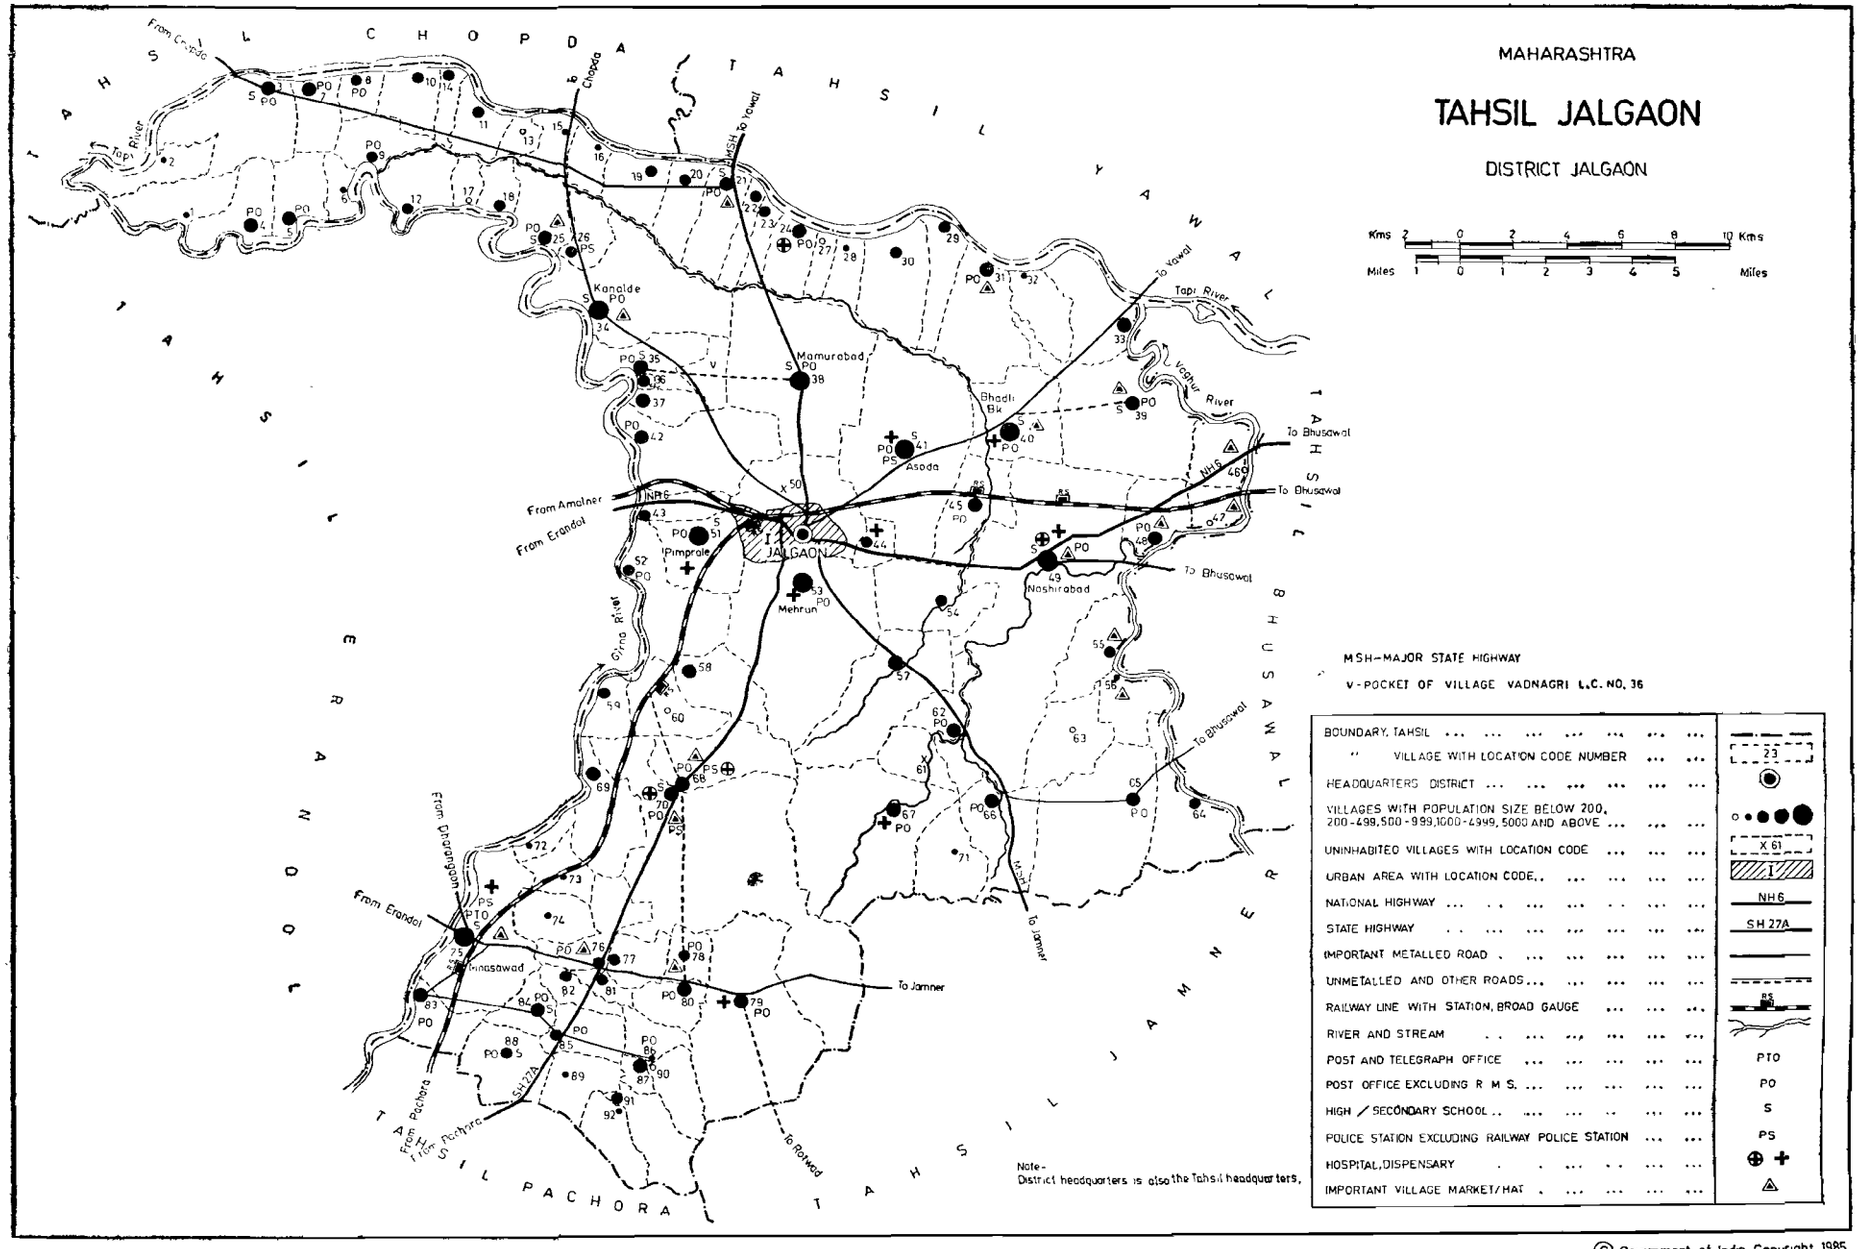

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube-well (without Electricity) ..	TW
Tube-well (with Electricity)	TWE
Tank	Tk
River	R
Lake	L
Water-fall	WF
Others	O
Total	T

Column 18 gives information on culturable waste lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts, etc. which cannot be brought under cultivation except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used:—

N .. Copies of newspapers coming in the village.
M .. Motor cycles/scooters available in the village.
C .. Cars/jeeps available in the village.
T .. Tractors available in the village.
PS .. Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining the Abbreviations used in Town Directory

The ' Town Directory ' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and VI-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town:—

Municipal Corporation/Corporation ..	M. Corp.
Municipality	M.
Municipal Council	M.Cl.
Non-Municipal	N.M.
Cantonment Board/Cantonment ..	C.B.
Notified Area/Notified Area Committee/ Notified Committee.	N.A.C.
Census Town	C.T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in km², number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil headquarters and the nearest city (urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town, Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are:—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil. Codes used are:—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used:—

Overhead tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell pumping system	BWP
Pressure tank	PT
Tubewell water/Hand pump ..	TW
Tap water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (i.e. Class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes:—

Hospital	.. ..	H
Dispensary	.. ..	D
Health Centre	.. ..	HC
Family Planning Centre	.. ..	FC
T. B. Clinic	.. ..	TB
Nursing Home	.. ..	NH
Ayurvedic	.. ..	A
Unani	.. ..	U
Homoeopathic	.. ..	Hom
Others	.. ..	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (cols. 6 to 9) is exhibited as—

Arts only	.. ..	A
Science only	.. ..	S
Arts and Science only	.. ..	AS
Commerce only	.. ..	C
Arts and Commerce only	..	AC
Combined for all categories—Arts, Science and Commerce.		ASC
Law	.. ..	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B.Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are:—

Shorthand	.. ..	SH
Typewriting	.. ..	TYPE
Shorthand and Typewriting	..	Sh.Type
Others	.. ..	O

Keeping in view the ' Minimum Needs Programme ' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as ' PL ' and the reading rooms indicated as ' RR '.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil in the State Land Records Depaartment. The total areas, as also the rural area, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.
