CENSUS OF INDIA, 1971

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 *Census Reports on Punjab will bear uniformly Series* No. 17 *and will be published in the following parts* :—

PART I-A	General Report
PART I-C	Subsidiary Tables
PART II-A	General Population Tables
PART II-B	Economic Tables
PART II-C(i) and V-A	Distribution of Population by religion and scheduled castes
PART II-C(ii)	Social and Cultural Tables (Table C-I to C-VI) and Fertility Tables
PART II-D	Migration Tables.
PART III	Establishment Report and Tables.
PART IV	Housing Report and Tables
PART VI-A	Town Directory
PART VI-B	Special Survey Reports on Selected Towns
PART VIII-A	Administration Report—Enumeration (For official use only)
PART IX	Census Atlas
PART IX-A	Administrative Atlas

B—STATE GOVERNMENT PUBLICATIONS

PART X	District Census Handbook for each district in three parts—
	PART A—Village and Town Directory
	PART B—Village and Townwise Primary Census Abstract
	PART C—District Census Tables and Administrative Statistics

Note—Parts A and B of the District Census Handbooks have been printed in one volume

Section B—Tables based on Village Directory and Primary Census Abstract	..	171
Section C—Administrative, Welfare and Development Statistics	..	188

PREFACE

The publication of District Census Handbook was first initiated at 1951 Census with a view to make Census Statistics available from the smaller territorial units. This publication was continued at 1961 Census. The 1961 District Census Handbook compared to 1951 was much more informative as it contained additional data about level of development and social amenities in villages. At 1971 Census the District Census Handbook was decided to be split up into three convenient parts. Part A and B of the District Census Handbook incorporating the primary data down to the village and town level has been published in one volume and that was released in record time. Part A contains the village and town Directories and Part B contains primary Census Abstract for all villages and Towns.

2. The present volume Part C of District Census Handbook has been divided into three sections.

Section I— District Census Tables

Section II— Tables on Village Directory and PCA

Section III—Administrative, Welfare and Development Statistics.

3. The data incorporated in section III have been collected and compiled from concerned State/Central Government departments and their publications. An indication regarding the source of data has been provided under each table. This volume also contains a very short note analysing the decadal changes in the decade.

4. This report, as at the last Census, contains to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf of the State Government.

5. The collection of Census data is a huge and massive affair. It involves Coop. of a large number of functioneries at various levels. First and foremost we are grateful to the ordinary citizen who sportingly responds to varied and hacknied questionaire which is basic source of our basic data. The various agencies involved in the collection of data-an army of enumerators-mostly teachers and revenue officials in villages and staff of local bodies in urban areas a number of supervisors from amongst teachers, revenue officials and local bodies staff and the District administration. We are immensely grateful to all of them. All our own level the entire staff of our organisation was actively involved in this operation and they have all given their unstinted help and co-operation at all times and even at odd hours.

6. Various Census tables incorporated in this volume were prepared in various sections of our office headed by different officers for different series. These tables have already been published in various state volumes pertaining to these series. In particular a mention has to be made of Shri G.S. Pabla, A.D.C.O., Shri D.P. Jain, T.O. who spared no efforts in accomplishing this task. Shri A.S. Dhilllon, T.O. and Shri Charan Singh, S.T.A. and Shri G.S. Gill, TO. (now Investigator), were also associated with the preparation of these Census tables. We place on record our deep sense of appriciation for their generous contribution. The job of collecting and compiling administrative statistics was ably handled by Shri N.S. Bhadauria duly assisted by other members of staff of his section under the able guidence of Shri K.C. Suri, A.D.C.O. (now D.D.C.O. H.P.).

7. This publication is being brought out giving only a few important administrative statistics and Census tables leaving the analysis and inferences to be drawn by readers and scholars. At this stage of editing and compilation Shri Bhadauria did a commendable job under the able guidance of Shri S.P. Grover who joined us as Assistant Director of Census Operations in Oct., 1977. Shri R.K. Singh, Assistant Director of Census Operations who joined us in May, 1978 has also helped us immensely by going through the edited material at the crucial stage. I am extremely grateful to all of them.

8. We are beholden to the master planners and architects of 1971 Census Shri A Chandra Shekhar, the then Registrar General of India, his worthy successor Shri R.B. Chari and the present Registrar General Shri P. Padamanabha for their valuable guidance and encouragement at all times. We are also greatly indebited to Shri K.K. Chakravarti, Assistant Registrar General for his valuable guidance, kind suggestions and benevelent help made available to us from time to time. Our record of acknowledgements would remain incomplete without a mention of my worthy predecessor Shri H. S. Kwatra whose encouragement, help and guidance are luckily readily available to us at all times.

9. We are extremely grateful to Shri H. S. Chhatwal, P.C.S., Administrator Cum Additional Controller Printing & Stationery Deptt. Punjab whose kind co-operation has enabled us to get this volume printed so well and in record time.

P. C. Sharma
Deputy Director
Census Operation, Punjab

DISTRICT DURING THE DECADE

Gurdaspur is the northernmost district bounded by Himachal Pradesh and Jammu & Kashmir in the North-east , Amritsar, Kapurthala and Hoshiarpur disrtricts in the south. It has the international boundary with Pakistan on the West running into 50 kms. The district lies between North latitude 31° 35° and 32° 31° and East longitude 74i 53° and 75° 56°. It has an area of 3560 sq. km. according to Surveyor General of India at 1971 Census compared to an area of 3,522.40 sq. km. at 1961 Census. The district is constituted of 3 tahsils having 1,526 inhabited villages and 10 towns namely, Batala, Dera Baba Nanak, Dhariwal, Dina Nagar, Fatehgarh Churian, Gurdaspur, Pathankot, Quadian, Sri Hargobindpur and Sujanpur. Territorial changes witnessed by the district during the decade are as under :—

Narot Jaimal Singh town was denotified. Three towns Bakloh, Dalhouise and Dalhouise Cantt. were transferred to Himachal Pradesh as a result of re-organisation of erstwhile Punjab State. 29 Villages of tahsil Dasuya (district Hoshiarpur) were transferred to this district vide Punjab Govt. notification No. 564-RG-1-670/727 dated 17th March, 1970. By these inter-district changes, Gurdaspur district gained 53.16 sq. km. of area. Pathankot tahsil gained one village with an area 1.1 km. and Gurdaspur tahsil 26 villages (48.1 sq. km.) and Batala tahsil 2 villages (3.9 sq. km.)

2. The district has a comparatively more temprate climate and also gets more rainfall than in the central Punjab owing to its proximity to the hills . Most of the rain fall occurs during the summer months.

3. With the exception of a few hilly areas where communications are difficult during the rainy season, the district is served by fairly good road-cum-rail transport system. Since independence, there has been a very fast development of Pucca roads in the district. The density of population of the district (345 per sq. km.) as at 1971 Census which is significantly higher than the State's density of 269 and has shown a very high increase over the corresponding figure of 276 in 1961. The higher density of the district can attributed to highly fertile soils with assured irrigation facilities and adoption of improved agriculture practices during the decade.

4. Workers constitute 26 per cent of the district's population. There is a decline in the percentage of workers compared to 1961 (29.3%) which follows the all India trend and is due to change in the definition of worker at 1971 Census. The percentage of workers in three sectors of economy, Primary, Secondary and Tertiary, as revealed by 1971 Census were 59.72, 12.44 and 27.84 respectively. This sectoral break up of the workers shows that the economy of the district still continues to be predominantly agricultural. The soil is highly fertile made up from the Alluvium of rivers Bias and Ravi. Three-fourths of the total area of the district is under plough and 55.13 per cent of the cropped area during 1970-71 is irrigated. The canals are the major source of irrigation. The district is well served by a network of Upper Bari Doab Canal system. Tubewell irrigation is also playing an important role. With the progressive rise of irrigation facilities during the last 20 years of planning the percentage of net irrigated to net sown area in the district has increased from 39 to 52 and percentage of gross irrigated area to gross cropped area has also shown an increase from 38.7 per cent to 55.1 per cent for the same period. The double cropping pattern is becoming popular due to additional irrigation facilities and increase of inputs of high yielding varities of seeds and chemical fertilizers and as a consequence there has been a substantial increase in the output of rice and sugarcane. However, there is a short-fall in the area sown under coarse grains like Bajra, Gram, Maize, Pulses and oil seeds. In border areas the latest agricultural techniques still need to be adopted so that these areas may also share the state's economic prosperity.

5. In the field of industry, Batala and Dhariwal towns of the district are known all over the country for engineering goods/machine tools and woollen manufactures, respectively. Despite large-scale migration of Muslim skilled labour from Batala to Pakistan in the wake of partition, the metal-based industry did not suffer a setback because the local labour picked up quickly the necessary technique to fill in the vacum. However, owing to the outbreak of hostilities with Pakistan on more than one occasion since the Independence, capital investment has been somewhat shy in this district. Consequently development, particularly in the field of industry, has remained somewhat erratic. No new large-scale industrial units have been set up in this district. Instead there has been flight of capital from Batala to more safer places like Faridabad, Sonepat etc., in Haryana. In the field of agriculture, however, the growth rate has been remarkable. It goes to the credit of the adventurous and hard working Punjabis' of this district to have continued uninterruptedly their economic activities despite the constant nightmare of hostilities from Pakistan."

6. *"Towns of Batala, Dera Baba Nanak and Sri Hargobindpur have a long history behind them and continue to enjoy their religious importance upto this day. Pathankot, Batala, Gurdaspur and Dhariwl towns, on the national highway to Kashmir, have marched forward in different ways over the past de cade and Municipal Committees in these towns are providing better public conveniences/amenities Judged in terms of over-all amenities, maximum of these are available in the villages of Batala tahsil. This tahsil has, beyond doubt, an edge over other tahsils in the matter of educational facilities, power supply, drinking water, communications and post and telegraphs. Gurdaspur tahsil, however, leads other tahsils in the district in the provision of medical facilities and shares closely with Batala tahsil the privilege of providing the best educational, drinking water, power supply, communications and post and telegraphs facilities. Pathankot tahsil is trailing behind all other tahsils in this respect."**

7. *The population of the district as returned at* 1971 *Census is* 1,229,249 *persons against* 980, 879 *persons at the* 1961 *Census. resulting in a growth rate of* 25.32 *per cent during the decade which is much higher as compared to State growth rate of* 21.7%. *The percentage of urban population is* 20.26 *corresponding to* 23.73 *of Punjab State as recorded at* 1971 *Census Sex ratio as revealed by* 1971 *Census is* 890 *compared to* 869 *at* 1961 *Census and is distinctly higher than that of the State* (865). *The literacy rate works out to*34.23 *percent which compares with State's literacy rate* (33.67%). *The district has* 48.02 *per cent Hindus,* 44.82 *per cent Sikhs and* 6.16 *per cent people of other religions. It has* 21.73 *per cent of scheduled castes population in the State* (22.97 *per cent in the rural areas and* 16.84 *per cent in urban areas*). *This reveals that scheduled caste population is concentrated more in rural areas than in urban areas. Punjabi speakers are* 62.08 *per cent of the population while* 36.24 *per cent are Hindi speakers and speakers of other languages are only* 1.68% *of total population.*

**DCH Part A & B,* 1971 *Census.*

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

It is a census tradition to present data, separately, for rural and urban areas. Village or town is recognised as the basic area of habitation. In all censuses throughout the world the dichotomy of rural and urban area is recognised and the data are generally presented for the rural and urban areas separately. Since 1951, the census organisation is publishing the Village Directory as a part of District Census Handbook. These directories furnish information about the civic amenities available in each village along with its demographic characteristics viz., size of population by sex, houses and households, literacy, scheduled castes and scheduled tribes population and distribution of population by broad industrial categories. The maps given in the Handbooks showing the boundaries of all villages as well as some important physical features like road, rivers, etc., help to plan and undertake different types of socio-demographic and econo-demographic field studies. The data at district/tahsil-level provide a deep insight into the infra-structure prevailing in each district and facilitate the task of district and State planners and civil administrators. It also provides material for undertaking techno-economic appraisal of the resources available, the structural changes which have taken place during the past decade and the inter-regional disparities within the district can be properly investigated with the help of statistical data which have been presented in these volumes.

2. HISTORY OF THE DISTRICT CENSUS HANDBOOK

1. Since 1951, the census organisation has been publishing the District Census Handbook on behalf of the State Government. It was the unique achievement of the 1951 Census to bring out these handbooks/giving the Primary Census Abstract (PCA) and important census tables for every district of the State. The basic census figures incorporated in PCA relate to area of the village, number of houses and households, total population literates, workers classified by broad industrial categories and the non-workers. The 1951 District Census Handbooks, however, varied in contents and coverages from state to state depending upon the availability of resources with the State Government. At the 1961 Census, it was decided to bring out a certain minimum statistical data maps and other useful information, in a uniform manner throughout the country. The census data of the 1961 handbooks covered villages and town wise information of certain amenities like educational facilities, supply of drinking water and availability of electricity. The introductory chapter of the 1961 handbook was almost a Gazetteer—giving detailed information on physical, historical, geological and administrative aspects of the district. Besides, demographic, economic, social and cultural aspects the information was also given about the amentities like education, medical and post office in each village which was further supplemented by a list of events of the preceding decade and a statement giving details of fairs and festivals held in the district. The District Census Handbooks of the 1961 Census were published in a few States as late as 1971. The handbooks had to wait till the complete tabulation programme was got through and these outdated publications undoubtedly detract from their value. At the 1971 Census, it was emphasised to make available the census data to the users as quickly as possible after the census count. With this object in view, the District Census Handbooks of 1971 have been divided into three convenient parts. Of which parts A and B combined together incorporating essential village and town-wise data, were released quickly.

3. SCOPE OF 1971 DISTRICT CENSUS HANDBOOK :

In order to obivate delay in the publication of 1971 District Census Handbooks, this publication therefore, has been split up into parts A, B and C, two of which (A & B) have been combined in one volume and Part C, forms the present volume. The details of the contents of each part are as follows :—

Part-A : Village and Town Directory :

Part A—presents village and town directories. The village directory gives information about the area in acres, amenities like education, medical, power supply, drinking water, communication, post and telegraph, staple food, land use pattern i.e. area under forest, irrigated and unirrigated land, cultivable waste and area not available for cultivation, day or days of the Market/Hat, if any, held in the village and the particulars of places of religious, historical or archaeological interest. Information about the nearest town and its distance from the village has also been incorporated.The Town Directory,has been included for the first time at the 1971 Census. It presents data with the aid of seven different statements giving (I) the status of the town, its decadal population growth, since 1901 and the functional category, (II) Physical aspects and location of town, 1969, (III) Municipal Finance, 1968-69, (IV) Civic and other amenities, 1969, (V) Medical, Education, Recreational and Cultural Facilities in towns, 1969, (VI) Trade, Commerce, Industry & Banking, 1969, and (VII) Population by religion, 1971.

Part-B : Village and town-wise Primary Census Abstract :

This Part incorporates the village and urban block-wise Primary Census Abstract. The Primary Census Abstract (PCA) furnishes the basic census data i.e., area, number of houses and households,

total population, by sex, scheduled castes and scheduled tribes population, workers classified into nine industrial categories based on National Classification of Industries 1970 and non-workers by sex.

The District Census Handbook without district and tahsil maps seems incomplete. We have, therefore, included these maps in Part (A & B) of the handbook. The district map shows the tahsil boundaries location of towns and large villages with population size 5,000, important railway lines and roads rivers etc., and an inset map showing the position of the district in the State. A tahsil map ha s been placed before the alphabetical list of villages showing the location of each village in the respective tahsil. The tahsil map indicates the boundaries of each village alongwith location code number and towns with in the tahsil. The villages and urban areas have been shown by various population sizes. The inset map shows the position of the tahsil in the district.

Part-C : District census tables, tables on village directory and primary census abstract and administive statistics.

With a view to present in a systematic and uniform manner, various census tables relating to a district have been pooled together and presented in this volume—DCH Part—C and in order to enable the reader to correlate the demographic aspects of the district with other environmental aspects of the district, basic administrative statistics have also been presented in this volume. The data incorporated in this part have been divided into three sections:—

Section A : District Census Tables

Section B : Tables on village directory and PCA data.

Section C : Administrative, welfare & developmental statistics.

Besides it contains a brief description of the district during the decade, bring out broad changes in demographic & socio-economic characteristics of the population.

4. DEFINITIONS AND CONCEPTS :

In census, the terms block village, town, house, household scheduled caste and scheduled tribe, literate, worker and non-worker are frequently used. These terms are defined below :

4.1 '*Village*'—The village in the Punjab State is the smallest unit of habitation with definite surveyed and fixed boundaries. The definition of the village adopted in census is identical with that of 'Mauza' given under Section 3(i) of the Punjab Land Revenue Act, 1887. It is the revenue Estate determined as such for the purpose of levy and collection of the land revenue. The revenue estates is defined in the Act *ibid* as an area of which a separate record of rights is maintained or which has been separately assesssed to land revenue or would have been so assessed if the land revene had not been realised or compounded or redeemed or which the State Government has otherwise declared as an estate. The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

4.2. '*Town*'—There is no universally acceptable definition of urban areas. National differences in the characteristics distinguish urban or rural areas at the international level. At the 1971 Census we have adopted the following definition of a town. Incidentally it is anologous to the one adopted at the 1961 Census :—

(a) All places with a municipality, corporation or cantonment or a notified town area;

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000,

(ii) at least 75% of the male working population engaged in non-agricultural activities;

(iii) a density of population of at least 400 per sq. km.

However, the Directors of Census Operations of the respective States were given some discretion in marginal cases to include in consultation with the State Government a place that had other distinct urban characteristics, or to exclude an underserving place from being treated as 'urban'.

4.3 '*Ward/Urban block*'—Wards have been devised by the local bodies for conducting municipal committee/cantonment elections. Ward is the smallest unit for administering the affairs of the urban area in a town/cantonment board. To conduct the census the enumeration blocks were carved out within each ward in the urban areas. It was decided normally to form a block with approximately 60 to 750 population or 120-150 households, with some marginal adjustments. It was emphasised that in the process of formation of urban blocks the municipal ward boundaries should not cut across. For the purpose of census, it was essential that the urban block should neccesarily be co-terminus with municipal

ward boundaries i.e., no census block should cut across the ward boundaries.

4.4. '*House*'—Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census. 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for residential or non-residential purpose or both.

4.5. '*Household*'—Is a group of persons who commonly live together and would take their meals from a common kitchen unless thes exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period hah been treated as a member of the household. On the other hand a son or daughter residing in a ostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence i.e., hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

4.6 '*Scheduled Caste*'—Is such a caste, race or tribe or an ethnic group within such a caste, race or tribe as declared to be a caste by the Presidential orders issued under Article 341 of the Constitution of India.

4.7 '*Scheduled Tribe*'—Is such a tribe or tribal community as is declarecd to be scheduled tribe under Article 342 of the Constitution of India. There is no scheduled tribe in the present Punjab State. The following castes have been declared as Scheduled Castes in Punjab (notified in Government of India, Ministry of Home Affairs, Communication No. SRO 2477-A dated the 29th October, 1956) and published as the Scheduled Castes and Scheduled Tribes lists (Notification) Order 1956.

List of scheduled castes (adopted at 1971 Census)

1. *Throughout the State* :
   1. Ad Dharmi
   2. Bangali
   3. Barar, Burar or Berar
   4. Batwal
   5. Bauria or Bawaria
   6. Bazigar
   7. Balmiki, Chura or Bhangi
   8. Bhanjra
   9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi
   10. Chanal
   11. Dagi
   12. Dhanak
   13. Dumna, Mahasha or Doom
   14. Gagra
   15. Gandhila or Gandil Gondola
   16. Kabirpanthi or Julaha
   17. Khatik
   18. Kori or Koli
   19. Marija or Marecha
   20. Mazhabi
   21. Megh
   22. Nat
   23. Od
   24. Pasi
   25. Perna
   26. Pherera
   27. Sanhai
   28. Sanhal
   29. Sansi, Bhedkut or Manesh
   30. Sapela
   31. Sarera
   32. Sikligar
   33. Sirkiband

2. *Through out the State except the districts of Patiala, Bhatinda, Mohindergarh, Kapurthala ana Sangrur*:
   1. Darain
   2. Bhogri, Dhangri or Siggi
   3. Sansoi

3. *In the districts of Patiala, Bhatinda, Mohindergarh, Kapurthala and Sangrur.*

Deha, Dhaya or Dhea.

Note:—District Mohindergarh has been transferred to Haryana State.

3.8. *'Literate'*—A 'Literate' is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write has not been considered as literate.

4.9. *'Worker and Non-Worker.*-In the 1971 Census,every individual was asked to declare what according to him was his 'main activity',i.e., how he engaged himself mostly.Accordingly,all persons were divided intotwo broad streams of main activity as 'worker' and 'non-worker'. A 'worker' was defined as a person whose main activity' was participation in any economically productive work by his physical or mental activity. For that matter' 'work' involved not only actual work but also coffective supervision or direction of work. The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration and this had been returned as his 'main' activity' the person was classified as a 'worker' and categorised accordingly. A person who normally but had been incapacitated due to illness or travel, holiday, temporary break down, strike etc., was treated as engaged in regular work in which he would have otherwise been engaged. Persons under training such as apprentice with or without stipend or wages were considered as economically active and recorded as working. A person who was offered work but did not actually join it was not treated as a worker. In case of seasonal work like cultivation, livestock keeping, plantation, some types of household industry etc. a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration.

The workers at the 1971 Census have been further classified into nine broad industrial categories based on National Industrial Classifications as under:—

I. Cultivatiors

II. Agricultural labourers

III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

IV. Mining and quarrying

V. Manufacturing, processing, servicing and repairs
   (a) Household industry
   (b) Other than household industry.

VI. Construction

VII. Trade and commerce

VIII Transport, storage and communications

IX Other services.

In 1971, a person was treated basically as a 'non-worker' if he or she did not come under any of the above categories of 'worker'. Thus a person engaged primarily in household duties such as cooking for one's own household, or performing one's own household duties, or student attending an institution, or rent receiver was classified as such for his main activity and was treated as non-worker'. If he was also engaged in some economic activity, obviously not to the same extent as a full time worker,that activity was mentioned under 'secondary work'. The secondary, work if any, of those who were basically classified as 'worker' was also ascertained. Besides, the dependents, beggers and vagrants, convicts in jails or inmates of a penal, mental or charitable institution and job-seekers were clubed under the head of 'non-worker'.

SECTION A

DISTRICT CENSUS TABLES

SECTION A—DISTRICT CENSUS TABLES

Introductory note

The 1971 Census enumeration was conducted in March-April with sun-rise of 1st April as the reference date. The enumeration commenced on 10th March and ended on 31st March with a revisional round from April 1 to April 3 to make the data upto date as on sun-rise of 1st April 1971.

The following schedules were canvassed universally in the country :

(a) Houselist

(b) Establishment schedule

(c) Individual slip.

Another schedule called as Population Record was compiled from the Individual slips. In 1971 Census an attempt was made to collect comparable statistics to meet the requirement of basic data by different ministries of Government of India, the State Government, other bodies and associates and research scholars.

As in the past, house numbering and houselisting preceded the actual census count. Following the 1961 tradition a uniform houselist was canvassed during 1970. In the houselist, data on housing such as material of wall and roof, number of rooms, whether household lives in a rented or owned house, as also the purpose to which the house was used, were collected.

At the 1971 Census a separate establishment schedule was canvassed along with the houselist. Establishment schedule collected, a variety of information about manufacturing, trade as well as all establishments run in a census house.

The Individual Slip has the usual demographic questions viz., name, relationship to head, sex, age, marital status and birth place. At the 1971 Census two new questions were asked, viz, (i) age at a marriage and whether any child born during the last one year to each currently married women so as to yield useful data on fertility differentials and (ii) particulars of last residence. The social questions followed the usual pattern as in 1961 Census except that the question on nationality was dropped this time. In the field of economic data a significant departute was made at 1971 Census.

Processing of census data on electronic computers has been considered as the unique feature of 1971 Census. In the past Censuses, the data were processed manually except that in 1961, when household economic data were processed on a sampling basis. In 1971, the following series were adopted for preparing of various census tables;

A—Series: General Population Tables

B—Series: Economic Tables

C—Series: Social and Cultural Tables

D—Series: Migration Tables

E—Series: Establishment Tables

F—Series: Fertility Tables (State level)

G—Series: Special Tables for Degree Holders and Technical personnal (State level)

H—Series: Housing Tables.

The details of tables under each of the series are as under:—

A-SERIES :-GENERAL POPULATION TABLES

A—1: **—Area, houses and population**: This is the basic population table for the census and furnishes data for district/tahsil/city/town/urban agglomeration for total, rural and urban areas separately. , It 'presents area in sq.km, density of population per sq km., number of inhabited and the un-habited villages number of towns, number of occupied residential houses, households and population by males and females. As in 1961, there are three appendices to this table.

Appendix I—This appendix shows 1961 territorial units constituting the persent set up of each unit. This appendix has been supplemented with an annexure showing particulars of areas for 1961 and 1971 for those towns which have under gone changes in area since 1961 and shows population for the transferred area aoccording to the 1961 and 1971 Censuses.

Appendix II:—One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and over. For various reasons many places with a population of 5,000 and over are not treated as town while a number of places with less than 5,000 population are treated as towns. This appendix, as in 1961, gives the number of such places with their population.

Appendix III: This appendix is intended to furnish figures for the number of houseless and institutional households and houseless and institutional population by sex, separately.

A—II—Decadal variation in population Since 1901:—

This table is identical to the 1961 Census and furnishe data of population from 1901 to 1971. This is a very important table as it gives the growth of popuslation from decade to decade.

The appendix to this table as in 1961, spells out the adjustments necessary to bring the 1961 Census population of the district to the jurisdiction of the district as at 1971 Census.

A—III—Villages classified by population :—

This table as in 1961 gives figure for the number of villages, and their population upto 1,000 persons and above. The first two broad groups are further sub-divided into smaller size sub-groups as indicated below and the number of villages with their nomenclature and the population covered under each sub-group is indicated below:—

(i) less than 200 persons	diminutive village
(ii) 200-499 persons	very small village
(iii) 500-999 persons	small village
(iv) 1,000-1,999 persons	medium village
(v) 2,000-4,999 persons	large village
(vi) 5,000-9,999 persons	very large village
(vii) 10,000 and above	special village

This is supplemented with an appendix to show the sub-totals of broad groups of villages viz., 500-1,999, 2,000-4,999 and 5,000 and above.

A—IV—Towns and urban agglomeration classified by population in 1971 with variation since 1901: —

This table corresponds to table A-IV of 1961 and gives information about each town since 1901. This also furnishes the area of the town at the 1971 Census in sq.kms. As in 1961 all towns were divided into six classes according to the population size as shown below:

Size class	Population
I	over 100,000
II	50,000-99,999
III	20,000-49,999
IV	10,000-19,999
V	5,000-9,999
VI	less than 5,000

A town with a population exceeding 100,000 is termed as a city. The 1961 census concept of town group has been substituted by 'Urban Agglomeration' in 1971 table. The table furnishes decadal percentage variations of the population of each town and city. Besides the town, figures for urban agglomerations have also been presented. As against one appendix in 1961 this is supplemented by two appendices.

Appendix I is the same as in 1961 i.e., showing new towns added in 1971. It is further supplemented with two lists 'A' and 'B' showing places with a population under 5,000 treated as town for the first time in

1971 and those ommitted from the list of towns in 1971 but which were treated as towns in 1961.

Appendix II: which is a new one introduced at the 1971 Census shows the reasons for the change area of towns between 1961 and 1971.

B—SERIES: ECONOMIC TABLES

B—I Part A: Workers and non-workers according to main activity classified by sex and age groups

This is the basic economic table giving the distribution of workers and non-workers according to activity classified by sex and broad age groups. The table is based on full count of the census and presents data by total, rural and urban population separately for each district.

Workers have been classified into nine categories of main activity:—

I Cultivators

II Agricultutral labourers

III Livestock, forestry, fishing, hunting and plantation, orchards and allied activities

IV Mining and quarrying

V Manufacturing, processing, servicing and repairs-

(a) Household indusrtry
(b) Other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications,

IX Other services.

Except for two minor changes, the classification of workers by different industrial categories follows almost of the same classification as was adopted at the 1961 Census.

Mining and quarrying has been accorded a separate category IV at the 1971 Census while it was only a constituent of category III comprising of mining, quarrying, livestock, hunting and plantations, orchards and allied activities in 1961. The household industry which formed category IV in its own right for the 1961 census has been treated as sub-category V(a) of manufacturing, processing, servicing and repairs in 1971 Census

Table B—II Workers and non-workers in cities and non-city urban areas as according to main activity classified by sex and age-groups :—

This table based on full count has been culled out from table B-I Part A. It displays the same data as is contained in table B-I Part A, further distributing the total district urban figures. These figures have again been distributed into cities, towns and urban agglomerations arranged according to their population sizes. The table will be of particular interest to local bodies as it furnishes data on employment by nature of industry in different age-groups.

Table B—III Parts A & B Classification of workers and non-Workers according to main activity by educational levels :—

This table gives the distribution of population by level of education for each category of workers and non-workers. This is presented in two parts the first Part-A for urban area and the others Part-B for rural areas. For uniformity at all India level only Part A is in corporated in this volume.

Unlike Table B-I Part A and Table B-II (based on full count) this table is based on 20 per cent urban and 10 per cent rural enumeration slips.

The educational levels adopted in Part A urban areas are,

Primary
Middle
Matriculation or higher secondary

Non-technical Diploma or certificate not equal to degree
Graduate degree other than
technical degree, Post graduation degree.

Technical degree or diploma equal to degree or post-graduate degree.

Engineering and technology, medicine, agriculture veterinary and dairying, teaching and others.

B-IV Part A :Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups :—

The table presents the distribution of working population other than that engaged in cultivation by division, major group and minor group of the National Industrial Classification codes as given in appendix to Part II B-Economic Tables, 1971 Census.

A similar table B-IV prepared for 1961 Census was based on Indian Standard Industrial Classification (I.S.I.C) which was evolved by Directorate General of Employment and Training in 1958.

The figures for each district have been presented by males, females and persons for the total and urban areas only.

The table is supplemented by an appenidix which corresponds to table B-IV Part C of 1961. The appendix gives the distribution of workers engaged in manufacturing, processing, servicing and repairs by household industry and other than household industry. The figures are given for males, females and persons for each district for the total and urban areas.

This table will be of great use to the planners as it provides data up to the minor group NIC for various sectors of economy bringing out the differentials between rural and urban areas.

Table B-IV-Part D Industrial classification by sex and class of workers of persons at work in non-household industry/trade/Business, profession for service as main activity—

The table gives the distribution of all workers other than those engaged in cultivation and household industry. The data in the table are cross tabulated by class of workers on one side and the divisions, major groups of National Indusrital Classification on the other. In the 1971 Census workers were grouped into four classes of employment.

The table displays figures by males and females separately. The presentation is by total and urban areas only and this table corresponds to table B-IV Part B of 1961.

Table B VI Part A(i) & Part A(ii)

Part B(i) and Part B(ii) :—Occupational classification of persons at work accordihg to main activity other than cultivation classified by sex age groups and educational levels.

The table B-VI has four parts-PartA(i) and (ii) relate to non-agricultural urban workers and part B(i) and (ii) to non-agricultural rural workers.

Part A (i) and Part A(ii)disp lay the distribution of non-agricultural workers by age groups:-0-14,15-19 20-24, 25-29, 30-39, 40-49, 50-59, and 60+ for each group of National Classification of Occupation, 1968 (N.C.O.) incorporated as an appendix to Part II B. Economic tabels 1971 Census. The age distribution has been aggregated and presented for the division level of N.C.O. before its presentation for groups for each of the N.C.O. divisions. the presentation is by males, females and persons separately for the district. Part A(ii) and Part B(ii) display the distribution of non-agricultural workers by educational levels. The levels of education in respect of part A (ii) dealing with urban areas are:—

Primary

Middle

Matriculation or higher secondary

Non-technical diploma or certificate not equal to degree

Technical diploma or certificate not equal to degree

Graduate degree other than technical degree

Post-graduate degree other than technical degree

Professional degree or diploma equal to degree or post-graduate degree
Engineering and technology, medicine, agriculture, veterinary or dairying, Teaching and others;
The level of education in respect of Part B (ii) dealing with rural areas are:—
Primary
Middle

Matriculation or higher Secondary

Graduate and above

In this table educational levels (i) non-technical diploma or certificate not equal to degree and (ii) Technical diploma or certificate not equal to degree of table B-III, Part B, have been accounted for under the heading Matriculation or Higher Secondary level.The distribution of levels of education has been presented for each group of N.C.O. and is preceded by distribution at division level. The presentation is by males and females, separately for the district as a whole.

In 1961 similar information was contained in table B-VI which gave figures for urban areas only at division level and by major age groups : 0—14, 15—34, 35—59, and 60+

Table B-VII : Secondary work for persons having main activity (i) Cultivators, (ii) Agricultural l abourers, (iii) Household Industry, (iv) non-household industry, trade, business or service and (v) Non-workers classified by sex and by secondary work (i) Cultivators, (ii) Agricultural labourers, (iii) Household industry, (iv) Non—household industry, trade, business or Service

At the 1971 Census a question was asked from persons whether he was engaged in any economically productive work as an ancillary to his main activity, be it economically productive or not. Thus, persons performing household duties or students who might not have been engaged in an economically productive work as main activity and still participated in some economic activity such as helping the household in several items of work as in cultivation or in household industry or looking after the cattle were accounted for as secondary workers. Besides, the persons who had reported themselves as workers for their main activity might have been engaged in a subsidiary work.

The table gives the distribution of persons engaged in secondary work cross-classified by their main activity. The secondary work has been classified by cultivators. agricultural labourers, households industry and other than household industry, trade, business or service.

The presentation of the data is by sex for the total, rural and urban areas.

Table B-VIII : Persons classified as non-workers according to main activity cross-classified by sex, age groups and type of activity :

The table gives the distribution of male workers by main activities cross-classified by age groups : 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, and 60+ The main activities into which the non-workers have been distributed are students, household duties, dependents and infants, retired rentier and persons of independent means,beggers, vagrants, etc., inmates of penal, mental and charitable institutions and 'others'. The last category of "others" comprises mainly of persons seeking work.

The table corresponds to table B-IX of 1961 with two variants, firstly the age groups for 1961 table were 0—14, 15—34, 35—59, and 60 + and secondly the'Others' category of non workers in 1971 corresponds to the sum of the two categories of 1961 persons seeking employment for the first time and persons employed before, but now out of employment and seeking work.

C—SERIES : SOCIAL AND CULTURAL TABLES

All tables of C—Series except C-V, C-VII and C-VIII have been prepared on 10% sample (Rural). and 20% sample (urban) basis. The table C-V, C-VII and C-VIII have been prepared on full count

Table C-I Part A (based on 20% Sample)

Part A—Members of household by relationship to head of household classified by age-groups.

Table C-I Part A is based on population record and has been compiled on a two phase sampling technique. In the first phase 20% of the blocks were selected and from such selected blocks a sample of 20% Households was drawn in the second phase by random sampling. Part A of this table has been prepared for total/rural/urban population at the district level. It gives the composition of the households by relationship to the head of the households, classified by three broad age groups viz., less than 30, 30—49 and 50+. Age not stated is included in all ages. Related and unrelated members of the households and the single member of the households have been shown separately. The relationship to the heads of the households has been shown for son, brother, daughter, sister, father, mother and other male and female members, separately in this table for married persons and for other maritral status combined.

This table is of great sociological interest indicating the extent of the joint family system. The age distribution of heads of the households and their relations classified by marital status will further help in the study of the future trend of joint family. At the last census, its corresponding table C-I was prepared on 20% sample basis for rural, urban and total population separately.The relationship

to the head of the household was shown as married sons and 'other married relations' but were not classified by broad age groups.

Table C-III : Age , sex and education :

Part A—Age, sex and education in all areas.

Part B—Age, sex and education in urban areas only.

This table corresponds to table C-III, Part A and B of the 1961 Census with slight difference in educational standards and age grouping cross-tabulated into literates. In the 1961 Census, this table was prepared on a full count but in the 1971 Census on 10% sample of rural slips and 20% sample of urban slips. This table has been, prepared, separately for total and urban population as part A and part B respectively. It measures the growth of literacy in the total population as well as in the different age groups.

The test for literacy adopted at the 1971 census was 'the ability to read and write with understanding in any language'. A person who fulfilled this test was taken as literate. In case he had attained any educational standard, the highest examination passed was recorded. In part A, the educational qualifications thus recorded have been classified into six educational levels for the total population cross-tabulated by age groups 0—4, 5—9, 10—14, 15—19, 20—24, 25—34, and 35+. These six educational levels are :

1. Primary
2. Middle
3. Matriculation or Higher Secondary
4. Non-technical diploma or certificate not equal to degree
5. Technical diploma or certificate not equal to degree.
6. Graduates and above.

Part B of this table contains figures of post-graduate degree holders, technical degree holders and technical personnel, further divided into five sub-groups engineering and technology, medicines, agriculture, veterinary and dairying. teaching and others.

Table C-V : Mother Tongue :

Part A: Distribution of Languages inclusive of mother tongues grouped under each, specified in Schedule VIII to the Constitution of India.

Part B Speaker of languages/mother tongues (inclusive of mother-tongues where grouped), other than those specified in Schedule VIII to the Constitution of India.

Table C-V Part A: has two sections (i) Showing the distribution of speaker of languages (inclusive of mother tongues grouped under each) specified in Schedule VIII to the Constitution of India for district separately for total, rural and urban areas cross-classified by sex and (ii) showing the distribution of speakers of these languages for district/tahsil/town for total areas only cross-classified by sex.

Table C-V Part B presents speakers of languages/mother tongues (inclusive of mother-tongues where grouped) other than those shown under Part A for district, This table has also been presented in two sections (i) showing the speaker of these languages/mother tongues for district for total, rural and urban areas cross classified by sex and (ii) showing the distriburlon of these languages, mother tongue for total areas of district/tahsil and towns classified by sex. In both parts A and B mother tongues have been grouped in some cases under the relevant language. This has been done on the basis of information readily available or in the light of studies already made. These identifiable mother tongues which returned 10,000 or more speakers each at all India level have have been grouped in Parts A and B as shown below.

Part A: Hindi : Awadhi, Bhojpuri, Brajbhasha, Garhwali, Hindustani, Kangri, Kumauni, Maithili, Malvi, Marwari, Mewati, Pahari, Rajasthani, Marathi—Kamari Punjabi & Bagri

Part B: Bhili/Bhilodi—Kokna & Kokni & Khuna

Lahnda—Multani

All other mother—tongues falljng under part B and which returued less than 10,000 speakers each at the all India level or were not identifiable have been included in the category, 'others' last entry in Part A.

Pahari: Is a combination of various speaches spoken over long. stretches of areas where the speakers prefered to give a general name as Pahari. Similar is the case with Kuki appearing in Table C—V Part B marked by asterik there in.

Table C—VII Religion

This table corresponds to tables D—II of 1951 and C—VII of 1961 Censuses, It has been prepared for districts/tahsils, urban agglomeration, and city/town separately on full count. Information has been given for total, rural and urban areas cross—classified by sex. This table gives information in respect of persons professing six main religions separately (Buddhist, Christians, Hindus, Jains. Muslims and Sikhs) along with other religions and parsuations and religions not stated.

Table C—VIII : Scheduled Castes and Scheduled Tribes :

Part A : Classification by literacy and industrial category of workers and non-workers according to main activity among scheduled castes :

This table corresponds to table D-III of 1951 Census and table C-VIII Part A of the 1961 Census.In 1961 Census, information was given up to the district level whereas in 1971 the details are shown down to tahsil/urban agglomeration city/town level.The table is prepared for total, rural and urban population separately on full count, cross-classified by sex. This table gives total population of the scheduled castes and their distribution by illiterates, literates and educated persons workers and non-workers. The workers are further classified into nine industrial categories. This is the main table which provides broad socio-economic data about the scheduled castes.

This table has been split up into two parts. Part A covers scheduled castes andPart B, scheduled tribes. Since there is no scheduled tribes in Punjab State, obviously, Part B has not been presented.

Information in respect of scheduled castes classified by literate and educated persons and illiterates is given in the appendix to this table.

In addition to this a number of special tables showing data for each scheduled castes are also given.

Special Tables on Scheduled Castes :

There are six special tables relating to scheduled castes which have been complied on full count. These are the micro tables portraying a crystal picture of the socio-cultural and socio-economic conditions of the scheduled castes in respect of district and may be of great value in safe-guarding and promoting interests of this weaker section of the population.

For presenting data in these special tables, all scheduled castes (37 in number) have been arranged in alphabetical order.

All such persons who did not return the name of the caste to which they belonged and have supplied vague returns like 'Harijan', Achhut etc., in the Individual Slip, were clubbed together under 'Unspecified'.

Table SC-I : Industrial classification of persons at work and non-workers by sex for scheduled castes (for each caste separately)

Part A : Rural
Part B : Urban

Part A of this table corresponds to data given in table SCT-I for the 1961 Census.

The table has been prepared for all scheduled castes at district level. Persons of each scheduled caste have been classified into workers under nine industrial categories and separately as non-workers under category X.

Workers have been further classified into four broad categories :—

i) Cultivators

ii) Agricultural Labourers

iii) Household Industry, and

iv) Other Workers.

All persons who were workers but not engaged in cultivation, agricultural labour or household industry have been classified as 'other workers',this would include factory worker those working intrade,transport, all government servants, municipal employees, teachers,mining workers,political and social workers, building labourers etc. In fact all types of economic activity not being covered by cultivation, agricultural labour or household industry comes under 'other' category. Worker engaged in plantation or forestry have not been treated cultivators or agriculturals labourer but as 'other' category of workers. Part B of this table contains information for urban areas on the same pattern as in Part A for rural areas.

Table SC-II : Age and marital status for scheduled castes (Castewise)

This table corresponds to table SCT-II Part A of 1961. Age data for each caste has been shown in broad age groups of 0—14, 15—44 and 45 and above by sex further classified according to marital status viz., never married, married, widowed, divorced or separated and unspecified status. The abbreviations used are :—

N.M. : Never married
M. Currently married

W : Widowed
S : Separated orDivorced.

The castes for which there have been no returns, have been omitted in this table.

Table SC-III : Education for scheduled castes (Castewise)

Part A : Urban

Part B : Rural

Part A of this table corresponds to table SCT-III Part A(i) for the 1961 Census. The data have been presented for each district for urban areas only.

The classification of educational level as adopted at the 1971 Census is given below :

1. Literate *(without educational level)*
2. Primary or junior basic
3. Matriculation or higher secondary
4. Non-technical diploma not equal to degree
5. Technical diploma not equal to degree
6. University degree post-graduate degree other than technical degree
7. Technical degreee or diploma equal to degree or post-graduate degree.

Part B of this table corresponds to table SCT-III Part B(i) forthe 1961 Census. The data have been presented for rural areas. On the same jurisdictional units as shown in Part A for the urban areas: Literates in rural areas have been been divided into the following four educational levels :

1. Literate (without educational level)
2. Primary or junior basic.
3. Matriculation and above but below graduate
4. Graduate and above.

Figures for illiterate have also been shown in this table.

Table SC-IV : persons not at work classified by sex type of activity and educational levels for scheduled castes (not castewise) :

The table corresponds to table SC-I of the 1961 Census and covers all the scheduled caste population unlike the previous tables giving separate information for each scheduled caste. The data are presented for total, rural and urban areas separately for the district.

The non-workers have been classified as per 1971 Census concepts according to their main activity as follows :

1. Student
2. Household duties
3. Dependents and Infants
4. Retired, rentier and persons of independent means
5. Beggars, vagrants, etc.
6. Inmates of penal, mental and charitable institution.
7. Others.

Various categories of non-workers have been further classified according to their educational levels as indicated below :

1. Literates (without educational level)
2. Primary or Junior basic

3. Matriculation and above but below graduate.

4. Graduate and above.

Figures for illiterate are also given in the table.

D—SERIES MIGRATION TABLES :

This series presents data on migration. The data have been incorporated at district level :

Table D-I : Population classified by place of birth

Data with reference to place of birth have been furnished in table D-I. Its two appendices give a break-up of population by sex and rural/urban status of the places of enumeration in the district as also that of the places of birth. In 1961 it was considered rural or urban as at the time of enumeration, whereas in 1971 it was considered rural or urban as at the time of birth of the respondent.

There are two appendices which give information about inter-district and inter-state migration.

The total includes age-groups 0—14. 60+ and age not stated.

Table D-V : Migrants workers and non-workers according to main activities classified by place of last residence :

This table corresponds to table D-VI of the 1961 Census which was prepared with reference to the place of birth whereas at the 1971 Census (place of last residence) is considered more relevant for presenting this table. The table shows sex-wise distribution of migrant workers and non-workers in each of the nine broad industrial categories according to the place of last residence in rural and urban areas in the case of our country's residents. In the case of migrants whose last place of residence is outside India only total figures are shown.

All migrants have been divided into two broad streams of main activity namely (1) as workers and (2) as non-workers according to their main activity.

This table indicates the industrial categories attracting migrants and also the movement of migrants from rural to urban areas and vice-versa. The table presents data for total and urban areas only.

Table D-VI : Migrants classified by place of last residence, age-group, duration of residence and marital status

This is a new table included in the 1971 Census tabulation plan which portrays the sociological aspects of the migrant population. It gives sexwise distribution of migrants by place of last residence according to age-groups, marital status and duration of residence. The table presents data for district and city urban agglomeration. The distribution pattern of migrants according to last residence is the same as given in table D-II with the modification that data about countries beyond India have been clubbed together under the heading 'outside India'. The duration of residence is classified into less than 1 year, 1—9 years, and 10 years and above and the age-groups adopted are 0—14, 15—19, 20—24, 25—49, 50 years and age not stated. The marital status has been classified as :

1) Never married

2) Married

3) Widowed and divorced

E—SERIES : ESTABLISHMENTS TABLES

All the tables in this series have been prepared on full count basis.

Table E-I : Distribution of establishment by broad types

This is a new table prepared for the first time at 1971 Census. It has been prepared for total, rural and urban areas and gives distribution of all establishments by three broad types viz. (i) manufacturing, processing or servicing establishments, (ii) trade or business establishments and other, (iii) establishments in each of the government or quasi government, private and co-operative sectors of the economy.

The manufacturing, processing or servicing establishments have been further classified as registered factories, unregistered workshops and household industries. The trade or business establishments have been classified as whole-sale retail or others. Lastly the 'other establishments' have been further classified as educational institutions, public health institutions and others.

Table E-II, Part A : Distribution of manufacturing, processing of servicing establishment other than household Industries, classified by registered factories, unregistered workshops and size of employment :

This table shows distribution of manufacturing, processing or servicing, establishment other than household industries for total, rural and urban areas separately. It gives useful information about the size of employment and the number of units under each of three categories (a) registered factories, (b) unregistered workshops, (c) household industries in each division/major group of NIC 1970.

Table E-II, Part B : Distribution of manufacturing, processing or servicing establishment other than household industries classified by industry fuel/power or manual used and size of employment :

Table E-II, Part C : Distribution of households industry establishment classified by industry fuel/power used and size of employment

In this table, the number of factories and workshops has been furnished for total, rural and urban areas and by division/major group of N.I.C. 1970 and by size of employment. This also gives information about the kind of fuel or power used by broad employment size groups in total, rural and urban areas separately.

All these tables i.e., E-II Parts A, B & C correspond to E-II of 1961 Census table.

Table E-III : Distribution of trade/commercial establishments classified by the type of business or trade size of employment

This is a new table and has been prepared for the trade/commercial establishments, classified by the type of business or trade and size of employment for total, rural and urban areas. All trade/commercial establishments have been further classified under each division/major group of N.I.C. 1970.

Table E-IV : Distribution of establishment (other than manufacturing, processing, servicing or business and trade establishments) by size of employment for total, rural and urban area in each division/major group of N.I.C. 1970

This table has been attempted for the first time in 1971 Census. It provides frame for the establishment not covered by table E-II Parts A and B and E-III.

HOUSING TABLES

Tables in this series are based on 20% sample of census houses. There are four tables based on houselisting data out of which the following tables have been processed on computor and presented in this publication.

Table H-I : Census houses and the uses to which they are put

The data given in this table relate to Census houses and the uses to which they are put separately for rural and urban areas. Total number of census houses is given in column 3.

This table more or less corresponds to table E-I of 1961 census. However, the data in table E-I of 1961 Census were presented down to tahsil level but at the 1971 Census it has been given only at the district level. Data have also been presented separately for each city, this time.

Table H-II : Distribution of census houses by predominant material of wal land predominant material of roof

This table has been prepared for the same units as in table H-I. It gives structural condition of the houses according to type of material used for wall and roof. This table corresponds to table E-IV of 1961 with the difference that in 1971 this table has been prepared for census houses whereas in 1961 households living in census houses were cross-classified by material of wall and roof. The table has been supplemented with an appendix (Appendix to Table H-II) which cross classifies material of wall of roof.

Table H-III : Households classified by number of rooms occupied.

This table corresponds with table E-V of 1961 except that additional information for households with unspecified number of rooms is given in 1971. Institutional households have not been taken into account for purposes of compliation of this table.

TABLE A-1 AREA, HOUSES AND POPULATION

District/Tahsil/Urban Agglomeration/ Town	Total Rural Urban	Area in Km2	Popu-lation per km2	Number of villages		No. of Towns	No. of occupied Residential houses	No. of House-holds	Popuation		
				Inhabited	Un-in habited				Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12

Notes:—1. The density figures of urban areas of Tahsil/District have been workerd out using the area figures corrected up to two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. For total and rural, the density is worked out on area figures corrected up to one place of decimal.

2. Total area figures given in Col.3 against District represent provisional "Geographical Area" figures supplied by Surveyor-General. The urban area figures are based on the area figures of individual towns supplied by local bodies. The rural area for a District has been arrived at by substracting the urban areas from the Provisional ' Geographical Area" supplied by the Surveyor-General. The rural area figures of units lower than the District do not and up to the area figures of the District because the rural areas of the units lower than the District have been computed from the "Land use" area supplied by the State Director of Land Records.

3. For arriving at Tahsil/District urban area figures, the area of statutory towns have been taken into account since the area of out-growths were not available in case of urban Agglomerations. The area of out-growths have been accounted form rural. Further, the density at Tahsil/District levels have been worked out on the areas so obtained.

4. The following abbrevations have been used for the status of a town:—

M.C. —Municipal Committee

N.A. —Not Available.

O.G. —Out-growth.

TABLE A-1 AREA, HOUSES AND POPULATION

APPENDIX I

Statement showing the 1961 Territorial Units Constituting the present set up of Punjab State

District/Tahsil (1971 Census)	1961 Territorial Unit	Area Added		Name of District/ Tahsil from which area is subtracted	Area which has been Subtracted		Name of District/ Tahsil to which area is added	Net gain/ Loss +(Gain) —(Loss) in km2
		Name	Area in km2		Name	Area in km2		
1	2	3	4	5	6	7	8	9
1. Gurdaspur District	Gurdaspur District	29 Villages of Hoshiarpur District	53.1	Hoshiarpur District	3 Towns— Bakloh, Dalhousie and Dalhousie Cantt. of Pathankot Tahsil	14.3	Chamba District of Himachal Pradesh	+38.8
Pathankot Tahsil	Pathankot Tahsil	One Village Bela Mastgarh (H.B. No. 408) of Dasuya Tahsil	1.1	Dasuya Tahsil of Hoshiarpur District	3 towns— Baklol, Dalhousie and Dalhousie Cantt. of Pathankot Tahsil	14.3	Chamba District of Himachal Pradesh	—13.2
Gurdaspur Tahsil	Gurdaspur Tahsil	26 Villages of Dasuya Tahsil	48.1	Dasuya Tahsil of Hoshiarpur District	..	..	..	+48.1
Batala Tahsil	Batala Tahsil	2 Villages— Zahidpur (H.B. No. 482) and Khawaja Bains (H.B. No. (484) of Dasuya Tahsil	3.9	Dasuya Tahsil of Hoshiarpur District	..	..	..	+3.9

Note—(1) Only those units which have undergone jurisdictional charge since 1961 census have been shown in this appendix.

(2) Area figures for entire Tahsil and Districts pertain to 1971 Census while area figures for portions of Tahsils exhibiting the transfers of villages, etc. based on 1961 Census.

Notes:— As the area of Outgrowth are not available, the area figures of urban agglomerations have been shown by "N.A." However, for arriving at all classes and other size classes area totals, area of towns have been taken into account.

The following abbrevations have been used for status of town.

M.C.	—	Municipal Committee
M.	—	Municipality
C.L.	—	Civil Lines
S.T.C.	—	Small Town Committee
N.A.	—	Not available
O.G.	—	Out growth

SECTION B

TABLES ON VILLAGE DIRECTORY AND P.C.A. DATA

FLY-LEAF

SECTION B : Tables on Village Directory and P.C.A. data

This section incorporates ten tables based on village level data. These tables were generated by the Data Processing Division, Office of Registrar General, India, New Delhi from the punched cards, punched from the village Directory and Primary Census Abstract published in District Census Handbook (Part A & B) which has already been released. The list of these tables is furnished below :

Table 1	—Distribution of villages with reference to area.
Table 2	—Distribution of villages by select amenities, infra-structure and land—use data with reference to distance from nearest town.
Table 3	—Distribution of villages by select demographic characteristics and distance range from nearest town.
Table 4	—Average size of village by distance range from the nearest town by size class.
Table 5	—Distribution of villages by size class of population having select servicing institutions and demographic characteristics.
Table 6	—Distribution of villages by number of hamlets and percentage of Scheduled Caste and Scheduled Tribe population.
Table 7	—Distribution of villages by density of population per hectare
Table 8	—Distribution of villages by proportion of S.C. & S.T. population.
Table 9	—Villages by percentage of irrigated area to total cultivated area and density of population per hectare.
Table 10	—Villages by percentage of literacy, having and not having telephone with reference to neare st town.

TABLE 1

DISTRIBUTION OF VILLAGES WITH REFERENCE TO

AREA (IN HECTARES)

District/Tahsil	Area (in Hectares)	No. of Villages

SECTION—C

ADMINISTRATIVE WELFARE

AND

DEVELOPMENT STATISTICS

FLY LEAF

SECTION C—ADMINISTRATIVE, WELFARE AND DEVELOPMENT STATISTICS

In this section 51 tables which were uniformally available for all the districts, have been incorporated. The list of tables is furnished below:—

List of tables on administrative, welfare and developmental statistics.

Sl. No.	Reference No.	Particular of table
1	1.01	Minimum and maximum temperature by month during 1961-71.
2	1.02	Rainfall statistics (in mm) by months and years.
3	3.102	Roads(by nature of materials) as maintained by public authorities.
4	3.103	Major Roads, 1970
5	3.106 3.107	Polymetric table of distances(in kms) of towns
6	3.110	Rest Houses & Bungalow
7	3.111	Railway stations in the district, amenities provided and distance from district headquarters.
8	3.201	Sources of irrigation
9	3.203	Gross area irrigated (by crops)
10	3.206	Towns and villages connected by electricity.
11	3.401	Banks and their branches, 1970.
12	3.501	Medical and Public health institution
13	3.501(a)	Hospitals/Dispensaries and related statistics 1970.
14	3.502	Medical and para-medical personnel.
15	3.504	Public health activities (vaccination, Maleria control, (B.C.G.)
16	3.506	Drinking water
17	3.506(a)	Villages by sources of drinking water as in 1969-70.
18	3.602	Collegiate and technical institutions(including Arts, Science, Commerce, Industrial schools, Agriculture etc.) together with the strength of teachers and students.
19	3.604	Library and Reading room facilities in the district.
20	3.706	Newspapers, magazines and periodical published in the district during 1970.
21	4.101	Land-use pattern as in 1970—71.
22	4.102	Single and Double cropped area.
23	4.103	Area and out-turn of principal crops
24	4.104	Crop and irrigation.
25	4.108	Total Rural and Urban population per 100 hectares of area under food-grains and net area sown during last three decades.
26	4.109	Density of cultivators and agricultural labourers per 100 hectares of net area sown in 1961 and 1971.
27	4.110	Rainfall, area sown and irrigated density in 1970.
28	4.114	Agricultural tools and implements.
29	4.201	Livestock and poultry.
30	4.202	Animal Husbandry and poultry farm managed by Government.
31	4.204	Veterinary institutions.
32	4.207	Livestock morbidity/mortality by diseases.
33	4.401	Forest area by category of control.
34	4.404	General progress of afforestation.
35	4.406	Major and minor forest products.
36	4.702	Joint stock companies as on 31-3-70.
37	4.704	Hats and markets.
38	4.705	Number of shop-cum-residence, business and Commercial houses in 1970(on the basis of houselist).

SECTION C—ADMINISTRATIVE WELFARE AND DEVELOPMENT STATISTICS

Sl. No.	Reference No.	Particular of table
39	5.101	Land revenue/collections.
40	5.102	Land tenure system and reform
41	5.103	Consolidation of holdings
42	5.108	Distribution of holdings by size group.
43	5.501(a)	Criminal justice and details of selected offences.
44	5.601	Civil justice
45	5.701	Machinery for maintenance of law and order-police stations
46	5.702	Strength of police force in the district during 1961-70.
47	5.901	Excise and Motor Spirit tax
48	5.902	Receipt of sales tax, Entertainment tax, and stamps
49	6.101	Local bodies and organs of democratic decentralisation
50	6.106	Receipt and expenditure of Gram Panchayat.
51	6.202	Yearwise income and expenditure of Municipalities.

TABLE

MINIMUM AND MAXIMUM TEMPERATURE

Station	Year	Temperature	All Seasons	January	February	March
1	2	3	4	5	6	7
Pathankot	1961	(a) Mean Maximum	29.0	19.2	18.8	27.6
