ACKNOWLEDGEMENTS

At the 1971 Census it has been our endeavour to compile both Census and non-Census statistics at the village and block level in a uniform manner. To ensure that these statistics are available to the users as soon as these are sifted and compiled, the District Census Handbook has been divided into three parts. This is the first part of the series, the Village and Town Directory, which mostly comprises Non-census data.

We are deeply indebted to the State Government for their ever willing and prompt help to us at all stages. The District Census Handbooks are being published by us on their behalf. I wish to express my gratitude to Sri M. Lal, Chief Secretary to U. P. Government, for all the guidance and facilities afforded to us in the conduct of Census in this State. I am also grateful to Sri P. C. Pandey, Secretary, G. A. D. (Now Commissioner, Rohilkhand Division, Bareilly) and his successor, Sri A. P. Dixit, for the facilities given by them in sorting out various administrative matters relating to the publication of these Handbooks. I am extremely thankful to the District Officers for their whole hearted co-operation in furnishing the desired information and the District Census Officers for their hard work and sustained efforts in collecting the same.

The programme for the printing of District Census Handbooks has been heavy indeed, more so as three parts are being published, one in Hindi and two in English. The arrangements, made by Sri A. Dar, Superintendent, Printing and Stationery, U. P., Allahabad for the printing of these volumes, are thankfully acknowledged. Joint Superintendent, Sri J. S. Gupta, I/c New Government Press, Aishbagh, Lucknow has also been extremely helpful in bringing out the maps.

In the Census Office, everyone has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I am grateful to Sri K. S. Sinha, Deputy Director, Headquarters, the Tabulation Officer, and other staff of the Technical Section, who have shared the burden and helped in bringing out these Handbooks.

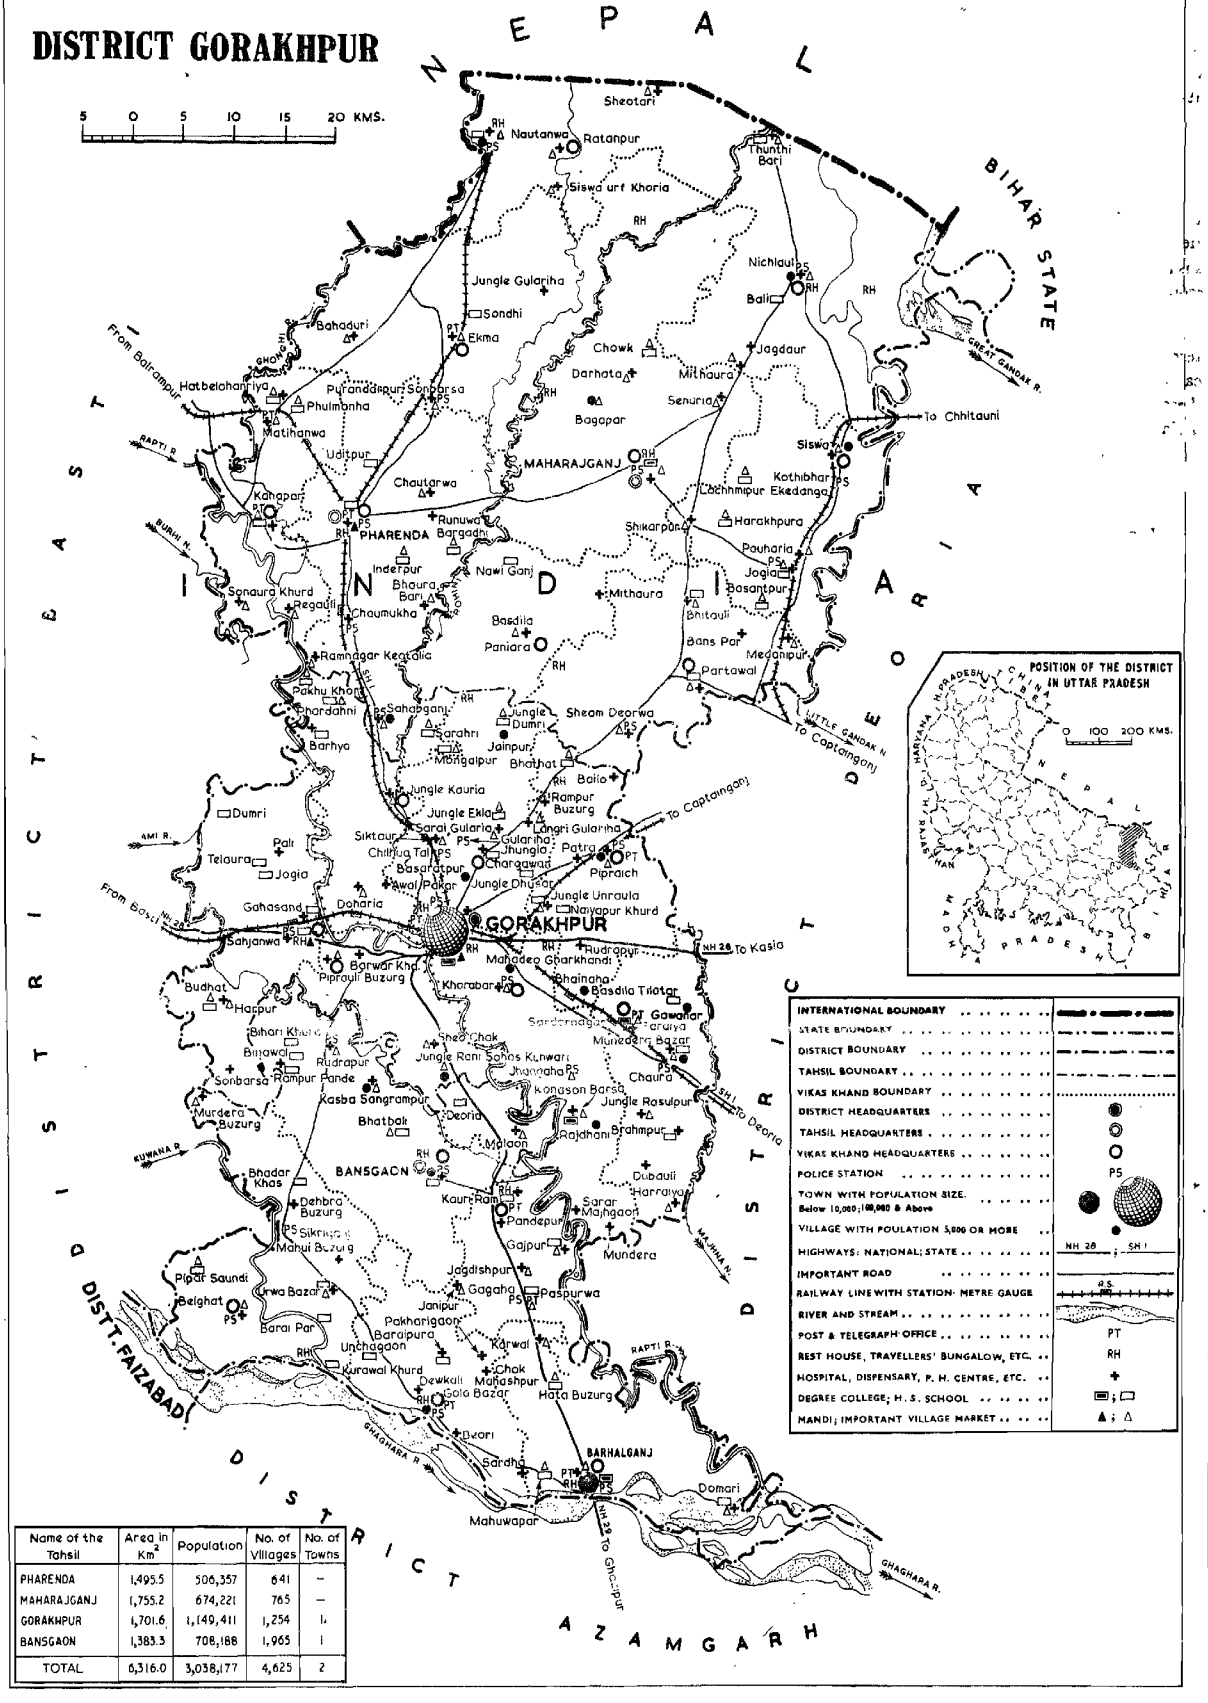

I must also express my gratitude to Sri A. Chandra Sekhar, Registrar General, India, Sri K. D. Ballal, and Dr. B. K. Roy Burman, Deputy Registrars General and Sri K. K. Chakravorty, Central Tabulation Officer for their constant help and guidance despite their own heavy preoccupations.

INTRODUCTORY NOTE

1. History of District Census Handbook.

It has been customary to bring out vital statistics at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. Such information was, however, not brought out in 1901, Village Directories were prepared for all districts in 1911, but could be published only for thirteen due to the out break of the First World War. At the 1921 Census, these were published for all districts in the form of District Census Statistics. In 1931 villagewise statistics were compiled but could not be published owing to financial stringency, resulting in loss of valuable data. At the 1941 Census, restricted tabulation was undertaken in the wake of the Second World War, but the utility of Census statistics, was recognised and these were published. The District Census Handbook in its present form was brought out at the 1951 Census, and was published alongwith another volume titled District Population Statistics. In 1961 Census, attempts were made to render the District Census Handbook more informative, as in addition to Census data pertaining to each village, data about its level of development and amenities were also collected. At the 1971 Census, efforts have been made to compile both Census and non-Census statistics at village/town level in a uniform manner with an enlarged

As the District Census Handbook makes Census statistics available for the smaller territorial units, it is constantly referred to for several purposes of administration, demarcation of electoral constituencies, planning and development and so on. To ensure that these statistics are available to the users early, the District Census Handbook has been decided for being published separately into three parts :

Part A : Town and Village Directory

Part B : Village and Town-wise Primary Census Abstract

Part C : Analytical Report and Administrative Statements—District Census Tables.

2. Scope of District Census Handbook.

Part A of the Handbook comprises the Town and Village Directory. In Village Directory, particulars of amenities in regard to Education, Medical, Power supply, Drinking water supply, Post and Telegraph and Communications have been given. Besides, it contains land-use statistics, days of weekly markets and places of religious, historical or archaeological interest in each village. The Town Directory comprising seven statements throws light on the status of the town, its origin, growth of population, functional category, location and physical aspects, Municipal finances, Civic and other amenities, Medical and Educational facilities and statistics pertaining to Trade, Commerce, Industry and Banking. Apart from these, it also gives the distribution of population of a town by religion and Scheduled Castes/Scheduled Tribes.

Part B presents data down to village level for rural area and block level for towns. It contains the Primary Census Abstract which incorporates figures of area, number of occupied residential houses and households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe, literate population, working population by nine broad industrial categories of cultivators, agricultural labourers, workers engaged in forestry and live stock etc., in mining and quarrying, in manufacture or repair, in construction, in trade and commerce, in transport and communications and in other services as well as the non-working population.

Part C deals with the administrative statistics pertaining to the district in all fields of development. The Census tables pertaining to language, religion, migration and economic activities are being reproduced in this part. A write up indicating changes in socio-economic and demographic characteristics of the district during the last decade is also being included in it.

3. **Town Directory**—given in Part A presents data for all the Census towns of the district. There is no uniformly accepted definition of a town. The historical, political, cultural and administrative considerations are generally taken as criteria for rural-urban classification. An urban area, in contradistinction to the rural, comprises a large majority of inhabitants who are engaged in industrial and non-agricultural activities. In addition to its size, population and occupational characteristics, an urban area provides such facilities as transportation, banking, commercial and technical services, community facilities and other civic services. According to the State Government, all Municipal Corporations, Municipal Boards, Cantonment Boards, Notified Areas and Town Areas are considered as towns, and according to their average annual income from their own resources, these have been classified into different classes of local bodies. The Criteria adopted under the Census Operations is slightly different from the State Government. In 1971 Census all places satisfying the following conditions have been treated as towns :—

1. All Municipal Corporations, Municipal Boards, Cantonments & Notified Areas.
2. All localities though not in themselves local bodies but forming part of a city or town agglomeration.
3. Other places satisfying all the three under mentioned conditions :
   (i) Population exceeds 5,000.
   (ii) At least 75% of the male working population engages in non-agricultural pursuits, and
   (iii) The density of population exceeds 1,000 persons per sq. mile (386 persons per sq. km.)

The information given in the Town Directory relates to the year 1969. The data has been presented in the following seven statements :

(a) **Statement I**—This statement presents the population of the towns at the end of each decade from 1901 to 1971, the Civic status of the towns and their functional categories at 1961 and 1971 Censuses. The functional categories given in columns 14 and 15 have been determined on the basis of the predominant functional character of the town, to derive which the working population under the broad industrial categories has been regrouped into five broad functional classifications.

(i) Primary Activities—Categories I, II, III & IV
(ii) Industry—Categories V (a), V (b), and VI
(iii) Trade and Commerce—Category VII
(iv) Transport—Category VIII, and
(v) Services—Category IX

For each town, the percentage of workers under each of the aforesaid classes to tota workers is worked out, and where the workers under one of the classes comprise 40% or more of the total workers, the town is taken as mono-functional. In other cases, the next predominant occupation is taken into account and if the total of the two comes to 60

or above, the town is designated as bifunctional. If the total does not yield 60% the third predominant occupation is also taken and such a town is treated as multi-functional.

The notations used in column 5 of the statement are :

C—Municipal Corporation
M—Municipal Board
NAC—Notified Area Committee
TC—Town Area Committee
CB—Cantonment Board

(b) **Statement II**—This statement gives the physical aspects and location of towns. Besides, the information relating to staple food, distance from nearest town, days of market/hat and places of religious, historical or archaeological interest is also given in the statement. If the village is uninhabited or power is being used for agricultural purpose only, these characteristics have been indicated in the remarks column.

The land use statistics are constantly in demand for Agricultural production programme. These statistics have been given in columns 11 to 15 under the headings (i) Forest, (ii) Irrigated, (iii) unirrigated, (iv) Cultivable waste and (v) Area not available for cultivation. (a) According to their area in acres the villages have been stratified in the following table :

Table 5

Area (in acres)	No. of Villages	Percentage
50 acres or less	457	9·91
51-100	754	16·35
101-200	1,091	23·66

It is evident from the above table that the number of villages having an area of more th n 100 acres but not more than 500 acres are highest claiming the percentage of 55·65. Thereafter, the number of villages goes on decreasing as the size of villages increases. There are 6 villages having an area exceeding 5,000 acres. As regards smaller villages, there are 457 having an area of less than 50 acres.

(b) The distribution of villages having educational institutions is given in the following table :—

The above table shows that the largest number of institutions 43·14% exist in the villages situate between 101 to 200 kilometers from the nearest town. The villages which lie within a radius of 26 to 50 kms. have the least number of institutions 30·74%.

(c) 53 villages in district Gorakhpur have hospitals. If all kinds of medical institutions including dispensaries, health centre etc. are taken into account, 178 villages out of 1,614 have medical institutions.

The following table presents the number of medical institutions per 100 Sq. Kms.

Table 7

Name of Tahsil	Total Area (in Sq. Kms.)	No. of medical institutions of any kind per 100 Sq. Kms.

Bansgaon	1,374·12	4
Gorakhpur	1,645·45	3

*Total	4,614	1,018	22·71

*Total is exclusive of 11 villages whose information is not available.

The percentage of electrified villages to the total villages is highest 51·47 for those situate within a radius of 5 kilometers and the minimum percentage of 14·77 is for those situate at a distance 26 to 50 kms. from the nearest town. It is evident from the above table that the percentage of electrified villages to total villages gerenally decreases with the increase

of distance from the nearest town. 51 villages in the distance group of 101-:00 are not electrified.

As many as villages of the district are connected by rail, out of the total number of 2,614 villages. 36·28% are connected by pucca road and 7,15% by kachcha and pucca roads. The percentage of villages having only kachcha roads is 15·06.% The nature of communications have been shown in the following table, where the villages have been classified according to their distance from the nearest town.

It is evident from the above table that the villages nearest to the town have better facilities of communications.

(f) There are in all 319 post offices in the rural areas of the district. An average, 1 post office caters to the need of about 14 villages. The number of Post Offices per 100 Sq. kms. in the various tahsils have been shown in the following table :

Table 10

Bansgaon	1,374·12	8
Gorakhpur	1,645·45	5
