PREFACE

The District Census Handbook which was first introduced under the 1951 Census has by now assumed a place of singular importance. Though compiled by the Census Department, it is actually a State Government publication brought out for every district of the State/Union Territory. The 1951 and 1961 Series of District Census Handbooks have become so popular among the general public, researchers, demographers, administrators, etc. that they have come to stay as a regular feature of every census. While continuing the publication under the present census, efforts have been made to enlarge its scope and enrich its contents in several ways. As a matter of fact, the 1961 District Census Handbook included not only the Census data but also some important non-census data of the district. This, however, resulted in a considerable delay in its publication. To avoid any such contingency it has been decided to bring out the District Census Handbook this time in three parts, viz:

Part A: Town and Village Directory.

Part B: Village and Town-wise Primary Census Abstract.

Part C: Analytical Report and Administrative Statements and District Census Tables.

The present Handbook of Goa, Daman and Diu districts is the first of its kind to present the Census data on a pattern uniform to that of the rest of the country. As a rule, three separate District Census Handbooks should have been brought out, but since the size of the three districts, and in particular that of Daman and Diu districts, is so small that a separate volume for each of them is considered unnecessary. Again, this volume presents data in parts A and B only. It is proposed to bring out Part C for all the three districts together in a separate volume at a later date, since the collection, compilation and scrutiny of the statistical data from different agencies as required in Part C is likely to take a considerable time. It is not desirable to hold up publication of Parts A and B till then.

In part A of the volume, information regarding the status of each town, its location, physical aspects, municipal finance, civic and other amenities, trade and commerce, industry, banking etc. is provided. Then follows the Village Directory which presents with the help of abbreviations information on certain basic and essential amenities existing in the village such as educational institutions, public health centres & medical dispensaries, supply of drinking water, electricity, transport and communications, weekly markets, etc. Thus the Town and the Village Directories together with the Taluka map should provide a complete index and statistical guide to each town and village in a Taluka. It may be noted that the village boundaries shown in the Taluka-maps are provisional, subject to modification on completion of the Cadastral Surveys of the Territory. The Taluka-maps do not show the location code numbers of villages which have been included in the Urban Agglomerations or other urban towns.

Part B is the vital part of the Handbook presenting some very important data collected under the Census. It gives village-wise and town-wise particulars of area, households, population, Scheduled Castes and Scheduled Tribes literacy and a broad categorisation of the workers. To facilitate reference, information in this Primary Census Abstract is supplemented by an alphabetical list of villages in each taluka.

The information presented in the Town and the Village Directories had to be collected from a variety of sources. The Primary Census Abstract is based on the manual sorting of census slips done in the Regional Tabulation Office specially set up here for a period of eight months. The maps have been drawn in my office.

This Handbook is the product of hard toil and labour of several persons in my office. In particular I wish to place on record my grateful appreciation for the strenuous work put in by the following members of my staff in the preparation of this volume.

1. Shri N. Y. Gore, Asstt. Director of Census Operations.
2. Shri D. P. Naik, Asstt. Director of Census Operations, (Tabulation).
3. Shri S. P. Desai, Tabulation officer.
4. Shri D. V. Nagappanavar, Statistical Assistant.
5. Shri M. G. Bandodkar, Investigator, (Cartography).

My thanks are due to Shri Peres D'Costa, Manager, Government Printing Press, Panaji for the personal attention he paid to the printing of this book.

Shri K. D. Ballal, I.A.S., Deputy Registrar General, (Census) and Dr. B. K. Roy Burman, Deputy Registrar (Social Studies) provided guidance in this work which is gratefully acknowledged.

Lastly, I must confess that but for the very keen interest shown by Shri A. Chandra Sekhar, I.A.S., Registrar General, India, in our work and the encouragement received from him from time to time, this volume could not have been brought out so early. If any degree of competence and efficiency has gone into this publication, it is solely due to his invaluable guidance. Responsibility for the deficiencies of this Handbook is however my own.

S. K. GANDHE

Director of Census Operations
Goa, Daman & Diu and Dadra & Nagar Haveli

Panaji,
July 3, 1972.

PART A OF THE DISTRICT CENSUS HANDBOOK OF GOA, DAMAN AND DIU DICTRICTS

Town and Village Directory

INTRODUCTORY NOTE TO PART 'A' OF THE DISTRICT CENSUS HANDBOOK

I — BACKGROUND

1.1 In the history of Indian Census the District Census Handbook was for the first time published in 1951. The Primary Census Abstract presenting the basic Census data for each village/ward of Town of every District enhanced very considerably the utility of this publication so much so that this district-level publication has now become an indispensable part of the plan of Census publications in the country. The District Census Handbook of 1961 Census included, besides the Primary Census Abstract, some of the important Census tables down to the taluka level. As a matter of fact, the 1961 District Census Handbook included not only the Census data but some important non-census data of the district also, like land utilization, cropping pattern etc. Unfortunately this extra innovation resulted in a considerable delay in publication of the District Census Handbooks of 1961 Census in some of the States, thus restricting the utility of the publication. Drawing upon such experiences, it has now been decided that the District Census Handbook under the 1971 Census should be brought out in three parts, namely:

Part A: — Town and Village Directory

Part B: — Village and Town-wise Primary Census Abstract.

Part C: — Analytical Report and Administration Statements and District Census Tables.

1.2 This volume presents data on Parts A and B. Part C is proposed to be brought out at a later date.

As a general rule, a separate District Census Handbook is brought out for each district. In the case of this Territory, however, the size of all the three districts, and particularly that of Daman and Diu districts, is so small that a separate publication for them is considered unnecessary. It has, therefore, been decided to bring out one publication which will cover Part A (Town/Village Directory) and Part B (Primary Census Abstract) of all the three districts of Goa, Daman and Diu. Part C in respect of all the three districts will again be published in one volume.

1.3 The area now comprising the Union Territory of Goa, Daman and Diu was under the Portuguese Rule upto 19-12-1961 when it was liberated and formed into the Union Territory of Goa, Daman and Diu.

II — BRIEF HISTORY OF CENSUS IN GOA

2.1 Taking a historical retrospective of Census in Goa it is revealed that the first ever organised Census in this Territory was taken in 1830, but no publication about the same is now available. However, table No. 142 appended to the Census Volume of 1881 gives the population of Goa, Daman and Diu as 406,563 in 1830.

2.2 A second attempt to hold Census appears to have been made in 1878. However, in this case also no data are available except for Table No. 141 appearing in the Census Volume of 1881, which indicates the population of Goa, Daman and Diu as 442,885 in 1878.

2.3 The third attempt to take a population Census was made in 1880 but that also seems to have been left incomplete. A fresh Census was subsequently ordered and held on 17th February 1881. From then onwards, regular Censuses appear to have been held in the Territory. The population Censuses were held by the erstwhile regime in the years 1887, 1900, 1910, 1921, 1931, 1940 and 1950. The 1960 Census of Goa, Daman and Diu was conducted by the former Portuguese administration, but the tabulation of data collected therein was done in the Office of the Registrar General, India, New Delhi, on the lines of the tabulation plan adopted for the rest of the country.

2.4 The reference dates of the various Censuses of Goa, Daman and Diu and that of India are given below for the sake of comparison.

TABLE No. 1

"Statement showing the various Census reference dates in Goa, Daman and Diu and in India"

Census Year	Reference date in Goa, Daman and Diu	Reference date in India
1	2	3
1881	17th February 1881	17th February 1881
1887	31st August 1887	—
1891	—	26th February 1891
1900/1901	Night of 30th November — 1st December, 1900	1st March 1901
1910/1911	Night of 30th-31st December, 1910	10th March 1911
1921	Night of 18th-19th March, 1921	18th March 1921
1931	26th February 1931	26th February 1931
1940/1941	15th December 1940	1st March 1941
1950/1951	Night of 14th-15th December 1950	1st March 1951
1960/1961	Night of 14th-15th December 1960	1st March 1961

2.5 It may be interesting to note that so far as Goa, Daman and Diu is concerned, the practice of presentation of census data for the lowest administrative unit has been in vogue almost from its very inception. It may, however, be added that the census data was not presented separately for each and every village (known as Aldeia in Portuguese) but for a «Freguesia» which may be equal to a part of an «Aldeia», or an «Aldeia», or a group of "Aldeias". A "Freguesia" was the administrative jurisdiction of a «Regedor» who, in turn, was the lowest level administrative functionary. Thus the 1961 Census presents data for 245 Freguesias. The Government of Goa, Daman and Diu, has, however, notified (in February 1971) the list of «Revenue» villages, and hence the 1971 Census data are presented separately for each Revenue village.

2.6 The following table shows the variety of Census data that is available for the earlier Censuses of Goa, Daman and Diu i.e. from 1881 to 1950.

TABLE No. 2

"Statement showing the various Census data available for each «Freguesia» in the past Census Reports of Goa, Daman and Diu, 1881 to 1950"

1881

I) General Population of the freguesia by:

a) Sex
b) Age Group (Less than 12 & 12 and above).
c) Marital Status
d) Place of birth (continents)
e) Literacy
f) Religion
g) Occupation

II) De Jure Population of the freguesia by:

a) Sex, age, marital status, place of birth, education and religion.
b) Occupation

III) No. of households, persons temporarily absent, in transit and de facto population.

1887*

Population enumerated of the freguesia by:

a) Sex
b) Age-Group (Less than 12 & 12 and above)
c) Marital Status
d) Literacy
e) Religion
f) Occupation
g) Distribution of population by religion and age.
h) Religion, literacy and sex.
i) Occupation and Religion
j) Single year age, religion, Marital status and sex.

1900

a) Population (Residents, absents and in transit).

b) *De facto* population by

i) Sex and age — Less than 12 & 12 and above.
ii) Sex and single year age upto 90 years and above 90 years.
iii) Sex and marital status
iv) Sex, education and age-groups.
v) Sex and Religion
vi) Sex and main physical and mental defects
vii) Occupation.
viii) Nationality, Marital status and age.
ix) Nationality, Place of birth and Sex.
x) Nationality, Religion and Literacy.

1910

a) Population (Residents, absents and in transit) by sex, and total *de facto* population.

b) De facto population by:

i) Sex and age — Less than 21 and 21+
ii) Sex and single year age upto 90 years and 90+
iii) Sex and marital status.
iv) Literates by age and sex and illiterates by sex only.
v) Sex and religion
vi) Sex and Main Physical and mental defects.
vii) Occupation.
viii) De facto population by religion, literacy and sex.
ix) Nationality, Marital status and Age.
x) Nationality, Place of birth and sex.
xi) Nationality, religion and education.

1921

a) Freguesia wise Number of households and Population (residents, absents and in transit) by sex and total *de facto* population

b) De facto population by:

i) Sex and age — Less than 21 & 21+
ii) Sex and single year age upto 90 years and 90+

ii) Sex and marital status. Age groups (below 10 years: 10 to 15; 16 to 20; 21 to 30; 31 to 50; above 50 and age not stated), marital status and the relationship of the partners at the time of marriage.

iv) Literates by age-groups and sex and illiterates by sex only.

v) Sex and religion.

vi) Sex and main physical & mental defects.

vii) Occupation.

viii) Sex, religion and literacy.

ix) Nationality and marital status, and age-group.

x) Nationality, place of birth and sex.

xi) Nationality, religion and Literacy.

c) Distribution of families by family size.

1931

a) Population (Residents, absents and in transit)

b) De facto population by:

i) Sex and age-group-Less than 21 and 21+

ii) Sex and single year age upto 90 and 90+

iii) Sex and marital status.

iv) Sex, Literacy and age-group.

v) Sex and religion.

vi) Sex and Main physical defects.

vii) Occupation.

viii) Religion, Literacy and sex.

ix) Nationality, marital status and age-group.

x) Nationality, place of birth and sex.

xi) Nationality, religion and literacy.

c) Distribution of families by family size.

1940

I) De facto population by:

i) Sex and Age-Group-Less than 21 and 21+

ii) Sex and Marital Status

iii) Literacy, Age-Group and sex.

iv) Race and sex.

v) Religion, Literacy and sex.

vi) Nationality, Place of birth and sex.

vii) Nationality, religion and literacy.

viii) Economic classification of de facto population.

II) Distribution of families by family size.

1950

In VOL. I

1. Distribution of buildings (or structures) according to their use — (Table 1)

2. Distribution of occupants (dwellers) according to the number of rooms of the houses occupied by them — (Table 4)

3. Distribution of families by family size. (Table 5)

4. Distribution of institutional households according to their type and number of persons living therein, by sex. (Table 6)

5. Urban and Rural population by sex. (Table 9)

6. Distribution of occupied houses and households (Table 10)

7. Distribution of population of 10 years and above who know Portuguese and who do not know Portuguese. (Table 15).

In VOL. II

1. Population by sex and age-groups. (Table 2)

2. Present population by sex and religion (Table 4)

3. Usually residents, present and absent population (the latter classified according to the places of residence) (Table 7).

---

*The tables mentioned here are available for the following 7 the then units only, viz Pernem (incomplete), Sanguem, Ponda, Sanquelim, Quepem, Canacona and district of Angediva.

2.7 As said earlier, the Tabulation plan for 1961 Census was the same as adopted for the rest of the country, though the field work was done by the erstwhile Portuguese administration. For the 1971 Census, of course, the all India pattern of Census taking was adopted from the very beginning, the date of reference for the entire country being 1st April, 1971. The present publication thus presents the census data for the first time on a pattern uniform to that of the rest of the country.

III — URBAN AREAS

3.1 For purposes of 1971 Census, the following definition of a town was adopted:

"To qualify for recognition as a town or urban area, a place should have:

(a) a Municipal Corporation or a Municipality or a Town Committee or a Notified Area Committee or a Cantonment Board;

OR

(b) i) a minimum population of 5,000,

ii) a density of not less than 400 per sq. km. (1000 per sq. mile),

iii) three-fourths of the occupations of the male working population should be outside agriculture, and

iv) the place should have according to the Director of Census Operations of the State a few pronounced urban characteristics and amenities".

3.2 So far as Goa, Daman and Diu is concerned, the condition laid down in (a) above has been followed. It has not been possible to follow the other criteria in respect of non-municipal places for a variety of reasons. In the first place, the final notification regarding 'revenue' villages was issued by the Government of Goa, Daman and Diu as late as in February, 1971, by which time it was too late to apply the population test to the villages and revise the whole pattern of location code numbers, etc. Secondly, exact areas of the newly notified revenue villages were not available and hence the test of density could not be applied. Then again the occupational distribution of population was also not available and hence the test mentioned in(b) (iii) above could also not be applied. In view of these limitations, it was decided to adopt only the first test; fortunately the Government of Goa, Daman and Diu has also adopted an identical basis for identifying the areas as urban towns.

There are in all 13 towns in Goa, Daman and Diu as follows: —

TABLE No. 3

"List of Towns in Goa, Daman and Diu"

Sl. No.	District	Taluka	Town
1	2	3	4
1.	Goa	Tiswadi	Panaji
		Bardez	Mapusa
		Pernem	Pernem
		Bicholim	Bicholim
		Satari	Valpoi
		Ponda	Ponda
		Sanguem	Sanguem
		Canacona	Chauri
		Quepem	Quepem
		Salcete	Margao
		Mormugao	Mormugao
2.	Daman	Daman	Daman
3.	Diu	Diu	Diu

IV — URBAN AGGLOMERATION

4.1 The town directory covers 13 towns of which 11 are in Goa District and one each in Daman and Diu Districts. No new town has been added to the list of towns of 1961 Census and similarly no town of 1961 Census has been declassified into a village in 1971. However, with the formation of Municipal Councils for the first time in this territory in 1970, some of the areas which were hitherto considered part of urban towns have been excluded from the new jurisdiction of the Municipal Councils. In some cases these excluded areas have not been included in any other Village Panchayats. For example, a part of the former Pernem town has been excluded from the Municipal Council area of that town. Such excluded part is treated as Pernem (rural) for the purposes of 1971 Census.

4.2 At the time of 1961 Census, the urban data was presented in terms of individual towns and cities and also in terms of «clusters» of population called as «Town groups». This was done with a view to identify functionally linked urban areas, urban spills beyond the administrative boundaries and metropolitan conurbations. In actual practice, however, the State Census Offices adopted varying definitions, procedures and criteria of delimitation of the town groups. In fact, the concept of town-group was not adopted for Goa, Daman and Diu. In other words, a uniformity of approach was not maintained. Again, the constituent units of a town-group were not confined to a contiguous area or territory. In actual reporting, only towns falling within a radius of 2 to 4 (and sometimes 5) miles of the periphery of the principal central town were included, but the interstitial rural areas were omitted. Thus the town group did not bring out a spatially contiguous territory of urban and rural settlements. Further, the town-group concept did not effectively tackle the problems involved in urban statistical reporting viz., the problem of municipal jurisdiction versus spillover growth and the accretion of population by annexation. In the case of Goa, Daman and Diu, however, there were no town groups as such for the 1961 Census.

4.3 Because of all these limitations, the concept of «town group» of 1961 Census was given up in the 1971 Census and a new concept of «Urban Agglomeration» was introduced.

4.4 An «Urban Agglomeration» is made of the main town and the adjoining areas of out growths which should be treated as urban spread, the population covered by such spreads being categorised as urban. Each such agglomeration may be made up of more than one statutory towns, adjoining cantonment, and also other adjoining urban growths such as a Railway Colony or a University Campus. Similarly, other outgrowths which did not qualify to be trated as individual towns in their own right are also to be attached to the urban unit to which they are adjacent. In other words, the urban agglomeration is a continuous spread comprising of a town and its ad-

joining outgrowths or two or more physically contiguous towns together with continuous well recognised outgrowths, if any, of such towns.

4.5 There are in this Territory two urban agglomerations, viz. Panaji Urban Agglomeration and Margao Urban Agglomeration. The constituent units of these two urban agglomerations are: —

Panaji Urban Agglomeration

i) Panaji Municipal Area
ii) Calapor
iii) Murda
iv) Panelim
v) Chimbel
vi) Cujira
vii) Morambi-o-Grande (Merces)
viii) Morambi-o-Pequeno (Merces)
ix) Taleigao

(Note: — While the places shown at (ii) to (ix) above are now notified as revenue villages, all of them except Taleigao formed part of the Panaji town in 1961 Census. They form almost a continuous outgrwoth to the Panaji Municipal Area).

Margao Urban Agglomeration

i) Margao Municipal Area
ii) Aquem
iii) Navelim

(Note: — Aquem and Navelim are now declared as revenue villages, but actually they form a continuous outgrowth of the Margao Municipal Area).

V — STANDARD URBAN AREA

5.1 The concept of Standard Urban Area which is related to the programme of town planning is different from that of Urban Agglomeration. The Standard Urban Area may be defined as the projected growth area of a city or town over the next two decades, i. e. as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Such a tract will include all extra-municipal urban growths such as the suburbs (industrial and residential), railway colonies, civil lines and cantonments and also such of the villages which are likely to be urbanised by 1991. A Standard Urban Area will thus be an area which will extend beyond the main city or town and would contain all likely developments over the next 20 years, i. e. upto 1991. The Standard Urban Area is identified by the administrative units that it encompasses, namely, city, town, village, etc. The boundaries of the Standard Urban Area are the administrative boundaries of the peripheral units.

5.2 In case of Goa, Daman and Diu, the demarcation of the Standard Urban Area was done by the Department of Town and Country Planning Organisation, Ministry of Health, Family Planning, Works, Housing and Urban Development, New Delhi, in consultation with the Senior Town Planner of the Government of Goa, Daman and Diu.

5.3 Two areas have been declared as Standard Urban Areas for this territory, viz., (i) Panaji Standard Urban Area and (ii) Mormugao Standard Urban Area.

VI — TOWN DIRECTORY, ITS CONTENTS AND A BRIEF ANALYSIS OF DATA

6.1 The seven statements included in the Town Directory are expected to give a fairly good idea about the socio-economic status of each town. Brief details of the contents of each of the seven statements and an analysis thereof are attempted below: —

(1) *STATEMENT I:* — Status, Growth history and Functional Category of Towns.

6.2 This statement contains 15 columns and gives information on such items as name of each town, its location code number in 1971-Census, name of taluka in which it is located, the civic administrative status in 1970, the population of the town, etc. The last two columns give functional category of the town as per 1960 and 1971 Census.

6.3 In column 5 of this statement, the abbreviation 'M' stands for Municipality. There is no urban area in the Union Territory of Goa, Daman and Diu which can be called a city i. e. having a population of more than 100,000 as per 1971 Census. Similarly, no non-municipal area has been considered as a town under the 1971 Census.

6.4 Though this Union Territory did have towns (urban areas) even in 1900, the population of individual towns is not available for the earlier

censuses. The growth in the number of towns since 1900 is given below: —

TABLE No. 4

"Progress in number of Towns and their names"

Census Year	Number of Towns	Names of Towns
1	2	3
1900	2	Panaji. Daman.
1910	2	Panaji. Daman.
1921	4	Panaji, Daman, *Diu, Vasco-da-Gama.*
1931	4	Panaji, Daman, Diu, Vasco-da-Gama.
1940	6	Panaji, Daman, Diu, Vasco-da-Gama, *Margao* and *Mapusa.*
1950	7	Panaji, Daman, Diu, Vasco-da-Gama, Margao, Mapusa and *Ponda.*
1960	13	Panaji, Mapusa, *Pernem, Bicholim Valpoi,* Ponda, *Sanguem, Chauri, Quepem,* Margao, Vasco-da-Gama. Daman and Diu.
1971	13	Panaji, Mapusa, Pernem, Bicholim, Valpoi, Ponda, Sanguem, Chauri, Quepem, Margao, Mormugao, Daman and Diu.

(Notes: — 1. The places which were treated as towns for the first time in the relevant Census Year have been shown in italics in the above statement.

2. As per recent notification of the Government of Goa, Daman and Diu, Vasco-da-Gama is included in the town of Mormugao).

6.5 The last two columns of statement I of the Town Directory show the functional category of towns as per 1960 and 1971 Censuses. This is an important piece of information in as much as it indicates whether the town is an agricultural town or industrial town etc., which is useful not only to the administrator but also to the social scientists.

6.6 The working population of any town was divided into nine industrial categories as under in 1961: —

Description of Working Population	Industrial Category
As Cultivator	I
As Agricultural Labourer	II
In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting & Plantations, Orchards & Allied activities	III
In Household Industry	IV
In Manufacturing other than Household Industry	V
In Construction	VI
In Trade & Commerce	VII
In Transport, Storage and Communications	VIII
In Other Services	IX

(Note: — In 1971 Census, the number of categories of workers is ten. The category III of 1961 Census was split up into two categories as follows: a) Livestock, Forestry, Fishing, Hunting & Plantations, Orchards & Other Allied Activities, and (b) Mining and Quarrying. In 1971 Census the category (a) above was classified as III and (b) above as IV. The category of household Industry has been designated as V(a) and that of «Manufacturing other than Household Industry» as V(b).)

6.7 For the purposes of functional classification of towns, the nine categories of workers shown above have been combined and regrouped into five as follows:

TABLE No. 5

Functional classification of Towns	Industrial categories of workers included
1	2
i) Primary Activities	I, II and III
ii) Industry	IV, V and VI
iii) Trade and Commerce	VII
iv) Transport	VIII
v) Service	IX

6.8 The ratios of workers under each of these five classes of economic activity to its total workers were calculated for each town, and its functional character was determined on that basis. If workers under one of the occupations formed 40% or more of the total workers, then that town was treated as a mono-functional town e. g. industrial town or service town.

6.9 If the percentage of workers was less than 40% the next predominant occupation was taken into account so that the total of the two will be 60% and above. Such a town was designated as a bifunctional town e. g. industrial-cum-service or commercial-cum-service. If the total was still less than 60% then the third predominant occupation was taken into account and such a town was designated as a multifunctional town e. g. industrial-cum-service-cum-commercial. On the basis of these criteria we get the following classification of the 13 towns of Goa, Daman and Diu as per 1971 Census: —

TABLE No. 6

"Functional categories of Towns in 1971 Census"

(Based on 1971 Census data)

Functional category	No. of Towns	Name of Town	Remark
1	2	3	4
1. Primary	1	Bicholim	Mono-functional
2. Service	2	Panaji, Valpoi	Mono-functional
3. Transport	1	Mormugao	Mono-functional
4. Primary Activities-cum-Service	3	Pernem, Sanguem, Chauri	Bi-functional
5. Service-cum-Industry	1	Diu	Bi-functional
6. Service-cum-Trade & Commence-cum-Industry	3	Mapusa, Ponda, Margao	Multi-functional
7. Service-cum-Industry-cum-Primary Activities	2	Quepem, Daman.	Multi-functional

The functional categorization of the Towns of 1971 Census based on the data of 1961 Census of each Town is given below for comparison.

Functional categorization of Towns of Goa, Daman and Diu as per 1961 Census data

Functional category	No. of Towns	Name of Town	Remark
1	2	3	4
1. Primary Activities	5	Pernem, Bicholim, Valpoi, Sanguem, Quepem.	Mono-functional
2. Service	1	Chauri	Mono-functional
3. Service-cum-Primary Activities	2	Panaji, Ponda.	Bi-functional
4. Primary Activities-cum-Trade & Commercial.	1	Daman	Bi-functional
5. Service-cum-Industry-cum-commercial	1	Mapusa	Multi-functional
6. Service-cum-Primary Activity-cum-commercial	1	Margao	Multi-functional
7. Transport-cum-service-cum-Industry	1	Mormugao	Multi-functional
8. Primary-cum-service-cum-Industry	1	Diu	Multi-functional

(2) *STATEMENT II:* — Physical Aspects and Location of Towns, 1969.

6.10 This statement contains 14 columns and furnishes information on such items as the altitude, rainfall, temperature, etc. It also gives data on the location aspects of each town in terms of names and distances of the nearest city with 100,000 population, State Headquarter, District Headquarter, Sub-divisional Headquarter, Railway Station, Bus route, Navigable river/canal and sea-port.

6.11 Since the Union Territory of Goa, Daman and Diu is a coastal area the altitude of all the towns of the Union Territory is less than 62 metres from the sea-level. Diu with an altitude of 6 metres and Mormugao with an altitude of 62 Metres are at the two ends of the range. All the towns of Goa district receive substantial rainfall during the monsoons, there being no town where the average rainfall is less than 2500 m. m. per year. Chauri, Sanguem, Ponda and Valpoi towns receive very heavy rainfall, their annual average being more than 3500 m. m.

6.12 Again, as the towns are very near the sea-coast, the maximum temperature seldom exceeds 34°C, and the minimum recedes below 18°C.

6.13 There is no town in Goa, Daman and Diu with a population of more than 100,000. Belgaum in Mysore State is the nearest city for the Goa District while Surat and Rajkot of Gujarat State are the nearest cities for Daman and Diu Districts, respectively. Belgaum has close commercial links with the district of Goa.

6.14 Of the 13 towns of Goa, Daman and Diu, only Margao and Mormugao are connected by rail. All the towns except Sanguem, Valpoi, Daman and Diu have a nearby navigable river. The two principal rivers of Goa, i. e. Mandovi and Zuari, play an important role in the economy of this Territory by serving as internal waterways for transport of goods as well as personnel.

6.15 It is again Sanguem, Valpoi, Daman and Diu towns which do not have a recognised sea-port within a radius of 50 kms.

6.16 Of all the towns of Goa, Daman and Diu, the town of Mormugao (which includes Vasco-da-Gama also) is expanding at a much faster rate. The decennial population growth of this town between 1960-1971 was 106.96%. This appears to be the cumulative effect of the developmental activities that are taking place in and around the port town. A large number of labourers is reported to have come here from far off places like Uttar Pradesh and Kerala to work at this sea-port during the last one decade.

(3) *STATEMENT III:*— Municipal Finance 1968-69.

6.17 This statement gives data on receipt and expenditure of each municipal town for the year 1968-69. Break-up of receipt and expenditure used in the table is as follows: —

Receipts

i) Receipt through taxes
ii) Revenue derived from municipal properties and powers apart from taxation.
iii) Government grant
iv) Loans
v) Advances
vi) Other sources

Expenditure

i) General administration
ii) Public safety
iii) Public health and conveniences
iv) Public work
v) Public Institution
vi) Others.

6.18 All the towns of Goa, Daman and Diu are Municipal towns and the first ever Municipal Elections were held in the month of October, 1970. The elected bodies took charge of the administration soon thereafter. Since the new bodies are working with the new set up, the capacity of each Municipal Council to add to its revenues by way of Taxes etc. is rather limited. Hence the Municipal Councils have to depend to a great extent upon Government grant. The following table shows the per capita receipt and expenditure of various Municipal Councils which are grouped in population size.

6.19 There does not appear to be any uniform trend in the per capita income or expenditure of the Municipal Councils. It is rather strange that the per capita income of smaller towns (i. e. Class VI) should be so high.

TABLE No. 7

Per Capita Receipts and Expenditure for Municipal Councils 1968-69 according to population size group

Class of Town	No. of Town	Per Capita						
		Receipt			Expenditure			
		Total Receipt	Receipt through Taxes etc.	Receipt from all other sources	Total Expdt.	Expdt. on Public Health and Conveniences	Expdt. on Public Institution	Expdt. on other aspects
		(Rs.)	(Rs.)	(Rs.)	(Rs.)	(Rs.)	(Rs.)	(Rs.)
1	2	3	4	5	6	7	8	9
CLASS I 100,000 & above	...	...	...	...	...	...	...	...
CLASS II 50,000-99,999	1	77.17	6.05	71.12	51.65	8.58	0.00	43.07
CLASS III 20,000-49,999	3	59.47	3.34	56.13	40.32	4.18	0.06	36.08
CLASS IV 10,000-19,999	1	16.74	7.95	8.79	7.40	3.30	0.42	3.68
CLASS V 5,000-9,999	4	43.80	7.24	36.56	42.85	5.68	0.27	36.90
CLASS VI Below 5,000	4	131.70	2.69	129.01	114.45	5.83	0.44	108.18

Note: — (1) Panaji Urban Agglomeration falls in Class II towns. However, for columns 3 to 9, only the Panaji Municipal area has been taken into consideration.
(2) For working out the per-capita Receipt and Expenditure, the population of the respective Municipal Council alone is taken into consideration.

(4) *STATEMENT IV.* — Civic and other amenities 1969.

6.20 This statement has 13 columns and contains information in respect of road length, system of sewerage, protected water supply, fire fighting services, electrification, etc.

6.21 The following abbreviations have been used in statement No. IV.

Column Number and item	Abbreviations	Description
1	2	3
3-Road Length	PR	Pucca Road
	KR	Kachha Road
4-System of sewerage/drainage	OSD	Open Surface Drainage
	S	Sewerage
5-Method of disposal of night soil	ST	Septic Tank Latrine
	HL	Head load
6-Protected Water supply-source	T	Tap water
	W	Well water

6.22 All the towns except Chauri and Quepem have protected water supply through water taps.

6.23 Fire-fightng services are available in case of three towns only viz. Mapusa, Mormugao and Panaji.

6.24 All the towns are electrified and majority of the connections are for domestic purposes.

(5) *STATEMENT V.* — Medical, educational, recreational and cultural facilities in towns, 1969.

6.25 This table, as its heading indicates, furnishes data on medical, educational, recreational and cultural facilities available in the town. The medical facilities are presentend with the following details: —

(a) i) Dispensaries
ii) Family Planning Centre
iii) Hospital
iv) Health Centre
v) Maternity & Child Welfare Centre
vi) Nursing Home
vii) T.B. Clinic

(b) Number of beds in medical institutions noted in (a) above.

6.26 The educational facilities are given in a considerable detail beginning from the primary upto the college level of education, with such break-up as engineering, medical, etc.

6.27 The Recreational & Cultural facilities covered in the statement are in respect of (a) stadia (b) Cinemas, (c) Auditoria/Drama halls and (d) Public libraries including reading rooms.

Football is the most popular game of this territory and the existing stadia are by and large used for holding a large number of football matches played every year. In fact the stadium at Vasco has earned a reputation of being one of the popular venues for football tournaments in the country.

A special feature of Goan population is its unusual interest in dramas, so much so that many of the cinema halls are very often used for holding drama performances. It would be interesting to know that in a capital town like Panaji, one of the cinema halls is almost constantly used for holding drama performances. During the winter season a large number of drama companies of Bombay visit this Territory regularly, and it seems Goa has come to be known as a place of high profits for drama performances. Move is already afoot to construct an ultra-modern, well-equipped Drama Theatre in Panaji town.

It will be noted from Statement V that two of the towns of Goa districts, viz. Sanguem and Valpoi, are not having any cinema theatre.

6.28 The following abbreviations have been used in Statement V.

Column Number and item	Abbreviation	Description
1	2	3
3 — Medical facilities-Hospitals, Dispensaries, etc.	D	Dispensary.
	FC	Family Planning Centre.
	H	Hospital.
	HC	Health Centre.
	MCW	Maternity and Child Welfare Centre.
	NH	Nursing Home.
	TBC	T. B. Clinic.
	O	Others
5 — Educational facilities-Arts, Science Commerce Colleges.	AS	Arts & Science.
	C	Commerce.
9 — Educational facilities-Recognised Shorthand typewriting & other vocational training institutions.	Sh. Typ.	Shorthand & Typing Institute.
	Typ.	Typing Institute, only.
	O.	Others.
13 — Other Educational Institutions.	BEd.	Bachelor of Education college.
	Phy.	Pharmacy college.
17 — Public Libraries.	PL	Public Libraries.

6.29 There is no hospital located at Pernem and Quepem Towns of Goa District. However, the Government hospital at Tuem village which is on the border of Pernem Town can be considered as hospital for Pernem. The towns of Chauri, Panaji, Margao and Daman are comparatively better served as far as medical services are concerned. This will be evident from the following table which shows the number of beds per 1000 population for each town of Goa, Daman and Diu.

TABLE No. 8

"Town-wise number of beds per 1000 population 1971"

Town	Number of beds per 1000 population
1	2
Bicholim	5
Chauri	22
Mapusa	8
Margao	12
Mormugao	2
Panaji	18
Ponda	3
Sanguem	4
Valpoi	4
Daman	11
Diu	4

6.30 Since there is a Medical College and Hospital at Panaji, the largest number of beds is at Panaji (1070) followed by Margao (565).

6.31 Educational facilities are concentrated at Panaji, Margao, Mapusa and Daman, which are the only towns of this Territory having facilities of college education. The only Medical College, Engineering College, Pharmacy College and Polytechnic are located at Panaji.

6.32 The number of higher secondary, middle and primary schools per 1000 population is indicated in the following table.

TABLE No. 9

"Number of Educational Institution per 1000 Population in Urban Area"

Town	Number per 1,000 population		
	High Schools	Middle Schools	Primary Schools
1	2	3	4
Panaji	0.24	0.05	0.57
Mapusa	0.55	—	0.20
Pernem	1.02	—	0.34
Bicholim	0.35	—	0.58
Valpoi	1.03	0.34	0.34
Ponda	0.26	0.26	0.91
Sanguem	0.40	—	1.20
Chauri	1.50	—	2.25
Quepem	0.68	—	0.34
Margao	0.27	0.04	0.47
Mormugao	0.16	—	0.11
Daman	0.17	0.06	0.29
Diu	0.32	—	0.64

6.33 The above table indicates that Chauri town is well served so far as educational facilities are concerned. Another conclusion arrived at from the above table is that the smaller towns have relatively better educational facilities than the bigger ones. This is clearly brought out by the following table:

TABLE No. 10

"Population size-wise number of Educationel Institutions per 1000 Population"

Population size of Towns	Number of educational institutes per 1000 population		
	High Schools	Middle Schools	Primary Schools
1	2	3	4
Less than 5,000	0.99	0.10	0.59
5,000 to 9,999	0.33	0.07	0.80
10,000 and above	0.25	0.03	0.38

6.34 The number of high schools and middle schools per 1000 population is more in case of towns with population less than 5000 than those with population 5000+. Similarly, the number of middle schools and primary schools is more in case of towns with population 5000 to 9999 than in case of town with population 10000 and above.

(6) *STATEMENT VI*:—Trade, Commerce, Industry and Banking, 1969.

6.35 This statement gives for each town names of three most important commodities imported into and exported from the town. It also furnishes information on the three most important commodities manufactured in the town. The number of banks, agricultural and non-agricultural credit societies existing in the town are also indicated in this statement.

6.36 While determining the three most important commodities imported into and exported from the town, it was expected that the selection of them will be done on the basis of value of the commodities. However, the Municipal Councils of Goa, Daman and Du did not have any octroi tax in 1969 and as such the data given in Cols. 3 to 8 of Statement VI had to be based on the general knowledge of the officials of the Municipal Councils.

6.37 When we earlier discussed the functional category of towns as per 1971 Census data, it was seen that in Goa, Daman and Diu, there is no town where industry is a dominant factor. Fish-canning, manufacture of soap, country liquor, salt pans, etc. are some of the important industries located in the towns of Goa, Daman and Diu.

6.38 All the towns of Goa, Daman and Diu are served by banks. The highest number of banking offices is in Panaji Urban Agglomeration (14). In the towns of Quepem, Sanguem and Valpoi, there is only one bank office each.

6.39 The Agricultural Credit Societies are located in Margao and Panaji Urban Agglomerations, and also in Ponda and Valpoi towns. In no other town do we get agricultural credit societies.

6.40 The non-agricultural credit societies are located in all towns and Urban Agglomerations of Goa, Daman and Diu.

(7) *STATEMENT VII:* — Population by Religion and Scheduled Caste/ /Scheduled Tribe, 1971.

6.41 This statement gives population figures on religion in respect of urban areas of this territory. The data has been shown separately by sex for each town and the two agglomerations along with their constituent units. The population is classified into six major religious groups viz. Hindus, Christians, Muslims, Budhists, Jains and Sikhs. Persons from other religious sects and persuations and persons having no religion have been grouped together and shown separately.

6.42 From statement VII, it will be seen that over 60% of the urban population is that of Hindus, 30% of Christians and over 9% of Muslims. All the other religions together form an insignificant proportion of less than 1%. Comparing the 1971 Census data with that of 1960, it is observed that the percentage of Christian population in urban areas has gone down from 35% to 30% while that of Hindus and Muslims has gone up by 2 per cent each. This appears to be mainly due to influx of outside elements, i. e. migrants from other parts of the country.

6.43 Out of total Scheduled Caste population of 16,514 as many as 5,705 (or 34.5%) reside in urban areas. The four big towns viz. Panaji Urban Agglomeration, Margao Urban Agglomeration, Mormugao, and Mapusa account for 76.04% of the total Scheduled Caste urban population. There is a very meagre Scheduled Tribe population in Goa district. However, the Scheduled Tribe population is predominant in Daman District, and the town of Daman alone accounts for 83.55% of the total Scheduled Tribe urban population of this territory.

VII — VILLAGE DIRECTORY, ITS CONTENTS AND A BRIEF ANALYSIS OF DATA

7.1 The Village Directory is expected to be helpful in a better understanding of the Census data tabulated village-wise. It presents information regarding some basic amenities available like transport, communication, educational and medical facilities, weekly market day etc. The data are presented for each village separately.

7.2 A list of revenue villages was obtained from the Director of Land Survey, Panaji, in January, 1970. Subsequently, however, the Govt. of Goa, Daman & Diu published the final list of revenue villages in February 1971 vide its Notification No. RD/LND/213/69-71/II dated 15-2-71 which was found to be slightly different from the one supplied by the Land Survey Department. According to the list of the Land Survey Department there are in all 446 villages and towns in the Territory while according to the final notification dated 15th February, 1971 there are 462 villages and towns. Since the final list of 462 villages was published much too late, it was not possible to adopt the same for the Census purposes inasmuch as the system of location codes, formation of blocks etc., was already finalised on the basis of the former list supplied by the Land Survey Department. It is obvious that some of the revenue villages of the final list are already included in some other Census villages based on the former list. as is indicated in the following table.

TABLE No. 11

"Taluka-wise Names of Revenue Villages included in Census Villages"

Taluka	Census Village	Names of Revenue Villages included in the Census Village shown in Col. 2
1	2	3
Bardez	Serula	1. Penha de Franca
	(Socorro)	2. Salvador do Mundo
	Pilerne	3. Marra
	Nerul	4. Reis Magos
Ponda	Queula	5. Durbhat
Quepem	Sirvoi	6. Deao
Salcete	Raia	7. Rachol
	Curtorim	8. Sao Jose de Areal
Mormugao	Sancoale	9. Sao Jacinto Island
		10. Sao Jorge Island

7.3 It may be noted that there are in all 409 inhabited 'Census' villages and 13 towns in the Territory as per 1971 Census.

7.4 As per the Notification dated 15-2-71 of the Government of Goa, Daman and Diu, there are in all 449 'Revenue' villages and 13 towns having municipalities. The difference between the number of revenue villages (449) and Census villages (409) is accounted for in the following table.

1.	Total number of Census villages (excluding uninhabited villages)	409
2.	Number of 'Revenue villages' which are included in other villages for census purposes (shown in the foregoing paragraph)	10
3.	Number of uninhabited revenue villages	8
4.	Number of revenue villages included in Urban agglomerations or other urban towns.	22
	Total	449

The Taluka-wise names of the uninhabited villages are shown below:

TABLE No. 12

"Taluka-wise Uninhabited Villages"

Taluka	Name of uninhabited villages
1	2
itari	1. Zarani 2. Pendral 3. Ansolem
anguem	1. Moissal 2. Boma 3. Oxel 4. Dongurli 5. Sigonem

Details of the 22 revenue villages included in rban agglomeration/towns are given hereunder:

TABLE No. 13

"Name of Revenue Villages included in Urban Area"

Names of Urban Area	No. of revenue villages included in Urban Areas	Names of villages
1	2	3
Panaji Urban Agglomeration	8	1. Panelim 2. Chimbel 3. Cujira 4. Murda 5. Morambi-o-Grande (Merces) 6. Morambi-o-Pequeno (Merces) 7. Calapor 8. Taleigao
2. Margao Urban Agglomeration	2	1. Aquem 2. Navelim
3. Mapusa	2	1. Corlim 2. Cunchelim
4. Bicholim	2	1. Lamgaon 2. Bordem
5. Valpoi	1	1. Massordem
6. Quepem	1	1. Cusmane
7. Mormugao	1	1. Vadem
8. Daman	5	1. Jumprim 2. Daman-Camp 3. Moti-Daman 4. Khariwadi 5. Kathiria
Total	22	

7.5 Mention may be made here of the Government of India's directive to the State/Union Territory Governments to avoid making any changes in administrative jurisdictions of Districts, talukas, villages, etc. during the Census Year. Since the final list of revenue villages was notified as late as middle of February, 1971, i.e. just on the eve of Census taking, it was not possible to revise the earlier list received from the Land Survey Department and already adopted for the Census.

7.6 The Village Directory contains 18 columns and provides the following information for each village:

a)	Amenities available in the village i.e.	
	i) Educational	— Col. No. 4
	ii) Medical	— Col. No. 5
	iii) Power supply	— Col. No. 6
	iv) Drinking water supply	— Col. No. 7
	v) Communications	— Col. No. 8
	vi) Post & Telegraph facilities	— Col. No. 9
b)	Staple food	— Col. No. 10
c)	Land use (i.e. area under different types of land use in hectares)	— Col. Nos. 11 to 15
d)	Nearest Town and its distance	— Col. No. 16
e)	Weekly market, if any	— Col. No. 17
f)	Places of religious or historical or archaelogical importance, if any	— Col. No. 18

7.7 The following abbreviations have been used in the Village Directory: —

Column Number and item	Abbreviation	Description
1	2	3
3 Area of Village	N.A.	Not Available
4 Educational Amenities	A.S.	Arts and Science College.
	Mid.S.	Middle School
	Pr.S.	Primary School
	Sec.S.	Secondary School including High School.
	O.	Other educational facilities.
5 Medical Amenities	D.	Dispensary
	F.C.	Family Planning Centre
	H.	Hospital
	H.C.	Health Centre (including Primary Health Centre).
	M.C.W.	Maternity and Child Welfare Centre.
	N.H.	Nursing Home
	T.B.C.	T. B. Clinic
	O.	Other Medical facilities.
6 Power Supply	E.	Electrified
7 Drinking Water	F.	Fountain
	R.	River Water
	T.	Tap Water
	T.K.	Tank Water
	T.W.	Tube Well Water
	W.	Well Water.
8 Communications	C.	Navigable Canal
	K.R.	Kutcha Road
	P.R.	Pucca Road
	R.	Navigable River
	T.	Rail
9 Post & Telegraph	P.O.	Post Office
	T.O.	Telegraph Office
	P.T.O.	Post and Telegraph Office

7.8 At the end of the Village Directory of each taluka, a taluka abstract is also presented.

7.9 Since all the villages of Goa, Daman and Diu have not been cadastrally surveyed so far, the villagewise area figures are available only in respect of five talukas, viz., Bardez, Pernem and Bicholim of Goa Distt. and Daman and Diu Taluka of Daman and Diu Distt. respectively.

7.10 It may be said that educational facilities are available for almost all the villages of the Union Territory either within the village itself or very near it. The following table shows the distribution of villages according to its distance from the nearest town and the number of villages having various educational facilities i. e. Primary, Middle, High Schools, Colleges and Others.

TABLE No. 14

"Distribution of villages according to their distance from the nearest town, and the number of villages having educational facilities by various levels"

Distance from the nearest town (in km.)	Total No. of villages (inhabited)	Number of Villages having				
		Primary School	Middle School	Higher Secondary School	College	Others
1	2	3	4	5	6	7
Goa District						
0-5	82	71	21	10	-	-
6-10	118	98	27	32	1	1
11-15	114	100	33	26	-	2
16-25	62	49	14	9	-	1
26-50	7	4	1	-	-	-
Total	383	322	96	77	1	4
Daman District						
0-5	15	13	-	1	-	5
6-10	6	5	-	-	-	1
Total	21	18	-	1	-	6
Diu District						
0-5	2	2	-	-	-	-
6-10	1	1	-	-	-	-
11-15	1	1	-	-	-	-
16-25	-	-	-	-	-	-
26-50	1	-	-	-	-	-
Total	5	4	-	-	-	-

7.11 It will be observed from the above table that distance of the village from the nearest town does not make much difference in regard to the availability of educational facilities so far as primary education is concerned. In fact it is reported to be the policy of the State Government to open a Primary School in every village, where the total number of pupils is at least 20. Of the 383 villages of Goa District 322 villages (or 84%) have at least a Primary School. This percentage is also high in case of Daman (86%) and Diu (80%) District.

7.12 In case of Goa District there are 7 villages which lie at a distance of 26 to 50 kms. from the nearest town and here we find that only 4 villages (or 57%) have at least a primary school.

7.13 There is no village in Daman District which is beyond a radius of 10 kms. from the nearest town. In case of Diu District only one village (Simbor) is at a distance of 26 km. from Diu, but this village is inhabited for only a part of the year.

7.14 Only one village in the whole of Goa, Daman & Diu has a college and that is village Nuvem in Salcete taluka. However, this village is located just on the periphery of Margao town.

7.15 Location of secondary schools or high schools appears to be determined by the population of the village and/or of the neighbouring villages and not necessarily by its distance from the nearest town. In fact the maximum number of secondary schools of Goa District is found in villages which lie between 6 to 15 kms. from the nearest town. The low number of secondary schools in villages within a radius of 5 kms. from the nearest town may be because of the pull of the town, where, by and large, greater educational facilities are available.

7.16 The following table shows the distribution of educational facilities among the villages of different population sizes: —

TABLE No. 15

Distribution of villages according to size of population and Educational facilities available

Size of population	Total No. of inhabited villages	No. of villages having Primary School	Middle School	Secondary School
1	2	3	4	5
Goa District				
Less than 500	131	79	6	2
500 to 999	76	70	12	1
1000 to 1499	38	36	11	6
1500 to 1999	41	41	13	11
2000 and above	97	96	54	57
Total	383	322	96	77
Daman District				
Less than 500	8	6	-	-
500 to 999	5	4	-	-
1000 to 1499	3	3	-	-
1500 to 1999	3	3	-	-
2000 and above	2	2	-	1
Total	21	18	-	1
Diu District				
Less than 500	1	1	-	-
500 to 999	1	-	-	-
1000 to 1499	-	-	-	-
1500 to 1999	-	-	-	-
2000 and above	3	3	-	-
Total	5	4	-	-

7.17 It is seen that as the population size increases, there is a corresponding increase in the educational facilities available in the villages. We find that there are, even now, 61 villages in Goa District, 3 villages in Daman District and 1 village in Diu District where there is no primary school.

7.18 In case of Diu District there is only one village i.e. Simbor which does not have a primary school. However, this village is inhabited for only a part of the year (generally from November to May when the fishing season is on), which accounts for the absence of a primary school there.

7.19 The distribution of medical facilities per 100 sq. kms. of area of each taluka is given in the following table.

TABLE No. 16

"Number of Medical Institutions (all kinds) per 100 sq. km. area, Taluka-wise, Goa, Daman and Diu"

Union Territory/ /District/Taluka	Rural area (in sq. km.)*	Total No. of Medical Institutions	No. of Medical Institutions (all kinds) per 100 sq. kms.
1	2	3	4
Goa, Daman and Diu	3675.8	173	4.71
Goa District	3579.4	164	4.58
Tiswadi Taluka	79.1	23	29.08
Bardez Taluka	253.4	28	11.05
Pernem Taluka	239.5	8	3.34
Bicholim Taluka	198.8	12	6.04
Satari Taluka	497.9	6	1.20
Ponda Taluka	277.9	21	7.56
Sanguem Taluka	881.2	11	1.25
Canacona Taluka	345.6	12	3.47
Quepem Taluka	346.1	6	1.73
Salcete Taluka	253.5	27	10.65
Mormugao Taluka	66.6	10	15.01
Daman District	66.4	7	10.54
Daman Taluka	66.4	7	10.54
Diu District	30.0	2	6.67
Diu Taluka	30.0	2	6.67

*1) The rural area of the District has been worked out by substracting the total urban area of the District from the total area of the District as furnished by the Surveyor General India, New Delhi. The urban area is provisional.

2) The rural area of each Taluka of Goa District is worked out by substracting the area of the Town Agglomeration or the Town as the case may be from the total area of the Taluka as furnished by the Directorate of Land Survey, Government of Goa, Daman and Diu. The urban area and the total area of the Taluka are provisional since the Cadastral Survey of the Talukas of Goa, Daman and Diu is in progress.

3) In case of Daman and Diu Talukas, the total area of the District as furnished by the Surveyor General India, New Delhi is taken as the total area of Daman and Diu Talukas respectively, since both the Districts contain one Taluka each.

4) The sum of the rural areas of all Talukas of Goa District will not be equal to the total rural area of Goa District because the former represent «land use» area and are derived from the figures supplied by the Directorate of Land Survey, Government of Goa, Daman and Diu, Panaji.

7.20 No village in Goa District with population less than 1500 has a hospital. All the rural hospitals of Goa District are located in villages having a population of 1500 or more.

7.21 In case of Daman and Diu districts, there is no hospital in any of the villages of the two districts. But since the distance from the villages to the District Headquarters is within an easy reach of all, the absence of a hospital in a village of Daman and Diu districts may not be felt.

7.22 The smaller talukas like Daman and Diu seem to be better off in respect of medical institutions than some of the bigger ones (in area) like Sanguem, Satari, Quepem and Canacona of Goa District. The talukas of Tiswadi, Bardez and Salcete of Goa District are much better off in comparision to other talukas of the same district. These talukas have on an average 15, 11 and 10 medical institutions respectively per 100 km². area.

7.23 The distribution of electrified villages, with reference to the distance from the nearest town is given in the following table.

TABLE No. 17

"Distribution of villages as per distance from the nearest town and the number of electrified villages in each 'distance-group', Goa, Daman and Diu"

Distance from the nearest town (in kms.)	Total no. of inhabited villages	Number of villages with electric power supply
1	2	3
Goa District		
0-5	82	43
6-10	118	41
11-15	114	33
16-25	62	6
26-50	7	1
Total	383	124
Daman District		
0-5	15	15
6-10	6	6
Total	21	21
Diu District		
0-5	2	2
6-10	1	1
11-15	1	1
16-25	—	—
26-50	1	—
Total	5	4

7.24 The villages of Daman and Diu districts are once again at a comparatively advantageous position than the villages of Goa District so far as the number of electrified villages is concerned. Of the total 383 villages of Goa district as many as 124 (32.37%) villages are electrified. All the villages of Daman district are already electrified, while 80% villages of Diu district have been connected with electricity. The only village left unelectrified in Diu District is village Simbor which is inhabited only for a part of the year.

7.25 The following table shows the population living in electrified villages for each taluka of the district of Goa, Daman and Diu. Only Rural population is taken into account in this table.

TABLE No. 18

"Rural Population and Population of villages electrified (1971) for each taluka of Goa, Daman and Diu"

Union Territory/ District/Taluka	Total Rural Population	Total No. of electrified villages	Population residing in Electrified villages	Population residing in electrified villages as a percentage of total rural population
1	2	3	4	5
Goa, Daman and Diu	630,997	149	381,187	60.41
Goa District	591,877	124	343,061	57.96
Tiswadi taluka	46,551	16	29,910	64.25
Bardez taluka	104,102	15	52,588	50.52
Pernem taluka	49,976	14	29,188	58.41
Bicholim taluka	49,839	13	30,404	61.00
Satari taluka	29,593	3	3,169	10.71
Ponda taluka	76,932	17	60,917	79.18
Sanguem taluka	39,582	1	2,157	5.45
Canacona taluka	28,151	2	8,985	31.92
Quepem taluka	38,622	9	24,149	62.53
Salcete taluka	107,083	31	89,680	83.75
Mormugao taluka	21,446	3	11,913	55.55
Daman District	21,422	21	21,422	100.00
Daman taluka	21,422	21	21,422	100.00
Diu District	17,698	4	16,704	94.38
Diu taluka	17,698	4	16,704	94.38

7.26 The talukas of Sanguem and Satari of Goa District have very meagre percentages of population living in villages which are electrified.

7.27 The talukas of Tiswadi (64.25%), Bicholim (61.00%), Ponda (79.18%), Salcete (83.75%) and Mormugao (55.55%) of Goa district have higher percentages of population living in electrified villages.

7.28 So far as means of communication are concerned, the entire area of Goa, Daman and Diu compares much better to other parts of the country. Most of the villages of this territory are within an easy reach of all-weather roads. It is only in the three talukas of Sanguem, Quepem and Satari, which are located on the eastern side and are intersected by hill-ranges, that some villages are situated away from roads. The following table shows the distribution of villages by their distance from the nearest town and the number of villages connected by different channels of communications.

TABLE No. 19

"Number of villages classified by their distance from the nearest town and the number of village in each 'distance group' connected by different channels of communications"

Distance from the nearest town (in kms.)	Total No. of inhabited villages	Number of villages connected by						
		Pucca Road	Kutcha Road	Pucca & Kutcha Road	Pucca Road and Inland waterway	Pucca Road and Rail	Kutcha Road and Rail	Others
1	2	3	4	5	6	7	8	9
Goa District								
0-5	82	35	27	15	5	-	-	-
6-10	118	31	52	15	9	5	-	6
11-15	114	38	44	19	5	3	1	4
16-25	62	10	42	7	-	-	1	2
26-50	7	-	5	1	-	-	1	-
Total	383	114	170	57	19	8	3	12
Daman District								
0-5	15	15	-		-	-	-	-
6-10	6	6	-	-	-	-	-	-
Total	21	21	-	-	-	-	-	-
Diu District								
0-5	2	2	-	-	-	-	-	-
6-10	1	1	-	-	-	-	-	-
11-15	1	1	-	-	-	-	-	-
16-25	-	-	-	-	-	-	-	-
26-50	1	-	-	-	-	-	-	1
Total	5	4	-	-	-	-	-	1

7.29 All the villages of Daman District and 4 out of 5 villages of Diu District are served by Pucca Roads. In case of Goa district 114 villages (or 29.77% of the villages of Goa District) are connected by pucca roads. There are 8 villages in Goa district which are connected by pucca road and rail, and 3 villages by rail and Kutcha road. All these facts taken together, it may be said that 169 villages of Goa, Daman and Diu Districts are connected by pucca motorable roads or rail or inland waterways.

7.30 Sources of Drinking water supply: — As in the case of rural areas of other States, in Goa, Daman and Diu also the main and dominant source of drinking water supply is the well. Of the 409 villages in Goa, Daman and Diu as many as 277 villages (or 67.73%) have their supply of drinking water from the wells only. The next source in importance is the river (42 villages). In respect of 76 villages, there is more than one source of water supply.

The following table shows the taluka-wise distribution of villages of Goa, Daman and Diu as per source of drinking water supply.

Union Territory/ District//Taluka	No. of inhabited villages	Source of Drinking water supply						
		Tap water only	Well only	River only	Tank only	Spring only	More than one source of water supply	Total
1	2	3	4	5	6	7	8	9
Goa, Daman and Diu	409	1	277	42	2	11	76	40
Goa District	383	-	253	42	2	11	75	383
Tiswadi Taluka	30	-	14	-	-	-	16	30
Bardez Taluka	39	-	27	-	-	-	12	39
Pernem Taluka	27	-	23	-	-	-	4	27
Bicholim Taluka	28	-	25	-	-	-	3	28
Satari Taluka	77	-	36	28	2	-	11	77
Ponda Taluka	30	-	25	-	-	-	5	30
Sanguem Taluka	47	-	12	9	-	10	16	47
Canacona Taluka	9	-	7	-	-	1	1	9
Quepem Taluka	39	-	32	5	-	-	2	39
Salcete Taluka	45	-	45	-	-	-	-	45
Mormugao Taluka	12	-	7	-	-	-	5	12
Daman District	21	-	21	-	-	-	-	21
Daman Taluka	21	-	21	-	-	-	-	21
Diu District	5	1	3	-	-	-	1	5
Diu Taluka	5	1	3	-	-	-	1	5

Though it is seen from the above table that tapped-water is being provided to only one village, in actual as many as 20 villages of Goa, Daman and Diu, receive tapped-water though supplemented by other sources of water-supply and hence included under Col. 8 of the above table.

7.31 There are in all 106 post offices for 383 villages of Goa District and 6 in Daman and 4 in Diu districts. The number of post offices per 100 sq. kms. area of each taluka is given in the following table.

TABLE No. 20

"Number of Post Offices per 100 sq. km. area of the talukas of Goa, Daman and Diu"

Union Territory/ District/Taluka	Rural Area in (km²)*	No. of Post Offices	No. of Post Offices per 100 sq. km.
1	2	3	4
Goa, Daman and Diu	3675.8	116	3.16
Goa District	3579.4	106	2.96
Tiswadi Taluka	79.1	10	12.64
Bardez Taluka	253.4	22	8.68
Pernem Taluka	239.5	7	2.92
Bicholim Taluka	198.8	7	3.52
Satari Taluka	497.9	3	0.60
Pond Taluka	277.9	10	3.60
Sanguem Taluka	881.2	11	1.25
Canacona Taluka	345.6	6	1.74
Quepem Taluka	346.1	4	1.16
Salcete Taluka	253.5	22	8.68
Mormugao Taluka	66.6	4	6.01
Daman District	66.4	6	9.04
Daman Taluka	66.4	6	9.04
Diu District	30.0	4	13.33
Diu Taluka	30.0	4	13.33

(* See note below Table No. 16 of the Introductory Note to Part A).

The taluka of Satari, Sanguem, Quepem, Pernem, Bicholim and Canacona are rather inadequately served by postal facilities. The main reason appears to be the larger geographical areas of these talukas and a high percentage of areas under forest. As in case of other amenities, the talukas of Daman and Diu are having better postal facilities too.

There are in all 31 villages in Goa, Daman and Diu where a telegraph office is situated. All these

31 villages are located in Goa District only. The distribution of these 31 villages by different talukas is given below:

Union Territory/District/Taluka	No. of villages having a telegraph office
Goa, Daman and Diu	31
Goa District	31
Tiswadi	7
Bardez	7
Pernem	—
Bicholim	2
Satari	—
Ponda	1
Sanguem	2
Canacona	—
Quepem	1
Salcete	9
Mormugao	2

We thus find that most of the telegraph offices are located in *Salcete* (9), *Tiswadi* (7) and *Bardez* (7) talukas. There is no village in Pernem, Satari, Canacona Talukas and in Districts of Daman and Diu where a telegraph office is located.

7.32 The staple food of the people of Goa, Daman and Diu is rice & fish. This is but natural since all the three districts are coastal districts providing a rich crop of marine fish all the year round, while paddy is by far the single largest crop of the area. In case of Mormugao taluka, of Goa district, however, where there has occured an influx of a large population from the north India to work in the harbour at Mormugao, wheat is also consumed to a considerable extent and hence wheat can be considered as the staple food of the Port-labour.

7.33 Columns 11 to 15 of the village directory are meant for the data on land utilization, i. e.

i) Forest Area

ii) Irrigated area

iii) Un-irrigated area

iv) Cultivable waste

v) Area not available for cultivation.

7.34 However, these columns are left blank in respect of all villages of Goa, Daman and Diu. In the absence of Cadastral Survey of the area, there is no system of primary reporting of land-use pattern statistics. It is, therefore, not possible to give any reliable data on land utilization for the villages of this territory.

7.35 Column 16 of the village directory gives the name of the nearest town from the village and its distance in kms. This column is expected to give an idea of the proximity of a town and its likely impact on the village life-social, economical, political, etc.

7.36 Column 17 of the village directory shows whether a weekly market (bazar, hat, etc.) is held in a village and if so on which day(s) of the week. There are very few weekly markets in Goa, Daman and Diu. However some of the village markets like that of Sanquelim of Bicholim taluka, Cuncolim of Salcete taluka, Sanvordem of Sanguem taluka, etc. are famous markets of this territory.

7.37 The last column i. e. column No. 18 gives in short the places of religious or historical importance in the village. This information gives some idea of the cultural, historial and social life of the people who live in the village. This information has been collected from the Charge Superintendents and cannot be claimed to be comprehensive and thorough. Nevertheless, it may be of some use to the one interested in the study of social and religious history of this territory.

PART B OF THE DISTRICT CENSUS HANDBOOK OF GOA, DAMAN AND DIU DISTRICTS

Village and Urban block-wise Primary Census Abstract

INTRODUCTORY NOTE TO PART 'B' OF THE DISTRICT CENSUS HANDBOOK — 1971 CENSUS

I — BACKGROUND

1.1 The importance of a District Census Handbook lies in the fact that it provides the basic census data separately for each village and town of a District. Normally the administrator, social scientist, politician or even the layman is interested in knowing data regarding occupied residential houses, households, population with its break-up by sex and literacy, economic participation (extent of workers and non-workers), etc. for each village and town. This Part 'B' of the District Census Handbook presents these data for all villages and towns of the three districts of Goa, Daman and Diu. In case of towns, the data are also presented separately for each ward, and each Enumerator's Block of 1971 Census.

1.2 In the Primary Census Abstract, the villages are presented taluka-wise and within a taluka, in order of the Location Code Numbers which were assigned to the villages and towns of the District for organizing the 1971 Census. The taluka map, which precedes the Primary Census Abstract of each taluka, shows location of all villages/towns of the taluka with symbolic population size marks. An alphabetical list of villages and towns showing the location Code number and total population is given at the beginning of the Primary Census Abstract of each taluka. The name of the town is printed in capital letters with its location code number in Roman figures. It is expected that the alphabetical list will be useful in locating quickly any village in the Primary Census Abstract, while the map will be a helpful guide in locating the situation of the village/town within the Taluka.

1.3 There are two urban agglomerations viz. Panaji Urban Agglomeration and Margao Urban Agglomeration in this territory. The Primary Census Abstract has, therefore, been presented for each Urban Agglomeration and also for each constituent unit of the Urban Agglomeration.

II — PRIMARY CENSUS ABSTRACT

2.1 The Primary Census Abstract has in all 38 columns contents of which are discussed in brief hereunder:

2.2 *Col. 1:* — This shows the location code number of each village/town of the district.

2.3 *Col. 2:* — This gives the name of village/town as approved by the Government of Goa, Daman and Diu and published in its gazette dated 18th February, 1971.

2.4 *Col. 3:* — The area of the village/town is shown in Hectares/Km^2 wherever it is available. Since the entire area of Goa, Daman and Diu has not been cadastrally surveyed so far, area figures are not available for villages of all the talukas.

2.5 *Col. 4 and Col. 5:* — For each village, ward, Enumerator's Block and town, the total number of occupied residential houses has been given in Col. No. 4, and number of households in Col. No. 5.

2.6 A "Census House" is a building or part of a building having a separate main entrance from the road, common court yard or staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for residential or non-residential purposes or for both. The entry in col. No. 4 relates to the occupied residential census houses.

2.7 A household is a group of persons who commonly live together and would take their meals from a common kitchen unless exigencies of work prevented any of them from doing so. It may be made up of related or unrelated persons. A cook or a servant living in the house of his employer and taking his food there is to be considered as a member of the master's household. On the other hand, a son or a daughter of the head of the household living separetely is not to be treated as a member of the household.

2.8 *Cols. 6, 7 and 8:* — These three cols. give the total population, total males and total females respectively for the concerned village, ward, Enumerator's Block or town of the taluka. The population enumerated is as at the Sunrise of 1st April, 1971. The enumeration period of 1971 Census was from 10th March 1971 to 31st March 1971. During a revisional round of 3 days (from 1st to 3rd April 1971) the enumerator had to pay a second visit to each and every household to bring the population uptodate as at sunrise of 1st April 1971. Thus, though the changes in the total population of a block after the first visit of the enumerator (i. e. between 10/3/1971 and 31/3/1971) have been made with a view to uptodating the population data by including new births and excluding deaths occurring before the sunrise of 1st April 1971 no changes in respect of other characteristics of the population recorded in the first visit have been made. In other words the data collected on demographic, social and economic questions relate to a point of time somewhere between the period from 10th March 1971 to 31st March 1971, and not necessarily as on 1st April 1971 which was the reference date for the count of population under the 1971 Census.

2.9 *Cols. 9, 10 and 11, 12:* — These cols. present population of the scheduled castes and scheduled tribes and its sex-wise distribution. These data are presented for the first time in respect of Goa, Daman and Diu. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the state has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the scheduled castes and scheduled tribes.

2.10 In the case of Goa, Daman and Diu, the following castes have been declared as Scheduled Castes.

	Caste	Synonym
1)	Bhangi	Hadi
2)	Chambhar	—
3)	Mahar	—
4)	Mahyavanshi	Vankar
5)	Mang	—

2.11 Likewise the following tribes have been declared as Scheduled Tribes: —

	Tribe	Synonym
1)	Dhodia	—
2)	Dubla	Halpati Talavia
3)	Naikda	Nayaka
4)	Siddi	—
5)	Varli	—

2.12 It may be mentioned here that scheduled castes are to be found only among Hindus and Sikhs, while scheduled tribes can be found in any religion.

Cols. 13 and 14: — These cols. show the figures for literate and educated persons.

2.13 A "literate" person is one who can both read and write with understanding in any language. A person who can merely read but cannot write is not a literate. Persons having higher education are also included under the term "literate".

2.14 *Cols. 15 and 16:* — In the 1961 Census the population was divided into workers and non-workers with emphasis on work and not on income or economic dependence. The same practice was adopted under the 1971 Census also, but with a revision in the definition of the term "worker". The concept of a "worker" adopted in the 1961 Census was mainly criticised as being too loose and permitting undue inflation of the population of workers by including such persons as housewives, students etc. whose participation in work was generally marginal. After a deep consideration and with expert advice in this respect, the following procedure was adopted under the 1971 Census of India to decide whether a person was "worker" or not.

2.15 Every person was asked what his main activity was, that is, how he engaged himself mostly. For the purpose of this question, all persons would have divided themselves into two broad streams of main activity, namely, (1) worker, and (2) non-worker, according as the type of main activity that the person returned himself as engaged in mostly.

2.16 'Worker' defined: a 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

2.17 For the purpose of determining the working status of a person the reference period was one week prior to the date of enumeration in respect of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this had been returned as his main activity, the person was categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike, etc., was also considered as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as working. A person who had merely been offered work but had not actually joined it, was not treated as engaged in work.

2.18 *Cols. 17 to 36:* — These cols, show the classification of workers by sex and by nine industrial categories (with a further subclassification of category V into (a) and (b)) as follows: —

I — Cultivator.
II — Agricultural Labourer.
III — Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV — Mining and Quarrying.
V(a) — Manufacturing, Processing, Servicing and Repairs — Household Industry.
V(b) — Manufacturing, Processing, Servicing and Repairs — Other than Household Industry.
VI — Construction.
VII — Trade and Commerce.

VIII — Transport, Storage and Communications.

IX — Other Services.

III — WORKER — CATEGORIES DEFINED

3.1 The above categories of workers are briefly defined below: —

Category I includes both the owner cultivators as well as tenant cultivators. Along with the workers personally doing work on land are also included persons who are engaged in supervision or direction of cultivation.

3.2 Definition of a cultivator: For purposes of the Census, a cultivator is one who is engaged in cultivation by oneself or by supervision or direction in one's capacity as owner, or lessee of land held from Government, or as tenant of land held from private person(s) or institution(s) for consideration of payment in cash, kind, or share.

3.3 Cultivation involves ploughing, sowing, harvesting and production of cereals and millets such as wheat, paddy, jowar, bajra, ragi, etc. and pulses, raw jute and kindred fibre crops, cotton etc., and other crops such as sugar-cane, groundnut, tapioca, etc. but does not include fruit growing, vegetable-growing or keeping orchards or groves or working in plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

3.4 A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, is not considered to be working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share is also not considered as cultivator.

3.5 Category II includes all other persons working on land as labourers on wages without holding any right in the land, and can be considered as agricultural labourers.

3.6 Definition of an Agricultural Labourer: A person who works in another person's land for wages in money, kind or share is considered as agricultural labourer. He has no risk in the cultivation but merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

3.7 Category III includes workers in Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

3.8 Category IV includes workers in mining and quarrying.

3.9 Category V(a) includes persons engaged in any household industry involving manufacturing, processing, servicing and repairs.

3.10 This category includes that main activity which involves some production, processing, servicing or repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, 'bidi' rolling, pottery manufacture, bicycle repairing, tailoring etc. provided it is treated as a Household Industry.

3.11 Definition of a Household Industry: A household industry is defined as an industry conducted by the Head of the household himself/herself and/ /or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

3.12 The main criterion of a Household Industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home it will not be considered a household industry. It should be located within the precincts of the house where the members live.

3.13 A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods.

It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, «dhobi», astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household.

3.14 Category V(b) includes persons engaged in industries involving manufacturing, processing, servicing and repairs but which are not falling within the category of a household industry.

3.15 This category includes all types of production, processing, servicing or repairing of goods, but does not include production or processing which may be classified as household industry.

3.16 Category VI includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

3.17 Category VII includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports. real estate and properties, stocks and shares, insurance, money-lending, banking etc.

3.18 Category VIII includes workers engaged in transport activities by air, rail, road or water, and also in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless, Signalling, Information and Broadcasting are also included in this category.

3.19 Category IX includes (i) Public utility services like electricity or gas or water supply, sanitary services, (ii) Central, State, or Municipal employees, (iii) Professional services, (iv) Trade or labour associations, Recreation services, etc. and other workers not included in Categories I to VIII above.

3.20 The above categories of workers shown in the Primary Census Abstract conform to the industry divisions of National Industrial Classification as indicated below: —

Category	National Industrial Classification—Industry Division No.
1	2
I Cultivator	000 to 006 and 007 Partly
II Agricultural Labourer	—do—
III Livestock Forestry, Fishing, Hunting & Plantations, orchards & allied activities.	Div. 0 (excluding 000 to 006, and 007 Partly).
IV Mining & Quarrying	1
V(a) Manufacturing, Processing, Servicing and Repairs — Household Industry.	2 and 3
V(b) Manufacturing, Processing, Servicing and Repairs — other than household Industry.	2 and 3
VI Construction	Div. 5
VII Trade & Commerce	Div. 6 and 8
VIII Transport, Storage and Communications.	Div. 7
IX Other Services	Div. 4 and 9 and X

3.21 *Cols. 37 and 38:* — These columns show the population of non-workers and include the following category of persons: —

i) Household duties

ii) Students

iii) Retired Persons or Rentiers

iv) Dependents

v) Beggars etc.

vi) Inmates of certain Institutions like jail, mental hospitals etc.

vii) Other non-workers.

IV — NON-WORKER CATEGORIES DEFINED

4.1 The definition of each of the above category of non-workers is given below: —

4.2 Household Duties: This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. If a person whose main activity is attending to household duties is also engaged in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc., and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised under this category.

4.3 Student: This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending any school, college or any other educational institutions. Even if such persons participated in some work but not to the same extent as a full time work, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity.

4.4 Retired Person or a Rentier: A person who has retired from service and is doing no other work i. e. not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category.

4.5 Dependent: This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an

old woman attends to household duties she should be categorised under household duties for her main activity rather than treated as a dependent.

4.6 Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either.

4.7 Beggars, etc.: This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

4.8 Institutions: This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. An under-trial prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended.

4.9 Other Non-Workers: This will include all non-workers who may not come under any of the six categories given above but are seeking work. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'Dependent' rather than under other non-workers. A person irrespective of age, whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

PRIMARY CENSUS ABSTRACT OF VILLAGES AND TOWNS OF GOA, DAMAN AND DIU DISTRICTS

Note: — The following abbreviations have been used in the Primary Census Abstract.

P = Persons

1) The area of the Taluka (Total) has been supplied by the Directorate of Land Survey Government of Goa, Daman and Diu, Panaji.

2) The urban area figures are obtained from the Government of Goa, Daman and Diu Gazette Series I Number 1 dated 8-4-1970 urban area figures are provisional since the survey work is not fully finalised.

3) The area figures for rural areas are derived by substracting the urban area from the total area of the Taluka.

Abstract — concld.

1) The area of the Taluka (Total) has been supplied by the Directorate of Land Survey Government of Goa, Daman and Diu, Paanji.

2) The urban area figures are those published in Government of Goa, Daman and Diu Gazette Series I Number 1 dated 8-4-1970. The

3) The area figures for rural areas are derived by substracting the urban area from the total area of the taluka.

4) As the area figures are provisional, the sum of the area of all villages of the Taluka will not be equal to the total rural area of

Abstract — concld.

1) The area of the Taluka (Total) has been supplied by the Directorate of Land Survey Government of Goa, Daman and Diu,
2) The urban area figures are those published in Government of Goa, Daman and Diu Gazette, Series I, Number 1 dated 8-4-1970.
3) The area figures for rural areas are derived by substracting the urban area from the total area of the taluka.
4) As the area figures are provisional, the sum of the area of all villages of the Taluka will not be equal to the total rural area

Abstract — Concld.

1) The area of the Taluka (Total) has been supplied by the Directorate of Land Survey Government of Goa, Daman and Diu.
2) The urban area figures are those published in Government of Goa, Daman and Diu Gazette, Series I, Number 1 dated 8-4-1970.
3) The area figures for rural areas are derived by substracting the urban area from the total area of the taluka.
4) As the area figures are provisional, the sum of the area of all villages of the Taluka will not be equal to the total rural area

Abstract — concld.

1) The area of the Taluka (Total) has been supplied by the Directorate of Land Survey Government of Goa, Daman & Diu, Panaji. As
2) The urban area figures are those published in Government of Goa, Daman and Diu Gazette Series I Number 1 dated 8-4-1970. The
3) The area figures for rural areas are derived by substracting the urban area from the total area of the taluka.
4) As the area figures are provisional, the sum of the area of all villages of the Taluka will not be equal to the total rural area

Abstract — Concld.
