PREFACE

1. INTRODUCING THE DISTRICT ..... 1—13

2. INTRODUCING THE STATISTICS ..... 14—17

3. THE VILLAGE DIRECTORY ..... 18—127

4. A—GENERAL POPULATION TABLES

A—I & Appendix III — Area, Houses and Population ..... 129—131

A—II — Variation in Population during sixty years 132

A—III — Villages classified by population 133

A—IV — Towns (and Town-groups) classified by population in 1961 with variation since 1901 134

5. B—GENERAL ECONOMIC TABLES

B—I — Workers and Non-workers classified by sex and broad age-groups ..... 135—137

B—III Pt. A — Industrial Classification of workers and non-workers by educational levels in urban areas only ..... 138—139

B—III Pt. B — Industrial Classification of workers and non-workers by educational levels in rural areas only ..... 140—143

B—IV Pt. A — Industrial Classification by sex and class of worker of persons at work at Household Industry ..... 152—153

B—IV Pt. B — Industrial Classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service ..... 154—159

B—IV Pt. C & Appendix — Industrial Classification by sex and divisions, major groups and minor groups of persons at work other than cultivation ..... 160—163

B—V — Occupational Classification by sex of persons at work other than cultivation ..... 164—179

B—VI — Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urban areas only ..... 180—184

B—VII Pt. A — Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer ..... 186—188

B—VIII Pt. A — Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in urban areas only ..... 190—191

B—VIII Pt. B — Persons unemployed aged 15 and above by sex and educational levels in rural areas only 192

B—IX — Persons not at work classified by sex, broad age-groups and type of activity ..... 193—199

6. C—SOCIAL AND CULTURAL TABLES

C—II — Age and Marital Status ..... 200—206

C—III Pt. A — Age, Sex and Education in all areas 207

C—III Pt. B — Age, Sex and Education in urban areas only 208

C—V — Mother tongue (alphabetical order) ..... 209—211

C—VII — Religion ..... 212—214

C—VIII Pt. A — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes 217

C—VIII Pt. B — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes 218

7. SCT—TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

SCT—I Pt. A — Industrial Classification of persons at work and non-workers by sex for Scheduled Castes ..... 220—223
SCT—I Pt. B — Industrial Classification of persons at work and non-workers by sex for Scheduled Tribes ..... 224—226
SCT—II Pt. A — Age and Marital Status for Scheduled Castes ..... 228—229
SCT—II Pt. B — Age and Marital Status for Scheduled Tribes ..... 230—232
SCT—III Pt.A(i) — Education in urban areas only for Scheduled Castes 234
SCT—III Pt.A(ii) — Education in urban areas only for Scheduled Tribes 235
SCT—III Pt.B(i) — Education in rural areas only for Scheduled Castes 236
SCT—III Pt.B(ii) — Education in rural areas only for Scheduled Tribes 237
SCT—IV Pt.A — Religion for Scheduled Castes 238
SCT—IV Pt. B — Religion for Scheduled Tribes ..... 239—240
SC—I — — Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes ..... 241—242
ST—I — — Mother tongue and Bilingualism for Scheduled Tribes ..... 243—245
ST—II — — Persons not at work classified by sex and type of activity for Scheduled Tribes ..... 246—247

8. INTRODUCING THE OFFICIAL STATISTICS ..... 248—251

9. TABLES ON OFFICIAL STATISTICS

1. RAINFALL AND TEMPERATURE

1.1 Monthly Total Rainfall at important centres in the district from 1951 to 1960 252
1.3 Maximum and Minimum Temperatures by station and by month in the district from 1951 to 1960 ..... 253—254

2. VITAL STATISTICS

2.1 Number of births and deaths as reported in the district from 1951 to 1960 255
2.2 Deaths from some selected causes in the district from 1951 to 1960 256

3. LAND UTILISATION AND AGRICULTURE

3.1 Land Utilisation Statistics in the district for the decades 1901 to 1961 257
3.2 Area under principal crops in the district for the decades 1901 to 1961 258
3.3 Gross area irrigated under different crops in the district for the decades 1901 to 1961 259
3.4 Sources of irrigation in the district for the decades 1901 to 1961 259
3.5 Yield rates of principal crops in the district, 1951-52 to 1959-60 260
3.6 Fortnightly wholesale prices of important commodities in the district from 1958 to 1960 ..... 261—270
3.7 Average retail prices of important commodities in the district for 1951 271

4. LIVESTOCK

4.1 Variation in the number of main Livestock in the district during 1945 to 1961 272

5. INDUSTRIES

5.1 List of all categories of industries in the district based on Houselists ..... 273—276
5.2 List of small scale industries operating in the district ..... 277—279

6. ADMINISTRATION

6.1 Number of criminal cases tried and persons convicted in the district from 1951 to 1960 280
6.2 Strength of Police and Jails in the district from 1951 to 1960 281
6.3 Different types of Co-operative Societies in the district from 1951-52 to 1960-61 282
6.4 Receipts of revenue under different heads in the district from 1951-52 to 1960-61 283

7. PUBLIC HEALTH AND MEDICAL

7.1 Different classes of Public Health and Medical Centres in the district from 1951 to 1960 284

8. EDUCATION

8.1 Number of different types of educational institutions and number of students in the district in 1959-60 and 1960-61 ..... 285—290

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

9.1 Number of Printing Presses, Newspapers, Cinema Houses, other places of public entertainment and Periodicals & Journals 291

10. COMMUNICATION

10.1 Names and length of village roads in the district ..... 292—294
10.2 Different categories of roads in the district as on 31st March, 1961 295

11. COMMUNITY DEVELOPMENT

11.1 Names and Stages of the Community Development Blocks in the district 296

12. BANKS AND SMALL SAVINGS

12.1 List of Banking Institutions functioning in the district 1960-61 297
12.2 Gross and Net collections on Small Savings in the district from 1951-52 to 1960-61 297

13. FAIRS AND FESTIVALS

13.1 List of Fairs and Festivals observed in the district 298
13.2 List of different types of Hats and Markets in the district 299

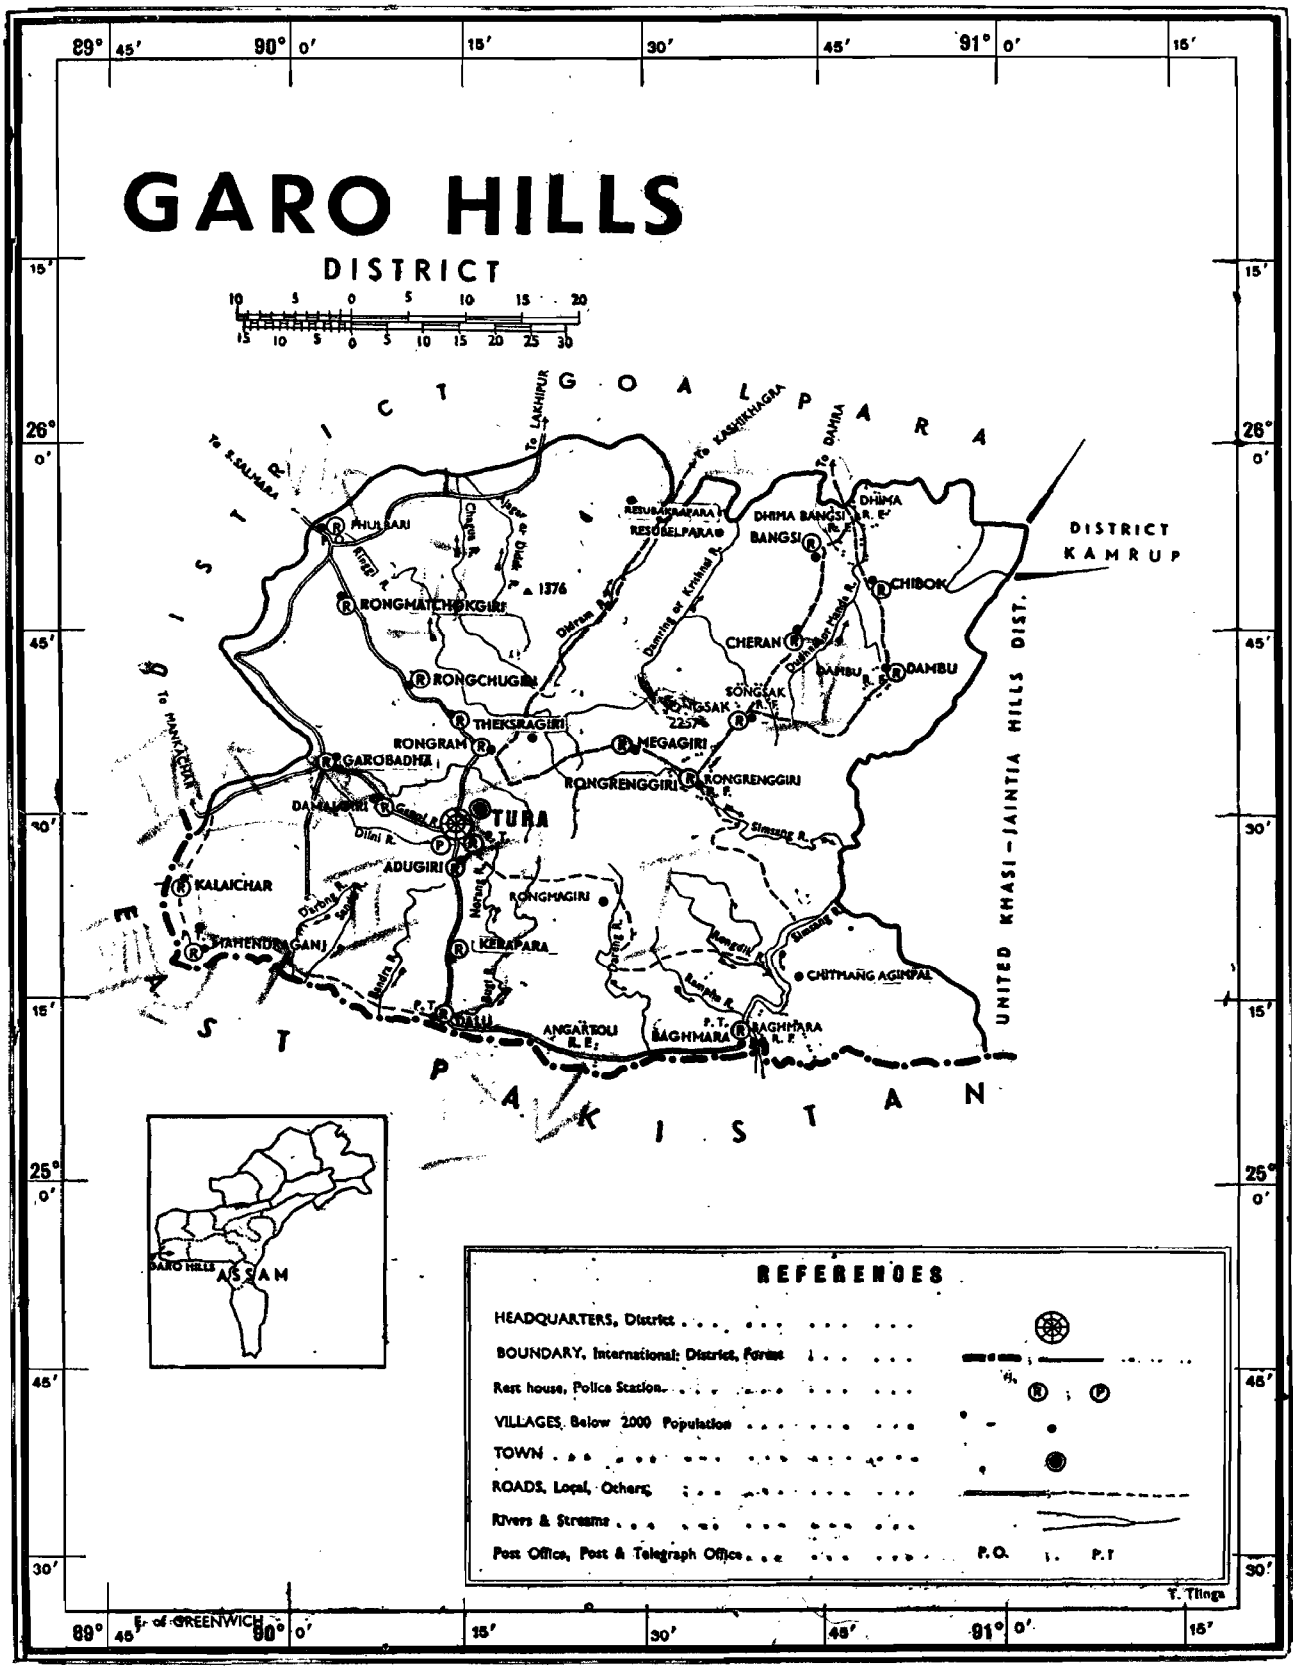

PREFACE

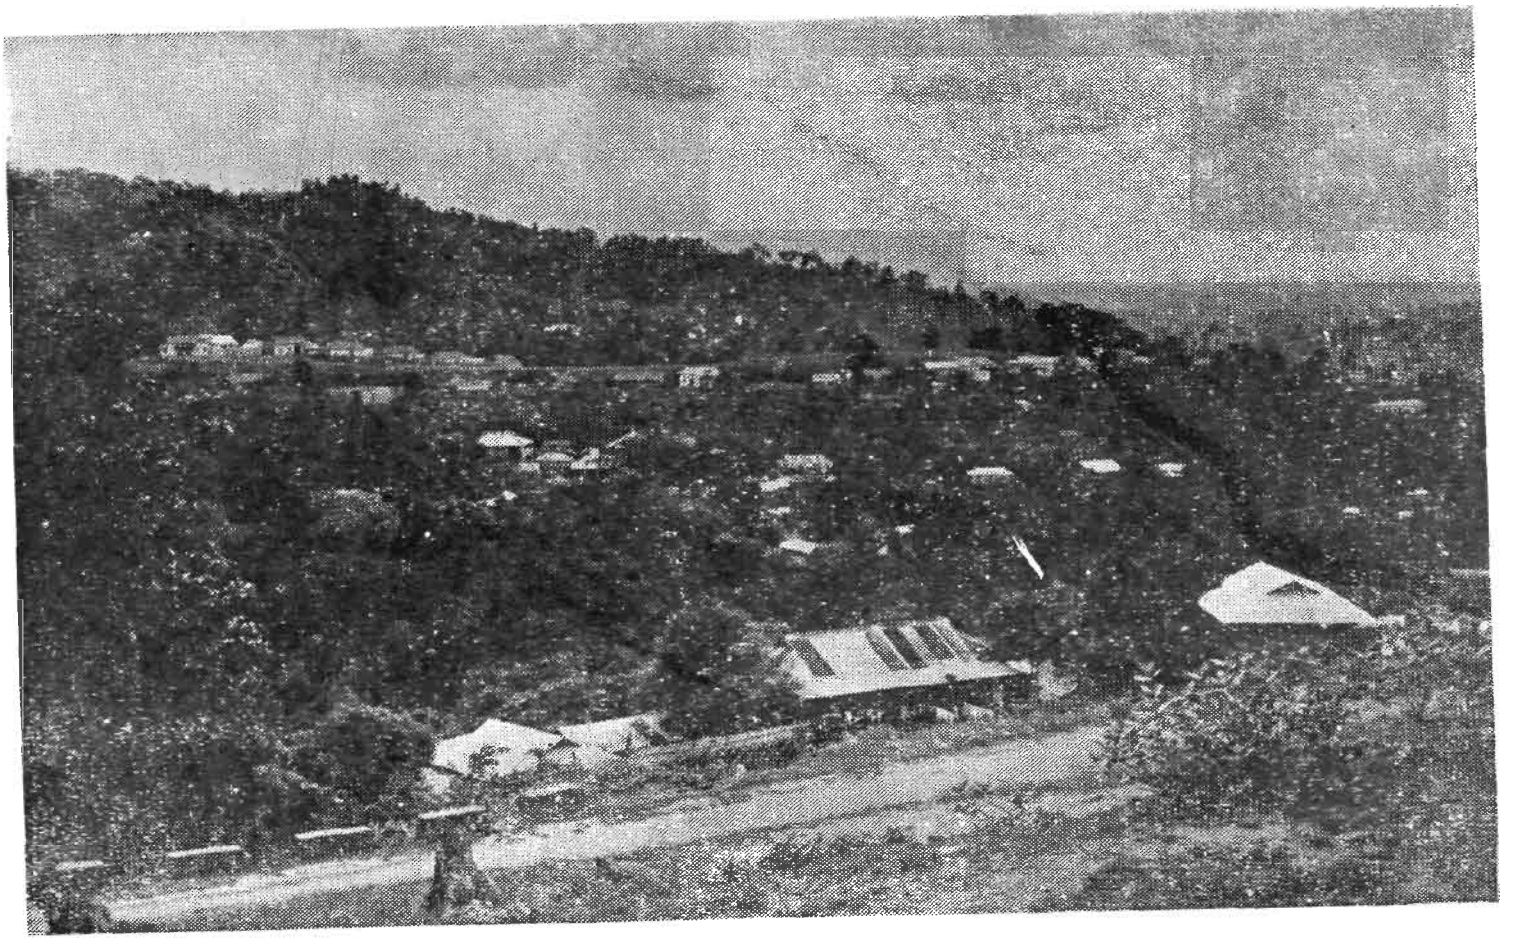

District Census Handbooks were introduced for the first time during the 1951 Census. In the 1961 Census, the District Census Handbooks have further been improved by making the introduction of the districts more elaborate, by the addition of official statistics and by having separate tables for Scheduled Tribes and Scheduled Castes. The introduction to each district is a sort of gazetteer giving the physical features, geological data, climate, rainfall and temperature, flora and fauna etc. and a short history of the people inhabiting the district. Sociological data about the people have also been given briefly. Attempts have also been made to appraise the impact of the two Five Year Plans on the economy of each district. Official statistics are given in the form of tables, but there is also an introduction explaining the purpose and utility of the official statistics. For example, the District Census Handbook will supply the number of schools and dispensaries existing in each district as well as the road mileage and many other data which one would like to know about each district. Such data will be useful to the administrators, legislators and sociologists who want to study the people of any district.

Data on the various subject mentioned above have been collected from the District Gazetteers prepared by Mr. B. C. Allen ICS, from monographs written on the people by well-known ethnographists and sociologists as well as from various Departments of Government, both Central and State. Many Deputy Commissioners and Subdivisional Officers have greatly helped me in supplying such data as are available with them concerning the district. The nature, quality and quantity of the data supplied by each Deputy Commissioner and Subdivisional Officer vary directly according to the interest that each officer has in his district/subdivision.

The preparation of tables was done under the able guidance of Sarvashri J. C. Bhuyan and K. S. Dey, Tabulation Officers, to whom I am greatly indebted. I could not have dictated my write-ups in such a short space of time had it not been for the great help given by my two Stenographers, Sarvashri G. Raghuram and J. Ramsden.

INTRODUCING THE DISTRICT

GARO HILLS

The Garo Hills District is bounded on the north by Goalpara district, on the west by the district of Goalpara and part of Rangpur (East Pakistan), on the south by the East Pakistan district of Mymensingh and on the east by the United Khasi and Jaintia Hills district. The district forms the western part of the Assam range and also the western and south-western boundary of the State. It is situated between latitude 25°9′ and 26° North and 89°47′ and 91°2′ East, and covers an area of 3152 square miles (or 8163. 7 square kilometers).

ORIGIN OF GARO

The origin of the name Garo has been the subject of some conjecture. In the southern portion of the hills there exists a division of the tribe who call themselves 'Gara' or Ganching. These people are not far removed from the Mymensingh district of East Pakistan, from which direction the Garos were first approached by Europeans or Bengalis. It is therefore not unlikely that this division of the tribe first received their appellation of Gara, that the name was extended to all the inhabitants of the hills, and that in time it became corrupted from 'Gara' to 'Garo'. Another theory, which has its foundation on the story of the migration from Tibet is that one of the original leaders of the migration was named Garu, and that he gave his name to the tribe. From the fact that Garos never used the name except in conversation with a foreigner, but always call themselves 'Achik' (hill-man), Mande (the man) or Achik Mande, it is likely that the first is the correct derivation of the name, and that 'Garo' is merely a corruption of the name of one of the subdivisions of the tribe.

Whatever may be the origin of the word 'Garo', the tribal people inhabiting the present Garo Hills district and some of its adjoining places have long been known to outsiders as the 'Garos'. It is after the word 'Garo' that the district bears its present name. The history of the district cannot, therefore, be disassociated from the history of the tribe, who form the immense mass of the inhabitants, and have given their name to the hills in which they live.

PHYSICAL FEATURES

As implied by its name, the greater portion of the district consists of hills which form the western extremity of the range dividing the valleys of the Brahmaputra and the Surma. The hills in the north are low, but gradually increase in height untill a fine range of mountains called the Tura Hills is reached. The hills near the Brahmaputra or Amawari, as that river is called by the people of the district, are uninteresting. They are usually covered with grass reeds or scrubby timber ; in former times they were no doubt covered with forest, which has gradually disappeared under the 'jhum' system of cultivation. Further in the interior of the district, when the higher ranges are reached, the country becomes bolder, and the scenery more beautiful. On a clear day from the summit of Tura hill a fine view can be obtained over the plain districts, the course of Brahmaputra being traceable for a distance upwards of a hundred miles. During the months of October and November, when the atmosphere is clear, a glimpse of the snowy range of the Himalayas beyond Darjeeling is often obtainable. It would be difficult to find a wider or more diversified scene than that which is presented to the eye of the traveller from *the top of the rather steep ascent of Tura hill.*

RIVER SYSTEM

Due to sufficient rainfall in the Assam range the gorges are occupied by rivers and rivulets, but not one of them is navigable by boats of four tons burthen throughout the year. Only five of the rivers can be said to be navigable at all in their course within the hills. These are the Krishnai, Kalu, Bhugai, Nitai and Someswari.

1. THE KRISHNAI

The Krishnai, which is called Damring by the Garos, takes its rise in the hills to the north of the Arbela range, near the village of Mandalanggiri, whence it flows in a northerly direction past the vellages of Rongrengiri, Thapa and Songma to Jira, a frontier village, where it leaves the district and enters Goalpara. It is navigable by canoes in the cold season as far as Rongrengiri but there is very little traffic. During the earthquake of 1897, the greater part of the bed of the Krishnai between Dekachang and Jira sank and formed a lake about eight miles long and in places nearly a mile wide. The river enters this lake near Dekachang.

2. THE KALU

The Kalu river, known by the Garos as the Gonal, takes its rise in the Tura range near the station of Tura, and flows in a westerly direction till it leaves the Garo Hills near Putimari and enters Goalpara. It again appears near the Rangapani hill, and for about two miles form the boundary of the district from the village Rangapani to Peshkar Bhita. It then falls into the Jinjiram, near Kakripara in the Goalpara district. Its principal tributary is the Banarasi river, which is called Rongkon by the Garos, which also takes its rise near Tura, and flows into the Kalu at a short distance from the point where it leaves the district. The Kalu is navigable for a distance of ten miles in the hills from Harigaon as far as Damalgiri, which is within twelve miles of Tura, by boats of two tons burthen, but only during the rainy season. The passage is dangerous, owing to the numerous snags in the riverbed, and until the Tura station was opened in 1868, the river had never been navigable at all.

3. THE BHUGAI

The next river is the Bhugai, which takes its rise on the Tura range a little to the south-east of the station ; and flows in a southerly direction passing many villages from Anai to Dalu, near which it leaves the hills, and ultimately falls into the old bed of the Brahmaputra above the station of Nasirabad in the district of Mymensingh (East Pakistan). Its principal tributary is the Noaranga, which, falls into it near the village of Remrangpara. The Bhugai is known to the Garos as the Bugi.

4. THE NITAI

The Nitai is known to the Garos as the Dareng and takes its rise on the southern slopes of the Tura watershed. It passes the villages of Adapgiri, Chakpatgiri, Sembu, Choto Sembu, Silkigiri and Bamongiri, and at Ghoshgaon enters the district of Mymensingh, where it falls into the Kanks river. Canoes can proceed as far as Chakpatgiri when the river is full of water.

5. THE SOMESWARI

The Someswari, or as it is called by the Garos, the Simsang, is the largest stream in the district. It drains the country to the north of the Tura range, up to the watershed of the Amblai river. It takes its rise on Nokrek, and drains the country between Tura and Arbela ranges and the valley of the Rongdi. The river follows a very winding course and at first flows in an easterly direction for about thirty miles. It then takes a turn to the south and runs generally in a southerly direction, till it emerges on the plains in pargana Susang of Mymensingh. It is navigable for fair sized boats as far as Siju, about twenty miles from the point where it issues from the hills. Beyond this point, dug-out canoes can occasionally be used as far as Rongkaibibra, the point of junction of the Someswari and the Rongkai river. The upper reaches of the river can hardly be described as navigable, as the rapids are long and dangerous. The principal tributaries are the Rongkai, the Rongdi and the Chibok.

No important changes of course, nor any instances of alluvium or diluvium, are known to have taken place in the rivers. Their banks are usually steep, and in some places, the streams flow through deep ravines, hardly accessible to man or beast. The beds of the rivers are generally rocky while within the hills. All the rivers and streams within the hills are fordable at nearly every bend during the dry season, but in the rainy season, many of them become impassable torrents.

LAKES AND MARSHES

The only lake in the district is that which has been formed by the subsidence of the valley of the Krishnai during the earthquake of 1897. The greater part of the bed of the Krishnai between Dekachang and Jira sank and formed a lake about eight miles long and in places nearly a mile in width. The lake was originally the site of a dense forest, but in places it is now as much as twelve feet deep. The only other beels of any importance are the Bara bil in the Kalumalupara pargana, and the Kata beel between Kalaichor and Mahendraganj.

THE MOUNTAIN SYSTEM

The principal mountain ranges in the Garo Hills district are the Tura and the Arbela hills. The Tura range runs almost through the centre of the district due east and west, until it joins the Khasi mountain ranges. The Arbela range is situated to the north of the Tura hills, and runs almost parallel to them. Nokrek (4,652 feet), the highest peak in the Tura range, is situated about eight miles to the south-esat of Tura, and from this point the hills gradually decline in height. Kailas east of the Someswari, is 3,375 feet above the level of the sea, and Balpakram, on the border of the Khasi Hills, 2,831 feet. These ranges are generally in the form of long even ridges, occasionally diversified by peaks and towering masses. The rest of the district consists of a tumbled mass of hills, whose general tendency is to run north and south. Several of the peaks are between 1,500 feet and 2,000 feet in height, but the general level is considerably less than this. In their original state the whole of these hills must have been covered with dense tropical forest,

and much of this forest still remains. Where, however, the hills have been cleared for cultivation, bamboos and high reed jungles cover the sites of the fallowing jhums. The sides of the hills are usually fairly steep but not precipitous, but an exception should, perhaps, be made in the case of the Tura and Arbela ranges. Here, though there are few rocks and precipices to be seen, the ascent to the summit except by one of the recognised paths would be by no means easy even for a man on foot. The hills, as a rule, take the form of ridges sloping steeply to the valleys with which they are intersected, but any boldness of outline which they may possess is effectually concealed by the luxuriance of the vegetation in which they are enshrouded. The Kailas hills, which is called Chitmang by the Garos, stands out an abrupt hog-backed mass, which towers above most of the hills in the vicinity. It thus appears to be higher than it really is, and it is probably on this account that it is regarded by the Garos as the home of the spirits of the dead.

GEOLOGY

The greater parts of Garo Hills are formed of gneissic rocks. Upon them are superimposed strata referable to the cretaceous system which consist of sandstones and conglomerates with subordinate clays and occasional coal seams. The cretaceous beds are overlaid by rocks of nummulitic age, consisting of limestone and sandstone with interstratified shales. Above the nummulitics there are upper tertiary rocks, composed mainly of sandstones, which form low hills along the border of the Mymensingh district of East Pakistan. Marine fossils have been met with in the lower beds of these sandstones.

The geological time scales represented in the Garo Hills are the oldest Archaean group, that covers nearly half (4142 square kilometers) of the district in the north and the Tertiaries. The archaeans are represented by gneisses which iuclude veins and lenticles of pegmatitic material and hornblende-schist. The foliation of the gneiss trends roughly north and south with dip both to the east and west. Near Dobu, magnetite quartzite rocks, possibly belonging to the Dharwans, are exposed and similar rocks infolded with the gneiss are found again west of Chimagiri and south-west of Ara. It is possible that they remain in such isolated positions partly owing to faulting. Kaolinised gneisses and thick deposits of Kaolin are seen in the valley of Rongtham from near Narringgiri (25°37′ N-90°42′ E) southward, and well developed in the valley south-esat of Dobu and further south around Tura and elsewhere. Except the magnetite-quartzites, other members of the Shillong series are not met with in the region.

The Permian is represented by an exposure of Gondwana rocks, consisting of carbonaceous shales with lenticles of vitranised coal, sandstone and grit, measuring 18 spuare kilometers at Singrimari. On fossil evidence (Vertebraria indica) and on the basis of analysis of the coal, the beds are assigned to Barakar (Lower Gondwana) series. The beds dip gently westward under the alluvium of the Jinjiram. They contain, however, no working seams. It is suggested that due to a series of north-south faults with westerly downthrows, the Gondwana bed, once of a great thickness, has been greatly depressed ; this presumption is confirmed by the discovery of Gondwana coal at 2400 to 2700 Metres depth in oil well drilling in East Pakistan, The Jurassic is represented by many dolerite dykes, sometimes as silt-like intrusions and sometimes with inclusions of gneiss, which pierce the Gondwanas and are mainly observed between Damra and Simsang. They are regarded as of the same age as the Sylhet Trap or the Rajmahal Trap. Near Singrimari the doleritic materials have also undergone widespread kaolinisation over the gneissic area, perhaps at the close of the Cretaceous period, suggesting that land did exist on the Tura plateau at the end of the Cretaceous period.

The Jaintia Series (Tertiary system) here consists of the Tura stage, the Siju stage and the Rewak stage. The series covers an area of 381 square kilometers and is comparable to the Theria, the Sylhet limestone and the Kopili stages of the Eocene age of the Khasi and Jaintia Hills. The Tura stage (170 metres thick) beds are faulted against the gneiss of the mountain to the west of Tura and alsc on the Dobu road, about 5 kilometers south of Tura. The outcrops stretch across the southern part form south-east to north-west in a belt of 19 kilometers wide. The stage consists of sandstone with intercalated coal seams. The overlying Siju range stretches across the district from east to west in a ribbon outcrop 5 kilometers wide and measures 1140 square kilometers. The Siju and the overlying Rewak stages are represented at Damalgiri, west of Tura, by impure sideritic limestone and calcareous shales. The limestone decreases in thickness from 90 metres west of Simsang river to 15 metres west of Tura. At Damalgiri the sideritic beds are barely 1.5 metres thick suggesting a shallowing of the Eocene sea in a westerly direction. The Surma series, of Lower Miocene age, overlies the beds of the Jaintia Series with an unconformity. The intervening Barail series is missing. The Kopili stage, of the Eocene, is directly overlain by the Bhuban stage of Surma series, which consists of soft sandstone and is exposed on the banks of the old Brahmapntra river north-west of Mahendraganj. The overlying Tipam series

of Upper Miocene age, covers 1341 kilometers in outcrops across the district from east to west, with varying width of 6.5 kilometers near Maheshkhali to Mahendraganj. Rocks of Quarternary era, the older alluvium, covers an area of 251 square kilometers and are seen east of Manikarchar and south-east of Mahendraganj. The recent Brahmaputra alluvium reaches up to the northern bonndary of the district and on the west extends eastward from the Brahmaputra itself.

The Tura range was brought about by the directional movement of the crust from a northern direction and the Darranggiri and neighbouring coalfield have been thrown into basin by the same movement.

ECONOMIC MINERALS

The Garo Hills district is a potential rich mineral area of Assam. There are deposits of coal, limestone and fireclay which are virtually untapped.

COAL

Coal found in the district is of cretaceous origin. The areas include the closely associated Baljong, Doiring, and Waimong (Chutmang) fields lying east of the Simsang Valley on the slope below the Kaivlas Peak. There are two seams in Baljong and Doiring and three in Waimong. All are of good quality. The reserves in the lower seams are computed at somewhat over four million tons in Baljang and one million tons in Doiring. The Rongrengiri coalfieds lie in the Simsang valley about twelve miles east of Arbela and twenty miles east of Tura. The area covers about 25 square miles. Coal seams in Rongrengiri are thin and are not worth mining at present.

Of late, much attention has been paid to the development of the Derangiri coalfied which lies north of Tura range, a few miles below Rongrengiri. Outcrops of coal are found on both sides of the Simsang river which flows through the Damalgiri area. Field investigations reveal the presence of a main seam ranging in thickness from five to nine feet and exposed at places in the river beds. Another upper seam one and a half to two eet thick is seen some 200 feet up in the sequence. There are some other thin seams also. The main seam in the Derangiri field contains reserves of about 125 million tons of hard, splintery coal.

The Derangiri coal measures extend eastwards up the Rengchu valley into the Nongstoin area of the Khasi Hills. On the Asilagaon hill there are occurences of at least two coal seams, out of which the lower one has reserves of not less than 15 million tons partly coking coal.

LIMESTONE

Limestone (Nummulitic) is found in the Siju Limestone stage of the Jaintia series of Eocene age. The bed stretches along the entire length of the Garo Hills from Pendengru on the east to Damalgiri on the west. White clays are known to occur in as many as ten places in the district. There are well-exposed sections near Tura, Deranggiri, Damalgiri etc. along the southern slopes of the Tura range. Feldspars and quartez occur almost obiquitonsly in the gneiss of the district.

The Associated Cement Company Limited had projected to build a Cement Factory at Siju Artheca, where coal and limestone occur together, carrying the finished product over an aerial ropeway to the nearest road head at Jhana Janijal. The partition of the country killed the project. The development of the Pendengru coalfied died a similar death. At present, a 5,000 kilowatt power plant is being built at Nangalbibra in the Simsang, in the Deranggiri coalfield. The coalfield will be worked by the National Coal Development Corporation. The raw materials for the stoneware or pottery plant is easily available in the area. so also the main raw material for a calcium carbide factory.

Lack of communication has effectively stood on the way of exploitation of the presently known mineral deposits. The easy outlet from the district is through Mymensingh, now in East Pakistan. With the partition, these outlets have been closed.

CLIMATE AND RAINFALL

The general elevation of the district is low. Tura, the headquarters of the district is situated on a spur of the main range and as it is only about 1,300 feet above sea-level, the temperature at certain seasons of the year is fairly high. November to February are the only really cold months in the year. Though the heavy rainfall in summer months keeps down the temperature, it renders the atmosphere exceedingly steamy and oppressive.

The average annual rainfall of the district recorded at Tura is, 2,689 mm. more than two-thirds of which is precipitated in the four months, May to August. In the four other months, November to February, there are altogether less than two inches of rain. The rainfall sn the district decreases from soiuth to north. At the south-east end of the district the average rainfall is above 400 cm. In the

next belt to the north, it averages between 300 to 400 cm. and in the western and the north portion, the rainfall averages 250 to 300 cm.

EARTHQUAKE

The district lies in the epicentral region of some important earthquakes. In the great catastrophe of 1897, the district suffered heavily with the loss of life and property. There were many landslides in the hills. The Chidrang fault in the Krishnai river is responsible for the aftershocks after the main earthquake. The other earthquakes originating in the district are that of September 9,1923, which had the intensity of 7-1 on the Rossi-Forel scale, and that of July 3,1930 with the intensity of 7-1.

TORNADOES

In 1900, the northern portion of the Garo Hills was visited by a tornado of most exceptional violence. On the 18th of April, a violent storm traversed the portion of Goalpara which lies between the Brahmaputra and the Garo Hills, and finally disappeared into the latter district. The path of the storm was only about a quarter of a mile in width, but within this limited area the strength of the hurricane was quite phenomenal. Thirty persons were killed outright in Goalpara, and eighty-eight injured. In the Garo Hills the village of Shondana, which was exposed to the full force of the wind, was utterly demolished and six persons were killed and nine injured. This storm occured about 4 P. M. in the afternoon, and on the following day, but about two hours earlier, there was a second hurricane, which followed a line a little to the north of the storm of the 18th. It struck the village of Silkata, killing eight persons and injuring one, and blew down trees and houses. One of the killed, a boy, had his head torn off and his back broken, while three others had their heads completely smashed and their brains dashed out.

FORESTS

The Garo Hills district it rich in forest resources. It has got 103 square miles of Forest Reserve which belongs to the Government and about 2,706 square miles of what have been called Unclassed State Forests. These Unclassed State Forests are included on the Akhing lands of various Nokmas and such lands are subject to shifting cultivation, the annual areas of shifting cultivation being allotted by the Nokmas to the villagers of his Nokmaship so that actually very few of these Unclassed State Forests bear any useful tree growth. The administration of these Unclassed State Forests is now vested in the District Council.

Sal is the principal timber species occuring in the Forest Reserves. It is, in the log form, exported primarily to East Pakistan after being taken to the Brahmaputra by road from the plains areas of the district. Sawn timber of Sal, mostly in the form of sleepers, is supplied at Pandu to the Eastern Group Sleeper Control. The district is the second biggest producer of Sal in the State. Apart from Sal, the principal other useful species occuring in these forests are Gurgra which is in keen demand as a plywood timber and also Haldu which has also been accepted as a plywood timber but at present not much in demand.

The Unclassed State Forests are full of bamboos of various kinds. While touring in the Garo Hills one sometimes simply wonders at the vast expanses of bomboos, The principal species are Dalu and Muli and these are exported to Pakistan and to a less extent to Gauhati. A revenue of more than a lakh of rupees is derived from the sale of Dalu bamboos and Muli bamboos. The Muli bamboos which have become reduced in vigour and hence thinner are being used for the manufacture of umbrella handles in the small industries located in the district. Small quantities of Agar and Cane (of the Raidang Variety) are also produced. Deposits of coal are known to exist in the Uuclassed State Forests but they have not been worked out so far.

Due to bad communication, the forest resources of the district cannot be exploited to a satisfactory extent. The Government is taking keen interest in exploiting the Forest products and spent a sum of Rs. 289,117.00 during the First Five Year Plan. The expenditure considerably increased in the Second Five Year Plan and amounted to Rs. 1,308,914.00. Old roads are improved and maintained while new roads are being constructed ; old plantations are maintained while creating new plantations, projects are piloted, Cinchona Nurseries maintained, Zamindari Forests reclaimed, new regeneration areas created and staff increased. Taking advantage of the habits of shifting cultivation of the people, plantations of Forest species have been created by the Forest Department by the tungya method whereby the villagers raise agricultural crops on one acre of land allotted inside Forest Reserves annnally to them, at the same time sowing seeds of Forest tree crops in between the lines of agricultural crops. Excellent plantations have been created by this method.

FAUNA

The hills abound in games, the larger kind being elephants, tigers, leopards, buffaloes,

bears, wild pigs and deer of which the principal varieties are the sambar, the barking deer and the swamp deer. In the low country, occasionally rhinoceros were found. The serow is sometimes seen and wild dogs are occasionally met with. Wild buffaloes are found in the valleys of the Bhujai, Nitai and the Someswari, and mithuns are fairly common. Wild elephants are much feared by the Garos as they often injure the crops and sometimes cause loss of life. In 1904, 17 persons were killed by wild animals, and rewards were paid for the destrnction of 50 tigers and leopards and 54 bears. Since 1878, elephants had been hunted almost every year by the Government Khedda department, about 190 animals being annually captured. Small games inculde peafowls, wild ducks of various kinds, snipes partridges, pheasant and jungle fowl, while excellent mahseer fishing can be obtained in the rivers.

As eveywhere else, wild animal life has been sadly depleted in this district which once used to have all kind of animals ; at present the principal wild animals are only tigers and elephants.

POPULATION

According to the Census of 1961, the Garo Hills district is surpassed only by the United Khasi and jaintia Hills districts in total population among the autonomous districts of the State. The population of the district is now 307,228 of whom 156,740 are males and 150, 488 are females against the Census of 1951 population figure of 242,075 of whom 124,054 are males and 118.021 females. The present Census shows a total increase of 65,153 persons over the last Census, the percentage of increase being 26.91 against the 1951 percentage increase of 8.28 which was the lowest registered in the State. The lowest percentage in the present Census is registered by the Cachar district, it being 23.53. The rates of growth of population were 14.94.12.71,6.57 and 17.11 percent for 1911,1921,1931 and 1941 respectively. So the 1961 Census shows the highest decennial growth compared to the earlier Censuses. This phenomenal increase is due to low death rate, better coverage, better health facilities and migrants from outside, mainly from East Pakistan. The percentage increase is 34.45 for the whole State and for the Assam Hills Division it is 35.96.

The density of population of the district in the 1961 Census is 97 persons per square mile as against 77 persons per square mile in the last Census. The density is only 58 persons per square mile in the Assam Hills and for the State it is 251 persons per square mile.

The Garo Hills district has no subdivision. It is divided into 10 mauzas of which Mauza IV has a population of 62,777 persons, the largest in the district. The smallest population is held by Mauza X, the figure being 11,310. Mauza I shows, strangely enough, a decrease, but not an increase of population over the last Census while Mauza X in which Tura, the district headquarters is situated, registers an increase of 181.8 % in the 1961 Census over the 1951 Census. The high rate of increase is explained by the tendency to move into towns.

Tura, the official headquarters of the district, which covers an area of 3.53 square miles is the only town in the district. It contains a population of 8,888 persons in the present Census of whom 5,423 are males and 3,465 females, i. e. for every 1000 males, there are 639 females. Therefore, of the total population of 307,228, the urban population is only 8,888 while 298,340 live in the villages. As in the case of all other districts, a definite tendency to move towards urban areas is prominent in the Garo Hills district.

The literacy percentage of the district in the 1961 Census is 19.96 against 7.31 in the 1951 Census. The percentage among the male population is very high compared to that of the female population, and it is again comparatively high in the urban areas where it is 60.17 as compared with the rural percentage. Garo Hills district is one of the most illiterate districts of the State. The average literaey percentage for the State as a whole is 27.36 and for the Mizo district, which registers the highest rate in the State it is 44.01.

A good number of displaced persons, mostly from East Pakistan, is to be found in the district. This is natural because the district is bounded on the west and south by Rongpur and Mymensingh districts of East Pakistan.

HISTORY

Of the origin of the Garos we have no information of any historical value. Until the latter part of the nineteenth century, little was known of this tribe except by those who suffered from their depradations, and by the officers who undertook the task of pacifying them and changing them into law-abiding subjects. Fthnologically the Garos are a section of the great Bodo race, which at one time occupied a large part of the valley of the Brahmaputra. They are said to have entered Assam from the north-east, and to have spread in successive waves, not only over the valley of the Brahmaputra, but even beyond it to the hills of Tippera. According to their own traditions, the Garos came originally from Tibet and settled in Cooch Behar. Their next wanderings were towards Gauhati, where they were enslaved by the

Assamese, but released by a Khasi Prince, who settled them in the neighbourhood of Boko. The place was, however, infested with tiger-men, and the Garos then moved into the Habaraghat Pargana, whence they finally wandered into the hills in which they now are found.

The earliest notices of the Garos describe them as being in a state of intermittent conflict with the Zamindars of the large estates lying at the foot of the hills. These Zamindars were, in all probability, themselves sprung from the great Bodo stock to which the Garos belong, but in power and civilisation had advanced far beyond their highland Kinsmen. This was believed to be in the days of Mughal rule and these powerful Zamindars, who only paid a nominal tribute to the British Government, enjoyed a position of semi-independence. The exactions levied by the subordinates of these border chiefs irritated the hillmen, and the belief that the spirits of their headmen required the souls of others to attend them in the next world acted as a further incitment to the despatch of raiding parties. The border chiefs with whom the Garos are principally brought in contact were those of Karaibari, Kalumalupara, Habraghat and Mechpara. One of their duties was to protect the plains from agressions of the hillmen, but their principal object was to enrich themselves with trade, cotton being a valuable article of export from the hills.

In 1775-76, the Zamindars of Mechpara and Karaibari entered the hills to avenge some Garo raids of more than usual atrocity. They remained for some years in the hills and brought a considerable tract of under their control. The principal chief of the southern hills at that time was a man called Renghta, and even he became subject to the Karaibari Zamindar. The Zamindar was an individual of much force of character, who tried to obtain for himself a position of absolute independence. He declined to pay his revenue, opposed all attempts to determine the boundaries of his Zamindari, and it was till 1815 that he was finally arrested.

The lawlessness of the Zamindars in the plains was naturally enough reflected in the hills, and, in 1816, Mr. Scott, afterwards Agent to the Governor-General on the North-East Frontier, was deputed to enquire into the matter. It could hardly be denied that action of some kind was called for, as during the ten years ending with 1816, 157 villages had been burnt by the Garo raiders and 178 persons killed. As a result of this enquiry it was decided to completely remove the Garos from the control of the Zamindars, to prohibit the levying of tne illegal dues which had been the cause of so much friction, and to place the frontier markets under the direct management of the Government. Mr. Scott entered into relations with 121 Garo chiefs living west of the Someswari, and as long as he was able to give the matter his personal attention, the peace of the frontier seemed to have been undisturbed.

The tribe at this time was divided into the following three sections : the Garos settled in the plains who did not differ much materially from ordinary raiyats, the Garos in the outer ranges who had to some extent been subdued and were assessed to tribute and the independent or bemulva Garos who occupied the higher hills in the interior.

In 1825, there was some trouble near Sherpur on the borders of Mymensingh, in which the Garos inhabiting the lower ranges were implicated. At the end of the eighteenth century, a Muhammadan Fakir had settled here and had attracted a small following, called in derision by their neighbours paghuls or fools. In 1813, he died and was succeeded by his son Tippu, who, with his mother, laid claim to miraculous powers. The villagers, many of whom were Garos, were much oppressed by the Zamindars. In 1825, a body of 700 men assembled to attack their landlords at Sherpur, and serious rioting took place. The paghuls were ultimately subdued, the country they inhabited was held to be outside the borders of the permanently settled estates, and the agrarian grievance was removed. In 1833, the paghuls again attempted to stir up a peasant rising, but it came to nothing.

About this time there was a certain amount of unrest upon the frontier. On enquiry being made it was found that it was largely due to the oppressive conduct of the officials of the Garo markets. An expedition was sent up into the hills in 1837 under Mr. Strong. The arrears of tribute were realised without difficulty, many of the Garo villages tendered their submission, and all this was effected without any loss of life on either side.

Occasional murders still took place, and in 1848 it was found necessary to send an expedition to subdue the Dassanni Garos, who had murdered one of their headmen with all his family for the somewhat inadequate reason that he had requested the tribe to pay tribute which had been in arrears since 1834.

In 1852, the Goalpara frontier was in a very disturbed condition. Seven raids took place, in which 44 persons were killed. An expedition was despatched into the hills, which burnt a village, but as the raiders were not surrendered, it was decided to blockade the hillmen. This was attended with certain measure of success, as they were to a great extent dependent on the profits of the cotton trade, and some of the offenders were given up

to justice. For three or four years there was peace upon the frontier, but towards the end of 1856, the hillmen broke out again, and between 1857 and 1859, there were nine raids made into Goalpara, which resulted in loss of twenty lives.

Further disturbances occurd along the frontier, the closing of the markets proved ineffectual, and in 1861 an expedition was despatched into the hills. The troops advanced from two sides, from Goalpara and Mymensingh, and succeeded in reaching and punishing most of the offending villages. Arrangements, were then made for the appointment of local headmen who were to be responsible for the arrest and surrender of offenders, but this arrangement did not extend to the hills overlooknig Mymensingh. An attempt by the Susang Raja, a Zamindar of Mymensingh, to levy rent in the hills led to a murderous raid in 1866, which was punished by an expedition.

Government had by this time to come to the conclusion that control from without would never really solve the Garo question. Hitherto it had been thought that it would be quite impossible for a European officer to exist in these malarious hills during the rainy season, but in 1866 it was decided that the experiment should be made, and in the following year, Lieutenant Williamson was established on one of the spurs of Tura mountain.

The success which attended this experiment was remarkable. The Garos are naturally a cheerful, kindly race, who, when fairly treated, give no trouble, and between 1867 and 1871 nearly one hunderd independent villages tendered their allegiance to the British Government.

In 1870, when the Survey of the Khasi Hills had nearly been completed, the survey party found itself at the north-east border of the Garo Hills, and it was decided to carry out a survey of that portion of the Garo territory which acknowledged British rule. The Deputy Commissioner, Captain Williamson joined Major Austin who was in charge of the survey party, and the two officers marched across the hills from Susang to Damra, and were thus the first Europeans to traverse the hills from Mymensingh to Goalpara. The only village to offer any opposition was Bangangri, and this was overcome by the exercise of a little tact. The villagers dropped their hostile attitude, received the party, and finally tendered their submission and agreed to pay revenue to the British Government. Their example was then followed by many other independent villages.

In the following season, work was again resumed till it was stopped by an unfortunate incident which occured in March, 1871. It was necessary for the purposes of the survey to clear a station on the summit of the Mimanram mountain. Two coolies who, it is said, were unable to speak the Garo language, were deputed to collect labour from the villages of Pharamagiri and Rangmagiri which are situated near Mimanram. When they arrived at Rangmagiri they found a feast in progress, and were offered some liquor by the revellers. What happened then, it is difficult to say, but it is obvious that a dispute can easily arise when one of the parties to it is half drunk, and neither side can properly understand the language of the other. The Garos threw themselves on the two coolies and attempted to make them prisoners. In the course of the struggle, one of them succeeded in escaping, the other was murdered, and his head kept as a trophy.

The season was so far advanced that punitive measures were postponed till the following cold weather. The villages were visited by Captain La Touche, the officiating Deputy Commissioner, and as he was unable to arrest the murderers, a party of police was left at Pharamagiri. In May, 1872, two of the men who were most responsible were brought in, and shortly afterwards an attack was made on the protected village of Demakchigiri by the independent villages of Kokwagiri and Bawigiri. An attack was also made in the outpost stationed at Pharamagiri. The Deputy Commissioner proceeded to this village and occupied the villages of Kokwagiri and Bawigiri without difficulty, but Government had by this time come to the conclusion that it was no longer desirable to tolerate any so-called independent villages in the hills. The Lieutenant-Governor, therefore, submitted proposals for their subjugation and the same met with the approval of the Governor-General in Council, and the necessary preparations for an expedition were at once taken in hand.

The expeditionary force was divided into three columns. One column, under Captain Davis, entered the Hills from Goalpara district on the north by the Nibari Duar ; a second under Mr. Daly, entered from the Mymensingh district, on the south ; the third or main column under Captain Williamson, the Deputy Commissioner, marched from Tura. It was arranged that each column should follow a prescribed route through the independent tract, visiting and enforcing the submission of all villages on its way ; and it was hoped that all would meet at a central rendezvous at about the same time.

The expedition was singularly successful. Many villages tendered their submission after little or no opposition. The Garos, convinced apparently that resistance was hopeless,

accepted the terms offered by Captain Williamson, and had under his directions, been engaged in opening out paths across the hills in several directions.

The subsequent history of the district is of quiet though not of rapid progress. The Garos are some of the most peaceful of the hillmen in Assam, and quickly settled down under a rule which was both considerate and light.

TOWN

There was no town in the Garo Hills before the 1961 Census. In 1961, I included Tura as one of the towns of Assam because its population was 8,888 (which exceeds 5,000), the density is more than 1,000 per square mile and more than 75% of its adult population live by non-agricultural means. Although Tura has no municipality or town committee, it satisfies the three criteria laid down for any place to be called a town.

VILLAGES

There are now 2,415 inhabited villages in the Garo Hills as against 2,257 in 1951, by far the largest number of villages in any hill district of Assam. The main reason for the big number of villages is because the Garos used to practise almost entirely only the jhum method of cultivation and so a village may merely consist of only a few houses because these people want to live as near their cultivation as possible. Their social system is also such that they do not have any special veneration for any established village like the Khasis or the Mizos. Indeed two or three Garo villages have only less than ten persons, and in fact, many Garo villages consist of only a few houses, and in no other district of Assam are the villages so small.

HOUSES

There were 71,418 houses in the Garo Hills in November 1960 according to the Census houselists. The houses are mostly made of bamboo for the frames and thatching grass for the roof although some wooden posts are also used to support the 'chang' portion of the house. The front portion of the house is more or less on a level with the ground, but as the houses may run up to 80 feet to 100 feet in length and are built on the side of a hill, a considerable portion of the structure is of necessity to be raised on wooden posts. The breadth of each house is more or less about the width of each room only. The interior of these elongated houses is divided into several compartments but there is a shortage of light and ventilation. Whenever they can, they use Sal wood for the main posts of their houses and granaries. The poorer villages have to content themselves with bamboo. Thatching grass is nearly always available but in some places bamboo leaves are used for roofing. There are no social distinctions in the choice of materials. A Gannani Nokma can show his rank in the appearance of his house. For example, in the front wall and the flank walls of the front verandah, ordinary people have the slats horizontal and vertical, but the Nokma may place these cross-wise, whether in the open work window ventilation, in the upper part of the front gable, or in the close woven wall proper. There are generally one or more verandahs at the side or end, and in front two wooden posts are erected in memory of each dead member of the family. Before some houses there will be seen a regular sheaf of thirty or forty posts, some of which are roughly carved into the effigy of the human form and dressed in the clothes of the deceased. The horns of all cattle killed are also kept in the front verandah, as an abiding testimony to the wealth and liberality of the family. The above description, however, apply mutatis mutandis to the Garos of the last century. Modern educated Garos have built their houses according to the Assam type of houses.

FOOD AND DRESS

The staple food of the Garos is rice, but they also eat yams, beans, millets, maize and chillies in addition. They also eat the flesh of almost any animal, domesticated or wild, which they can get. Like many other hill tribes of Assam, the Garos of the interior do not take milk. Nowadays, however, many Garos have become Christians and many of them have become educated. Educated Garos and Christians generally take milk.

In the old days, and even now in the interior of the Garo Hills, the Garo costume is as scanty as is compatible with decency. The men wear a narrow cloth, which is passed between the legs and fastened round the waist. The women's cloth, which is only about fourteen inches broad, is fastened round the body below the navel, the two top corners meeting over the thigh ; the bottom corners are left unfastened, as otherwise the petticoat would be too tight for comfort. The women load their ears with masses of brass earrings, and individuals have been seen with more than 60 brass rings, each 6½ inches in circumference, and weighing altogether just under 2 lbs. in the lobe of a single ear. The lobe, though enormously distended was not broken, but the weight of the rings was to a great extent, supported by a string passed over the head. Garos wear turbans wound tightly round the top of the head so as to keep

the hair erect. The actual crown of the head is, however, bare.

Every man who is a Ganna Nokma may wear a red pagri. This is of silk with a fringe, and yellow embroidery, and is woven by the Khasis. Such pagris are common in the Chisak country where Nokmas are three a penny. but very rare in the rest of the hills. The Chisaks alone among the Garos wear jaksils when of the rank of Nokma. These are plain bronze or brasshops worn just above the elbow. In the old days when the coloured loin cloth or gando was decorated with beads, as it rarely is nowadays, only one who had taken a head could sport a fourth row of beads. Now anyone who has given the requisite feasts is at liberty to do so. Only great land Nokmas are allowed to keep yaks' tails in the house, and on bringing one in, the Nokma has to perform a sacrifice called gurerima (holding a horse) but this is confined to Chisaks.

Modern Garos who are Christians and who have been educated, have changed their mode of dress. The men folk in the highland regions generally were western dress while those who live near the plains also wear a dhoti. The educated women folk wear a sari.

RELIGION

The Garos appear to believe in a Supreme Deity and in a future life, but, as is usual in the hills, the bulk of their religious activities are devoted to the propitiation of evil spirits, who are supposed to be the cause of the misfortunes that befall them. The following is an old description of a Garo sacrifice—"The priest squatted before a curious flat shield of split bamboo and cane, and muttered strangely to himself, as though under the influence of some drug. A villager kept dragging a kid in a circle round and round the priest and the god, and each time as it passed the priest dabbed it on the head with a little flour and water. Finally a little of the mixture was forced into its mouth and it was summarily beheaded. The blood was allowed to pour upon a plate of rice, which, with the tail, was offered to the deity. The rest of the animal went to form part of the feast". The above is a description made of the Garos more than fifty years ago by Captain Playfair. Since then much water has flown down the sea and many Garos have become educated while about 40,000 have become Christians. The Christian Garos do not observe any of the above religious ceremonies for obvious reasons. Superstition has also died down among the Christians. Even the non-Christians have by and large ceased to be as superstitious as they used to be in the days of yore.

MARRIAGE AND INHERITANCE

Although inter-marriage is not prohibited, mixed marriages among the Garos are rather rare This is mainly due to the fact that in the hill areas, the population is almost entirely composed of Garos only. Strips of flat land adjacent to the plains are mostly occupied by Muslim immigrants, but even here, mixed marriages are rare. Among the non-Christian Garos, the proposal comes from the family of the bride, and though his parents' consent must be obtained, the wishes of the person concerned most are sometimes not consulted. The essential portions of the ceremony are an address from the priest and the slaughter of a cock and a hen. Divorce is recognised and widows are allowed to remarry, but are expected to do so in the husband's family. Polygamy is permitted provided that the consent of the first wife is obtained. Among the Garo Christians, marriages are arranged and solemnised according to the tenets of Christianity. Divorce is not recognised by the Catholics, but among the Protestants, divorce is recognised only according to the provisions of the Indian Christian Divorce Act. Inheritance goes through the female. and property frequently goes through the daughter to the son-in-law. Where this is the case among the non-Christian Garos, the son-in-law is compelled to marry his mother-in-law, if she is still alive. When a woman dies, the family property passes to the youngest daughter, or occasionally to her eldest daughter. The husband is, however, allowed to retain possession of the estate if he can succeed in obtaining one of his first wife's family as his second spouse. In spite of the liberal exposure of their persons, the women are chaste and may make good and steady wives.

OCCUPATIONS

For all practical purposes, the occupations of the inhabitants of the Garo Hills begin and end with agriculture. In the hills, the Garos cultivate their land on the system known as jhum or the slash-and-burn method of cultivation. According to this method, bamboos, trees and shrubs are cut down indiscriminately in the months of December to January-February of each year and left to dry. Towards the end of February and March, fire is set to the debris and thereafter, the unburnt woods are collected and put separately. With the first rains, the ground is prepared and seeds are sown in the burnt ash. Much has been said against the evil of this method of cultivation, but modern opinion is more liberal regarding this practice. In the Dhebar Commission Report, quotations are made from the opinions of Shri M. D. Chaturvedi, formerly

Inspector General of Forests, and M. S. Sivaraman, Adviser to the Programme Administration of the Planning Commission regarding this method. The liberal opinion is of the view that the shifting cultivation is the only practical approach to certain inherent difficulties in preparing a proper seed-bed in steep slopes where any disturbance of the surface by hoeing or ploughing will result in washing away of the fertile top of the soil. The tribal people, therefore, take care not to plough or disturb the soil before sowing. The destruction of weeds and improvement of tilth necessary for a proper seed-bed are achieved with the help of fire. What is necessary is that shifting cultivation should be controlled because it is tied up with the tribal way of life. It is also necessary to educate the tribal people in soil conservation, contour-bunding and terrace cultivation. Terrace cultivation is rather expensive in the hills without subsidies from Government. According to the 1961 Census, 93.7% of the inhabitants of the Garo Hills are engaged only in cultivation as against 95.1% in 1951. The slight shift in percentage suggests that the Garos are gradually taking to other forms of occupations also, and this is a very good sign.

Apart from agriculture, the Garos also keep buffaloes, cattle, goats, pigs and poultry. Cattle are neither worked nor milked and are therefore sturdy. Goats and cocks are used for food and sacrifice. The local industries are hitherto practically of no importance. The Garo women weave a a coarse cotton cloth for the scanty garments of themselves and the men and bamboo mats and baskets are also made for sale. Rude pottery is made in certain villages, but nearly all the metal utensils are imported. Cotton growing is a very important occupation of some parts of the Garo Hills. But the trade in cotton is mostly in the hands of outside traders who, is alleged, are not very scrupulous, compared to the simple Garos.

With the improvement of communications, some Garos are engaged in transport and commerce and that probably accounts for the slight lowering of the percentage of cultivators. The opening of communications has also helped the Garos to sell their produce more profitably. The o vious need for the development of this district is much more improvement of communications in the first instance.

SOCIAL ORGANISATION

The organisation of the Garos is more or less democratic. When a matter is in dispute, all concerned, including the women, assemble and debate, with feasting proportionate to the gravity of the issue. Generally the chair is taken by the Nokma, if it concerns only one village, or by the laskar (a petty magistrate appointed by the District Council, generally on election by the Nokmas of the charge), or even by the mauzadar (salaried Garo official who checks the assessment of house tax for a group of laskars).

There is no definite division into groups or classes with a definite order of social precedence as between these classes. Any man who has acquired social status is called a 'nokma', anyone else is an 'ordinary man' (ramram mande). So also is one who has given the necessary feasts, which entitle him to wear certain badges—among Chisaks in the north-east jaksils (elbow rings) and a red silk turban. Among Chisaks the standard of feast required is very low, and nokmas abound. In the rest of the hills only the very rich can give the elaborate feasts required. In some parts only a genuine nokma (i. e. one who has gone through the expensive ritual of feasts and is called a Ganna Nokma, Ganna having the same force in this case as Ganna in the Naga Hills) can adorn his house with certain carved boards, and with a criss-cross pattern of bamboo slats in the walls at the fore-part of his house.

In the hills, the nokma or headman of the village is, according to Garo customs, considered to have jhum rights over a certain tract of land. All members of the village are, however allowed to cultivate rent free, and even if a foreigner or Garo from another village settles on the land, he is only required to pay a purely nominal quit rent, such as four annas in cash or a present of fowls and liquor. The nokma thus, under Garo usage, reaps little or no benefit from such rights as he is considered to possess, and he does not appear to have ever occupied the position of an ordinary landlord.

ADMINISTRATION

The last decade witnessed the introduction of the District Council which has taken over the administration of all subjects enumerated in the Sixth Schedule to the Constitution of India. Though still in its infancy, the District Council has been trying to do much for the improvement of the lot of the Garo people.

ECONOMIC DEVELOPMENT

Although many letters were addressed to various Departments of the Government of Assam as well as to the District authorities in the Garo Hills, no reports were available regarding economic development in this district. Only the District Agricultural Officer of the Garo Hills gave a report about certain developments regarding agriculture, but some parts of his

report are not intelligible to me either due to bad English or bad typing or both.

From the figures published by the Director of Statistics, the Garo Hills district is economically the most backward part of Assam. Its per capita income was only Rs. 192/- in 1960-61 which was the lowest of all the districts of the State. The average per capita income for Assam is Rs. 307/-, and for the Lakhimpur district, it is Rs. 417/-. This figure of per capita income is perhaps the most accurate pointer to the very poor state of development of this district.

AGRICULTURE

As already stated, 93·67 per cent of the total working population of the district is dependent on agriculture. The only areas where the wet method of paddy cultivation can be done are those lying at foothills alongside the border of Goalpara district and the Rangpur and Mymensingh districts of Pakistan. But almost all these strips of fertile loamy soil are practically occupied by immigrant Muslims. The tribal Garos live mostly in the hill areas where the soil is poor and the method of cultivation is the primitive jhum system. In hill areas, the soil is either sandy-loam or clayey-loam. In the plain strips of land, the principal kharif crops grown are paddy, jute and sugarcane and the principal rabi crops are gram, pulses, mustard, tobacco, potato, sesamun and vegetables. In the jhum areas, the principal crops grown by the Garos are cotton, millet, maize, hill paddy, mesta, ginger, chillies, betel leaf, pine-apples, tapioca aram (kochu), banana, tnrmeric and some kind of summer vegetables. Cashew nuts, oranges, black pepper, cocoanut, betel nut, lemon, guava, lichi, mango and jack fruits are also grown throughout the district.

DEVELOPMENT UNDER THE FIVE YEAR PLANS

Under the impact of the two Five Year Plans, something has been done by Government to effect some changes in the sphere of agriculture. Various schemes of agriculture were made and these can be summarised as follows :—

(i) **Farms** : Altogether 15 Seed Farms and 3 Demonstration Farms have been established in the district with a view to increase the production of improved seeds locally.

(ii) **Fertilizers** : The Garo people use only burnt ashes and some cowdung as manure. Under the scheme, certain fertilizers and manures which were not used by the cultivators before were introduced and every effort was made to popularise them among the hill people. It is said that their use has gradually become popular with the passage of time. The people were also taught to make compost and green manure.

(iii) **Cash Crops** : In order to increase the area producing cash crops and other food crops, subsidies in cash and kind have been provided to the cultivators and consequently the condition of cash crops such as jute, cotton, mustard, pine-apple etc. has improved.

(iv) **Horticulture** : In order to introduce and increase the cultivation of improved plants aud grafts other than the local varieties, steps were taken to establish two Horticulture Nurseries at Rongram and and Dobashipara.

(v) **Demonstration** : Agricultural Inspectors and Demonstrators were appointed and various demonstrations have been conducted at various centres with a view to exhibiting improved practices in the field of cultivation among the village cultivators. The villagers have shown keen interest in these practices.

(vi) **Japanese Method** : The Japanese method of cultivation of paddy was introduced mainly in the strips of plains at the foot hills with sali paddy and this method has been found to be very useful in increasing production. As it can be used only in strips of plains area, the benefit has gone mainly to non-tribal people.

(vii) **Agricultural Implements** : Improved agricultural implement of various kinds were introduced and distributed among the cultivators.

(viii) **Minor Irrigation** : Wherever suitable areas for wet cultivation are available in the hills and wherever there are small streams and springs in the area, the people have constructed channels and bunds to irrigate their fields. Government have helped to implement these minor irrigation schemes and so an area of 56,579 acres has been benefited by this scheme. There is no doubt that wherever there are irrigation facilities, they have increased the level of production.

(ix) **Land Reclamation and Soil Conservation** : During the First and Second Five Year Plans, many areas which were lying uncultivated, were reclaimed and made suitable for cultivation. Terracing has been introduced in the hill slopes and subsidies were given to the cultivators who introduced this method.

(x) **Plant Protection** : Under the scheme, the cultivators were enlightened how to use pesticides and other technical devices to prevent

their crops from attack by pests and insects, and various equipments such as dusters and sprayers were distributed at subsidised rates among the cultivators.

(xi) **Border Scheme** : This scheme was implemented during the Second Five Year plan to help the people living on the Pakistan borders whose economy was hard hit by the Partition. Under the scheme, subsidies for regeneration of food crops and cash crops and the cultivation of other food crops were given and free supply of various plants, seeds, implements etc. were also provided to the cultivators. It was under this scheme that a Fruit Preservation Factory was started at Tura with the idea of processing the fruits available in the border areas. The economic condition of the people has improved to some extent with the introduction of this scheme,

(xii) **Rehabilitation Scheme** : This scheme was initiated during the Second Five Year Plan with a view to control the process of shifiting cultivation which is widely prevalent in the hill areas. Under the scheme, two major villages, namely Rengkhong and Wazadagiri, were organised. In each of these villages, 300 families have been rehabilitated with the essential facilities for their livelihood especially in connection with the development of agriculture.

(xiii) **Field Management Committees** : 300 Field Management Committees were established in the district by the end of the Second Five Year Plan, but due to ignorance and other factors, the people have not been benefited by this scheme.

The District Agricultural Officer opined that due to difficulties of communication and some natural calamities such as droughts and attack by pests, the modest targets of most of the agricultural schemes could not be achieved.

INDUSTRIES

There is as yet no industry worth the name in the Garo Hills district. Although coal and limestone lie hidden beneath the earth in Garo land, they have not yet been exploited for the benefit of the Garos and the State of Assam.

There are a few primitive cottage industries such as weaving of coarse cloth, making of baskets and other cane work. No report was received from the Industries Department regarding its activity in this district, but from some data collected by my staff, it appears that during the First and Second Five Year Plans, Government spent a certain amount of money for the development of these small scale and cottage industries. Grants-in-aid were given to the workers, machines and tools distributed and subsidies given and products purchased at fixed price to encourage the small scale industries.

FISHERIES

From the data collected by my staff from the Fishery Department, it appears that all that this Department has done in the Garo Hills district is to distribute a sum of Rs. 84,400/- to 170 parties within the district as subsidies or grants-in-aid for the development of fisheries. There are no Fish Farms and no Fish Seeds were also produced in the district.

Though a hill district, Garo Hills has ample scope for the development of beels, swamp and river fisheries. Moreover, in many areas the climatic conditions are similar to those obtaining in the plains districts. There are a few natural fisheries which are owned and leased out by the District Council to lessees including few Co-operative Societies. The number of such natural fisheries is about thirty one. Almost all kind of fishes are seen in these natural fisheries. Even species like the rohu, katla, chital, magur, kai etc. which are common in the plains are also found in this district.

INTRODUCING THE STATISTICS

The All-India Census Publications published by the Union Government contain data only down to the level of a district in some cases, or to the level of a police station in other cases. Data regarding each village cannot be had from the Central Government Census Publications. But the data down to the level of a village are very essential for the purposes of the State Government and the administration in the districts and subdivisions. So for the first time, the District Census Handbooks were compiled and printed for each district of Assam in 1951. The editing and compilation was done by the Superintendent of Census Operations, but the printing and expenditure thereof was borne by the State Government. The District Census Handbooks have become very popular ever since, because they are needed not only by Government and the Deputy Commissioners and Subdivisional Officers, but also by the Local Bodies and the general public. They are absolutely essential for the purposes of delimitation of constituencies, the establishment of panchayats, the determination of quota of civil supplies, the establishment of police stations and many other administrative matters required by the State Government. It has therefore, been decided that in the 1961 Census also, the District Census Handbooks should be edited and compiled by the Superintendent of Census Operations and printed at the cost of the Government of Assam.

The Primary Census Abstracts given in the 1951 Census will now appear in the form of Village Directories which not only give detailed Census data for each village, but they also give such other informations as the existence of communication facilities, drinking water facilities, educational facilities, scheduled castes and scheduled tribes and the different categories of workers. The Village Directories also give us the area in acres of each village, if the village has been cadastrally surveyed and if the area figure is available, and they also give us the number of literates and the number of workers classified according to the nine categories of the Standard Industrial Classification adopted by the Government of India. Such informations are furnished for each village and for each block of a ward of a town. Thus the Directory furnishes information on the primary economic activities of each village or ward of a town and the literacy proportion of the population. This abstract is useful therefore, not only for the State Government and the Local Bodies for their adminstrative purposes but they are also in great demand by various Ministries of the Union Government like the Ministary of Education, Ministry of Labour and Employment, Ministry of Food and Agriculture and the Planning Commission. These data are also required for all sample surveys, both rural and urban, based on villages or wards of a town. The District Census Handbooks also contain tables on mother tongue, religion and the various tables specially prepared for Scheduled Tribes and Scheduled Castes of each district. Official statistics relating to vital statistics, statistics of household and small-scale industries, administrative statistics and other statistics relating to various activities of Government, especially those connected with the First and Second Five Year Plans, have also been given. There is therefore, no doubt that the District Census Handbooks of the 1961 Census will furnish most of the data that are required for administrative as well as for planning and development purposes.

Before 1951, the population had been classified by religion but at the 1951 Census, the economic classification was substituted for the classification based on religion. In 1951, the people have been divided into two broad livelihood categories, namely the agricultural classes and the non-agricultural classes, and these two classes have again been sub-divided into four classes each. Each of the eight livelihood classes was again divided into three sub-classes with reference to their economic status, namely—

(i) Self-supporting Persons ;
(ii) Non-earning Dependents ; and
(iii) Earning Dependents.

In the 1961 Census, the classification based on livelihood has been done away with and the basis of the classification now is work. People have been divided into two classes, the Workers and Non-Workers. The working population has been divided into nine categories of workers namely—

I. Working as Cultivator

II. Working as Agricultural Labourer

III. Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV. Working at Household Industry

V. Working in Manufacturing other than Household Industry

VI. Working in Construction

VII. Working in Trade and Commerce

VIII. Working in Transport, Storage and Communications

IX. Working in Other Services

The working population has been classified separately according to the returns relating to occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely Industrial nor an Occupational Classification of the population, but it was a combination of both. There were only 10 divisions and 88 subdivisions of the Industries and services. In the 1961 Census, the National Classification of Industries and Occupation adopted by the Government of India was also used for the Census and there were more than 300 occupational families and 300 industrial minor groups for which figures are given for the total population sex-wise. Another unique feature of the 1961 Census is that all these Economic Tables are prepared on the basis of the principal work of a person.

Non-workers have again been classified into eight categories as follows :—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. A convict in jail (an undertrial prisoner is shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

In the 1951 Census, the population was shown according to certain units known as Census Tracts. These Tracts were selected by the Superintendent of Census Operations on an ad-hoc basis and they may constitute one Police Station, two Police Stations or even three Police Stations and they may also consist of part of a Police Station only. Urban areas of each district were treated as separate Tracts in the 1951 Census. In the 1961 Census, I have taken Police Stations only as units of Census Divisions and so all census data are given down to the level of a Police Station. In the case of Garo Hills, however, the Mauzas were taken instead of Police Stations according to the census practice in the past. Moreover, Garo Hills, has only one established Police Station with maps and so the Mauzas are the only convenient smaller units. The other exception is that the urban areas of Tura were treated as a separate entity for the district.

ABBREVIATIONS OR NOTATIONS USED IN THE VILLAGE DIRECTORY

As all details cannot be given in the Village Directory, certain abbreviations and notations were used for the sake of easy reproduction and printing. The following notations were therefore used in the Village Directory.

NOTATIONS

1. Transport and Postal Facilities

(i) Road, Bridle Path, Metalled Road, Tarred Road	'R'
(ii) Railway	'Rly'
(iii) Postal Facilities	
Branch Post Office	'BO'
Sub-Post Office	'SO'
Extra Departmental Branch Office	'Edbo'
Extra Departmental Sub-Office	'Edso'
Central Sub-Office	'CSO'

2. Educational Institutions

(i) Primary, Basic, Tol, Muktab, Night, Nursery School	'P'
(ii) Middle School (M.E. & M.V.)	'M'
(iii) High School or Higher Secondary	'H'
(iv) Higher Institutions including Colleges	'C'
(v) Techical Institutions	'T'

3. Drinking Water Supply

(i) Tanks or Beels	'Tk'
(ii) Kacha well	'Kw'
(iii) Pipes and Tube wells or Ring wells	'S'
(iv) Pucca well	'Pw'
(v) River, Running Stream or Springs	'Riv'

P. S. Distance of the items is considered up to five miles

4. Bazar Day and Medical Facilities

(i) Weekly Bazar	'Wb'
(ii) Daily Bazar	'Db'
(iii) Dispensaries	'D'
(iv) Hospitals	'Hos'

5. Veterinary Facilities and whether the village is covered by Community Development or National Extension Service Blocks

(i) Government Veterinary (ii) Private Veterinary (iii) Other Methods	'V'
(iv) Community Development	'Cd'
(v) National Extension Service	'Nes'

DEFINITIONS

The following definitions used in the 1961 Census are reproduced below for easy reference :

1. Town

For the purpose of the 1961 Census, a town means a Municipality, a Town Committee, or a Cantonment and any other area having the following urban characteristics :

(i) If the population is not less than 5,000

(ii) If the density is not less than 1,000 per square mile

(iii) If the adult male population in non-agricultural livelihoods is at least 75 per cent of the total male population.

2. Village

In Assam a village means a cadastral village where there has been a cadastral survey. In the Plains districts where there has been no cadastral survey, it is taken to be a gaon together with its adjacent 'tolas', 'paras' etc. provided that none of these independent collections of houses are so large or so distant from the cadastral village, with distinct individual names. In the Hills districts, the most convenient definition of a village is that it is a collection of houses bearing a separate name and situated with certain boundaries traditionally recognized by the villagers.

3. House

It is a structure or part of a structure inhabited or vacant or a dwelling, shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

4. Household

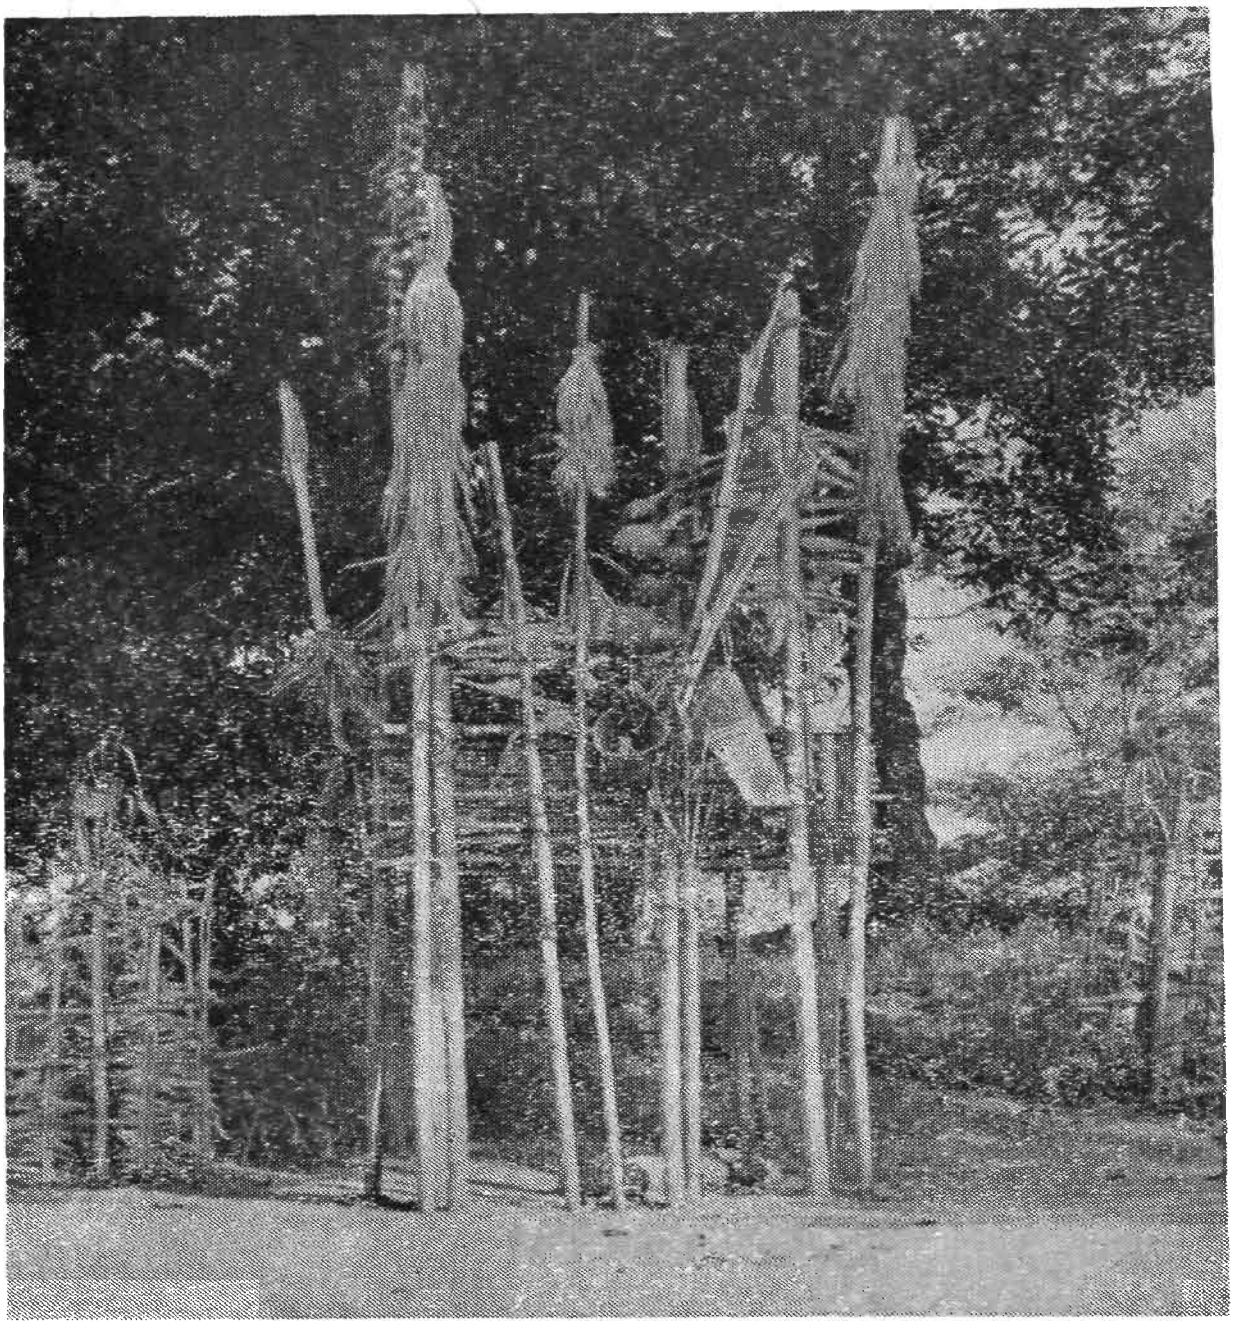

It is a group of persons who commonly live together and take their meals from a common mess or kitchen unless the exigencies of work prevent any one of them from doing so.

5. Scheduled Tribes

They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible parts of the Indian Union. They are generally very backward and so the Government of India has prepared a schedule of such tribes for the purpose of giving them facilities in education and employment so that they may come up to the level of the other advanced people of India as soon as possible. Scheduled Tribes may belong to any religion.

6. Scheduled Castes

They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to help them rise to the level of other more advanced societies in India, the Government has made a schedule of such people—hence the name Scheduled Castes.

Delang or Monument of Wood and Bamboo

7. Houseless persons

They are people who have no houses to dwell and generally live in pavements or open places, such as beggars, who beg in people's houses by day and sleep under the trees by night.

8. Institutional population

They are people who are inmates of institutions, like hostels, boardings, jails etc.

9. Worker

Is a person who is working as a cultivator, an agricultural labourer, at a household industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work.

10. Non-worker

Is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a rentier who earn some income but if they do not do any other work they are classified as non-workers. On the contrary, students and housewives may be doing some work either in school or in the house but as they do not earn any income they are classified as non-workers for the purpose of the Census.

11. Cultivator

For purposes of the Census a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government, (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

12. Agricultural Labourer

Is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share, such as share of produce. The labourer should have no right of lease or contract on land on which he works nor should he be responsible for taking decision as to which crops to sow and when or taking the risk of cultivation. A share of the produce goes to him only as wages.

13. Household Industry

A household industry is defined as an industry conducted by the head of the household himself or mainly by members of the household at home or within the village in rural areas and only at home in urban areas.

TABLES

Besides the Village Directory which contains the Primary Census Abstracts for each village in the district in addition to other important informations relating to the village, all A-series tables relating to the general population ; all B(i) i. e. General Economic Tables except B-II, all C-series i. e. Social and Cultural Tables except C-I, C-IV & C-VI ; and all tables for Scheduled Castes and Scheduled Tribes are reproduced in this volume. A short explanatory note for each of the above census tables presented in this volume is also given.

TABLE A-I

AREA, HOUSES AND POPULATION

This is the basic population table for the Census. This table furnishes the data for each police station and town separately. The area is given both in square miles and square kilometres ; but the density is calculated from square miles only. In addition to the data on area and density, this table gives the number of inhabited and uninhabited villages, occupied residential houses and the population separately for males and females according to the 1961 Census for both rural and urban areas separately.

The area figures of the district and police stations are as supp'ied by the Director of Land Records and Surveys, Government of Assam. The area figures of the towns are collected from the respective Deputy Commissioners and Subdivisional Officers, Local Bodies and in some cases, from the Local Self-Government Department of the Government of Assam. In case of Garo Hills, Deputy Commissioner supplied the area figures of Mauza and Town of the district.

A-I—AREA, HOUSES AND POPULATION

District/Mauza/ Town	Total Rural Urban	Area in		Population per square mile	Number of villages		Number of Towns	Number of occupied residential houses	Population		
		Square miles	Sq. Km.		Inhabited	Un-inhabited			Persons	Males	Females

	Total	7.7	19.9	1,469	13	..	1	2,045	11,310	6,739	4,571
Mauza X	Rural	4.2	10.8	577	13	..	..	489	2,422	1,316	1,106
	Urban	3.5	9.1	2,518	..	..	1	1,556	8,888	5,423	3,465
Tura	Urban	3.53	9.14	2,518	..	..	1	1,556	8,888	5,423	3,465

Note :— 1. The Sq. Km. and density figures of Urban areas of Mauza/District are worked out by using the area figures corrected upto 2 places of decimals. In addition to this, the area figures relating to Sq. Km. are further adjusted to make the Mauza/District totals tally.

2. Town treated as such for the first time in 1961 is printed in italics.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS

This table furnishes population data for the last seven Censuses from 1901 to 1961 and the variation of population in each decade. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistical data, forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is given from decade to decade.

District	Years	Persons	Decade Variation	Percentage Decade Variation	Males	Females
1	2	3	4	5	6	7
GARO HILLS	1901	138,274	..	..	70,035	68,239
	1911	158,936	+20,662	+14.94	81,264	77,672
	1921	179,140	+20,204	+12.71	91,466	87,674
	1931	190,911	+11,771	+6.57	97,442	93,469
	1941	223,569	+32,658	+17.11	113,180	110,389
	1951	242,075	+18,506	+8.28	124,054	118,021
	1961	307,228	+65,153	+26.91	156,740	150,488

A-III—VILLAGES CLASSIFIED BY POPULATION

This table gives figures for the number and population of villages in the various population groups which are less than 200, 200-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10,000 and above. The group less than 500 of the last Census has been split up into two groups namely, less than 200 and 200-499.]

District/Mauza	Total number of inhabited villages	Total Rural Population			I—Villages with less than 2,000 population—(Contd.)

A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

This table gives the growth of each town since 1901. This table furnishes the areas of the towns of the 1961 Census both in square miles and square kilometres. For the purpose of this table, all towns are divided into 6 classes according to population. As in table A-II, the percentage variation of each town is given from decade to decade. But in Garo Hills district, Tura is the only town considered for the first time in 1961 Census.

CLASS V—5,000-9,999

District	Name of Town	Status of Town	Year	Area		Persons	Decade variation	Percentage Decade Variation	Males	Females
				Sq. miles	Sq. Km.					
1	2	3	4	5	6	7	8	9	10	11
Garo Hills	*Tura*	..	1961	3.53	9.14	8,888	..	..	5,423	3,465

Note : Town treated as such for the first time in 1961 is printed in italics

B — GENERAL ECONOMIC TABLES

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table is prepared separately for total, rural and urban population and it gives the total population classifying the nine industrial categories of workers and non-workers. Each category is divided into five age-groups namely, 0-14, 15-34, 35-59, 60+ and Age not stated. This is the basic economic table. The classification of workers and non-workers by age-groups is a special feature of the 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, namely, children, young persons, middle-aged persons and elderly persons.

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Part A of this table relates to urban areas only. Each of the nine categories of workers and non-workers is shown by literacy and educational levels. This is an important table as it shows the employment of persons of different educational levels among the various categories of workers. This information may be of much use for the assessment of educational qualification of available man-power.

Part B of this table relates to rural areas. The educational level is confined only to (i) Literate (without educational level), (*ii*) Primary or Junior Basic and (*iii*) Matriculation and above.

B-III PART A—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS IN URBAN AREAS ONLY

TABLE B-IV

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION BY SEX AND CLASS OF WORKER

This table corresponds more or less to the Union Table B-III of the 1951 Census.

It divides the working population, other than persons at work at cultivation, industrially into nine Divisions, forty five Major Groups, 343 Minor Groups and into four statuses of employment. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only ten divisions and eighty eight subdivisions of industries and services. The present classification follows the National Classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers at Household Industries are classified into two employment statuses, namely, Employee and Others. The workers in Non-Households Industries are classified by the four statuses of employment, namely, Employer, Employee, Single worker and Family worker against Employer, Employee and Independent worker in the 1951 Census. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is **not** an employer, even if he has the power to employ another person (s) in his office on behalf of his own employer (s).

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as Manager, Superintendents, Agents etc. and in that capacity employ or control other workers on behalf of their own employers are only employees.

A Single Worker is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is treated as a Single worker.

A Family worker is a member who works without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

This table has three parts. Part A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part B deals with the persons at work in non-household industry, trade, business, profession or service by the the four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy.

The Indian Standard Industrial Classification so far as this district is concerned, is reproduced below :—

STANDARD INDUSTRIAL CLASSIFICATION

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

Major Group	Description	Minor Group
00	**Field Produce & Plantation Crops**	
	Production of other crops (including vegetables) not covered by production of cereal crops, pulses, fibres, oilseeds, sugarcane and other cash crops	005
01	**Plantation Crops**	
	Production of plantation crops other than tea, coffee, rubber, tobacco, ganja, chinchona and opium	015
02	**Forestry and Logging**	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Production and gathering of other forest products not covered above	026
03	**Fishing**	
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
04	**Livestock and Hunting**	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for production of honey, wax and collection of honey	044

DIVISION 1 : MINING AND QUARRYING

10	**Mining and Quarrying**	
	Quarrying of stone (including slate), clay, sand, gravel and limestone	107
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stone, asbestos, gypsum, sulphur and asphalt	109

DIVISION 2 & 3 : MANUFACTURING

20	**Food Stuffs**	
	Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains	200
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oil (other than hydrogenated oil)	207

Major Group	Description	Minor Group
Division 2 & 3 :	MANUFACTURING (Continued)	
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
23	**Textile-Cotton**	
	Cotton dyeing, bleaching	233
	Cotton weaving in handlooms	235
24	**Textile-Jute**	
	Jute spinning and weaving	241
25	**Textile-Wool**	
	Embroidery and art work in woolen textile	256
26	**Textile-Silk**	
	Spinning of silk other than in mills	262
27	**Textile-Miscellaneous**	
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including rain coats and headgear	273
28	**Manufacture of Wood and Wooden Products**	
	Sawing and planning of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
30	**Printing and Publishing**	
	Printing and publishing of newspapers and periodicals	300
31	**Leather and Leather Products**	
	Manufacture of shoes and other leather footwear	311
	Repair of shoes & other leather footwear	314
34-35	**Non-Metallic Mineral Products Other than Petroleum and Coal**	
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of earthenware and earthen pottery	350
	Manufacture of earthen image, busts and statues	355
36	**Basic Metals and their Products except Machinery and Transport Equipment**	
	Manufacture of armaments	362
	Manufacture of iron and steel furnitures	364
37	**Machinery (All kinds other than Transport and Electrical Equipment)**	
	Manufacture and assembling of machinery other than electrical, except textile machinery	370

Major Group	Description	Minor Group
Division 2 & 3 :	MANUFACTURING (Continued)	
38	**Transport Equipment**	
	Manufacture of motor vehicle engines parts and accessories	383
	Repairing and servising of motor vehicles	384
	Manufacture of bicycles and tricycles and accesseries such as saddle, seat frame, gear	385
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipments such as animal drawn and hand drawn vehicles	389
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
	Manufacture and tuning of musical instruments	394
	Manufacture and repair work of goods not assignable to any other group	399
DIVISION 4 :	CONSTRUCTION	
40	**Construction**	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water reservoirs such as bund, embankments, dam, canal, tank, tubewell, wells	403
DVISION 5 :	ELECTRICITY, GAS, WATER & SANITARY SERVICES	
50	**Electricity and Gas**	
	Generation and transmission of electric energy	500
51	**Water supply and Sanitary Services**	
	Collection, purification and distribution of water to domestic and industrial consumers	510
DIVISION 6 :	TRADE AND COMMERCE	
60-63	**Wholesale Trade**	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food-stuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics and textile products such as garments, hsseian, gunny bag, silk and woolen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621

Major Group	Description	Minor Group
Division 6 :	TRADE AND COMMERCE (Continued)	
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in all goods not covered above	639
64-68	**Retail Trade**	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder) aerated water	641
	Retail trading in intoxicants such as wine, liquor	642
	Retail trad ng in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, firewood and kerosene	645
	Retail trading in food-stuff like sweetmeat condiments, cakes biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products : (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery and paper	661
	Retail trading in metal, procelain and glass utensils	662
	Retail trading in bricks, tile and other building materials	670
	Retail trading in hardware and sanitary equipments	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
	R tail trading in electrical goods like electric fan, bulb	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock & watch, eye glass, frame	684
	Retail trading in musical instruments, gramophone records, pictures and paintings including curio dealing	687
	Book-Selling	688
	Retail trading in goods unspecified	689
69	**Trade and Commerce Miscellaneous**	
	Importing and exporting of goods and commodities	690
	Stocks, shares and futures	692
	Money lending (indigenous)	694
DIVISION 7 :	TRANSPORT, STORAGE AND COMMUNICATION	
70-71	**Transport**	
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such an hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704

Major Group	Description	Minor Group
Division 7 :	TRANSPORT, STORAGE AND COMMUNICATION (Continued)	
	Transporting by boat, steamer, ferry etc., by river, canal	706
	Transporting by other means not covered above	709
73	**Communication**	
	Postal, telegraphic, wireless and signal communication	730
	Telephone communication	731
	Information and broadcasting	732
DIVISION 8 :	SERVICES	
80	**Public Service** (This does not include Government or Quasi Government or local body activities, other than administrative in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups)	
	Public service in police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards etc.	805
	Public service in administrative departments and offices of State Governments	809
81	**Educational and Scientific Services**	
	Educational services such as those rendered by technical colleges, techincal schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	**Medical and Health Services**	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	**Religious and Welfare Services**	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, (this includes missions, ashrams and other allied organisations)	830
	Religious and other allied services rendered by pandit, priest, preceptors, fakir, monk	831
	Welfare services rendered dy organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	**Legal Services**	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhurie, munshi	840

Major Group	Description	Minor Group
Division 8 :	SERVICES (Continued)	
85	**Business Services**	
	Engineering services rendered by professional organisation or individuales	850
	Business, services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
86	**Community Services and Trade & Labour Association**	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisation such as rate-payers association, club, library	861
87	**Recreation Services**	
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus carnivals	872
88	**Personal Services**	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafe restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry servicing rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, drycleaning services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	**Services (Not Elsewhere Classified)**	
	Services rendered by organisations or individuals not elsewhere classified	890
DIVISION 9 :	ACTIVITIES NOT ADEQUATELY DESCRIBED	
90	**Activties unspecified and not adequately described (This includes new entrants to the Labour market)**	
	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900

APPENDIX TO TABLE B-IV PART C

GARO HILLS DISTRICT

Minor groups having less than 1% of workers of the respective Division (Less than 0.5% in Case of minor groups of Division 2 & 3), have been shown in this appendix.

The following abbreviations have been used :—

HI—Household Industry

NHI—Non-household Industry

M—Males

F—Females

005 Total NHI (M 2), Urban NHI (M 2) ; 015 Total NHI (M 2), Urban NHI (M 2) ; 020 Total NHI (M 2) ; 021 Total NHI (M 2), Urban NHI (M 2) ; 026 Total NHI (M 7) ; 043 Total NHI (M 9), Urban NHI (M 9) ; 207 Total NHI (M 1) ; 241 Total NHI (M 3) ; 256 Total HI (F 3) ; 262 Total HI (F 1) ; 271 Total HI (M 1) ; 272 Total HI (M 3, F 7) ; 287 Total HI (M 2) ; 300 Total NHI (M 4, F 1), Urban NHI (M 4) ; 343 Total NHI (M 5), Urban NHI (M 5) ; 355 Total NHI (M 2) ; 362 Total HI (M 2), NHI (M 1), Urban HI (M 2), NHI (M 1) ; 370 Total NHI(M 1), Urban NHI (M 1) ; 383 Total NHI (M 1) ; 388 Total HI (M 2), NHI (M 3) ; 392 Total NHI (M 2), Urban NHI (M 1) ; 394 Total NHI (M 1) ; 600 Total NHI (M 1, F 4), Urban NHI (M 1) ; 601 Total NHI (M 6) ; 602 Total NHI (M 10), Urban NHI (M 10) ; 621 Total NHI (M 3), Urban NHI (M 2) ; 631 Total NHI (M 6) ; 639 Total NHI (M 17), Urban NHI (M 12) ; 641 Total NHI (M 9), Urban NHI (M 9) ; 642 Total NHI (M 5), Urban NHI (M 3) ; 644 Total NHI (M 17), Urban NHI (M 1) ; 647 Total NHI (M 11), Urban NHI (M 1) ; 652 Total NHI (M 10) ; 653 Total NHI (M 6), Urban NHI (M 6) ; 660 Total NHI (M 8), Urban NHI (M 1) ; 662 Total NHI (M 2), Urban NHI (M 1) ; 670 Total NHI (M 4), Urban NHI (M 4) ; 671 Total NHI (M 8, F 1), Urban NHI (M 2, F 1) ; 673 Total NHI (M 1, F 1), Urban NHI (M 1, F 1) ; 682 Total NHI (M 10) ; 683 Total NHI (M 1) ; 684 Total NHI (M 1) ; 687 Total NHI (M 3), Urban NHI (M 3) ; 688 Total NHI (M 3), Urban NHI (M 3) ; 690 Total NHI (M 5) ; 692 Total NHI (F 1), Urban NHI (F 1) ; 694 Total NHI (F 1), Urban NHI (F 1) ; 810 Total NHI (M 1), Urban NHI (M 1) ; 812 Total NHI (M 1), Urban NHI (M 1) ; 821 Total NHI (M 11), Urban NHI (M 5) ; 830 Total NHI (M 18), Urban NHI (M 6) ; 831 Total NHI (M 21), Urban NHI (M 7) ; 832 Total NHI (M 5, F 1), Urban NHI (M 2, F 1) ; 840 Total NHI (M 12, F 1), Urban NHI (M 3, F 1) ; 850 Total NHI (M 9), Urban NHI (M 7) ; 851 Total NHI (M 3), Urban NHI (M 3) ; 860 Total NHI (M 5) ; 861 Total NHI (M 2, F 5) ; 871 Total NHI (M 12), Urban NHI (M 12) ; 872 Total NHI (M 3, F 14), Urban NHI (M 1) ; 881 Total NHI (M 2) ; 882 Total NHI (M 47, F 8), Urban NHI (M 25, F 6) ; 883 Total NHI (M 21, F 7), Urban NHI (M 11, F 4) ; 884 Total NHI (M 43, F 9), Urban NHI (M 14) ; 885 Total NHI (M 6), Urban NHI (M 3).

TABLE B-V

Occupational classification by sex of persons at work other than cultivation

This is a new table for the 1961 Census. As discussed earlier in case of table B-IV, the classification adopted is the 1951 Census was a combination of industrial and occupational. Two separate tables are, therefore prepared on the basis of industry and occupation of the workers in this census.

This table classifies the workers other than at cultivation into 11 Occupational Divisions, 75 Groups and 331 Families according to their occupations. This classification follows the National Classification of Occupations adopted by the Government of India with minor modifications within the frame work. It gives data for each family of the National Classification of Occupations separately for total and urban and for persons, males and females, and thus brings out the distribution of occupations among males and females.

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

GARO HILLS DISTRICT

Families having less than 1% of the workers of the respective Division, (less than 0.5% in case of families of Division 7-8), have not been shown in this table ; but are given in the appendix to this table. Divisions thus affected are marked with an asterisk*.

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This table is prepared only for urban areas and only up to the Division of the National Occupational Classification. The population under each Occupational Division is classified by the five age-groups ; 0-14, 15-34, 35-59, 60+ and Age not stated and further classified according to the broad educational levels. This table is likely to give useful informations about those occupations which attract personnel.

" 2—Clerical and Related workers
" 3—Sales workers
" 4—Farmers, Fishermen, Hunters, Loggers anb Related workers
" 5—Miners, Quarrymen and Related workers
" 6—Workers in Transport and Communication Occupations
" 7-8—Craftsmen, Production Process workers, and Labourers not Elsewhere Classified
" 9—Service, Sports and Recreation workers
" X—Workers not Classifiable by Occupation

TABLE B-VII

Part A of this table shows persons working principally (i) as Cultivators or (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivators or (iii) as Agricultural Labourer.

Part B of this table shows the Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged at Household Industry. As there is no such figure in this District, Part B of table B-VII is not presented.

Table B-VII is prepared separately for total, rural and urban population. Part A of the table is a cross tabulation in the case of persons whose principal and secondary works are any two of (i) Cultivation, (ii) Agricultural Labour and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household industry or vice versa.

Divisions and Major Groups appearing in Part A of this table are described below :

Division 2 & 3 : Manufacturing

Major Group 23 : Textiles-Cotton

Major Group 28 : Manufacture of wood and wooden products

B-VII PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

TABLE B-VIII

This table shows the persons unemployed aged 15 and above by sex, broad age-groups and educational levels.

Part A of this table relates to urban areas. This is a classification of unemployed persons by their educational levels and age-groups. This is prepared separately for those who are seeking employment for the first time and for those who were employed before but are now out of employment and seeking work. In the first case, the age-groups are 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and in the second case, 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. This table will throw light on educated unemployed for purposes of planning for employment and also for assessing the available man-power.

Part B of this table relates to rural areas. In this table educational levels for total unemployed persons are given. The educational levels are limited to Literate (without educational level), Primary or Junior Basic and Matriculation and above as in Table B-III—Part B.

TABLE B-IX

This table shows the persons not at work classified by sex, broad age-groups and type of activity.

This table is prepared separately for total, rural and urban population. It relates to the non-working population. The non-workers are divided into eight categories according to their activities. This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

The eight categories are based on the recommendations of the United Nations. This table makes the data available separately for those who have an earning without working. Separate data are also available in respect of housewives, who though do domestic work, are not classified as economically active. Separate data are also available for school-attending children which may be useful to the Education Department. There is a category which consists of all other dependents including children and disabled persons.

C — SOCIAL AND CULTURAL TABLES

TABLE C-II : AGE AND MARITAL STATUS

This table is prepared separately for total, rural and urban population. This is a very important demographic table. The age-groups conform to the international requirements. From this table, it can be ascertained whether proportions in the various marital statuses have increased or decreased since last Census and whether any trend is observed in the age of marriage. This table which was prepared on a 10 % sample at the 1951 Census is prepared on full count at the present Census.

TABLE C-III

This table is prepared separately in three parts for total, rural, and urban population. There are five yearly age-groups up to 34, and other age-groups are 35-44, 45-59, 60+ and Age not stated. While in the previous Censuses, only the total literate population for different age-groups was given, at the present Census, data for broad educational levels are also given. The educational levels are different for rural and urban areas as given in Table B-III. In this Handbook the Table C-III is presented for total and urban population only.

TABLE C-V

MOTHER TONGUE

This table is prepared from the mother tongue returns of the 1961 Census. The figures in detail down to Mauza level, in case of rural areas, and up to District level, in case of urban areas, are shown in this table in alphabetical order.

C-V—MOTHER TONGUE

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

Classification by literacy and industrial category of workers and non-workers among Scheduled Castes/Scheduled Tribes

This table is presented in two parts—Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. It is prepared separately for total, rural and urban population. The table gives the total population of Scheduled Castes and Scheduled Tribes separately and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers. Literacy figures of Scheduled Castes and Scheduled Tribes are given for the first time in the present Census. This table is important as it will be the basis for the allocation of Reserved Seats in Parliament and the State Legislatures.

C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

PART A

Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes

District	Total Rural Urban	Total			Illiterate		Literate and educated persons		Total workers		WORKERS I As Cultivator		II As Agricultural Labourer		III In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities	
		Persons	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

TABLE SCT—I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

All the SCT Tables are prepared in two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes.

This table is prepared for each Scheduled Caste and Scheduled Tribe. This table gives the population of each Scheduled Caste and Scheduled Tribe separately, for rural and urban, and also shows in which sectors of industry members of each Scheduled Caste and Scheduled Tribe are working. Data have also been given on the un-wholesome occupations in which the members of Scheduled Castes are working. The population figures of each individual caste and tribe are often required for welfare and other works.

SCT—II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This is an important demographic table corresponding to table C-II but it gives data for the total population only. The age-groups are restricted to 0—14, 15—44, 45+ and Age not stated. At present demographic data are not at all available in respect of these communities. This table thus fulfils a very useful role. The age and marital status data give an indication whether the population belonging to Scheduled castes and Scheduled Tribes is decreasing, stable or increasing.

TABLE SCT—III

EDUCATION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared for each Scheduled Caste and Scheduled Tribe and separately, for rural and urban population. It gives the literacy and educational levels for each Scheduled Caste and Scheduled Tribe. In the case of urban areas, data are given for educational levels as in Table B—III Part A. In the case of rural areas, data are given only for mere literates, Primary or Junior Basic and Matriculation and above as in Table B-III Part-B.

TABLE SCT—IV

RELIGION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared separately for rural and urban. This table is intended to give the religions professed by members of each Caste/Tribe belonging to Scheduled Castes/Scheduled Tribes.

SCT-IV PART A

RELIGION FOR SCHEDULED CASTES

Note :—Members of Scheduled Castes can belong either to the Hindu or Sikh religion. In Garo Hills District, there are no members of Scheduled Castes belonging to Sikh religion. As all the Scheduled Castes belong to Hindu religion, the caste-wise population is given in Table SCT-I Part A and, therefore, no separate figures have been presented in this Table.

TABLE SC—I

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

This table is prepared for total Scheduled Castes and not for individual castes. It is prepared separately for total, rural and urban. The table gives data for students and unemployed persons in the non-working population. They are further classified according to broad educational levels consisting of Literates, Primary or Junior Basic, Matriculation or Higher Secondary and Above Matriculation or Higher Secondary. This table gives very useful informations on the students and unemployed persons among the Scheduled Castes.

INTRODUCING THE OFFICIAL STATISTICS

The Tabulation Plan and other proposals for the 1961 Census envisaged incorporation of official statistics on a large variety of subjects for each district in the District Census Handbook of the district concerned. This proposal was communicated to all Chief Secretaries of State Governments by the Registrar General as early as November 1960 with the request that each State Government should take up the collection of the data in right earnest so that the same may enrich the informations of the District Census Handbook. Each State Government was also welcome to further enrich the District Census Handbooks by any additional information that they may like to incorporate in the handbook. The items with other details were listed by the Registrar General and he also indicated the periods against which such data were to be collected. Copies of the above letter and the contents therein were forwarded to all Superintendents of Census Operations by the Registrar General with the request that the matter may be pursued with the State Governments. The data were to be processed and compiled by the Superintendent of Census Operations and incorporated in the District Census Handbooks of each District.

In pursuance of this communication from the Registrar General, I opened a small cell with a Statistical Assistant, one Upper Division Assistant and a few experienced tabulation personnel to take up the work and I addressed all the State and Central Government departments dealing with the subjects under which the data were to be collected and compiled. I pursued the matter not only by letters and reminders, but also by sending my staff to the various departments concerned to copy out the data wherever it was not possible for the department concerned to supply the data to me without extra hands. But inspite of persistent pursuit for about two years, all the data could not be collected. Some informations were not available at all, while some departments were not very co-operative. As the Census Publications cannot wait indefinitely for these informations, I have to process and compile whatever data are available to me.

The subjects listed to be collected embraced almost all spheres of the socio-economic life of the people and the Governmental activities connected therewith. From rainfall and temperature to places of ancient monuments and worship, from vital statistics to statistics of banks and insurances, from agricultural and land utilisation statistics to the statistics of local bodies, industries and so on, the plan was to appraise the stage of development of each one of the socially and economically important aspect of governmental activities during the last decade which coincides with the two Five Year Plans. Had it been possible to collect all the data in full, a clear picture would have been obtained of the stage of development of each district of Assam as well as the achievements and the impacts of the two Five Year Plans on the economy of each district of Assam. It would also have been possible to bring to light the inter-district and regional disparities in respect of development schemes in each district or region and these data could then be utilised as the basis for future plans and allocation of different schemes.

Realising the fact that well-conceived plans must be based on correct statistics, I started the work of collecting the data with earnestness and tried my utmost to collect as much information as possible of all departments of Government. But in spite of the best of exertions by me and my staff, only about 60% to 70% of the data had reached me till the end of 1962. These available data have been duly processed, compiled and presented in the table following this Note. Incomplete as they are, even the data thus presented in this book will surely give a picture of the various stages of developments in each district and region of Assam and I hope that my successor may improve upon the same in the next Census. I shall now briefly describe the original plan and the achievements in respect of the collection of data against each one of the broad heads in the cases below :—

1. RAINFALL AND TEMPERATURE

The aim was to give rainfall data of five centres and temperature data for two centres for each district of Assam for the period 1951-60. I addressed the Meteorologists in charge of the Regional Meteorological Centre, Calcutta and the Gauhati Airport. I also addressed the Deputy Commissioners and Subdivisional Officers as well as the Adviser, Assam Branch of the Indian Tea Association, and I was able

to collect rainfall and temperature data for one centre only in the district. The data thus collected and complied will be reasonably accurate for the district.

2. VITAL STATISTICS

I addressed the Director of Health Services, Assam for supplying me with vital statistics which are so important for population planning and projection. Our plan was to show the births and deaths recorded for each month of the last decade against each police station in the district. The Public Health Department replied that they never have records of births and deaths down to the police station level and so I asked them to give the figures down to the district level, but even that also was not forthcoming. I sent my staff to the office of the Director of Health Services and they had to take much trouble in locating, extracting and compiling whatever data are available in that office regarding vital occurences from the Vital Statistics Returns lying uncared for in the office premises of the Director of Health Services. But these data are absolutely inaccurate and they cannot give any picture of births and deaths in the district. However, the table is presented for whatever it is worth. In the General Report of the 1951 Census, the then Director of Health Services admitted that there is no doubt that the collection of registration data is defective. As far back as 1921, my predecessor Mr. Llyod remarks that "it is obvious that the vital statistical figures are useless for purposes of comparison or checking with the Census figures." In 1911, Mr. McSwinney remarks that "the inaccuracies are so great that there is danger of inferring that the present system of collecting vital statistics is absolutely useless." If the collection of vital statistics had been so bad in the past decades, it has been worse during the decade 1951-61. The Deputy Director of Health Services told me that when the data were collected by the police, mauzadars and the municipalities, something could be had from them ; but when the collection has been entrusted to the Panchayats, no figures are available at all. Government may have to devise a definite scheme and a definite agency for the collection of these vital occurences, otherwise these important statistics are of no use as far as Assam is concerned.

3. LAND UTILISATION AND AGRICULTURE

In respect of land utilisation and agriculture, informations were proposed to be furnished under the heads—(i) land utilisation statistics (ii) area under principal crops (iii) gross area irrigated (iv) sources of irrigation (v) irrigation projects (vi) yield rates of principal crops (vii) fortnightly wholesale prices of important commodities month by month (viii) consumption statistics (ix) details of socio-economic enquiries and (x) agricultural extension schemes.

Statistics under these two heads are still in a very poor stage of development in Assam. In April 1961, I addressed the Director of Agriculture, the Director of Land Records and the Director of Statistics requesting them to supply me with as much data under the above heads as are available with each of them. The Director of Agriculture straightaway shifted this responsibility to the Director of Statistics. The Director of Statistics in his turn asked me to collect the data from his office records through some of my staff. The Director of Land Records directed the Settlement Officers and Deputy Commissioners concerned to supply the data direct to me. In accordance with the suggestion of the Director of Statistics, I sent a few employees of my office to collect the available data from his office records. Except for the periods 1901-1912, 1952 and again from 1958 onwards, most of the data were available and were collected accordingly. In reply to the Director of Land Records' letter to all Settlement Officers and Deputy Commissioners, only the Deputy Commissioners of Cachar and Goalpara and the Settlement Officer, Sibsagar submitted some figures. The rest were silent. I also made direct correspondence with all the Revenue and Settlement Officers but to no effect. For the period 1901-12 and 1952, I wrote to the Registrar General to see if the necessary figures could be extracted from some of the publications preserved in the archives of the Ministry of Food and Agriculture. The Registrar General was kind enough to take the trouble and get the figures collected and forwarded to me. These figures are included in the tables prepared under this head.

Within the above limitations, tables under Agriculture and Land Utilisation statistics have been prepared and presented. Most of the tables are limited in scope and practical usefulness from the point of view of studying the trends or projecting a policy decision owing to lack of informations for the gaps during the period under reference. The period of reference 1901-1960 is interpreted as consisting of the Census years, namely 1901, 1911, 1921, 1931, 1941, 1951 and 1961. Each Census year represents five years, i. e. two years ahead and two years backward of the Census year which is also included.

But the Census years 1901 and 1961 are exceptions to this rule. In view of the non-availability of data preceding the year 1901 and following the year 1961, the figures for the year 1901 has been worked out on the average of the years 1901 to 1905 and for that of 1961, the average was worked out from the year 1956-57 to 1960-61.

Although the original plan was to publish the prices of staple food stuff and average prices of basic commodities month by month for the last decade with a cost of Living Index, the plan had to be restricted to the presentation of average retail prices of some important commodities due to the non-availability of data.

The construction of the cost of living Index calls for informations regarding comsumption level, weightage, family budget etc. Such informations are not available even in the Department of Statistics. Consequently the idea had to be dropped. The Director of Agriculture had been requested to enlighten me with data regarding experiments in double and triple cropping and agricultural extension schemes, but even though a reply was received from him no data could be had from it. The data relating to consumption statistics and details of socio-economic enquiries have also been left out altogether on account of non-availability of data.

4. LIVESTOCK

Variation in the number of main livestock during 1920-60 was proposed to be given. I addressed the Secretary, Veterinary Department, Government of Assam who directed the Director of Veterinary and Animal Husbandry Department to compile and forward the necessary figures to me. The Director of Veterinary Department could supply me with data only from 1945 onwards. For the earlier period, he said the data were not available in the Department.

5. INDUSTRIES

I wrote to the Department of Industries for a list showing all categories of Industries of the district, but I was referred to the Superintendent of Industries, Tura. I wrote to the latter accordingly and he furnished me with a list of small scale industries operating in the district. A list showing all categories of industries has been compiled from the Census data extracted from the Houselists and these were presented in the tables.

6. ADMINISTRATION

Under this head, informations were sought to be incorporated in this book in respect of the (1) number of criminal cases tried, (2) persons convicted, (3) strength of police, jails, (4) receipt of different kinds of taxes, (5) receipt of land revenue, (6) number of registered documents and (7) value of property transferred in the district for the latest period of time for which informations are available. The growth of co-operative societies from 1951 till 1960 was another item under this head.

Data regarding the number of criminal cases tried and persons convicted are collected from the 'Report on the Administration of Criminal Justice in the State of Assam' which was subsequently supplemented by data extracted by my staff from the office records of the office of the Inspector General of Police, Assam. On the strength of Police in the district, whatever data has been presented, were compiled from the 'Report on the Police Administration in the State of Assam'. The Commissioner of Taxes was prompt enough to supply me with the figures of collections under different categories. I wrote to the Revenue Department and the Director of Land Records to send me the figures showing the receipt of land revenue during the last decade. The Director of Land Records referred me back to the Revenue Department. The Revenue Department made a lot of correspondences but no data were available from them. At long last, the compilation team could collect some figures from the 'Statistical Abstract' published by the Director of Statistics and office records of the Revenue Department unofficially. For informations regarding the number of registered documents and value of property transferred in the district, I made necessary correspondences with the Director of Land Records and Inspector General of Registration who referred me to the Accountant General and the District Registrars. I had written to the District Registrars accordingly, but nothing had been received. Data regarding different types of co-operative societies in the district were collected by my staff from the office records of the office of the Registrar of Co-operative Societies, Assam, Shillong which was subsequently supplemented by the information furnished by the Deputy Co-operative Officer, Tura.

7. PUBLIC HEALTH & MEDICAL

The list presented regarding this item was prepared from the data supplied by the Civil Surgeon, Garo Hills, Tura.

8. EDUCATION

Under this head, the intention was to show the increase in the number of various cate-

gories of schools and colleges including Medical and Technical from 1951 to 1960. I wrote to the Director of Public Instruction, Assam, accordingly but inspite of a number of reminders, he could not supply me with the required data. My next course was to depute some of my staff to that office and get the informations collected. In this way, my staff with the co-operation of the office staff of the Director of Public Instruction, could collect informations for two years only. My staff were given to understand that informations for the earlier years were not available in the office of the Director of Public Instruction.

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

The informations furnished under this head were supplied by the Deputy Commissioner, Garo Hills, Tura.

10. COMMUNICATION

Under this head, informations were attempted to be compiled regarding the number of (1) village roads, and (2) different categories of road mileage.

For data on village roads, I wrote to the Development Commissioner who was good enough to get the data collected through the Block Development Officers. But the informations received were not complete for the whole district. On road mileage, the Chief Engineer (Roads & Buildings) was addressed and he supplied me with a booklet from which the informations presented in this book were extracted.

11. LOCAL BODIES

This includes the Panchayats in the rural areas and Municipalities and Town Committees in urban areas. As there is neither any Panchayat nor any town having municipality or town committee in the district this item has been dropped.

12. COMMUNITY DEVELOPMENT

The Development Commissioner, Assam furnished me with a statement showing the names and stages of all the Community Projects in the district. After compilation to make it intelligible to the general reader, the statement is reproduced in this volume.

13. BANKS, INSURANCES AND SMALL SAVINGS

On request, the Director of Statistics was good enough to furnish me with a list showing the banking institutions in the district. Data on Small Savings were supplied by the Regional Director, National Savings, Government of India, Assam, Shillong. For data on the number of insurance policies in the district, I wrote to the Divisional Manager, Life Insurance Corporation, Gauhati, and the Managing Director, Life Insurance Corporation, Bombay but they could not supply me with the district-wise figures. Consequently the idea had to be dropped.

14. FAIRS AND FESTIVALS AND HATS AND MARKETS

A list of Fairs and Festivals in the district was furnished by the Deputy Commissioner, Tura. The Secretary, Chief Executive Committee, District Council, Tura supplied the data relating to Hats and Markets.

15. CALENDAR OF IMPORTANT EVENTS, ANCIENT MONUMENTS AND GAZETTEER OF PLACE NAMES

Informations were sought to be incorporated in this book in respect of (1) Some of important events that took place in the district during the decade 1951-60, (2) ancient monuments, antique objects and places of worships and (3) gazetteer of place names in the district. I wrote to the Deputy Commissioner, Tura and other local authorities accordingly but nothing had been received from him. Consequently the idea had to be dropped.

* The forest areas exclude the areas of the forest villages within the reserves

‡ Including seedling areas

££ Average of three years viz. 1948-49 to 1950-51. For the subsequent years viz- 1951-52 and 1952-53 data are not available

@ Figures for the year 1912-13 only

*** The informations re ating to cultivable wastes, pastures and grazing lands and miscellaneous tree crops and groves etc., were not available separately for the years prior to 1951-52 and these three categories were included under the group "cultivable wastes other than fallows" for the years 1912-13 to 1949-50 which changed into category "other uncultivated land excluding current fallows" from the year 1950-51 onwards. This category since 1951-52 had been divided into (i) cultivable wastes, (ii) permanent pastures and grazing lands and (iii) area under miscellaneous tree crops and groves not included under net area sown

** Data presented for 19..1 is the average of two years viz. 1956-57 and 1957-58. For the subsequent years viz. 1958-59 to 1960-61 data are not available

@@ Average of three years viz. 1948-49 to 1950-51 and it includes the seedling areas for the same years.

Table 5.1

VILLAGE-WISE LIST OF ALL CATEGORIES OF INDUSTRIES BASED ON HOUSELIST

(Industries are denoted by three digit code numbers while the number of units are shown in brackets)

MAUZA-I

Nuhgora 235 (1) ; Chemba giri 235 (1) ; Bamongiri 235 (2) ; Millbonpara 235 (1) ; Dabit Ampinglam giri 235 (1) ; Dabil Ashim 325 (1).

MAUZA-II

Megong giri—Rongkhon agat 369 (1) ; Anangpara 369 (2) ;
Godal giri—278 (1) ; Mechapani 393 (1).

MAUZA-III

Sekla Agipang giri 273 (1) ; Rongcheri giri 384 (1) ; Tamagiri 369 (1) ; Rongrambijol block 369 (2) ; Bajajdelea 235 (1).

MAUZA-IV

Resu Bazara 399 (1) ; Rongrangiri 369 (1).

MAUZA-V

Sikrikilla 281 (2), 369 (2), 388 (1) ; Mendipathar Rabha 280 (1) ; Mendipathar 235 (1).

MAUZA-VI

Fulbari Motor Station 205 (1), 220 (1), 369 (4).

MAUZA-VII

Shakuranbari 205 (1)

MAUZA-VIII

Nandir Char M. Jai Bazar 273 (3), 369 (4), 393 (2) ; Majher Char 369 (2), 388 (1), Kukur Manwa 369 (1).

MAUZA-IX

Saipai 205 (1), 211 (1), 350 (4), 369 (1), Killapara 205 (5), 311 (3), 350 (6), 369 (3), 384 (1), 393 (5), 399 (1) ; Gasuapara 369 (1), 388 (1).

MAUZA-X

Garobandha 313 (1).

TURA TOWN

Total—205 (2), 281 (4), 289 (1), 302 (1), 384 (3), 392 (1), 399 (4).

Tura—Block 1—289 (1), 384 (1), 392 (1) ;
Block 2—281 (4), 302 (1), 384 (2) ;
Block 3—205 (2), 369 (1), 399 (4).

EXPLANATIONS OF THE CODES USED FOR THE INDUSTRIES IN TABLE 5.1

Sl. No.	Description	Code
1	2	3
1	Production of raw cotton and kindred fibre crops	003
2	Production of crops (including vegetables) other than cereal crops, pulses, oilseeds, fibres, sugercane and other cash crops	005
3	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
4	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
5	Rearing of silk-worms and production of cocoons and raw silk	045
6	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
7	Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains	200
8	Production of sugar and syrup from sugarcane in mills	201
9	Production of indigenous sugar, gur from sugarcane or pa'm juice and production of candy	202
10	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
11	Production of bread, biscuits, cake and other bakery products	205
12	Production of butter, ghee, cheese and other diary products	206
13	Production of edible fats and oil (other than hydrogenated oil)	207
14	Production of other food products such as sweatmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
15	Production of country liquor	211
16	Production of aerated and mineral water	214
17	Production of ice	215
18	Production of ice-cream	216
19	Procession of tea in factories	217
20	Production of other beverages	219
21	Manufacture of bidi	220
22	Manufacture of hookah tobacco	223
23	Cotton ginning cleaning, pressing bailing	230
24	Cotton spinning (other than in mills)	231
25	Cotton dyeing, bleaching	233
26	Cotton weaving in power looms	234
27	Cotton weaving in handlooms	235
28	Manufacturing of khadi textile and handlooms	236
29	Printing of cotton textile	237
30	Jute pressing and baling	240
31	Jute spinning and weaving	241
32	Manufacture of other products like rope cordage from jute and similar fibre such as hemp, mesta	244
33	Wool spinning other than in mills	253
34	Spinning and weaving of silk textile in mill	260
35	Spinning of silk other than in mills	262
36	Weaving of silk textile by handloom	264
37	Manufacture of hosiery and other knitted fabrics and garments	271
38	Making of textile garments including rain coats and headgear	273
39	Manufacture of made-up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
40	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276

Sl. No.	Description	Code
1	2	3
41	Manufacture of umbrellas	278
42	Sawing and planning of wood	280
43	Manufacture of wooden furniture and fixtures	281
44	Manufacture of structural wooden goods (including treated timber such as beams, posts, doors, windows	282
45	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
46	Manufacture of other wooden products such as utensils, toys artwares	284
47	Manufacture of veneer and plywood	285
48	Manufacture of plywood products such as tea chest	286
49	Manufacture of boxes and packing cases other than plywood	287
50	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
51	Manufacture of other wood and allied products not covered above	289
52	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper & paper board in mill	290
53	do do do handmade	291
54	Manufacture of products, such as paper bags, boxes, cards envelopes and moulded pulp goods from paper, paper board and pulp	292
55	Printing and publishing of newspapers and periodicals	300
56	Printing and Publishing of books	301
57	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
58	All types of binding stitching, sizing and other allied work connected with binding industry	303
59	Carrying, tanning and finishing of hides and skins and preparation of finished leather	310
60	Manufacture of shoes and other leather footwear	311
61	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
62	Manufacture of leather products (except those covered by code No. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
63	Repair of shoes & and other leather footwear	314
64	Repair of all other leather products except footwear	315
65	Manufacture of tyres and tubes	320
66	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
67	Production of coaltar and coke oven	325
68	Manufacture of other coal and coaltar products not covered elsewhere	326
69	Manufactre of fertilizers	332
70	Manufacture of ammunition, explosive and fire works	333
71	Manufacture of matches	334
72	Manufacture of medicines, pharmeceutical preparations, perfumes, cometics and other toilet preparations except soap	335
73	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats.)	339
74	Manufacture of structural clay products such as brick, tile	340
75	Manufacture of cement and cement products	341
76	Manufacture of lime	342
77	Manufacture of structural stone goods, stone dressing and stone crushing	343
78	Manufacture of asbestos products	347
79	Manufacture of mica products	348
80	Manufacture of earthenware and earthen pottery	350
81	Manufacture of porcelain and its products	352
82	Manufacture of earthen image, busts and statues	355

Sl. No.	Description	Code
1	2	3
83	Manufacture of earthen toys and artwares except those covered by code No. 355	356
84	Manufacture of other non-metallic mineral products not elsewhere specified	359
85	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
86	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
87	Manufacture of iron and steel furniture	364
88	Manufacture of brass and bell-metal products	365
89	Manufacture of aluminium products	366
90	Manufacture of metal products (other than of iron, brass, bell-metal and aluminium) such as tin can	367
91	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
92	Manufacture of sundry hardwares such as G. I. Pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in codes 360, 361, 364-370, 376-384, 386, 388-390, 392-394, 396 and 399	369
93	Manufacture and assembling of machinery other than electrical, except textile machinery	370
94	Manufacture of instaled wires and cables	376
95	Manufacture of all kinds of battery	377
96	Manufacture of electronic equipment such as radio, microphone	378
97	Manufacture of electric machinery and apparatus, appliances not specified above	379
98	Manufacture, assembling and repairing of locomotives	380
99	Manufacture of wagons, coaches, tramway and other rail road equipment other than joist, rail, sheet, plate	381
100	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
101	Manufacture of motor vehicles engines parts and accessories	383
102	Repairing and servicing of motor vehicles	384
103	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
104	Repairing of bicycles and tricycles	388
105	Manufacture of other transport equipments such as animal drawn and hand drawn vehicles	389
106	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment supplies	390
107	Assembling and repairing of watches and clocks	392
108	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
109	Manufacture and tuning of musical instruments	394
110	Manufacture of sports goods	396
111	Manufacture and repair work of goods not assignable to any other group.	399
112	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
113	Generation and transmission of electric energy	500
114	Distribution of electric energy	501
115	Collection, purification and distribution of water to domestic and industrial consumers	510
116	Retail trading in food stuffs like sweatmeats, condiments, cakes, biscuits etc.	646
117	Retail trading in goods unspecified	689
118	Recreation services rendered by Cinema houses by exhibition of motion pictures	871
119	Services rendered by portrait and commercial photographic studios	885
