FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled

Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added **inter alia** with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tehsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/police Station/C. D. Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. H. Khan, IAS, Director of Census Operations, Jammu and Kashmir, Srinagar on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag Deputy Registrar General, (Social Studies) of my office. Dr. B. K. Roy Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the social Studies Division at the headquarters under the guidance of Shri M. M. Dua. Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1982

PREFACE

The compilation and publication of District Census Handbooks has been a traditional feature of the Indian Census since 1951. However, in Jammu and Kashmir State, where no census was conducted in 1951 due to the unsettled conditions prevailing then, this work was taken up as a regular feature of census since 1961 with certain improvements and additions in the data content of the publication at the 1971 census, further enhancing its utility for the data users.

The 1981 series of the District Census Handbook which we have begun with the district of Punch will contain two parts each. Part A deals with Town and Village Directory and Part B consists of Town and Village Primary Census Abstract. In 1971 census there was also third part of the Handbook, published as a separate volume, comprising administrative and census statistics. However, in view of the considerable delay experienced then in getting the relevant administrative statistics pertaining to various departments, compilation of this volume has been given up at the 1981 census. It is expected that such statistics would be available to the data users in the usual publications of the State Directorate of Evaluation and Statistics.

The Town Directory of the Handbook consists of seven statements which are almost similar to those adopted for the 1971 census except that a few new columns have been added to facilitate analysis of the data. A significant addition is of class of town in every statement which has been done on the consideration that the infrastructure of amenities and facilities found in urban India can best be analysed with reference to this specific parameter. The addition of the column on civic administration status in statements III and IV and population in statements IV and V also serves the same purpose vis-a-vis the respective statements. Due consideration has also been given to the Minimum Needs Programme of the Planning Commission. The columns on Scheduled Caste population in statement IV and adult literacy classes/centres in statement V are a sequel to this programme.

The Village Directory also follows the same pattern as in 1971 census except again for a few additional columns The column on total population and number of households has been added to facilitate analysis of the other data in the Directory. The column on approach to village is to identify the number of inaccessible villages in the district. The column on number of households living in owned houses or posessing house sites in the village is again intended to cater to the Minimum Needs Programme of the Planning Commission.

It is hoped that with its present content the Handbook would, more than ever, serve as a useful reference publication, particularly for such administrators and data users as have to deal with planning, implementation and evaluation of development programmes, including the Minimum Needs Programme, at the grass-roots level.

The compilation of the Handbook would not have been possible but for the cooperation extended by the Revenue, Education, Medical, Public Health and other local authorities of the District in making relevant data available, for which we owe them our grateful thanks.

It must be stated here that the task of finalising and printing the present volume has fallen on me, since Shri A. H. Khan, IAS, Director of Census Operations, Jammu & Kashmir, under whose able stewardship the census operations of 1981 were carried out, retired from Government service by the time the volume could be taken up for compilation.

We are grateful to Shri P. Padmanabha, IAS, Registrar General and Census Commissioner of India and Shri N. G. Nag, Deputy Registrar General (Social Studies) whose detailed

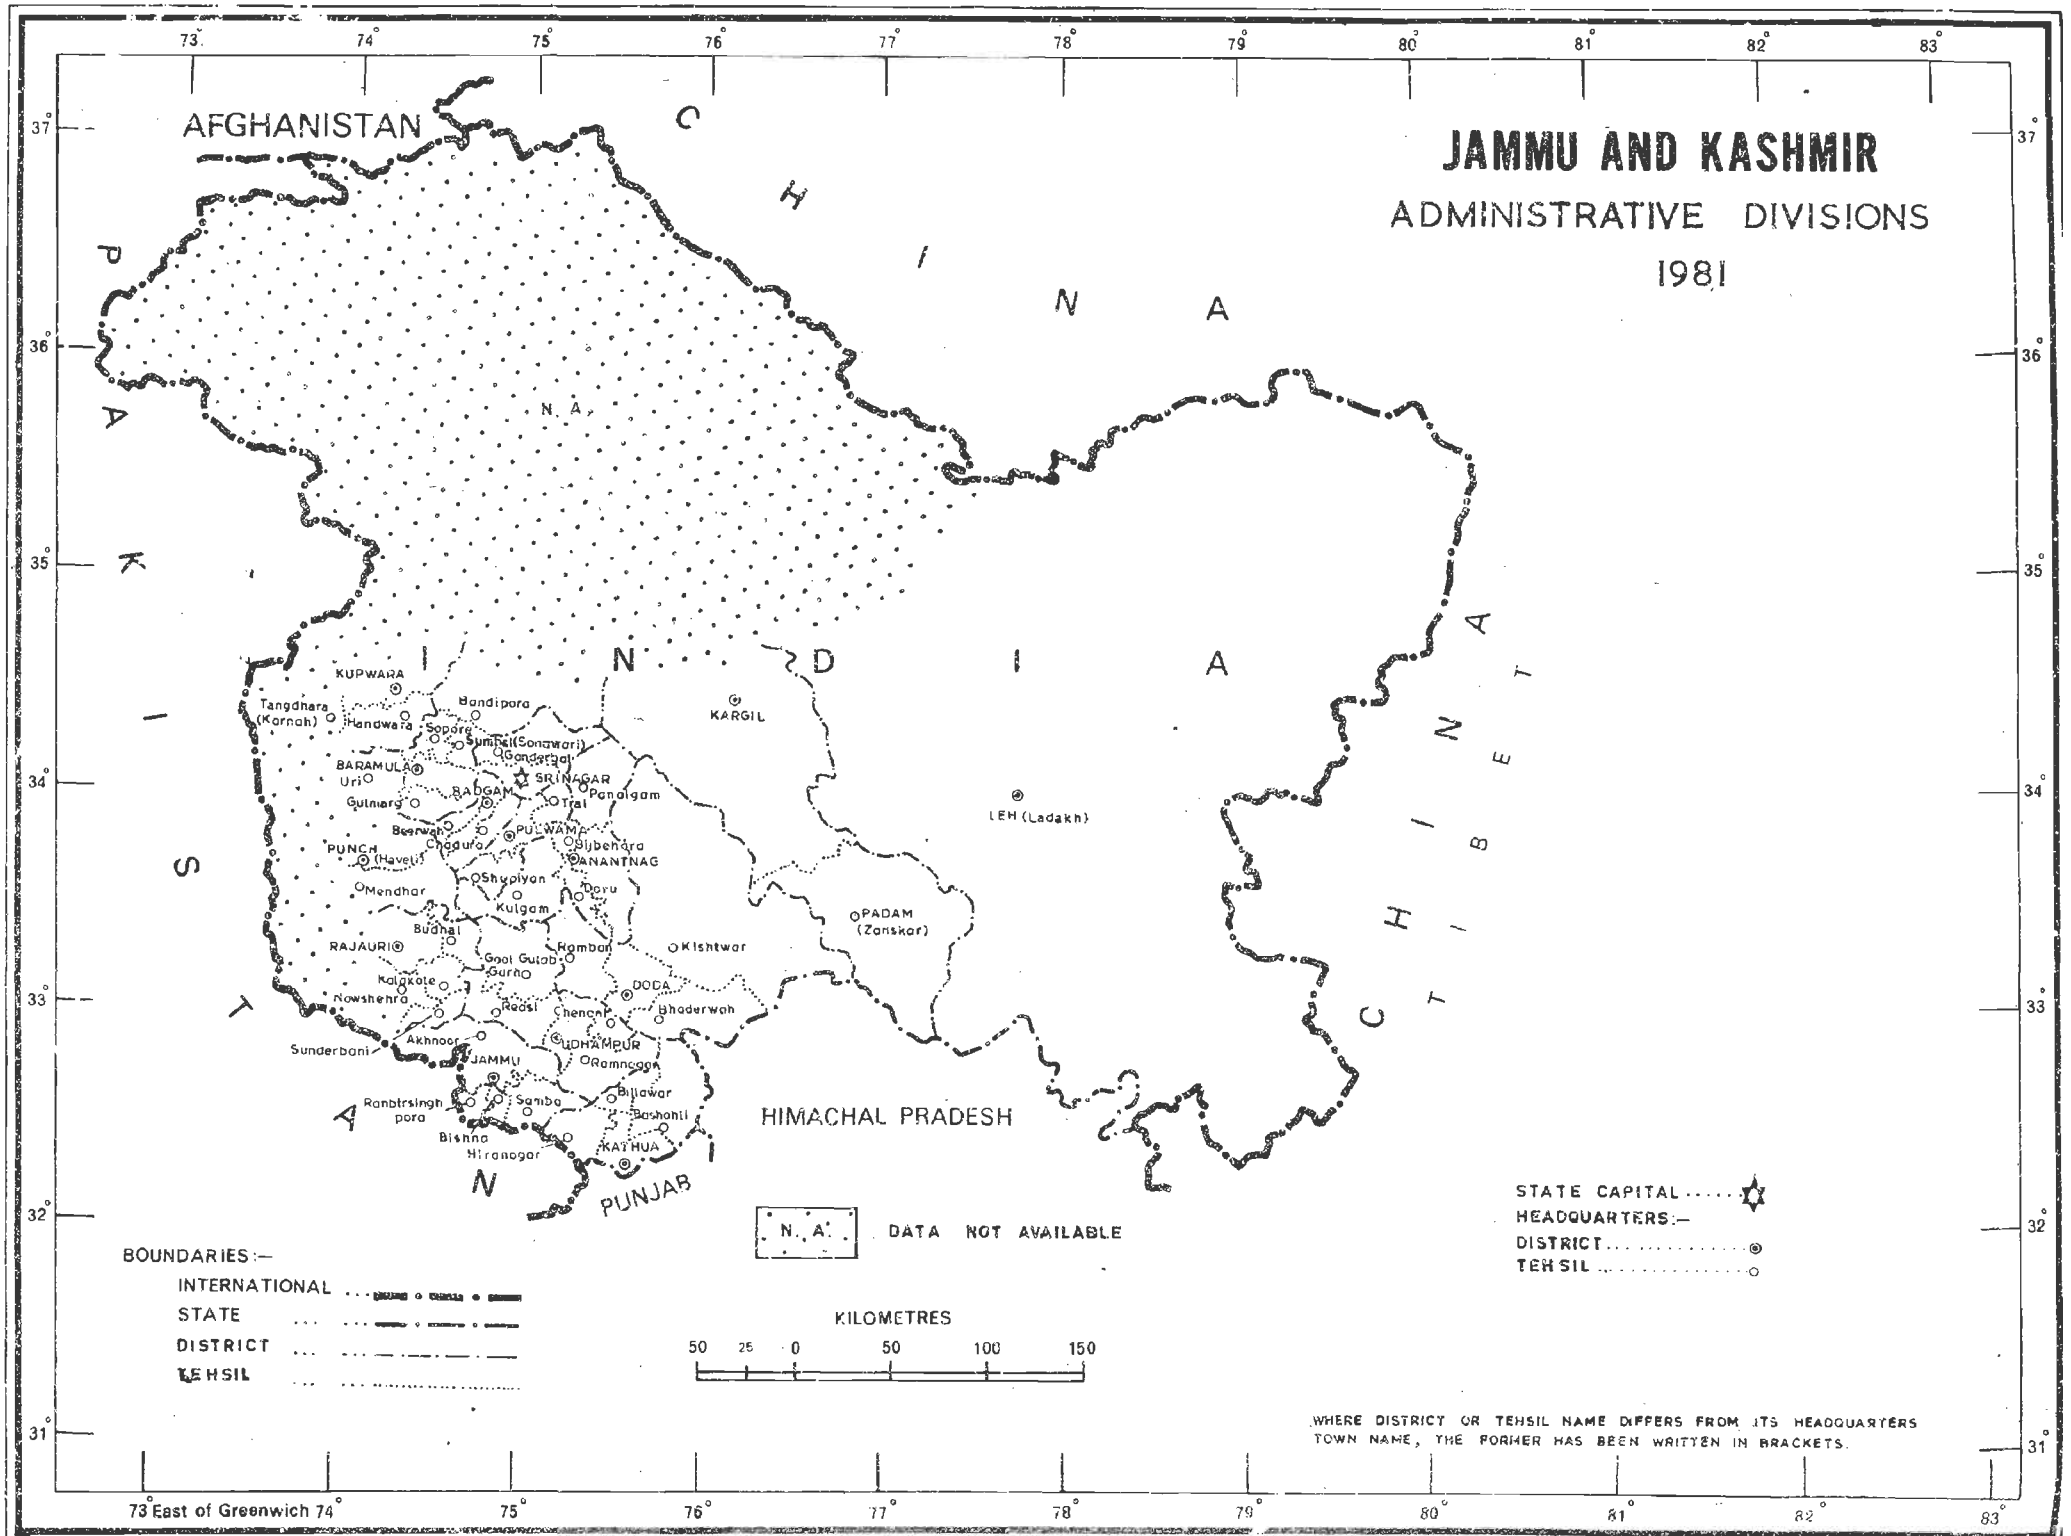

instructions, guidance and advice were available all through.

The credit for compiling this Handbook, including analysis of data, belongs to Shri Abdul Gani, Joint Director, besides Shri H. L Kalla, Deputy Director, Shri Shamus-ud-Din, Tabulation Officer and Shri G. A. Beigh Statistical Assistant who ably assisted the former in this task and deserve appreciation for their respective contributions.

The Handbook has been provided with five maps, one showing the administrative divisions of Jammu and Kashmir State as in 1981, one pertaining to Kupwara district and rest to its three constituent tehsils. These were prepared by the staff of our Cartographic section under the close and valuable guidance of Dr. B. K. Roy, Deputy Registrar General (Map) of the office of the Registrar General, India. Their names along with those of other officials who rendered valuable assistance in bringing out the volume are mentioned separately in this Handbook.

Srinagar,
the 15th May, 1987.

N. A. KAMILI,
IAS
DIRECTOR

NOTE :- * The population figures exclude population of areas under unlawful occupation of Pakistan and China where census could not be taken.

‡ Includes 78114 Sq. Kms. under illegal occupation of Pakistan and 5180 Sq. Kms illegally handed over by Pakistan to China and 37555 Sq. Kms. under illegal occupation of China in Leh (Ladakh) District.
(a) Provisional

@ Excludes 3, 1 & 4 villages of Srinagar, Chadura and Badgam tehsils forming out-growths of Srinagar Urban Agglomeration, 6 villages of Jammu tehsil forming out-growth of Jammu Urban Agglomeration respectively and 1 village of Udhampur tehsil treated as Census Town.

ANALYTICAL NOTE

A description of the various concepts used at the 1981 Census and a broad appraisal of the administrative statistics vis-a-vis the history of the district, the social and cultural changes witnessed by the district during the last ten years particularly in relation to economic resources, social, cultural and developmental activities and a brief description of the places of historical and religious importance in the district is given in the following pages :—

Rural/Urban Classification

For the 1981 census the classification of urban areas has been based on the following criteria :

a) All places with a municipality, corporation or cantonment board or notified town area committee.

b) All other places which satisfied the following tests :
   i) A minimum population of 5000.
   ii) At least 75 per cent of male working population engaged in non-agricultural (and allied) activity.
   iii) A density of population of at least 400 per Sq. Km. (1000 per sq. mile)

The places which satisfied the criterion (a) above were treated as statutory towns while those as were not statutory towns but satisfied the tests laid down in criterion (b) above were treated as census towns. All other places which did not satisfy either of the above two criteria were classified as rural. Areas which quailfied to be treated as towns under criterion (a) and (b) above were further classified by population ranges in the following order :

Population range	*Class*
1,00,000 & above	I
50,000—99,999	II
20,000—49,999	III
10,000—19,999	IV
5,000— 9,999	V
Below 5,000	VI

Census House

A Census house was defined as a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recgonised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both.

Census Household

A household for purposes of the 1981 census has been defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both.

Scheduled Caste/Scheduled Tribe

In Jammu & Kashmir State there are no scheduled tribes. However, the following 13 castes stand notified as scheduled castes under the State constitution :—

1. Barwala
2. Basith
3. Chamar or Ramdasia
4. Batwal
5. Chura
6. Dhyar
7. Doom or Mahasha
8. Gardi
9. Jolaha
10. Megh or Kabirpanthi
11. Ratal
12. Saryara
13. Watal

At the 1981 Census only those persons who returned themselves as belonging to any of the 13 castes specified above was treated as scheduled caste.

Literacy

For purposes of Census a person was treated as literate if he/she could read and write in any language with understanding power. A person who could merely read but was not able to write was classified as illiterate. For a person to be treated as literate it was not necessary that he/she should have received any formal education or should have passed any minimum educational standard.

Workers/Non-workers

For the 1981 Census a person was treated mainly as a worker if he/she had participated in any kind of economically productive work during the major part of the reference year i,e. at least 6 months or 183 days or more prior to the date of enumeration. A person who claimed to have participated in any kind of economically productive work for less than six months perior to the date of enumeration was treated as marginal worker. However, persons who did not participate in any kind of economically productive work during the whole period of the reference year were treated as non-workers.

Brief history of the district

Like other districts of the State, Kupwara district has also derived its name after its district headquarter, Kupwara town, which is situated at a distance of 90 kms. from the State headquarters. The district was carved out of erstwhile Baramula district in July, 1979 in keeping with the State Government's policy of ensuring speedy and comprehensive development of the backward and either to neglected areas. Under the re-organisd district set-up it is the sixth district of Kashmir region. It is constituted of three tehsils namely, Handwara, Karnah and Kupwara.

The total population of the district as recorded at the 1981 census is 328,743 persons distributed among 365 inhabited villages while another 4 villages in the district are uninhabited. In the north the district is bounded by Ladakh, the north-west portion is bordered by the line of actual control while its southern portion is bounded by portions of Baramula district. It has a geographical area of 2379 sq. kms. The district has hilly topography and abounds in very difficult terrains. Karnah, Keran and Machal are the known difficult and hilly areas interspersed by hilly ranges all around. These areas of the district generally remain cut off from the rest of the valley during winter for about five months and have as such been identified by the Government as specially backward areas of the district.

Kupwara has only two small urban units namely, Handwara and Kupwara notified areas falling in its jurisdiction with a population of 6,616 and 3,072 persons respectively.

Brief history of District Census Handbooks

The district Census Handbooks were published for the first time in 1951 as a part of the Census publication programme in almost all States of India except Jammu & Kashmir State where due to the disturbed conditions prevailing in the wake of tribal invasion of 1947-48 no census could be undertaken and as such no data was collected for the decade 1941-1951. The publication of District Census Handbook series fulfilled a long felt need. These gave out not only the data contained in Primary Census Abstract according to new classifications but included a sufficient account of the district and its people, and a vast magnitude of other data covering such topics as communication, education, public health etc. in respect of each town and village of the district. Consequently, these have been found to be of immense help to all the departments of the State Government for planning and development at the grass-roots level. With the introduction of single line administration at the district level, the utility and importance of these publications for constant use and reference by District Development Commissioners has increased enormously. The present hand-book is proposed to contain even more comprehensive data than in the past so as to meet also the requirements of minimum needs programme set forth by the the Planning Commission. The publication will besides the

basic population data emanating from the 1981 Census, contains comprehensive information pertaining to amenities and land-use pattern and other infrastructural statistics in respect of each village and town of the district so as to serve a ready reference material for planners and administrators for assessment of past achievements and formulation of new programmes of development at the grass-roots level.

Town Directory

The Town Directory covers information at town level and includes items such as status of administration, growth of population, growth pattern since 1901, physical aspects and location, civic finances, civic and other amenities, medical, educational, recreational and cultural facilities, trade, industry and commerce, banking facilities etc.

In addition, demographic data like sex-ratio, number of households, density of population and position of civic and other amenities in notified or recognised slums of class I & II towns have also been introduced. Considering the increasing employment of women in urban areas and the consequent housing need of single working woman, it has been felt necessary to indicate in the town directory also such information as the number of working women hostels with number of seats.

A broad appraisal of the data incorporated in the seven statements of the town directory is attempted in the following paragraphs :

Statement—I gives information on civic administration status as in 1980, growth history of towns from 1901 to 1981, sex ratio of towns from 1961 to 1981, density and area in sq. kms.

Statement—II gives the physical as well as locational aspects of towns of the district. Under the physical aspects data on annual rainfall (in mms.) and maximum and minimum temperature (in centegrade) have been highlighted. The statement also gives information on distance of the town from the nearest city with a population of one lakh and above, distance from the State, district and tehsil Hqrs., from the railway station and bus route. It also provides information on the existance of river/canal if any within 10 kms.

Statement—III provides the budgetary statements pertaining to the financial year 1978-79. The statement has been apportioned into the receipt and expenditure heads. Under the receipt head information has been given on such items as "receipt through tax-es, revenue derived from municipal properties and power apart from taxation, government grants, loans, advances and other sources". Expenditure head shows expenditure on general administration, public safety, public health and conveniences, public works, public institutions and others.

Statement—IV depicts civic and other amenities available in the towns of Kupwara district and gives information on such items as length of the road in the town, system of sewerage, number and type of laterine, method and disposal of night soil, source and capacity of drinking water and fire fighting services. The statement also highlights the pattern of electricity consumed in the town and indicates the number of connections under sub-heads like domestic, industrial, commercial, road-lighting and others.

Statement—IV-A which is meant to depict civic and other amenities available in the notified slums of class I and II towns has no relevance for Kupwara district.

Statement—V gives medical, educational, recreational and cultural facilities as were available in the towns of Kupwara district in 1979. Under medical facilities are indicated the type of medical institutions and the number of medical beds available Likewise, different types of educational institutions available have been covered under educational facilities. Information regarding the number of cinema houses, stadia, auditoria/ drama halls and public libraries have also been incorporated in the statement to bring out the extent of availability of recreational and cultural facilities. In addition, information about number

of working women hostels has also been given in the statement. If a medical or an educational facility was not available in the town, the name of the nearest place where it is available has also been given in the statement.

Statement—VI gives the facilities of trade, commerce, industry and banking available in the towns in 1979. Besides, the number of credit cooperative socities operating, the details of three most important commodities imported, exported and manufactured in the towns have also been indicated.

Village Directory

The village directory portion of the handbook depicts particulars of amenities available in each village of the district in the field of education, medical care, power supply, drinking water, post and telegragh, communication, besides information about land use and places of religious, historical and archeological importance in the village. In case where a particular amenity is not available within the village, distance at which such a facility is available even in the most modest form has been indicated in three broad ranges viz; —5kms., 5—10 kms., and 10+ kms. If there are composite schools, like middle schools with primary classes or Secondary schools with middle classes, these have also been included in the number of primary and middle schools, respectively. For example, if in a village or a town there were two primary schools and one middle school with primary classes, in the village/town the number have been given as three and that of middle school as one even though there are only three educational institutions. So also in case of secondary schools.

The village directory also carries the following four appendices :—

Appendix-I : It gives the abstract of educational, medical and other amenities available in the tehsils of the district.

Appendix-II : It furnishes the land utilisation data in respect of census towns. This appendix, however, is not relevant to Kupwara district.

Appendix-III : This is a list of villages where no amenities other than drinking water like education, medical, post and telegraph, communication, power supply are available.

Appendix-IV : It provides a list of villages according to the proportion of scheduled caste population by ranges.

All these appendices appears after the main village directory.

Primary Census Abstract.

The Primary Census Abstract part of the publication is exclusively based on the 1981 census data. It provides information in respect of each village and ward/mohalla of a town at tehsil level in respect of its area, number of residential houses, number of households, total population, scheduled caste population, literate and educated persons and working population by sex in four broad industrial categories viz; (i) cultivators, (ii) agricultural labourers, (iii) household industry, manufacturing, processing, servicing and repairs and (iv) other workers besides non-workers as a separate category.

Special PCA on Scheduled Castes

It is for the first time that a special Primary Census Abstract has been introduced in the DCHBs for the scheduled caste population. The special PCA provides information pertaining to scheduled castes in respect of number of residential houses and their population, literates, main workers, classified by cultivators, agricultural labourers, workers in the household industry and other workers, marginal workers and non-workers classified by sex. This PCA is also presented for District, Tehsil and Town levels.

Physical Aspects

The district is situated at an altitude of about 5300 feet from the sea level. Some difficult and known passes are located in the district. These include Gabhra pass, Sadhna pass, Nastuchan Gali, Furkhan Gali and Tutonar

Gali which connect Karnah, Keran and Machal with the rest of the district. It is, however, endowed with rich and dense forests. River Kishan Ganga is the only important river originating from the Himalayas which flows through the outer areas of the district from east to west and traverses through Keran and Teetwal and finally merges with River Jehlum at Domel in occupied part of Kashmir.

Tehsil Handwara has the largest number of villages viz; 198 followed by tehsil Kupwara with 129 villages while Karnah tehsil has only 42 villages and is the smallest tehsil of the district. Tehsils have further been subdivided into cummunity development blocks. Tehsil Kupwara comprises four blocks viz ; Sogam, Kupwara, Trehgam and Kralapora while tehsil Handwara constitutes of three blocks namely, Langate, Rajwar and Ramhal. The whole of tehsil Karnah, however, constitutes one block namely, Tangdar

Major Characteristics

The district experiences severe cold during winter with temperature some times going down to minus 7 degrees centigrade especially from December to February with moderate temperature during summer. June to August are the hotest months with temperature sometimes going upto a maximum of 36 degree centigrade. All but some villages of Karnah tehsil receive snowfall during winter. The average annual rainfall for the entire district was recorded as 985 millimeters during 1980.

Kupwara district is considered deficient in natural irrigation facilities. Nevertheless, there are some Nallas/Khuls in various parts of the district which are exploited for irrigation. Among them mention may be made of Kahmil Nallah, Handi Nallah, Lolab Nallah, Haihama Nallah, Mawar Nallah etc. However, river Kishanganga is also harnessed to irrigate some border areas of Karnah and Keran. Some areas of the district such as Lolab, Haihama, Kandi Khas in tehsil Kupwara, Ramhal and Rajwar in tehsil Handwara face acute shortage of irrigation facilities during July and August. To obviate these difficulties Govt. has started construction of storage tanks in these areas to store rain/snow water and subsequently supply the same to the standing crops during the period of scarcity. About 60 such storage tanks have already been constructed so far.

The pre-dominance of agriculture in the economy of the district can be viewed from the fact that about 90% of the population of the district depends in one way or the other on agriculture for their livelihood. As the entire district is rural in character production of food grains particularly under cereal crops is showing an upward trend. Rice production has also increased from 3.17 lakh Qtls. in 1979-80 to 5.03 lakh qtls. Barley is also increasingly produced. Agricultural returns for the year 1980-81 put total cropped area of the district at 45,646 hectares. The area under maize which was 18,916 hectares constitutes more than 42% of the cropped area and that under rice cultivation was 18,363 hects, which is more than 40% of the total cropped area. While area under wheat cultivation was only 136 hects., the cereal crops covered 629 hects. Thus area under cereals and other food crops constitutes about 85% of the total cropped area. Area under pulses was 1327 hectares which in terms of percentage constitutes only 3% of the total cropped area. The total area under food crops works out to 39,371 hectares which is nearly 88% of the total cropped area.

Production of walnuts is the major horticulture produce in the district. An area of 8,094 hects, comprising 7,649 hects under fresh fruit and 445 hects. under dry fruit has been brought under orchards. Soon after district Kupwara came into existance, a separate horticulture wing was established for promotion of horticulture in the district. Presently, a number of schemes are under way to enhance the production of quality fruit with particular emphasis being given to production of dry fruit. The scheme of 'Revival of Ambri production programme' had been launched and

about 40 hects. have already been brought under Ambri production in the existing orchards. Similarly, the "Intensive fruit production programme" covers an area of 7,284 hects; which was already been brought under plant and protection services. To combat scab about 18,009 hects. have been sprayed with various pesticides and insectides.

There is a great potential for development of small scale industrial units in the district. This is due to presence of huge forest resources. Of the total forest area of 902,100 hects, in the valley, Kupwara district accounts for 144,000 hects. which is 12.6% of the valley's total forest area.

The district is also rich in minor forest products. Varieties of medicinal plants and herbs are grown in the forest areas of the district. These plants and herbs are exploited for manufacture of drugs and pharmaceuticals. "Kut roots", Baladona leaves, Baladona roots, Diostorea Poshker etc. are found in sizeable quantities in the district forest areas.

Rearing of live-stock is also an important occupation of the people living in the district. The live stock census of 1977 reveals that the total live-stock population of the district stood at 1.98 lakh heads as against 1.92 lakh heads counted during 1972 Census. The following table indicates the tehsil-wise live-stock population of various species during 1972 and 1977 Censuses :

Description	1972	1977			
		Kupwara	Handwara	Karnah	Total
1. Cattle	98,016	54,641	45,440	10,385	11,0466
2. Buffallos	2,361	584	1,689	1,082	2,355
3. Sheep	72,418	32,133	26,670	4,127	63,930
4. Goats	15,184	8,785	4,437	4,484	17,679
5. Others	3,883	1,777	1,299	771	3,847
Total	191,862	98,893	78,535	20,849	198,277

Total poultry birds in the district were 1.51 lakhs, out of which 0.80 lakhs were in Kupwara tehsil, 0.62 lakhs in Handwara tehsil and only 0.09 lakhs in Kanah tehsil.

The development of fishries has not made any headway in the district as no permanent source of water is available in the district where fish could be cultured. The fishries department, is however, contemplating to grow fish in the existing storage tanks built up by the irrigation department in the Kandi areas of the district. For this purpose the department proposes to construct a fish farm at Diver.

It is reported that Mawar and Kahmil Nallas would become suitable for trout culture. Mawar Nalla has already been taken up for this purpose and is stocked with brown trout figure lings. According to the fishries department, the stream will be ready for angling in 1984. Plans are also a foot to grow fish on similar lines in Kahmil Nalla.

Electricity is not at all generated in the district. However, Karnah Micro Hydel Project a local source for generation of electric power in the district is going to be completed in near future. The project has been recast time and again and lately its installed capacity has been fixed at 2 MW only. The project will be located at Tangdar. At present work on the project is going on in full swing and is likely to cost about Rs. 2.38 crores. During 1981-82 alone, Rs. 56.00 lakhs were spent on this project With the completion of this project it is expected that the current power difficulty would be over-come to some extent.

The district has also good reserves of li nite. It is, however, held that installation of a thermal power generating unit cannot be planned as the lignite reserves are not enough to sustain such units. The district is presently fed by the electricity generated in other parts of the State. Due to extensive rural electrification programme, consumption of electricity in the

district has more than doubled in the last four years.

There has been a considerable improvement in the means of communication in the district. In the annual plans of the district adequate provision of funds for construction of a network of roads has been given top priority. During 1979-80 alone, against a total district annual ceiling of Rs. 281.09 lakhs, the approved outlay for construction of roads and bridges was fixed at Rs. 54.19 lakhs. Similarly, during 1980-81 against the total outlay of Rs. 403.56 lakhs, the provision for construction of roads and bridges was Rs. 66.00 lakhs which has been spent in full. The road length of all types maintained by the State Public Works Department which was 481 kms. in 1979 has increased to 540 kms. in the year 1980. Of the total road length in the district during 1980-81, 172 kms. were black topped, 202 kms. metalled, 76kms. shingled, 74 kms. fair weather and only 16 kms. jeepable. Presently, both passanger and goods traffic is operating through-out the district and even hilly and far off places like Karnah etc. are also linked by vehicular transport. However, no passanger service is at present available for Machal and Keran areas.

Adequate piped water supply to the inhabitants of the district is receiving increasing attention of the Government. For the purpose, Rs. 42 96 lakhs and Rs. 79 lakhs were spent in 1979-80 and 1980-81 respectively. The number of public stand posts installed by the district public health engineering department which stood at 1,249 in the year 1980, has gone upto 1,342 during 1981. Similarly, the number of private pipe connections which stood at 290 have risen to 301.

Against the overall State average literacy rate of 26.67 percent, district Kupwara has returned only 16.82 percent of its population as literates during 1981 Census. As between the two sexes the literacy rate is 27.07 percent in case of males and 4.88 percent in case of females.

There were 795 educational institutions of all types in the district during 1980-81. The number of primary schools stood at 608 which include Makhtabs and Patshalas. In addition, there were 146 middle schools and 41 high/higher secondary schools in the district. The total number of students on roll in the various educational institutions during 1980-81 was 34,727 students. The number of teachers in various educational institutions of the district during the corresponding year was 1,715. Among them, 1,383 were male teachers and 314 only female teachers. There is, however, no college for general education available in the district. There is adequate thrust in the district annual plans for the spread of general education The expenditure during the year 1980-81 on this account was Rs. 31.52 lakhs. The main schemes which are being implemented under the general education programme are :-

1) Elementary education

2) Teachers education

3) Secondary education

4) Physical education

5) Adult education

Bulk of the funds earmarked are being spent under the elementary education. As against a total expenditure of 31.52 lakhs during 1980-81, Rs. 19.49 lakhs were spent on this head alone.

The district is rich in some of the mineral deposits. Mention may be made of the following :-

1) Estimated reserves of about 4.00 million tonns of lime stone have been discovered at Trehgam by the Geology and Mining Department.

2) Lignite deposits of about 7 million tonnes with high ash content have been discovered at Nichhama, of Handwara tehsil. The mineral is used for generation of Thermal power, fertilizer manufacturing and briquittes. Presently, only briquittes are being manufactured from lignite which is a source of fuel for stoves in winter in the valley.

3) The most significant is the recent discovery of huge marble deposits of various

shades in the interior parts of Kupwara district like Dragmulla, Awoora and Zirhama. The estimated reserves discovered and surveyed so far are approximately put at 40 million tonnes. The extraction and processing of these valuable deposits is bound to put the district on a great leap forward in its economic transformation.

Expansion of Medical Health care facilities are receiving greater attention in the district annual plans. The expenditure on the provision of medical facilities in the district during 1980-81 was of the order of 20.44 lakhs.

The main schemes implemented so far under health cover programmes are as under :-

1) Primary health centres
2) Subsidiary health centres
3) District hospitals
4) Improvement of opening of new dispensaries
5) Medical aid centres etc.

With its peculiar scenic beauty of valleys opening into dense forests of varied species, snow caped mountains, streams and nallas, greenlands and moderate temperature during summer, the district of Kupwara has been attracting tourists in sizeable numbers particularly in hot months. The famous health resorts such as Lolab valley, Bungas valley, Nowgam, Drungyari etc. are located in the district. There are also many Hindu springs situated at Tikker, Buderkali, Chandigam in the district where festivals are held every year and which attract visitors in large numbers. The district had not previously received due attention for development of tourism. However, with the improvement of roads and construction of rest houses, restaurants and hotels and other necessary facilities, the district should become an important area of tourist interest.

In the development of industries the district is considerably lagging behind. There is no industrial unit in the district which could be classified as large scale or medium scale industry. Now with the establishment of district industries centre the development of small scale industries units is receiving greater attention of the government and during 1980-81 about 38 new units were set-up. This has given employment to 210 persons in the district. Khadi and village industries board is also looking after the development of cottage units. It provides village societies with incentives of financial assistance. The board has so organised and financed 44 co-operative societies and the number of individuals assisted by the board stood at 110 ending March, 1980. The number of co-operative societies by March, 81 had increased to 46 and the number of individuals assisted by the board were about 241 persons.

Important Religious and Historical places

Satkulnag.

This is a compound word of Kashmiri language, its constituents being 'Sat' meaning seven 'Kul' used for stream and 'Nag' implying a spring. The name has been assigned to the spring on account of its water being divided into seven streams of which four flow in the direction of village Drav of Karnah tehsil where they deposit their tributaries in river Kishan Ganga. The other three streams take a south-ward route in the direction of main valley. The spring is itself situated in Bungus pasture which is flocked by graziers in summer.

Charchashma

The word charchashma means four springs. The four springs cluster in close neighbourhood on the peak of Kajinag mountain in Handwara tehsil. As the mountain has a very difficult slope, the springs are not easily accessible.

Ramkund

The four springs which are considered sacred by Hindus are situated at a distance of 3 kms. from village Nihari on mount Wat in Handwara tehsil. As is evident from the names of the springs they seem to have had some historical association with 'Lord Rama'. This is also

confirmed by the popular belief according to which Rama built a temple at this place and spent a long time here in meditation.

Gotamrashinagh

As is clear by its name, the spring enjoys religious sanctity and is held sacred by Hindus. It is situated in Gazaryal village of Handwara tehsil and has plenty of fish.

Kupwara cave

The cave is known after Kupwara town in which it is situated. It is so dark that no one dares to enter it unless he carries burning candle sticks with him. According to a tradition Sheikh Zain-ud-Din a Muslim saint of Kashmir who lived in 14th century is said to have meditated in the cave for a long time.

Lolab valley

Lolab valley is a beautiful ovalshaped valley stretching to about 15 miles and with varying breadths ranging from few hundred yards to about 3 miles. It is situated in the extreme north of Kashmir valley and is traversed by the large Lahwal stream and intersected by small nallas flowing down from the surrounding hills. Dense forests of deodar which grow at a low level around the valley add in no small measure to its beauty. It is bordered by extensive pasture grounds which stretch on the hill slopes and serve as a grazing areas.

The valley is inhabited by about 30 villages which have a mixed layout of the settlement obtaining in mountains and plain areas. Most of the villages are situated in the midst of groves of chinar, walnut, cherry, apple and peach trees.

Lolab valley is reputed for a special variety of fowls called 'Khassi' which are not found in any part of the State. The fowl resembles a peacock, because of its multi-coloured feathers and an attractive physical structure. A Khassi fowl is not born as such, but is reared by depriving a natural fowl of its reproductive faculty.

Bungas pasture

Nagmarg pasture is very pretty and is situated near Lolab valley. Also another pasture namely, Bungas pasture occupies the border of tehsils of Handwara and Karnah. It is reputed for good climate and variety of wild flowers. This pasture also attracts herds of cattle in summer due to the availability of plenty of fodder. This pasture could be developed into tourism suburbs also.

Monuments

The district has also some places of archaeological interest, these consist chief of ruins of the following mosques and temples.

i) Ruins of Ramkund temple at Farkian in tehsil Handwara

ii) Shardamia temple at Guglusa in tehsil Handwara

iii) Nandrishi Pirs tomb at Magam in Handwara tehsil

iv) Dhyaneshwar temple at Simattan in Handwara tehsil

Brief analysis of the P.C.A. data

Part-B of this publication contains data collected during 1981 census and is based on the Primary Census Abstract which depicts valuable information in respect of each village and ward/mohalla of a town in the district incorporating various demographic aspects viz; area, number of residential houses, number of households, total population with sex-wise break-up, scheduled caste population, literate and educated persons and sex-wise break-up of working population categorised into main workers, marginal workers and non-workers. This information has been summarised in various inset tables, giving an insight into the demographic structure of population at tehsil level. A brief analysis of the data as revealed in these tables highlighting the various

demographical changes that have taken place in the rural and urban areas of the district during decade 1971-81 follows :-

The sub-joined table No. 1 gives an account of the distribution of population at tehsil level :—

TABLE NO. 1

Population, Number of villages and Towns, 1981

S. No.	Name of Tehsil	Population									No. of villages		No. of towns
		Total			Rural			Urban					
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Total	Inhabited	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
1.	Handwara	128,335	68,586	59,749	121,719	64,986	56,733	6,616	3,600	3,016	198	196	1
2.	Karnah	28,325	15,337	12,988	28,325	15,337	12,988	...	...	...	42	41	....
3.	Kupwara	172,083	92,986	79,097	169,011	91,323	77,688	3,072	1,663	1,409	129	128	1
	Total District	328,743	176,909	151,834	319,055	171,646	147,409	9,688	5,263	4,425	369	365	2

Table No. 1 above highlights tehsilwise number of villages with population in the district. There are 365 inhabited villages with a population of 328,743 persons as on the 1981 census reference date viz; on the sunrise of 6th May, 1981. Of this 176,909 are males and 151,834 females. This table also reveals that Handwara tehsil with 196 inhabited villages stands on the top followed by Kupwara tehsil with 128 inhabited villages. Karnah is the smallest tehsil in the district having only 41 inhabited villages. There are only 4 un-inhabited villages in the entire district. In terms of population Kupwara tehsil ranks on the top constituting 52.35% of the total district population followed by Handwara accounting for 39 03% of the population of the district. Karnah stands at the bottom with only 8.62% of the population being in this tehsil. Kupwara district is predominantly rural in character with 97.05% of the population of the district living in rural area.

Table No. 2 below indicates the decadal variation in the distribution of population during 1971-81 at district and tehsil levels :-

Table NO. 2

Decadal change in distribution of population

S. No.	Name of Tehsil	Population						Percentage decadal (1971-81) variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Handwara	102,010	96,985	5,025	128,335	121,719	6,616	+25.81	+25.50	+31.66
2.	Karnah	18,904	18,904	....	28,325	28,325	....	+49.84	+49.84	....
3.	Kupwara	136,910	136,910	...	172,083	169,011	3,072	+25.69	+23.45	....
	District	257,824	252,799	5,025	328,743	319,055	9,688	+27.51	+26.21	+92.80

It will be seen that Kupwara district has a total population of 328,743 persons as per 1981 census compared to 257,824 persons returned at the 1971 Census. This indicates a net addition of 70,919 persons in the district during the decade and an overall growth rate of 27.51% as compared to the State growth rate of 29.69%. The rural growth rate which has been recorded as 26.21 is a bit higher than that of State rural growth rate which stands at 25.77% during the decade 1971-81 Handwara and Kupwara tehsils have registered

a rural growth rate of 25.50% and 23.45% respectively.

The sub-joined table No. 3 deals with the distribution of tehsil-wise villages by population ranges :-

TABLE NO. 3

Distribution of villages by population ranges

Range of population	No. of villages in each range	Percentage of villages in each range
(1)	(2)	(3)
— 200	52	14.25
200— 499	96	26.30
500—1,999	185	50.69
2,000—4,999	30	8.22
5,000—9,999	1	0.27
10,000+	1	0.27
Total	365	100.00

The data in the table indicate that 50.69% of villages fall in the population range of 500-1,999 encompassing 53.00 percent of the district population. On the other hand, 26.30% of villages fall in the population range of 200-499 claiming only 10.70% of district population. 14.25% of villages fall in the range of less than 200, having returned the lowest population percentage of 2.13 .30 villages or 8.22% in the population range of 2,000-4,999 claim 28.04 percent of total population of the district.

The sub-joined table No. 4 indicates the distribution of villages by density ranges :-

TABLE NO 4

Distribution of villages by density

Range of Density (per sq. km.)	Total No. of Villages in each density range	Percentage of villages in each density range
(1)	(2)	(3)
— 10	...	...
11— 20	1	0.27
21— 50	1	0.27
51—100	2	0.55
101—200	15	4.11
201—300	38	10.41
301—500	140	38.36
501+	168	46.03
Not known	...	...
Total	365	100.00

From the above table it is observed that 168 villages constituting 46.03 % of the total inhabited villages of the district fall in the density range of more than 500 persons per sq. km. followed by 140 villages or 38.36% in the range of 301-500 persons. 38 villages or 10.41% have a density of 201-300, while only 15 or 4.11% villages fall in the range of 101-200 persons.

Table No. 5 below shows the proportion of scheduled castes population to total population in the villages :-

TABLE NO. 5

Proportion of Scheduled Caste population to total population in the villages

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
(1)	(2)	(3)
Nil	354	96.99
0— 5	11	3.01
6—10	...	...
11—15	...	...
16—20	...	...
21—30	...	...
31 and above	...	...
Total	365	100.00

The data indicate that of the total 365 inhabited villages in the district there are only 11 or 3.01% villages where an element of Scheduled Caste population is found and that also just in the range of five or less than five percent.

The sub-joined table No. 6 indicate the literacy rates by population ranges :

TABLE No. 6

Literacy rates by population ranges of villages

Range of population	No. of villages in each range	Literacy rate
(1)	(2)	(3)
— 200	52	18.43
200— 499	96	15.42
500—1,999	185	16.37
2,000—4,999	30	17.76
5,000—9,999	1	12.64
10,000+	1	8.33
Total	365	16.32

According to the 1981 Census, the district has registered a literacy rate of 16.32% as against 21.63% recorded for the State as a whole. Out of 365 villages in the district, the highest number of 185 villages falling in the population range of 500-1,999 have maintained a literacy level of 16.37% while 96 villages in the population range of 200-499 have registered a literacy level of 15.42%. There are 52 villages in the population range of less than 200 where the literacy level stands at 18.43%. It is also observed that smaller villages have a higher rate of literacy whereas larger villages have relatively lower rate of literacy.

Table No. 7 depicts the urban literacy rate in the district :-

TABLE NO. 7

Literacy rate for towns

Name of the town (1)	Literacy rate (2)
Handwara	34.79
Kupwara	30.57
All towns	33.45

Handwara and Kupwara notified areas which constitute the urban content of district Kupwara have registered literacy at the level of 34.79% and 30.57% respectively which is almost twice the total literacy rate of 16.82% registered for district as a whole.

The sub-joined table No. 8 indicates tehsil-wise distribution of literates, workers, non-workers, scheduled caste population in the district :-

TABLE NO. 8

Literates, Workers, Non-workers, Scheduled Caste/Tribe population in the district

Name of Tehsil	Total/ Rural/ Urbrn	Total Population			Percentage of—(Contd) S.C. population to total population	S.T. population to total population	Literates to total population		
		Persons	Males	Females			Persons	Males	Females

29.82	52.18	3.23	18.87	4.54	35.91	48.69	56.72	39.14	51.31	43.28	60.86

We have already seen that both in the matter of rural as well as urban literacy the district has to make a large headway even to come up to the level obtaining for the State as a whole. Down at the tehsil level the position is still lower in respect of Kupwara tehsil where the literacy rate has been returned at 16.30% corresponding to 16.82% for the district as a whole. Handwara is better placed with total, rural and urban literacy being higher than for the district as a whole. As between the two sexes male literacy level far outweighs the female literacy level in all the tehsils. The differential is however greater in rural areas than in urban areas.

Percentage of main workers to total population as reproduced in cols. 11-13 shows that male work participation rate in urban areas generally trails behind that in rural areas, although the differential is marginal in all the tehsils. In the case of female participation rate which though very low, the position as between rural and urban components is just reverse in Handwara tehsil. Amongst the tehsils, the highest rural participation rate for both the sexes has been returned by Kupwara tehsil as compared to the district as a whole. The urban participation rate for both sexes is, however, higher in Handwara tehsil.

Marginal workers as will be noticed from cols. 14 to 16 of the statement constitute 18.49% of the population in the district. At the tehsil level this proportion varies from 1.55% in Karnah tehsil to 24.26% in Handwara tehsil. It is however significant to note that in all tehsils predominant proportion of marginal workers are claimed by female population of the rural and urban component except in Karnah tehsil. It is a traditional feature of the rural economy that in the female folk, though primarily engaged in household activities do contribute their bit by marginal participation in seasonal economic activities. It will thus be seen that the proportion of rural marginal female workers to total rural female population varies from as much as 1.06% in Karnah tehsil to as much as 50.20% in Handwara tehsil. Even in urban areas where marginal workers claim relatively much smaller proportion in both sexes, the proportion of females outweighs the male proportion in all tehsils of the district. The proportion of total workers made up of main workers and marginal workers put together is brought out in cols. 17–19 of the table. It will be seen that in the case of male population the proportion of workers outstrips the proportion of non-workers both in rural and urban parts. In the case of female

population the ratio of non-workers is however, higher than that of workers except in Handwara tehsil (total and rural) where the proportion stands at 48.95% and 48.32% corresponding to the workers ratio of 51.05% and 51.68% respectively.

Brief analysis of village directory data

The data collected from the Revenue and other government agencies regarding availability of various amenities has been tabulated in the main village directory statements. The salient features of this data in broad aggregates are brought out below in the form of inset tables :—

The position of availability of various amenities at district/tehsil level is indicated in the following table :—

TABLE NO 9

Distribution of villages according to the availability of different amenities

Sl. No.	Name of Tehsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities: Education	Medical	Drinking water	Post and telegraph	Market/ Hat	Communication	Approach by pucca road	power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Handwara	196	163	30	196	30	...	75	124	183
			(83 .16)	(15.31)	(100. 00)	(15.31)	(...)	(38. 27)	(63. 27)	(93.37)
2.	Karnah	41	37	7	41	4	...	2	3	21
			(90. 24)	(17. 07)	(100. 00)	(9. 76)	(...)	(4. 88)	(7. 32)	(51.22)
3.	Kupwara	128	120	24	128	30	...	60	75	113
			(93. 75)	(18.75)	(100. 00)	(23. 44)	(...)	(46. 88)	(58. 59)	(88.28)
Total District		365	320	61	365	64	...	137	202	317
			(87. 67)	(16. 71)	(100. 00)	(17. 53)	(...)	(37. 53)	(55. 34)	(86.85)

The table reveals that of the 365 inhabited villages in the district, 320 accounting for 87.67% villages have one or the other type of educational institutions like middle, high, higher secondary schools located within the village and this amenity is almost evenly distributed in all the three tehsils of the district. As regards medical facility only 61 villages have either a dispensary or primary health centre or hospital which makes a meager proportion of 16. 71% of the total villages. At tehsil level, the incidence of this basic amenity ranges between 15. 31% in Handwara to 18.75% in Kupwara. Drinking water facility is, however, available to all the villages of the district from one source or the other. However, protected drinking water supply is available to 86 villges only which form just 24% of the total number of villages, which makes a poor position indeed. In the matter of post & telegraph facility, the proportion of villages at district level is 17.53% while at the tehsil level Kupwara tehsil claims the highest proportion of 23.44% followed by Handwara tehsil with 15. 31% of villages. Communication- wise the district does not, however, appear to be placed comfortably. Out of 365 inhabited villages in the district, only 137 villages have the benefit of the communcation facilities. Among the three tehsils of the district Kupwara tehsil appears to be better placed with 46.88% of its villages linked with a bus stops etc. Handwara comes next with 38.27% of the villages having communication facilities. At the bottom is the Karnah tehsil with only 4.88% of its villages connected with such facility 202 villages

or 55.34% of the total number of villages in the district are connected with pucca roads, of these 124 or 63.27% fall in Handwara tehsil and 75 or 58.59% in Kupwara tehsil. Karnah tehsil lags far behind other two tehsils with a proportion of only 7.32% villages, in the matter of pucca roads.

In the district 317 villages comprising 87% of the total number of villages are electrified. The progress is very satisfactory, particularly in Handwara & Kupwara tehsils with 93.37% & 88.28% villages respectively having been covered under the rural electrification programme. So far as the farflung Karnah tehsil is concerned, 51.22% of villages enjoy this facility.

The table No. 10 below highlights the availability of various amenities in terms of the proportion of population served by each :-

TABLE NO. 10

Proportion of Rural population served by different amenities

Sl. No.	Name of tehsil	Total population of inhabited villages in the tehsil	Proportion of rural population served by the amenity of :-							
			Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power Supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1.	Handwara	121,719	91.96	28.60	100.00	29.89	...	51.78	72.10	94.23
2.	Karnah	28,325	98.50	38.80	100.00	27.17	...	14.73	8.27	57.61
3.	Kupwara	169,011	98.91	38.77	100.00	47.39	...	67.18	74.52	94.90
Total district		319,055	96.22	34.89	100.00	38.92	...	56.65	67.71	91.33

It will be observed that the position is relatively brighter in terms of the population served by various amenities than what came out in the earlier table 9 in terms of the proportion of villages both for the district as a whole as also at the tehsil level except Karnah tehsil. The proportion of population benefitted is nearly full or substantial in the fields of education, drinking water and power supply. In case of other amenities while the position is still not very satisfactory in all the tehsils of the district, Karnah tehsil has to go long way even to catch up the level obtaining in other two tehsils.

Distribution of villages not having certain amenities arranged by distance ranges from the place where these are available is indicated in the subjoined table No. 11:-

TABLE No. 11

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of :-			
	—5 kms.	5—10 kms.	10+ kms.	Total (Cols. 2—4)
(1)	(2)	(3)	(4)	(5)
1. Education	45	...	...	45
2. Medical	266	28	10	304
3. Drinking water	...	...	...	...
4. Post & Telegraph	261	27	13	301
5. Market/Hat	...	...	...	...
6. Communication	159	27	42	228

Out of 365 villages in the district there are only 45 or 12.30% villages where no educational facility of any sort is available within the

village itself, but the amenity is available at a distance of less than 5 kms. So also out of 304 villages which have no medical facilities of any type in the villages, 266 villages have the medical facility available within the range of less than 5 kms. Another 28 villages have the facility within 5—10 kms. and 10 villages have this facility at a distance of more than 10 kms. As in the case of medical facility, the district appears to be badly placed in respect of post and telegraph facility. However, an overwhelming number of villages numbering 261 have this facility at a distance of less than 5 kms. range and remaining 40 villages have it within 5—10 kms. and beyond 10 kms. respectively. Communication-wise, 228 villages have no such facility and these 159 villages have bus stop facility at less than 5 kms. distance and another 27 villages have bus services available within 5-10 kms. while the remaining 42 villages have to cover beyond 10 kms. to catch public transport. It is thus noticeable that practically all the basic amenities are available to most of the rural population in the district within a distance of less than 5 kms. of their villages of residence if not within the village itself and the proportion of population which has to cover a distance of more than 10 kms. to avail of any particular amenity is indeed very small.

Table No. 12 below gives the distribution of villages according to distance from the nearest town and availability of different amenities :-

TABLE NO. 12

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in Kms.)	NO. of inhabited villages in each range	NO. (with Percentage) of villages having the amenity of :-							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0— 5	47	40	6	47	10	...	23	36	47
		(85.11)	(12.77)	(100.00)	(21.28)	(...)	(48.94)	(76.60)	(100.00)
6—15	157	134	24	157	28	...	71	103	156
		(85.35)	(15.29)	(100.00)	(17.83)	(...)	(45.22)	(65.61)	(99.36)
16—50	107	99	22	107	20	...	41	60	93
		(92.52)	(20.56)	(100.00)	(18.69)	(...)	(38.32)	(56.07)	(86.92)
51+	54	49	9	54	6	...	...	3	21
		(90.74)	(16.67)	(100.00)	(11.11)	(...)	(...)	(5.56)	(38.89)
Unspecified	...	...	...	...	...	...	...	...	...
Total	365	320	61	365	64	...	137	202	317
		(87.67)	(16.71)	(100.00)	(17.53)	(...)	(37.53)	(55.34)	(86.85)

It will be seen that distance from the nearest town does not seem to have any major effect on the provision of various amenities except for medical care, communication & to some extent post & telegraph facilities where the villages placed at a distance of 6-15 kms. seem for good reason to have received relatively better attention than those placed nearer the town. This is also true for villages placed at a distance of less than 5 kms However, the difference in the proportions is not as substantial as one should have expected & this might possibly be so due to a relatively less proportion of population inhabiting the more distant villages

Distribution of villages according to population range and amenities available is mentioned in subjoined table No. 13 :-

TABLE NO. 13

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	NO. (With percentage) of villages having the amenity of :-							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
— 499	148	110	5	148	6	...	31	60	121
		(74.32)	(3.38)	(100.00)	(4.05)	(...)	(20.95)	(40.54)	(81.76)
500—1,999	185	178	38	185	41	...	79	115	165
		(96.22)	(20.54)	(100.00)	(22.16)	(...)	(42.70)	(62.16)	(89.19)
2,000—4,999	30	30	16	30	15	...	25	25	29
		(100.00)	(53.33)	(100.00)	(50.00)	(...)	(83.33)	(83.33)	(96.67)
5,000+	2	2	2	2	2	...	2	2	2
		(100.00)	(100.00)	(100.00)	(100.00)	(...)	(100.00)	(100.00)	(100.00)
Total	365	320	61	365	64	...	137	202	317
		(87.67)	(16.71)	(100.00)	(17.53)	(...)	(37.53)	(55.34)	(86.85)

As will be readily observed the population size of villages has a direct bearing on determining the position of various amenities with more populated villages expectedly attracting more attention than less populated villages. The highest beneficaries are obviously the villages with a population of 2,000 & more. The least proportion is of those with a population of less than 500 particularly in the field of medical care and post & telegraph facilities where the coverage of such villages is about 4 percent.

Tehsilwise main staple food of the inhabitants in the majority of villages is indicated in table No 14 below :-

TABLE NO. 14

Main staple food in the majority of villages in each tehsil

S. No. (1)	Name of tehsil (2)	Main staple food (3)
1.	Handwara	Rice, Maize
2.	Karnah	Rice, Maize, Wheat
3.	Kupwara	Rice, Maize

It will be seen that the main staple food in all the tehsils of the district is Rice and Maize. However, in Karnah tehsil wheat is also used as main staple food.

Distribution of villages according to land use is given in the subjoined table No. 15 :—

TABLE NO. 15

Distribution of villages according to land use

S. No.	Name of tehsil	No. of inhabited villages	Total area	Percentage cultivable area to total area	Percentage of irrigated area to total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1.	Handwara	196	28,346.12	91.21	34.23
2	Karnah	41	6,988.56	59.08	21.22
3.	Kupwara	128	29,936.52	82.91	50·81
	Total district	365	65,271.20	83.96	40.76

It will be seen that Handwara and Kupwara tehsils are more or less evenly placed in terms of proportion of cultivable area to total area. Karnah being the smallest tehsil in the district has 59.08%, of cultivable land as against its total area of 6988.56 hectares. The proportion of irrigated area in the three tehsils varies from 21.22% in Karnah to 50.81% in Kupwara.

Brief analysis of Town Directory data

Separate data in respect of urban population structure, civic finance, the availability of various amenities has been compiled in the main town directory tables I to VI. For facilating a brief commentary and assessment of the progress made by urban population some of the important statistics has further been subdivided in table No. 16—21

The sub-joined table No. 16 indicates the figures relating to urban population its percentage, variation, density and sex-ratio :-

TABLE NO. 16

Growth, density and Sex-ratio of Urban Population in the District in relation to the State

	District						State					
Census Year	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1961	204,073	...	...	...	...	...	3,560,976	593,315	16.66	...	N.A.	844
1971	257,824	5,025	1.95	...	594	860	4,616,632	858,221	18.59	+44.65	N.A.	860
1981	328,743	9,688	2.95	+92.80	878	841	*5,987,389	1,260,403	21.05	+46.86	2146	875

*The population figures exclude population of areas under unlawful occupation of Pakistan and China where census could not be taken.

There was no urban area in the district at the 1961 census. As can be readily seen from the table Kupwara district lags far behind the State as a whole in its progress towards urbanisation, the position having been consistantly so during the last two decades. The district thus continues to be predominantly rural in character, the proportion of urban population having increased by only one percent from 1.95% in 1971 to 2.95% in 1981. The corresponding proportion for the State as a whole has increased to 21.05% in 1981 as against 18.59% in 1971. As regards density of population, in the absence of area figures for the State urban 1971, comparable picture is available only for 1981 indicating that urban density of population per sq. km. in Kupwara is less than what it was for the State as a whole. The urban sex-ratio in the district is to some extent adverse to female even as compared with that for the State as a whole. However, this ratio shows some improvement in 1981 over that of 1971, the same way as for the State. The urban sex-ratio in respect of the State has increased from 844 to 860 during the decade 1961-71 and 860 to 875 in 1971-81 against that it has decreased from 860 to 841 during the decade 1971-81 in so far as the district sex-ratio is concerned.

The subjoined table No. 17 is intended to identify the towns added or declassified during the 1971-81 decade.

TABLE NO. 17

New towns added/towns declassified in 1981 census

Name of town (1)	Population 1981 census (2)
(a) **Added**	
(i) Kupwara	3072
(b) **Declassified**	...

It will be seen that over the last 10 years Kupwara has come to be recognised as a new town while there has been no declassification of any town previously recognised as such. In this way the number of towns in the district has gone up to two.

The subjoined Table No. 18 indicates the per capita receipt from various resources and expenditure on various amenities in respect of each town of the district :-

TABLE NO. 18

Per capita receipt & expenditure in towns

Class, name & civic status of the town	Per capita Receipt: Total	Receipt through taxes	Receipt from all other sources	Per capita Expenditure: Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
V Handwara N.A.	17.38	2.72	14.66	53.88	16.55	11.34	...	...	26.00
VI Kupwara N.A.	108.85	101.20	7.65	90.43	24.09	...	45.57	...	20.77
Total	46.39	33.95	12.44	65.47	18.94	7.74	14.45	...	24.34

In the two towns put together the per capita total receipts are Rupees 46.39. The total receipt through taxes is, however, Rupees 33.95 while receipts from other sources are hardly Rupees 12.44. On the expenditure side the per capita total expenditure is Rupees 65.47. The per capita expenditure on general administration in the two towns put together is of the order of Rupees 18.94 on public health and that on conveniences is Rupees 7.74,public works Rupees 14.45 and other items is Rupees 24.34. Between the two towns, however, Kupwara is placed far ahead of Handwara town both in the matter of per capita receipt as well as expenditure.

The distribution of schools of different levels per ten thousand population in the town is given in the following table No. 19:-

TABLE NO. 19

Schools per ten thousand population in towns

Class, name and civic status of town	No. per ten thousand population: Higher Secondary/Inter/ PUC/ Junior college	Secondary/ Matriculation	Junior Secondary/ middle	Primary
(1)	(2)	(3)	(4)	(5)
V Handwara N.A.	3.02	...	4.53	9.07
VI Kupwara N.A.	3.26	3.26	6.51	16.28
Total	3.10	1.03	5.16	11.35

The data from the above table inidcate that Kupwara town with less population has been better provided for in terms of schools of various levels than Handwara with larger population, the chief consideration probably having been to equip each town with such facilities regardless of whether it deserves these at all in relation to its population size.

The sub-joined inset table No. 20 gives the number of medical institutions per 1,000 population :-

TABLE NO. 20

No. of beds in medical institutions in towns

Class, name and civic status in the town	No. of beds in medical institutions per 1,000 population
(1)	(2)
V Handwara N.A.	1.51
VI Kupwara N.A.	3.26
Total	2.06

It will be seen like table No. 19, Kupwara town with a total population of 3,072 only is placed better with 3.26 beds per 1,000 population corresponding to 1.51 beds per 1,000 population in Handwara.

The below given inset table No. 21 highlights the extent of most important commodity manufactured, imported and exported in the towns of the district :-

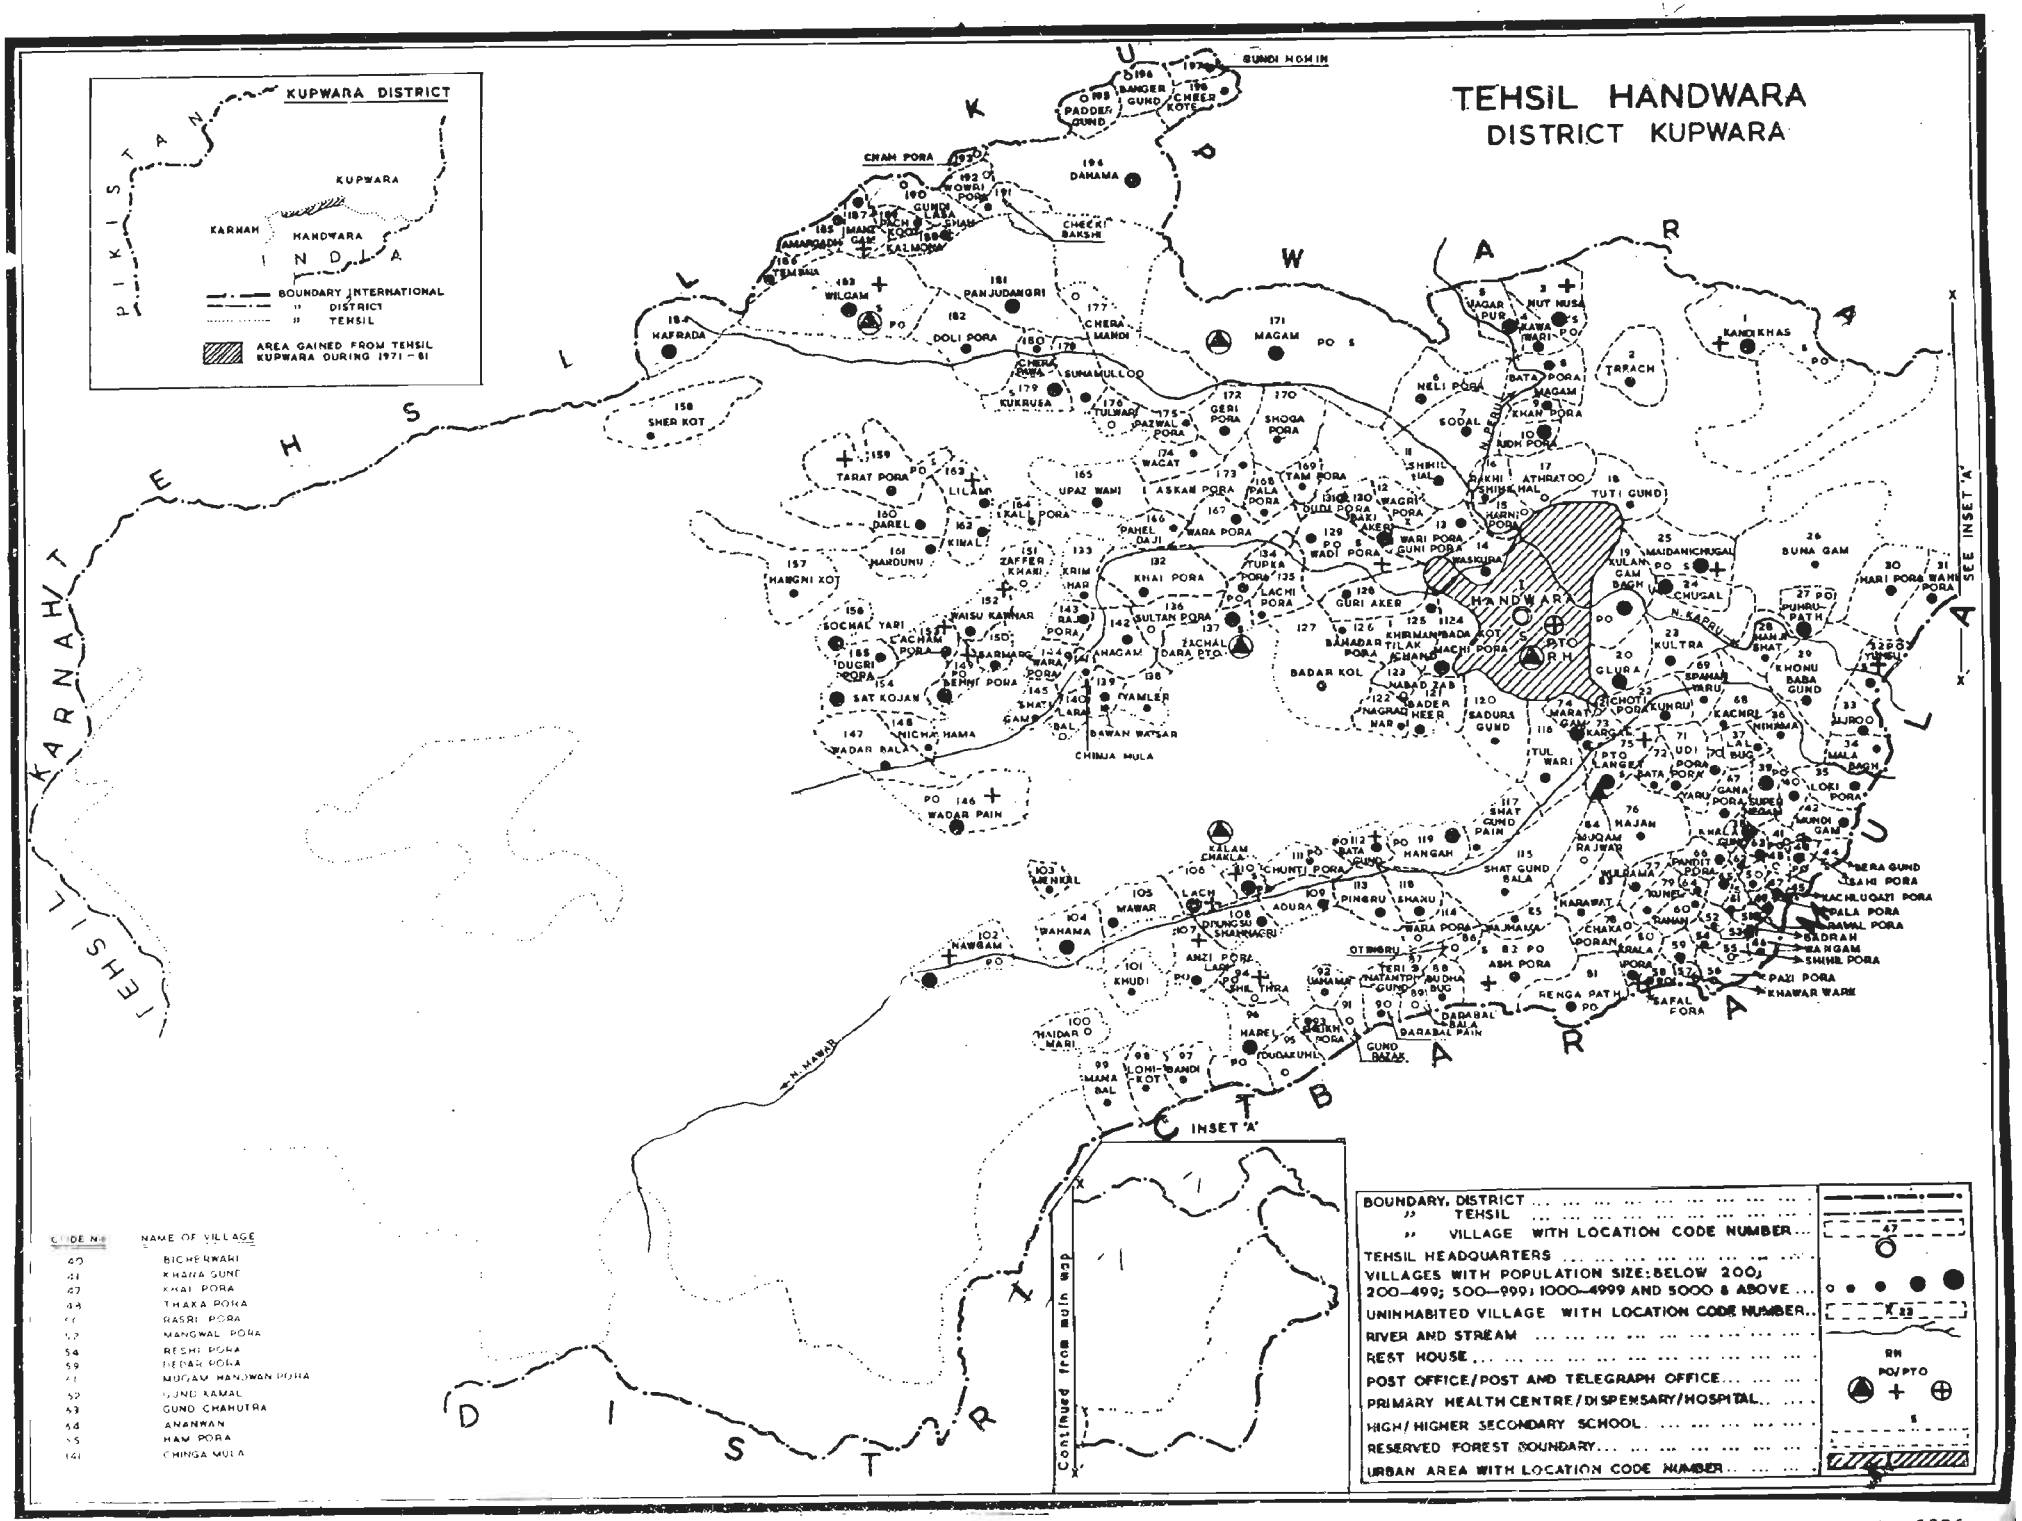

TABLE NO. 21

Most important commodity manufactured, imported and exported in the towns

Class, name and civic status of the town		Most important commodity		
		Manufactured	Exported	Imported
(1)		(2)	(3)	(4)
V Handwara	N.A.	Furniture	Fruit	Rice
VI Kupwara	N.A.	Blankets	Walnuts giri	Cloth

While the table speaks for itself, it will be noticed that blankets are the main item of manufacture in Kupwara town and wooden furniture is the main commodity manufactured in Handwara town. The chief items of export are fruit and dry fruit in both the towns, while rice and cloth are the chief items of import in both the towns.

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

A number of codes has been used in the Village Directory. These are emplified below :

Column No. (1)	Item (2)	Code (3)
5 (Educational* Amenities)	Primary or elementary school	P
	Junior secondary or middle school	M
	Matriculation or Secondary	H
	Higher secondary/Intermediate Pre-university/Junior college	PUC
	College, any college (graduate level and above) like Arts, Science, Commerce, etc.	C
	Industrial school	I
	Training school	Tr
	Adult literacy class/centre	Ac
	Other educational institutions, These includes Sanskrit Path-shala, Senior basic school, Makhtab, etc.	O
6 (Medical£ Amenities)	Hospital	H
	Maternity and Child welfare Centre	MCW
	Maternity home	MH
	Child welfare centre	CWC
	Health centre	HC
	Primary health centre	PHC
	Primary health sub centre	PHS
	Dispensary	D
	Family planning centre	FPC
	T. B. clinic	TB
	Nursing home	NH
	Registered private practitioner	RP
	Subsidised medical practitioner	SMP
	Community health worker	CHW
	Others	O
7. (Drinking water Amenities)	Tap water	T
	Well water	W
	Tank water	Tk
	Tubewell water	TW
	Handpump	Hp
	River water	R
	Fountain	F
	Canal	C
	Lake	L
	Spring	S
	Nallah	N
	Others	O
	Information not available	NA
8 (Post & Telegraph Amenities)	Post office	PO
	Telegraph office	TO
	Post & Telegraph office	PTO
	Telephone Connection	Phone
10 (Communi-cations)	Bus	BS
	Railway station	RS
	Navigable water-way (including river, canal, backwaters, etc.)	NW

Column No. (1)	Item (2)	Code (3)
11 (Approach to village)	Pucca road	PR
	Kaccha road	KR
	Navigable river	NR
	Navigable canal	NC
	Navigable water-way (other than river or canal)	NW
	Foot path	FP
13 (Power supply)	Electricity for domestic purposes	ED
	Electricity for agriculture	EAG
	Electricity for other purpose like industrial commercial, etc.	EO
	Electricity for all purposes	EA
16 (Irrigated by source)	Government canal	GC
	Private canal	PC
	Well (without electricity)	W
	Well (with electricity)	WE
	Tube-well (without electricity)	TW
	Tube-well (with electricity)	TWE
	Tank	Tk
	River	R
	Lake	L
	Waterfall	Wf
	Others	O
	Total	T
20 (Remarks including any place of religious, historical or archaeological interest)	Copies of the newspaper coming in the village	N
	Motorcycles/scooters available in the villages	M
	Cars/Jeeps available in the village	C
	Tractors available in the village	T

NOTE : *Where there are more than one institutions of the same type in the village the same have been indicated in figures against the appropriate abbrevations e. g. P (3), M (2), H (2).

£Where there are more than one institutions of the same type in the village, the same have been indicated in figures against the appropriate abbrevations e. g. H (2), D (3), etc,

NOTE : £Represents provisional geographical area figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represents paper area and are derived from the figures supplied by the Revenue Department.

Conversion Factor : 1 Acre = 0.40,469 hectares and 100 hectares = 1 km²
