CENSUS TABLES

OF THE INDIAN ADMINISTRATIVE SERVICE
DIRECTOR OF CENSUS OPERATIONS
KERALA

INTRODUCTORY NOTE TO PART C

Each District Census Handbook contains a general account of the district and its people, census tables and statistics on the area, houses, population, general amenties available in villages and towns and the distribution of population by industrial categories of workers and non-workers for each village, town and lower units. Each District Census Handbook is published in three parts as given below:

Part A—Town and Village Directory

Part B—Town and Village Primary Census Abstract

Part C—Census Tablese

Parts A and B relating to each districts were published together in one volume immediately after the 1971 census as soon as the data available. Part C was originally intended to include Administrative Statistic such as land-use and cropping pattern, livestock and poultries, details of police force, jails, local bodies, educational institutions, medical institutions etc. But since these data have already been published by the Directorate of Economics and Statistics, it was decided to drop the Administrative Statistics and the report thereon from Part C of the District Census Hand book and instead publish the Part C volume with the census tables pertaining to the district. Accordingly the Part C volume is now published showing all the important census tables.

Note: — 1. This table includes area, houses and population of forest area also.

2. Towns treated as such for the first time in 1961 census which continue as towns in 1971 census are shown with asterisk (*) on their left.

3. Towns treated as such for the first time in 1971 are printed in italics.

4. The following abbreviations have been used for the status of a town.
C—Corporation. M—Municipal. NM—Non-Municipal.

5. The area figures given in col. 3 for the districts represent provisional 'Geographical area' figures supplied by the Surveyor General, India. Figures for urban areas are those supplied by the local bodies. Area figures for rural areas are derived by subtracting the urban area figures form the total areas of the district. The total area figures of taluks will not tally with the district figures because the former represent 'land use area' and are derived from the figures supplied by the Director of Survey and Land Records. The area figures for Highland , Midland and Lowland are compiled by the census office.

6. The density figures per km² shown under column 4 for urban area of District/Taluk are worked out using the area figures corrected upto 2 places of decimals obtained by adding the area of individual town in the respective unit and not by using the area figures given in the table. For 'total' and 'rural' the density is worked out on area figures corrected upto 1 place of decimal
