DISTRICT CENSUS HANDBOOK
KOTTAYAM

PART X-C

CENSUS TABLES

K. NARAYANAN
OF THE INDIAN ADMINISTRATIVE SERVICE
DIRECTOR OF CENSUS OPERATIONS
KERALA

INTRODUCTORY NOTE TO PART C

Each District Census Handbook contains a general account of the district and its people, census tables and statistics on the area, houses, population, general amenities available in villages and towns and the distribution of population by industrial categories of workers and non-workers for each village, town and lower units. Each District Census Handbook is published in three parts as given below:

Part A - Town and Village Directory

Part B - Town and Village Primary Census Abstract

Part C - Present volume

Parts A and B relating to each district were published together in one volume immediately after the 1971 census as soon as the data became available. Part C was originally intended to include Administrative Statistics such as land-use and cropping pattern, livestock and poultries, details of police force, jails, local bodies, educational institutions, medical institutions etc. But since these data have already been published by the Directorate of Economics and Statistics, it was decided to drop the Administrative Statistics and the report thereon from Part C of the District Census Handbook and instead publish the Part C volume with the census tables pertaining to the district. Accordingly the Part C volume is now published showing all the important census tables.

Note:— 1. This table includes area, houses and population of forest areas also.

2. The following abbreviations have been used for the status of town, M—Municipal, NM—Non-municipal.

3. The area figures given in col. 3 for the district represent provisional, 'geographical area' figures supplied by the Surveyor General, India. Figures for urban areas are those supplied by the local bodies. Area figures for rural areas are derived by subtracting the urban area figures from the total area of the district. The total area figures of taluks will not tally with the district figure because the former represent 'land use' area and are derived from the figures supplied by the Director of Survey and Land Records. The area figures for Highland, Midland and Lowland are compiled by the Census Office.

4. The density figures per km² shown under column 4 for urban area of district/taluk are worked out using the area figure corrected up to 2 places of decimals obtained by adding the area of individual town in the respective unit and not by using the area figures given in the table. For 'total' and 'rural' the density is worked out on area figures corrected up to 1 place of decimal.

Note:- *Ponkunnam and Munnar were towns in previous censuses but declassified as rural in 1961 Census. In 1971 they were again declared as towns.

The present Palai town was known as Meenachil town in 1921, 1931 and 1941 Censuses.

The following abbreviations are used in col. 5 for denoting status of a town.
MC-Municipality including Cantonment, M-Municipality, NM-Non-municipal.

The total for any class in past censuses has been worked out as the total of towns of that particular class in that particular census. They include towns which might have been individually withdrawn from urban status in preceding or succeeding censuses. Except in cases where several towns merged into one in which class totals have been changed in regard to computed population of the unit and not the individual town.
