PREFACE

The District Census Handbooks were published for the first time in 1951 as part of the Census publication programme.

Each Handbook contained a general account of the district and its people, census tables and statistics on the area, houses, population, general amenities and distribution of population by livelihood classes for each village and town. The 1961 District Census Handbooks were a distinct improvement on the 1951 volumes. A uniform procedure was adopted for the preparation of the Handbooks. Each Handbook contained three parts as detailed below:

Part A. General, dealing with a general introduction about the district, its progress on various fields of general amenities since 1951 and an analysis of population by various demographic characteristics.

Part B. Census data, dealing with the Census Tables of 1961 pertaining to the district.

Part C. Village/Town Directory, dealing with the amenities, Primary Census Abstract down to the level of karas/muris/desoms in the case of rural areas and blocks and wards in the case of urban areas and number of industrial establishments by type.

District and taluk maps were also incorporated in each District Census Handbook.

In 1971 also it has been decided to adopt more or less the same pattern and publish the District Census Handbooks in three parts as given below:

Part A. Town and Village Directory

Part B. Village and Town Primary Census Abstract

Part C. Administrative Statistics and Report

It is proposed to print and publish Parts A and B relating to a district in a single volume with a view to making it available to the public as soon as the information is collected and compiled. Part C will be printed as a separate volume.

The collection and compilation of data for Part A were done by the Office of the Director of Census Operations, Kerala through specially designed schedules for villages and towns. The information on rural areas was furnished by the Tahsildars and on the urban areas by the concerned Municipal/Corporation Commissioners. While Part B of the Handbook presents the Village and Town Primary Census Abstract, Part C gives the Report and Administrative Statistics processed from information collected from the various Central and State Government Offices.

A special feature of the publication of the Handbook in 1971 is the presentation of Primary Census Abstract not only for villages but also for the panchayats. This is the first time that an attempt has been made to present panchayat-wise figures. The additional work involved in the new venture is more than justified in view of the growing importance of panchayats in administration.

On the recommendation of Registrar-General, India, the Government of Kerala have agreed to bring out these volumes as State Government publications and issued orders in G.O. MS. No. 199/70/PD., dated 17th June 1970. The printing of the Handbooks was undertaken by the Superintendent of Government Presses, Trivandrum.

This volume gives the population figures of Kottayam District as on 1st April 1971. On 26th January 1972 a new district known as Idikki was formed taking regions from the Ernakulam and Kottayam Districts. The changes have been mentioned at the appropriate places of this volume.

It is not possible to have compiled a book of this kind without the co-operation and goodwill extended by the various State and Central Government Offices. I am grateful to them for their co-operation. The District Census Handbook section of my office functioned under the direct control of Shri B. T. Pillai, Deputy Director of Census Operations (Tabulation) and he was assisted by a Tabulation Officer and necessary staff. Shri S. Jayashanker was the Tabulation Officer in charge of the section at the time of addressing the various departments for collection of information. At the time of compilation of the District Census Handbook Smt. C. Kamalam took charge as the Tabulation Officer. I feel very happy in acknowledging the valuable contributions made by these officers and other members of the staff in my office, especially Smt. K. Sulabhamma, Statistical Assistant and Shri G. Sivadasan, Smt. M. Premakumari Amma, Assistant Compilers in the compilation of this important work. Sarvashri K. Krishna Pillai and R. Prabhakaran have prepared the maps included in this volume.

I would like to place on record my deep sense of gratitude to Shri P. Kurien John, Superintendent of Government Presses for the warm co-operation extended by him for the timely printing of the Handbook. I also wish to place on record my appreciation of the excellent work done by Shri M. Hariharasubramania Iyer, Deputy Superintendent, Government Press, Ernakulam and his efficient colleagues in executing the printing of this book neatly and in record time.

I shall be failing in my duty if I do not place on record my gratefulness to Shri A. Chandra Sekhar, I.A.S., Registrar-General for the valuable guidance and help extended to me in this work.

Trivandrum,
25th December 1973.

K. NARAYANAN,
Director of Census Operations.

PART A

TOWN AND VILLAGE DIRECTORY

INTRODUCTION

This part comprises Town and Village Directory of Kottayam District. The Town Directory furnishes data for each town in the district in respect of the status of the town administration, its origin, growth of population, functional category of the town, physical aspects and location, latest municipal finance, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities. The Village Directory includes details of amenities available in each village in respect of educational and medical institutions, power supply, drinking water supply, post and telegraph, communications, weekly markets, places of religious, historical or archaeological interest and particulars of land use.

2. The details were furnished by the Tahsildars and the Commissioners of Municipalities and compiled and processed at the office of the Director of Census Operations.

Census town

3. Owing to the growing importance of urbanisation, the 1961 Census laid down a uniform three-fold-criteria for classification of places as towns. Corporations, Municipalities, Cantonments and Townships were automatically recognised as towns. The following were the three criteria adopted for treating the other areas as towns:—

(i) Places with a minimum population of 5,000 persons;

(ii) A density of not less than 1,000 persons per sq. mile;

(iii) At least 75 per cent of the male population should follow non-agricultural livelihoods.

However, places which did not satisfy the above criteria but had definite urban characteristics like newly established industrial areas, large housing settlements, places of tourist and pilgrim importance etc. were also treated as towns as exceptional cases on the recommendation of the State Government. The definition of Census town remained more or less the same in 1971.

4. There are nine towns in Kottayam District, viz. Changanacherry, Ettumanoor, Kanjirappally, Kottayam, Mundakkayam, Munnar, Palai, Ponkunnam and Vaikom. Of these Changanacherry, Kottayam, Palai and Vaikom are municipal towns while the others are towns declared as such for census purposes. Two towns viz. Munnar and Ponkunnam were declared as towns in 1971 Census. Though Ponkunnam did not strictly satisfy the criteria laid down for classification of towns, as a special case, it was classified as a town on the recommendation of the State Government. Since the 1961 Census, there has been an increase in the jurisdiction of Palai municipalities. The following table gives the list of census towns in 1961 and 1971.

Standard urban area

5. The 1961 Census reports contained particulars of town-groups. These town-groups were formed with a view to identifying functionally linked urban areas, urban spills beyond the administrative boundaries and metropolitan conurbation. In most cases the town-groups did not bring out spatially contiguous territory of urban rural settlements. Therefore, in 1971, the 'town-group' concept was given up and a new concept of 'Standard Urban Area' was evolved. The Standard Urban Area may be defined as the projected growth area of a city or a town as it would be in 1991 taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. All municipal towns with an estimated population of 50,000 or more by 1971 were considered to be treated as Standard Urban Areas. The demarcation of standard urban area was jointly done by the Town Planning Department of the Government of Kerala, Office of the Director of Census Operations, Kerala, Office of the Registrar-General, India and the Central Town and Country Planning Organization, New Delhi. There are two standard urban areas in Kottayam District viz. Kottayam and Changanacherry. The standard urban area of Kottayam is the area covered by Kottayam municipality, and the peripheral villages with urban potentialities and that of Changanacherry is the area covered by Changanacherry municipality and rural portion of Vazhappally East and Changanacherry villages. The constituent units of the standard urban areas are given below:

TOWN DIRECTORY

6. The Town Directory is presented in the form of six statements.

Statement I

7. This statement gives the civic administration status, population from 1901 to 1971 and the predominant functional category of each town for 1961 and 1971.

8. The functional character of a town was decided in 1961 as per the following procedure. In 1961 the workers were grouped under nine industrial categories as shown below:

I Cultivators

II Agricultural labourers

III Mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities

IV Household industry

V Manufacturing other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services.

These nine industrial categories of workers were first grouped as:—

(i) Agriculture and its allied activities (Categories I, II and III).

(ii) Industries including construction (Categories IV, V and VI)

(iii) Trade and commerce (Category VII)

(iv) Transport, storage and communications (Category VIII) and

(v) Other services (Category IX)

The percentage of workers in each of the above five groups to the total workers in the town was worked out. If any one single group takes in 40 per cent or more of the total workers, that town will be designated by the corresponding function, viz., primary activity for the first group, industrial for the second, commercial for the third, transport for the fourth and service for the fifth group. If the highest percentage is less than 40, then the next predominant group is added. If the two groups together take in a minimum of 60 per cent of the total workers, the town will then be designated by both the functions, e.g. industrial-cum-transport. When the sum of the two groups does not reach 60 per cent then the third predominant group is taken into account and the town is designated by all the three functions.

9. The same procedure is followed in deciding the predominant functional character of the town in 1971 also. It must, however, be pointed out that in 1971 Census the workers were grouped under slightly different nine industrial categories. They are:

I Cultivators

II Agricultural labourers

III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities

IV Mining and quarrying

V Manufacturing, processing, servicing and repairs

(a) Household industry

(b) Other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services.

The above categories are grouped as:

(i) *Primary activity*.—Agriculture and its allied activities (Categories I, II, III and IV)

(ii) *Industrial*.—Industries including construction [Categories V (a), V (b) and VI]

(iii) *Commercial*.—Trade and commerce (Category VII)

(iv) *Transport*:—Transport, storage and communications (Category VIII)

(v) *Service*.–Other services (Category IX)

Based on the above criteria the towns of this district have been classified into the following functional categories.

TABLE 3

FUNCTIONAL CATEGORY OF TOWNS, 1971

Functional category	Name of town (s)
1	2
Primary activity	Kanjirappally, Mundakkayam, Ponkunnam
Primary activity-cum-service	Ettumanoor
Service-cum-industrial	Munnar
Primary activity-cum-service-cum-industrial	Palai, Vaikom
Service-cum-commercial-cum-industrial	Changanacherry, Kottayam

Statement II

10. The second statement gives the location and physical aspects of the town. It also furnishes details of the nearest railway station, Navigable river/canal, seaport etc. The bus route and road facilities available in each town are also given in the statement. There is no sea port with in the district. The nearby seaports are Alleppey and Cochin. Kottayam is the district and taluk headquarters. The distance of the other towns from Kottayam have also been indicated in the statement. Railway facilities are available for the towns Changanacherry, Ettumanoor and Kottayam with in its limits.

Statement III

11. The third statement gives an idea of the municipal finance of the municipalities in the district. It has been possible to present the statement of receipt and expenditure for the year 1969–70 obtained from the Municipal Commissioners of Changanacherry, Kottayam, Palai and Vaikom Municipalities. In respect of the other towns which are not municipal towns, the figures could not be furnished. Table 4 gives the per capita receipt and expenditure of the municipalities in the district.

Medical Facilities

18. Under medical facilities details of both public and private institutions are given. Almost all the villages in the district have got medical facilities of one kind or the other. The table below gives the number of medical institutions per 100 sq. km. of area in each taluk.

Communication Facilities

19. From the point of view of communications it is seen that though all the villages in the district are served by pucca roads only 6 villages have railway facilities within 2 km. The following table gives the distribution of villages by the distance from the nearest railway station.

Land Utilization

21. For the first time an attempt has been made to collect data on land utilization. For this purpose the total area has been classified into 5 types viz. (1) Forest area (2) Irrigated land (3) Unirrigated land (4) Culturable waste and (5) Area not available for cultivation. The pattern of land use in the various taluks of this district is approximately brought in the following table.

TABLE 10

22. An abstract showing the educational, medical and other facilities available in the rural areas of each taluk and the district is also presented in this volume.

Definitions

23. The definitions of certain terms adopted are furnished below:

I. Classification of electrical energy (adopted by Kerala State Electricity Board)

Domestic: Lights and combined installations of lights and fans and radios for domestic and non-commercial purpose. Domestic consumers and non-commercial institutions whose connected loads other than that of lights and fans exceed 1 KW and domestic heat and small power including refrigeration, cookers, sewing machines and other appliances for domestic use up to and including 3 H. P.

Industrial: Power at 400 Volts or lower which includes industrial general purposes i.e. power supply for electric boilers, large cookers, ovens etc.

Commercial: This includes display lighting, neon signs, photography, commercial and non-domestic heat and small power load up to and including 3 H. P. and cinematograph and motion picture studios.

Road lighting: Public lighting including light houses, main lamps, street lights installed in private institutions where Board's lines exist.

Statement IV

1.12. Statement IV indicates the civic and other amenities available in the town i.e., details on system of sewerage, method of disposal of night-soil, drinking water facilities, electrical facilities etc. All the towns are electrified. Kottayam Municipality alone has got the facility of fire fighting service. Most of the towns are served by various types of protected water supply schemes.

Statement V

13. Medical, educational, recreational and cultural facilities available in the various towns are furnished in this statement. All the towns have got medical and educational facilities. The Kottayam Medical College is situated at Arpookara in Kaipuzha village about 11 km. from the Kottayam municipality. Taking into consideration all the medical institutions (other than private institutions) there are 1497 beds in the urban areas of the district. This works out to an average of 7 beds per 1,000 population as against 8 beds per 1,000 population in Trivandrum District.

14. The school educational system adopted in Kerala is as follows. At present the duration of School course is 10 years; standards I to IV constitute the Lower Primary section while standards V to VII constitute the Upper Primary (Middle) Section. The Secondary (High) School section has standards VIII, IX and X.

Statement VI

15. Statement VI gives details in respect of trade, commerce, industry and banking.

VILLAGE DIRECTORY

16. The Village Directory gives details in respect of medical, educational, electrical and drinking water facilities available in the villages besides giving an idea of the pattern of land use in the villages. The area of each village, in square kilometres is also indicated in the Village Directory. In this connection it may be pointed out that the area figures were collected from the Tahsildars as well as from the Director of Survey and Land Records. In a few cases it is seen that the area of the village as given by the Tahsildars do not agree with the area furnished by the Director of Survey and Land Records. Since the break-up of the area of villages according to type of land use is presented in this part and since this information can be furnished only by the Tahsildars the area-figures as given by the Tahsildars are adopted. In Part B of the District Census Handbook where the Primary Census Abstract is presented down to the village level the area of villages as furnished by the Director of Survey and Land Records is adopted. The following table gives distribution of villages by size.

Educational Facilities

17. The extent of educational facilities available in the villages can be studied more profitably with the following table. It gives the categorisation of villages according to the distances from the nearest town. The number of villages having primary schools, middle schools, high schools and colleges are also indicated. Eight villages have colleges, 75 villages have high schools and 91 villages have middle schools.

Agricultural: Powers at 3 H.P. and above—power used for dewatering and lift irrigation and poultry, livestock farms under Animal Husbandry Department come under this category.

Others:

1. Power at 11 KV for industrial purposes
2. Power for extra-high tension consumers
   (i) 66 KV—Power intensive
   (ii) 66 KV—Non-power intensive
   (iii) 110 KV—Power intensive
   (iv) 110 KV—Non-power intensive
3. Temporary illumination including exhibition.

II. – Land use pattern.

Forest: This includes all actually forested areas on the lands classed or administered as forests under any legal enactment dealing with forests whether state owned or private:

Irrigated and unirrigated lands: This covers all agricultural lands and includes net area sown with crops and orchards and also current and other fallows. The fallow lands include all lands which were taken up for cultivation for a period of not less than one year and not more than five years. In case of irrigated land sources of irrigation are canal, tank, well, tube well etc.

Culturable waste: This includes lands available for cultivation, whether or not taken up for cultivation or abandoned after a few years for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category. Lands under thatching grasses, bamboo bushes and other groves for fuels, which are not included under orchards or forests shall also come under this head. All grazing lands, whether they are permanent pastures and meadows or not; village common and grazing lands within forest areas are included in this category.

Area not available for cultivation: This includes lands not available for cultivation such as barren, uncultivable and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water e.g. rivers and canals, and other lands put to uses other than agricultural. Barren and unculturable land covers all barren and unculturable lands, like mountains, deserts etc. Lands which cannot be brought under cultivation unless at a high cost are classified as uncultivable whether such land is in isolated blocks or within cultivated holdings.

INTRODUCTION

Situation and administrative units

Kottayam district is bounded on the north by the Ernakulam and Trichur Districts and Coimbatore district of Tamil Nadu on the east by the natural barrier of western Ghats and by the Madurai, Ramanathapuram and Tirunelveli districts of Tamil Nadu, on the south by Quilon and Alleppey districts and on the West by Alleppey district. This district lies between north latitudes 9° 15′ and 10° 21′ and east longitudes 76° 22′ and 77° 25′. This district has got 8 taluks viz., Devicolam, Udumbanchola, Peermade, Meenachil, Vaikom, Kottayam Kanjirappally and Changanacherry. There are 101 revenue villages and 9 towns in the district. Of the nine towns viz., Munnar, Palai, Vaikom, Ettumanoor, Kottayam, Ponkunnam, Kanjirappally, Mundakkayam and Changanacherry, 4 are municipalities, and the others are non-municipal towns declared as such for census purposes. There are 13 development blocks and 98 panchayats in the district as on 1st April 1971. The following table gives the details of the administrative units of the district:

Area and physical features

2. The total extent of Kottayam district as furnished by the Surveyor General, India is 6389·0 km² the largest district in the State. As far as the district-wise area figures are concerned, the figures furnished by the Surveyor General, India have been adopted, while, for the taluks, the figures furnished by the State Director of Survey and Land Records have been presented in this part. Area of municipalities were obtained from the local bodies.

3. Based on the physical features, the entire State is divided into three natural divisions viz. (i) the mountainous region—Highland (ii) the flat coastal belt—Lowland and (iii) the undulating area in between the above two regions—Midland. The classification into natural divisions is as follows. The region which lies below 25 feet above the mean sea level is classified as lowland, between 25 feet and 250 feet above mean sea level as midland and the remaining region which is covered by forests and mountains as highland. Devicolam, Udumbanchola, and peermade taluks lie entirely in highland region, where as Meenachil and Kanjirappally taluks lie in highland and midland regions and Vaikom, Kottayam and Changanancherry taluks in midland and lowland regions. The following table gives the population of the district by natural divisions:

Population and growth rate

4. The census enumeration was originally programmed to commence on 10th February and end on 28th February 1971, the reference date for the census being the sunrise of 1st March 1971. The mid-term Elections to the fifth Parliament made it necessary to postpone the census enumeration by a month. The enumeration, therefore, commenced on the 10th March and ended on 31st March 1971 with the reference date as the sunrise of 1st April 1971. The population of Kottayam District as at the sunrise of 1st April 1971 is 2,085,134 of which 1,054,965 are males and 1,030,169 are females. The net addition to the population of the district between 1961 and 1971 is 358,777 thereby recording a decennial growth rate of 20·78% during the decade as against the State growth rate of 26·29%. The rate of growth recorded during the previous decade 1951–61 was 30·59%. The table given hereunder shows the population of the district from 1901 onwards and the decennial growth rates.

5. Among the taluks of the district, Udumbanchola has the highest growth rate of 70·27% whereas Devicolam, the largest taluk in area ranks last in growth rate with 9·09%. Highest percentage of population of the district is claimed by Kottayam taluk with 23·84% the last being Devicolam with 6·44%. Table 4 below furnishes taluk-wise population and decennial growth rate:

Rural-urban distribution

6. Owing to the growing importance of urbanisation the 1961 Census laid down a uniform three-fold-criteria for classification of places as towns. Corporations, Municipalities, Cantonments and Townships were automatically recognised as towns. The following were the three fold-criteria adopted for treating the other areas as towns:

(i) Places with a minimum population of 5,000 persons,

(ii) A density of not less than 1,000 persons per sq. mile (400 persons per sq. km.) and

(iii) At least 75 per cent of the male population should follow non-agricultural livelihoods.

However, places which did not satisfy the above criteria but had definite urban characteristics like newly established industrial areas, large housing settlements, places of tourist and pilgrim importance etc. were also treated as towns as exceptional cases on the recommendation of the State Government. The definition of census town remained more or less the same in 1971.

7. There are 9 towns in Kottayam district viz. Munnar, Palai, Vaikom, Ettumanoor, Kottayam, Ponkunnam, Kanjirappally, Mundakkayam and Changanacherry. Of this Munnar and Ponkunnam are new towns in 1971 when compared to 1961. Though Ponkunnam did not strictly satisfy the criteria laid down for classification of towns as a special case, it was declared, as a town on the recommendation of the State Government. Since the 1961 census, there has been an increase in the jurisdiction of Palai municipality. All the above nine towns together take in 10·22 per cent of the total population of the district. The following table presents the rural-urban distribution of population of Kottayam district.

Density of population

9. The density of population of the district has increased from 270 persons per sq. km. in 1961 to 326 persons in 1971. The same trend is also noticed in all the taluks. Changanacherry taluk has got the highest density with 1013 persons per sq. km. in 1971 and Devicolam taluk has the lowest with 76 persons per sq. km. The taluk-wise density is given hereunder.

Sex-ratio

10. Sex-ratio (defined as the number of females per 1,000 males) of the district shows a fluctuating trend from decade to decade. Taking the population of the district as a whole in all the decades from 1901 to 1971 males out number females. The same trend is noticed in rural and urban areas also. The table below gives the sex-ratio of the district for the period 1901–'71.

Literacy

13. According to 1971 census, this district has got a literacy rate of 67·72 per cent as against the State rate of 60·42 per cent. The literacy rate of the district has increased from 56·56 per cent in 1961 to 67·72 per cent in 1971. The same trend is noticed in the case of males and females also and in all the taluks. Among the taluks, Kottayam has got the highest literacy rate of 75·43 per cent, the lowest being in Devicolam taluk with 44·41 per cent. The following table gives the taluk-wise literacy rates of the total population, males and females.

Occupied residential houses and households

15. Occupied residential houses have shown an increase of 14·12 per cent in the district during the last ten years as against the State rate of 21·93 per cent. Among the taluks, Udumbanchola has registered a growth of 50.32 per cent in the number of occupied residential houses. In the case of Devicolam taluk there is a decrease of 6·96 per cent during the decade 1961–71. In this taluk, the decrease is conspicuous in the K.D. Hills village—a predominantly plantation area. The improved agricultural practices introduced in tea plantations have resulted in a substantial saving of labour during the decade. Hence the vacancies caused by the retirement of labourers on superannuation or on option to receive the benefit of liberalised gratuity were not filled up by the management. It also happened that the census count was taken in March-April when there is a slackening of work in the estates and labourers are encouraged to take their annual leave to visit their native places in Tamil Nadu. The above factors have contributed to a reduction in the number of occupied residential houses in the taluk. The rural-urban distribution of occupied residential houses is given in the following table:—

Working population

21. The total number of workers in the district as per 1971 Census count is 619,613 of which 494,382 are males and 125,231 are females. 29·72 per cent of the total population is returned as workers. The work participation rates of males and females are 46·86 per cent and 12·16 per cent respectively. The percentage of workers to total population shows a decline from 32·62 in 1961 to 29·72 in 1971. The same trend is noticed in all the taluks of the district. The decline in the percentage of working force to a large extent would be attributable to the definition placed on the term 'worker' in the 1971 Census.

22. In 1971, a worker was defined as a 'person whose main activity is participation in any economically productive work by his/her physical or mental activity' whereas in 1961 Census a worker was taken to mean a person who engaged himself/herself in any economically productive work without regard to his/her main activity. According to the 1971 definition 'a man or a woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or girl who is primarily a student attending an institution, even if such a person helps in the family economic activity, but not as a full-time worker should not be treated as a worker for the main activity. Such participation in economically productive work was regarded as secondary work of the particular person'. But such categories of persons, were classified as workers during 1961 Census. In 1961, in the case of regular employment in any trade, profession, service, business or commerce a person was taken as a worker if he was employed during any of the fifteen days, preceding the day on which he was enumerated. But in 1971 Census the reference period was only one week prior to the date of enumeration in the case of regular work in trade, profession, service etc. The data relating to the secondary work and the results of the survey regarding the comparability of economic questions in 1961 and 1971 Censuses will throw some more light on the decline of the working force in 1971. The following table gives the workers and work participation rates for the district and taluks.

Scheduled Castes and Scheduled Tribes

20. As per the 1971 Census count the Scheduled Castes and Scheduled Tribes population are 182,071 and 23,172 respectively. The corresponding figures for 1961 are respectively 157,287 and 21,391. The following table gives the Scheduled Castes and Scheduled Tribes population and their percentages to total population in the district and taluks for 1961 and 1971.

24. The total population has been divided broadly into two viz., workers and non-workers. The workers have been furthur divided into industrial categories. In 1961 the workers were grouped under nine industrial categories as shown below:—

I Cultivators
II Agricultural labourers
III Mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities
IV Household industry
V Manufacturing other than household industry
VI Construction
VII Trade and commerce
VIII Transport, storage and communications
IX Other services

In 1971 Census, the workers were grouped under slightly different nine industrial categories. They are:

I Cultivators
II Agricultural labourers
III Live-stock, forestry, fishing, hunting and plantations, orchards and allied activities
IV Mining and quarrying
V Manufacturing, processing, servicing and repairs
(a) Household industry
(b) Other than household industry
VI Construction
VII Trade and commerce
VIII Transport, storage and communications
IX Other services

25. Among the total workers 24·31 per cent are cultivators and 26·02 per cent are agricultural labourers. 29·86 per cent of the male workers are cultivators and 23·26 per cent are agricultural labourers, while among females 36·89 per cent are agricultural labourers and 2·40 per cent are cultivators.

26. The following table gives the distribution of workers of the district into nine industrial categories by sex.

* This represents ' Geographical area ' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by subtracting the urban area from the total area of the district. The total of the area figures of the taluks will not tally with the district figure because the former represents ' land use ' area and are derived from the figures supplied by the Director of Survey and Land Records.

† This taluk forms part of Idikki District with effect from 26th January 1972.
