1951 DISTRICT CENSUS HANDBOOK

KOLHAPUR DISTRICT

Kolhapur is a newly created district, with an area of 2756.3 square miles, according to the area figures furnished by the Surveyor General of India formed after the merger of Kolhapur and other Indian States with the State of Bombay.

It consists of 956 villages of the former Kolhapur State, five villages of the former Kurundwad State, one village of the former Miraj Senior State, and seven villages that were formerly in Belgaum district.

This Handbook contains tables for Kolhapur district, compiled after the 1951 Census of India. The main results of the 1951 Census are embodied in the State Tables published for the States of Bombay, Saurashtra and Kutch. In this handbook the data are exhibited in greater detail. The numbers given to tables in this publication correspond to those given in the State Census Report. The following tables for the district have, however, not been included in this Handbook :—

A-II.—Variation in population during fifty years.

A-IV—Towns classified by population with variations since 1901.

D-IV—Migrants.

In the E Summary table some columns have been omitted.

In the case of the C-series of tables the data were extracted on the basis of a sample count of approximately 10% of the census slips instead of a full count of all the slips.

In 1941, the population figures were exhibited according to communities in the 'Village Handbook' published by the Government of Bombay. In 1951, the basis of classification at the census was changed from a social to an economic one, and the figures for villages given in the Primary Census Abstracts and in tables A-V, B-I, B-II, C-II, and E are according to the following eight livelihood classes :—

Agricultural Classes

I. Cultivators of land, wholly or mainly owned; and their dependants.

II. Cultivators of land, wholly or mainly unowned; and their dependants.

III. Cultivating labourers, and their dependants.

IV. Non-Cultivating owners of land; agricultural rent receivers; and their dependants

Non-agricultural Classes

Persons (including dependants) who derive their principal means of livelihood from :—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other Services and Miscellaneous sources.

Dependants, whether earning or non-earning, were classified at the census according to the principal means of livelihood of the persons on whom they were dependent.

The Primary Census Abstracts, which contain basic information in respect of every village and town, have been arranged according to talukas and petas, units into which every district is divided for administrative purposes. The taluka was, however, too small a unit to adopt for preparing the main census tables. Therefore, in the B, C and D-series of tables figures have been given for tracts and not for talukas and petas. Before sorting the census slips and tabulating the results, tracts were formed by combining the rural and urban areas of two or more talukas or petas.

The tracts into which Kolhapur district was divided for the purpose are shown below :—

Rural tracts

(1) Rural areas of Karvir and Kagal talukas.

(2) Rural areas of Hatkanangale and Shirol talukas.

(3) Rural areas of Gadhinglaj and Bhudargad talukas and Ajra Peta.

(4) Rural areas of Radhanagari and Shahuwadi talukas and Bavada and Panhala petas.

Urban tracts

(1) Kolhapur City.

(2) Urban areas of Hatkanangale, Shirol and Shahuwadi talukas and Panhala peta.

(3) Urban areas of Kagal and Gadhinglaj talukas and Ajra peta.

Urban areas comprise the cities and towns shown in table A-V.

Shortly before the 1951 population census, a census of Small Industries was taken, and the results of this census are given in the table called 'Small scale Industries Census-Employment in Establishments', included in this handbook.

11. Shirol ...	203·8	44	4	18,066	13,758	4,308

Notes :—1. The area figures given in column 2 of this table and the E—Table have been obtained from the Land Records Department or from local records.

2. The number of villages shown in column 3 is the number of revenue villages excluding uninhabited villages and villages which form part of Municipal areas.

3. The number of towns given in column 4 is the number of cities and towns shown in table A-V. In general, a town means a municipal area, cantonment area, or a place which has a population of 5,000 or more inhabitants and which exhibits urban characteristsics.

4. The number of occupied houses given in columns 5, 6, & 7 is the number of census houses that *were occupied at the time of the census.*

A house for census purposes meant "a dwelling with a separate main entrance". Thus more than one household might be found in the same census house.

DISTRICT INDEX OF NON-AGRICULTURAL OCCUPATIONS

KOLHAPUR DISTRICT.

This index gives the number of self-supporting persons, males and females, having as their principal means of livelihood the main productive occupations that are found in the district The number of persons following miscellaneous occupations not given in this index was males–82 and females–16. The list of miscellaneous occupations includes, amongst others, the following occupations :—charcoal burners, contractors, gas-lamp and umbrella repairers, share-brokers and wine merchants. This index should be read with the B—III Table. 2,458 self-supporting persons derived their principal means of livelihood from unproductive activities as mentioned in the note to that table.

The group code numbers shown in column '2' of the index are the numbers given to the various occupations under the Indian Census Economic Classification Scheme.

Primary Census Abstracts.

These abstracts show figures of population according to eight livelihood classes for every city, town and village. In the case of Kolhapur City and most municipal areas, figures have been given for wards as well. These abstracts are in essence a village directory, with the data exhibited according to livelihood classes, instead of communities as in 1941.

The area figures given in column 3 have been obtained from the Land Records Department. In some cases, figures were unfortunately not available. The total rea of Kolhapur district as calculated by the Surveyor General, India, is 2756.3 Sq. m les.

The figures given in columns 4 and 5 and 9 to 12 have been extracted from the National Registers, prepared by enumerators after the census. These Registers consisted of a transcription of the replies to the more important census questions in respect of every person enumerated. Figures of literates according to tracts, derived from the census slips, shown in table D-VII, are more reliable than the village figures derived from the National Registers. The census slip on which the replies to the census questions were recorded was the main document. The National Register was merely a copy. In addition, mistakes seem to have occurred while extracting literacy figures for villages in the Tabulation Office. The percentage of literacy in the district was 12.52% according to table D-VII, a figure which differs only by 0.33% with the figure of 12.85% derived from sorting the 10% sample slips, while the literacy figure according to the Primary Census Abstracts was 11.7%.

Information contained in columns 29 to 33 has been extracted from the data collected for each village by the Bombay District Gazetteers (Revision) Editorial Board.

The following abbreviations have been used in the abstract :—

M.	for	Municipality
P. S.	for	Primary School
V. P.	for a	Village Panchayat
C. C. S.	for a	Co-operative Credit Society
C. S.	for a	Co-operative Society of any other kind.
